Ning Xie, *Associate Professor*

The Knight Foundation School of Computing and Information Sciences offers five Master of Science degrees and a Doctor of Philosophy degree. The Master of Science in Computer Science degree provides study in state-of-the-art computer applications as well as an introduction to the theoretical foundations of computer science. The Master of Science in Information Technology is intended to educate students in the technical aspects of information. The Master of Science degree in Telecommunications and Networking is intended to provide study in state-of-the-art telecommunications and networking technologies and management. The Master of Science in Cybersecurity includes student learning outcomes that address cybersecurity from several complementary perspectives. The Master of Science in Data Science provides broad and deep technical training in data science, with specialization in several key application areas of importance to industry. The Doctor of Philosophy in Computer Science is designed to provide study in all major areas of computer science while leading to the frontiers of knowledge in a chosen field of concentration.

Master of Science in Computer Science

Admission

The following are in addition to the University's graduate admission requirements:

1. A Bachelor's Degree or equivalent in Computer Science from an accredited institution. A degree in a related field is acceptable if the applicant shows evidence of computer science background suitable for entry into the master's program as judged by the Graduate Committee.
2. Foreign students whose native language is not English must score at least 550 on the paper-based (or 80 on iBT) in the Test of English as a Foreign Language (TOEFL).

Required Courses

1. Required coursework: 9 credits

COT 5407	Introduction to Algorithms	3
Choose two from the following:		
CEN 5011	Advanced Software Engineering	3
COP 5725	Principles of Database Management Systems	3
COP 5614	Operating Systems	3

2. Elective coursework

- a. non-thesis option: 21 credits of elective courses
- b. thesis option: 15 credits of elective courses and 6 credits of master's thesis

Elective courses can be selected from SCIS Graduate Course Offerings.

No grade below "C" will be accepted in any course taken to satisfy graduate program requirements.

Thesis Option

CIS 6970	Thesis	6
----------	--------	---

After completion of the other required courses, the student must conduct a research thesis. The topic must first be approved by the faculty member who will supervise the research and then by the Thesis Committee. The thesis

will be accepted only after being read and approved by a Thesis Committee. An oral defense is required before the Thesis Committee.

Combined BS/MS in Computer Science Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Current enrollment in the Bachelor's Degree program in Computer Science at FIU.
2. Completed at least 75 credits of coursework.
3. Current GPA must be 3.3 or higher.
4. Complete the separate Combined Degree Pathway application, including signed approval by the director or designee from the graduate program.

General Requirements

The FIU Bachelor's degree in Computer Science must be awarded before the Master's degree.

Coursework

Required Courses

COT 5407	Introduction to Algorithms	3
Choose two from the following:		
CEN 5011	Advanced Software Engineering	3
COP 5725	Principles of Database Management Systems	3
COP 5614	Operating Systems	3

Elective

7 courses selected from the SCIS Graduate Course Offerings.

No grade below "C" will be accepted in any course taken to satisfy graduate program requirements.

Overlap

Up to 4 courses (12 credits) may be used in satisfying both the Bachelor's and Master's degree requirements. All overlapping courses must be approved by both graduate and undergraduate program directors before students are enrolled in such courses.

The courses must be regular 5000-level computer science graduate courses intended for graduate majors.

Master of Science in Cybersecurity

The MS-Cybersecurity program will include student learning outcomes that address cybersecurity from several complementary perspectives:

1. Students will gain practical, hands-on skills in current "best practices" in cybersecurity, such as configuring firewalls and writing secure web applications, while also understanding their limitations.
2. Students will gain deep knowledge of the principles of the emerging science of cybersecurity, enabling them to understand and even design solutions with rigorously-provable security guarantees.
3. Students will gain understanding of the broader human context of cybersecurity, enabling them to consider and address its social, economic, political, and psychological implications.
4. Students will gain deeper knowledge of specific areas in cybersecurity through their selection of elective courses.

Admission Requirements

The following are in addition to the University's graduate admission requirements.

1. A Bachelor's degree from an accredited institution in Computer Science, Computer Engineering, Information Technology, or a similar discipline.
2. Foreign students whose native language is not English must score at least 550 on the paper-based (or 80 on iBT) in the Test of English as a Foreign Language (TOEFL).

Required Courses

The students are required to earn 30 credits from 10 courses, including 5 core courses and 5 elective courses chosen from an approved set of electives.

Core Courses (15 credits)

CEN 5079	Secure Application Programming	3
CIS 5208	Social, Economic, and Policy Aspects of Cybersecurity	3
CIS 5370	Principles of Cybersecurity	3
CNT 5415	Practical Applied Security	3
COT 5428	Formal Foundations for Cybersecurity	3

Elective Courses (15 credits)

List of courses is maintained by the Knight Foundation School of Computing and Information Sciences and the Department of Electrical and Computer Engineering.

Master of Science in Data Science

The Master of Science in Data Science is an interdisciplinary program that provides broad and deep technical training in data science, drawing on faculty expertise from five different colleges across the FIU campus, allowing for specialization in several key application areas of importance to industry, and training students from a wide variety of disciplines. The program is aimed at students with sound analytical skills holding a Bachelor's degree in Computer Science, Computer Engineering, Statistics, Healthcare Management, Management Information Systems, Hospitality Management, or related disciplines. The program will have a common core involving four courses in Computing and Statistics plus a Capstone course. The Elective courses are offered as separate specialization tracks to prepare students to become data scientists in areas such as Computational Data Analytics, Business Data Analytics,

Hospitality Data Analytics, and Biostatistics Data Analytics. The program will prepare students with professional experience for the marketplace. The Capstone course will pursue a discipline-specific and industry-relevant project in data analytics.

Admissions Requirements

The following requirements are in addition to the University's graduate admission requirements.

1. Bachelor's degree in a discipline appropriate for the specialization sought. For example, a specialization in **Computational Data Analytics** requires a Bachelor's degree in Computer Science, Computer Engineering, Information Technology, Mathematics, Statistics, or a related discipline. Students seeking to specialize in other tracks would require an appropriate Bachelor's degree.
2. GRE general test score with a minimum quantitative score of 148.
3. Three letters of recommendation

Required Courses

Students are required to complete 30 credits of graduate level courses. Included in the program are 12 credits of core courses, 15 credits of elective courses, and 3 credits of a capstone course.

Core Coursework (12 credits)

Students must complete these four courses.

CAP 5768	Introduction to Data Science	3
COP 5771	Principles of Data Mining	3
STA 6244	Data Analysis I (or equivalent)	3
STA 6247	Data Analysis II (or equivalent)	3

Students in the Biostatistics Data Analytics track may replace STA 6244 and 6247 with PHC 6052 and 6091, respectively.

Required Capstone Course (3 credits)

Students in each track must complete three credits of capstone course involving a data analytics project.

IDC 6940	Capstone in Data Science	3
ISM 6930	Topics in Management Information Systems (for Business track)	3

Specialization Elective Courses (15 credits)

Students must complete any five courses from one of the specialization tracks listed below. The list of courses is maintained by the unit that houses the track.

Computational Data Analytics (Knight Foundation School of Computing and Information Sciences)

Business Analytics (Dept. Information Systems and Business Analytics)

Hospitality Analytics (College of Hospitality and Tourism Management)

Biostatistics Data Analytics (Dept. Biostatistics)

Public Policy Analytics (Dept. of Public Policy and Administration)

Data Science 4+1 Degree Pathway

With their advisor's approval, students from all undergraduate majors including Computer Science,

Information Systems and Statistics may apply to the Data Science 4+1 degree pathway. If accepted, students will be allowed to take up to 12 credits of graduate data science courses which will apply towards both their undergraduate degree requirements and the master's degree program in data science.

The admission requirements are:

1. Current enrollment in an approved bachelor's degree program at FIU.
2. Completed 75 credits.
3. Current GPA must be 3.3 or higher.
4. GRE quantitative score of 148 or higher.
5. Completed prerequisites for the master's in Data Science program or demonstrated competencies in the specialization areas (the latter option requires approval by the graduate program director of the appropriate specialization area)
6. Complete the separate 4+1 pathway application, including signed approval by the director or designee from the graduate program.

Master of Science in Information Technology

The Master of Science in Information Technology is intended to educate students in the area of technical aspects of Information. It provides an emphasis on software technology, database technology, and security technology. The program is ideally suited for those who wish to obtain a higher level degree in Information Technology, and seek employment in the IT industry.

Admissions Requirements

The following are in addition to the University's graduate admissions requirements.

1. Bachelor's degree from an accredited institution in Information Technology, Computer Science, Computer Engineering, or a similar field or a Bachelor's degree in any field plus 3 years of Information Technology work experience.
2. Foreign students whose native language is not English must score at least 550 on the paper-based (or 80 on iBT) in the Test of English as a Foreign Language (TOEFL).

A student's GPA and required test scores will be considered as minimum requirements for admission. The academic background of each student shall be analyzed to determine if there is need for remedial courses in addition to the required curriculum. Students are also required to comply with all course prerequisites.

Required Courses

Students in the Master of Science in Information Technology program will be required to take 30 credits of graduate level courses. Included in the program are 9 credits of Information Technology core courses, 6 credits that form a track, and 15 credits of Information Technology elective courses.

Core Coursework (9 credits)

CEN 5087	Software and Data Modeling
CIS 5372	Fundamentals of Computer Security
CIS 5027	Computer Systems Fundamentals

Track Courses (6 credits)

Student must choose one track

Software Track

The software track prepares students with fundamental methods and cutting-edge technologies for developing and maintaining software systems. Students graduating from the software engineering specialization will have a thorough knowledge of the process and major techniques for modeling, designing, and analyzing software systems. The graduates of this track will be well-prepared to undertake major software systems development projects from major software corporations such as Motorola, Siemens, and IBM.

Students must choose two courses from a list of courses maintained by the school.

System Administration Track

The System Administration track prepares the student to be able to install, support, and maintain servers or other computer systems, and planning for and responding to service outages and other problems. Other duties may include scripting and basic programming, setting up custom operating system environments, project management for systems-related projects, supervising or training computer operators, and being the consultant for computer problems beyond the knowledge of technical support staff.

Students must choose two courses from a list of courses maintained by the school.

Security Track

The security track will equip students with fundamental knowledge and skills in information security and privacy, system security, and network security to they become highly qualified workforce in information technology fields.

Students must choose two courses from a list of courses maintained by the school.

Electives (15 credits)

Students must choose any four graduate level courses offered by the Knight Foundation School of Computing and Information Sciences, with the exception of CGS 6834 and COP 6007. Three credits can be earned in either CIS 5900 or CIS 5910, but not both. With the approval of the Graduate Program Director, one course not appearing on this list can be substituted for an elective.

Master of Science in Telecommunications and Networking

The Master of Science in Telecommunications and Networking is intended to educate individuals seeking employment with hardware and/or software companies, service providers, large user organizations, or telecommunications regulatory agencies as well as for those who are employed by these companies/organizations and wish to obtain formal, higher-level, specialized degree in Telecommunications and Networking. Telecommunication and Networking students learn how to lead in the ever changing environment of real-time global information networking, telecommunications, wireless and optical strategies and how to amplify business value through communications, technologies and systems. All courses in the program are categorized under the five following areas. SCIS offers thesis and non-thesis options for the Master's Degree.

Admissions Requirements

1. Bachelor's degree in a related field from an accredited institution.
2. Foreign students whose native language is not English, must score at least 550 on the paper-based (or 80 on iBT) in the Test of English as a Foreign Language (TOEFL).

Graduate Requirements

1. Maintain an overall GPA of at least 3.0. No grade below "C" will be accepted in any course taken to satisfy graduate program requirements.
2. Completion of 30 semester hours of graduate level in three categories:
 - 15 credits of required courses
 - 6 credits of either thesis or courses from any one focus area
 - 9 credits of electives

Required Courses (breadth)

All students must complete the following five courses:

TCN 5030	Computer Communications and Networking Technologies
TCN 6430	Networks Management and Control Standards
TCN 6275	Mobile Computing
TCN 5080	Secure Telecommunications Transactions (or CIS 5372)
TCN 5640	Telecommunications Enterprise Planning and Strategy

One Focus Area (depth)

Students in the non-thesis option must select two courses from one focus area that aligns with their backgrounds and interests. Areas include but are not limited to software, communications, policy/legal issues, wireless and security. These areas are designed to serve a wide constituency of students. The list of focus areas and acceptable courses are maintained by the school.

Electives

Three additional courses offered by the Knight Foundation School of Computing and Information Sciences (to bring to 30 credits), including any above course or TCN-prefix course not otherwise used to the satisfy focus requirement. The list of acceptable courses is maintained by the School.

Combined BS in Electrical Engineering/MS in Telecommunications and Networking Degree Pathway

Students who pursue a BS degree and are in their junior year, with at least a 3.3 GPA on both overall and upper division courses may apply to enroll in the combined BS/MS pathway. To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be

considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the of the University's graduate admissions requirements.

Students enrolled in the pathway may count up to six credit hours of Telecommunications and Networking graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment pathway. During this combined BS/MS pathway, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post B.S. requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the six credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of "B" is required. Students enrolled in the pathway may count up to six credit hours of Telecommunications and Networking graduate courses toward the elective BSEE requirements as well as toward the MS in Telecommunications and Networking degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the undergraduate advisor.

Students interested in the pathway should consult with the undergraduate advisor on their eligibility to the pathway. The students should also meet the graduate advisor to learn about the graduate program and available courses before completing the application form and submitting it to the undergraduate advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Doctor of Philosophy in Computer Science

The following are in addition to the University's graduate admission requirements:

1. A baccalaureate or master's degree in Computer Science, or equivalent degree in a related field as judged by the School's Graduate Committee.
2. For students without a Master's degree in a related field: A minimum of a 3.2 average on all upper division work and acceptable courses in Calculus and Statistics.
3. For students with a Master's degree in a related field: A minimum of a 3.0 average on all upper division work and acceptable courses in Calculus and Statistics, and a minimum of a 3.3 average in related graduate work.
4. Foreign students whose native language is not English must score at least 550 on the paper-base (or

80 on iBT) in the Test of English as a Foreign Language (TOEFL). TOEFL within the past two years.

5. GRE (General test) GRE must have been taken within the past five years.
6. Three letters of recommendation from persons in a position to judge the applicant's potential for advanced graduate study in computer science.

Required Courses

All students must complete the following three courses and receive a grade of 'B' or higher in each.

COP 5614	Operating Systems	3
	or	
TCN 5445	Telecommunication Network Programming	3
COT 5310	Theory of Computation I	3
	or	
TCN 5421	Theory of Network Computation	3
COT 6405	Analysis of Algorithms	3

No grade below "C" will be accepted in any course taken to satisfy graduate program requirements.

Other Requirements

1. The student must pass at least seven elective courses, for a total of 30 semester credit hours of course work. At least four of the seven elective courses must be distinguished and specially marked Ph.D. level courses. The acceptable elective courses and distinguished Ph.D. level courses can be found in a list maintained and published by the School. In addition, the student must also earn at least 15 dissertation credit hours and satisfy the School's seminar attendance requirement. In total, 75 credits beyond the bachelor's degree are required.
2. The student must pass the Qualifying Examination, which is an examination designed to ensure that the student has competency in core computer science topics.
3. The student must pass the Preliminary Examination, which is an oral examination of his or her dissertation proposal.
4. The student must write a dissertation on his or her research and successfully defend it orally in the Dissertation Defense.
5. The student must spend at least one academic year in full-time residence. Normally, this will be after passing the Qualifying Examination.

For additional information and for specific rules and regulations relating to the graduate program, please refer to the web site, (<http://www.cis.fiu.edu/programs/grad/>) or write to:

Course Descriptions

Definition of Prefixes

CAP-Computer Applications; CDA-Computer Design/Architecture; CEN-Computer Software Engineering; CGS-Computer General Studies; CIS-Computer Science and Information Systems; CNT-

Computer Networks; COP-Computer Programming; COT-Computing Theory; TCN-Telecommunications; IDC-Interdisciplinary Computing

CAP 5011 Multimedia Systems and Applications (3). Course covers organization of multimedia systems, data representation, quality of service, scheduling algorithms, synchronization and tele-communication of multimedia streams. Prerequisite: COP 4610.

CAP 5109 Advanced Human-Computer Interaction (3). Fundamental concepts of human-computer interaction, cognitive models, user-centered design principles, evaluation techniques, and emerging technologies in various contexts and domains.

CAP 5507 Game Theory (3). Game representations, solution concepts, algorithms & complexity, repeated games, learning, auctions, voting application to many disciplines. Familiarity with mathematical proofs would be helpful.

CAP 5510C Introduction to Bioinformatics (3). Introduction to bioinformatics; algorithmic, analytical and predictive tools and techniques; programming and visualization tools; machine learning; pattern discovery; analysis of sequence alignments, phylogeny data, gene expression data, and protein structure. Prerequisites: COP 3530, or equivalent and STA 3033 or equivalent.

CAP 5602 Introduction to Artificial Intelligence (3). Presents the basic concepts of AI and their applications to game playing, problem solving, automated reasoning, natural language processing and expert systems. Prerequisite: COP 3530.

CAP 5610 Introduction to Machine Learning (3). Decision trees, Bayesian learning reinforcement learning as well as theoretical concepts such as inductive bias, the PAC learning, minimum description length principle. Prerequisite: Graduate standing.

CAP 5622 Machine Learning Techniques & Application (3). Practical introduction to Machine Learning: tools for Supervised/Unsupervised Learning, Reinforcement Learning, Best Practices/Practical Applications, Cloud Deployment of ML models. For non-CS majors.

CAP 5627 Affective Intelligent Agents (3). Design and implementation methods using artificial intelligence (AI) techniques, human-computer interaction (HCI) principles, emotion theories; applications, e.g. health informatics, education, games. Prerequisites: Graduate standing or permission of the instructor.

CAP 5640 Graduate Introduction to Natural Language Processing (3). The concepts and principles of computer processing of natural language, including linguistic phenomena, formal methods, and applications. Students will conduct an independent research project. Prerequisites: M.S. or Ph.D. standing or permission of the instructor.

CAP 5701 Advanced Computer Graphics (3). Advanced topics in computer graphics: system architecture, interactive techniques, image synthesis, current research areas. Prerequisites: COP 3530 and CAP 3710 or equivalent, or by permission. This course will have additional fees.

CAP 5738 Data Visualization (3). Advanced class on data visualization principles and techniques. Students propose, implement, and present a project with strong collaborative and visual components.

CAP 5768 Introduction to Data Science (3). Foundations of databases, analytics, visualization and management of data. Practical data analysis with applications. Introduction to Python, SQL, R, and other specialized data analysis toolkits. Prerequisites: STA 3164 or equivalent.

CAP 5769C Practical Data Science (3). Topics will include: data collection and processing, data visualization and presentation, statistical model building using machine learning, and big data techniques for scaling these methods. Prerequisite: M.S. or Ph.D. standing or permission of the instructor. Corequisite: None. M.S.& Ph.D. in CS students may not take this course for their degrees.

CAP 5771 Principles of Data Mining (3). Introduction to data mining concepts, knowledge representation, inferring rules, statistical modeling, decision trees, association rules, classification rules, clustering, predictive models, and instance-based learning. Prerequisites: COP 4710 and STA 3033.

CAP 6619 Advanced Topics in Machine Learning (3). Advanced course on machine learning principles and techniques. Students propose, implement, and present a collaborative project with advanced machine learning techniques. Prerequisite: CAP 5610.

CAP 6736 Geometric Modeling and Shape Analysis (3). Techniques for 2D/3D geometric modeling and analysis, including representation, reconstruction, processing, modeling and shape analysis, and applications in science and engineering. Prerequisites: SCIS graduate standing or by permission of the instructor.

CAP 6776 Advanced Topics in Information Retrieval (3). Information Retrieval (IR) principles including indexing and searching document collections, as well as advanced IR topics such as Web search and IR-style search in databases. Prerequisite: COP 5725.

CAP 6778 Advanced Topics in Data Mining (3). Web, stream data, and relational data mining, graph mining, spatiotemporal data mining, privacy-preserving data mining, high-dimensional data clustering, social network, and linkage analysis. Prerequisite: CAP 5771 or permission of the instructor.

CDA 5655 Virtualized Systems (3). Topics include the concepts and principles of virtualization and the mechanisms and techniques of building virtualized systems, from individual virtual machines to virtualized networked infrastructure. Prerequisites: COP 4610 or permission of the instructor.

CDA 6939 Special Topics: Advanced Topics in Computer Architecture (3). This course deals with selected special topics in computer architecture. Prerequisite: Permission of the instructor.

CEN 5011 Advanced Software Engineering (3). This course deals with the design of large scale computer programs. Included are topics dealing with planning design, implementation, validation, metrics, and the

management of such software projects. Prerequisite: CEN 4010.

CEN 5064 Software Design (3). Study of object-oriented analysis and design of software systems based on the standard design language UML; case studies. Prerequisite: CEN 5011.

CEN 5076 Software Testing (3). Tools and techniques to validate software process artifacts: model validation, software metrics, implementation-based testing, specification-based testing, integration and systems testing. Prerequisites: CEN 4010 or CEN 5011.

CEN 5079 Secure Application Programming (3). Development of applications that are free from common security vulnerabilities, such as buffer overflow, SQL injection, and cross-site scripting attacks. Emphasis is on distributed web applications. Prerequisite: Graduate standing.

CEN 5082 Grid Enablement of Scientific Applications (3). Fundamental principles and applications of high-performance computing and parallel programming using OpenMP, MPI, Globus Toolkit, Web Services, and Grid Services. Prerequisites: Graduate standing or permission of the instructor.

CEN 5087 Software and Data Modeling (3). Essential software and data modeling methods and techniques such as UML, XML, and ER. Prerequisite: Graduate standing.

CEN 5120 Expert Systems (3). Introduction to expert systems, knowledge representation techniques and construction of expert systems. A project such as the implementation of an expert system in a high level AI-language is required. Prerequisites: COP 3530 or permission of the instructor.

CEN 6070 Software Verification (3). Study of formal verification of software systems; verification methods; verification of sequential and concurrent software systems. Prerequisite: CEN 5011.

CEN 6075 Software Specification (3). Study of formal specification in the software development process; specification methods; specification of sequential and concurrent systems. Prerequisite: CEN 5011.

CGS 5166 Introduction to Bioinformatics Tools (2). Introduction to bioinformatics; analytical and predictive tools; practical use of tools for sequence alignments, phylogeny, visualizations, pattern discovery, gene expression analysis, and protein structure. Prerequisites: PCB 6025 or equivalent.

CGS 6834 Programming for the Web (3). Installation and maintenance of servers. Techniques for building secure multimedia interactive web pages. A hands-on project to develop an educational interactive multimedia web site is required. This course is not an elective for Computer Science programs.

CIS 5027 Computer Systems Fundamentals (3). Fundamentals concepts of IT Systems: operating systems, networking, distributed systems, platform technologies, web services and human-computer interaction. Covers design principles, algorithms and implementation techniques. Prerequisite: Graduate standing.

CIS 5208 Social, Economic, and Policy Aspects of Cybersecurity (3). The broader human context of

cybersecurity, from the perspective of society, economics, and policy. Prerequisite: Graduate standing.

CIS 5346 Storage Systems (3). Introduction to storage systems, storage system components, storage architecture, devices, trends and applications, performance, RAID, MEMS and portable storage, file-systems, OS storage management. Prerequisite: Graduate standing.

CIS 5370 Principles of Cybersecurity (3). Cybersecurity algorithms, techniques. Mathematical foundations. Symmetric and public key encryption. Authentication, key infrastructure, certificates. Covert channels. Access control. Vulnerabilities. Prerequisite: Graduate standing.

CIS 5372 Fundamentals of Computer Security (3). Information assurance algorithms and techniques. Security vulnerabilities. Symmetric and public key encryption. Authentication and Kerberos. Key infrastructure and certificate. Mathematical foundations. Prerequisite: Graduate standing.

CIS 5373 Systems Security (3). Risk, Trust, and Threat models; Types of Attacks; Safe Programming Techniques; Operating System Mechanisms, Virtual Machine Systems; Hardware Security Enforces; Application Security; Personal Security. Prerequisite: CIS 5372.

CIS 5374 Information Security and Privacy (3). Information Security Planning, Planning for Contingencies, Policy, Security Program, Security Management Models, Database Security, Privacy, Information Security Analysis, Protection Mechanism. Prerequisite: CIS 5372.

CIS 5432 Advanced IT Automation (3). Advanced topics in system/network management including monitoring, help desk, antivirus, anti-malware, backup, disaster recovery, discovery, audit, remote control, automated response, policies, and reports. Prerequisites: CIS 4431 or permission of the instructor.

CIS 5900 Independent Study (1-10). Individual conferences, assigned readings, and reports on independent investigations. Prerequisite: Permission of the department.

CIS 5910 Project Research (1-6). Advanced undergraduate or master's level research for particular projects. Repeatable. Prerequisite: Permission of the department.

CIS 5915 Research Experience for Graduate Students (0-9). Participation in ongoing research in the research centers of the school.

CIS 5931 Special Topics (VAR). A course designed to give groups of students an opportunity to pursue special studies not otherwise offered.

CIS 6612 Special Topics: Advanced Topics in Software Engineering (3). This course deals with selected topics in software engineering. Prerequisite: Permission of the instructor.

CIS 6900 Independent Study (1-10). Individual conferences, assigned readings, and reports on independent investigations. Prerequisite: Permission of the department.

CIS 6930 Advanced Special Topics (3). A course designed to give groups of students an opportunity to pursue special advanced studies not otherwise offered.

CIS 6931 Special Topics: Advanced Topics in Information Processing (3). This course deals with selected special topics in information processing. Prerequisite: Permission of the instructor.

CIS 6933 Computer Science Seminar (1). Regularly scheduled seminar series featuring speakers on computer science related topics. Prerequisite: Graduate standing.

CIS 6970 Thesis (1-10). Prerequisite: Completion of all other requirements for the M.S. Degree in Computer Science.

CIS 7910 Graduate Research (1-25). Doctoral research prior to candidacy. Repeatable. Prerequisite: Permission of the department.

CIS 7980 Ph.D. Dissertation (1-10). Prerequisite: Permission of the Major Professor and Doctoral Candidacy.

CNT 6207 Distributed Processing (3). Study of distributed processing using networking and distributed computing techniques. Investigation of distributed algorithms and models of distributed computing. Prerequisite: Graduate Standing.

CNT 6208 Advanced Topics in Concurrent and Distributed Systems (3). Study of the major aspects of concurrent and distributed systems. Topics include foundations of concurrent computation, languages and tools for concurrent systems, distributed real-time systems, distributed multimedia systems, and concurrent object-oriented systems.

COP 5614 Operating Systems (3). Operating systems design principles, algorithms and implementation techniques: process and memory management, disk and I/O systems, communications and security.

COP 5621 Compiler Construction (3). Basic techniques of compilation; scanning; grammars and LL and LR parsing, code generation; symbol table management; optimization. Prerequisites: MAD 3512 and CEN 4010.

COP 5725 Principles of Database Management Systems (3). Overview of Database Systems, Relational Model, Relational Algebra and Relational Calculus; SQL; Database Applications; Storage and Indexing; Query Evaluation; Transaction Management. Selected database topics will also be discussed.

COP 5949 Cooperative Education in Computer Science (1-3). One semester of full-time work, or equivalent, in an outside organization, limited to students admitted to the CO-OP program. A written report and supervision evaluation is required of each student.

COP 6007 Computer Programming Concepts (3). For non-computer science graduate students. Concepts of object oriented programming, introduction to an object oriented programming language; internet programming; applications of programming to learning technologies. Prerequisite: Permission of the instructor.

COP 6556 Semantics of Programming Languages (3). This course provides an overview of systematic and effective approaches to programming. Abstraction; formal

specification techniques; program verification and semantics of programming languages. Prerequisite: COT 5310.

COP 6611 Advanced Operating Systems (3). Advanced topics in operating system design; microkernel; memory architecture; multi-processor issues; multimedia operating systems; case studies. Prerequisite: Graduate standing.

COP 6727 Advanced Database Systems (3). Design, architecture and implementation aspects of DBMS, distributed databases, and advanced aspects of databases selected by the instructor. Prerequisite: Graduate standing.

COP 6795 Special Topics on Databases (3). Study of selected advanced topics in databases and related areas. Prerequisite: Permission of the instructor.

COT 5310 Theory of Computation I (3). Abstract models of computation; including finite automata, regular expressions, context-free grammars, pushdown automata, Turing machines. Decidability and undecidability of computational problems. Prerequisite: MAD 3512.

COT 5407 Introduction to Algorithms (3). Design of efficient data structures and algorithms; analysis of algorithms and asymptotic time complexity; graph, string, and geometric algorithms; NP-completeness.

COT 5428 Formal Foundations for Cybersecurity (3). Formal models and methods for achieving rigorous security guarantees. Cryptographic indistinguishability properties, reduction proofs. Formal analyses of security APIs. Secure information flow. Prerequisite: CIS 5370.

COT 5432 Applied Parallel Computing (3). This course teaches advance undergrad and graduate students to solve problems from scientific, social and financial domains using parallel computing principles and techniques. Prerequisites: COP 3530 and (CDA 3102 or CDA 4101 or EEL 4709) or permission of the instructor

COT 5443 Optimization Methods for Computing: Theory and Applications (3). Optimization for CS students, including introduction to optimization algorithms, applications in CS, efficient computing, and real-world problems. Prerequisites: MAC 2311 Calculus I or equivalent; MAS 3105 Linear Algebra or equivalent (instructor's permission is acceptable).

COT 5520 Computational Geometry (3). Design and analysis of efficient algorithms to solve geometric problems: geometric searching, convex hull, proximity problem, Voronoi diagram, spanning tree, triangulation, graph drawing applications. Prerequisite: COP 3530 (or equivalents).

COT 6405 Analysis of Algorithms (3). Design of advanced data structures and algorithms; advanced analysis techniques; lower bound proofs; advanced algorithms for graph, string, geometric, and numerical problems; approximation algorithms; randomized and on-line algorithms. Prerequisite: Graduate standing.

COT 6421 Theory of Computation II (3). Verification of program correctness; program schemes; fixed-point theory of programs; resolution and theorem proving. Prerequisite: COT 5310.

COT 6446 Randomized Algorithms (3). Topics include moments and deviations, tail inequalities, random walk

and Markov chains, stochastic processes, the probabilistic method, and applications of these tools and techniques in data structure, geometric algorithms, graph algorithms, secure systems and property testing, etc. Prerequisite: COT 5407.

COT 6930 Special Topics: Advanced Topics in Theory (3). This course deals with selected special topics in computing theory. Prerequisite: Permission of the instructor.

COT 6931 Topics in Cognitive Science (3). A “top-down” view of Computer Science, in particular artificial intelligence, by studying the computational aspects of human cognition. Prerequisite: Permission of the instructor.

COT 6936 Topics in Algorithms (3). Advanced data structures, pattern matching algorithms, file compression, cryptography, computational geometry, numerical algorithms, combinatorial optimization algorithms and additional topics. Prerequisite: COP 3530.

IDC 5007 Concepts of Artificial Intelligence (3). High-level conceptual survey of artificial intelligence for non-CS graduate students, including techniques, applications, ethics, and philosophical issues. No high-level math or programming required.

IDC 5013 Computer Science for Middle School Teachers (3). Provide teachers with the knowledge to teach Computer Science topics such as programming, physical computing, web development, design, and data, appropriate for middle school students.

IDC 5014 Computer Science for High School Teachers (3). Computer Science topics such as computational thinking, logic, visual programming, social and ethical issues related to computer technologies, appropriate for high school students.

IDC 6940 Capstone Course in Data Science (1-3). Projects course using Python, SQL, R, and/or other specialized analysis toolkits to synthesize concepts from data analytics and visualization as applied to industry-relevant projects. Prerequisite: CAP 5768

TCN 5010 Telecommunications Technology and Applications (3). An in-depth introduction to voice and data networks, signaling and modulation, multiplexing, frequency band and propagation characteristics, special analysis of signals, and traffic analysis. Prerequisite: Permission of the instructor.

TCN 5030 Computer Communications and Networking Technologies (3). Teaches the dynamics related to computer communications, how computers are grouped together to form networks, various networking implementation strategies, and current technologies. Prerequisite: Permission of the instructor.

TCN 5060 Telecommunications Software and Methodologies (3). A high-level look into network architectures and distributed applications, client-server models, network software platforms and advanced techniques for programs specifications through implementation. Prerequisites: TCN 5030 or permission of the instructor.

TCN 5080 Secure Telecommunications Transactions (3). Telecom and information security issues such as:

digital signatures, cryptography as applied to telecom transactions, network policing, nested authentication, and improving system trust. Prerequisites: TCN 5030 or permission of the instructor.

TCN 5150 Multimedia Computer Communications (3). Covers multimedia computer communications technologies including, multimedia over networks, videoconferencing, telephone, compression algorithms and techniques for transmitting data efficiently. Prerequisites: TCN 6210 or permission of the instructor.

TCN 5421 Theory of Network Computation (3). Fundamental mathematical models of general and network computation: finite state automata, regular languages, decidability; scholastic processes, Markov chains, queuing theory.

TCN 5440 Software Development for Telecommunication Networks (3). Focuses on the aspects, tools, and techniques of developing software applications for telecommunications networks. Prerequisites: TCN 5030 or equivalent.

TCN 5445 Telecommunications Networking Programming (3). Advanced telecommunications network programming skills including Router and Bridge Software, socket programming and protocol handler. Prerequisite: Permission from instructor.

TCN 5455 Information Theory (3). Entropy and measure of information. Proof and interpretation of Shannon's fundamental theorem for various channels, including noiseless, discrete, time-discrete and time-continuous channels. Prerequisite: Permission of the instructor.

TCN 5640 Telecommunications Enterprise Planning and Strategy (3). Methodologies for re-engineering, project management, strategic planning, change management, RFPs, and life-cycle management within the telecommunications and IT arena. Prerequisite: Permission of the instructor.

TCN 5710 Cyber Sustainability (3). In-depth introduction to sustainable development and optimization of cyber systems, such as mobile networks and data centers, with an emphasis on cost, energy, water and life-cycle assessment.

TCN 6210 Telecommunications Network Analysis and Design (3). A systematic, analytic and descriptive approach to the evaluation of telecommunications networks, networking principles, and control and quality of service. Prerequisite: Permission of the instructor.

TCN 6215 Advanced Network Algorithms (3). This course will cover algorithms that are used in network research and implementation. Prerequisites: TCN 6210 or consent of the instructor.

TCN 6230 Optical Networks (3). Enabling technologies, multiplexing techniques, WDM, broadcast networks, wavelength-routed networks, network architectures, protocols, network algorithms, and device-network interfaces. Prerequisites: TCN 5030 or equivalent.

TCN 6260 Internetworking (3). The course will discuss advanced topics, current trends and control of internetworking. An analytical and descriptive approach will be used to cover the subject of internetworking.

TCN 6270 Mobile and Wireless Networks (3).

Techniques in the design and operation of wireless networks; LANs, MANs, and WANs; analytical models; application of traffic and mobility models; mobility control, and wireless ATM. Prerequisites: TCN 5030 or equivalent.

TCN 6275 Mobile Computing (3). Enabling technologies and impediments of mobile computing. It includes mobile architectural design, mobile-aware and transparent adaptation, mobile data access and file systems, and ad-hoc networks. Prerequisite: Permission of the instructor.

TCN 6420 Modeling and Performance Evaluation of Telecommunications Networks (3). Covers methods and research issues in the models and performance evaluation of high-speed and cellular networks. Focuses on the tools from Markov queues, queuing networks theory and applications. Prerequisites: TCN 5030 or equivalent.

TCN 6430 Networks Management and Control Standards (3). Protocols for management of telecom networks, including Simple Network Management Protocol and Common Management Information Protocol. Extension of protocols to optimize network performance. Prerequisites: TCN 5030 or equivalent.

TCN 6450 Wireless Information Systems (3). Enabling technologies and impediments of wireless information systems. Focuses on software architectures, and information and location management in the wireless environment. Prerequisite: Permission of the instructor.

TCN 6820 Industrial Development of Telecommunications (3). This course, from a management perspective, addresses the evolution of the telecom industry, the impact it has on reshaping our world, and the importance of management decisions in telecom.

TCN 6880 Telecommunications Public Policy Development and Standards (3). A concept-oriented examination of the domestic and international telecommunications policy processes and standards setting environment. Prerequisite: Permission of the instructor.

TCN 6935 Graduate Seminar (0). Investigation and report by graduate students on topics of current interest in telecommunication and networking. Prerequisites: Ph.D. classification and approval of instructor.

Moss Department of Construction Management

Irishad U. Ahmad, Ph.D., P.E., *Professor Emeritus*

Ronald A. Baier, P.E., *Teaching Professor Emeritus*

Mohamed ElZomor, Ph.D., *Assistant Professor and
Graduate Program Director*

José Faria, Ph.D., PMP, *Moss Endowed Chair*

Eugene D. Farmer, A.I.A., NCARB, LEED-AP BD+C,
Professor Emeritus

Xuan Lv, Ph.D., *Assistant Professor*

José D. Mitrani, P.E., CPC, CGC, *Professor Emeritus*

Ayman A. Morad, Ph.D., *Associate Teaching Professor*

Walled Orabi, Ph.D., *Associate Professor and
Undergraduate Program Director*

Sacha Perez, M.S. Ed. *Academic Advisor I*

Nipesh Pradhananga, Ph.D., P.E., *Associate Professor
and Associate Chair*

Arif Sadri, Ph.D., *Assistant Professor*

Reza Sheykhi, Ph.D., *Visiting Instructor*

Lufan Wang, *Assistant Teaching Professor*

Natasha Wedderburn, MPA, *Professional Academic
Advisor*

Lu Zhang, Ph.D., *Assistant Professor*

Master of Science in Construction Management

The master's degree is rapidly becoming the entry level requirement for middle and upper level managerial positions in the construction industry. The primary goal of this program is to provide the knowledge and advanced skills essential for success in these positions. The program is flexible enough to accommodate graduates from other disciplines who may lack an undergraduate background in construction management.

Students who hold four year undergraduate degrees in construction management may complete the masters degree in one academic year as full-time students. Equivalent degree related fields would include studies in construction drawings, construction materials and methods, construction accounting and finance, economic planning, structures, site work, legal aspects of construction, cost estimating, construction scheduling and business management/finance. Students with deficiencies in these fields may need longer residence for the master's degree, as they will be required to take specified basic undergraduate courses.

Admission Application

Students desiring to enter the Construction Management graduate program must formally apply to the University for acceptance at <https://admissions.fiu.edu/index.html>
Students can also send their application material to:

Florida International University
College of Engineering
Dean's Office
Admissions Coordinator
10555 West Flagler Street
Miami, FL 33174
Email: grad_eng@fiu.edu
Fax: (305) 348-6142

See the graduate admission section in this catalog for graduate application instructions.

Admission Requirements

In order to be admitted, applicants should hold a Bachelor's Degree in Construction, Construction Management, Architecture, Engineering, Business or equivalent related fields. Students with baccalaureate degrees other than Construction Science, Construction Management, or Construction Engineering may be accepted with the understanding that they will be required to take specified basic undergraduate courses as determined by the Graduate Program Director, to provide an adequate background for more advanced courses. In addition, applicants must have earned a minimum grade point average (GPA) of 3.0 in the upper division course work related to their undergraduate degree.

Eligibility for admission for those students whose upper division undergraduate GPA is less than 3.0 (on a 4.0 scale) may be evaluated on the basis of one or more of the following:

- GRE or GMAT scores
- Letters of reference
- Work experience
- Other relevant factors, including but not limited to, awards, recognitions, published journal articles, conference presentations, etc.

Applicants who do not satisfy the GPA requirement will be evaluated by the Department's Graduate Program Director based on the factors identified earlier, and may be recommended for admission on a provisional/conditional status.

TOEFL

In addition to the above criteria, international graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Curriculum

Students seeking to obtain a Master of Science in Construction Management have a choice of either a thesis or a non-thesis option. Students have to complete 30-36 semester hours including thesis. Students with a Bachelor of Science (BS) degree in Construction Management, Construction Science, or Construction Engineering must complete at least 30 semester hours to graduate. Students with a BS degree in Engineering or a BA degree in Architecture must complete at least 33 semester hours to graduate. All other students with undergraduate degrees in disciplines such as business, accounting, finance, etc. must complete at least 36 semester hours to graduate. The thesis option consists of a minimum of 24-30 semester hours of course work and 6 semester hours of thesis. The non-thesis option consists of 30-36 semester hours of course work and may include up to 6 semester hours of independent studies. A student shall not register for masters thesis without first having received the approval from his/her thesis supervisor and the Chair of the Department. A student may not register for independent studies without the approval of his/her advisor, and the Chair of the Department.

Course Requirements

Graduate credit is awarded for courses numbered 5000 and above. The work in the major field must be in courses numbered 5000 or above. For work outside the major, up to two courses numbered 4000-4999 may be taken provided they are part of a plan of study approved by the student's supervisory committee or the Department Graduate Committee, whichever is applicable, and prior approval is obtained from the Chair of the Department. Approval must be obtained in writing prior to the student registering for such a course.

Students with deficiencies in the areas designated as equivalent related fields will be required to take and successfully complete (with a grade of "C" or above or with "P" grade, if applicable) 3000 and 4000 level courses in Construction Management in order to provide the proper foundation for advanced courses.

The program of course work for a masters degree must be approved by the student's advisor, supervisory committee (if thesis option), and Department Chair. No more than six credits from a previous masters degree program may be applied toward a second masters degree. These credits are applied only with the written approval of the Department Chair, the Dean of the College of Engineering and Computing, and the University Graduate School.

Transfer of Credit

Only graduate (5000 - 7999) level work to the extent of two courses, totaling not more than six semester hours, earned with a grade of 'B' or better may be transferred from another institution, or from post-baccalaureate work at the University except as noted otherwise in this catalog. Credits transferred from other universities may be applied toward meeting the degree requirements but the grades earned will not be computed in the student's grade point average. Acceptance of transfer of credit requires approval of the Graduate Program Director, College Dean, and the University Graduate School. Petitions for transfer of credit for a masters degree should be made during the student's first term of enrollment in the masters program.

Supervisory Committee

Students who choose the thesis option should request the appointment of a supervisory committee as soon as possible after admission into the program, but in no case later than the second semester of graduate study. Supervisory committees for graduate degree programs are nominated by the student's graduate advisor and approved by the Department Chair, College Dean, and the Dean of the University Graduate School. The student's proposed plan of study must be approved, in writing, by the student's graduate advisor, the supervisory committee and the Department Chair.

Masters Thesis

A student choosing the thesis option must, as part of his/her plan of study, prepare a written proposal of the thesis work planned. This proposal must adhere to all University and Department regulations concerning format and content. Once this proposal is approved, in writing, by the student's graduate advisor, his/her supervisory committee, the Department Chair, and the College Dean, the student will be permitted to register for masters thesis. The student must be enrolled in at least one thesis credit

hour the semester the proposal is submitted to the University Graduate School.

Examination

A final oral examination, which is primarily a defense of the thesis research, is required for thesis masters candidates. A passing grade must be obtained in order to qualify for graduation. The examination will be administered by his/her supervisory committee.

Special Student

In exceptional cases, students wishing to enroll in courses during the application process may do so as a special student (non degree seeking). No more than 12 semester credits of work taken as a special student can be applied towards graduation. No courses with a grade lower than a "B", earned as a special student, will be included in the Masters program upon admission. Students taking courses under the special student designation should consult other sections of this catalog for pertinent regulations covering the special student status.

General Regulations

Grades

The Moss Department of Construction Management requires a minimum cumulative grade point average of 3.0 in all courses taken towards a masters degree. The minimum acceptable grade for any work attempted as a graduate student is a "C."

Grade of Incomplete

A grade of "I" (Incomplete) may be granted, at the option of the Instructor, upon approval by the Department Chair, to a student who, due to serious, documented, and verifiable extenuating circumstances beyond his/her control is unable to complete the work required to obtain a grade for a course.

A student wishing to receive an incomplete ("I" grade) must meet with his/her professor and sign an agreement outlining what work must be completed to receive the final grade and when this work is due. Failure of the student to either complete the work required by the agreement or not meet the deadline prescribed in the agreement will result in the grade reverting to a grade of "F" (failing grade).

Graduation

In order to be eligible to graduate the student must have successfully completed his/her plan of study as established with the student's graduate advisor, his/her supervisory committee (if applicable), and the Department Chair. This includes completion of all applicable graduate course work with an overall minimum grade point average of 3.0. A student choosing the thesis option must also have submitted a complete masters thesis, whose format, content, and presentation must be acceptable to and approved by his/her graduate advisor, supervisory committee, Department Chair, College Dean, and the Dean of the University Graduate School.

Students should contact an advisor at least one semester prior to their projected graduation and request a review of their file. At the start of the final semester the student is required to complete an Application for Graduation (online application). If for any reason a student fails to graduate in the semester after applying for

graduation, the student must reapply for graduation and enroll for at least one graduate credit.

It is the student's responsibility to ascertain that all requirements for graduation, as stated in the University Catalog and in the Department Program sheets, have been met.

Foundation Courses

Students (CM majors) requiring 30 credit hours to graduate are not allowed to take any of the foundation courses to count towards their MSCM degree. Students requiring 33 credit hours to graduate must take at least three courses (9 credits) from the foundation courses listed below – unless exempted by the Graduate Program Director. Students requiring 36 credits to graduate must take at least four courses (12 credits) from the list of foundation courses given below – unless exempted by the Graduate Program Director. The foundation courses, whether three or four, must be taken with the approval of the Graduate Program Director.

BCN 5618	Fundamentals of Construction	
	Estimating	3
BCN 5645	Construction Economic Analysis	3
BCN 5728	Principles of Construction Scheduling	3
BCN 5766	Codes and Regulations	3
BCN 5746	Construction Legal Environment	3

Construction Management Electives

All BCN courses listed in this catalog can be taken as elective courses. Depending on the academic background of the student, the balance of 30-36 credits is to be taken from the list. Thesis students may take up to 6 credits of BCN 6971 spread over at least two consecutive terms with 3 credit hours in each. All students may take up to 6 credits of BCN 5905. A student shall not register for BCN 5905, BCN 6910, or BCN 6971, without the approval of his/her advisor, and the School Director. Not more than 3 credit hours of BCN 5905 or BCN 6971 may be taken in any one semester. A student shall count BCN 5949 only once towards graduation.

Combined BS/MS in Construction Management Degree Pathway

Students who pursue a BS degree in Construction Management, completed 75 credits and have an overall GPA of at least a 3.2 GPA may apply to enroll in the combined BS/MS pathway in Construction Management upon recommendation from the undergraduate advisor. Students should complete all lower division courses to be considered for this degree pathway. The student must also meet the admission criteria for the graduate degree program and the University Graduate School. Students need only apply once to the combined degree pathway, but the application

must be submitted to Graduate Admissions before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the pathway may count up to nine credit hours of BCN graduate courses towards the

electives of the BS degree. A minimum grade of B is required for all graduate courses counted for both the BS and MS degrees. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

The combined BS/MS pathway has been designed to be a continuous program. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor's and master's degrees.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for admission. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form online.

Master of Science in Construction Management/Juris Doctor Joint Degree Pathway

Florida International University (College of Engineering and Computing and College of Law) offers a joint degree pathway culminating in both a Juris Doctor degree, awarded by the College of Law, and a Master of Science in Construction Management (MSCM) degree, awarded by the College of Engineering and Computing.

Under this joint degree pathway, a student can obtain expertise in both fields (construction and law) in significantly less time than it would take to obtain both degrees if pursued consecutively.

Essential criteria relating to this joint degree pathway are as follows:

1. Candidates for the pathway must meet the entrance requirements for and be accepted by both Colleges. Both Colleges must be informed by the student at the time of application to the second program that the student intends to pursue the dual degree.
2. The joint degree pathway is not open to students who have already earned one degree.
3. For law students, enrollment in the MSCM program is required no later than the completion of 63 credit hours in the J.D. program. For MSCM students, enrollment in the J. D. program is required no later than the end of the first semester after beginning the MSCM program. (A summer session is counted as a full semester.)
4. The College of Engineering and Computing will allow 9 credit hours of law courses to be credited toward both the MSCM and J.D. degrees. These [9] credit hours of law classes will be in lieu of the three elective courses required for the MSCM degree. Foundation courses must be completed as required and explained in the catalog and cannot be substituted with any College of Law courses. The students must have a minimum GPA of 3.0 in each of the three law courses for inclusion in their MSCM degree program.

Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the J. D. degree for courses taken in the MSCM curriculum upon completion of the MSCM degree curriculum with a grade point average of 3.0 or higher. These 9 credit hours of construction management courses will be in lieu of electives required for the J.D.

5. A student enrolled in the joint degree pathway may begin the student's studies in either College, but full-time law students must take the first two semesters of law study consecutively and part-time law students must take the first three semesters of law study consecutively. Students enrolled in the MSCM program must be enrolled at least in one course in any given semester during his/her entire course of study. Students admitted to one College but electing to begin study in the other College under the joint degree pathway may enter the second College thereafter without once again qualifying for admission so long as they have notified the second College before the end of the first week of the first semester in the second College and are in good academic standing when studies commence in the second College.
6. A student enrolled in the joint degree pathway can receive either degree if the student has satisfied all of the requirements for that degree.

Course Descriptions

Definition of Prefixes

BCN-Building Construction

Student programs of study in the graduate level program are carefully designed and sequenced following consultation with a graduate faculty advisor. Appropriate prerequisite course work is assigned on the basis of individual needs.

BCN 5022 Housing for Developing Countries (3). Problems faced by developing countries in housing their population. Political, economic, social, and technical considerations in decision process.

BCN 5406 Principles of Building Structures for Construction Management (3). Applications of the principles of mechanics to engineering problems of equilibrium, strength, and stiffness. Topics include equilibrium of forces, stress, strain, torsion, beams, and columns.

BCN 5585 Sustainable Construction (3). Study of the concepts and techniques of sustainable construction, in depth review of sustainable materials and construction techniques. Prerequisite: Permission of the instructor.

BCN 5588 Vulnerability Analysis (3). Assessment of risk and potential for damage to a community or facility from the impact of natural or anthropogenic hazards. Physical and construction related issues.

BCN 5589 Hazard Mitigation (3). Reducing potential damage to the built environment from natural hazards, including hurricanes, floods, earthquakes, explosions. Benefit-cost analysis. Regulatory problems.

BCN 5618 Fundamentals of Construction Estimating (3). Principles and practices of estimating, providing application, and drill in surveying quantities of labor and materials for general construction projects: excavation,

concrete and formwork, carpentry, masonry, structural steel, lath and plaster, interior finishes.

BCN 5622 Advance Planning and Simulation for Construction (3). The application of advanced planning, scheduling, and simulation techniques and concepts to construction processes and operations.

BCN 5626 Construction Cost Analysis and Control (3). Description of different types of estimating techniques in relation to different stages in a construction project. Productivity analysis, measurement of progress, and techniques of cost control are covered.

BCN 5645 Construction Economic Analysis (3). Nature of construction costs, funding sources and arrangements, capital requirements, bonding, insurance, risk and contingency evaluation, general office operations, and bidding procedures.

BCN 5706 Interdisciplinary Aspects of Housing (3). Recognition and definition of those factors which affect the planning, financing, and construction of housing projects. The operations and responsibilities of a multidisciplinary team dealing with decision process. This course takes a critical look at the housing delivery system to include: how the housing industry operates, various technologies prevalent in housing construction, and constraints to housing. The course will also look at the future, examining problems and forces that will shape opportunities.

BCN 5716 Productivity in Construction (3). An in-depth study of common issues relating to productivity improvements in construction.

BCN 5728 Principles of Construction Scheduling (3). Application of CPM and PERT to construction planning, time-cost trade-off, resource/cost-flow management and analysis, repetitive task planning, progress updating, and computerized scheduling

BCN 5735 Hazardous Materials and Waste in Construction (3). Discussion of the common hazardous materials and waste regulations found in construction activities.

BCN 5738 Construction Safety Management (3). Introduce the graduate student in Construction Management to the important elements essential in managing the safety function of a construction company.

BCN 5741 Construction Claims (3). Construction claims, administration, and avoidance. Covers the importance of construction contract errors, unforeseen and changed conditions, disruptions, acceleration, termination, and proving of claims.

BCN 5746 Construction Legal Environment (3). Legal and business aspects of engineering contracts and specifications in the construction industry. Analysis, study of precedents, and application of contract clauses, including changes, changed conditions, termination, disputes, payments, risk and insurance, inspection, liquidated damages, and technical requirements.

BCN 5747 Construction Law Case Studies (3). Case study and analysis of reported appellate decisions on common construction law issues; licensing; bid disputes; contract issues; construction lien law; surety problems; and unresolved claims.

BCN 5749 Advanced Construction Documentation (3). Construction related documentation requirements for avoidance of litigation before, during, and after completion of construction projects; dispute resolution processes for construction operations.

BCN 5755 Construction Financial Management (3). Money management in construction operations: financing, funding, sources of money, cash flow, disbursement, liability and bonding, cost and managerial accounting, and profit analysis.

BCN 5766 Codes and Regulations (3). Study of building codes required by local, county, and state levels and their relation to quality control.

BCN 5771 Management and Marketing of Construction Services (3). Human effectiveness in marketing construction management services in the public and private sectors.

BCN 5772 Management of Construction Organizations (3). This course studies the management of a construction company. Topics included are: company organization, incorporation structures, policies and procedures, finance, accounting, information modeling, bidding strategies, and operation.

BCN 5774 Topics in International Construction (3). Introduction to procurement, financing and management of international construction projects with emphasis on international economics, contracts, trade agreements and specifications.

BCN 5784 Construction Information Systems (3). The application of information management techniques, including computer hardware and software systems, to the analysis and solution of typical problems in the practice of construction management.

BCN 5792 Total Quality Management and Planning in Construction (3). The application of TQM philosophy and tools developed by Deming, Juran, Crosby and ISO 9000 standards to solving construction industry related problems will be discussed. Strategic planning as it relates to construction will also be covered in this course.

BCN 5905 Directed Independent Studies (1-3). Individual studies under supervision of faculty, tutor, or advisor. Requires prior approval of advisor and Chair.

BCN 5906 Special Topics (1-3). Intensive study for small group of students in a particular topic, or a limited number of topics not otherwise offered in the curriculum.

BCN 5949 Graduate Construction Management Internship (1). Supervised work in construction management. Evaluation and reports required. Prerequisites: Consent of advisor and Department Chair.

BCN 6473 Systems Approach for Housing Planning (3). Discussions of basic concepts of systems analysis and systems approach to the field of housing planning. The advantage of systems approach. Case studies.

BCN 6642 Value Engineering in Construction (3). Relationship of costs to time and life cycle of construction projects, and methods to improve the economic value of construction projects.

BCN 6775 Decision and Risk Analysis in Construction (3). Techniques of decision analysis for the medium to top

level management personnel in the construction industry. Typical construction related problems that involve risk and uncertainty are studied.

BCN 6785 Advanced Estimating and Bidding Strategy (3). Application of computer software to rigorous exercises in construction estimating. Cost information related to construction with applications in current practice. Prerequisites: BCN 5618 or Instructor Permission

BCN 6788C Artificial Intelligence Applications in Construction Management (3). The course presents a study of the concepts, techniques, and applications of AI technology in the construction management domain.

BCN 6795 Automation in Construction (3). In depth introduction and analysis of automation technologies in construction, covering issues related to the application, implementation and evaluation of automation technologies throughout the lifecycle of a construction process for smart jobsites. Prerequisite: Permission of the instructor.

BCN 6796 Construction Failures (3). Discussion of issues and presentation of case studies related to failures of construction projects. Prerequisite: Permission of the instructor.

BCN 6910 Supervised Research (1-6). Graduate level research carried out under the supervision of a faculty member.

BCN 6912 Project in Construction Engineering and Management (3). Independent research work culminating in a professional practice oriented report for the requirements of the project-option of the Masters degree in construction engineering of construction management. Prerequisites: Fifteen graduate credits and approved project plan.

BCN 6916 Developments in Construction Technologies (3). Study of advanced field techniques and emerging uses worldwide. Information flow and creativity are highlighted as crucial elements which stimulate new developments. This course prepares the students to understand and deal with concepts of change.

BCN 6935 Seminar on Construction Management (3). Advanced study of problems, trends, and issues in a time of rapid change in building and management technology. Topics selected or developed by class.

BCN 6971 Thesis (1-3). (Total of 6 credit hours spread over at least two consecutive terms with 1-3 credit hours in each must be completed.) Students develop a thesis under the direction of a senior faculty mentor, and their supervisory committee, and advance and defend their propositions before an audience of peers, scholars, and their supervisory committee. Requires approval of advisor, supervisory committee, and Department Chair.

The mission of the Department of Biomedical Engineering is to bridge engineering, science and medicine:

- to educate and train the next diverse generation of biomedical engineers
- to conduct research leading to significant discoveries in medical sciences
- to conduct design and development of innovative medical technology
- to translate scientific discovery and medical technology to industry or clinical practice for delivery of health care
- to engage with the local to global community for knowledge dissemination

The objectives of the graduate Biomedical Engineering Program at FIU are the following:

1. Provide opportunity for advanced graduate studies and entrepreneurial activities;
2. Encourage FIU graduates to extend their careers into research and teaching;
3. Prepare graduates for conducting innovative and impactful biomedical engineering research, design and development;
4. Provide highly trained professionals in Biomedical Engineering to serve in academic institutions, government agencies, research laboratories, and manufacturing and service industries.
5. Improve minority and Hispanic doctoral graduate representation in the Biomedical Engineering field, where they are highly underrepresented; and
6. Help attract more biotechnology industries to Miami-Dade County and South Florida.

Master of Science in Biomedical Engineering

The Department of Biomedical Engineering at Florida International University offers Research and Professional tracks for the Master's Degree. In addition, the Department offers accelerated combined BS/MS pathways and certificate programs. These programs provide an

interdisciplinary education intended to prepare the student for professional practice in Biomedical Engineering.

All work counted for the Master's degree must be completed during the six years immediately following the date of admission to the graduate program.

Admission Requirements

The following is in addition to the University's graduate admission requirements:

1. A student seeking admission into the program must have a bachelor's degree in engineering, the physical/life sciences, computer science, or mathematics from an accredited institution, or in the case of foreign students, from an institution recognized in its own country as preparing students for further study at the graduate level.
2. An applicant must have achieved a "B" average in upper level undergraduate work.
3. Applicants who have not satisfied the above will be evaluated for probationary or waiver admission.
4. In addition to the above criteria, International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
5. The GPA and TOEFL scores specified above are to be considered minimum requirements for admission. Applicants from science and engineering areas other than biomedical engineering will be expected to complete undergraduate remedial courses selected to prepare them for graduate courses in their area of interest. Full admission into the graduate program requires the completion of these background courses with no grades below "C" and a grade point average of 3.0 or better.

Graduation Requirements

The degree will be conferred when the following conditions have been met:

1. Recommendation of the advisor and faculty of the Department.
2. Certification provided by the Department Chair, College Dean, and University Graduate School that all degree requirements have been met.
3. Meet the undergraduate deficiencies, if any existed in the student's program, as additional courses toward the degree.
4. Complete the required semester hours of graduate level credit (not more than six graduate semester hours with a grade of "B" or higher can be transferred from other accredited institutions).
5. Successful defense of an acceptable graduate thesis if required of the program.
6. Students must maintain an overall GPA of 3.0. No grade below a "C" will be accepted in a graduate program. In the event that a student is placed on probationary status, he or she must obtain a directed program from his or her advisor and approved by the Graduate Program Director prior to continuing further course work toward the degree. The student must satisfy the directed course of action within the prescribed time limit; otherwise he or she will be academically dismissed.

7. Comply with all University policies and regulations.

Orthotics and Prosthetics Engineering Track

This track will provide comprehensive training for students in life-science areas, including anatomy, kinesiology, pathology, and normal pathological gait. In addition, it will provide extensive engineering training in biomechanics, material science, and the fabrication and evaluation processes of orthotic and prosthetic devices, as well as research skills.

Completion of this track will prepare students to pursue a career in the field of orthotics and prosthetics as an engineer and innovator. This track is not accredited for pursuing professional certification for orthotics and prosthetics provided by the American Board for Certification (ABC).

Course Requirements

BME 5105 Intermediate Biomaterials Science	3
BME 5941 Biomedical Engineering Internship	1
BME 6907 Master's Project	3

Professional Track

This track is tailored primarily for engineers currently practicing in the biomedical industry and students interested in pursuing a management career in the biomedical industry. A student shall complete 27 credit hours of course work and a 3 credit hour capstone project. The courses are organized into four core areas: Life Sciences, Mathematics, Engineering Management, and Biomedical Engineering. The student will choose two courses from the Engineering Management core based on personal training requirements. While the degree is structured as a non-thesis program, students will be required to conduct an industrial project (3 credit hours). The project will include contemporary topics and trends in biomedical engineering technology development and will require a formal report and presentation upon completion. Students receiving financial support from the department are not eligible for the Professional Track option.

Early in the program (before the end of the second term) the student and advisor will complete a study plan that specifies the courses that will comprise the program. A maximum of three credits of independent studies beyond the MS project may be included in a study plan.

Professional track students are required to take an oral final examination dealing with the objectives of their study plan. The student will briefly summarize the project report (20 minutes) as a part of the exam. The examining committee will include a minimum of three faculty members, at least two of whom have appointments in the Department.

Course Requirements

Approved Life Science Elective (3 credits) such as

BME 5410 Biomedical Physiology and Engineering I	3
BME 5411 Biomedical Physiology and Engineering II	3
PHZ 6255 Molecular Biophysics	3

Mathematics Core (3 credits)

STA 5676 Reliability Engineering	3
or	
STA 5126 Fundamentals of Design of Experiments	3

Approved Engineering Management Elective (6 credits) such as

EIN 5226C Total Quality Management for Engineers	3
EIN 5322 Engineering Management	3
EIN 5359 Industrial Financial Decisions	3
MAN 6167 Leadership in a Global Environment	3

Biomedical Engineering Core (18 credits)

Biomedical Engineering Electives	15
BME 6907 Master's Project	3

Research Track

The research track is geared to prepare the graduate for further graduate study or a career in biomedical research. A student shall complete a minimum of 30 credit hours. This includes a minimum of 24 hours of course work (15 credits of electives in specialty areas, 6 credits of mathematics core courses, 3 credits of life science elective), one semester of the Biomedical Engineering Seminar and 6 semester credit hours of Master's Thesis or 3 credit hours of Master's Project. Students electing Master's project will need to take one additional biomedical engineering elective course. Early in the program (before the end of the second term) the student and advisor will complete a study plan that specifies the courses that will comprise the program. A maximum of three credits of independent studies other than the MS thesis may be included in a study plan. Students receiving support from the department are not permitted to choose the project option.

All students in the research track are required to complete a research project under the supervision of an advisor and a committee. When the research is completed, the student should schedule a defense with an examining committee consisting of a minimum of three graduate faculty members (at least two of whom have appointments in the Department). The candidate should prepare to summarize the thesis or the report in the manner of a technical paper using appropriate visual aids in 40 minutes or less. Following the presentation, the candidate will answer questions related to the work from the audience and/or the committee. At the conclusion of the defense, the committee will agree upon the outcome - pass or fail - and report the results to the Graduate School. Following the exam, student will implement the committee's suggestions for improving the draft document.

Each committee member must sign the approval form in the final document. Copies of the approved thesis must be provided to the advisor, Department, and the University Graduate School. Students should become familiar with the University Graduate School's regulations and deadlines available online at <http://gradschool.fiu.edu>.

Course Requirements

Biomedical Engineering Core (21 credits)

All students in the Research Track must take three courses in one specialty area, and one course in each of the other two specialty areas. The current specialty areas are: 1) Basic research in engineered tissue model systems; 2) Diagnostic bioimaging and sensor systems; and 3) Therapeutic and reparative neurotechnology.

CHM 5503	Physical Chem of Nucleic Acids	3

Combined BS/MS Degree Pathways

This five-year pathway seamlessly combines a baccalaureate degree in biomedical, mechanical or electrical engineering with the Master's in biomedical engineering. To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed 75 credits in the bachelor's degree program at FIU, have earned at least a 3.25 GPA on both overall and upper division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree program; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is

required. Upon completion of the combined BS/MS pathway, students must have accumulated a minimum of 24 hours of credits at the graduate (5000+) level. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as student assistants on sponsored research projects.

Doctor of Philosophy in Biomedical Engineering

The PhD program in Biomedical Engineering prepares graduates for industrial or academic research in one (or more) of three areas of specialization: 1) Basic research in engineered tissue model systems; 2) Diagnostic bioimaging and sensor systems; and 3) Therapeutic and reparative neurotechnology. Students can gain valuable exposure to clinical practice and research, and acquire real experience in the practice of engineering, product development, and commercialization. Semester-long clinical research experiences are provided, and students have the opportunity to participate in clinical/industrial R&D projects.

Admission Requirements

A prospective student must meet all admission requirements stipulated in the University's Graduate Policies and Procedures. In addition, the requirements for admission to the doctoral program in Biomedical Engineering are stated as follows:

1. A student seeking admission to the doctoral program must have a Bachelor's or Master's degree in Biomedical Engineering, or other closely related field from an accredited institution.
2. A GPA of at least 3.0/4.0 in the upper division coursework of applicant's Bachelor's degree and a GPA of at least 3.3/4.0 in the applicant's Master's degree are required.
3. GRE is required with no minimum score requirements. Applications with higher GRE scores will be considered more preferably.
4. Three letters of recommendation.
5. A statement of research interests and goals.
6. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

The Graduate Admission Committee will examine credentials of all applicants. Applicants who have not satisfied the above will be evaluated for probationary or waiver admission.

Degree Requirements

Credit Requirements

The PhD program requires a total of 75 credit hours beyond the BS degree. These credits are comprised of a minimum of 27 hours of coursework and a minimum of 15 hours of dissertation.

Applicants having a Master's Degree in Biomedical Engineering or closely related field from an accredited institution are given a maximum of 30 transferred semester hours. The graduate program committee and the academic adviser may recommend that applicants take

additional courses based on their research needs and deficiencies. Applicants from science and engineering areas other than biomedical engineering will be expected to complete undergraduate courses selected to prepare them for graduate courses in their area of interest. Full admission into the graduate program requires the completion of these background courses with no grades below "C" and a grade point average of 3.0 or better.

Course Requirements

The program of study will require completion of courses (beyond the BS degree) in the following categories:

Biomedical Engineering – minimum of 15 credits

Courses in this area must cover the major and minor specialty areas of the student. The three current specialty areas within biomedical engineering are:

1. Basic research in engineered tissue model systems
2. Diagnostic bioimaging and sensor systems
3. Therapeutic and reparative neurotechnology

Engineering Mathematics – minimum of 6 credits

Courses in this area must cover the broad areas of statistics and theoretical/numerical modeling. Example courses in each of these areas are:

Statistics

STA 5126 Fund Design of Experiments

or

STA 6176 Biostatistics

Theoretical modeling

BME 6715 Mathematical Modeling of Physiological Systems

or

BME 6716 Mathematical Modeling of Cellular Systems

Numerical modeling

BME 6705 Nonlinear Systems with Applications to Life Sciences

Life Science – minimum of 6 credits

The life science courses may be selected from approved electives such as:

BME 5410 Biomedical Physiology and Engineering I

BME 5411 Biomedical Physiology and Engineering II

BME 6019 Clinical Research Experience

PCB 6025 Molecular and Cellular Biology I

PCB 6027 Molecular and Cellular Biology II

PHZ 6255 Molecular Biophysics

CHM 5325 Physical Chemistry of Proteins

CHM 5506 Physical Biochemistry

CHM 5503 Physical Chem of Nucleic Acids

Biomedical Engineering Seminar

BME 7938 Doctoral BME Seminar 0

Qualifying Examination, Candidacy Requirements, and Final Defense

Students must demonstrate Graduate knowledge acquisition in three incremental stages in order to be awarded a PhD in Biomedical Engineering:

- Qualifying Exam
- Proposal Defense (oral and/or written)

- Final Defense (oral)

Qualifying Exam is offered twice a year: one at the end of Fall semester and the other at the end of Spring semester. Students entering the PhD with a Master's degree have to pass the Qualifying Exam within the first year in the PhD program. Students entering the PhD with a bachelor's degree, have to pass the Qualifying Exam within the first two years in the PhD program. In the semester prior to taking the Qualifying Exam, the student must declare an intention to take the exam and must declare a major area. In the event a student fails the Qualifying Exam, the student may retake it one more time the next time it is offered. A student who has successfully passed the Qualifying Exam and completed all the course work will be formally admitted to PhD candidacy.

The student will be required to prepare a formal dissertation proposal, and successfully defend the content of the proposal before his/her advisory committee. Immediately following the proposal defense, the student's dissertation committee will vote to pass the proposal, to have the student resubmit the proposal within six months, or to dismiss the student from the PhD program. A student can only resubmit his/her proposal once. The dissertation committee should be comprised of at least five members, at least three of whom should be biomedical engineering graduate faculty and at least one FIU graduate faculty member must be from outside biomedical engineering.

All students in the PhD program are required to complete a dissertation under the supervision of an advisor and committee. When the dissertation research is completed, the student should schedule a final defense with the examining committee. The dissertation, with an approval cover letter from the advisor, should be given to the examining committee for review not less than four weeks before the scheduled defense. The candidate should prepare to summarize the dissertation in the manner of a technical paper using appropriate visual aids in 40 minutes or less. Following the presentation, the candidate will answer questions related to the work from the audience and/or the committee. At the conclusion of the defense, the committee will agree upon the outcome pass or fail and report the results to the Graduate School. Following the exam the student will implement the committee's suggestions for improving the draft document. Each committee member must sign the approval form in the final document. Copies of the approved dissertation must be provided to the advisor, Department, and the University Graduate School. Students should become familiar with the University Graduate School's regulations and deadlines available online at <http://gradschool.fiu.edu>.

MS en Route for PhD Candidates

Doctoral candidates who have completed the requirements for the Master of Science degree in Biomedical Engineering and have filed the D-2 and D-3 forms that have been accepted by the University Graduate School will receive a Master of Science en route to the PhD in Biomedical Engineering, respectively.

Courses to be counted in the MS en route must have been taken at FIU. Transfer credits cannot be used for MS en route. Students must consult their Graduate Programs Director to ensure they qualify.

Course Descriptions

Definition of Prefixes

BME-Biomedical Engineering; EEE-Engineering: Electrical and Electronics; EEL-Electrical Engineering; EGM-Engineering Mechanics

BME 5005 Applied Biomedical Engineering Principles

(3). Biomedical engineering applications to instrumentation, transport phenomena, mechanics, materials and imaging. Prerequisite: Permission of the instructor.

BME 5036 Biotransport Processes (3). Transport of fluid, heat, and mass in the human body. Application to dialyzers and heart-lung devices. Prerequisites: BME 3632, BME 4100.

BME 5105 Intermediate Biomaterials Science (3).

Materials used in prosthesis for skin and soft tissue, vascular implant devices, bone repair, and artificial joints. Structure-property relationships for biological tissue. Prerequisite: Permission of the instructor.

BME 5141 Introduction to Laboratory Skills and Materials in Prosthetics and Orthotics (1).

Equipment and tools used in the fabrication of prostheses and orthoses; proper safety techniques and operating procedures; prosthetic and orthotic material characteristics.

BME 5200 Orthopedic Biomechanics (3).

Introduction to the fundamentals of human musculoskeletal physiology and anatomy and computation of mechanical forces as it applies to orthopedic biomechanics. Prerequisite: BME 4100

BME 5213L Clinical Evaluation Tools (3). This course provides an in-depth review of those modern technologies useful for O&P practitioners to plan, assess, treat patients with orthopedic and neurological impairments.

BME 5214L Orthotic Management of the Lower Limb 1

(4). This course provides a comprehensive study of short- and long-term lower limb orthotic patient management distal to the knee.

BME 5215L Prosthetic Management of the Lower Limb 1

(4). This course provides a comprehensive study of short- and long-term lower limb prosthetic patient management distal to the knee.

BME 5218L Orthotic Management of the Spine (3).

This course provides a comprehensive study of short- and long-term spinal orthotic patient management.

BME 5233 Biomechanics of Cardiovascular Systems

(3). Functional cardiovascular physiology and anatomy; analysis and computation of cardiovascular flow; constitutive properties of tissue and analyses of relevant deformation and stress profiles. Prerequisite: Permission from instructor.

BME 5316 Molecular Bioprocess Engineering (3).

Use of enzyme kinetics, bioreactor design, bioseparations and bioprocessing in the biomedical, biopharmaceutical, and biotechnology industries. Prerequisites: BCH 3033, BME 3632.

BME 5336 Cell/Tissue Engineering: Theory and Methodology (3).

Overview of tissue engineering theory

and practice with emphasis on cell behavior and morphology. Prerequisites: BME 5105, BME 3403/5702.

BME 5340 Introduction to Cardiovascular Engineering

(3). Quantitative cardiovascular physiology, engineering applied to cardiovascular system: mechanics, materials, transport, and design.

BME 5350 Radiological Engineering and Clinical

Dosimetry (3). Quantities for describing the interaction of radiation fields with biological systems. Absorption of radiant energy by biological systems. Applications to clinical dosimetry and radiation safety procedures. Prerequisite: Permission of the instructor.

BME 5358L Clinical Rotation in Radiation Oncology

(3). Practical calibration of radiation therapy instruments, dose calculation and planning of radiation treatment under supervision of certified medical physicist. Prerequisite: BME 5505C.

BME 5410 Biomedical Physiology and Engineering I

(3). Introductory course on cardiovascular and respiratory physiology and associated engineering concepts frequently encountered in the Biomedical Engineering field.

BME 5411 Biomedical Physiology and Engineering II

(3). Introductory course on neural and musculoskeletal physiology and associated engineering concepts frequently encountered in the Biomedical Engineering field.

BME 5505C Engineering Foundation of Medical Imaging Instrument (3).

Engineering basis of medical imaging systems, including radiology, X-Ray CT, SPECT, PET, MRI, and laser and ultrasound based imaging, as well as instrument quality assurance procedures. Prerequisite: Permission of the instructor.

BME 5560 Biomedical Engineering Optics (3).

Introduction to physical and geometrical optics of biomedical optical devices. Design of optical microscopes, endoscopes, fiber optic delivery systems, spectrometers, fluorimeters, and cytometers. Prerequisites: Calculus, Differential Equations, Chemistry, and Physics.

BME 5564 Geometrical Optics for Biomedical

Engineers (3). The course introduces concepts and fundamental laws related to geometrical optics. The course will introduce optical components and their use in optical design of bioinstrumentation. Prerequisite: Calculus I

BME 5566L Biomedical Optical Laboratory (3).

Hands on experiences to enhance the skills of designing and doing optical experiments, using optical components such as mirrors, fibers, and lasers to perform measurements imaging and analysis.

BME 5573 Nanomedicine (3).

Nano-scale tools and nanomaterials that result in new medical products and applications with special emphasis on imaging, diagnosis, drug delivery, regenerative medicine as well as new biomaterials. Prerequisites: BME 5105 or permission of the instructor.

BME 5578 Bio- and Nanomedical Commercialization:

Concept to Market (3). This course offers a comprehensive overview of elements involved in

commercialization of bio and nano technology-based R&D.

BME 5726 Protein Engineering (3). Cloning, expressing and purifying proteins, and E. coli and Yeast expression systems. Design of proteins for specific end uses. Prerequisite: Permission of the instructor.

BME 5731 Analysis of Physiological Control Systems (3). Quantitative analysis methods and modeling of the self-regulation processes that result in homeostatic conditions in physiological systems with special emphasis on processes found in the human body. Prerequisites: Permission of the instructor, EEL 3003 or EEL 3110, BME 3404.

BME 5803 Biomedical Device Design (3). User inputs; regulatory, ethical, societal, and environmental considerations; creativity; project management; prototype construction and testing; project feasibility; writing and oral communication. Prerequisite: Permission of the instructor.

BME 5804 Risk Analysis and Management of Biomedical Devices (3). Discuss the importance of risk management for medical devices and steps to implement it during the product development stage.

BME 5805 Regulatory Process for Medical Devices and Drugs (3). Understand the regulatory affairs environment, how to navigate and work with the FDA, and the steps and timetable to develop and commercially market medical devices and drugs in the USA and others.

BME 5935 Nanomedicine Seminar Series (1). This seminar series exposes students to research and innovation in the field of nanomedicine. Experts from hospitals, government, academia, and industry provide weekly rotating talks.

BME 5941 Biomedical Engineering Internship (1-3). Engineering practice in biomedical applications at an industrial partner's site. Intern will be hired through cooperative agreement to conduct collaborative research with supervision of advisor.

BME 6019 Clinical Research Experience (1). Students are matched with and then "shadow" a clinician during procedures (diagnostic and interventional), and research and development activities. Prerequisite: Permission of the instructor.

BME 6212 Solid Mechanics Applications in Physiological Systems (3). Solid mechanics and numerical methods as applied to analysis of the musculoskeletal system and trauma. Design application in orthotics and prosthesis and heart valves. Prerequisites: BME 4007 or permission of the instructor.

BME 6235 Advanced Cardiac Mechanics (3). Applications of principles of solid mechanics to the human cardiovascular system. 3-D reconstruction of the left ventricle, contractile properties and stress distribution in the myocardium. Prerequisite: BME 6212.

BME 6265 Fluid Mechanics Applications in Physiological Systems (3). Fluid mechanics principles including finite element and finite difference methods as it is applied to the analysis of various physiological systems will be covered. Process flow, diffusion and transport will be discussed in cardiovascular and pulmonary systems. Application of these primarily in the design of heart-lung machines, dialysis units, and heart valves will be

discussed. Prerequisites: BME 4007 or permission of the instructor.

BME 6266 Advanced Biofluid Mechanics (3). Applications of fluid mechanics principles to human circulatory systems. Unsteady blood flow and wave propagation in elastic tubes. Influence of fluid dynamics on thrombosis and atherosclerosis. Prerequisite: BME 6265.

BME 6315 Cytomic and Proteomic Measurement Techniques (3). Principles and methods of cytoxic, proteomic and genomic technology. Cellular probes, variance of protein expression. Description of the genome. Cytometry assays, protein structure, microarrays.

BME 6345 Advanced Cardiovascular Engineering (3). Engineering modeling, design, and measurements related to cardiovascular system, disease and diagnosis. Prerequisite: BME 5340.

BME 6351C Radiation Safety in Biomedicine (3). Theory and engineering basis of radiation safety in diagnostic and therapeutic radiology. Regulatory issues for the safe use of radiation in medicine. Prerequisite: BME 5350.

BME 6353C Advanced Radiation Dosimetry (3). State of the art of radiation treatment planning in radiation oncology. Intensity modulated radiation treatment methods and instruments.

BME 6359L Clinical Rotation in Diagnostic Radiology (3). Measuring of radiation fields for quality assurance of diagnostic radiology and nuclear medicine instruments under supervision of a certified medical physicist. Prerequisite: BME 5505C.

BME 6421 Electrophysiological Phenomena in Biological Tissues (3). Provide a balanced understanding of the origin of major electrical phenomena in biology with emphasis on the genesis and data analysis of the electro- and magneto- encephalography. Prerequisite: Permission of the instructor.

BME 6501 Applied Biomedical and Diagnostic Measurements (3). Fundamentals of biomedical measurements and the design of biomeasurement systems and devices. This includes transducers and electrodes, EMG, EEG, ECG and medical imaging techniques, and electrical safety. Prerequisites: BME 4007 or permission of the instructor.

BME 6532 Molecular Imaging (3). Synthesis of PET and SPECT radiopharmaceuticals and optical imaging agents, pharmacokinetics and experimental models of molecular imaging tracer kinetics, imaging of molecular processes and function. Prerequisite: Permission of instructor.

BME 6545 Biosensors and Nanobioelectronics (3). Advanced topics in the design and practical application of bioelectronic devices such as biosensors, DNA nanowires, analytical electrochemistry and biomolecular electronics. Prerequisites: Permission of the instructor, CHM 1046, BCH 3033.

BME 6563 Optical Spectroscopy (3). Introduction to the scientific principles of optical spectroscopic technologies and their usage in the field of medicine. Prerequisite: Permission of the instructor.

BME 6564 Optical Imaging Biomedicine (3). Optical techniques for imaging the structure and function of biological tissues. Modeling of light transport in tissue (forward problem) and image reconstruction (inverse problem). The basic physics and engineering of each optical based imaging technique will be covered. Prerequisites: BME 4562 or BME 5560, MAP 2302.

BME 6565 Quantitative Microscopy and Visualization (3). Practical and useful projects in optical, confocal, near field, scanning probe and other advanced microscopy and cytometry. Spatial and spectral quantitation of physiologic measures in living tissue. Prerequisite: Permission of the instructor. Corequisite: BME 5560.

BME 6645 Drug Transport Modeling (3). Theoretical and experimental models of drug transport systems, computer simulations of fluid and mass transport in biomedical systems, pharmacokinetics modeling and molecular imaging. Prerequisite: Permission of instructor.

BME 6705 Nonlinear Systems with Applications to Life Sciences (3). Concepts and applications of nonlinear dynamics to life sciences. Specific nonlinear models arising from biology and medicine will be investigated using computer simulations. Prerequisite: Permission of the instructor.

BME 6715 Mathematical Modeling of Physiological Systems (3). Engineering modeling, design, and measurements related to cardiovascular system, disease and diagnosis. Prerequisite: Permission of the instructor.

BME 6716 Mathematical Modeling of Cellular Systems (3). Development of mathematical modeling techniques for engineers using cellular systems as an application. Biochemical reactions, membrane potentials, excitable cells, wave propagation, cellular regulation. Prerequisite: Permission of the instructor.

BME 6717 Computational Analysis and Simulation of Physiological Processes (3). Study of advanced computational techniques in BME. Focus on execution (in MATLAB), conceptualization, analysis of the relevant literature, and oral presentation of results. Corequisite: STA 4202 or STA 4234 or STA 5236 or STA 6176 or STA 6746

BME 6335 Artificial Organs (3). Theoretical and experimental models of artificial organs for drug delivery, extracorporeal devices, oxygenators, models of tissue engineered organs, computer simulations of fluid and mass transport. Prerequisites: Permission of instructor.

BME 6763 Bioinformatics in Cytomics (3). Biomedical data archiving, analysis and visualization. Medical imaging, microscopy imaging, multiparameter cytometry sensors, protein and gene sequencing data processing are emphasized.

BME 6905 Independent Studies (1-3). Individual research studies for qualified biomedical engineering graduate students. Work is to be performed under the supervision of an advisor.

BME 6907 BME Master's Project (3). Individual work culminating in a professional practice-oriented report suitable for the requirements of the Professional Track of the MS program in biomedical engineering. Prerequisite: Permission of the instructor.

BME 6910 Supervised Research (1-6). Graduate level biomedical engineering research carried out under the supervision of a faculty member.

BME 6933 Workshop in Biomedical Engineering Techniques (1). A short intensive treatment of specialized research topics or techniques in biomedical engineering. May be repeated for credit with different subject content. Prerequisite: Permission of the instructor.

BME 6936 Biomedical Engineering Seminar (0). Problems in Biomedical Engineering and results of ongoing research will be presented and discussed by invited experts. Prerequisite: Permission of the instructor.

BME 6970 Master's Thesis (1-6). Master's thesis on Biomedical Engineering is to be submitted and an oral presentation is to be made. Thesis should contain aspects of design to fulfill requirements for combined BS/MS program. Prerequisite: Advisor's permission.

BME 7334C Cell/Tissue Engineering: Methods and Applications (4). Overview of tissue engineering theory and practice with emphasis on cell behavior and morphology. Prerequisite: BME 6330.

BME 7938 Doctoral Biomedical Engineering Seminar (0). The course consists of oral presentations made by guests, faculty and graduate students on advanced topics and current research activities in Biomedical Engineering. Prerequisites: Permission of the major professor and Doctoral Candidacy.

BME 7980 Ph.D. Dissertation (1-12). Doctoral Research leading to the Ph.D. Biomedical engineering dissertation. Prerequisites: Permission of the major professor and Doctoral Candidacy.

EEE 5261 Bioelectrical Models (3). Engineering models for electrical behavior of nerve and muscle cells, electrode-tissue junctions, volume conduction in tissue and the nervous system as an electrical network. Prerequisites: EEE 4202C or permission of the instructor.

EEE 5275 Bioradiation Engineering (3). Spectrum of radiation sources, types of fields, properties of living tissue, mechanisms of field propagation in tissue. Applications in imaging and therapy, hazards and safety. Prerequisites: EEL 4410 or permission of the instructor.

EEE 6285 Biosignal Processing I (3). Characterizing biosignals by application of time and frequency domain analytic methods. Comparison of analog and digital processing. Engineering design for VLSI implementations in implantable devices. Prerequisites: EEE 4202C and EEE 6502 or permission of the instructor.

EEE 6286 Biosignal Processing II (3). Engineering design of advanced systems for processing biosignals. Methods for signal compression. Adaptive systems for automatic recognition. Application of artificial intelligence for signal classification. Prerequisites: EEE 6285 or permission of the instructor.

EEL 5820 Digital Image Processing (3). Image Fundamentals, Image Transforms, Image Enhancement, Edge Detection, Image Segmentation, Texture Analysis, Image Restoration, and Image Compression. Prerequisites: EEL 3135 and knowledge of any programming language (FORTRAN, Pascal, C).

EEL 6816 Electronic Neural Systems (3). This course bridges electronics to the understanding of neurobiologically inspired models. Biological tasks and neural computations are studied in the context of networks and processing elements. Prerequisite: Permission of the instructor.

EEL 6821 Computer Vision (3). Image formation and image properties, radiance and irradiance, introduction to brain topography, color vision, visual machinery of the brain, statistical pattern classification and decision functions, the eigensystem and its computational aspects, stereo vision, motion vision, size and orientation independence. Prerequisite: EEL 5820.

EEL 6836 Computer Visualization of Brain Electrical Activity (3). Computer techniques for the visualization of brain electrical activity. Analysis of the origin of this activity as it relates to its measurement and visualization through computerized systems. Prerequisites: EEE 4510 or permission of the instructor.

The Department of Civil and Environmental Engineering offers advanced study for the degree of Master of Science and Doctor of Philosophy. Degrees offered include: Master of Science in Civil Engineering, Master of Science in Environmental Engineering, and Doctor of Philosophy in Civil Engineering. The areas of specialty are Structures, Mechanics, Geotechnical, Construction, Transportation, Water Resources, and Environmental Engineering.

Master of Science in Civil Engineering

The Master of Science program in Civil Engineering emphasizes course work as well as research. The student is required to specialize in a defined area of civil engineering, but may broaden knowledge through studies combining subject material from different areas of specialization and interdisciplinary related courses.

The graduate degree is offered to prepare qualified students for the professional practice of or advanced academic research in civil engineering. The degree is available in either a thesis or non-thesis program. The thesis program entails a minimum of six credits for the successful completion of research and a thesis. The non-thesis program must be supported by either the successful completion of an engineering project and a report of substantial engineering content for a minimum of three credits or the all-course option. A student must satisfactorily complete a minimum of 30 semester credits of acceptable graduate course work.

Master of Science in Environmental Engineering

A Master of Science in Environmental Engineering is available to students interested in graduate work in Environmental Engineering. The program is designed to expose graduate students to a wide range of knowledge on environmental engineering and on problem solving while encouraging them to pursue individual research interests. Thus, the curriculum has a common core of courses but is flexible enough to permit an interdisciplinary approach, if so desired, and allows the student to pursue his or her career goals.

The applicant should hold a Bachelor's degree in engineering, the natural sciences, or a closely related field. Students who do not meet the stated criteria may be considered for admission if they satisfy deficiencies and complete required prerequisites. A student must satisfactorily complete a minimum of 30 semester credits of acceptable graduate courses, including either a master thesis or an engineering project or the all-course option.

Admission Policies for Master of Science Programs

A student seeking admission into the Civil Engineering or the Environmental Engineering graduate program must have a bachelor's degree in Civil Engineering, Environmental Engineering, or related engineering or equivalent from an accredited institution or, in the case of foreign students, an institution recognized in its own country as preparing students for further study at the graduate level. The minimum requirements for admission to the Master programs are:

1. At least a "B" average in upper level undergraduate work, and
2. A bachelor's degree in engineering, science, or a closely related field from an accredited institution, and
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required, and

4. Three letters of recommendation or the forms provided by the department, and
5. A statement of objectives in which, in addition to other information, the intended concentration must be clearly stated, and
6. A resume including contact information, education and employment history, practical and research experiences (such as projects and publications), skills and other pertinent information.

Students who meet all criteria, except for requirements 1 and 2 above, may be evaluated for conditional admission. Meeting the minimum requirements does not guarantee admission to the programs.

Grades earned at an institution with non-traditional grading systems will be given every consideration and applicants will be treated equally as are students from institutions with traditional grading systems.

Application Procedures for Master of Science Programs

A student planning to enroll in the graduate program must complete the following:

1. Submit an online Graduate Application for Admission to the Graduate Admissions Office.
2. Have a copy of the official transcripts of all previously earned college or university credits sent from the applicant's former institution(s) to the Graduate Admissions Office.
3. Submit three letters of recommendation, statement of objectives, and resume as part of the online Graduate Application for Graduate Admissions Office.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

It should be emphasized that the admission cannot be acted upon until all of the documents and credentials have been received.

Students seeking a waiver to normal admissions standards must contact the departmental main office for filing instructions and deadlines.

Degree Requirements for Master of Science Programs

To be eligible for a Master's degree a student must:

1. Satisfy all University requirements for a Master's degree.
2. Meet all undergraduate deficiencies, and requirements as specified by the students' advisory committee.
3. Complete 30 semester hours of acceptable graduate level courses, including up to 3 credits of an Independent Study course. Supervised Research credits are not counted toward the 30 credit degree requirement.
4. Optionally, complete an acceptable thesis (minimum six credits) or engineering project (minimum three credits).
5. Successfully complete the core courses defined for the student's chosen specialty area.
6. Earn a minimum grade point average of 3.0 in all approved courses in the student's program of study.

7. Complete CGN 6939 Graduate Seminar.
8. For students who chose the thesis option, they must get approval and written evaluation of the oral defense and written thesis by their thesis committee. The committee should have, at a minimum, three graduate faculty members, and each member must complete and sign the student evaluation.
9. For students who chose the engineering project option, they must get approval and written evaluation of the oral defense and written engineering project by their project committee. The committee should have, at a minimum, three graduate faculty members, and each member must complete and sign the student evaluation.
10. For students who chose the non-thesis and non-engineering project (all-course) option, they must present a 5-page written report (in the format of a journal article) and an oral presentation (in CGN 6939) of a selected topic that demonstrates substantial professional engineering knowledge and experience. The written report and oral presentation must be evaluated and the student evaluation forms must be completed and signed by two departmental graduate faculty members, at a minimum, and then used by the CGN 6939 instructor to issue a P/F grade. The seminar will be scheduled and will be announced to students and faculty at least one week in advance in the last semester of the student's program.

Core Courses

In order to master real-life engineering problems, engineers need to have an education with both breadth, as well as depth. Therefore, in addition to the above degree requirements, students must choose an area of technical specialization upon enrollment and satisfy the core course requirements as defined below. A proposed program of study shall be developed by a student's academic advisor together with the student and approved by the Graduate Program Director. All students are strongly encouraged to take the Research Methods for Civil Engineers course - especially those who are pursuing the thesis option. Students are also required to register for the 0-credit Graduate Seminar (CGN 6939) at least once and are encouraged to take it each Fall and Spring semesters.

Areas of Technical Specialization:

Environmental Engineering

Environmental engineering students are required to take at least one course in each of the following core areas:

1. Water supply/wastewater/water quality,
2. Air quality,
3. Soil/solid/hazardous waste, and
4. Water resources (including groundwater).

Furthermore, it is advisable that students gain some expertise in environmental chemistry and in computational techniques including GIS techniques, while seeking knowledge in new areas of research and development.

Students are also required to register for the zero-credit Graduate Seminar (CGN 6936) and are encouraged to participate in it each semester.

Water Resources Engineering

This field involves the analysis of qualitative and quantitative water issues and the search for integrated, innovative and sustainable solutions to problems in the surface, groundwater, and atmospheric water environments.

Students pursuing a M.S. in Civil Engineering with concentration in Water Resources Engineering will follow a program of study that includes 15 credit-hours of engineering coursework emphasizing advanced knowledge and applications in either hydrology, hydraulics or hydrosystems or their combination thereof. The students will also complete a three credit-hour independent study to enrich the area of sought expertise.

Students are also required to comply with the following core requirements:

1. Take one course (3 credit-hours) among the following three background courses:
 - CWR 5305 Surface Hydrology
 - CWR 5125 Groundwater Hydrology
 - CWR 5140C Ecohydrology
2. Take one among the following applied courses:
 - CWR 5235 Open Channel Hydraulics
 - CWR 5535 Advanced Modeling Applications in Water Resources Engineering
 - CWR 6236 Engineering Sediment Transport

Students are required to take the Graduate Seminar (CGN 6939) once and are strongly encouraged to attend it while registering in the program. Students may also include up to six credit hours from other civil engineering areas or related disciplines, as long as the subjects relevantly add to the student's water resources engineering knowledge.

Structural Engineering

Students pursuing a M.S. in Civil Engineering with concentration in Structural Engineering will take at least twelve (12) credit hours of elective courses in structural engineering relevant to their track. A maximum of six (6) credits taken outside of the Civil and Environmental Engineering Department to enhance knowledge from related disciplines can be applied, upon approval of the academic advisor (or major professor), to graduation requirements. Furthermore, it is advisable that students gain some expertise in numerical methods.

Students in the Structural Engineering track are required to take at least six (6) credit hours of core course work as follows:

1. One course (3 credits) in design of structures from the following:
 - CES 5325 Design of Highway Bridges
 - CES 5606 Advanced Structural Steel Design
 - CES 5715 Prestressed Concrete Design
 - CES 5800 Timber Design
 - CES 6706 Advanced Reinforced Concrete Design
2. One course (3 credits) in analysis of structures from the following:
 - CES 5106 Advanced Structural Analysis
 - CES 5587 Topics in Wind Engineering
 - CES 6209 Advanced Structural Dynamics
 - EGM 5421 Structural Dynamics

Construction Engineering

Students pursuing a M.S. in Civil Engineering with concentration in Construction Engineering will follow a program of study that includes at least fifteen (15) credit-

hours of civil engineering coursework that focuses on knowledge and applications within Construction Engineering of civil and environmental engineering infrastructure. The students will also complete a three (3) credit-hour independent study to enrich their graduate experience. Furthermore, it is advisable that students gain expertise in state-of-the-art computational methods in construction engineering.

Students in the Construction Engineering track are required to take at least six (6) credit hours of core course work from the following:

1. CCE 5035 Construction Engineering Management;
2. CCE 5036 Advanced Project Planning for Civil Engineers
3. CCE 5405 Advanced Heavy Construction Techniques

Geotechnical Engineering

Students pursuing a M.S. in Civil Engineering with concentration in Geotechnical Engineering will follow a program of study that includes at least fifteen (15) credit-hours of civil engineering coursework that focuses on knowledge and applications to the Geotechnical Engineering of civil and environmental engineering infrastructure. The students will also complete a three (3) credit-hour independent study to enrich their graduate experience. Furthermore, it is advisable that students gain expertise in state-of-the-art computational methods in construction engineering.

Students in the Geotechnical Engineering track are required to take at least six (6) credit hours of core course work from the following:

1. CEG 5065 Geotechnical Dynamics
2. CEG 6017 Theoretical Geotechnical Mechanics; and
3. CEG 6105 Advanced Foundations Engineering

Transportation Engineering

Transportation engineering is concerned with the planning, design, operation, and maintenance of the transportation infrastructure and systems. A student who chooses to specialize in transportation engineering must complete a minimum of five courses from the list below:

TTE 5205	Advanced Highway Capacity Analysis
TTE 5215	Fundamentals of Traffic Engineering
TTE 5607	Transportation Demand Analysis
TTE 5805	Advanced Geometric Design of Highways
TTE 6257	Traffic Control Systems Design
TTE 6506	Mass Transit Planning
CGN 5320	GIS Applications in Civil and Environmental Engineering

Students are also required to register for the zero-credit Graduate Seminar (CGN 6936) and are encouraged to participate in it each semester.

Independent Study Course

A student may take up to a total of three credits of independent study, which will be letter graded. If a student needs a course that will not be offered during the student's course of study, special topics courses should be set up to meet the student's needs. There will be no limit on the number of special topics courses provided that the core course requirements are satisfied.

Grades and Credits

No course in which a grade below a 'C' is earned may be counted toward a Master of Science degree.

Transfer Credit

The student may receive permission to transfer up to a maximum of six semester hours of graduate credit earned from another institution or up to 12 semester hours of graduate credit earned as a non-degree seeking students at FIU after admitted into one of the graduate programs in the Civil and Environmental Engineering Department. Such credits are transferable provided that: (1) the course(s) were taken at the graduate level at an accredited college or university; (2) grade(s) of 'B' or higher were earned for the courses; (3) the course(s) are judged relevant by the student's advisory committee; (4) the credits were not used toward another degree; and (5) the credit(s) were completed within six years immediately preceding the awarding of the degree.

Credits are not transferable until the student has earned 12 semester hours in the graduate programs in the Department of Civil Engineering and Environmental Engineering.

Time Limit

All work applicable to the Master's degree, including transfer credits, must be completed within six years of first enrollment in the master's program.

Combined BS/MS in Civil Engineering Degree Pathway

Students who pursue a BS degree in Civil Engineering and have completed 75 credits and have at least a 3.3 GPA on both overall and upper division courses may apply to enroll in the combined BS/MS pathway in Civil Engineering upon recommendation from three CEE faculty members. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the admission requirements of both the department and the University Graduate School. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment pathway. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of B is required. All double counted courses must be at 5000 level or higher. Students enrolled in the pathway may

count up to nine credit hours of CEE graduate courses toward the elective engineering BS requirements as well as toward the MS degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for the pathway. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form and submitting it to the Undergraduate Advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Undergraduate students enrolled in the pathway are encouraged to seek employment with a department faculty to work as student assistants on sponsored research projects. The students will be eligible for graduate assistantships upon full admission into the graduate school.

Combined BS in Civil Engineering/MS in Environmental Engineering Degree Pathway

Students who pursue a BS degree in Civil Engineering and are in their senior year and have at least a 3.3 GPA on both overall and upper division courses may apply to the department to enroll in the combined BS (Civil)/MS pathway in Environmental Engineering upon recommendation from three CEE faculty members. To be considered for admission to the combined bachelor's/masters degree pathway in Environmental Engineering, students must have completed at least 75 credits in the bachelor's degree program in Civil Engineering at FIU and meet the admissions criteria for the graduate degree program at FIU and meet the admissions criteria for the graduate degree program to the which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to the Graduate Admissions typically before the student starts the last 30 credit of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and will be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the credits specified by the program catalog, may be applied toward both degrees. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the admission requirements of both the department and the University Graduate School.

Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment pathway. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS

degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of "B" is required. All double counted courses must be at 5000 level or higher. Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses toward the elective engineering BS requirements as well as toward the MS degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for the pathway. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form and submitting it to the Undergraduate Advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Undergraduate students enrolled in the pathway are encouraged to seek employment with a department faculty to work as student assistants on sponsored research projects. The students will be eligible for graduate assistantships upon full admission into the graduate school.

Combined BS/MS in Environmental Engineering Degree Pathway

Students who pursue a BS degree in Environmental Engineering and are in their senior year and have at least a 3.3 GPA on both overall and upper division courses may apply to the department to enroll in the combined BS/MS pathway in Environmental Engineering upon recommendation from three CEE faculty members. To be considered for admission to the combined bachelor's/masters degree pathway in Environmental Engineering, students must have completed at least 75 credits in the bachelor's degree program in Environmental Engineering at FIU and meet the admissions criteria for the graduate degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to the Graduate Admissions typically before the student starts the last 30 credit of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and will be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the credits specified by the program catalog, may be applied toward both degrees. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the admission requirements of both the department and the University Graduate School.

Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment

pathway. However, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to one year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this one year post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the nine credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of "B" is required. All double counted courses must be at 5000 level or higher. Students enrolled in the pathway may count up to nine credit hours of CEE graduate courses toward the elective engineering BS requirements as well as toward the MS degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the Undergraduate Advisor.

Students interested in the pathway should consult with the Undergraduate Advisor on their eligibility for the pathway. The students should also meet the Graduate Program Director to learn about the graduate program and available courses before completing the application form and submitting it to the Undergraduate Advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Undergraduate students enrolled in the pathway are encouraged to seek employment with a department faculty to work as student assistants on sponsored research projects. The students will be eligible for graduate assistantships upon full admission into the graduate school.

Doctor of Philosophy in Civil Engineering

Minimum Admission Requirements

The minimum requirements for admission to the doctoral degree program in Civil Engineering are:

1. Applicants having a Master's degree in Civil Engineering or Environmental Engineering (the latter for those applicants seeking the environmental area of specialization only) from a U.S. institution must satisfy the following requirements for admission to the doctoral program:
 - a. GPA of at least 3.3/4.0 in the master's program
 - b. Official GRE scores
 - c. Three letters of recommendation or recommendation forms provided by the department
 - d. A statement of objectives in which, in addition to other information, the intended research area must be clearly stated. (see identification of Research Area)
 - e. A resume containing contact information, education and employment history, practical and research experiences (including publications), skills and other pertinent information.
2. Credentials of all other applicants including those with foreign degrees and those with B.S. degrees in disciplines other than Civil Engineering (or Environmental Engineering) will be examined by the Graduate Program Advisory Committee on a case by

case basis. Additional credentials that will be considered include, but are not limited to, work experience, awards and recognitions, publications and presentations, and other professional experience.

- International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
- In addition to the departmental requirements, all students must satisfy the University's Admission and Graduate Policies and Procedures.

Degree Requirements

Maximum Length of Study

The maximum length of study is seven years for students admitted with an acceptable B.S. degree and six years for students with an acceptable M.S. degree. For those students who have not completed their studies within these limits, the length of study may be extended on a yearly basis after petition by the student and approval by the student's supervisory committee. Any extension beyond nine years must be approved by the University Graduate School.

Identification of Research Area

There are currently three main areas of research or specialization: (1) Structural, Geotechnical, and Construction Engineering; (2) Environmental and Water Resources Engineering; and (3) Transportation Engineering. The student must contact the Department for a list of all faculty members, visit them, and be accepted by one professor to guide the dissertation research. If no such professor can be found, within 15 months of admission, the student will be dismissed from the Ph.D. program.

Course Requirement

The program will consist of at least 75 semester credit hours beyond the baccalaureate degree, 54 hours of which are course work and 15 hours dissertation, or at least 45 semester credit hours beyond the M.S. degree, 24 hours of which are course work and 15 hours dissertation. Applicants who have a Master's degree in Civil Engineering or Environmental Engineering (the latter for those applicants seeking the environmental area of specialization only) or a closely related engineering field from an accredited institution may be given a maximum of 30 transferred semester credit hours. In addition to the above requirements, the selection of courses must meet the following requirements for credits beyond the Master's degree:

- Minimum three credits in Mathematics or Statistics
- Minimum 18 core credits (see exception under Core Courses below) in the selected major area in Civil Engineering (or Environmental Engineering).
- Any deviation from requirements 1 and 2 above must be justified in writing and approved by the departmental Graduate Program Director.
- Complete CGN 6939 – Graduate Seminar.

Additional engineering courses (3000 and 4000 level) may be required as deficiencies for students coming from other engineering and non-engineering majors.

All courses and dissertation topics must be approved by the student's dissertation committee. A proposed program

of study shall be developed by a student's major professor together with the student and approved by the Graduate Program Director.

Core Courses

All Ph.D. students must satisfy the core course requirements defined for the MS degree programs, except those students who, upon admission, have completed an eligible and acceptable BS and MS degrees programs in Civil Engineering. A student may take other courses, preferably at the 6000-level and above, in the specialty as well as in other areas to meet the minimum 18 hours of departmental coursework requirement, as approved by the major professor and the dissertation committee, provided all the core courses have been completed previously during the MS program or will be completed in the Ph.D. program. In addition, all doctoral students are required to take the Research Methods for Civil Engineers courses before or during the first semester of dissertation credits. Students are also required to register for the 0-credit Graduate Seminar (CGN 6939) at least once and are encouraged to take it each Fall and Spring semesters.

Directed Independent Study Course (CGN 6905)

A student may take up to a total of three credits of directed independent study, which will be letter graded. If a student needs a course that will not be offered during the student's course of study, special topics in civil engineering courses should be set up to meet the student's needs. There will be no limit on the number of special topics courses provided that the core course requirements are satisfied.

Dissertation Committee

The student's dissertation committee should be appointed as soon as possible and within the 15-month period after the student has been admitted to the Ph.D. program. The committee must have a minimum of four eligible faculty members, at least three from the Department of Civil & Environmental Engineering, and at least one from outside the department, but within FIU. All committee members should have a Ph.D. degree and must be members of the graduate faculty. The major professor must hold dissertation advisor status. The dissertation committee should meet as early as possible to review student's background, discuss student's expected research areas, provide guidance on course selection, etc.

Residency Requirements

The Ph.D. student should spend at least one academic year in full residency, after successfully passing his/her Comprehensive Examination (see the following description).

Examinations

A student must successfully complete the following written exam and oral defenses in partial fulfillment of requirements for the Ph.D. degree in Civil Engineering:

- Qualifying Exam: The Qualifying Exam must be taken as soon as possible and no later than the semester the student completes the minimum applicable course requirements. The exam consists of eight problems covering materials from core courses as determined by the student's dissertation committee. The exam will be open-book and the student will be given eight hours to solve all eight problems. In the event that a student fails the exam, he or she can retake it only once in the subsequent semester.

2. Proposal Defense: The proposal defense must be completed at least one year prior to the expected graduation date. In addition to the five-page proposal (brief version) required by the University Graduate School, the student must prepare a detailed proposal that contains, at a minimum, background information, problem statement, objectives, literature review, methodology, work plan, and schedule. The proposal must be submitted to each committee member at least two weeks prior to the defense date. The defense will be given in the form of a graduate seminar that is open to all faculty, students, and visitors. A student can take the proposal defense twice.
3. Dissertation Defense: A draft dissertation must be submitted to each committee member at least six weeks prior to the date of the defense. The defense will be given in the form of a graduate seminar that is open to all faculty, students, and visitors. A student can fail this defense only once. In addition to dissertation copies to the University Graduate School, the student must deliver one final approved bound copy to the Department Chairperson, one to the major professor, and one to each member of the dissertation committee. Students should become familiar with the University Graduate School's policies, procedures, regulations and deadlines available on line at <http://gradschool.fiu.edu>.

MS en Route for PhD Candidates

Doctoral candidates who have completed the requirements for the Master of Science degree in Civil Engineering or Environmental Engineering and have filed the D-2 and D-3 forms that have been accepted by the University Graduate School will receive a Master of Science en route to the PhD in Civil Engineering or Environmental Engineering, respectively. Courses to be counted in the MS en route must have been taken at FIU. Transfer credits cannot be used for MS en route. Students must consult their Graduate Programs Director to ensure they qualify.

Course Descriptions

Definition of Prefixes

CES-Civil Engineering Structures; CEG-Engineering General, Civil; CGN-Civil Engineering; CWR-Civil Water Resources; EES-Environmental Engineering Science; EGM-Engineering, Mechanics; EGN-Engineering, General; ENV-Environmental Engineering; TTE-Transportation and Traffic Engineering; URP-Urban and Regional Planning

CCE 5035 Construction Engineering Management (3). Course will cover construction organization, planning and implementation; impact and feasibility studies; contractual subjects; liability and performance; the responsibility of owner, contractor and engineer. Prerequisites: CES 3100 or equivalent and CEG 4011 or equivalent.

CCE 5036 Advanced Project Planning for Civil Engineers (3). Advanced techniques and methods for planning activities, operations, finance, budget, workforce, quality, safety. Utilize case studies as learning tools for students aspiring to management positions. Prerequisites: CCE 4031 or equivalent.

CCE 5405 Advanced Heavy Construction Techniques (3). Heavy construction methods and procedures involved in large construction projects such as bridges, cofferdams, tunnels, and other structures. Selection of equipment based on productivity and economics. Prerequisite: CCE 4001.

CCE 5505 Computer Integrated Construction Engineering (3). Course covers the discussion of available software related to Construction Engineering topics; knowledge based expert systems and their relevance to construction engineering planning and management. Prerequisites: CCE 4031 or equivalent.

CEG 5065 Geotechnical Dynamics (4). Analytical, field, and laboratory techniques related to vibration problems of foundations, wave propagations, behavior of soils and rocks, earth dams, shallow and deep foundations. Earthquake engineering. Prerequisite: CEG 4011.

CEG 6017 Theoretical Geotechnical Mechanics (3). A continuum mechanics interpretation of geotechnical engineering; soil rheology; theories of yielding; failure and plastic stability. Analytical and numerical modeling of non-linear properties. Prerequisites: CEG 4012C and MAP 2302. Suggested corequisite: MAP 4401.

CEG 6105 Advanced Foundations Engineering (3). Computer applications involving the numerical analysis and design of complex soil-structure interactions: highway and airfield pavements, deep foundation groups and NATM tunnelling techniques. Prerequisite: CEG 4012.

CES 5106 Advanced Structural Analysis (3). Extension of the fundamental topics of structural analysis with emphasis on energy methods and methods best suited for nonprismatic members. Prerequisite: CES 3100.

CES 5325 Design of Highway Bridges (3). Structural analysis and design for highway bridge systems which includes design criteria, standards of practice and AASHTO specifications for designing super-structures and substructure elements of various types of bridges. Prerequisites: CES 4605, CES 5715, and CEG 4011.

CES 5565 Computer Applications in Structures (3). Discussion and application of available computer programs, techniques and equipment for the analysis, design and drafting of structures. Graduate students have to do a project. Prerequisites: CES 4605 and CES 4702.

CES 5587 Topics in Wind Engineering (3). The course will cover the nature of wind related to wind-structure interaction and design loads for extreme winds, tornadoes and hurricanes. Prerequisites: CES 3100 Structural Analysis and CWR 3201.

CES 5606 Advanced Structural Steel Design (3). Extension of the analysis and design of structural elements and connections for buildings, bridges, and specialized structures utilizing structural steel. Prerequisite: CES 4605.

CES 5715 Prestressed Concrete Design (3). The behavior of steel and concrete under sustained load. Analysis and design of pre-tensioned and post-tensioned reinforced concrete members, and designing these members into the integral structure. Prerequisite: CES 4702.

CES 5800 Timber Design (3). The analysis and design of modern wood structures. Effect of plant origin and physical structure of wood on its mechanical strength; fasteners and their significance in design. Prerequisite: CES 3100.

CES 6209 Advanced Structural Dynamics in Civil Engineering (3). Response of structures subjected to arbitrary forms of deterministic dynamic loading; formulation of methods to evaluate stresses and deflections due to vibrations. Prerequisite: EGM 5421.

CES 6706 Advanced Reinforced Concrete Design (3). The analysis and design of reinforced concrete and masonry structural systems to formalize the student's knowledge of the behavior of structural components into a final integrated structure. Prerequisite: CES 4702.

CES 6707 Reinforced Concrete Mechanics (3). Limit analysis of reinforced concrete. Concrete plasticity. Use and advantages of methods derived from basic mechanics. How reinforced concrete members respond to overload and fail. Prerequisite: CES 6706.

CGN 5315 Civil Engineering Systems (3). Application of systems analysis techniques to large scale civil engineering problems. Prerequisites: ESI 3314 or equivalent.

CGN 5320 GIS Applications in Civil and Environmental Engineering (3). Introduction to the basics of geographic information systems, their software and hardware, and their applications in Civil and Environmental Engineering, landscape architecture, and other related fields. Corequisites: TTE 4201 or CWR 3540 or ENV 3001.

CGN 5407 Advanced Numerical Methods for Nonlinear and Large Deformation Problems in Civil Engineering (3). The course will discuss a suite of advanced numerical methods for computational solutions to effectively tackle the nonlinear and large deformation problems in civil engineering. Prerequisites: CGN 4011, EGM 5351

CWR 5635 Optimization in Water Resources Engineering (3). This course presents the fundamentals of optimization techniques and their applications to various water resources engineering problems such as flood control and design of hydraulic structures. Prerequisite: CWR 3540 or permission of instructor

CGN 5870 Corrosion Control in Civil Engineering (3). The course provides understanding of principles of corrosion phenomena with emphasis on its application to materials in civil engineering including testing methods, corrosion control, and durability. Prerequisite: Permission of the instructor.

CGN 5874 Building Diagnostics (3). This course will give an introduction into building diagnostics with a focus on non-destructive testing (NDT) techniques used to investigate Civil Engineering materials and structures. Prerequisites: Graduate standing, enrolled in engineering curriculum.

CGN 5930 Special Topics in Civil Engineering (1-3). A course designed to give groups of students an opportunity to pursue special studies not otherwise offered. Prerequisite: Permission of the instructor.

CGN 5935 Professional Engineering (Civil) Review (4). Prepares qualified candidates to take the P.E. written examination in the field of Civil Engineering. Reviews

hydraulics, hydrology, water supply and wastewater, geotechnics, structures, concrete and steel design, etc.

CGN 6030 Research Methods for Civil Engineers (1). Survey and critical analysis of research in the disciplines of civil and environmental engineering. Emphasizes theory and methods of conducting advanced research, including the scientific method. Prerequisites: First-year doctoral or master standing.

CGN 6308 Intelligent Civil Engineering System (3). Application of artificial intelligence and other techniques to build intelligent civil and environmental engineering systems. Develop planning, design, analysis, diagnosis, control, monitoring applications through projects. Prerequisite: Permission of the instructor.

CGN 6325 Advanced GIS for Civil and Environmental Engineering (3). Advanced GIS concepts and techniques for civil and environmental engineering applications including LRS, temporal GIS, 3D modeling, GIS data accuracy and standards, spatial statistical analysis, and others. Prerequisites: CGN 5930 or permission of the instructor.

CGN 6426 Advanced Computing in Civil Engineering (3). Advanced computer modeling and programming techniques for civil and environmental engineering applications including data modeling, engineering database design, object-oriented programming, and user interface design. Prerequisite: Permission of the instructor.

CGN 6905 Directed Independent Study (1-3). Individual conferences, assigned readings, and reports independent investigations selected by the student and professor with approval of advisor.

CGN 6910 Supervised Research (1-12). Graduate level research carried out under the supervision of a faculty member. Maximum 12 credits can be counted for Ph.D. students only. Prerequisite: Permission of the Major Professor.

CGN 6916 Engineering Project (1-3). Independent research work culminating in a professional practice oriented report for the requirements of the non-thesis option of the M.S. degree. Prerequisites: Fifteen graduate credits and approved project plan.

CGN 6930 Advanced Special Topics in Civil Engineering (1-3). A course designed to give groups of students an opportunity to pursue special studies in an advanced topic of Civil Engineering not otherwise offered. Prerequisite: Permission of the instructor.

CGN 6939 Graduate Seminar (0). An examination of recent technical findings in selected areas of concern. Emphasis is placed on presentations (oral and written), research activities, readings, and active discussions among participants.

CGN 6971 Thesis (1-6). The student following the thesis option of the Master's degree will pursue research through this course. The research work will culminate with an acceptable thesis. Prerequisite: Permission of the graduate's thesis advisor.

CGN 7980 Ph.D. Dissertation (1-12). Doctoral research leading to Ph.D. civil engineering dissertation. Prerequisites: Permission of the Major Professor and Doctoral Candidacy.

CWR 5140C Ecohydrology (3). Hydrology of ecosystems, interaction between the hydrologic cycle and vegetative processes. Prerequisite: Permission of the instructor.

CWR 5235 Open Channel Hydraulics (3). Theoretical treatment and application of hydraulics. Flow in open channels with special reference to varied flow, critical state hydraulic jump, and wave formation. Prerequisite: CWR 3540.

CWR 5251 Environmental Hydraulics (3). Application of fluid mechanics in the study of physical mixing in surface water bodies, dispersion of materials, and design of hydraulic systems. Prerequisite: Permission of the instructor.

CWR 5305 Surface Hydrology (3). Principles of Hydrology with a particular focus on surficial processes of interest to engineering design. Emphasizes applications to flood prevention and mitigation and stormwater management issues. Prerequisites: CWR 3201, CWR 3540 (or equivalent).

CWR 5535C Advanced Modeling Applications in Water Resources Engineering (3). Complex model applications in hydrology, hydraulics, hydrosystems engineering and environmental interconnections. Prerequisite: Permission of the instructor.

CWR 6117 Stochastic Hydrology (3). Application of probability and statistics in hydrologic engineering. Frequency analysis of extreme events. Time series analysis and stochastic modeling. Prerequisites: CWR 3201 and CWR 3540.

CWR 5125 Groundwater Hydrology (3). Physical properties, equations of flow/mass transport, saturated/unsaturated zone, wells, pumping tests, quality/contamination control, analytical solutions, introduction to numerical models/computer codes. Prerequisite: Permission of the instructor.

CWR 6126 Advanced Groundwater Hydrology (3). Finite difference/finite element/boundary integral methods, transport and fate of chemically and biologically reacting solutes, tracer tests, hydrological approaches to remedial action and monitoring. Prerequisites: CWR 5125 or permission of the instructor.

CWR 6236 Engineering Sediment Transport (3). Physical processes of sediment transport and deposition, land erosion, river morphology applied to engineering design, design of stable channels, scour, transport of sediment-attached pollutants.

CWR 6625C Ecological Engineering (3). Introduction and incorporation of the important concepts and theories of ecology into water resources engineering principles and designs. Prerequisite: Permission of the instructor.

EES 5135 Water Quality Indicators (3). Ecological studies of micro and macro organisms which are indicators of water quality. Emphasis of bioassays and early warning systems. Prerequisite: Permission of the instructor.

EES 5137 Biological Monitoring of Freshwater Ecosystems (3). The use of aquatic insects and other invertebrates to monitor changes in the aquatic environment. The ecological aspects of aquatic insects in

relation to pollution stress are assessed. Prerequisites: EES 5135 or permission of the instructor.

EES 5506 Occupational Health (3). Effects, assessments, and control of physical and chemical factors in man's environment, including chemical agents, electromagnetic radiation, temperature, humidity, pressures, illumination, noise, and vibration. Prerequisite: Admission to graduate program.

EES 5605 Noise Control Engineering (3). Fundamentals of sound and noise. Health hazards and other effects. Measurement and noise control in transportation, construction, and other environments. Prerequisite: Admission to graduate program.

EES 6506 Environmental and Human Factors (3). Effects, assessment and control of physical and chemical factors in the natural and man-made environments, including noise, electro-magnetic radiation, air and water pollution, public and occupational health, vector control, communicable diseases. Prerequisite: Admission to graduate program.

EES 6508 Occupational Health and Toxicology (3). A continuation of EES 6506. Investigation of toxic substances in air, water, and food in the industrial environment. Prerequisite: EES 6506.

EGM 5111 Experimental Stress Analysis (3). Course covers the necessary theory and techniques of experimental stress analysis and the primary methods employed: brittle coating, strain gauges, photo-elasticity and Moire. Prerequisites: EGM 3520, EGM 5653.

EGM 5351 Finite Element Methods in Mechanics (3). Matrix techniques and variational methods in solid mechanics; single element, assemblage and generalized theory; non-linear analysis; applications in structural and soil mechanics, torsion, heat conduction and hydro-elasticity, etc. Prerequisite: CES 5106.

EGM 5421 Structural Dynamics (3). Fundamentals of free, forced, and transient vibration of singles and multidegree of freedom structures, including damping of lumped and distributed parameters systems. Graduate students have to do a project. Prerequisite: CES 3100 and MAP 2302.

EGM 6425 Structural Reliability (3). Fundamentals of probability theory and stochastic processes; probabilistic modeling of structural loads and material properties; reliability analysis and design of structures; reliability-based design criteria. Prerequisite: STA 3033.

EGM 6533 Advanced Mechanics of Materials (3). Extension of the fundamental principles of engineering mechanics to include curved beams, warping, stability, etc. Prerequisites: CES 5106 and MAP 2302.

EGM 6653 Theory of Elasticity (3). An advanced course covering the concepts of stress and strain tensors, indicia notation, transformation of stresses, compatibility equations, the stress function and the closed form solution of some important continuum mechanics problems. Prerequisites: EGM 3520, MAP 2302.

EGM 6675 Advanced Plasticity (3). Formulation of the plastic stress-strain relationships; Prandtl-Reuss equations; yield criteria; Plane Plastic Flow and the Plane

Slip Line Field Theory; limit analysis and basics of creep. Prerequisite: EGM 3520.

EGM 6736 Theory of Elastic Stability (3). Course will cover the beam-column problem; elastic and inelastic buckling of bars and frames; review of experimental work and design formulas; buckling of rings, curved bars and arches; bending and buckling of thin plates and thin shells. Prerequisite: EGM 3520.

EGM 6796 Theory of Plates and Shells (3). A course covering the concepts of thin plates with small deflections; thin plates with large deflections; thick plates; the Membrane Theory of Shells; and the General Theory of Cylindrical Shells. Prerequisite: EGM 3520.

EGN 5439 Design of Tall Buildings (3). The course analyzes different modern high-rise structural systems, and includes the dynamics of wind and earthquakes to efficiently design very tall buildings and their ancillary structures. Prerequisite: Permission of the instructor.

EGN 5455 Numerical Methods in Engineering (3). Study of procedures that permit rapid approximate solutions, within limits of desired accuracy, to complex structural analysis. Graduate students have to do a project. Prerequisite: CES 3100.

EGN 5990 Fundamentals of Engineering (FE) Review (4). Prepares upper level engineering students to take the Fundamentals of Engineering (FE) State Board examinations. Reviews chemistry, computers, statics, dynamics, electrical circuits, fluid mechanics, mechanic of materials, material science and thermodynamics.

ENV 5002C Fundamentals for Environmental Engineers (3). Laws and principles of the physical, chemical and biological phenomena that define and control the fate of chemical species in natural and engineered systems. Prerequisite: Permission of the instructor.

ENV 5007 Environmental Planning (3). Environmental laws and regulations, ecological principles, planning policies and processes, risk assessment, environmental impact due to growth, and environmental indicators.

ENV 5008 Appropriate Technology for Developing Countries (3). Appropriate environmental technologies and associated factors. Topics include water, air, soil and waste management. Low cost and energy alternatives are emphasized. Prerequisite: Permission of the instructor.

ENV 5027 Bioremediation Processes (3). Bio-transformation of subsurface contaminants is gaining recognition as a viable treatment tool. This course provides students with quantitative methods required to design bioremediation systems. Project required. Prerequisite: Permission of the instructor.

ENV 5062 Environmental Health (3). Study of the control and prevention of environmental-related diseases, both communicable and non-communicable, injuries, and other interactions of humans with the environment. Prerequisite: Permission of the instructor.

ENV 5104 Indoor Air Quality (3). Sources and causes of poor indoor air quality (IAQ). Protocols for IAQ investigations; problem evaluation and solution proposals. Approaches to sustainable construction; best IAQ and energy savings.

ENV 5105 Air Quality Management (3). Technical and regulatory aspects of air quality management. Emissions inventories, ambient monitoring, and models used to evaluate the impact of pollutants on local, regional and global air quality.

ENV 5116 Air Sampling Analysis (3). Practical laboratory work and theoretical aspects involved in a wide range of air sampling and analysis systems. Critical comparison and examination of methods and instrumentation. Source testing, instrumental sensitivity, applicability and remote sensing systems. Prerequisites: ENV 5105 or ENV 4101.

ENV 5126 Particulate Air Pollution Control (3). Particulate pollution control devices, principles, design, costs. Cyclones, electrostatic precipitators, filters, bag houses, scrubbers, noval control devices.

ENV 5127 Gaseous Air Pollution Control (3). Gaseous pollution control devices, principles, design, costs. Gaseous pollutants control using adsorption, absorption, incineration, and other novel control systems.

ENV 5334 Spill Response and Hazardous Materials Transport (3). Consequence analysis of accident scenarios covering the release and dispersion of toxic substances during transport into air, soil, or aquifer and fast response to spills and toxics recovery. Prerequisite: Permission of the instructor.

ENV 5335 Advanced Hazardous Waste Treatment Processes (3). Hazardous waste site assessment, remedial investigation, design of site monitoring strategies and remediation plans. Prerequisites: CHM 1045 and CHM 1045L.

ENV 5347 Waste Incineration (3). Domestic and industrial waste incineration and pollutant stream control of aqueous and airborne pollutants. Design of incineration's.

ENV 5356 Solid and Hazardous Waste (3). Generation, transport, treatment and disposal of solid and hazardous wastes; risk assessment and treatment of contaminated media. Prerequisites: CHM 1045 and CHM 1045L.

ENV 5406 Water Treatment Systems and Design (3). Course emphasizes water quality, quantities, treatment and distribution systems particularly as relates to municipal water supply. Requires laboratory project. Prerequisite: Permission of the instructor.

ENV 5512 Water and Wastewater Analysis (3). Relevance of the main quality parameters and their measurements by wet chemistry and analytical equipment. Includes BOD, COD, TOC, CO, TSS, VSS, alkalinity, acidity, pH hardness, ammonia, TKN, NO₂, NO₃, PO₄, etc. Prerequisites: ENV 5666, CHM 1046, and CHM 1046L. Corequisite: ENV 5512L.

ENV 5512L Water and Wastewater Analysis Laboratory (1). Experiments are conducted which measure gross organic pollution indicators, suspended solids, conductivity, alkalinity, acidity, pH, nitrate, nitrite, TKN, ammonia, total phosphates, chlorine residual and chlorine breakpoint. Prerequisites: ENV 5666, CHM 1046, and CHM 1046L. Corequisite: ENV 5512.

ENV 5517 Design of Wastewater Treatment Plants (3). Wastewater collection systems. Integration of unit

operations into the planning and design of treatment plants, including sludge handling and disposal. Prerequisite: Permission of the instructor.

ENV 5519 Chemistry for Environmental Engineers (3). Basis for applying microbial and physicochemical principles to understand reactions occurring in natural and engineered systems including water/wastewater treatment processes. Includes laboratory project. Prerequisite: Permission of the instructor.

ENV 5559 Reactor Design (3). A theoretical and practical basis for reaction kinetics to understand multiphase reactions, analysis and design of batch and continuous flow reactors. Projects on analysis of reactor design and operating data.

ENV 5613 Environmental Entrepreneurship (3). Application of environmental engineering concepts in the development of innovative ideas, products or services; interactive experiences with environmental businesses. Prerequisites: ENV 3001 or permission of the instructor.

ENV 5659 Regional Planning Engineering (3). Theories of urban and regional growth; collective utility analysis; input-output models in planning; application of linear programming to regional social accounting; economic base analysis. Prerequisites: Computer Programming or permission of the instructor.

ENV 5666 Water Quality Management (3). Predicting and evaluating the effect of human activities on streams, lakes, estuaries, and ground waters; and the relation of human activities to water quality and protection of water resources. Prerequisite: Permission of the instructor.

ENV 5905 Independent Study (1-3). Individual research studies available to academically qualified students on graduate status.

ENV 5930 Special Topics in Environmental Engineering (1-3). Specific aspects of environmental technology and urban systems not available through formal course study. Open to academically qualified students only.

ENV 6045 Environmental Modeling (3). Evaluation of regional resources, environmental stresses, and considerations in regional systems; systems analysis in environmental management and its relation to decision making; modeling of air and water systems. Prerequisites: Computer programming or permission of the instructor.

ENV 6056 Engineering Assessment of Metal Contaminants & Colloidal Transport (3). Kinetics of metal sorption reactions, colloidal transport, assessment of metal contaminants in soil. Prerequisite: Permission of the instructor.

ENV 6070 Green Engineering (3). Study of green engineering principles and methodologies to enhance environmental performance of societal sectors, including regulatory framework, sustainability, P2, LCA and industrial ecology. Prerequisite: Permission of the instructor.

ENV 6337 Hazardous Waste Site Assessment (3). Phase I and Phase II Investigations, Environmental Testing, Assessment, Monitoring Design. Prerequisites: ENV 5335 or permission of the instructor.

ENV 6510C Advanced Unit Operations I (3). Theory and design of physical and chemical processes for treatment of contaminated media. Application of fluid mechanics, heat and mass transfer to design and operation of physical/chemical systems. Prerequisite: Permission of the instructor.

ENV 6511C Advanced Unit Operations II (3). Theory and design of biological processes for treatment of contaminated media. Application of biochemical reaction kinetics theory to design and operation of biological treatment systems. Prerequisite: Permission of the instructor.

ENV 6511L Advanced Unit Operations II Lab (1). Bench scale experiments for scaling-up and designing the following water and wastewater processes: sedimentation, coagulation, filtration, adsorption, oxidation and gas transfer. Prerequisite: ENV 6510. Corequisite: ENV 6511.

ENV 6516 Advanced Treatment Systems (3). Integration of unit operations into advanced treatment systems for contaminated media. Applications may include either conventional or innovative/emerging technologies. Prerequisite: Permission of the instructor.

ENV 6558 Industrial Wastewater Treatment (3). Characteristics and composition of industrial wastewaters. Sampling techniques and analyses. Water conservation and reuse. Joint industrial-commercial collection and treatment of wastewaters. Prerequisite: ENV 6516.

ENV 6614 Environmental Risk Assessment (3). Characteristics of risk analysis, hazard identification, exposure assessment, consequence analysis, dose-response analysis. Prerequisite: Permission of the instructor.

ENV 6615 Environmental Impact Assessment (3). An examination of alternative techniques useful for analysis and environmental impacts of man's activities. Environmental impact assessment methodologies are emphasized.

ENV 6916 Engineering Project (1-3). Individual work culminating in a professional practice-oriented report suitable for the requirements of the M.S. degree-project option. Only three credits are applicable towards degree. Prerequisites: Completion of 20 graduate credits and approved proposal.

ENV 6934 Advanced Special Topics in Environmental Engineering (1-3). Specific aspects of Environmental Engineering requiring advanced engineering and research skills. A maximum of three credits are applicable towards degree. Prerequisite: Permission of the instructor.

ENV 6935 Graduate Environmental Seminar (0). The course consists of oral presentations made by students, guests, and faculty members on current topics and research activities in environmental systems.

ENV 6971 Thesis (1-6). Research for Master's thesis.

TTE 5007 Transportation Systems in Developing Nations (3). Transportation systems in the Developing Nations. Role of international organizations, technology transfer/choices, orientation of transport networks, socio-economic and environmental impacts. Prerequisites: Graduate standing or permission of the instructor.

TTE 5015 Applied Statistics in Traffic and Transportation (3). Civil and Environmental Engineering statistics methods as applied to traffic and transportation are covered. Topics include: significance tests, standard distributions, analysis of variance, and regression analysis. Prerequisite: Graduate standing.

TTE 5100 Transportation and Growth Management (3). Theory and principles of transportation and growth management, including the growth phenomena and regional impact planning. Design projects required. Prerequisite: TTE 4201.

TTE 5205 Advanced Highway Capacity Analysis (3). Parameters involved in calculating highway capacity and level of service on different highway and transportation facilities. Computer application will be also discussed. Prerequisite: TTE 4201.

TTE 5215 Fundamentals of Traffic Engineering (3). Speed and volume studies, stream characteristics, traffic flow theory, accident characteristics. Prerequisite: TTE 4201.

TTE 5273 Intelligent Transportation Systems (3). ITS functional areas, planning architecture, standards, and evaluation. Implementation of selected ITS technologies and strategies. Prerequisites: TTE 4201 or equivalent.

TTE 5315 Highway Safety Analysis (3). Influencing factors (roadway characteristics, vehicle characteristics, and human factors), safety data, network screening, identification and diagnosis of safety problems, selection of countermeasures, evaluation studies, accident reconstruction. Prerequisites: STA 3033, TTE 4201.

TTE 5606 Transportation Systems Modeling and Analysis (3). Modeling and analysis techniques in transportation. Linear Programming, queueing theory, decision making techniques. Prerequisite: TTE 4201.

TTE 5607 Transportation Demand Analysis (3). Travel demand analysis and forecasting. Modeling techniques including trip generation and distribution, mode split, and trip assignment. Practical applications. Prerequisite: TTE 4201.

TTE 5805 Advanced Geometric Design of Highways (3). Parameters governing the geometric design of highways; curve super-elevation; widening on highway curves; elements of intersection design; design of interchanges; use of AASHO design guidelines. Design project required. Prerequisites: SUR 3101C and TTE 4201.

TTE 5835 Pavement Design (3). Analysis and design of sub-base, base, and pavement of a roadway. Discussions of flexible pavement and rigid pavement as structural units. Boussinesq's approach. Westergaard's theory. Beams on Elastic Foundations. Prerequisites: CEG 4011 and CES 4702.

TTE 5925 Urban Traffic Workshop (3). Selected laboratory problems related to urban traffic. Prerequisite: TTE 4201.

TTE 5930 Transportation Seminar (1-3). Oral presentations made by students, guests, and faculty members on current topics and research activities in traffic and transportation engineering. Prerequisite: TTE 4201.

TTE 6257 Traffic Control Systems Design (3). Theory and principles of traffic control systems design, including both freeway and urban streets. Design projects required. Prerequisite: TTE 4201.

TTE 6267 Traffic Simulation Models (3). Traffic simulation modeling and analysis. Application of microscopic and macroscopic traffic simulation models to evaluate and optimize traffic control systems. Prerequisites: TTE 6257 or equivalent.

TTE 6506 Mass Transit Planning (3). Theories and principles of mass transit planning, include highway transit, rail transit and new transit modes. Design projects required. Prerequisite: TTE 5930.

TTE 6525 Bearing Capacity of Roads and Airfields (3). Advanced study of bearing capacity principles and theory; stress-strain behavior of pavements; constitutive modeling; and failure histories of pavement. Prerequisite: Permission of the instructor.

TTE 6526 Airport Planning and Design (3). Theory and principles of airport planning and design, include both general aviation and major commercial airports. Design projects required. Prerequisite: Permission of the instructor.

TTE 6528 Airport Terminal Design and Operations (3). Theory and practice of airport terminal design and operations, including passenger terminal complex, cargo terminal complex, and ground transportation. Design projects required. Prerequisite: Permission of the instructor.

TTE 6605 Planning and Design of Intermodal Facilities (3). Theory and practice of intermodal facility planning and design, including facility location, site design and access, and intermodal considerations. Design projects required. Prerequisites: TTE 5930 or permission of the instructor.

TTE 6650 Transportation and Land Development (3). Theory and principles of transportation and land development, including site planning, traffic analysis, and access and site circulation. Design projects required. Prerequisite: TTE 4201.

TTE 6701 Light Rail Planning and Design (3). Theory and practices of light rail transit planning and design, including demand analysis, capacity evaluation, geometric design, and track design. Design projects required. Prerequisite: TTE 4201.

TTE 6755 Port Planning and Development (3). Theory and practice of port planning and development, including demand analysis, capacity evaluation, ground access, and port development strategy. Design projects required. Prerequisites: TTE 5930 or permission of the instructor.

TTE 6833 Superpave Asphalt Mixture Design and Analysis (3). Materials characterization and testing; elastic, visco-elastic and plastic behavior; fracture and fatigue, rutting and design of bituminous mixtures. Prerequisite: Permission of the instructor.

TTE 6834 Pavement Maintenance and Rehabilitation (3). Pavement performance assessment; criteria for pavement evaluation, measurement of pavement distress. Analysis and interpretation of pavement condition data. Formulation and evaluation of maintenance and

rehabilitation alternative. Prerequisite: Permission of the instructor.

TTE 6837 Pavement Management Systems (3). Theory and principles of pavement management systems (PMS), including PMS at network and project level, PMS strategies, and PMS software packages used for decision making process. Prerequisites: TTE 5835 or permission of the instructor.

URP 5312 Urban Land Use Planning (3). Elements of the general land use plan, location and space requirements; the use of models in planning; development of the land use plan; policy plan, implementation. Prerequisite: Permission of the instructor.

URP 5316 Environmental and Urban Systems (3). Overview of basic issues and principles of environmental and urban planning/design systems. Emphasis will be placed on multidisciplinary linkages.

URP 5912 Research Methods (3). Methods of information search, data interpretation, and hypotheses formulation used in the field.

URP 6222 Urban Regional Analysis (3). The urban areas as a complex system; modeling the urban growth processes; statistical decision making games; modeling and simulation; cost effectiveness; application of the theory; a system-wide view of the Miami area. Prerequisite: Permission of the instructor.

URP 6317 Advanced Environmental and Urban Systems (3). To study the application of physical planning and design concepts and their environmental, infrastructural and social impacts.

URP 6906 Independent Study (1-3). Specialized individual studies in Environmental and Urban Systems. Prerequisite: Permission of the instructor.

URP 6935 Special Topics (3). Intensive treatment of specific subjects in the field of environmental and urban systems. Topics will vary depending upon the interest of students and faculty.

URP 6937 Final Project (1-3). Individual work culminating towards professional practice that also meets a degree requirement of the Master of Environmental and Urban Systems program. Prerequisite: Permission of the instructor.

Kang Yen, Professor, and Director of the International

Development Program

Master of Science in Electrical Engineering

The Department of Electrical and Computer Engineering offers both thesis and non-thesis options for the Master's Degree. The program provides a broad and multidisciplinary education, followed by in-depth studies of areas of interest.

All work counted for the Master's degree must be completed during the 5 years immediately following the date of admission.

Admission Requirements

The following are in addition to the University's graduate admission requirements:

1. A student seeking admission into the program must have a bachelor's degree in engineering, physical sciences, computer science or mathematics from an accredited institution, or, in the case of foreign students, from an institution comparable or equivalent to US degree for further study at the graduate-level, or, a bachelor's degree in a related and a minimum of one year of work experience in the broad areas of electrical engineering and/or technology.
2. An applicant must have a GPA score of 3.0 or higher in upper-level undergraduate work.
3. Applicants who have not satisfied the above score may be evaluated for conditional admission.
4. International applicants whose native language is not English are required to demonstrate English language proficiency through one of the following:
 - 80 on the iBT TOEFL (equivalent to 550 on the paper-based version of the Test of English as a Foreign Language);
 - 6.5 overall on the International English Language Testing System (IELTS);
 - 53 Pearson Test of English - Academic;
 - Cambridge English – Advanced;
 - An undergraduate or graduate degree from an accredited institution where the language of instruction is English.

In lieu of the above requirement a student may opt for (a) or (b) below along with an additional method of direct assessment of English language acquisition of an interview or proctored video-taped session

a) Successful completion of University level English courses from an accredited institution (e.g. ENC 1101, ENC 1102 or other equivalent courses with a letter grade of "B" or higher) that prepare applicants to be proficient in English.

OR

b) English Language Institute Level Six: successful completion with passing grades for all content areas;

Plus, one of the following additional methods of assessment:

- i) Interview (in person when possible or via videoconference) with admissions committee.
- ii) Proctored video-taped responses to questions from the admissions committee.

5. Applicants from science areas other than electrical or computer engineering will be expected to complete sufficient background material at the undergraduate level prior to unconditional acceptance into the graduate program.

6. Applicants from science areas other than electrical or computer engineering will be expected to complete sufficient background material at the undergraduate level prior to unconditional acceptance into the graduate program.

Graduation Requirements

The degree will be conferred when the following conditions have been met:

1. Recommendation of the advisor and faculty of the Department.
2. Certification by the Dean of the College that all requirements of the degree being sought have been completed.
3. A GPA of at least 3.0 has been earned for certain courses required by the program.
4. Met the undergraduate deficiencies, if any existed in the student's graduate program, as additional courses toward the degree.
5. Completed the required semester hours of graduate-level credit (not more than 6 graduate semester hours with a grade of "B" or higher can be transferred from other accredited institutions).
6. Students must maintain an overall GPA of 3.0. No grade below "C" will be accepted in a graduate program. In the event that a student is placed on probationary status, he or she must obtain a directed program from his or her advisor and approved by the Dean prior to continuing further course work toward the degree. The student must satisfy the directed course of action within the prescribed time limit; otherwise he or she will be academically dismissed.
7. Complied with all University policies and regulations.

Thesis Option

A student must complete 24 semester credit hours of technical course work plus 6 semester credit hours of EEL 6971 - Master's Thesis. The candidate's Thesis committee shall approve an appropriate thesis topic.

The course requirements include a minimum of 12 hours of 6000 level course credit and a minimum of 9 hours at the 5000-6000 level in Electrical Engineering.

Upon the successful completion of all course work, including thesis work, and after the determination by the student's advisor that he or she has completed the objectives of the thesis research, the student must pass a final oral examination which is primarily a defense of the thesis research.

The courses are chosen by mutual agreement between the student and the thesis advisor.

Non-Thesis Option

Students may choose the non-thesis option for their master's degree. The degree requirements differ from the thesis option in one aspect. The student must either:

1. Complete 27 credits of coursework approved by his advisor and successfully finish EEL 6916 Graduate Project with at least a 'B'.

OR

2. Complete 30 credits of coursework approved by the Graduate Program Director.

Students choosing the non-thesis option must take:

1. Two sets of graduate-level Electrical Engineering approved sequence courses from the catalog. Each set includes a minimum of 6 semester credit hours.

2. Six semester credit hours at the 5000-6000 level in mathematics.

Math Electives in ECE

EEL 5171	Advanced System Theory	3
EEE 5543	Random Signal Principles	3
EEL 6020	Numerical Analysis of Electrical Devices	3

The above list may be changed or expanded by the Graduate Advisory Committee.

The remaining elective courses can be chosen from Science, Technology Engineering, and Mathematics (STEM) disciplines based upon student approved plan of study and will be selected by the student and his or her advisor based on the student's career objectives.

Any course taken without the proper prerequisites and corequisites will be dropped automatically before the end of the term, resulting in a grade of "DR" or "DF".

Students, who are dismissed from the University due to low grades, may appeal to the Dean for reinstatement. A second dismissal results in no possibility of reinstatement. Any exception to the program requires the department's approval.

Master of Science in Electrical Engineering- Energy Cybersecurity

Common Core (6 credits)

EEL 5171	Advanced Systems Theory	3
EEL 5543	Random Signal Principles	3
EEL 6805	Advanced Malware Reverse Engineering	3
EEL 5718	Computer Communication Network	3
EEL 6803	Advanced Digital Forensics	3
EEL 6787	Network Security	3
EEL 5285	Sustainable and Renewable Energy Sources and their Utilization	3
EEL 6267	Application of Intelligent Systems to Power System Operations	3
EEL 5717	Advanced Security of Internet of Things and Cyber-Physical Systems	3
EEL 5278	Smart Grid Cyber Security and Intelligent Electronic Devices	3

Master of Science in Electrical Engineering- RF and Microwave

Common Core (6 credits)

EEL 5171	Advanced Systems Theory	3
EEL 5543	Random Signal Principles	3
EEL 5426	RF Circuit Design	3
EEL 5437	Microwave Engineering	3
EEL 5467	Antennas for Wireless Communication	3
EEL 5482	Fields and Waves Engineering	3
EEL 5500	Digital Communication System I	3
EEL 5501	Digital Communication System II	3
EEL 5563	Introduction to Optical Fibers	3
EEL 6463	Antenna Theory and Design	3

Combined BS/MS in Electrical Engineering Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in Electrical Engineering with the

Master's in Electrical Engineering. To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits required for the bachelor's degree program at FIU, have earned at least a 3.2 GPA on both overall and upper-division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate-level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. Only graduate courses with formal lectures can be counted for both degrees. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is required. Upon completion of the combined BS/MS pathway, students must have accumulated a minimum of 24 hours of credits at the graduate (5000+) level. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as a student assistant on a sponsored research project.

Master of Science in Computer Engineering

The Department of Electrical and Computer Engineering offers both thesis and non-thesis options for the Master's Degree.

All work counted for the Master's degree must be completed during the 5 years immediately following the date of admission.

The program provides a broad and multidisciplinary education, followed by in-depth studies of areas of interest.

Admission Requirements

The following is in addition to the University Graduate School admission requirements:

1. A student seeking admission into the program must have a bachelor's degree in engineering, physical sciences, computer science or mathematics from an accredited institution, or, in the case of foreign students, from an institution comparable or equivalent to US degree for further study at the graduate-level, or, a bachelor's degree in a related and a minimum of one year of work experience in the broad areas of computer engineering and/or technology.
2. An applicant must have a GPA score of 3.0 or higher in upper-level undergraduate work.
3. Applicants who have not satisfied the above score may be evaluated for conditional admission.
4. International applicants whose native language is not English are required to demonstrate English language proficiency through one of the following:
 - 80 on the iBT TOEFL (equivalent to 550 on the paper-based version of the Test of English as a Foreign Language);'

- 6.5 overall on the International English Language Testing System (IELTS);
- 53 Pearson Test of English - Academic;
- Cambridge English – Advanced;
- An undergraduate or graduate degree from an accredited institution where the language of instruction is English.

In lieu of the above requirement a student may opt for (a) or (b) below along with an additional method of direct assessment of English language acquisition of an interview or proctored video-taped session

a) Successful completion of University level English courses from an accredited institution (e.g. ENC 1101, ENC 1102 or other equivalent courses with a letter grade of "B" or higher) that prepare applicants to be proficient in English.

OR

b) English Language Institute Level Six: successful completion with passing grades for all content areas;

Plus, one of the following additional methods of assessment:

- i) Interview (in person when possible or via videoconference) with admissions committee.
 - ii) Proctored video-taped responses to questions from the admissions committee.
5. Applicants from science areas other than electrical or computer engineering will be expected to complete sufficient background material at the undergraduate level prior to unconditional acceptance into the graduate program.

Graduation Requirements

The degree will be conferred when the following conditions have been met:

1. Recommendation of the advisor and faculty of the Department.
2. Certification by the Dean of the College that all requirements of the degree being sought have been completed.
3. A GPA of at least 3.0 has been earned for certain courses required by the program.
4. Met the undergraduate deficiencies, if any existed in the student's graduate program, as additional courses toward the degree.
5. Completed the required semester hours of graduate-level credit (not more than 6 graduate semester hours with a grade of "B" or higher can be transferred from other accredited institutions).
6. Students must maintain an overall GPA of 3.0. No grade below "C" will be accepted in a graduate program. In the event that a student is placed on a probationary status, he or she must obtain a directed program from his or her advisor and approved by the Dean prior to continuing further course work toward the degree. The student must satisfy the directed course of action within the prescribed time limit, otherwise he or she will be academically dismissed.
7. Complied with all University policies and regulations.

Thesis Option

A student must complete 24 semester credit hours of technical course work plus 6 semester credit hours of EEL 6971 - Master's Thesis. The candidate's Thesis committee shall approve an appropriate thesis topic.

The course requirements include a minimum of 12 hours of 6000 level course credit and a minimum of 9 hours at the 5000-6000 level in Computer Engineering.

Upon the successful completion of all course work, including thesis work, and after the determination by the student's advisor that he or she has completed the objectives of the thesis research, the student must pass a final oral examination which is primarily a defense of the thesis research.

The courses are chosen by mutual agreement between the student and the thesis advisor.

Non-Thesis Option

Students may choose the non-thesis option for their master's degree. The degree requirements differ from the thesis option in one aspect. The student must either:

3. Complete 27 credits of coursework approved by his advisor and successfully finish EEL 6916 Graduate Project with at least a 'B'.

OR

4. Complete 30 credits of coursework approved by the Graduate Program Director.

Students choosing the non-thesis option must take:

1. Two sets of graduate-level Computer Engineering approved sequence courses from the catalog. Each set includes a minimum of 6 semester credit hours.
2. Six semester credit hours at the 5000-6000 level in mathematics.

Math Electives in ECE

EEL 5171	Advanced Systems Theory	3
EEE 5543	Random Signal Principles	3
EEL 6020	Numerical Analysis of Electrical Devices	3

The above lists may be changed or expanded by the Graduate Advisory Committee.

The remaining elective courses can be chosen from Science, Technology Engineering, and Mathematics (STEM) disciplines based upon student approved plan of study.

Any exception to the program requires the department's approval.

Master of Science in Computer Engineering- Machine Learning

Common Core (6 credits)

EEL 5171	Advanced Systems Theory	3
EEL 5543	Random Signal Principles	3

Track- Specific Courses

EEL 6825	Pattern Recognition	3
EEL 5813	Neural Networks- Algorithms and Applications	3
EEL 6812	Advanced in Neural Networks	3
EEL 6681	Fuzzy Systems Design	3

The Machine Learning track will require 6 credits as common core, 12 credits of track-specific core courses and 12 credits of elective 5000- or 6000- level graduate courses from the ECE department, for a total of 30 credits.

Combined BS/MS in Computer Engineering Degree Pathway

This five-year pathway seamlessly combines a baccalaureate degree in Computer Engineering with the

Master's in Computer Engineering. To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits required for the bachelor's degree program at FIU, have earned at least a 3.2 GPA on both overall and upper-division courses, and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students enrolled in the pathway may count up to 9 hours of graduate-level courses (i.e., 5000 level or higher) as credits for both the undergraduate and graduate degree programs. Only graduate courses with formal lectures can be counted for both degrees. For each of the courses counted as credits for both BS and MS degree, a minimum grade of 'B' is required. Upon completion of the combined BS/MS pathway, students must have accumulated a minimum of 24 hours of credits at the graduate (5000+) level. Students enrolled in the pathway are encouraged to seek employment with a department faculty member to work as a student assistant on a sponsored research project.

Master of Science in Computer Engineering – Network and Security Online

The Master of Science in Computer Engineering – Network Security Online program is similar to the existing/approved face-to-face program in terms of curriculum and admissions requirements.

Admission Requirements

The following is in addition to the University Graduate School admission requirements:

1. A student seeking admission into the program must have a bachelor's degree in engineering, physical sciences, computer science or mathematics from an accredited institution, or, in the case of foreign students, from an institution comparable or equivalent to US degree for further study at the graduate-level, or, a bachelor's degree in a related and a minimum of one year of work experience in the broad areas of computer engineering and/or technology, or a bachelor's degree in any field plus 3 years of relevant work experience will be considered. The student must take and pass two deficient courses required by the program.
2. An applicant must have a GPA score of 3.0 or higher in upper-level undergraduate work.
3. Applicants who have not satisfied the above score may be evaluated for conditional admission.
4. International students whose native language is not English, must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System Test (IELTS). Minimum required score is: 550 on the paper-based test (PBT)

- TOEFL), or 80 on the iBT TOEFL, or 6.5 overall on the IELTS test.
5. Applicants from science areas other than electrical or computer engineering will be expected to complete sufficient background material at the undergraduate level prior to unconditional acceptance into the graduate program.

The Master of Science in Computer Engineering – Network Security Online program requires 30 semester hours beyond the bachelor's degree. This is a lock-step program that consists of a specific sequence of courses. The Master of Science in Computer Engineering – Network Security Online program includes two required components:

Computer Engineering Courses (24 credits)

CIS 5208	Social, Economic and Policy Aspects of Cybersecurity	3
CNT 5415	Practical Applied Security	3
EEL 6803	Advanced Digital Forensics	3
EEL 6805	Advanced Malware Reverse Engineering	3
EEL 5718	Computer-Communication Network Engineering	3
EEL 5807	Advanced Ethical Hacking	3
EEL 6787	Network Security	3
TCN 5271	Advanced IoT Communications and Networking	3

Math Electives (6 credits)

EEL 5171	Advanced Systems Theory	3
EEE 5543	Random Signal Principles	3
EEL 6020	Numerical Analysis of Electrical Devices	3

The Math Electives may be changed or expanded by the Graduate Advisory Committee.

Any exception to the program requires the department's approval.

Master of Science in Internet of Things

Core Courses 21 credits:

TCN 5271	Ubiquitous and Embedded Sensor Network Centric Telecommunications	3
EEE 5718	Advanced Security of Internet of Things and Cyber-Physical Systems	3
EEE 6525	Advanced Sensor Signal Processing	3
TCN 6276	Antennas for Wireless and Body-Centric Communications	3
EEL 6795	Power Aware Computing	3
EEL 6787	Network Security	3
CNT 6148	Advanced IoT and Sensor Big Data Analytics	3

Elective Courses 9 credits:

EEL 6463	Antenna Theory and Design	3
EEL 6894	Real-Time Computing and Applications	3
EEL 5757	Real-Time Digital Signal Processing Implementations	3
EEL 5741	Advanced Microprocessor Systems	3
EEL 6020	Numerical Analysis of Electrical Devices	3
EEL 5718	Computer-Communication Network Engineering	3
EEL 5591C	Wireless Digital Communications with USRP Applications	3

EEL 5467	Antennas for Wireless Communication Systems	3
EEL 5437	Microwave Engineering	3
EEL 5145	Advanced Filter Design	3
EEE 6311	Advanced Electronic Systems I	3
CNT 6311	Advanced IoT and Sensor Data Visualization	3
CNT 6156	Advanced IoT and Sensor Programming with Python	3
CNT 6144	Advanced IoT Analytics with Cloud Services	3
CNT 6154	Advanced IoT Applied Machine Learning	3
CNT 6150	Sensor and IoT Data Analytics with Deep Learning	3

Doctor of Philosophy in Electrical and Computer Engineering

Admission Requirements

The requirements for admission to the doctoral program in Electrical and Computer Engineering are:

- Applicants having a bachelor's degree in engineering, physical sciences, computer science or mathematics from an accredited institution must provide the followings for admission to the doctoral program:
 - An applicant must have a GPA score of 3.0 or higher.
 - Applicants who have not satisfied the above score may be evaluated for conditional admission.
 - Applicants must submit GRE scores although no minimum scores are required to be considered for admission.
 - Three letters of recommendation in the forms provided by the department
 - International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
- Applicants having a Master's degree in Electrical or Computer Engineering from an accredited institution must provide the followings for admission to the doctoral program:
 - GPA of at least 3.3/4.0 in the master's program
 - Applicants must submit GRE scores although no minimum scores are required to be considered for admission.
 - Three letters of recommendation in the forms provided by the department
 - International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

- Credentials of all other applicants will be examined by the Graduate Admission Committee on a case by case basis. In addition to the departmental requirements, all students must satisfy the University's Graduate Policies and Procedures.

Identification of Research Area

Within 12 months upon acceptance into the Ph.D. program, the student has to identify an area of research of his or her interest by contacting and being accepted by a professor willing to guide the dissertation research. If no such professor can be found, the student will be dismissed from the Ph.D. program. Contact the Department for a list of the faculty members with Dissertation Advisor status and their research interests.

Course Requirements

The Ph.D. in Electrical and Computer Engineering requires at least 75 credit hours beyond the bachelor's degree. A maximum of 30 credit hours of course work earned in a Master's degree in Electrical or Computer Engineering, from FIU or another accredited institution, may be counted toward the Ph.D. provided that a minimum grade of "B" is earned in each course.

Degree Requirements

- Students must complete at least 9 credits of coursework in their major area (EEL 6905, 6916, 6932 and 6971 will not be counted as coursework) and at least 6 credits in two different breadth areas (a grade of "B" or better in each course). The appropriate areas of study and specific courses are determined by the dissertation advisor. Students majoring in Electrical Engineering should have one minor in computer engineering, and those majoring in Computer Engineering should have one minor in Electrical Engineering.
- The student must have completed a minimum of 45 credits of graduate course work toward the Ph.D. before the student is eligible for the candidacy. This includes up to 30 transfer credits.
- At least 15 credits of EEL 7980 are required. Registration for EEL 7980 Ph.D. Dissertation is allowed only after passing the qualifying examination.
- Fifty percent of the total hours counted toward the doctoral degree have to be at the 6000 and 7000 level (including EEL 7980).

Residency Requirements

The Ph.D. student must spend at least one academic year in full-time residency. Usually, this will be after being admitted to candidacy. To satisfy the residency requirement for a Ph.D. degree in Electrical and Computer Engineering, the candidate must complete a minimum of 18 credit hours within a period of 12 months in residency at the University.

Graduate Supervisory and Research Committee

The student's Ph.D. Graduate Supervisory and Research Committee should be appointed as soon as possible and not later than 15 months after being admitted to the Ph.D. program. Consult the Graduate Handbook in the Department for more details on how to select the committee members.

Ph.D. Course Breadth Requirements

The student must submit information about how the breadth requirement has been satisfied to the Graduate Program Director at the time he/she signs up for the Ph.D. Qualifying Examination.

Qualifying Examination

To be eligible for the written qualifying examination, the student must have satisfied the Ph.D. course breadth requirements in his or her area of specialization and in two other areas. The students can take the qualifying examination no later than the semester in which all the required coursework for the degree is completed. Failure to do this is causation for dismissal from the Ph.D. program.

One of the following two options will be selected by the student's major advisor for the qualifying exam: (1) Written exam and (2) Research paper preparation and presentation. Failing any part of the exam implies the failure of the entire examination. The exam must be retaken the next time it is offered. Failing a second time is cause for dismissal from the Ph.D. program.

Consult the Graduate Handbook available in the Department for details on examination procedures, dates, duration, application and grading criteria.

Proposal Defense

Proposal defense must be taken within one semester after the satisfactory completion of the qualifying examination.

Admission to Candidacy

Candidacy status indicates that a doctoral student is ready for the completion of the dissertation. A student is admitted to candidacy upon successfully completing all required course work and passing the qualifying examination.

Oral Defense and Submission of Doctoral Dissertation

A dissertation is required of all candidates for the doctoral degree. A proposal must be submitted to the student's Dissertation Committee for approval, following the general guidelines in the "Regulations for Thesis and Dissertation Preparation". A student must enroll for dissertation credits in the semester in which he or she expects to be admitted to candidacy, and must maintain continuous enrollment for not less than 3 credits of EEL 7980 every semester, including Summers, until the semester in which the doctoral degree is awarded. Upon completion of the dissertation, the degree candidate will submit to the Dean of the Graduate School an application for dissertation defense signed by the student's Dissertation Committee with sufficient time to allow for publishing a notice in the monthly calendar of dissertation and theses defenses to invite members of the university community to observe the defense.

Following the successful defense of the dissertation, as determined by a majority vote of the student's research committee, the dissertation must be forwarded to the Dean of the College of Engineering and Computing and the Dean of the Graduate School for their approval.

All dissertations submitted in fulfillment of requirements for graduate degrees must conform to University guidelines (see "Regulations for Thesis and Dissertation

Preparation"). One final, approved copy of the dissertation must be delivered to the Chairperson of the Department of Electrical and Computer Engineering. Library copies must conform to University guidelines, also published in "Regulations for Thesis and Dissertation Preparation". Any exception to the program requires the department's approval.

Financial Aid

Consult the Department for information on research and teaching assistantships available for doctoral students.

MS en-route to PhD

Students in the ECE PhD program may obtain an MS degree in Electrical Engineering or Computer Engineering provided that the following conditions are satisfied.

- Completed 30 credits of graduate course work at FIU. Only the letter-graded (i.e. not P/F) courses are counted towards this requirement.
- The courses have not been used for a previously earned master's degree.
- In good academic standing and all courses are within the time limits to degree completion.
- All courses are B or better.
- No pending Incomplete grades.
- Have approved D1, D2 and D3 on file with UGS.

This is subject to approval by the GPD and UGS.

Course Descriptions

Definition of Prefixes

CNT-Computer Networks; EEE-Engineering: Electrical and Electronic; EEL-Engineering: Electrical; OSE-Optical Science and Engineering; TCN-Telecommunications/Networking

CNT 5415 Practical Applied Security (3). Hands-on training in practical installation and maintenance of secure systems, including such topics as security configuration, DMZs, firewalls, anti-virus software, and hardware security modules. Prerequisite: Graduate standing.

CNT 6144 Advanced IoT Analytics with Cloud Services (3). This course will focus on the theoretical concepts, principles, tools, techniques and deployment models and analytics for cloud services.

CNT 6148 Advanced IoT & Sensor Big Data Analytics (3). This course focuses on Big Data processing associated with IoT/sensor devices in extracting actionable intelligence. The fundamental algorithms and techniques of Big Data for IoT data are explored.

CNT 6150 Advanced Sensor & IoT Data Analysis with Deep Learning (3). This course will focus on the use of deep learning techniques and algorithms on structured and unstructured data received from sensors and IoT devices.

CNT 6154 Advanced IoT Applied Machine Learning (3). The course focuses on the theoretical and principles of applying machine learning algorithms to sensor/IoT data

sets, engaging in the techniques of feature extraction and evaluation in model building.

CNT 6156 Advanced IoT & Sensor Programming with Python (3). This course will focus on implementing control system applications with the Python programming language for IoT and sensor systems.

EEE 5261 Bioelectrical Models (3). Engineering models for electrical behavior of nerve and muscle cells, electrode-tissue junctions, volume conduction in tissue and the nervous system as an electrical network. Prerequisites: EEE 4202C or permission of the instructor. (F)

EEE 5275 Bioradiation Engineering: Detection and Measurement (3). Spectrum of radiation sources, types of fields, properties of living tissue, mechanisms of field propagation in tissue. Application in imaging and therapy, hazards and safety. Prerequisites: EEL 4410 or permission of the instructor. (S)

EEE 5348 Digital Electronics (3). Analysis and design of logic gates using saturated and non-saturating elements, transmission gates, interfacing of logic families, bistable circuits, A/D and D/A converters. Prerequisites: EEE 4304 or permission of the instructor.

EEE 5352 Bipolar Junction Transistors (3). Bipolar junction transistor physics. Semiconductor bulk properties at equilibrium and nonequilibrium. PN junction theory. Theory of the bipolar junction transistor. Prerequisites: EEE 3396 or permission of the instructor. (S)

EEE 5353 Field Effect Transistors (3). Field effect device physics and technology. MOS capacitor. DC and AC characteristics of the MOS transistor. The MOS transistor in dynamic operation. Prerequisites: EEE 3396 or permission of the instructor. (F)

EEE 5366 Industrial Electronics (3). A study of solid-state devices for the control of power, their applications and limitations in power-switching circuits and in the control of physical transducer. Prerequisites: EEL 4213, EEE 4304 or permission of the instructor. (F, every third year)

EEE 5371 High-Frequency Amplifiers (3). Analysis and design of high-frequency amplifiers and oscillators: stability, scattering parameters, use of the Smith chart and other practical design tools, noise. Prerequisites: EEE 4304, EEL 4410 or permission of the instructor. (F, every third year)

EEE 5425 Introduction to Nanotechnology (3). Nanoscale electrical, optical and magnetic device operation. Overview of new devices enabled by nanotechnology, methods for fabrication and characterization of nanoscale and devices. Prerequisite: EEE 3396.

EEE 5427C Advanced Nanofabrication of Electronic Devices (3). This course covers the advanced theory and technology for the fabrication of micro/nano-scale electronic devices. Includes lectures and laboratory sessions on techniques such as lithography and etching. Prerequisites: EEE 5425 or permission of the instructor.

EEE 5515 Signal Detection Theory (3). This course thoroughly investigates the fundamentals of modern signal detection theory. The topics to be covered include:

Deterministic signals, Random signals, Statistical decision theory. Prerequisites: EEE 5543 or permission of the instructor.

EEE 5543 Random Signal Principles (3). Noise, random processes, correlation, spectral analysis in the analysis and design of communication systems. Optimization techniques; minimum mean square error. Prerequisite: EEL 3514. (SS, alternating years)

EEE 5718 Advanced Security of Internet of Things and Cyber-Physical Systems (3). In this project-based class, the students will gain advanced hands-on training in the security of Internet-of-Things (IoT) and Cyber-Physical Systems (CPS) areas. Prerequisites: Programming coursework or any CS oriented courses (e.g. COPXXXX) or any embedded coursework or permission of the instructor.

EEE 5772 Intelligent Robotics, Vision, and Controls (3). This course provides the fundamentals of mobile robots, arm robots, camera models, image processing, feature extraction, and multi-view geometry, and visual servo systems. Prerequisite: MATLAB experience or permission from the instructor.

EEE 6285 Biosignal Processing I (3). Characterizing biosignals by application of time and frequency domain analytic methods. Comparison of analog and digital processing. Engineering design for VLSI implementations in implantable devices. Prerequisites: EEE 6502 or permission of the instructor. (F)

EEE 6286 Biosignal Processing II (3). Engineering design of advanced systems for processing biosignals. Methods for signal compression. Adaptive systems for automatic recognition. Application of artificial intelligence for signal classification. Prerequisites: EEE 6285 or permission of the instructor. (S)

EEE 6311 Advanced Electronic Systems I (3). Principles of analog and digital electronics network. Advanced analysis, modeling and computer simulation of op-amps. Analog design techniques and practical examples are covered. Prerequisites: EEE 4314 or permission of the instructor. (F, alternating years)

EEE 6312 Advanced Electronic Systems II (3). Study of linear properties of electronic systems and design of fault-tolerant systems using A/D and D/A and control algorithms. Prerequisites: EEE 6311 or permission of the instructor. (S, alternating years)

EEE 6315 Advanced Solid-State Electronics (3). IC technologies, properties and fabrication concepts. Bipolar, MOS, I²L, CCD, bubble technologies. Ion implantation characteristics. Lithography techniques. Prerequisites: EEE 3396, EEE 4304 or permission of the instructor. (SS, every third year)

EEE 6332 Thin Film Engineering (3). Thin films used in microelectronics and optoelectronics; deposition methods; the evolution of film microstructure; film growth modeling; introduction to film analysis. Prerequisite: EEE 3396. (SS, alternating years)

EEE 6335 Electrical Transport in Semiconductors I (3). This course focuses on carrier transport fundamentals, beginning at the microscopic level and progressing to the macroscopic effects relevant to semiconductor devices. Prerequisite: EEE 5352. (F, alternating years)

EEE 6337 Electrical Transport in Semiconductors II (3). This course focuses on quantum phenomena occurring in carrier transport in modern small-size semiconductor devices. Prerequisite: EEE 6335.

EEE 6395 Applied Superconductivity (3). Covers the basic physical properties of superconductors. Superconducting devices: squids, memory & logic elements. Emphasis is placed on applications of superconductors. Prerequisites: EEE 3396 and EEL 4410. Corequisite: Permission of the instructor. (S)

EEE 6397 Semiconductor Device Theory (3). Device physics and modeling of GaAs FETS. GaAs analog and digital integrated circuits. Modulation doped field-effect transistors. Heterojunction bipolar transistor theory. Prerequisite: EEE 3396. (S)

EEE 6399C Electronic Properties of Materials (3). Properties of materials from which electronic components and structures are fabricated; electrical conduction in metals, semiconductors and insulators; thermal; magnetic; optical. Prerequisite: EEE 3396. (F, alternating years)

EEE 6429 Advanced Quantum Computers (3). This course provides advanced principles of quantum computers and quantum information systems with in-depth analysis and state of the art physical implementations.

EEE 6434 Colloidal and Nanoscale Engineering (3). In-depth coverage of the fundamentals of colloidal interactions between surfaces, particles, surfactants and biomolecules, and their relevance to self-assembly. Prerequisites: Knowledge of thermodynamics, statistical mechanics and/or physics.

EEE 6466 Microsystems and MEMS: Chem/Bio Sensors and Microfabrication (3). This course will give students an introduction with an emphasis on design and analysis of fundamentals of electrochemical sensing and integration into microfluidic systems. Prerequisites: EEL 3396 or permission of the instructor.

EEE 6502 Digital Signal Processing (3). Treatment of digital signal and system characteristics: Z transforms and FFT theory. Real-time and correlation functions. Multidimensional signal processing and digital filtering. Prerequisite: Permission of the instructor. (F)

EEE 6516 Signal Estimation Theory (3). The course covers both the theoretical and practical aspects of statistical parameter estimation from received signals in noise. Both classical estimation and Bayesian estimation are studied. Prerequisite: EEE 5543 or permission of the instructor.

EEE 6525 Advanced Sensor Signal Processing (3). Various sensor systems, sensor signal detection, signal estimations, distributed sensor networks, sensor data fusion approaches, wireless sensor networks, radar networks and optimal sensor allocation and sensor network design. Prerequisite: EEL 3514 or permission of the instructor.

EEE 6719 Cyberphysical Systems Security (3). Expose students to fundamental security primitives specific to CPS. The topics will cover the cyber and physical attacks, security of CPS protocols, key management and privacy and control. Prerequisite: A Network Security related course or consent of the instructor

EEE 6751 Advanced Image and Video Forensics (3). The course covers the theoretical and advanced practical aspects and principles of forensic image and video analysis and their application to digital forensics.

EEE 6753 Advanced Network Forensics and Incident Response (3). The course covers the theoretical and advanced practical aspects of computer network forensics and security.

EEE 6755 Advanced Mobile Forensics (3). The course covers the theoretical and advanced practical aspects of digital forensics of mobile devices.

EEE 6764 Platform Design, Testing, and Validation for IoT Applications (3). This course will be able to fabricate, assemble, and design driving firmware of the custom-designed IoT system/device and hands-on experience on the IOT hardware platform design, optimization, testing. Prerequisite: Permission from instructor (No hardware design experience is required)

EEE 6765 Advanced Embedded Systems Design and Implementation for IoT Applications (3). This course will provide hands-on experience on the hardware design and implementation of a typical IoT system/device using Eagle/Autodesk PCB design software. Prerequisite: EEL 3110 and EEL 3110 or permission from instructor (No hardware design experience is required)

EEE 6766 Algorithm Design and Firmware Implementation for IoT Sensing, Network Connectivity, and Closed-Loop Control (3). This course will provide solid firmware programming experience on essential IoT components including wireless communication, sensor interfacing (ADC, USART, I2C and SPI) and digital signal processing. Prerequisite: Permission from instructor (Basic programming experience is required)

EEE 6767 Advanced Embedded Programming for IoT Sensing, Network, Control, and Applications (3). This course will provide hands-on experience on the software design and implementation of a typical IoT system/device on a customer-made IoT education platform of CyberSens-EDU. Prerequisite: COP 2210 or permission from instructor (Basic programming experience is required)

EEL 5009 Concepts in Electrical and Computer Engineering (3). The course covers a broad range of topics and concepts required for pursuing a Master's Degree in Electrical and Computer Engineering. Prerequisite: Permission of the instructor.

EEL 5145 Advanced Filter Design (3). Graduate course in the design and advance analysis of passive and active high order circuits. Use of the computer as a design tool. Prerequisites: EEL 4140 or permission of the instructor. (S, alternating years).

EEL 5171 Advanced Systems Theory (3). State-space representations for continuous and discrete-time systems, controllability and observability, pole-zero allocation, Lyapunov stability theorem, state observers. Prerequisites: EEL 3657 or permission of the instructor. (S)

EEL 5259 Modeling and Analysis of Modern Distribution Grids (3). This course covers modelling, design, analysis, and operations of low and medium

voltage electric power distribution systems including the increasing penetration of distributed generators.

EEL 5260 Power System Optimization (3). This course covers recent advances in optimization techniques and their applications to electric power grid planning and operational problems.

EEL 5270 Electrical Transients in Power Systems (3). Traveling waves on transmission and multi-conductor systems, successive reflections, distributed parameter systems, transients on integrated power systems. Prerequisites: EEL 4213 or permission of the instructor.

EEL 5275 Power Systems Protection (3). Analysis of power systems under faulted conditions using linear transformation. The study of surge, transient and waves on power lines. Computer-aided analysis and design emphasizing protection of equipment. Prerequisites: EEL 4215 or permission of the instructor. (F)

EEL 5278 Smart Grid Cyber Security and Intelligent Electronic Devices (3). Design, simulate and solve smart grid cybersecurity issues. Manmade and natural large scale disturbances. Smart grid cyber networked standards and new Intelligent Electronic Devices (IED). Prerequisite: Graduate standing.

EEL 5285C Sustainable and Renewable Energy Sources and Their Utilization (3). Alternative energy techniques, solar power, wind power, biomass, and other sources, electric power grid and integration of renewables, energy storage and smart energy utilization and public policy. Prerequisites: EEL 4213 or equivalent.

EEL 5426 RF Circuit Design (3). Transmission lines, guided EM propagation, microwave circuits, resonators, impedance matching, passive components, thin-film circuits, filters, two-port networks, measurements, advanced simulations. Prerequisites: EEL 3135 and EEL 3110.

EEL 5427C Electromagnetic Modeling of Radio Frequency (RF) Structures (3). The goal of this course is to teach modeling RF, terahertz and photonics structures using electromagnetic full-wave solvers. The class will use commercial EM solvers to model state-of-the-art problems. Prerequisite: EEL 3135, EEL 4410.

EEL 5437 Microwave Engineering (3). Microwave guides. Microwave tubes. Microwave solid-state devices. Microwave integrated circuits, Microwave enclosures. Prerequisites: EEL 4410 or permission of the instructor. (S, every third year)

EEL 5467 Antennas for Wireless Communication Systems (3). Antenna principles, wire antennas, printed antennas, antenna arrays, and measurements. Full-wave simulation software is used for the design and analysis of antennas for wireless communication systems. Prerequisite: EEL 4410 or permission of the instructor.

EEL 5482 Fields and Waves Engineering (3). Concepts and theorems in fields and waves, analytic techniques for guided waves, radiation and scattering, numerical techniques for analysis of electrical devices. Prerequisites: EEL 4410 or permission of the instructor. (S)

EEL 5500 Digital Communication Systems I (3). This course will consider the most important aspects of digital communication systems such as noise-related subjects,

random signals, linear systems, and baseband digital modulation and multiplexing. Prerequisites: EEL 3514 or permission of the instructor. (SS)

EEL 5501 Digital Communication Systems II (3). This course will consider more important aspects of digital communication systems such as matched filters, digital base and modulation, multiplexing, carrier digital modulation and error correction coding. Prerequisites: EEL 5500 or permission of the instructor. (F)

EEL 5563C Introduction to Optical Fibers (3). Use of fiber optics as a communication medium. Principles of fiber optics; mode theory; transmitters, modulators, sensors, detectors and demodulators; fiber data links. Prerequisites: EEL 3514, EEE 4314 and EEL 4410 or permission of the instructor. (F, alternating years)

EEL 5587 Long Term Evolution Communication: From Theory to Practice (3). Introduction to the basic concepts in Long Term Evolution (LTE) technology and beyond. Prerequisite: Permission of the instructor.

EEL 5591C Wireless Digital Communications with USRP Applications (3). The course covers the fundamentals of wireless digital communications from a DSP perspective. Hands-on experience with wireless communication principles is achieved through lab experiments and course projects. Prerequisites: EEL 3514, EEE 4510.

EEL 5653 Digital Control Systems (3). Analysis and design of digital control systems. Z-transforms, analysis and control of discrete-time systems, digital control of analog systems. Several digital controller design methods. Computer simulation and microprocessor implementation. Prerequisite: EEL 3657. (SS)

EEL 5669 Autonomous Systems and Controls (3). This course provides an in-depth discussion to the fundamental components of autonomous systems and controls. In particular, the course will allow the students to master the building blocks. Prerequisite: COP 3337, COP 4338, or permission by instructor.

EEL 5718 Computer-Communication Network Engineering (3). System engineering synthesis, analysis, and evaluation of computer-communication networks. Network design, routing and flow control, telecommunication traffic engineering, transmission, switching, etc. Prerequisite: Permission of the instructor. (SS)

EEL 5719 Digital Filters (3). Analysis, design and implementation of digital filters. Hardware and software approach to design. Prerequisite: Permission of the instructor. (F)

EEL 5725 Hardware Description Languages (VHDL or Verilog) (3). This course involves systematic studies of Fault-Tolerant Digital Systems, VHDL and VERILOG based dynamic digital system designs, and system implementations with CPLDs, FPGAs, ASICs. Prerequisite: EEE 4304, EEL 4746 or Permission of the instructor. (F)

EEL 5741 Advanced Microprocessor Systems (3). Interfacing of various microprocessors together. Concepts of master-slave systems, virtual memory and I/O control techniques. Digital system evaluation and optimization.

Prerequisites: EEL 4746 or permission of the instructor. (SS, alternating years)

EEL 5757 Real-Time Digital Signal Processing Implementations (3). Techniques for the implementation of Digital Signal Processing (DSP) algorithms in dedicated processors, for assessing the real-time performance of audio, control, and communication systems. Prerequisites: EEE 4510 or permission of the instructor.

EEL 5799 Advanced Concepts in Computer Engineering (3). This course covers a range of topics and concepts required for pursuing a Master's Degree in Computer Engineering associated with the integration of hardware and software in devices for cybersecurity. Prerequisite: Instructor's Permission

EEL 5807 Advanced Ethical Hacking (3). This will give individuals exposure to the latest hacking tools and techniques to understand the anatomy of computer attacks and teach them the countermeasures to protect their valuable data.

EEL 5809 Advanced Concepts in Electrical and Computer Engineering (3). The course covers a range of topics to provide a theoretical foundation of cybersecurity in engineering for students entering into the cybersecurity program. Prerequisite: Instructor's Permission.

EEL 5813 Neural Networks-Algorithms and Applications (3). Various artificial neural networks and their training algorithms will be introduced. Their applications to electrical and computer engineering fields will also be covered. Prerequisite: Permission of the instructor. (SS)

EEL 5820 Digital Image Processing (3). Image Fundamentals, Image Transforms, Image Enhancement, Edge Detection, Image Segmentation, Texture Analysis, Image Restoration, and Image Compression. Prerequisite: EEL 3135 and knowledge of any programming language (FORTRAN, Pascal, C). (F)

EEL 5935 Advanced Special Topics (1-3). A course designed to give groups of students an opportunity to pursue special studies in an advanced topic of Electrical Engineering not otherwise offered. Prerequisite: Consent of instructor.

EEL 5941 Graduate Electrical and Computer Engineering Internship (1-3). Graduate students acquire practical experience through a supervised internship in the industry. The student prepares an internship proposal, and the work performed is documented in a report and presented. Prerequisite: Permission of the student's advisor.

EEL 5945 Electrical and Computer Engineering Teaching Practicum (1). Graduate students acquire practical teaching experience through supervised course teaching. The student prepares an internship proposal, and the work performed is documented in a report and presented. Prerequisite: Permission from the student's advisor and department. Corequisite: Teaching at least one full course during that semester.

EEL 6020 Numerical Analysis of Electrical Devices (3). Numerical techniques for the analysis of static and diffusion eddy current type field problems and associated phenomena in electrical devices. Emphasis on implementation and applications to practical problems.

Prerequisites: EEL 4213, MAP 3302 or equivalent or permission of the instructor. (SS)

EEL 6141 Advanced Network Analysis (3). Modeling and analysis of networks by t-domain and s-domain techniques. Topics include topology, formulation of loop eqs and node pair eqs., state-space networks, computer solutions. Prerequisites: EEL 3112 or permission of the instructor. (S, every third year)

EEL 6167 VLSI Design (3). Study of VLSI Design concepts in MOS/CMOS environment, CAD techniques, VLSI array processors and wavefront array processors, and implementation of array processors. Prerequisites: EEL 5741, EEE 4314. (SS, alternating years)

EEL 6219 Electric Power Quality (3). Modeling of networks under non-sinusoidal conditions, loads which may cause power quality problems, analysis of harmonics, flickers, impulses, standards, power quality improvement methods. Prerequisites: EEL 4213 or permission of the instructor.

EEL 6235 Motor Drives Control (3). Switched, resonant and bidirectional power supplies, DC motors: single, three-phase and chopper drives. AC motors: voltage, current and frequency control. Closed-loop control. Prerequisites: EEL 4213, EEE 3303, EEL 3657. (SS, alternating years)

EEL 6253 Computer Analysis of Power Systems (3). Power systems analysis and designs by computer solutions. Interactive solutions, power flow, optimum solutions. Dynamic solutions and stability. Prerequisites: EEL 4215 or permission of the instructor. (F, every third year)

EEL 6254 Power Systems Reliability (3). Expansion planning, load forecasting, reliability and availability application to generation planning, bulk power supply systems, generation system operation and production costing analysis. Prerequisites: EEL 4215 or permission of the instructor. (S)

EEL 6261 Power Systems Engineering (3). Steady-state analysis, fault studies, load flow, dynamic and transient performance, on-line control, practical applications. Prerequisites: EEL 4215 or permission of the instructor. (SS, every third year)

EEL 6267 Application of Intelligent Systems to Power System Operations (3). Power system security assessment using intelligence systems techniques such as pattern recognition, expert systems, and neural networks. Class projects include applying IS to load forecasting, alarm processing. Prerequisites: EEL 4214, EEL 6273. (SS, alternating years)

EEL 6273 Power System Stability and Control (3). Direct methods for system stability, computer analysis of large scale models, Lyapunov stability, longer term stability, security analysis, MW-frequency control, isolated and multiple area control. Prerequisites: EEL 4215 or permission of the instructor. (S)

EEL 6292 Power Systems Economics and Markets (3). This is a graduate-level course that covers the basic economics principles underpinning the design, operation, and planning of modern power systems in a competitive environment. Prerequisite: EEL 4213 or equivalent.

EEL 6297 Introduction to Smart Grid and its applications (3). This course covers the fundamentals of

smart grid. It provides the working definition of the functions, design criteria, tools, techniques, and technology needed for building smart grid. Prerequisite: EEL 4213 or equivalent.

EEL 6438 RF and Microwave Photonics (3). This course provides advanced principles of quantum computing and quantum information with in-depth analysis and state of the art implementations.

EEL 6439 RF System Design for Wireless Communications (3). The course introduces the basic concepts of wireless transceiver design for digital communications. Topics: RF transmitters and receivers, RF systems blocks, noise and noise figure, non-linearity, and intermodulations, intercepts points, phase noise, IQ imbalances. Prerequisite: EEL 3514 or permission of the instructor

EEL 6443 Electro-Optical Devices and Systems (3). Introduction to optical devices and systems such as solid-state laser systems, their applications in industry. Also holography, linear and non-linear optical modulation and demodulation concepts. Prerequisites: EEL 4410, EEE 4314. Corequisites: EEL 5563 or permission of the instructor. (S, every third year)

EEL 6444 Optical Fiber Communication Systems (3). Course focuses on specification, design and application of fiber optic communication systems considering the fiber optic waveguide, optical device sources, photodetector, receiver and transmitter designs. Prerequisites: EEL 5501 or permission of the instructor. (S, every third year)

EEL 6463 Antenna Theory and Design (3). Radiation patterns of dipoles and loops, array analysis and synthesis, self-impedance and mutual impedance, frequency-independent antennas and antenna miniaturization, and reflectors and lens antenna. Prerequisite: EEL 4410. (S, alternating years)

EEL 6468 Adaptive and Smart Antennas (3). The course introduces an in-depth understanding of modern adaptive and smart antenna concepts. Topics include smart antennas, direction of arrival estimation, beamforming, and space-time processing. Prerequisite: EEL 5467 or permission of the instructor.

EEL 6479 Electromagnetic Interference and Electromagnetic Compatibility (3). The goal of this course is to teach concepts of electromagnetic compatibility and electromagnetic interference to the graduate students. Prerequisites: EEL 3135 and EEL 4410

EEL 6509 Digital Communications by Satellite (3). This course will consider processing and non-processing transponders, earth terminals, propagation link characteristics, multiple access techniques, and spread spectrum techniques. Prerequisites: EEL 5501 or permission of the instructor. (S)

EEL 6536 Spectral Analysis (3). Methods for the analysis and estimation of a signal's spectral content. These include nonparametric, parametric and line spectral estimation, filter bank techniques and array processing. Prerequisites: EEE 5543 or EEE 6502 or permission of the instructor.

EEL 6572 Pictorial Information Systems Design (3). Picture input device design, pictorial information systems

hardware, picture processor design, picture storage system design, pictorial database system design, picture communication interface design, and engineering applications. Prerequisites: EEL 4709C or CDA 4400. (SS)

EEL 6575 Data Communications Engineering (3). Digital networks for data communications, CCITT, HDLC, SDLC. Real-time switching techniques. Microprocessor-based network topologies. Busing schemes such as VME, MULTIB, RS232. Prerequisites: EEL 4746 and EEE 4314 or permission of the instructor. (F)

EEL 6614 Modern Control Theory I (3). Graduate-level treatment of modern control systems. Optimal control of feedback systems. Performance measures, Pontryagin's minimum principle, dynamic programming, numerical techniques. Prerequisites: EEL 5171 or permission of the instructor. (F, alternating years)

EEL 6615 Modern Control Systems, Theory, and IoT Applications (3). Course in Internet-of-things (IoT) applications, feedback control, and the hands-on implementation on the CPS systems sensing, and systems testing. Prerequisites: EEL 6614 or permission of the instructor. (S, alternating years)

EEL 6673 Cyber-Physical Systems Identification and IoT Applications (3). Course in Cyber-Physical System modeling, diagnostic tests, and systems validation. Hands-on implementation on the design of embedded CPS systems. Prerequisite: EEL 5171. (F, alternating years)

EEL 6681 Fuzzy Systems Design (3). Applications of fuzzy theory to develop design methodologies for various engineering systems. Emphasis will be on systems for pattern recognition, model identification, and automatic control. Prerequisite: Permission of the instructor.

EEL 6726 Advanced VLSI Design (3). Advanced design and development of Very Large Scale Integrated Circuit (VLSI) Micro Chip Structures. Micro Chip routing and thermal optimizations will be emphasized for implementing VLSI units. Prerequisite: Permission of the instructor. (S, every third year)

EEL 6751 Wavelet Theory Applied to Signal Processing (3). Application of wavelet theory to transient and non-stationary signal processing; compression and noise reduction of signals, singularity and edge detection, and time-frequency analysis. Prerequisites: EEL 3135 or equivalent.

EEL 6758 Engineering Design of Microprocessor-Based Operating Systems (3). Hardware microprocessor-based systems, BIOS (basic input and output), Kernel partitions, memory, stack organization and physical design of operating systems. Prerequisites: EEL 4709C and EEL 4746 or permission of the instructor. (S, every third year)

EEL 6787 Network Security (3). Network Security Requirements, Number Theory, Steganography, Encryption Design Principles and Algorithms, Message Authentication and Digital Signature Principle and Designs, Network System Security Design. Prerequisite: Permission of Instructor.

EEL 6795 Power-Aware Computing (3). The power/thermal challenges in computing system design; source of the power dissipation and power/thermal modeling; power/thermal aware design techniques at

different design abstraction levels. Prerequisites: EEL 4709C or permission of the instructor.

EEL 6803 Advanced Digital Forensics (3). This course provides students with the advanced skills to track and counter a wide range of sophisticated threats including espionage, hacktivism, financial crime syndication, and APT groups. Prerequisite: EEL 4802.

EEL 6805 Advanced Malware Reverse Engineering (3). This course provides the student with the necessary tools and techniques to perform practical reverse engineering on suspicious files and firmware encountered in a range of devices and understanding the implications associated with malware attacks. Prerequisite: EEL 4802.

EEL 6812 Advances in Neural Networks (3). Latest concepts in artificial neural networks research and newly developed applications. Implementation, convergence in learning algorithms, accuracy refinement, and optimal structure of neural networks. Engineering applications. Prerequisite: EEL 5810. (F, alternating years)

EEL 6816 Electronic Neural Systems (3). This course bridges electronics to the understanding of neurobiologically inspired models. Biological tasks and neural computations are studied in the context of networks and processing elements. Prerequisite: Permission of Instructor.

EEL 6821 Computer Vision (3). Image formation and image properties, Radiance and irradiance, introduction to Brain Topography, Color Vision, visual machinery of the brain, statistical pattern classification and decision functions, the eigensystem and its computational aspects, stereo vision, motion vision, size and orientation independence. Prerequisite: EEL 5820. (S)

EEL 6825 Pattern Recognition (3). Pattern recognition techniques via computer: decision functions, optimum decision criteria, training algorithms, unsupervised learning, feature extraction, data reduction, machine intelligence. Prerequisites: EEE 5543 or permission of Instructor.

EEL 6836 Computer Visualization of Brain Electrical Activity (3). Computer techniques for the visualization of brain electrical activity. Analysis of the origin of this activity as it relates to its measurement and visualization through computerized systems. Prerequisites: EEE 4510 or permission of instructor.

EEL 6870 Intelligent Computer Design (3). The course involves self-testing and correcting type of modular computer system development. Also concepts relating to Artificial Intelligence and Expert systems will be integrated into the computer system design. Prerequisite: EEL 4709C. (F, alternating years)

EEL 6894 Real-Time Computing and Applications (3). Introduction to real-time computing; real-time system modeling; classic uniprocessor scheduling; power-aware and thermal-aware real-time scheduling; multiprocessor and distributed real-time computing. Prerequisites: EEL 4709C or permission of the instructor.

EEL 6905 Individual Work (1-4). Special problems or projects selected by the students and faculty member. The student conducts the project with a minimum of supervision. Consent of Department Chairperson and Faculty Advisor.

EEL 6916 Graduate Project (3). Independent research work culminating in a professional practice-oriented report for the requirements of the non-thesis option of the M.S. degree project. Prerequisites: Fifteen graduate credits and approved project plan.

EEL 6931 Special Topics in Electrical and Computer Engineering (1-3). Course covers advanced topics not in existing graduate courses in electrical and computer engineering. Prerequisite: Permission of the instructor.

EEL 6932 Graduate Seminar (1). An examination of recent technical findings in selected areas of concern. Emphasis is placed on presentations (oral and written), research activities, readings, and active discussions among participants. Prerequisite: Consent of graduate advisor.

EEL 6971 Research Master's Thesis (1-6). The student, following the option of the Master's Degree with thesis, should work for his/her thesis through this course. Prerequisite: Graduate standing.

EEL 6977 Extended Thesis Research (0). For Graduate research students who have completed their sequence of thesis credits, but must register for a course to remain on graduate student status.

EEL 7910 Advanced Research (1-6). Advanced research credits under the supervision of the dissertation advisor. Prerequisite: Completion of the written comprehensive examination.

EEL 7980 Ph.D. Dissertation (1-12). Doctoral research leading to Ph.D. Electrical Engineering Dissertation. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

OSE 6492 Nanophotonics (3). This course focuses on nanoscale processes and devices and their applications for manipulating light on the nanoscale. Photonic crystals, plasmonics, metamaterials and Si photonics are covered. Prerequisites: EEE 3396, EEE 5425 or equivalent.

TCN 5155 Wireless Communications with Multimedia Applications (3). Overview of wireless communications systems; interference, blocking, spectral efficiency; performance of digital modulation in the presence of fading; diversity techniques; and multimedia applications. Prerequisite: EEL 3514.

TCN 5271 Advanced IoT Communications and Networking (3). This course presents advanced paradigms in terms of communication of IoT devices and the underlying networking protocols. Topics covered include IoT platforms, applications and protocol stack. Prerequisites: Graduate standing and permission of the instructor.

TCN 6276 Antennas for Wireless and Body-Centric Communications (3). Advanced antenna theory, simulation, and design as applied to wireless communications, advanced state-of-the-art antenna systems, and body-centric wireless communications. Prerequisites: EEL 4410 or permission of the instructor.

TPA 5213 Performing Arts Technology (2). Applications of structural, mechanical, electrical and electronic technologies to prepare performing arts students for management and production roles. Includes basic circuits

and NEC codes, control systems. Prerequisite: Permission of graduate advisor.

Mechanical Engineering, a major division of the engineering profession, plays a major role in our technologically advanced society. The design and manufacturing of power plants, automobiles, aircrafts, robots to improved methods of transportation and production by industrial robots are but a few important inventions that would not have been realized without the creativity associated with the mechanical engineering profession. The mechanical engineer is a vital ingredient in most industries that require automation, computers and medical technology, as well as areas as diverse as space exploration, environmental control and bioengineering. In fact, the mechanical engineer has a direct input in all facets of modern life. There is a high demand for

graduates in mechanical engineering from high technology industries throughout the United States and the developing world. The Mechanical and Materials Engineering Department at FIU takes pride in providing well educated and technologically competent graduates to serve these industries.

The academic program provides a well-balanced curriculum in the following areas of specialization:

- Mechanical Systems
- Mechanics
- Robotics and Mechatronics
- Thermo/fluid Systems
- Heating-Ventilation-and-Air-Conditioning (HVAC)
- Material Characterization
- Manufacturing and Automation Systems
- Materials Science and Engineering
- Multidisciplinary Design Optimization and Inverse Design
- Computational Analysis and Distributed Parallel Computing
- Biomechanics
- Laser and Plasma Materials Processing
- Nanomaterials
- Nanotechnology
- Electronic Packaging
- Optical Measurement and Diagnostics
- Waste Management
- Renewable Energy

Materials Science and Engineering is a dynamic field involved in the synthesis, structure, properties and performance of materials. Advanced materials are the foundation of manufactured products and many of the technological advances of this century were enabled by the development of new materials. Materials Science and Engineering is a graduate program only, with undergraduate electives offered in the Mechanical Engineering curriculum to prepare the student for graduate education in materials science and engineering. The academic program offers specialization in metallurgy, ceramics, electronic materials, nanomaterials and biomaterials. There is an increasing demand for graduates in materials science and engineering, with high technology industries leading the need for graduates. In fact, many of the companies needing materials scientists and engineers did not exist 20 years ago. Because everything is made of materials and new materials, such as nanomaterials, are rapidly being developed, materials science and engineering is a growth field in engineering.

Opportunities also exist for conducting research in the following Centers:

Advanced Materials Engineering Research Institute (AMERI): This center provides open access to research instrumentation, characterization capabilities and process development laboratories to support materials science and engineering research over the range from nanomaterials to bulk properties. AMERI also houses a nanofabrication facility for device fabrication.

The Center for the Study of Materials under Extreme Conditions (CeSMEC): The center focuses on study of physical property and synthesis of materials at extreme conditions of pressure, temperature and size. The center

is equipped with state of the art facilities in X-ray diffraction, spectroscopy, thermodynamic and first principle computations. Recent additions are hydride synthesis and diamond-growth facilities.

Multidisciplinary Analysis, Inverse Design, Robust Optimization and Controls (MAIDROC) Laboratory: It has a 280-processor parallel computer running Linux and MPI. MAIDROC provides independent, secure, and up-to-date computing environment for diverse large-scale simulation and design projects involving several engineering disciplines such as fluid dynamics, solid mechanics, heat transfer, electro-magnetics and chemistry.

Master of Science in Mechanical Engineering

The Department of Mechanical and Materials Engineering offers both thesis and non-thesis options for the Master's Degree in Mechanical Engineering. A student seeking the Master's degree with or without thesis is required to pass a comprehensive oral or written examination.

All work counted for the Master's degree must be completed during the six years immediately following the date of admission.

The program provides a broad education, covering more than one field, followed by in-depth studies in areas of interest.

Admission Requirements

The following is in addition to the University's graduate admission requirements:

1. A student seeking admission into the program must have a bachelor's degree in engineering, physical sciences, computer science or mathematics from an accredited institution, or, in the case of foreign students, from an institution recognized in its own country as preparing students for further study at the graduate level.
2. An applicant must have achieved a "B" average, GPA of 3.0 in upper level undergraduate work.
3. Applicants who have not satisfied the above will be evaluated for probationary or waiver admission.
4. In addition to the above criteria, International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version, or 213 on the computer-based version of the Test of English as a Foreign Language) or 6.5 overall on the IELTS is required.
5. The GPA and TOEFL scores specified above are to be considered minimum requirements for admission. Applicants from science areas other than mechanical engineering will be expected to complete remedial undergraduate courses selected to prepare them for graduate courses in their area of interest. Full admission to the graduate program requires the completion of these background courses with no grades below 'C' and a grade point average of 3.0 or better.

Graduation Requirements

The M.Sc. degree will be conferred when the following conditions have been met:

1. Recommendation of the advisor and faculty of the Department.
2. Certification provided by the Department Chair, College Dean, and University Graduate School that all degree requirements have been met.
3. Completion of the two applied/computational mathematics courses offered by the department, two courses outside student's major area and other courses as suggested by the student's major professor and committee.
4. Completion of undergraduate course deficiencies specified at admission, if any, with no grades below 'C' and a GPA ≥ 3.0 .
5. Thesis option: Successfully completed a minimum of 30 semester hours of graduate course work as specified in an approved study plan containing at least 6 hours of 6000 level courses with a GPA ≥ 3.0 (the minimum successful grade is a 'C'. Not more than six semester hours transferred from another accredited graduate program that was not part of a previously awarded degree may be incorporated in the study plan) plus a minimum of six hours of masters thesis research.
6. Non-thesis option: Successfully completed a minimum of 30 semester hours of graduate course work as specified in an approved study plan containing at least 9 hours of 6000 level courses with a GPA ≥ 3.0 (not more than six semester hours transferred from another accredited graduate program that was not part of a previously awarded degree may be incorporated in the study plan).
7. Thesis option: Successful public oral defense of the thesis. Submission of the approved thesis to the Graduate School.
8. Non-thesis option: Successful completion of a final oral comprehensive examination covering the general objectives of the study plan.
9. Students must achieve an overall GPA ≥ 3.0 in all graduate work completed at FIU in their approved study plan.
10. Students must complete the Graduate Seminar course.
11. Students must comply with all relevant University policies and regulations.

Thesis Option

A student shall complete a minimum of 24 semester credit hours of course work, plus a minimum of 6 semester credit hours of EML 6971, Master's Thesis Research, and take MME Graduate Seminar.

The course requirements include a minimum of 12 hours of 6000-level course credit including thesis hours. A maximum of 6 credit hours of courses offered by other departments may be included among the 24 course hour minimum. A maximum of three credit hours of approved independent studies, EML 6908, may be counted toward the M.S. thesis degree. A maximum of six graduate credit hours can be transferred from other accredited institutions provided that the courses have not been used for another degree and have a minimum letter grade of 'B' and meet university requirements. Transfer courses must be approved by the advisor and Graduate Coordinator.

Early in the program (before the middle of the second

term) the student and advisor will complete a study plan that specifies the courses that will comprise the program.

When the thesis research is completed, the student should schedule a defense with an examining committee appointed through the Graduate School consisting of a least three graduate faculty members (at least two of whom should be from the MME Department). The thesis, with an approval cover letter from the advisor, should be given to the examining committee for review not less than four weeks before the scheduled defense. The candidate should prepare to summarize the thesis in the manner of a technical paper using appropriate visual aids in 40 minutes or less. Following the presentation, the candidate will answer questions related to the work from the audience and/or the committee. At the conclusion of the defense, the committee will agree on the outcome -pass or fail- and report the results to the Graduate School. Following the exam the student will implement the committee's suggestions for improving the draft document. Each committee member must sign the approval form in the final document. Copies of the approved thesis must be provided to the advisor, department, and the library. Students should become familiar with the University Graduate School's regulations and deadlines available on line at <http://gradschool.fiu.edu>.

Non-Thesis Option

A student shall complete a minimum of 30 semester credit hours of graduate course work, and one semester of Graduate Seminar. Non-thesis students are encouraged to do a three-credit project under the independent study course registration. An approved study plan must include at least 9 credits of 6000 level graduate course work, including the project if elected. Up to nine credit hours of graduate course work from other departments may be included among the minimum of 30 credits. A maximum of six graduate credits from other accredited graduate programs completed with a 'B' or better and not counted toward a previous degree may be included in the study plan. Transfer credits must meet university requirements. The advisor and the Graduate Coordinator must approve transfer courses if they are to be included in a study plan. A maximum of three credits of independent study beyond an independent project may be included in a study plan.

Non-thesis students are required to take a final oral comprehensive exam dealing with the objectives of their study plan. If a project has been completed, the student will briefly summarize the project report (20 minutes) as a part of the exam. The examining committee will include a minimum of three faculty members, at least two of whom should be from the department.

Course Requirements

All MSME degree seeking thesis option students must take two of the following applied/computational mathematics courses offered by MME department plus the MME graduate seminar.

EGM 5315	Intermediate Analysis of Mechanical Systems	3
EGM 5346	Computational Engineering Analysis	3
EGM 5354	Finite Element Method Applications in Mechanical Engineering	3
EGM 6355	Nonlinear Finite Element Analysis	3
EGM 6422	Advanced Computational Engineering Analysis	3
EML 6725	Computational Fluid Dynamics	3

EML 6935	Graduate Seminar	0
----------	------------------	---

An additional six credit hours of courses must be taken outside the major area of study of the student. The remaining 4 courses should in the area of the student's specialization or as suggested by the student's major professor and committee. Out of 24 semester credit hours of course work a maximum of three credit hours of approved independent studies, EML 6908, may be counted towards the M.S. thesis degree. A minimum of 6 credits of EML 6971 Thesis is also required.

All MSME degree seeking non-thesis option students must take two of the following applied/computational mathematics courses offered by MME department plus the MME graduate seminar.

EGM 5315	Intermediate Analysis of Mechanical Systems	3
EGM 5346	Computational Engineering Analysis	3
EGM 5354	Finite Element Method Applications in Mechanical Engineering	3
EGM 6355	Nonlinear Finite Element Analysis	3
EGM 6422	Advanced Computational Engineering Analysis	3
EML 6725	Computational Fluid Dynamics	3
EML 6935	Graduate Seminar	0

An additional six credit hours of courses must be taken outside the major area of study of the student. The remaining 6 courses should in the area of the student's specialization or as suggested by the student's project professor; one of those courses must be EML 6908 where the students will present their project work. Out of 30 semester credit hours of course work a maximum of six credit hours of approved independent studies, EML 6908, may be counted towards the M.S.

Thermo/Fluid (Each course is 3 credits unless stated otherwise)

EAS 6721	Advanced Aerodynamic Shape Design
EML 5103	Intermediate Thermodynamics
EML 5104	Classical Thermodynamics
EML 5152	Intermediate Heat Transfer
EML 5606C	Advanced Refrigeration & A/C Systems
EML 5615C	Computer Aided Design in A/C
EML 5708	Advanced Design of Thermal and Fluid Systems
EML 5709	Intermediate Fluid Mechanics
EML 6153C	Advanced Heat Transfer
EML 6154	Conduction Heat Transfer
EML 6155	Convection Heat Transfer
EML 6157	Radiation Heat Transfer
EML 6712	Advanced Fluid Mechanics
EML 6714	Advanced Gas Dynamics
EML 6725	Computational Fluid Dynamics

Mechanics/Materials (Each course is 3 credits unless stated otherwise)

EAS 5221	Design and Analysis of Aerospace Structures
EGM 5346	Computational Engineering Analysis
EGM 5354	Finite Element Method Applications in Mechanical Engineering
EGM 5615	Synthesis of Engineering Mechanics
EGM 6570	Fracture Mechanics
EMA 5295	Principles of Composite Materials
EMA 5507C	Analytical Techn. of Materials Sciences
EMA 5935	Advanced Topics in Materials Engineering

EMA 6127C	Advanced Physical & Mechanical Metallurgy
EMA 6165C	Polymer Physics & Analytical Techniques
EML 5505	Smart Machine Design and Development
EML 5509	Optimization Algorithms
EML 5125	Classical Dynamics
EML 5385	Identification Techniques of Mech. Systems
EML 5562	Advanced Electronic Packaging
EML 6223	Advanced Mech. Vibration Analysis
EML 6233	Fatigue and Failure Analysis
EML 6805	Advanced Design of Robots
Design and Manufacturing	
EAS 5221	Design and Analysis of Aerospace Structures
EML 5385	Identification Techniques of Mechanical Systems
EML 5505	Smart Machine Design and Development
EML 5509	Optimization Algorithms
EML 5530	Intermediate CAD/CAE
EML 5562	Advanced Electronic Packaging
EGM 5615	Synthesis of Engineering Mechanics
EML 5808	Control Technology for Robotic Systems
EML 5825	Sensors and Applied Machine Intelligence
EML 6223	Advanced Mechanical Vibration Analysis
EML 6532	Advanced CAD/CAE
EGM 6570	Fracture Mechanics
EML 6805	Advanced Design of Robots

Combined BS/MS in Mechanical Engineering Degree Pathway

Students, who pursue a BS degree and are in their junior year (completed 75 credits), with at least a 3.20 GPA on both overall and upper division courses may apply to enroll in the combined BS/MS pathway. To be considered for admission to the combined bachelor's/master's degree program, students must have completed at least 75-90 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees. In addition to the admission requirements of the combined BS/MS pathway, students must meet all the admission requirements of the University Graduate School.

Students enrolled in the pathway may count up to six credit hours of MME graduate courses as credits for both the BS and MS degrees. The combined BS/MS pathway has been designed to be a continuous enrollment

pathway. During this combined BS/MS pathway, upon completion of all the requirements of the undergraduate program, students will receive their BS degrees. Students in this pathway have up to three major semesters to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this three-major-semester post BS requirement or who elect to leave the combined pathway at any time and earn only the BS degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the six credits in both the bachelor's and master's degrees.

For each of the graduate courses counted as credits for both BS and MS degree, a minimum grade of "B" is required. Students enrolled in the pathway may count up to six credit hours of MME graduate courses toward the elective engineering BS requirements as well as toward the MS degree. Only graduate courses with formal lectures can be counted for both degrees. The students are responsible for confirming the eligibility of each course with the undergraduate advisor.

Students interested in the pathway should consult with the undergraduate advisor on their eligibility to the pathway. The students should also meet the graduate advisor to learn about the graduate program and available courses before completing the application form and submitting it to the undergraduate advisor. Applicants will be notified by the department and the University Graduate School of the decision on their applications.

Master of Science in Materials Science and Engineering

The Department of Mechanical and Materials Engineering offers both thesis and non-thesis options for the Master's Degree. A student seeking the Master's degree with or without thesis is required to pass a comprehensive oral or written examination.

All work counted for the Master's degree must be completed during the six years immediately following the date of admission.

The program provides a broad education, covering more than one field, followed by in-depth studies in areas of interest.

Admission Requirements

The following is in addition to the University's graduate admission requirements:

1. A student seeking admission into the program must have a bachelor's degree in engineering, physical sciences, computer science or mathematics from an accredited institution, or, in the case of foreign students, from an institution recognized in its own country as preparing students for further study at the graduate level.
2. An applicant must have achieved a "B" average, GPA of 3.0 in upper level undergraduate work. If a student is requesting financial assistance, Graduate Record Examination (GRE) with the following minimum scores on the individual components: verbal ≥ 143 and quantitative ≥ 151 is also required.
3. Applicants who have not satisfied the above will be evaluated for conditional admission.
4. In addition to the above criteria, International graduate student applicants whose native language is not

English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version, or 213 on the computer-based version of the Test of English as a Foreign Language) or 6.5 overall on the IELTS is required.

5. The GPA, GRE and TOEFL scores specified above are to be considered minimum requirements for admission. Applicants from science areas other than materials science and engineering will be expected to complete undergraduate courses selected to prepare them for graduate courses in their area of interest. Full admission to the graduate program requires the completion of these background courses with no grades below 'C' and a grade point average of 3.0 or better.

Graduation Requirements

The degree will be conferred when the following conditions have been met:

1. Recommendation of the advisor and faculty of the Department.
2. Certification provided by the Department Chair, College Dean, and University Graduate School that all degree requirements have been met.
3. Completed the three department core course requirements plus the elective courses in the student's major area.
4. Completed undergraduate course deficiencies specified at admission, if any, with no grades below 'C' and a GPA ≥ 3.0 .
5. Thesis option: Successfully completed a minimum of 30 semester hours of graduate course work as specified in an approved study plan containing at least 6 hours of 6000 level courses with a GPA ≥ 3.0 (the minimum successful grade is a 'C'; not more than six semester hours transferred from another accredited graduate program that was not part of a previously awarded degree may be incorporated in the study plan) plus a minimum of six hours of masters thesis.
6. Non-thesis option: Successfully completed a minimum of 27 semester hours of graduate course work as specified in an approved study plan containing at least 9 hours of 6000 level courses and a 3 credit hour project with a GPA ≥ 3.0 (not more than six semester hours transferred from another accredited graduate program that was not part of a previously awarded degree may be incorporated in the study plan).
7. Thesis degree: Successful public oral defense of the thesis. Submission of the approved thesis to the Graduate School.
8. Non-thesis degree: Successful completion of a formal report and presentation.
9. Students must achieve an overall GPA ≥ 3.0 in all graduate work completed at FIU in their approved study plan.
10. Completed one semester of the Graduate Seminar course.
11. Complied with all relevant University policies and regulations.

Thesis Option

A student shall complete a minimum of 24 semester credit hours of course work, plus a minimum of 6 semester credit hours of EMA 6971, Master's Thesis, and MME Graduate Seminar.

A maximum of 6 credit hours of courses offered by other departments may be included among the 24 course hour minimum. A maximum of three credit hours of approved independent studies, EML 6908, may be counted toward the M.S. thesis degree. A maximum of six graduate credit hours can be transferred from other accredited institutions provided that the courses have not been used for another degree and have a minimum letter grade of 'B'. Transfer courses must be approved by the advisor and Graduate Coordinator. Early in the program (before the end of the second term) the student and advisor will complete a study plan that specifies the courses that will comprise the program.

When the thesis research is completed, the student should schedule a defense with an examining committee appointed through the University Graduate School consisting of a least three graduate faculty members (at least two of whom should be from the department). The thesis, with an approval cover letter from the advisor, should be given to the examining committee for review not less than four weeks before the scheduled defense. The candidate should prepare to summarize the thesis in the manner of a technical paper using appropriate visual aids in 40 minutes or less.

Following the presentation, the candidate will answer questions related to the work from the audience and/or the committee. At the conclusion of the defense, the committee will agree on the outcome -pass or fail- and report the results to the Graduate School. Following the exam the student will implement the committee's suggestions for improving the draft document. Each committee member must sign the approval form in the final document. Hardcover bound copies of the approved thesis must be provided to the advisor and the department. Students should become familiar with the University Graduate School's regulations and deadlines available on line at <http://gradschool.fiu.edu>.

Non-Thesis Option

A student shall complete a minimum of 30 semester credit hours of graduate course work, and one semester of Graduate Seminar. Non-thesis students are encouraged to do a three-credit project under the independent study course registration. Up to nine credit hours of graduate course work from other departments may be included among the minimum of 30 credits. A maximum of six graduate credits from other accredited graduate programs completed with a 'B' or better and not counted toward a previous degree may be included in the study plan. The advisor and the Graduate Coordinator must approve transfer courses if they are to be included in a study plan. A maximum of three credits of independent study beyond an independent project may be included in a study plan.

Non-thesis students are required to submit a formal report and presentation of the project, with the report and presentation evaluated by an examining committee that will include a minimum of three faculty members, at least two of whom should be from the department.

Areas of Specialization

Metals and Alloys
Electronic Materials
Ceramics
Polymers and Biomaterials
Nanomaterials

Course Requirements

All MSMSE degree seeking students must take the following three courses or equivalent plus one seminar as common core courses:

EMA 5106	Thermodynamics and Kinetics of Materials	3
EMA 5001	Physical Properties of Materials	3
EMA 5507C	Analytical Methods in Material Science	3
EML 6935	Graduate Seminar	3

The remainder of the courses shall be chosen from the electives with consultation of the student's advisor. Additionally, up to six hours may be taken from courses offered by other departments.

MSMSE Elective Courses

EEL 6332	Thin Film Engineering	3
EML 5103	Inter. Thermodynamics	3
EMA 5xxx	Surface Science	3
EMA 5140	Introduction to Ceramic Materials	3
EMA 5295	Principles of Composite Materials	3
EMA 5200	Nanomechanics and Nanotribology	3
EGM 5354	Finite Element Method Applications in Mechanical Engineering	3
EGN 5367	Industrial Materials and Engineering Design	3
EMA 6126	Adv. Physical Metallurgy	3
EMA 6127C	Advanced Physical and Mechanical Metallurgy	3
EML 6233	Fatigue and Failure Analysis	3
EGM 6355	Nonlinear Finite Element Analysis	3
EML 5509	Optimization Algorithms	3
EML 5562	Adv. Electronic Packaging	3
EML 6908	Independent Study	1-3
EML 6971	Master Thesis	1-6
EMA 5015	Introduction to Nanomaterials Engineering	3
EMA 5104	Adv. Mechanical Properties of Materials	3
EMA 5016	Nanoelectronic Materials	3
EMA 5017	Nanoparticle Technology	3
EMA 5018	Nanoscale Modeling of Materials	3
EMA 5646	Ceramic Processing	3
EMA 5605	Fundamentals of Materials Processing	3
EMA 6518	Transmission Electron Microscopy	3
EMA 6665	Polymer Processing and Engineering	3
EMA 6449	Electronic Properties of Ceramic Materials	3
EMA 6264	Mechanical Properties of Polymers	3
EMA 6165	Polymer Physics and Analytical Techniques	3
EEE 6399C	Electronic Properties of Material Science	3

Doctor of Philosophy in Mechanical Engineering

Admission Requirements

The requirements for admission to the doctoral program in Mechanical Engineering for applicants having a Bachelor's

degree in Mechanical Engineering from an accredited institution are the following:

1. GPA of at least 3.0/4.0 in the last 60 upper level credit hours
2. GRE of at least 151 on the quantitative component.
3. Three letters of recommendation.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version, or 213 on the computer-based version of the Test of English as a Foreign Language) or 6.5 overall on the IELTS is required.
5. Applicants having a Master's degree in Mechanical Engineering from an accredited institution must also satisfy the above requirements for admissions to the doctoral program; however a GPA of at least 3.3/4.0 in the Master's program is also required.

Credentials of all other applicants will be examined by the Graduate Admission Committee on a case by case basis.

In addition to the departmental requirements, all students must satisfy the University's Graduate Policies and Procedures.

Identification of Research Area

Within 4 months upon acceptance into the Ph.D. program, the student having a Master's Degree has to identify an area of research of his or her interest by contacting and being accepted by a professor willing to guide the dissertation research. The student with a Bachelor's degree should identify the area of research within 12 months upon acceptance into Ph.D. program. If no professor is obtained, the student will be dismissed from the Ph.D. program. Contact the department for a list of the graduate faculty members and their research interests.

Course Requirements

Applicants having a Bachelor's degree in Mechanical Engineering are required to complete at least 75 credit hours, of which at least 45 hours must be coursework and 15 hours dissertation. The credit hours earned towards the Ph.D. program have the following requirements:

1. At least 21 credits at the 5000 level or higher, not to include dissertation.
2. At least 12 credits at the 6000 level or higher, not to include dissertation.
3. Breadth criteria could be satisfied by taking 3 courses in a field/area outside the student's own field.
4. Two applied/computational mathematics courses as suggested for M.S. program.
5. A minimum of 15 credits of dissertation.
6. A maximum of 6 semester hours of graduate credit earned from another accredited institution that was not used for a previous degree may be transferred as long as the courses were completed within the six years preceding admission to the program and meet university requirements.
7. EML 6908 Independent Studies counts for a maximum of 6 credit hours of coursework.
8. EML 6910 Supervised Research counts for a maximum of 6 credit hours of coursework.

9. EML 6935 Graduate Seminar (zero credits) should be registered every semester until the advancement to candidacy (D-2).

Applicants entering the Ph.D. program with a Masters degree in Mechanical Engineering are required to complete at least 45 credit hours, of which at least 24 hours must be coursework and 15 hours dissertation. The credit hours earned towards the Ph.D. program have the following requirements:

1. Breadth criteria could be satisfied by taking 3 courses in a field/area outside the student's own field.
2. A minimum of 12 credits of 6000 higher, not to include dissertation.
3. A minimum of 15 credits of dissertation.
4. Additional courses to be determined by candidate's dissertation committee.
5. EML 6908 Independent Studies counts for a maximum of 6 credit hours of coursework.
6. EML 6910 Supervised Research counts for a maximum of 6 credit hours of coursework.
7. EML 6935 Graduate Seminar (zero credits) should be registered every semester until the advancement to candidacy (D-2).

Applicants having a Master's Degree in any other Engineering discipline from an accredited institution may transfer a maximum of 24 semester hours as part of their requirements.

Elective Courses: Possible elective courses from the Mechanical Engineering department include:

Thermo/Fluid

EAS 6721	Advanced Aerodynamic Shape Design
EML 5103	Intermediate Thermodynamics
EML 5104	Classical Thermodynamics
EML 5152	Intermediate Heat Transfer
EML 5606C	Advanced Refrigeration & A/C Systems
EML 5615C	Computer Aided Design in A/C
EML 5708	Advanced Design of Thermal and Fluid Systems
EML 6153C	Advanced Heat Transfer
EML 6154	Conduction Heat Transfer
EML 6155	Convection Heat Transfer
EML 6157	Radiation Heat Transfer
EML 6712	Advanced Fluid Mechanics
EML 6714	Advanced Gas Dynamics
EML 6725	Computational Fluid Dynamics

Mechanics/Materials

EAS 5221	Design and Analysis of Aerospace Structures
EGM 5346	Computational Engineering Analysis
EGM 5354	Finite Element Method Applications in Mechanical Engineering
EGM 6570	Fracture Mechanics
EMA 5295	Principles of Composite Materials
EMA 5106	Thermodynamics and Kinetics of Materials

EML 6805	Advanced Design of Robots

Residency Requirements

The program will provide student access to a wide range of support facilities including research library, cultural events, and other occasions for intellectual growth associated with campus life, significant faculty/student interaction, opportunities for student exposure to and engagement with cognate disciplines and research scholars working in those disciplines, and significant peer interaction among graduate students. Students will be provided with the opportunity for a mentoring apprentice relationship with faculty and students as well as adequate time for in-depth evaluation of the student. To satisfy the residency requirement for the Ph.D. degree, the candidate must complete a minimum of 18 credit hours within a period of 12 months at the University.

Graduate Supervisory and Research Committee

The student's Ph.D. Graduate Supervisory and Research Committee should be appointed as soon as possible and no later than 4 months after being admitted to the Ph.D. program. Consult the Graduate Guidelines in the department for more details on how to select the committee members.

Ph.D. Course Breadth Requirements

Breadth criteria could be satisfied by taking 3 courses in a field/area outside student's own field. Examinations and Proposal and Final Defense Student must demonstrate graduate knowledge acquisition in four incremental stages in order to be awarded a Ph.D. in Mechanical Engineering.

Stages of Progression Towards Degree

A student must demonstrate acquisition of graduate knowledge in five incremental stages in order to be awarded a Ph.D. in Mechanical Engineering:

I. Formation of the Dissertation Committee

Students must select a dissertation advisor during their first semester of study. Students must select a dissertation committee and submit the D-1 form at least one semester before their first attempt to take the Comprehensive Examination.

II. Comprehensive Exam (CE)

General written exam to test masters level knowledge.

A student who is admitted to the Ph.D. program with a bachelors degree must take the CE no later than the beginning of the 4th major semester after admission, and a student who enters the Ph.D. program with a masters degree must take and pass the CE no later than the beginning of the 2nd major semester after admission. Students may petition for exceptions from the departmental graduate committee by one major semester at a time. A student who fails the CE may retake the exam once only.

III. Admission to Candidacy

Candidacy status indicates that a doctoral student is ready to commence working on the dissertation. A student is admitted to candidacy upon successfully completing all required course work and passing the Comprehensive Examination. After completion of coursework credits and the Comprehensive Exam, form D-2 must be turned in.

IV. Proposal Defense (PD)

The dissertation proposal will be presented by the student in the form of a Graduate Seminar in which he/she must submit a proposal for his/her dissertation.

Students must declare their proposal subject within 6 months after taking and passing the Comprehensive Exam. After completion of proposal defense, form D-3 must be turned in.

V. Final Defense (FD)

There will be a public defense at a graduate seminar. The defense can be failed no more than once.

The final defense should be presented no later than the 4th year after the master's degree and no later than the 6th year after the bachelor's degree.

Following the successful defense of the dissertation, as determined by a majority vote of the student's examining committee, the dissertation must be forwarded to the Dean of the College of Engineering and Computing and the Dean of the University Graduate School for their approval.

All dissertations submitted in fulfillment of the requirements for graduate degrees must conform to University guidelines (see "Regulations for Thesis and Dissertation Preparation Manual"). One final and approved copy of the dissertation must be delivered to the Chairperson of the Department of Mechanical Engineering and one to the advisor, in addition to the copies required by the University Graduate School.

Financial Aid

Consult the Department for information on research and teaching assistantships available for doctoral students.

Doctor of Philosophy in Materials Science and Engineering

The Ph.D. in Materials Science and Engineering will prepare graduates for industrial and/or academic research as well as for higher level jobs in materials related industry in one (or more) of five areas of specialization: 1) electronic materials, 2) nanotechnology, 3) metals and alloys, 4) ceramics, and 5) polymer science and biomaterials.

Admission Requirements

The requirements for admission to the doctoral program in Materials Science and Engineering for applicants having a Bachelor's degree in Materials Science and Engineering or in a related field, e.g. Mechanical Engineering, Electrical Engineering, Physics, Chemistry, and Geophysics from an accredited institution are the following:

1. GPA of at least 3.0/4.0 in the last 60 credit hours attempted.
2. GRE of at least 151 on the quantitative component.
3. Three letters of recommendation.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version, or 213 on the computer-based version of the Test of English as a Foreign Language) or 6.5 overall on the IELTS is required.
5. Applicants having a Master's degree in Materials Science and Engineering from an accredited institution must also satisfy the above requirements for admissions to the doctoral program; however, a GPA of at least 3.3/4.0 in the Master's program is also required.

Credentials of all other applicants will be examined by the Graduate Admission Committee on a case-by-case basis. In addition to the departmental requirements, all students must satisfy the University's Graduate Policies and Procedures.

Course Requirements

Applicants having a Bachelor's Degree are required to complete at least 75 credit hours, out of which at least 45 hours must be coursework and 15 hours dissertation. The credit hours earned towards the Ph.D. program have the following requirements:

- At least 21 credits at the 5000 level or higher, not to include dissertation.
- At least 12 credits at the 6000 level or higher, not to include dissertation.
- EML 6908 Independent Studies counts for a maximum of 6 credit hours of coursework.
- EML 6910 Supervised Research counts for a maximum of 6 credit hours of coursework.
- EML 6935 Graduate Seminar (zero credits) should be registered every semester until the advancement to candidacy (D-2).

Applicants having a Master's Degree in Materials Science, Materials Engineering, and Metallurgical Engineering are required to complete at least 45 credit hours, out of which at least 24 hours must be coursework and 15 hours dissertation. The credit hours earned towards the Ph.D. program have the following requirements:

- At least 12 credits at the 6000 level or higher, not to include dissertation.
- EML 6908 Independent Studies counts for a maximum of 6 credit hours of coursework.
- EML 6910 Supervised Research counts for a maximum of 6 credit hours of coursework.
- EML 6935 Graduate Seminar (zero credits) should be registered every semester until the advancement to candidacy (D-2).

Applicants having a Master's Degree in any other Engineering discipline from an accredited institution may transfer a maximum of 24 semester hours from their previous course of study.

Materials Science and Engineering Courses

Fundamentals

EMA 5001	Physical Properties of Materials (Required core course for MSMSE)
EMA 5106	Thermodynamics and Kinetics of Materials (Required core course for MSMSE)
EMA 5507C	Analytical Techniques of Materials Science (Required core course for MSMSE)

These 3 or equivalent courses should be taken by all PhD students in Materials Engineering

Specialty Areas

Metals and Alloys

EMA 5104	Advanced Mechanical Properties of Materials
EMA 5295	Principle of Composite Materials
EMA 6126	Advanced Physical Metallurgy
EMA 6127C	Advanced Physical and Mechanical Metallurgy
EMA 6185	Advanced Mechanics of Composites
EGL 6570	Fracture Mechanics
EGL 7574	Advanced Fracture Mechanics
EML 6233	Fatigue and Fracture Analysis

Electronic Materials

EEL 6315	Advanced Solid State Electronics
EEL 6399	Electronic Properties of Materials
EMA 5016	Nanoelectronic Materials
PHZ 6426	Advanced Solid State Physics
PHZ 5405	Solid State Physics

Ceramics

EMA 5140	Introduction to Ceramic Materials
EMA 6646	Ceramic Processing
EMA 6449	Electronic Properties of Ceramic Materials

Polymers

CHM 6511	Polymer Chemistry
EMA 5584	Biomaterials Science
EMA 6165C	Polymer Physics and Analytical Techniques
EMA 6264	Mechanical Properties of Polymers
EMA 6665	Polymer Processing and Engineering

Analytical Techniques in Materials Science

EMA 6516	Crystallography and X-ray Diffraction
EMA 6518	Transmission Electron Microscopy
GLY 5287C	Scanning Electron Microscopy with EDS Analysis

GLY 5288C	Electron Microprobe Microanalysis with EDS Analysis
PHZ 6437	Surface Physics

Nano Structured Materials

EEL 6315	Advanced Solid State Electronics
EEL 6332	Thin Film Engineering
EMA 5017	Nanoparticle Technology
EMA 5015	Introduction to Nanomaterials
EMA 5016	Nanoelectronic Materials

It is important that there will be three 6000 level courses developed for each specialization.

Stages of Progression Towards Degree

A student must demonstrate acquisition of graduate knowledge in five incremental stages in order to be awarded a Ph.D. in Materials Science Engineering:

I. Formation of the Dissertation Committee

Students must select a dissertation advisor during their first semester of study. Students must select a dissertation committee and submit the D-1 form at least one semester before their first attempt to take the Comprehensive Examination.

II. Comprehensive Exam (CE)

The Comprehensive Examination is the general written and oral exam to test master's level knowledge. A student who is admitted to the Ph.D. program with a bachelor's degree must take the CE no later than the second term of the 2nd year after admission, and a student who enters the Ph.D. program with a master's degree must take and pass the CE no later than the 2nd term after admission. Students may petition for exceptions from the graduate student committee. A student who fails the CE may retake the CE exam only once.

III. Admission to Candidacy

Candidacy status indicates that a doctoral student is ready to commence working on the dissertation. A student is admitted to candidacy upon successfully completing all required course work and passing the Comprehensive Examination. After completion of coursework credits and the Comprehensive Exam, form D-2 must be turned in.

IV. Proposal Defense (PD)

The dissertation proposal will be presented by the student in the form of a Graduate Seminar, in which he/she must submit a proposal for his/her dissertation. Students must declare their proposal subject within 6 months after taking the Comprehensive Examination. After completion of proposal defense, form D-3 must be turned in.

V. Final Defense (FD)

There will be a public defense at a graduate seminar. The defense can be failed no more than once. The final defense should be presented no later than the 4th year after the master's degree and no later than the 6th year after the bachelor's degree.

Following the successful defense of the dissertation, as determined by a majority vote of the student's examining committee, the dissertation must be forwarded to the Dean of the College of Engineering and Computing and the Dean of the University Graduate School for their approval.

All dissertations submitted in fulfillment of the

requirements of graduate degrees must confirm to University guidelines (see "Regulations for Thesis and Dissertation Preparation Manual"). One final and approved copy of the dissertation must be delivered to the Chairperson of the Department of Mechanical and Materials Engineering in addition to the copies required by the University Graduate School.

Course Descriptions

Definition of Prefixes

EAS—Engineering: Aerospace; EGM—Engineering: Mechanics; EGN—Engineering: General; EMA—Engineering: Materials; EML—Engineering: Mechanical

EAS 5124 Aerodynamics and Flight Mechanics (3). Fundamentals of aerodynamics, definition of aerodynamic shapes, analysis of aerodynamic forces, airplane performance, and flight stability and control. Prerequisites: EGN 3321, EML 3126, EGN 3343.

EAS 5221 Design and Analysis of Aerospace Structures (3). Fundamental principles of aircraft design and analysis. Advanced computational methods used for analysis of aerospace structures. Prerequisites: EML 3032, MAP 2302 or EGM 3311, EMA 3702, EML 4140.

EAS 6185 Turbulence (3). Fundamentals of turbulent flow, solutions for bounded and free turbulent flows, dynamics of turbulence, statistical description of turbulence, spectral dynamics, and stability.

EAS 6212 Aeroelasticity (3). Understanding and analysis of aeroelastic phenomena in fixed-wing aircraft, aero-structural dynamics, static aeroelasticity, dynamic aeroelasticity, and dynamic response and transient stresses. Prerequisite: Permission of the instructor.

EAS 6721 Advanced Aerodynamic Shape Design (3). Analytical formulations and numerical algorithms for inverse shape design and optimized shape design of 2D and 3D aerodynamic and aerothermal configurations over a range of flow regimes. Prerequisites: Permission of the instructor. Good programming skills. Basic courses in fluid mechanics.

EGM 5315 Intermediate Analysis of Mechanical Systems (3). First course at the graduate level in the analysis of mechanical systems. Modeling of the system and analytical and numerical methods of solution of the governing equations will be studied. Fluid and thermodynamic systems will be emphasized in this course. Prerequisites: EGM 3311 or permission of the instructor.

EGM 5346 Computational Engineering Analysis (3). Application of computational methods to mechanical engineering problems of translational, rotational, control, thermal and fluid systems employing linear/nonlinear system elements. Prerequisites: EML 2032, MAP 2302, and EML 3222, or permission of the instructor.

EGM 5354 Finite Element Method Applications in Mechanical Engineering (3). Utilize the finite element method to solve problems in heat transfer, fluid dynamics, diffusion, acoustics, vibration, and electromagnetism, as well as the coupled interaction of these phenomena. Prerequisites: EML 2032, EMA 3702, and EML 4140.

EGM 5371 Meshfree and Alternative Methods in Mechanical Engineering (3). Course covers the

alternative methods in engineering analysis with a special focus on meshfree method with distance fields in mechanical engineering. Prerequisites: EML 3036, (MAP 2302 or EGM 3311), EGM 5354, or permission of the instructor.

EGM 5615 Synthesis of Engineering Mechanics (3). Unified approach to the analysis of continuous media using constitutive equations, mechanical behavior of materials and their usefulness in handling failure theories and composite materials. Prerequisites: MAP 2302 or EGM 3311, and EMA 3702.

EGM 5935 Review of Topics in Mechanical Engineering (4). To prepare qualified candidates to take the Mechanical Engineering PE written examination. Reviewed courses include Thermodynamics, Fluid Mechanics, Mechanics of Materials, Mechanical Design and Heat Transfer.

EGM 6355 Nonlinear Finite Element Analysis (3). Nonlinear finite element analysis. Geometric and material nonlinearities will be considered in the formulation of different finite elements. Prerequisite: Permission of the instructor.

EGM 6422 Advanced Computational Engineering Analysis (3). Modeling of vibrational and dynamic systems including solution of governing equations by analytical and numerical techniques. Prerequisites: EGM 5346 or permission of the instructor.

EGM 6455 Impact Dynamics (3). Mechanical impact, point-mass collisions, vibratory impact, stress waves in solids, elastic-plastic stress waves, low velocity impact, penetration and perforation applications. Prerequisites: EGN 3321 and EMA 3702.

EGM 6570 Fracture Mechanics (3). Griffith's and Irwin's fracture criteria; stress intensity factors evaluation; crack-tip plastic zone; fracture toughness measurement; crack initiation; fatigue crack growth; stress corrosion cracking. Prerequisite: EGM 5615.

EGM 6654 Advanced Theory of Elasticity (3). Modern methods of stress and strain analysis including two-dimensional problems of stress concentration, contact adhesion, friction, thermal stresses, and dynamic waves. Prerequisites: EGM 5615, EGM 5315, or permission of the instructor.

EGM 7574 Advanced Fracture Mechanics (3). Modern fracture mechanics including invariant integrals, nano-scale fracture, environmental fracture, penetration mechanics, failure waves, erosion, and fracture by electron and laser beams. Prerequisites: EGM 6570, EGM 6422.

EGM 7676 Classic Topics of Nonlinear Mechanics (3). Classic topics on nonlinear mechanics, such as Theory of Plasticity of Solids, and the Theory of Jets and Cavities of Fluids. Prerequisites: EGM 5315, EGM 6422, EGM 5615, EML 5709.

EGN 5013C Nanoscale Fabrication and Synthesis (3). This course covers the advanced micro/nanofabrication tools and techniques. It includes lab sessions where the students design, fabricate and test selected micro/nano-scale devices.

EGN 5367 Industrial Materials and Engineering Design (3). Industrial materials, material selection, and engineering design process, including synthesis, analysis, optimization, and evaluation.

EGN 6900 Methods and Practices in Engineering and Computing Education Research (3). Foundational course in research methods and practices of engineering and computing education researchers, focusing on research design decisions, research quality, ethical implications, and publishing.

EGN 6907 Independent Study (1-10). A variable credit independent study course for PhD students to work on topics where standard courses cannot be opened. Topics must be related to engineering or computing education.

EGN 6920 Cooperative Education in Engineering (1-3). A variable credit cooperative education in engineering courses for current PhD students who have a position within an organization focused on their area of study. Topic must be eng or computing related.

EGN 6935 Seminar on STEM Education Research (0). Weekly interactive and engaging presentations featuring faculty, students and guest speakers sharing research topics in science, technology, engineering and mathematics (STEM) topics.

EGN 6939 Advanced Special Topics (1-3). An advanced special topics course for PhD students to pursue and study areas in engineering or computing education at an advanced level that otherwise would not be offered.

EGN 6942 Mentored Teaching Practicum in Engineering and Computing Education (1). Structured application of educational theories and pedagogy through classroom teaching experiences and weekly learning community meetings. Requires students find a faculty teaching mentor.

EGN 6957 Professional Development in Engineering and Computing Education (2). An exploration of professional development tools and techniques within engineering and computing education research and practice.

EGN 7918 Graduate Research (1-25). Doctoral research prior to candidacy. Repeatable. Prerequisite: Permission of the department.

EMA 5001 Physical Properties of Materials (3). The physical properties of materials, including the influence of structure on properties, thermodynamics of solids and phase transformations and kinetics on microstructural development. Prerequisite: EGM 4521C.

EMA 5015 Introduction to Nanomaterials Engineering (3). The science and engineering of nanomaterials, the fabrication, behavior, and characterization of the nano-size particles and materials. Prerequisites: EGN 3365, EGM 3311.

EMA 5016 Nanoelectronic Materials (3). Course provides an understanding of nanotechnology based on materials engineering. Topics include energy bands in semiconductors, MOSFET scaling, materials processing and other applications. Prerequisite: EGN 3365.

EMA 5017 Nanoparticle Technology (3). An interdisciplinary overview of the nanoparticle engineering. Synthesis of nanoparticles, nanoparticle growth and

transport, characterization methods, and applications. Prerequisites: EGN 3365 or permission of the instructor.

EMA 5018 Nanoscale Modeling of Materials (3). Overview of computational nanotechnology. Modeling, simulation and design of nanomaterials. Energy minimization, molecular dynamics and advanced multiscale numerical techniques. Prerequisites: EGN 3365 or permission of the instructor.

EMA 5104 Advanced Mechanical Properties of Materials (3). Advanced treatment of the mechanical behavior of solids; examines crystal plasticity, dislocations, point defects and grain boundaries, creep and fatigue behavior, fracture. Prerequisite: EGN 3365.

EMA 5106 Thermodynamics and Kinetics of Materials (3). Laws of thermodynamics. Entropy and free energy. Diffusion mechanisms. Transition state theory and field effects. Phase diagrams. Nucleation in condensed phases. Crystal growth. Prerequisite: EGN 3343 Thermodynamics I.

EMA 5140 Introduction to Ceramic Materials (3). Synthesis of ceramics, inorganic glasses and their microstructure as related to physical properties. Prerequisites: EGN 3365 or instructor's permission.

EMA 5200 Nanomechanics and Nanotribology (3). Mechanical and tribological properties at nano-scale length, fundamentals of nanoindentation and nanoDMA, application of nanoindentation for hard, soft, natural and biological materials. Prerequisites: EGN 3365 or permission of the instructor.

EMA 5295 Principles of Composite Materials (3). The mechanical behavior of composite materials used in the automotive, aircraft and sporting goods industries; material and laminar properties; design of composites; failure analysis; and environmental effects. Prerequisites: EGM 5615 or permission of the instructor.

EMA 5305 Electrochemical Engineering (3). Introduction to graduate students the fundamental principles of electrochemistry and its applications in different engineering systems for energy, chemical, biomedical, and electronics industries. Prerequisite: Permission of the instructor.

EMA 5326 Corrosion Science and Engineering (3). Electrochemical principles of corrosion, methods of corrosion control and measurement. Prerequisites: EGN 3365 or permission of the instructor.

EMA 5507C Analytical Techniques of Materials Science (3). Fundamental theories and techniques of the analytical methods for materials including: X-ray diffraction, scanning and transmission electron microscopy, thermal and surface analysis, and vacuum systems. Prerequisite: EGN 3365.

EMA 5605 Fundamentals of Materials Processing (3). Extraction of materials from the minerals using pyro, hydro and electro techniques. Fundamentals of solidification process. Prerequisites: MSE 4521 or permission of the instructor.

EMA 5646 Ceramic Processing (3). Introduction to the science of ceramic processing, with emphasis on theoretical fundamentals and current state-of-the-art processing. Prerequisite: EMA 5140.

EMA 5935 Advanced Topics in Materials Engineering (3). Topics include thermodynamics of solids, principles of physical metallurgy, including phase transformation and diffusion and analytical methods in materials engineering. Prerequisites: EGN 3365 and EGM 3343.

EMA 6113 Advanced Materials Thermodynamics (3). Advanced thermodynamic study of materials using thermochemical and computational methods. Prerequisite: EMA 5106.

EMA 6126 Advanced Physical Metallurgy (3). Energetics of phase transformation and spinodal decomposition, homogeneous and heterogeneous nucleation in solid state reactions, and martensite transformations. Prerequisites: EMA 4121 or permission of the instructor.

EMA 6127C Advanced Physical and Mechanical Metallurgy (3). Advanced topics in physical and mechanical metallurgy including statics and dynamics of dislocations, plastic deformation of fracture, creep solidification, phase transformation, and heat treatment. Prerequisites: EGN 3365 or permission of the instructor.

EMA 6165C Polymer Physics and Analytical Techniques (3). Topics in polymers and the analytical techniques, including: synthesis, characterization, state of polymers, plasma processes, X-ray diffraction, scanning, and transmission electron microscopy. Prerequisites: EGN 3365 or permission of the instructor.

EMA 6185 Advanced Mechanics of Composite Materials (3). Study of micromechanics and mechanical processes in microscale, including fracture, reinforcement and delamination. Prerequisite: EMA 5295.

EMA 6264 Mechanical Properties of Polymers (3). Advanced concepts of solid mechanics and mechanical behavior of polymers; stress-strain relationships, stress transformation, beam bending, elasticity, plasticity and fracture. Prerequisites: EMA 6165C or permission of instructor.

EMA 6449 Electronic Properties of Ceramic Materials (3). The defect solid state and its relation to electrical properties of ceramics. Solid electrolytes. Theory of electron transport in metallic, semiconducting and insulating ceramics. Prerequisite: EMA 5140.

EMA 6516 Crystallography and X-ray Diffraction (3). Principles of crystallography and the use of x-ray diffraction and Raman Spectroscopy to characterize crystalline solids. Prerequisite: Instructor's permission.

EMA 6518 Transmission Electron Microscopy (3). Kinematic and dynamic theories of diffraction contrast and electron interaction in materials. Diffraction analysis for structural and compositional determination. Specimen preparation techniques. Prerequisite: EMA 5507.

EMA 6665 Polymer Processing and Engineering (3). Standard and advanced processing methods, characterization of morphology, and reaction processing. An industry-based case study analysis integrates heat and mass transport, and fluid flow during materials processing; and the economics of materials processing and recycling. Prerequisite: Permission of instructor.

EMC 5415 Digital Control of Mechanical Systems (3). Discrete modeling of mechanical systems. Digital

feedback systems. Computer interface of mechanical systems. Controller design with emphasis on hydraulic, pneumatic and electromechanical devices. Prerequisite: EML 4804.

EML 5082 Advanced Nondestructive Testing and Mechanical Health Monitoring (3). Theory and application of Nondestructive Testing (NDT) and Mechanical Health Monitoring (MHM) techniques will be discussed. Automated interpretation of signals and advanced methods will be presented. Prerequisite: Permission of the instructor.

EML 5103 Intermediate Thermodynamics (3). Thermodynamic approach to processes and engines; alternative formulations and Legendre transformations; Maxwell relations, first and second order phase transitions. Prerequisite: EML 3101.

EML 5104 Classical Thermodynamics (3). Mathematical analysis of the laws of classical reversible and irreversible thermodynamics. Applications to mechanical, electro-magnetic, and chemical systems, under ideal and real conditions. Prerequisite: EML 3101.

EML 5125 Classical Dynamics (3). Kinematics of rigid body motion, Eulerian angles, Lagrangian equations of motion, inertia tensor, momental ellipsoid. Rigid-body equations of motion, Euler's equations, force-free motion, polhode and herpolhode, theory of tops and gyroscopes. Variational principles. Hamiltonian equations of motion. Poincaré representation. Prerequisites: MAP 2302 or EGM 3311, and EGN 3321.

EML 5152 Intermediate Heat Transfer (3). Multi-dimensional heat conduction under steady and transient conditions. Heat, mass and momentum transfer. Radiation heat transfer. Gas radiation. Free and forced convection. Prerequisite: EML 4140.

EML 5385 Identification Techniques of Mechanical Systems (3). FFT, time series analysis and neural networks are introduced. Applications of these techniques are discussed for identification of mechanical structures, and machine diagnostics. Prerequisite: EML 4804.

EML 5290 Fundamentals of Microfabrication (3). Science of miniaturization will be introduced. Materials choices, scaling laws, different options to make very small machines and practical applications will be emphasized. Progress related to state-of-the-art BioMicroElectro Mechanical Systems will be presented.

EML 5412 Combustion Processes (3). Introduction to combustion processes, thermochemistry, chemical kinetics, laminar flame propagation, detonations and explosions, flammability and ignition, applications in IC engines and gas turbines. Prerequisites: EML 3101 and EML 4140.

EML 5505 Smart Machine Design and Development (3). Design of independently operating smart electro-mechanical systems (most consumer products) which monitor their environment, give decisions, and create motion. Prerequisites: EML 4804 or permission of the instructor.

EML 5509 Optimization Algorithms (3). Multi-disciplinary numerical analysis combined with single objective and multi-objective unconstrained and constrained optimization

and sensitivity analysis techniques to optimize the design. Prerequisites: Permission of the instructor.

EML 5519 Fault-Tolerant System Design (3). Fault tolerance in mechanical, manufacturing, computer, and aerospace systems. Basic stages of fault isolation. Fault tolerance measures, architectures, and mechanical system design methodologies. Prerequisite: EML 3500.

EML 5530 Intermediate CAD/CAE (3). Computer aided geometrical modeling of spatial mechanical systems. Design criteria and analytical approaches for planer kinematic systems will be emphasized. Prerequisites: EML 4535 or permission of the instructor.

EML 5555 Special Projects in Mechanical Engineering Design and Business Development (3). Mechanical engineering design project that encompasses conceptual and structural design, analysis, and optimization complemented by a study to develop a business venture to produce the designed product. Prerequisites: EML 4501 or equivalent, QMB 6357, and MAN 6209.

EML 5559 Design, Production and Marketing (3). Student teams will evaluate the market and identify promising mechatronics systems. They will simulate design, development, and commercialization of the products in realistic environment.

EML 5562 Advanced Electronic Packaging (3). Advanced topics in electronic packaging. Evaluation of first through fourth level assembly. Applications of computer layout design, thermal management and mechanical stability analysis. Prerequisites: EML 4561 or permission of the instructor.

EML 5599 Heat Pipe Theory and Applications (3). Heat pipe theory, heat pipe design and its applications, especially in the areas of energy conversion and conservation. Prerequisites: EML 3101 and EML 4140.

EML 5606C Advanced Refrigeration and Air Conditioning Systems (3). The various methods used in the thermal design and analysis of both refrigeration and heat pump systems are investigated. Various methods of producing heating and cooling are examined including vapor compression, absorption, air cycle, steam jet, thermoelectric, solar heating and cooling systems. Prerequisite: EML 4601.

EML 5615C Computer/Aided Design in Air Conditioning (3). Software will be used to demonstrate heating, ventilating and air conditioning design concepts and sizing equipment and determining performance parameters. Project design is required. Prerequisites: EML 2032 and EML 4601.

EML 5708 Advanced Design of Thermal and Fluid Systems (3). Advanced design of pumps, compressors, heat exchangers, HVAC systems and thermal and fluid control devices. Prerequisite: EML 4706.

EML 5709 Intermediate Fluid Mechanics (3). Basic concepts and scope of fluid dynamics; non-inertial reference frames. Two-dimensional potential theory. Applications to airfoils. The Navier-Stokes equations; selected exact and approximate solutions. Prerequisite: EML 3126.

EML 5808 Control Technology for Robotic Systems (3). State-space equations of robots. Controller design

based on linearization, nonlinearity cancellation, optimal control, adaptive control and other methods. Stability analysis, performance comparison. Prerequisites: EGN 3321, EML 4804, or equivalent.

EML 5825 Sensors and Applied Machine Intelligence (3). Sensors, signal analysis techniques, and error compensation methods will be introduced for machine intelligence. Production Machine Modeling and Design. Prerequisites: EML 4804, EML 4503, or equivalent, or permission of the instructor.

EML 5927 Professional Development and Leadership for Mechanical Engineers (3). Consequences of engineering and concepts for personal career management, decision making leadership, and entrepreneuring that enhance the effectiveness of professional engineering practice. Prerequisite: Senior standing in engineering.

EML 6148 Microscale Transport Phenomena (3). Transport phenomena in small length and time scales are studied. Deviations from classical behavior are addressed. Applications include heat transfer in electronics, MEMS, and laser machining. Prerequisites: EML 5152, EML 5709, or permission of the instructor.

EML 6153 Advanced Heat Transfer (3). Review of analogies among heat, mass and momentum transfer. Free and forced convection from theoretical and experimental viewpoint for laminar and turbulent flows. Film and dropwise condensation. Prerequisite: EML 5152.

EML 6154 Conduction Heat Transfer (3). Heat transfer by conduction for steady and unsteady one and multidimensional systems with and without heat generation. Temperature distribution analysis using analytical and computational methods. Prerequisite: EML 4140.

EML 6155 Convection Heat Transfer (3). Development and solution of governing equations of parallel flows, boundary layer flows, instability and turbulence with convective heat transfer. Prerequisite: EML 4140.

EML 6157 Radiation Heat Transfer (3). Heat transfer by radiation for steady and unsteady one and multi-dimensional systems. Radiation parameters effecting different systems will be studied, analytically or numerically. Prerequisite: EML 4140.

EML 6223 Advanced Mechanical Vibration Analysis (3). Multi degree-of-freedom systems, discrete and continuous systems; vibration control and introduction to vibration of non-linear systems. Prerequisites: EML 3222 or EML 4220.

EML 6233 Fatigue and Failure Analysis (3). A study of the theoretical and practical aspects of material failure including failure modes, life prediction, corrosion with the goal of designing a safe product. Prerequisite: EGM 5615.

EML 6518 Advanced Modeling in Mechanical Engineering (3). Basic principles of mathematical modeling following a variety of problems in mechanical engineering. Prerequisites: EGM 6422 and EGM 5615.

EML 6532 Advanced Computer-Aided Design/Computer-Aided Engineering (3). Advanced CAD techniques in design of mechanical systems. Architecture of CAD systems including database applications.

Advanced computational geometry student programming. Prerequisite: EML 5530.

EML 6574 Advanced Mechanical Design Optimization (3). Advanced topics in numerical optimization, sensitivity analysis, approximation techniques and shape optimization. Prerequisite: Consent of the instructor.

EML 6712 Advanced Fluid Mechanics I (3). Turbulent flows with emphasis on engineering methods. Momentum, energy, and species transfer. Production, dissipation, and scaling laws for turbulence. Mixing length, effective viscosity. Prerequisite: EML 5709.

EML 6714 Advanced Gas Dynamics (3). Thermodynamic and fluid mechanics principles applied to high speed flows. Flows to be studied include flows with friction and heat loss/addition. Prerequisite: EML 4711.

EML 6725 Computational Fluid Dynamics (3). Basic computational methods for incompressible and compressible flows. Methods for solving the stream function equation. Boundary conditions for vorticity and stream function equations. Finite difference and finite element techniques. Prerequisite: Consent of the instructor.

EML 6747 Mechanics of Fluid Flow in Porous Materials (3). The mathematical theory of fluid penetration through porous materials and lungs, heat transfer, fluidized beds, non-stationary flows, and double continua. Prerequisite: EML 5709.

EML 6750 Multiphase Suspension Flow (3). Definition of multiphase flow, experimental observation, mathematical modeling of multiphase systems, measurement techniques, suspension boundary layer flow, and fluidization techniques. Prerequisite: Permission of the instructor.

EML 6805 Advanced Design of Robots (3). Kinematic analysis of mechanisms and robot arms, geometric configurations, analytical and numerical methods in kinematics. Prerequisites: EML 3222, EML 4806, and EML 4501.

EML 6908 Independent Studies (1-3). Individual research studies available for qualified graduate students. The work is to be performed under the supervision of an advisor. A report is to be submitted. Students may register for 1 to 3 credits per semester. Prerequisite: Advisor's permission.

EML 6910 Supervised Research (1-6). Graduate level research carried out under the supervision of a faculty member.

EML 6935 Graduate Seminar (0). Different problems in Mechanical Engineering and results of ongoing research will be presented and discussed by invited experts. The seminar will expose the students to advances in existing and emerging areas of research. Prerequisite: Graduate standing.

EML 6946 Mechanical and Materials Engineering Internship (1-3). Graduate students gain work experience through supervised internship in industry. The student prepares an internship program proposal, and the work performed is documented in a report and presented. Prerequisite: Permission of the student's thesis advisor.

EML 6971 Masters Thesis (1-6). Master's thesis in any advanced topic, a report is to be submitted and an oral presentation is to be made. Students may register for one to six credits per semester. Total of six credits to be earned for the Master's Degree. Prerequisite: Advisor's permission.

EML 7837 Boundary Value Problems in Engineering (3). Analytical methods and skills for closed-form solutions of boundary value problem of mathematical physics and mechanics for engineering applications based on Riemann theory. Prerequisites: MAP 5407, MAA 4402, or permission of the instructor.

EML 7939 Ph.D. Seminar (0). Various subjects in Mechanical Engineering and results of ongoing research will be presented and discussed by invited experts. The seminar will expose the students to advances in existing and emerging areas of research. Prerequisite: Ph.D. students only.

EML 7979 Ph.D. Dissertation (3-12). Doctoral research leading to Ph.D. Mechanical Engineering dissertation. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

SUCCEED – School of Universal Computing, Construction, and Engineering Education

Mark Allen Weiss, *Distinguished University Professor
Professor of Computer Science, Associate Dean, and
Interim Director*

Bruk Berhane, *Assistant Professor*

Trina Fletcher, *Assistant Professor*

Monique Ross, *Assistant Professor, Computer
Science*

Stephen Secules, *Assistant Professor*

Alexandra Coso Strong, *Assistant Professor*

SUCCEED was formed in 2018, through a collaboration between the College of Engineering and Computing and the STEM Transformation Institute, as the first engineering and computing education department at a minority-serving institution. The school was created in alignment with the university's vision to be a "leading urban public research university focused on student learning, innovation, and collaboration." As such, SUCCEED aims to be the premier department in the U.S. with expertise in developing engineering and computing leaders who reflect the growing diversity of the 21st century.

Faculty within the school, along with students and staff, seek to connect research and innovation with student learning through collaboration with other members of the college and FIU as a whole. In particular, SUCCEED faculty research and promote evidence-based approaches that broaden participation and improve educational outcomes. Through these efforts, the faculty impact current and future engineering and computer science students at FIU and beyond.

Doctor of Philosophy in Engineering and Computing Education

Admission Requirements

For admission into the program, students will:

1. Have a bachelor degree in Engineering or Computing or a closely related field.
2. Have an upper division GPA of at least 3.0 in the bachelor's degree, measured by the last 60 credits attempted.
3. Complete a Graduate Record Exam (GRE) within the prior five years.
4. Have three letters of recommendation, a copy of the transcript, and a copy of the university graduate application to the Graduate Program Director in accordance with University Graduate School deadlines.
5. Have received approval of the departmental graduate committee.
6. Foreign students whose native language is not English must obtain a score of 80 or higher on the TOEFL iBT (this corresponds to 550 on the old TOEFL test) or 6.3 overall on the 1ELTS. The University Graduate

School has a list of countries that are exempt from this requirement.

Graduation Requirements

The graduation requirements for the program will be:

1. Completing a total of 75 credit hours of coursework beyond the bachelor degree (see section VIII. C. for detail), with a cumulative GPA of 3.0 or higher.
2. Successful completion of the Comprehensive Exam. This examination is designed primarily to make sure the student has suitable background knowledge to conduct research in their chosen area. The student must pass the Comprehensive Exam by the end of the seventh semester (excluding summers) in the program if they were admitted without a Master's degree or by the end of the fifth semester if admitted with a Master's or the equivalent 15 credit hours. Two attempts are permitted. Any exception needs to be approved by the Graduate Committee.
3. Upon completion of the required core courses and passing the Comprehensive Exam, the student advances to Candidacy.
4. Choosing advisor(s). The student will choose a faculty from the College of Engineering and Computing as their dissertation advisor. A co-advisor could be selected from within the College or from outside.
5. Assembling a Dissertation Committee. The student will assemble a Dissertation Committee of at least four faculty members [including advisor(s)]. Three of whom will be from SUCCEED or the STEM Transformation Institute, and one must be from outside of SUCCEED, but within FIU.
6. Successful presentation and submission of a dissertation proposal. The student will present and defend their plan for dissertation study. The purpose of the proposal is to verify that the candidate has chosen a suitable topic for dissertation research and to evaluate the candidate's ability to conduct such research. The proposal will be submitted to at least three members of the candidate's dissertation committee (at least two of whom will be from SUCCEED or the STEM Transformation Institute). The candidate presents their accomplishments and proposed research and answer questions from the committee and others in the audience.
7. Satisfaction of the teaching requirement. The ability to teach at the university level is an important skill that should be encouraged in all graduate students. For this reason, students will be required to take the "Foundations of Engineering and Computing Teaching and Learning" course prior to candidacy, and participate in a mentored teaching practicum for one semester during their PhD studies in order to gain exposure to the classroom or laboratory teaching environment. Students with teaching experience from previous graduate programs may petition to waive the teaching requirement, in which case the three-credit course should be replaced with an alternate course. Waivers will be granted at the discretion of the Graduate Program Director.
8. Submission and defense of a dissertation based upon original research in Engineering or Computing Education. A dissertation is required of all candidates for the PhD degree and must conform to the format

outlined in the Regulations for Thesis and Dissertation Preparation Manual available to students online from the FIU Graduate School.

9. After submission of the dissertation and completion of all other required work for the PhD degree, the candidate will be given a final oral thesis defense examination by the Dissertation Committee. Successful completion of all of these steps will culminate in the granting of the PhD degree.

Engineering and Computing Education Foundations (12 credits)

Students must complete the following courses:

EGN 6008	Fundamentals of Engineering and Computing Education	3
EGN 6900	Methods and Practices in Engineering and Computing Education Research	3
EGS 6057	Equity in STEM Education: Research, Policy and Practice	3
EGN 6942	Mentored Teaching Practicum in Engineering and Computing Education	1
EGN 6957	Professional Development in Engineering and Computing Education Research	2

Required Engineering Pedagogy (3 credits)

EGS 6055	Foundations of Engineering and Computing Teaching and Learning
----------	--

Research Methods/Statistics Electives (9 credits)

Students are required to completed three research methods courses. EDF 6481 is required for all students. In conjunction with their advisor, students must choose two additional research methods courses.

EDF 6481	Education Research Methods
----------	----------------------------

2 Research methods electives

Specialization Courses (9 credits)

In conjunction with their advisor, students must complete nine credit hours of courses that focus on an area of specialization.

Seminar (0 credits)

Students are required to register for a seminar course and attend weekly seminars hosted by the STEM Transformation Institute.

EGN-6935 Seminar on STEM Education Research

Discipline-Specific Specialization (15 credits)

Students must complete any five courses from one of the specialization tracks listed below. The list of courses is maintained by the unit that houses the track. This requirement can be satisfied by an appropriate Master's degree from an accredited university.

Biomedical Engineering
 Civil Engineering
 Computer Engineering
 Computer Science
 Electrical Engineering
 Engineering Management
 Environmental Engineering
 Information Technology
 Mechanical and Materials Engineering

Total Credits: 75 hours

***Students without a masters degree can take comprehensive exam during summer of 3rd year**

Course Descriptions

Definition of Prefixes

EGN - Engineering General; EGS-Engineering Support;

EGN 6900 Methods and Practices in Engineering and Computing Education Research (3). Foundational course in research methods and practices of engineering and computing education researchers, focusing on research design decisions, research quality, ethical implications, and publishing. Prerequisite: EDF 6481 or permission of instructor.

EGN 6907 Independent Study (1-10). A variable credit independent study course for PhD students to work on topics where standard courses cannot be offered. Topics must be related to engineering or computing education. The outcomes and goals of the course for the student must be approved by department.

EGN 6920 Cooperative Education in Engineering (1-3). A variable credit cooperative education in engineering course is for current PhD students who have a position with an organization focused on their area of study. Topics must be related to engineering or computing education.

EGN 6935: Seminar on STEM Education Research (0). Weekly interactive and engaging presentations featuring faculty, students and guest speakers sharing research topics in science, technology, engineering and mathematics (STEM) topics. Prerequisite: Graduate standing.

EGN 6939 Advanced Special Topics (1-3). An advanced special topics course for PhD students to pursue and study areas in engineering or computing education at an advanced level that are otherwise not offered. The list of topics will be announced in advance for prospective students.

EGN 6942 Mentored Teaching Practicum in Engineering and Computing Education (1). Structured application of educational theories and pedagogy through classroom teaching experiences and weekly learning community meetings. Requires students find a faculty teaching mentor. Prerequisite: EGS 6055.

EGN 6957 Professional Development in Engineering and Computing Education Research (2). An exploration of professional development tools and techniques within engineering and computing education research and practice.

EGN 7918 Graduate Research (1-25). Doctoral research prior to candidacy. Repeatable. Prerequisite: Permission of the department.

EGN 7980 Dissertation Research (1-12). Research towards completing doctorate research upon completion of their comprehensive exams. Repeatable. Prerequisite: Permission of the Major Professor and Doctoral Candidacy.

EGS 6008 Foundations of Engineering and Computing Education (3). Introductory course providing a conceptual understanding of engineering and computing education through philosophical theories for research and practice. Theory-based methods will guide students through a

historical context of engineering and computing education and its impact on current and future aspects of the fields.

EGS 6055 Foundations of Engineering and Computing Teaching and Learning (3). Introduction to learning theory and inclusive, learner-centered, and evidence-based pedagogy and assessment in engineering and computing, using a human-centered design approach to educational design.

EGS 6057 Equity in STEM Education: Research, Policy, and Practice (3). An analysis of diversity and inclusion through research, policy and practice within science, technology, engineering and mathematics (STEM) education for the private and public sectors.

College of Engineering and Computing

Dean	John L. Volakis
Associate Dean for Academic Affairs	Anthony J. McGoron
Associate Dean for Research	Osama Mohammed
Associate Dean for Undergraduate Studies	Mark Weiss
Chairperson, Biomedical Engineering	Ranu Jung
Interim Chairperson, Civil and Environmental Engineering	Arindam Gan Chowdhury
Interim Chairperson, Electrical and Computer Engineering	Jean Andrian
Chairperson, Mechanical and Materials Engineering	Arvind Agarwal
Endowed Chairperson, Moss Construction Management	Jose Faria
Interim Director, School of Computing and Information Sciences	Jason Liu
Director, School of Universal Computing, Construction, and Engineering Education (SUCCEED)	Monica Cardella
Interim School Director, School of Biomedical, Materials and Mechanical Engineering	Anthony J. McGoron
Director, Moss School of Construction, Infrastructure, and Sustainability	Atorod Azizinami
Interim School Director of Electrical, Computer, and Enterprise Engineering	Osama Mohammed
Director, Center for Advanced Technology and Education	Malek Adjouadi
Director, Accelerated Bridge Construction University Transportation Center	Atorod Azizinami
Co-Director, Accelerated Bridge Construction	David Garber
Co-Director, Accelerated Bridge Construction	Armin Mehrabi
Director, NHERI Wall of Wind (WOW) Experimental Facility (EF); Co-Director, Lab. Wind Engineering Research	Arindam Gan Chowdhury
Co-Director, Lab Wind Engineering Research	Ioannis Zisis
Center Director, Extreme Events Research	Richard Olson
Director, Lehman Center for Transportation Research	Mohammed Hadi
Director, Transit Program and Co-Director of Driving Simulation Lab	Fabian Cevallos
Director, Florida Center for Cyber Infrastructure Education and Research for Assurance and Trust	S. S. Iyengar
Director, High Performance Database Research Center Director, Industry/University Cooperative Research Center (IUCRC) Center for Advanced Knowledge Enablement (CAKE)	Naphtali Rishe
Director, Industrial Relations	Jose Cortes
Director, Telecommunications and Information Technology Institute	Niki Pissinou
Associate Director, Undergraduate Programs	Mark Finlayson
Director, Advanced Materials Engineering Research Institute (AMERI)	Arvind Agarwal

Director, Engineering Manufacturing Center	Ibrahim Tansel
Director, Center for Diversity and Student Success (CD-SSEC)	Andres Tremante
Director, Center for the Study of Matters at Extreme Conditions	Jiuhua Chen
Program Director of International Program Development	Kang K Yen
Program Director of Enterprise and Logistics Engineering	Chin-sheng Chen
Director International Programs, (South East Asia)	Khokiat Kengskool
Program Director, Division of External Programs	Natalie Del Sol-Nunez
Executive Director for Technology	Steven Luis

Faculty

Adjouadi, Malek, Ph.D. (University of Florida), Professor, Electrical and Computer Engineering; Director, Center for Advanced Technology and Education
Afanasyev, Alexander, Ph.D. (University of California-Los Angeles) Assistant Professor, Knight Foundation School of Computing and Information Sciences
Agarwal, Arvind, Ph.D. (University of Tennessee at Knoxville), Distinguished University Professor, Mechanical and Materials Engineering
Akkaya, Kemal, Ph.D. (University of Maryland Baltimore County), Professor, Electrical and Computer Engineering
Ali, Hesham, Ph.D. , (City University of New York- City College of New York), Professor of Practice, Civil and Electrical Engineering
Allagui, Anis, Ph.D. (Concordia University), Associate Professor, Mechanical and Materials Engineering
Alluri, Priyanka, Ph.D., P.E. (Clemson University), Associate Professor, Civil and Environmental Engineering
Alwan, Elias Antoun, Ph.D. , (Ohio State University) Eminent Scholar Chaired Professor, Electrical and Computer Engineering
Amini, Mohammadhadi, Ph.D. (Carnegie Mellon University), Assistant Professor, Knight Foundation School of Computing and Information Sciences
Andrian, Jean, Ph.D. (University of Florida), Associate Professor and Interim Electrical and Computer Engineering
Arellano, Wilmer, Ph.D., P.E. (Florida Atlantic University), Associate Teaching Professor, Electrical and Computer Engineering
Aron, Alicia, Ph.D. (Technion, Israel Institute of Technology), Assistant Professor, Mechanical and Materials Engineering
Azizinami, Atorod, Ph.D., P.E. (Carolina-Columbia), Endowed Vasant H. Surti Professor, Civil and Environmental Engineering, Director, Accelerated Bridge Moss School of Construction University Transportation Center (ABC-UTC), and Director, Preeminent Institute for Resilient and Sustainable Coastal Infrastructure (InteRaCt) and Sustainability
Bai, Ou, Ph.D. (Saga University) Associate Professor, Electrical and Computer Engineering
Baier, Ronald, A., M.S., P.E. (University of Florida), University Instructor Emeritus, Moss Construction Management
Bajuelos, Antonio, Ph.D. (Joint Institute for Nuclear

- Research), Assistant Teaching Professor, Knight Foundation School of Computing and Information Sciences
- Bao, Wei Yu, Ph.D.** (Florida International University), Associate Teaching Professor, Mechanical and Materials Engineering
- Barreto, Armando B., Ph.D.** (University of Florida), Professor, Electrical and Computer Engineering
- Beladi, Seyad Ebrahim, Ph.D.** (University of Florida), Assistant Teaching Professor, Mechanical and Material Engineering
- Berger, Aaron Ph.D.,** (Yale University), Associate Professor, Biomedical Engineering
- Berhane, Bruk, Ph.D.** (University of Maryland), Assistant Professor, SUCCEED
- Bernardo-Bricker, Anna R., Ph.D.** (Florida International University), Associate Teaching Professor, Civil and Environmental Engineering
- Bhardwaj, Shubendu, Ph.D.,** (The Ohio State University), Assistant Professor, Electrical and Computer Engineering
- Bhansali, Shekhar, Ph.D.** (Royal Melbourne Institute of Technology), Alcatel-Lucent Professor and Distinguished University Professor, Electrical and Computer Engineering
- Bhimani, Janki, Ph.D.** (Northeastern University in Boston), Assistant Professor, Knight Foundation School of Computing and Information Sciences
- Bobadilla, Jamie Leonardo, Ph.D.** (University of Illinois), Associate Professor, Knight Foundation School of Computing and Information Sciences
- Boesi, Benjamin, Ph.D.** (University of Florida), Associate Professor, Associate Chair and Undergraduate Program Director, Mechanical and Materials Engineering
- Bousten, Kevin, Ph.D.** (University of Miami), Assistant Teaching Professor, Mechanical and Materials Engineering
- Brown, Michael, M.D., Ph.D.** (University of Miami), Teaching Professor, Biomedical Engineering
- Caballero, Amaury A., Ph.D., P.E.** (Energy Institute of Moscow), Teaching Professor, Electrical and Computer Engineering
- Cabrerizo, Mercedes, Ph.D.** (Florida International University), Mark Edwards Professorship in Neuroscience and Learning and Associate Professor, Electrical and Computer Engineering
- Cao, Yiding, Ph.D.** (University of Dayton), Professor, Mechanical and Materials Engineering
- Carbunar, Bogdan, Ph.D.** (Purdue University), Associate Professor, Knight Foundation School of Computing and Information Sciences
- Cardella, Monica, Ph.D.** (University of Washington) Professor, SUCCEED
- Cevallos, Fabian Gonzalo Ph.D.,** (Florida International University), Associate Research Professor and Transit Program Director, Civil and Environmental Engineering
- Chang, Carlos Martin Ph.D.,** (Texas A&M University), Associate Professor, Civil and Environmental Engineering
- Chaparro, Gustavo, Ph.D.** (Florida International University), Assistant Teaching Professor, Electrical and Computer Engineering
- Charters, Maria, M.S.** (Barry University), Associate Teaching Professor, Knight Foundation School of Computing and Information Sciences
- Chen, Chin Sheng, Ph.D.** (Virginia Polytechnic Institute and State University), Program Director and Professor, Enterprise and Logistics Engineering
- Chen, Dong Ph.D.** (University of Massachusetts Amherst), Assistant Professor, Knight Foundation School of Computing and Information Sciences
- Chen, Jiuhua, Ph.D.** (Japan Graduate University for Advanced Studies), Professor, Mechanical and Materials Engineering
- Chen, Shu-Ching, Ph.D.** (Purdue University), Professor, Knight Foundation School of Computing and Information Sciences
- Cheng, Zhe, Ph.D.** (Georgia Institute of Technology), Associate Professor, Mechanical and Materials Engineering
- Chowdhury, Arindam Gan, Ph.D.** (Iowa State University), Professor and Interim Chair, Civil and Environmental Engineering; Director, NHERI Wall of Wind (WOW), Experimental Facility (EF); Co-Director, Lab. Wind Engineering Research, Extreme Events Institute, an FIU Preeminent Program
- Christie, Michael, Ph.D.** (Rutgers University), Associate Teaching Professor, Biomedical Engineering
- Cickovski, Trevor, Ph.D.** (Notre Dame), Assistant Teaching Professor, School of Computing and Information Sciences
- Clarke, Peter, Ph.D.** (Clemson University), Associate Professor, Knight Foundation School of Computing and Information Sciences
- Danziger, Zachary, Ph.D.** (Northwestern University), Assistant Professor, Biomedical Engineering
- Davis, Debra, Ph.D.** (University of Texas), Associate Teaching Professor, Knight Foundation School of Computing and Information Sciences
- Deng, Hai, Ph.D.** (University of Texas, Austin), Associate Professor, Electrical and Computer Engineering
- Dickerson, Darryl, Ph.D.** (Purdue University), Assistant Professor, Mechanical and Materials Engineering
- Dinh, Steven, Sc.D.** (Massachusetts Institute of Technology) Professor, Electrical and Computer Engineering
- Du, Yu, Ph.D.,** (Florida International University), Assistant Teaching Professor, Electrical and Computer Engineering
- Downey, Timothy, M.S.** (State University of New York at Albany), Teaching Professor, School of Computing and Information Sciences
- Dulikravich, George, Ph.D.** (Cornell University), Professor, Mechanical and Materials Engineering; Professor, Founder and Director, MAIDROC Laboratory; Founder and Editor-in-Chief, Inverse Problems in Science and Engineering journal
- Ebrahimian, Ali, Ph.D.,** (University of Minnesota - Twin) Assistant Professor, Civil and Environmental Engineering
- Elawady, Amal Mohamed Kamel, Ph.D.,** (University of Western Ontario, Canada), Assistant Professor, Civil and Environmental Engineering
- Elzomor, Mohamed, Ph.D.** (Arizona State University) Assistant Professor, Moss Construction Management
- Faria, Jose, Ph.D.** (University of Maryland), Associate Teaching Professor, Endowed Chair of Moss Construction Management
- Farmer, Eugene, M.S.,** (University of Illinois-Urbana-Champaign) Professor Emeritus, Moss Construction Management
- Finlayson, Mark, Ph.D.** (Massachusetts Institute of

- Technology), *Eminent Scholar Chaired Associate Professor, Associate Director of Undergraduate Programs, Knight Foundation School of Computing and Information Sciences*
- Fletcher, Trina, Ph.D.** (Purdue University), *Assistant Professor, SUCCEED*
- Fuentes, Hector R., Ph.D., P.E., B.C.E.E.** (Vanderbilt University), *Professor, Civil and Environmental Engineering*
- Galarza, Luis E, Ph.D.,** (Florida International University), *Assistant Teaching Professor and Interim Associate Chair, Electrical and Computer Engineering*
- Gallo, Luigi, Dr. Ing.,** (University of Pavia, Italy), *Professor, Electrical and Computer Engineering*
- Garber, David, Ph.D.** (University of Texas at Austin), *Associate Professor, Civil and Environmental Engineering*
- Georgakopoulos, Stavros V., Ph.D.** (Arizona State University), *Professor, Electrical and Computer Engineering*
- Gholamiboroujeni, Kianoush, Ph.D.** (Florida International University) *Assistant Teaching Professor, Knight Foundation School of Computing and Information Sciences*
- Gibson, Edward, Ph.D.,** (Carnegie Mellon University), *Professor, Knight Foundation School of Computing and Information Sciences.*
- Godavarty, Anuradha, Ph.D.** (Texas A&M University), *Associate Professor, Undergraduate Program Director, Biomedical Engineering*
- Hadi, Mohammed, Ph.D., P.E.** (University of Florida), *Professor, Civil and Environmental Engineering*
- He, Xudong, Ph.D.** (Virginia Polytechnic University), *Professor, Knight Foundation School of Computing and Information Sciences*
- Hernandez, Antonio, Ph.D.,** (Hiroshima University), *Assistant Teaching Professor, Knight Foundation School of Computing and Information Sciences*
- Hodges, Deidra, Ph.D.** (University of South Florida), *Associate Professor, Electrical and Computer Engineering*
- Hopkins, Gordon R., Ph.D.** (University of Alabama), *Dean Emeritus, Mechanical and Materials Engineering*
- Hu, Liting, Ph.D.** (Georgia Tech) *Assistant Professor, Knight Foundation School of Computing and Information Sciences*
- Hutcheson, Joshua, Ph.D.** (Vanderbilt University), *Assistant Professor, Biomedical Engineering*
- Islam, MD Shafiul, Ph.D.,** (University of North Dakota) *Assistant Teaching Professor, Electrical and Computer Engineering*

Mission

The mission of the Florida International University College of Law is to serve the citizens of the State of Florida, particularly South Florida, by providing access to the legal profession through a contemporary, high-quality educational program. Like the University and metropolitan communities of which they are a part, the student body, faculty and administration reflect a broad range of backgrounds, interests, and professional possibilities. Out of this diversity, the College of Law seeks to create a scholarly community in which students and faculty discuss issues freely and with respect for differing perspectives.

The faculty takes seriously its obligations to the profession and the society it serves; so faculty participate

actively in local, state, national and international professional service activities. Similarly, the College of Law seeks to graduate students who appreciate the lawyer's professional and ethical obligations to serve the community, including those in need. To this end, students must complete a community service requirement. The College of Law also offers clinical legal education programs in which students represent indigent clients.

J.D. Curriculum

Accredited by the American Bar Association and admitted to the Association of American Law Schools, the College of Law offers both a full-time program and a part-time program. Ordinarily, full-time students will earn the J.D. degree in three years and part-time students in four years (including summer sessions). Students are admitted to either the full-time/day division or the part-time/evening division, and generally may not transfer from one division to the other or take required courses in the other division until they have completed the first 30 hours of course work. All students must complete a minimum of 90 hours of course work with a cumulative grade point average of 2.0 or higher to earn the J.D. degree.

In addition to the traditional courses offered by nearly all U.S. law schools, the College of Law builds on FIU's international distinction by incorporating important developments in the globalization of both public and private law. The curriculum does this by requiring all first-year students to take an introductory class on international and comparative law, including international and comparative content into all domestic law classes, and offering a rich array of upper-level electives in international, transnational and comparative law. Recognizing the importance of a solid grounding in the skills and values of the profession, the College of Law curriculum further provides students with extensive, rigorous legal research and writing experiences, introduces other skills such as counseling and negotiation.

The curriculum is taught by a faculty committed to excellence in both teaching and scholarship. Faculty members are actively engaged in research in their respective areas of expertise. The scholarly mission of the College of Law enriches classroom teaching and learning; contributes to the understanding, development, and reform of the law; and promotes the University's mission as one of the nation's leading urban public research institutions.

The College of Law also maintains a Master of Law (LL.M.) for foreign lawyers, a Juris Master in Law (J.M.), a Master of Science in the Law of Technology and joint degree programs with the College of Business, Latin American and Caribbean Studies, Department of Environmental Studies, College of Engineering, Department of Public Administration, Department of Social Work, Herbert Wertheim College of Medicine, and the Department of Psychology. In addition to these programs, students may be able to arrange for other cross-disciplinary graduate studies, with advance permission of the College of Law and the Dean of the other graduate discipline.

Admissions

The College of Law Admissions Committee seeks to enroll a diverse group of students who have demonstrated academic and personal achievement and who show signs

of future promise. While the admissions process gives much weight to a prospective student's academic record and performance on the LSAT or GRE, the Admissions Committee, in its discretion, also takes into account other factors relevant to one's potential as a lawyer. Positive factors include leadership ability, commitment to public service, international experience, work history, military service, and evidence of overcoming substantial obstacles (for example: a native language other than English; economic, family, or social hardship, etcetera.) Negative factors include a history of criminality or academic misconduct. The Admissions Committee encourages each applicant to answer all questions with candor, detail and, where appropriate, to provide specific examples of relevant background experiences.

Completed applications for admission will be considered on a rolling basis beginning in late October. **Please see the College of Law website for complete application details at**

<https://law.fiu.edu/lawadmit/>

Please note the FIU College of Law will not accept LSAT scores earned prior to June 2015. Candidates for whom English is not their first language must take the Test of English as a Foreign Language. www.toefl.org.

Juris Master in Law (J.M.)

Admission Requirements

Admission to the J.M. program will be based on the following factors:

1. Undergraduate GPA;
2. Professional and academic background;
3. Personal statement (essay or statement of interest);
4. Professional and academic references; and
5. Graduate degree or LSAT, GRE, GMAT or MCAT score report.

The candidate for the J.M. degree must have a bachelor's degree from an accredited U.S. institution, or a comparable degree from an international institution, with a minimum 3.0 (on a 4.0 scale) grade point average (GPA) in all work attempted while registered as an upper-division undergraduate student. Alternatively, the candidate must have received a graduate degree from an accredited U.S. institution, or a comparable degree from an international institution. Any international degree would need to be evaluated to be determined equivalent. The J.M. Admission Committee will have discretion to waive the GPA minimum if the candidate's achievements in activities after receiving the bachelor's degree suggest a high likelihood of success in the J.M. program. Candidates may not have completed or currently be enrolled in a professional law degree program.

Acceptance into the program will be based on the candidate's standardized test scores, academic training and professional background, a personal statement, and professional references. For students from non-English speaking countries, demonstrated proficiency in English (at a level needed to comprehend lectures, class discussion, and reading assignments in law) will be required. TOEFL scores for non-English speakers will be assessed, unless the applicant submits a TOEFL Waiver Request from in order to be evaluated for a waiver to the TOEFL requirement.

Degree Requirements

The full-time J.M. candidate will take 11 credits in the fall, 13 credits in the spring, and 6 credits in the summer, to complete the program within one year. Students may elect to complete the program on a part-time basis by taking fewer credits per semester. The sequence of courses will be as follows:

Required Core Courses: (17 credits)

JRM 6300	Introduction to American Law	3
JRM 6710	Legal Analysis and Writing	3
JRM 6010	Contracts and Business Law	4
JRM 6700	Torts and Criminal Wrongs	3
JRM 6091	Introduction to Regulatory Compliance	4

Choose one of the following concentrations:

Advanced Legal Skills and Litigation

Management Concentration: (13 credits)

JRM 6352	Legal Procedure and the Legal System	2-3
	Litigation Management and Legal Technology	3
JRM 6401	Conflict Resolution: Beyond Litigation	3
	Discovery and e-Discovery	3

Choose one of the following:

JRM 6720	Family Relations Law	3
JRM 6030	Real Estate Law	3

Health Law Concentration: (13 credits)

JRM 6120	Public Health and The Law	3
JRM 6100	Regulations of Medical Institutions	4
JRM 6110	Medicare and Medicaid Law	3
JRM 6070	Regulation of Health Insurance	3

Banking & Finance Law Concentration: (13 credits)

JRM 6080	Banking and Finance Regulation	3
JRM 6081	Bank Secrecy Act and Anti-Money Laundering Law Part I	2
JRM 6082	Bank Secrecy Act and Anti-Money Laundering Law Part II	2
JRM 6083	Consumer and Commercial Lending Regulations	3
JRM 6084	Consumer Financial Services Regulation	3

Employment & Labor Law Concentration: (13 credits)

JRM 6402	Conflict Prevention and Resolution in the Workplace	3
JRM 6542	Harassment in the Workplace	3
JRM 6545	Legal Issues in the Workplace	4
JRM 6543	Remedies in the Workplace	3

Education Law Concentration: (13 credits)

JRM 6580	Legal Developments in Education	4
JRM 6581	Education Regulation and Legislation (No Child Left Behind)	3
JRM 6541	Legal Developments in Disability Law	3
	Student Privacy and Educational Records	3

Master of Law (LL.M.)

The LL.M. is a graduate degree in law exclusively designed for lawyers who have received an undergraduate law degree from a foreign country. It is composed of 24 credits and is based entirely on coursework that can be completed in one academic year (2 semesters) on full-time basis. The LL.M. also offers the option of enrolling on a part-time basis to accommodate those who work or have

other commitments. The LL.M. curriculum provides a robust foundation in United States law, legal reasoning, research and writing through three foundation LL.M. courses. The rest of the LL.M. curriculum is elective and customizable, thus allowing the students to choose from a broad range of law courses offered at FIU Law and assemble a study plan that fits each candidate's individual goals. Upon completion of the LL.M. coursework, students may opt to transfer to the J.D. program subject to additional requirements, prepare for the Bar exam needed to obtain a license to practice law in certain U.S. states, gain work experience through an Optional Practical Training (O.P.T.), or pursue other academic or professional endeavors.

Admissions Requirements

1. Transcripts from Evidence of having obtained a foreign law degree, including official transcripts, submitted through the Law School Admissions Council (LSAC);
2. Evidence of English language proficiency through any of the following: (a) having obtained a minimum score of 90 points in the Test of English as Foreign Language (TOEFL), or (b) having obtained a minimum score of 7.0 points in the International English Language Testing System (IELTS),
3. 2 Letters of recommendation from someone who is familiar with the candidate's academic and/or professional accomplishments;
4. Resume or Curriculum Vitae;
5. Statement of Purpose; and
6. Interview by phone, if requested

Credits required: 24

Foundation Courses

United States Law I
United States Law II
Legal Skills & Values: LLM

Elective courses

Chosen by student and faculty advisor from approved course catalog

Master of Science in the Law of Technology (30 credits)

Admission Requirements

Admission to the Master of Science in the Law of Technology program will be based on the following factors:

1. Undergraduate GPA;
2. Professional and academic background;
3. Personal statement (essay or statement of interest);
4. Profession and academic references; and

The candidate for the Master of Science in the Law of Technology degree must have a bachelor's degree from an accredited U.S. institution, or a comparable degree from an international institution, with a minimum 3.0 (on a 4.0 scale) grade point average (GPA) in all work attempted while registered as an upper-division undergraduate student. Alternatively, the candidate must have received a graduate degree from an accredited U.S. institution, or a comparable degree from an international institution. Any international degree would need to be

evaluated to be determined equivalent. The Master of Science in the Law of Technology Admission Committee will have discretion to waive the GPA minimum if the candidate's achievements in activities after receiving the bachelor's degree suggest a high likelihood of success in the Master of Science in the Law of Technology program.

Acceptance into the program will be based on the candidate's academic training and professional background, a personal statement, and professional references. For students from non-English speaking countries, demonstrated proficiency in English (at a level needed to comprehend lectures, class discussion, and reading assignments in law) will be required. TOEFL scores for non-English speakers will be assessed unless the applicant submits a TOEFL Waiver Request form in order to be evaluated for a waiver to the TOEFL requirement.

Degree Requirements

The full-time Master of Science in the Law of Technology candidate will take 30 credits to complete the program within three semesters. Students may elect to complete the program on a part-time basis by taking fewer credits per semester. Students will choose among the following courses:

Pre-Program Boot Camp (optional):

Workshop United States Law I: Methods, Sources, and Structure (0)

Workshop Fundamentals of Cybersecurity (0)

Workshop Python for Lawyers (0)

Semester One

Law, Technology, and Innovation (12 credits)

LAW 6883	Blockchain Fundamentals for Lawyers	3
ECE 6XXX	Sensor IoT Analytics	3
LAW 6XXX	Cybersecurity and User Privacy	3
LAW 6821	Law, Science, and Technology	3
LAW 6823	Law Practice Technology	3

Semester Two

Law, AI, and Machine Learning (9 credits)

LAW 6233	Computer and Internet Law	3
LAW 6570	Intellectual Property Law	3
LAW 6XXX	Smart City Applications and Governance	3
LAW 6XXX	Artificial Intelligence and the Law	3
CAP 5610	Introduction to Machine Learning	3
CAP 5768	Introduction to Data Science	3

Semester Three Data Protection and Financial Technology (9 credits)

LAW 6XXX	Data and Algorithms in the Criminal Justice System	
LAW 6038	Financial Technology Law	3
LAW 6XXX	Blockchain Applications	3
ECE 6XXX	Data Visualization	3

Note: CAP courses adapted to exclude prerequisites. LAW courses approved by faculty on 12/13/18. "ECE" courses recently approved.

Note: Pre-program workshops are "optional."

Graduate Certificate in Environmental and Natural Resources Law

The Environmental and Natural Resources Law Graduate Certificate program seeks to provide graduate-level

interdisciplinary instruction in the diverse fields of Environmental and Natural Resources law. Specifically, the Certificate Program will provide law students with in-depth study and training in state and federal legislation shaping environmental policy and governing the exploitation and preservation of natural resources, thereby increasing their competitiveness amongst law graduates in the state of Florida and elsewhere. The certificate will allow students to complement their legal studies by designing a unique curriculum that focuses on their particular environmental interests, leveraging Florida's unique geographic location and increasing demand for lawyers with training in environmental and natural resources law.

Certificate Requirements: (15 credits)

Required Courses: (9 credits)

LAW 6471	Environmental Law	3
LAW 6470	Natural Resources Law	3
LAW 6520	Administrative Law	2-3

Elective Courses: (at least 6 credits)

LAW 6492	Water Resources Law	2
LAW 7475	Ocean and Coastal Law	2-3
LAW 6936	Seminars (Biodiversity Law)	2-3
LAW 6936	Seminars (Climate Change Law)	2-3
LAW 6460	Land Use Planning and Control	2-3
LAW 7268	International Environmental Law	2-3
LAW 6936	Seminars (Energy Law)	2-3
LAW 6905	Independent Study	1-2
LAW 7946	Advanced Externship Placement	2-4

Related Courses (may be taken to count for 0-2 of the 6 elective credits)

LAW 6730	Admiralty Law	2-3
LAW 6250	Comparative Law	2-3
LAW 6425	Construction Law	2-3
LAW 6302	Federal Courts	3
LAW 6580	Food and Drug Law	2-3
LAW 6720	Health Law	2-3
LAW 6263	International Human Rights Law	2-3
LAW 6555	Law and Economics	2-3
LAW 6821	Law, Science, and Technology	3
LAW 6523	Legislation	2-3
LAW 6531	Local Government Law	2-3
LAW 6297	NAFTA and Other Regional Trade Agreements	2-3
LAW 6426	Real Estate Transactions	2-3

Graduate Certificate in Intellectual Property

This certificate program is open to degree-seeking students only.

Program Requirements

- (a) Earn at least 14 credits from the Intellectual Property course list, (b) take at least two courses from the Entrepreneurship course list, and (c) take the Intellectual Property survey course.
- Students must earn a GPA of 2.7 over their law school career, as well as a GPA of 3.0 in their courses on the Intellectual Property course list.
- Students must complete a seminar which requires a 25-page paper based on original research which may be used to fulfill the upper-level College's writing requirement, or an independent study that includes a

research paper on a topic related to Intellectual Property.

Intellectual Property Course List

LAW 6550	Antitrust	2-3
LAW 6233	Computer and Internet Law	2-3
LAW 6572	Copyright Law	2-3
LAW 7575	Entertainment Law	2-3

Course Descriptions

Definition of Prefixes

LAW-Law
JRM-Juris Master

FOUNDATION CURRICULUM

LAW 5300 Civil Procedure (4). This course entails study of civil litigation from the inception of a suit through trial and appeal. The course considers problems of personal and subject-matter jurisdiction, service of process, venue, leadings, rules governing joinder of multiple parties and multiple claims, discovery and pretrial, the trial itself (with or without a jury), judgments, and appeals.

LAW 5501 Constitutional Law (4). This course deals with the fundamental principles of American constitutionalism. It considers the relationships between the branches of the federal government within the separation of powers and the relationship of the national government with the states within our federalism. It focuses on the institution of the Supreme Court and its power of judicial review and how that power is exercised to interpret the Constitution. The various powers of Congress are studied, especially the commerce clause power, including its negative effects on the state police power. The executive powers of the President, both domestic and foreign, are explored. The constitutional relationship between the individual and the government are analyzed within the context of the due process and equal protection clauses of the fourteenth amendment.

LAW 5000 Contract Law (4). This course introduces and explores the function of contracts in a free enterprise economy. It covers the evolution and application of common law doctrines and, where applicable, those provisions of the Uniform Commercial Code governing the contracts process, including mutual assent, consideration, reliance, conditions, interpretation of contract language, performance and breach, and remedies. The course may also cover impossibility and frustration, beneficiaries, and assignments.

LAW 5100 Criminal Law (3). The purpose of the course is to introduce the principles and objectives of the criminal law and to explore its utility and limitations as a means of social control. The course covers general common law elements and principles, including actus reus and mens rea; general defenses, including insanity, ignorance and mistake, duress, self-defense, defense of others and of property, necessity, and entrapment; the criminal capacity of children and of corporations; theories of liability for various parties to crime; and vicarious strict liability.

LAW 5259 Introduction to International and Comparative Law (3). This new course introduces students to public international law, international economic law, and comparative law. Exposure to the law of nations in the international component of the course poses critical jurisprudential questions on the nature of law, the role of enforceability, and the prospects for constructing an international society. The comparative component compares and contrasts the common law system that prevails in the United States to civil law systems, especially as they have evolved in Latin America. Together the course provides the foundation for later advanced study in these and other topics as part of the upper-level curriculum.

LAW 5792 Legal Skills and Values I (3). **LAW 5793 Legal Skills and Values II (2).** The Legal Skills and Values Program at the College of Law combine demanding traditional instruction in legal research and writing with an introduction to other lawyering skills, like interviewing and counseling, and to issues of

professionalism. It is a required three-semester curriculum that will run throughout the first year, and must be completed by the end of the fourth semester by full-time students and by the end of the fifth semester by part-time students. It is premised on the beliefs that 1) strong research and writing skills are vital to lawyers in all areas of practice; 2) other lawyering skills should be introduced early in a student's academic career; and 3) concerns for the ethical sensitivity and civility of lawyers demand an early and recurring emphasis.

LAW 5400 Property (4). This course introduces and examines concepts of property ownership, possession, and transfer. It includes acquisition and protection of personal property; estates in land, including present, concurrent, and future interests; leasehold estates; easements, covenants, and private controls of land use; some aspects of real property transfers, including deeds, descriptions, recording and priority, and the real estate contract; and an introductory treatment of nuisance, zoning and other public controls of land use.

LAW 5700 Torts (4). This course examines the body of law directed toward the compensation of individuals for injuries to their protected legal interests. It includes liability for negligence and for intentional interference with person and property, and liability without fault ("strict liability"). Covered are doctrines including duty, breach of duty, causation, damages, and defenses.

UPPER LEVEL CURRICULUM

LAW 6760 Accounting for Lawyers (2-3). This is a study of the basic principles, conventions, and methods of accounting to enable the lawyer to understand the legal economic environment, with specific reference to accounting problems encountered in such areas of the law as tax and corporations.

LAW 6520 Administrative Law (2-3). This is an introduction to the laws controlling executive branch agencies of government. Major topics include delegation of power to agencies, modes of agency action, control of agencies by the legislative branch, control by the judicial branch, and public access and influence.

LAW 6730 Admiralty Law (2-3). This course is an introduction to the law of the sea under federal and international law. Topics covered will include rules governing liability for maritime collision, rights and duties arising from personal injury or death of a seaman, liabilities of ship owners and insurers, maritime liens and mortgages, and special problems caused by involvement of governments as parties to maritime transactions and litigation. Other topics will include admiralty practice and procedure and maritime environmental law.

LAW 6783 Advanced Legal Analysis (2). Advanced legal analysis presents students with the opportunity to refine the core skills necessary for success on the bar exam. After an introduction to the testing methods used on the bar exam, students will learn optimal ways to prepare for their bar study. Students will then complete numerous multiple choice and essay questions, similar to those used on the Multistate Bar Examination and on the state day of the bar, and receive extensive feedback from faculty regarding their strengths and weaknesses. The course culminates in an examination designed to stimulate the

actual bar exam. Prerequisite: Open to students in the fall semester of the final year of study at the College of Law.

LAW 6798 Advanced Legal Research (2-3). Advanced Legal Research will build on the basic foundation of legal research skills provided through Legal Skills and Values I and II by offering students an advanced and in-depth exploration of legal research techniques and resources, including print and electronic tools. This course will cover primary and secondary legal sources through a variety of resources, methods, and processes for conducting efficient legal research. Prerequisite: Cannot be taken simultaneously with LSV2.

LAW 6114 Criminal Procedure: Adjudication (3). This course examines topics not covered in the basic course in Criminal Procedure, including the grand jury process, bail, the plea-bargain process, right to jury trial, double jeopardy, joinder and severance, and right to confront and examine witnesses.

LAW 6791 Advanced Electronic Legal Research (2-3). The goal of Advanced Legal and Electronic Research is to review and expand the legal research skills that have been introduced in Legal Skills and Values courses. The course focuses on practitioner-oriented materials and their use, as well as more sophisticated Internet and electronic research techniques. In addition, the student will choose a specific subject area of interest to the student, and then prepare a research guide to be presented to the class.

LAW 7943 Advanced Immigration and Human Rights Clinic (1-2). Advanced clinical training under the supervision of a law school faculty member in order to undertake work on complex cases or projects, including completing project(s) or case(s) begun by a student during the Immigration and Human Rights Clinic. Such advanced work may include appellate advocacy, impact litigation, legislative advocacy, community organizing, and other work in the area of immigration and human rights.

LAW 7946 Advanced Externship Placement (2-4). To perform advanced legal work at the same area or to explore a different area of careers in government, public interest or corporate (in house) law. Prerequisites: Criminal Externship or Civil Externship or Judicial Externship.

LAW 7944 Advanced Legal Clinic (1-5). Advanced clinical training under the supervision of a law school faculty member in order to complete projects or cases begun by the student during a clinic, or to pursue in more depth the subject of the clinic. Prerequisites: One prior clinical course. Must be approved by the Supervising faculty member.

LAW 7364 Advanced Trial Advocacy (3). This course focuses on advanced elements, concepts, and strategies in presenting complex cases to a jury, namely jury selection, presentation of scientific evidence, and examination of expert witness. Prerequisites: Trial Advocacy, Evidence, Approval by the Director of the Trial Advocacy Program.

LAW 6270 African American and Minority Jurisprudence (3). This course will teach the students about the substantial body of legal thought produced by African American, Indigenous, Latinx, and Asian legal scholars in the United State. The course will focus on the historical development of minority legal thought from the

founding of the United States to the present. Rather than focusing on race specifically, the course seeks to provide students with a richer understanding of minority scholars' thoughts on the law and politics of the United States more broadly. Consequently, while the course will concern itself with racial equality, it may also explore writings on legal issues that may not have a specific component touching on race. The course will also provide a comparative and international exploration of thinkers outside the United States focusing particularly on the Caribbean, Latin America, Asia, and Africa.

LAW 7956 African Journal of Legal Studies (1-2). The AJLS is a peer-reviewed interdisciplinary academic journal focusing on human rights and rule of law issues in Africa.

LAW 6310 Alternative Dispute Resolution (2-3). This course entails an examination of the alternative dispute resolution mechanisms and techniques for incorporating them into legal practice. A variety of readings and exercises are used as background for discussions of the utility of different mechanisms for resolving certain kinds of disputes. This course focuses on adjudication, negotiation, and mediation.

LAW 6271 American Indian Law (3). The course will begin with historical materials, followed by an overview of federal Indian policy periods, and then will proceed to examine the legal framework chronologically then by subject matter.

LAW 6550 Antitrust (2-3). The course is a study of judicial decisions construing and applying the federal antitrust laws (i.e., Sherman, Clayton, Robinson-Patman, and Federal Trade Commission Acts) to the control of the competitive process in the American economy.

LAW 7952 Appellate Advocacy Competition (2). Students selected as members of the Board of Advocates Appellate Advocacy Group will compete in a regional, national, or international appellate advocacy competition and will earn credit for satisfactory completion of their competition duties. Students, working in a team, will typically prepare an appellate brief and then deliver an appellate oral argument multiple times during the competition oral argument rounds. Prerequisite: Appellate Procedure.

LAW 6372 Advanced Appellate Advocacy (2). Students, working in two-person teams, will prepare an appellate brief and deliver an appellate oral argument in a competition format. Students will receive substantial classroom instruction in persuasive brief writing and oral advocacy as well as the relevant appellate rules and procedure topics. Prerequisite: Students on academic supervision may enroll only with approval of course instructor and Dean of Academic Support

LAW 7373 Appellate Procedure (3). This course focuses on practice and procedure in the Florida District Courts of Appeal and the Eleventh Circuit. The course covers selected state and federal statutes and court rules governing appellate procedure as well as key appellate topics such as the merits of appeal, ethical limitations, jurisdiction, finality, issue selection, preparation of the record, preservation of error, fundamental/plain error, harmless error, and standard and scope of review. During the course students will typically draft several short appellate documents, such as a Notice of Appeal, a

Designation of Record/Directions to Clerk, and a Request for Oral Argument, as well as an appellate brief outline; unlike Legal Skills and Values II or III, the course will not cover brief writing or oral argument.

LAW 6291 Aviation and Space Law (2-3). Air Space Law at the FIU College of Law examines post-9/11 national aviation and space policy, together with key administrative, antitrust, business, constitutional, and legislative and regulatory issues confronting the civil and general airplane transportation industry, Florida's "Space Coast", and the international communities for which Miami-Dade County serves as a gateway. Prerequisite: First year curriculum.

JRM 6081 Bank Secrecy Act and Anti-Money Laundering Law Part I (2). This is the first part of LAW 6088. The course offers a study of the rules and regulations through which the Federal Deposit Insurance Corporation (FDIC) establishes and maintains procedures designed to assure and monitor compliance with the BSA and implementing regulations. The course introduces students to the administrative and enforcement mechanisms of OFAC (Office of Foreign Assets Control) of the U.S. Department of Treasury. Part II reviews the penalties and other regulatory enforcement actions imposed for noncompliance with money laundering laws, as well as criminal prosecutions for willful violations of same. Prerequisite: Juris Masters Students Only

JRM 6082 Bank Secrecy Act and Anti-Money Laundering Law Part II (2). This is the second part of LAW 6088. The course offers a study of the rules and regulations through which the Federal Deposit Insurance Corporation (FDIC) establishes and maintains procedures designed to assure and monitor compliance with the BSA and implementing regulations. The course introduces students to the administrative and enforcement mechanisms of OF AC (Office of Foreign Assets Control) of the U.S. Department of Treasury. Part II reviews the penalties and other regulatory enforcement actions imposed for noncompliance with money laundering laws, as well as criminal prosecutions for willful violations of same. Prerequisite: Juris Masters Students Only

JRM 6080 Banking and Finance Regulation (3). This course provides an overview for the business and human resources professional of the banking and finance sector's important role in ensuring compliance with complicated legal, regulatory and supervisory issues within banking law and practice. Prerequisite: Juris Master students only.

LAW 7085 Banking Law (2-3). This course is concerned with the federal regulation of national and state-chartered financial institutions. Topics include the history of banking in the United States, entry restrictions, expansion through the bank holding company structure, branching, liability issues, limitations on bank activities, and the regulation of failing financial institutions.

LAW 6052 Bankruptcy (2-3). This course covers such diverse matters as the various forms of relief available to different kinds of debtors, including liquidation, reorganization of a business, and adjustment of an individual's debts; financing a Chapter 11 debtor in possession; the automatic stay and the rights of secured and unsecured creditors; the trustee's avoiding powers, exemptions, discharge of debts and the treatment of executory contracts. The basic concepts underlying the

1978 Bankruptcy Code such as discharge, reorganization and equitable distribution are also investigated.

LAW 6958 Board of Advocates (1-2). Students selected as members of the Board of Advocates will earn credit for satisfactory completion of their Board duties, which will include participation on at least one competition team (competition credits will be awarded separately); service as bailiffs, timekeepers, clients, witnesses, jurors, and judges for practice rounds and courses; and participation in Board meetings and activities. Board officers, as well as student coaches for competition teams, may earn additional credit for satisfactory completion of their duties as officers or coaches.

LAW 6948 Business, Innovation and Technology Clinic (4-6). Law students provide basic corporate legal assistance to for profit small businesses, entrepreneurs, and non-profit organizations that cannot afford to pay market rates for legal services. Prerequisites: 45 credits Corequisites: Professional Responsibility; Business Organization or Patent Law or Trademark Law

LAW 5072 Business Law and Intellectual Property for Engineers and Entrepreneurs (3). Focused on the formation, governance, operation, and legal protection of businesses. Coverage includes contracts, malpractice, products liability, employment law, and intellectual property law. Prerequisite: Permission of the instructor. Corequisite: Engineering students only – not for law majors.

LAW 6060 Business Organizations (3-4). This is a basic course on state and federal law governing incorporated business enterprises, partnerships and limited liability companies.

LAW 7070 Business Planning (2-3). This course explores the application of laws relating to unincorporated and incorporated business organizations and the federal income taxation of such organizations in the context of business planning and counseling situations. Prerequisites: Business Organizations, Federal Income Tax, Corporate and Partnership Tax.

LAW 6935 Caribbean Law and Development (2-3). This course will cover the legal and judicial systems of the Caribbean countries and the process by which these systems were introduced. A focus of the course is on Regional Cooperation in the political and especially economic areas. Similarities and differences across the countries of the region that both propel and hinder legal integration will be highlighted.

LAW 6943 Carlos A. Costa Immigration and Human Rights Clinic (4-6). Students enrolled will represent low-income immigrant clients in federal immigration court. Prerequisites: 45 credits, Professional Responsibility, Evidence and Immigration Law. Corequisites: Professional Responsibility, Evidence and Immigration Law.

LAW 6714 Children and the Law (2-3). This course will consider: Constitutional issues posed by the allocation of power as between the state and the family; the status of the child within the family, including economic status, scope of parental privilege to discipline, problems of medical consent, disputes over custody, and adoption; and the juvenile court system, dealing with delinquent, incorrigible, neglected and abused children.

LAW 6949 Civil Externship Placement (2-4). To enhance the student's understanding of the legal profession and its standards by exposing the student relevant lectures and experiential opportunities in civil litigation. Prerequisite or Corequisite: Professional Responsibility.

LAW 7510 Civil Rights (2-3). This course focuses on selected federal statutes enacted to remedy violations of federal constitutional rights. The principal Reconstruction Era statutes, 42 U.S.C. sections 1981, 1982, and 1983, are examined in depth.

LAW 7953 Client Counseling Competition (1). Students selected as members of the Board of Advocates Client Counseling Group will compete in a regional or national client counseling competition and will earn credit for satisfactory completion of their competition duties. Students, working in a team, will typically prepare for and then interview and counsel a client.

LAW 7813 Community Law Teaching (2-3). The course focuses on the delivery of law-related education by law students to lay persons, specifically, high school students. Law students study legal pedagogy focusing on ways to teach legal concepts to high school students and present classes about law, democracy, and human rights in local high schools.

LAW 6251 Comparative Constitutional Law (2-3). This course will analyze elements of constitutionalism, including: the legitimacy of constitution-making and constitutional amendment; limited government; the consent of the governed, majority rule and representative government; separation of powers; judicial and other institutions for constitutional review; civil, political, social, economic rights, and different conceptions of equality; and the relevance for constitutionalism of a society's economic system. The course will consider how and to what extent the elements of constitutionalism are realized in the United States and, selectively, in various countries in different parts of the world, and the factors that render different countries more receptive or more resistant to the development of a culture of constitutionalism or to any of its principal elements.

LAW 6253 Comparative Criminal Law (2-3). This course entails a comparative analysis of important issues of substantive criminal law and criminal procedure against the background of various legal systems. The analysis focuses on American and continental European law and practice. Topics include structure and dynamics of criminal trials, prosecutorial and police discretion, lay participation in the administration of criminal justice, and a comparative analysis of crucial doctrines of substantive criminal law.

LAW 6257 Comparative Environmental Law Urban Issues (3). This course offers students the opportunity to study a wide range of environmental problems in a comparative context. The course examines Brazilian legal and regulatory responses to issues such as urbanizations and its threat to biodiversity of the Atlantic Rainforest, water and wastewater management in a less developed country, the use of international and national legal instruments to improve urban air quality, ecosystem conservation, and environmental education. Brazilian experience and efforts will be compared to US and other legal responses where relevant. Students will have the opportunity to study these

and other questions through in class lectures from US and Brazilian faculty, role-playing exercises, and field visits.

LAW 6254 Comparative Family Law (2-3). This course will entail the study of U.S. and other countries' domestic relations laws, including laws governing marriage, divorce, and children.

LAW 6250 Comparative Law (2-3). This course is designed to develop a technique by which lawyers trained in one system of law may be enabled to recognize, analyze and study legal problems arising in a different system. The first part is devoted to procedural and evidentiary problems faced by domestic courts when they have to decide cases involving foreign law and foreign facts. Following this, the fundamental, historically conditioned differences in approach and method between common law and civil law will be explored. Throughout the course, foreign legal institutions will be compared to our own, with the aim of gaining perspective in understanding and appraising the solutions provided by our own system.

LAW 6255 Comparative Law: Constitutions and the Judicial Process (1-4). This course introduces the major legal traditions in the contemporary world while focusing on public law and related institutions. A broad comparative and historical framework provides the basis for closer study of topics including constitutions, constitutional actions, courts, judicial review, judicial process, administrative law, and the legal profession. Special emphasis is placed on Spain and Latin America. Readings and discussion in class are supplemented with visits to Spanish legal institutions in Seville and Madrid.

LAW 6831 Comparative Property Law (2-3). This course offers the students an opportunity to study a comparative analysis of a wide array of property law issues in differing property law systems. Topics include rights in personal property, present and future interests, marital property, real estate transactions and financing, landlord/tenant law, and takings. These concepts may be examined in either a commercial or residential context. Students interested in property law generally and in transnational property transactions would benefit from an understanding of the differing property law systems. Prerequisite: Introduction to International and Comparative Law when offered on campus to FIU students.

LAW 6830 Comparative Public Law: Government Administration and the Judiciary (3). This course focuses upon both constitutional and ordinary judicial control over government administration from civil law and common law perspectives, in unitary and federal nation-states. Particular emphasis will be placed upon the emergence of divergent legal control mechanisms over government in the Spanish-speaking Americas, on the other hand, and in Spain itself, on the other. A civil law training perspective will be used more than a common law perspective in the teaching of the course, in order that the U.S. students might better appreciate how the learning of a linguistic and conceptual grid of legal reference points up front, rather than an experiential learning of law through the case law method, can affect the way in which the differently trained legal professionals approach their work. Readings and discussion in class will be supplemented with visits to Spanish legal institutions in Seville and Madrid, providing the students an enriched exposure to a different legal culture.

LAW 6832 Comparative Succession Law (2-3). This course offers the students an opportunity to study a comparative analysis of a wide array of succession law issues. Topics may include intestacy, testamentary transfers, and probate avoidance. Students interested in succession law generally and in transnational estate planning would benefit from an understanding of the differing succession law systems.

LAW 7308 Complex Litigation (2-3). Students learn how the federal rules of civil procedure, particularly in the area of complex litigation, can become instruments of policy. Topics include class actions and multi-district litigation.

LAW 6233 Computer and Internet Law (2-3). This is a course on law in the Information Age. Topics may include patent and copyright protection for computer software, Internet copyright and trademark issues, privacy concerns, jurisdictional issues and computer crime.

LAW 6318 Conflict Management Practice - Comparative Perspective of Mediation (2-3). Designed to provide students with both a theoretical background and practical experience in mediation and mediation advocacy, with an emphasis on its practice in an international context. In recent years, individuals and their lawyers are increasingly turning to mediation to resolve disputes, and effective lawyers will need to understand the nature or conflict and to be equipped with the skills essential to effective mediation. This course will introduce students to the various mediation models and mediator styles and to the policy, practical, and ethical implications of the growing use of mediation. It also will offer the opportunity to develop and enhance the skills necessary to both mediate disputes and to represent clients in a mediation setting.

LAW 6317 Conflict Management Practice-Comparative Perspectives of Negotiation (2 -3). Provides an overview of the theory and practice of negotiation, with an emphasis on its practice in the international context. All attorneys spend much of their professional lives negotiating with clients, co-counsel, opposing counsel, and others. Further, in an increasingly interdependent worlds, counselors will need a strong foundation in cross-cultural negotiation techniques to effectively represent their clients in local and national disputes and in of negotiation and to enhance students' negotiation skills. In addition to negotiation skills and theory, students will also be introduced to the ethical issues in negotiation.

LAW 6340 Conflicts of Law (2-3). This course deals with the special problems that arise when the facts or the parties in a case have contacts with more than one state or country. These problems relate to jurisdiction in persona, in rem and quasi-in rem; choice of the applicable law; and after rendition of a judgment, that judgment's recognition and enforcement in other states and countries. Jurisdictional and choice of law rules are studied with special emphasis on situations involving torts, contracts and property transactions cutting across state and national boundaries. Also considered are interstate and international problems concerning marriage, divorce, and decedents' estates.

LAW 6293 Conflict Prevention and Community Improvement (3). Will study responses to community conflict in Rio and other Brazilian communities and will examine their impact on law and society. The course will offer students an opportunity to examine and discuss the

dispute resolution design process with professionals and to visit Brazilian community programs to observe first-hand active conflict prevention programs. Students will consider the Brazilian models in the context of the institutionalization of dispute resolution/conflict prevention in both legal and extralegal settings in developed and less developed communities internationally.

JRM 6402 Conflict Prevention and Resolution in the Workplace (3). This course, designed for the business and human resources professional, provides detailed practical guidance to help staffing firms and departments comply with employment laws, emphasizing preventive measures and techniques aimed at reducing the risk of legal liability for employment law violations. Prerequisite: Juris Master students only.

JRM 6401 Conflict Resolution: Beyond Litigation (3). This course introduces the student to the growing importance within the industry of resolving conflicts through settlement, negotiation, and mediation. Attuned to the professional needs of legal assistants, compliance officers and human resources personnel, the course primarily focuses on facilitative mediation. Prerequisite: Juris Master students only.

LAW 6425 Construction Law (2-3). This course will consider legal issues encountered in construction projects, beginning with the role of the construction lawyer and review of duties and liabilities of the construction team - Architect, Engineer, Owner, Contractor, Construction Manager. The course includes discussion of the bidding process (including bid protest and bid awards), the contracting process with emphasis on key contract provisions, contract performance issues, litigation liability and damage issues, and bonding issues.

JRM 6083 Consumer and Commercial Lending Regulations (3). This course covers those regulations that address a bank's core profit-making products, particularly consumer and commercial lending. The focus explores how banks lend, how banks structure common loan products, and how they secure collateral. This course will also survey appropriate sections of the Uniform Commercial Code, the credit process, real estate lending (including Truth in Lending), loan origination, affirmative and negative covenants, defaults, and provisions of the Bank Holding Company Act. Prerequisite: Juris Master students only.

LAW 6942 Consumer Bankruptcy Externship (6). The Bankruptcy Clinic, a two-semester course, combines classroom and practical work experience. Students may enroll for one semester with permission. They will represent clients in federal bankruptcy proceedings, as permitted by the Florida Limited Practice Act and the Rules of the United States District Court for the Southern District of Florida. The classroom component examines legal, social and ethical dimensions of bankruptcy law practice, including legal skills and knowledge in federal bankruptcy law practice, such as client interviewing, legal analysis, drafting legal documents, arguing motions, professional responsibility, and practice issues such as choice of relief under state law or the Bankruptcy Code, relief from the automatic stay, objections to discharge and dischargeability, and confirmation of a chapter 13 plan. Case developments and issues will be shared in case rounds exposing students to many ethical and practice

concerns and issues. Prerequisites: 45 credit hours, Professional Responsibility, Evidence, and Bankruptcy Law. Corequisites: Professional Responsibility, Evidence, and Bankruptcy Law.

JRM 6084 Consumer Financial Services Regulation (3). This course covers those regulations that are associated with financial products and services offered by banks. The focus of this course includes the Consumer Financial Protection Act, Equal Credit Opportunity, Community Reinvestment Acts, and federal and Florida laws governing fair credit reporting, trade practices, usury, electronic funds transfers, and funds availability. This course includes an analysis of the impact of the Dodd-Frank. Prerequisite: Juris Master students only.

JRM 6010 Contracts and Business Law (4). This course provides an overview of law within the business environment. It is designed to enable the student to develop an understanding of the terms and concepts that govern basic Contract/Business Law. Prerequisite: Juris Master students only.

LAW 6572 Copyright Law (3). A basic introduction to copyright law is included in the Intellectual Property survey course. However, due to that course also covering Patent, Trademark, and Trade Secret law, coverage of copyright law is necessarily limited. This course will expose students to more in-depth knowledge of the rules governing copyright protection for architecture, fashion, and computer software; the ownership and co-ownership of copyrights; the registration and transfer of copyright interests; musicians' royalty rights; copyright interests in Latin America, Asia, Africa, and Europe; the exclusive rights to distribute, perform, and display works; theories of copyright protection the economic analysis of copyright law; and U.S. implementation of copyright treaties such as the Anti-Counterfeiting Trade Agreement, Trans-Pacific Partnership, North American Free Trade Agreement, GATT Annex on Intellectual Property, WIPO Performances and Phonograms Treaty, WIPO Audiovisual Treaty, and WIPO Copyright Treaty.

LAW 6610 Corporate and Partnership Tax (2-3). The course examines the income tax treatment of corporations and their shareholders and of partnerships and their partners arising from various transactions including incorporations, distributions, redemptions, liquidations, and non-taxable acquisitive reorganizations. Prerequisite: Federal Income Tax.

LAW 6945 Criminal Externship Placement (2-4). To enable students to gain a better understanding of the major issues involved with criminal law practice and the criminal justice system. Prerequisite or Corequisite: Professional Responsibility.

LAW 6112 Criminal Procedure: Investigation (3). This course explores pre-trial aspects of criminal procedure under the Fourth, Fifth and Sixth Amendments to the United States Constitution, with emphasis on searches and seizures, police interrogation and the right against self-incrimination, and the right to counsel.

LAW 6230 Critical Legal Theory (2-3). This course explores the relationship between law and legal institutions and ideology. It addresses questions relating to the role of law in society and whether and to what extent law serves to perpetuate existing economic and social

privileges, at the expense of less powerful members of society.

LAW 6294 Cross Cultural Communication in International Dispute Resolution (3). This course surveys the impact that culture has on international dispute resolution processes. In any increasingly interdependent world, counselors will need a strong foundation in cross-cultural communication skills to effectively represent their clients in local and national disputes and in conflicts with a transnational character. This course will explore cultural differences in social customs, business practices, religious and ethical values, and language in the context of various dispute resolution processes through classroom discussions, simulations, and role—plays, many of which will involve Latin and South American settings and will address environmental, land use, and trade issues. Students will develop and enhance their skills in critical thinking, listening, and cross-cultural communications and will have the opportunity to learn about and observe the use of these skills with lawyers and other professionals in Rio.

LAW 7707 Cybersecurity and Privacy Law (3). Cybersecurity law is at the intersection of tort law, competition law, intellectual property law, the law of jurisdiction, constitutional law, and related fields.

LAW 6106 Death Penalty Clinic (4-6). This course will involve students working on death penalty cases under the direct supervision of a clinical professor and a lawyer representing a client on a capital case. Students will assist in investigations, interviewing clients and witnesses, gathering documents, legal research, drafting pleadings, assisting with strategic decisions and in developing integrated theories of defense. The emphasis will be on making a case for life. Prerequisites: 45 credits, Death Penalty, Professional Responsibility. Corequisite: Professional Responsibility.

LAW 6105 Death Penalty Law (2-3). This course will introduce a basic outline of the many components of the death penalty post Furman, including the procedural regulations placed upon litigation. Topics will include Eighth Amendment challenges (e.g., juveniles, the mentally retarded), jury sentencing, racial disparities, the prosecution function, effective defense representation, and international law. There will be a particular emphasis on the sentencing phase of death penalty cases. Prerequisites: Foundation courses completed. Corequisite: Evidence preferred but not required.

LAW 6515 Disability Law (2-3). This course explores the right of individuals with disabilities to be free from discrimination in several major aspects of life including employment, higher education, elementary and secondary education, public accommodations, and housing. The primary legal authorities covered will be the Americans with Disabilities Act, the Rehabilitation Act of 1973, and the Individuals with Disabilities Education Act. The course will consider both the traditional civil rights roots of these laws as well as the latest trends unique to disability in this rapidly emerging field of law.

JRM 6820 Discovery and e-Discovery (3). This course is an in-depth study of the principles, methods and investigative techniques utilized to "discover": that is to locate, gather, document and disseminate information. In response, to discovery, ESI (Electronically Stored

Information) involves the identification, collection, preservation and production of documents. The predominance of ESI has changed the context of information exchanges between adverse parties in litigation, raising complex problems of interpretation and litigation costs. Indeed, the failure to properly comply with the rules covering the exchange of ESI and spoliation of evidence has resulted in severe monetary sanctions. The course covers the statutes and court rulings governing this burgeoning and important aspect of litigation practice. Prerequisite: Juris Master students only

LAW 6713 Domestic Arbitration (3). This course will teach the students about the nature, scope, substance, procedure, and other key aspects relevant to domestic arbitration in the United States of America. Prerequisite: LAW 5000 Contracts

LAW 6037 E Commerce (2-3). This course will consider special issues that arise when business is conducted electronically. Topics may include the jurisdiction of courts over disputes arising from on-line transactions between distantly located parties, contract formation and enforcement issues, electronic signatures, and choice of law problems.

LAW 6583 Education Law (2-3). The course focuses on educational policy and the intersection of public schools and the law. The course covers topics such as school desegregation, compulsory school attendance laws, curriculum content, the First Amendment in schools (flag salutes, school prayer, government aid to parochial schools), school financing, voucher plans, community control of schools, bilingual education, and issues surrounding single-sex schools.

JRM 6581 Education Regulation and Legislation (No Child Left Behind) (3). This course provides an understanding of the US education system and the challenges of education reform. Particular attention will be paid to the wide-reaching effects of the No Child Left Behind Act of 2001, the government's flagship aid program for disadvantaged students. Prerequisite: Juris Master students only.

LAW 6717 Elder Law (2-3). This course covers such areas as income tax provisions of special interest to senior citizens, Social Security, pension plan distributions, Medicare and Medicaid coverage, long-term care and nursing home admission, powers-of-attorney regarding health care proxies and financial/legal matters, guardianship, and ethical considerations in advising elderly clients. The emphasis is on understanding federal statutory provisions that affect the care, comfort, and financial security of persons as they live longer, to permit informed advising and sensitive planning.

LAW 6584 Election Law (2-3). This course examines federal and state law regulating the conduct of elections and the financing of campaigns. It includes aspects of federal and state constitutional law on speech, association, and equal protection; state law on who gets to vote and who gets voted for; and problems of apportionment, gerrymandering, race-conscious districting under the Voting Rights Act, and party governance. With respect to campaign finance, it considers: how much and what kinds of legal regulation are appropriate regarding parties, candidates, independents, political action

committees, corporations, unions, and individuals; and the appropriate role of the courts.

LAW 7549 Employment Discrimination (3). This course assesses the major federal and state employment discrimination statutes (e.g., Title 7, Americans with Disabilities Act, Age Discrimination in Employment Act) with emphasis on the relationship among the legislative, executive, and judicial branches in the development and implementation of public policy.

LAW 6545 Employment Law (2-3). This course is a survey of basic legal and policy concepts governing the employment relationship. Subject areas include: personal service contracts, including grounds for discharge and the at-will doctrine; the collective bargaining process, including the notion of exclusivity/concerted activity, unfair labor practices, duty to bargain, impasse resolution and contract enforcement; employment discrimination, including race, sex, handicap, age, and remedial affirmative action; statutory regulation of conditions of employment, including workers' compensation, fair labor standards, safety and health and whistleblower statutes; public and private employment distinctions, including civil service systems and employment as a property right.

LAW 7575 Entertainment Law (2-3). The course will examine the various complex contractual issues facing attorneys representing clients in the entertainment industry. The course will focus on issues arising in the production, distribution and exploitation of theatrical film and television properties and will also address issues arising in the music industry. Topics will include, among others, negotiating talent services and talent management agreements; acquiring and protecting property rights to creative works; protecting rights of privacy and publicity; and negotiating and accounting for profit participation, residuals, and royalties.

LAW 6471 Environmental Law (3). This is a survey of environmental regulation, addressing the environmental policies, rights, and remedies provided by the common law and various federal statutes. The course focuses on the National Environmental Policy Act, the Clean Air Act, the Comprehensive Environmental Response, Compensation and Liability Act, and various other statutes and common law doctrines related to hazardous wastes and toxic substances. Throughout the course, students will be asked to pay attention to the regulatory and administrative structures invoked by these statutes and doctrines.

LAW 6256 Environmental Health Law and Policy (3). This course is an inter-disciplinary course examining a range of legal responses to questions of environmental health law and policy in the context of modern Rio de Janeiro, Brazil. In conjunction with graduate students in public health, students are asked to consider appropriate legal, regulatory and policy responses to a range of environmental health challenges, from the effects of pesticides on consumers to efforts to control communicable and insect-borne disease. Because this course is offered abroad, students are also asked to consider the appropriate role of foreign lawyers and policymakers in formulating appropriate responses to the environmental health challenges studied. The course features extensive lecturing by Brazilian faculty drawn from the worlds of law, public health and other social

sectors, and students are asked to tackle role-playing exercises in order to apply the material studied.

LAW 6621 Estate and Gift Tax (2-3). This course covers federal estate and gift taxes and their impact on gratuitous property transactions during life and at death. The course includes brief consideration of the tax on generation skipping transfers. Prerequisites: Federal Income Tax, Wills and Trusts.

LAW 6431 Estate Planning (3). This course will explore the theories and skills involved in the estate planning process. Topics include the estate planning engagement, information gathering, identification of client objectives, development of remedial and conventional estate plans, and selection of fiduciaries. Prerequisites: Federal Income Tax, and Wills and Trusts.

LAW 6222 European Legal History (2-3). This course introduces students to European legal history from the Roman era to the present day. Although focusing predominantly on the development of the continental tradition and subsequent national legal systems, the course also incorporates aspects of English legal history. The materials selected highlight the political and cultural context within which Europe formed and adapted a highly sophisticated legal science. The course provides essential background for any student interested in understanding civil law systems found throughout the world today in Europe, Latin America, and Asia.

LAW 6280 European Union Law (2-3). This course is a review of major legal aspects of the institutions of the European Union and the law of the European Community. It will emphasize: the development of law of a "constitutional" nature, the system for enforcement of EC law; the relationship between national law and law at the European level (federal and subsidiary); the breakdown of barriers in the internal market and the free movement of goods and services; competition policy; and other internal market policies.

LAW 6330 Evidence (3). This course addresses the law of evidence, including hearsay, judicial notice, burden of proof, and presumptions; functions of judge and jury; competency and privileges of witnesses; and exclusion of testimony of witnesses and documents.

LAW 6591 Family Education Rights and Privacy Act (FERPA) (3). The Family Education Rights and Privacy Act is a federal law that protects the privacy of student records of any educational institution that receives federal Department of Education funds. FERPA prohibits the federal funding of institutions that release education records without the consent of parents or eligible students. FERPA compliance is complex, because the law contains numerous exceptions applicable to certain individuals and to different situation, as well as several gray areas. The course explores these complexities and the difficulties of compliance in detail.

LAW 6710 Family Law (2-3). This course examines state regulation of sexual and marital relationships, including the conflict between the doctrines of family privacy and state intervention in the marital relationship.

LAW 6940 Family Law Clinic (4-6). Students in the Family Law Clinic will represent individuals with family law disputes. Prerequisites: 45 credits, Professional

Responsibility, Evidence, and Family Law. Corequisites: Professional Responsibility, Evidence, and Family Law.

JRM 6720 Family Relations Law (3). This course introduces business and human resources professionals to the Florida Statute governing the law on family relations. Prerequisite: Juris Master students only.

LAW 6845 Fashion and Design Law (2-3). This course will introduce students to Fashion and Design Law, with a focus on the relationship between intellectual property laws, fashion, and culture. Students will learn about how intellectual property laws can, and cannot, be used to protect fashion and designs nationally and internationally. The course may also cover licensing, global legal disputes, relevant trade law mechanisms, and other related fashion law topics. No technical background is required for this course. Intellectual Property Law is highly recommended but not required.

LAW 6302 Federal Courts (3). The course examines the power and role of the federal courts as defined by the United States Constitution, federal statutes and judicial decisions. Among the topics examined are federal question, diversity and civil rights jurisdiction, habeas corpus, immunities of state and local governments from suit, and abstention.

LAW 6600 Federal Income Tax (3). This course offers an introduction to the fundamental principles of federal income taxation, particularly as applied to individuals, including the concepts of gross income, identification of the proper taxpayer, deductions, income tax accounting, capital gains and losses, deferred payment sales and non-recognition transactions. Consideration will be given to issues of tax policy and tax planning techniques.

LAW 6038 Financial Technology Law (3). Fintech law is at intersection of Internet law, contract and tort law, securities and commodities law, intellectual property law, the law of entrepreneurship, and related fields.

LAW 7511 First Amendment (2-3). This course is an examination of the historical origins and underlying values of the rights of conscience protected in the First Amendment. The emphasis will be on the fundamental principles articulated in Supreme Court interpretations of its provisions relating to free speech, free press, and religious liberty. Prerequisite: LAW 5501

LAW 7303 Florida Civil Practice (2-3). This course entails a study of Florida civil practice from the commencement of an action through final judgment.

LAW 6403 Florida Condominium and Community Association Law (2-3). This course shall focus on the planning, structuring and operation of condominium and community associations in Florida. The course will cover issues related to community planning and the day-to-day operations of an association. The students will be provided with a sample set of governing documents for a condominium and homeowner's association before the first day of class. Simulations will be provided to the students on a weekly basis. Students will be required to draft a legal opinion advising their client on the best course of action for each simulation. Students will also draft several documents relevant to the practice of Florida Condominium and Community Association Law. Prerequisites: Property, Civil Procedure.

LAW 7503 Florida Constitutional Law (2-3). This course studies the Constitution of the State of Florida, including recent decisions of the Florida Supreme Court and analysis of current proposals for constitutional change.

LAW 5309 Florida Law and Procedure (2). Focused on differences and distinctions between state law and general common law principles in certain fundamental areas of law typically tested on the Florida bar examination. Prerequisites: Foundation courses or substantial equivalent.

LAW 6580 Food and Drug Law (2-3). This course offers a comprehensive study of the Food and Drug Administration's regulatory standards governing the production and marketing of food and pharmaceuticals in the United States. The new drug pre-market approval process, good manufacturing practice requirements, drug labeling and advertising rules, and related FDA enforcement powers and activities are covered.

LAW 6506 Foreign Relations and National Security Law (2-3). This course assesses foreign relations law, with a focus on national security law under the United States Constitution. It examines the scope of presidential powers, the role of executive agreements, treaties, and legislative powers pertaining to foreign affairs and national security.

JRM 6542 Harassment in the Workplace (3). This course, tailored toward the business and human resources professional, reviews efforts and strategies for compliance with workplace employment policies against discrimination and harassment. Prerequisite: Juris Master students only.

LAW 6720 Health Law (2-3). This is a study of numerous topics, including national health care programs, health care financing, reimbursement, licensing and accreditation, hospital organization, physician and patient autonomy, antitrust law, quality of care and medical malpractice, and ethical issues related to availability of health care and services.

LAW 6981 Immigrant Children's Clinic (4-6). Students will gain experience representing children in state dependency proceedings, appeals, and in some cases, in federal immigration proceedings. Prerequisites: 45 credits, Professional Responsibility, Evidence, and Family Law. Corequisites: Professional Responsibility, Evidence, and Family Law.

LAW 6264 Immigration Law (2-3). This course examines the major aspects of the Immigration and Nationality Act. The interrelationship between the administrative agencies empowered to execute the Immigration and Nationality Act's mandate will be studied. Major attention will be focused on the immigrant and nonimmigrant visa systems, political asylum and refugees, exclusion, and deportation of the foreign-born, and naturalization. Policy implications of the statute and judicial interpretations are addressed.

LAW 6905 Independent Study (1-2). A student may pursue an independent study project, including a research and writing project, under the supervision of a faculty member who has a special interest in the subject area of the project. The student must obtain the consent of the faculty member before registering for the course.

LAW 6080 Insurance Law (2-3). The course deals with the making, administration and interpretation of insurance

contracts; governmental (including judicial) regulation of insurance; common insurance contract provisions; subrogation; excess liability of insurers; and property, life and liability insurance policies and problems.

LAW 6570 Intellectual Property (3-4). This is a survey course that introduces students to patent, copyright, trademark, trade secret, right of publicity and unfair competition law. The course is designed to give students entering a general business or civil litigation practice a thorough overview of the various intellectual property doctrines.

LAW 6015 International and Comparative Sales (3). This course entails the study of legal rules governing the international sale of goods, and a comparison of these rules with civil law and United States domestic law counterparts. The course will focus on the United Nations Convention on Contracts for the International Sale of Goods. Topics will include choice of law, contract formation, performance and breach, excuse of performance, and remedies for breach. Comparing and contrasting the three systems - international law, civil law, and domestic/common law - offers the student insight into the choices, interests, and policies pursued under each respective system of law.

LAW 6824 International and Foreign Legal Research (1-2). International and Foreign Legal Research aims to provide students with a basic foundation to competently research international, comparative and foreign law. This course will familiarize students with the basic sources of international law and the national law of key foreign jurisdictions, and help students develop the necessary skills to efficiently research transnational legal questions. Prerequisite: Cannot be taken simultaneously with LSV 2.

LAW 6551 International Antitrust (2-3). This course considers all major aspects of international antitrust law affecting United States businesses, including the Justice Department's international enforcement guidelines, issues of extraterritorial application of United States antitrust law, and the "effects doctrine." International enforcement cooperation and European Union antitrust enforcement will also be discussed.

LAW 6087 International Banking (2-3). This course addresses issues of banking and financial law in international private transactions. Topics include letters of credit, banking and bank secrecy regulation, efforts to combat money laundering, and currency regulation.

LAW 6261 International Business Transactions (2-3). The course provides an overview of the domestic, foreign, and international law governing international business transactions. Transactions discussed include export sales, agency and distributorship agreements, licenses, joint ventures, privatization, project finance, and foreign government debt. The course also covers U.S. regulation of international transactions in such areas as antitrust, securities, intellectual property, tax, foreign corrupt practices, and export controls, as well as the impact of North American Free Trade Agreement and the General Agreement on Trade and Tariffs.

LAW 6316 International Commercial Arbitration (2-3). The course covers the basics of the law and practice of international commercial arbitration, including: drafting arbitration clauses in international transactions and

enforcement of arbitral agreements; preparing and presenting cases before arbitral tribunals, including issues of witnesses, experts, discovery and evidence; recognition, enforcement and setting aside of arbitral awards; the major international arbitral institutions and their rules of procedure; the relationship between international arbitration and national court systems; and various treaties and conventions dealing with international arbitration.

LAW 6103 International Criminal Law (2-3). The course explores international crimes, such as genocide, crimes against humanity, torture, narcotics trafficking, terrorism, and war crimes. It focuses on contemporary responses by way of international criminal jurisdiction claimed by individual states, bilateral cooperation on extradition and evidence gathering, prosecutions before ad hoc international tribunals, and the development of an international body of criminal law and procedure. Particular attention is paid to the question of jurisdiction, including the reach of U.S. Constitutional protections to investigations and law enforcement activities overseas. Special consideration is given to international terrorism, the role of human rights in international criminal law, and the establishment of an international criminal court.

LAW 7268 International Environmental Law (2-3). This course focuses on issues including marine pollution, transboundary movement of hazardous waste, climate change, biodiversity, the relation of population and the environment, and other global and transboundary environmental problems.

LAW 6263 International Human Rights Law (2-3). This course is an introduction to the international law protecting human rights. It examines the theory and the history of the field, together with key United Nations documents. International treaty and non-treaty mechanisms for protecting and promoting human rights, including regional systems and the role of nongovernmental organizations, are covered.

LAW 6574 International Intellectual Property Law (2-3). This course provides students with an overview of intellectual property (IP) law in the global context, commencing with a survey of patent, copyright and trademarks. We will learn about the multilateral institutions that address IP issues, and study the leading multilateral IP treaties, including the World Trade Organization Agreement on Trade-Related Intellectual Property Rights, the Paris Convention for the Protection of Industrial Property, the Berne Convention for the Protection of Literary and Artistic Works, and other international agreements that facilitate the protection of IP interests in multiple countries. In addition to studying domestic and international mechanisms for the protection of IPRs, we will review current issues in International IP law and policy. No technical background is required for this course.

LAW 6987 International Law Internship (2-6). The International Law Internship is a non-paid credit-based work experience that provides a student with the ability to gain advanced legal knowledge and skills within an organization, industry or functional area reflecting the student's academic and professional interests.

LAW 6265 International Litigation (2-3). This is a study of international litigation for the resolution of private and public disputes.

LAW 6295 International Organizations (3). This course aims to introduce students to the fascinating and complex world of international organizations, and situate specifically the United Nations, World Bank, and regional institutions within the context of the dynamic international legal order and world politics.

LAW 6269 International Telecommunications Law (2-3). This course surveys telecommunications laws and regulations worldwide, with particular emphasis on the United States, Europe, and Latin America. Also to be addressed are major international agreements and organizations affecting telecommunications.

LAW 7262 International Trade Law and Policy (2-3). This course concerns the national and international regulation of imports and exports. Law, policy and economics of the international trading system will be discussed. The course primarily focuses on import restrictions on goods; however, export restrictions and trade in services will also be considered. Topics include the pure theory of trade, industrial policy, the World Trade Organization and its dispute settlement process, dumping and countervailing duties, retaliation, and economic sanctions.

LAW 6381 Interviewing and Counseling (2). A study of theories and skills involved in interviewing and counseling, this course entails student performances in role playing and simulations as a primary means of instruction.

JRM 6300 Introduction to American Law (3). This is a required course for all students in the J.M. program. It provides a basic overview of the U.S. legal system. An effort is made to include broad coverage of important areas of American law, including constitutional law, criminal law and procedure, environmental and natural resources law, and family law. Students will be introduced to some of the most important cases in U.S. legal history. Prerequisite: For Juris Master Students Only.

JRM 6091 Introduction to Regulatory Compliance (3-4). This course introduces the student to regulatory compliance from a business and human resources professional's point of view. It examines Sarbanes-Oxley, HIPAA, and other regulations, and covers the most important best practices that are common across multiple pieces of legislation. Prerequisite: Juris Master students only.

LAW 6041 Investor Advocacy Clinic (4-6). Students enrolled in this Clinic will represent clients in securities arbitration proceedings. Prerequisites: 45 credits, Professional Responsibility, Business Organization. Corequisites: Professional Responsibility, Business Organization.

LAW 7940 Judicial Clinic (3-12). Students enrolled in this course will have the opportunity to combine substantive study with practical experience as a judicial extern. Students will be assigned to work (up to fulltime in limited cases) with judicial officers or trial and appellate judges in the state and federal courts. Students will observe hearings and trials, research legal issues, draft orders and opinions and review case files as assigned. A classroom component will examine the legal, political and ethical dimensions of the judicial decision-making process.

LAW 6984 Judicial Externship Placement (2-4). To enable students to serve as judicial externs with

participating judges, magistrates or referees in State or Federal Courts. Prerequisites: Student must have a G.P.A. of 2.75 and a writing sample.

LAW 5210 Jurisprudence (2-3). This course is an investigation of the nature of law, and considers the differences between law and custom, morality, policy, "common sense," logic, and reason. The course considers the philosophic underpinnings of the Restatements and other codes. It further inquires into the sources and legitimacy of law, and asks whether law must be enforced and why wrongs should be righted.

LAW 6540 Labor Law (2-3). This course is about labor union activities and other forms of concerted activity. It focuses upon an employee's right to form or join a union and the right to refrain from such activities. The course covers the representational and unfair labor practice provisions of the National Labor Relations Act, including the formation of a labor organization and negotiation and administration of collective bargaining agreements.

LAW 6460 Land Use Planning and Control (2-3). Since the 1920s, our society has regulated urban and rural uses of land in an attempt to encourage the prudent allocation of land resources, thus this course undertakes an intensive analysis of the traditional regulatory techniques, including general and specific planning, zoning, and subdivision mapping, and relates them to the practical and political aspects of the land use entitlement process and to resolve conflicting use preferences.

LAW 6281 Latin American Private Law (2-3). Commercial transactions, business entities, interests in property, family law, inheritance, and torts are all considered part of the broad category of private law in Latin America. This course aims to provide historical and institutional background for these areas of law followed by an investigation and evaluation of present practices and developments, particularly in the Spanish-speaking countries. The ways private law in practice and in theory respond or do not respond to internal and external economic, social, and political forces will be considered. Topics to be addressed may include methods of structuring transactions, land reform, notions of civil responsibility, courts and alternative dispute resolution, and the privatization of state-owned enterprises.

LAW 6553 Law and Development (2-3). This course examines the role of law and the legal system in economic and social development, particularly in less developed countries, emerging markets, and nations in transition. It will explore how law, in its various forms, may bring about or impede development, however defined, and how development may affect or change the legal system of the country concerned. At key moments, the course will use a comparative method to explore how similar issues such as gender, child labor, industrial regulation, working conditions, corporate governance among others were treated in the United States.

LAW 6555 Law and Economics (2-3). The course gives a presentation of economic principles that are important for understanding the relationship between economics and the law. Traditional microeconomics subjects, including demand, supply, market exchange, consumer behavior, and the theory of the firm are presented with special reference to legal problems. Tools of microeconomics are used for the analysis of economic regulation of business,

environmental protection, and the economics of discrimination.

LAW 6245 Law and Literature (2-3). This is a course that uses the perceptions of the novelist as a way of exploring the interactions of law with the larger society.

LAW 6282 Law and Politics in Latin America (3). This course examines a series of issues related to law and legal systems in Latin America. It draws out the interrelationship of theory and politics that constitute "lawyerly thinking" by Latin Americans. It has both a practical orientation, addressing how to understand and work with Latin American law and lawyers, and a theoretical orientation, examining how legal practices are the result of both overlapping and competing projects of social organization. This course in comparative law and politics examines a cross-section of the institutions, doctrines, and interpretive theories of Latin American codes, courts and legal commentators. As against the widely held view that Latin American law is merely imitative of foreign models or is mainly irrelevant to their societies, the course examines the strategic and programmatic function of law in the service of national governance, cultural identity, and existing economic arrangements.

LAW 6091 Law and Procedure: Federal Financial Institutions (3). The course provides an overview of BSA/AML compliance program requirements, BSA/AML risks and risk management expectations, industry sound practices, and examination procedures. Special focus on federal institutions such as the Federal Reserve.

LAW 6350 Law and Procedure: US and Florida (4). The course will function as a capstone course reviewing differences and distinctions between state law and general common law principles in certain fundamental areas of law. The differences and distinctions will focus on those areas determined to be of significance to the Florida Board of Bar Examiners, as indicated by the areas typically tested on the Florida and Multistate portions of the bar examination. Prerequisites: Offered to 3L and 4L students.

LAW 6751 Law Firm Management (2-3). This course focuses on all aspects of the formation, management, development and growth of a law firm, forms of partnership, licensing requirements, insurance, human resources and employment practice. Prerequisites: This course should be open to second- and third-year students. However, it may be more suitable for third-year students.

LAW 6043 Law of Consumer Credit (3). State and federal statutes, including the Truth-In-Lending Act, privacy and legislation on credit card practices and fees, and the legislation resulting from the 2008 financial crisis.

LAW 7064 Law of Corporate Finance (3). An advanced corporations course on legal and economic issues involved in corporate financing decisions, covering a broad range of issues including basic accounting, valuation of corporate entities and their securities, corporate capital structures including the relationship of corporate debt to equity and the impact of leverage, dividend and investment policy, and new financial instruments such as derivatives and structured finance. Prerequisite: Business Organizations.

LAW 6753 Law of Legal Malpractice (2-3). This course will examine the bases for legal malpractice as well as the

interplay between the law of legal malpractice and ethical obligations to which lawyers are held by the Lawyers' Code of Professional Responsibility and the ABA Model Rules of Professional Conduct. It will explore the basic elements of the tort of legal malpractice, the creation of the attorney-client relationship, and applicable defenses. A major emphasis of the course will be on the prevention of malpractice, and we will examine common mistakes made by practicing attorneys which give rise to malpractice claims. Overall, the course will seek to instill a commitment to achieve the highest ideals of the legal profession.

LAW 6823 Law Practice Technology (2-3). Technology and its use is changing the practice of law. Law Practice Technology will expose students to the theory and use of technology in legal practice, examining the role different technologies and their use in supporting legal practice and providing legal representation. This course will examine litigation technologies; document management; practice management; electronic discovery; project management; eLawyering and virtual law practice; web design basics; and the ethical, security and privacy issues related to the development and use of technology in legal practice. Prerequisite: Civil Procedure.

LAW 6950 Law Review: Board of Editors (1-2). Students selected as members of the Board of Editors of the Law Review may earn credit for satisfactory completion of their Board duties. As members of the Board of Editors, students will solicit, select, edit and publish articles submitted by lawyers, judges, and professors from across the country. The Board of Editors also may organize and solicit participants for symposia on legal topics of current interest and publish the papers presented at the symposia. Student editors will supervise the preparation of student comments by new members of the Law Review and will select and edit those comments for possible publication. Student editors will train new Law Review members on proper citation format and cite-checking requirements for articles published in the Law Review. Student editors will be responsible for all other aspects of the Law Review, including obtaining subscriptions, managing its finances, working with the publisher and others in the printing and distribution of the Law Review.

LAW 6956 Law Review: Senior Members (1-2). Senior Members of the Law Review may earn credit for satisfactory completion of their duties. Senior Members will assist the Board of Editors in all aspects of the Law Review, including cite checking articles to be published in the Law Review.

LAW 6821 Law, Science, and Technology (3). To examine the various ways in which the legal system interacts with science technology, including the impact of the legal system on evolving fields of science and technology and the influence of these fields on the legal system. Each class will focus on a different theme involving the interaction of law, science and technology, using a specific case study. Prerequisites: First year curriculum.

LAW 6957 Law Review: Staff Members (1-2). Staff Members may earn credit for satisfactory completion of their duties. The student members are required to write a comment of publishable quality, complete instruction on

cite checking, and assist the Board of Editors and Senior Members in cite checking and any other assigned duties needed to publish the Law Review.

LAW 6780 Legal Analysis (1-2). This course will advance students' legal analysis, legal writing and test taking skills. Students will address legal methods useful in developing a full understanding of doctrinal rules and of how those rules operate within legal analytical frameworks. There will be regular practice exams, in-class writing assignments and individual conferences.

JRM 6710 Legal Analysis and Writing (3). Students in this required course are introduced to the art of analytical legal writing. Students will learn to analyze cases, statutes and other authorities. The course emphasizes student development in the following skills: organizing the analysis of legal issues logically and coherently; expressing written legal analysis clearly, concisely, and effectively; developing and defending legal arguments, both in writing and orally; performing basic legal research; drafting selected legal documents; and using proper citation form. The writing exercises promote the students' awareness and appreciation of relevant ethical standards. Prerequisite: Juris Master students only.

LAW 6941 Legal Clinic (3-7). Students enrolled in the Clinic will represent actual clients in either a litigation or transactional context, as permitted by the Florida Limited Practice Act. The course is open only to students who have completed at least 60 credit hours of law school course work. Prerequisites: Professional Responsibility, Evidence (for the litigation clinic), Trial Practice (for the litigation clinic), and Business Organizations (for the transactional clinic).

JRM 6541 Legal Developments in Disability Law (3). This course covers the fundamentals of disability law with an emphasis on resources, evaluations, and appeals processes for the business and human resources professional. The main statutory focus will be on the Americans with Disabilities Act. Prerequisite: Juris Master students only.

JRM 6580 Legal Developments in Education (4). This course presents the business and human resources professional with the emerging legal developments and regulatory standards governing such issues as liability in student attacks and the merits and constitutionality of drug testing students in school. Prerequisite: Juris Master students only.

LAW 6226 Legal History (2-3). This course deals with the history of the United States viewed through aspects of the law, the legal profession, legal education, and the evolution of constitutional principles. The focus of this course is on the background and context of the growth of American law and legal institutions, and on the ways in which law and legal concepts have been centrally important in American history. Major emphasis is given to the period of the Revolution, the growth of positivism, the Gilded Age, the Progressive Era, the New Deal, and the Cold War period.

JRM 6545 Legal Issues in the Workplace (4). This course, designed for business personnel and human resources generalist, covers the basics in recognizing and managing legal issues within the workplace. Line managers and supervisors would also benefit from a

working knowledge of laws affecting the workplace. Prerequisite: Juris Master students only.

JRM 6352 Legal Procedure and the Legal System (2-3).

This course provides an overview of the major principles and functions of the legal system. It introduces students to criminal procedure, civil procedure, and other rules and processes governing litigation and transactional law. The course will select and follow the typical procedural trajectory of a major case. This course is the substantive "external" complement to the "internal" procedural course, LAW 6822 Litigation Management and Legal Technology. Prerequisite: Juris Master students only.

LAW 5781 Legal Reasoning (2-3). This course is a skills-based class offered as a two or three credit class during the spring semester. The course is designed to teach and reinforce skills relating to legal analysis and academic performance, including skills relating to legal problem solving and written expression. Ideally, class size is limited to allow for assessment and feedback.

JRM 6070 Regulation of Health Insurance (3). This course will explore the obligations of large and small employers with respect to health insurance. The ACA includes a "shared responsibility" provision, with potential penalties for employer noncompliance. The course covers employer liability under the ACA and the specific ways the Act will impact access, quality, costs, and tax implications. The course provides a general understanding of the US health care system and the challenges of health care reform in relation to employer compliance under the Act. Prerequisite: Juris Master students only.

LAW 6795 Legal Skills and Values II-III (4). Legal Skills and Values II-III (LSV: II-III) combines elements of both LSV II and LSV III, and runs parallel to these courses in the three-course LSV sequence. The course continues the foundational LSV I focus on research analysis, and communication, but shifts to persuasive and transactional advocacy as it stimulates "real world" legal experiences. Prerequisites: LSV Director or Co-director approval.

LAW 6797 Legal Skills and Values III (2-3). This course will advance students' legal skills in analysis, research, objective writing, persuasive writing, and oral communications, and also raise new professionalism issues. Students will interview and counsel a client regarding a dispute and then research the legal issues raised by the dispute. Students will write a Complaint or Answer, a Demand Letter or Response Letter, an objective memo to a senior attorney describing the legal issues and a proposed course of action, and then prepare or respond to discovery requests. Students will mediate with opposing counsel to resolve the dispute, and ultimately will write a brief in support of their client's position.

LAW 7808 Legal Skills & Values IV (1-3). Students enrolled in this elective course will build upon and hone the objective and persuasive writing skills they learned and began developing in LSV I, LSV II, and LSV III. The course is designed to help students evaluate their reading, comprehension, analysis, and writing skills and diagnose any problems they may have in these areas. The course goal is to help excellent writers become exceptional writers and to help average- and below average writers become excellent writers. Further, during the course students will conduct legal research and deliver short

presentations regarding their work, thus enhancing their legal research and oral communication skills. During the initial segment of the course (Diagnostic Assessment), students will work with the professor and class to critically evaluate their past writings (prior briefs and papers) to assess their strengths and weaknesses. During the second segment (Transactional Work), students will critically read and edit a contract and write a client letter discussing essential elements of the contract. In the third segment (Judicial Opinion Writing), students will research and write a short judicial opinion. In the final course segment (Scholarly Writing), each student will research and write a short article suitable for publication in a magazine such as The Florida Bar Journal. Pre-requisites: LAW 5792, LAW 5793, LAW6797.

LAW 6806 Legal Skills and Values: LL.M. (2-3). This course provides graduate law students with essential training on legal research, writing, and analysis to understand common documents found in the practice of law in the United States. It covers basic aspects of professional communication, including legal correspondence and memorandum writing.

LAW 6523 Legislation (2-3). This course entails a study of the legislative process.

JRM 6350 Litigation Management and Legal Technology (3). The course covers the litigation process from the pre-suit investigation to the appeal. The student will acquire the knowledge and the skills to effectively manage the workflow of major litigation for the attorneys at each phase, with an emphasis on leveraging legal technology to create efficiencies for the attorney and the client. Important topics such as litigation principles, lawyer and client relationship and ethics, gathering evidence, depositions, preparation for a civil trial, structure of a civil trial, judgments, appeals, and more are discussed in detail. Prerequisite: Juris Master students only

LAW 6531 Local Government Law (2-3). The powers, limitations, and special legal rules concerning local governments are studied in this course. Emphasis is given to Florida problems concerning counties, cities, and special districts.

LAW 6383 Mediation (3). Students will gain an understanding of the practice of mediation from the perspective of a lawyer representing a client, along with acquiring the skill to focus on the interactions of the participants.

LAW 7959 Mediation Competition (1). Students selected as members of the Board of Advocates Mediation Group will compete in a regional or national negotiations competition and will earn credit for satisfactory completion of their competition duties. Students, working in a team, will typically prepare and then mediate an agreement on multiple issues.

LAW 6723 Community Lawyering Clinic (2-6). The Medical-Legal Partnership Clinic is a legal services delivery model designed to improve legal client/patient outcomes by addressing social determinants of health (poverty, education and employment, income, housing, legal status, personal and family stability, etc.) Under the MLP Clinic, supervised students-lawyers will provide legal assistance to underserved, low-income households in association with community partners. Prerequisites: 45

credits, Professional Responsibility, and one of the following: Health Law or Administrative Law or Disability Law or Immigration Law. Corequisites: Professional Responsibility, and one of the following: Health Law or Administrative Law or Disability Law or Immigration Law.

LAW 6725 Medical Malpractice Law (2-3). Medical Malpractice Law examines legal claims that may be brought against physicians, hospitals, and other allied health professionals and organizations, as a result of the provision of medical and/or health services, or as a result of relationships with medical and health services providers. The course will examine the duties of care imposed by law on medical and health care providers, legal remedies for breach of the standards of medical care, defenses to legal claims, and medical ethics. Recommended but not required as a prerequisite: Evidence Law.

JRM 6110 Medicare and Medicaid Law (3). This course provides students with a fundamental understanding of the Medicare and Medicaid programs and the practical skills for using this information to serve their clients. The course examines the purpose and design of Medicare and Medicaid; the Medicare and Medicaid vocabulary; and the criteria for eligibility and enrollment in these programs. Prerequisite: Juris Master students only

LAW 7065 Mergers and Acquisitions (2-3). This course will approach the study of major corporate restructuring from both an academic and a practice perspective. Included in the course will be a review of underlying economic objectives and sources of efficiency gains in restructuring ownership interests in publicly financed firms and factors affecting choice of transaction form. Major emphasis will be on the corporation law and securities laws pertaining to M&A transactions. Both hostile and friendly deals will be covered. More briefly addressed will be tax law, competition law and executive compensation issues encountered in such transactions. Prerequisite: Business Organizations.

LAW 6741 Military Justice (2-3). Course presents students with the development of Western military justice systems and reasons for having unique justice systems for the military; provides an overview of the actors and institutions in the American military justice system; illustrates the military's unique criminal offenses and defenses, rights of the accused, Rules for Courts-Martial, Military Rules of Evidence, rules for professional responsibility, all set in the context of a mock courts-martial.

LAW 6297 NAFTA and Other Regional Trade Agreements (2-3). This course analyzes the legal structures of non-global freer trade agreements, including but not limited to NAFTA. It reviews GATT Article XXIV and the economic and policy debate (global vs. regional trade arrangements); discusses key aspects of NAFTA, including industrial development, investment dispute and other disputes; and analyzes legal and policy issues relating to the negotiation of a Free Trade Agreement of the Americas (FTAA). Other regional trade arrangements, including the Southern Cone Common Market (Mercosur), are also considered. A focus of the course is efforts in NAFTA to deal with environmental and labor concerns.

LAW 6507 National Security Law and the Constitution (2-3). The goal of this class is to examine the growing body of national security law under the Constitution.

LAW 6470 Natural Resources Law (3). Natural Resources Law will cover the laws regulating the exploitation of natural resources. Major topics include Wildlife and Biodiversity, Marine Resources, Public Lands, Water, Rangelands, Oil and Gas. Prerequisite: Completion of 1L year.

LAW 6313 Negotiation (2-3). The course is designed to provide students an understanding of the history, process and practice of negotiation through role-plays, simulations and life experiences.

LAW 7954 Negotiation Competition (1). Students selected as members of the Board of Advocates Negotiations Group will compete in a regional or national negotiations competition and will earn credit for satisfactory completion of their competition duties. Students, working in a team, will typically prepare and then negotiate an agreement with opposing counsel.

LAW 6061 Non-Profit Organizations (2-3). This course will address the legal regulation of nonprofit organizations from the perspective of state law and federal tax law. Topics to be covered include: the theoretical rationales for the nonprofit sector and federal tax benefits; formation and dissolution of nonprofit corporations and charitable trusts; operation and governance, including the legal duties and liabilities of directors and trustees; requirements to qualify and maintain federal tax-exempt status; the distinction between public charities and private foundations; the tax consequences of business and investment activities of nonprofits; basic charitable giving strategies; and regulation of charitable solicitation.

LAW 7475 Ocean and Coastal Law (2-3). This course considers aspects of land use law, water law, natural resources law, property law, and constitutional law from the perspective of the special needs of the coast. The course examines the common law and major acts protecting coastal zones and natural resources, and includes discussion of the important interrelations of water, habitat, wildlife, and land use, as well as issues concerning jurisdictional conflicts.

LAW 6086 Offshore Financial Centers: Use and Abuse (3). This course examines both legitimate and illegitimate uses of OFCs with reference to detailed case studies drawn from the local experience related to corruption, drug money laundering, terrorist financing, sanctions, and tax evasion.

LAW 6573 Patent Law (2-3). This course provides in-depth coverage of substantive trade secret law and patent law. In addition, it covers aspects of patent prosecution practice and procedure. Prerequisite: Intellectual Property Law.

LAW 6031 Payment Systems (2-3). This course will survey the uses of different payment mechanisms (negotiable and nonnegotiable instruments, credit cards and electronic funds transfer and wire transfer systems) in both credit and cash transactions. The course will consider allocation of risks for fraud, countermands, defenses on the underlying contract, mistake, timeliness, and unauthorized payments. In each case the allocation of risks in connection with different payment mechanisms will

be considered, along with whether these allocations should be the same or different for each mechanism. The course will focus on Articles 3 and 4 of the Uniform Commercial Code and, as time permits, consider letters of credit under U.C.C. Article 5 and the International Chamber of Commerce Uniform Customs and Practice. Special emphasis will be given to techniques of statutory analysis, commercial counseling, and a rethinking of present rules, especially in the light of the revision of Articles 3 and 4. The impact of federal legislation on the state payments law (U.C.C. Articles 3, 4, and 4A) may also be treated.

LAW 6541 Pension and Employee Benefit Law (2-3).

This course will introduce students to the basics of federal pension law, including the employee benefit provisions of the Internal Revenue Code and the labor law portions of ERISA (the federal statute governing employer-provided plans). The course will provide a basic overview of the tax principles of deferred compensation, and an introduction to the tax requirements for qualified pension plans. It will also cover the large body of federal case law addressing such issues as ERISA preemption of state law and its impact on employer-provided health benefits, age and sex discrimination in pension benefits, and other issues. Prerequisites: Federal Income Tax; Corporate and Partnership Tax.

LAW 6361 Pre-Trial Practice (2-3). This course covers trial preparation from client interview to the courthouse steps. The course considers theory of the case, fact investigation, pleadings, discovery, and disclosure (depositions, issues, requests for production), motion practice, settlement conferences and negotiations, final pre-trial preparation, and professionalism values.

LAW 6702 Products Liability (2-3). This course is a survey of the history, growth, and development of the law regarding injury to persons and property resulting from defective products. It will examine the various legal theories of fraud, express warranty, implied warranties of fitness and merchantability, negligence, and strict liability.

LAW 7285 Profesión Jurídica Comparada (Comparative Legal Profession) (2-3). This course is designed for students who have a basic knowledge of the Spanish language and want to develop or expand their legal vocabulary. The prerequisite Spanish-language proficiency for admission to the class will be determined by the professor in individual cases. The focus of the course is on effective communication with Spanish-speaking colleagues and clients rather than on grammar or punctuation. Both oral expression and legal writing skills are emphasized through a series of assignments. Students have an opportunity to simulate meetings with clients and negotiations with colleagues in the Spanish language. A portion of class time is devoted to comparative analysis of the legal concepts raised in the assignments.

LAW 6750 Professional Responsibility (3). This course will examine the law of professional responsibility, including professionalism issues and malpractice risk management, with significant emphasis on the rules of ethics governing lawyers and judges. The objective is to give students an appreciation for the challenges they will face as practitioners, and a working knowledge of the

principles of professionalism and the ethics rules that they will use in their daily practices.

LAW 6754 Professionalism, Ethics, and the Legal Profession (1-2). To enhance a law student's understanding of the legal profession and of its standards by exposing them to relevant lectures on professionalism, ethics, and the legal profession. Prerequisite: Recommended - Professional Responsibility.

LAW 7942 Prosecution Innocence Project (2). The prosecution innocence project (PIP) is a one semester, two credit experiential learning course that provides an opportunity for students to participate in a thorough and actual review of the prosecution file, including arrest and booking reports, general offense reports, supplemental reports, witness statements, law enforcement interviews, jail calls, 911 calls, lab reports, depositions, photographs, and any other items of note. Students will develop an understanding of the many components of criminal investigation and trial and post-conviction proceedings and hone research and writing skills, as they write legal memoranda on a variety of subjects including competency of counsel, forensic science, Brady/Giglio evidence, legalities of police investigations, and post-conviction remedies.

JRM 6120 Public Health and The Law (3). This course introduces the student to the regulation of health professionals practicing in Florida. In particular, the course examines the different ways the law governs regulated and self-regulated conduct within the Florida health care system. Prerequisite: Juris Master students only.

LAW 6260 Public International Law (2-3). This course explores advanced issues of international law. The goal is to understand how international law operates in practice. Special attention will be devoted to the acceptance and application of international law by United States courts. Topics include the process of international dispute resolution, the application of domestic law extraterritorially, state responsibility to aliens and foreign investors, and sovereign immunity.

LAW 6234 Race and the Law (2-3). This course will consider contemporary theories of law and questions of racial justice, including the relationship between developments in the social sciences on the nature of race, racism, prejudice and discrimination, and the interpretation of constitutional and statutory protections against racial discrimination.

JRM 6030 Real Estate Law (3). This course takes an interdisciplinary and practice-oriented approach to real estate transactions, covering land transfers, mortgage law, and selected topics such as usury and mechanics' liens. Students will study selected tax, environmental and federal securities laws issues in the context of real estate transactions. Prerequisite: Juris Master students only

LAW 6426 Real Estate Transactions (2-3). This course takes an interdisciplinary and practice-oriented approach to real estate transactions, covering land transfers, mortgage law, and selected topics such as usury and mechanics' liens. Students will study selected tax, environmental and federal securities laws issues in the context of real estate transactions.

LAW 6267 Refugee and Asylum Law (2-3). This course will examine international and domestic refugee and

asylum law. Close attention will be paid to the definition of "refugee" in international conventions and under U.S. law, with emphasis on such topics as: what constitutes persecution, what forms of persecution support an asylum claim, and what conduct renders an applicant ineligible for asylum. The course will also analyze overseas refugee processing and procedure for adjudicating asylum claims in the U.S.

JRM 6100 Regulations of Medical Institutions (4). This course, the complement of LAW 6863 Public Health and the Law, introduces the business and human resources professional to the regulation of hospitals and medical facilities. The course focuses on some of the practical problems arising in the context of health care regulation and compliance. Prerequisite: Juris Master students only.

LAW 6305 Remedies (3). The course focuses upon the nature and scope of relief that a court may grant a party who has established a substantive right. Topics include judicial remedies such as damages in tort and contract cases, restitution, punitive remedies, declaratory relief, and coercive remedies in equity.

JRM 6543 Remedies in the Workplace (3). This course, designed for the business and human resources professional, provides an overview of the workers' compensation laws that protect people injured or disabled on the job. The same laws ensure that the families of workers killed due to work-related accidents or illnesses are provided with benefits. Prerequisite: Juris Master students only.

LAW 6010 Sales (2-3). This course covers contracts for the sale of goods under Article 2 of the Uniform Commercial Code. Some consideration will also be given to leasing of goods under Article 2A of the Code.

LAW 6051 Secured Transactions (2-3). This course covers the creation, perfection, and enforcement of security interests in personal property under Article 9 of the Uniform Commercial Code, including priorities among conflicting interests in the same property and choice of law problems. Some discussion of bankruptcy law as it affects the interests of secured creditors may also be included.

LAW 6561 Securities Law Enforcement (2-3). Course is designed to the study of federal statutes, case law, and regulations, which are designed to protect investors from fraud. Prerequisites: Securities Regulations, and The Law of Corporate Finance. Corequisite: Business Organizations.

LAW 6560 Securities Regulation (2-3). This course is a comprehensive survey of the statutes and regulations governing the distribution of securities, trading of securities on the stock exchanges and over-the-counter markets, the regulation of broker-dealers, and the growing role of institutional investors. Primary focus is placed upon the Securities Act of 1933 and the Securities Act of 1934, with limited attention to state "Blue Sky" securities legislation. Prerequisite: Business Organizations.

LAW 6947 Semester in Practice Program (8-12). The semester-in-practice practicum is a full-time immersion course providing third and fourth year students with full time practical experience for an entire semester in an off site externship. Prerequisites: above 60 credits, cumulative GPA of 3.10, and Professional Responsibility. Corequisite: Professional responsibility.

LAW 6936 Seminars (2-3). Seminars provide an opportunity for intensive analysis of legal and policy issues in a specialized area of study, culminating in a major research paper or a series of shorter papers. They require a considerable investment of time by students and faculty, and a corresponding responsibility for thorough preparation and participation by all members of the seminar. Some seminars may also include a final examination.

LAW 7930 Special Topics in Law (2-3). The content of this course varies. It may include topics of current interest or not covered by other curricular offerings. The course may be repeated if there is no duplication of subject matter.

LAW 7844 Sports and Entertainment Law (3). This course will focus on the application of various legal doctrines to sports activities, and the various complex contractual issues facing attorneys representing clients in the entertainment industry. Representative topics include regulation of amateur athletics, public regulation of sports activities, legal relationships and structures in professional sports, legal issues involved in representation of professional athletes, and issues arising in the production, distribution and exploitation of theatrical film and television properties and in the music industry.

LAW 6480 Sports Law (2-3). This course will focus on the application of various legal doctrines to sports activities. Representative topics include regulation of amateur athletics, public regulation of sports activities, legal relationships and structures in professional sports, and legal issues involved in representation of professional athletes.

LAW 7660 Tax Policy (2-3). This course will evaluate topics such as the choice of a tax base (income or consumption), rate structure (flat or progressive), taxable unit (individual or family), and method of government spending (direct or through the tax system via tax expenditures) against the tax policy norms of equity, efficiency, and administrability to determine how well the present tax system satisfies these norms. Prerequisites: Federal Income Tax; Corporate and Partnership Tax.

LAW 6585 Telecommunications Law (2-3). This course introduces the regulation of the telecommunications industry. Once dominated by a single, highly regulated producer (AT&T), the industry is now among the most dynamic in the nation. The course will analyze and assess rules promulgated by Congress and the Federal Communications Commission that seek to transform existing monopoly markets into competitive industries.

JRM 6700 Torts and Criminal Wrongs (3). This course introduces and explores the basis for civil and criminal liability, including the liability for negligence for intentional wrongs, and for liability without fault (strict liability). Doctrines covered include duty, breach of duty, causation, damages, and defenses, as well as elements of and defenses to criminal liability in the compliance context. Prerequisite: Juris Master students only.

LAW 6473 Toxic and Environmental Tort Litigation (2-3). This course examines tort litigation, both substantively and procedurally, arising from environmental exposure to toxic substances, with emphasis on the legal theories available (e.g., nuisance, trespass, strict liability, and

negligence) and the issues that present unusual challenges in such litigation for both the parties and the legal system (e.g., causation, expert testimony, damages, and statutes of limitations).

LAW 6576 Trademarks and Geographical Indications (2-3). This course will introduce students to the law of trademarks and unfair competition. Trademark law aims to protect against consumer confusion and the appropriation of commercial goodwill. Trademarks can have tremendous value in a variety of industries, ranging from food and agriculture to fashion and entertainment. Students will learn about acquiring, prosecuting, and enforcing trademark rights in the business context. In addition, the course will cover the theoretical underpinnings of trademark protection and evaluate current issues related to trademark law domestically and internationally. This includes a consideration of the relationship between trademarks and geographical indications. No technical background is required for this course. Intellectual Property Law is recommended but not required.

LAW 6034 Transnational Commercial Law (1-4). This course offers an overview of three foundational areas in the field of commercial law: sales, payment systems and negotiable instruments. It presents the student with the core doctrines and issues relating to the Uniform Commercial Code in the United States. As such, it complements the basic series of commercial law courses in U.S. law schools. Additionally, the materials introduce the student to the Spanish law in all these same areas. Spanish doctrines and relevant issues are presented in tandem with the U.S. legal materials. Comparing and contrasting the two systems offers the student greater insight into the choices, interests and policies pursued under each respective system of law. Additionally, the course will examine the European Union's proposed regime for unified rules of commercial law across the Continent. Drawing on different sets of both unified and national rules in this area of law, this course presents a truly transnational view of the field of commercial law and its underlying concerns.

LAW 7225 Transnational Disputes: Practicing Law in the Era of Globalization (3). This course is designed to prepare future lawyers to deepen their knowledge and develop effective strategies to defend and litigate/arbitrate disputes involving multiple jurisdiction and issues. The successful 21st century lawyer can no longer practice in a jurisdictional silo. A dispute in one part of the world can have long-lasting repercussions on an individual, company, or state thousands of miles away. In today's legal market, clients expect—and demand—that their attorneys be familiar with legal processes and laws throughout the world, and that they possess the skills necessary to develop an effective strategy to defend and litigate their interests at any time and place. In short, a successful 21st century lawyer must know how to handle and successfully resolve international disputes. This course is designed to prepare students for this reality.

LAW 6809 Transnational Representation and Advocacy (3). This course will provide students the opportunity to hone their research, writing and advocacy skills in the realm of transnational dispute resolution from the perspective of the advocate. The course will examine the different substantive and procedural legal frameworks available in a variety of transnational fora, including

international courts, arbitral tribunals, inter-governmental entities, special commissions, and national courts. The course will also consider the most effective techniques for researching and drafting memoranda, briefs and pleadings before foreign and international tribunals; and will help the students to become effective oral advocates both in the context of international student competitions and their future professional careers. Finally, the course will stress the importance of professional ethics and discuss the challenges faced by legal professionals in that respect. This course has no co-requisites or pre-requisites.

LAW 7951 Trial Advocacy Competition (2). Students selected as members of the Board of Advocates Trial Advocacy Group will compete in a regional, national, or international trial advocacy competition and will earn credit for satisfactory completion of their competition duties. Students, working in a team, will typically prepare for and participate in a trial, which typically will include the delivery of an opening statement, the examination of witnesses, the introduction of evidence, and the delivery of a closing statement.

LAW 6363 Trial Advocacy (2-3). The focus of this course is on trial tactics and techniques. All students participate as counsel and perform the assignments. All phases of an actual trial are examined, including direct and cross-examination of witnesses, and opening and closing arguments. Co-requisite: Evidence.

LAW 7200 United States Law I: Methods, Sources, and Structure (2-3). This course introduces graduate students to the United States legal system. It covers fundamental aspects of legal analysis and argumentation, the sources of law, the reading of cases and statutes in the common law tradition, and the structure of the legal system in the United States today. It addresses general approaches to constructing legal arguments, the use of primary and secondary sources in the United States, the development of United States law, the role and function of various institutions in the context of federalism, the legal process, the legal profession, and legislative and administrative developments.

LAW 7804 United States Law II: Scholarship and Perspectives (2-3). This course introduces graduate law students to scholarly and theoretical techniques and approaches used in the United States to understand law. It covers basic aspects of academic and scholarly writing in law, perspectives on law from different theoretical schools, and the tools that legal academics use in thinking about and writing about law. The course will survey different kinds of academic writing, with emphasis on the law review article. It will also discuss sociological jurisprudence, legal realism, law and economics, and critical legal studies.

LAW 6492 Water Resources Law (2). Water Resources Law will explore water's distinctive character as property that is both public and private, and individual and common. The course will begin with an overview survey of the general legal issues regarding historic water allocation and information regarding current water uses in the United States. First we will study the Riparian system of allocation. We will conclude that study with an examination of water resource issues facing Florida. We will then examine western prior appropriation systems. We will also conclude that study by examining the dispute among

users of the Colorado River. We will conclude the course by studying issues related to groundwater and the impact of the Clean Water Act on water resources. Prerequisites: None, although Environmental and Administrative Law is helpful.

LAW 6116 White Collar Crime (2-3). Using the vehicle of federal investigation and prosecution of white-collar crime, this course will explore the interplay of different fields of law and of legal standards and administrative discretion — features common to many types of transactional practice. The materials considered will be chosen from the fields of substantive criminal law, criminal procedure, sentencing, administrative law, evidence, corporate law, and professional responsibility. Topics considered will include entity criminal liability, substantive federal crimes (e.g., mail fraud and RICO), grand jury investigations, administrative agency subpoena authority, parallel civil and criminal proceedings, application of the self-incrimination and lawyer-client privileges, federal sentencing guidelines (for individuals and entities) and forfeitures. Considerable attention will be given to Department of Justice policies and strategies utilized by counsel representing witnesses, targets, and defendants. Prerequisite: Criminal Procedure.

LAW 6430 Wills and Trusts (3-4). The intergenerational transfer of wealth in the United States is controlled by both statutory and common law principles. Competing views of the individual's freedom of disposition and state power both to channel and to tax property have led to an interesting and complex array of legal devices and institutions. These include statutory intestacy and elective share provisions, wills, and trusts. Related topics to be addressed will include planning for incapacity, future interests in property, powers of appointment, life insurance, and introductory aspects of trust and estate administration.

LAW 6235 Women and the Law (2-3). The course considers the legal treatment of sex differences in the construction and legitimization of the social status of women and men. Topics include rape, sexual harassment, incest, battery, sexuality, economic segregation, prostitution, and pornography. Central concerns to be pursued include the desirability of sex-neutral legislation and adjudication, the meaning for women of the legal distinction between the public and private spheres, competing theories of the origins of sex roles, and the differences between and similarities of traditional morality and a feminist critique of power.

LAW 6236 Women and the Law: Comparative and Global Considerations (3). The course will consider the role of law in the lives of women from global and comparative perspectives. Topical coverage will include the role of international law on the lives of women by considering certain UN conventions relating to the status of women, as well as with respect to certain global issues which affect the lives of women in a particular sense (e.g., immigration policies and practices, including asylum and refugee law, and human trafficking). The comparative law component will consider and compare legal approaches to matters relating to women's private and domestic life choices and options, such as laws relating to family law, reproduction, and wage and labor gender-based disparities.

LAW 7955 World Arbitration and Mediation Review (2). This course offers law students an opportunity to engage in research, writing, editing, and publishing scholarly works in the fields of domestic and international arbitration and mediation.

LAW 6705 Worker's Compensation (2-3). This course surveys the statutory no-fault insurance system that displaces tort law in the workplace. Class discussion will center on the scope of coverage and benefits under compensation legislation.

<i>Teaching and Learning</i>	Samantha Lemus-Martinez

Mission Statement

The Herbert Wertheim College of Medicine develops highly qualified, community-engaged, socially accountable health care professionals, and serves our region, our nation, and the greater world through transformative translational research, medical education, and clinical programs that drive forward innovations in health care.

History

Florida International University (FIU) Herbert Wertheim College of Medicine (HWCOC) was established in response to a community need for access to medical education and a regional need to address a shortage of physicians. A proposal for a college of medicine at FIU was presented to the Board of Regents on July 5, 2004; the decision was postponed, and later that year the Board of Regents was dissolved by the Governor and replaced by the Board of Governors.

The university continued to build its case for a medical school based on the need for greater access to medical education and patient care, and on the need to reduce health disparities in the community. In November 2005, the Board of Governors heard FIU presentations for the creation of a new medical school in Florida. In March

2006, the South Florida community was awarded a public college of medicine at FIU in Miami. Founding faculty members were recruited, and in February 2008 the Liaison Committee on Medical Education (LCME) conferred preliminary accreditation on the college's Doctor of Medicine degree program. The college accepted its first class of future doctors in fall 2009. Full accreditation was granted in February 2013, and the first cohort of students graduated in April 2013.

Doctor of Medicine (MD) Degree

The Doctor of Medicine (MD) degree program prepares students for advancement into postgraduate study and for the practice of medicine in any medical specialty or primary care area. In addition to required courses and clerkships, the MD degree program requires demonstrated achievement of general competencies required for beginning a residency program, passing of Step 1 and Step 2 Clinical Knowledge of the United States Medical Licensing Examination, consistent display of professional behaviors and values appropriate for the practice of medicine, and recommendation from the Medical Student Evaluation and Promotion Committee and the HWCOC Dean.

The curriculum is divided into four successive periods of study, with foundations in basic medical science, clinical science, clinical skills, professionalism, and social accountability. Service learning is a major component of the program, occurring through the college's Green Family Foundation Neighborhood Health Education Learning Program (NeighborhoodHELP) and other health care delivery service opportunities. The college has formal affiliations with health care providers in the community, providing settings for supervised clinical practice learning. Among these affiliations are Baptist Health South Florida, Broward Health, Citrus Health Network, Cleveland Clinic Florida, Good Samaritan Medical Center, Jackson Health System (Public Health Trust), Leon Medical Centers, Memorial Healthcare System, Nicklaus Children's Hospital, Mount Sinai Medical Center, Palmetto General Hospital, Miami VA Healthcare System, South Florida Evaluation and Treatment Center, and several ambulatory health care clinics.

For additional information on program requirements for the MD degree, visit the HWCOC website at <http://medicine.fiu.edu/education/md/>.

Admission

HWCOC participates in the American Medical College Application Service (AMCAS) application process (see <https://www.aamc.org/students/applying/amcas>).

Applications verified by AMCAS are the first step in the HWCOC applicant screening process. Following receipt and verification of the AMCAS application and its data, each applicant is invited to complete the HWCOC Secondary Application. A \$30 nonrefundable application fee is required with submission of the HWCOC Secondary Application. The HWCOC Secondary Application provides additional insight into the applicant, exploring the applicant's interest in medicine, and suitability for HWCOC. Applicants are invited for interviews based on academic factors and nonacademic factors, such as personal experience in several of the following:

clinical/patient care exposure, research, commitment to service, leadership, and other enriching qualities.

After the interview, the completed file is reviewed by the Admissions Committee. The Admissions Committee then votes to determine the admission status of the applicant. HWCOC maintains an active waitlist until the first day of Orientation.

Coursework Requirements

Total Credits: 189

Period 1 (37 credits)

BMS 6001	Genes, Molecules, and Cells	6
BMS 6015	Clinical Skills I	5
BMS 6100	Structure of the Human Body	4
BMS 6400	Pharmacology	4
BMS 6500	Integrated Functions of the Human Body	5
BMS 6603	Pathology and Infectious Disease	6
BMS 6820	Medical Jurisprudence	1
BMS 6826	Ethical Foundation of Medicine	1
BMS 6827	Foundations for the Community-Engaged Physician	2
BMS 6880	Clinical Epidemiology and Quantitative Research	2
BMS 6891	Professional Behavior I	1

Period 2 (54 credits)

BMS 6016	Clinical Skills II	8
BMS 6064	End of Life Care	1
BMS 6066	Evidence-Based Medicine & Complimentary and Integrative Medicine	1
BMS 6067	System Based Practice	2
BMS 6071	Community-Engaged Physician I	5
BMS 6631	Hematopoietic and Lymphoreticular Systems	3
BMS 6632	Endocrine System	3
BMS 6633	Cardiovascular and Respiratory Systems	6
BMS 6634	Gastrointestinal System and Medical Nutrition	4
BMS 6635	Musculoskeletal Systems	3
BMS 6636	Nervous System and Behavior I	6
BMS 6637	Reproductive System	3
BMS 6638	Renal System	3
BMS 6643	Integumentary System: The Skin	2
BMS 6840	Nervous System and Behavior II	3
BMS 6892	Professional Behavior II	1

Period 3 (59 credits)

BMS 7810	Core Concepts in Medicine	3
MDC 6102	Community-Engaged Physician II	1
MDC 7120	Family Medicine Clerkship	9
MDC 7180	Obstetrics and Gynecology Clerkship	7
MDC 7200	Internal Medicine Clerkship	9
MDC 7400	Pediatrics Clerkship	7
MDC 7600	Surgery Clerkship	9
MDC 7760	Radiology Clerkship	2
MDC 7800	Neurology Clerkship	5
MDC 7830	Psychiatry Clerkship	7

Period 4 (39 credits)

MDC 6103	Community-Engaged Physician III	1
MDC 7124	Geriatrics	2
MDE 7059	Community Medicine Practicum	1
MDE 7067	Professional Development and Clinical Medicine Capstone	2
MDR 7910	Research Scholarship	9

MDS 7XXX	Selective (Medicine, Surgery, or Hospital-Based Specialty)	4
MDS 7XXX	Selective (Medicine, Surgery, or Hospital-Based Specialty)	4
MDI 7XXX	Subinternship	4
MDS 7710	Emergency Medicine Selective	4
MDE 7XXX	Clinical Elective	4
MDE 7XXX	Clinical Elective	4

*The number of credits during Period 3 and Period 4 will depend on when student takes MDC 7800 Neurology Clerkship.

Green Family Foundation NeighborhoodHELP

HWCOC, in collaboration with community partners and other FIU colleges, established NeighborhoodHELP as a novel component of medical education; the program aims to improve health outcomes and train future members of the health care workforce to be socially accountable. Through this service-learning experience, students develop an understanding of the social determinants of health, of interprofessional practice, and of important aspects of health systems science. Teams of students, faculty, and outreach workers strive to address the social and health care needs of household members living in medically underserved neighborhoods in South Florida. After being introduced to important concepts including interprofessional practice, health disparities, and health equity in their first year, medical students then join an interprofessional team for their last three years. These interprofessional teams may include FIU nursing, social work, physician assistant, public health, law, and education students in addition to medical students. Teams apply concepts learned in the classroom during regular visits to these communities, developing individualized and comprehensive plans to improve the health and quality of life of the household members served. Students, supervised by interprofessional faculty, assess, respond to, and collaborate with assigned households to address health issues. Staffed by primary care providers, the program provides integrated primary and behavioral health care in fully equipped mobile health centers stationed in the designated neighborhoods. It also runs a mobile mammography screening program. Through participation in NeighborhoodHELP, students develop cultural humility by helping to address the complex medical, social, and behavioral health needs experienced by diverse patients in dynamic communities.

Clinical Services: FIU Health Care Network (FIU Health)

FIU Health Care Network (branded FIU Health) is the management service organization that manages the university's health system and faculty group practice. FIU Health supports the education and service missions of FIU and HWCOC and provides primary and specialty care services to the community through an integrated, team-based approach.

Research: Biomedical and Clinical

Research universities, and medical schools in particular, perform basic medical research that leads to breakthroughs in detection, diagnosis, treatment, and eradication of disease and other health problems. FIU scientists conduct important disease-related research.

One of the objectives of the research program is to foster synergy between teaching, clinical practice, and basic/translational research. FIU medical students are aware of the latest medical developments and work alongside renowned researchers to develop research skills.

The college's internationally recognized scientists, all with substantial research funding, are developing major research programs in basic, translational, and clinical research in glycobiology, environmental science and toxicology, genomic and molecular medicine, immunology and nanotechnology, cancer biology, behavioral health and health disparities and population health.

Master in Physician Assistant Studies

The Master in Physician Assistant Studies (MPAS) program is designed to provide a broad, interdisciplinary education that prepares students for collaborative medical practice as physician assistants. By utilizing the expertise of HWCOP physician and physician assistant faculty members, core knowledge and information is provided to students.

The 27-month curriculum differentiates itself from other graduate programs at FIU by training students to serve South Florida's diverse population through a patient-centered curriculum that emphasizes medical and cultural competence. The educational program occurs in a medical school environment and educates students in basic science and clinical science. The program is divided into two phases, didactic and clinical; the duration of the didactic phase is 15 months, and the duration of the clinical phase is 12 months. During the second phase of the program, students participate in supervised clinical rotations. Students are required to complete supervised clinical experiences in emergency medicine, family medicine, internal medicine, pediatrics, psychiatry, obstetrics and gynecology, and surgery. Students also must complete an elective. Rotation sites may vary in schedule, expectations, and assignments.

Admission Requirements

The MPAS program adheres to the general admission procedures outlined by the FIU University Graduate School (UGS). Completed applications are evaluated by an Admissions Committee designated by the program director, who is appointed by the HWCOP Dean. In addition, applicants must meet the following criteria for admission to the master's program:

1. Hold a Bachelor's degree or its equivalent from an accredited college or university. Baccalaureate degrees must be completed by the spring semester prior to matriculation;
2. Earn overall upper division and upper division science grade point averages (GPAs) of at least 3.0 (on a 4-point scale);
3. Complete all prerequisite courses within 7 years of the application deadline. All prerequisite courses must be completed by the application deadline (i.e., courses completed after the application deadline will not be acknowledged). Applicants must earn grades of "C" or higher in all prerequisite courses.
4. Submit official Graduate Record Examination (GRE) scores. Scores must be dated within 5 years of the application deadline. Scores should be sent by the Educational Testing Service directly to the Central

Application Service for Physician Assistants, code 0554;

5. Submit three letters of recommendation from physicians, physician assistants, nurse practitioners, professors, or any individual with whom the applicant has worked in a professional or educational environment;
6. For international graduate student applicants whose native language is not English, a total score of 80 on the internet-based Test of English as a Foreign Language (TOEFL) (equivalent to a total score of 550 on the paper-based TOEFL) or 6.5 overall on the International English Language Testing System (IELTS) is required.

Graduation Requirements

To be awarded a Master in Physician Assistant Studies degree, each student must:

1. Pass each required course/rotation with a grade of "C" (75%) or higher and maintain an overall GPA of 3.0;
 - a. Pass summative written and practical examinations;
2. Complete a minimum of 92 credits
3. Submit and obtain faculty endorsement of a signature paper/capstone project;
4. Complete the Physician Assistant Clinical Knowledge Rating and Assessment Test (PACKRAT) for self-assessment;
5. Comply with program standards of conduct and guidelines for ethical conduct;
6. Complete the program's Physician Assistant Board Review Course.

Course Requirements (92 credits)

Fall Semester 1 (14 credits)

PAS 6022	Gross Anatomy	4
PAS 6014	Physiology I	3
PAS 6040	Clinical Assessment I	3
PAS 6184	Medical Microbiology and Infectious Disease	4

Spring Semester 2 (17 credits)

PAS 6031	Clinical Skills I	2
PAS 6015	Physiology II	3
PAS 6011	Clinical Medicine I	3
PAS 6023	Pharmacology in Disease Pathology I	2
PAS 6090	Clinical Application of Evidence-Based Practice I	3
PAS 6041	Clinical Assessment II	2
PAS 6016	Integration into Clinical Concepts I	2

Summer Semester 3 (7 credits)

PAS 6012	Clinical Medicine II	3
PAS 6026	Pharmacology in Disease Pathology II	2
PAS 6017	Integration into Clinical Concepts II	2

Fall Semester 4 (13 credits)

PAS 6032	Clinical Skills II	1
PAS 6033	Clinical Medicine III	3
PAS 6050	The Role of PA in American Health Care	3
PAS 6005	Human Behavior	2
PAS 6018	Integration into Clinical Concepts III	2
PAS 6091	Clinical Application of Evidence-Based Practice II	2

Clinical Year Rotations (36 credits)

PAS 6103	Internal Medicine Clerkship	6
----------	-----------------------------	---

PAS 6400	Family Medicine Clerkship	8
PAS 6200	Surgery Clerkship	6
PAS 6500	Obstetrics/Gynecology Clerkship	3
PAS 6300	Pediatric Clerkship	6
PAS 6600	Emergency Medicine Clerkship	4
PAS 6125	Psychiatry Clerkship	3

Elective Clinical Rotations (5 credits minimum)

PAS 6185	Geriatric Medicine Clerkship	4
PAS 6940	Elective Clinical Clerkship	Variable

PhD in Biomedical Sciences

Approved by the Board of Governors of the State University System of Florida in January 2012 and admitting students since August 2012, the PhD in Biomedical Sciences program at HWCOC provides a curriculum different than that of other FIU colleges. A distinctive feature of this program is that both graduate students and medical students sit side-by-side in some courses in the introductory basic sciences portion of the medical curriculum, providing graduate students with an appreciation of the medical aspects of modern biosciences. The program equips graduate students with the ability to apply research skills from bench to bedside and to translate fundamental discoveries into new treatments for human diseases.

Admission Requirements

The PhD in Biomedical Sciences program at HWCOC adheres to the general admission procedures outlined by the FIU University Graduate School (UGS). Completed applications are evaluated by an Admissions Committee. Each applicant must meet the following minimum requirements to be considered for admission:

1. Hold a Bachelor's degree in a relevant discipline from an accredited college or university;
2. Earn a GPA of at least 3.0 (on a 4-point scale) during the last 60 credits of an accredited undergraduate degree or an earned graduate degree;
3. Submit official transcripts from all colleges or universities attended;
4. Submit official GRE scores;
5. Submit a minimum of three letters of recommendation from undergraduate or research advisors. Strong unequivocal letters attesting to the applicant's educational background, motivation, analytical skills, and promise as a research scientist are important considerations;
6. Submit curriculum vitae and a statement of purpose highlighting future goals after obtaining the PhD degree;
7. International graduate student applicants whose native language is not English are required to submit a score for the TOEFL or for the IELTS. A total score of 80 on the internet-based TOEFL or 6.5 overall on the IELTS is required.

Degree Requirements

The PhD in Biomedical Sciences requires a minimum of 81 post-baccalaureate credits, of which at least 24 credits are allocated for dissertation research. Students are required to maintain a cumulative GPA of 3.0 or higher.

Coursework Requirements**Mandatory Courses**

GMS 6103	Molecular Microbiology and Infectious Diseases	3
GMS 6220	Molecular Genetics and Cellular Biology	6
GMS 6481	Physiology and Immunology	4
GMS 6605	Basic Structure of the Human Body	3-4
GMS 6864	Principles of Clinical Epidemiology and Biostatistics	2
GMS 6939	Graduate Seminar	1
GMS 6940	Supervised Teaching in Biomedical Science	1
GMS 6942	Laboratory Rotations	1
GMS 6961	Qualifying Examination	5
GMS 6962	Formation of Committee: Appointment of Dissertation Committee: Preliminary Proposal	1
GMS 6963	Doctoral Dissertation Proposal	3
GMS 6964	Dissertation Proposal Seminar	1
GMS 6979	Research Credits	1-10
GMS 7980	Dissertation Research Credits	1-10
GMS 7981	Dissertation Defense Seminar	1

Elective Choices* (5 credits minimum)

BME 6545	Biosensors and Nanobioelectronics	3
BSC 5459	Advanced Bioinformatics for Biologists	3
CGS 5166	Introduction to Bioinformatics Tools	2
CHM 5305	Graduate Biological Chemistry	3
CHM 6088	Environmental Chemistry of Trace Elements	3
CHM 6382	Advanced Biological Chemistry	3
GMS 6300	General Pathology	4
GMS 6500	Basic Pharmacology	4
GMS 6904	Introduction to Scientific Writing	3

**This is not a complete list of possible elective courses. The dissertation advisor or the Dissertation Advisory Committee, at their discretion, may suggest potential electives that are described in this Graduate Catalog.*

Laboratory Rotations

Newly matriculating students perform research rotations in a minimum of three different faculty laboratories for 4 to 6 weeks each. Students choose faculty laboratories with the consent of those faculty members. The purpose of the rotations is threefold. First, each rotation period provides the student with an opportunity to evaluate the faculty member and laboratory. Second, the rotation provides the faculty member with an opportunity to evaluate the student. Third, rotations in diverse laboratories expose the student to a variety of methodologies and concepts. The rotation experience is an approved course (GMS 6942) with credit, and students receive a pass or fail grade based on an average of the evaluations of the three participating faculty members. Before beginning a rotation, students should discuss with the faculty member the expectations of the rotation and evaluation procedures. In the event that the student cannot make a decision on a major advisor after three rotations, or if a faculty member will not agree to be the student's supervisor, a fourth rotation is allowed. This requirement is waived if a student is supported by a grant or an external fellowship.

Supervised Teaching in Biomedical Science

Graduate students are required to register for one credit of GMS 6940 (Supervised Teaching) each semester they

serve as teaching assistants. This requirement is waived if a student is supported by a grant or an external fellowship.

Graduate Seminar

Graduate students are required to register for one credit of GMS 6939 (Graduate Seminar).

Research Credits

Graduate students are required to complete at least 10 credits of GMS 6979 (Research Credits) involving research conducted in the PhD advisor's laboratory.

Qualifying Examination

Students take a qualifying exam soon after completion of mandatory courses. The qualifying exam consists of two parts:

- Part I: The student submits a comprehensive review on a topic chosen by the Dissertation Advisory Committee (DAC);
- Part II: Oral defense of the entire comprehensive review paper submitted by the student.

Doctoral Dissertation Proposal

After completion of the qualifying examination, a student must submit to DAC a doctoral dissertation proposal in the format for an AHA, National Institutes of Health (NIH), or National Science Foundation (NSF) predoctoral fellowship application.

Dissertation Proposal Seminar

A seminar based on the student's proposal is presented and graded by the dissertation committee. The formal admission to PhD candidacy occurs when the student successfully completes required courses and passes the qualifying exam, prepares a formal dissertation proposal, and successfully defends the content of the proposal before his or her advisory committee. Immediately following the proposal defense, the student's dissertation committee votes to admit the student to candidacy, to have the student resubmit the proposal within 6 months, or to dismiss the student from the PhD program. A student can only resubmit his or her proposal once. The dissertation committee should comprise at least five members, at least three of whom should be HWCOC graduate program faculty and at least one who is not a member of the HWCOC faculty and who holds a graduate faculty appointment.

Dissertation Research Credits

At least 24 credits of GMS 7980 (Dissertation Research) are to be taken after the student has advanced to candidacy.

Elective Course Requirement

Students must complete their elective requirements (5-credits minimum) before submitting their dissertations.

Dissertation and Dissertation Defense Seminar

The DAC approves the major goals of a student's research project, monitors progress of student performance, and approves a target date for the dissertation defense. A prerequisite for the dissertation defense is publication or submission of peer-reviewed papers. It is expected that the student will be first or senior author on at least one of the peer-reviewed publications.

The format of the dissertation should follow UGS guidelines. The dissertation defense takes place after the dissertation is submitted in a final form and approved by the DAC. Changes recommended at the time of the defense may be incorporated subsequently. The dissertation should be submitted to the DAC at least 4 weeks prior to the expected defense date to permit the members adequate opportunity for review. Review of the dissertation by an outside reviewer is encouraged. The defense of the dissertation is governed by the regulations established by the UGS. The dissertation defense includes a public seminar followed by defense of the dissertation to the DAC in closed session. Following the examination, the DAC evaluates the performance in the candidate's absence and votes to pass or fail the candidate. The record of the vote is recorded on the FIU UGS Defense of Dissertation Results form and submitted to the UGS office.

Combined MD and Professional MBA Degree in Healthcare Management Pathway

HWCOC medical students in the third period of medical study may apply to the Masters of Business Administration (MBA) program. Each college (HWCOC and the College of Business) independently reviews and admits applicants to its programs. Only students admitted to both programs are permitted to enroll in classes in the combined degree pathway.

Combined degree pathway students complete the first 3 years of coursework in the MD degree program at HWCOC. At the beginning of the fourth period of study of the MD degree program curriculum, students admitted to the combined degree pathway pause their medical studies and begin classes as part of the MBA program. Classes in the MBA program are taken during the fall and spring semesters of the medical student's fourth year of study. During this time, students complete 33 hours of course work in the MBA program. Nine credits taken through HWCOC count toward the 42 credits required for the MBA degree. Students also must complete three program residencies (face-to-face or online). At the beginning of the fifth year, students resume study in Period 4 of the MD degree program curriculum. Students who successfully complete all requirements graduate with both degrees at the end of the 5 years.

Admissions Process:

To apply for admission to the combined MD and Professional MBA in Healthcare Management pathway, medical students in the summer or fall of their third year (prior to November 1) must be in good academic standing and must receive approval from the Medical Student Evaluation and Promotion Committee, the HWCOC Office of Student Affairs, and the HWCOC Office of Academic Affairs. Applications are reviewed by the program admission committee. Applicants to the combined degree pathway are not required to submit standardized test scores, but must have a minimum GPA of 3.0; applicants also are required to have completed 2 years of experience, which includes volunteering, internships or clerkships, and any full- or part-time employment.

Combined MD and MPH -major in Epidemiology Pathway

The Herbert Wertheim College of Medicine (HWCOC) and the Robert Stempel College of Public Health and Social Work (Stempel College) offer a combined degree pathway of a Master's of Public Health with a concentration in Epidemiology and a Doctor of Medicine.

An MPH is a professional public health degree emphasizing the understanding of population health and disease. The MD degree is a clinical medicine degree focusing on patient-centered clinical care.

Students may apply to the combined pathway in their third year of medical study. Each College will independently review and admit applicants to their programs. Only students admitted to both programs will enroll in classes in the combined pathway. Students will be expected to complete 45 credits for the MPH and all requirements for the MD degree.

Combined degree pathway students complete the first three years of coursework in the MD degree program at HWCOC. At the beginning of the fourth period of study of the MD degree program curriculum, students admitted to the combined degree pathway pause their medical studies and begin classes as part of the MPH program. Classes in the MPH program are taken during the fall, spring and summer semesters of the medical student's fourth year of study. During this time, students complete 36 hours of course work in the MPH program. Nine credits taken through HWCOC count toward the 45 credits required for the MPH degree.

At the beginning of the fifth year, students resume study in Period 4 of the MD degree program curriculum. Students who successfully complete all requirements graduate with both degrees at the end of the 5 years.

Admissions Process:

Medical students in the summer or fall of their third (M3) year (prior to November 1st) must make a formal application to the COM MPH Application Committee.

This application will include a personal statement. They must also get approval from the MSEPC and the Executive Associate Dean for Academic Affairs prior to applying to the MPH program.

Applications will only then be reviewed by the MPH - Epidemiology program admission committee. Applicants to the combined MD/MPH pathway will not be required to submit GRE scores. MCAT scores will be accepted.

Doctorate of Medicine/ Master of Science in Health Informatics and Analytics (MD/MSHIA) Combined Degree Pathway

The Herbert Wertheim College of Medicine (HWCOC) and the Master of Science in Health Informatics and Analytics (MSHIA) program in the Alvah H. Chapman Jr. Graduate School of Business at Florida International University have a combined degree pathway culminating in both a Doctorate of Medicine (MD) and a Master of Science in Health Informatics (MSHIA). Under the combined degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Important criteria relating to the joint degree pathway are as follows:

1. HWCOC Medical students in their third year of medical study may apply to the MSHIA program.

Each college (College of Medicine and College of Business) will independently review and admit applicants to their programs. Only students admitted to both programs will enroll in classes in the combined program.

2. Combined degree pathway students will complete the first three years of coursework in the College of Medicine. Then, beginning in the fourth year, students in the combined pathway will interrupt their medical studies and begin classes for the MSHIA program. Classes in the MSHIA program will be taken during fall, spring and summer semesters of the fourth year. During this time students will complete 27 hours of course work in the MSHIA program. Ten credits taken in the medical school will count toward the 37 credits required for the MSHIA degree. At the beginning of the fifth year, students will recommence taking courses in the medical program. Students will graduate with both degrees at the end of the 5 years.
3. Students will be expected to complete a minimum of 37 credits for the MSHIA and 189 credits as well as all requirements for the MD degree. Twenty-seven of those credits will be taken in the College of Business, with ten HWCOC credits being accepted toward the MSHIA degree. There is no change in course requirements for the MD degree.
4. Students will apply for the combined MD/MSHIA pathway in the following manner: Medical students in the fall of their third year (prior to December 30) must be in good academic standing and must get approval from the Medical Student Evaluation and Promotions Committee (MSEPC), the Office of Student Affairs (OSA), and the Office of Academic Affairs (OAA), in order to apply for admission to the MSHIA program. Applications will be reviewed by the MSHIA program admissions committee. Applicants to the combined MD/MSHIA pathway will not be required to submit standardized test scores; they must have a minimum GPA of 3.0.
5. Students begin taking classes in business in the fourth year. The entire fourth year is devoted to classes in the MSHIA program. There is also a mandatory requirement for MSHIA program virtual residencies.

The curriculum in the MD/MSHIA pathway follows a prescribed course of study shown below. The proposed schedule is as follows. (HWCOC does not have semesters. Therefore, we have used Period designations.)

First Year Period 1 (M1) August to end of March: College of Medicine curriculum

Second Year Period 2 (M2) April to end of March: College of Medicine curriculum

Third Year Period 3 (M3) April to end of March: College of Medicine: all required clerkships

Fourth Year medical students start M4 period in April. Then, in August start the MSHIA courses.

Medical students must be counseled as to when to take USMLE Step 1 and USMLE Step 2 CK and CS, and which electives, selective or subinternship to engage in prior to taking a leave to pursue the MSHIA program.

The remainder of Year 4 then consists of MSHIA courses. That is, from August through end of June.

Fifth year- The MSHIA program ends the end of June. Medical students take the remainder of the 5th year, which is the M4 period in the medical school (July through April).

Medical students will be counseled as to which electives, selectives or subinternship to take prior to applying for residency in September of this fifth year.

The following courses are required for the MSHIA program.

HIM 6628	Healthcare Data Visualization	3
HIM 6865	Healthcare Database Systems	3
HIM 6682	Quality & Outcome Analytics	3
HIM 6685	Clinical Information Systems	3
HIM 6517	Healthcare Project Management	3
HIM 6124	Technical & Data Architectures & Standards for Health Care	3
HIM 6527	Healthcare Information Security & Privacy	3
HIM 6858	Health Informatics / Analytics Practicum	3

(proposed by student & subject to the approval of the department housing the MSHIA program, Information Systems and Business Analytics)

One of the following courses (selected at the Department's discretion for each cohort) is required for the MSHIA degree:

HIM 6694	Consumer Health Informatics	3
HIM 6937	Special Topics	3

MSHIA Virtual Residencies I, II and III.

Residencies are mandatory, professional development non-credit requirements (typically include virtual meetings and independent activities, for example Six Sigma)

Courses waived in MSHIA: 10 credits

HIM 5065	Intro. To Health & Informatics	3
HIM 6019	Legal & Ethical Aspects of Healthcare	3
HIM 6267	Foundations of Health Informatics & Analytics Administration	1
QMB 6357	Business Stat. Analysis	3

Credits accepted from HWCOC: 10 credits

MDR 7910	Research Scholarship	4
BMS 6880	Foundations of Clinical Epidemiology & Quantitative Research	2
BMS 6067	US Healthcare Delivery System	2
BMS 6820	Humanism and Medical Jurisprudence	1
BMS 6826	Ethical Foundations of Medicine	1

There are, therefore, 9 courses to be taken in the College of Business, for a total of 27 credits.

Students must earn a minimum GPA of 3.0 in the MSHIA program to be conferred with the MSHIA degree.

Certificate in Core Clinical Clerkships

The FIU Certificate in Core Clinical Clerkships program provides core clinical clerkship training to third-year medical students studying at medical schools with which HWCOC has established contractual partnerships. During the clinical clerkships, students complete medical preceptorships and experiences, working with faculty members in the care of patients in hospital and private practice settings. The program aims to train students in decision-making skills relevant to patient care, and to offer students an understanding and knowledge of the health care system. Students complete six clinical clerkships in these disciplines: internal medicine (12 weeks), family medicine (6 weeks), obstetrics and gynecology (6 weeks),

surgery (12 weeks), psychiatry (6 weeks), and pediatrics (6 weeks) for a total of 48 weeks. Students are supervised by faculty members who are licensed and have expertise in their respective specialties. Performance is evaluated at the bedside and in other clinical settings. This certificate program is open only to non-degree-seeking students enrolled in programs at partner institutions.

Core Clinical Clerkships Curriculum: 48 Credits

MDC 7200	Internal Medicine Clerkship	12
MDC 7120	Family Medicine Clerkship	5
MDC 7180	Obstetrics and Gynecology Clerkship	6
MDC 7600	Surgery Clerkship	12
MDC 7830	Psychiatry Clerkship	6
MDC 7400	Pediatrics Clerkship	7

Graduate Certificate in Molecular and Biomedical Sciences

The Graduate Certificate in Molecular and Biomedical Sciences program seeks to provide academic enhancement and professional development to non-degree seeking applicants to health-related professional degree programs. The courses taught in this program offer a foundation for a better understanding of the courses taught during the first year of medical school. The certificate aims to strengthen the applicant's biomedical knowledge and enhance his or her professionalism skills to improve his or her future application to medical school or other health-related professional degree programs. This certificate program is open only to non-degree-seeking students.

Admission Requirements

Students applying for the Graduate Certificate in Molecular and Biomedical Sciences must meet the following requirements for admission:

1. Completed University Graduate School application
2. Completed graduate certificate application
3. Bachelor's degree
4. All HWCOC pre-medical course requirements completed
 - a. General Biology with laboratory - 2 semesters
 - b. General Chemistry with laboratory - 2 semesters
 - c. Organic Chemistry with laboratory (satisfied by either Organic Chemistry 1 and 2 or Organic Chemistry 1 and Biochemistry) - 2 semesters
 - d. Physics with laboratory - 2 semesters
 - e. Mathematics - 2 semesters of College Mathematics
 - f. College English - 2 semesters of College English
5. US citizenship or permanent resident status

Required Courses: (20 credits)

BMS 6013	Medical Cell Biology and Biochemistry	3
BMS 6004	Medical Molecular Biology	3
BMS 6301	Medical Microbiology and Immunology	3
BMS 6501	Medical Physiology	3
BMS 6130	Pathology and Medical Histology	3
BMS 6003	Medical Genetics	3
GMS 6922	Professional Skills in Medical Sciences I	1
GMS 6923	Professional Skills in Medical Sciences II	1

Course Descriptions

Definition of Prefixes

BMS-Basic Medical Sciences; GMS-Graduate Medical Sciences; IHS-Interdisciplinary Health Sciences; MDC-Medicine Clinical Clerkships; MDE-Medical Electives; MDI-Medical Internships; MDR-Medical Research; MDS-Medical Selective; PAS-Physician Assistant

Courses in the College of Medicine numbered BMSxxxx and MDCxxxx are restricted to students enrolled in the College of Medicine.

BMS 6001 Genes, Molecules & Cells (5-8). This course is designed to introduce the fundamental concepts of cell and molecular biology, biochemistry, and medical genetics as they relate to normal and disease processes. The topics will be covered in lectures, small group, and whole class discussion. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6002 Human Structure & Function (7). This is an introduction to essential concepts of human structure and function with integration of the anatomical and physiological basis of several important clinical skills and procedures. Prerequisite: Enrolled in the College of Medicine.

BMS 6003 Medical Genetics (3). The course covers fundamental principles of medical genetics integrated with biochemistry, cell biology and molecular biology. Prerequisite: Enrollment in the HWCOCM Graduate Certificate Program in Molecular and Biomedical Sciences.

BMS 6004 Medical Molecular Biology (3). The course covers fundamental concepts of prokaryotic and eukaryotic molecular biology, as they relate to human health and diseases. Prerequisites: Enrollment in the HWCOCM Graduate Certificate Program in Molecular and Biomedical Sciences.

BMS 6013 Medical Cell Biology and Biochemistry (3). The course covers fundamental concepts of cell biology and biochemistry, as they relate to human health and diseases. Prerequisite: Enrollment in HWCOCM Graduate Certificate in Molecular and Biomedical Sciences.

BMS 6015 Clinical Skills I (4-6). Clinical Skills I will focus on teaching the knowledge, skills and attitudes needed in areas such as communication, the physical examination and documentation. These skills are developed and refined using various teaching modalities and later integrated with more advanced clinical skills during the Clinical Skills II course. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6016 Clinical Skills II (1-12). Clinical Medicine is a longitudinal strand throughout the four-year medical school curriculum. The strand is designed to provide students with the foundations of patient care. Clinical Skills II (CS II) will prepare students for their clinical clerkship years and provide them with the tools necessary for a lifetime of clinical competence. CS II continues to develop and foster the basic concepts emphasized during CS I and incorporates more advanced interviewing, communication, and physical examination skills. In addition, CS II focuses on the development and practice of clinical reasoning skills by emphasizing the correlation of findings on history and physical examination with underlying pathophysiology, test results, and the ability to develop and refine a working

differential diagnosis. The topics addressed in CS II will be aligned with the course work presented contemporaneously in other courses and strands. For example, the cardiovascular examination will be covered during the cardiovascular organ system module. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6064 End of Life Care (1). This course teaches the basic concepts associated with end-of-life care for adults. Emphasis is placed on symptom management, preparation for death, and support to adults and their families. The goal is to develop knowledge of specific strategies to support end-of-life care planning among patients, families, and healthcare professionals. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6066 Evidence-Based Medicine & Complimentary and Integrative Medicine (1-12). This course is intended for students to acquire and develop both the knowledge and the skills for evidence-based medicine (EBM). The emphasis of the course is on the second, third and fourth steps of EBM: searching clinical evidence, appraising critically the validity and importance of clinical research evidence, and determining the applicability of evidence into practice. In addition, during this course students will use concepts obtained in previous epidemiology courses as they are applied to help solving clinical problems. The second part of the course is an introduction to the most common complementary and integrative medicine (CIM) therapies used by patients in the United States. Students interact with CIM practitioners from different disciplines during workshops, review several cases in which patients use CIM techniques, and discuss issues related to patient care. Students are required to work on clinical cases, formulate PICO questions (P=Population/Patient/Problem, I=Intervention, C=Comparison, O=Outcome), search clinical evidence-based literature (learned in EBM) and apply that knowledge to advise patients on the safety, efficacy, and appropriateness of CIM therapies and OTC medications. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6067 System Based Practice (1-12). This course provides the student with a fundamental understanding of the U.S. healthcare delivery systems, policies that shape healthcare, and the Quality and Safety movement. Prerequisite: Enrolled in the College of Medicine.

BMS 6071 Community-Engaged Physician I (5). This Community-Engaged Physician I course is part of the Medicine and Society strand and encompasses the Green Family Foundation Neighborhood Health Education Learning Program (NeighborhoodHELP). This service-learning course integrates the community-engaged household visit experiences of NeighborhoodHELP with active learning class sessions. It aims to provide students the skills to assess the social determinants of health while simultaneously providing household-centered care in collaborative interprofessional teams. Students will learn the fundamentals of health education, health promotion, appropriate screening and preventive health services, and chronic disease management while having the opportunity to reflect critically on these activities during their household visits. With its emphasis on community medicine, the course also builds on concepts of population health and health disparities introduced in prior courses

and culminates in a community-based group project. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6100 Structure of the Human Body (1-12). This course is designed to introduce first year medical students to essential concepts of the structure of the human body, including early human development, composition of different tissues, and organ morphology. Basic concepts of embryology, histology, and gross anatomy from the microscopic to the organ system level are taught as the foundation for an in-depth understanding of the physiology of the human body and of clinical medicine. Lectures, laboratory sessions, and case presentations will be used to deliver course objectives. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6130 Pathology and Medical Histology (3). Introductory course in the study of normal tissues and organs and how these are affected by disease. Prerequisite: Enrollment in the HWCOCM Graduate Certificate in Molecular and Biomedical Sciences.

BMS 6301 Medical Microbiology and Immunology (3). The course is designed to introduce the students to the general principles of infectious, host responses and the pathogen's evasion that are relevant for a foundation in clinical medicine. Prerequisite: Enrollment in the HWCOCM Graduate Certificate Program in Molecular and Biomedical Sciences.

BMS 6400 Pharmacology (4). This course is an introduction to the basic principles of pharmacology and to the primary classes of drug therapy, including the prototypic agents. The main goal of the medical training (curriculum) is to develop the diagnostic and therapeutic skills (competencies) required by a basic doctor. Safe and effective prescribing is a core competency. In addition, learning should provide an appropriate framework fostering the ability to assimilate information about new drug development that will occur throughout a professional career (self-directing learning). The Pharmacology teaching is designed with this final goal (to attain a core competency) in mind and reflects the paradigm shift from a process-focused education to an outcome oriented education. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6500 Integrated Functions of the Human Body (1-12). The course is designed to introduce first year medical students to essential concepts of physiology and immunology. The goal is to provide the students with a strong foundation relevant to their understanding of pathological conditions and to their future diagnostic and therapeutic decision making. Physiology is taught using an organ system approach, emphasizing the interplay of molecules, cells, tissues, organs and systems to maintain normal function of the human body. Normal and abnormal functions of the immune system are introduced. Integration of immunology with organ system physiology is emphasized. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6501 Medical Physiology (3). The course is designed to introduce the students to essential concepts of medical physiology. Prerequisite: Enrollment in the HWCOCM Graduate Certificate Program in Molecular and Biomedical Sciences.

BMS 6603 Pathology and Infectious Disease (1-12). Pathology and Infectious Disease is an introductory course in the study of disease and the general principles of infectious disease. The Pathology component of the course will emphasize the general concepts and vocabulary to lay the groundwork that will be useful during the subsequent courses within the organ systems modules. Areas covered in this course include general concepts of histology, cellular adaptations, necrosis, apoptosis, inflammation, repair, hemodynamic disorders, neoplasia, and pathology as it relates to nutritional/environmental factors, as well as an introduction to forensic medicine and pediatric and genetic disorders. In addition, during this course the students will also receive general concepts relating to clinical laboratory medicine and regulatory organizations allied to the field of medicine and hospital oversight in a 2 hour lecture referred to as fundamentals of laboratory medicine, followed by a one hour practical in the classroom. The Infectious Disease component includes an overview of microbes, including bacteria, viruses, fungi, and parasites, important to human disease and disease processes. Specific topic areas of this component of the course include microbial disease, virulence mechanisms, evasion strategies used by pathogens against the antimicrobial immune response, and innate antimicrobial mechanisms. General concepts (building blocks for comprehending organ-specific pathology presented in Period 2) are emphasized in this introductory course. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6631 Hematopoietic and Lymphoreticular Systems (3). This course is designed to provide the fundamental ground knowledge as it relates to the understanding of hematologic diseases, the clinical approach to a patient with a hematologic disease and the initial approach to the use of various chemotherapeutic drugs. Discussions related to: the mechanisms of disease with an understanding of the molecular bases that explain the disease process; the clinical features of the different disorders - genetic or acquired - as well as a description of the morphologic features of these diseases based on the most current available and clinically applicable information. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6632 Endocrine System (3). This Endocrine System course: (1) Introduces medical students to the abnormal processes and principal therapies of endocrine disorders, building upon the specific topics discussed in the course Integrated Functions of the Human Body and Structure of the Human Body; (2) Advances medical students' knowledge and comprehension of the aforementioned disorders and therapeutic modalities, including the influence and effects of gender, ethnicity, and behavior of patients on specific endocrine diseases. To provide an interactive teaching and learning environment, the course includes 'question and answer' sessions interspersed during the lectures as well as case discussions. A solid understanding of normal endocrine processes (including hormone synthesis, secretion, action, and metabolism) and anatomy and function of endocrine organs are required to successfully master this course. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6633 Cardiovascular and Respiratory Systems (6). This course is an introductory learning opportunity to gain the basic concepts of cardiac and pulmonary medicine. The course will review the cardiopulmonary structures and anatomic and physiologic relationships and their integration with clinical medicine. The course will cover abnormal cardiovascular and pulmonary structures and physiology and the associated mechanisms of the related diseases. The clinical manifestations of derangements of the cardiopulmonary system will be reviewed. The student will be introduced to the diagnostic and therapeutic interventions in cardiopulmonary disease. Case-based approaches, group discussions, simulations, and didactic presentations, with some exposure to clinical skills, will be used to achieve course objectives. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6634 Gastrointestinal System and Medical Nutrition (4). This course is designed to introduce second year medical students to the principles of diseases affecting the human body's digestive system. The course will cover conditions affecting the hollow viscera (esophagus, stomach, small intestine and colon) as well as solid organs that are part of the digestive system (liver and pancreas). Clinical cases will be used to introduce students to critical medical thinking and problem-based learning. Integration of anatomy, physiology, immunology and histology will be emphasized. Prerequisite: Enrolled in the College of Medicine.

BMS 6635 Musculoskeletal Systems (1-5). This second year medical school course is designed to provide students the opportunity to learn the normal development, structure, and function of the musculoskeletal system, expanding upon the foundations from the first-year anatomy course. Common congenital and acquired pathologic conditions, as well as interpretation of diagnostic tests and basic treatment options are reviewed. The following areas are emphasized: effects of environment, nutrition, exercise, and aging on bone and joint homeostasis; radiological assessment and correlation with pathoanatomy; infectious, neoplastic, and mechanical disorders affecting the musculoskeletal system; basis of autoimmunity, rheumatologic diseases and inflammatory disorders. The course provides opportunities to learn and assess application of pathophysiologic reasoning as well as clinical, laboratory and radiologic findings to assist in differential diagnosis with review of treatment strategies. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6636 Nervous System and Behavior I (1-12). This course provides an integrated, multidisciplinary overview of the structural and functional relationships of the central and peripheral nervous systems under both healthy and diseased conditions. The course covers essential concepts in normal and pathologically altered neurological functions (using neuroanatomy, neurophysiology, neuropharmacology, neuropathology, and clinical neurology). The goal of the course is to give students the skills to develop and prioritize a differential diagnosis, localize lesions based on diagnostic tests and neurological signs, explain the patient's signs and symptoms, as well as propose and interpret diagnostic tests and approaches to therapy. The format of the course includes lectures, laboratory work, small-group case-based discussions, and

clinical correlates presented through a variety of application exercises and case discussions. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6637 Reproductive Systems (3). Reproductive Systems provides an overview of the development of the male and female reproductive systems with a focus on abnormalities of sexual differentiation and function, the physiology of control of the menstrual cycle, conception, infertility, menopause and pregnancy. In addition, the pathophysiology of the male reproductive system will be covered. Prerequisite: Enrolled in the College of Medicine.

BMS 6638 Renal System (1-12). This course is an introduction to the study of the renal system. It will help the student integrate what they have learned in previous courses (e.g., Anatomy, Physiology, Biochemistry, Genetics, Epidemiology, Histology, and Pharmacology) and lead to an understanding of the mechanisms of diseases involving the kidneys. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6643 Integumentary System: The Skin (1-5). This course provides the medical student the opportunity to learn the normal development, structure, and function of the integumentary system. Common congenital and acquired pathologic conditions and the interpretation of diagnostic tests, and basic treatment options are reviewed. The course also provides opportunities to learn and assess application of pathophysiologic reasoning and clinical, laboratory, and radiologic findings to differential diagnosis. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6820 Medical Jurisprudence (1-12). Medical Jurisprudence introduces students to health law concepts students will initially encounter in clinical settings and provides a framework to identify and analyze pertinent legal issues. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6826 Ethical Foundation of Medicine (1). This course gives students a foundation in bioethics and the obligations of medical practice as coming from a social contract. It serves as the foundational course to prepare students to make daily ethical decisions related to ethical issues, challenges, and dilemmas they will encounter as students and socially accountable physicians. The course provides historical background on the social and moral foundations of modern medicine. Students review the major medical oaths and codes; work through cases; and analyze the ethical basis of decision-making by focusing on informed consent and advance care planning. They discuss the social and cultural factors in patient-doctor interaction, including implicit bias. Students are also introduced to the role and value of the humanities and arts in medicine. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6827 Foundations for the Community-Engaged Physician (1-12). This course will serve as an introduction to the community engaged physician course series, the longitudinal service-learning program that encompasses the Green Family Foundation Neighborhood Health Education Learning Program (NeighborhoodHELP). It aims to provide a foundation of empirical knowledge for understanding and promoting health in communities and working with vulnerable populations. The course places special emphasis on cultural humility, health equity, and

the social determinants of health. Students also begin to develop collaborative skills to work effectively as part of interprofessional teams. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6840 Nervous System and Behavior II (1-12). This course will present the fundamentals of psychiatry and psychological principles that are the foundation for clinical work in Period 3. These principles include psychiatric diagnoses and treatment, cognitive neuroscience, cognitive and emotional development, and principles of psychopharmacology and psychotherapy. Learning will take place in an interactive process using team-based learning, problem-based learning, and some traditional lectures. Independent study and preparation prior to group activities will be an integral part of the learning process. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6880 Clinical Epidemiology and Quantitative Research (1-12). This course is an introduction to the foundations and methods of clinical and epidemiological research. The main perspective is the use of quantitative methods to address clinical or epidemiological research questions, as well as the use of research to inform the practice of medicine. Concepts from the sciences of clinical epidemiology and biostatistics will be presented to the student in theory and problem-based scenarios. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6891 Professional Behavior I (1). Professional Behavior I is a course within Professional Development designed to introduce and teach awareness of certain values, emotions and attitudes, behaviors and self-reflection to the medical student. This course applies the philosophy and general understanding for emotionally preparing the future physician for the many diverse psychological experiences associated with the clinical setting and professional life. Specifically, to have an understanding and awareness of one's behavioral and personal issues, the emotional stress found in practicing medicine, and how these can impact patient care and health outcomes. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 6892 Professional Behavior II (1). This course is a continuation of the Period 1 Professional Behavior experience. Where the focus of the course during Period 1 was on "self-awareness," Period 2 goes more into depth in the development of self-awareness and the development of the emerging "MD Identity." Class sessions are structured using the same approach with the introduction, history, development and implications of the Values, Emotions and Attitudes (VEAs) on medical practice. However, the vignettes are more evidence-based and discussions include reflections of the student's clinical experiences as they relate to the VEA. Additionally, the VEAs presented in the class session are more comprehensive and identify greater implications for the MD. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 7810 Core Concepts in Medicine (5-7). The major themes of Osler Friday are student-driven inquiry, learning and teaching with integration of the 6 core competencies of medical education. Problem-based learning in small groups followed by large group consultation with

specialists will serve as the primary learning format. Individual and pair assignments in critical appraisal, clinical application of statistics, and a group assignment in case development will also support the course learning objectives. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

BMS 8910 Directed Study (1-3). Medical students engaged in individual research under the supervision of the COM faculty. Prerequisite: Enrolled in the College of Medicine.

GMS 6065 Molecular Oncology (3). This course will introduce students to fundamental areas of cancer biology, and provide students with a detailed understanding of emerging topics in molecular and clinical oncology. Prerequisite: GMS 6220 and GMS 6481

GMS 6103 Molecular Microbiology and Infectious Diseases (3). This course introduces the general principles of infectious diseases and the host response to infection. Prerequisites: Currently enrolled in the HWCOP PhD program and permission of the course director.

GMS 6220 Molecular Genetics and Cellular Biology (6). The course gives graduate students an introduction to fundamental concepts in biochemistry, cellular and molecular biology, and genetics with an emphasis on medically-relevant themes. Prerequisites: Currently enrolled in the HWCOP PhD program and permission of the course director.

GMS 6300 General Pathology (4). This course introduces the molecular and genetic basis of human diseases while emphasizing the basic pathologic processes and vocabulary. Prerequisites: Currently enrolled in the HWCOP PhD program and permission of the course director.

GMS 6481 Physiology and Immunology (4). This course introduces students to the fundamental concepts of physiology and immunology from a biomedical perspective that will assist in evaluating pathology and therapeutic target options. Prerequisites: Currently enrolled in the HWCOP PhD program and permission of the course director.

GMS 6500 Basic Pharmacology (4). This course is an introduction to the basic principles of pharmacology and provides an overview of drugs from a molecular, cellular, and basic science perspective. Prerequisites: Currently enrolled in the HWCOP PhD program and permission of the course director.

GMS 6605 Basic Structure of the Human Body (3-4). This course gives graduate students an introduction to basic concepts of human anatomy, including embryology, histology, gross anatomy and neuroanatomy. Prerequisites: Currently enrolled in the HWCOP PhD program and permission of the course director.

GMS 6864 Principles of Clinical Epidemiology and Biostatistics (2). This course provides an introduction to the elements and foundations of epidemiology and biostatistics. Prerequisites: Currently enrolled in the HWCOP PhD program and permission of the course director.

GMS 6904 Introduction to Scientific Writing (3). The introductory course designed to teach the students to design, write, and present scientific papers and grant

applications. Prerequisite: HWCOC Graduate School Enrollment.

GMS 6922 Professional Skills in Medical Sciences I (1). The course provides students with a small structured learning environment in which to analyze the relationships between concepts and develop the ability to evaluate and integrate information. Prerequisite: Enrollment in the HWCOC Graduate Certificate Program in Molecular and Biomedical Sciences.

GMS 6923 Professional Skills in Medical Sciences II (1). Provide students with a small structured learning environment in which to analyze the relationships between concepts and develop the ability to evaluate and integrate information. Prerequisite: Enrollment in the HWCOC Graduate Certificate Program in Molecular and Biomedical Sciences.

GMS 6939 Graduate Seminar (1). A weekly seminar/discussion course consisting of research presentations by students, faculty, and visiting scientists in the area of biomedical sciences will form part of a recurring credit. Prerequisite: HWCOC Graduate School Enrollment.

GMS 6940 Supervised Teaching in Biomedical Science (1). Students will assist the faculty members who teach either graduate or medical students. Prerequisite: HWCOC Graduate School Enrollment.

GMS 6942 Laboratory Rotations (1). Laboratory rotations in specific laboratories of the HWCOC graduate program faculty that will eventually lead to the choice of a thesis laboratory. Prerequisite: HWCOC Graduate School Enrollment.

GMS 6961 Qualifying Examination (5). The purpose of the Qualifying Examination is to confirm the readiness of the graduate student to conduct PhD research. Prerequisite: HWCOC Graduate School Enrollment. Corequisites: Completion of all mandatory courses.

GMS 6962 Formation of Committee: Appointment of Dissertation Committee: Preliminary Proposal (1). The student submits preliminary research proposal approved by his/her committee. Prerequisite: HWCOC Graduate School Enrollment.

GMS 6963 Doctoral Dissertation Proposal (3). Doctoral Dissertation Proposal written in the style of an AHA, NIH or NSF predoctoral fellowship application. Prerequisite: HWCOC Graduate School Enrollment. Corequisites: Completion of GMS 6961, advisor.

GMS 6964 Dissertation Proposal Seminar (1). After completion of the Qualifying Examination (QE) and Dissertation proposal approval the student must present his proposal to the Dissertation Committee. The student will give a PowerPoint presentation the proposed research to the members of the dissertation committee. The dissertation committee will specifically evaluate the following: (i) Has the student demonstrated the ability to design a feasible project? (ii) Has the student shown a reasonable knowledge of the literature regarding the project? (iii) Has the student presented the proposal (both written and oral) in a scholarly fashion? (iv) Has the student demonstrated competent scientific knowledge with respect to overall fundamental principles and applications in biomedical science? and (v) Does the proposed

research constitute an acceptable and feasible dissertation project? This will be achieved through an oral question and answer component within the scheduled time of the dissertation proposal exam meeting. The chairman of the dissertation committee will (i) insure that the proposal exam is held to a reasonable length of time; (ii) insure that the student is evaluated fairly and rigorously; and (iii) see that a written evaluation is promptly prepared and sent to the student and to the director of the graduate program. Prerequisite: HWCOC Graduate School Enrollment. Corequisites: Completion of GMS 6961, GMS 6963, and permission of the advisor.

GMS 6979 Research Credits (1-10). Research conducted in the PhD advisor's laboratory. May be repeated. Prerequisite: HWCOC Graduate School Enrollment.

GMS 7603 Anatomy of the Musculoskeletal System (2). This course gives Doctor of Physical Therapy (DPT) students a solid working knowledge of the functional anatomy of the back and limbs, including bones, joints, muscles, nerves and blood vessels. This will form the anatomical basis for an in-depth understanding of related pathological conditions, clinical examination and therapeutic interventions. Course objectives will be delivered by lectures and different types of laboratory sessions. Prerequisite: Admission into the Doctor of Physical Therapy Program. Corequisite: GMS 6605.

GMS 7980 Dissertation Research Credits (1-10). Research towards the completion of a doctoral dissertation. May be repeated. Prerequisite: HWCOC Graduate School Enrollment. Corequisites: Completion of GMS 6961, GMS 6964 and permission of the major professor.

GMS 7981 Dissertation Defense Seminar (1). Dissertation defense seminar. Prerequisite: HWCOC Graduate School Enrollment. Corequisites: Permission of major professor and graduate committee.

IHS 6116 Interprofessional Health Ethics (1). This online course will introduce graduate students in health sciences and biomedical engineering to ethical issues that emerge in teams which contribute to or support health care delivery, services, promotion, research, and the design, manufacture and marketing of health products (e.g. drugs and devices). In five modules, students will have the opportunity on their own and in interprofessional groups to engage critically with controversial topics in clinical ethics, research ethics and public-health/population health, such as assisted reproduction, transplant and regenerative medicine, research integrity and false claims to authorship, the marketing of drugs and medical devices, the treatment of infectious diseases, personal responsibility for health, and social determinants of health. In addition, students will learn the ethical commitments of their own and other health professions to determine where they overlap and where differences in scopes of practice may lead to ethical dilemmas. Prerequisites: Admission to a graduate program in health sciences at FIU or permission of the instructor.

MDC 6102 Community-Engaged Physician II (1-12). This course is a continuation of the Community Engaged Physician I course and the longitudinal NeighborhoodHELP service-learning program that reinforces concepts offered earlier in the Medicine and Society strand. Through NeighborhoodHELP, the course

offers opportunities for students to apply what they have learned and to reflect critically on their service-learning experiences. During their household visits, students will address the social and health needs of households, develop care plans in interprofessional teams, and integrate learning from their Clinical Medicine courses. Prerequisite: Enrolled in College of Medicine.

MDC 6103 Community-Engaged Physician III (1-12).

This course is a continuation of the Community Engaged Physician II course and the longitudinal NeighborhoodHELP service-learning program that reinforces concepts offered earlier in the Medicine and Society strand. Through NeighborhoodHELP, the course offers opportunities for students to apply what they have learned and to reflect critically on their service-learning experiences. During their household visits, students will address the social and health needs of households, develop care plans in interprofessional teams, and integrate learning from their Clinical Medicine courses. Prerequisite: Enrolled in College of Medicine.

MDC 7120 Family Medicine Clerkship (1-12).

Family medicine is the specialty that focuses on care for the whole person regardless of age, sex, or disease, set within his or her social and community context. The Period 3 Family Medicine Clerkship is a practical opportunity for students to demonstrate progressive skill development, integrating their knowledge of basic and social sciences, clinical skills, professional development, and social accountability. Under the supervision of FIU Family Medicine faculty, students conduct and document histories, physical exams, assessments, and management plans while providing patient education. The course is aimed at preparing students for Period 4 rotations and their future careers as physicians, regardless of the specialty they ultimately choose. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC 7124 Geriatrics (2). During the 2-week Geriatrics rotation, students will actively participate in the ongoing, daily care of older adults who have a wide variety of acute and chronic illnesses and abnormal physical findings. Throughout the course, students will work with a variety of geriatric focused health professionals – including physicians, nurse practitioners, therapists, certified nursing assistants, and social workers-- as part of the interdisciplinary care team. Students will be involved with and responsible for admission assessments, ongoing care and management for patients, discharge planning and communicating with patients' families. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC 7180 Obstetrics and Gynecology Clerkship (6-7).

The Obstetrics and Gynecology Clerkship offers third-year medical students a 6-week rotation in the core discipline of women's health. The gynecologist and obstetrician are involved in every facet of women's health care maintenance and delivery throughout the patient's lifespan. They provide care from prepubertal and early menarche; act as primary care providers for healthy women; help women experience the joy of normal pregnancy and delivery; and provide care during crises of infertility, pregnancy loss, and cancer. Therefore, a general understanding of the field is important to the development of a well-rounded primary care physician. Medical students are exposed to all aspects of the specialty, including ambulatory clinics, hospital inpatient

wards, the operating room, emergency room visits and consults, radiology, and the labor and delivery suite. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC 7200 Internal Medicine Clerkship (9-12).

The Period 3 Internal Medicine Clerkship occurs in consecutive rotations. This clerkship has two components, ambulatory and hospital-based, and is designed to provide medical students with a foundation of knowledge, skills, and attitudes necessary to approach and care for adult patients in outpatient and hospital settings. Students' primary work is done under direct supervision of internal medicine preceptors from the community, the public health system, and the academic setting. The Internal Medicine Clerkship emphasizes basic assessment and management of core common problems in internal medicine, including identifying patient problems, establishing a differential diagnosis, and planning an appropriate evaluation and treatment in preparation for an increased independence in management and therapeutics during Period 4. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC 7400 Pediatrics Clerkship (7-9).

The Core Pediatric Clerkship will provide students with experiences in the evaluation, diagnosis, and management of pediatric patients. Through both inpatient and outpatient clinical experiences, students will be exposed to a wide variety of pediatric patients presenting with acute illnesses, chronic illnesses, and health maintenance needs. Students will actively participate in clinical cases, simulated cases, simulation laboratory scenarios, and didactic lectures. The clerkship emphasizes the basic skills of assessment and management of common pediatric problems. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC 7600 Surgery Clerkship (9-12).

This clerkship will provide students with experience in the recognition and management of surgical disease and in basic surgical techniques. During this clerkship students will develop understanding of the scientific basis of surgical diseases and disorders. Students will then learn to perform assessments and develop differential diagnoses for these surgical presentations. Students will learn through participating in preoperative care, operative procedures, outpatient surgery clinics and didactic experiences on management of surgical diseases. Students will also learn how to evaluate normal and complicated postoperative recovery with surgical inpatients and outpatients. Upon completion of the surgery clerkship, students will also fully understand norms of professional behavior by working effectively with patients and families as a member of the health care team. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC 7760 Radiology Clerkship (2-3).

The Radiology Clerkship takes place entirely at FIU Campus AHC2. The clerkship is a largely self-directed online study of selected resources and developed PowerPoint presentations together with directed reading of required text and articles. Progress in understanding of the concepts provided will be assessed by frequent MCQ examinations. This clerkship will provide medical students with a basic understanding of the common techniques used in medical imaging, the evidence-based choice of appropriate studies for given clinical symptoms, the potential complications and side

effects of such studies and the interpretation of medical imaging studies of common clinical conditions. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC 7800 Neurology Clerkship (3-5). The Neurology Clerkship takes place at various sites. This clerkship has three components: ambulatory, didactic, and hospital-based. This clerkship provides medical students with experience in general and specialty neurology. Students learn to diagnose and treat nonemergent neurological disorders in the outpatient setting and neurological emergencies in the inpatient setting. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDC 7830 Psychiatry Clerkship (6-7). The course introduces Period 3 medical students to general and specialty psychiatry and allows students to develop competencies in diagnosing and treating psychiatric disorders. The structure of the clerkship ensures that students receive exposure to different clinical practice settings, including emergency department (ED), inpatient, outpatient, and consultation-liaison services. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7010 Directed Clinical Study (0). Students will follow (shadow) a physician at varied institutions to observe daily activities. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7048 Narrative Medicine Elective (1-12). Pioneered by Rita Charon, narrative medicine trains doctors and other caregivers to use careful listening and reflective writing to forge deeper connections with their patients, resulting in the provision of better care and the promotion of physician wellness. The narrative medicine elective is offered as a two-week rotation, with the option for students to enroll in an additional two-credit longitudinal component. During this elective, students will have the opportunity to explore different types of narrative medicine writing—including the parallel chart, 55-word stories, poetry and using narratives as an advocacy tool. Students will participate in discussion sessions about assigned readings; participate in small group writing workshops; and share their writing with their peers. The course director will create individualized writing plans tailored to students' specific interests, objectives, and clinical schedules. Students will write a total, including drafts, of about 10,000 words. Prerequisite: Enrolled in HWCOC.

MDE 7053 Medicine and Society Elective (1-12). The Medicine and Society elective is designed for individualized study and further pursuit of topics relevant to the Medicine and Society strand's mission to improve health outcomes for underserved communities in the delivery of care through the educational objectives on social determinants of health and policy. Students design an independent study experience under the tutelage of Medicine and Society or other Humanities, Health, and Society faculty. Potential projects include pursuit of a policy initiative in collaboration with Law, a cultural competency project, or an intensive community-based health initiative. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7059 Community Medicine Practicum (1-4). This longitudinal course aims to increase students' competencies in population health and community needs

assessment. Students are evaluated based on their development of a community health written assignment and health promotion plan alongside a service-learning practicum portfolio. A final reflection assignment helps students more deeply understand the importance of social accountability, critical and ethical thinking, and working with underserved/disadvantaged communities. This course develops students' skills and insights into community assessments and efforts that address the social determinants of health on a population level. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7061 Seminars in Physician Leadership Elective (2-4). This course introduces medical students to the foundations of leadership principles and how they apply to the practice of medicine. The course covers four interrelated topics: 1) foundations of leadership; 2) managing common resources to maximize social welfare; 3) anticipating and responding to change at social, organizational, and individual levels; and 4) paradoxes in leadership in a complex world. Case studies are used to introduce students to critical leadership thinking and problem-based learning. Prerequisite: Enrolled in HWCOC.

MDE 7067 Professional Development and Clinical Medicine Capstone (1-5). The Professional Development Capstone is explicitly designed to address anticipated expectations of Professionalism in the first few months of residency and beyond. Additionally, the Capstone in Professional Development is intended to serve as a review of relevant topics for Internship and the introduction of specific practical topics not otherwise covered in the curriculum.

The Clinical Medicine Capstone is a yearlong required course for all Period 4 medical students. It consists of two components. The first component is a monthly online module including a clinical reasoning case exercise, several EKG and radiology challenge questions, and a short quiz based on a review article covering a topic relevant to internship. The second component, held during the final month of medical school, is a week-long transition to internship bootcamp consisting of small group and individual role play and standardized patient activities designed to simulate common clinical scenarios encountered during internship. Completion of each of the monthly modules and attendance at the bootcamp are mandatory and will be tracked. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7092 Teaching Skills Elective (1-12). This is a non-clinical elective offered for two or four continuous weeks, designed to help students improve their teaching and/or curricular development skills through small-group, self-directed, experiential learning, and mentor feedback and engagement in authentic work. In this course, students will be provided with opportunities to learn about the foundational principles of adult learning theory, curriculum design, pedagogy, assessment, and teaching. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7100 Community Medicine Elective (1-12). This intensive ambulatory block will serve as a community based primary care experience. Under the supervision of community based FIU faculty, the student will assume a level of independence appropriate to his/her skills and

training level. Students will practice patient-centered communication, diagnostic and management skills, clinical reasoning, management of common ambulatory clinical issues, and patient education and negotiation. Experiences may include any primary care specialty (e.g. family medicine, internal medicine, pediatrics, obstetrics and gynecology, psychiatry). Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7102 Public Health Elective (1-12). This elective introduces students to the practice of public health for physicians. Students are assigned a site preceptor (MD/PhD or MD/MPH). Experiences and activities are tailored to individual student interests; a minimum of 50 percent of the rotation is spent at health department clinics. Students create and present a final public health research project. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7108 LGBTQ + Healthy Equity Elective (1-12). This four-week elective will provide medical students with the essential background and tools needed to provide high-quality and culturally appropriate care to patients who identify as LGBTQ (Lesbian, Gay, Bisexual, Transgender, Queer, and Questioning), gender non-conforming, or who are born with differences of sex development. Medical students will choose to follow a clinical and/or public health track. Through the clinical track, students will diagnose, treat and provide preventative care to LGBTQ and gender non-conforming patients through clinical assignments with health providers who work primarily with this patient population. Through the public health track, students will assess and intervene regarding the behavioral, social and cultural determinants of health and their impact on the health status of LGBTQ populations. In both tracks, students will produce a public health, research, medical education, or advocacy project related to LGBTQ health. Prerequisite: Enrolled in Herbert Wertheim College of Medicine

MDE 7120 Family Medicine Elective (1-12). This intensive ambulatory or inpatient block is particularly suited to students interested in primary care. Students will be assigned to either an inpatient or outpatient Family Medicine experience. Under the supervision of FIU faculty, the student will assume a level of independence appropriate to a fourth year student. For each patient s/he sees, the student will be responsible for the history and physical, writing a note, presenting the case to the supervising faculty member, and putting the agreed-upon management plan into action. Through this process, students will hone their patient communication skills, diagnostic skills and clinical reasoning, development of management plans for common ambulatory or inpatient clinical scenarios, and execution of patient education. Students will attend all departmental rounds and teaching activities, as well as complete any relevant reading assignments. Students will be provided with regular feedback from the supervising physician. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7121 Primary Care Sports Medicine Elective (1-12). This is an outpatient clinical rotation that provides a comprehensive spectrum of evaluation and management of both medical illness and orthopedic injury as it relates to musculoskeletal medicine. Students will diagnose, treat and help prevent general medical problems and injuries in athletes regardless of gender, or level of competition. The

care of the athlete will include performance of pre-participation sports physicals, assessment of common medical problems and musculoskeletal injuries, as well as treatment and rehabilitation of these conditions. The student will learn nonsurgical treatments for acute and overuse musculoskeletal problems to minimize time away from sports, school or work. The student will also treat chronic problems such as osteoarthritis to help minimize disability and maximize function, develop skills in conservative fracture management with splinting and casting and may be involved in sideline coverage of sporting events. The student will also be exposed to musculoskeletal ultrasound diagnostics and injections. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7140 Geriatric Medicine Elective (1-12). The Geriatric Medicine Elective is designed to allow fourth-year medical students the opportunity to participate with increased responsibility in the care of geriatric patients. Students learn the various components of a comprehensive work-up (e.g., functional scales, mini-mental exam). Students participate with the geriatric team in hospital consultations and follow-ups. This rotation is designed to supplement and introduce students to aspects of geriatrics not fully covered on a busy internal medicine inpatient and outpatient service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7161 Obstetrics and Gynecology Elective (1-12). This fourth year clinical elective in Obstetrics and Gynecology offers the student the opportunity to enhance his/her skills in outpatient diagnosis and management. The student is expected to adhere to the schedule agreed upon with the FIU faculty member, including call duty, rounding, and other clinical responsibilities (ie. those related to surgery, outpatient clinic, or the labor floor). The rotation may be tailored based on the student's specific goals and learning objectives; the student should reach out to the course director to discuss special considerations. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7162 Gynecologic Oncology Elective (1-12). This four week elective is intended for students who have already completed the basic core clerkship in OB/GYN and are interested in enhancing their exposure to the subspecialty of Gynecologic Oncology. The student will be provided experience in the inpatient and outpatient management of patients with pre-malignant and malignant conditions of the genital tract. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDE 7166 Gynecologic Surgery Elective (1-12). This four week course will introduce the student to gynecologic care in the adult female, ranging from routine care to the evaluation and surgical treatment of complex gynecologic conditions. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDE 7180 Perinatology/Maternal Fetal Medicine Elective (1-12). This Period 4 clerkship allows students to experience the full range of maternal-fetal medicine and familiarizes students with the diagnosis and management of pregnant patients who have obstetrical, medical, or surgical complications. Students receive experience in ultrasound, genetics, genetic counseling, and the management of high-risk obstetrical patients. Students

follow patients through the inpatient antepartum service and participate in the care of high-risk obstetrical patients admitted to the hospital. Attendance at the following conferences is required: FHR tracing and labor management review, high risk obstetrics conference, grand rounds, prenatal - neonatology conference, and journal club. Students are required to take call on the Labor and Delivery Unit one night per week. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDE 7201 Advanced Internal Medicine (1-12). The Advanced Internal Medicine (IM) rotation allows fourth-year students the opportunity work closely with IM hospitalist physicians as integral members of the IM hospitalist service. Students provide longitudinal care for hospitalized patients from the time of consultation in the emergency room to the patient's discharge and/or transfer. Students' schedules vary according to the needs of each site; some students may be on call during the rotation. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7204 Hospitalist Service Elective (1-12). The four week Hospitalist rotation is designed to allow fourth year students the opportunity to participate with increased responsibility in the care of patients admitted to the internal medicine/hospitalist service. Students provide longitudinal care for hospitalized patients from the time of consultation in the emergency room to the patient's discharge and/or transfer. Students' schedules vary according to the needs of each site; students are expected to take call every fourth night. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7220 Cardiology Elective (1-12). The objective of this hospital-based rotation is for students to improve their understanding of the pathophysiology of common cardiovascular diseases; the evaluation of acute and chronic cardiac disorders, including indications for invasive and non-invasive studies and EKG interpretation; the appropriate history and physical exam technique, with particular attention to the cardiovascular exam; and the differential diagnosis and first line treatment of prevalent cardiovascular disorders, with an emphasis on disease prevention. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7245 Pulmonology Elective (1-12). Through time spent both on the inpatient pulmonary consultation service and in the outpatient setting, this rotation will prepare students to effectively care for common cardiopulmonary disorders. In particular, students will be exposed to radiological interpretation of chest imaging and the interpretation of pulmonary function tests. Depending on the site, students will be part of a team with fellows and residents or will be under the direct supervision of a pulmonary specialist. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7250 Dermatology Elective (1-12). This elective course is designed to give the student exposure to clinical dermatology, including the diagnosis and management of common skin diseases seen in general practice. The majority of the student's time will be spent working with faculty members in the outpatient clinical setting; although there may be some opportunities for inpatient consultations and other work. Upon completion of this elective, the student will know the clinical features of the

most commonly encountered skin diseases and will be familiar with the modalities available for their management. This elective will be useful to students planning a career in a primary care specialty or dermatology. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7260 Endocrinology Elective (1-12). Students will see patients with both common and rare disorders of the Endocrinology system in the adult out-patient setting and the inpatient consultation service. Students are expected to longitudinally follow patients seen as part of the inpatient endocrinology consult service. Students are expected to prepare, as assigned, topic presentations and case discussions during the week. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7270 Gastroenterology/Hepatology Elective (1-12). This course will consist of a four week rotation, which will include inpatient and outpatient gastroenterology and hepatology. Throughout the rotation, students will be assuming primary responsibility of patients under the supervision of gastroenterology attendings. The experience will also allow for participation in varied endoscopic procedures, such as esophageal manometry, and upper and lower endoscopy. During the week, students will participate in pathology and radiology conferences geared to gastroenterology and hepatology cases. The course will concentrate on teaching students how to interpret clinical information and develop therapeutic decision making. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7280 Hematology-Oncology Elective (1-12). This rotation is intended to prepare students to learn a basic approach to evaluation, diagnosis, staging and treatment of patients with blood diseases and cancer. Through exposure to patients with these diseases, students will improve their physical diagnosis skills, recognition of complications of disease, and understanding of therapeutic issues. Students will learn concepts of palliative care, end of life and hospice care. The rotation is mainly inpatient-consult service with some outpatient exposure. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7301 Allergy and Clinical Immunology Elective (1-12). Students actively participate in all outpatient clinics to ensure a broad and comprehensive experience. Where pertinent to our training goals, students will also have the opportunity to evaluate inpatients. Emphasis will be placed on history-taking and the physical examination as they relate to patients with allergic and immunologic conditions. Students will develop basic skills in the evaluation of and interpretation of immunological studies performed on blood specimens, pertinent imaging studies, pulmonary function testing and allergy skin testing. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7310 Rheumatology Elective (1-12). This rotation includes office and hospital consultation. The objective is to improve the student's understanding of the pathophysiology, clinical presentation, differential diagnosis, and treatment of common rheumatologic disorders, including the evaluation of soft tissue rheumatism, acute and chronic arthritis, autoimmune connective tissue disorders, and indications for arthrocentesis and tendon injections. Students learn the

interpretation of the most common laboratory tests used in rheumatic conditions. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7320 Infectious Disease Elective (1-12). This elective rotation is intended to prepare students to obtain, under direct supervision of an infectious disease faculty, the necessary diagnostic and therapeutic skills to effectively care for patients with infectious disorders from the surgical, transplant, intensive care, OB/GYN, hematologic/oncologic, and general medicine services in a community hospital. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDE 7340 Intensive Care Unit Elective (1-12). This rotation is intended to prepare students to obtain necessary diagnostic and therapeutic skills to effectively care for patients diagnosed with critical medical disorders. Students work under direct the supervision of the ICU attending physician or as a member of a teaching team under the supervision of the attending physician, pulmonary/critical care fellow, and IM residents. Students assist in the admission, evaluation, and management of patients admitted to the Medical Intensive Care Unit. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7350 Nephrology Elective (1-12). This 2 week or 4 week elective offers students the opportunity to learn about the diseases of the kidney and become more skilled in their management. Students will participate in the care of patients with medical renal disease that are seen in the office and also on the renal inpatient consult service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7400 Pediatric Hospitalist Services Elective (1-12). Medical students will examine patients admitted to the Inpatient Hospitalist Services, write daily entries into the medical record, develop and execute plans for patient care, enter orders into the medical record, and make daily rounds on all patients. Students will participate in all academic activities, including simulation training and didactic lectures, provided to the students, residents, and fellows of the Hospitalist Service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7401 Inpatient Pediatrics Elective (1-12). As a member of the inpatient pediatrics care team, students will hone their history and physical exam skills, work on developing a differential diagnosis, and begin to develop and execute diagnostic and treatment plans. The hospital has organized a program for medical students to expand their practical knowledge of pediatrics. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7404 Pediatric Ambulatory Services Elective (1-12). The student, under direct physician supervision, will participate in the diagnosis and treatment plan for emergency and outpatient cases. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7405 Advanced Pediatric Medicine (1-12). Medical students will examine patients admitted to the Inpatient Hospitalist Services, write daily entries into the medical record, develop and execute plans for patient care, enter orders into the medical record, and make daily rounds on all patients. Students will participate in all academic activities, including simulation training and didactic

lectures, provided to the students, residents, and fellows of the Hospitalist Service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7420 Pediatric Cardiology Elective (1-12). This rotation will occur in both the inpatient and outpatient settings, with medical students participating in the care of patients admitted to cardiology service, patients requiring cardiac consultation, and outpatient care visits. Medical students are expected to examine patients admitted to the hospital and make daily rounds on all patients on the cardiology service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7422 Pediatric Cardiovascular Surgery Elective (1-12). Medical students will examine patients admitted to the Cardiovascular Surgery service, write daily entries into the medical record, develop plans for care, enter orders into the medical record, and make daily rounds on all patients. Students will participate in all academic activities, including simulation training and didactic lectures, provided to the students, residents, and fellows of the Cardiovascular Surgery. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7425 Pediatric Pulmonology Elective (1-12). Medical students work closely with the Division of Pediatric Pulmonology and the Respiratory Therapy Department. Students are exposed to the importance and value of pulmonary function testing in the diagnosis and follow-up of acute and chronic pulmonary problems, interpretation of blood gases, and the assessment and management of patients seen in the division. Special emphasis is placed on the student's understanding of the interpretation of blood gases in the presence of different medical problems and the pathophysiology of pulmonary diseases. Emphasis is also given to clinical aspects of asthma, bronchopulmonary dysplasia (BPD), and cystic fibrosis. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7430 Pediatric Endocrinology Elective (1-12). Under the supervision of FIU faculty, students will see patients with both common and rare disorders of the Endocrinology system in the pediatric out-patient setting and the inpatient consultation service. Students are expected to longitudinally follow patients seen as part of the inpatient endocrinology consult service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7433 Pediatric Gastroenterology Elective (1-12). Medical students will perform routine histories and physical examinations on all gastroenterology patients, with emphasis on clinical diagnosis and treatment. Students are expected to take an active role in the management of gastroenterology patients in both inpatient and outpatient settings. Students will also participate in endoscopic procedures. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7438 Pediatric Genetics Elective (1-12). The student will participate in the evaluation and management of children with metabolic/genetic disorders or of those children suspected of having such disorders. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7440 Pediatric Hematology Elective (1-12). Medical students will evaluate and follow hematology and oncology patients in both the inpatient and outpatient

settings. Students will attend all hematology-oncology educational conferences. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7445 Pediatric Nephrology Elective (1-12). Students will participate in the evaluation and management of children with renal diseases. They will do so by performing histories and physical examinations, evaluating the laboratory data obtained, and formulating a therapeutic plan. A second portion of this elective will consist of the active participation at conferences in which the pathology of the patients will be discussed. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7450 Pediatric Allergy and Clinical Immunology Elective (1-12). The student, under direct supervision, will participate in clinics and private patient care in the area of allergy and immunology. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7454 Pediatric Infectious Disease Elective (1-12). Medical students examine patients admitted to the Pediatric Infectious Diseases Unit, write daily entries into the medical record, develop plans for care, enter orders into the medical record, and make daily rounds on all patients. Students participate in all academic activities, including simulation training and didactic lectures, provided to the students, residents, and fellows of the Pediatric Infectious Diseases Unit. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7456 Pediatric Rheumatology Elective (1-12). Students, under direct supervision, will participate in the evaluation and management of patients with rheumatologic disorders. During this rotation, students will be exposed to the wide spectrum of rheumatologic disorders of infancy, childhood and adolescence, from Systemic Lupus Erythematosus and Juvenile Arthritis to the still ill-defined Vasculitis. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7460 Pediatric Neonatology Elective (1-12). Medical students will examine patients admitted to the Pediatric Neonatology Unit, write daily entries into the medical record, develop plans for care, enter orders into the medical record, and make daily rounds on all patients. Students will participate in all academic activities, including simulation training and didactic lectures, provided to the students and residents of the Neonatology Unit. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7462 Pediatric Intensive Care Elective (1-12). Medical students will examine patients admitted to the Pediatric Intensive Care Unit, write daily entries into the medical record, develop plans for care, enter orders into the medical record, and make daily rounds on all patients. Students will participate in all academic activities, including simulation training and didactic lectures, provided to the students, residents, and fellows of the Pediatric Intensive Care Unit. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7470 Pediatric Neurology Elective (1-12). The medical student will perform histories and physical examinations on patients with neurological problems, develop diagnostic and treatment plans, and discuss them

in detail with a faculty member. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7490 Pediatric Surgery Elective (1-12). This rotation will give students more advanced exposure to the practice of pediatric surgery through hands-on instruction in the in-patient management of surgical patients in the NICU, PICU, and general floors. By the end of the rotation, students will understand the unique anatomic, physiologic, metabolic issues in infants, children, and adolescents with surgical problems. Students will be able to demonstrate competency in the diagnosis and management of common pediatric surgical issues. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7492 Advanced Pediatric Surgery (1-12). Advanced Pediatric Surgery, combining in-patient, emergency, and out-patient experiences, gives the student, under the direction of FIU faculty, increased responsibility for decisions made for the total care of the pediatric surgical patient. This rotation will expose students to the unique anatomic, physiologic, and metabolic issues seen in infants, children, and adolescents with surgical issues. Students will gain hands-on experience in the in-patient management of surgical patients in the NICU, PICU, and general wards; with focus on hands-on instruction and experience in pre- and post-operative care. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7494 Pediatric Orthopedic Surgery Elective (1-12). The section of Orthopedics presents to the fourth-year student a comprehensive outline of the spectrum of orthopedic surgery as practiced in a pediatric setting. The student is involved in an intensive in-patient experience and has increased responsibility, involving primary workup of new patients and writing orders. The student also performs procedures such as evaluating patients, taking an orthopedic history, performing a physical examination of the musculoskeletal system, assisting in the operating room, and being involved in postoperative care. The student is involved in the management of orthopedic trauma and is expected to participate with the orthopedic surgery team in the diagnosis, surgical treatment, and postoperative management of orthopedic trauma patients. The student may participate directly with patients in the emergency department, operating room, intensive care unit, and the orthopedic unit. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7497 Pediatric Urology Elective (1-12). In this rotation, the student will acquire knowledge of pediatric urology and urologic anatomy; develop an understanding of and ability to perform a pediatric urologic history and physical exam; interview and present patients; develop an understanding of emergent pediatric urologic issues as well as common urologic issues; develop an understanding of a spectrum of pediatric urologic procedures/surgeries; develop an understanding of perioperative urologic issues of both urologic and non-urologic patients; and develop an understanding of the role of a pediatric urologist in the care of patients and when an appropriate referral should be made (emergent or routine). The student will function as a supervised member of the urologic team, interacting with faculty and resident staff and participating in urologic clinics and in the operating room. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7500 Pediatric Dermatology Elective (1-12). Medical students will observe the diagnosis and treatment of dermatologic problems in the weekly Dermatology Clinic. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7505 Pediatric Emergency Medicine Elective (1-12). Medical students will examine and evaluate patients presenting to the Pediatric Emergency Room. Students are expected to make entries into the electronic medical record, develop plans for care, and enter orders. Students will participate in all academic activities, including simulation training and lectures, provided to the Pediatric Emergency Medicine fellows and Pediatric residents. Students are expected to expand their knowledge of Pediatric Emergency Medicine with a focus on acute airway management, acute evaluation of the pediatric trauma patient, evaluation of the pediatric acute abdomen, fever in children, and the management of minor soft tissue injuries. Skills and knowledge will be acquired through directed readings, patient care, and simulation scenarios. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7531 Anatomic and Clinical Pathology Elective (1-12). This elective will provide an introduction and overview to the practice of pathology and is aimed at the student who may be considering pathology as a career. The student will be exposed to anatomic pathology (surgical, autopsy and cytopathology) and clinical pathology (clinical chemistry, hematology, microbiology and transfusion medicine). Molecular pathology will also be touched upon. The student will have access to the entire laboratory but will spend the most time in sign-out sessions and clinical conferences with the attending pathologists and residents. The student will learn pathology but will also experience what a career in pathology is like in a cordial setting surrounded by enthusiastic physicians. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7537 Pediatric Pathology Elective (1-12). This elective will allow the student to become familiar with, observe, and participate in the daily activities in the pediatric pathology department of a large tertiary care Children's Hospital. Students will be exposed to both anatomic pathology and clinical laboratory medicine with emphasis on neonatal and pediatric disease processes. They will also gain an appreciation of performance of laboratory tests and their interpretation, quality control and cost-effectiveness. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7550 Ophthalmology Elective (1-12). The clinical rotation in ophthalmology provides students with a focused and in-depth experience in the evaluation, diagnosis, and management of ophthalmic conditions. Students spend substantial time in the clinic and the operating room in general ophthalmology or their ophthalmologic subspecialty of interest. Students are expected to be actively involved in the workup of patients with various presenting concerns; and to interpret and present their findings and suggested clinical management to the attending physician. Students also have the opportunity to perform research in a preferred area of interest. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7570 Orthopedic Surgery Elective (1-12). The section of Orthopedics presents to the student a comprehensive outline of the spectrum of orthopedic surgery as practiced in a community hospital. The student is involved in an intensive in-patient experience and has significantly increased responsibility, involving primary workup of new patients and writing orders. The student performs procedures such as evaluating patients, taking an orthopedic history, and performing a physical examination of the musculoskeletal system. The student should improve his or her ability to manage complex patient presentations, including diagnosing and treating common adult orthopedic problems. The student should develop advanced skills in fracture treatment and cast application. He or she should be involved in joint replacement surgery and management of postoperative adult orthopedic patients. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7580 Physical Medicine and Rehabilitation Elective (1-12). This elective offers students experience in the diagnosis and management of patients with a variety of neuro-muscular diagnoses such as stroke, spinal cord injury, traumatic brain injury, and neuro-degenerative disorders such as multiple sclerosis. Students may treat patients with musculo-skeletal disorders such as amputation, total hip arthroplasty, total knee arthroplasty, and multiple trauma victims. Students attend physical, occupational, and speech therapy sessions with their patients to learn the daily process of rehabilitation. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7590 Oral and Maxillofacial Surgery Elective (1-12). This elective is an opportunity for medical students to expand their knowledge in anatomy and physiology of the oral cavity, maxillofacial region, the neck, and their adnexal structures to the extent of being capable of recognizing abnormal findings. Students also learn about the surgical management of oral and head and neck pathology and the correction of congenital and traumatic deformities. Acute trauma care is a major component of this service. Students have the opportunity to perform minor procedures in the hospital clinic, as well as the emergency room. Students observe and participate in surgical procedures involving oral and maxillofacial pathology, IV sedation, infections, major hard and soft tissue trauma, reconstruction, and dento-craniofacial deformities. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7592 Otolaryngology/ENT Elective (1-12). This clinical elective exposes medical students to the surgical subspecialty of Otolaryngology-Head and Neck Surgery, also known as Ear, Nose and Throat (ENT). Medical students work directly with clinical team in the operating room, inpatient setting, and outpatient clinic caring for patients with a variety of medical and surgical diseases affecting the head and neck region. Students are expected to be an active member of the patient care team; they should participate in diagnostic evaluations, present their findings to the attending physician, and synthesize assessments and plans. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7600 General Surgery Elective (1-12). The student works directly with general and vascular surgeons. During the rotation, the student is exposed to all phases of patient

care, including outpatient clinic, the operating room and hospital. Emphasis will be placed on the initial assessment, physical examination and preoperative evaluation of surgical patients. When appropriate, the student will follow individual patients whose cases are particularly instructive. While no formal projects are required, ample opportunity exists for independent projects as dictated by the student's special interests. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7601 Advanced General Surgery (1-12). Advanced General Surgery, the student works directly with general and other subspecialty surgeons. During the rotation, the student is exposed to all phases of patient care, including outpatient clinic, the operating room and hospital. Emphasis will be placed on initial assessment, physical examination and preoperative evaluation of surgical patients. When appropriate, the student will follow individual patients whose cases are particularly instructive. While no formal projects are required, ample opportunity exists for independent projects as dictated by the student's special interests. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7605 Vascular Surgery Elective (1-12). The goal of the rotation is to provide students with a thorough understanding of the diseases of the peripheral vascular systems - arterial, venous, and lymphatic. Those considering a career in vascular surgery can gauge if the specialty meets their interests and skills while those planning to choose other fields can learn more than enough to know when referral to a vascular surgeon is appropriate. Students will work with our vascular surgeons in the office, hospital wards, operating room, interventional suite, and wound center to learn about the diagnosis and management of the full spectrum of vascular diseases. They will be exposed to patients with carotid artery disease, aortic and peripheral artery aneurysms, peripheral artery occlusive disease, dialysis access needs, venous thrombosis, varicose veins, and chronic wounds. They will be able to assist in open surgeries and in balloon angioplasty/stent procedures. There will also be opportunities for clinical research if desired. There will be no night or weekend call. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7632 Cardiothoracic Surgery Elective (1-12). The goal is to provide fourth year medical students with a special interest in Cardiothoracic Surgery with the opportunity to become more familiar with the pathophysiology and clinical presentation of the most common cardiothoracic diseases. It is expected that the medical student will be part of the Cardiothoracic Surgical team involved in the daily routine including the operating room, the cardiothoracic intensive care unit and floor. Some exposure to catheter based therapy in the hemodynamics room (cath lab) will also be included. Because of the short duration of the rotation, students will have exposure to both the cardiac and thoracic pathways. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7640 Bariatric and Minimally Invasive Surgery Elective (1-12). This 4-week rotation will give the student exposure to surgical treatments for morbid obesity and the use of minimally invasive surgery in a number of conditions affecting the GI tract, abdominal wall, endocrine

glands and spine. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7645 Surgical Oncology Elective (1-12). The goal of this elective is to introduce the student to the surgeon's role in the multidisciplinary management of patients with cancer. The program includes the evaluation and management of patients with malignant and benign solid tumors and their surgical management. The full spectrum of care includes medical oncology, radiation oncology and nuclear oncology. The experience will include outpatient clinics, in-patient rounds/consults, surgery and exposure to clinical trials and clinical research. The students will attend and present at weekly multidisciplinary tumor conferences, attend cancer committees, and participate in monthly journal clubs. The opportunity to participate in clinical research will be made available to interested students. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDE 7650 Neurosurgery/Neuroscience Elective (1-12). The 4-week Neurosurgery Elective will assign interested students to faculty neurosurgeons at one of our affiliated facilities. This rotation presents the student the broad-spectrum of neurosurgical conditions and procedures encountered in a tertiary hospital setting. Students are expected to be involved in all aspects of pre-operative, intra-operative, and post-operative care; including care provided in the inpatient, outpatient, and surgical settings. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7660 Plastic and Reconstructive Surgery Elective (1-12). The Plastic and Reconstructive Surgery Elective is a 4 week rotation designed to expose students to a wide variety of clinical problems and techniques commonly encountered in the field of plastic surgery. Students will be exposed to all subspecialties in plastic surgery, including general reconstructive surgery, pediatric/craniofacial surgery, hand surgery, and aesthetic surgery. Students will rotate through several offices/hospitals during the rotation and will be expected to participate in pre- and post-operative office visits, hospital visits, and surgeries. In addition, students will be expected to master wound closure techniques and other basic plastic surgery technical skills. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7661 Breast Surgery Elective (1-12). The Breast Surgery Elective focuses exclusively on the clinical management of benign and malignant breast diseases. The student will become proficient in taking a history, performing a breast examination, and developing a differential diagnosis for breast patients. The student will learn about the surgical management of breast cancer and the integration of other modalities in the overall management of this disease. Working 1-on-1 with an FIU faculty attending surgeon, the student will have some responsibility for inpatient care and will have the opportunity to be first assistant in the operating room. Weekly didactic sessions with the attending physician will cover the most important aspects of breast cancer including biology, diagnostics, prevention, and treatment. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7675 Urology Elective (1-12). In this rotation, the student will acquire knowledge of Urology and urologic

anatomy; develop an understanding of and ability to perform a urologic history and physical exam; interview and present patients; develop an understanding of emergent urologic issues as well as common urologic issues with an emphasis on the acute scrotum, urinary tract infections, urinary stones, incontinence, benign prostatic hyperplasia, erectile dysfunction, hematuria and prostate cancer/PSA testing by both didactic and practice based learning; develop an understanding of a spectrum of urologic procedures/surgeries, including foley catheterization, cystoscopy, and transrectal ultrasound and prostate biopsy by observation and participation; develop an understanding of peri-operative urologic issues both urologic and non-urologic patients via inpatient encounters; and develop an understanding of the role of a Urologist in the care of both male and female patients and when an appropriate referral should be made (emergent or routine). The student will function as a supervised member of the urologic team, interacting with faculty and resident staff and participating in urologic clinics and in the operating room. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7676 Colorectal Surgery Elective (1-12). This 4-week rotation will introduce the student to the diagnosis and management of disorders affecting the colon and rectum; including conditions such as Crohn's disease, Ulcerative colitis, familial polyposis, colorectal cancer and disorders of evacuation. Students will be an integral member of a patient care team that includes both FIU faculty attending surgeons and surgical residents. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7682 Trauma Surgery Elective (1-12). This elective provides the 4th year medical student experience in the evaluation and treatment of the patient with severe trauma. The student will be initially involved in the assessment and stabilization of the patient in the Trauma Room in the ER and will then be involved in the preoperative management, intraoperative treatment and postoperative recovery of the patient. Students will be exposed to emergency interpretation of imaging and diagnostic studies, ventilatory management, invasive monitoring procedures and interventional procedures such as chest tube insertion, thoracentesis and paracentesis. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7700 Anesthesiology Elective (1-12). This rotation will allow the student supervised hands-on participation in preoperative anesthesiology evaluation, creation of an anesthesia plan, intravenous line placement, induction of general anesthesia and airway management, monitoring of anesthesia, and emergence and postoperative care. Students will also be involved in other procedures commonly performed by anesthesiologists, such as regional blocks for pain control. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7701 Pediatric Anesthesiology Elective (1-12). This rotation will allow the student supervised hands-on participation in preoperative anesthesiology evaluation, creation of an anesthesia plan, intravenous line placement, induction of general anesthesia and airway management, monitoring of anesthesia, emergence and postoperative care in pediatric patients. Students will also be involved in other procedures commonly performed by

anesthesiologists, such as regional blocks for pain control. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7710 Emergency Medicine Elective (1-12). This rotation is intended to make the student familiar with the wide range of clinical conditions, minor to major which are responsible for the patient seeking care at an Emergency Room. The student will practice skills in the recognition and management of acute life-threatening conditions and exacerbation of serious disease in a strictly supervised setting. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7763 Diagnostic Radiology Elective (1-12). This rotation is intended to give students an introduction to the basics of diagnostic imaging, the appropriate choice of imaging method for given clinical problems, and the side-effects and risks associated with each. Students will become familiar with imaging findings in common clinical conditions. The rotation will involve online modules, small group sessions and 'virtual' and real reading room sessions. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7765 Interventional Radiology Elective (1-12). This rotation is intended to give students an introduction to the basics of Interventional Radiology (IR); including IR techniques and procedures, and an understanding of the field's role in the management of medical and surgical problems. Students will participate in the workup, treatment and follow-up of patients undergoing various IR procedures. Students will also gain experience in the interpretation of radiologic imaging such as ultrasound, CT, and MRI. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7769 Pediatric Radiology Elective (1-12). This elective will expose students to the essentials of pediatric radiology. Students will spend time working with radiologists who are reading plan films, ultrasounds and cross-sectional imaging studies; as well as those who are performing basic radiologic procedures including fluoroscopy and nuclear medicine. By the end of the rotation, students will be familiar with topics and concerns specific to imaging studies in the pediatric population. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7780 Radiation Oncology Elective (1-12). This rotation provides students with supervised participation in the care of radiation oncology patients. This includes the diagnostic/clinical evaluation of the patient's disease and the development of treatment plans involving radiation therapy. Students are exposed to state-of-the-art radiation oncology equipment and, during the planning phase, are shown the use of CT imaging with plain and contrast-enhanced techniques for therapy planning and positioning of the patient for radiation treatment. They are exposed to the management of the most common tumors seen in our community, including breast, prostate, lung, GI, skin, and head and neck cancer. Students are introduced to palliative care and the incorporation of integrative medicine in the overall care of the patient. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7800 Neurology Elective (1-12). This course is designed to give students an advanced experience in the field of Neurology. By the completion of the rotation,

students will be able to perform a detailed neurological examination and describe the neuro-anatomic phases of the examination and any findings. There will be an emphasis of the diagnosis and treatment of common neurologic conditions including headache, neck pain, back pain, peripheral neuropathy, dementia, seizures, multiple sclerosis, pain management, cerebrovascular disease, and altered mental status. Students will additionally receive basic training in reading EMG/NCS and EEG. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7807 Neuro-Oncology Elective (4). The management of patients with primary and metastatic brain malignancies is a complex endeavor. Treatment strategies for these patients often involve a multi-disciplinary approach. This rotation will provide exposure to all of the main modalities who care for patients with neurologic malignancies including radiation oncology, neurosurgical oncology, and medical neuro-oncology, with a focus on medical neuro-oncology. Outside of the core subspecialties, there are opportunities for time in neuro-radiology, review of current surgical cases with the pathology department, and exposure to rehab and palliative medicine through subspecialty

MDE 7820 Pain Management Elective (1-12). Students will rotate in an ambulatory setting at a pain management practice under the direct supervision of an FIU faculty member. This rotation will provide students with exposure to the evaluation and management of acute and chronic pain including: upper and lower back pain; chronic arthritis; disk disease; radicular and neuropathic pain syndromes; and pain associated with malignancy. Students will gain an understanding of common procedures used in pain management: local anesthesia, joint injections, epidural injections, peripheral nerve blocks, and trigger point injections. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7843 Community Psychiatry Elective (1-12). This 2-week or 4-week rotation allows Period 4 medical students to refine the skills they acquired in the Period 3 Psychiatry Clerkship through further inpatient, outpatient and emergency psychiatry experiences. Students will focus on honing their skills related to psychiatric interviewing, diagnostic reasoning, and treatment planning. Students will participate in the initial assessment of patients presenting for admission and will follow inpatients throughout their hospital stay. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7845 Advanced Psychiatry Elective (1-12). This rotation allows Period 4 medical students to become familiar with the clubhouse international model of psychosocial rehabilitation for people with mental illness by immersing themselves in the patient care tasks of the work-unit. To accomplish this, students will interview and contribute to diagnosing and creating treatment plans for people with mental illness who are homeless, victims of human trafficking, involved in jail diversion programs and people with neurodevelopmental disorders. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7862 Adult Inpatient Psychiatry Elective (1-12). This 2-week or 4-week rotation allows Period 4 medical students to refine the skills they acquired in the Period 3 Psychiatry Clerkship through further inpatient and

emergency psychiatry experiences. Students will focus on honing their skills related to psychiatric interviewing, diagnostic reasoning, and treatment planning. Students will participate in the initial assessment of patients presenting for admission and will follow inpatients throughout their hospital stay. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7871 Child Inpatient Psychiatry Elective (1-12). The 2-week or 4-week rotation exposes Period 4 medical students to child and adolescent psychiatry in a hospital setting and allows them to refine the skills they acquired in the Period 3 Psychiatry Clerkship through further inpatient and emergency psychiatry experiences. Students will focus on honing their skills related to psychiatric interviewing, diagnostic reasoning, and treatment planning. Students will participate in the initial assessment of patients presenting for admission and will follow inpatients throughout their hospital stay. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7880 Forensic Psychiatry Elective (1-12). This rotation exposes interested Period 4 medical students to the interactions between the psychiatric and legal systems by providing the opportunity to rotate in a forensic psychiatric hospital. Students will learn the clinical, legal and ethical issues at the interface between psychiatry and the law and will refine the skills they acquired in the Period 3 Psychiatry Clerkship through further inpatient and assessment experiences. Students will focus on honing their skills related to psychiatric interviewing, diagnostic reasoning, and treatment planning. Students will participate in the initial assessment of patients presenting for admission and will follow inpatients throughout their hospital stay. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7883 Geriatric Psychiatry Elective (1-12). This rotation exposes interested Period 4 medical students to the practice of geriatric psychiatry. Students will refine the skills they acquired in the Period 3 Psychiatry Clerkship through further inpatient and assessment experiences. Students will focus on honing their skills related to psychiatric interviewing, diagnostic reasoning, and treatment planning. Students will participate in the initial assessment of patients presenting for admission and will follow inpatients throughout their hospital stay. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDE 7930 Anatomy Elective (1-12). The 4-week Anatomy Elective will allow students the opportunity to gain a deeper insight into human anatomy and develop the skills and knowledge required for surgical internships and subspecialties. This will allow the students to develop an understanding of the anatomical basis of successful surgical interventions and the risks involved. Under the direct supervision of faculty anatomists and clinicians, students will perform dissections of all relevant body regions in groups of 4-6 students. Moreover, students will assist in the laboratory teaching sessions of the courses "Structure of the Human Body" and "Musculoskeletal Anatomy for Physiotherapy Students." Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7122 Family Medicine Subinternship (1-12). Family medicine is the specialty that focuses on care for the whole person regardless of age, sex, or disease, set within

his or her social and community context. The Family Medicine Sub-Internship consists of both an ambulatory and inpatient experience. Under the supervision of FIU HWCOC faculty, students assume an appropriate level of clinical independence; allowing them to practice diagnostic and clinical reasoning, disease management skills, and patient communication and education for patients of varying ages and comorbidities. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7160 Obstetrics and Gynecology Sub-Internship (4). During the obstetrics and gynecology (ob/gyn) sub-internship, the student is responsible for performing all intern level activities under supervision including, but not limited to: evaluating patients' presenting issues and all medical concerns, admitting patients, managing labor and delivery, and formulating a management plan. The sub-intern will demonstrate the ability to counsel and obtain informed consent for vaginal and cesarean deliveries and postpartum tubal ligations. S/he will interpret fetal heart rate tracings and formulate a plan of care for an abnormal tracing. S/he will be responsible for crosscoverage of postpartum patients during labor and delivery shifts. S/he may also be involved in the gynecologic care of patients, including pre-, intra- and post-operative management. The student is expected to participate in all of the educational activities of the Department of Obstetrics and Gynecology during the sub-internship. Prerequisite: Student must be in his/her fourth year and have successfully completed all core third year clerkships.

MDI 7200 Internal Medicine Subinternship (1-12). The Sub-Internship in Internal Medicine is intended to prepare students to effectively care for medical conditions commonly encountered during inpatient rotations, including ward emergency scenarios. Building on the skills gained during period 3, students will take a more active role in patient care; including admitting patients, documenting in the electronic medical record, entering orders, and coordinating and implementing the patient's care plan. This rotation will provide necessary skills to be successful during their first year of post-graduate education. The sub-intern will fulfill clinical and academic responsibilities as an integral team member of an inpatient medical service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7340 ICU Subinternship (1-12). This rotation is intended to prepare students to obtain necessary diagnostic and therapeutic skills to effectively care for patients diagnosed with critical medical disorders. Subinterns will work in a team under the direct supervision of a pulmonary/critical care fellow and a senior resident. Students will assist in the admission, evaluation, and management of patients admitted to the Medical Intensive Care Unit (MICU). Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7341 Acute Coronary Care (CCU/CICU) Subinternship (1-12). This rotation is intended to prepare students to obtain necessary diagnostic and therapeutic skills to effectively care for patients diagnosed with critical cardiac disorders. Students will become an integral part of the CICU team consisting of cardiology attending, fellows, internal medicine residents and interns. Students will assist in the admission, evaluation, and management of patients admitted to the CICU. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7400 Pediatric Medicine Subinternship (1-12). The Pediatric Medicine Sub-internship gives the student increased responsibility for decisions made for the total care of the patient. In general, the student is expected to function more as an intern than as a third year student. During the sub-internship, the student will be exposed to all competencies central to medical education; including interpersonal skills, professionalism, practice and systems based learning, patient care, and medical knowledge. Sub-interns are expected to examine patients admitted to the inpatient hospitalist services, write daily progress notes and enter orders in the medical record, develop and assist in implementation of plans for care, and make daily rounds on all patients. Students will participate in all academic activities of the Hospitalist Service, including simulation training and didactic lectures. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7463 Pediatric Intensive Care Subinternship (1-12). The Pediatric Intensive Care Subinternship is a unique opportunity for students to learn about the pathophysiology, pharmacology, social aspects, and clinical skills found in a world-class pediatric intensive care unit. The faculty, fellows, residents, and staff hope that students utilize this experience to further their knowledge of the critical care of children and to see how family centered care in all fields of medicine contributes to an improved overall medical environment. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7480 Pediatric Orthopedic Surgery Subinternship (1-12). The Orthopedics sub-internship will present the sub-intern with a comprehensive outline of the spectrum of orthopedic surgery as practiced in a community hospital. The sub-intern will be involved in an intensive in-patient experience and will have significantly increased responsibility; involving taking an orthopedic history, performing a focused musculoskeletal exam, participating in the primary workup of new patients and writing orders. Over the course of the rotation, the sub-intern should improve his or her ability to manage both common and complex patient presentations. The sub-intern should develop advanced skills in fracture treatment and cast application. He or she should be involved in a wide array of pediatric orthopedic surgeries and the management of postoperative pediatric orthopedic patients. The sub-intern will participate in daily patient care tasks, take night call, write notes, and dictate discharge summaries. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7490 Pediatric Surgery Subinternship (1-12). The Pediatric Surgery sub-internship, combining in-patient, emergency, and out-patient experiences, gives the student increased responsibility for decisions made for the total care of the pediatric surgical patient. This rotation will expose students to the unique anatomic, physiologic, and metabolic issues seen in infants, children, and adolescents with surgical issues. In general, the student is expected to function as an intern, or junior resident. Students will gain hands-on experience in the in-patient management of surgical patients in the NICU, PICU, and general wards; with focus on hands-on instruction and experience in pre- and post-operative care. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7570 Orthopedic Surgery Subinternship (1-12). The section of Orthopedics will present to the student a

comprehensive outline of the spectrum of orthopedic surgery as practiced in a community hospital. The student will be involved in an intensive inpatient experience and will have significantly increased responsibility, involving primary workup of new patients and writing orders. The student will also perform procedures such as evaluating patients, taking an orthopedic history, and performing a physical examination of the musculoskeletal system. The student should improve his or her ability to manage complex patient presentations, including diagnosing and treating common adult orthopedic problems. The student should develop advanced skills in fracture treatment and cast application. He or she should be involved in joint replacement surgery and management of postoperative adult orthopedic patients. The student will participate in daily care, take night call, write notes, and dictate discharge summaries. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDI 7600 General Surgery Subinternship (1-12). This course is designed for students who desire a greater in-depth experience in general surgery or who are seriously considering surgery as a possible career choice. It serves as an exploratory path for a planned career in general surgery or other surgical sub-specialties. In this role, the subintern will have more responsibilities than a period 3 clerkship student. The student will examine patients, assist in surgery, participate in pre-operative and post-operative care and will also be encouraged to develop his/her clinical and technical skills. The student will be expected to participate in all of the educational activities of the Department of Surgery during the course of his/her rotation. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7620 Cardiothoracic Surgery Subinternship (1-12). The goal of the Cardiothoracic Surgery Sub-internship is to give fourth year medical students with a specific interest in the field the opportunity to become more familiar with the pathophysiology and clinical presentation of the most common cardiothoracic diseases. It is expected that the medical student will become an integrated part of the Cardiothoracic Surgical Team and assume the role of a sub-intern involved in all aspects of pre-operative, peri-operative, and post-operative patient care; including in the operating room, the cardiothoracic intensive care unit (CTICU) and general inpatient floor. Some exposure to catheter based therapy in the hemodynamics room (cath lab) will also be included. Given the four-week duration of the sub-internship, the thoracic and cardiac pathways will be integrated in order to provide students with exposure to both fields. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7660 Plastic and Reconstructive Surgery Subinternship (1-12). The Subinternship in Plastic Surgery is a 4-week experience designed to provide the student with advanced exposure to the clinical problems and techniques commonly encountered in the field of plastic surgery, with the goal of preparing the student for residency in this discipline. A student may choose to focus on pediatric plastic surgery, hand surgery, general reconstructive surgery, or aesthetic surgery. Students will rotate through a single setting during the rotation and will develop working relationships with the surgical preceptor. The student is expected to participate in pre- and post-operative office visits, hospital visits, and surgeries. In

addition, the student will be expected to further advance his or her basic plastic surgery technical skills. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7674 Urology Subinternship (1-12). In this rotation, the student will acquire knowledge of Urology and urologic anatomy; develop an understanding of and ability to perform a urologic history and physical exam; interview and present patients; develop an understanding of emergent urologic issues as well as common urologic issues with an emphasis on the acute scrotum, urinary tract infections, urinary stones, incontinence, benign prostatic hyperplasia, erectile dysfunction, hematuria and prostate cancer/PSA testing by both didactic and practice based learning; develop an understanding of a spectrum of urologic procedures/surgeries, including foley catheterization, cystoscopy, and transrectal ultrasound and prostate biopsy by observation and participation; develop an understanding of peri-operative urologic issues of both urologic and non-urologic patients via inpatient encounters; and develop an understanding of the role of a Urologist in the care of both male and female patients and when an appropriate referral should be made (emergent or routine). The student will function as a supervised member of the urologic team, interacting with faculty and resident staff and participating in urologic clinics and in the operating room. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDI 7680 Trauma/Acute Care Surgery Subinternship (1-12). The Trauma/Acute Care Surgery subinternship is intended to provide the student with in-depth knowledge of patient care as it relates to trauma and non-trauma emergency surgical diseases. The student is expected to function at the level of a junior resident and be on the scene for first-line evaluation and management of patients in the emergency room. In addition, it is expected that the student maintains close follow-up of the patient's progress on a daily basis. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDR 7060 Medical Ethics and Humanism Elective (1-12). Offered as a two-week rotation, with the option for an additional two-credit longitudinal component; this elective is designed for the individualized study of topics in clinical, research, and service-learning ethics and humanism in medicine. Students will examine ethical and humanistic issues in medicine that emerge in the clinical setting, lab, or community. Students will read, write and analyze case vignettes, attend community ethics activities (e.g. Hospital ethics committee meetings), develop a scholarly project, and contribute to an ethics research project. Humanism in medicine is the recognition that both practitioner and patient are human beings, with the shared values and experiences of humanity. This provides a framework for improved clinical interactions and addresses phenomena such as ethical leadership, inclusive communication, and burnout. The course director will create learning contracts tailored to students' individual interests, objectives, and clinical schedules. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDR 7910 Research Scholarship (1-12). The Research Scholarship Course aims to develop competencies required to do research as a lead investigator or colead investigator. This course provides students the opportunity to be exposed to and supported through the completion of

a research project in a role that very closely resembles the role of a primary investigator or first author researcher. The student should be a full participant and a crucial element in the generation of (or fully understand, if assigned to an ongoing project) the research idea (research question or hypothesis), the development of the project proposal, data collection tools, data collection activities, analysis, interpretation, and the writing of a short document summarizing the experience. Potential research projects could encompass, but are not to be limited to the areas of basic sciences and community-based clinical and epidemiological research. Prerequisite: Enrolled in the Herbert College of Medicine.

MDS 7140 Geriatric Medicine Selective (1-12). The Geriatric Medicine Elective is designed to allow fourth-year medical students the opportunity to participate with increased responsibility in the care of geriatric patients. Students learn the various components of a comprehensive work-up (e.g., functional scales, mini-mental exam). Students participate with the geriatric team in hospital consultations and follow-ups. This rotation is designed to supplement and introduce students to aspects of geriatrics not fully covered on a busy internal medicine inpatient and outpatient service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7160 Obstetrics/Gynecology Selective (1-12). This fourth year clinical selective in Obstetrics and Gynecology offers the student the opportunity to enhance his/her skills in outpatient diagnosis and management. The student is expected to adhere to the schedule agreed upon with the FIU faculty member, including call duty, rounding, and other clinical responsibilities (ie. those related to surgery, outpatient clinic, or the labor floor). The rotation may be tailored based on the student's specific goals and learning objectives; the student should reach out to the course director to discuss special considerations. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7161 Gynecology Oncology Selective (1-12). This four week selective is intended for students who have already completed the basic core clerkship in OB/GYN and are interested in enhancing their exposure to the subspecialty of Gynecologic Oncology. The student will be provided experience in the inpatient and outpatient management of patients with pre-malignant and malignant conditions of the genital tract. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7163 Gynecology Surgery Selective (1-12). This four week course will introduce the student to gynecologic care in the adult female, ranging from routine care to the evaluation and surgical treatment of complex gynecologic conditions. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7180 Perinatology/Maternal Fetal Medicine Selective (1-12). This Period 4 clerkship allows students to experience the full range of maternal-fetal medicine and familiarizes students with the diagnosis and management of pregnant patients who have obstetrical, medical, or surgical complications. Students receive experience in ultrasound, genetics, genetic counseling, and the management of high-risk obstetrical patients. Students follow patients through the inpatient antepartum service and participate in the care of high-risk obstetrical patients admitted to the hospital. Attendance at the following

conferences is required: FHR tracing and labor management review, high risk obstetrics conference, grand rounds, prenatal - neonatology conference, and journal club. Students are required to take call on the Labor and Delivery Unit one night per week. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7204 Hospitalist Service Selective (1-12). The four week Hospitalist Service Selective is designed to allow fourth year students the opportunity to participate with increased responsibility in the care of patients admitted to the internal medicine/hospitalist service. Students provide longitudinal care for hospitalized patients from the time of consultation in the emergency room to the patient's discharge and/or transfer. Students' schedules vary according to the needs of each site; students are expected to take call every fourth night. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7220 Cardiology Selective (1-12). This hospital-based selective aims to improve the student's understanding of the pathophysiology of common cardiovascular diseases, indications for invasive and noninvasive studies, and first-line treatment of prevalent cardiovascular disorders. This rotation should improve the student's ability to evaluate acute and chronic cardiac disorders, appropriately take a patient history and conduct a physical exam, interpret an EKG, and develop a differential diagnosis. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7245 Pulmonology Selective (1-12). Through time spent both on the inpatient pulmonary consultation service and in the outpatient setting, this rotation will prepare students to effectively care for common cardiopulmonary disorders. In particular, students will be exposed to radiological interpretation of chest imaging and the interpretation of pulmonary function tests. Depending on the site, students will be part of a team with fellows and residents or will be under the direct supervision of a pulmonary specialist. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7270 Gastroenterology/Hepatology Selective (1-12). This course will consist of a four week rotation, which will include inpatient and outpatient gastroenterology and hepatology. Throughout the rotation, students will be assuming primary responsibility of patients under the supervision of gastroenterology attendings. The experience will also allow for participation in varied endoscopic procedures, such as esophageal manometry, and upper and lower endoscopy. During the week, students will participate in pathology and radiology conferences geared to gastroenterology and hepatology cases. The course will concentrate on teaching students how to interpret clinical information and develop therapeutic decision making. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7280 Hematology Oncology Selective (1-12). This rotation is intended to prepare students to learn a basic approach to evaluation, diagnosis, staging and treatment of patients with blood diseases and cancer. Through exposure to patients with these diseases, students will improve their physical diagnosis skills, recognition of complications of disease, and understanding of therapeutic issues. Students will learn concepts of palliative care, end of life and hospice care. The rotation is

mainly inpatient-consult service with some outpatient exposure. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7320 Infectious Disease Selective (1-12). This elective rotation is intended to prepare students to obtain, under direct supervision of an infectious disease faculty, the necessary diagnostic and therapeutic skills to effectively care for patients with infectious disorders from the surgical, transplant, intensive care, OB/GYN, hematologic/oncologic, and general medicine services in a community hospital. Prerequisite Enrolled in the Herbert Wertheim College of Medicine.

MDS 7340 Intensive Care Unit Selective (1-12). This rotation is intended to prepare students to obtain necessary diagnostic and therapeutic skills to effectively care for patients diagnosed with critical medical disorders. Students work under direct the supervision of the ICU attending physician or as a member of a teaching team under the supervision of the attending physician, pulmonary/critical care fellow, and IM residents. Students assist in the admission, evaluation, and management of patients admitted to the Medical Intensive Care Unit. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7341 CCU/CICU Selective (1-12). This rotation is intended to prepare students to obtain necessary diagnostic and therapeutic skills to effectively care for patients diagnosed with critical cardiac disorders. Students will become an integral part of the CICU team consisting of cardiology attending, fellows, internal medicine residents and interns. Students will assist in the admission, evaluation, and management of patients admitted to the CICU. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7342 Cardiothoracic ICU Selective (1-12). This course provides the 4th year medical student with exposure to the multidisciplinary team approach to both the medical and surgical care of the patients needing surgery for Cardiac problems. The student will have experience of patient management from pre-operative through operative to post-operative management. In addition to experience with cardiothoracic surgery, the student will be involved in the medical management of critically ill patients with cardiothoracic problems. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7350 Nephrology Selective (1-12). The 4-week Nephrology Selective offers students the opportunity to learn about the diseases of the kidney and become more skilled in their management. Students will participate in the care of patients with medical renal disease who are seen in the office and also on the renal consult service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7400 Pediatric Medicine Selective (1-12). Medical students will examine patients admitted to the Inpatient Hospitalist Services, write daily entries into the medical record, develop plans for care, enter orders into the medical record, and make daily rounds on all patients. Students will participate in all academic activities, including simulation training and didactic lectures, provided to the students, residents, and fellows of the

Hospitalist Service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7420 Pediatric Cardiology Selective (4). This rotation will occur in both the inpatient and outpatient settings, with medical students participating in the care of patients admitted to cardiology service, patients requiring cardiac consultation, and outpatient care visits. Medical students are expected to examine patients admitted to the hospital and make daily rounds on all patients on the cardiology service. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7460 Pediatric Neonatology Selective (1-12). Medical students will examine patients admitted to the Pediatric Neonatology Unit, write daily entries into the medical record, develop plans for care, enter orders into the medical record, and make daily rounds on all patients. Students will participate in all academic activities, including simulation training and didactic lectures, provided to the students, and residents of the Neonatology Unit. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7462 Pediatric Intensive Care Selective (1-12). Medical students will examine patients admitted to the Pediatric Intensive Care Unit, write daily entries into the medical record, develop plans for care, enter orders into the medical record, and make daily rounds on all patients. Students will participate in all academic activities, including simulation training and didactic lectures, provided to the students, residents, and fellows of the Pediatric Intensive Care Unit. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7490 Pediatric Surgery Selective (1-12). Pediatric Surgery Selective, combining in-patient, emergency, and out-patient experiences, gives the student, under the direction of FIU faculty, increased responsibility for decisions made for the total care of the pediatric surgical patient. This rotation will expose students to the unique anatomic, physiologic, and metabolic issues seen in infants, children, and adolescents with surgical issues. Students will gain hands-on experience in the in-patient management of surgical patients in the NICU, PICU, and general wards; with focus on hands-on instruction and experience in pre- and post-operative care. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7494 Pediatric Orthopedic Surgery Selective (1-12). The section of Orthopedics presents to the fourth-year student a comprehensive outline of the spectrum of orthopedic surgery as practiced in a pediatric setting. The student is involved in an intensive in-patient experience and has increased responsibility, involving primary workup of new patients and writing orders. The student also performs procedures such as evaluating patients, taking an orthopedic history, performing a physical examination of the musculoskeletal system, assisting in the operating room, and being involved in postoperative care. The student is involved in the management of orthopedic trauma and is expected to participate with the orthopedic surgery team in the diagnosis, surgical treatment, and postoperative management of orthopedic trauma patients. The student may participate directly with patients in the emergency department, operating room, intensive care unit, and the orthopedic unit. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDS 7500 Pediatric Emergency Medicine Selective (4).

Medical students will examine and evaluate patients presenting to the Pediatric Emergency Room. Students are expected to make entries into the electronic medical record, develop plans for care, and enter orders. Students will participate in all academic activities, including simulation training and lectures, provided to the Pediatric Emergency Medicine fellows and Pediatric residents. Students are expected to expand their knowledge of Pediatric Emergency Medicine with a focus on acute airway management, acute evaluation of the pediatric trauma patient, evaluation of the pediatric acute abdomen, fever in children, and the management of minor soft tissue injuries. Skills and knowledge will be acquired through directed readings, patient care, and simulation scenarios. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7530 Pathology Selective (1-12). The primary goal of the pathology rotation is to become familiar with the role of the department of pathology and laboratory medicine within the hospital and to learn to interact with the pathologists, pathology house staff (residents), and laboratory personnel. In addition, students should learn some basic concepts in pathology. The pathology department provides and oversees all aspects of laboratory testing (clinical pathology) and provides diagnostic information on tissue specimens (anatomic pathology). The primary activities in which students participate include the daily sign-out of biopsies/surgical specimens, review of autopsies, and various intra and interdepartmental conferences. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7570 Orthopedic Surgery Selective (1-12). The section of Orthopedics presents to the student a comprehensive outline of the spectrum of orthopedic surgery as practiced in a community hospital. The student is involved in an intensive in-patient experience and has significantly increased responsibility, involving primary workup of new patients and writing orders. The student performs procedures such as evaluating patients, taking an orthopedic history, and performing a physical examination of the musculoskeletal system. The student should improve his or her ability to manage complex patient presentations, including diagnosing and treating common adult orthopedic problems. The student should develop advanced skills in fracture treatment and cast application. He or she should be involved in joint replacement surgery and management of postoperative adult orthopedic patients. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7580 Physical Medicine and Rehabilitation Selective (1-12). This selective offers students experience in the diagnosis and management of patients with a variety of neuro-muscular diagnoses such as stroke, spinal cord injury, traumatic brain injury, and neuro-degenerative disorders such as multiple sclerosis. Students may treat patients with musculo-skeletal disorders such as amputation, total hip arthroplasty, total knee arthroplasty, and multiple trauma victims. Students attend physical, occupational, and speech therapy sessions with their patients to learn the daily process of rehabilitation. They learn to perform accurate functional assessments of patients, establish a plan of care for those patients, and provide accurate estimates of goals of the

admission, including length of stay. Students learn comprehensive discharge planning for a newly disabled individual. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDS 7600 General Surgery Selective (1-12). The student works directly with general and vascular surgeons. During the rotation, the student is exposed to all phases of patient care, including outpatient clinic, operating room and hospital. Emphasis will be placed on initial assessment, physical examination and preoperative evaluation. When appropriate, the student follows individual patients whose cases are particularly instructive. Supplemental reading for such cases is encouraged. While no formal projects are required, ample opportunity exists for independent projects as dictated by the student's special interests. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7605 Vascular Surgery Selective (1-12). The goal of the rotation is to provide students with a thorough understanding of the diseases of the peripheral vascular systems – arterial, venous, and lymphatic. Those considering a career in vascular surgery can gauge if the specialty meets their interests and skills while those planning to choose other fields can learn more than enough to know when referral to a vascular surgeon is appropriate. Students will work with our vascular surgeons in the office, hospital wards, operating room, interventional suite, and wound center to learn about the diagnosis and management of the full spectrum of vascular diseases. They will be exposed to patients with carotid artery disease, aortic and peripheral artery aneurysms, peripheral artery occlusive disease, dialysis access needs, venous thrombosis, varicose veins, and chronic wounds. They will be able to assist in open surgeries and in balloon angioplasty/stent procedures. There will also be opportunities for clinical research if desired. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7630 Cardiothoracic Surgery Selective (1-12). The goal is to provide fourth year medical students with a special interest in Cardiothoracic Surgery with the opportunity to become more familiar with the pathophysiology and clinical presentation of the most common cardiothoracic diseases. It is expected that the medical student will be part of the Cardiothoracic Surgical team involved in the daily routine including the operating room, the cardiothoracic intensive care unit and floor. Some exposure to catheter-based therapy in the hemodynamics room (cath lab) will also be included. Because of the short duration of the rotation, students will have exposure to both the cardiac and thoracic pathways. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7640 Bariatric and Minimally Invasive Surgery Selective (1-12). This 4-week rotation will give the student exposure to surgical treatments for morbid obesity and the use of minimally invasive surgery in a number of conditions affecting the GI tract, abdominal wall, endocrine glands and spine. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7641 Surgical Oncology Selective (1-12). The goal of this selective is to introduce the student to the surgeon's role in the multidisciplinary management of patients with cancer. The program includes the evaluation and

management of patients with malignant and benign solid tumors and their surgical management. The full spectrum of care includes medical oncology, radiation oncology and nuclear oncology. The experience will include outpatient clinics, in-patient rounds/consults, surgery and exposure to clinical trials and clinical research. The students will attend and present at weekly multidisciplinary tumor conferences, attend monthly cancer committees, and participate in monthly journal clubs. The opportunity to participate in clinical research will be made available to interested students. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7650 Neurosurgery/Neuroscience Selective (1-12). The 4-week Neurosurgery/Neuroscience Selective will assign interested students to faculty neurosurgeons at one of our affiliated facilities. This rotation presents the student the broad-spectrum of neurosurgical conditions and procedures encountered in a tertiary hospital setting. Students are expected to be involved in all aspects of pre-operative, intra-operative, and post-operative care; including care provided in the inpatient, outpatient, and surgical settings. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7660 Plastic and Reconstructive Surgery Selective (1-12). The selective rotation in plastic surgery is a 4-week rotation designed to expose the student to a wide variety of clinical problems and techniques commonly encountered in the field of plastic surgery. The student will be exposed to all subspecialties in plastic surgery, including general reconstructive surgery, pediatric/craniofacial surgery, hand surgery, and aesthetic surgery. Students will rotate through an in-patient setting during the rotation and will be expected to participate in pre- and post-operative office visits, hospital visits, and surgeries. In addition, the student will be expected to master wound closure techniques and other basic plastic surgery technical skills. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7676 Colorectal Surgery Selective (1-12). This 4-week rotation will introduce the student to the diagnosis and management of disorders affecting the colon and rectum, including conditions such as Crohn's disease, ulcerative colitis, familial polyposis, colorectal cancer, and disorders of evacuation. Students will be an integral member of a patient care team that includes both FIU faculty attending surgeons and surgical residents. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7682 Trauma Surgery Selective (1-12). This selective provides the 4th year medical student experience in the evaluation and treatment of the patient with severe trauma. The student will be initially involved in the assessment and stabilization of the patient in the Trauma Room in the ER and will then be involved in the preoperative management, intraoperative treatment, and postoperative recovery of the patient. Students will be exposed to emergency interpretation of imaging and diagnostic studies, ventilatory management, invasive monitoring procedures and interventional procedures such as chest tube insertion, thoracentesis and paracentesis. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7700 Anesthesiology Selective (1-12). This rotation will allow the student supervised hands-on participation in preoperative anesthesiology evaluation, creation of an anesthesia plan, intravenous line placement, induction of general anesthesia and airway management, monitoring of anesthesia, and emergence and postoperative care. Students will also be involved in other procedures commonly performed by anesthesiologists, such as regional blocks for pain control. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7701 Pediatric Anesthesiology Selective (1-12). This rotation will allow the student supervised hands-on participation in the preoperative anesthesiology evaluation, creation of an anesthesia plan, intravenous line placement, induction of general anesthesia and airway management, monitoring of anesthesia, emergence and postoperative care in pediatric patients. Students will also be involved in other procedures commonly performed by anesthesiologists, such as regional blocks for pain control. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDS 7710 Emergency Medicine Selective (3-5). This rotation is intended to familiarize students with the wide range of clinical conditions, minor to major, which are responsible for the patient seeking care at an emergency department. Students practice skills in the recognition and management of acute life-threatening conditions and exacerbation of serious disease in a strictly supervised setting. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7760 Diagnostic Radiology Selective (1-12). This rotation is intended to give students an introduction to the basics of diagnostic imaging, the appropriate choice of imaging method for given clinical problems and the side-effects and risks associated with each. Students will become familiar with imaging findings in common clinical condition. The rotation will involve online modules, small group sessions and 'virtual' and real reading room sessions. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7765 Interventional Radiology Selective (1-12). This rotation is intended to give students an introduction to the basics of Interventional Radiology (IR); including IR techniques and procedures, and an understanding of the field's role in the management of medical and surgical problems. Students will participate in the workup, treatment and follow-up of patients undergoing various IR procedures. Students will also gain experience in the interpretation of radiologic imaging such as ultrasound, CT, and MRI. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7780 Radiation Oncology Selective (1-12). This rotation provides students with supervised participation in the care of radiation oncology patients. This includes the diagnostic/clinical evaluation of the patient's disease and the development of treatment plans involving radiation therapy. Students are exposed to state-of-the-art radiation oncology equipment and, during the planning phase, are shown the use of CT imaging with plain and contrast-enhanced techniques for therapy planning and positioning of the patient for radiation treatment. They are exposed to the management of the most common tumors seen in our

community, including breast, prostate, lung, GI, skin, and head and neck cancer. Students are introduced to palliative care and the incorporation of integrative medicine in the overall care of the patient. Prerequisite: Enrolled in Herbert Wertheim College of Medicine.

MDS 7800 Neurology Selective (1-12). The Neurology Selective is a 4-week rotation that can be tailored to the student's needs and specific interests. In-patient and out-patient experiences are available, in addition to simulations and neuro-anatomy lab. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

MDS 7860 Adult Inpatient Psychiatry Selective (1-12). The course allows Period 4 medical students to refine the skills they acquired in the Period 3 Psychiatry Clerkship through further inpatient and emergency psychiatry experiences. Students will focus on honing their skills related to psychiatric interviewing, diagnostic reasoning, and treatment planning. Students will participate in the initial assessment of patients presenting for admission and will follow inpatients throughout their hospital stay. Prerequisite: Enrolled in the Herbert Wertheim College of Medicine.

PAS 6005 Human Behavior (2). This is an integrated primary core course, foundational to the principles of human behavior and psychiatry. It will involve an intensive study of the clinical presentation, pathophysiology, and recognition of various diseases and anomalies in the population. The contextual approach to these disciplines will include the interrelationship or prior and current learning incorporating the basic sciences, anatomy and physiology, ancillary diagnostics and medical term. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6011 Clinical Medicine I (3). This course is a systematic review and discussion of the epidemiology, pathophysiology, clinical manifestations, diagnosis and management of the most common diseases in humans. It builds upon the foundation of basic science knowledge and clinical assessment skills. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6012 Clinical Medicine II (3). This course is a systematic review and discussion of the epidemiology, pathophysiology, clinical manifestations, diagnosis and management of the most common disease in humans. It builds upon the foundation of basic science knowledge and clinical assessment skills. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6014 Physiology I (3). This is an integrated primary core course, foundational to principles of physiology. It will involve an intensive study of the clinical presentation, pathophysiology, and recognition of various disease and anomalies in the population. The contextual approach to these disciplines will include the interrelationship of prior and current learning incorporating the basic sciences, anatomy and physiology, ancillary diagnostics and medical terminology. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6015 Physiology II (3). This is an integrated primary core course, foundational to the principles of physiology. It will involve an intensive study of the clinical presentation, pathophysiology, and recognition of various diseases and anomalies in the population. The contextual approach to these disciplines will include the interrelationship of prior

and current learning incorporating the basic sciences, anatomy and physiology, ancillary diagnostics and medical terminology. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6016 Integration into Clinical Concepts I (2). This is the first in a series of three courses in the didactic year that provide students the opportunity to translate knowledge gained in the concurrent didactic curriculum courses to clinical problems and to clinical decision making. The course is conducted by the faculty facilitators in a small-group discussion format. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6017 Integration into Clinical Concepts II (2). This is the second in a series of three courses in the didactic year that provide students the opportunity to translate knowledge gained in concurrent didactic curriculum courses to clinical problems and to the clinical decision making. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6018 Integration into Clinical Concepts III (2). This is the final course in a series of three didactic year courses that provide students the opportunity to translate knowledge gained in concurrent didactic curriculum courses to clinical problems and clinical decision making. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6022 Gross Anatomy (4). Gross Anatomy for Physician Assistant students is a clinically oriented course in which descriptive and surface anatomy are integrated with embryology. Organization of human anatomy is correlated with diagnostic imagine and pathophysiology. The objective is to provide students with a hands-on experience in the study of the human body, an understanding of relevant aspects of human development and its abnormalities. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6023 Pharmacology in Disease Pathology I (2). These lectures are integrates with the appropriate organ or disease system in which an appreciation of the pathophysiology is helpful for understanding the basis of use of a class of drugs in a particular disease. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6026 Pharmacology in Disease Pathology II (2). These lectures are integrates with the appropriate organ or disease system in which an appreciation of the pathophysiology is helpful for understanding the basis of use of a class of drugs in a particular disease. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6031 Clinical Skills I (2). This course is the first in a two course sequence designed to provide students with an overview of skills and procedures needed for clinical practices as a PA. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6032 Clinical Skills II (1). This course is the second in a two course sequence designed to provide students with an overview of skills and procedures needed for clinical practice as a PA. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6033 Clinical Medicine III (3). This course is a systematic review and discussion of the epidemiology, pathophysiology, clinical manifestations, diagnosis and

management of the most common diseases in humans. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6040 Clinical Assessment I (3). Students are introduced to the sequential process and skills involved in history taking and physical examination techniques. It emphasizes the "normal" physical exam assessment, and introduces students to assessment techniques for the most common abnormal physical exam findings. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6041 Clinical Assessment II (2). This course is the second in a two sequence designed to provide students with an overview of skills and procedures needed for clinical practice as a PA. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6050 The Role of PA in American Health Care (3). The first portion covers major aspects of the US health care system. The aim is to give students a broad foundation of knowledge regarding the basic components of the health system and its issues and trends. The second portion presents the key components of the PA profession and examines the scope and the role of the PA in medical practice. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6090 Clinical Application of Evidence-Based Practice I (3). This course provides an introduction to research design and methods including bio statistical analyses that are most commonly encountered within health research. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6091 Clinical Application of Evidence-Based Practice II (2). Advanced application of research, statistical, and evidence-based medicine concepts presented in Clinical Applications of Evidence-Based Practice II with emphasis on studies assessing therapeutic intervention. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6103 Internal Medicine Clerkship (6). This eight week clinical course focuses on basic medical practice. The student is exposed to the common medical problems encountered on an in-patient and out-patient medical services. Emphasis is placed on the history and physical examination and the process required in the proper work-up and management of the patient. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6125 Psychiatry Clerkship (3). This four week clinical course in a psychiatric care setting will allow students to participate in daily rounds and become knowledgeable of the use of psychotropic medications for psychiatric disorders. Group therapy sessions will be a major part of the learning experience. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6184 Medical Microbiology and Infectious Disease (4). Provides skills to integrate topics in basic microbiology and clinical infectious diseases. Lectures and small group case studies will provide students with an understanding of the basic principles of medical microbiology including microbial pathogenesis and clinical infectious diseases. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6185 Geriatric Medicine Clerkship (4). This clinical course provides the opportunity for students to become

familiar with common physical and psychological problem encountered by the geriatric patient including cardiac and respiratory insufficiency, urinary tract infection, stroke, and diabetes mellitus. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6200 Surgery Clerkship (6). The student will be exposed to a variety of clinical problems routinely seen on the surgical service. Emphasis will be placed on the preoperative, intraoperative and postoperative management of the patient. In the operating room the student will practice aseptic techniques, operating room principles, and assisting in surgery. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6300 Pediatric Clerkship (6). This eight week clinical course in pediatric care settings will introduce students to childhood illnesses and normal variations of growth and development. Students will perform histories and physical examinations and manage patients in the newborn nursery, pediatric out-patient clinic and emergency room. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6400 Family Medicine Clerkship (8). This clinical course introduces the student to the family practice setting where emphasis is placed on the common disease treated by the primary care practitioners in conjunction with other members of the health care team. The student is exposed to rural epidemiology, cultural diversity, and problems that affect delivery of health care team. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6500 Obstetrics/Gynecology Clerkship (3). During this four week clinical rotation the student will participate on the obstetrical service managing pregnancy, labor and delivery and be introduced to pre and postnatal complications. The student will also participate in the management of the common gynecologic problems. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6600 Emergency Medicine Clerkship (4). This required rotation is designed to provide an in-depth exposure to the illnesses and injuries sustained by adults and children that necessitate emergency care. These educational experiences are intended to emphasize interview and examination skills and the performance of techniques and procedures essential to the proper management of emergency illness and injury. Prerequisite: Enrolled in the Physician Assistant Program.

PAS 6940 Elective Clinical Rotation (1-6). This elective clinical rotation provides practical clinical exposure and knowledge, whether in an area of primary care or specialty medicine. This course may be repeated. Prerequisite: Enrolled in the Physician Assistant Program.

 Sciences **Alexander Agoulnik**
 PhD Program in Biomedical
 Sciences **Nazira El-Hage**
 Physician Assistant Studies, Academics **Jimmy Santana**
 Physician Assistant Studies Program **Raisa Miller**
 Psychiatry and Behavioral Health **Priscilla Chaves**
 Psychiatry Clerkship **Leonard Gralnik**
 Quality and Clinical Performance
 Improvement **Elizabeth Pancorbo**
 Risk Management **Yvonne Capote**
 Student Affairs & MPAS,
 Operations **Irene Delano**
 Student Programs **Scarlett Aldana**
 Student Support Services;
 Student Ombudsperson **Heidi von Harscher**
 Translational Glycobiology Institute **Charles J. Dimitroff**
 Teaching and Learning **Samantha Lemus-Martinez**

Faculty

Abbott, Karen, Ph.D. (University of Georgia), Associate
 Director for Translational Glycobiology Institute and
 Associate Professor
Ajabshir, Sahar, Ph.D. (Florida International University),
 Assistant Professor
Abi Rafeh, Ibrahim, M.D. (Universidad Tecnológica de
 Santiago, Dominican Republic), Assistant Professor
Agoulnik, Alexander, Ph.D. (Novosibirsk Institute of
 Cytology & Genetics, Russia), Interim Chair, Human
 and Molecular Genetics, Director PhD Program in
 Biomedical Sciences and Professor
Agoulnik, Irina, Ph.D. (Novosibirsk Institute of Cytology
 & Genetics, Russia), Professor
Agudelo, Marisela, Ph.D. (University of South Florida,
 College of Medicine) Assistant Professor
Akhouri, Shweta, M.D. (St. Matthews University, Cayman
 Islands), Assistant Professor
Alfonso, Bianca, M.D., Ph.D. (University of Medicine and
 Pharmacy Iuliu Hatieganu, Romania), Assistant
 Professor
Anderson, Frederick, M.D. (University of Pittsburgh
 School of Medicine), Medical Director for Humanities,
 Health and Society and Associate Professor
Andreu, Aileen, M.D. (Temple University School of
 Medicine), Assistant Professor
Arslan, Orhan, Ph.D. (Hacettepe University, Turkey),

Professor
Athauda, Gagani, M.D. (Riga Stradins University, Latvia),
 Associate Professor
Atluri, Venkata, Ph.D. (Postgraduate Institute of Medical
 Education and Research, India), Assistant Professor
Aziz, Muhammad, M.D. (Dow Medical College Karachi,
 Pakistan), Assistant Professor
Barengo, Noel, M.D., Ph.D. (University of Kuopio-
 Finland), Associate Professor
Benitez, Sonia, M.S. (Florida International University),
 Senior Associate Dean, Finance and Administration and
 Faculty Administrator
Berkman, Aron, M.D., Ph.D. (Case Western Reserve
 University), Associate Professor
Berkshire, Tiffany, D.O., M.P.H., M.B.A. (Philadelphia
 College of Osteopathic Medicine), Assistant Professor
Bichachi, Abraham, M.D. (University of Miami),
 Assistant Professor
Biehler, Jefry, M.D., M.P.H. (University of Oklahoma),
 Chair, and Clerkship Director for Pediatrics and
 Associate Professor
Bisschops, Julia C, M.D. (Saint George's University,
 Grenada), Assistant Professor
Bonnin, Rodolfo, Ph.D. (University of Missouri), Director,
 Assessment and Evaluation, and Associate Professor
Braunstein, Theodore, M.D. (University of Science, Art
 and Technology), Instructor
Brito, Shandi, PA-C., (Nova Southeastern University),
 Instructor
Brown, David, M.D. (Boston University), Interim Chair,
 Humanity, Health and Society; Chief of the Division of
 Family and Community Medicine and Associate
 Professor
Busatto, Catherine, M.S. (South University), Instructor
Caban-Aleman, Carissa, M.D. (University of Puerto Rico,
 Medical Sciences Campus), Director of Behavioral
 Health Services for Student Health Services and
 Assistant Professor
Camps-Romero, Eduardo, M.D. (Universidad Central del
 Caribe, Bayamon Puerto Rico), Director of Behavioral
 Health for Humanities, Health and Society and Assistant
 Professor
Carcache, Luis, M.D. (University of Miami), Assistant
 Clerkship Director for Psychiatry and Assistant
 Professor
Caride, Avelino Ruben, M.D. (University of Miami School
 of Medicine), Medical Director Ambulatory Care Center
 and Assistant Professor
Castellano-Sanchez, Amilcar, M.D. (University of Zulia,
 Venezuela), Director of Pathology Curriculum and
 Associate Professor
Castellanos, Daniel, M.D. (Pontifical Catholic University
 Mother and Teacher, Dominican Republic), Assistant
 Dean, Graduate Medical Education; Chair, Psychiatry
 and Behavioral Health and Professor
Castellanos, Marietta, M.D., (Universidad
 Iberoamericana, Dominican Republic), Assistant
 Professor
Cendan, Juan, M.D., (University of Florida), Executive
 Associate Dean for Student Affairs, Vice Dean for
 HWCOC and Professor
Chakraborty, Asmi, Ph.D., (University of Alabama),
 Postdoctoral Associate
Chand, Hitendra, Ph.D. (University of Delhi, India),
 Associate Professor
Chandler, Kevin, Ph.D. (Georgetown University),

The Nicole Wertheim College of Nursing and Health Sciences was created in 2006 by the merger of the School of Nursing and the School of Health Sciences. In support of the University's mission as a major urban research institution, the College offers programs of professional study in selected health professions.

The College offers baccalaureate degrees in Nursing and Health Services Administration. Master's degrees are offered in Athletic Training, Health Services Administration, Occupational Therapy, Speech-Language Pathology, and Nursing, The Doctor of Philosophy in Nursing, the Doctor of Nursing Practice, and the Doctor of Physical Therapy and the Doctor of Athletic Training are offered by the College.

The Nicole Wertheim College of Nursing and Health Sciences' mission is to prepare diverse healthcare professionals who are providers and leaders in the delivery of high quality, accessible, culturally-competent, and compassionate care within a highly technological and global environment. Our Vision is to be globally recognized as the higher education destination organization that is innovative, inquiry-driven, and technologically advanced, drawing diverse top-class faculty, students, staff, and others for a positive transformation of society with a focus on the health care needs of underserved populations.

Students interested in the academic programs offered by the Nicole Wertheim College of Nursing and Health Sciences are urged to contact the Office of Student Services at (305) 348-7703 or via the web at <http://cnhs.fiu.edu/>

College Policies

Background checks and drug screenings

The practicum/field placement sites used by all programs in the Nicole Wertheim College of Nursing and Health Sciences require the disclosure of conviction records for misdemeanors and/or felonies and current screening for drug use. Therefore, students are required to submit to criminal background checks and drug screening tests before admission and to the initiation of the clinical education portion of their education. The student will be responsible for the financial cost of such screenings.

Findings in background checks and/or drug screening tests may affect a student's ability to participate in clinical experiences and complete the program, and/or obtain licensure or certification.

Standard disclaimer on policy/procedure changes

The programs, policies, requirements, and regulations listed in this catalog are continually subject to review in order to serve the needs of the University's and College's various publics and to respond to the mandates of the Florida Department of Education, Board of Governors, the Legislature, and other regulatory and accrediting agencies. Changes may be made without advance notice. Please refer to the General Information section for the University's policies, requirements, and regulations. Please refer to the College's website for the most recent information regarding program requirements, policies, and procedures.

Changes to the Curriculum Requirements

The curricula described in this catalog are continually subject to review in order to respond to the mandates of the Florida Department of Education, Board of Governors, and the Legislature. This is especially true for the programs that are subject to national accreditation requirements. University policy changes in the curriculum may be made without advance notice.

Generally, the Nicole Wertheim College of Nursing and Health Sciences makes every effort to minimize the impact of curriculum changes on currently enrolled students by stipulating that students complete the requirements of their degree program in effect at the time of admission or readmission to the program. In the event that this is not possible due to accreditation standards or the deletion of courses, students may be required to complete alternative degree requirements in order to graduate. Students should review their files to ensure that all documentation of changes is noted.

Health Services Administration

Mariceli Comellas, Ed.D., *Director of the Master of Health Services Administration and Clinical Assistant Professor*

Wensheng Fan, Ph.D, MPH, *Clinical Assistant Professor and Clinical Assistant Professor*

Chanadra Young-Whiting, Ed.D., MPH/HSA, CHES
Chair and Clinical Associate Professor

	Administration	3
HSA 6149	Strategic Planning and Marketing of Health Care Services	3
HSA 6205	Hospital and Health Facilities Organization	3
HSA 6156	Economic and Decision Analysis in Health Care	3
HSA 5226	Management of Long Term Care Systems	3
Integrative Coursework: 5-9 credit hours		
HSA 6717	Advanced Health Services Management and Research Seminar	3
HSA 6875	Administrative Residency (Prereq: HSA 6930 and Permission of Instructor)	2
HSA 6930	Professional Seminar	1
	or	
HSA 6977	Master's Research Project (Prereq: HSA 6930 Permission of Instructor)	3-6

Master of Health Services Administration

Admissions Requirements

Admission to the program will be based upon a combination of the upper-division (last 60 hours) grade point average and a personal statement. Each applicant must have a GPA for the last 60 hours of a 3.0 on a 4.0 scale.

Courses are sequenced to enhance the development of competencies as students progress through the curriculum. Students need to pay attention to course prerequisites and adhere to course sequencing.

Prerequisites

Demonstrated knowledge and ability in the areas of accounting, quantitative analysis, or research methods or statistics, economics, and Finance as approved by the Department.

Program Total: (48 credits)

Foundation Courses: 9 credits of required coursework

HSA 5125	Introduction to Health Policy and Management	3
HSA 6185	Management and Organization in Health Care	3
HSA 6176	Financing & Reimbursement of Health Systems	3

Health Services Administration Core Courses: 31 credits of required coursework

(must have completed at least 9 hours of foundation coursework)

HSA 6426	Health Law and Legal Aspects of Management	3
HSA 6175	Financial Management of Health Systems	3
HSA 6186	Leadership and Organizational Behavior in Health Care Systems	3
HSA 6759	Quality Assessment and Outcome in Health Care	3
HSA 6187	Managing Human Resources and Health Professions	3
HSA 6197	Design and Management of Health Information Systems	3
HSA 5655	Ethical Decisions in Health Services	

Administrative Residency

An administrative residency in a health care organization is offered to all students. Students lacking health services administrative experience are encouraged to complete an administrative residency.

The residency is considered an integral part of the educational process. It is designed to provide practical experience with the theories, concepts, and administrative skills the students acquired in academic study. The residency is generally arranged in an agency or institution compatible with the student's area of interest. The student works with an organizational preceptor in the health agency during this period, and the experience is supervised by a faculty preceptor.

Students must apply for the administrative residency, complete an educational plan, be approved and be placed in an agency by the Residency Coordinator the semester before the residency begins.

Athletic Training

Michelle Odai, Ph.D., LAT, ATC, Chair, MSAT Program

Director and Clinical Associate Professor

Jeff Konin, Ph.D., ATC, PT, FACSM, FNATA, DAT

Program Director and Clinical Professor

Matthew Kutz, Ph.D., ATC, Clinical Professor

**Rodrigo Martinez, DAT, LAT, ATC, Coordinator of
Clinical Education and Clinical Assistant Professor**

**Ajaya Williams, Ed.D., LAT, ATC, Clinical Assistant
Professor**

Daniella Eiroa, DAT, LAT, ATC, Assistant Athletic Trainer

**Shane Vaughan, DAT, LAT, ATC, Associate Athletic
Trainer**

Master of Science in Athletic Training

The Athletic Training Program at Florida International University is accredited by the Commission on Accreditation of Athletic Training Education (CAATE). Students will graduate with a Master of Science degree in Athletic Training and be eligible to sit for the Board of Certification (BOC) examination.

The examination tests for knowledge and skill in five major domains:

- (1) injury/illness prevention and wellness promotion;
- (2) examination, assessment, and diagnosis;
- (3) immediate and emergency care;
- (4) therapeutic intervention; and
- (5) healthcare administration and professional responsibility, organization and professional health and well-being.

Admission Requirements

To be admitted to the professional Master of Science Athletic Training Program, the student must:

1. Hold a bachelor degree from an accredited institution.
2. Have a minimum 3.00 GPA average (based on a 4.0 scale) in the last 60 credits of upper division courses of the bachelor degree.
3. Complete the following prerequisite courses with a minimum grade of "C":
 - a. General Biology and Lab (4 cr.)
 - b. ^Human Anatomy and Lab (4 cr.)
 - c. ^Human Physiology and Lab (4 cr.)
 - d. Physics without Calculus and Lab (4 cr.)
 - e. Nutrition (3 cr.)
 - f. Statistics (3 cr.)
 - g. Introductory Psychology (3 cr.)
 - h. Kinesiology or Biomechanics (3 cr.)
 - i. Exercise Physiology (3 cr.)

^ Or, *Anatomy and Physiology I and II with Lab for a total of 8 credits*
4. Three letters of recommendation (one must be from a faculty member)
5. A curriculum vitae/resume
6. A personal statement of professional and educational goals

Application and Admission Processes

Applying for admission to the MSAT program is via the Athletic Training Centralized Application Service (ATCAS) at the below address:

<https://atcas.liasoncas.com/>

Additional Requirements

To remain in the Entry-Level Master of Science Athletic Training Education Program the student must maintain a **3.00** cumulative GPA. To be awarded the Master of Science degree in Athletic Training the student must achieve a **3.00** cumulative GPA.

Required Courses

Semester I (Summer B) - 8 Credits

^ATR 5105C	Principles of Athletic Training with Lab	4
^ATR 5115C	Management of Medical Emergencies	3
^ATR 5805	Clinical Education Seminar in Athletic Training	1

^Denotes courses that must be taken in sequence. Course sequence may be modified by the department

Graduation Requirements

The student must complete the required 58 credits, complete a minimum of 1000 clinical education experience hours, and be in compliance with the University Graduate School graduation requirements.

Doctor of Athletic Training

Admission Requirements

To be admitted to the post-professional DAT program, a student must:

1. Hold a Master's degree with a minimum of 27 graduate credits;
2. Have a minimum cumulative GPA of 3.0 (on a 4.0 scale) in graduate coursework;

3. Submit proof of athletic training certification through the Board of Certification;
4. Submit proof of state credential (if applicable in the student's current state of residence/practice);
5. Have 2-3 years of athletic training work experience (recommended)
6. Submit three letters of recommendation
7. Submit resume or curriculum vitae
8. Submit a statement of professional and personal goals to include reasoning for completing the FIU DAT.

Graduation Requirements

To be eligible for graduation from the post-professional DAT program, a student must complete a total of 48 credits. Students are required to attend a 1-week residency on campus each year. Additionally, a student must be in compliance with the FIU Graduate School graduation requirements to be eligible for graduation.

Required Courses (48 credits)

Applied Scholarship Core

ATR 7630	DAT Applied Scholarship I	3
ATR 7631	DAT Applied Scholarship II	3
ATR 7632	DAT Applied Scholarship III	3

Entrepreneurial Leadership Core

ATR 6507	Entrepreneurial Leadership in Athletic Training	3
ATR 6546	Successful Business Strategies in Athletic Training	3
ATR 6547	Financial Planning for Athletic Training	3
ATR 6548	Athletic Training Consulting	3

Academic Leadership Core

ATR 6557	Navigating Academic in Athletic Training	3
ATR 6555	Academic Leadership in Athletic Training	3
ATR 6556	Curricular Planning and Development in Athletic Training	3
ATR 6558	Teaching and Learning Strategies in Athletic Training	3
ATR 7955	Athletic Training Globalization	3
ATR 7806	DAT Capstone Project (repeated 4 times)	3

Communication Sciences & Disorders

Monica S. Hough, Ph.D., CCC-SLP, Chair and Professor

Alliete Alfano, Ph.D., CCC-SLP, Assistant Professor

Jean Mead, Ed.D., CCC-SLP, Coordinator of Clinical Education and Clinical Assistant Professor

Angela Medina, Ph.D., CCC-SLP, Assistant Professor

Mariateresa (Teri) Muñoz, SLP.D, MS, CCC-SLP, Clinical Assistant Professor

Eliane Ramos, Ph.D., CCC-SLP, Clinical Associate Professor

Communication Sciences and Disorders (CSD) is one of the Departments in the Nicole Wertheim College of Nursing and Health Sciences. This CSD Department offers a master's degree program in Speech Language Pathology. Additionally, ten required graduate prerequisite courses are offered for interested applicants who have a bachelor's degree in another discipline via the Graduate Certificate in CSD. The unique focus of the CSD department is one of Cultural and Linguistic Diversity (CLD). The goal of the department is to educate CLD professionals to meet the needs of multicultural populations with communication disorders. Students matriculating in the program will benefit from the infusion of CLD throughout the curriculum. Special emphasis is placed on the provision of services to the bilingual population of the Metropolitan Miami area. Students will take extra coursework that emphasize multilingual/multicultural issues as they apply to language acquisition as well as assessment and intervention of speech and language disorders in adults and children.

Students will have opportunities to receive clinical education from a variety of clinical settings in the Miami Metropolitan area including hospitals, schools, private practices and community based clinics that will further their experience with multilingual/multicultural populations. They also will be required to engage in research projects with faculty members. A description of the admission requirements and a description of the master's program follow.

Admission Criteria

Applicants for admission to the master's degree program must meet the current FIU minimum standards for admission to graduate school.

1. A grade point average of 3.0 in the last 60 hours of undergraduate study
2. Bachelor's degree
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Additionally, the CSD department requires the following for admission to the graduate program:

1. Departmental application
2. FIU Graduate School online application
3. Statement of purpose summarizing skills and interests in the program
4. Two letters of recommendation from persons with knowledge of academic performance

5. Bachelor's degree in Communication Sciences and Disorders or completion of the 10 required prerequisite courses.
6. Students considered for Masters' SLP admission will be invited for an interview and asked to complete a spontaneous writing sample. Accommodations will be made for invited students who are not able to come to campus.

Requirements for students without a bachelor's degree in Communication Sciences and Disorders

The Department of Communication Sciences and Disorders requires an individual applying for the master's degree to hold a bachelor's degree in communication disorders or its equivalent. An applicant's undergraduate background influences the time necessary to complete the graduate degree, as there are 10 prerequisite courses required for entrance to the graduate program via the Graduate Certificate program in CSD (28 credits). The following courses or their equivalents are required in the Graduate Certificate in CSD:

LIN 5018	Introduction to Linguistics	3
SPA 5012C	Introduction to Communication Sciences and Disorders	3
SPA 5009C	Normal Communication Development and Disorders	3
SPA 5150C	Acoustics of the Sciences of Speech and Hearing	3
SPA 5035C	Disorders of Hearing and Audiological Sciences	3
SPA 5051C	Clinical Observation, Management, and Procedures in Communication Disorders	3
SPA 5102C	Advanced Human Anatomy and Physiology of Mechanisms of Communication	3
SPA 5102L	Laboratory in Advanced Human Anatomy and Physiology of Mechanisms of Communication	1
SPA 5113C	Advanced Applied Phonetics	3
SPA 6322	Aural Habilitation and Rehabilitation	3

Master of Science in Speech-Language Pathology

The Master of Science in Speech-Language Pathology consists of 61 graduate hours. Full time enrollment is required. Students will complete six semesters in the program. Student progress will be monitored each semester by departmental faculty.

An overall GPA of 3.0 is required for graduation. A grade of "B" or higher is required for all courses in the program of study. If a student receives a grade of "B-" or below, then that course must be retaken; however, only two courses can be repeated. Any student who earns a grade of "B-" or lower in more than two courses will be terminated from the program.

Clinical practicum hours will be obtained in a variety of community settings. A minimum of 400 clinical clock hours are required for graduation. Passing the PRAXIS examination (162 passing score) is required for degree completion.

The program of study provides students with theoretical and clinical education to develop the competencies needed to practice as a speech-language pathologist.

Upon completion of the master's degree, the graduate will have met all academic and practicum requirements for applying for the Certificate of Clinical Competence awarded by the American Speech-Language-Hearing Association.

The Master of Science (M.S.) in Speech-Language Pathology at Florida International University is accredited by the Council on Academic Accreditation in Audiology and Speech-Language Pathology (CAA) of the American Speech-Language-Hearing Association, 2200 Research Blvd, Rockville, MD 20850, (301) 296-5700. Please feel free to contact the CAA if you have any questions about accreditation.

Program of Study

Core Courses in Speech-Language Pathology (52)

Speech: (18)

SPA 5204	Phonological Disorders	3
SPA 5216	Vocal and Velopharyngeal Disorders	3
SPA 5225	Fluency Disorders	3
SPA 5107	Neurological Bases of Communication Disorders	3
SPA 6232	Neuromotor Communication Disorders	3
SPA 6565	Dysphagia	3

Language: (18)

SPA 5402	Language Learning in Preschool Children	3
SPA 5403	Language Learning in School-Aged Children	3
SPA 6406	Dual Language Acquisition and Disorders	3
SPA 6410	Aphasia and Related Disorders	3
SPA 6005	Assessment & Treatment of the Bilingual Child with Communication Disorders	3
SPA 6479	Communication Disorders and Aging in a Bilingual Society	3

Practical Courses: (16)

SPA 5553	Differential Diagnosis of Communicative Disorders	3
SPA 5935L	Pre-Clinic Seminar	1
SPA 5500	Basic Clinical Practicum	3
SPA 5502	Intermediate Clinical Practicum	3
SPA 6505	Advanced Clinical Practicum**	3

***This clinical practicum must be repeated for a total of 12 credits in clinical practice.*

Research

[Thesis–9 credits]

SPA 5805	Research Methodology in Communication Disorders	3
SPA 6971	Master's Thesis	6

[Non-Thesis–6 credits]

SPA 5805	Research Methodology in Communication Disorders	3
SPA 6930	Master's Project	3

Students will enroll in 1 credit of Master's Project per semester in each of their last 3 semesters in the program.

Electives: (3)

The non-thesis option also mandates the selection of 1 of the following elective courses for an additional 3 credits.

**SPA 6322	Aural Habilitation and Rehabilitation	3
SPA 6254	Adult Communication Disorders and Cognition	3
SPA 6559	Augmentative and Alternative Communication	3
SPA 6938	Topics in Speech Pathology	3

****Students who have not taken this course via the Graduate Certificate or in their undergraduate CSD program at another university will be required to take this course for the elective requirement.**

Youngblut, Jo-Anne, Ph.D., RN, FAAN, *Professor Emeritus*

The Master of Science in Nursing (MSN) program is accredited by the Commission on Collegiate Nursing Education (CCNE), One Dupont Circle, Suite 530, Washington, DC 20036-1120, (202) 887-8476 and by the Council on Accreditation of Nurse Anesthesia Educational Programs, 222 S. Prospect Ave., Suite 304, Park Ridge, Illinois 60068 (847-692-7050) and is approved by the Florida Board of Nursing (4052 Bald Cypress Way, BIN CO2, Tallahassee, FL 32399, 850-245-4125).

The Nicole Wertheim College of Nursing and Health Sciences also offers a Ph.D. in Nursing and Doctor of Nursing Practice degree, as well as selected continuing education courses.

Master of Science in Nursing

The College offers a program of study leading to the Master of Science in Nursing (MSN) degree. This degree is typically completed curriculum, as part of the post-BSN-TO-DNP curriculum, to prepare qualified professional nurses for advanced nursing roles in the care of adults, children, and families; as well as a separate program of study to prepare qualified professional nurses to function as nurse educators for teaching positions in colleges, universities, and clinical practice settings. The program offers clinical majors in adult-gerontology primary care advanced practice nursing (AGNP), pediatric primary care advanced practice nursing (PNP), family health advanced practice nursing (FNP), psychiatric-mental health advanced practice nursing (PMHNP), and nurse anesthetist (AN), and tracks for the Nurse Executive (NE) and Nurse Educator. The design of the program allows for the development of the nurse practitioner role, the nurse anesthetist role or nurse educator role.

Throughout the curriculum, students are guided in the process of self-development to pursue excellence in professional and scholarly endeavors. The program allows flexibility within the basic curricular structure through individualized learning experiences, electives, a thesis, masters paper, research project or translational research and the opportunity to investigate an area of interest in advanced study.

The curriculum model is structured so that students will complete the program in 6 semesters (2 years) only with credits varying from 6-11 credit hours per semester. Courses are offered online and/or on ground allowing students flexibility.

Graduates of these programs are eligible to sit for national certification examinations in their respective specialties and apply for APRN licensure (APRN roles) as/if appropriate.

Program Objectives

The objectives of the MSN program are to prepare graduates as:

1. Leaders, educators, and change agents in the delivery of high-quality, accessible, culturally competent healthcare in local and global societies.
2. Professional advanced practice nurses who use communication, interprofessional collaboration, and synthesis of evidence-based practice, scholarship, and

research in the delivery of health care for local and global societies.

3. Facilitators and leaders of interprofessional health care teams who use an understanding of organizational systems and the environment and are able to integrate care services and health care policy across local and global societies.

4. Critical thinkers who actively and skillfully utilize ethical principles into the translation of evidence into safe, affordable, accessible, innovative, quality care.

5. Advanced practice nurses who deliver patient and family centered holistic care using knowledge of basic sciences including genetics/genomics, preventive health, and advances in health technology

6. Advanced practice nurses who analyze, influence, and develop health policy that promotes access and delivery of high quality healthcare to diverse populations.

Common Prerequisite Courses and Equivalencies

<u>FIU Course(s)</u>	<u>Equivalent Course(s)</u>
STA 3145	STA X014
CHM 1033/L	CHM X033
PCB 2099/L	BSC X085C
ZOO 3731/L	BSC X086C
MCB 2000/L	MCB X010C
DEP 2000	DEP X004
PSY 2012	PSY X012
HUN 2201	HUN X201

Courses which form part of the statewide articulation between the State University System and the Community College System will fulfill the Lower Division Common Prerequisites.

For generic course substitutions/equivalencies for Common Program Prerequisites offered at community colleges, state colleges, or state universities, visit: <http://www.flvc.org>. See Common Prerequisite Manual.

Program Policies

Nursing majors are responsible for transportation expenses related to clinical experiences. They are required to carry health and accident insurance. To safeguard the health of clients, nursing students are required to submit proof of immunizations upon entry to into the nursing program. Students must submit proof of basic cardiopulmonary resuscitation (CPR) certification (American Heart Association) prior to entering clinical courses in the nursing major. This CPR certification must cover the period of enrollment in the major.

The College reserves the right to terminate a student from the nursing program for reasons related to the inability to safely carry out professional responsibilities.

Application Process

Applicants must complete the following steps in order to be considered for admission:

STEP 1 – Submit an application to Nursing CAS (the Centralized Application Service for Nursing Programs)

1. Complete an online application via Nursing CAS <http://www.nursingcas.org> and pay the appropriate fee to Nursing CAS.
2. Complete the required FIU supplemental application and pay the \$30 fee.

3. Send official transcripts from **ALL SCHOOLS attended** (all Associates & Bachelors degree coursework) to Nursing CAS for upload and verification. **EXCEPTION:** Foreign transcripts, along with their official evaluations (grades, credits, and GPA in U.S. terms), should be sent directly to the college at the following address: Nicole Wertheim College of Nursing & Health Sciences, AHC-3, Room 121, 11200 S.W. 8th Street, Miami, FL, 33199.

4. Upload all required supplemental items including three (3) professional nursing references, professional CV, copy of an active Florida RN License, and Personal Statement to Nursing CAS.

STEP 2 – Professional Interview

1. Following a review of all completed applications a select number of applicants will be offered the opportunity to participate in a panel interview.
2. Interview candidates may be instructed to bring an additional set of official transcripts to their interview appointment.

Anesthesia Nursing Application Process

Applicants must complete the following steps in order to be considered for admission:

1. Complete two applications as indicated and return to the appropriate offices:
 - a. Complete a FIU graduate admissions application online available at <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>
 - b. Complete an online application via Nursing CAS <http://www.nursingcas.org> and pay the appropriate fee to Nursing CAS
2. Request an official transcript of records from each college or university attended for undergraduate and graduate work. A transcript must be sent to Florida International University OneStop, 11200 SW 8 street, SASC First Floor, Miami, Florida 33199 and to the Anesthesiology Nursing program as described in the program application package.
3. Applicants to the Anesthesiology Nursing program are reviewed by the program Admissions Committee and selected applicants are invited for interview. The program Admissions Committee makes final recommendations for admission.

NOTE: The programs, policies, requirements, and regulations listed in this catalog are continually subject to review in order to serve the needs of the University's and College's various publics and to respond to the mandates of the Florida Department of Education, Board of Governors, the Legislature, and other regulatory and accrediting agencies. Changes may be made without advance notice. Please refer to the General Information section for the University's policies, requirements, and regulations. Please refer to the College's website for updated information in nursing.

Master of Science in Nursing – Adult-Gerontology Primary Care Nurse Practitioner

Admission Requirements

1. Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.
2. Cumulative undergraduate GPA of 3.0 or greater in a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level.)
3. UG 60 GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.
4. Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.
5. Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.
6. Completion of all MSN admission paperwork including the NursingCAS application, FIU supplemental application, a written essay, recommendations, and Curriculum Vitae, as well as favorable personal interview with MSN Committee.

Graduation Requirements

1. Successful completion of 45-48 semester credits in nursing required courses and all clinical experience requirements.
2. Completion of a thesis (6 credits), a master's paper (3 credits), or a research project (3 credits).
3. Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.
4. Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B-" or below will not count toward satisfying graduate degree requirements.
5. With the exception of thesis courses, students are expected to register for courses with letter grades.

Master of Science in Nursing – Nurse Executive Track

Note: A moratorium has been placed on admissions to the Nurse Executive Track.

Admission Requirements

The applicant must:

- Have completed a baccalaureate degree in nursing which is accredited by the National League for Nursing Accrediting Commission (NLNAC), or the Commission on Collegiate Nursing Education (CCNE). Applicants with a baccalaureate degree from nursing programs without NLNAC or CCNE accreditation will be considered on an individual basis. RN applicants (with a baccalaureate degree in another field) to the MSN program must have completed a non-nursing baccalaureate degree with a GPA of 3.0 or higher from a nationally accredited college or university.
- Have evidence of a current RN licensure in Florida.
- Have completed introductory courses in statistics (3 credits), and basic health assessment (3 credits). RN applicants with an Associate Degree in Nursing and a baccalaureate degree in another field who are applying to the MSN program must have completed a non-nursing baccalaureate degree with a GPA of 3.0 or higher from a nationally accredited college or university. These RN applicants must have completed undergraduate courses with a grade of "C" or higher: 4 credits each of human anatomy & lab, human physiology & lab, microbiology & lab, and survey of chemistry & lab; and 3 credits each of human growth & development, statistics, psychology, principles of nutrition, and ethics.

5. Submit evidence of basic computer application (word processing) skills.
6. Have a faculty interview.
7. Provide the following:
 - a. Statement of philosophy of nursing and professional goals.
 - b. Letters of reference from: 1) a previous nursing faculty; 2) a current immediate supervisor; and 3) a co-worker.
8. For international students (graduates of foreign nursing schools) only:
 - a. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) of 550 or for the International English Language Testing System (IELTS). Minimum required scores is 550 on the paper-based TOEFL, 80 on the internet-based TOEFL (iBT) or 6.5 overall on the IELTS.
 - b. CGFNS certification or Florida RN license.
9. The Florida Board of Nursing and clinical agencies require the disclosure of conviction records for misdemeanors and/or felonies; therefore, this information will be required at the time of application. Applicants are required to submit to criminal background checks and drug testing. Expenses associated with background checks and drug testing (including repeat testing) are the responsibility of the student. Findings may affect a student's ability to be admitted, to participate in clinical experiences and complete the program, and/or obtain advanced licensure/ certification.

Degree Requirements

1. Completion of 43 semester credits. Minimum of 36-40 credits in nursing and 3-6 credits of non-nursing electives. The non-nursing electives are restricted to supporting courses for the specialty area.
2. Completion of a thesis (6 credits), a master's paper (3 credits), or a research project (3 credits). Students electing a master's paper or research project must complete an additional three hours of cognate course(s).
3. Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.
4. Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B-" or below will not count toward satisfying graduate degree requirements.
5. With the exception of thesis courses, students are expected to register for courses with letter grades. Electives may be taken as pass/fail subject to the approval of the advisor.

Combined BSN/MSN for Foreign-Educated Physician Degree Pathway Track

Note: A moratorium has been placed on admissions to the Foreign-Educated Physician Track.

Admission Requirements

The Combined BSN/MSN track is a pathway for foreign-educated physicians (FEPs) from culturally diverse backgrounds to:

- obtain the BSN degree
- become Registered Nurses (RNs)
- attain the MSN degree
- become eligible to take the Advanced Registered Nurse Practice (APRN) national certification exam

The combined BSN/MSN track is an accelerated program that builds upon the knowledge and skills of the social and physical sciences from a prior BS degree. It is comprised of **63** upper division credits and 44-48 graduate credits, totaling 106 to 110 credit hours. Admission to the MSN component is contingent upon meeting the MSN admission requirements.

To be admitted to the BSN/MSN track, students must:

1. Have completed a medical degree from an accredited non-US university;
2. Have transcripts evaluated by Josef Silny & Associates or by an equivalent transcript evaluation company;
3. Obtain a TOEFL score of 550;

- Meet nursing entry requirements for computation and reading skills;
- Meet the admission criteria to be admitted to the University and to the College of Nursing and Health Sciences; and
- Successfully complete the following nursing prerequisites (with grade of 'C' or above): statistics, human growth & development across the life span, human nutrition, anatomy & physiology, microbiology, chemistry. Transcripts will be evaluated by NWCNHS.
- The Florida Board of Nursing and clinical agencies require the disclosure of conviction records for misdemeanors and/or felonies; therefore, this information will be required at the time of application. Applicants are required to submit to criminal background checks and drug testing. Expenses associated with background checks and drug testing (including repeat testing) are the responsibility of the student. Findings may affect a student's ability to be admitted, to participate in clinical experiences and complete the program, and/or obtain advanced licensure/ certification.

To advance to the MSN component of this track, (Semesters V-VIII), students must:

- Have a cumulative GPA of 3.2 or above for Semesters I to IV; and
- Be licensed as a registered nurse (RN) by the end of Semester V.

Degree Conferrals

Students enrolled in the MSN component must apply to graduate with the BSN during the 4th week of semester VI; BSN degree will be posted at the end of semester VI. Students will graduate with the MSN at the end of semester VIII.

BSN Stop-out Options

- Low GPA Stop-out Option: Students with <3.2 cumulative GPA for Semesters I to IV will take NUR 4636C (Care of Communities: Community Health Nursing, 4 credits) and NUR 4945L (Senior Clinical Practicum, 4 credits) in Semester V. BSN degree will be awarded at the end of semester V or semester VI depending on availability of NUR 4945L. Students must apply for graduation of the BSN component by the 4th week of the semester they intend to graduate.
- Failure to Pass NCLEX Stop-out Option: Students not passing NCLEX-RN by the end of Semester V will take NUR 4945L (Senior Clinical Practicum, 4 credits) in Semester VI. BSN degree will be awarded at the end of semester VI. Students must apply for graduation of the BSN component by the 4th week of the semester they intend to graduate.
- Stop out students will graduate with BSN and will be discontinued from the combined BSN-MSN track.

Curriculum

Semester I – 18 (15 UG/3 Grad)

NUR 3029	Foundations of Nursing Practice	3
NUR 3029C	Foundations of Nursing Practice Laboratory	2
NUR 3029L	Foundations of Nursing Practice Clinical	3
NUR 3066C	Health Assessment and Promotion in Nursing Practice	4
NUR 3119	Professional Nursing: Concepts and	

	Issues	3
NGR 6172	Pharmacology and Pharmacotherapeutics in Advanced Nursing Practice (MSN Requirement)	3

Semester II – 15 (12 UG/3 Grad)

NUR 3226	Nursing Care of Adults I	3
NUR 3226L	Nursing Care of Adults I Clinical	3
NUR 3227	Nursing Care of Adults II	3
NUR 3227L	Nursing Care of Adults II Clinical	3
NUR 3685L	Integrative Nursing Care I	0
NGR 5141	Pathophysiological Basis of Advanced Nursing Practice (MSN Requirement)	3

Semester III – 14 (11 UG/3 Grad)

NUR 3535	Psychosocial Nursing	3
NUR 3535L	Psychosocial Nursing Clinical	3
NUR 4686L	Integrative Nursing Care II	0
NUR 4286	Nursing Care of Older Adults	2
NUR 3821	Professional Nursing Leadership: Concepts and Issues	3
NGR 5110	Theories in Nursing (MSN Requirement – Not required for BSN)	3

Semester IV – 17 (17 UG)

NUR 4455	Care of Families: Childbearing Nursing	3
NUR 4455L	Care of Families: Childbearing Nursing Clinical	3
NUR 4355	Care of Families: Childrearing Nursing	3
NUR 4355L	Care of Families: Childrearing Nursing Clinical	3
NUR 4667	Nursing in Global Health Care Systems – GL	3
NUR 4940	Senior Clinical Synthesis	2

Low GPA Stop-out Option: Students with <3.2 cumulative GPA for Semesters I to IV will take NUR 4636C (Care of Communities: Community Health Nursing, 4 credits) and NUR 4945L (Senior Clinical Practicum, 4 credits) in Semester V or VI, and end with a BSN degree.

Semester V – 13 (4 UG/10 Grad)

NUR 4636C	Care of Communities: Community Health Nursing	4
NGR 5131	Culture and Advanced Nursing Practice (MSN Requirement – Not required for BSN)	3
NGR 6002C	Advanced Health Assessment (MSN Requirement – Not required for BSN)	4
NGR 5810	Research Methods in Nursing (MSN Requirement)	3

Failure to Pass NCLEX Stop-out Option: Students must pass the NCLEX during semester V. Students not passing the NCLEX-RN by the end of the semester V will take NUR 4945L (Senior Clinical Practicum, 4 credits) in semester VI and will be eligible for a BSN degree at the end of semester VI. (+4 UG credits for Stop Out Students only)

Semester VI

NGR 6201C, or 6301C, or 6601C	Advanced Adult-Gerontology, Child, or Family Health Nursing I	3-4
NGR 6201L, or 6301L, or 6601L	Advanced Adult-Gerontology, Child, or Family Health Nursing Practice I*	3-4
NGR 5XXX	Elective	3

Students must apply for graduation from the BSN by 4th week of semester VI.

Semester VII

NGR 6202C, or 6302C, or 6602C	Advanced Adult-Gerontology, Child, or Family Health Nursing II	3-4
NGR 6202L, or 6302L, or 6602L	Advanced Adult-Gerontology, Child, or Family Health Nursing Practice II*	3-4
NGR 6910C	Research Project	3

Semester VIII

NGR 6209, or 6337, or 6748	Clinical Decision Making in Advanced Adult-Gerontology, Child or Family Health Nursing	3
NGR 6700L, or 6337L, or 6619L	Role Synthesis in Advanced Adult-Gerontology, Child, or Family Health Nursing Practice*	4

Eligible to take APRN National Certification Exam after completion of semester VIII.

Students must apply for graduation from MSN at the beginning of semester VIII.

*All students must have a majority of APRN preceptors in all NP practicum courses.

Repeating Nursing Courses and Dismissal

A grade of "C" or higher in all NUR courses and a grade of "B" or higher in all NGR courses is necessary for continuing in the combined BSN/MSN track. A course in the BSN/MSN track can be repeated only once. If a student fails the same NUR course twice, or two NUR clinical and/or clinical-related courses, or two NGR courses, he/she will be dismissed from the BSN/MSN for FEP track.

RN-BSN-MSN

The RN-BSN-MSN requires a minimum of 120 credits for completion of the BSN portion. In addition to 60 transferable lower division credits, the degree requirements include a 24 credit nursing core, a 30 credit clinical proficiency evaluation (completed by equivalency exams), 4 credits of human anatomy & lab, human physiology & lab, microbiology & lab, and survey of chemistry & lab; and 3 credits each of human growth & development, statistics, psychology, principles of nutrition, ethics, and intercultural communication. No more than six (6) transferable credits from other nursing baccalaureate programs will be accepted for the BSN portion of the program of study.

Each applicant's educational record is individually evaluated by the nursing unit. To progress through the curriculum, the RN must successfully complete prerequisite, corequisite and required courses for the curriculum plan in effect at the time of admission.

Students must complete the University Core Curriculum, and Equivalency Exams and be admitted to the MSN Program prior to enrollment in Level III courses. Applicants must have a 3.2 cumulative GPA to be admitted to the MSN Program and must meet admission criteria for the FIU Graduate School and MSN Program. Students must be admitted to the MSN program prior to taking Pathophysiological Basis of ANP, Culture & Advanced Nursing Practice, and Advanced Client Assessment courses.

RNs must have one year clinical nursing experience and obtain professional liability insurance prior to registering for NUR 4636C and/or NUR 4945L.

Admission Requirements

Degree seeking applicants with fewer than 60 semester hours of transfer credit must satisfy the same admission requirements as beginning freshmen. Visit the information website for this program at <http://rn2bsn.fiu.edu/> for program information.

For admission to the RN-BSN-MSN track a student must:

1. Unencumbered Florida Registered Nurse License,
2. Cumulative GPA (no prerequisite grade below a C) from an ACEN (Accreditation Commission for Education in Nursing, formerly NLNAC) accredited ASN or Diploma Nursing program. You may verify your nursing program's accreditation at the following link: http://www.acenursing.us/accreditedprogram/s/pro_gramsearch.htm,
3. Minimum 60 transferable lower division college credits,
4. Meet a) Florida mandated Gordon Rule requirements; b) University Core Curriculum requirements; and c) University foreign language requirement. These requirements can be met with an Associate in Arts (AA) from a Florida College System or non-nursing Bachelor's degree in another field from an accredited institution.
5. Applicants with foreign degrees that have Florida RN licensure can apply if degree earned is evaluated to be equivalent to a Bachelor's degree or Doctorate in Medicine degree at an accredited U.S. institution,
6. RN-BSN applicants who have taken BSN courses at another accredited institution and are requesting a transfer into the NWCHNS RN-BSN track must have all coursework evaluated by FIU Nursing Faculty to determine course equivalency and are allowed a maximum of 6 transfer upper division Nursing credits and,
7. Approved transferred nursing coursework must be completed within 5 years of enrollment at the time of admission.
8. See Generic BSN for program policies related to background checks, immunizations, health requirements, and CPR.

Advanced Placement of RNs

Advanced placement in both nursing and non-nursing courses is facilitated by earning credits through examination, i.e., challenge or equivalency exams such as CLEP or Excelsior College examinations (Psychiatric-Mental Health Nursing, Adult Health Nursing, and Maternal-Child Nursing) with a grade of "C" or higher.

RNs who are admitted to the MSN program complete three graduate level courses (Advanced Health Assessment, Pathophysiological Basis of ANP and Culture & Advanced Nursing Practice) while taking BSN courses. Applicants admitted to the MSN program will substitute graduate nursing practicum credits for NUR 4945L Senior Clinical Practicum. Students who are not admitted to the MSN program will complete NUR 3666 Evidence-Based Nursing and Research in Global Health Care and NUR 4945L Senior Clinical Practicum for the BSN degree.

Curriculum

**RN Baccalaureate Level Course Requirements:
(10)****(For RN with BS/BA in another field)**

NUR 3119	Professional Nursing: Concepts and Issues	3
NUR 3668	Nursing Leadership in Global Health Care	3

Level IV:		
NUR 4636C	Care of Families: Community Health Nursing	4

*E.E. = Equivalency Exam

**Students must apply to the MSN program at this point; Applicants must have a 3.2 GPA to be admitted to the MSN program.

See University catalog/nursing advisor for pre-and-co-requisite courses.

Master of Science in Nursing –Direct Care Leadership Track

This track is not a direct admission program, but planned to be awarded to Doctorate in Nursing Practice – Nurse Anesthetist (DNP-NA) students as they progress through their DNP-NA program of study in recognition of meeting certain content milestones.

The Direct Care Leadership track is designed to recognize RN's preparation for leadership roles in advanced nursing clinical practice. The program includes coursework in the following areas: Graduate Nursing Core, Advanced Practice Nursing (APN) Core, and Functional Role -Direct Care Leadership.

Graduate Core – 12 credits

Theoretical Underpinning and Research Process – 6 credits

NGR 7121	Scientific and Theoretical Foundations of Adv Practice NSG	3
NGR 5810	Research Methods	3
<i>Applications of Research and Evidence-Based Clinical Practice – 6 credits</i>		
NGR 7854	Analytical Methods for Evidence Based Clinical Practice	3
NGR 7853	Translational Research	3
APN Core – 10 credits		
NGR 6172	Pharmacological Concepts in Adv. Practice Nursing	3
NGR 6002C	Advanced Health Assessment	4
NGR 5141	Pathophysiology for Advanced Practice Nursing	3
Functional Role - Direct Care Leadership – 13 credits		
<i>Direct Care – 6 credits</i>		
NGR 5131	Culture and Advanced Practice Nursing	3
NGR 7716	Fundamentals of Clinical Education	3
NGR 6497	Advanced Anesthesia Life Support (BCLS/ACLS/PALS)	1
<i>Professional Aspects of Practice – 7 credits</i>		
NGR 6493	Technology & Equipment in Anesthesiology Nursing	2
NGR 6492	Professional Aspects of Nurse Anesthetist Practice	2
NGR 7769	Patient Safety and Quality Improvement in Healthcare	3

Degree Requirements (MSN-Direct Care Leadership)

The Master of Science – Direct Care Leadership requires successful completion of 35 semester credits in the post-BSN-to-DNP Nurse Anesthetist program, as outlined in the plan of study. DNP-NA students will be expected to progress in their plan of study and demonstrate satisfactory attainment of course objectives and program competencies. All course work must be completed with a minimum grade of “B” or “Pass” for non-letter grade courses. Conferral of the MSN-Direct Care Leadership occurs en-route to DNP-Nurse Anesthetist degree. Completion of the MSN-Direct Care Leadership alone DOES NOT prepare students to meet educational eligibility requirements to sit for the National Board of Certification and Recertification for Nurse Anesthetist (NBCRNA) national certification exam (NCE) at the MSN level.

Ph.D. in Nursing

The Ph.D. in Nursing program is designed to prepare its graduates for leadership roles and research careers in academia, the health care industry, as well as government and private organizations focused on health care. The program purpose is to develop individuals who will be leaders in generating and applying the science needed to guide nursing practice, and who have the knowledge and skills to direct and guide application of other evidence-based health care findings to improve the health of people from diverse cultures. Students in the program will pursue individualized courses of study under the mentorship of research active faculty. A major program emphasis is the preparation of Ph.D. educated minority nursing leaders and focused research on health issues for minority and

underserved populations. There are two tracks in the PhD in Nursing, MSN to PhD and BSN to PhD.

Admission Requirements MSN to PhD Track

A prospective student must meet all admission requirements stipulated in the University's Graduate Policies and Procedures. Additional requirements are as follows:

1. A master's degree in nursing from an accredited institution.
2. A master's program grade point average (GPA) of 3.3/4.0 or higher.
3. (Verbal and Quantitative) Graduate Record Examination (GRE) scores.
4. Three letters of recommendation from academic and professional references.
5. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). Minimum required scores is 550 on the paper-based TOEFL, 80 on the internet-based TOEFL (iBT) or 6.5 overall on the IELTS.
6. A statement of the applicant's goals for pursuing the PhD degree in nursing. This statement must be typed, double-spaced, in a narrative format of no more than 500 words, using Times New Roman or Arial 12 Font.
7. Current Registered Nurse (RN) licensure or RN licensure with Advanced Registered Nurse Practitioner (APRN) certification in the State of Florida if applicable. The license must remain current throughout the program. Registered Nurse (RN) licensure in Florida is waived for international students.
8. Current professional liability insurance. The graduate student must maintain liability insurance throughout the program.
9. A satisfactory interview by members of the College's Doctoral Program Admissions Committee. The Committee will examine the credentials of all applicants.

Admission Requirements BSN to Ph.D. Track

Prospective student must meet all admissions requirements stipulated in the University's Graduate Policies and Procedures. Additional requirements are as follows:

1. An overall undergraduate GPA of 3.3 on a 4.0 scale.
2. Curriculum Vitae
3. Evidence of scholarship in nursing science, for example: Term paper/special project report; research report; published article or manuscript submitted for publication
4. Demonstrated computer proficiency in word processing and electronic library searches
5. Applicants, whose native language is not English, must take the TOEFL (Test of English as a Foreign Language) and obtain a minimum of 80 on the iBT TOEFL (equivalent to 550 on the paper based version).
6. The Graduate Record Examination (GRE) is required for admissions into the Ph.D. in Nursing Program.
7. Three letters of recommendation from academic and professional references.

8. A statement of the applicant's goals for pursuing the Ph.D. degree in nursing. This statement must be typed, double-spaced, in a narrative format of no more than 500 words, using Times New Roman or Arial 12 Font.
9. Current Registered Nurse (RN) licensure in the State of Florida. License must remain current throughout the program.
10. Current professional liability insurance. The graduate student must maintain liability insurance throughout the program.
11. A satisfactory interview by members of the College's Doctoral Program Admissions Committee. The Committee will examine the credentials of all applicants.

Application Process

Applicants must complete the following steps in order to be considered for admission:

1. Complete two on-line applications as indicated include all identified supporting documents to these.
 - a. Complete a graduate admissions application online available at <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>
 - b. Complete the FIU NWCNHS-PhD Application for Admission via NursingCAS (The Centralized Application Service for Nursing Programs) at <https://nursingcas.liasoncas.com/applicant-ux/#/login>.
2. Request an official transcript of records from each college or university attended for undergraduate and graduate work. Transcripts must be sent to both 1) FIU, Office of Admissions, P.O. Box 659004, Miami, Florida 33265-9004 and 2) uploaded to your NursingCAS profile.
3. Submit the required documents (transcripts, GRE scores, TOEFL scores if applicable, letters of recommendation, statement of goals, RN licensure, liability insurance) for admission evaluation. The application and required documents do not have to be sent to the University Graduate Admissions Office or the College Admissions Office as one package; however, all required documents MUST be received on or before the deadline date.
4. The application file must be complete before the College's Doctoral Program Committee will consider the applicant for admission. The application and supporting documents must be received on or before June 1 for Fall admission. If the application and supporting documents are not received by the appropriate deadline, the application will be considered for admission for the following term.

General Degree Requirements

1. Achievement of an overall cumulative GPA of 3.0 or above. A cumulative GPA of less than 3.0 will place the student on probation for one semester, and she/he may be subject to dismissal if the 3.0 GPA requirement is not met after the probationary period.
2. Removal of all conditions, deficiencies, and incomplete grades. With the exception of doctoral dissertation courses, students are expected to register for courses with letter grades. Credit hours for courses in which the grade is "B-" or below will not

count toward satisfying graduate degree requirements.

3. Student is expected to complete the dissertation five (5) years from the date of advancement to candidacy (i.e., successful completion of written and oral examinations, favorable recommendation of supervisory/guidance committee, and an approved dissertation proposal.
4. All requirements must be completed within nine years of first enrollment in the doctoral program.

Curriculum MSN to PhD Track: (60 Credits)

The MSN to PhD track requires completion of 60 credit hours of coursework and dissertation credits. The program can be completed in 4 years of full-time study.

The track requires completion of the following courses:

A research sequence (1 course on knowledge development, 2 courses in research methods and design, 2 courses in statistics, and 2 courses on grantsmanship); research in health care for multicultural, diverse and vulnerable populations; academic, health care and political systems: function, structure, leadership and survival; accessing, managing, and packaging information; and a minimum of 2 cognate courses in a specific knowledge area.

Core Knowledge: (12)

NGR 6123	Knowledge Development in Nursing Science	3
NGR 7736	Academic, Health Care, and Political Systems: Function, Structure, Leadership, and Survival	3
NGR 7830	Research in Health Care for Multicultural, Diverse, and Vulnerable Populations	3
NGR 7873	Accessing, Managing and Packaging Information	3

Research Methods and Design: (9)

NGR 6800	Advanced Nursing Research Methods I: Design and Sampling	3
NGR 6801	Advanced Nursing Research Methods II: Measurement and Dissemination	3
NGR 6815	Qualitative Methods	3

Statistics: (6)

NGR 6851	Empirical Evidence for Clinical Research and Practice II	3
NGR 6857	Empirical Evidence for Clinical Research and Practice III	3

Grantsmanship: (6)

NGR 6917	Grantsmanship I	3
NGR 6918	Grantsmanship II	3

Cognate Electives: (6)

(Electives by advisement)

NGR 6850	Empirical Evidence for Clinical Research and Practice I (recommended if no Stats taken in the last 3 years)	3
----------	--	---

Candidacy Examination (3-9)

NGR 7982	Candidacy Examination	3-9
----------	-----------------------	-----

Dissertation: (18)

NGR 7980	Dissertation I	3-18
----------	----------------	------

Curriculum BSN to PhD Track (Minimum of 94 credits)

The BSN to PhD track builds on student's general nursing knowledge and skills at the baccalaureate level and provides a course of study for advanced nursing practice at the master's level. The curriculum includes master's level courses designed to prepare students for advanced practice roles and provide the foundation from which students can engage in a program of intellectual inquiry at the doctoral level. If a student in the BSN- PhD track desires specialty certification (e.g., adult nurse practitioner), all required course work and clinical practice must be completed for that clinical specialty. Students on this track will receive the MSN degree upon completion of their required courses as outlined on their individual plan of study. The program can be completed in 4 ½ - 5 years of full-time study.

The BSN- PhD in Nursing track requires a minimum of 91 credits, including 6 credits of MSN core, 9 credits of APN (Advanced Practice Nursing) core; 12-16 credits of nursing specialty; 4 credits of role development; 12 credits of core knowledge (scientific inquiry & nursing science, cultural competence in research), 6 credits of statistics, 9 credits of advanced research methods, 6 credits of grantsmanship, 6 credits of cognate electives, and a minimum of 18 credit hours of dissertation.

MSN Core: (6)

NGR 5604	Culture and Advanced Nursing Practice	3
NGR 5810	Research Methods in Nursing	3

APN Core: (10)

NGR 6002C	Advanced Health Assessment	4

Candidacy Examination (3-9)

NGR 7982 Candidacy Examination 3-9

Dissertation (18)

NGR 7980 Dissertation I 3-18

Examinations

A student must successfully complete the following written examination and oral defenses in partial fulfillment of requirements for the Ph.D. degree in Nursing:

1. Candidacy Examination: The purpose of the Candidacy Examination is to demonstrate the student's ability to 1) synthesize knowledge in the student's research (substantive and methods) and cognate areas; 2) visualize the long-term development of a program of research in the defined area; and 3) place the planned Dissertation research in the context of that program of research and the area of knowledge. Upon successfully passing the written and oral Candidacy Examination and completing all required coursework, the student is admitted to Dissertation Candidacy. The Candidacy Examination is held after completion of course work requirements as represented in the student's Plan of Study, and prior to the Defense of the Dissertation Proposal.
2. Dissertation Proposal Defense: The proposal defense must be completed after the student has identified the major substantive and methodological issues of the research problem and the proposal is written in excellent form. The Proposal should consist of:
 - a) An introduction to research problem, with a statement of the research question or hypothesis;
 - b) A review of relevant literature sufficient to provide context for the research problem as well as a review of literature focused on the specific question to be examined;
 - c) A description of the research methods to be utilized in answering the research question, including a complete definition of the data to be collected and extant data bases that could be used; and
 - d) A list of references.

The proposal oral defense must be successfully completed and approved by the Dissertation Committee prior to the defense of the dissertation.

3. Dissertation Defense: All Committee members must preliminarily approve the Dissertation document before the student can apply for Dissertation Defense.

By their signatures, Committee members certify that the Dissertation is ready for Defense.

The student should consult with his/her Chairperson on the format and the time parameters of the oral Defense. After the Committee determines that the Defense was successful, the student should obtain signatures of all Committee members on the required form. Students should become familiar with the Nicole Wertheim College of Nursing and Health Sciences Ph.D. in Nursing Policies and Procedures at <http://cnhs.fiu.edu> and the University Graduate School's regulations and deadlines at <http://gradschool.fiu.edu>.

Doctor of Nursing Practice

The Doctorate of Nursing Practice (DNP) is a program of graduate doctoral study for the registered nurse with specialty preparation in advanced practice nursing. The DNP program of study includes or builds upon the clinical specialization to include study of: advanced specialty practice; systematic practice and program outcome evaluation; application of health information resources; development of safe, equitable, and cost effective health policy; innovation, implementation and evaluation of care delivery models; leadership development in health care delivery and clinical expertise for advanced nursing practice and education. The goals of the DNP program are to prepare nurses for leadership roles in a specialized area of advanced practice nursing with an emphasis on: philosophical, ethical, and scientific principles that provide the foundation for leadership in professional nursing care; continued acquisition of knowledge and clinical skills in an area of advanced practice specialization; and leadership and clinical expertise in healthcare delivery, evaluation, quality improvement and advanced practice nursing education. The DNP is offered as a MSN-to-DNP track or as a Dual Degree MSN + DNP option for adult-gerontology primary care nurse practitioner, pediatric primary care nurse practitioner, family health nurse practitioner, psychiatric-mental health nurse practitioner, and clinical specialty areas.

The DNP Scholarly Project is a program culmination evidence-based scholarly project which unfolds in a 3 - course series that provides the DNP students with mentored opportunities to identify, develop, implement, evaluate, and disseminate an independent, analytic scholarly project within the domain of advanced nursing practice. DNP students enter the DNP Scholarly Project series upon successful completion of all established DNP coursework and are required to submit a formal proposal, obtain approval by the DNP Project Team, submit and obtain approval of Institutional Review Board (IRB), implement, and evaluate their respective evidence-based scholarly project commensurate of doctoral education during this course series. A successful public presentation of scholarly project outcomes and defense is also required. Enrollment in the DNP Scholarly Project Course series, NGR 7940C (4 credits), NGR 7941C (4 credits), NGR 7942C (4 credits), NGR 7943 (1 credit) with a minimum of 1 credit, provides eligibility for DNP students to be considered "enrolled half- time equivalent" to meet financial aid qualification.

Admission Requirements (Post -MSN-to-DNP track)

Admission to the DNP Program is competitive and is based on evaluations of the applicant's abilities, past performance, recommendations and match of FIU's DNP Program goals with the applicant's professional practice goals. In addition to the general FIU graduate admission requirements, applicants to the DNP Program must meet the following requirements:

1. Completed Master's degree in Advanced Practice Nursing specialty role (e.g. ANP, PNP, FNP, CRNA, CNM, CNS, etc.) from an accredited institution with minimum cumulative GPA of 3.25;
Or
Completed Master's Degree in Nursing and a completed Post Graduate Certificate in Advanced Practice Nursing specialty role (e.g. ANP, PNP, FNP, CRNA, CNM, CNS, etc.)
2. Current licensure with no restrictions as an APRN in your state of residence;
3. Proof of Advanced Practice Specialty Certification;
4. Completion CNHS DNP Program Application;
5. Essay (500 words) addressing desired focus and areas of interest for practice in DNP program;
6. Three (3) professional recommendations describing the applicant's ability to be successful in a DNP program;
7. Curriculum Vitae;
8. Successful personal Interview with DNP admissions committee;

Degree Requirements (Post MSN-to-DNP track)

The Doctor of Nursing Practice program requires completion of a minimum of 36 credits (beyond a Master of Science in Nursing) and a DNP Scholarly Project. DNP students will be expected to progress in their plan of study and demonstrate satisfactory attainment of course objectives and terminal program competencies. All course work must be completed with a minimum grade of "B" or "Pass" for non-letter grade courses. Clinical performance in residency/preceptorship experiences must be evaluated at a satisfactory level and completed with a grade of "Pass." The DNP Scholarly Project must be approved by the DNP Scholarly Project Team. A successful public presentation and defense of the DNP Scholarly Project is also required.

Doctoral Nursing Practice Core (36 credits)

NGR 7121	Scientific and Theoretical Foundations for Advanced Nursing Practice	3
NGR 7769	Patient Safety and Quality Improvement in Healthcare	3
NGR 7891	Healthcare Finance and Economics in Advanced Clinical Practice	3
NGR 7871	Health Informatics	3
NGR 7854	Analytical Methods for Evidence-Based Clinical Practice	3
NGR 7892L	Health Policy Practicum (60 Clinical hours)	3
NGR 7733	Organizational Dynamics of Health Systems	3
NGR 7853	Translational Research	3
NGR 7940C	DNP Project I	4
NGR 7941C	DNP Project II	4
NGR 7942C	DNP Project III	4

Admission Requirements (BSN-to-DNP Nurse Anesthetist)

Admission to the **BSN-to-DNP Nurse Anesthetist** is competitive and is based on evaluations of the applicant's abilities, past performance, recommendations and match of FIU's DNP program goals with the applicant's professional practice goals. In addition to the general FIU graduate admission requirements, applicants to the DNP-NA Program must meet the following requirements:

1. Successful completion of all the admission requirements for graduate education at Florida International University, the Nicole Wertheim College of Nursing and Health Sciences, and the Department of Nurse Anesthetist Practice (DNAP).
2. Baccalaureate degree in Nursing (BSN) from a National League for Nursing Accrediting Commission (NLNAC) or the Commission on Collegiate Nursing Education (CCNE) accredited nursing program and from an accredited institution.
3. Cumulative undergraduate GPA of 3.0 or greater in a 4.0 scale and a minimum GPA of 3.0 for upper division coursework (UG 60).
4. Official GRE scores (Verbal, Quantitative, and Analytical); NOTE: There is no minimum GRE score recommended for this program.
5. Current State of Florida RN license. Out of state students must obtain a license to practice in Florida prior to admission.
6. Completion NWCHNS DNAP Program Application.
7. Essay (500 words)
8. Three professional recommendations.
9. Curriculum Vitae.
10. Successful personal interview with DNAP admissions committee.

Degree Requirements (BSN-to-DNP Nurse Anesthetist)

The Doctorate of Nursing Practice – Nurse Anesthetist requires the completion of all required courses and clinical experience requirements and a Quality Improvement Project. DNP-NA students will be expected to progress in their plan of study and demonstrate satisfactory attainment of course objectives and terminal program competencies. All course work must be completed with a minimum grade of "B" or "Pass" for non-letter grade courses. Clinical performance in residency must be evaluated at a satisfactory level and completed with a minimum letter grade of "B." The Quality Improvement Project must be approved by the DNP Project Committee. A successful public presentation and defense of the DNP Project is also required.

NOTE: The programs, policies, requirements, and regulations listed in this catalog are continually subject to review in order to serve the needs of the University's and College's various publics and to respond to the mandates of the Florida Department of Education, Board of Governors, the Legislature, and other regulatory and accrediting agencies. Changes may be made without advance notice. Please refer to the General Information

section for the University's policies, requirements, and regulations. Please refer to the College's website for updated information in nursing.

The Florida Board of Nursing and clinical agencies require the disclosure of conviction records for misdemeanors and/or felonies; therefore, this information will be required at the time of application. Applicants are required to submit to criminal background checks and drug testing. Expenses associated with background checks and drug testing (including repeat testing) are the responsibility of the student. Findings may affect a student's ability to participate in clinical experiences and complete the program, and/or obtain advanced licensure/ certification.

Post-BSN-to-DNP (Adult-Gerontology Primary Care Nurse Practitioner-MSN/DNP)

The Post-BSN-to-DNP is a program of graduate doctoral study for registered nurses. The Post-BSN-to-DNP program of study builds upon the initial clinical training of entry level nurses prepared at the baccalaureate level. This program will include the study of: advanced specialty practice; systematic practice and program outcome evaluation; application of health information resources; development of safe, equitable, and cost effective health policy; innovation, implementation and evaluation of care delivery models; leadership development in healthcare delivery and clinical expertise for advanced nursing practice education. Graduates of this program will be eligible for certification as an Adult-Gerontology Primary Care Nurse Practitioner. The goals of the Post-BSN-to-DNP program are to prepare nurses for leadership roles in a specialized area of advanced nursing practice with an emphasis on: philosophical, ethical, and scientific principles that provide the foundation for leadership in professional nursing care; continued acquisition of knowledge and clinical skills in an area of advanced practice specialization; and leadership and clinical expertise in healthcare delivery, evaluation, quality improvement and advanced practice nursing education.

Admission Requirements

1. Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.
2. Cumulative undergraduate GPA of 3.0 or greater on a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level.)
3. UG 60 GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.
4. Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.
5. Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.

6. Completion of all admission paperwork including the NursingCAS application, a written essay, Recommendations, and Curriculum Vitae
7. Essay (500 words) addressing desired focus and areas of interest for practice in The Post-BSN-to-DNP program.
8. Three (3) professional recommendations describing ability to be successful in a MSN-DNP program.
9. Curriculum Vitae.
10. Successful personal Interview with The Post-BSN-to-DNP admissions committee.

In order to advance to the DNP Scholarly Project course series component of this track, students must meet the following requirements upon conferral of MSN degree:

1. Maintain good academic standing as defined in the FIU Student Handbook
2. Current licensure with no restrictions as an APRN in your state of residence;
3. Proof of Advanced Practice Specialty National Board Certification in the specialty of conferred MSN (i.e., AGNP, FNP, PNP, PMHNP)

Post-BSN-to – DNP (Adult-Gerontology Primary Care Nurse Practitioner- MSN/DNP) Requirements

1. Successful completion of 59 semester credits in post-BSN-to-DNP program required courses and all specialty clinical experience requirements; as well as satisfactory attainment of terminal program competencies (exit examination) prior to conferral of MSN degree.
2. Successful completion of all DNP required core courses (36 credits), including DNP Project public presentation and defense are required for conferral of DNP degree.
3. Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.
4. Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B- or below will not count toward satisfying graduate degree requirements.
5. With the exception of DNP Project courses, students are expected to register for courses with letter grades.

Post-BSN-to-DNP (Pediatric Primary Care Nurse Practitioner-MSN/DNP)

The Post-BSN-to-DNP is a program of graduate doctoral study for registered nurses. The Post-BSN-to-DNP program of study builds upon the initial clinical training of entry level nurses prepared at the baccalaureate level. This program will include the study of: advanced specialty practice; systematic practice and program outcome evaluation; application of health information resources; development of safe, equitable, and cost effective health policy; innovation, implementation and evaluation of care delivery models; leadership development in healthcare delivery and clinical expertise for advanced nursing practice education. Graduates of this program will be eligible for certification as a Pediatric Primary Care Nurse Practitioner. The goals of Post-BSN-to-DNP program are to prepare nurses for leadership roles in a specialized area of advanced nursing practice with an emphasis on: philosophical, ethical, and scientific principles that provide the foundation for leadership in professional nursing care; continued acquisition of knowledge and clinical skills in an area of advanced practice specialization; and leadership and clinical expertise in healthcare delivery, evaluation, quality improvement and advanced practice nursing education.

Practitioner- MSN/DNP) Requirements

1. Successful completion of 63 semester credits in post-BSN-to-DNP program required courses and all specialty clinical experience requirements; as well as satisfactory attainment of terminal program competencies (exit examination) prior to conferral of MSN degree.
2. Successful completion of all DNP required core courses (36 credits), including DNP Project public presentation and defense are required for conferral of DNP degree.
3. Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.
4. Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B- or below will not count toward satisfying graduate degree requirements.
5. With the exception of DNP Project courses, students are expected to register for courses with letter grades.

Post-BSN-to-DNP (Psychiatric-Mental Health Nurse Practitioner-MSN/DNP)

The Post-BSN-to-DNP is a program of graduate doctoral study for registered nurses. The Post-BSN-to-DNP program of study builds upon the initial clinical training of entry level nurses prepared at the baccalaureate level. This program will include the study of: advanced specialty practice; systematic practice and program outcome evaluation; application of health information resources; development of safe, equitable, and cost effective health policy; innovation, implementation and evaluation of care delivery models; leadership development in healthcare delivery and clinical expertise for advanced nursing

practice education. Graduates of this program will be eligible for certification as a Psychiatric-Mental Health Nurse Practitioner. The goals of the Post-BSN-to-DNP program are to prepare nurses for leadership roles in a specialized area of advanced nursing practice with an emphasis on: philosophical, ethical, and scientific principles that provide the foundation for leadership in professional nursing care; continued acquisition of knowledge and clinical skills in an area of advanced practice specialization; and leadership and clinical expertise in healthcare delivery, evaluation, quality improvement and advanced practice nursing education.

Admission Requirements

1. Successful completion of all the admission requirements for graduate education at Florida International University and the Nicole Wertheim College of Nursing and Health Sciences.
2. Cumulative undergraduate GPA of 3.0 or greater on a 4.0 scale (CUM GPA is a calculation inclusive of all academic coursework including courses at the community college level.)
3. UG 60 GPA of 3.0 or greater in Bachelor of Nursing upper division coursework.
4. Current State of Florida RN license. Out-of-state students must obtain a license to practice in Florida prior to admission.
5. Baccalaureate degree in Nursing (BSN) from a program accredited by the Commission on Collegiate Nursing Education (CCNE) or by the Accreditation Commission for Education in Nursing (ACEN) formerly known as the National League for Nursing Accrediting Commission (NLNAC). Applicants from Programs without such accreditation will be considered on an individual basis.
6. Completion of all admission paperwork including the NursingCAS application, a written essay, Recommendations, and Curriculum Vitae
7. Essay (500 words) addressing desired focus and areas of interest for practice in The Post-BSN-to-DNP program.
8. Three (3) professional recommendations describing ability to be successful in a MSN-DNP program.
9. Curriculum Vitae.
10. Successful personal Interview with The Post-BSN-to-DNP admissions committee.

In order to advance to the DNP Scholarly Project course series component of this track, students must meet the following requirements upon conferral of MSN degree:

1. Maintain good academic standing as defined in the FIU Student Handbook
2. Current licensure with no restrictions as an APRN in your state of residence;
3. Proof of Advanced Practice Specialty National Board Certification in the specialty of conferred MSN (i.e., AGNP, FNP, PNP, PMHNP)

Curriculum

Doctor of Nursing Practice Core (36 credits)

NGR 7121	Scientific and Theoretical Foundations for Advanced Nursing Practice	3
NGR 7769	Patient Safety and Quality Improvement in Healthcare	3
NGR 7891	Healthcare Finance and Economics in Advanced Clinical Practice	3

NGR 7871	Healthcare Informatics	3
NGR 7854	Analytical Methods for Evidence-Based Clinical Practice	3
NGR 7892L	Health Policy Practicum	3
NGR 7733	Organizational Dynamics of Health Systems	3
NGR 7853	Translational Research	3
NGR 7940C	DNP Project I	4
NGR 7941C	DNP Project II	4
NGR 7942C	DNP Project III	4

Advanced Practice Nursing Core (14 credits)

NGR 6002C	Advanced Health Assessment	4
NGR 5141	Pathophysiologic Basis of Advanced Nursing Practice	3
NGR 6172	Pharmacology and Pharmacotherapeutics in Advanced Nursing Practice	3
NGR 6538	Psychopharmacology for Advanced Practice Nursing	3
NGR 6743	Advanced Practice Nursing Clinical Education Seminar	1

Graduate Nursing Core (8 credits)

NGR 5131	Culture and Advanced Nursing Practice	3
NGR 5810	Research Methods in Nursing	3
NGR 6703	Role Development of the Advanced Practice Nurse	2

Psychiatric-Mental Health Nurse Practitioner (19credits)

NGR 6503	Advanced Psychiatric-Mental Health Nursing I	3
NGR 6503L	Advanced Psychiatric-Mental Health Nursing Practice I	3
NGR 6504C	Advanced Psychiatric-Mental Health Nursing II	3
NGR 6504L	Advanced Psychiatric-Mental Health Nursing Practice II	3
NGR 6505L	Role Synthesis in Advanced Psychiatric-Mental Health Nursing Practice	4
NGR 6560	Advanced Psychiatric Mental Health Clinical Decision Making	3

Post-BSN-to-DNP (Psychiatric-Mental Health Nurse Practitioner-MSN/DNP) Requirements

1. Successful completion of 59 semester credits in post-BSN-to-DNP program required courses and all specialty clinical experience requirements; as well as satisfactory attainment of terminal program competencies (exit examination) prior to conferral of MSN degree.
2. Successful completion of all DNP required core courses (36 credits), including DNP Project public presentation and defense are required for conferral of DNP degree.
3. Achievement of an overall cumulative GPA of 3.0 or above. See Graduate Catalog in University Graduate School Rules and Regulations for information on Academic Warning, Probation, and Dismissal.
4. Removal of all conditions, deficiencies, and incomplete grades. Credit hours for courses in which the grade is "B- or below will not count toward satisfying graduate degree requirements.

5. With the exception of DNP Project courses, students are expected to register for courses with letter grades.

Occupational Therapy

Lynne Richard, Ph.D., OT/L, Chair and Associate Professor

Alma Abdel-Moty, Dr. OT, MS, OTR/L, Academic Fieldwork Coordinator and Clinical Professor

Tana Carson, Ph.D., MOT, OTR/L, Assistant Professor

Hector Huerta, OTD, MS, OTR/L, Clinical Assistant Professor

Rebecca Mojica, OTD, MS, OTR/L, Visiting Assistant Teaching Professor

Amy Paul-Ward, Ph.D., Associate Professor

Ana Rodriguez, OTD, MS, OTR/L, Clinical Assistant Professor

Ingris Treminio, OTD, OTR/L, Clinical Assistant Professor

Jaclyn Schwartz, Ph.D., OTR/L, Assistant Professor

Master of Science in Occupational Therapy

Mission

The mission of Florida International University's Occupational Therapy Department is to establish excellence in occupational therapy education, research and scholarly activities as well as to prepare culturally knowledgeable entry level practitioners who will provide evidence-based occupational therapy services to a locally and globally diverse community. The Department's mission reflects the College's mission: to teach, conduct research, and serve the community. The College prepares diverse health care professionals as providers and leaders in the delivery of high quality, accessible, culturally responsive care within a highly technological and global environment. The College promotes, expands, and validates scientific knowledge and evidence-based practice through interdisciplinary research. The Department's mission is in concert with the University's mission: to meet the educational and support needs of a diverse student population and provide opportunities for minority and non-traditional students.

Vision

The vision of the Occupational Therapy Department is to be locally and globally recognized for quality occupational therapy education, community engagement, research, and scholarly activity.

About The Profession

Occupational Therapy (OT) is a health profession which prepares practitioners to help people across the lifespan to participate in the things they want and need to do through the therapeutic use of everyday activities (American Occupational Therapy Association).

Occupational therapists assess individuals' abilities to carry out tasks and activities necessary to enable function for productive living. Working collaboratively with clients, considering their personal goals, lifestyles, and environments, the therapists develop intervention programs designed to help develop/restore the greatest possible functional capacity. During the treatment or rehabilitation process, the clients actively engage in directed programs of purposeful, meaningful activities designed to increase their levels of functioning.

Occupational therapists work collaboratively with individuals, families, other health professionals, and health and community agency personnel. A successful therapist must be able to work with others, look at the totality of human performance, think creatively, problem solve, and direct the actions of others. Occupational therapists serve a wide variety of individuals in all age ranges and work in settings such as community agencies, sheltered workshops, hospitals, schools, skilled nursing facilities, rehabilitation centers, and home health. There is an increasing demand for occupational therapists and excellent opportunities exist for career advancement. Additional information regarding careers in occupational therapy can be found at the American Occupational Therapy Association Inc. at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929, at www.aota.org, or by calling (301) 652-6611 or (800) 377-8555 (TDD - Telecommunication Device for the Deaf).

The OT program is a seven semester, 80 credit, and full-time program leading to a Master of Science in Occupational Therapy degree.

Program Accreditation

The Occupational Therapy Professional MS Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) located at 6116 Executive Boulevard, Suite 200, North Bethesda, MD 20852-4929. ACOTE's telephone number C/O AOTA is (301) 652-6611, www.acoteonline.org.

Certification and Licensure

The entry-level Professional Master of Science in Occupational Therapy program is accredited by ACOTE. Graduates of the program are eligible to sit for the national certification examination for occupational therapists administered by the National Board for Certification in Occupational Therapy (NBCOT). After successful completion of this exam, the individual will be an Occupational Therapist, Registered (OTR).

Most states require licensure to practice; eligibility for a licensure is usually based on successful graduation from an accredited OT program and passing the NBCOT Certification Exam. A felony conviction may affect a graduate's ability to sit for the NBCOT Certification Examination or attain state licensure. Students should be aware that it is difficult (or impossible) to obtain a license if they have ever been convicted, plead guilty or nolo contendere to a felony violation.

Background Checks and Drug Screenings

All admitted and incoming students, as part of the admission process, must comply with the Nicole Wertheim College of Nursing and Health Sciences [NWCNHS] policy for health and immunization screening and background check.

The health and immunization screening includes the following requirements:

- Immunization and /or titers of:
 - Varicella, Rubella and Rubella, Mumps or MMR vaccine
 - Tetanus Toxoid booster; diphtheria; pertussis, or ADACEL vaccine
 - Hepatitis B Vaccine (3 doses)
 - PPD- 2 step-if 1st time taker
- Medical history and Physical Exam

- CPR/BLS – for health care providers from AHA
- Proof of major medical health insurance coverage
- 7 year employment verification
- Pass a drug screening

Florida International University- NWCNHS utilizes Complio as the background clearing house, and for tracking student immunization records.

The background check includes social security number search (residency history, state and year SSN issued), criminal search (7 years), sex offender search, federal criminal search, and healthcare exclusion list.

Advising

Group information sessions for interested applicants are held on a regular basis during the semester; the dates are posted on the department website, <https://cnhs.fiu.edu/academics/occupational-therapy/index.html>. If you have specific questions related to your application, the OT advisor will answer them during the session. All applicants are expected to attend an information session. Students can also call the OT department at (305) 348-6068 or (305) 348-2922 and ask to speak with an advisor.

NOTE: The programs, policies, requirements, and regulations listed in this catalog are continually reviewed in order to serve the needs of the University's and College's various policies and to respond to the mandates of the Florida Department of Education, Board of Governors, the Legislature, and other regulatory and accrediting agencies. Changes may be made without advance notice. Please refer to the General Information section for the University's policies, requirements, and regulations. Please refer to <https://cnhs.fiu.edu/academics/occupational-therapy/index.html> for latest information on the OT program, policies, and procedures.

The Professional Master of Science

The Professional Master of Science in Occupational Therapy program is designed for students who hold a baccalaureate degree from an accredited college or university. Through a combination of academic and fieldwork education the MSOT program of study prepares students for entry-level practice as a generalist practitioner.

Application Process and Deadlines

The application and admission process is composed of three parts:

1. The OT program uses the Occupational Therapy Centralized Application Service (OTCAS) for application to our program. An applicant must create an OTCAS account at: <https://portal.otcas.org/>. All application materials are completed through the OTCAS system. All official transcripts should be sent directly to OTCAS to verify your academic records. All application materials must be received by the application deadline in order to be considered. Our website: <https://cnhs.fiu.edu/academics/occupational-therapy/index.html> provides full details and application the deadline date.
2. Applicants are required to submit an Admissions application fee. The FIU Admissions Office will contact applicants via email with instructions

regarding payment after the OTCAS application is complete

3. Graduate Record Exam (GRE) scores must be sent to the FIU Admission's Office and official transcripts must also be sent to the FIU Admission's Office if you are admitted to the OT program. For more information: <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>.

Admission Requirements

Admission to the Professional Master of Science in Occupational Therapy is highly competitive and admits students for the **fall semester of each academic year**. The department selects students based on their record of academic excellence, outstanding personal qualities and achievements.

To be considered for admission to the Professional Master's degree program students must:

1. Have taken the Graduate Record Exam (GRE) within the last five years. GRE scores must be received by the FIU Admission's Office (**GRE School Code 5206**) by the application deadline.
2. Hold a bachelor degree from an accredited college or university.
3. Have a minimum of 3.0 GPA average based on a 4.0 scale in upper division courses of the bachelor degree.
4. Complete the following prerequisite courses prior to the start of the fall admission term with a minimum grade of "C": a). Abnormal Psychology; b) Human Growth & Development; c) Biology with Lab; d) Statistics; and e) Medical Terminology. Required cumulative GPA for all prerequisite courses is 3.0 on a 4.0 scale.
5. A grade of "B" or above must be earned in the following 4 courses: a) Anatomy and Anatomy Lab; b) Pathology; c) Physiology; and d) Neuroscience. Applicants with 3 of the 4 courses complete by the application deadline will be given priority for review and potential admission.
6. Complete the OTCAS application. Provide 3 letters of reference, a personal essay of professional and educational goals, work experience, activities, accomplishments and recognitions. These documents are submitted directly with your application. Admission is competitive and meeting the minimum requirements for admission does not guarantee admission into the program.
7. Meet admissions requirements of the OT department, FIU's Admission Office and pay the FIU Admissions Office application fee.
8. International students must have a Bachelor's degree equivalent of a US baccalaureate degree from an institution recognized in their own country as preparing students for graduate level study. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). Minimum required scores is 550 on the paper-based TOEFL, 80 on the internet-based TOEFL (iBT) or 6.5 overall on the IELTS.
9. A departmental interview may be required.

Prerequisites for the Professional MS degree

1. Biology and lab

2. Human Physiology (3 credits) or Anatomy/Physiology I and II with labs (<i>students who have completed Anatomy/Physiology I and II with labs have met the prerequisites for Biology and Physiology, but not Anatomy</i>)6-8	3	OTH 5438	Adult Neurorehabilitative Approaches in Occupational Therapy	3
3. Abnormal Psychology	3	OTH 5438L	Adult Neurorehabilitative Approaches in Occupational Therapy - Lab	1
4. Human Growth and Development	3	OTH 5843C	Adaptation of Human Occupation and Environment for Psychosocial Practice II	3
5. Statistics	3	OTH 5725	Management and Community Based Practice in Occupational Therapy	3
6. Human Anatomy with lab ¹	4	OTH 6973	Master's Project	3
7. Pathology	3	OTH 5922L	Integrative Seminar II	2
8. Medical Terminology	1-3	OT Elective		3
9. Neuroscience ¹	3	OTH 5845	Level II Fieldwork I	6
		OTH 5846	Level II Fieldwork II	6

¹These courses must be numbered 3000 or above.

Required Courses for Professional Master in OT: (80 credits)

Professional Master's Course Sequence*

OTH 5011	Foundations of O.T. Practice	3
OTH 5162	Therapeutic Approaches in Occupational Therapy	2
OTH 5162L	Therapeutic Approaches in Occupational Therapy - Lab	1
OTH 5202	Occupational Development: Infancy Throughout Adolescence	3
OTH 5202L	Occupational Development: Infancy Through Adolescence Lab	1
OTH 5760	Current Research in Occupational Therapy	3
OTH 5224	Conditions Affecting Occupational Performance	3
OTH 5203	Occupational Development: Adulthood and Aging	3
OTH 5414	Analysis & Adaptation Human Motion	3
OTH 5414L	Analysis & Adaptation Human Motion Lab	1
OTH 6195	Assistive Technology and the Environment	2
OTH 6195L	Assistive Technology and the Environment Lab	1
OTH 6772	Evidence Based Practice and Critical Appraisal	3
OTH 5921L	Integrative Seminar I	2
OTH 5430	Biomechanical and Rehabilitative Approaches in Occupational Therapy I	2
OTH 5430L	Biomechanical and Rehabilitative Approaches in Occupational Therapy I - Lab	1
OTH 5217	Occupational Engagement Throughout the Continuum of Care	2
OTH 5217L	Occupational Engagement Throughout the Continuum of Care Lab	1
OTH 5301	Adaptation of Human Occupation and Environment for Psychosocial Practice I	2
OTH 5301L	Adaptation of Human Occupation and Environment for Psychosocial Practice I Lab	1
OTH 5524	Occupation-based Intervention for Pediatric Populations	3
OTH 5524L	Occupation-based Intervention for Pediatric Populations Lab	1
OTH 6972	Master's Project	3
OTH 6431	Biomechanical and Rehabilitative Approaches in Occupational Therapy II	2
OTH 6431L	Biomechanical and Rehabilitative Approaches in Occupational Therapy II Lab	1

*Some courses may be offered Online; Curriculum and sequence may be changed by department

Academic Standing

Good Standing: To achieve and maintain a classification of good standing, the student must maintain a minimum G.P.A. of 3.0.

Physical Therapy

Mark D. Rossi, PT, MPT, Ph.D., CSCS, *Chair and Associate Professor*

Erasmó Alvarez, PT, DPT, *Clinical Assistant Professor*

David Capote, PT, DPT, COMT, KTCC, CSCS, *Clinical Assistant Professor*

Sheila Clemens, PT, MPT, Ph.D., *Assistant Professor*

Helen Z. Cornely, PT, Ed.D., *Associate Dean of Administrative Affairs and Associate Professor*

Inae Gadotti, PT, MSc, Ph.D., *Associate Professor*

Teresa Muñecas, PT, DPT, *Director of Clinical Education and Clinical Assistant Professor*

Annabel Nunez-Gaunaurd, PT, MSPT, Ph.D., *Assistant Professor*

Lisa Roberts, PT, DPT, CSCS, *Clinical Assistant Professor*

Amanda Thomas, PT, DPT, *Clinical Assistant Professor*

Edgar Vieira, PT, MSc, Ph.D., *Associate Professor*

About the Department

The mission of at Florida International University's Physical Therapy Department is to contribute to the health of the global community. Our student centered program will prepare an ethnically, racially and culturally diverse group of students to be caring and competent Doctors of Physical Therapy. The department will foster critical thinking, scholarship and leadership through the conduct of an evidenced based curriculum and dissemination of basic and clinical research related to populations who have, or are at risk for developing movement problems. Faculty and students will be engaged in community activity that is aligned with our research and teaching.

The curriculum is accredited by the Commission on Accreditation of Physical Therapy Education (CAPTE), and has been since its inception in 1975.

The department occupies over 6,000 square feet of offices and laboratories on the Modesto A. Maidique Campus of FIU. The departmental inventory includes the full range of clinical equipment used by practicing physical therapists and is continually updating equipment to support faculty and student research projects. The Human Performance Laboratory contains state-of-the art biomechanics equipment to measure many aspects of human movement.

There are 10 full-time faculty members, and numerous adjunct faculty.

The clinical and research interests of the faculty range from pediatrics to geriatrics, and from neuroscience to biomechanics.

The faculty prides itself on its intellectual, cultural, racial, and ethnic diversity. There are approximately 160 students in the department.

Academic Program

The department offers a three-year, 113-credit program leading to Doctor of Physical Therapy (DPT) degree.

The DPT program is rigorous, and is recommended only for highly motivated students with proven records of success as undergraduates. Admission to the program is limited to approximately 55 students per year.

Upon completion of this program, students will be eligible to apply for licensure as a Physical Therapist

anywhere in the United States and several other jurisdictions.

Minimum Admission Requirements

1. A Bachelor's degree from an accredited institution.
2. An overall cumulative, pre-requisite, and last 60 hours of Upper Division GPA of 3.0
3. A score above the 50 percentile on both Verbal and Quantitative sections of the GRE is recommended. A minimum score of 3.5 is recommended for the Analytical portion of the GRE.
4. A minimum of 60 hours of observation and/or work experience with physical therapists.
5. Three letters of recommendation two of which must be from a physical therapist.
6. Completion of the following prerequisites courses:

Courses	Cr
Chemistry with Lab	8
Developmental Psychology	3
General Biology with Lab	4
Human Anatomy with Lab	4
Human Physiology with Lab	4
Physics with Lab	8
Psychology	3
Statistics	3

Additional Items:

1. Essay which explains why you want to become a physical therapist and why you are interested in attending FIU.
2. A curriculum vitae/resume.
3. Admission into FIU as a graduate student.

Application and Admission Processes

Applying for admission to the DPT program is via the Physical Therapist Centralized Application Service (PTCAS) at the below address.

<http://www.ptcas.org/FloridaInternational.html>.

The applicant also needs to complete a Supplemental Graduate School Online Form at <https://intra.fiu.edu/Facts/PTCAS>.

Admission to the program is highly competitive. The Department selects students based primarily on their record of academic performance, although evidence of non-academic outstanding personal qualities is also considered.

Timelines

Final application deadline is mid-January to begin the program the following Fall semester.

Qualified applicants will be invited for an interview.

Early Admission

We will review applicants on a monthly basis beginning in September prior to the January deadline. Well qualified students who apply within this time frame will be invited to campus for an early interview. Successful candidates will be offered early admission contingent on completing all admission requirements. Go to the department's website for a full description of the admissions process and prerequisite courses <http://cnhs.fiu.edu/pt/index.html>.

Program of Studies

Fall Semester 1: (15 credits)

PHT 5174	Analysis of Movement and Function	3
PHT 5174L	Analysis of Movement and Function Lab	1

PHT 5523	Dimensions of Professional Practice Seminar I	3	Fall Semester 3: (13 credits)		
PHT 5070	Principles of Diagnostic Imaging	1	PHT 5505C	Physical Therapy Constructs of Health and Wellness	3
PHT 5244C	Principles of Therapeutic Exercise	3	PHT 6009	Differential Diagnosis in Physical Therapy	3
PHT 5180	Musculoskeletal Diagnosis and Management I	3	PHT 6817	Clinical Internship II	3
PHT 5180L	Musculoskeletal Diagnosis and Management I Lab	1	PHT 6970	DPT Project 3	3
			PHT 6547	Case Management in Physical Therapy	1
			Spring Semester 3: (14 credits)		
Spring Semester 1: (14 credits)			PHT 6827	Clinical Internship III	3
PHT 5303	Principles of Pathophysiology in Physical Therapy	3	PHT 6725	Extremity Evaluation and Rehabilitation	3
PHT 5205	Clinical Skills	3	PHT 6325	Advanced Clinical Pediatric Physical Therapy	3
PHT 5205L	Clinical Skills Lab	1	PHT 5524	Dimensions of Professional Practice Seminar II	3
PHT 6353	Principles of Diagnostics and Pharmacology in Physical Therapy	3	PHT 6905	Independent Study	1
PHT 5181	Musculoskeletal Diagnosis and Management II	3	PHT 5960	Comprehensive Exam I	1
PHT 5181L	Musculoskeletal Diagnosis and Management II Lab	1			
			Summer Semester 3: (5 Credits)		
Summer Semester 1: (12 credits)			PHT 6828	Clinical Internship IV	3

Certificate Programs

Graduate Certificate in Communication Sciences and Disorders

The Graduate Certificate in CSD provides graduate level instruction in the basic processes of speech, language, and hearing, speech and language development, and speech and language production that are required for the identification, prevention, and management of speech, language, swallowing, and cognitive-communication disorders. Students applying to the Graduate Certificate in CSD must already have completed a bachelor's degree, which may be in any discipline. This certificate program is open to non-degree-seeking students only. The Graduate Certificate in CSD prepares students with bachelor's degrees in other discipline areas with the required coursework to be eligible for application to the "Masters" program in Speech-Language Pathology (SLP) in the Department of Communication Sciences and Disorders. Individuals with a bachelor's degree and the completed Graduate Certificate in CSD may be eligible to apply for state licensure to become a speech-language pathology assistant. However, the "Masters" degree in Speech-Language Pathology is the only entry level degree to become a practicing licensed and certified Speech-Language Pathologist. Completion of the coursework in the Graduate Certificate in CSD or its equivalent is required for eligibility for application into the "Masters" program in SLP. The Graduate Certificate in CSD consists of 28 required credits (10 courses) of specified graduate coursework.

Admission Requirements

A student already holding a BA or BS degree who has a minimum 3.0 cumulative GPA is eligible to apply for the Graduate Certificate program in CSD. A minimum grade of "C" or better is required for all certificate courses. For any courses in the Graduate Certificate program in CSD that are eligible for transfer to the "Masters" program in SLP (see Graduate course catalog), a minimum grade of "B" is required.

Required Courses

The Graduate Certificate program in CSD consists of 28 required credits (10 courses) of specified graduate coursework.

SPA 5009C	Normal Communication Development and Disorders	3
SPA 5012C	Introduction to Communication Sciences and Disorders	3
SPA 5035C	Disorders of Hearing and Audiological Sciences	3
SPA 5051C	Clinical Observations, Management, and Procedures in Communication Disorders	3
SPA 5102C	Advanced Human Anatomy and Physiology of Mechanisms of Communication	3
SPA 5102L	Advanced Human Anatomy and Physiology of Mechanisms of Communication Laboratory	3
SPA 5113C	Advanced Applied Phonetics	3
LIN 5206	Phonetics	3

SPA 5150C	Acoustics of the Sciences of Speech and Hearing	3
SPA 5262	Linguistics for SLP	3
	or	
LIN 5018	Introduction to Linguistics	3
SPA 6322	Aural Habilitation and Rehabilitation	3

This course is a required course in the "Masters" program in SLP at FIU. Students who complete this course through the Graduate Certificate in CSD or who complete the course at another university will be exempt from taking the course in the "Masters" program.

LIN 5018	Introduction to Linguistics	3
	or	
SPA 5262	Linguistics for SLP	3

Additional Requirements

To remain in the Graduate Certificate program in CSD, students must maintain a minimum 3.0 cumulative GPA in the graduate certificate coursework. To be awarded the Graduate Certificate in CSD, the student must achieve a minimum 3.0 GPA in the certificate and complete all of the courses in the Certificate at FIU. Students in the Graduate Certificate in CSD are required to be continuously enrolled in at least two courses per semester (except when taking the last course in the certificate program). Furthermore, all students are required to complete the certificate within four continuous semesters, which includes summer semesters.

Graduate Certificate in Culturally Competent Nursing Education

This certificate provides a unique combination of courses to prepare the graduate in the pedagogical competencies essential to teach nursing in an increasingly complex health care environment. This certificate program is open to degree-seeking students only. The technologically enhanced plan of study builds on advanced professional nursing competencies and emphasizes the use of a variety of assessment, instructional, curricular development and evaluate strategies that facilitate learning in culturally diverse populations. The goals of this certificate are to:

- Prepare nurse faculty with the knowledge, skills, and structured experiences to enhance classroom and clinical teaching and learning.
- Prepare nurse educators from diverse backgrounds who can teach nursing students to provide culturally competent care for diverse communities.
- Provide nurse educators with expertise in teaching technologically enhanced curricula and in facilities that enhance learning.
- Prepare nursing faculty and advanced practice nurses for professional certification as a Nurse Educator.

Admission Requirements

1. Completed FIU Graduate Admissions online application at <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>, (305) 348-7000.
2. Completed Graduate Nursing certificate application within College of Nursing and Health Sciences.
3. A student must be enrolled in or have completed a Master of Science in Nursing (MSN) degree with a clinical nursing specialty from a NLNAC or CCNE accredited program.

4. Graduate grade point average of 3.0 or higher.
5. Graduate courses (3 credits each) completed or in progress: nursing theory, research, advanced client assessment, advanced pathophysiology, and advanced pharmacology.*
6. Current RN license in Florida.

Other requirements apply. Please contact the graduate nursing office for more detailed information.

*Students lacking required courses must take them prior to registering for the Nursing Education Certificate specialty courses.

Required Credits

Total of 16 credits

Curriculum

NGR 6708C	Classroom Teaching Strategies for Nursing	3
NGR 6710L	Clinical Specialty Practicum for the Nurse Educator	1
NGR 6713	Curriculum Development in Nursing	3
NGR 6714C	Clinical Teaching Strategies for Nursing	3
NGR 6715	Instructional Technology in Nursing and Health Sciences	3
NGR 6718	Testing and Evaluation in Nursing Education	3

Part-Time Study

Part-time study is available and can be accomplished at the student's own pace but must be completed within the **University's time requirement of six years**. Please contact the graduate nursing office for more information.

Graduate Certificate in Gerontology

The objective of the certificate is to provide graduate students and qualified practitioners in the field of aging with a range of gerontological courses leading to a specialization in gerontology to supplement their chosen disciplines. Through provision of an in-depth understanding of the bio-socio-psychological nature of the aging process, and the relation of political and economic resources, the program's long range objective is to increase the knowledge and sensitivity of professionals in this area, and thereby improve the service delivery system for the increasingly large population of elderly Floridians. This certificate program is open to both degree- and non-degree seeking students.

Admission

Students must have a bachelor's degree and be admitted to the program by the Program Coordinator who will serve as their faculty advisor.

Program of Study: (18)

SOW 5641	Understanding the Process of Aging	3
NGR 5250	Physical Change and Healthy Aging	3
HSA 5226	Management of Long Term Care Systems	3

The balance of four courses to be selected from the following areas of concentration. Students who have not had direct practice with older people will be required to select an Individual Study course which will include 225 hours of practicum experience.

Long Term Care Administration

HSA 5225	Long Term Care Management I	3
HSA 5226	Management in Long Term Care	3
HSA 5227	Long Term Care Management II	3
HSA 5454	Ethical Decision Making in Health Services Administration	3
HSA 5816	Practicum in Long Term Care Management	3

Aging and Rehabilitation

OTH 5600	Study of Gerontology as Related to Occupational Therapy	3
OTH 5613	Interdisciplinary Approach to Aging	3
OTH 5630	Occupational Therapy Assessment of the Elderly	3
OTH 5764	Research (<i>topic selected in Geriatric Clinical Specialty</i>)	3
OTH 5905	Independent Study (<i>variable credit</i>)	3
PHT 6238	Motor Development: Adult Through Geriatrics	3
PHT 6239	Adult Congenital Handicapping Conditions	3

Psychology of Aging

DEP 5404	Proseminar in Psychology of Adulthood and Aging	3
DEP 6438	Gerontological Assessment	3
DEP 6465	Psychology of Culture and Aging	3
DEP 6446	Cognitive Processes of Aging	3

Social Work Practice with Older Persons

SOW 5605	Medical Social Work	3
SOW 5845C	Counseling the Elderly	3
SOW 5905	Individual Study	1-3
SOW 6245	Social Welfare Policy and Services for the Elderly ¹	3
SOW 6247	Housing and Environmental Needs	3
SOW 6359	Social Work Treatment with Families of Elderly ¹	3
SOW 6646	Social Work Practice with Elderly ¹	3
SOW 6647	Advocacy in Social Work Practice	3
SOW 6649	Social Work Practice in Long Term Care and the Elderly	3

¹Open only to students with MSW degree or students in Master's degree program in Social Work.

Nurse Executive Certificate Program

Students who are not seeking the Master of Science in Nursing (MSN) degree, but who still seek professional preparation for a nursing management career are candidates for the Nurse Executive Certificate Program. The purpose of the certificate program is to enhance the knowledge and skills of the first line nursing supervisory staff. These courses can also be applied toward a Nurse Executive graduate (MSN) degree. Eligible candidates for admission to the program must have a baccalaureate degree in nursing. This certificate program is open to non-degree-seeking students only.

Curriculum

NGR 5720C	Organizational Dynamics of Nursing	
-----------	------------------------------------	--

NGR 6726C	Nursing Management/CQI	3
NGR 5723C	Advanced Nursing Administration I	4
NGR 6724C	Advanced Nursing Administration II	4

Post-Graduate Nurse Practitioner Certificate Program

The Post-Graduate Nurse Practitioner Certificate builds upon a previously earned master's degree in nursing or higher and is designed for individuals who hold licensure as a registered nurse (RN) and/or advanced registered nurse practitioner (APRN) in the state of Florida.

This program is for RNs who seek initial national certification and licensure as an APRN in a specialty area and for nurse practitioners who wish to be nationally certified in an additional specialty area. The following specialty tracks are available on a space-available basis:

- Adult-Gerontology Primary Care Nurse Practitioner
- Pediatric Primary Care Nurse Practitioner
- Family Nurse Practitioner
- Psychiatric-Mental Health Nurse Practitioner

Please note: Students enrolled in the Certificate Program are classified as non-degree seeking; therefore do not qualify for federal financial aid, school certified private loans or College of Nursing and Health Sciences Scholarships.

Admission Requirements

1. A Master of Science in Nursing (MSN) degree from an CCNE, NLNAC, or ACEN accredited program.
2. A graduate (MSN) grade point average (GPA) of 3.0 or above.
3. Graduate courses in nursing theory (3 credits) and research (3 credits), advanced pathophysiology (3 credits), advanced health assessment (3 credits), and advanced pharmacology (3 credits).
-If the applicant's coursework in advanced pharmacology, advanced pathophysiology, and advanced health assessment took place more than 3 years ago, they may need to repeat the courses prior to enrollment specialty courses, following evaluation of record and professional experience by admission committee and program chair.
4. State of Florida RN and/or APRN licensure. A photocopy of the license must be submitted along with student's application to the Post Graduate Nurse Practitioner Certificate Program.
5. Pre-admission panel interview with a members of the Graduate Nursing Admissions Committee.
6. Two letters of recommendation.

Admission Procedure

STEP 1 - Submit an application to Nursing CAS (The Centralized Application Service for Nursing Programs)

- Complete an online application via Nursing CAS <http://www.nursingcas.org> and pay appropriate fees. Applications will be accepted from Dec 1 to March 1 for Fall admission.
- Send official academic transcripts from ALL SCHOOLS attended (all Associate, Bachelors, Masters degree, and higher [if applicable] coursework) to Nursing CAS for upload and verification.

- Upload all required supplemental items including professional CV, active Florida RN and/or APRN License, recommendations and Personal Statement to Nursing CAS.

- Complete the required FIU supplemental application and pay the \$30 fee.

STEP 2 - Professional Interview

- Following a review of all completed applications a select number of applicants will be offered the opportunity to participate in a panel interview.
- Interview candidates may be instructed to bring an additional set of official transcripts to their interview appointment.

Post Master's Certificate in Nursing Education

The Post Master's Certificate in Nursing Education is designed to provide nursing faculty teaching in all nursing programs (LPN, ADN, BSN, MSN, and Doctoral) knowledge, skill, and structured experiences in classroom and clinical teaching. It enables Community College nursing faculty in Florida to meet requirements for courses in education to maintain their teaching certificates. It will prepare nursing faculty for professional certification by the National League for Nursing for Nursing (NLN) as a Nurse Educator. This certificate program is open to non-degree-seeking students only.

The curriculum for the Post Master's Certificate in Nursing Education consists of 15 credit hours, 9 credit hours in classroom/didactic instruction and 6 credit hours in classroom/clinical teaching experience/seminar.

Admission Requirements

1. Master's degree in Nursing from a nationally accredited education institution.
2. GPA of 3.0 in MSN
3. Letters of recommendation from prior faculty member and nursing supervisor.
4. Statement of personal goals including personal philosophy of teaching and learning.
5. Graduate course in culture and advanced practice nursing (3 credits)

Course Descriptions

Definition of Prefixes

ATR-Athletic Training; GEY-Gerontology; HSA-Health Services Administration; HSC-Health Sciences; NGR-Nursing Graduate; OTH-Occupational Therapy; PET-Physical Education Therapy; PHT-Physical Therapy; SPA-Speech Language Pathology

F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering.

ATR 5105C Principles of Athletic Training with Lab (4). Introduction to principles of athletic training, including the athletic training profession, risk management, the evaluation process, injury prevention, immediate care, and medical documentation. Prerequisite: Admittance into Athletic Training Education Program. Corequisites: ATR 5115C, ATR 5805.

ATR 5115C Management of Medical Emergencies (3). Introduction to the principles of evaluating and managing medical emergencies and application of associated clinical skills. Prerequisite: Admittance into Athletic Training Education Program. Corequisites: ATR 5105C, ATR 5805. Prerequisite: Admittance into Athletic Training Education Program. Corequisites: ATR 5105C, ATR 5805.

ATR 5217C Clinical Evaluation and Diagnosis in Athletic Training I (4). Clinical evaluation and diagnosis of orthopedic injuries and/or dysfunctions that occur to the lower extremity during physical activity. Prerequisites: ATR 5105C, ATR 5115C, ATR 5805. Corequisites: ATR 5305C, ATR 5815L.

ATR 5218C Clinical Evaluation and Diagnosis in Athletic Training II (4). Clinical evaluation and diagnosis of orthopedic injuries and/or dysfunctions that occur to the upper extremity during physical activity. Prerequisites: ATR 5217C, ATR 5305C, ATR 5815L. Corequisite: ATR 5316C.

ATR 5219C Orthopedic Assessment III – Head, Spine, and Trunk (4). Introduction to common types of orthopedic injuries and/or dysfunctions that occur to the head, spine, and trunk during physical activity and the techniques of injury prevention, recognition, and evaluation. Prerequisites: ATR 5825L and ATR 5316C. Corequisite: ATR 5435.

ATR 5305C Therapeutic Interventions in Athletic Training I (4). Introduction to therapeutic modalities and rehabilitation techniques encountered in athletic training practice for acute injuries, including application of associated clinical skills. Prerequisites: ATR 5105C, ATR 5115C, ATR 5805. Corequisites: ATR 5217C, ATR 5815L.

ATR 5316C Therapeutic Interventions in Athletic Training II (4). Introduction to therapeutic modalities and rehabilitation techniques encountered in athletic training practice for sub-acute and chronic injuries, including application of associated clinical skills. Corequisite: ATR 5218C.

ATR 5435 Diseases and Disabilities in the Physically Active (3). Introduction to the clinical signs and symptoms of general medical conditions that will present to the Certified Athletic Trainer. Prerequisites: ATR 5218C, ATR 5316C, and ATR 5825L. Corequisite: ATR 5219C.

ATR 5517 Administration and Professionalism in Athletic Training (3). Introduction to the concepts of legal liability, budgeting, inventory, facilities design and general administration of the athletic training room. Prerequisites: ATR 5219C, ATR 5835L, ATR 5435. Corequisite: ATR 6620.

ATR 5805 Clinical Education Seminar in Athletic Training (1). Addresses issues related to the clinical setting and prepares the student for the clinical component of the Athletic Training Program while completing clinical experience hours. Prerequisite: Admittance into Athletic Training Program.

ATR 5815L Clinical Education I (3). Designed to allow students to apply athletic training techniques associated with the principles of athletic training, management of medical emergencies, and clinical education. Prerequisites: ATR 5105C, ATR 5115C, ATR 5805. Corequisites: ATR 5217C, ATR 5305C.

ATR 5825L Clinical Education II (3). Designed to allow students to apply athletic training techniques associated with orthopedic assessment of the lower extremity and therapeutic modalities. Prerequisites: ATR 5217C, ATR 5305C, ATR 5815L. Corequisites: ATR 5218C, ATR 5316C.

ATR 5835L Clinical Education III (3). Designed to allow students to apply athletic training techniques associated with orthopedic assessment of the upper extremity and rehabilitation. Prerequisites: ATR 5218C, ATR 5316C, ATR 5825L. Corequisites: ATR 5219C, ATR 5435.

ATR 5845L Clinical Education IV (3). Designed to allow students to apply athletic training techniques associated with orthopedic assessment of the head, spine, and trunk, intervention and referral, and diseases and disabilities. Prerequisites: ATR 5219C, ATR 5835L, ATR 5435. Corequisite: ATR 6620.

ATR 6207 Preventative Interventions in Athletic Training (3). Advanced primary and secondary assessment skills used by athletic trainers to develop preventative interventions will be examined and applied. Attendance at an on-campus summer workshop is required.

ATR 6425 Pharmacology and Diagnostic Imaging in Athletic Training (3). Introduces students to the principles of pharmacology and diagnostic imaging and their relationships to the Certified Athletic Trainer. Prerequisite: ATR 5517, ATR 6620, ATR 5845L. Corequisites: ATR 6621, ATR 6855L.

ATR 6507 Entrepreneurial Leadership in Athletic Training (3). Leadership and business strategies related to athletic training. Topics that will be covered include characteristics associated with entrepreneurship, innovation, and identifying niches.

ATR 6518 Healthcare Informatics in Athletic Training (3). Technologies used to manage clinical data and access the most recent evidence for optimum patient care will be learned and applied. Various outcomes assessment techniques will also be discussed.

ATR 6526 Quality Improvement Strategies in Athletic Training (3). Quality improvement strategies from multiple perspectives will be applied and evaluated. Attendance at an on-campus summer workshop is required.

ATR 6527 Community Health and Prevention Strategies in Athletic Training (3). Public health concepts encountered by athletic trainers will be introduced including risk factors, various disparities, and community-based programs and prevention strategies for medical conditions.

ATR 6546 Successful Business Strategies in Athletic Training (3). Establishing a business structure, creating a market for one's business, management and leadership principles, and other critical components of starting and operating a successful business venture.

ATR 6547 Financial Planning for Athletic Training (3). Designed for the athletic training student to learn how to build a financial portfolio as it relates to professional and personal goals.

ATR 6548 Athletic Training Consulting (3). Various opportunities for athletic trainers to consult within and outside the profession by developing the skills required to successfully offer a service, product, or information.

ATR 6555 Academic Leadership in Athletic Training (3). Addresses leadership styles for athletic trainers working in a secondary school or college/University setting. Issues pertaining to human resources, personnel, supervision, performance, promotion.

ATR 6556 Curricular Planning & Development in Athletic Training (3). Components of planning and developing a curriculum to include writing course syllabi, programmatic and regional accreditation, curricular sequencing, interprofessional education, and exam writing.

ATR 6557 Navigating Academia in Athletic Training (3). Introduces the structure and governance of a college/University academic setting. Common terms, titles, roles, expectations are discussed. Components of teaching, scholarship, service, and advising.

ATR 6558 Teaching & Learning Strategies in Athletic Training (3). This class focuses on common methods implemented in the learning environment. Various teaching and learning style inventories will be introduced and analyzed for different settings and audiences.

ATR 6620 Research and Evidence-Based Practice in Athletic Training I (3). Introduces students to a systematic approach to ask and answer clinically relevant questions in athletic training through the critical examination of existing research evidence.

ATR 6621 Research and Evidence-Based Practice in Athletic Training II (3). Introduces students to the concepts of conducting research and disseminating findings. Prerequisite: ATR 6620.

ATR 6855L Clinical Education V (3). Designed to allow students to apply the athletic training techniques associated with administration and professionalism in allied health care in selected clinical education settings. Prerequisites: ATR 5517, ATR 5845L.

ATR 6906 Independent Study/Thesis in Athletic Training (1-9). Faculty supervised project or research thesis that involves an in-depth study of contemporary issues and/or clinical practices relevant to athletic training. Prerequisites: Graduate standing and permission of the instructor.

ATR 7606 Epidemiology and Health Surveillance in Athletic Training (3). Epidemiological concepts for quantifying injury and illness will be introduced. Topics include study design, techniques, hypothesis formation, and access to care.

ATR 7619 Using Research for Evidence-based Clinical Practice in Athletic Training (3). Designed to enhance the athletic trainer's clinical decision-making process by integrating clinical experience, patient values, and best available research evidence.

ATR 7630 DAT Applied Scholarship I (3). Critically analyzes translational research and clinical practice. Guides one through understanding how clinically relevant research questions are developed, studied, and implemented.

ATR 7631 DAT Applied Scholarship II (3). Designed to introduce one to applied scholarship. Describes the publication process for poster and presentation for local, state, regional, national, and international journals and conferences. Prerequisite: ATR 7630 or permission from the instructor.

ATR 7632 DAT Applied Scholarship III (3). Analyzes qualitative and quantitative literature for clinical practice and academia. Small grant funding will be introduced. Prerequisites: ATR 7631 or permission from the instructor.

ATR 7633 DAT Applied Research IV (3). The fourth in a series of five courses designed to culminate in a research project. Students will complete data collection and manage and analyze data for an applied research project. Prerequisite: ATR 7632 or permission of the instructor.

ATR 7634 DAT Applied Research V (3). The fifth in a series of five courses designed to culminate in a research project. Students will complete data analysis and disseminate the research findings through submission of a manuscript. Prerequisite: ATR 7633 or permission from the instructor.

ATR 7806 DAT Capstone Project (3). Individualized Specialization plan chosen from either Educational Leadership or Entrepreneurial Leadership which develops a body of knowledge and skills culminating in a capstone project. Repeatable. Prerequisite: Open to DAT students only.

ATR 7955 Athletic Training Globalization (3). Prepares the athletic training student to develop competency in cultural awareness. Students develop a global awareness project that has the option of including international travel.

GEY 5005C Issues in Gerontology for Health Professions (3). This course examines social, economic, and demographic issues challenging older adults and health care professionals providing services to this age group.

GEY 5600 Physical Change and Healthy Aging (3). Primary health care and wellness with discussion and assessment of normal physiological alterations and their relationship to common health concerns and medical problems of older adults.

HSA 5125 Introduction to Health Policy and Management (3). The American health care system is broadly analyzed in social, economic, and political terms, including examination of its major operational and

programmatic components as they have evolved in their changing patterns and trends of organizational development.

HSA 5177 Financing and Reimbursement for Long Term Care Facilities (3). This course introduces the theory and practice of government regulations as they pertain to long term care facilities. The program seeks to identify the critical elements for securing payments for service and study relevant capital investment procedures and policies. Prerequisite: HSA 5225. Corequisite: HSA 5227.

HSA 5225 Long Term Care Management I (3). Long term care facility organization and management are studied. Management implications of the social, economic, financial, and regulatory environment of nursing homes are examined. Prerequisite: HSA 6185.

HSA 5226 Management of Long Term Care Systems (3). Organizational, financial, and policy issues in the management of long term care systems in the U.S. with special emphasis on the State of Florida.

HSA 5227 Long Term Care Management II (3). Survey of theories of gerontic care for understanding the aging process. Focus is on the application of knowledge of the aging process to management and care given in nursing homes. Corequisite: HSA 5816.

HSA 5455 Ethical Decisions in Health Services Administration (3). This course will study ethical principles as they apply to areas of management, supervision and clinical practice in the delivery of health care. Emphasis is on managerial decision-making. Prerequisites: HSA 5125, HSA 6185.

HSA 5816 Practicum in Applied Management in Long Term Care (3). Students will spend 180 hours in supervised practice in a nursing home setting. They carry out managerial responsibilities related to the administration of the facility. Corequisite: HSA 5227.

HSA 5876L Administrative Residency in Nursing Home Setting (3-6). Students will spend 480 hours of supervised practice in a selected nursing home to gain experience in organization and management within the nursing environment. Prerequisites: HSA 5816, HSA 5225, HSA 5226, HSA 5227.

HSA 5935 Special Topics Seminar in Health Services (1-3). Students investigate topics of interest in health care services through lectures by the faculty and guest speakers. May be repeated. Prerequisite: Permission of faculty advisor.

HSA 6149 Strategic Planning and Marketing of Health Care Services (3). Principles, techniques, and case study applications of strategic planning and marketing in the context of changing environmental, policy, and competitive forces in the health services industry. Prerequisite: Completion of 36 credit hours in program coursework.

HSA 6155 Health Policy and Economics (IS) (3). This course examines the impact of government, private sector, and interest groups on priority setting in global health policymaking and national health strategies using basic economics principles. Prerequisites: HSA 6415, HSA 6156, PHC 6065. For PMBA students, completion of MAN 6095, HSA 6176, and HSA 6156.

HSA 6156 Economic and Decision Analysis in Health Services (IS) (3). Using economics as a tool, this course analyzes specific world-wide health care problems and the functioning of global health care markets. Prerequisites: Completion of Foundation Courses or minimum of 9 credit hours of program coursework including HSA 5125, HSA 6185, PHC 6065, HSA 6176. For PMBA students, completion of MAN 6095 and HSA 6176.

HSA 6175 Financial Management of Health Systems (3). Aspects of modern hospital and health care organization financial management are covered to prepare students for executive roles in policy planning and control responsibilities involving budgeting, auditing, investing, capital financing, etc. Prerequisites: Completion of Foundation Courses or minimum of 9 credit hours of program coursework including HSA 5125, HSA 6185, PHC 6065, HSA 6176.

HSA 6176 Financing & Reimbursement of Health Systems (IS) (3). In this course financing models for health delivery systems are examined. Reimbursement strategy of Medicare, Medicaid and other third party payers are analyzed. Prerequisite or Corequisite: HSA 5125, For PMBA students, MAN 6095.

HSA 6185 Management and Organizational Theory in Health Care (3). Fundamentals of management and organizational theory with focus on roles and functions of managers, and the influences of organizational structure and design in the dynamic environment of health care systems.

HSA 6186 Leadership and Organization Behavior in Health Care Systems (3). Examine leadership and organizational behavior in health care settings. Personal and profession growth are encouraged through integrative study of individual, group and organizations issues. Prerequisites: Completion of Foundation Courses or minimum of 9 credit hours of program coursework including HSA 5125, HSA 6185, PHC 6065, HSA 6176.

HSA 6187 Managing Human Resources and Health Professions (3). Study of human resource functions and activities necessary to enhance knowledge, competencies, skills, attitudes and behavior and to improve individual and organizational performance in health care organizations. Prerequisites: Completion of Foundation Courses or minimum of 9 credit hours of program coursework including HSA 5125, HSA 6185, PHC 6065, HSA 6176.

HSA 6197 Design and Management of Health Information Systems (3). The development and management of health information systems to support managerial decision-making. Emphasis is on the integration of clinical, personnel, and financial data. Prerequisites: Completion of Foundation Courses or minimum of 9 credit hours of program coursework including HSA 5125, HSA 6185, PHC 6065, HSA 6176.

HSA 6205 Hospital and Health Facilities Organization (3). Administrative theory and management principles are examined in their application to the organizational analysis of hospitals and health care facilities. Prerequisites: HSA 5125, HSA 6185 or permission of the instructor.

HSA 6215 HMO and Ambulatory Care Administration (3). Overview of the management process employed in health maintenance organizations (HMO's) and other

group medical practices operating under various financial arrangements, including prepayment. Prerequisites: HSA 5125, HSA 6185, or permission of the instructor.

HSA 6415 Marketing and Demographic Analysis in Health Care (3). This course is designed to familiarize students with analytical procedures and empirical techniques of market analysis and to equip students for practical work in market analysis. Prerequisites or Corequisites: HSA 5125 and PHC 6065.

HSA 6426 Health Law and Legal Aspects of Management (3). The broad range of legal issues in health care and administrative aspects of law that concern health care managers are surveyed for implications concerning malpractice, patient rights, contracts, liability and immunity, taxation, surgical consent, etc. Prerequisites: Completion of Foundation Courses or minimum of 9 credit hours of program coursework including HSA 5125, HSA 6185, PHC 6065, HSA 6176.

HSA 6717 Advanced Health Services Management and Research Seminar (3). Integrates the theoretical and practical knowledge of other courses in the curriculum. Case studies and relevant research provide the substantive framework for analysis of health care issues. Prerequisite: Permission of the instructor.

HSA 6759 Quality Assessment and Outcome in Healthcare (3). The concept of quality and quantity assessment are examined from multiple perspectives: patients, healthcare providers, payors standard setting organization and healthcare policymakers. Prerequisites: Completion of Foundation Courses or minimum of 9 credit hours of program coursework including HSA 5125, HSA 6185, PHC 6065, HSA 6176.

HSA 6875 Administrative Residency (2). Off-campus placement in residency with health care organizations under supervision of a managing preceptor at the site. Prerequisites: HSA 6930 and approval of the coordinator.

HSA 6905 Directed Study in Health Services Administration (1-6). The course is designed to allow students an opportunity for in-depth literature research relating to a problem or issue in health services administration under the supervision of a faculty advisor. Prerequisite: Permission of faculty advisor.

HSA 6930 Professional Seminar in Health Services Management (1). A professional seminar to provide career development skills in preparation for residency or master's project. Prerequisite: Completed 36 credit hours in the program coursework.

HSA 6977 Masters Research Project (1-6). The student will be field afforded the opportunity to conduct a research project on a specific health care management problem in a community or institutional setting. A formal proposal will be prepared and approved by faculty. Students will be expected to demonstrate during the course of this research project that they can implement theoretical knowledge and skills learned earlier in courses on research methods and design. Prerequisites: HSA 6930 and permission of advisor.

HSC 5319 Teaching Health Education (4). Students will select various modern techniques and tools for teaching health education in elementary and secondary school settings.

HSC 5665 Information and Communication for Health Professionals (3). Information and communication technology introduces technology and practical computer applications for today's health care professional. This on-line course uses a web-based format. Prerequisite: Basic computer experience.

NGR 5064C Diagnostic and Therapeutics in Advanced Nursing Practice (3). Provides the advance practice nurse/student the theoretical background and clinical applications for diagnostics and therapeutics across the lifespan.

NGR 5110 Theories in Nursing (3). Analysis, evaluation, and application of theories from nursing and related disciplines to advanced nursing practice, research, education and administration. Prerequisites: Departmental permission, Graduate standing.

NGR 5131 Culture and Advanced Nursing Practice (3). Theoretical models explanatory of culture and behavioral manifestations of cultural diversity. Focuses on multicultural nursing and methodologies for nursing care throughout the life span. Prerequisite: Departmental permission.

NGR 5134C Interdisciplinary Health Care Across Cultures (3). The course focuses on health care teams. Types of service, roles and interdisciplinary interaction will be studied as they relate to policies, economics, ethics and ethnic issues in various countries. Prerequisite: Permission of Instructor.

NGR 5136 International Nursing System/Advanced Nursing Practice (3). Comparative analysis of philosophical, legal, political, economic and social underpinnings of the nursing progression within the context of international developments and trends in the post-cold war era.

NGR 5138 Cultural Immersion for International Health Care (1-2). The course introduces basic language, values, social etiquette, daily life, and interpersonal, family and health care patterns in a foreign country in preparation for cross-cultural health study. Prerequisite: Permission of the instructor.

NGR 5141 Pathophysiologic Basis of Advanced Nursing Practice (3). Focuses on the pathophysiologic basis of clinical judgment and client management in advanced nursing practice. Prerequisites: Graduate standing and permission of the department.

NGR 5168 Complementary and Alternative Therapies in Nursing and Healthcare (3). Provides the theory, practice and patterns of use in complementary and alternative practices and products (CAPPs). Integrates CAPPs knowledge with conventional healthcare using National Institutes of Health NCCAM framework.

NGR 5250 Physical Change and Healthy Aging (3). Emphasis on health alterations in aging, delivery of healthcare, and ethical decision-making and advocacy in relationship to common medical problems of the elderly and their families.

NGR 5263 Gerontology for Health Professions (3). A comprehensive overview of aging with the goal of enhancing health outcomes and promoting healthy aging locally and globally. Prerequisite: Graduate status.

NGR 5340 Women and Health: A Nursing Perspective (3). Analysis of the unique health concerns of women across the life span. Emphasizes a multidisciplinary approach. Prerequisite: Graduate standing.

NGR 5495 Women's Health Issues (3). This course is designed to acquaint the student with selected conditions impacting the health of women.

NGR 5610C Family Theory and Nursing Intervention Across Cultures (3). Students are exposed to selective family theories, family nursing assessment, intervention and evaluation. Culture and economic status and their influence on family structure and processes are addressed. Prerequisites: Graduate status, permission of instructor.

NGR 5632 Practicum in International Family Focused Nursing (1). Students apply learning about nursing care in another country, assessment and intervention with families by instituting a change in their work/practice place at home. Prerequisite: Permission of Instructor.

NGR 5660C Leadership and Advocacy for Child and Family Health (3). Acquisition and application of leadership/advocacy skills with culturally diverse families to improve healthcare in professional/public healthcare settings.

NGR 5720C Organizational Dynamics and Nursing Systems (3). Course provides a theoretical understanding of the dynamics of organizational design and behavior. Emphasis is placed on skills to analyze, diagnose and intervene in organizational dynamics.

NGR 5723C Advanced Nursing Administration I (4). Analyzes how social/ethical/legal issues, workplace diversity and organizational culture influences nursing management. Strategies for recruitment, retention and managing human resources are included. Corequisite: NGR 5730C.

NGR 5737 Legal and Ethical Dimensions of Advanced Nursing Practice (3). Analysis of legal and ethical precepts and application to moral and legal dilemmas in advanced nursing practice focusing on the advocacy role in promoting rights of individuals and families. Prerequisite: Consent of instructor.

NGR 5810 Research Methods in Nursing (3). Research methods and designs commonly used in nursing. Focuses on the research process as it is integrated in the interchange of theory, practice, and research using information systems. Prerequisites: Statistics, departmental permission and NGR 5110. Corequisite: NGR 5110.

NGR 5832 Applied International Nursing Research (3). Examines and applies international nursing research methods with a focus on global health related to health disparities in underserved populations in health disparities in underserved populations in local, national, and international areas. Prerequisites: PHC 6706 or comparable.

NGR 5905 Independent Study in Nursing (1-10). Individually determined, research oriented, in-depth study of a nursing problem or clinical experience as approved by the faculty preceptor. Prerequisites: BSN, Permission of the instructor, and admission to a graduate program.

NGR 5936 Special Topics in Nursing (1-6). Critical analysis of the clinical decision making process in advanced health nursing practice (ANP). Synthesis of learning from previous clinical courses. Prerequisite: Must be a nursing student or Florida licensed RN.

NGR 6002C Advanced Health Assessment (4). Refinement of health assessment skills fundamental to advanced nursing practice emphasizing critical thinking in advanced health assessments across the lifespan. Prerequisite: Basic Health Assessment

NGR 6123 Knowledge Development in Nursing Science (3). This course examines theory development, philosophical inquiry, and ways of organizing nursing knowledge. Attention is directed to inquiry as grounded in languages and cultures. Prerequisite: Departmental permission.

NGR 6172 Pharmacology and Pharmacotherapeutics in Advanced Nursing Practice (3). Knowledge and skills to provide pharmacological management of client's common health problems in a safe, high quality, cost-effective manner. Prerequisites: Graduate standing and departmental permit.

NGR 6201C Advanced Adult-Gerontology Nursing I (3). Study of Advanced Adult Practice Nursing and specialization, expansion and advancement of evidence-based knowledge and skills fundamental to the role of the Adult Nurse Practitioner in primary care. Prerequisites: NGR 5141, NGR 6172. Corequisite: NGR 6201L.

NGR 6201L* Advanced Adult-Gerontology Nursing Practice I (3). Clinical implementation of evidence-based knowledge and skills required of the advanced adult practice nurse in the prevention, diagnosis and management of acute health conditions in primary care. Corequisite: NGR 6201.

NGR 6202C* Advanced Adult-Gerontology Nursing II (3). Continuing development of evidence-based knowledge and skills fundamental to the adult nurse practitioner role in the care of clients experiencing chronic and multisystem illnesses. Prerequisite: NGR 6201C, NGR 6201L. Corequisite: NGR 6202L.

NGR 6202L* Advanced Adult-Gerontology Nursing Practice II (3). Clinical implementation of evidence-based knowledge and skills fundamental to the adult nurse practitioner role in the care of the client and family experiencing chronic, multisystem illness. Corequisite: NGR 6202.

NGR 6209 Clinical Decision Making in Advanced Adult-Gerontology Nursing (3). Critical analysis and application of the diagnostic and clinical decision making process in advanced adult-gerontology nursing practice (ANP). Prerequisites: NGR 6201, NGR 6201L, NGR 6202, NGR 6202L. Corequisite: NGR 6700L.

NGR 6301C Advanced Child Health Nursing I (3). Development of evidence-based and theoretical knowledge for the advanced pediatric nurse in health promotion, disease prevention and management of acute health conditions in primary care settings. Prerequisites: NGR 5141, and NGR 6172. Corequisite: NGR 6301L.

NGR 6301L* Advanced Child Health Nursing Practice I (3). Implementation of evidence-based knowledge and skills for the advanced pediatric nurse in health promotion,

disease prevention and management of acute health conditions in primary care settings. Corequisite: NGR 6301C.

NGR 6302 Advanced Child Health Nursing II (3). Continuing development of evidence-based knowledge and skills fundamental to the pediatric nurse practitioner role in the care of the client and family experiencing chronic, multisystem illness. Prerequisites: NGR 6301C, NGR 6301L. Corequisite: NGR 6302L.

NGR 6302L* Advanced Child Health Nursing Practice II (3). Application of evidenced-based knowledge and skills fundamental to the pediatric nurse practitioner role in the care of the client and family experiencing chronic, multisystem illness. Corequisite: NGR 6302.

NGR 6333 Conceptual Issues in Nursing Management of Developmental Disabilities (3). Study of developmental theories, concepts and research findings in context of nursing model. Problems relevant to nursing intervention are examined through critique of pertinent literature. Corequisites: Graduate standing and permission of the department.

NGR 6337 Clinical Decision Making in Advanced Child Health Nursing (3). Critical analysis of the clinical decision making process in advanced child nursing practice. Synthesis of learning from previous clinical courses. Prerequisites: NGR 6301C, NGR 6301L or NGR 6302, NGR 6302L.

NGR 6337L Role Synthesis in Advanced Child Health Nursing Practice (4). Capstone course synthesizing role functions of the Pediatric Advanced Practice Nurse with emphasis on professional practice issues and transition into the practice role. Prerequisites: NGR 6301C, NGR 6301L, NGR 6302, NGR 6302L.

NGR 6400 Chemistry and Physics of Anesthesiology Nursing (3). Detailed study of the chemical and physical principles which apply to physiology, pharmacology and anesthesia equipment. Emphasis is placed on biochemistry and physics of gases and vapors. Prerequisite: Graduate Nurse Anesthesiology Track.

NGR 6404 Advanced Bioscience for Anesthesiology Nursing I (3). Course in human anatomy, physiology, and pathophysiology to include the effects of anesthesia on the cell, the circulatory system, and the respiratory system. Prerequisite: Graduate Nurse Anesthesiology Track.

NGR 6405 Advanced Bioscience for Anesthesiology Nursing II (3). Study of the anatomy and physiology of the endocrine, excretory, and neurological systems. This will progress to the pathophysiology of these systems with emphasis on the application of anesthesia. Prerequisite: Graduate Nurse Anesthesiology Track.

NGR 6407 Technology And Physics in Anesthesiology Nursing (3). Physics and technological concepts in the anesthesia management for the surgical patient in the peri-operative period across the lifespan. Prerequisite: Successful completion of semesters 1-2 of the DNAP Program

NGR 6421 Principles of Anesthesiology Nursing I (3). Introduction to the principles of anesthesia assessment, management and fundamentals skills in administering anesthesia to the surgical patient across the lifespan in the

peri-operative period. Prerequisite: Successful completion of semesters 1-2 of the DNAP Program

NGR 6422 Principles of Anesthesiology Nursing II (3). Principles, application, administration, and management of obstetric and pediatric anesthesia for the surgical patient in the peri-operative period. Prerequisites: Successful completion of semesters 1-4 in the DNAP program

NGR 6423 Principles of Anesthesiology Nursing III (2). Principles of cardiothoracic anesthesia, preoperative assessment, pre, intra, and postoperative management, extra-corporeal circulation, cardiac assist devices, and pharmacological intervention. Prerequisite: Graduate Nurse Anesthesiology Track.

NGR 6424 Principles of Anesthesiology Nursing IV (1). This course will emphasize the anesthetic management to all patients across the lifespan. A review of the body systems, pharmacology and technology as it relates to anesthesia.

NGR 6425 Advanced Principles of Anesthesiology Nursing I (2). Advanced principles for the assessment, administration, and anesthetic management of surgical populations across the lifespan in the perioperative period. Prerequisite: Successful completion of semesters 1-6 of the DNAP Program

NGR 6426 Advanced Principles of Anesthesiology Nursing II (2). Synthesis of advanced principles for the assessment, administration, and anesthetic management of surgical populations across the lifespan in the perioperative period. Prerequisite: Successful completion of semesters 1-7 of the DNAP Program

NGR 6431L Anesthesiology Nursing Clinical Residency I (1). Introduction to supervised clinical residency of anesthesiology nursing, fundamental to the anesthetic management of the surgical patient across the lifespan. Prerequisite: Successful completion of semesters 1-2 of the DNAP Program

NGR 6432L Anesthesiology Nursing Clinical Residency II (2). Supervised clinical residency for the beginning application of knowledge, skills and competencies fundamental to the anesthetic management for the surgical patient across the lifespan. Prerequisite: Successful completion of semesters 1-3 of the DNAP Program

NGR 6433L Anesthesiology Nursing Clinical Residency III (2). Supervised clinical residency for the application of knowledge, skills and competencies fundamental to the anesthetic management for the progressively advanced surgical cases across the lifespan. Prerequisite: Successful completion of Semester 1-4 of DNAP Program

NGR 6434L Anesthesiology Nursing Clinical Residency IV (3). Supervised clinical residency for the advanced application of knowledge, skills, and aptitude fundamental to anesthesiology nursing practice progressing to on-call experience. Prerequisite: Successful completion of semesters 1-5 of the DNAP Program

NGR 6435L Anesthesiology Nursing Clinical Residency V (3). Supervised clinical residency for the progressively independent application of knowledge and skills fundamental to anesthesiology nursing practice.

Prerequisite: Successful completion of semesters 1-6 of the DNAP Program

NGR 6435 Principles of Anesthesiology Nursing V (1). The course will emphasize the anesthetic management to all patients across the lifespan. A review of the body systems, pharmacology and technology as it relates to anesthesia. Prerequisite: NGR 6424 Corequisite: Graduate Nurse Anesthesiology Track

NGR 6436L Anesthesiology Nursing Clinical Residency VI (3). Supervised clinical residency for the independent application of knowledge and skills fundamental to anesthesiology nursing practice. Prerequisite: Successful completion of semesters 1-7 of the DNAP Program

NGR 6437L Anesthesiology Nursing Clinical Residency VII (3). Supervised clinical residency for the autonomous application of knowledge and skills fundamental to anesthesiology nursing practice. Prerequisite: Successful completion of semesters 1-8 of the DNAP Program

NGR 6441L Anesthesiology Nursing Simulation Practicum II (1). Application of knowledge and skills fundamental to advanced anesthesiology nursing practice in the care for the intermediate acuity patient; ultrasound guided regional anesthesia; and pain management. Corequisite: NGR 6432L.

NGR 6442L Anesthesiology Nursing Simulation Practicum III (1). Application of knowledge and skills fundamental to advanced anesthesiology nursing practice in the preparation, management and OB, pediatric, and cardio-vascular-thoracic anesthesia care. Corequisite: NGR 6433L.

NGR 6460 Pharmacology of Anesthesiology Nursing I (2). Pharmacology of drugs affecting the autonomic nervous system as well as anesthetic agents. Administration and doses of the drugs is included. Prerequisite: Graduate Anesthesiology Track.

NGR 6461 Pharmacology of Anesthesiology Nursing II (2). Course will study the uptake, distribution and biotransformation of anesthetics, including the advanced study of therapy in anesthesia of specialty areas and treatment of complications. Prerequisite: Graduate Anesthesiology Track.

NGR 6462 Pharmacology and Chemistry of Anesthesiology Nursing (3). Pharmacology of drugs affecting the chemical, biochemical, and physiologic effects of the autonomic nervous system. Prerequisite: Successful completion of semesters 1-2 of the DNAP Program

NGR 6463 Pharmacology and Chemistry of Anesthesiology Nursing II (3). Advanced pharmacology of drugs affecting the chemical, biochemical, and physiologic effects of anesthetic drugs for surgical patients across the lifespan. Prerequisite: Successful completion of semesters 1-2 of the DNAP Program

NGR 6490 Regional Anesthesia and Pain Management (2). Theoretical and clinical application in the administration and management of regional anesthesia incorporating acute and chronic pain management. Prerequisite: Graduate Nurse Anesthesiology.

NGR 6491 Advanced Anesthesiology Nursing Seminar (4). Synthesis of clinical and didactic course review in the anesthesia management of surgical populations in the perioperative period in preparation for the National Certification Exam. Prerequisite: Successful completion of semesters 1-8 of the DNAP Program

NGR 6492 Professional Aspects of Anesthesiology Nursing (2). This course explores: American Association of Nurse Anesthetists, Councils on Accreditation, Certification and Practice and Professional issues for the practice model of Anesthesiology in Nursing. Prerequisite: Graduate Nurse Anesthesiology Track.

NGR 6493 Technology in Anesthesiology Nursing (2). The use and care of anesthesia equipment (mechanical and electronic) are discussed. Computers and their uses in anesthesiology are also included. Prerequisite: Graduate Anesthesiology Track.

NGR 6494 Anesthesia for Special Populations I (3). Advanced, anatomy, physiology, and pathophysiology for the anesthetic management and considerations of surgical patients across the lifespan. Prerequisite: Successful completion of semesters 1-3 of the DNAP Program

NGR 6945 Anesthesia for Special Populations II (3). Advanced, anatomy, physiology, and pathophysiology for the anesthetic management and considerations of surgical patients across the lifespan. Prerequisite: Successful completion of semesters 1-5 of the DNAP Program

NGR 6497 Advanced Anesthesia Life Support (1). Advanced Anesthesia Life Support (AALS) is an advanced course that highlights the importance of team management of emergency anesthesia events, team dynamics and communication, systems of care.

NGR 6503 Advanced Psychiatric-Mental Health Nursing I (3). This course prepares students for advanced practice roles in psychiatric mental health nursing. Scientific knowledge is developed for ARNPs seeking to care for clients across the lifespan. Prerequisite: Admission to the program. Corequisite: NGR 6503L.

NGR 6503L* Advanced Psychiatric-Mental Health Nursing Practice I (3). Management of psychiatric mental health disorders in time-limited and extended care therapies in collaboration with health care providers across delivery systems. Blends the ARNP/CNS. Corequisite: NGR 6503.

NGR 6504C Advanced Psychiatric-Mental Health Nursing II (3). Continued development of advanced practice nursing model in the psychiatric care of individuals, groups and families across settings and populations. Prerequisites: NGR 6503, NGR 6503L. Corequisite: NGR 6504L.

NGR 6504L* Advanced Psychiatric-Mental Health Nursing Practice II (3). Application of advanced practice nursing model with clients who have complex psychiatric problems or are at high risk. Collaborative process in therapy, consultation, and planned change. Corequisite: NGR 6504C.

NGR 6505L Role Synthesis in Advanced Psychiatric-Mental Health Nursing Practice (4). Advanced psychiatric/mental health nursing role with diverse population. Role developed through contractual

agreements with faculty and mentors. Prerequisites: NGR 6503, NGR 6503L, NGR 6504C, NGR 6504L.

NGR 6538 Psychopharmacology for Advanced Practice Nursing (3). Background for neurobiological pharmacologic, psychiatric, and age dynamic factor to advanced practice nurse prescribing of psychiatric medications. Prerequisite: Advance to Semester III in graduate program.

NGR 6560 Advanced Psychiatric Mental Health Clinical Decision Making (3). Apply knowledge gained during the curriculum to develop the role and skills of the FPMHNP. Identify opportunities for collaboration, consulting, and referral. Prerequisites: NGR 6503, NGR 6503L, NGR 6504C, NGR 6504L, NGR 6538.

NGR 6601C Advanced Family Health Nursing I (4). Study of Advanced Family Practice Nursing and specialization, expansion and advancement of evidence-based knowledge and skills fundamental to the role of the Family Nurse Practitioner in primary care. Prerequisites: NGR 6172, NGR 5141. Corequisite: NGR 6601L.

NGR 6601L Advanced Family Health Nursing Practice I (4). Clinical implementation of evidence-based knowledge and skills required to the advanced family practice nurse in the prevention, diagnosis and management of acute health conditions in Primary Care. Corequisite: NGR 6601C.

NGR 6602C Advanced Family Health Nursing II (4). Continuing development of evidence-based knowledge and skills fundamental to the family nurse practitioner role in the care of clients and families experiencing chronic and multisystem illnesses. Prerequisites: NGR 6601C, NGR 6601L. Corequisite: NGR 6602L.

NGR 6602L Advanced Family Health Nursing Practice II (4). Clinical implementation of evidence-based knowledge and skills in the diagnosis and management of chronic and/or multi-system health conditions of clients and families in Primary Care. Corequisite: NGR 6602C.

NGR 6619L Role Synthesis in Advanced Family Health Nursing Practice (4). Capstone course synthesizing role functions of the Family Advanced Practice Nurse with emphasis on professional practice issues and transition into the practice role. Prerequisites: NGR 6601C, NGR 6601L, NGR 6602C, NGR 6602L.

NGR 6700L* Role Synthesis in Advanced Adult-Gerontology Nursing Practice (4). Capstone course synthesizing role functions of the Adult Gerontology Advanced Practice Nurse. The emphasis is professional practice issues and transition into the advanced nursing practice role. Prerequisites: NGR 6201C, NGR 6201L, NGR 6202C, NGR 6202L.

NGR 6703 Role Development of the Advanced Practice Nurse (2). This course provides a forum for the graduate nursing student to analyze the roles of nurses in advanced practice. Prerequisite: Admission to Graduate Nursing

NGR 6708C Classroom Teaching Strategies for Nursing (3). Experience/seminar in classroom teaching for prospective nurse educators. Focuses on strategies for effective course planning, delivery, and evaluation in the classroom with diverse students. Prerequisites: NGR 6713, ADE 5386, ADE 6360.

NGR 6710* Role Synthesis in Nursing Education (4). Application of teaching/learning theories to nursing and selected teaching/learning strategies. Demonstration of various teaching strategies. Teaching practicum. Prerequisites: NGR 6713 and NGR 6202L, or NGR 6504L, or NGR 6302L or NGR 6602L.

NGR 6710L Clinical Specialty Practicum for the Nurse Educator (1). This course will supervise clinical practice activities related to nursing care of common health problems of a specific patient population. Prerequisite: Admission to Graduate Nursing Program, NGR 5141, NGR 6002C, NGR 6172.

NGR 6712C* Advanced Nursing Administration III (4). Intensive practicum applying leadership, decision-making, management, and administration theories and concepts under the guidance of a nurse executive preceptor and supervising faculty. Prerequisites: NGR 6726C, HSA 6176, PHC 6443, NGR 5723C, NGR 6724C.

NGR 6713 Curriculum Development in Nursing (3). Curriculum theory and its application in nursing education. Curriculum construction, implementation, and evaluation are discussed from theoretical, philosophical, historical, and current perspectives. Prerequisites: Graduate standing and departmental permission, NGR 5110.

NGR 6714C Clinical Teaching Strategies for Nursing (3). Experience seminar in clinical teaching. Application of research-based literature and best practices in the development/implementation/evaluation of clinical education for nursing students. Prerequisites: NGR 6713, ADE 5386.

NGR 6715 Instructional Technology in Nursing and Health Sciences (3). Provides advanced technological knowledge, skills, and opportunity to develop strategies using technology to improve and enhance student learning in variety of settings. Prerequisites: NGR 6713, ADE 5386.

NGR 6718 Testing and Evaluation in Nursing Education (3). Development of competency in concepts and measures of evaluation in nursing education. Prerequisite: Admission to the Certificate in Nursing Education.

NGR 6724C Advanced Nursing Administration II (4). Discusses financial issues surrounding nursing and the development and refinement of budgeting skills. Included are the nurse as entrepreneur, marketing, budgets and computers in financial management. Prerequisite: NGR 5723C (Adv. Nsg. Adm. I). Corequisite: HSA 6176.

NGR 6725 Issues and Strategies of Nursing Administration (3). Analysis of issues, principles, and concepts of nursing administration. Includes synthesis of behavioral and organizational theories with institutional goals in formulation of administrative strategies. Prerequisites: Graduate standing and departmental permission.

NGR 6726C Nursing Management and Continuous Quality Improvement (3). Role of nurse managers in developing and implementing continuous quality-improvement programs; implications of such programs on health care delivery. Includes role of middle management in personnel development and promoting nursing research in the clinical arena. Corequisites: NGR 6202L, or NGR 6504L, or NGR 6302L.

NGR 6743 Advanced Practice Nursing Clinical Education Seminar (1). This course provides the Advanced Practice Nursing (APN) student with the necessary foundational knowledge and skills known contribute to the successful transition of APN students from the classroom to the community-based clinical practicum environment. Prerequisites: Acceptance in one of the advanced practice nursing programs (AGNP, FNP, PNP, PMHNP) and successful completion of all pre-clinical core courses.

NGR 6748 Clinical Decision Making in Advanced Family Nursing Practice (3). Critical analysis of the clinical decision making process in advanced family nursing practice. Synthesis of learning from previous clinical courses. Corequisite: NGR 6619L.

NGR 6800 Advanced Nursing Research Methods I: Design and Sampling (3). The first course in a 2-course sequence on the design and conduct of nursing research focuses on the conceptual and empirical basis, design, sampling, and ethical conduct of nursing research. Prerequisite: Departmental Permission.

NGR 6801 Advanced Nursing Research Methods II: Measurement and Dissemination (3). The second course in a 2-course sequence on the design and conduct of nursing research focuses on measurement in nursing research, data management and analysis, and dissemination of findings. Prerequisite: NGR 6800.

NGR 6812 Master's Research (3). Refinement of research proposals focusing on methodology and pilot study. Hands-on experience on computerized data analysis. Prerequisites: HSC 6910 or NGR 5810.

NGR 6815 Qualitative Methods (3). Critical issues, theoretical and practical applications for conducting qualitative research explored as they relate to health, social service and public administration environments. Prerequisites: PHC 6706 or NGR 5810. Corequisite: NGR 6123.

NGR 6850 Empirical Evidence for Clinical Research and Practice I (3). This course is focused on basic empirical evaluation procedures -- categorical analysis, comparison of means, correlations -- for clinical research and evidence-based practice.

NGR 6851 Empirical Evidence for Clinical Research and Practice II (3). This course is focused on advanced empirical evaluation procedures -- linear regression, structural equation modeling overview, power analysis -- for clinical research and evidence-based practice. Prerequisites: NGR 6850 or equivalent.

NGR 6857 Empirical Evidence for Clinical Research and Practice III (3). This course is focused on complex empirical evaluation procedures -- MANOVA, logistic regression, missed methods, power analysis -- for clinical research and evidence-based practice. Prerequisites: NGR 6851 or equivalent.

NGR 6910C Research Project (3). Focus is on the development of competencies in scientific inquiry. Competencies are achieved through participation in ongoing research projects and a written report of the experience. Prerequisites: PHC 6091 or NGR 5810, NGR 5110.

NGR 6917 Grantsmanship I (3). The first course in a 3-course series on development and funding of programs of research focuses on successful research programs, planning a research trajectory, and obtaining predoctoral funding. Prerequisite: Departmental permission.

NGR 6918 Grantsmanship II (3). The second course in a 3-course series on development and funding of programs of research focuses on refinement of student trajectories, and grantsmanship for small research grant funding. Prerequisite: Departmental permission.

NGR 6939C NSG Management of At-Risk Populations (6). Intensive study of the advanced nursing management of at-risk populations, focusing on the elderly, persons with HIV/AIDS, survivors of domestic violence, substance abusers, and uninsured persons. Prerequisites: Departmental permit. Corequisites: NGR 6601L/NGR 6201L.

NGR 6941L Anesthesiology Nursing Simulation Practicum I (1). Application of knowledge and skills fundamental to basic anesthesiology nursing practice emphasizing preparation, assessment, positioning, fluid and airway management, and basic anesthesia care. Corequisite: NGR 6431L.

NGR 6970 Master's Thesis I (3). Refinement of research proposals focusing on methodology and pilot study. Hands-on experience on computerized data analysis. Completion of a research project for non-thesis students. Prerequisite: NGR 5810. Corequisites: NGR 6202L or NGR 6504L or NGR 6302L.

NGR 6971 Master's Thesis II (3). Implementation through completion of student's research thesis proposal. Prerequisite: NGR 6970.

NGR 7121 Scientific and Theoretical Foundations for Advanced Nursing Practice (3). This course examines the scientific underpinnings, theoretical models, and the ways of organizing nursing knowledge for advanced nursing practice.

NGR 7716 Fundamentals of Clinical Education (2). Fundamental principles of clinical education and teaching of adult learners in the healthcare professions. Emphasis is on in-service education, clinical precepting, and simulation-based instruction.

NGR 7733 Organizational Dynamics of Health Systems (3). This course will explore and analyze the role of the DNP as a systems leader and change agent for the creation, implementation, and evaluation of care delivery models within health care systems. Prerequisite: Admission to any track in the Advanced Practice Nursing Program.

NGR 7736 Academic Health Care and Political Systems: Function, Structure Leadership and Survival. (3). Analyzes purpose, structure, function, challenges, politics of academic, health care and political systems. Examines leadership roles, strategies for change and dealing with organizational politics. Departmental permission.

NGR 7769 Patient Safety and Quality Improvement in Healthcare (3). Principles and practices for patient safety and quality improvement. Focus on technologies, evidence based practices and high-performance teams. Emphasize safety and QI strategies for DNP practice.

NGR 7830 Research in Health Care for Multicultural Diverse and Vulnerable Populations (3). The course focuses on research issues with multicultural, diverse, and vulnerable populations. Prerequisite: Departmental permission.

NGR 7853 Translational Research (3). Critique and application of research to support improved models of care delivery using evidence-based practice.

NGR 7854 Analytical Methods for Evidence-Based Clinical Practice (3). Focus on appraisal of evidence to answer clinical research questions, including evaluation of empirical research, systematic reviews, quality improvement and evaluation of practice changes. Prerequisites: Undergraduate statistics and research courses.

NGR 7871 Healthcare Informatics (3). This course is designed to prepare students to critically analyze, develop, implement, and evaluate healthcare information systems/technology within clinical and/or academic settings. Prerequisite: Admission to any track in the Advanced Practice Nursing Program.

NGR 7873 Accessing, Managing and Packaging Information (3). Focuses on finding, obtaining, evaluating, managing, and disseminating information from the internet and other sources, and packaging information to convey a message and maximize the impact using current technology. Prerequisite: Departmental permission.

NGR 7891 Healthcare Finance and Economics in Advanced Clinical Practice (3). This course provides foundational knowledge and understanding of health care economic trends, reimbursement issues, funding sources and related ethical and legal issues in Advanced Clinical Practice. Prerequisites: Enrollment in DNP degree plan or admission in other graduate program with permission.

NGR 7892L Health Policy Practicum (3). This course will examine the role of health policy at the federal, state, and local governmental levels and its impact on health care organizations and nursing delivery systems. Prerequisite: Admission to any track in the Advanced Practice Nursing Program.

NGR 7940C DNP Project I (4). First of a 3-course series providing the DNP resident with an immersive residency experience and mentored guidance undertaking the development, implementation and evaluation of a scholastic project.

NGR 7941C DNP Project II (4). Second of a 3-course series providing the DNP resident with an immersive residency experience and mentored guidance undertaking the development, implementation and evaluation of a scholastic project.

NGR 7942C DNP Project III (4). Third of a 3-course series providing the DNP resident with an immersive residency experience and mentored guidance undertaking the development, implementation and evaluation of a scholastic project.

NGR 7943 DNP Project Completion (1). This course will provide the DNP resident with continuous enrollment until the DNP Project Completion requirement is fulfilled. Prerequisites: NGR 7940C, NGR 7941C, NGR 7942C.

NGR 7980 Dissertation I (3-18). Provides an overview of the dissertation process within framework of completing the dissertation. Prerequisite: Admission to candidacy.

NGR 7982 Candidacy Examination (3-9). The candidacy examination includes the successful completion of 4 written papers and an oral defense. This course is designed to assist students to prepare their papers for the candidacy examination. Prerequisite: This course must be taken during the last semester of coursework and/or after completion of required coursework as presented in student's plan of study.

NSG 6495 Anesthesia for Special Populations II (3). Advanced, anatomy, physiology, and pathophysiology for the anesthetic management and considerations of surgical patients across the lifespan. Prerequisite: Successful completion of semesters 1-5 of the DNAP Program

OTH 5002 Occupation and Health (3). Concepts of purposeful activities, occupation, and health will be explored in relation to self and the OT profession.

OTH 5011 Foundations of Occupational Therapy Practice (3). The theoretical foundations of occupational therapy and issues affecting professional practice.

OTH 5162 Therapeutic Approaches in Occupational Therapy (2). Through development of an understanding of the components and nuances of human occupation, students will develop skills needed to promote optimal performance through simulation and adaptation of life tasks.

OTH 5162L Therapeutic Approaches in Occupational Therapy - Lab (1). Emphasis on analysis of activities and the integration of therapeutic activities and their physical, emotional, cognitive, and sociocultural implications for occupational performance. Prerequisite: Admission to graduate program. Corequisite: OTH 5162.

OTH 5195 Occupational Therapy Job Modification (3). Analysis and adaptation of client's workplace for the disabled. Prerequisites: Admission to program or permission of the instructor (occasional elective).

OTH 5202 Occupational Development: Infancy Throughout Adolescence (3). Occupation during infancy, childhood, and adolescence. Includes social, cultural, and environmental factors on occupational competence. Corequisite: OTH 5202L

OTH 5202L Occupational Development: Infancy Through Adolescence Lab (1). Laboratory to accompany OTH 5202, Occupational Development Throughout the Life Span. Corequisite: OTH 5202.

OTH 5203 Occupational Development: Adulthood and Aging (3). Exploration of occupational development from young adulthood through the geriatric years.

OTH 5213 Pediatric Seminar: School Based Occupational Therapy (3). Course designed to provide students with necessary skills and specific knowledge to practice occupational therapy effectively in the educational setting. Prerequisite: Admission to the program.

OTH 5214 Occupational Therapist Role in Family Centered Care (3). Course designed to orient O.T. students to family-centered care issues, such as legislation, cultural issues, family systems and

empowerment strategies, in order to prepare them for clinical practice. Prerequisite: Permission of the instructor.

OTH 5217 Occupational Engagement Throughout the Continuum of Care (2). Occupational therapy assessment and intervention for individuals with specific health-related conditions within the context of diverse clinical practice settings is examined. Prerequisites: Admission to the program; OTH 5414; OTH 5414L. Corequisite: OTH 5217L

OTH 5217L Occupational Engagement Throughout the Continuum of Care Lab (1). Laboratory emphasizing occupational therapy assessment and intervention for specific health-related conditions within the context of diverse clinical settings. Prerequisites: Admission to the program; OTH 5414; OTH 5414L. Corequisites: OTH 5217

OTH 5224 Conditions Affecting Occupational Performance (3). Focuses on chronic health conditions and their impact on an individual's physical, cognitive, psychological, and social capabilities as mediators of occupational performance. Prerequisite: Admissions to the program.

OTH 5280 Role of Environment in Occupational Therapy (3). Assessing the influence of environmental factors on OT practice in specific field settings. Prerequisite: Admission to program.

OTH 5301 Adaptation of Human Occupation and Environment for Psychosocial Practice I (2). Designed to prepare the student with the tools and knowledge needed for clinical reasoning in the selection of assessment and treatment of individuals with cognitive and neuropsychiatric disorders. Prerequisite: Admission to graduate program. Corequisite: OTH 5301L.

OTH 5301L Adaptation of Human Occupation and Environment for Psychosocial Practice I Lab (1). Administration of assessments and treatment planning for individuals with cognitive and neuropsychiatric disorders. Prerequisite: Admission to Graduate Program. Corequisite: OTH 5301.

OTH 5324 Clinical Intervention for Persons with Neuropsychiatric & Cognitive Disorders (4). Develops clinical reasoning abilities in the selection of assessment and treatment strategies for individuals with cognitive and neuropsychiatric disorders.

OTH 5326 Psychiatric O.T.: Contemporary Theory and Practice (3). Examination of contemporary knowledge relevant to the theory and practice of O.T. in psychiatry. Prerequisites: Admission to Program or permission of the instructor.

OTH 5345 Occupational Therapy Program Development in Psychiatry (3). Seminar discussion and practical experience in OT programming in psychiatry. Prerequisites: Admission to program or permission of the instructor.

OTH 5360 Global Social Justice Issues in Health Care (3). An examination of relevant social justice related theories for health professionals leading to an understanding of how therapists can empower persons with disabilities to navigate the health system.

OTH 5405C Analysis of Therapeutic Procedures in Physical Disabilities (3). A lecture/lab course designed to

introduce advanced students to theory based assessment problem identification and treatment for the physically disabled adult.

OTH 5406 Sensory Problems and Therapeutic Implications (3). An in-depth study of sensory problems and the implications for therapy. A variety of patient populations and clinical applications will be discussed. Prerequisites: Graduate standing or permission of the instructor (occasional elective).

OTH 5407 Theoretical Perspectives of Pain (3). Theoretical perspectives of pain: etiology, assessment, management and effects. Prerequisites: Admission to the program or permission of the instructor (occasional elective).

OTH 5414 Analysis & Adaptation in Human Motion (3). Presents anatomical, physiological, and biomechanical principles of human motion & biomechanical frame of reference in adaption with biomechanical problems. Corequisite: OTH 5414L

OTH 5414L Analysis & Adaptation in Human Motion Lab (1). Laboratory to accompany OTH 5414, Analysis & Adaptation of Human Motion in OT. Corequisite: OTH 5414

OTH 5427 Neurorehabilitation Approaches in OT (3). OT evaluation procedures and treatment planning for patients with CNS dysfunction. Corequisite: OTH 5427L.

OTH 5427L Neurorehabilitation Approaches in OT Lab (1). Laboratory to accompany OTH 5427, Neurorehabilitation approaches in OT. Corequisite: OTH 5427.

OTH 5430 Biomechanical and Rehabilitative Approaches in Occupational Therapy I (2). First of a two-part course. Application of occupational therapy evaluation and interventions for individuals with musculoskeletal disorders to prepare clients for the engagement in occupation. Prerequisites: Admission to graduate program, OTH 5414, OTH 5414L. Corequisite: OTH 5430L.

OTH 5430L Biomechanical and Rehabilitative Approaches in Occupational Therapy I - Lab (1). Experience in client evaluation and treatment planning. Includes a four-week Level I fieldwork experiences. Prerequisites: Admission to graduate program, OTH 5414, OTH 5414L. Corequisite: OTH 5430.

OTH 5438 Adult Neurorehabilitative Approaches in Occupational Therapy (3). Course covers evaluation and intervention principles of selected practice models as they relate to neuromotor disorders and their impact on the occupational performance of individuals. Prerequisite: OTH 6431, OTH 6431L, OTH 5217, OTH 5217L. Corequisite: OTH 5438L.

OTH 5438L Adult Neurorehabilitative Approaches in Occupational Therapy - Lab (1). Students will apply occupational therapy evaluation and intervention principles to adults with neuromotor dysfunction. Prerequisite: OTH 6431, OTH 6431L, OTH 5217, OTH 5217L. Corequisite: OTH 5438.

OTH 5440 Treatment Approaches for the Neurologically Impaired (3). In depth instruction in approaches to the neurologically impaired patient.

Emphasis will be on dysfunction due to stroke or head injury. Prerequisites: OTH 4422 or equivalent.

OTH 5503 Current Occupational Therapy Practice in the Neonatal Intensive Care Unit (3). Theoretical framework and guidelines for assessment and intervention in a neonatal intensive care unit. Prerequisite: Majors only.

OTH 5505 Pediatric Health and Dysfunction in Occupational Therapy (3). Investigation of pediatric health and dysfunction issues encountered by Occupational Therapists. Corequisite: OTH 5505L.

OTH 5505L Pediatric Health and Dysfunction in OT Lab (1). Laboratory to accompany OTH 5505, Pediatric Health and Dysfunction in Occupational Therapy. Corequisite: OTH 5505.

OTH 5524 Occupation-based Intervention for Pediatric Populations (3). Course introduces developmental and neuromotor theories as they are applied to the pediatric populations and provide the student with frames of reference for pediatric occupational therapy practice. Prerequisite: Admission to graduate program. Corequisite: OTH 5524L.

OTH 5524L Occupation-based Intervention for Pediatric Populations Lab (1). Students will apply theoretical knowledge to clinical problems in occupational therapy evaluation and treatment of children with neuromotor and/or sensorimotor disorders. Prerequisite: Admission to graduate program. Corequisite: OTH 5524.

OTH 5600 Study of Gerontology as Related to Occupational Therapy (3). An overview of current issues in the practice of occupational therapy for the aged.

OTH 5603 Role of Occupational Therapist in Family Centered Care of Elderly (3). Issues related to care giving of elder and caregivers including autonomy, cultural influences and family systems. Prerequisite: Permission of the instructor.

OTH 5610 Foundations in Gerontology for Health Professions (3). Implication for health professions of the biological, cross-cultural, physiological, psychological, social, and societal contexts of aging.

OTH 5613 Interdisciplinary Approach to Aging (3). Issues related to roles of specific health team members and application of interdisciplinary approach to care of the elderly. Prerequisites: Aging course or work experience with elderly, permission of the instructor.

OTH 5630 OT Assessment of the Elderly (3). Study of assessment techniques appropriate for OT evaluation of the elderly. Prerequisite: Admission to program.

OTH 5725 Management and Community Based Practice in Occupational Therapy (3). Students will study administrative issues in OT and the promotion of community-based programing. Issues studied may include licensing, documentation, leadership, management, and supervision.

OTH 5751 Rehabilitation Seminar in Occupational Therapy (3). A seminar designed to gain an understanding of OT clinical practice areas in rehabilitation. Various clinicians will present their perspectives of organizational structure, populations served, evaluation and treatment approaches. Prerequisite: Permission of the instructor.

OTH 5760 Current Research in Occupational Therapy (3). Review of research methodology and statistical concepts in the clinical setting using examples of research in occupational therapy.

OTH 5764 Research in a Clinical Specialty (3). Participation in ongoing research of faculty members in clinical specialty area. Prerequisite: Permission of the instructor.

OTH 5765 Research in Clinical Practice (3). Students identify a research topic and questions based on observation of clinical problems during field visits.

OTH 5805 Service Learning in Health (3). Student's learning is centered on a community service experience which meets specific principles of service learning. Prerequisites: Admission to graduate study in OT. (Other graduate students or graduate certificate students in aging admitted by permission of the instructor.)

OTH 5843C Adaptation of Human Occupation and Environment for Psychosocial Practice II (3). This fieldwork course provides the student with the experience needed for occupational therapy assessment and treatment of individuals with cognitive and neuropsychiatric disorders. Prerequisites: OTH 5301 and OTH 5301L.

OTH 5845 Level II Fieldwork I (6-12). Three-month internship in an approved setting. Prerequisite: Completion of didactic coursework.

OTH 5846 Level II Fieldwork II (6-12). Three-month internship in an approved setting. Prerequisite: Completion of didactic coursework.

OTH 5921L Integrative Seminar I (2). This course is designed to introduce students to the integrative process, develop strategies for learning and academic success and integrate concepts related to foundations of occupational therapy. Prerequisite: Admission to graduate program.

OTH 5922L Integrative Seminar II (2). This course is designed to serve as a capstone experience in the integrative process. Possibilities for practice will be explored and students will prepare for the role transition to a clinician. Prerequisite: OTH 5921L.

OTH 5934 Evaluation and Treatment of Hand Dysfunction (3). Seminar in current issues related to the assessment and treatment of common injuries of the hand (occasional elective).

OTH 5938 O.T. Theoretical Perspectives in Health Therapy (3). This seminar course is designed to examine the OT's role in the prevention of both physical and mental diseases. It will demonstrate and discuss how OT foundational underpinnings provide the tools therapists need to guide patients and clients toward lifestyle behaviors which can prevent or delay disease onset and foster functional adaptation. Prerequisite: Permission of the instructor.

OTH 6009 Current Issues and Theories of Occupational Therapy (3). Exploration of current issues and theories in occupational therapy leading to development of student's theoretical reference for practice. Prerequisite: Admission to the program.

OTH 6106 The Role of Occupational Therapy and Assistive Technology (3). This course provides the

student with in-depth information about assessment for AT and recommendation of appropriate equipment.

OTH 6195 Assistive Technology and the Environment (2). Introduction of assistive technology devices and environmental modifications that enable and enhance participation in meaningful occupations for persons with disabilities. Prerequisites: Admission to the OT program. Corequisites: OTH 6195L

OTH 6195L Assistive Technology and the Environment Lab (1). Lab provides hands-on activities with assistive technology devices and environmental modifications that enable and enhance participation in meaningful occupations for persons with disabilities. Prerequisites: Admission to the OT program. Corequisites: OTH 6195

OTH 6215 Advanced OT Intervention Strategies (3). Principles and characteristics of treatment regimens designed to enhance the study of treatment effectiveness. Emphasis on application of activity appropriate for student's clinical concentration. Prerequisite: Admission to program. (F)

OTH 6265 Measurement and Assessment in Occupational Therapy (3). Measurement concepts and practices used in occupational therapy evaluation. Prerequisites: Admission to program or permission of the instructor.

OTH 6281 Cultural, Global, and Environmental Issues in Occupational Therapy (3). Exploration to the cultural, socioeconomic, and ethnic variables that impact occupational therapy interventions. Prerequisite: Admission to graduate program.

OTH 6431 Biomechanical and Rehabilitative Approaches in Occupational Therapy II (2). Using the biomechanical and rehabilitative practice models, students will design appropriate occupational therapy interventions for individuals with musculoskeletal and connective tissue disorders. Prerequisites: OTH 5430, OTH 5430L. Corequisite: OTH 6431L.

OTH 6431L Biomechanical and Rehabilitative Approaches in Occupational Therapy II Lab (1). Lab will provide students with the hands-on experience needed to evaluate and design occupational therapy intervention plans for individuals with musculoskeletal disorders. Prerequisites: OTH 5430, OTH 5430L. Corequisite: OTH 6431.

OTH 6507 Occupational Therapy for Occupationally Dysfunctional Children & Adolescents (3). Exploration of factors leading to successful adaptation to occupational roles, are explored with particular emphasis on the relationship between these factors and Occupational Therapy theory. Prerequisite: Permission of the instructor.

OTH 6538 Advanced Methods in Pediatric Assessment (3). Advanced applications of theory and research in the area of pediatric occupational therapy assessment. Skills in neonatal, neurodevelopmental, occupational behavior, and computer-assisted methods.

OTH 6548 Advanced Methods in Pediatric Occupational Therapy (3). Advanced application of theory and research in occupational therapy. Includes neurodevelopmental treatment approaches, neonates through adolescents. Prerequisite: OTH 6538.

OTH 6706 Leadership & Management in Occupational Therapy (3). Study of leadership and administrative issues in OT in relation to licensing, certification, documentation, supervision, and professional roles.

OTH 6772 Evidence Based Practice and Critical Appraisal (3). An in-depth investigation of the tools and resources for systematically locating and reviewing research evidence.

OTH 6937 ADA Workplace Accommodations of Persons with Disabilities (3). Interdisciplinary course designed to bring together students of both rehabilitation and business/management disciplines to develop strategies to implement the Title I-Workplace provision of the Americans with Disabilities Act (ADA).

OTH 6948 Continuing Clinical Competence for Occupational Therapists (3). Design, execution, and presentation of a major Occupational Therapy project.

OTH 6972 Master's Project Development (3). Development and planning of Master's Project. Prerequisites: OTH 5760, OTH 6772.

OTH 6973 Master's Project Implementation (3). Implementation and completion of the Master's Project. Prerequisite: OTH 6972.

PET 5716 Analysis and Observation of Teaching in Physical Education (3). This course analyzes the teaching-learning process in physical education. The emphasis is on systematic observation instruments and guidelines for systematic development of instructional skills. (F)

PET 5935 Special Topics in Athletic Training (1-3). This course presents current trends and professional issues in Athletic Training.

PET 6406L Physical Assessment, Measurement, and Evaluation Workshop (1-3). The workshop will provide the student with a working knowledge and basic theory in physical assessment, measurement, and evaluation laboratory teaching and develop skills associated with each. Prerequisite: Permission of instructor.

PHT 5017 Technology and Communication Management for Physical Therapists (3). This course integrates technology, research and education for physical therapists. The course consists of practical projects using the Internet, software applications, and web-based applications.

PHT 5027 Clinical Education Seminar (1). This course is designed to address prerequisite clinical education issues that historically contribute to the overall success in the clinical internships. Topics range from use of the evaluation tool to taxonomies of learning. Prerequisites: Admission to Professional PT Curriculum or permission of department.

PHT 5045 Applied Educational Theory in Physical Therapy (3). The application of teaching and learning principles to Physical Therapy patient education, student clinical education, and continuing education. A variety of teaching methodologies will be practiced by participants. Prerequisites: Admission to PT Professional Program or permission of department.

PHT 5070 Principles of Diagnostic Imaging (1). This course covers the basic physics of medical imaging and

provides an overview of various diagnostic imaging tools such as X-rays, Scans, MRI, Ultrasound with emphasis on the musculoskeletal system. Corequisites: PHT 5371 and PHT 5174.

PHT 5174 Analysis of Movement and Function (3). The course is designed to give physical and/or occupational therapy students the cognitive skills necessary to analyze human movement in the context of physical therapy practice. Prerequisites: Admission to PT Professional Program or permission of department. Corequisite: PHT 5174L.

PHT 5174L Analysis of Movement and Function Lab (1). The course is designed to give physical and occupational therapy students the psychomotor skills necessary to analyze human movement in the context of PT practice. Prerequisites: Admission to PT Professional Program or permission of department. Corequisite: PHT 5174.

PHT 5180 Musculoskeletal Diagnosis and Management I (3). This course is designed to prepare the student in the area of physical therapy related musculoskeletal diagnosis and treatment with focus on upper extremities. Prerequisites: Admission to PT Professional Program or permission of department. Corequisite: PHT 5180L.

PHT 5180L Musculoskeletal Diagnosis and Management I Lab (1). This is the laboratory course designed to prepare students for evaluating and treating physical therapy related musculoskeletal diagnosis. Prerequisites: Admission to PT Professional Program or permission of department. Corequisite: PHT 5180.

PHT 5181 Musculoskeletal Diagnosis and Management II (3). This is designed to prepare the student in the area of Physical Therapy related musculoskeletal diagnosis treatment with focus on lower extremities. Prerequisites: PHT 5180, PHT 5180L, PHT 6341, PHT 6341L. Corequisite: PHT 5181L.

PHT 5181L Musculoskeletal Diagnosis and Management II Lab (1). This is a laboratory course designed to prepare students for evaluating and treating physical therapy related musculoskeletal diagnosis. Prerequisites: PHT 5180, PHT 5180L, PHT 6341, PHT 6341L. Corequisite: PHT 5181.

PHT 5182 Musculoskeletal Diagnosis and Management III (3). This course is designed to prepare the student in the area of Physical Therapy related musculoskeletal diagnosis and treatment with focus on the spine. Prerequisites: PHT 5181 and PHT 5181L. Corequisite: PHT 5182L.

PHT 5182L Musculoskeletal Diagnosis and Management III Lab (1). This is a laboratory course designed to prepare students for evaluating and treating physical therapy related musculoskeletal diagnosis specific to the spine. Prerequisites: PHT 5181 and PHT 5181L. Corequisite: PHT 5182.

PHT 5205 Clinical Skills (3). Utilizing a seminar format, this course will provide the student with the theory and practice of necessary and basic physical therapy clinical skills. Prerequisites: Admission to the PT Program or permission of instructor. Corequisites: PHT 5174 and PHT 5174L.

PHT 5205L Clinical Skills Lab (1). Utilizing a laboratory format, this course will provide the student with the theory and practice of necessary and basic physical therapy clinical skills. Prerequisites: Admission to the PT Program or permission of instructor. Corequisite: PHT 5205, Clinical Skills.

PHT 5218 Physical Agent Modalities for Non-Physical Therapy Majors (1). The course is an introduction to physical agent modalities in rehabilitation for students and practitioners of occupational therapy, athletic training, massage therapy or other health care professions.

PHT 5244C Principles of Therapeutic Exercise (3). This course will discuss principles of therapeutic exercise as related to a comprehensive physical therapy plan of care for individuals across the lifespan. Prerequisite: Admission into the Physical Therapy Program.

PHT 5303 Principles of Pathophysiology in Physical Therapy (3). This pathology course is designed for physical therapy students. It deals with the pathophysiologic processes that affect specific tissues and organ systems of the body. Prerequisite: PHT 5174. Corequisites: PHT 5205, PHT 5181.

PHT 5323C Pediatric Physical Therapy (3). Entry-level, skills and competencies in pediatrics, including motor development; diagnosis, examination and intervention; and family, health education, and service delivery issues. Prerequisites: Admission into the graduate program in PT or permission on instructor.

PHT 5328 Advanced Pediatric Physical Therapy Assessment (3). Analysis of assessment tools in relation to treatment. Competence in administration of appropriate tools will be required at end of course. Prerequisites: Either STA 5126 or STA 6166 and permission of the instructor.

PHT 5335 Physical Therapy in Obstetrics/Gynecology (3). This course will explore the role of the therapist in the field of obstetrics and provide an introduction to gynecological issues. Emphasis will be on evaluation and treatment of the OB client. Prerequisite: Permission of the instructor.

PHT 5336 Theories in Cardiopulmonary Rehabilitation (3). This course is designed to provide students with applied theory in the clinical and physical therapy management of medical and surgical cardiac and respiratory conditions. Prerequisite: Permission of the instructor.

PHT 5373 Advanced Therapy Assessment of the Elderly (3). The study of assessment tools used in geriatric rehabilitation in relation to appropriate intervention strategies and research findings. Prerequisites: Appropriate adult motor development course/permission of major advisor.

PHT 5375 Foundations in Gerontology for Health Professions (3). Implications for health professions of the biological, cross-cultural, physiological, psychological, social, and societal contexts of aging.

PHT 5504 Service Learning in Physical Therapy (1-3). The course includes a brief introduction to community service in Physical Therapy, an opportunity to assist professionals to deliver community-based physical therapy services, and the preparation of case studies based on the

students' experiences. Prerequisites: Advanced standing in the undergraduate PT program or admission to Graduate PT program.

PHT 5505C Physical Therapy Constructs in Health and Wellness (3). Covers elements of Physical Therapy related prevention, screening, health and wellness for individuals, schools, and communities.

PHT 5515 Therapeutic Services for Physically Impaired and Mentally Retarded Students (3). Lecture, lab, and group work to develop skills of education and therapy professionals for implementation with disabled children in schools. Prerequisite: Permission of major advisor or instructor.

PHT 5523 Dimensions of Professional Practice Seminar I (3). This is the first in a sequence of four (4) courses designed to prepare the student in the areas of physical therapy related research, administration, education and professional issues. Prerequisite: Admission to Professional PT Curriculum.

PHT 5524 Dimensions of Professional Practice Seminar II (3). This is the second in a sequence of four (4) courses designed to prepare the student in the areas of physical therapy related research, administration, education and professional issues. Prerequisite: PHT 5523.

PHT 5525 Dimensions of Professional Practice Seminar III (3). This is the third in a sequence of four (4) courses designed to prepare the student in the areas of physical therapy related research, administration, education and professional issues. Prerequisite: PHT 5524.

PHT 5639 Physical Therapy Administrative Techniques and Methods (3). Provides an in-depth view of the health care industry and its relationship to the P.T. profession. Management techniques in all areas will be presented with emphasis on planning and financial management.

PHT 5805 Clinical Internship I (3). This is the first in a sequence of 4 supervised full-time clinical internships designed to offer the student experiences in patient evaluation and care with emphasis on musculoskeletal dysfunction. Prerequisite: PHT 5960.

PHT 5815 Clerkship in Physical Therapy (2). Two-week full-time clinical experience combined with independent study of question or issue in clinical Physical Therapy. Prerequisite: Permission of major advisor.

PHT 5823 Internship (3). Supervised, full-time clinical experience, designed to offer the student experience in patient evaluation and care, particularly in the areas of rehabilitation and neurorehabilitation.

PHT 5960 Comprehensive Exam I (1). This is the first of two comprehensive examinations that cover all previously completed coursework and is required for continued progression in the curriculum. Prerequisites: All Fall and Spring Semester Courses-Year I.

PHT 6009 Differential Diagnosis in Physical Therapy (3). This course is designed to enable the physical therapy student to engage in the diagnostic process to establish differential diagnoses for patients across the life span. Prerequisite: PHT 4300.

PHT 6125 Clinical Biomechanics (3). An introduction to temporal parameters, kinetics and kinematics of normal and pathological movement. Prerequisites: PHT 5182, PHT 5182L, PHT 6165C.

PHT 6127 Advanced Pathologic Movement Analysis (3). Explores the abnormal gait and movement patterns as they relate to pathologic states involving either the musculoskeletal or the neurologic system, or both. Prerequisite: Permission of major advisor.

PHT 6145 Motor Development: Adult Through Geriatrics (3). A study of motor development of the adult through old age. Application of developmental principles to physical therapy practice and research. Prerequisite: Permission of major advisor.

PHT 6163 Neurological Diagnosis and Management I (3). This is the first in a sequence of three (3) lecture courses designed to prepare the student in the areas of physical therapy related neurological diagnosis and treatment. Prerequisites: PHT 5960 or permission of instructor. Corequisite: PHT 6163L.

PHT 6163L Neurological Diagnosis and Management I Lab (1). This is the first in a sequence of three (3) laboratory courses designed to prepare the student in the areas of physical therapy related neurological diagnosis and treatment. Prerequisites: PHT 5960 or permission of instructor. Corequisite: PHT 6163.

PHT 6164 Neurological Diagnosis and Management II (3). This is the second in a sequence of three (3) lecture courses designed to prepare the student in the areas of physical therapy related neurological diagnosis and treatment. Prerequisites: PHT 6163, PHT 6163L. Corequisite: PHT 6164L.

PHT 6164L Neurological Diagnosis and Management II Lab (1). This is the second in a sequence of three (3) laboratory courses designed to prepare the student for psychomotor competencies in the areas of physical therapy related neurological diagnosis and treatment. Prerequisites: PHT 6163, PHT 6163L. Corequisite: PHT 6164.

PHT 6165C Applied Clinical Neuroanatomy (3). Examines correlation of sites of pathology in the central and peripheral nervous systems with actual patients; their signs and symptoms, their regimen of treatment, and prognosis for rehabilitation. Prerequisites: Neuroanatomy and permission of major advisor.

PHT 6169 Neurological Diagnosis and Management III (3). This is the third in a sequence of three (3) lecture courses designed to prepare the student in the areas of physical therapy related neurological diagnosis and treatment. Prerequisites: PHT 6164, PHT 6164L. Corequisite: PHT 6169L.

PHT 6169L Neurological Diagnosis and Management III Lab (1). This is the third in a sequence of three (3) laboratory courses designed to prepare the student for psychomotor competencies in the areas of physical therapy related neurological diagnosis and treatment. Prerequisites: PHT 6164, PHT 6164L. Corequisite: PHT 6169.

PHT 6237 Environments/Energy Expenditures of the Disabled (3). Analysis of the home and work settings in relation to various forms of physical disabilities. Energy

expenditures pertaining to environmental factors as they pertain to physical therapy evaluation and treatment. Prerequisite: Permission of major advisor.

PHT 6239 Developmental Disabilities in Adulthood (3). A study of adults with developmental disabilities; including aspects of societal perspectives, political and public policy regarding the handicapped, and current theories in treatment of the handicapped adult population. Prerequisite: Permission of major advisor and instructor.

PHT 6325 Advanced Clinical Pediatric Physical Therapy (3). The study of theory, treatment and current clinical research in pediatric physical therapy practice. Prerequisites: Permission of major advisor and PHT 5320.

PHT 6326 Physical Therapy for At-Risk Infants (3). This course will explore current PT practice and research for at-risk infants in NICU, NCCU, and follow-up programs. Includes aspects of physiological and behavioral monitoring indicators for physical therapy intervention. Prerequisite: PT graduate students.

PHT 6341 Diagnosis and Management of Disease (3). Covers Physical Therapy implications of disease processes, conditions and systemic disorders throughout the lifespan. Prerequisite: All Fall Semester Courses-Year I. Corequisite: PHT 6341L.

PHT 6341L Diagnosis and Management of Disease Lab (1). The practicum portion of PHT 6341 that covers physical therapy intervention in disease processes, conditions, and systemic disorders throughout the life span. Prerequisite: All Fall Semester Courses-Year I. Corequisite: PHT 6341.

PHT 6353 Principles of Diagnostics and Pharmacology in Physical Therapy (3). Topics include interpretation of medical laboratory tests results, diagnostics imaging, and pharmacology with a focus on effects, side effects, and toxicity in relation to PT interventions. Prerequisites: PHT 5182, PHT 6381, PHT 6169, PHT 6341.

PHT 6365 Theories in Sports Physical Therapy (3). Study and exploration of relevant issues in sports physical therapy. Focus on problem identification, investigation, analysis, and problem solving approaches. Prerequisite: Permission of major advisor.

PHT 6381 Diagnosis and Management of Cardiopulmonary Systems (3). This lecture course covers the elements of patient and client management provided by physical therapists with anticipated goals of preferred practice patterns in cardiopulmonary care. Prerequisites: PHT 5205 and PHT 5205L. Corequisite: PHT 6381L.

PHT 6381L Diagnosis and Management of Cardiopulmonary Systems Lab (1). This laboratory course covers the elements of patient and client management provided by physical therapists with anticipated goals of preferred practice patterns in cardiopulmonary care. Prerequisites: PHT 5205 and PHT 5205L. Corequisite: PHT 6381.

PHT 6403 Client-Centered Rehabilitation (3). Utilizes small and large group discussion, multimedia presentations, readings and projects to explore issues of communication, cultural diversity and client-centered rehabilitation.

PHT 6526 Dimensions of Professional Practice Seminar IV (3). This is the fourth in a sequence of four (4) courses designed to prepare the student in the areas of physical therapy related research, administration, education and professional issues. Prerequisite: PHT 5525.

PHT 6547 Case Management in Physical Therapy (1). Comprehensive physical therapy patient care management and practice review cumulating in a simulated physical therapy licensure examination. Prerequisite: PHT 6705 (Long Term Rehabilitation). Corequisite: PHT 6970 (DPT Project).

PHT 6552 Private Practice Seminar for Physical Therapists (3). This course analyzes various practice models and includes presentations from private practitioners and community business experts.

PHT 6625 Advanced Physical Therapy Clinical Research Methodologies and Design (3). Exploration of scientific method and theory as applied to clinical and experimental research in physical therapy; includes method of inquiry, techniques of data collection, organization, and interpretation. Prerequisites: STA 5126 or STA 6166 and permission of major advisor.

PHT 6705 Long Term Rehabilitation for Persons with Chronic Disease and Disability (3). Applying long term rehabilitation for persons with chronic disease and disability with focus on the continuum of fitness, health and rehabilitation throughout the life span.

PHT 6706 Information and Communication Technology in Rehabilitation (3). An introductory course that focuses on computer rehabilitation technology for clinical practices, research and education, and devices that assist the quality of patient activities. Prerequisite: Student should have a basic understanding of personal computers.

PHT 6714 Spinal Dysfunction I (Lower Back) (3). In-depth exploration of the evaluation and treatment of various lumbar spine dysfunctions. Prerequisite: Permission of major advisor.

PHT 6715 Spinal Dysfunction II (Upper Back) (3). In-depth exploration of the evaluation and treatment of various cervical spine dysfunctions. Prerequisite: Permission of major advisor.

PHT 6716 Theories in Orthopedic Physical Therapy (3). Study and exploration of relevant issues in orthopedic physical therapy. Focus on problem identification, investigation, analysis, and problem solving approaches. Prerequisite: Permission of major advisor.

PHT 6718 Theories in Neurorehabilitation (3). Examines theoretical bases of evaluation and treatment of the neuro-patient; includes exploration of the relationship of motor control and motor learning to current neurologic rehabilitation. Prerequisite: Permission of major advisor.

PHT 6725 Extremity Evaluation and Rehabilitation (3). In-depth exploration, critical analysis, and investigation of joint and extremity dysfunctions. Prerequisite: Permission of major advisor.

PHT 6746C Complementary Therapies for Rehabilitation Professionals (3). Complementary PT will describe and explain how various complementary

therapies will be introduced and incorporated into rehabilitation programs. Practical application and safety will be emphasized. Prerequisites: PHT 5205, PHT 5205L, PHT 5505.

PHT 6817 Clinical Internship II (3). This is the second in a sequence of 4 supervised full-time clinical internships designed to offer the student experience in patient evaluation and care with general medical and surgical clients. Prerequisites: PHT 5960, PHT 6164, PHT 6164L.

PHT 6824 Internship I (3). Supervised full-time clinical experience with emphasis on: evidence-based practice; clinical decision making; administration; educational activities; outcomes assessment; differential diagnosis; and consultation. Prerequisite: PHT 6009.

PHT 6825 Internship II (3). Continuation of PHT 6824, Internship I. Prerequisite: PHT 6824.

PHT 6826 Internship III (3). Continuation of PHT 6825, Internship II. Prerequisite: PHT 6825.

PHT 6827 Clinical Internship III (3). This is the third in a sequence of 4 supervised full-time clinical internships designed to offer the student experience in patient evaluation and care with the neurologically involved client. Prerequisite: PHT 6961.

PHT 6828 Clinical Internship IV (3). This is the final in a sequence of 4 supervised full-time clinical internships designed to offer the student experience in patient care in a specialty setting, including but not limited to pediatrics, SCIP, burns, etc. Prerequisite: PHT 6961.

PHT 6845 Resources and Skills for the PT/PI Student (3). This course focuses on the interdisciplinary team that works for the optimum educational benefit of the student. Therapists and teachers will learn and work collaboratively within this course. Corequisites: Graduate OT, PT, or Education students.

PHT 6905 Independent Study (1-3). Individually determined, research-oriented, in-depth study of a physical therapy issue. An independent study contract must be approved by the instructor. Prerequisites: Permission of major advisor and instructor. Must be fully admitted to the graduate program.

PHT 6961 Comprehensive Exam II (1). The second comprehensive examination covering all previously completed coursework and is required for continued progression in the curriculum. Prerequisites: All Fall and Spring Semester Courses-Year II.

PHT 6970 DPT Project (3). An individually supervised project for physical therapy students.

SPA 5009C Normal Communication Development and Disorders (3). Advanced study of the processes of typical speech and language acquisition as the basis for understanding associated developmental speech and language disorders. Prerequisite: Admission to the Graduate Certificate in Communication Sciences and Disorders.

SPA 5012C Introduction to Communication Sciences and Disorders (3). Introduction to the processes of communication sciences and principles of identification, assessment, and treatment of speech and language disorders. Prerequisite: Admission to the Graduate Certificate in Communication Sciences and Disorders.

SPA 5035C Disorders of Hearing and Audiological Sciences (3). Principles and procedures involved in the identification and assessment of problems associated with the auditory mechanism, including hearing loss prevention and conservation of auditory functioning. Prerequisite: Admission to the Graduate Certificate in Communication Sciences and Disorders.

SPA 5051C Clinical Observation, Management, and Procedures in Communication Disorders (3). Study of the principles involved in therapeutic intervention of communication disorders in different clinical settings. Observation of assessment and treatment sessions is a requirement of the course. Prerequisite: Admission to the Graduate Certificate in Communication Sciences and Disorders.

SPA 5102C Advanced Human Anatomy and Physiology of Mechanisms of Communication (3). Advanced study of anatomy, physiology, and neurology mechanisms of speech and hearing. Includes system study of speech production and perception: respiration, phonation, articulation, audition. Prerequisite: Admission to the Graduate Certificate in Communication Sciences and Disorders. Corequisite: SPA 5102L.

SPA 5102L Laboratory in Advanced Human Anatomy and Physiology of Mechanisms of Communication (1). Laboratory extension of SPA 5102C Advance Human Anatomy and Physiology of Mechanisms of Communication to accompany this course. Prerequisite: Admission to the Graduate Certificate in Communication Sciences and Disorders. Corequisite: SPA 5102C.

SPA 5107 Neurological Bases of Communication (3). The anatomical and physiological aspects of the central and peripheral nervous system as they pertain to communication acquisition and disorders. Prerequisite: Permission of the instructor.

SPA 5113C Advanced Applied Phonetics (3). Advanced study of principles of phonetics and phonetic transcription via International Phonetic Alphabet. Physiological descriptions and classification of speech sounds. Prerequisite: Admission to the Graduate Certificate in Communication Sciences and Disorders.

SPA 5150C Acoustics of the Sciences of Speech and Hearing (3). Advanced study of the communication sciences associated with the process of speech and hearing, including speech perception and production, speech and hearing physiology, and acoustic phonetics. Prerequisite: Admission to the Graduate Certificate in Communication Sciences and Disorders.

SPA 5204 Phonological Disorders (3). An examination of normal and deviant articulatory acquisition and behavior. Presentation of major theoretical orientations and the therapeutic principles based upon them. Prerequisite: Permission of the instructor.

SPA 5216 Vocal and Velopharyngeal Disorders (3). Study of etiology, symptoms, and treatment strategies for a variety of vocal and craniofacial disorders. Prerequisite: Permission of the instructor.

SPA 5225 Fluency Disorders (3). Study of etiology, symptoms, and treatment strategies for fluency disorders.

SPA 5262C Linguistics for Speech-Language Pathology (3). Study of linguistic theory as applicable to

speech-language development and disorders relative to speech-language pathology. Emphasis is on description and analysis of major components of language.

SPA 5402 Language Learning in Preschool Children (3). Presentation of the linguistic development in children ages 0-5 years as well as the delays and disorders associated with language. Prerequisite: Permission of the instructor.

SPA 5403 Language Learning in School-Aged Children (3). Overview and evaluation of the language skills of preschool and school aged children including metalinguistic and discourse development. Prerequisite: SPA 5402 and permission of the instructor.

SPA 5500 Basic Clinical Practicum (3). Supervised practice with representative speech and language problems in the school settings. Prerequisites: SPA 5204, SPA 5402, SPA 5403, SPA 5553.

SPA 5502 Intermediate Clinical Practicum (3). Supervised practice with communication problems in outpatient settings, private practices, rehabilitation. Prerequisite: SPA 5500.

SPA 5553 Differential Diagnosis of Communicative Disorders (3). The administration, evaluation and reporting of diagnostic tests and procedures used in assessment of speech and language disorders. Prerequisite: Permission of the instructor.

SPA 5805 Research Methodology in Communication Disorders (3). Research design, statistical analysis (descriptive and inferential) and dissemination of experimental data, with an emphasis on clinical research. Legal/ethical and cultural consideration in research design and implementation will also be addressed. Prerequisite: Permission of the instructor.

SPA 5935L Pre-Clinic Seminar (1). This course is designed to address the prerequisite practicum requirements to prepare students for clinical internship rotations. Prerequisite: Acceptance into the speech pathology master's program (or by permission from the instructor).

SPA 6005 Assessment & Treatment of the Bilingual Child with Communication Disorders (3). Assessment and treatment of normal and atypical language development across cultures. Prerequisite: Permission of the instructor.

SPA 6232 Neuromotor Communication Disorders (3). Study of speech and communicative problems of neuromotorically-impaired children and adults with apraxia of speech, the dysarthrias, and other related motor speech disorders. SPA 5107 and Permission of the instructor.

SPA 6254 Adult Communication Disorders and Cognition (3). Relationship between cognition and language in typical aging and definition, appraisal, and treatment of communication disorders in dementia, traumatic brain injury, and right hemisphere brain-damage.

SPA 6322 Aural Habilitation and Rehabilitation (3). This course provides information and strategies for aural habilitation intervention with hearing impaired children. Includes techniques of speech reading, auditory training and language for the hearing impaired. The course is part of the Graduate Certificate in CSD and is an elective

course in the Masters' in Speech-Language Pathology (if student has not completed an undergraduate course in aural rehabilitation or has not taken as part of the Graduate Certificate). Prerequisite: SPA 5035

SPA 6406 Dual Language Acquisition and Disorders (3). Development of normal and atypical language in speakers of more than one language. Prerequisite: Permission of the instructor.

SPA 6410 Aphasia and Related Disorders (3). Consideration of the neurological and psychological aspects of aphasia and related approaches are discussed and evaluated. Prerequisites: SPA 5107 and Permission of the instructor.

SPA 6479 Communications Disorders and Aging in a Bilingual Society (3). Survey of types and characteristics of bilingualism and normal and atypical speech and language changes associated with aging. Prerequisite: Permission of the instructor.

SPA 6505 Advanced Clinical Practicum (3). Supervised practice with severe communication problems in area hospitals and long term care facilities. Prerequisite: SPA 5502.

SPA 6559 Augmentative and Alternative Communication (3). Introduction to augmentative and alternative communication practices relative to individuals with severe speech, language, and/or communication deficits requiring AAC strategies or devices. Prerequisite: SPA 5107.

SPA 6565 Dysphagia (3). Information and training in the evaluation and treatment of swallowing disorders. Prerequisite: Permission of the instructor.

SPA 6930 Master's Project (1-6). This course provides the student with an opportunity to explore in-depth a specific topic of interest in speech pathology. Prerequisite: Permission of the instructor.

SPA 6938 Topics in Speech Pathology (1-3). This course is intended to give students information about topical issues in the field of Speech Language Pathology. Prerequisite: Permission of instructor.

SPA 6971 Master's Thesis (1-6). Supervised research on an original research project submitted in partial fulfillment of the Master's degree requirement. Prerequisite: Permission of the instructor.

*All students must provide evidence of personal professional liability insurance prior to registering for any clinical nursing courses.

Robert Stempel College of Public Health & Social Work

<i>Dean</i>	Tomás Guilarte
<i>Associate Dean, Academic Affairs</i>	Mark Macgowan
<i>Associate Dean, Graduate Education</i>	Stanislaw Wnuk
<i>Associate Dean, Research</i>	Jason Richardson
<i>Assistant Dean, Student and Alumni Affairs</i>	Magnolia Hernandez
<i>MPH Program Director</i>	Vukosava Pekovic
<i>Director, Online MPH, Educational Programs and Workforce Development</i>	Yasenska Peterson

Chairs and Directors:

<i>Academy for International Disaster Preparedness</i>	Javier I Marques
<i>Biostatistics</i>	Zoran Bursac
<i>Dietetics and Nutrition (Interim)</i>	Evelyn Enrione
<i>Environmental Health Sciences</i>	Kim Tieu
<i>Epidemiology</i>	Mary Jo Trepka
<i>Health Policy and Management (Interim)</i>	Alejandro Arrieta
<i>Health Promotion and Disease Prevention</i>	Elena Bastida
<i>School of Social Work</i>	Mary Helen Hayden

The Robert Stempel College of Public Health & Social Work includes five departments of Public Health that include: Biostatistics, Environmental Health Sciences, Epidemiology, Health Policy and Management, and Health Promotion and Disease Prevention; a department of Dietetics and Nutrition, the Academy for International Disaster Preparedness, and the School of Social Work. Programs of study are offered that lead to a Master's of Public Health degree (MPH) (with specializations in Biostatistics, Environmental Health Sciences, Epidemiology, Health Policy and Management, and Health Promotion and Disease Prevention), including an Online Master of Public Health; a Master of Science degree in Dietetics and Nutrition; a Master's degree in Social Work (MSW); and a Master of Arts degree in Disaster Management. A Ph.D. in Public Health (with specializations in environmental and occupational health, epidemiology, and health promotion and disease prevention, health systems research); a Ph.D. degree in Dietetics and Nutrition; and a Ph.D. in Social Welfare are also offered. In addition, a Bachelor of Science degree in Dietetics and Nutrition; and a Bachelor of Science degree in Social Work are also offered.

The mission of the college is to serve the South Florida community by increasing, sharing, and applying knowledge, wisdom, and ethical decision making in public health and social welfare. Our mission is carried out through:

- Educating and training future leaders, researchers, and practitioners;
- Conducting innovative research translating research into policy, programs, and practice, and
- Promoting healthy lives for diverse and especially underserved populations, here and abroad.

Accreditation

The Robert Stempel College of Public Health and Social Work is accredited by the Council on Education for Public Health. The Didactic (DPD) and pre-professional practice programs (CP) in Dietetics and Nutrition are accredited by the Commission on Accreditation of Dietetic Education. The BSSW and MSW programs are accredited by the Council on Social Work Education. Each degree program is committed to preparing students for the pursuit of excellence in professional and scholarly endeavors in an era of globalization, scientific and technological advances, and demographic changes. The health and well-being of communities as affected by multiple determinants is reflected in our interdisciplinary curriculum. The programs emphasize the involvement of practitioners, academic researchers, and the community to improve and promote public health and social well-being.

Office of Student and Alumni Affairs

The Office of Student and Alumni Affairs serves as a liaison between students in the Robert Stempel College of Public Health & Social Work and university-wide student support services. The office works closely with directors and department chairs to coordinate admissions and advising services, and to provide students with information about scholarships, internships, community engagement opportunities and career development resources to help ensure student and alumni success.

The College has dynamic professional staff dedicated to promoting the college and supporting our students while they pursue their academic goals.

Admission Application

Students seeking admission to the graduate programs in the Robert Stempel College of Public Health & Social Work must formally apply to the University for acceptance at <https://admissions.fiu.edu/how-to-apply/graduate-applicant/index.html>. For additional information contact the:

Robert Stempel College of Public Health & Social Work
Office of Student and Alumni Affairs

Online Master of Public Health

Robert Stempel College of Public Health and Social Work offers a fully online MPH degree taught by college faculty and experts in public health. The Online MPH degree program prepares students for interdisciplinary public health positions that investigate the distribution of diseases, as well as determinants of social and environmental health among diverse populations. Students also learn how to use existing health policies and influence policies in support of optimizing population health. All admissions and graduation requirements are the same as the traditional MPH program. Each online course is the equivalent of an on-campus section of the same course in terms of objectives, content, rigor, and

transferability. Students must meet stated prerequisites or assessment scores, where applicable.

Admission Requirements

Applicants must meet the University's general graduate admission requirements. Students with diverse backgrounds are encouraged to apply.

1. A Bachelor's degree or equivalent from an accredited US college or university or, in the case of foreign students, a WES verified institution and also recognized in its own country as preparing students for further study at the graduate level.
2. A minimum 3.0 GPA in the last 60 credits of upper level work.

In addition, applicants are required to submit

- a) a current resume;
 - b) a written statement of purpose (career goals);
 - c) three letters of recommendation.
3. Foreign graduates, including applicants from non-English speaking countries and domestic students who studied outside of the U.S., must demonstrate proficiency in the English language by presenting a minimum score of 80 on the iBT TOEFL (equivalent to 550 on the paper-based version of the Test of English as a Foreign Language), or 6.5 overall on the International English Language Testing System (IELTS). Applicants who hold an undergraduate or graduate degree from an institution within the United States, other English speaking countries, or countries listed in the university's English Proficiency Test Exempt Countries (<https://fiuonline.fiu.edu/admissions/international-students.php>) are not required to submit English proficiency exam scores.

Program Requirements

The Online Master of Public Health requires completion of 45 credit hours of approved course work with a minimum of a 'B' (3.0) average. Public Health Core courses must be passed with a grade of 'B' or higher. All work applicable to the degree must be completed within six years of first enrollment in the master's program.

Public Health Core Courses: (15 credits)

PHC 6000	Epidemiology I: Intro to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3

Online General Core Courses: (15 credits)

Five courses (3-credits per course) are to be selected to reflect the Online MPH competency-based objectives that allows the learning outcome in the integration of interdisciplinary public health programs.

PHC 6055	Data Management and Epidemiologic Analysis Using SAS/SPSS	3
PHC 6155	Health Policy	3
PHC 6355	Environmental Health and Safety	3
PHC 6536	Health Demography	3
PHC 6113	Community Health Promotion Planning and Research	3

Elective Courses (9 credits)

Students are required to take three courses (3-credits per course) for 9-credits of the following advised graduate public health electives. Students may take any other faculty approved 6000 level courses in the college to meet the 9-credit requirement.

PHC 6009	AIDS Epidemiology	3
PHC 6091	Biostatistics 2	3
PHC 6104	Public Health Management and Leadership	3
PHC 6374	Environmental Disasters and Human Health	3
PHC 6412	Health Promotion in Culturally Diverse Communities	3
PHC 6600	Health Promotion Communication Theory and Design	3

Practicum and Culminating Experience: (6 credits)

PHC 6945	Practicum in Public Health	3
PHC 6930C	Integrative Seminar in Public Health	3

PHC 6945 (Practicum) and PHC 6930C (culminating experience) are both required for all Online MPH students. The Practicum may be taken after completing a minimum of 30 credit hours, including all core courses. Students must contact the Program at least two semesters prior to registering for the Practicum to begin the process of planning, respective to the geographic location of the student and intended project. The Practicum may be waived if the student has at least 3 years of relevant practice experience working in a public health practice setting. The waiver request is prepared by the student and submitted to the program for final approval. If the Practicum Requirement is waived, the student will need to substitute an approved 3-credit course in place of PHC 6945 (Practicum) such that the total curriculum hour requirement of 45 credit hours is met.

Master of Social Work (Clinical)/Master of Public Health (Generalist)

The MSW (Clinical)/MPH (Generalist) program will be an interdisciplinary, three-year program incorporating knowledge and skills from social work and public health. The combined degree program consists of a combination of social work and public health courses.

Admissions Requirements

- Students will need to apply to and be accepted into each degree program separately in order to qualify for the combined degree program. Students will have to meet the regular admissions criteria for each program.
- If a student is already in progress with either the MSW or MPH, the application to the other degree program will need to be submitted by the end of the 1st year of coursework. At that time, the student must notify both programs that they are interested in pursuing the combined degree.

Required Courses

The required credits for the program is 87 credits.

Year One

Fall (15 credits)

SOW 5105	Human Behavior and the Social Environment I	3
SOW 5235	Social Welfare Policy and Services I	3
SOW 5404	Social Work Methodology	3

PHC 6000	Intro to Public Health Epidemiology	3
PHC 6102	Intro to PH Health Policy & Management	3

Spring (12 credits)

SOW 5342	Social Work Practice with Individuals and Families	3
SOW 5379L	Interviewing Skills Lab	3
PHC 6052	Biostatistics I	3
PHC 6410	Health Behavior and Public Health	3

Summer (6 credits)

PHC 6536	Health Demography	3
Social Work Elective		3

Year Two**Fall (12 credits)**

SOW 5344	Theory and Practice with Communities & Orgs	3
SOW 5629	Social Work Practice with Diverse Populations	3
PHC 6113	Community Health Promotion Planning and Research	3
PHC 6315	Introduction to Environmental Health Sciences	3

Spring (12 credits)

SOW 5324	Theory and Practice with Groups	3
SOW 5532	Field Practicum I	3
Social Work Elective		3
PHC	Environmental Health Risk Assessment	3

Summer (6 credits)

SOW 6125	Human Behavior and the Social Environment II	3
PHC 6055	Data Management	3

Year Three**Fall (6 credits)**

SOW 6435	Evidence-Based Social Work Practice	3
PHC 6155	Health Policy	3

Spring (6 credits)

SOW 6425	Clinical Assessment and Intervention Planning	3
SOW 6533	Field Practicum II	3

Summer (12 credits)

SOW 6534	Field Practicum III	6
SOW 6351	Clinical Intervention in Couple and Family Social Work Practice	3
PHC 6930	Integrative Seminar in Public Health	3

Substitutions:

- SOW 6533 Field Practicum II may substitute for PHC 6945 Practicum in Public Health with approval from internship coordinator in public health.
- PHC 6155 Health Policy Analysis may substitute for SOW 6236 Social Welfare Policy Services II.
- Students must take two (2) electives in social work. These electives may substitute for the electives in the MPH Generalist.
- MSW/MPH students do not have to take PHC 6500 Foundations in Public Health.

Nan Van Den Bergh, *Clinical Professor Emeritus*

Eric F. Wagner, *Professor and Director, Community-Based Research Institute*

Social Work offers graduate and undergraduate studies leading to the Master of Social Work and Bachelor of Science in Social Work degrees. The School also offers a Ph.D. in Social Welfare.

The profession of Social Work requires a high degree of knowledge and dedication. The desire and ability to work effectively with people and to help solve social problems demands a scientific understanding of society and human behavior, skills in social work practice, and identification with the values of the profession.

Note: The programs, policies, requirements, and regulations listed in this catalog are continually subject to review in order to serve the needs of the University's, College's and School's regulatory and accrediting agencies. Changes may be made without advance notice. The curricula described in this catalog are continually subject to review in order to respond to the mandates of the Florida Department of Education, Board of Governors, the legislature, the Council on Education for Public Health and the Council on Social Work Education. The School makes every effort to minimize the impact of curriculum changes on currently enrolled students by stipulating that students complete the requirements of their degree program in effect at the time of admission or readmission to the program. In the event that this is not possible due to accreditation standards or the deletion of courses,

students may be required to complete alternative degree requirements in order to graduate.

Master of Social Work

Social Work offers an integrated program that leads to the Master of Social Work (MSW) degree. The program is designed to give the student professional education for the advanced practice of social work. The curriculum applies a bio-psychosocial model within the context of a social systems framework to understand client systems, address problems and develop interventions.

The Master of Social Work Program at Florida International University is accredited by the Council on Social Work Education (CSWE). The program is grounded in the core competencies set forth by CSWE. Students are expected to meet all core competencies, including generalist and advanced clinical practice behaviors, by the end of their studies. Students are also provided grounding in basic public health knowledge.

All students will be required to acquire or to possess the core competencies in the areas of professional study considered essential in social work education: professional, behavior and ethics, diversity, and difference in practice, advancing human rights and social, economic, and environmental justice, policy practice, research, and practice including engagement, assessment, interventions, and evaluations with individuals, families, groups, organizations, and communities. The knowledge acquired in the professional courses will be applied in supervised field experiences in social service agencies. As part of field education, social work students may also participate with students from the Herbert Wertheim College of Medicine and the Nicole Wertheim College of Nursing and Health Sciences in the Green Family Foundation Neighborhood HELP™, an inter-professional team approach in Miami-Dade communities.

The program offers a specialization in advanced clinical practice and students complete a field practicum program that supports practice in that specialization. With the help of faculty, students will develop individualized programs in the specialization to meet their educational needs, advanced practice behaviors, and contribute to their professional objectives. The program provides a curriculum which meets the current educational requirements for clinical licensure in Florida.

Field agencies require the disclosure of conviction records for misdemeanors and/or felonies and current screening for drug use. Therefore, students are required to submit to state and federal background checks and drug screening tests prior to the initiation of the practicum. Findings in the background checks and/or drug screenings tests may affect a student's ability to participate in field internship and, thus, complete the social work program. Students are further advised that Florida and most other states may restrict or deny social work employment and/or licensure for persons with a felony conviction. **Students with a criminal background must consult with the MSW Program Coordinator before continuing in the program.**

Evening and weekend field placements are extremely limited and are granted only as an exception in extreme circumstances. **The School of Social Work is under no obligation to provide such placements. Consequently, practicum placement cannot be guaranteed even for students who require evening and weekend**

placements and all students must have at least eight (8) weekday, daytime hours available per week during their practicum experience. Students cannot complete their field placements in an agency at which they are employed.

For additional information regarding the graduate social work program of study and degree requirements, contact the School of Social Work at (305) 348-5880.

Admission Requirements

Applicants to the MSW program are required to meet the minimum standards set forth by the Florida Board of Education, the University, and the School of Social Work. Students must have a GPA of 3.0 or better in all upper-level courses. Application procedures for admission to graduate study are found in the graduate admission section of this catalog. An application to the University, an application to the Social Work MSW program, a personal narrative, and three letters of reference are required for admission. A personal interview may be requested. All applicants are required to have completed college-level courses in biology (including coverage of Human Biology) and statistics and 12 semester hours in the social and behavioral sciences.

In addition to the College and University policies governing transfer credit the following regulations apply:

1. Courses taken in a Master of Social Work program, accredited by the Council on Social Work Education, in which the applicant was fully admitted, may be transferred up to a maximum of 6 semester hours.
2. Graduate courses taken in other than CSWE accredited Social Work programs may not be transferred.
3. Required concentration courses (6000 level) are not transferable.

Advanced Standing Status

Applicants with a B.S.W. degree from a program accredited by the Council on Social Work Education (CSWE) within five years prior to matriculation and a minimum of 3.25 GPA (last 60 hours/upper division of undergraduate studies) **may be considered** for Advanced Standing status. Advanced Standing is **not automatically granted**. All students admitted to the MSW Program are required to take 30 semester hours of concentration courses in addition to the course in public health unless they have a BSSW/BSW from FIU or another social work program that is accredited by the Council on Education for Public Health (CEPH). Students that fulfill the criteria can take an additional, 3-credit elective in the place of the public health course. Students who are admitted with Advanced Standing status will not be required to take the graduate foundation courses if they earned a 'B' or better in the corresponding course(s) at the bachelor's level. Students admitted with Advanced Standing Status will not be awarded any transfer credit, substitutions, or exemptions.

Degree Requirements

The Master of Social Work program is a 60 semester hour program composed of 30 semester hours of generalist courses followed by 30 semester hours of specialization courses in the second year. The Master of Social Work for students with Advanced Standing Status is composed of 33 semester hours of specialization courses.

An overall GPA of 3.0 is required for graduation. Any required course in which a student receives a grade lower than 'B' must be retaken. (A grade of 'B-' is not acceptable.) However, a grade of 'B-' in an elective does not have to be retaken. A passing grade in field practicum courses is required for continuation in the program. Field courses cannot be repeated.

Students in the MSW program who fail a required social work course (a 'B-' or lower) three (3) times may not take the course again and will be automatically dismissed from the program.

A student must successfully complete all work applicable to the Master of Social Work program within 48 months from initial admission. In unusual circumstances, and if the reasons warrant it, a student may petition the School Director for an extension of the time limit.

Required Courses: (60)

Block I GENERALIST COURSES

SOW 5105	Human Behavior and the Social Environment I	3
SOW 5235	Social Welfare Policy and Services I	3
SOW 5342	Social Work Practice with Individuals and Families	3
SOW 5379L	Interviewing Skills Lab	3
SOW 5404	Social Work Research Methodology	3

Block II GENERALIST COURSES

SOW 5324	Theory and Practice with Groups	3
SOW 5629	Social Work Practice with Diverse Populations	3
SOW 5532	Field Practicum I	3
SOW 5344	Theory and Practice with Communities and Organizations	3
PHC 6500	Foundations of Public Health Practice	3

(Or SOW Social Work Clinical Practice Elective 3 if student has a BSSW/BSW from FIU or a social work program accredited by CEPH).

Block III SPECIALIZATION COURSES

SOW 6125	Human Behavior & the Social Environment II – Psychopathology	3
SOW 6236	Social Welfare Policy and Services II	3
SOW 6435	Evidence-Based Social Work Practice	3
SOW 6425	Clinical Assessment and Intervention Planning	3
SOW 6533	Field Practicum II	3
PHC 6500	Foundations of Public Health Practice	3

Block IV SPECIALIZATION COURSES

SOW 6351	Clinical Intervention in Couple and Family Social Work Practice	3
SOW 6534	Field Practicum III	6
SOW	Social Work Clinical Practice Elective	3
SOW	Social Work Clinical Practice Elective	3

Students are required to complete all of the first-year Generalist Courses and be fully admitted to the MSW Program before enrolling into any of the 6000 level Specialization courses.

Master of Social Work/ Master of Public Health in Health Promotion and Disease Prevention (HPDP) Degree Pathway

The MSW/MPH in Health Promotion and Disease Prevention degree pathway will be an interdisciplinary,

three-year program incorporating knowledge and skills from social work and public health with a concentration in clinical social work and Health Promotion and Disease Prevention. The first year will consist of social work courses, followed by public health courses in the second year, and a combination of social work and public health courses in the final year. The required credits for the pathway would be 90 credits.

Admissions Requirements

- Students will need to apply to and be accepted into each degree pathway separately in order to qualify for the combined degree program. Students will have to meet the regular admissions criteria for each program.
- If a student is already in progress with either the MSW or MPH, the application to the other degree program will need to be submitted by the end of the 1st year of coursework. At that time, the student must notify both programs that they are interested in pursuing the combined degree pathway.

Required Courses

Year One

Fall (14 credits)

SOW 5105	Human Behavior and the Social Environment I	3
SOW 5235	Social Welfare Policy and Services I	3
SOW 5342	Social Work Practice with Individuals and Families	3
SOW 5379L	Interviewing Skills Lab	3
SOW 5404	Social Work Methodology	3
	or	
PHC 6706	Research Methods in Public Health	3

Spring (13 credits)

SOW 5344	Theory and Practice with Communities & Orgs	3
SOW 5324	Theory and Practice with Groups	3
SOW 5532	Field Practicum I	3
SOW 5629	Social Work Practice with Diverse Populations	3

Summer (6 credits)

SOW 6125	Human Behavior and the Social Environment II	3
	Social Work Elective	3

Year Two

Fall (9 credits)

PHC 6052	Biostatistics I	3
PHC 6602	Theoretical Foundations of Health Promotion	3
PHC 6410	Health Behavior and Public Health	3

Spring (9 credits)

PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6000	Intro to Public Health Epidemiology	3
PHC 6102	Intro to PH Health Policy & Management	3

Summer (6 credits)

	Public Health Elective	3
	Public Health Elective	3

Year Three

Fall (12 credits)

	Social Work Elective	3
--	----------------------	---

PHC 6146	Health Promotion Program Planning and Intervention Design	3
SOW 6236	Social Welfare Policy & Services II	3
SOW 6435	Evidence-Based Social Work Practice	3

Spring (9 credits)

SOW 6425	Clinical Assessment and Intervention Planning	3
SOW 6533	Field Practicum II	3
PHC 6750	Program Development & Evaluation for Health Promotion	3

Summer (12 credits)

PHC 6930	Integrative Seminar in Public Health	3
SOW 6534	Field Practicum III	6
SOW 6351	Clinical Intervention in Couple and Family Social Work Practice	3

Substitutions:

- SOW 6533 Field Practicum II may substitute for PHC 6945 Practicum in Public Health with approval from internship coordinator in public health.
- Students may choose to take either PHC 6706 Research Methods in Public Health or SOW 5404 Social Work Research Methodology.
- Students must take two (2) electives in social work and two (2) electives in HPDP. The two (2) social work electives may substitute for the 3rd and 4th HPDP electives usually required.
- MSW/MPH students do not have to take PHC 6500 Foundations in Public Health.

Master of Social Work/ Master of Public Health in Health Promotion and Disease Prevention (HPDP) with MSW Advanced Standing Status Pathway

The MSW/MPH in Health Promotion and Disease Prevention with Advanced Standing degree pathway will be an interdisciplinary, two-year accelerated pathway incorporating knowledge and skills from social work and public health with a specialization in clinical social work and Health Promotion and Disease Prevention. Only students who already have an undergraduate degree in social work and meet the criteria for the advanced standing MSW may apply to this accelerated pathway. Both the first and second years of the program will involve social work and public health courses

Admission Requirements:

- Students will need to apply to and be accepted into each degree program separately in order to qualify for the combined degree pathway.
- For the MSW/MPH with advanced standing, admission to both programs must occur prior to beginning any coursework. At the time of admission, the students will need to notify both programs that they are interested in pursuing the combined degree pathway with advanced standing in social work.

Required Courses:

Year One

- PHC 6155 Health Policy Analysis may substitute for SOW 6236 Social Welfare Policy Services II.
- Students must take two (2) electives in social work. These electives may substitute for the electives in the MPH Generalist.
- MSW/MPH students do not have to take PHC 6500 Foundations in Public Health.

Juris Doctor/Master of Social Work Joint Degree Program Pathway

1. Candidates for the pathway must meet the entrance requirements for and be accepted by both the College of Law and the School of Social Work. Both schools must be informed by the student at the time of application to the second school that the student intends to pursue the joint degree pathway.
2. The joint degree pathway is not open to students who have already earned one degree.
3. For law students, enrollment in the M.S.W. program is required no later than the completion of 63 credit hours in the J.D. program. For M.S.W. students, enrollment in the J.D. program is required no later than the completion of 30 credit hours in MSW Program.
4. A student must satisfy the curriculum requirements for each degree before either degree is awarded. The School of Social Work will allow 9 credit hours of approved law courses to be credited toward both the M.S.W. and J.D. degrees. These 9 credit hours of law classes will be in lieu of Social Work electives and must be selected from an approved list of law classes. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the J.D. degree for courses taken in the M.S.W. curriculum upon completion of the M.S.W. degree curriculum with a grade point average of 3.0 or higher.
5. A full-time law student enrolled in the joint degree pathway may spend the first year in either the College of Law or the School of Social Work. A part-time law student enrolled in the joint degree pathway may begin the student's studies in either the College of

Law or the School of Social Work, but must take the first three semesters of law study consecutively. Students admitted to one school but electing to begin study in the other school under the joint degree program may enter the second school thereafter without once again qualifying for admission so long as they have notified the second school before the end of the first week of the first semester in the second school and are in good academic standing when studies commence in the second school.

6. A student enrolled in the joint degree pathway will not receive either degree until the student has satisfied all of the requirements for both degrees, or until the student has satisfied the requirements of one of the degrees as if the student had not been a joint degree pathway candidate.

Doctor of Philosophy in Social Welfare

The Doctor of Philosophy in Social Welfare aims to prepare students for careers in research, university teaching, and leadership in social work and social welfare.

The Program emphasizes research that informs the development, implementation and evaluation of culturally appropriate interventions to meet the human needs of individuals, families, groups, and communities.

The Program is structured to develop and strengthen students' skills in the methods of scientific inquiry, to deepen their understanding and analysis of social problems and public issues, and to contribute to the knowledge base of social welfare. Students pursue a course of study focused on social problems, intervention research, and research methodology related to an area of specialization of particular interest to them.

The faculty mentor students on a specific area of research, its theoretical foundations and practical applications. Instruction and mentoring involve courses and seminars, supervised conduct of research, collaborative work with faculty, presentations of scientific papers, writing and publishing scholarly work, and submitting research grant proposals. While in the program, students are expected to disseminate the results of their study and research in appropriate forums. Students are also offered opportunities to teach.

Admission Requirements

Applicants are required to meet the following requirements:

1. A Master's degree in Social Work from an accredited school of social work, or in a closely related field;
2. Evidence of superior academic achievement in undergraduate and graduate education, including a 3.0 (upper division) undergraduate GPA and a 3.5 graduate GPA;
3. Official Graduate Record Examination (GRE) scores;
4. Documentation of completion of courses in statistical methods and research methodology with grades of 'B' or better;
5. Three letters of recommendation (two academic and one professional);
6. Two examples of written scholarly work;
7. A personal statement describing the applicant's research interests and career goals;
8. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language

(TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or overall 6.5 on the IELTS is required;

9. All applicants must be approved by the Doctoral Committee. Applications for Fall semester admission are due by February 15th of the year of application.

Degree Requirements

1. Completion of a minimum of 75 credit hours earned beyond the bachelor's degree: (at least 36 credit hours of required coursework taken over the first three consecutive semesters following admission, obtaining at least a "B" grade for each course, and at least 15 dissertation credit hours following advancement to candidacy); continuous registration for at least 3 credit hours of dissertation courses during each semester following advancement to candidacy; maintenance of an overall cumulative grade point average (GPA) of at least 3.0;
2. Filing, before the end of the fourth semester of study, three major papers, each having obtained a grade of at least "B+" from a three-member Doctoral Candidacy committee (this constitutes the Doctoral Candidacy Examination);
3. Successful defense of a Dissertation Proposal from a duly constituted Dissertation Committee;
4. Completion of a dissertation under the guidance of the Dissertation Committee;
5. Successful defense of the dissertation before the Dissertation Committee and the University community;
6. Obtaining the Ph.D. degree within nine years of admission into the Ph.D. program.

Program of Study

The Doctor of Philosophy in Social Welfare is a 75 semester credit hour program comprised of at least 36 hours of required coursework and 15 semester hours of dissertation study. The balance of the hours (prior to dissertation credits) are made up of electives and/or supervised or independent research courses (i.e., SOW 6914 or SOW 7916), in consultation with the student's academic advisor. Additional semester graduate credit hours may be drawn from the student's master's degree.

Required Courses (*Designates Required Course)

Semester I (12 hours)

*SOW 7216	Social Welfare Policy	3
*SOW 7406	History & Systems of Social Work Research	3
*SOW 7492	Theory Development and Research Methods in Social Welfare	3
*PHC 6709	Quantitative Research Analysis I (or equivalent)	3

Semester II (12 hours)

*SOW 7237	Micro-Practice Theory and Research	3
*SOW 7238	Macro-Practice Theory and Research	3
*PHC 6091	Biostatistics 2 (or equivalent)	3
*AAA xxxx	Graduate Elective (or SOW 7916 Supervised Research)	3

Semester III (12 hours)

*SOW 7936	Dissertation Seminar in Social Welfare	3
*SOW 7493	Research Methods in Social Welfare II (or equivalent)	3

*AAA xxxx	Graduate Elective (or SOW 7916 Supervised Research)	3
PHC 6500	Foundations of Public Health Practice	3

Semester IV +

If Doctoral Candidacy attained:

*SOW 7980	Dissertation Credits (min 15 hours)	3
-----------	-------------------------------------	---

If Doctoral Candidacy not attained:

*SOW 7916	Supervised Research	3
-----------	---------------------	---

or

SOW 6914	Independent Research	1
----------	----------------------	---

* This course is not required for Ph.D. students who (a) have a graduate degree in Public Health, (b) a joint MSW/MPH degree, (c) who have already obtained a B or better in PHC 6500 at FIU, or (d) have taken an equivalent graduate level course at another university.

For additional and updated information about degrees offered, entrance requirements, and services, please visit our website:

Biostatistics

Zoran Bursac, *Professor and Chair*

Michelle Hospital, *Research Associate Professor*

Nan Hu, *Associate Professor*

Boubakari Ibrahimou, *Associate Professor*

Tan Li, *Associate Professor*

Gabriel Odom, *Assistant Professor*

Emir Veledar, *Courtesy Professor*

Changwon Yoo, *Associate Professor*

The Department offers a major in Biostatistics for the College's MPH degree, which covers basic applied biostatistics especially as required for public health and community health research and practice.

MPH in Biostatistics

Biostatistics is a field that facilitates the conduct of health and medical research through a focus on designing sound experiments and studies relevant to human health and through the process of collecting, managing, analyzing and interpreting data. Biostatisticians collaborate in the identification and refinement of important research questions and in the methods and procedures required to obtain high quality and reliable answers to these questions. There remains a shortage of professional biostatisticians and the field provides meaningful and rewarding careers for those interested and able to go down this path.

Admission Requirements

Applicants must meet the University's general graduate admission requirements:

1. A Bachelor's degree or equivalent from an accredited college or university or, in the case of foreign students, an institution recognized in its own country as preparing students for further study at the graduate level.
2. A minimum 3.0 GPA on the last 60 under-graduate hours. In addition, applicants are required to submit 1) a current resume; and 2) a written statement of purpose (career goals). Applicants are also encouraged to submit three letters of recommendation.
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required. Students with diverse backgrounds are encouraged to apply.
4. Submission of official GRE scores are optional. If a student decides to submit GRE scores, the scores must be less than 5 years old.
5. Preference will be given to applicants having completed coursework in mathematics through calculus.

MPH Core Curriculum: (15 credits)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3

PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3

Major in Biostatistics: (15 credits)

PHC 6056	Longitudinal Health Data Analysis	3
PHC 6064	Applied Statistical Methods for Discrete Data	3
PHC 6080	SAS Computing for Health Sciences	3
PHC 6091	Biostatistics 2	3
PHC 6059	Survival Data Analysis	3

Electives for Biostatistics: (9 credits)

PHC 6055	Data Management and Epidemiologic Analysis Using SAS/SPSS	3
PHC 6099	R Computing for Health Sciences	3
PHC 7719	Multivariate Methods in Health Sciences Research	3
PHC 6067	Probabilistic Graphical Models	3
PHC 6907	Independent Study: Public Health	3
PHC 6931	Special Topic in Biostatistics	3

Practicum and Culminating Experience: (6 credits)

PHC 6945	Practicum in Public Health	3
PHC 6930C	Integrative Seminar in Public Health	3

PHC 6945 (Practicum) and PHC 6930C (culminating experience) are both required for all MPH students. The Practicum may be taken after completing a minimum of 30 hours, including all core courses. The Practicum may be waived if the student has at least 3 years of relevant practice experience working in a public health practice setting. The waiver request is prepared and submitted by the student, through their Faculty Advisor and Department Chair, for final approval/disapproval by the Academic Public Health Director. If the Practicum requirement is waived, the student will need to substitute 3 additional approved hours so that the total curriculum hour requirement of 45 is met. MPH students are expected to complete PHC 6930C Integrative Seminar in Public Health during their last semester in the program.

For additional and updated information about degrees offered, entrance requirements, and services, please visit the College's website: <http://stempel.fiu.edu>.

Doctor of Philosophy in Public Health Major in Biostatics and Data Analytics

Doctoral Requirements

A student must enroll for dissertation credits after completing all coursework, passing the candidacy examination, and being advanced to candidacy. Dissertation credits cannot be taken before advancement to candidacy.

This candidacy/qualifying examination requires both a written and an oral examination. The examination should be completed after a minimum of 33 credits in residence and no later than the sixth term of study (including the summer term). The student must meet the University's registration requirements at the time they take the exam. The student should register in the term in which they plan to take the qualifying examination. A candidacy examination may not be passed conditionally. A "Pass" on the examination cannot be made contingent upon other factors

such as the completion of additional coursework or the preparation of extra research projects. After a doctoral student is admitted to candidacy, continuous registration for at least three dissertation credits is required until the dissertation requirement is fulfilled.

Required Courses

The program requires a minimum of 75 credit hours beyond the baccalaureate, including a minimum of 15 hours of dissertation credits. There are three components to the College Ph.D. curriculum. The first component is a core curriculum shared across all public health majors (12 credit hours). The second component is specific to biostatistics and data analytics (48 credit hours) and doctoral seminar (0 credit hours). Students will attend meetings of the doctoral seminar during each fall and spring semester before dissertation completion. The third component consists of the dissertation, including 15 dissertation credit hours.

Shared Core Courses: (12 credits)

PHC 6601	Emerging Issues in Public Health	3
PHC 6091	Biostatistics 2	3
PHC 7705	Methods in Evidence Based Public Health	3
PHC 7981	Research Concepts and Proposal Development	3

Courses for a Major in Biostatistics and Data Analytics

A minimum of 48 credit hours which include 12 hours in Biostatistics Core Courses, 36 hours in Biostatistics Elective Courses or appropriate other electives as determined by the doctoral mentor, and 0 credits of doctoral seminar*

Department reserves the right to offer seminar for credit.

Biostatistics and Data Analytics Core Courses (12 credits)

PHC 7050	Advanced Biostatistics I	3
PHC 7051	Advanced Biostatistics II	3
PHC 7054	Advanced Biostatistics III	3
PHC 6099	R Computing for Health Sciences	3
OR		
PHC 6080	SAS Computing for Health Sciences	3

Biostatistics and Data Analytics Elective Courses (36 credits)

PHC 6056	Longitudinal Data Analysis	3
PHC 6059	Survival Data Analysis	3
PHC 6060	Principles and Approaches to Biostatistical Consulting	3
PHC 6064	Applied Statistical Methods for Discrete Data	3
PHC 6067	Probabilistic Graphical Models	3
PHC 6080	SAS Computing for Health Sciences	3
PHC 6084	Introduction to Bayesian Inference	3
PHC 6099	R Computing for Health Sciences	3
PHC 6701	Advanced R Computing	3
PHC 6931	Special Topics in Biostatistics	1-3
PHC 7064	Applied Structural Equation Modeling	3
PHC 7083	Advanced Bayesian Inference	3
PHC 7719	Multivariate Methods in Health Sciences Research	3
PHC 7982	Public Health Pre-Dissertation Research	1-6

Doctoral Seminar (0* credits)

PHC 7933	Seminar in Biostatistics	1-6
----------	--------------------------	-----

Students will be required to participate in the doctoral seminar every fall and spring semester from the start of the program. Seminar attendance carries 0 credits unless offered for credit by the department.

Dissertation Requirements: (15 credits)

PHC 7980	Dissertation	3
----------	--------------	---

Dietetics and Nutrition

Evelyn B. Enrione, *Interim Chair, Associate Professor, Director, Dietetic Internship, Director, MS Program*
Deborah M. Abel, *Clinical Associate Professor and Director, Graduate Certificate in Pediatric Nutrition*
Marianna Baum, *Professor*
Catherine Coccia, *Associate Professor and Director, PhD Program*
Julia D. C. Gonzalez Pampin, *Administrator Student & Alumni Services, Graduate Programs*
Fatma Huffman, *Professor*
Juan P. Liuzzi, *Associate Professor*
Marcia Magnus, *Associate Professor*
Joan A. Marn, *Clinical Instructor and Director, Didactic Program*
Vijaya Narayanan, *Clinical Associate Professor and Director, Nutrition Science Track*
Tania Rivera, *Clinical Assistant Professor*
Cristina Palacios, *Associate Professor*

Emeriti Faculty
Michele Ciccazzo, *Associate Professor and Dean Emeritus*
Katharine R. Curry, *Professor Emeritus*
Penelope S. Easton, *Professor Emeritus, Founding Chair*
Susan P. Himburg, *Professor Emeritus and Associate Vice-President, Academic Planning and Accountability*
Dian O. Weddle, *Associate Professor Emeritus*

The Program in Dietetics and Nutrition offers graduate studies leading to a Master of Science or a Doctor of Philosophy in Dietetics and Nutrition. The M.S. program is designed to meet the needs of professional practitioners as well as students with undergraduate degrees in related fields. The Ph.D. program prepares graduates to assume leadership roles in research, academia, government agencies, private industry and community-based organizations. Our doctoral program allows students to study and work side-by-side with nationally known educators, researchers, and practitioners who serve as mentors.

The Dietetic Internship (DI) Program has been granted Full Accreditation by the Accreditation Council for Education in Nutrition and Dietetics of the Academy of Nutrition and Dietetics (ACEND®). The address, telephone number and website for ACEND® is 120 South Riverside Plaza, Suite 2000; Chicago, IL 60606-6995; (312) 899-0040; <http://www.eatright.org/ACEND>.

Students who meet the admissions' criteria on the application and have completed a Didactic Program in Dietetics approved or accredited by ACEND® are eligible to apply to the DI. The Dietetic Internship Program does not grant credit for prior learning for any portion of the internship components. All interns must successfully complete the required courses, practica and number of supervised practice hours to receive a DI verification statement. For further information, please visit the website, <http://stempel.fiu.edu/academics/dietetics-and-nutrition/areas-of-study/internship-program/index.html>.

Master of Science in Dietetics and Nutrition

Admission Requirements

Minimum entrance requirements under current University Graduate School must be met. For the M.S. this includes a 'B' (3.0 on a 4.0 scale) average in all upper division coursework. Prospective applicants must have completed the following courses with a grade of "C" or higher:

CHM 1045	General Chemistry I	3
CHM 1045L	General Chemistry Lab I	1
CHM 2210	Organic Chemistry I	4
CHM 2210L	Organic Chemistry Lab I	1
CHM 2211	Organic Chemistry II	3
CHM 2211L	Organic Chemistry Lab II	1
	OR	
CHM 2200	Survey of Organic Chemistry	3
CHM 2200L	Survey of Organic Chemistry Lab	1
MCB 2000	Introductory Microbiology	3
MCB 2000L	Introductory Microbiology Lab	1
PCB 3702	Intermediate Human Physiology	3
	OR	
HSC 3549	Clinical Physiology for Health Professionals	3
HUN 2201	Principles of Nutrition	3
HUN 4240	Nutrition and Biochemistry	3
	OR	
BCH 3033	General Biochemistry	3

Students who are candidates for the Master of Science degree in Dietetics and Nutrition must complete a minimum of 37 semester hours of graduate study including at least 30 hours at this University. All course work must be recent enough to be relevant to the contemporary field of nutrition.

Graduate students wishing to become a Registered Dietitian may use the Department website for information and discuss their options with the Graduate Program Director.

Each student's program will be planned to support his/her career goals through consultation with an assigned faculty advisor. Retention and graduation in the Master's program requires maintenance of a 3.0 GPA and student may not receive more than 2 grades of "C+".

Course Requirements: (37 credits)

Nutrition Core: (9 credits)

Students must take at least three out of five courses. One course must be in macro-nutrients, one in micro-nutrients.

HUN 5245	Nutrition and Biochemistry	3
HUN 6307	Carbohydrates and Lipids	3
HUN 6327	Proteins	3
HUN 6335	Functions of Vitamins	3
HUN 6355	Minerals in Human Nutrition	3

Public Health Core: (3 credits)

PHC 6500	Foundation of Public Health Practice	3
----------	--------------------------------------	---

Research Core:

There are 3 options to meet the requirements for research:

Option 1: Research Courses

Option 2: Master's Project

Option 3: Master's Thesis

Research Courses (14 credits)

The research option provides the opportunity to develop an overview in the knowledge and skills of research primarily through secondary data analysis. Students who

select this option state a research problem and relevant research question which will be addressed through the creation of a research proposal. Students will write a report and present their topic to the class.

DIE 6568	Research I	3
DIE 6567	Research II	3
STA 6166	Statistical Methods in Research	3
	OR	
PHC 6052	Biostatistics I	3
DIE 6937	Graduate Seminar in Dietetics (<i>two semesters, 1 credit each</i>)	2
Recommended Elective		3

Masters Project Option (14 credits)

Master's Project is a non-thesis option. It affords the opportunity to conduct original applied research, program planning, or program evaluation on a specific dietetics and nutrition problem, topic, or existing program. Students who select the Master's Project must choose a major professor to direct their project. The advisor and the student may identify other resource persons to serve in an advisory capacity for the project. Before beginning the project, student must present a project concept proposal to the major professor. Student will write a project report and present the project in Seminar.

DIE 6568	Research I	3
DIE 6937	Graduate Seminar in Dietetics (<i>two semesters, 1 credit each</i>)	2
STA 6166	Statistical Methods in Research	3
	OR	
PHC 6052	Biostatistics I	3
DIE 6576	Project in Dietetics and Nutrition	6

Master Thesis Option (14 credits)

The thesis option provides the student the opportunity to conduct original research and to report this in a scholarly manuscript. This option is especially well suited to a student who plans on pursuing a PhD degree. Students who select this option must choose a major professor to act as the chair of their thesis committee and two additional committee members. Before beginning work on a thesis, a student must present a proposal to their committee for approval. The committee will direct and supervise the work carried out by the student. Student will write a report and present the research at an announced open forum.

DIE 6568	Research I	3
DIE 6937	Graduate Seminar in Dietetics (<i>two semesters, 1 credit each</i>)	2
DIE 6971	Thesis in Dietetics and Nutrition	6
STA 6166	Statistical Methods in Research	3
	OR	
PHC 6052	Biostatistics I	3

Recommended Electives¹: (11 credits)

DIE 5247	Trends in Therapeutic Nutrition	3
ANT 6469	Graduate Medical Anthropology	3
DIE 6128	Dietetics Administration & Management	3
DIE 6259	Management of Nutrition Services	3
DIE 6285	Pregnancy and Lactation	3
DIE 6286	Pediatric Obesity	3
DIE 6287	Pediatric Dysfunctional Eating	3
DIE 6368	Advanced Techniques in Dietetic	3

	Practice	3
DIE 6368L	Advanced Techniques in Dietetic Practice Lab	1
DIE 6929	Specialized Short Course in Dietetics and Nutrition	1
DIE 6935	Special Topics in Dietetics	3
FOS 6236	Food Toxicology and Food Safety	3
HUN 5123	Ethnic Influences on Nutrition and Food Habits	3
HUN 5195	International Nutrition: Problems, Policies and Planning	3
HUN 5245	Nutritional Biochemistry	3
HUN 5611	Nutrition Education in the Community	3
HUN 5621	Food, Nutrition and Communication	3
HUN 6248	Sports Nutrition	3
HUN 6254	Drug and Nutrient Interaction	3
HUN 6255	Nutrition and Wellness	3
HUN 6257	Physio/Psychology of Food Intake	3
HUN 6266	Nutritional Assessment	3
HUN 6295	Contemporary Issues in Food and Nutrition	3
HUN 6415	Pediatric Nutrition	3
HUN 6416	Advanced Pediatric Nutrition	3
HUN 6417	Nutrition for the High-Risk Infant and Newborn in Intensive Care Unit	3
HUN 6435	Nutrition and Aging	3
HUN 6522	Public Health Nutrition	3

¹Courses that are not listed as recommended electives may be taken as approved by advisor/Program Director.

Nutrition Science Track Accelerated Bachelor's/Master's Degree Pathway

The combined degree pathway provides an accelerated seamless course of study leading from the undergraduate freshman year to the conferral of the Master of Science in Dietetics & Nutrition. The accelerated BS/MS pathway will integrate undergraduate and graduate coursework. The BS in Dietetics & Nutrition (Nutrition Science Track) requires 120 credits. The MS in Dietetics & Nutrition is comprised of 37 credit hours. Ten graduate credits taken in the senior year of the baccalaureate program will count as elective credits toward the baccalaureate degree and toward course requirements for the master's degree in dietetics and nutrition. Completion of the remaining 27 graduate credits to earn the master's degree may occur in three semesters following undergraduate graduation.

Admission into the integrated BS/MS degree pathway in Dietetics & Nutrition requires the following:

- Enrollment in the nutrition science track of the undergraduate dietetics & nutrition degree program.
- Completion of 75 credits in the dietetics & nutrition bachelor's degree program and 15 credits in the major.
- Minimum overall GPA of 3.5
- Two Evaluation forms (preferably filled out by FIU Faculty)
- Statement of purpose (1 page double spaced) discussing interests in and benefits of the accelerated BS/MS program pathway. Concepts to include but not limited to, why are you choosing the BS/MS degree pathway, what

interests you about the pathway, and how will this pathway advance your career goals.

- Meet admission requirements for FIU graduate school and master's program in the Department of Dietetics & Nutrition.

Retention in the pathway necessitates meeting the requirements of the bachelor's and master's courses and programs. In addition to the program requirements of the undergraduate nutrition science track, students will be expected to complete the following 10 credits of graduate courses during their senior year.

1. Statistics Requirement (3 credits): STA 6166 Statistical Methods in Research OR PHC 6052 Biostatistics I OR STA 6176 Biostatistics
2. Public Health Requirement (3 credits): PHC 6500 Foundations of Public Health Practice
3. Community Nutrition (3 credits): HUN 6522 Public Health Nutrition
4. Seminar in Dietetics (1 credit): DIE 6937 Graduate Seminar in Dietetics & Nutrition

To earn a BS and MS in Dietetics and Nutrition, students must meet the graduation requirements of both degree programs.

Doctor of Philosophy in Dietetics and Nutrition

Ph.D. students must complete a minimum of 55 hours after M.S. degree or a minimum of 75 hours beyond the B.S. degree. The stated minimum does not include remedial coursework. Students who did not complete PHC 6500 Foundations of Public Health prior to admission to the PhD program must complete PHC 6500 as part of the program of studies. Coursework will be planned with the advisor and the dissertation committee to support the student's research interests and career goals and to ensure the program of student meets the 75-credit hour requirement. A 3.0 GPA must be maintained, and all courses needed for graduation must be completed with a grade of "C+" or higher.

Required Courses

Required Research & Methods Core: (15 credits)

(Prerequisites: PHC 6706 or equivalent; PHC 6709 or equivalent; PHC 6500 or equivalent)

PHC 6091	Biostatistics 2	3
PHC 6602	Theoretical Foundation of Health Promotion	3
PHC 6703	Epidemiology Methods: Experimental Design	3
	or	
	Approved Experimental or Clinical Research Methods Course	3
HUN 6266	Nutritional Assessment	3
PHC 7981	Research Concepts and Proposal Development ¹	3.
	¹ Designed for Public Health Students.	
DIE 7566	Research Concepts and Proposal Development ²	3
	² Designed for Dietetics Students	

Required Dietetics: (minimum 13 credits)³

HUN 7408	Nutrition Across the Lifespan	3
HUN 7523	Community Nutrition	3
HUN 7524	Nutrition Science and Implications for Community Health	3

³A program of study will be developed with the assistance of a major professor and dissertation committee. More than 13 credits may be required for the student to achieve competency in the research methods and content related to their dissertation research. Graduate courses outside of Dietetics & Nutrition may be taken as approved by dissertation committee.

Required Nutrition Sciences: (0-9 credits)⁴

HUN 6285	Nutrition & Metabolism I (CHO&Lipids)	3
HUN 6286	Nutrition & Metabolism II (Proteins)	3
HUN 6287	Nutrition & Metabolism III (Vit & Min)	3

⁴Do not need if equivalent previously taken at the graduate level.

Required Seminar: (minimum 3 credits)

DIE 6937	Graduate Seminar in Dietetics & Nutrition	1
	(course may be repeated 3 times, minimum)	

Required Electives: (minimum 0-9 credits)⁴

⁴Do not need if equivalent previously taken at the graduate level.

Required Dissertation: (minimum 15 credits)

DIE 7980	Dissertation	15

Master of Arts in Disaster Management

Dulce Suarez, *Adjunct Professor and Program Director*

Amy Aiken, *Adjunct Professor*

Charles Cyrille, *Adjunct Professor*

Jeffrey Byard, *Adjunct Professor*

Yoni Bock, *Adjunct Professor*

Jesse Spearo, *Adjunct Professor*

Joann Brown, *Adjunct Professor*

Dorothy L. Contiguglia-Akan, *Adjunct Professor*

Quentin Felty, *Adjunct Professor*

Michael Marx, *Adjunct Professor*

Ruben Almaguer, *Adjunct Professor*

Jesse Spearo, *Adjunct Professor*

The Master of Arts in Disaster Management is a 30- credit graduate program featuring coursework in emergency management and international humanitarian assistance. This one-year graduate program has been developed in response to the growing recognition and need for graduate level education in disaster management. The program's curriculum is interdisciplinary in nature and scope and designed to develop and improve the skills of disaster practitioners and those interested in entering the exciting field of disaster management.

The graduate degree is offered in an 11-month executive format culminating with a disaster field operations course whereby students will engage in a field simulated exercise focusing on the practical issues that arise in a disaster (rapid damage and public health assessment, shelter and site planning, field cluster sampling, water, sanitation and hygiene, personal security, food aid, and operational approaches to relations with the military).

Broadly speaking, the general learning outcome of the program is aligned with FEMA's Higher Education Core Competencies and is designed to take students beyond the core competencies needed by practitioners, to a deeper understanding of the reasons behind the practice and cultivate in them an ability to develop and implement integrated solutions to problems. Upon successful completion students will:

- possess sufficient knowledge of the history of disasters
- Able to recognize the ways sociocultural and geographic factors contribute to population vulnerability and how scientific evidence enhances decision-making in changing risk profiles
- be well-versed in the definition, mission, concepts and terminology applied in emergency management and international humanitarian assistance
- demonstrate a solid grounding in social, political, cultural and ecological issues in the social construction of disasters
- possess a firm grasp of the statutory and regulatory basis of disaster management
- identify and define areas of disaster management responsibility including mitigation opportunities, planning, training, exercises, warning, evacuation,

sheltering, damage assessment, feeding, and medical care

- recognize the importance of public, private and nongovernmental organization networking to facilitate collaboration and cooperation; understand the importance of communication, coordination and collaboration in disasters
- be able to identify the resources needed and how to obtain those resources to assist survivors
- describe the various hazards and the organization needed to reduce the threat
- identify the core requirements to effective planning
- demonstrate how to perform vulnerability analysis be able to recognize and apply the appropriate decision making models; be able to isolate and apply strategic planning
- demonstrate recognition of the social and ethical considerations unique to the practice of disaster management.
- be familiar with crisis communication language.
- deliver press briefings and learn how to anticipate questions the press are likely to ask disaster and emergency managers.
- understand the variety of disaster-related health consequences that may arise during and after and event, as well as how to mitigate their impact

Admission Requirements

All applicants for graduate study at FIU must have a:

1. Baccalaureate degree from an accredited institution for higher education, or equivalent degree from a foreign institution.
2. 3.0 undergraduate GPA.
3. Foreign students must submit official Test of English as a Foreign Language (TOEFL) scores and must have a minimum score: 550 Paper and Pencil, 213 Computer-based, 80 Internet-based.

The above admission requirements are minimums, and not all students meeting them are assured admission. Students with a grade-point average below the above minimums may still apply and request a waiver of those scores. The student must provide an explanation of why the waiver should be approved.

Graduation Requirements

In order to graduate, a student must maintain a 3.0 GPA and complete satisfactorily the prescribed curriculum.

Required Courses

This 30-credit professional master's program requires completion of the following 10 courses:

FES 6846	Comparative Disaster Management Systems	3
FES 6858	Crisis Communications	3
FES 6826	Disaster Preparedness and Planning Methodologies	3
SYG 6932	Special Topics in Disaster Studies	3
FES 6857	Introduction to Vulnerability Analysis and Hazard Mitigation	3
FES 6806	Disaster Response and Recovery	3
FES 6848	Disaster Health Readiness	3
FES 6847	Foundations in Humanitarian Assistance	

	and Coordination	3
FES 6805	Disaster Field Operations	3
PHC 6374	Environmental Disasters and Human Health	3

FES 6847	Foundations in Humanitarian Assistance & Coordination	3
FES 6805	Disaster Field Operations	3
PHC 6374	Environmental Disasters & Human Health	3

Note: Courses not included on the approved list of required courses may count toward meeting the requirement of this degree only with the permission of the Director or Dean.

Note: Courses not included on the approved list of required courses may count toward meeting the requirement of this degree only with the permission of the Executive Director or Dean.

Hybrid Washington DC Master of Arts in Disaster Management

The hybrid Washington DC Master of Arts in Disaster Management consists of the same 30-credit curriculum focusing studies in emergency preparedness, disaster management, and humanitarian assistance as the face-to-face and online programs. Broadly speaking, the general learning outcome of the program is aligned with FEMA's Higher Education Core Competencies and is designed to take students beyond the core competencies needed by practitioners, to a deeper understanding of the reasons behind the practice and cultivate in them an ability to develop and implement integrated solutions to problems. The hybrid program consists of approximately 25% course meetings in the FIU facility in Washington, DC, 70% online course work and 5% participation at a three-day disaster field exercise held in Miami, Florida at the culmination of the program.

Admission Requirements

- All applicants for graduate study at FIU must have a:
1. Baccalaureate degree from an accredited institution for higher education, or equivalent degree from a foreign institution.
 2. 3.0 undergraduate GPA.
 3. Foreign students must submit official Test of English as a Foreign Language (TOEFL) scores and must have minimum scores: 550 Paper and Pencil, 213 Computer-based, 80 Internet-based.

The above admission requirements are minimums, and not all students meeting them are assured admission. Students with a grade-point average below the above minimums may still apply and request a waiver of those scores. The student must provide an explanation of why the waiver should be approved.

Graduation Requirements

In order to graduate, a student must maintain a 3.0 GPA and complete satisfactorily the prescribed curriculum.

Required Courses

This 30-credit professional master's program requires completion of the following 10 courses:

FES 6846	Comparative Disaster Management Systems	3
FES 6858	Crisis Communications	3
FES 6826	Disaster Preparedness & Planning Methodologies	3
SYG 6932	Special Topics in Disaster Studies	3
FES 6857	Introduction to Vulnerability Analysis & Hazard Mitigation	3
FES 6806	Disaster Response & Recovery	3
FES 6848	Disaster Health Readiness	3

Online Master of Arts in Disaster Management

The online Master of Arts in Disaster Management is a 30-credit graduate program featuring course work in emergency preparedness, disaster management and humanitarian assistance. This one-year graduate program has been developed in response to the growing recognition and need for graduate level education in disaster management. The program's curriculum is interdisciplinary in nature and scope and designed to develop and improve the skills of disaster practitioners and those interested in entering the exciting field of disaster management. Broadly speaking, the general learning outcome of the program is aligned with FEMA's Higher Education Core Competencies and is designed to take students beyond the core competencies needed by practitioners, to a deeper understanding of the reasons behind the practice and cultivate in them an ability to develop and implement integrated solutions to problems. Students enrolled in the online program will be required to travel to Miami to participate in a 3-day disaster field exercise, which is part of the Disaster Field Operations course (FES 6805).

Admission Requirements

- All applicants for graduate study at FIU must have a:
4. Baccalaureate degree from an accredited institution for higher education, or equivalent degree from a foreign institution.
 5. 3.0 undergraduate GPA.
 6. Foreign students must submit official Test of English as a Foreign Language (TOEFL) scores and must have a minimum scores: 550 Paper and Pencil, 213 Computer-based, 80 Internet-based.

The above admission requirements are minimums, and not all students meeting them are assured admission. Students with a grade-point average below the above minimums may still apply and request a waiver of those scores. The student must provide an explanation of why the waiver should be approved.

Graduation Requirements

In order to graduate, a student must maintain a 3.0 GPA and complete satisfactorily the prescribed curriculum.

Required Courses

This 30-credit professional master's program requires completion of the following 10 courses:

FES 6846	Comparative Disaster Management Systems	3
FES 6826	Disaster Preparedness and Planning Methodologies	3
FES 6857	Introduction to Vulnerability Analysis	

	and Hazard Mitigation	3
FES 6806	Disaster Response and Recovery	3
FES 6848	Disaster Health Readiness	3
FES 6847	Foundations in Humanitarian Assistance and Coordination	3
FES 6805	Disaster Field Operations	3
FES 6858	Crisis Communication	3
PHC 6374	Environmental Disasters and Human Health	3
SYG 6932	Special Topics in Disaster Studies	3

Note: Courses not included on the approved list of required courses may count toward meeting the requirement of this degree only with the permission of the Director or Dean.

Environmental Health Sciences

Kim Tieu, Professor and Chair

Diana Azzam, Assistant Professor

Jeremy W. Chambers, Associate Professor and Doctoral Program Director

Alok Deoraj, Associate Teaching Professor and Graduate Program Director (MPH)

Quentin Felty, Associate Professor

Tomás R. Guilarte, Professor and Dean, Robert Stempel College of Public Health and Social Work

Jason Richardson, Professor and Associate Dean of Research

Deodutta Roy, Professor

Stanislaw Wnuk, Professor and Associate Dean of Graduate Education

Muhammad Hossain, Assistant Professor

Roberto Lucchini, Professor

Xugang Xia, Professor and Associate Vice President of Translational Neuroscience at the FIU-Center for Translational Science (FIU-CTS)

Hongxia Zhou, Professor (FIU-CTS)

Stephen Black, Professor and Associate Vice President for translational research (FIU-CTS)

Ting Wang, Professor (FIU-CTS)

Haiwei Gu, Associate Professor (FIU-CTS)

Affiliated Faculty

Samir Elmir, Director, Environmental Health and Engineering, Miami-Dade County Health Department

Timothy Allen, Associate Professor, Cognitive Neuroscience, FIU

Shimelis Setegn, Senior Scientist at South Florida Water Management District

Fidias E. Leon-Sarmiento, Associate Professor, Dept. of Neurosciences, Baptist Hospital South Florida

Jesus Olivero-Verbel, University of Cartagena

The Department offers a Graduate Certificate in Environmental Health Sciences (EHS), a Master's degree in Public Health (MPH) with a major in EHS and MPH in EHS with a concentration in Brain, Behavior and the Environment (BBE). The department also offers a Ph.D. in Public Health with a major in the EHS with concentrations in Environmental Toxicology or Brain, Behavior and the Environment (BBE).

MPH in the Environmental Health Sciences Major

The graduate training programs in the Environmental Health Sciences are both interdisciplinary and interdepartmental. The Department of Environmental Health Sciences performs high quality mechanism- and evidence-based translational research, which impacts our teaching and training for future Environmental Health leaders. Our multidisciplinary EHS Faculty conduct world class research to investigate and prevent human diseases caused by environmental exposure, that goes beyond the traditional focus on hazardous agents.

Admission Requirements

Applicants to the MPH program with a major in Environmental Health Sciences (EHS) must meet the following requirements:

1. A Bachelor's (or Master's) degree in biology, chemistry, physics, nursing, medicine, engineering, or other appropriate field with at least one (1) undergraduate biology, and one (1) undergraduate chemistry course from an accredited college or university or, in the case of foreign students, an institution recognized in its own country as preparing students for further study at the graduate level.
2. A minimum 3.0 GPA (on the last 60 undergraduate hours). In addition, applicants are required to submit 1) a current resume; and 2) a written statement of purpose (career goals).
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
4. Submission of official GRE scores is optional. If a student decides to submit GRE scores, the scores must be less than 5 years old.

Curriculum and Course Requirements

For the MPH with a major in Environmental Health Sciences, ALL students must complete the MPH core (15 credits) and departmental core courses (12 credits), EHS selected elective courses (12 credits), a Practicum (3 credits) and Integrative Seminar (3 credits) course.

MPH Core Curriculum: (15 credits)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3

Major in Environmental Health Sciences Core

Courses: (12 credits)

PHC 6310	Environmental Toxicology	3
PHC 6311	Environmental Health Risk Assessment	3
PHC 6355	Environmental Health and Safety	3
PHC 6374	Environmental Disasters & Human Health	3

Elective Courses: (12 credits)

PHC 6312C	Health Impacts of Air, Water, and Land Pollution	3
PHC 6422	Regulatory Aspects of Environmental Health Sciences	3
PHC 6442	Global Environmental Public Health	3
PHC 6538	Gene & Environment Interaction	3
PHC 6907	Independent Study in Public Health	1-3
PHC 6920	Special Topics in Environmental Health Sciences	3
PHC 6380	Introduction to Neurotoxicology	3
PHC 6730C	Neurotoxicology Research Methods	3
PHC 6382C	Neuropharmacology	3
PHC 6383C	Neurobehavioral Techniques	3

Practicum and Culminating Experience: (6 credits)

PHC 6945	Practicum in Public Health	3
----------	----------------------------	---

PHC 6930C Integrative Seminar in Public Health 3

PHC 6945 (Practicum) and PHC 6930C (culminating experience) are both required for all MPH students. The Practicum may be taken after completing a minimum of 30 hours, including all core courses. The Practicum may be waived if the student has at least 3 years of relevant practice experience working in a public health practice setting. The waiver request is prepared and submitted by the student, through their Faculty Advisor and Department Chair, for final approval/disapproval by the Academic Public Health Director. If the Practicum requirement is waived, the student will need to substitute 3 additional approved hours so that the total curriculum hour requirement of 45 is met. MPH students are expected to complete PHC 6930C Integrative Seminar in Public Health during their last semester in the program.

MPH in the Environmental Health Sciences with a Concentration in Brain, Behavior and the Environment

The total credit requirement for the MPH is 45 credits. The BBE concentration is part of the MPH Environmental Health Sciences major, which includes five courses (15) credits in the MPH Core Curriculum, four courses (12 credits) in the EHS major, and two courses (6 credits) in the Practicum and Culminating Experience. The other 12 credits will be from the BBE concentration required coursework.

MPH Core Curriculum: (15 credits)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3

Major in Environmental Health Sciences Core Courses: (12 credits)

PHC 6310	Environmental Toxicology	3
PHC 6311	Environmental Health Risk Assessment	3
PHC 6355	Environmental Health and Safety	3
PHC 6374	Environmental Disasters & Human Health	3

Concentration in Brain, Behavior and the Environment Required Courses: (12 credits)

PHC 6380	Introduction to Neurotoxicology	3
PHC 6730C	Neurotoxicology Research Methods	3
PHC 6382C	Neuropharmacology	3
PHC 6283C	Neurobehavioral Techniques	3

Practicum and Culminating Experience: (6 credits)

PHC 6945	Practicum in Public Health	3
PHC 6930C	Integrative Seminar in Public Health	3

Doctor of Philosophy in Public Health Major in Environmental Health Sciences with a Concentration in Environmental

Toxicology or Brain, Behavior and the Environment

The Doctor of Philosophy (Ph.D.) in Public Health is available with a major in Environmental Health Sciences, with concentrations either in: Environmental Toxicology, or Brain, Behavior and the Environment. Students will be expected to demonstrate significant research capacity by completing 60 credits beyond the Master's degree and through the writing of an original dissertation.

Doctoral Admissions

Applicants must meet the University's general graduate admission requirements:

1. A four-year bachelor's degree or equivalent from a nationally accredited institution or, in the case of foreign students, from a well established institution of higher learning that is authorized to grant degrees by appropriate authorities in that country.
2. A minimum of a 3.0 GPA, "B" average, in the last 60 upper-division undergraduate coursework, or a graduate degree from a nationally accredited institution.
3. Official GRE scores (scores must be no more than five years old).
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or a 6.5 overall on the IELTS is required.

The College also requires:

1. A current resumé.
2. Three letters of recommendation.
3. A writing sample (Master's thesis or research project, published manuscript, or some other document which demonstrates writing ability).
4. A personal statement of research interest.

Potential applicants are strongly encouraged to contact individual faculty to discuss common research interests since admission decisions require identification of a faculty mentor, and evaluation of fit to the program.

Doctoral Requirements

A student may enroll for dissertation credits after completing all coursework, passing the candidacy examination, and being advanced to candidacy. Dissertation credits cannot be taken before advancement to candidacy.

The candidacy examination will be prepared and graded by a committee consisting of a minimum of three faculty members. Admission to candidacy requires that a majority of the committee members agree that the student passed the examination. A candidacy examination may not be passed conditionally. A "Pass" on the examination cannot be made contingent upon other factors such as the completion of additional coursework or the preparation of extra research projects. Students will be allowed only two attempts to pass the candidacy examination.

After a doctoral student is admitted to candidacy, continuous registration for at least 3 dissertation credit hours each semester (including the summer term) is required until the dissertation requirement is fulfilled.

Required Courses

The major requires a minimum of 75 credit hours beyond the baccalaureate which includes a minimum of credit hours of dissertation credits. There are three components to the Ph.D. curriculum. The first is a core curriculum shared across all majors (12 credit hours). The second component is specific to the major (9 credit hours). The third component is specific to the concentration (12 credit hours), followed by content and secondary field courses (to total a minimum of 18 required credit hours). The fourth component consists of the dissertation, including a minimum of 15 dissertation credit hours. The remaining credit hours to add up to the minimum university requirement of 75 credits will be determined in consultation with the student's advisor.

Shared Core Courses: (12 credits)

PHC 6601	Emerging Issues in Public Health	3
PHC 6091	Biostatistics 2 (or other approved Quantitative Methods course)	3
PHC 7981	Research Concepts and Proposal Development	3
PHC 7705	Methods in Evidence Based Public Health	3

Courses for Environmental Health Sciences Major requires 9 hours of EHS Major Core Courses; 12 hours of concentration courses, and 9 hours of content and secondary field courses. Overall this must include a minimum of 9 hours at the 7000 level.

Environmental Health Sciences Major Core Courses: (9 credits)

PHC 6328	Molecular & Cellular Toxicology	4
PHC 6329	Biomarkers	3
PHC 7732C	Research Ethics & Scientific Integrity	1
PHC 6921	Environmental Health Sciences Seminar	1

Environmental Toxicology Concentration: (12 credits)

PHC 7300	Biological Basis of Environmental Diseases	4
PHC 7327	Emerging issues in the Environmental Health Sciences	2
PHC 7374	Organ-specific Toxicology	4
PHC 7713	Advanced Environmental Toxicology Research Methods	2

Brain Behavior and the Environment Concentration: (12 credits)

PHC 7381C	Neuroscience	4
PHC 7731C	Advanced Neurotoxicology Research Methods	2
PHC 7384	Advanced Neurotoxicology	4
PHC 7385C	Emerging Issues in Neurotoxicology	2

Content Courses: (a minimum of 9 credits are required)

At least 9 credit hours of approved content courses. Content course may be selected from the approved EHS courses identified below, unless otherwise indicated.

PHC 6310	Environmental Toxicology	3
PHC 6311	Environmental Health Risk Assessment	3
PHC 6312C	Health Impacts of Air, Water, and Land Pollution	3
PHC 6355	Environmental Health and Safety	3
PHC 6374	Environmental Disasters & Human Health	3

PHC 6442	Global Environmental Public Health	3
PHC 6422	Regulatory Aspects of Environmental Health Sciences	3
PHC 6538	Gene & Environment Interaction	3
PHC 6907	Independent Study in Public Health	3
PHC 6914L	Current Topics in Environmental Health Sciences Research Lab	1-9
PHC 7917	Pre Doctoral Research	1-6
PHC 6920	Special Topics in Environmental Health Sciences	3
PHC 6380	Introduction to Neurotoxicology	3
PHC 6730C	Neurotoxicology Research Methods	3
PHC 6382C	Neuropharmacology	3
PHC 6383C	Neurobehavioral Techniques	3
PHC 7300	Biological Basis of Environmental Diseases	4
PHC 7327	Emerging Issues in the Environmental Health Sciences	2
PHC 7374	Organ-Specific Toxicology	4
PHC 7713	Advanced Environmental Toxicology Research Methods	2
PHC 7381C	Neuroscience	4
PHC 7731C	Advanced Neurotoxicology Research Methods	2
PHC 7384	Advanced Neurotoxicology	4
PHC 7385C	Emerging Issues in Neurotoxicology	2

Secondary Field Courses: (a minimum of 9 credits are required)

At least 9 credit hours of approved secondary field courses. Secondary field courses may be selected from approved graduate school courses in consultation with the student's academic advisor.

Dissertation Requirements: (a minimum of 15 credits are required)

PHC 7980	Dissertation	15

The Department offers a Graduate Certificate in Epidemiology, a Master's degree in Public Health with a major in Epidemiology; a Master's degree in Public Health with major in Epidemiology with a concentration in Infectious Disease Epidemiology; and a Ph.D. in Public Health with a major in Epidemiology.

MPH in Epidemiology

The courses prepare students to investigate the distribution of diseases and health conditions in the population, disease outbreaks, and the factors determining the distribution.

Admission Requirements

Applicants must meet the University's general graduate admission requirements:

1. A Bachelor's degree or equivalent from an accredited college or university or, in the case of foreign students, an institution recognized in its own country as preparing students for further study at the graduate level.
2. A minimum 3.0 GPA on the last 60 undergraduate hours. In addition, applicants are required to submit 1) a current resume; and 2) a written statement of purpose (career goals). Applicants are also required to submit three letters of recommendation.
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required. Students with diverse backgrounds are encouraged to apply.
4. Submission of official GRE scores is optional. If a student decides to submit GRE scores, the scores must be less than 5 years old.

MPH Core Curriculum: (15 credits)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3

Major in Epidemiology: (15 credits)

PHC 6002	Infectious Disease Epidemiology	3
PHC 6003	Chronic Disease Epidemiology	3
	or	
PHC 6008	Cardiovascular Disease Epidemiology	3
PHC 6013	Epidemiology II: Observational Design	3
PHC 6016	Social Epidemiology	3
	or	
PHC 6441	Epidemiology of Health Disparity	3
PHC 6091	Biostatistics II	3

Electives for Epidemiology: (9 credits)*

PHC 6001	Environmental and Occupational Epidemiology	3
PHC 6004	Injury Epidemiology and Prevention	3
PHC 6007	Cancer Epidemiology	3
PHC 6009	AIDS Epidemiology and Control	3
PHC 6012	Current Research in Epidemiology	3
PHC 6014	Behavioral Epidemiology	3
PHC 6020	Clinical Epidemiology	3
PHC 6033	Mechanism of Complex Disease in Public Health	3
PHC 6055	Data Management and Epidemiologic Analysis Using SAS/SPSS	3
PHC 6062	Systematic Reviews and Meta-Analysis	3
PHC 6064	Applied Statistical Methods for Discrete Data	3
PHC 6251	Disaster and Emergency Epidemiology	3
PHC 6443	Ethical Issues in Public Health	3
PHC 6510	Advanced Infectious and Tropical Disease Epidemiology	3
PHC 6536	Health Demography	3
PHC 6591	Reproductive Health Epidemiology	3
PHC 6703	Epidemiology Methods: Experimental Design	3
PHC 6715	Survey Research in Public Health	3
PHC 6762	International Public Health	3
PHC 6907	Independent Study in Public Health	1-3
PHC 6934	Scientific Writing and Oral Presentation in Epidemiology	3
PHC 6595	Genetic Epidemiology	3
PHC 6034	Intermediate Epidemiology	3

* or any other advisor-approved elective, including those offered as Major in Epidemiology courses.

Practicum and Culminating Experience: (6 credits)

PHC 6945	Practicum in Public Health	3
PHC 6930C	Integrative Seminar in Public Health	3

PHC 6945 (Practicum) and PHC 6930C (culminating experience) are both required for all MPH students. The Practicum may be taken after completing a minimum of 30 hours, including all core courses. The Practicum may be waived if the student has at least 3 years of relevant practice experience working in a public health practice setting. The waiver request is prepared and submitted by the student, through their Faculty Advisor and Department Chair, for final approval/disapproval by the Academic Public Health Director. If the Practicum requirement is waived, the student will need to substitute 3 additional approved hours so that the total curriculum hour requirement of 45 is met. MPH students are expected to complete PHC 6930c Integrative Seminar in Public Health during their last semester in the program.

MPH in Epidemiology with a Concentration in Infectious Disease Epidemiology

The Master of Public Health Program major in Epidemiology with a concentration in Infectious Disease Epidemiology (INFDISEPI) is designed to prepare students to address the challenge of emerging and reemerging infectious diseases, especially for tropical locations such as Miami and South Florida.

Admission Requirements

Applicants must meet the University's general graduate admission requirements:

1. A Bachelor's degree or equivalent from an accredited college or university or, in the case of foreign students, an institution recognized in its own country as preparing students for further study at the graduate level.
2. A minimum 3.0 GPA on the last 60 undergraduate hours. In addition, applicants are required to submit 1) a current resume; and 2) a written statement of purpose (career goals). Applicants are also required to submit three letters of recommendation.
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required. Students with diverse backgrounds are encouraged to apply.
4. Submission of official GRE scores is optional. If a student decides to submit GRE scores, the scores must be less than 5 years old.

MPH Core Curriculum: (15 credits)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3

Major in Epidemiology: (15 credits)

PHC 6002	Infectious Disease Epidemiology	3
PHC 6003	Chronic Disease Epidemiology	3
	or	
PHC 6008	Cardiovascular Disease Epidemiology	3
PHC 6013	Epidemiology II: Observational Design	3
PHC 6016	Social Epidemiology	3
	or	
PHC 6441	Epidemiology of Health Disparity	3
PHC 6091	Biostatistics II	3

Concentration in Infectious Disease Epidemiology (9 credits)

PHC 6009	AIDS Epidemiology and Control	3
PHC 6510	Advanced Infectious and Tropical Disease Epidemiology	3
PHC 6591	Reproductive Health Epidemiology	3

Practicum and Culminating Experience: (6 credits)

PHC 6945	Practicum in Public Health	3
PHC 6930C	Integrative Seminar in Public Health	3

PHC 6945 (Practicum) and PHC 6930C (culminating experience) are both required for all MPH students. The Practicum may be taken after completing a minimum of 30 hours, including all core courses. The Practicum may be waived if the student has at least 3 years of relevant

practice experience working in a public health practice setting. The waiver request is prepared and submitted by the student, through their Faculty Advisor and Department Chair, for final approval/disapproval by the Academic Public Health Director. If the Practicum requirement is waived, the student will need to substitute 3 additional approved hours so that the total curriculum hour requirement of 45 is met. MPH students are expected to complete PHC 6930C Integrative Seminar in Public Health during their last semester in the program.

Combined MD and MPH - major in Epidemiology Degree Pathway

The Herbert Wertheim College of Medicine (HWCOM) and the Robert Stempel College of Public Health and Social Work (Stempel College) offer a combined degree pathway of a Master's of Public Health with a concentration in Epidemiology and a Doctor of Medicine.

An MPH is a professional public health degree emphasizing the understanding of population health and disease. The MD degree is a clinical medicine degree focusing on patient-centered clinical care.

Students may apply to the combined pathway in their third year of medical study. Each College will independently review and admit applicants to their programs. Only students admitted to both programs will enroll in classes in the combined program. Students will be expected to complete 45 credits for the MPH and all requirements for the MD degree.

Combined degree pathway students complete the first three years of coursework in the MD degree program at HWCOM. At the beginning of the fourth period of study of the MD degree program curriculum, students admitted to the combined degree pathway pause their medical studies and begin classes as part of the MPH program. Classes in the MPH program are taken during the fall, spring, and summer semesters of the medical student's fourth year of study. During this time, students complete 36 hours of course work in the MPH program. Nine credits taken through HWCOM count toward the 45 credits required for the MPH degree.

At the beginning of the fifth year, students resume study in Period 4 of the MD degree program curriculum. Students who successfully complete all requirements graduate with both degrees at the end of the 5 years.

Admissions Process:

Medical students in the summer or fall of their third (M3) year (prior to November 1st) must make a formal application to the COM MPH Application Committee.

This application will include a personal statement. They must also get approval from the MSEPC and the Executive Associate Dean for Academic Affairs prior to applying to the MPH program.

Applications will only then be reviewed by the MPH - Epidemiology program admission committee. Applicants to the combined MD/MPH pathway will not be required to submit GRE scores. MCAT scores will be accepted.

Doctor of Philosophy in Public Health Major in Epidemiology

The Doctor of Philosophy (Ph.D.) in Public Health is available with a major in Epidemiology. Students will be

expected to demonstrate significant research capacity by completing 60 credits beyond the Master's degree and through the writing of an original dissertation.

Doctoral Admissions

Applicants must meet the University's general graduate admission requirements:

1. A four-year bachelor's degree or equivalent from a nationally accredited institution or, in the case of foreign students, from a well-established institution of higher learning that is authorized to grant degrees by appropriate authorities in that country.
2. A minimum of a 3.0 GPA, "B" average, in the last 60 upper-division undergraduate coursework, or a graduate degree from a nationally accredited institution.
3. Official GRE scores (scores must be no more than five years old).
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or a 6.5 overall on the IELTS is required.

The College also requires:

1. A current resume.
2. Three letters of recommendation.
3. A writing sample (master's thesis or project, published manuscript, or other).
4. A personal statement of interest.

Potential applicants are strongly encouraged to contact individual faculty to discuss common research interests since admission decisions may require identification of a potential faculty mentor.

Doctoral Requirements

A student may enroll for dissertation credits after completing all coursework, passing the candidacy examination, and being advanced to candidacy. Dissertation credits cannot be taken before advancement to candidacy.

The candidacy examination will be prepared and graded by a committee consisting of a minimum of three faculty members. Admission to candidacy requires that a majority of the committee members agree that the student passed the examination.

After a doctoral student is admitted to candidacy, continuous registration for at least 3 dissertation credit hours each semester (including the summer term) is required until the dissertation requirement is fulfilled.

Required Courses

The program requires a minimum of 75 credit hours beyond the baccalaureate which includes a minimum of 15 hours of dissertation credits. There are three components to the College Ph.D. curriculum. The first is a core curriculum shared across all majors (12 credit hours). The second component is specific to the major (27 credit hours) and secondary field courses (12 credit hours). The third component consists of the dissertation, including a minimum of 15 dissertation credit hours. The remaining credit hours to add up to the minimum university requirement of 75 credits will be determined in consultation with the student's advisor.

Shared Core Courses: (12 credit hours required)

PHC 6091	Biostatistics 2	3
PHC 6601	Emerging Issues in Public Health	3
PHC 7705	Methods in Evidence-Based Public Health	3
PHC 7981	Research Concepts and Proposal Development	3

Courses for a Major in Epidemiology A minimum of 27 hours which include a minimum of 15 hours in methods courses and 12 hours (with a minimum of 9 at the 7000 level) in content courses.

Methods Courses: (15 credits hours required)

The following two methods courses are required (6 credits)

PHC 7011	Advanced Current Research in Epidemiology	3
PHC 7015	Advanced Research Methods: Experimental Design	3

Three additional methods courses are chosen from the below list (9 credits)

PHC 6056	Longitudinal Health Data Analysis	3
PHC 6059	Survival Data Analysis	3
PHC 6064	Applied Statistical Methods for Discrete Data	3
PHC 6080	SAS Computing for The Health Sciences	3
PHC 6099	R Computing for Health Sciences	3
PHC 7719	Quantitative Multivariate Analysis in Health Sciences Research	3

Content Courses: (12 credit hours required from the list of courses below)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6001	Environmental and Occupational Epidemiology	3
PHC 6002	Infectious Disease Epidemiology	3
PHC 6003	Chronic Disease Epidemiology	3
PHC 6004	Injury Epidemiology and Prevention	3
PHC 6007	Cancer Epidemiology	3
PHC 6008	Cardiovascular Disease Epidemiology	3
PHC 6009	AIDS Epidemiology and Control	3
PHC 6013	Epidemiology II: Observational Design	3
PHC 6014	Behavioral Epidemiology	3
PHC 6016	Social Epidemiology	3
PHC 6020	Clinical Epidemiology	3
PHC 6062	Systematic Reviews and Meta-Analysis	3
PHC 6251	Disaster and Emergency Epidemiology	3
PHC 6441	Epidemiology of Health Disparity	3
PHC 6443	Ethical Issues in Public Health	3
PHC 6510	Advanced Infectious and Tropical Disease Epidemiology	3
PHC 6536	Health Demography	3
PHC 6591	Reproductive Health Epidemiology	3
PHC 6715	Survey Research in Public Health	3
PHC 6762	International Public Health	3
PHC 6907	Independent Study: Public Health	3
PHC 6934	Scientific Writing and Oral Presentation in Epidemiology	3
PHC 6939	Special Topics in Cardiovascular Disease Epidemiology	3
PHC 7017	Advanced Epidemiology of Health Disparity	3
PHC 7162	Grant Writing in Public Health	3
PHC 7982	Public Health Pre-Dissertation	3

	Research	3
PHC 6595	Genetic Epidemiology	3
PHC 7606	Tobacco Use: Causes, Consequences, and Control	3

Secondary Field Courses: (12 credits required)

At least 12 credit hours of approved secondary field courses. Secondary field courses are selected from approved graduate school courses in consultation with academic advisor.

Dissertation Requirements: (A minimum of 15 dissertation credit hours required)

PHC 7980	Dissertation	15

Health Policy and Management

Alejandro Arrieta, *Interim Chair, Associate Professor and PhD Program Director*

Carlos Espinal, *Research Professor*

Andria Rusk, *Assistant Research Professor*

Donna Davis, *Assistant Teaching Professor and MPH Program Director*

Gilbert Ramirez, *Visiting Professor*

Jessica L. Adler, *Associate Professor, Affiliate Faculty*

Colleen Nolan, *Adjunct Instructor*

Grace Litano, *Adjunct Instructor*

Osmel Delgado, *Adjunct Instructor*

Fredrick Newman, *Professor Emeritus*

The Department of Health Policy and Management is focused on training masters graduates to have careers in health care management, health economics and population health management. Doctoral students will train in health systems research to pursue careers in research, health policy and health system design. Students not interested in a degree can obtain a certificate in health policy or health economics.

MPH in Health Policy and Management

This degree is currently not admitting new students.

The masters in Health Policy and Management provides students with core skills in management, policy analysis, public health economics and how to use evidence in decision-making. Students get specialized training in continuous quality improvement (with an option of obtaining the Health Care Professional Quality Improvement Certification), health system budget finance, and risk management in health systems (supporting getting the state of Florida health care risk management certification). Students completing this masters are positioned to start or advance careers in hospitals or health systems. Students are required to complete 15 core MPH credits, 15 core HPM credits, 9 elective credits specific to work in hospitals and health systems, a 3 credit practicum and a 3 credit capstone course for a total of 45 credits.

Admission Requirements

Applicants must meet the University's general graduate admission requirements:

1. A Bachelor's degree or equivalent from an accredited college or university or, in the case of foreign students, an institution recognized in its own country as preparing students for further study at the graduate level.
2. A minimum 3.0 GPA on the last 60 undergraduate hours. In addition, applicants are required to submit 1) a current resume; and 2) a written statement of purpose (career goals). Applicants are also encouraged to submit three letters of recommendation.
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the

iBT TOEFL or 6.5 overall on the IELTS is required. Students with diverse backgrounds are encouraged to apply.

4. Submission of official GRE scores are optional. If a student decides to submit GRE scores, the scores must be less than 5 years old.

MPH Core Curriculum: (15 credits)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3

Major in Health Policy and Management: (15 credits)

PHC 6104C	Public Health Management and Leadership	3
PHC 6154C	Evidence Synthesis Applied to Clinical Settings and Health Policy-Making	3
PHC 6155C	Health Policy Analysis	3
PHC 6430C	Public Health Economics	3
PHC 6148	Strategic Planning for Healthcare Organizations	3

Concentration Courses: (9 credits)

For students with demonstrated experience in quality improvement, health care finance or risk management, other public health courses may be substituted with advisor approval.

PHC 6118	Population Health Management and Improvement	3
PHC 6160	Public Health Budgeting and Financial Management	3
PHC 6147	Continuous Quality Improvement in Healthcare Organization	3

Practicum and Culminating Experience: (6 credits)

PHC 6945	Practicum in Public Health	3
PHC 6930C	Integrative Seminar in Public Health	3

PHC 6945 (Practicum) and PHC 6930C (culminating experience) are both required for all MPH students. The Practicum may be taken after completing a minimum of 30 hours, including all core courses. The Practicum may be waived if the student has at least 3 years of relevant practice experience working in a public health practice setting. The waiver request is prepared and submitted by the student, through their Faculty Advisor and Department Chair, for final approval/disapproval by the Academic Public Health Director. If the Practicum requirement is waived, the student will need to substitute 3 additional approved hours so that the total curriculum hour requirement of 45 is met. MPH students are expected to complete PHC 6930c Integrative Seminar in Public Health during their last semester in the program.

For additional and updated information about degrees offered, entrance requirements, and services, please visit our website:

<http://stempel.fiu.edu/students/advising/index.html>.

Doctor of Philosophy in Public Health Major in Health Systems Research

This degree is currently not admitting new students.

The Doctor of Philosophy (Ph.D.) in Public Health is available with a major in Health Systems Research. Students will be expected to demonstrate significant research capacity through the writing of an original dissertation.

Doctoral Admissions

Applicants must meet the University's general graduate admission requirements:

1. A four-year bachelor's degree or equivalent from a nationally accredited institution or, in the case of foreign students, from a well-established institution of higher learning that is authorized to grant degrees by appropriate authorities in that country.
2. A minimum of a 3.0 GPA, "B" average, in the last 60 upper-division undergraduate credits, or a graduate degree from a nationally accredited institution.
3. Official GRE scores (scores must be no more than five years old).
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or a 6.5 overall on the IELTS is required.

The College also requires:

1. A current resume.
2. Three letters of recommendation.
3. A writing sample (master's thesis or project, published manuscript, or other).
4. A personal statement of interest.

Potential applicants are strongly encouraged to contact individual faculty to discuss common research interests, since admission decisions require identification of a faculty mentor.

Doctoral Requirements

A student may enroll for dissertation credits after completing all coursework, passing the candidacy examination, and being advanced to candidacy. Dissertation credits cannot be taken before advancement to candidacy.

The candidacy examination will be prepared and graded by a committee consisting of a minimum of three faculty members. Admission to candidacy requires a majority of the committee members agree the student passed the examination. A candidacy examination may not be passed conditionally. A "Pass" on the examination cannot be made contingent upon other factors such as the completion of additional coursework or the preparation of extra research projects. Students will be allowed only two attempts to pass the candidacy examination.

After a doctoral student is admitted to candidacy, continuous registration for at least three dissertation credits is required until the dissertation requirement is fulfilled.

Required Courses

The program requires a minimum of 75 credit hours beyond the baccalaureate, including a minimum of 15 hours of dissertation credits. There are three components to the College Ph.D. curriculum. The first component is a core curriculum shared across all public health majors (12 credit hours). The second component is specific to Health

Systems Research (36 credit hours) and doctoral seminar (12 credit hours). The third component consists of the dissertation, including 15 dissertation credit hours.

Shared Core Courses: (12 credits required)

PHC 6601	Emerging Issues in Public Health	3
PHC 6091	Biostatistics 2	3
PHC 7981	Research Concepts and Proposal Development	3
PHC 7705	Methods in Evidence Based Public Health	3

Courses for Health Systems Research Major: A minimum of 48 credit hours which include a minimum of 12 hours in Methods Courses, 24 hours in Content Courses, and 12 credits of doctoral seminar.

Methods Courses: (12 credits)

PHC 7095C	Advanced Methods for Health Systems Research	4
PHC 7XXX	Advanced Methods for Health Policy Evaluation	4
PHC 7753C	Applied Econometrics for Health Systems Research	4

Content Courses: (24 credits required)

PHC 6155C	Health Policy Analysis	3
PHC 6118	Population Health Management and Improvement I	3
PHC 6154	Evidence Synthesis Applied to Clinical Settings and Health Policy-Making	3
PHC 6430C	Public Health Economics	3
PHC 7908C	Health Systems Research Readings I	3
PHC 7909C	Health Systems Research Readings II	3
PHC 7982	Public Health Pre Dissertation Research 6	6

Doctoral Seminar: (12 credits required)

HSC 7935C	Doctoral Seminar in Health Systems Research	2
-----------	---	---

Students will be required to participate in the doctoral seminar during Fall and Spring semesters of the first three years in the program.

Dissertation Requirements: (15 credits required)

PHC 7980	Dissertation	15
----------	--------------	----

BA in Economics/Masters in Public Health Degree Pathway

This degree pathway is currently not admitting new students.

The BA/MPH pathway is designed for outstanding undergraduate students. It provides a strong base of knowledge and skills in economics, and at the same time accelerates completion of the Master of Public Health degree. Students may take advantage of the overlap of courses in the BA and MPH programs to receive their MPH degrees in a shorter period than it would otherwise be possible.

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate

Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

To apply, their GPA needs to be significantly above average (3.25). Students would also be required to maintain a high GPA (3.0) to remain in the pathway. The grade requirements for an MPH in Health Policy and Management would apply to courses that are counted toward the MPH degree.

Admission Requirements

- Current enrollment in the Bachelor's degree program in economics at FIU.
- Current GPA of 3.25 or higher.
- Three letters of recommendation.
- Approval of the Health Policy and Management admissions committee.
- Submission of official GRE scores is optional. If a student decides to submit GRE scores, the scores must be less than 5 years old.

General Requirements

Meet the requirements of both the BA in Economics and the MPH in Health Policy and Management.

Overlap: Up to 4 courses (12 credits) may be used in satisfying **both** the Bachelor's in Economic and the MPH degree requirements. Students will take the following MPH courses as electives during their final year in the BA program:

PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6430	Public Health Economics	3
PHC 6063C	Health Policy Database Applications	3
PHC 6436	Advanced Issues in Economic Evaluation of Healthcare Programs	3

MPH Core Curriculum: (15 credits)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6315	Introduction to Environmental Health	3
PHC 6410	Health Behavior and Public Health	3

Major in Health Policy and Management: (15 credits)

PHC 6104C	Public Health Management and Leadership	3
PHC 6154C	Evidence Synthesis Applied to Clinical Settings and Health Policy-Making	3
PHC 6155C	Health Policy Analysis	3
PHC 6430C	Public Health Economics	3
PHC 6148	Strategic Planning for Healthcare Organizations	3

Suggested Elective Courses: (9 credits)

PHC 6063C	Health Policy Database Applications I	3
PHC 6087C	Health Policy Database Applications II	3
PHC 6436	Advanced Issues in Economic Evaluation of Health Care Programs	3

Practicum and Culminating Experience: (6 credits)

PHC 6945	Practicum in Public Health	3
PHC 6930C	Integrative Seminar in Public Health	3

PHC 6945 (Practicum) and PHC 6930C (culminating experience) are both required for all MPH students.

The Practicum may be taken after completing a minimum of 30 hours, including all core courses. The Practicum may be waived if the student has at least 3 years of relevant practice experience working in a public health practice setting. The waiver request is prepared and submitted by the student, through their Faculty Advisor and Department Chair, for final approval/disapproval by the Academic Public Health Director. If the Practicum requirement is waived, the student will need to substitute 3 additional approved hours so that the total curriculum hour requirement of 45 is met. MPH students are expected to complete PHC 6930C Integrative Seminar in Public Health during their last semester in the program.

BA Psychology/Public Health Policy MPH Degree Pathway

This degree pathway is currently not admitting new students.

The BA/MPH pathway is designed for outstanding undergraduate students. It provides a strong base of knowledge and skills in psychology, and at the same time accelerates completion of the Master of Public Health degree. Students may take advantage of the overlap of courses in the BA and MPH programs to receive their MPH degrees in a shorter period than it would otherwise be possible.

Admission Requirements

To apply, their GPA needs to be significantly above average (3.25). Students would also be required to maintain a high GPA (3.0) to remain in the pathway. The grade requirements for an MPH in Health Policy and Management would apply to courses that are counted toward the MPH degree.

- Current enrollment in the Bachelor's degree program in psychology at FIU.
- Current GPA of 3.25 or higher.
- Three letters of recommendation.
- Approval of the Health Policy and Management admissions committee.
- Submission of official GRE scores is optional. If a student decides to submit GRE scores, the scores must be less than 5 years old.

General Requirements

Meet the requirements of both the BA in Psychology and the MPH in Health Policy and Management.

Four courses (12 credits) will be used to satisfy both the Bachelor's in Psychology and the MPH degree requirements. Students will take the following MPH courses as electives during their final year in the BA program:

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6410	Health Behavior and Public Health	3

Combined BA Sociology & Anthropology/M.P.H in Health Policy and Management Degree Pathway

This degree pathway is currently not admitting new students

Admission Requirements

Students who meet the following requirements will be able to apply for admission to the Master of Public Health program:

- Current enrollment in the bachelor's degree program in Sociology/Antropology at FIU.
- Current G.P.A. of 3.25 or higher.
- Three letters of recommendation from undergraduate faculty familiar with the student's work.
- Approval of the Health Policy and Management admissions committee.
- Approval of the University Graduate School.

Students must meet the requirements of both the B.A. in Sociology/Antropology with majors in either anthropology or sociology and the M.P.H. in Health Policy and Management.

Up to four courses (12 credits) may be used to satisfy the requirements for a B.A. in Sociology/Antropology and the M.P.H. degree requirements. Students will take the following MPH courses as electives during their final year in the BA program. The electives will be counted as part of the hours students must take outside the majors of anthropology or sociology.

PHC 6000	Introduction to Public Health Epidemiology	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6410	Health Behavior and Public Health	3
PHC 6430	Population Health Management I	3

MSW/MPH Program in Health Policy & Management (HPM) Degree Pathway

This degree pathway is currently not admitting new students

The MSW/MPH in Health Policy & Management degree pathway is an interdisciplinary, three-year pathway incorporating knowledge and skills from social work and public health with a concentration in clinical social work and Health Policy & Management. The first year will consist of social work courses, followed by mainly public health courses in the second year, and a combination of social work and public health courses in the final year. The required credits for the pathway would be 90 credits.

Admissions:

- Students will need to apply to and be accepted into each degree program separately in order to qualify for the combined degree pathway. Students will have to meet the regular admissions criteria for each program.
- If a student is already in progress with either the MSW or MPH, the application to the other degree program will need to be submitted by the end of the 1st year of coursework. At that time, the student must notify both programs that they are interested in pursuing the combined degree.

Required Courses

Year One

Fall (14 credits)

SOW 5105	Human Behavior and the Social Environment I	3
SOW 5235	Social Welfare Policy and Services I	3
SOW 5342	Social Work Practice with Individuals and Families	3
SOW 5379L	Interviewing Skills Lab	2
SOW 5404	Social Work Research Methodology	3

Spring (13 credits)

SOW 5344	Theory and Practice with Communities & Organizations	3
SOW 5629	Social Work Practice with Diverse Populations	3
SOW 5324	Theory and Practice with Groups	3
SOW 5532	Field Practicum I	3

Summer (6 credits)

SOW 6125	Human Behavior and the Social Environment II	3
	Social Work Elective	3

Year Two

Fall (9 credits)

PHC 6052	Biostatistics I	3
PHC 6000	Intro to Public Health Epidemiology	3
PHC 6102	Intro to PH Health Policy & Management (Online)	3

Spring (9 credits)

PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3
PHC 6104C	Public Health Management and Leadership	3

Summer (9 credits)

PHC 6154C	Evidence-Based Health Policy for PH HPM Elective	3
SOW 6435	Evaluating Empirically Based Social Work Practice	3

Year Three

Fall (9 credits)

PHC 6155C	Health Policy Analysis	3
PHC 6430C	Public Health Economics	3
	Social Work Elective	3

Spring (9 credits)

PHC 6063C	Health Policy Database Applications	3
SOW 6425	Clinical Assessment and Intervention Planning	3
SOW 6533	Field Practicum II	3

Summer (12 credits)

PHC 6930	Integrative Seminar in Public Health	3
SOW 6534	Field Practicum III	6
SOW 6351	Clinical Intervention in Couple and Family Social Work Practice	3

Substitutions:

- PHC 6155C Health Policy Analysis may substitute for SOW 6236 Social Welfare Policy Services II
- SOW 6533 Field Practicum II may substitute for PHC 6945 Practicum in Public Health with approval from internship coordinator in public health
- Students must take 2 electives in social work, and 1 elective in HPM. One of those social work electives will be substituted for the 2nd HPM elective usually required.
- MSW/MPH students do not have to take PHC 6500 Foundations in Public Health

MSW/MPH Program in Health Policy & Management (HPM) with Advanced Standing Status Degree Pathway

This degree pathway is currently not admitting new students.

The MSW/MPH in Health Policy & Management with Advanced Standing degree pathway is an interdisciplinary, two-year accelerated pathway incorporating knowledge and skills from social work and public health with a concentration in clinical social work and Health Policy & Management. Only students who already have an undergraduate degree in social work and meet the criteria for the advanced standing MSW may apply to this accelerated pathway. Both the first and second years of the program will involve social work and public health courses.

The required credits for the pathway would be 63 credits.

Admissions

- Students will need to apply to and be accepted into each degree program separately in order to qualify for the combined degree pathway.
- For the MSW/MPH with advanced standing degree pathway, admission to both programs must occur prior to beginning any coursework. At the time of admission, the students must notify both programs that they are interested in pursuing the combined degree with advanced standing in social work pathway.

Required Courses

Year One

Fall (9 credits)

PHC 6052	Biostatistics I	3
PHC 6000	Intro to Public Health Epidemiology	3
PHC 6102	Intro to PH Health Policy & Management (Online)	3

Spring (9 credits)

PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3
PHC 6104C	Public Health Management and Leadership	3

Summer (9 credits)

PHC 6154C	Evidence-Based Health Policy for PH	3
PHC 6147C	Continuous Quality Improvement in Healthcare Organizations	3
SOW 6435	Evaluating Empirically Based Social Work Practice	3

Year Two

Fall (9 credits)

PHC 6155C	Health Policy Analysis	3
PHC 6430C	Public Health Economics	3
	Social Work Elective	3

Spring (9 credits)

PHC 6160	Public Health Budgeting and Financial Management	3
SOW 6425	Clinical Assessment and Intervention Planning	3
SOW 6533	Field Practicum II	3

Summer (12 credits)

PHC 6930	Integrative Seminar in Public Health	3
SOW 6534	Field Practicum III	6
SOW 6351	Clinical Intervention in Couple and Family Social Work Practice	3

Substitutions:

- PHC 6155C Health Policy Analysis may substitute for SOW 6236 Social Welfare Policy Services II
- SOW 6533 Field Practicum II may substitute for PHC 6945 Practicum in Public Health with approval from internship coordinator in public health
- Students must take 2 electives in social work, and 1 elective in HPM. One of those social work electives will be substituted for the 2nd HPM elective usually required.
- MSW/MPH students do not have to take PHC 6500 Foundations in Public Health

Health Promotion and Disease Prevention

Elena Bastida, *Professor and Chair*

Rashida Biggs, *Clinical Assistant Professor*

William W. Darrow, *Professor*

Jessy Devieux, *Professor*

Carlos Espinal, *Research Professor*

Melissa Howard, *Clinical Assistant Professor*

Patria Rojas, *Assistant Professor*

Mariana Sanchez, *Assistant Professor*

The Department offers Graduate Certificates, a Master's degree in Public Health (MPH) with a major in Health Promotion and Disease Prevention, MPH in Health Promotion and Disease Prevention with a Concentration in Maternal and Child Health, and a Ph.D. in Public Health with a major in Health Promotion and Disease Prevention.

MPH in Health Promotion and Disease Prevention

The courses prepare students to develop and implement health promotion/health education programs in various sites. This program of study is concerned with personal and public health lifestyles, identification of risk factors and behavioral change strategies that promote positive health behaviors of individuals, groups, and community. See also Graduate Certificates in Health Promotion and Maternal and Child Health, which do not require enrollment in the MPH degree program.

Admission Requirements

Applicants must meet the University's general graduate admission requirements:

1. A Bachelor's degree or equivalent from an accredited college or university or, in the case of foreign students, an institution recognized in its own country as preparing students for further study at the graduate level.
2. A minimum 3.0 GPA on the last 60 undergraduate hours. In addition, applicants are required to submit 1) a current resume; 2) a written statement of purpose (career goals). Applicants are also encouraged to submit three letters of recommendation.
3. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required. Students with diverse backgrounds are encouraged to apply.
4. Submission of official GRE scores is optional. If a student decides to submit GRE scores, the scores must be less than 5 years old.

MPH Core Curriculum: (15 credits)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6315	Introduction to Environmental Health Sciences	3

PHC 6410	Health Behavior and Public Health	3
----------	-----------------------------------	---

Major in Health Promotion and Disease Prevention: (12 credits)

PHC 6146	Health Promotion Program Planning and Intervention Design	3
PHC 6602	Theoretical Foundations of Health Promotion	3
PHC 6706	Research Methods in Public Health	3
PHC 6750	Program Development and Evaluation in Health Promotion	3

Elective Courses: (12 credits)

Electives may be selected from the following list of Health Promotion and Disease Prevention courses. Students must consult with a faculty advisor for approval prior to selecting elective courses not on this list.

PHC 5009	AIDS: Contemporary Issues	3
PHC 5113	Community Health Promotion Planning and Research	3
PHC 5409	Public Health Behavior Change Theory and Practice	3
PHC 5415	Public Health in Minority Urban Populations	3
PHC 6412	Health Promotion in Culturally Diverse Communities	3
PHC 6443	Ethical Issues in Public Health	3
PHC 6504	Introduction to Health Education and Wellness	3
PHC 6530	Principles of Maternal and Child Health	3
PHC 6580	Contemporary Issues in Health Promotion	3
PHC 6589	Health Promotion in Institutional Settings	3
PHC 6600	Health Promotion Communication Theory and Design	3
PHC 6715	Survey Research in Public Health	3
PHC 6751	Community Organization for Health Promotion	3
PHC 6762	International Public Health	3

Practicum and Culminating Experience: (6 credits)

PHC 6945	Practicum in Public Health	3
PHC 6930C	Integrative Seminar in Public Health	3

PHC 6945 (Practicum) and PHC 6930C (culminating experience) are both required for all MPH students. The Practicum may be taken after completing a minimum of 30 hours, including all core courses. The Practicum may be waived if the student has at least 3 years of relevant practice experience working in a public health practice setting. The waiver request is prepared and submitted by the student, through their Faculty Advisor and Department Chair, for final approval/disapproval by the Academic Public Health Director. If the Practicum requirement is waived, the student will need to substitute 3 additional approved hours so that the total curriculum hour requirement of 45 is met. MPH students are expected to complete PHC 6930c Integrative Seminar in Public Health during their last semester in the program.

MPH in Health Promotion and Disease Prevention with a Concentration in Maternal and Child Health

The total credit requirement for the MPH is 45 credits. The MCH Concentration is organizationally housed in the MPH

Health Promotion and Disease Prevention major which includes five courses (15 credits) in the MPH Core Curriculum, four courses (12 credits) in the HPDP Major and 2 courses (6 credits) in the Practicum and Culminating Experience. The other 12 credits, as noted above will include the MCH required and MCH elective coursework.

MPH Core Curriculum: (15 credits)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6052	Biostatistics I	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3

Major in Health Promotion and Disease Prevention: (12 credits)

PHC 6146	Health Promotion Program Planning and Intervention Design	3
PHC 6602	Theoretical Foundations of Health Promotion	3
PHC 6706	Research Methods in Public Health	3
PHC 6750	Program Development and Evaluation in Health Promotion	3

Maternal and Child Health Required Courses: (6 credits)

PHC 6530	Principles of Maternal and Child Health	3
PHC 6537	Case Studies in Maternal and Child Health Programs, Policies and Research	3

Elective Courses: (6 credits)

Electives may be selected from the following list of Maternal and Child Health courses. Students must consult with a faculty advisor for approval prior to selecting elective courses not on this list.

SOW 5240	Advanced Interventions in Child Maltreatment	3
PHC 6063C	Health Policy Database Applications I	3
PHC 6531	Environmental Justice in MCH	3
PHC 6591	Reproductive Health Epidemiology	3
PHC 6504	Introduction to Health Education and Wellness	3
PHC 6762	International Public Health	3
PHC 6754C	Analytic Methods in MCH	3
HUN 6415	Pediatric Nutrition	3

Practicum and Culminating Experience: (6 credits)

PHC 6945	Practicum in Public Health	3
PHC 6930C	Integrative Seminar in Public Health	3

The practicum may be waived if the student has at least 3 years of relevant public health practice experience, and substituted for 3 additional MCH elective credit hours.

Doctor of Philosophy in Public Health Major in Health Promotion and Disease Prevention

The Doctor of Philosophy (Ph.D.) in Public Health is available with a major in Health Promotion and Disease Prevention. Students will be expected to demonstrate significant research capacity by completing 60 credits

beyond the Master's degree and through the writing of an original dissertation.

Doctoral Admissions

Applicants must meet the University's general graduate admission requirements:

1. A four-year bachelor's degree or equivalent from a nationally accredited institution or, in the case of foreign students, from a well-established institution of higher learning that is authorized to grant degrees by appropriate authorities in that country.
2. A minimum of a 3.0 GPA, "B" average, in the last 60 upper-division undergraduate coursework, or a graduate degree from a nationally accredited institution.
3. Official GRE scores (scores must be no more than five years old).
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or a 6.5 overall on the IELTS is required.

The College also requires:

1. A current resume.
2. Three letters of recommendation.
3. A writing sample (master's thesis or project, published manuscript, or other).
4. A personal statement of interest.

Potential applicants are strongly encouraged to contact individual faculty to discuss common research interests since admission decisions may require identification of a potential faculty mentor.

Doctoral Requirements

A student may enroll for dissertation credits after completing all coursework, passing the candidacy examination, and being advanced to candidacy. Dissertation credits cannot be taken before advancement to candidacy.

The candidacy examination will be prepared and graded by a committee consisting of a minimum of three faculty members. Admission to candidacy requires that a majority of the committee members agree that the student passed the examination. A candidacy examination may not be passed conditionally. A "Pass" on the examination cannot be made contingent upon other factors such as the completion of additional coursework or the preparation of extra research projects. Students will be allowed only two attempts to pass the candidacy examination.

After a doctoral student is admitted to candidacy, continuous registration for at least 3 dissertation credit hours each semester (including the summer term) is required until the dissertation requirement is fulfilled.

Required Courses

The program requires a minimum of 75 credit hours beyond the baccalaureate which includes a minimum of 15 credit hours of dissertation credits. There are three components to the College Ph.D. curriculum. The first is a core curriculum shared across all majors (12 credit hours). The second component is specific to the major (30 credit hours) and secondary field courses (9 credit hours). The

third component consists of the pre-dissertation research and/or elective courses (9 credit hours), and the dissertation, including 15 dissertation credit hours.

Shared Core Courses: (12 credits)- Required

PHC 6601	Emerging Issues in Public Health	3
PHC 6091	Biostatistics 2 (or other approved Quantitative Methods course)	3
PHC 7981	Research Concepts and Proposal Development	3
PHC 7705	Methods in Evidence Based Public Health	3

Courses for Health Promotion and Disease Prevention Major

A minimum of 27 hours which include a minimum of 9 hours in Methods Courses and 18 hours (with minimum of 9 at the 7000 level) in Content Courses.

Methods Courses*: (12 credits)- Required

Major advisor and the program committee for the student will identify appropriate methods courses from an approved list.

PHC 6055	Data Management and Epidemiologic Analysis Using SAS/SPSS	3
PHC 7198	Advanced Qualitative Methods in Public Health	3
PHC 7723	Survey Research in Public Health	3
PHC 7702	Advanced Measurement in Public Health	3

*or other advisor-approved methods course

Content Courses: (18 credits)- Required

PHC 6443	Ethical Issues in Public Health	3
PHC 7162	Grant Writing in Public Health	3
PHC 7583	Policy and Practice in Health Promotion	3
PHC 7584	Advanced Research Designs	3
PHC 7587	Theory Development in Health Promotion	3
PHC 7588	History and Foundations of Public Health	3

Secondary field courses or Additional Concentration Outside of Major: (9 credits)- Required

Courses to be selected in consultation with advisor from University offerings in a focused area appropriate to public health.

Pre- Dissertation Research and/or Electives (in any combination): (9 credits)- Required

PHC 7982	Pre-Dissertation Research	3-9
----------	---------------------------	-----

Dissertation Requirements:(15 credits)- Required

PHC 7980	Dissertation	15
----------	--------------	----

Doctor of Philosophy in Public Health Major in Health Promotion and Disease Prevention-Health Disparities Track

The Doctor of Philosophy (Ph.D.) in Public Health is available with a major in Health Promotion and Disease Prevention. Students will be expected to demonstrate

significant research capacity by completing 60 credits beyond the Master's degree and through the writing of an original dissertation.

Doctoral Admissions

Applicants must meet the University's general graduate admission requirements:

1. A four-year bachelor's degree or equivalent from a nationally accredited institution or, in the case of foreign students, from a well-established institution of higher learning that is authorized to grant degrees by appropriate authorities in that country.
2. A minimum of a 3.0 GPA, "B" average, in the last 60 upper-division undergraduate coursework, or a graduate degree from a nationally accredited institution.
3. Official GRE scores (scores must be no more than five years old).

4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or a 6.5 overall on the IELTS is required.

The College also requires:

1. A current resume.
2. Three letters of recommendation.
3. A writing sample (master's thesis or project, published manuscript, or other).

Potential applicants are strongly encouraged to contact individual faculty to discuss common research interests since admission decisions may require identification of a potential faculty mentor.

Doctoral Requirements

A student may enroll for dissertation credits after completing all coursework, passing the candidacy examination, and being advanced to candidacy. Dissertation credits cannot be taken before advancement to candidacy.

The candidacy examination will be prepared and graded by a committee consisting of a minimum of three faculty members. Admission to candidacy requires that a majority of the committee members agree that the student passed the examination. A candidacy examination may not be passed conditionally. A "Pass" on the examination cannot be made contingent upon other factors such as the completion of additional coursework or the preparation of extra research projects. Students will be allowed only two attempts to pass the candidacy examination.

After a doctoral student is admitted to candidacy, continuous registration for at least 3 dissertation credit hours each semester (including the summer term) is required until the dissertation requirement is fulfilled.

Required Courses

The program requires a minimum of 75 credit hours beyond the baccalaureate which includes a minimum of 24 credit hours of dissertation credits. There are three components to the College Ph.D. curriculum. The first is a core curriculum shared across all majors (12 credit hours). The second component is specific to the major (27 credit hours) and secondary field courses (12 credit hours). The third component consists of the dissertation, including 24 dissertation credit hours.

Shared Core Courses: (12 credits)

PHC 6601	Emerging Issues in Public Health	3
PHC 6091	Biostatistics 2 (or other approved Quantitative Methods course)	3
PHC 7981	Research Concepts and Proposal Development	3
PHC 7705	Methods in Evidence Based Public Health	3

Courses for Health Promotion and Disease Prevention Major-Health Disparities Track

A minimum of 27 hours which include a minimum of 9 hours in Methods Courses and 18 hours (with minimum of 9 at the 7000 level) in Content Courses.

Methods Courses*: (12 credits)

Major advisor and the program committee for the student will identify appropriate methods courses from an approved list.

PHC 6055	Data Management and Epidemiologic Analysis Using SAS/SPSS	3
PHC 7198	Advanced Qualitative Methods in Public Health	3

Master of Social Work/ Master of Public Health in Health Promotion and Disease Prevention (HPDP) Degree Pathway

The MSW/MPH in Health Promotion and Disease Prevention degree pathway will be an interdisciplinary, three-year pathway incorporating knowledge and skills from social work and public health with a concentration in clinical social work and Health Promotion and Disease Prevention. The first year will consist of social work courses, followed by public health courses in the second year, and a combination of social work and public health

courses in the final year. The required credits for the pathway would be 90 credits.

Admissions Requirements

- Students will need to apply to and be accepted into each degree program separately in order to qualify for the combined degree pathway. Students will have to meet the regular admissions criteria for each program.
- If a student is already in progress with either the MSW or MPH, the application to the other degree program will need to be submitted by the end of the 1st year of coursework. At that time, the student must notify both programs that they are interested in pursuing the combined degree pathway.

Required Courses**Year One****Fall (14 credits)**

SOW 5105	Human Behavior and the Social Environment I	3
SOW 5235	Social Welfare Policy and Services I	3
SOW 5342	Social Work Practice with Individuals and Families	3
SOW 5379L	Interviewing Skills Lab	3
SOW 5404	Social Work Methodology	3
	or	
PHC 6706	Research Methods in Public Health	3

Spring (13 credits)

SOW 5344	Theory and Practice with Communities & Orgs	3
SOW 5324	Theory and Practice with Groups	3
SOW 5532	Field Practicum I	3
SOW 5629	Social Work Practice with Diverse Populations	3

Summer (6 credits)

SOW 6125	Human Behavior and the Social Environment II	3
	Social Work Elective	3

Year Two**Fall (9 credits)**

PHC 6052	Biostatistics I	3
PHC 6602	Theoretical Foundations of Health Promotion	3
PHC 6410	Health Behavior and Public Health	3

Spring (9 credits)

PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6000	Intro to Public Health Epidemiology	3
PHC 6102	Intro to PH Health Policy & Management	3

Summer (6 credits)

	Public Health Elective	3
	Public Health Elective	3

Year Three**Fall (12 credits)**

	Social Work Elective	3
PHC 6146	Health Promotion Program Planning and Intervention Design	3
SOW 6236	Social Welfare Policy & Services II	3
SOW 6435	Evaluating Empirically Based Social Work Practice	3

Spring (9 credits)

SOW 6425	Clinical Assessment and Intervention Planning	3
----------	---	---

SOW 6533	Field Practicum II	3
PHC 6750	Program Development & Evaluation for Health Promotion	3
Summer (12 credits)		
PHC 6930	Integrative Seminar in Public Health	3
SOW 6534	Field Practicum III	6
SOW 6351	Clinical Intervention in Couple and Family Social Work Practice	3

Substitutions:

- SOW 6533 Field Practicum II may substitute for PHC 6945 Practicum in Public Health with approval from internship coordinator in public health.
- Students may choose to take either PHC 6706 Research Methods in Public Health or SOW 5404 Social Work Research Methodology.
- Students must take two (2) electives in social work and two (2) electives in HPDP. The two (2) social work electives may substitute for the 3rd and 4th HPDP electives usually required.
- MSW/MPH students do not have to take PHC 6500 Foundations in Public Health.

MSW/MPH Program in Health Promotion and Disease Prevention (HPDP) with MSW Advanced Standing Status Degree Pathway

The MSW/MPH in Health Promotion and Disease Prevention with Advanced Standing degree pathway will be an interdisciplinary, two-year accelerated program incorporating knowledge and skills from social work and public health with a concentration in clinical social work and Health Promotion and Disease Prevention. Only students who already have an undergraduate degree in social work and meet the criteria for the advanced standing MSW may apply to this accelerated pathway. Both the first and second years of the pathway will involve social work and public health courses.

Admissions Process:

- Students will need to apply to and be accepted into each degree program separately in order to qualify for the combined degree pathway.
- For the MSW/MPH with advanced standing, admission to both programs must occur prior to beginning any coursework. At the time of admission, the students will need to notify both programs that they are interested in pursuing the combined degree pathway with advanced standing in social work.

Required Courses:

The required credits for the program is 66 credits.

Year One**Fall (12 credits)**

SOW 6125	Human Behavior and the Social Environment II	3
PHC 6052	Biostatistics I	3
PHC 6146	Health Promotion Program Planning and Intervention Design	3
PHC 6410	Health Behavior and Public Health	3

Spring (12 credits)

PHC 6750	Program Development & Evaluation for Health Promotion	3
PHC 6000	Intro to Public Health Epidemiology	3

PHC 6102	Intro to PH Health Policy & Management	3
SOW 6435	Evaluating Empirically Based Social Work Practice	3

Summer (9 credits)

Public Health Elective (3)		
Public Health Elective (3)		
Social Work Elective (3)*		

Year Two**Fall (12 credits)**

SOW 6236	Social Welfare Policy & Services II	3
PHC 6602	Theoretical Foundations of Health Promotion	3
PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6706	Research Methods in Public Health	3

Spring (9 credits)

SOW 6425	Clinical Assessment and Intervention Planning	3
SOW 6533	Field Practicum II	3
	Social Work Elective	3

Summer (12 credits)

PHC 6930	Integrative Seminar in Public Health	3
SOW 6534	Field Practicum III	6
SOW 6351	Clinical Intervention in Couple and Family Social Work Practice	3

Substitutions:

- SOW 6533 Field Practicum II may substitute for PHC 6945 Practicum in Public Health with approval from internship coordinator in public health.
- Students must take two (2) electives in social work and two (2) electives in HPDP. The two (2) social work electives may substitute for the 3rd and 4th HPDP electives usually required.
- MSW/MPH students do not have to take PHC 6500 Foundations in Public Health.

Certificate Programs

Graduate Certificate in Addictions

This graduate certificate provides specialized advanced clinical training for social work students and professionals working in the addictions field. It will meet all of the classroom educational requirements laid out by the State of Florida for certification through the Florida Certification Board. This certificate program is open to degree-seeking students only.

Requirements: (30 credits)

SOW 5105	Human Behavior and the Social Environment I or BSSW equivalent	3
SOW 6125	Human Behavior and the Social Environment II – Psychopathology	3
SOW 5324	Theory and Practice with Groups or BSSW equivalent	3
SOW 5342	Social Work Practice with Individuals & Families or BSSW equivalent	3
SOW 5629	Social Work Practice with Diverse Populations or BSSW equivalent	3
SOW 6351	Clinical Intervention in Couple and Family Social Work Practice	3
SOW 6435	Evidence-Based Social Work Practice	3
SOW 5710	Current Issues in Addiction Practices	3
SOW 6114C	Assessment & Treatment of Addiction & Related Problems	3
SOW 6711	Prevention of Addiction & Related Problems	3

Graduate Certificate in Child Welfare

This Graduate Certificate in Child Welfare (GCCW) will provide specialized training in child protection and child welfare services. Students who are awarded the GCCW will be prepared for work with neglected and abused children, their families, and the social service organizations that serve them. A total of 18 graduate credits are required for this certificate. This certificate program is open to degree-seeking students only.

Required Courses: (18 credits)

SOW 5240	Advanced Interventions in Child Maltreatment	3
SOW 5241	Advanced Child Welfare Policy and Practice	3
SOW 6533	Field Practicum II (in a Child Welfare agency)	3
SOW 6534	Field Practicum III (in a Child Welfare agency)	6
SOW 6425	Clinical Assessment and Intervention Planning	3

Graduate Certificate Program in Environmental Health Sciences

This Graduate Certificate provides a graduate level instruction to educate and support individuals in the public health and global health workforce by enhancing their knowledge and skills in environmental health research and practice to influence policies. Upon completion of the certificate, the student will be able to identify and assess toxicity to manage environmental (including workplace) exposures of chemical, biological, and radiological risks to

human health. This certificate program is open to non-degree-seeking individuals only.

Program Requirements

The Graduate Certificate Program requires the completion of 18 graduate credits. The student must demonstrate proficiency in the identification and characterization of human health risks from exposures to environmental and workplace contaminants. Students who are proficient in any one area covered by the required courses may choose from selected alternative courses to complete their requirements.

Required Courses (12 credits)

PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6355	Environmental Health and Safety	3
PHC 6310	Environmental Toxicology	3
PHC 6311	Environ. Health Risk Assessment	3

Elective Courses (6 credits)

PHC 6374	Environ. Disasters & Human Health	3
PHC 6538	Gene and Environment Interaction	3
PHC 6312C	Health Impacts of Air, Water, and Land Pollution	3
PHC 6442	Global Environmental Public Health	3
PHC 6224	Regulatory Aspects of Environmental Health	3

Admission Requirements

Applicants must hold a bachelor's degree or equivalent from an accredited college or university. Science or biology related background with a graduate course in biostatistics, statistics, or social science statistics is desirable.

Graduation (completion) Requirements

Completion of 18 graduate credits with an overall 'B' average.

Graduate Certificate in Epidemiology

This Graduate Certificate seeks to provide graduate level instruction in epidemiology to non-graduate-degreed practitioners. Students shall be provided with a scientific foundation to utilize the fundamentals of biometry to describe and study variables related to disease risk, and to organize and maintain databases, while at the same time be provided with opportunities for practical application. This certificate program is open to non-degree-seeking students only.

Program Requirements

The Graduate Certificate requires the completion of 18 graduate credits. The student must demonstrate proficiency in research methodology, basic statistical and computer skills related to distribution and determinants of disease. If students are proficient in any one area covered by the required courses, alternative courses may be selected. Substitution of courses must be approved by the advisor. Students should consult with advisors since new courses are frequently added, and some courses have prerequisites and enrollment stipulations.

Required Courses: (6 credits)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6013	Epidemiology II: Observational Design	3

Elective Courses: (12 credits)

Students may select 12 credits from the following courses:

PHC 6003	Chronic Disease Epidemiology	3
PHC 6008	Cardiovascular Disease Epidemiology	3
PHC 6009	AIDS Epidemiology and Control	3
PHC 6014	Behavioral Epidemiology	3
PHC 6016	Social Epidemiology	3
PHC 6703	Epidemiology Methods: Experimental Design	3
PHC 6062	Systematic Reviews and Meta-Analysis	3
PHC 6441	Epidemiology of Health Disparity	3
PHC 6536	Health Demography	3

Admission Requirements

Applicants must hold a bachelor's degree or equivalent from an accredited college or university.

Graduation (completion) Requirements

Completion of 18 graduate credits with an overall 'B' average.

Graduate Certificate in Health Economics

This certificate program is currently not admitting new students

The graduate certificate program requires the completion of 15 graduate credits. This certificate program is open to non-degree-seeking students only.

Required Courses: (15 credits)

PHC 6430C	Public Health Economics	3
PHC 6063C	Health Policy Database Applications I	3
PHC 6087C	Health Policy Database Applications II	3
PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6436	Advanced Issues in Economic Evaluation of Health Care Programs	3

Graduation (completion) Requirements

To complete the certificate, students will be required to maintain an overall 3.0 GPA.

Graduate Certificate in Health Policy

This certificate program is currently not admitting new students

The graduate certificate program requires the completion of 15 graduate credits. This certificate program is open to non-degree-seeking students only.

Required Courses: (15 credits)

PHC 6102	Introduction to Public Health Policy and Management	3
PHC 6104C	Public Health Management and Leadership	3
PCH 6148	Strategic Planning for Healthcare Organizations	3
PHC 6155C	Health Policy Analysis	3

PHC 6160	Public Health Budgeting and Financial Management	3
	or	
PHC 6154C	Evidence Synthesis Applied to Clinical Settings and Health Policy-Making	3

Graduation (completion) Requirements

To complete the certificate, students will be required to maintain an overall 3.0 GPA.

Graduate Certificate in Health Promotion

The Graduate Certificate Program seeks to provide graduate level instruction in health promotion to non-graduate- degreed practitioners. Students will gain a scientific foundation for designing, conducting, and evaluating health promotion programs in public health, while at the same time benefit from numerous opportunities for practical application. This certificate program is open to non-degree-seeking students only.

Program Requirements

The Graduate Certificate Program requires completion of 18 graduate credits. The student must demonstrate proficiency in health promotion and design, implantation, and evaluation. If students are proficient in any one area covered by the required courses, alternative courses must be approved by the advisor. A graduate statistics course (biostatistics, social statistics) is a prerequisite.

Students should consult with advisors since new courses are frequently added, and some courses have prerequisites and enrollment stipulations.

Required Courses¹: (15 credits)

PHC 6146	Health Promotion Program Planning and Intervention Design	3
PHC 6410	Health Behavior in Public Health	3
PHC 6602	Theoretical Foundations of Health Promotion	3
PHC 6706	Research Methods in Public Health	3
PHC 6750	Program Development and Evaluation in Health Promotion	3

A three hour elective course must be selected.

¹If students are proficient in any one area covered by the required courses, the following elective courses may be substituted:

Approved Electives: (3 credit maximum)

PHC 5009	AIDS: Contemporary Issues	3
PHC 5409	Public Health Behavior Change Theory and Practice	3
PHC 5415	Public Health in Minority/Urban Population	3
PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6443	Ethical Issues in Public Health	3
PHC 6504	Introduction to Health Education and Wellness	3
PHC 6530	Principles of Maternal and Child Health	3
PHC 6580	Contemporary Issues in Health Promotion	3
PHC 6600	Health Promotion Communication Theory and Design	3
PHC 6751	Community Organization for Health Promotion	3
PHC 6762	International Public Health	3

Admission Requirements

Applicants must hold a bachelor's degree or equivalent from an accredited college or university.

Graduation (completion) Requirements

Completion of 18 graduate credits with an overall 'B' average.

Graduate Certificate in Management in Social Work

This graduate certificate provides specialized management training for social work students and professionals planning to enter or work in managerial positions in the social work field. Courses do not meet elective requirements for MSW clinical program. All certificate students will be required to take the three required courses as well as the two from the approved list. This certificate program is open to degree-seeking students only.

(Note: This certificate is currently under revision. Please check with the Student Services Coordinator in the School of Social Work for information).

Requirements: (15 credits)**Required Courses**

SOW 5344	Theory & Practice with Communities & Organizations	3
PAD 6156	Applied Organizational Theory & Behavior	3
SOW 5455	Writing and Managing Grants for Social Service Programs	3

Select two from the following:

PAD 6205	Public Financial Management	3
PAD 5435	Administration & the Role of Women	3
HSA 6425	Mental Health Administration & Planning	3
URS 5645	Strategic Planning in Public & Non-Profit Organizations	3
PAD 6434	Leadership and Decision Making	3
SOW 6387	Social Services Management Skills	3

Graduate Certificate in Maternal and Child Health

The graduate certificate program requires the completion of 15 graduate credits. This certificate program is open to both degree-seeking and non-degree seeking students.

Required Courses: (6 credits)

PHC 6530	Principles of Maternal and Child Health	3
PHC 6537	Case Studies in Maternal and Child Health Programs, Policies and Research	3

Choose at least three of these specialty courses: (9 credits)

HUN 6415	Pediatric Nutrition	3
PHC 6063C	Health Policy Database Applications	3
PHC 6531	Environmental Justice: Contextualizing Maternal and Child, Women, Youth and Family (WYF) Wellbeing	3
PHC 6750	Program Development and Evaluation in Health Promotion	3
PHC 6754C	Analytic Methods in Maternal and Child Health	3
PHC 6762	International Public Health	3

SOW 5240	Advanced Interventions in Child Maltreatment	3
----------	--	---

Graduate Certificate in Pediatric Nutrition

The graduate certificate program requires the completion of 15 graduate credits. The graduate certificate in Pediatric Nutrition is a fully online graduate/professional certificate program that consists of 2 core pediatric nutrition courses plus at least three additional pediatric specialty courses over an academic year. The certificate is open to both degree seeking and non-degree seeking students.

Required Courses: (6 credits)

HUN 6415	Pediatric Nutrition	3
HUN 6416	Advanced Pediatric Nutrition	3

Choose at least three of these specialty courses: (9 credits)

HUN 6417	Nutrition of the High Risk Infant and Newborn in Intensive Care	3
DIE 6287	Dysfunctional Eating in Pediatrics	3
DIE 6286	Pediatric Obesity	3
DIE 6285	Pregnancy and Lactation	3

Graduate Certificate in Public Health Foundations

The graduate certificate program requires the completion of 18 graduate credits. The student must demonstrate proficiency in basic statistical and computer skills related to distribution and determinants of disease. If students are proficient in any one area covered by the required courses, alternative courses may be selected. Substitution of courses must be approved by the advisor. Students should consult with advisors since new courses are frequently added, and some courses have prerequisites and enrollment stipulations. This certificate program is open to non-degree-seeking students only.

Admission

Applicants must hold a bachelor's degree or equivalent from accredited college or university.

Required Courses: (18 Credits Total)

PHC 6000	Epidemiology I: Introduction to Public Health Epidemiology	3
PHC 6065	Public Health Statistics	3
PHC 6102	Introduction to Health Policy and Management	3
PHC 6315	Introduction to Environmental Health Sciences	3
PHC 6410	Health Behavior and Public Health	3
PHC 6500	Foundations of Public Health	3

Graduate Certificate in Social Work Practice with the Elderly

This graduate certificate provides specialized advanced clinical training for social work students working with elderly populations. This certificate program is open to degree-seeking students only.

Requirements: (15 credits) Required

SOW 6236	Social Welfare Policy and Services II	3
SOW 6534	Field Practicum III (in an Elderly/Aging Setting)	6
Select 2 from the following:		
SOW 5641	Understanding the Process of Aging	3
SOW 6646	Social Work Practice with the Elderly	3
SOW 5605	Medical Social Work	3
SOW 5805C	Counseling the Elderly	3
SOW 6359	Social Work Treatment with Families of the Elderly	3

Post-MSW Certificate in Clinical Practice

This certificate program is designed for MSW practitioners who specialized in macro/administrative or generalist practice and wish to increase their knowledge and skills in direct services/clinical practice. In most cases, MSW practitioners completing this certificate will have the requisite MSW course work for clinical licensure in the state of Florida. This certificate program is open to degree-seeking students only.

The post-MSW Certificate in Clinical Practice program of study is under revision. Students should anticipate changes in the 6000 level courses.

Admission Requirements

Applicants must satisfy all minimum requirements as specified by the University Graduate School for admission into Graduate Programs. In addition, the applicant must have earned a Master's of Social Work degree with a minimum cumulative GPA of 3.0.

Program of Study

SOW 6125	Human Behavior and Social Environment II – Psychopathology	3
SOW 6351	Clinical Intervention in Couple and Family Social Work Practice	3
SOW 6425	Clinical Assessment and Intervention Planning	3
SOW 6533	Field Practicum II	3
SOW 6534	Field Practicum III	6

For additional and updated information about degrees offered, entrance requirements, and services, please visit our website: <https://stempel.fiu.edu/academics/>

Course Descriptions

Definition of Prefixes

DIE-Dietetics; FOS-Food Science; FES-Fire and Emergency Services; FSS-Food Service Systems; GEY-Gerontology; HSC-Health Sciences; HUN-Human Nutrition; HSA- Health Services Administration; IHS-Interdisciplinary Health Sciences; PHC-Public Health; SOW-Social Work

DIE 5247 Trends in Therapeutic Nutrition (3). Evaluation and interpretation of current research in dietary care of metabolic diseases. Prerequisites: Diet therapy or approval of the instructor.

DIE 5936 Advanced Practice Seminar (1-3). Designed to provide didactic components in tandem with practice learning experiences in health care institutions. Covers material in clinical dietetics, management, and community nutrition. Utilizes a team approach and will draw on specialists from all areas of dietetics. Corequisites: DIE 6946, DIE 5947, DIE 5948 or permission of the instructor. (S)

DIE 5948 Advanced Practicum in Clinical Nutrition (1-6). Application of the principles, concepts, theories, and methodologies of administration and management to dietetic systems in healthcare and foodservice. Prerequisite: Permission of the instructor. DI course does not count towards M.S. degree. (F)

DIE 6128 Dietetic Administration and Management (3). Application of management and organizational theory to dietetic systems in health and community institutions.

DIE 6259 Management of Nutrition Services (3). Analysis of interdisciplinary nutrition services delivery with emphasis on management models and theories regarding division of work, quality improvement and productivity, leadership, motivation and planning, organizing, staffing, directing, and controlling.

DIE 6285 Pregnancy and Lactation (3). This course is designed to apply the principles of practical and comprehensive nutrition information on counseling and support needs during and between Pregnancy and Lactation. Prerequisites: HUN 6415 and HUN 6416.

DIE 6286 Pediatric Obesity (3). This course is designed to apply the latest tools and practice recommendations needed to educate and counsel in the area of childhood obesity and prevention. Prerequisites: HUN 6415 and HUN 6416.

DIE 6287 Dysfunctional Eating in Pediatrics (3). This course is designed to apply the principles of psychology, physiology, and nutrition to nutrition care and counseling for infants, children and adolescents engaged in dysfunctional/abnormal eating. Prerequisites: HUN 6415 and HUN 6416.

DIE 6368 Advanced Techniques in Dietetic Practice (3). Techniques and approaches in changing nutritional behavior, establishing private practice, providing dietetic services in various size institutions, hospitals, nursing homes, and in the community. Prerequisites: DIE 4435, DIE 4435L or equivalent. Corequisite: DIE 6368L. (S, even years)

DIE 6368L Advanced Techniques Dietetic Practice Lab (1). Individual practice in conducting interviews, planning

nutritional care, changing nutritional behavior, and providing dietetic consultation. Prerequisite: Permission of the instructor. Corequisite: DIE 6368. (S, even years)

DIE 6567 Research II (3). This course will further expand student knowledge and skills in research in Dietetics and Nutrition primarily through the development of a research proposal. Prerequisite: DIE 6568.

DIE 6568 Research I (3). Consideration of scientific methods and theoretical orientation as applied to research in dietetics. Special consideration given to various techniques of investigation, data collection, data organization, and interpretation. Prerequisites: STA 6166 or permission of the instructor.

DIE 6576 Project in Dietetics and Nutrition (1-6). Development and completion of a research project on a specific, important topic, question or need in the area of dietetics and nutrition. Prerequisites: DIE 6568; 12 hours graduate study, and permission of project advisor.

DIE 6578 Qualitative Research Methods in Dietetics (3). Application of qualitative research methods including field and case study approaches in interpreting and designing research studies. Introduction to interdisciplinary research. Prerequisite: DIE 6568.

DIE 6906 Readings in Dietetics and Nutrition (1-3). Dietetics and nutrition or in-depth advanced study of a specialty. Prerequisites: Permission of the instructor and advanced standing in graduate program. (F,S,SS)

DIE 6907 Individual Study in Dietetics (1-3). Intensive individual investigation of a phase of dietetics. Emphasis on recent findings in dietetics and allied disciplines. Prerequisite: Permission of the Instructor. (F,S,SS)

DIE 6915 Supervised Research (1-3). Continuation of thesis research under thesis advisor. Repeatable. Prerequisite: Completion of all other required course work. (F,S,SS)

DIE 6929 Specialized Short Courses in Dietetics and Nutrition (1-3). Intense courses on specialized topics in dietetics and nutrition for the advanced student or professional. Topic based on current nutrition concerns. Prerequisites: Advance graduate standing and permission of the instructor.

DIE 6935 Special Topics in Dietetics (3). In-depth study of historical, epidemiological, prevention, and treatment aspects of topics related to dietetics. Prerequisites: Competence in topic covered, admission to graduate program.

DIE 6937 Graduate Seminar in Dietetics and Nutrition (1). Presentations by researchers and doctoral students on studies, theories, applications; journal club presentations by students. Two semesters enrollment, M.S. students; three semesters Ph.D. students. (F,S)

DIE 6946 Advanced Supervised Dietetics Practice I (6). Advanced practical application of knowledge and skills in a supervised practice setting. Prerequisite: Permission of the instructor. DI course does not count towards M.S. degree. (S)

DIE 6947 Advanced Supervised Dietetics Practice II (6). Continuation of advanced practical application of knowledge and skills in a supervised practice setting.

Prerequisite: Permission of the instructor. DI course does not count towards M.S. degree. (F)

DIE 6971 Thesis in Dietetics and Nutrition (1-6). Prerequisites: DIE 6568 or DIE 6578, 12 hours of graduate study and permission of Thesis advisor. (F,S,SS)

DIE 7566 Research Concept Development in Dietetics and Nutrition (3). Grant proposal writing for dietetic and nutrition research. Prerequisite: DIE 6568, STA 6166, and STA 6167.

DIE 7980 Ph.D. Dissertation (1-12). Research for doctoral dissertation. Prerequisite: Permission of Major Professor and Doctoral Candidacy.

FES 6000 Command and Control in Disasters (3). To teach students how to manage disasters through systematic processes and methods.

FES 6805 Disaster Field Operations (3). Provides students with the knowledge and skills to engage in disaster work in field settings.

FES 6806 Disaster Response and Recovery (3). Designed to expose students to the principles and practices that promote effective disaster response and recovery operations.

FES 6826 Disaster Preparedness and Planning Methodologies (3). Provides a fundamental understanding about the importance of preparedness and planning, reasons for planning and identifies the people and organizations that may be involved in the planning process.

FES 6846 Comparative Disaster Management Systems (3). Introduction to the disaster management system applied in the U.S. and systems used to prepare and respond to international disasters.

FES 6847 Foundations in Humanitarian Assistance and Coordination (3). Focused on the role and responsibilities of the organizations engaged in humanitarian assistance.

FES 6848 Disaster Health Readiness (3). This course examines the efforts to provide humanitarian assistance from the perspective of the humanitarian agency and professional health worker in the field.

FES 6856 Introduction to Disaster Logistics (3). Focus on the process of planning, implementing and controlling the flow and storage of goods and materials from the point of origin to the point of consumption or use.

FES 6857 Introduction to Vulnerability Analysis and Hazard Mitigation (3). How to develop a community vulnerability analysis and implement mitigation and risk reduction initiatives to reduce future damage and build greater hazard resilient communities.

FES 6858 Crisis Communications (3). This course introduces students to the principles and practical tools of crisis communications during emergencies.

FOS 6236 Food Toxicology & Food Safety (3). Discusses food and water borne bacterial, parasitic, and viral infections and intoxication. Examines food additives, and contaminants. Describes toxic food constituents as well as naturally occurring toxicants. Prerequisites: Graduate standing and food science competency.

FSS 6535 Computer Assisted Food and Nutritional Services Management (3). Advanced course in computer analysis and utilization for detection and resolution of problems of food service and nutritional care. Prerequisites: Advanced graduate standing, DIE 6128 or equivalent, and computer competency.

GEY 5600 Physical Change and Healthy Aging (3). Primary health care and wellness with discussion and assessment of normal physiological alterations and their relationship to common health concerns and medical problems of older adults.

HSC 4751 Statistical Applications (3). The intent of this course is to familiarize students with the basic approaches to social research as applied in healthcare settings. Emphasis will be placed on techniques for organizing and presenting data for policy and management decision-making.

HSA 6505 Risk Management (3). This course provides students with the basics for managing risk in health care systems and prepares students to obtain a Certificate of Risk Management. Prerequisite: PHC 6102.

HSC 7935C Doctoral Seminar in Health Systems Research (2). This doctoral seminar includes presentations by researchers and doctoral students on studies, theories, and applications related to health systems research.

HUN 5123 Ethnic Influences on Nutrition and Food Habits (3). Systematic study of food habits of various cultural groups. Emphasis on methodology, analysis of data, relationship of food habits to nutritional standards, and corrective measures. Includes laboratory. Prerequisite: Competency in food preparation and nutrition. Recommended for non-majors.

HUN 5195 International Nutrition: Problems, Policies, and Planning (3). Advanced study of magnitude, causes and nature of under nutrition in developing countries; emphasis on programs, planning and policies directed toward alleviating hunger. Prerequisite: Permission of the instructor. Recommended for non-majors.

HUN 5245 Nutrition and Biochemistry (3). Advanced study of the relationship of nutrition and biochemistry with emphasis on digestion, absorption, metabolism of nutrients, and determination of norms. Prerequisites: Organic Chemistry and Physiology.

HUN 5611 Nutrition Education in the Community (3). In-depth study of nutrition education information and methods in the community including the nutrition education component of school food service and other congregate meal programs. Prerequisites: Recent courses in nutrition education or permission of the instructor.

HUN 5621 Food, Nutrition and Communication (3). Concepts and techniques for effective professional communication with individuals, groups and other professionals. Emphasis on communication via mass media. Prerequisites: Competency in food and nutrition knowledge.

HUN 6248 Sports Nutrition (3). The influence of exercise on specific nutrient demands and utilization of nutrients will be examined. Nutritional requirements and interrelationships between nutrition and exercise in the prevention and management of common diseases such as

obesity, hypertension, diabetes and cardiovascular disease will also be discussed. Prerequisites: Human Nutrition and Intermediate Physiology. (S, odd years)

HUN 6254 Drug and Nutrient Interaction (3). The interaction of drug and nutrient metabolism in relation to optimum nutrition. Prerequisites: Advanced Nutrition, Biochemistry, Physiology.

HUN 6255 Nutrition in Wellness Program (3). Examination of required factors for successful development, implementation and evaluation of wellness programs and investigation of interrelationships between nutrition/physical activity as means of chronic disease risk reduction. Prerequisites: Advanced Nutrition and Nutrition Education.

HUN 6257 Physio/Psychology of Food Intake (3). Examination of food intake regulation with applications in both research and practice. Prerequisites: Competence in nutrition and physiology.

HUN 6266 Nutritional Assessment (3). In-depth study of the methodology and application of nutritional assessment. Prerequisites: HUN 4241 or equivalent, DIE 3244 and Lab or equivalent, and DIE 4246 and Lab or equivalent.

HUN 6285 Nutrition and Metabolism I (3). Advanced study of the human nutrition of carbohydrates, lipid, fiber, thiamin riboflavin, pantothenic acid, biotin and choline. Prerequisites: Advanced Nutrition, Biochemistry, Physiology.

HUN 6286 Nutrition and Metabolism II (3). Advanced study of the human nutrition of protein, energy, folate, vitamin B6, vitamin B12 and water. Prerequisites: Advanced Nutrition, Biochemistry, Physiology.

HUN 6287 Nutrition and Metabolism III (3). Advanced study of the human nutrition of vitamins C, A, D, E, and K, and essential macro and trace minerals. Prerequisites: Advanced Nutrition, Biochemistry, Physiology.

HUN 6295 Contemporary Issues in Food and Nutrition (3). Critical evaluation of current controversies in nutrition and dietetics research. Prerequisites: Advanced Nutrition, Biochemistry, Physiology, Research Methods.

HUN 6307 Carbohydrates and Lipids (3). The biological, physiological and metabolic functions of carbohydrate and lipids as they relate to human nutrition. Prerequisites: Biochemistry, Advanced Nutrition and Physiology.

HUN 6327 Proteins (3). Protein metabolism, physiology and nutrition. Prerequisites: Biochemistry, Advanced Nutrition, and Physiology.

HUN 6335 Functions of Vitamins (3). Integration of chemical, biological and physiological functions of vitamins as related to human nutrition. Prerequisites: Advanced Nutrition, Biochemistry, Physiology. (S, even years)

HUN 6355 Minerals in Human Nutrition (3). The physiological and metabolic functions of selected macro and trace minerals as they relate to nutritional status in humans. Prerequisites: Advanced Nutrition, Biochemistry, Physiology. (S, odd years)

HUN 6415 Pediatric Nutrition (3). This course is designed to apply the principles of physiology,

biochemistry and nutrition to Medical Nutrition Therapy for healthy infants, children and adolescents.

HUN 6416 Advanced Pediatric Nutrition (3). This course is designed to apply the principles of physiology, biochemistry and nutrition to Medical Nutrition Therapy for medically compromised infants, children and adolescents. Prerequisite: HUN 6415.

HUN 6417 Nutrition of the High Risk Infant and Newborn in Intensive Care (3). This course is designed to apply the principles of physiology, biochemistry and nutrition to nutrition care and planning for high risk infants and newborns in intensive care.

HUN 6435 Nutrition and Aging (3). Changes associated with aging and the impact of nutrition on these changes. Prerequisite: Permission of the instructor. (S, odd years)

HUN 6522 Public Health Nutrition (3). Development and assessment of nutrition programs for the general population throughout the life cycle. Prerequisites: DIE 3310 or equivalent.

HUN 7408 Nutrition Across the Lifespan (3). The course will explore social, economic, physiologic, and lifestyle factors that influence nutrition status across the stages of growth and development, maturation, and aging. Prerequisites: HUN 4403, HUN 4241, DIE 5247.

HUN 7523 Community Nutrition (3). Evaluate models and methodologies to identify public health nutrition issues; analyze current and historical research/nutrition policy; recognize necessary infrastructure to support policy. Prerequisites: HUN 4410, HUN 6522, PHC 6500.

HUN 7524 Nutrition Science and Implications for Community Health (3). Critical examination and synthesis of current human nutrition science topics with emphasis on implications to human health, nutrition, public health policy, and research. Prerequisites: Nutritional Biochemistry and Pathophysiology.

IHS 6502 Principles of Clinical Trials (3). Advanced study of clinical trials including research design, ethics, monitoring and analysis. Prerequisites: PHC 6706 or equivalent.

IHS 6937 Interdisciplinary Graduate Seminar (1-3). Multidisciplinary seminar including foundations of reasoning and investigative methods focusing on a multi-dimensional problem related to social, legal, policy, economic, and health issues. Prerequisite: Research Methods.

IHS 6948 FIU Behavioral Health Workforce Education and Training Fellowship (0-3). Inter-professional and integrated care training of behavioral health clinicians to competently serve the underserved, uninsured, economically disadvantaged and those with chronic health conditions. Prerequisite: Acceptance in BHWET Fellowship Corequisite: For Field Practicum II semester: SOW 6533, SOW 6425 For Field Practicum III semester: SOW 6534 and SOW 6351

PHC 5009 AIDS: Contemporary Issues (3). This course introduces the contemporary social and public health issues associated with the AIDS epidemic and the policies and programs designed to prevent HIV transmission.

PHC 5108 Foundations of Public Health Practice for Social Workers (1). This course will serve as an

introduction to applied public health (PH) for MSW level social workers, provide an overview of public health disciplines and provide exposure to its field applications.

PHC 5158C A History of United States Health Policy (3). Places contemporary health policy controversies into historical perspective by highlighting some of the major health-related issues that have drawn federal intervention during the past two centuries. Prerequisite: PHC 6102.

PHC 5409 Public Health Behavior Change Theory and Practice (3). A course for health promotion practitioners who lack formal training in behavior change foundations and strategies. The course emphasizes applications to practical development of health promotion interventions. (S)

PHC 5415 Public Health in Minority/Urban Population (3). Covers the scope of Public Health Issues related to minority and urban populations with an emphasis on health care status, utilization of the health care system and expenditures. (F)

PHC 5581 Public Health Aspects of Complementary and Alternative Medicine (3). Introduction of theory, practice and scientific evidence for complementary and alternative medicine. Emphasis on regulatory issues and quality assurance; politics of use and social, cultural and historical factors.

PHC 5675 The Cuban Maternal and Child Health Paradox: A View from Santiago de Cuba (3). This course consists of visits and encounters with workers in the front line of MCH in Cuba who contribute to the Cuban "paradox" (low maternal and infant mortality in a low-resource setting).

PHC 6000 Epidemiology I: Introduction to Public Health Epidemiology (3). This course is an introduction to the study of the distribution, determinants, and measurement of health and disease in populations, including design methods and their application. (F,S)

PHC 6001 Environmental and Occupational Epidemiology (3). This course covers outbreaks; cluster analysis; cross-sectional, case-control, cohort, ecological and time series designs; surveillance programs; environmental cancer; reproductive hazards, biological monitoring and biomarkers. Prerequisites: PHC 6315 and PHC 6000.

PHC 6002 Infectious Disease Epidemiology (3). This course covers principles specific to infectious disease epidemiology, explores the application of epidemiologic methods to infectious disease problems, and examines surveillance, and outbreak investigation. Prerequisites: PHC 6000 and PHC 6065.

PHC 6003 Chronic Disease Epidemiology (3). A review of selected epidemiologic research methodology as it applies to infectious and chronic diseases and its application towards understanding selected major infectious and chronic diseases from a population based perspective. Prerequisite: PHC 6000.

PHC 6004 Injury Epidemiology and Prevention (3). Analyzes the impact and extent of injuries as a public health problem. Issues of prevention, sources of data, environment, social and occupational aspects are included

in an epidemiological approach. Prerequisite: PHC 6000. (SS)

PHC 6007 Cancer Epidemiology (3). This course will provide an understanding of the epidemiological patterns, etiology and risk factors of cancer from a community and population perspective. Prerequisite: PHC 6000.

PHC 6008 Cardiovascular Disease Epidemiology (3). This course will increase understanding of epidemiological patterns, etiology and risk factors of selected major cardiovascular disease from a population based perspective. Prerequisites: PHC 6000, PHC 6065.

PHC 6009 AIDS Epidemiology and Control (3). Reviews the epidemiology, virology, immunology, and clinical aspects of HIV, and also examines its impact upon risk groups and the responses of society to the epidemic. Prerequisites: PHC 6000 and PHC 6065 or permission of the instructor. (S)

PHC 6012 Current Research in Epidemiology (3). This course will examine current areas of research in epidemiology and bring students into contact with researchers in various fields. Prerequisites: PHC 6000, PHC 6065. (S)

PHC 6013 Epidemiology II: Observational Design (3). The fundamental concepts, principles, and methods of observational epidemiologic research at an intermediate level. (S)

PHC 6014 Behavioral Epidemiology (3). This course will examine human behaviors as determinants of health and disease, methods of exploring these relationships, and ways of altering risk behaviors. Prerequisite: PHC 6000.

PHC 6016 Social Epidemiology (3). Explores the epidemiological aspects of health and medical care of the poor and disadvantaged population groups. Emphasis on the relationship of organization and delivery of health care, including health promotion, prevention, and related topics. Prerequisite: PHC 6000 and PHC 6065 or permission of the instructor. (F)

PHC 6020 Clinical Epidemiology (3). A course on methods in clinical epidemiologic studies, including study design, sample size, clinical measurements, clinimetric indices, casual inference, analytic issues and clinical decision making. Prerequisites: PHC 6065, PHC 6000 or permission of the instructor.

PHC 6033 Mechanism of Complex Disease in Public Health (3). This course will review genetic and non-genetic epidemiologic associations with complex diseases together with the underlying biological basis for them to develop strategies for prevention. Prerequisites: PHC 6000 and undergraduate course in (human) biology.

PHC 6034 Intermediate Epidemiology (3). This course is designed for Public Health students requiring a more thorough knowledge of the concepts and methods used in epidemiological research. Prerequisite: PHC 6000.

PHC 6052 Biostatistics I (3). An introduction to basic biostatistical techniques for MPH students majoring in Biostatistics, but also open to those seeking a thorough understanding of and ability to use the essential biostatistical procedures. Prerequisites: Familiarity with basic algebra and basic calculus is important.

PHC 6055 Data Management and Epidemiologic Analysis Using SAS/SPSS (3). Covers practical issues related to the management, security, and analysis of epidemiologic data by creating, managing, and analyzing an epidemiologic database using statistical software packages. Prerequisite: PHC 6052, or permission of the instructor.

PHC 6056 Longitudinal Health Data Analysis (3). Applied longitudinal health data analysis; methods to compare different health treatments and behavioral interventions. Focus will be on models for single and multiple correlated public health outcomes. Prerequisites: PHC 6052, PHC 6091 or permission of the instructor.

PHC 6059 Survival Data Analysis (3). Concepts of lifetime events and survival data in Public Health; modern methods used to analyze time-to-event data; non-parametric and parametric models. Prerequisite: PHC 6052, PHC 6091, or permission of the instructor. Corequisite: PHC 6091.

PHC 6060 Principles and Approaches to Biostatistical Consulting (3). The course specifically addresses the process of providing biostatistical consulting support for public health, medical and clinical research. Prerequisites: PHC 6052, PHC 6091, PHC 6093.

PHC 6062 Systematic Reviews and Meta-Analysis (3). This course is designed to train students in the conduct of a systematic literature review and developing the skills critical for evidence-based clinical and public health practice.

PHC 6063C Health Policy Database Applications I (3). In this course students identify and manage secondary data to obtain quantitative evidence to support public health/health system decision making. Prerequisites: PHC 6000, PHC 6065

PHC 6064 Applied Statistical Methods for Discrete Data (3). This course will offer students a focused introduction to statistical models for the analysis of binary medical and public health data. The course will provide an introduction to the application of statistical models for PH outcomes in epidemiology, dietetics and nursing. Prerequisite: PHC 6052 or permission of the instructor.

PHC 6065 Public Health Statistics (3). Covers the basic concepts and tools for non-biostatisticians, including descriptive statistics, confidence intervals, hypothesis testing, the basic statistical tests and data presentation. (F,S)

PHC 6067 Probabilistic Graphical Models (3). Concepts and implementation of Probabilistic Graphical Models, comparative study the models, and their suitability for various datasets. Prerequisites: PHC 6052, PHC 6091, or permission of the instructor.

PHC 6080 SAS Computing for the Health Sciences (3). Course covers essential computer-based techniques for the SAS system for data management and statistical analysis relevant to public health. Topics include: programming techniques, macro programming, and SQL with SAS. Prerequisites: PHC 6052, PHC 6091 or permission of the instructor.

PHC 6084 Introduction to Bayesian Inference (3). This course will introduce students to probabilistic statistical inference using the Bayesian approach, as well as equip

students to perform basic computing within the Bayesian statistical framework. Prerequisite: PHC 6052 and PHC 6091.

PHC 6086 Cluster Analysis for Public Health (3). This course introduces data matrix, types of data, measures of similarity, hierarchical and non-hierarchical clustering methods, density based methods, clustering trees, and number of clusters. Prerequisites: PHC 6065 or an equivalent, basic calculus and linear algebra.

PHC 6087C Health Policy Database Applications II (3). Students will analyze secondary data and communicate results to inform evidence-based public health/health system decision making. Prerequisite: PHC 6102, PHC 6063C

PHC 6090 Advanced Public Health Statistics (3). Public Health Statistics continuation. Covers the concepts and interpretation of randomized blocks and factorial ANOVA, multiple, logistic and proportional hazards regression techniques and survival analysis. Prerequisite: PHC 6065.

PHC 6091 Biostatistics 2 (3). Continuation of Biostatistics I. Covers advanced methods for ANOVA, different regression and correlation techniques and survival analyses. Prerequisite: PHC 6052.

PHC 6093 Biostatistical Data Management Concepts and Procedures (3). Covers procedures and tools for data management, including data collection, transfer, handling, quality and security issues for research projects for public health, medicine and related fields.

PHC 6099 R Computing for Health Sciences (3). This course will introduce R statistical software computing and analytics associated with topics discussed in Biostatistics I and II. Prerequisite: PHC 6052 Biostatistics I or equivalent statistics course with permission of instructor. Corequisite: PHC 6091 Biostatistics II or permission of instructor.

PHC 6102 Introduction to Public Health Policy and Management (3). This core public health course introduces students to comparative health systems and policies in the United States and globally with key concepts and methods in policy assessment and evaluation.

PHC 6103 Introduction to Applied Public Health (3). This course will serve as an introduction to applied public health and provide an overview of core public health disciplines with hands-on exposure to its application in the field.

PHC 6104C Public Health Management and Leadership (3). This course integrates theory with practice by examining management, leadership and organizational behavior in public health organizations.

PHC 6110 Health Risk Appraisal (3). Health promotion technique designed for identifying personal health risks and the use of these methodologies for inducing behavioral change. Evaluation of the effectiveness of various health appraisal instruments. Prerequisite: Biostatistics and Epidemiology.

PHC 6113 Community Health Promotion Planning and Research (3). This course allows students to develop and apply the research principles necessary for needs assessments, planning, implementation, and evaluation of

health promotion programs for diverse populations. Prerequisite: PHC 6410

PHC 6118 Population Health Management and Improvement I (3). This course is an introduction to population health management, an emerging model in healthcare delivery that involves moving from individual-based episodic healthcare to a population health model. Prerequisite: PHC 6102.

PHC 6146 Health Promotion Program Planning and Intervention Design (3). The principles of and practices of health promotion program planning and design, development, testing of behavioral interventions are described and explained in this course. Prerequisites: PHC 6410, PHC 6706, PHC 6065.

PHC 6147C Continuous Quality Improvement in Healthcare Organizations (3). This course covers continuous quality improvement (CQI) strategies in healthcare and health systems, including foundational concepts in patient safety and quality, leadership, teams, and systems. Prerequisite: PHC 6102

PHC 6148 Strategic Planning for Healthcare Organizations (3). This course introduces students to strategic planning for healthcare organizations encouraging modern business approaches, including the planning process and using data to identify growth opportunities. Prerequisite: PHC 6102.

PHC 6150 Public Health Policy Analysis and Formulation (3). Strategies for formulating public health policy; political processes; resource allocation, organization, and participation. Examination of current policy issues and efforts to effect change. (SS)

PHC 6154C Evidence Synthesis Applied to Clinical Settings and Health Policy-Making (3). This decision-making processes in health-policy and clinical settings and describes methods for communicating evidence synthesis to its end-users. Prerequisites: PHC 6000, PHC 6065.

PHC 6155C Health Policy Analysis (3). Students will analyze public health and health care policies from multiple perspectives, communicate health policy issues via written reports, and develop the capacity to collaborate with peers. Prerequisite: PHC 6065.

PHC 6160 Public Health Budgeting and Financial Management (3). The course covers the analysis of healthcare financial statements, cost allocation, and budgeting. It introduces the basic concepts of accounting and reimbursement methods of healthcare organizations.

PHC 6183 Disaster Risk and Emergency Management in Public Health I (3). This course meets the demand for new management strategies and skills that will permit an orderly, structured, effective, and flexible approach to health emergency preparedness and response.

PHC 6185 Disaster Risk and Emergency Management in Public Health II (3). This course meets the demand for new management strategies and skills that will permit an orderly, structured, effective, and flexible approach to health preparedness and response. Prerequisite: PHC 6183.

PHC 6190 Biostatistical Methods for Survey Research (3). Discusses the biostatistical issues for sample surveys in the health sciences. Includes the use of national/state

health databases. Prerequisites: PHC 6052, PHC 6091, or permission of the instructor.

PHC 6251 Disaster and Emergency Epidemiology (3). Disaster and Emergency Epidemiology studies the public health response to natural disasters, environmental emergencies and perpetuated acts of terrorism.

PHC 6256C Population Health Management and Improvement II (3). This is second in a two-course sequence. This course moves students from the conceptualization of population health management issues and initiatives to real-world implementation and evaluation. Prerequisites: PHC 6102 and PHC 6118.

PHC 6307 Exposure Assessment in Environmental and Occupational Epidemiology (3). Surveys available mechanisms utilized by public health and environmental agencies to monitor levels of pollution, environmental quality, and change in environmental conditions which impact human health. Prerequisites: PHC 6000, PHC 6065, PHC 6315. (SS)

PHC 6310 Environmental Toxicology (3). Theory and practice of occupational and environmental toxicology; health effects of toxins in humans; principles of toxicology; toxicokinetics; and health effects of toxins on organ systems. Prerequisite: PHC 6315.

PHC 6311 Environmental Health Risk Assessment (3). This course explores environmental health care management problems associated with risk to the population from exposure to particular agents and conditions. Emphasizes practical problems in risk estimation through the case method approach. Prerequisite: PHC 6315. (S)

PHC 6312C Health Impacts of Air, Water and Land Pollution (3). The course covers the impact of air, water and land pollution on human health/well-being and on the whole environment plus pollution and control measures of each kind of pollution. Prerequisite: PHC 6315.

PHC 6315 Introduction to Environmental Health Sciences (3). An overview of public health philosophy and government organization in the provision of official agency, environmental, and preventive medicine services, with particular emphasis on the regulatory and surveillance responsibilities authorized in the public sector. (F,S)

PHC 6316 Environmental Health Management (3). The course provides the student with skills in management of the programs dealing with food, water, waste, radiation, workplace, air, energy, human establishments, and humanitarian challenges. Prerequisites: PHC 6315 or permission of the instructor.

PHC 6326 Emerging Environmental Health Issues (Local/County, State, U.S., and Global) (3). This course is designed to provide students in environmental health with a step-by-step guide to the practical application of knowledge already acquired in environmental and occupational health sciences.

PHC 6328 Molecular and Cellular Toxicology (4). The course is designed to provide a mechanistic understanding of how environment agents result in toxicity at the cellular and molecular level through interactions with receptors, enzymes, and DNA.

PHC 6329 Biomarkers (3). This course will provide an understanding of the principles, identification, validation and application of molecular biomarkers, and their use health/disease risk assessment in human populations.

PHC 6355 Environmental Health and Safety (3). The course covers recognition of environmental hazards and injuries and the principles of environmental safety including regulations, standards and models of accident causation at work places. Prerequisite: PHC 6315.

PHC 6356 Fundamentals of Industrial Hygiene (3). The course covers recognition, evaluation, and control of chemical biological and physical agents in the workplace; application to exposure, control measures, and standard setting procedures. Prerequisite: PHC 6315.

PHC 6374 Environmental Disasters and Human Health (3). This course will provide an overview of environmental disasters and the measures designed to reduce the impact of disasters on Environmental Health. It aims to strengthen the ability of people to withstand the disruption of their accustomed infrastructure and systems for environmental health.

PHC 6380 Introduction to Neurotoxicology (3). This master-level course will provide students a knowledge of how environmental neurotoxicants may impact the development and progression of brain diseases such as Alzheimer's and Parkinson's.

PHC 6382C Neuropharmacology (3). This course introduces fundamental concepts in neuropharmacology, such as pain relief and mood modulation, and describe how environmental factors affect drug actions in the nervous system.

PHC 6383C Neurobehavioral Techniques (3). A master's level course designed to introduce students to neurobehavioral methods used in the research lab and clinic to assess the effects of environmental exposures. Prerequisite: PHC 6380, PHC 6382C

PHC 6410 Health Behavior and Public Health (3). The overall goal of this course is to introduce the student to the learning and behavioral science theories that provide the framework for the practice of health promotion and public health. Prerequisites: Public Health major or permission of the instructor. (F,S)

PHC 6412 Health Promotion in Culturally Diverse Communities (3). This course will examine both analytical and practical approaches to cultural competency, cultural humility, and addressing the public health needs of culturally diverse communities.

PHC 6422 Regulatory Aspects of Environmental Health Sciences (3). The application of law as it relates to the environment and human health. Legal process and rule-making; cost-benefit analysis; judicial review; evidentiary problems; and other elements of environmental law are emphasized. Prerequisites: PHC 6000, PHC 6065 and PHC 6315. (S)

PHC 6430C Public Health Economics (3). This course focuses on the application of basic microeconomics tools to the analysis of consumers', producers', and insurers' behavior in the market for health care. Prerequisite: PHC 6065 or permission of the instructor.

PHC 6436 Advanced Issues in Economic Evaluation of Health Care Programs (3). This course presents applications of economic evaluation issues including cost analysis, health outcomes, and health state utilities. Prerequisites: PHC 6065, PHC 6430.

PHC 6441 Epidemiology of Health Disparity (3). This course is designed to provide an overview and understanding of Health Disparity, its indicators, measuring methods and models as well as theoretical underpinning for explanation of Health Disparity. Prerequisites: PHC 6000 and PHC 6065.

PHC 6442 Global Environmental Public Health (3). This graduate level course addresses global public health issues by integrating the complex molecular, biological, environmental, technological and social system interactions causing diseases. Prerequisites: PHC 6315 or PHC 6312 or by instructor's permission and IDS 3189 or IDS 3183.

PHC 6443 Ethical Issues in Public Health (3). This course provides an overview of ethical principles, perspectives, and decision-making in public health. (F,S)

PHC 6465C Public Health and Medicine in History (3). This course introduces students to central themes and questions pertaining to the history of medicine, public health, and health care in the United States.

PHC 6500 Foundations of Public Health Practice (3). Philosophy, nature, and scope of public health; organization and administration; principles of disease prevention and health promotion; current issues and trends; socioeconomic and political forces. Prerequisites: Public Health major or permission of the instructor. (F,S,SS)

PHC 6504 Introduction to Public Health Education and Wellness (3). Primarily intended to introduce graduate students to concepts and principles underlying the use of Public Health and Behavioral Strategies to positively influence behavioral patterns. Prerequisites: Public Health major or permission of the instructor. (S)

PHC 6510 Advanced Infectious and Tropical Disease Epidemiology (3). Course covers advanced principles specific to tropical infectious disease biology, immunology, pathogenesis, epidemiology, and investigation strategies relevant to S Florida, Caribbean, Latin America. Prerequisite: PHC 6000 and PHC 6002

PHC 6520 Public Health Aspects of Foodborne Diseases (3). Examines the scope of the foodborne disease problem; factors that contribute to outbreak of foodborne disease; strategies for the prevention and control of these diseases are explored. Prerequisites: PHC 6000, PHC 6065, and PHC 6315. (SS)

PHC 6530 Principles of Maternal and Child Health (3). Covers the scope of the field of maternal and child health with emphasis on the needs of infants, children, youth, women and families in the reproductive cycle and programs designed to meet these needs. Prerequisites: Public Health major or permission of the instructor. (S)

PHC 6531 Environmental Justice: Contextualizing Maternal and Child, Women, Youth, and Family (WYF) Wellbeing (3). Explores disparities in exposures to environmental agents and conditions and related adverse events and outcomes relevant to maternal, child,

reproductive, and family health and approaches to respond.

PHC 6536 Health Demography (3). The study of basic population structure, composition, trends and relationship to health status. Implications of demographic trends, policies for public health; population growth, immigration, infant mortality. Prerequisites: PHC 6065 or permission of the instructor. (SS)

PHC 6537 Case Studies in Maternal and Child Health Programs, Policies and Research (3). Seminar course focused on intended and unintended impact of programs and policies on the health of women and children from a life course perspective, identifying research gaps and needs. Prerequisite: PHC 6530 or permission of the instructor. Corequisite: If student has not taken PHC 6530, should be taken concurrently.

PHC 6538 Gene & Environment Interaction (3). Genetic issues and topics that impact on Public Health will be covered such as HW gene frequencies and HUGO. A public health perspective with a field of study.

PHC 6580 Contemporary Issues in Health Promotion (3). Current problems and findings in health promotion content areas such as smoking, alcohol, and drug misuse, family health, safety, physical fitness, communicable and chronic diseases will be discussed. Prerequisites: PHC 6000 and PHC 6065. (SS)

PHC 6589 Health Promotion in Institutional Settings (3). This course will investigate the role, methods and techniques used to promote health in diverse settings such as clinic and community agencies, schools, universities and workplaces. (SS)

PHC 6591 Reproductive Health Epidemiology (3). This course focuses on current research, methodological issues, and discusses case studies in the epidemiology of reproductive and perinatal health from domestic and international setting. Prerequisites: PHC 6000 and PHC 6065.

PHC 6595 Genetic Epidemiology (3). This course provides a background to genetic epidemiologic methods, and focuses on design, execution, analysis and interpretation of genetic association studies. Basic genetics will also be covered. Prerequisites: PHC 6000 or approval by instructor.

PHC 6600 Health Promotion Communication Theory and Design (3). Theory, design, and implementation of health education communication utilized in reaching the public. Emphasis on the critical analysis of the communication processes; group techniques and media methods; and the consultation process. Prerequisites: Health Promotion Concentration or by permission of the instructor. (F)

PHC 6601 Emerging Issues in Public Health (3). Investigation of emerging public health issues, such as public health informatics, genomics, global health, policy and law, and public health ethics, within the framework of ecological model.

PHC 6602 Theoretical Foundations of Health Promotion (3). The course will emphasize the use of psychosocial theories in understanding and addressing public health problems. Prerequisites: PHC 6410, PHC 6065.

PHC 6604 Current Issues in Health Policy (3). This course is an intervention of current public health policy issues, such as chronic disease, health disparities, and healthcare reform within a policy analysis framework.

PHC 6700 Methods and Analysis in Epidemiological Research (3). This course provides understanding of principles, methods and analytical techniques applied in epidemiologic research using multimedia and interpersonal approaches of instructions to motivate and explain with real life examples. Prerequisite: PHC 6000.

PHC 6701 Advanced R Computing (3). This course will introduce writing statistical computing and data science code in R covering data structures, graphics, reports, functions and scripts for analysis pipelines. Prerequisite: PHC 6099 or equivalent computational statistics course (with instructor permission).

PHC 6703 Epidemiology Methods: Experimental Design (3). Introduction to clinical and community trial design and conduct, randomization, blinding, recruitment, data collection, assessment of adverse effects, compliance with therapy, and analyses. Prerequisites: PHC 6013, PHC 6xxx – Public Health Statistics II.

PHC 6706 Research Methods in Public Health (3). Study of scientific research, inductive and deductive thinking, research methods and design as applied to the field of Public Health. Prerequisite: Undergraduate statistics course.

PHC 6709 Quantitative Research Analysis in Health Urban Affairs I (3). Application of quantitative techniques used for research analysis in health and urban affairs research and practice settings. Prerequisites: STA 3145 or STA 6166 or equivalent.

PHC 6715 Survey Research in Public Health (3). Health survey design, implementation and analysis, and interpretation of data. Emphasis on practical aspects of conducting health surveys. Study of existing health surveys. Prerequisites: PHC 6000 and PHC 6065. (F,S)

PHC 6730C Neurotoxicology Research Methods (3). A master's level course designed to introduce students with fundamental approaches in neurotoxicology and interpreting research results in environmental health sciences. Prerequisite: PHC 6380.

PHC 6750 Program Development and Evaluation in Health Promotion (3). Focuses on the development, implementation, and evaluation of health promotion programs to improve health outcomes. Prerequisites: PHC 6000 and PHC 6065. (SS)

PHC 6751 Community Organization for Health Promotion (3). Emphasis is on the diagnosis of community health problems and various organizational strategies utilized for effective solution. Review and analysis of community organization process; resources; and the role of health promotion specialist. Prerequisites: Health Promotion Concentration or permission of the instructor. (F)

PHC 6754C Analytic Methods in Maternal and Child Health (3). Enhances skills in independent data analysis using free software (Epi Info, OpenEpi) and publicly available data in local and state health agency professionals and students preparing for MCH practice.

PHC 6762 International Public Health (3). This course describes international differences in the distribution and determinants of disease and health, and examines interventions aimed at improving health status. (F)

PHC 6763 Global Perspectives of Environmental Health in Caribbean and Latin America (3). The course describes the relationship between human health and the environment in developing countries of the Caribbean and Latin America. Prerequisite: PHC 6315.

PHC 6900 Environmental Public Health Genomics and Molecular Toxicology Journal Club (1). Students will learn to read, evaluate, present and discuss papers. Papers will be presented on a diverse set of topics related to genetics of environmental human diseases and molecular toxicology.

PHC 6901 Readings in Public Health (1-3). Individual advanced study in a comprehensive overview of Public Health or in-depth advanced study of a specialty. Prerequisites: Permission of instructor and Advanced standing in the graduate program.

PHC 6907 Independent Study: Public Health (1-3). Allows student investigations of special topics and issues utilizing literature searches, analysis, or active performance in public health settings under the direction of faculty supervision. Prerequisite: Permission of the faculty advisor.

PHC 6914L Current Topics in Environmental Health Sciences Research Lab (1-9). To conduct laboratory based analytical research and collect data.

PHC 6920 Special Topics in Environmental Health Sciences (3). This course is designed to impart in depth knowledge of emerging issues in the area of environmental and occupational health.

PHC 6921 Environmental Health Sciences Seminar (1). This is an oral communication course intended to provide graduate students the opportunity to practice speaking in front of an audience and to present their research data or topic of interest.

PHC 6930C Integrative Seminar in Public Health (3). Integrative Seminar serves as the culminating experience for MPH degree and the final assessment of the public health competencies required of MPH graduates. Prerequisites: PHC 6945 or instructor consent, if exempt from PHC 6945.

PHC 6931 Special Topics in Biostatistics (1-3). This is a series of 1-3 credit hour offerings, on topics of considerable interest to advanced masters and doctoral students in public health, not limited to statistical methods. Prerequisites: PHC 6052, PHC 6091, or permission of the instructor.

PHC 6934 Scientific Writing and Oral Presentations in Epidemiology and Biostatistics (3). Covers the planning and execution of written and oral presentations in epidemiology/biostatistics by critically evaluating published articles and preparing a manuscript and an oral presentation. Prerequisites: PHC 6000 and PHC 6065.

PHC 6939 Special Topics in Cardiovascular Disease Epidemiology (3). The purpose of this course is designed to impart in-depth knowledge of a particular cardiovascular disease or risk factor that is affecting populations

nationally and or internationally. Prerequisites: PHC 6000, PHC 6065, or permission of the instructor.

PHC 6945 Practicum in Public Health (3). This course is a preceptor-guided experience in public health organization. It provides an opportunity for graduate students in Public Health to bridge the gap between theory and practice. Prerequisite: Permission of the faculty advisor. (F,S,SS)

PHC 6971C Master's Thesis in Public Health (1-6). The Master's Thesis is a scholarly manuscript resulting from a long period of research and related preparation, undertaken to fulfill partially the requirements of an advanced degree.

PHC 6977 Master's Research Project (3). Course provides the student with an opportunity to pursue research in an area pertaining to Public Health.

PHC 7011 Advanced Current Research in Epidemiology (3). The purpose of this course is to examine and critically review current areas of research in Epidemiology with focus on observation studies. Prerequisites: PHC 6000, PHC 6013, PHC 6065 or equivalent.

PHC 7015 Advanced Research Methods-Experimental Design (3). A course on methods in experimental epidemiologic studies, including randomization, blinding, assessment of adverse effects, compliance, and intent-to-treat, survival and subgroup analyses. Prerequisites: PHC 6000, PHC 6065, PHC 6013.

PHC 7017 Advanced Epidemiology for Health Disparity (3). Provides advanced understanding of health disparity - disparity indicators, complex measurement methods and applications, theoretical frameworks, and analysis and evaluation of programs/policy. Prerequisites: PHC 6055 and PHC 6065 or equivalent.

PHC 7018C Advanced Environmental Health (3). The objective of this course is to teach students advanced toxicology principles such as toxicokinetics, polymorphisms of metabolizing enzymes, toxicogenomics, and biomarkers of toxic exposure. Prerequisite: PHC 6310.

PHC 7050 Advanced Biostatistics I (3). Introduction to mathematical expectation of random variables, probability distributions, moment generating functions, sampling, covariance and correlation, point estimation of distribution parameters.. Admission to the PhD program in Biostatistics, or satisfactory completion of the following undergraduate courses or their equivalents: MAC 2311-2313, MAS 3105, STA 3111-3112, STA 3163-3164, MAA 3200, STA 4321-4322, MAA 4211-4212.

PHC 7051 Advanced Biostatistics II (3). Familiarize students with the likelihood principle, point estimators, interval estimators, hypothesis testing, Bayesian point and interval estimators, and asymptotic evaluations. Prerequisite: PHC7050 or equivalent (permission from instructor).

PHC 7054 Advanced Biostatistics III (3). Generalized linear model and estimating equation approaches for non-linear public health data. Held in the Public Health Informatics Laboratory utilizing various statistical software. Prerequisites: PHC 7050, PHC 7051, or permission of the instructor.

PHC 7064 Applied Structural Equation Modeling (3). Will introduce the application of SEM to public health data including model specification, path analysis, testing fit, confirmatory factor analysis, longitudinal data analysis, and the interpretation. Prerequisite: PHC 6052 and PHC 6091 or equivalent courses (with instructor permission)

PHC 7083 Advanced Bayesian Inference (3). This course will cover advanced topics related to Bayesian methods such as prior assumptions, hierarchical modeling and computational MCMC methods with various sampling algorithms. Prerequisite: PHC 6084 or equivalent

PHC 7095C Advanced Methods for Health Systems Research (4). This course focuses on quantitative research methods using secondary data and introduces students to a wide spectrum of national and global health policy databases. Prerequisite: PHC 6091.

PHC 7162 Grant Writing in Public Health (3). Course covers proposal writing political/social aspects of "grantmanship" identifying sources of grant funding doing research to support the application, and tailoring the proposal to specific audiences. Prerequisites: PHC 6091, PHC 7705, PHC 7981.

PHC 7198 Advanced Qualitative Methods in Public Health (3). Advanced research design, data analysis and writing findings in qualitative research. Prerequisites: PHC 6706, PHC 6715, or equivalent advanced research methods.

PHC 7300 Biological Basis of Environmental Diseases (4). This course describes the state of homeostasis of anatomical and physiological systems where contributing environmental factors are translated to influence the human health and diseases.

PHC 7327 Emerging Issues in Environmental Health Sciences (2). This course will explore emerging scientific discoveries to understand environmental human disease and how the emerging technologies can be applied to environmental health and regulatory decisions.

PHC 7372 Signal Transduction in Environmental Health and Toxicology (3). Designed to develop critical and analytical thinking about how hazardous agents interfere with normal signaling while others may mimic endogenous stimulants and mediators.

PHC 7374 Organ-Specific Toxicology (4). Provides an advanced understanding of the responses of specific, key organ systems (e.g. immune, renal, hepatic, reproductive) to toxic insult.

PHC 7381C Neuroscience (4). This course will familiarize doctoral students with fundamental concepts in neuroscience with emphasis on the role of environmental factors play in the modulation of neurological processes.

PHC 7384 Advanced Neurotoxicology (4). This doctoral course will provide students an in-depth knowledge of how various environmental neurotoxicants may induce neurotoxicity resulting in neurodegeneration as seen in some brain diseases. Prerequisite: PHC 7381C

PHC 7385C Emerging Issues in Neurotoxicology (2). This course will require doctoral students to integrate media reports and scientific literature to develop socially-relevant and impactful hypotheses for research in

environmental health sciences. Prerequisite: PHC 7381C, PHC 7384.

PHC 7437C Applied Economic Evaluation for Health Systems Research (4). This course is an advanced methods course focuses on the economic evaluation of health policies, programs, and systems. Prerequisites: PHC 6091, PHC 7095C.

PHC 7466 Policy and Advocacy in Global Health Disparities (3) This course focuses on the influence of policy and advocacy on health disparities in the United States, Caribbean region and globally and other structural factors impacting disparity.

PHC 7502 Health Promotion in the Workplace (3). This course emphasizes program design, management, and evaluation of health promotion in corporations. Issues in health assessment, fitness, wellness, and stress will be covered. Prerequisites: PHC 6589, PHC 6410.

PHC 7583 Policy and Practice in Health Promotion (3). Intensive exploration of health promotion policies with critical analysis. Preparation to develop effective policies and to assess the appropriate practice of health promotion or different levels.

PHC 7584 Advanced Research Designs (3). This course reviews and critically evaluates multiple research methods of analysis from disciplines such as psychology and sociology as they apply to health promotion research and ethics. Prerequisites: PHC 6750 and PHC 6146 or permission of the instructor.

PHC 7587 Theory Development in Health Promotion (3). Discussion and critique of the structural components and research processes related to the origination and construction of health promotion theories. Prerequisites: PHC 5409 and PHC 6602.

PHC 7588 History and Foundations of Public Health (3). This course reviews the evolution of the public health profession and the principles and practices of health promotion. Prerequisites: advanced standing.

PHC 7606 Tobacco Use: Causes, Consequences, and Control (3). The course will utilize a broad approach to provide a comprehensive overview of the history, epidemiology, health effects, and policy aspects of the tobacco epidemic. Prerequisites: None for PhD students, and core courses for MPH students.

PHC 7702 Advanced Measurement in Public Health (3). Advanced course in measurement and evaluation in public health. Computer applications for public health practice emphasized. Prerequisites: PHC 6065, PHC 6715, PHC 6750.

PHC 7705 Methods in Evidence Based Public Health (3). Review of methods in evidence based public health; study designs addressing patient reported outcome measures; health status measures, area-based health intervention evaluation, quality of life and survival measures in health interventions. Prerequisite: PHC 6065.

PHC 7711 Methodological Issues in Scientific Inquiry of Public Health Research (3). Understanding and application of analytical methods in the philosophy of science in order to explore systematically the critical methodological issues underlying public health research. Prerequisite: Doctoral standing.

PHC 7713 Advanced Environmental Toxicology Research Methods (2). Students will gain an appreciation and knowledge of key methods in environmental toxicology, and how to apply these to the design, execution, and analysis of environmental health case studies. Prerequisites: PHC 6001, PHC 6065, Ph.D. standing or advanced MPH student with departmental approval.

PHC 7716 Advanced Research Methods: Survey Research (3). Conceptualization of survey research including how to conduct a survey and present results for professional publication. Prerequisites: PHC 6706, PHC 6065.

PHC 7719 Multivariate Methods in Health Sciences Research (3). Advanced statistical methods for analysis of multivariate data and related statistical inference in public health and biomedical research. Prerequisites: PHC 6052, PHC 6091, or permission of the instructor.

PHC 7723 Survey Research in Public Health (3). This course facilitates the systematic identification, interpretation, and understanding of survey research concepts, principles, and practices in public health. Prerequisites: PHC 6000, PHC 6065, PHC 6410, PHC 6706.

PHC 7731C Advanced Neurotoxicology Research Methods (2). A rigorous doctoral level course designed to familiarize students with fundamental approaches in neurotoxicology necessary for conducting cutting-edge research in environmental health sciences. Prerequisite: PHC 7381C Corequisite: PHC 7384.

PHC 7732C Research Ethics & Scientific Integrity (1). This course will introduce and familiarize students with basic elements of research ethics using real-life scenarios to create a foundation of responsible research conduct.

PHC 7733 Theoretical Paradigms in Health Disparities Research (3). This course focuses on the concept of cultural and social diversity in public health and its importance in guiding policy, programs, services, and health within a community.

PHC 7753C Applied Econometrics for Health Systems Research (4). This methods course focuses on using econometrics methods to identify causal relationships using cross-sectional or panel data for health systems research. Prerequisites: PHC 6091, PHC 7095C.

PHC 7908C Health Systems Research Readings 1 (3). This is the first of a two-semester course sequence for doctoral students covering the main components of health system in the U.S. and abroad, and the diverse ways in which researchers analyze them. Prerequisite: Permission of the instructor.

PHC 7909C Health Systems Research Readings 2 (3). This is the second of a two-semester course sequence for doctoral students covering the main components of health systems in the U.S. and abroad, and the diverse ways in which researchers analyze them. Prerequisite: Permission of the instructor.

PHC 7917 Environmental and Occupational Health Sciences Pre Doctoral Research (1-6). This course is designed to provide the Pre-Doctoral student with experience in the conduct of a research project with

guidance from appropriate environmental and occupational health faculty.

PHC 7932 Health Disparities Training and Development Seminar (3). This course focuses on health disparities development and research training in the areas of HIV, substance abuse, obesity, and diabetes with a focus in the United States and the Caribbean region.

PHC 7933 Seminar in Biostatistics (1-6). Course emphasis on the biostatistical methods used in research. Various biostatisticians will present their current research and lead class discussions on the development of their research agenda. Prerequisites: PHC 7050, PHC 7051, PHC 7054.

PHC 7980 Dissertation (1-12). Research for doctoral dissertation under the supervision of a major professor and a doctoral committee. Prerequisites: Permission of instructor and doctoral candidacy.

PHC 7981 Research Concepts and Proposal Development (3). The purpose of this course is to present the basic general components of research, to describe methods, and to present perspectives specifically and directly applicable to the field of public health. Prerequisites: PHC 6091 or equivalent.

PHC 7982 Public Health Pre Dissertation Research (1-6). This course is designed to provide Doctoral students with the guidance necessary to prepare for comprehensive examination and dissertation proposal under the guidance of the dissertation chair. Prerequisites: Admission into the Ph.D. program, instructor consent, completion of coursework.

SOW 5105 Human Behavior and the Social Environment I (3). Study of individuals and families with emphasis on the analysis of biopsychosocio-cultural factors (including racial/ethnic and gender variables) affecting human development and social functioning through the life cycle. Prerequisites: 12 semester hours of college-level courses in the social and behavioral sciences and one college-level course in biology (including coverage of human biology).

SOW 5109* Crises in the Lives of Women (3). An overview of special experiences in the lives of women which might lead women to seek professional assistance. Topics include pregnancy, domestic violence, rape, abortion, childbirth, sex discrimination, AIDS, climacteric, widowhood. Prerequisites: Senior or graduate standing.

SOW 5116 Trauma Theory and Interventions (3). This course will provide an overview of theories related to trauma over the lifespan and skills necessary to assess and intervene in situations involving trauma. Prerequisites: SOW 5105, Human Biology, Human Behavior, and Social Environment or similar. Corequisites: Social work major or similar field.

SOW 5155* Social Work Practice with Sexual Problems (3). Skills applicable to sex-related concerns encountered in social work practice. Presents theories of the etiology of common sexual problems and explores treatment intervention modalities. Prerequisites: Graduate or senior level practice course or permission of the instructor.

SOW 5235 Social Welfare Policy and Services I (3). This course analyzes major social welfare policies and

programs in the United States, their emergence, development, contemporary operations and how they shaped the development of the Social Work profession.

SOW 5240* Advanced Interventions in Child Maltreatment (3). This course will examine best practices in the health, mental health, and socio-emotional development of children and adolescents within the child welfare system. Prerequisites: SOW 5105 and SOW 5342 or advanced standing status.

SOW 5241* Advanced Child Welfare Policy and Practice (3). This course will explore professional practice and policy issues in child welfare, with emphasis on intervention in child maltreatment. Prerequisites: SOW 5235 and SOW 5105 or advanced standing status.

SOW 5324 Theory and Practice With Groups (3). Study and application of biopsychosocial, cultural dimensions, theories, techniques and intervention strategies for social work group practice. Prerequisite: SOW 5342. Corequisite: SOW 5532.

SOW 5342 Social Work Practice with Individuals and Families (3). This course is an overview of social work practice with individuals and families placing emphasis on professional values, interviewing skills, assessment, intervention, and outcome evaluation, all within a cross-cultural perspective. Pre/Corequisite: SOW 5105. Corequisite: SOW 5379L.

SOW 5344 Theory and Practice with Communities and Organizations (3). Study and application of biopsychosocio-cultural dimensions, theories, techniques and intervention strategies for communities and organizations. Focuses on empowerment of populations at risk and promotion of social and economic justice.

SOW 5354* Crisis Intervention in Social Work Practice (3). This course examines the etiology, structure, theory, and application of crisis intervention in social work practice. It provides assessment criteria for assignment to this form of treatment and techniques for intervention. Prerequisites: Senior or graduate level practice course, or permission of the instructor.

SOW 5365* Behavior Therapy in Social Work Practice (3). Overview of the principles, clinical foundations, and applications of socio-behavioral approaches relevant to social work practice. Emphasis on behavioral change methods and problem solving in assessment, intervention, and evaluation. Prerequisite: SOW 5342 or Advanced Standing Status.

SOW 5379L Interviewing Skills Lab (3). Competency-based course providing graduate students with basic interviewing skills for social work practice. Emphasis is on acquisition of interviewing behavior rather than theory. Corequisite: SOW 5342.

SOW 5404 Social Work Research Methodology (3). This course provides information on the principles and methods of basic social work research. The ethical conduct of research is taught within the context of social work purposes and values. The formulation of problems for study that address the social needs of diverse population groups is emphasized. Prerequisite: Statistics.

SOW 5455* Writing and Managing Grants for Social Service Programs (3). Prepare students to write, develop and manage grants for social services programs. Develop

knowledge of grant sources, the grant making, writing and management of grant funded social welfare services. Prerequisite: SOW 5344.

SOW 5532 Field Practicum I (3). The first masters-level field practicum and seminars that provide students with the opportunity to apply and integrate generalist social work knowledge and skills. Prerequisites: SOW 5105, 5235, 5342, 5404, 5379L. Pre/Co-Req: SOW 5629, 5344. Corequisite: SOW 5324.

SOW 5541* Advanced Standing Seminar (2). This course examines the integration of academic knowledge and social work skills that develop the profession's critical thinking foundation. Prerequisites or Corequisites: SOW 6125, SOW 5324.

SOW 5605* Medical Social Work (3). Principles of medical social work practice in hospitals and communities. Focuses on the social worker as part of the health care team, with basic knowledge of medical problems of patients and their families. Prerequisites: Graduate or senior standing.

SOW 5607* Social Work Practice and Psychopharmacology (3). Social work practice, research, and policy in relation to psychotropic drugs including effectiveness and limitations of main drug classes and ethical, professional, legal, scientific and cultural issues. Prerequisites: Graduate or senior standing.

SOW 5614* Social Work Practice with Persons Affected by Domestic Violence (3). Course prepares students to appropriately identify, assess, and intervene with persons affected by domestic violence utilizing assessment and intervention strategies in practice. Prerequisites: Graduate or Senior standing with the permission of the instructor.

SOW 5621* Social Work with Refugees, Immigrants, and Migrants (3). Provides skills and knowledge responsive to the needs of immigrants and refugees and addresses influences of cultural, ethnic, gender, age, and class differences in acculturation and service delivery. Prerequisites: Graduate or Senior standing with the permission of the instructor.

SOW 5624* Feminist Therapy in Social Work (3). Reviews basic principles of feminist therapy and focuses on the application of feminist therapy in clinical social work practice. Prerequisites: Graduate standing or permission of the instructor.

SOW 5629 Social Work Practice with Diverse Populations (3). Prepares students for responsive practice with diverse populations, with emphasis on South Florida. Includes knowledge and skills in interviewing, assessment interventions, termination, and follow-up. Prerequisite: SOW 5342.

SOW 5635* School Social Work Practice (3). Designed to assist students in developing knowledge and skills necessary for effective social work practice in school settings. Promotes understanding of social work practice to improve the functioning of children. Prerequisite: SOW 5342 or Advanced Standing Status.

SOW 5640* Foundations in Gerontology for Health Professions (3). Implications for health professions of the biological, cross-cultural, physiological, psychological, social, and societal contexts of aging.

SOW 5641* Understanding the Process of Aging (3). Study of the physical, psychosocial, and cultural factors affecting human development in late life, from a social work perspective. Prerequisites: Graduate or senior standing and permission of the instructor.

SOW 5672* Animal Assisted Treatment for Social Work (3). An introduction to the human animal bond and animal assisted treatment. There will be illustrations of programs using small animals, horses, and dolphins. Prerequisites: Graduate or permission of instructor.

SOW 5710* Current Issues in Addiction Practices (3). An overview of chemical dependency in the social service delivery system including policy and program approaches, client assessment, treatment techniques and prevention issues. Prerequisites: Graduate or Senior standing.

SOW 5805C* Counseling the Elderly (3). Applied gerontological knowledge to counseling skills required for independent as well as frail elderly clients. Course focuses on long and short term interventions in a range of practice settings. Prerequisites: Graduate or senior standing.

SOW 5806 Disaster Behavioral Health (3). A combination seminar and lecture course in which students will learn about the fundamentals of mental and behavioral health issues and practices in disaster response and recovery. Prerequisite: SOW 5105 or Advanced Standing Status or Permission of instructor.

SOW 5905* Individual Study (1-3). Individually selected program of advanced supervised study related to specific issues in social work and social welfare. Prerequisite: Permission of the instructor.

SOW 5921 Self-Awareness and Self-Modification for Practice (3). An experience-oriented course directed toward helping students become aware of their own interpersonal processes and how these may influence their skill and effectiveness as helping persons.

SOW 5932* Seminar in Social Work (3). An exploration of various critical issues of concern to the social work profession. Prerequisites: Graduate or senior standing.

SOW 6114C* Assessment and Treatment of Addiction and Related Problems (3). Course provides increased understanding of treatment for addictive disorders including assessment, therapeutic techniques and supportive aftercare as well as community consultation and referral skills. Prerequisite: SOW 5710.

SOW 6125 Human Behavior and the Social Environment II-Psychopathology (3). Study of the psychosocial aspects of client problems, including psychopathology, frequently encountered by social workers in direct practice with attention to differential treatment issues. Prerequisite: SOW 5532 or advanced standing status.

SOW 6236 Social Welfare Policy and Services II (3). This course offers students the opportunity to gain in-depth knowledge about social welfare policy-making processes and their impact on the social service delivery system. Prerequisites: SOW 5532 and advanced standing.

SOW 6243* Child and Family Social Policy Issues (3). A comprehensive overview of the range of children and family policies, programs and issues in the U.S.A. in the context of comparing residual and institutional approaches

to social service delivery, and policy implications for use of each approach.

SOW 6245* Social Welfare Policies and Services to the Elderly (3). The content of the course will center around the federal/state policies affecting the quality of life of the older person. Among the areas to be considered are an overview of the situation of the aged, specific public and private social welfare policies, including the origin of policy making, and problems involved in the process of implementation of social welfare policies for the elderly.

SOW 6281* Legal Aspects of Social Work Practice (3). Introduction to legal aspects of social work practice including client and agency rights, malpractice issues, legal research, and practice interaction with legal counsel, legal services, and the courts.

SOW 6351 Clinical Intervention in Couple and Family Social Work Practice (3). Provides students with a critical and culturally sensitive understanding and application of the major models of social work intervention with couples and families. Prerequisite: SOW 6533 and SOW 6425 Assess. And Intervention. Corequisite: SOW 6534.

SOW 6359* Social Work Treatment with Families of the Elderly (3). Preventive and treatment approaches in social work practice with families of the elderly. Focus on aging family as client-system; knowledge, skills needed for a range of interventions are provided.

SOW 6372* Supervision, Consultation and Staff Development (3). Key aspects of the social services supervisory situation are explored. This course emphasizes supervisory competence, issues facing supervisor and supervisee. Also explores consultation and staff development.

SOW 6386* Social Program Planning and Development (3). Theory and practice of social program planning and development for organizations and communities. Social services to families, children and elderly, especially service needs for which programs do not exist will receive special emphasis.

SOW 6387* Social Services Management Skills (3). Learning units in which students practice and demonstrate, through simulation and participation, skills in major aspects of social services management.

SOW 6425 Clinical Assessment and Intervention Planning (3). Critical analysis of assessment models, the current issues, skills of assessment and intervention planning, including the evidence basis of assessment practice. Prerequisites: SOW 5324 and SOW 5532 or advanced standing. Corequisite: SOW 6533.

SOW 6435 Evidence-Based Social Work Practice (3). Examines the foundations, tools to find resources, design tailored interventions, implement, and evaluate evidence-based social work practice. Prerequisites: SOW 5532 or advanced standing.

SOW 6436* Empirically-Based Practice in Social Work (3). Advanced utilization of intervention effectiveness research results and techniques in social work practice with individuals, families and groups. Prerequisites: SOW 6435 and an advanced practice course.

SOW 6533 Field Practicum II (3). The first part of two masters-level advanced field practicum courses and

integrative seminars that provide students with the opportunity to apply and integrate advanced clinical knowledge and skills. Prerequisites: A BSW/BSSW degree and advanced standing status or satisfactory completion of SOW 5532, 5344, 5629, 5324. Pre/Co-Reqs: SOW 6125, 6435, 6236. Corequisite: SOW 6425.

SOW 6534 Field Practicum III (6). The second advanced field practicum/ integrative seminar which includes licensure prep and capstone, giving students the opportunity to apply and integrate advanced clinical knowledge and skills. Prerequisites: SOW 6533, 6435, 6125, 6236. Corequisite: SOW 6351.

SOW 6611* Advanced Practice with Family Systems (3). Advanced clinical skills in working with families and couples. Focus will be given to non-traditional change strategies such as family sculpting, family reenactment, family choreography and dramatization. Extensive use of videotaped case simulations, co-therapy, live supervision and peer evaluation models. Prerequisites: SOW 6351 or permission of the instructor.

SOW 6646* Social Work Practice with the Elderly (3). The knowledge and skills necessary for advanced social work practice in social agencies which deal with problems and issues of the aging population in contemporary society.

SOW 6647* Advocacy in Social Work Practice (3). This course covers skills and knowledge necessary for the practice of advocacy on behalf of individuals and groups, including political, legislative, and organizational perspectives.

SOW 6649* Social Work Practice in Long Term Care and the Elderly (3). This course focuses on direct practice with the frail elderly and their families within the rapidly changing system of community and institutional long term care.

SOW 6655* Clinical Intervention in Child and Adolescent Social Work Practice (3). This course will provide students with the opportunity to select, apply and evaluate appropriate intervention strategies in working with children and adolescents. Specific attention to socio-cultural, gender and racial differences in understanding development issues and in critically assessing the applicability of practice theories. Prerequisites: SOW 5324, SOW 5532, or advanced standing program.

SOW 6656* Decision-Making in Child Placement (3). This course will stress decision-making and interventions when substitute care is considered or carried out. Termination of parental rights and the choice and timing of placements of children will be considered.

SOW 6711* Prevention of Addiction and Related Problems (3). Course provides increased understanding of substance abuse prevention including history and effective approaches as well as skills to reinforce healthy lifestyles and identify early potential problems. Prerequisite: SOW 5710.

SOW 6914* Independent Research (1-6). Individually selected program of supervised data collection and analysis on specific topics in social work and social welfare. Prerequisites: SOW 5404 and permission of the instructor.

SOW 7216 Social Welfare Policy (3). Using a systemic approach and focusing on high-risk populations, this course analyzes the social welfare policy-making process and its impact on public and private social service delivery systems. Prerequisites: Admission to Ph.D. program or permission of the instructor.

SOW 7237 Micro-Practice Theory and Research (3). Analysis of research priorities in the development of effective interventions in the social welfare field. Prerequisites: Admission to Ph.D. program or permission of the instructor.

SOW 7238 Macro-Practice Theory and Research (3). This course focuses on intervention theory research and methods at the community, organizational and societal level. Prerequisites: Admission to Ph.D. program or permission of the instructor.

SOW 7406 History and Systems of Social Work Research (3). Development, dissemination, and utilization of Social Work Research; the social work research tradition; types of research questions in Social Welfare; past and current contextual influences on social work research.

SOW 7492 Theory Development and Research Methods in Social Welfare (3). The logic of social research, role of theory in social welfare research, range and limitations of research methods, ethical issues. Students begin work on their doctoral research proposal. Prerequisites or Corequisites: STA 6166 or equivalent. Prerequisites: Admission to Ph.D. program or permission of the instructor.

SOW 7493 Research Methods in Social Welfare II (3). This second course in a two-semester sequence focuses primarily on design, measurement, and analysis issues in ethno-graphic field studies, surveys and group experiments for the evaluation of intervention technology in social welfare. Prerequisites: SOW 7492 and STA 6166, or equivalent.

SOW 7916 Supervised Research (3). Directed experience in the conduct of research in social welfare and social work under the guidance of a faculty member. Must be taken twice for a total of six credits. Prerequisite: Completion of first year.

SOW 7932 Interdisciplinary Seminar on Social Welfare Within an Urban Milieu (3). Academics from social work and allied disciplines and professions will discuss their theoretical interests and research activities. Prerequisite: Successful completion of first year of Doctoral program.

SOW 7936 Dissertation Seminar in Social Welfare (3). This course focuses on helping students with the development of the dissertation prospectus. Emphasis is placed on development of an acceptable research protocol in the students' specialization area. Prerequisites: SOW 7215, SOW 7237, SOW 7238, SOW 7492, and SOW 7493.

SOW 7980 Ph.D. Dissertation (1-12). This course provides dissertation guidance to doctoral candidates in the Ph.D. program in Social Welfare. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

SYG 6932 Special Topics in Disaster Studies (3). Case studies of major disasters used to explore topics such as impact of gender, class, ethnicity, and age on vulnerability,

response, and outcome; effects of larger political and economic systems; and relationship to social change. May be repeated with change of topic.

*Social Work Electives

The Chaplin School of Hospitality and Tourism Management offers Bachelor and Master Degrees in Hospitality Management that combine practical experience with classroom theory to assist the student in gaining the understanding, skills, and techniques needed to qualify for progressively responsible job opportunities and to achieve his or her career goals in the hospitality and tourism industries. The graduate program is available in person and completely online. Some courses available in the evening.

With the cooperation of industry executives, the School has created an internship program which literally utilizes the hotels, resorts, restaurants, clubs, airlines, travel agencies, and cruise lines as practice labs for students.

An Industry Advisory Council - which includes outstanding executives in the lodging, food service and tourism industries - works regularly with the faculty, staff, and students of the School to formulate and update a curriculum that is current, flexible, and related to the needs of the hospitality and tourism industries.

The School was designated a Program of Distinction by the former Florida Board of Education.

Note: The programs, policies, requirements, and regulations listed in this catalog are continually subject to review, in order to serve the needs of the University's various publics, and to respond to the mandates of the Florida Board of Education and the Florida Legislature. Changes may be made without advanced notice. Please refer to the General Information section for the University's policies, requirements, and regulations.

Location

The School is located on 200 tropical acres in a resort-like setting at the scenic Biscayne Bay Campus at Biscayne Boulevard and Northeast 151 Street, North Miami, Florida.

Admission

Applicants to the School must submit a graduate application for admission to the University and must follow the regular University admission procedures described in the Admission section of the catalog.

Applicants must be eligible for admission to the University before admission to the School. Admissions standards for the Master of Science degree in Hospitality Management are an earned four-year bachelor's degree with a 3.0 grade point average (GPA) on a 4.0 scale. International graduate student applicants whose native language is not English are required to demonstrate English language proficiency through one of the following:

- 80 on the iBT TOEFL (equivalent to 550 on the paperbased version of the Test of English as a Foreign Language);
- 6.5 overall on the International English Language Testing System (IELTS)
- 53 Pearson Test of English - Academic
- Cambridge English - Advanced;
- Applicants who hold an undergraduate or graduate degree from an accredited institution where the language of instruction is English;

Or

Successful completion of University level English courses from a regionally accredited institution (e.g. ENC 1101, ENC 1102 or other equivalent courses with a letter grade of "B" or higher) that prepare applicants to be proficient in English.

Or

ELI Level Six: successful completion with passing grades for all content areas. Plus at least one of the following:

- i) Interview (in person when possible or via videoconference).
- ii) Proctored video-taped responses to questions from the admissions committee.

An applicant with an undergraduate upper division grade point average (GPA) of less than 3.0 should submit scores of Graduate Record Examination (GRE or Graduate Management Admission Test (GMAT), which will be taken into consideration by the admissions committee in its evaluation of the application. Students who have earned a minimum 3.0 (as evaluated by the University Graduate Admission's office) may be waived from the GRE or GMAT requirement.

A maximum of six semester hours of related graduate credit may be transferred from another university or from the graduate programs of this University provided they meet University requirements.

There is a requirement that all students complete 1000 hours of practical work experience in the hospitality or tourism industry in addition to the Graduate Internship of 300 hours. A minimum of 800 hours of the total 1300 hours must be completed while enrolled at FIU. Work experience documentation is required.

Degree Requirements

To be eligible for a Master’s degree, a student must:

1. Satisfy all University requirements for a Master’s degree.
2. Complete a minimum of 33 semester hours of graduate level course work in the Hospitality Management curriculum. (Exception: Executive Hospitality Management Track).
3. Earn a minimum grade point average of ‘B’ (3.0) in all approved courses in the student’s graduate program of study.

No courses, in which a grade below ‘C’ is earned, may be counted toward the Master’s Degree in Hospitality Management. However, all approved work taken as a graduate student will be counted in computing the grade point average, including courses graded ‘D’ or ‘F’.

4. Pass an English Assessment Examination given by the University’s Writing Center.

Non-Degree Seeking Students

Individuals who do not have the educational requirements to meet degree admission standards may be interested in enrolling in certain specific courses to improve their skills and to enhance their chances for promotion. A person may register as a Non Degree Seeking Student for a maximum of 12 semester hours. These credits and grades will not be considered for admission to our degree programs.

Distance Education Programs

The School of Hospitality Management offers the following programs via distance learning:

1. Executive Master of Science in Hospitality Management
2. Master of Science in Hospitality Management
3. Master of Science in Hospitality Management: Specialization in Real Estate Development
4. Master of Science in Hospitality Management: Specialization in Revenue Management
5. Master of Science in Hospitality Management: Mega Events Management

Master of Science in Hospitality Management

Core Requirements: (33)

HMG 6246	Organizational Behavior in Hospitality and Tourism	3
HMG 6257	Hospitality and Tourism Industry Research Analysis	3
HMG 6280	Global Issues in Hospitality and Tourism	3
HMG 6296	Strategic Management for Hospitality and Tourism	3
HMG 6466	Hospitality and Tourism Revenue Management	3
	or	
HMG 6476	Feasibility Studies for the Hospitality	

	Industry	3
	or	
HMG 6478	Restaurant Development	3
HMG 6477	Accounting and Financial Management	3
HMG 6586	Research and Statistical Methods	3
HMG 6596	Marketing and Sales in Hospitality and Tourism	3
HMG 6697	Hospitality Law Seminar	3
HMG 6916	Hospitality Industry Research Project	3
	or	
HMG 6946	Graduate Internship*	3
	Elective Course	3

Industry Experience Requirement: 1300 hours*

The three credit Graduate Internship (HMG 6946) involves 300 hours of hospitality practical training experience and is immediately required for all graduate students at the beginning of their first semester of studies unless prior experience warrants a waiver of this requirement (see advisor for information) or students are approved to complete HMG 6916, Hospitality Industry Research Project.

Prior to registering for Internship, students are required to complete 1000 hours of hospitality related practical work experience. A minimum of 500 out of the 1000 hours must be completed while enrolled in the graduate program at FIU and up to 500 hours may be completed prior to enrolling at FIU. Work experience documentation is required. If the candidate provides documentation of 1300 hours of work experience of management level work, the requirement may be waived.

Master of Science in Hospitality Management: Executive Masters Track

Management Experience

A minimum of five years hospitality related management experience is required for acceptance into this track. Applicants must currently hold a management position in the hospitality or tourism industry. A Bachelor’s degree from an accredited institution is required.

Core Requirements: (30)

HMG 6246	Organizational Behavior in Hospitality and Tourism	3

Master of Science in Hospitality Management: Mega Events Management (In Person and Fully Online)

The mission of the Chaplin School is to prepare leaders to design and develop the customer experiences of the future. The proposed new track fulfills the mission of the Unit by providing students with unique real-world opportunities to cultivate their academic experiences. As part of the University's Mission of being committed to high-quality teaching, state-of-the-art research and creative activity, and collaborative engagement with our local and global communities, the proposed track will offer teaching by highly qualified academicians with industry experience. In addition, the real-world opportunities will offer our students a unique opportunity for research endeavors. These same opportunities also raise engagement with local and global communities, from the assessment to the preparation and execution of mega events. The expectation for those focusing on mega-events management is that they will have some training and/or experience in event production prior to enrollment as demonstrated by: 1. at least four years of full-time event experience, **or** 2. a bachelor's degree with an emphasis in events, **or** 3. possession of appropriate industry certification. Those lacking any of these will need to demonstrate competency on the foundational topics necessary to succeed in the master's degree by reading several documents selected to provide solid overviews on aspects of events planning and completing an online test. It is highly recommended this be done prior to starting the events portion of the master's curriculum.

Course Requirements (33)

HMG 6257	Hospitality and Tourism Industry Research Analysis	3
HMG 6446	Hospitality and Tourism Technology Innovations	3
HMG 6477	Financial Management for the Hospitality Industry	3
HMG 6697	Hospitality Law Seminar	3
HMG 6280	Global Issues in Hospitality and Tourism	3
HMG 6296	Strategic Management for Hospitality	

	and Tourism	3
HMG 6946	Graduate Internship	3
Mega Event Management		
HMG 6001	Event Feasibility	3
HMG 6500	Event Marketing and Sponsorship	3
HMG 6630	Event Safety & Security Planning	3
HMG 6200	Mega Events Management	3

This is an 11 course, 33 credit program. Graduate Internship should be completed in the final semester.

Combined BS/MS in Hospitality Management Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than 12 graduate credits may be applied toward both degrees. Students must earn a "B" or higher grade in these 4 courses in order to apply towards the Master's degree.

Admission Requirements

1. Current enrollment in the Bachelor's Degree program in Hospitality Management at FIU.
2. Completed at least 75 credit hours of course work.
3. Current GPA must be 3.2 or higher.

General Requirements

1. Complete the separate combined degree pathway application.
2. Applications are typically submitted prior to the first semester of the student's senior year

Required: (33 credits)

HMG 6280	Global Issues in Hospitality and Tourism	3
HMG 6225	Multicultural Human Resources Management for the Hospitality Industry	3
or		
HMG 6246	Organizational Behavior in Hospitality and Tourism	3
HMG 6296	Strategic Management for Hospitality and Tourism	3
HMG 6257	Hospitality and Tourism Industry Research Analysis	3
HMG 6477	Accounting and Financial Management	3
HMG 6476	Feasibility Studies for the Hospitality Industry	3
or		
HMG 6478	Restaurant Development	3
HMG 6916	Hospitality Industry Research Project	3
HMG 6697	Hospitality Law Seminar	3

HMG 6946	Graduate Internship	0
HMG 6466	Hospitality and Tourism Revenue Management	3
HMG 6596	Marketing and Sales in Hospitality and Tourism	3
	Elective Course	3

Overlap

Up to 4 courses (12 credits) may be used to satisfy both the bachelor's and master's degree requirements. Courses must be 5000- or 6000- level School of Hospitality and Tourism Management Graduate Courses and students must earn a grade of a "B" or higher.

Hospitality Management 4+1 Degree Pathway

With their advisor's approval, students from undergraduate majors other than Hospitality Management may apply to the Hospitality 4+1 degree pathway. If accepted, students will be allowed to take up to 12 credits of graduate hospitality management courses which will apply towards both their undergraduate degree requirements and the master's degree program in hospitality management.

The admission requirements are:

1. Current enrollment in an approved bachelor's degree program at FIU.
2. Completed a minimum of 75 credits.
3. Current GPA must be 3.2 or higher
4. Complete the separate 4+1 application, including signed approval by the director or designee from the graduate program.

Course Descriptions

Definition of Prefixes

FSS - Food Service Systems; HFT - Hotel, Food, Tourism; HMG - Hospitality Management Graduate.

Courses that meet the University's Global Learning requirement are identified as GL.

FSS 5755 International Food Production Management (3).

Study of international commercial food production management designed for hospitality graduate students. This course includes instruction on international cooking principles as well as hands-on food preparation in the food laboratories. This course includes weekly interactive lectures and a laboratory experience to allow the learner to develop skills required in food preparation and management.

FSS 6108 Purchasing and Menu Planning (3).

Advanced information on sources, grades and standards, criteria for selection, purchasing and storage for the major foods, including development of specifications. Consideration of the menu pattern with particular emphasis on costing, pricing, and the work load placed on the production staff. Item analysis and merchandising features are emphasized.

FSS 6365 Food Service Systems (3).

Principles of system analysis applied to the food service industry. Attention is given to the organization of modern food production, preparation, and distribution systems. Case study problems require application of economic and management principles for solution.

FSS 6452 Advanced Food Service Design Operations (3). Advanced planning, programming, and project documentation for commercial food service facilities. Spatial, environmental, and electro-mechanical design factors are stressed, with particular emphasis on efficiency modulation and investment aspects. Recommended: HFT 4343.

FSS 6834 Food Service Research (3). The planning, executing, and reporting of an individual research project dealing with significant problems in food service. Students demonstrate an understanding of research techniques through data collection, evaluation, and interpretation.

HMG 5000 Hospitality Pathway to Success (0). A comprehensive overview of academic policies, requirements, and career portfolio development as required for graduation from the Chaplin School of Hospitality and Tourism Management graduate program.

HMG 5485 Financial Accounting and Analysis for the Hospitality Industry (3). This course will introduce students to the basic accounting framework in the hospitality and tourism industries, including an understanding of the recording of transactions and the structure of hospitality financial statements based on the Uniform System of Accounts for the Lodging Industry (USAL).

HMG 5547 Leadership Training for Team Building (3). Students will learn leadership skills to facilitate team building activities in order to improve group communication, trust, problem-solving, and productivity.

HMG 5655 Franchising and Management Contracts (3). A comprehensive course designed to examine the franchise/franchiser, franchisee and owner/manager relationships in hotel and food service operations and the mutual obligations created by each type of contract.

HMG 5719 Implementation and Management of Tourism Projects (3). Practical development, implementation, and management of tourism projects and programs with emphasis on developing tour packages for international and developing nation's situations. Prerequisites: HFT 3700 or equivalent.

HMG 5877 Wine Technology (3). This course is an introduction to the appreciation and management of wine, successful operators merchandising wines in restaurants, retail stores, supermarkets, and wholesale companies. Students learn the economies of buying and selling wine, how to taste and evaluate wines of the great vineyards around the world.

HMG 5878 Wine, Culture and Society (3). A survey of the renowned old and new world wine regions, their evolution in western culture and their role in contemporary society. Grape Varieties/celebrated vineyards; wine classification systems; influence of media on wine consumption. Detailed focus on the restaurant industry in Miami and the U.S. Management of restaurant wine lists. Prerequisite: Must be at least 21 years of age.

HMG 5901, 5906, 5911 Independent Studies (VAR). With permission from the Associate Dean, students may engage in independent research projects and other approved phases of independent study. Prerequisite: Permission.

HMG 5936 Intensive Pod in the Hospitality Industry (1). This course will provide intensive instruction on a particular topic or skill not otherwise offered in the curriculum. This course is repeatable.

HMG 5945 Graduate Hospitality Management Internship (0-3). Managerial experience in one of the major phases of hospitality operations and visitor industry. Reports are required. Prerequisite: Permission of the instructor.

HMG 5957 Study Abroad: Hospitality and Tourism (3). An integrated program of learning conducted in foreign environments for hospitality management majors. They will be exposed to different cultures and taught how to manage businesses in other countries.

HMG 6001 Event Feasibility (3). Determine the viability of an event proposal & selecting an appropriate location; factors, financial considerations, & time-lines for determining whether an event is economically & socially advisable.

HMG 6200 Mega Event Management (3). Leadership in large scale event production requires coordinating and supervising a plethora of trained and untrained personnel. Structure, methodology and planning are examined.

HMG 6208 Hospitality Industry Consulting (3). Provides in-depth analysis of hospitality consulting. Includes opportunities techniques and methodologies used in practice. Lectures, case studies, projects and site visits are used. Prerequisites: HFT 4464 or HFT 4465.

HMG 6225 Multicultural Human Resources Management for the Hospitality Industry (3). A study of personnel, consumer relations, and diversity in the hospitality industry within a multicultural, multiracial, and multi ethnic society through an examination of value systems and cultural characteristics.

HMG 6226 Motivation and Leadership (3). Study of motivation, perception, learning, attitude formation, incentive theory, and job satisfaction, with emphasis on leadership and group task performance.

HMG 6227 Hospitality Management Training Systems (3). A course designed to develop and provide applications of proven training systems and methods for managers in the hospitality industry. The case study method will be used.

HMG 6228 Managing Self and Others in the Hospitality Industry (3). Students will increase managerial effectiveness by learning and applying a model for enhancing self-esteem and integrating that model into their managerial philosophy for the hospitality industry.

HMG 6245 Hospitality/Tourism Service Operations Management – GL (3). Application of techniques to create, operate, staff, and evaluate service systems for hospitality/tourism enterprises. Emphasis on queues, forecasting demand, route and scheduling and quality management. Prerequisites: HFT 3505 or HFT 4509.

HMG 6246 Organizational Behavior in Hospitality Industry and Tourism (3). Study of human behavior in organizational settings, the interface between human behavior & organizations; reflecting several levels of analysis & a wide variety of interactions.

HMG 6256 International Hotel Operations (3). A consideration of various environments within which the international hospitality firm operates. Organizational, financial, and marketing factors are of major concern. Emphasis is placed on those problems and constraints which are uniquely different from problems of firms engaged in domestic operations of a similar nature. Prerequisites: HFT 2401, HFT 3503.

HMG 6257 Hospitality and Tourism Industry Research Analysis (3). Explore emerging domestic & global issues using content analysis & other methodologies to identify & analyze relevant industry problems facing management in the hospitality & tourism industry.

HMG 6278 Timeshare Management (3). Course covers management, marketing, sales legislation, financing, and budgeting of timeshare and vacation ownership properties. Opportunity to gain AEI certification.

HMG 6280 Global Issues in Hospitality and Tourism (3). This course synthesizes theories & concepts of globalization, multinational strategy & international business studies by providing students an opportunity to develop analytical & interpretive skills.

HMG 6291 Entrepreneurship in the Hospitality and Tourism Industry (3). This course will help students understand the rationale and methods leading to a major acquisition and the problems and solutions that go along with the decision. Prerequisites: HFT 2401 and HFT 4464.

HMG 6296 Strategic Management for Hospitality and Tourism (3). Adv. course focusing on thinking strategically & anticipating the future in global economy defined by uncertainly requiring knowledge in strategic resource assessment, decision-making & allocation.

HMG 6297 Seminar in Management Methods (3). Class will be divided into small groups, each of which will meet regularly with the executive committee of an area hotel or restaurant. Each group will be, in reality, the junior executive committee for the property. The groups will come together periodically for analysis and discussion of their experiences, and to relate their experiences to principles of modern management.

HMG 6299 Case Studies in Hospitality Management (3). Case studies are used to analyze and integrate the various disciplines of hospitality management and the visitor industry. A critical attitude toward all administrative and management thought is encouraged. Prerequisite: HMG 6477.

HMG 6325 Hospitality Facilities Engineering and Management (3). Hospitality facilities management from value-oriented system engineering perspective emphasizing management responsibilities for efficiency in building design, operations and utilities systems. Prerequisite: HFT 2401.

HMG 6346 Design and Planning of Restaurants and Hotels (3). Advanced level of study of all aspects considered in designing and planning a restaurant or hotel. Includes lectures, case studies, and laboratory drawing exercises. Scheduling and cost controls considered. Prerequisite: HFT 3263.

HMG 6404 Non Commercial and Contract Food Service Management (3). Advanced management of food service operations in noncommercial facilities, self

operated and contract managed. Includes business and industry, health care, campus dining, correctional, and food service vending.

HMG 6429 Hospitality Asset Management (3). This course will present an overview of the role of hospitality industry asset managers as well as an in-depth study of the techniques and practices employed by them in their representation of ownership.

HMG 6446 Hospitality and Tourism Technology Innovations (3). Advanced course examining Information Technology and how it's utilized to gain competitive advantage - focusing on general concepts of e-commerce, F&B innovations, lodging and GDS, and analytics.

HMG 6447 Hotel Information Systems (3). A seminar on computer systems and their applications within the hotel industry. An intensive study of a computerized property management system. All computer applications are examined, from reservations to the back office through a series of assignments and projects. Prerequisites: HFT 2441 or HMG 6446.

HMG 6448 Advanced Hospitality Computer Applications (3). Importing financial data, international features, linking workbooks, mapping geographical data, scenario manager, goal seeking and optimization problems will be covered. Prerequisites: HFT 2441 or equivalent.

HMG 6455 Revenue Optimization Science (3). Includes applying data & mathematical techniques and algorithms to understand factors that affect business revenue & further optimize revenue via data driven decision-making and predictive models. Prerequisite: HMG 6584

HMG 6464 Segmentation and Price Optimization (3). This course expands upon the central concepts in revenue management—RevPAR (Revenue Per Available Room) and RevPASH (Revenue Per Available Seat Hour). Prerequisite: HMG 6466

HMG 6466 Hospitality and Tourism Revenue Management (3). Explores the scope & application of revenue management in service companies within the Hospitality & Tourism industry.

HMG 6472 Feasibility Studies for Tourism Projects (3). In-depth study of the tools and techniques available for evaluating financial feasibility and cost-benefit analysis of tourism projects. Prerequisites: ECO 2013 and HFT 4465.

HMG 6475 Demand Management: Hotel Revenue Distribution Channels (3). Hospitality demand management is defined as the art and science of dynamically managing demand for hospitality services to optimize profitability and customer relationships. Prerequisite: HMG 6466

HMG 6476 Feasibility Studies for the Hospitality Industry (3). In-depth study of the tools and techniques available for evaluating financial feasibility of a hospitality investment. Feasibility study required.

HMG 6477 Accounting and Financial Management (3). Specialized accounting & finance tools for analysis as related to the hospitality & tourism industry. Application of budgeting & pricing models, risk/return trade off & capital investment analysis.

HMG 6478 Restaurant Development (3). A study of the procedures to research and develop a restaurant from concept to opening. Emphasis will be on market research, site development, financial feasibility, and the formulation of an operating plan for an individual restaurant.

HMG 6479 Strategic Revenue Management (3). This course provides a brief review of fundamental microeconomics, and an illustration for determining a customer's willingness to pay. Prerequisite: HMG 6466

HMG 6486 Investment Analysis for the Hospitality Industry (3). Advanced investment methods and opportunities with emphasis on securities of the hospitality industry, financing techniques, syndication, negotiations.

HMG 6494 Restaurant Information Systems (3). An in-depth study of principles relating to use of computer systems in the restaurant and food service industry. The student is required to implement a simulated restaurant on computer systems. This simulation includes personnel files, daily management, menu explosion and analysis, and inventory tracking. A research project will be assigned. Prerequisites: HFT 2441 or HMG 6446.

HMG 6500 Event Marketing and Sponsorship (3). Examines both marketing trends and sponsorship development. In experiential marketing, event design and promotion must reflect the most current developments in marketing, including social media.

HMG 6507 Tourism Marketing on the Internet (3). An in-depth study of Internet Web site Hosting for tourism managers, including a detailed examination of the current practices of on-line tourism marketing and tourism destination management systems. Prerequisites: HFT 3503, HMG 6555.

HMG 6525 Sales Tactics for Hospitality Industry (3). Advanced course investigating sales tactics and procedures used in hospitality sales environment. Practical application role plays and skill rehearsals used. Prerequisite: HFT 3503.

HMG 6526 Sales Management for the Hospitality Industry (3). Analyzes strategic processes for competitive sales management in hospitality industry. Uses critical thinking models, decision-making simulations and field operation assessments for managing sales function. Prerequisite: HFT 3503.

HMG 6555 e-Commerce for Hospitality and Tourism (3). Planning and managing e-Commerce for hospitality global distribution systems, including major opportunities, limitations, issues and risks from managerial perspectives.

HMG 6562 Global Destination Marketing Organizations (3). An advanced study of the evolution and growth, mission, structure, funding, and roles of the different types of Destination Marketing Organizations worldwide. Prerequisites: HFT 4509 or equivalent.

HMG 6567 Entrepreneurial Marketing for Hospitality and Tourism (3). This class offers hands-on tools for business success and a vehicle for redefining products and markets in innovative ways that produce sustainable competitive advantage. Database management will be used.

HMG 6584 Data Science in Hospitality (3). Includes applying data science techniques, such as data wrangling,

data management, exploratory data analysis, predictive modeling, regression & classification to problems in hospitality & tourism. Prerequisites: CAP 5768, CAP 5771, STA 6244. Corequisite: STA 6247

HMG 6585 Customer Experience Design & Behavior Analysis (3). Crafting the customer experience by measuring it to produce robust data sets. Model, analyze/assess the customer experience & iteratively design & influence customer experience & behavior using data. Corequisite: HMG 6584

HMG 6586 Research and Statistical Methods (3). A study of basic research and statistical methodology applied to a variety of hospitality industry research projects. Techniques for data collection, interpretation and methods of reporting are the focus.

HMG 6596 Marketing and Sales in Hospitality and Tourism (3). An examination of the role of marketing strategy and management within the overall strategic planning process of hospitality/tourism organizations.

HMG 6605 Legislation and the Hospitality Industry (3). An advanced study of the legislative requirements imposed upon hospitality industry operators. Special emphasis is placed on the minimum wage law, sales tax, uniform provision and maintenance, tip credit, the determination of what constitutes hours worked for the various job categories, discrimination, and sexual harassment.

HMG 6607 Hospitality Real Estate Development (3). This course will examine/analyze how hotels, resorts, condo-hotels, vacation properties are developed from concept to planning, analysis, financing and management. Will be conducted in a seminar environment.

HMG 6609 Negotiating Strategies for the Hospitality Industry (3). Students study and practice negotiating strategies to reach more satisfactory outcomes from a business point-of-view. The hospitality industry requires skilled negotiations regarding management contracts, supplier agreements, alliance and franchise agreements.

HMG 6630 Event Safety & Security Planning (3). Starting with risk management assessment, strategies and techniques are explored to operate an event which anticipates and is ready to respond to security, wellness and facilities threats.

HMG 6697 Hospitality Law Seminar (3). New laws and their impact on the hospitality industry are examined. Students research current legal issues and problems and explore the impact of new legislation on the hospitality industry.

HMG 6704 Contemporary Issues in Tourism (3). An in-depth study of current issues and trends confronting the fast development of the tourism activity at national and international levels.

HMG 6705 Management of Nature-Based Tourism (3). Exploration of research methods and findings related to eco-tourism. Review of effective management strategies for controlling nature-based tourism operations.

HMG 6706 Environmental Management Systems for Tourism (3). An in-depth examination of the environmental cost of tourism development. The effective implementation of international models as well as

environmental practices for sustainable tourism development will be studied.

HMG 6707 Travel and Tourism Data Analysis (3). Applies data science & analytics techniques to analyze tourist behavior, forecast demand, design travel packages, develop data-driven marketing strategies & identify factors influencing customers. Prerequisites: CAP 5768, CAP 5771, STA 6244. Corequisite: STA 6247.

HMG 6712 Tourism Planning and Regional Development (3). An in-depth examination of the process of identifying needs, objectives and strategies for tourism development. The formulation and evaluation of tourism policies and plans will be studied. Prerequisites: HFT 3713 or permission of the instructor.

HMG 6715 Problem Solving for Travel and Hospitality (3). Practical discussion and exploration of issues pertaining to the operation and management in the travel and hospitality industry. The course provides creative problem solving solutions utilizing today's information technologies.

HMG 6746 Cultural Behavior in Tourism (3). The course introduces the major cultural groups of overseas visitors to the U.S. and identifies the cultural differences in preferences for specific tourism products and services between these groups and the main stream of the U.S. population.

HMG 6747 Tourism Marketing Research Methods and Applications (3). The nature and characteristics of tourism research are presented, elements of tourism research process examined, and the importance and strategic application of research to tourism decision making highlighted.

HMG 6756 Convention and Meeting Management (3). Advanced study of planning, arranging, marketing, implementing, and managing conventions and meetings. Prerequisite: HFT 3503.

HMG 6816 The Production, Management, and Merchandising of Craft Beers (3). Technical and practical aspects of craft brewing and microbrewery technology. Relevant chemical, biological and physical processes will be examined. Aspects of the management of micro-breweries and brewpubs. Prerequisites: Must also take accompanying Lab. Minimum age 21.

HMG 6816L The Production, Management, and Merchandising of Craft Beers Lab (1). A hands-on overview of the scientific principles and techniques of craft brewing. A sampling of craft beers will be made from basic malt extract kits, partial mash recipes and all-grain techniques. Prerequisite: Minimum age 21.

HMG 6858 Advanced Catering Management and Research (3). This course focuses on research and examination of catering practices used in the catering profession. It includes an in-depth analysis of all components of the catering profession including management, legal aspects, catering contracts, menus and food displays, beverage service, catering equipment, catering logistics, human resources, etc.

HMG 6863 World of Wine and Food (3). An intensive study of wines from around the world and how they pair with foods. Guest chefs will prepare tapa size portions of

food to be paired with local and specific wines. Prerequisite: 21 years old.

HMG 6872C Commercial Beverages of the World (3). An overview of basic aspects of production and serving a variety of beverages involved in hospitality commerce. This course will include presentations from industry procedures as well as tasting and evaluation of commercial products. Prerequisite: Students must be 21 years old.

HMG 6876 Emerging Topics in Food and Beverage (3). An in-depth study of current issues and topics confronting the food and beverage industry and how they impact future business practices. Management implications addressed.

HMG 6879 Components of Wines for Beverage Managers (3). Designed for beverage management students to learn some basic language and scientific concepts employed in wine making. The chemical structures, as well as the aromas and tastes of various specific components in wines will be investigated. These components will include those derived from the grape, the process of fermentation and storage, and will include common wine flaws. Prerequisite: Must be 21 years old.

HMG 6908 Directed Study in Tourism Studies (3). An opportunity for individuals interested in various aspects of planning, development, marketing, management and research in tourism to work on their own under the close supervision of an advisor. Prerequisites: Permission of the instructor and if the directed study is of a research nature, HMG 6586 is required.

HMG 6916 Hospitality Industry Research Project (3-9). Focuses on research methods of business oriented research projects dealing with current problems in the hospitality and tourism industry. Research proposal is the focus.

HMG 6932 Advanced Special Topics in Hospitality Management (0-9). Focus on current issues and advanced subjects related to the hospitality industry. Consent of faculty supervisor and Department Chairperson required. This course is repeatable.

HMG 6946 Graduate Internship (0-9). Structured hospitality practical training work experience involving training program and job rotations not previously performed. Ten week/300 hour minimum. Report and management project required. Prerequisites: Documented completion of 1000 hospitality related work hours of which at least 500 hours must be completed while enrolled at FIU. Permission of the instructor.

HMG 6972 Hospitality and Tourism Thesis (1-3). Design and preparation of an original research investigation in the hospitality and tourism discipline. Prerequisites: STA 5206, STA 6166, and STA 6167 and permission of the instructor.

HMG 7252 Advanced Contemporary Issues in the Hospitality Industry (3). Explores the major emerging issues or problems that impact the domestic and global lodging industry. The students will learn to use content analysis and other methodologies to identify and analyze relevant industry problems and issues facing management and personnel in the lodging industry.

HMG 7909 Advanced Independent Study (3). With permission from the Associate Dean, students may engage in independent research projects and other approved phases of independent study. Prerequisite: Permission of the instructor.

Steven J. Green School of International and Public Affairs

Founding Dean **John F. Stack, Jr.**
Associate Dean, Graduate Studies and Innovation **Shlomi Dinar**
Associate Dean, Planning, Administration and Student Success **Jeffery Gonzalez**
Senior Director, Strategic Initiatives **Pedro D. Botta**

Launched in 2008, the Steven J. Green School of International and Public Affairs at FIU educates the leaders and changemakers of tomorrow through innovative teaching and research that advances global understanding, contributes to policy solutions and promotes international dialogue. The Green School enrolls more than 5,000 students and employs nearly 360 faculty. It offers 37 interdisciplinary degree programs at the bachelor's, master's and doctoral levels, as well as 55 undergraduate and graduate certificate programs. The Green School encompasses eight signature departments: Criminology and Criminal Justice, Economics, Global and Sociocultural Studies, History, Modern Languages, Politics and International Relations, Public Policy and Administration and Religious Studies. Home to 17 of the university's most prominent international centers, institutes and programs, the Green School is an affiliate member of the Association of Professional Schools of International Affairs (APSIA.)

Graduate Programs

The Green School has academic programs leading to Master's degrees in African & African Diaspora Studies, Asian studies, global and sociocultural studies, criminal justice, economics, global affairs, history, international studies, Latin American and Caribbean Studies, political science, public policy and administration, religious studies, and Spanish.

The Green School offers academic programs leading to the Ph.D. in global and sociocultural studies, economics, history, international crime and justice, international relations, political science, public affairs, and Spanish.

Master of Arts in Global Affairs

The Master of Arts in Global Affairs provides a two-year in-person or fully online (36 credits) skills based program enhanced by an interdisciplinary curriculum that will allow students to compete for and excel in employment opportunities in the global marketplace. The program is designed to provide students with the ability to understand and negotiate successfully across societies and borders. Students are trained for careers in the public and private sectors, international organizations, government agencies, non-governmental as well as not-for-profit organizations.

The Master of Arts in Global Affairs program offers four separate tracks of study.

The Globalization and Security track explores the nexus between globalization has broadened and intensified the scale and character of modern-day security challenges

(e.g. transnational crime, natural disasters and environmental change, migration and refugee flows, and surveillance and intelligence). The Global Risk and Corporate Responsibility track aims to train a cadre of future risk managers and corporate citizenship professionals that understand this complex new business environment and can help develop corporate strategies to manage risks and build stakeholder relationships. Emphasizing corporate social responsibility, the program will provide students with the knowledge and the skills needed to craft strategies that promote socioeconomic development and safeguard the environment, while strengthening relationships with key stakeholders and enhancing shareholder wealth.

The International Development track readies students to apply data-based techniques of economics, buttressed with the understanding of relevant sociopolitical factors, to the analysis of practical problems and solutions in international economic development. In our globalized society, development aims to improve our understanding of the world's economically disadvantaged countries and regions, while addressing salient issues, such as poverty, marginalization and inequality. As such, the track will provide students with the needed skills and knowledge to engage and collaborate across various entities such as international organization, government, business, communities, and non-governmental organizations.

The International Crime & Justice track readies students to operate in the areas of domestic and international crime and justice issues. Graduates will be better equipped to understand and respond to transnational crime and justice problems, which continue to present formidable dilemmas in public policy, criminal justice and national security realms. Accordingly, the track will provide students with the needed skills and knowledge to engage and collaborate across various entities which have an interest in managing internationally relevant crime and justice matters.

The Cybersecurity and Technology Policy track combines technical and non-technical foundational courses necessary to understand cybersecurity, as well as emerging technologies and the broader policy implications in an increasingly interconnected world. The curriculum covers a wide-range of key topics and issues—from internet governance and cyberwarfare to critical infrastructure, data security and supply chain management. The program also includes courses in policy formation, computer sciences, law, ethics, business, and international relations to cultivate a holistic understanding of one the most important security trends in the 21st Century.

All Global Affairs students take the same core courses. Each track has its own set of specialty courses. One of the highlights of the program is a core Capstone course, whereby students work on a policy relevant research topic with a mentor from a government agency, corporation, not-for-profit, or international organization. In addition to the mentor, students are also teamed up with a FIU faculty supervisor with expertise on the topic. Non-credit professional development seminars (on topics such as career development, handling the media, conflict resolution, negotiation skills, leadership, grant writing, etc.) also make up a part of the program. Finally, optional language instruction is also available through the Green School's Strategic Language Institute.

Admission Requirements

1. Baccalaureate degree from an accredited institution for higher education, or equivalent degree from a foreign institution.
2. 3.0 GPA in the last 60 upper division credits of undergraduate degree.
3. Two letters of recommendation (professional and academic recommendations only; at least one letter needs to be from a faculty member; a professional letter should come from a supervisor).
4. Curriculum Vitae.
5. A statement of purpose (750 words) describing the candidate's academic and professional background as well as proposed track of study and career aspirations.

In addition, foreign students must:

Official TOEFL scores (Note: unofficial scores will not be taken into consideration)

1. Paper and Pencil: 550
2. Internet-based: 80

The above admission requirements are minimums and not all students meeting them are assured admission. Students with a grade-point average below the above minimums may still apply and request a waiver of those scores. The student must provide a justification as to why the waiver should be approved.

Degree Requirements

The Master of Arts in Global Affairs program requires a total of 36 credits. Students take 18 credits of core courses. The remaining 18 credits are specialty courses associated with each track.

Core Courses: (18 credits)

ISS 6216	Foundations of Globalization	3
ECO 6025	Economic Policy Analysis for Global Governance	3
ISS 6307	Research Tools for Global Studies	3
ISS 6387	Analytical Writing and Presentation Skills	3
SYA 6655	Program Design and Evaluation	3
PAD 6306	Policy Analysis and Program Planning	3
ISS 6926	Capstone	3

Track 1: Globalization and Security (18 credits)

Specialty courses include (additional courses selected by the program administration may also be included):

DSC 6020	Terrorism and Homeland Security	3
GIS 5620	Surveillance, Intelligence, and International Relations	3
INR 6338	Seminar in Strategic Studies	3
CCJ 6676	Transnational Crime and National Security	3
INR 5012	Global Issues and Human Rights	3
INR 5352	Environment and Security	3
INR 5066	Global and Human Security	3
INR 5935	Topics in International Relations	3
REL 5149	Religion, Violence, and Conflict	3
ISS 6327	Global Security Risks and the Private Sector	3
ISS 6249	Migration, Security and Globalization	3
ISS 6219	International Law and Global Security	3
ISS 6132	Intelligence Community Successes and Failures: Policy Implications	3

ISS 6640	Global Financial Crimes	3
----------	-------------------------	---

Track 2: Global Risk and Corporate Responsibility (18 credits)

Specialty courses include (additional courses selected by the program administration may also be included):

ISS 6259	Corporate Diplomacy	3
ISS 6246	Global Economy and Industrial Sustainability	3
ISS 6248	Public-Private Partnerships for Social Impact	3
ISS 6247	Social Enterprise and Grassroots Innovation	3
ISS 6409	Capstone Reporting	3
ISS 6327	Global Security Risks and the Private Sector	3

Track 3: International Development (18 Credits)

Specialty courses include (additional courses selected by the program administration may also be included):

ISS 6609	Quantitative Methods	3
ISS 6630	Markets, Governments and Public Policy	3
ISS 6615	International Development Policy	3
ISS 6610	Global Economy, Finance and Institutions	3
ISS 6275	Growth, Development, and Policy	3
ISS 6660	International Trade for Global Affairs	3

Track 4: International Crime & Justice —Online (18 credits)

Accelerated specialty courses include (additional courses selected by the program administration may also be included):

CCJ 6676	Transnational Crime and National Security	3
CCJ 6079	Geospatial Crime Analysis	3
CCJ 6040	Comparative Crime and Criminal Justice Systems	3
CCJ 6675	Applied Research in Human Rights & Rule of Law	3
CCJ 6620	Immigration and Crime	3
CCJ 6696	Human Trafficking	3
ISS 6640	Global Financial Crimes	3
DSC 6020	Terrorism and Homeland Security	3

Track 5: Cybersecurity and Technology Policy — Online (18 credits)

Specialty courses include (additional courses selected by the program administration may also be included):

CIS 5027	Computer Systems Fundamentals	3
ISS 5654	Foundations of Cybersecurity and Technology Policy	3
ISS 5656	Cyberspace and Globalization	3
ISS 6658	Cyber Warfare and Strategy	3
ISS 6655	Issues in Cybersecurity and Technology Policy	3
LAW 7707	Cybersecurity and Privacy Law	3

Internships

Global Affairs students are highly encouraged to secure an internship during the summer between year 1 and 2 of the program. The internship should be relevant to the track of study and may take place at a corporation, non-profit organization, international institution, or government agency.

Graduation Requirements

In order to graduate, a student must earn a minimum grade of a C, maintain a 3.0 GPA and complete satisfactorily the prescribed curriculum.

Course Descriptions

Definition of Prefixes

ECO-Economics; ISS-Interdisciplinary Social Sciences; SYA-Sociological Analysis

ECO 6025 Economic Policy Analysis for Global Governance (3). Designed for MA students in the Global Governance program, the course provides training in applied microeconomic and policy analysis.

ISS 5127 Urbanization and Disaster Risk (3). Examines trends and characteristics of urbanization, taking cities as heterogeneous, dynamic, and complex spaces, with emphasis on risk construction and social vulnerabilities. Prerequisite: Graduate Standing.

ISS 5135 National Security Essentials (3). An examination of the U.S. national security structure, current security-related controversies and potential U.S. responses to security threats.

ISS 5267 Global Solutions to Sex Trafficking (3). Engage students in understanding and creating solutions to global sex trafficking using collaborative problem solving, policy analysis, and social innovation and entrepreneurship.

ISS 5388 Communicating Analytically (3). Improves analytic communications for government professionals, enhancing research and effective writing skills and developing briefing techniques.

ISS 5654 Foundations of Cybersecurity and Technology Policy (3). Provides a foundational understanding of the technical and non-technical considerations influencing global cybersecurity and technology policy.

ISS 5656 Cyberspace and Globalization (3). Provides an overview of how cybersecurity and the shifting technological landscape impact the world and the opportunities and challenges these changes, amplified by globalization, pose to security.

ISS 6111 Leadership Dynamics in Global Risk and Corporate Responsibility (3). Train students to lead organizations to thrive in a global economy, while providing the necessary leadership skills to enable students to make better decisions in Corporate Social Responsibility.

ISS 6126 Livelihoods Protection and Disaster Risk Reduction (3). Examines linkages between livelihoods protection and disaster risk reduction to reduce community vulnerabilities to natural to enhance hazard-sensitive livelihood strategies and interventions. Prerequisite: Graduate standing.

ISS 6128 Global Health Security (3). Covers the topic of global public health with a major emphasis on security, by recognizing the direct and indirect public health consequences of disasters, diseases and climate change.

ISS 6132 Intelligence Community Successes and Failures: Policy Implications (3). Reviews how historical United States Intelligence Community successes and

failures shaped U.S. foreign and domestic policy and examines current organizational structures.

ISS 6216 Foundations of Globalization (3). Advanced course to introduce students in the M.A. in Global Governance to the many nuances of globalization.

ISS 6219 International Law and Global Security (3). This course examines the relationship between international law and global security. Particular attention is paid to laws of war and international military intervention, international criminal law.

ISS 6245 The Politics of Conflict and Development (3). Prepares students to understand and analyze the politics of development in Asia, Africa, Eastern Europe, Latin America, the Middle East and North Africa.

ISS 6246 Global Economy and Industrial Sustainability (3). Development paradigms and international economic evolution paths are analyzed in light of sustainability and institutional citizenship frameworks.

ISS 6247 Social Enterprise and Grassroots Innovation (3). This course introduce students to the theory and practice of social enterprise and grassroots innovation and how to devise sustainable, market-driven solutions to pressing socioeconomic challenges.

ISS 6248 Public-Private Partnerships for Social Impact (3). This course examines how governments are partnering with for-profit and non-profit organizations to shape public policy and solve some of the world's most intractable social problems.

ISS 6249 Migration, Security and Globalization (3). Migratory flows associated with globalization, their benefits, effects and impact on security. It will examine the problems posed by new presences and the policies and practices that can resolve them.

ISS 6259 Corporate Diplomacy (3). Examine the role of governments, community stakeholders, multilateral organizations, international non-profit organizations, and multi-sector partnerships in promoting peace and social justice.

ISS 6266 Democracy and Human Rights: From Theory to Practice (3). Examines Democracy and Human Rights around the world, particularly in key countries such as Russia, China, Egypt and Cuba.

ISS 6275 Growth, Development, and Policy (3). Provides understanding as to why some countries are rich and others poor, and why some countries grow quickly and others slowly.

ISS 6307 Research Tools for Global Studies (3). Designed for MA students in the Global Governance program, the course provides qualitative and quantitative research methods in Global Studies. Prerequisite: Graduate standing.

ISS 6327 Global Security Risks and the Private Sector (3). This course will consider the nature of the contemporary risks facing firms operating in the global marketplace and what strategies can be implemented by the global companies to minimize vulnerability.

ISS 6384 Reputation and Crisis Management (3). Establish an understanding of mass communication principles and how they can be utilized to implement

strategies and tactics related to reputation management and crisis communications.

ISS 6387 Analytical Writing and Presentation Skills (3). Designed for MA students in the Global Governance program, the course provides training in communication skills by applying appropriate strategies for different types of writing and presentation.

ISS 6409 Capstone Reporting (3). This course provides methods and tools to communicate objectives, results, challenges and recommendations of capstone projects as well as of social responsibility initiatives in general.

ISS 6658 Cyber Warfare and Strategy (3). Surveys current concepts and trends in cybersecurity strategy used during times of cyber conflict. Examines differences between offensive and defensive cyber capabilities and strategy development.

ISS 6660 International Trade for Global Affairs (3). Focuses on global economic integration and the institutions that regulate it.

ISS 6609 Quantitative Methods (3). Expands the focus on linear regression, causal inference, and provides an introduction to more advanced methods, such as time series, panel data and instrumental variables.

ISS 6610 Global Economy, Finance, and Institutions (3). Examines modern theory of macroeconomics in the context of the global economy, and applies it to gain an understanding of recent issues and policy responses.

ISS 6615 International Development Policy (3). Provides a broad introduction into the various policy-relevant aspects of the economics of international development.

ISS 6630 Markets, Governments and Public Policy (3). Surveys the field of Public Economics, which explores the rationales for and consequences of government intervention in markets.

ISS 6640 Global Financial Crimes (3). Provide a solid conceptual foundation of global financial crimes and understanding of the causes and reasons for global money laundering, terrorism, corruption, tax evasion and other financial crimes.

ISS 6650 US-Russian Relations and Their Impact on Global Security (3). Focus on the state of Europe both past and present, debate over enlargement of European institutions, challenges of the Russian relationship and other factors as its implicates on global security.

ISS 6655 Issues in Cybersecurity and Technology Policy (3). Examine key issues such as internet governance, supply chain management, critical infrastructure, cyber warfare and the weaponization of information

ISS 6690 Professionalization Seminar (0). Weekly seminar led by array of GSS faculty covering topics to aid in professionalization of future faculty and social researchers.

ISS 6917 Directed Research Project in Applied Interdisciplinary Social Science (1-9). Allows for a graduate student to design, complete, and present findings from an applied social science research project, under the direction of a faculty member.

ISS 6926 Capstone (3). This course is designed to allow students to apply the skills and methods acquired throughout the program to a significant policy-relevant case study or issue. Prerequisite: Graduate standing.

SYA 6655 Program Design and Evaluation (3). Designed for MA students in the Global Governance program, the course provides training in program design and evaluation. Prerequisite: Graduate standing.

Interdisciplinary Courses

The Green School has several interdisciplinary programs which are not based in a specific academic department. The courses offered by these programs, therefore, are not found in the departmental listings in the Catalogs, but are included here.

LBS 5155 Workplace Diversity (3). Students examine theoretical debates surrounding workforce participation of women and minorities; historical position of these groups in labor force; social phenomena that contribute to discriminatory practices and development of policies to eliminate discriminatory practices.

LBS 5215 Women in the Workplace (3). Students explore women's changing role in the U.S. and global economy. Special attention is given to the role of race, class, and ethnicity within the context of gender and work.

LBS 5406 Collective Bargaining and Labor Relations (3). A comprehensive study of major issues and themes in American collective bargaining. Includes origins of collective bargaining, labor law, unionization, contract negotiation, patterns in contract content, impact of external laws, public sector unions, grievance arbitration and interest arbitration. Prerequisite: Permission of Instructor.

LBS 5464 Labor Arbitration (3). Study of labor dispute resolution with emphasis on grievances, fact-finding, and arbitration.

LBS 5465 Mediation Techniques (3). Examines the role of mediation in resolving civil, commercial, family, public, and workplace disputes. Incorporates mediation principles and skills, different approaches to mediation, and current research in mediation. Prerequisite: Permission of Instructor.

LBS 5466 Family Mediation (3). Provides a comprehensive understanding of conflict resolution, power and balances, emotional and psychological issues, negotiation techniques as well as the development of practical skills in the field of family mediation. Prerequisite: Permission of Instructor.

LBS 5467 Civil Mediation (3). A comprehensive understanding of the field of civil mediation as well as the development of the practical skills to be a civil mediator. Prerequisite: Permission of Instructor.

LBS 5485 Fundamentals of Conflict Resolution (3). Survey of the major contemporary theories of organizational functioning and the management of conflict within and among organizations in a globalized world. Theories that center primarily within the fields of dispute resolution, sociology, and social interaction/ group theory will be emphasized. Prerequisite: Permission of Instructor.

LBS 5486 The Dynamics of Conflict Management (3).

Investigate conflict and violence, and help students to develop strategies to defuse them in the classroom.

LBS 5488 Organizational Conflict and Dispute Resolution Systems (3).

Examines the causes, consequences, and cost of organizational conflict and the dispute resolution systems organizations use to resolve conflict.

LBS 5507 Labor and Employment Law (3).

Familiarizes the student with the legal issues and rules regarding unionization of employees, the collective bargaining process, the relationship between the employee and his/her union, and the administration of collective bargaining agreements. Examines the legal framework within which collective bargaining occurs and also familiarizes students with additional issues of rights in employment. Prerequisite: Permission of Instructor.

LBS 5658 Labor Movements and Economic Development (3).

Relationships between union and economic development strategies in developing/recently developed countries; emphasis on social movement unionism and unions in Latin America and Asia. Prerequisite: Permission of Instructor.

LBS 5930 Topics in Labor Studies (1-3).

Selected topics or themes in Labor Studies. Themes will vary from semester to semester. With a change in content, course may be repeated. May include field work. Prerequisite: Graduate standing.

LBS 5931 Topics in the Philosophy and Methods of Conflict Resolution (3).

Provides an examination of the philosophy, methods, and research in the field of conflict resolution. The particular content and orientation of the course may vary according to the particular focus examined. Prerequisite: Permission of Instructor.

LBS 6906 Directed Individual Study (3).

Specialized intensive study in areas of interest to student. Student plans and carries out independent study project under the direction of faculty member. Topics must relate to content of Labor Studies or ADR. Prerequisite: Permission of instructor.

LBS 6945 Internship Labor Studies/Alternative Dispute Resolutions (3).

Practical training and experience in organization according to students needs and interests. Reports and papers required. Prerequisite: Permission of instructor.

Master of Arts in African & African Diaspora Studies

The M.A. degree in African & African Diaspora Studies provides interdisciplinary, graduate level education and prepares students to develop and employ theoretical, analytical, and methodological approaches the research of critical issues pertaining to African America, Africa and its diasporas. The objective of the M.A. program is to prepare scholars for professional positions in a range of fields and for further study at the Ph.D. level. The M.A. degree can be taken either on-site or online. Multidisciplinary in scope and diverse in approach, the M.A. program in AADS is ideal for candidates interested in a wide array of subjects pertaining to African America, continental Africa and the African diaspora. These include: Social and Public Policy, Cultural Studies, International Relations, Gender and Sexuality Studies, Literary Study, History, Globalization Studies, Education, Religious Studies, Trans-Atlantic Studies, Critical Race Studies, Sociology, and Anthropology. AADS offers both a terminal M.A. and three combined M.A./Ph.D. programs in partnership with International Relations, Atlantic History, and Global & Sociocultural Studies. These attract students from around the world interested in subjects that are geographically and disciplinarily diverse, including but by no means limited to: transnational policy analysis; African, African American and Caribbean history and culture; African environmental politics; transnational migrations; African and African diaspora nationalist struggles, and the Asian diasporas in Africa and the Caribbean. Our focus on African diaspora cultural studies facilitates research in Gender and Sexuality, Literatures, Popular Culture, and Religious syncretism. FIU's strong connections with Latin America and the Caribbean make it an ideal place to study Afro-Latin cultures, with a focus on these two regions. The M.A. degree prepares graduates for further study at the Ph.D. level, as well as for professional positions in the public, private, non-profit and international arenas and for employment in education, public policy, public administration, journalism, international organization and other fields.

The MA in African & African Diaspora Studies is cohort-based and only admits students to begin their studies in the fall semester. It is a one-year degree to be completed over three terms: fall, spring, and summer C. The full curriculum comprises 30 credits. Students are expected to enroll in 10 credits of course work per semester, which includes enrollment in the AADS Graduate Colloquium (AFA 6920) each semester for 1 credit. For this 1 credit course, students will work under the supervision of an AADS faculty member to develop and complete the research paper, proposal or report that fulfills the exit requirement.

Admission Requirements

Each applicant to the African & African Diaspora Studies Graduate Program (AADS) must complete an online graduate application form and arrange to send transcripts of all prior undergraduate and graduate work and official

reports of the TOEFL (if applicable) to the FIU's Office of Graduate Admissions. Each applicant should also send a separate statement of purpose to the director of the AADS Graduate Programs, along with copies of the above material, a resume, and writing sample. The statement of purpose should express the applicant's academic and professional objectives as well as specific interest in African & African Diaspora Studies. Applicants are strongly encouraged to include examples of academic or other relevant professional work that may support their application. Applicants must request three letters of recommendation from professors able to comment on their academic ability. The letters of recommendation should be sent directly to the Director of the African & African Diaspora Studies Graduate Programs.

The application file must be complete before the African & African Diaspora Studies Graduate Committee will consider the applicant for admission. For the admissions deadline please go to <http://africana.fiu.edu/academics/admissions/>. To be admitted into the AADS M.A. program a student must meet the University's graduate admission requirements (which can be found in Florida International University's Graduate Catalog), and the following minimum standards:

1. Applicants must have a baccalaureate degree from an accredited college or university.
2. Applicants must have an undergraduate grade point average (GPA) of 3.0 or higher. Applicants must submit grade transcripts for consideration. The student must also have a GPA of 3.5 on any previous graduate work.
3. Applicants should request that three letters of recommendation from individuals able to judge their academic potential be sent directly to the Director of the African & African Diaspora Studies Graduate Programs. For the exact street address, please consult our website at <http://africana.fiu.edu>.
4. Applicants are encouraged to submit examples of written work and other supporting materials.
5. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Financial Aid

Each academic year a limited number of graduate students are hired as graduate assistants. Graduate assistantships are allocated on a competitive basis and typically pay a substantial portion of tuition expenses and provide a stipend. To be considered for an assistantship the applicant must make such a request in writing to the Director of AADS Graduate Programs. The Director of the AADS Graduate Programs will make the awarding of teaching assistantships in consultation with the AADS Director. Students receiving an assistantship are required to perform approximately (but not more than) 20 hours of teaching and research related duties per week and are required to participate in a one-hour seminar related to teaching at the beginning of their first semester.

Graduation Requirements

Candidates must obtain a grade of "B" or higher in all courses and achieve a cumulative point average of at

least 3.0 (based on a 4.0 scale) and present a satisfactory research paper, proposal or report with scholarly citation styles admitted in the discipline. The selection of the citation style must be made with the research paper/proposal/report advisor. The FIU faculty eligible to serve on a research paper/proposal/report committee are the faculty members who have achieved graduate faculty standing as established by the University Graduate School. Other FIU faculty not identified in that list may be considered to serve on a committee (but not as chairperson of that committee) based on research, identified interest, and publications after approval from the AADS Graduate Programs Director.

Research Paper/Proposal Option

To fulfill this requirement, the student must compile a portfolio of their most representative work, along with a reflection on each paper of how each paper relates to AADS methods and theories. The portfolio should reflect their academic work and interests. Students will work with the Graduate Program Director and/or faculty mentor to develop their portfolio over the fall and spring semesters. Students will complete the portfolio and are required to give an oral presentation (oral defense) of their portfolio to AADS faculty as a requirement for successful completion of AFA 6911.

The FIU faculty eligible to evaluate the oral presentation are the faculty members who have achieved graduate faculty standing as established by the University Graduate School and are core or affiliated faculty in AADS. Other FIU faculty not identified in that list may be considered to serve on a committee (but not as chairperson of that committee) based on research, identified interest, and publications after approval from the Director of AADS Graduate Programs.

The MA in African & African Diaspora Studies is cohort-based and only admits students to begin their studies in the fall semester. The MA in AADS curriculum unfolds over three terms: fall, spring, and summer C. The full curriculum comprises 30 credits. To graduate on time, students are expected to enroll in courses for 10 credits every term. During the AFA 6920 sessions (AADS Graduate Colloquium; three times 1 credit), enrolled students work closely with the AADS faculty mentor and/or Graduate Program Director to prepare their exit requirement (Portfolio). Students will be assigned such as faculty mentor by the AADS Graduate Program Director (GPD) upon admission. Students may request to work with a specific AADS faculty member. Such selection must be requested by the third week of the fall semester. Before placing such request to the AADS GPD, a student must approach and get the approval of the chosen AADS faculty member. That AADS faculty member will serve as the chairperson of the student's research paper/proposal or internship report committee.

Required Credits

Total: 30 credit hours

Term 1 (Fall)

AFA 5005	African and African Diaspora Studies Theory	3
AFA 5855	Research Methods and Scholarly Writing in Africana Studies	3
	One Elective from the list of Humanities or Social Sciences	3

AFA 6920 African and African Diaspora Studies
Graduate Colloquium 1

Term 2 (Spring)

One Elective from the list of Humanities or Social
Sciences 3

One Elective from the list of Humanities or Social
Sciences 3

One Elective from the list of Humanities or Social
Sciences 3

AFA 6920 African and African Diaspora Studies
Graduate Colloquium 1

Term 3 (Summer C)

One Elective from the list of Humanities or Social
Sciences 3

One Elective from the list of Humanities or Social
Sciences 3

One Elective from the list of Humanities or Social
Sciences 3

AFA 6920 African and African Diaspora Studies
Graduate Colloquium 1

Language Requirement

Students will be asked to demonstrate proficiency in a language other than English according to the nature of their research paper/proposal and professional interests. Credit hours earned in meeting language requirement will not count toward the 30 credit hours required for the degree.

List of Electives I: The Humanities

Students must choose between 9 and 15 credits from the list below

With approval of the Graduate Director, students may also select other courses not listed below after submitting the appropriate syllabus.

AFA 5932 Special Topics in African and African
Diaspora Studies

AFA 5107 Teaching the African American
Experience

AFA 5341 Health Issues in the African World

Race

M.A. in African & African Diaspora Studies/Ph.D. in Global and Sociocultural Studies Combined Degree Pathway

The combined African & African Diaspora Studies MA/Global & Sociocultural Studies PhD pathway allows qualified graduate students to develop an expertise in African & African Diaspora Studies by earning an MA in AADS while progressing toward a PhD in one of the three major areas in the Global and Sociocultural Studies Department geography, sociology, or anthropology.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores;
4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet-based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Admission Procedure

To be accepted into this program, students must submit an application to the PhD in Global and Sociocultural Studies with a sub-plan for a MA in African & African Diaspora Studies. This designation will appear in the menu of programs in the graduate application. To be accepted into this program, students must submit an application by **January 1** in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the on-line application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable;
5. Statement of purpose explaining his/her interest for enrolling in both the AADS MA program and in the PhD program in GSS. The statement of purpose must clearly address the applicant's academic and professional objectives for enrolling in both fields of inquiry. The statement of purpose must also indicate the intended major (anthropology, geography, or sociology) the applicant plans to select while engaged in the PhD in GSS;
6. Three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability;
7. A curriculum vitae; and
8. Writing samples and other relevant professional work that may support their applications.

Degree Requirements for M.A. in African & African Diaspora Studies

This 30-credit, one year, three-semester program occurring over the Fall, Spring, and Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 9 credits of core Global and Sociocultural Studies courses, and 12 credits of electives. There is also a Foreign Language Requirement.

MA in AADS Core (9 credits)

AFA 5005	African & African Diaspora Studies Theory	3
AFA 5855	Research Methods in African and African Diaspora Studies	3
AFA 6920	African & African Diaspora Studies Graduate Colloquium (3 credits- 1 credit over three semesters)	

Combined MA in AADS/PhD in Global and Sociocultural Studies Core

SYA 6127	Theory and Inquiry	3
ANG 5093	Research Methods	3

MA in AADS Elective (15 credits)

Nine credits of elective courses with an AADS focus must be from the Global and Sociocultural Studies Department. Six credits may be from outside of the Department but within the Green School and/or the College of Arts & Sciences. Students wishing to take courses outside of the Green School and the College of Arts & Sciences must seek prior approval.

Note: Students are advised to take at least 9 of these elective credits in their chosen major discipline for GSS (anthropology, geography, or sociology).

MA in AADS Research Proposal option

To graduate from the MA in AADS, students enrolled in this combined MA/PhD pathway must elect to complete either a research proposal or research paper for their exit option. Those who elect to write a research proposal must take AFA 6911 Research Paper/Proposal Writing in African and African Diaspora Studies.

MA in AADS Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests.

Application for Graduation from MA in AADS

Students should apply for graduation for the MA in AADS during the summer term if they are on track for completing all requirements for the degree — including the exit option. Ordinarily, the MA will be conferred before the student advances to candidacy for the PhD in Global and Sociocultural Studies.

Matriculation to PhD in GSS

All students must undergo a successful M.A. review upon completion of the AADS Masters Program requirements in order to continue toward the Ph.D. in GSS. The GSS Graduate Committee, along with an appointee from AADS, conducts these reviews. The purpose of the M.A. review is to determine the ability of the student to do Ph.D. level work with the department's faculty. Among the information considered during the review are students' performances and grades in courses, and faculty recommendations.

Degree Requirements for Ph.D. in Global and Sociocultural Studies

The doctorate in Global and Sociocultural Studies requires a minimum of 75 credits beyond the baccalaureate including a dissertation based on original research. 30 credits of the MA in AADS will count toward the 75-credit minimum. Thus, a minimum of 45 credits must be earned beyond the MA.

Major Courses (33 credits)

All doctoral students will choose a major in Anthropology, Geography, or Sociology. The following distribution of coursework is required.

- a). Major theory (3)
- b). Major methods (3)
- c). Major course electives (6 minimum)
- d). Exam and dissertation credits and GSS and non-GSS Department electives
 - Doctoral Exam Preparation (6 maximum)
 - Doctoral Dissertation (15 minimum)

General Electives (12 credits)

GSS and non-GSS Department electives

Ph.D. General Examination

After successfully completing the common core requirements, the major's course requirements, and electives, a student prepares for the Ph.D. General Exam by enrolling in a maximum of six credits of exam preparation for their major. In preparation for the exam, a student forms a dissertation committee according to the

regulations published on the University Graduate School web page (<http://gradschool.fiu.edu>). The Ph.D. General Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate School Policies and Procedures Manual and the Department's Ph.D. General Exam guidelines.

The Dissertation Proposal and Defense/Candidacy Exam

After passing the Ph.D. General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the Ph.D. program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG 7980, GEO 7980, or SYA 7980). The Ph.D. program requires a student to be continuously enrolled in a minimum of 3 hours of Doctoral Dissertation each semester from the time of advancement to candidacy until completion of the dissertation, including summers. Upon completion of the dissertation manuscript and authorization by the committee, a student defends the dissertation before the committee and the University community. The University Graduate School's regulations governing the dissertation are described at <http://gradschool.fiu.edu>.

MA in African & African Diaspora Studies/Ph.D. in History Combined Degree Pathway

The Combined African & African Diaspora Studies MA / Ph.D. in History pathway allows qualified graduate students to complete the MA in African & African Diaspora Studies (MA in AADS) en route to the Ph.D. in History. This PATHWAY will train doctoral students within the discipline of Atlantic History while giving them area studies expertise in African & African Diaspora Studies. In combination, these two programs provide a beneficial synthesis for interdisciplinary approaches to both the Atlantic world and the African diasporic experience.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.0 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.25 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores;
4. International graduate student applicants whose native language is not English and have not obtained

a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the IBT TOEFL (equivalent to 575 on the paper-based version of the Test of English as a Foreign Language) is required.

Admission Procedure

To be accepted into this pathway, students must submit an application to the PhD in History with a sub plan for a MA in African & African Diaspora Studies. This designation will appear in the menu of programs in the graduate application. Applicants should prepare all application materials in time for the Department of History and the Office of Graduate Admissions to receive them no later than **December 1** for the following year's fall admissions. Applicants will be notified of the Department's recommendation regarding their application no later than March 15.

The following documents must be submitted as part of the application. They will be reviewed by the Admissions Committee from both units.

1. Official transcripts of all prior college-level work (undergraduate Bachelor's degree and any graduate transcripts);
2. Official GRE scores or equivalent;
3. Official TOEFL scores, if applicable;
4. A curriculum vita;
5. A detailed statement of research interests, reasons for seeking the MA/ PhD, future career goals, a summary of scholarly and extra-curricular activities, and the names of History Department faculty members who would be appropriate dissertation advisors (Note: Consult the department website for information about faculty members)
6. A writing sample (such as a seminar paper) which demonstrates the ability to conduct research and write effectively; and
7. Three letters of reference from academic sources or others able to judge academic abilities and potential.

In addition, an interview (in person or phone) with members of the MA in AADS Program and/or appropriate faculty in the Department of History is highly recommended.

MA in African & African Diaspora Studies (MA in AADS)

This 30-credit, one year, three-semester program occurring over the Fall, Spring, and Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 9 credits core History courses, and 12 credits of electives. There is also a Foreign Language Requirement.

MA in AADS Core Courses: (9 credits)

AFA 5005	African and African Diaspora Studies Theory	3
AFA 5855	Research Methods in African and African Diaspora Studies	3
AFA 6920	AADS graduate colloquium (3 credits- 1 credit over three semesters)	

Combined MA in AADS/PhD in History Core Courses: (9 credits)

HIS 6059	Historical Methods	3
----------	--------------------	---

6 credits in any of the following courses, or any other graduate History courses with an AADS focus.

AFA 6851	Advanced Seminar in African and African Diaspora Studies
AFH 5905	Readings in Asian History
AFH 5935	Topics in African History
AFH 6915	Research in African History
AFH 6932	Research Seminar in African History I
AFH 6933	Research Seminar in African History II
WOH 5236	The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807
WOH 5237	The African Diaspora Since the End of the Slave Trade

MA in AADS Elective (12 credits)

12 credits of elective courses with an AADS focus, at least 6 credits of which are from within the Department of History (making a total of 15 History credits) such as those on the following list:

AFA 6851	Advanced Seminar in African and African Diaspora Studies
AFH 5905	Readings in African History
AFH 5935	Topics in African History
AFH 6915	Research in African History
AFH 6932	Research Seminar in African History I
AFH 6933	Research Seminar in African History II
WOH 5236	The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807
WOH 5237	The African Diaspora Since the End of the Slave Trade

Students wishing to take courses outside of the Green School and/or the College of Arts & Sciences must seek prior approval from the Graduate Program Directors of the MA and PhD programs.

MA in AADS Research Proposal Option

To graduate from the MA in AADS, students enrolled in this combined MA/PhD program must elect the research proposal option and take the proposal writing course AFA 6911 Research Paper/Proposal Writing in African and African Diaspora Studies.

MA in AADS Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests.

Application for Graduation from MA in AADS

Students should apply for graduation for the MA in AADS during the summer term if they are on track for completing all requirements for the degree – including the exit option. Ordinarily, the MA will be conferred before the student advances to candidacy for the PhD in History.

Ph.D. in History

Students will begin study toward the Ph.D. in History immediately following their satisfactory completion of MA in AADS degree requirements. Students are expected to meet all the degree requirements for the Ph.D. in History, which requires a total of 75 credits.

Courses required *in addition to* the degree requirements for the MA in African & African Diaspora Studies (minimum 45 credits)

HIS 6906	Advanced Readings in Atlantic Civilization	3
HIS 6918	Research in Atlantic Civilization	3
6 credits outside of AADS and Atlantic Civilization (also excluding Methods), 3 credits of which must be in a comparative course (HIS or WOH prefix)		
Electives		18
HIS 7890	Dissertation	15

Language Requirements

All students must acquire reading competence in two languages other than English. The language requirement may be fulfilled in one of two ways: 1) achieving a High Pass on the department examination in one language, and at least a Pass on the second; or 2) achieving a Pass or High Pass in departmental examination in one language, and competency in social science quantitative skills, demonstrated by receiving a grade of "B" or "B+", for Pass, and "A" or "A-", for High pass, in an appropriate course approved for this purpose by the Graduate Program Director. At least one High Pass must be received. Language requirements vary, according to the concentration fields. In cases where the dissertation will be in the history of US or English-speaking countries, one language plus the quantitative skill is sufficient. In Latin American history, either Spanish or Portuguese, and a second language appropriate to the student's field are required. Language exams will be graded on a High Pass, Pass, and Fail basis; a High pass is required in the student's primary language. Students should check with the Department's Graduate Program Director to determine which languages are appropriate for their program of studies.

Comprehensive Examinations and the Dissertation

Following completion of all course work, satisfaction of language requirements, and the constitution of a dissertation committee, students will be required to pass a written and an oral comprehensive examination. After the completion of their comprehensive examinations and the approval of a dissertation proposal by their dissertation committee, students will write a doctoral dissertation. The time needed for the research and writing of dissertations in History is variable, although doctoral candidates normally spend one year engaged in continuous field research and a second year in full-time writing.

Restrictions

1. The grade of "B" or better is required for graduate credit.
2. At the end of the second semester of residence, or upon completion of the first 18 credit-hours of work, the Graduate Committee will examine and evaluate the student's progress and prospects. Professors will provide detailed written evaluations of the work of all first-year Ph.D. students they have taught. Students whose progress is deemed insufficient will be advised to withdraw from the program.
3. No more than 6 semester-hours of Topics (5935) courses toward meeting the degree requirements, without permission of the Graduate Program Director.

4. No more than 6 semester-hours of HIS 5908 (Independent Study) toward meeting the degree requirements, without permission of the Graduate Program Director.

M.A. in African & African Diaspora Studies/Ph.D. in International Relations Combined Degree Pathway

The combined African & African Diaspora Studies M.A./International Relations Ph.D. pathway allows qualified graduate students to pursue both degrees at the same time.

Admission Requirements

To be accepted into this pathway, students must simultaneously submit applications for the M.A. in African & African Diaspora Studies and the Ph.D. in International Relations by January 15 in the year in which they wish to begin their studies.

To be considered for admission, students must meet the following requirements:

1. Minimum cumulative grade point average of 3.2 in undergraduate work.
2. Minimum cumulative grade point average of 3.5 in any prior graduate work.
3. Official Graduate Record Exam (GRE) scores.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the iBT TOEFL (equivalent to 575 on the paper-based version of the Test of English as a Foreign Language) is required.

Applicants must follow the admission procedures for both programs (see the appropriate sections in this graduate catalog). Only applications to begin studies in the fall semester will be considered. This designation will appear in the menu of programs in the graduate application, and students must indicate their intention to apply for this combined degree pathway.

Each applicant must complete an online graduate application form and arrange to send transcripts of all prior college (undergraduate and graduate) work and official reports of the Graduate Records Exam (GRE) and TOEFL (if applicable) to FIU's Office of Graduate Admissions.

Each applicant should also submit a separate statement of purpose, along with copies of the above material. The letter of application should include a statement expressing the applicant's academic and professional objectives. Applicants must include writing samples and other relevant professional work that may support their applications. Applicants must request three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability. The letters of recommendation should be sent directly to the Director of the African & African Diaspora Studies Graduate Programs. AADS will photocopy the recommendation letters once they are all in and send them to the International Relations Graduate Program Director.

The application file must be complete before the African & African Diaspora Studies/International Relations

Graduate Program Committees will consider the applicant for admission. We encourage applicants to send their application material sooner.

Required Credits

Students must fulfill the requirements for both programs. The 30 credits for the M.A. in AADS earned by students will count toward the 75 credits required for the Ph.D. in INR.

Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests. The Director of AADS Graduate Programs will ask a university faculty member fluent in the language of interest to the student, to evaluate the student's fluency by asking her/him to summarize or synthesize the content of a text of between 10 to 20 pages, published in that language, in no more than one page. That exercise will have to take place at the university during a limited period of time. The text will be given to the student at the beginning of the exercise. The chosen text will have some connection to the student's research interest. Once a student has demonstrated proficiency for the M.A. in African & African Diaspora Studies, that proficiency will be recognized by the International Relations Ph.D. program. Therefore, proficiency in a foreign language will not be part of the candidacy exam. Credit hours earned in meeting the language requirement will not count towards the 30 credit hours required for the M.A. degree.

Students should apply for graduation with the M.A. in African & African Diaspora Studies as soon as they have completed all requirements for the degree – including the exit requirements, as specified for the M.A. in African & African Diaspora Studies. Ordinarily, students will complete these requirements and earn their M.A. before advancing to candidacy for the Ph.D. in International Relations. The research paper/proposal option is the only option available for students enrolled in this combined M.A./Ph.D. pathway.

Masters of Arts in African & African Diaspora Studies Requirements

This 30-credit, one year, three semester program occurring over the Fall, Spring, and Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 6 credits of core International Relations courses, and 15 credits of electives. There is also a Foreign Language Requirement.

MA in AADS Core Courses: (9 credits)

AFA 5005	African and African Diaspora Studies Theory	3
AFA 5855	Research Methods in African and African Diaspora Studies	3
AFA 6920	African and African Diaspora Studies Graduate Colloquium	3-
	1 semester of graduate colloquium	

Combined MA in AADS/PhD in International Relations Core Courses: (6 credits)

INR 5609	Contemporary Dynamics of International Relations	3
INR 6706	Political Economy of International Relations	3

M.A. in AADS in electives (15 credits)

15 credits of elective courses with an AADS focus may be from outside the International Relations Department and within the Green School and/or the College of Arts & Sciences. Students wishing to take courses outside of the Green School must seek prior approval.

MA in AADS Research Proposal or Paper Option

To graduate from the MA in AADS, students enrolled in this combined MA/PhD pathway must elect to complete either a research proposal or research paper for their exit option. Those who elect to write a research proposal must take AFA 6911 Research Paper/Proposal Writing in African and African Diaspora Studies.

Doctor of Philosophy in International Relations (75 credits)

The following courses in addition to all 30 M.A. credits:

INR 5615	Research Design in International Relations	3
GEO 6473	Space, Place, and Identity	3
INR 6608	Contemporary International Relations Theory	3

Major and Minor Fields: (12 credits)

Major field of study	9
Minor field of study	3

Electives: (6 credits)

Additional elective course work according to the specific information about elective courses indicated in the Ph.D. in INR section of the catalog.

Comprehensive Examinations

Once students have achieved 60 credits of course work, they must sit for written examinations on the core sequence of their fields as per the Ph.D. in INR section of the catalog.

Dissertation: (15 credits)

See the university catalog for relevant sections of the Ph.D. Program in International Relations for details.

MA in African & African Diaspora Studies/Ph.D. in Political Science Combined Degree Pathway

The combined African & African Diaspora Studies M.A./Political Science Ph.D. pathway allows qualified graduate students to pursue both degrees at the same time.

Admission Requirements

To be accepted into this pathway, students must simultaneously submit applications for the M.A. in African & African Diaspora Studies and the Ph.D. in Political Science by January 15 in the year in which they wish to begin their studies.

To be considered for admission, students must meet the following requirements:

1. Minimum cumulative grade point average of 3.2 in undergraduate work.
2. Minimum cumulative grade point average of 3.5 in any prior graduate work.

3. Official Graduate Record Exam (GRE) scores from with the last five years.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the iBT TOEFL (equivalent to 575 on the paper-based version of the Test of English as a Foreign Language) is required.

Applicants must follow the admission procedures for both programs (see the appropriate sections in this graduate catalog). Only applications to begin studies in the fall semester will be considered. This designation will appear in the menu of programs in the graduate application, and students must indicate their intention to apply for this combined degree pathway.

Each applicant must complete an online graduate application form and arrange to send transcripts of all prior college (undergraduate and graduate) work and official reports of the Graduate Records Exam (GRE) and TOEFL (if applicable) to FIU's Office of Graduate Admissions.

Each applicant should also submit a separate statement of purpose, along with copies of the above material. The letter of application should include a statement expressing the applicant's academic and professional objectives. Applicants must include writing samples and other relevant professional work that may support their applications. Applicants must request three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability. The letters of recommendation should be sent directly to the Director of the African & African Diaspora Studies Graduate Programs. AADS will photocopy the recommendation letters once they are all in and send them to the International Relations Graduate Program Director.

The application file must be complete before the African & African Diaspora Studies/International Relations Graduate Program Committees will consider the applicant for admission. We encourage applicants to send their application material sooner.

Required Credits

Students must fulfill the requirements for both programs. The 30 credits for the M.A. in AADS will count toward the required coursework for the doctoral program.

Masters of Arts in African & African Diaspora Studies Requirements

This 30-credit, one year, three semester program occurring over the Fall, Spring, and Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 6 credits of core Political Science courses, and 12 credits of electives. Students are encouraged to select eligible Political Science courses to fulfill their MA elective requirements and must seek advanced approval from the Political Science Graduate Program Director in order to have these credits applied to the Ph.D. course requirements. There is also a Foreign Language Requirement.

MA in AADS Core Courses: (9 credits)

AFA 5005	African and African Diaspora Studies Theory
----------	---

AFA 5855	Research Methods in African and African Diaspora Studies	3
AFA 6920	African and African Diaspora Studies Graduate Colloquium (3-1 credit over three semesters)	

**Combined MA in AADS/PhD in International Relations
Core Courses: (6 credits)**

POS 5607	Research Methods	3
POS 5716	Foundations in Political Science	3

M.A. in AADS in electives (15 credits)

15 credits of elective courses with an AADS focus are required. Students are encouraged to select courses from within the Political Science Department. If students wish to take electives from outside the Political Science Department and within the Green School and/or the College of Arts & Sciences, they must seek prior approval from the Graduate Program Directors of both AADS and Political Science

List of Approved Elective Courses

AFA 5932	Special Topics in African and African Diaspora Studies
AFA 6245	African Diaspora in Latin America
AFA 5600	National and Transnational Policy Analysis: The African Diaspora
AFA 5341	Health Issues in the African World
AFA 6217	Sex, Race, and Power in European Colonial Times (crosslisted with SYD 6796)
ANG 6473	Diasporas, Migration, and Globalization
CPO 5278	Comparative Racial Politics
CPO 5325	Politics of the Caribbean
CPO 6350	Seminar in Brazilian Politics
CPO 6376	Seminar in Central American Politics
CPO 6206	Seminar in African Politics
ECS 5406	Latin American Economics
ECS 6436	The Economics of Caribbean Migration
ECS 7435	Economics of the Caribbean
HIS 5930	Special Topics: US and the Caribbean
INR 5087	Ethnicity and the Politics of Development
INR 5255	Seminar in African Development
INR 6936	Seminar in Inter-American Politics
ISS 6317	Social Science Research Quantitative Methods I
LAH 5465	Peoples, Culture and Politics of Haiti
LAW 6234	Race and Law
REL 5488	Theology and Liberation Movements
SYD 6705	Comparative Analysis of Ethnicity and Race
WOH 5236	The Transatlantic Slave Trade and the Making of the African Diaspora, 1441-1807
WOH 5237	The African Diaspora Since the End of the Slave Trade

MA in AADS Research Proposal or Paper Option

To graduate from the MA in AADS, students enrolled in this combined MA/PhD pathway must elect to complete either a research proposal or research paper for their exit option. Those who elect to write a research proposal must take AFA 6911 Research Paper/Proposal Writing in African and African Diaspora Studies.

Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their research paper/proposal and professional interests. The Director of AADS Graduate Programs will ask a university faculty member fluent in the language of interest to the student, to evaluate the student's fluency by asking her/him to summarize or synthesize the context of a text of between 10 to 20 pages, published in that language, in no more than one page. That exercise will have to take place at the university during a limited period of time. The text will be given to the student at the beginning of the exercise. The chosen text will have some connection to the student's research interest. Once a student has demonstrated proficiency for the M.A. in African and African Diaspora Studies, that proficiency will be recognized by the Political Science Ph.D. program. Therefore, proficiency in a foreign language will not be part of the candidacy exam. Credit hours earned in meeting the language requirement will not count towards the 30 credit hours required for the M.A. degree.

Students should apply for graduation with the M.A. in African and African Diaspora Studies as soon as they have completed all requirement for the degree — including the exit requirements, as specified for the M.A. in African and African Diaspora Studies. Ordinarily, students will complete these requirements and earn their M.A. before advancing to candidacy for the Ph.D. in Political Science. The research paper/proposal option is the only option available for students enrolled in this combined M.A./Ph.D. pathway.

Doctor of Philosophy in Political Science (76 credits)

The following courses are required for the PhD in Political Science. The M.A. earned credits that are eligible to be applied to the Ph.D. must be approved in advanced by the Political Science Graduate Program Director:

POS 5702	Teaching Political Science	1
POS 6918	Seminar in Political Science Methodology	3
CPO 5091	Seminar in Comparative Politics	3
INR 5007	Seminar in International Politics	3
POS 5045	Seminar in American Politics	3
POT 5007	Seminar in Political Theory	3
	Two Examination Fields (minimum)	12
	Third Specialization (minimum)	9
	Approved Electives(minimum)	9

Language Requirement

The Political Science Ph.D. program requires competency in one foreign language or demonstrated competency in computer and methodological techniques when considered more appropriate. Language competency must be demonstrated prior to taking the comprehensive examinations.

Comprehensive Examinations

After satisfactory completion of course work, students will take comprehensive exams in two chosen subfields before admitted to candidacy and defending a dissertation proposal. The comprehensive exams require a demonstration of broad knowledge of the two examination fields.

Comprehensive examinations are given twice yearly, in mid-September and in mid-January.

Dissertation (minimum 24 credits)

After passing the comprehensive exams, students are admitted to candidacy and enroll for dissertation credits under the supervision of their dissertation advisors. Candidates will prepare and defend a dissertation proposal. Upon completion of the work, a public defense of the dissertation will be scheduled in accordance with university policy.

Course Descriptions**Definition of Prefixes**

AFA-African and African Diaspora Studies

AFA 5005 African and African Diaspora Studies Theory (3). Explores the emergence of three fields of inquiry in Africana Studies: African Studies, African Diaspora Studies, and African-American Studies. Focus on major themes, ideas, and diverse conceptual and theoretical perspectives. Prerequisite: Graduate standing.

AFA 5107 Teaching the African-American Experience (3). Teachers Institute on literature, culture, history, politics designed to meet Florida State Teachers Certification requirements. Includes instruction on pedagogy, practical teaching methods, and FCAT.

AFA 5248 Transnational Connections: Latin America and the Caribbean in Africa (3). Analyzes the dynamic transnational relationships that have unfolded across the South Atlantic between Latin America and the Caribbean and Sub-Saharan Africa over time.

AFA 5302 Africana Visual Arts (3). A study of Africana, African, and/or African Diaspora Visual aesthetics. It examines relationships between Africana Visual arts and other creative forms. Prerequisite: Graduate standing.

AFA 5341 Health Issues in the African World (3). Examination of the history of the biomedicine system and its relationship to African populations, and the evolution of this relationship with respect to disease in the contemporary world. The course is organized to promote awareness of the impact of culture, ethnicity, racism, class on public health research.

AFA 5600 National and Transnational Policy Analysis: The African Diaspora (3). Analysis of national and transnational policies as they directly relate and impact the African Diaspora. Prerequisite: Graduate Standing.

AFA 5855 Research Methods and Scholarly Writing in Africana Studies (3). This proseminar addresses research methods for the multi- and inter-disciplinary study of sociocultural realities to African and African Diaspora peoples, globally.

AFA 5932 Special Topics in African and African Diaspora Studies (3). An examination of different features of Continental Africa and the African Diaspora not normally offered in the basic curriculum or otherwise offered. May be repeated. Prerequisite: Graduate standing.

AFA 5934 Special Topics in Black Transnationalism (3). A course designed to give groups of students special studies in the black experience transnationally. Prerequisite: Graduate Standing.

AFA 6217 Sex, Race, and Power in European Colonialisms (3). Critical examination of sexual intimacy

in colonial contexts between European colonizers and colonized people. An exploration of the intersection between racialization and sexualization. Prerequisite: Graduate standing.

AFA 6245 The African Diaspora in Latin America (3). Advanced exploration of the historical, socioeconomic, and political realities of African diasporic communities in Central America, the Caribbean, and South America. Corequisite: Graduate standing.

AFA 6851 Advanced Seminar in African and African Diaspora Studies (3). Reflections on the global diversity of black subjectivities and African and African diasporic communities and experiences. A research paper/research proposal writing seminar. Prerequisite: Graduate standing.

AFA 6905 Independent Study (0-6). Student generated research projects in African and African Diaspora Studies. Independent investigation, reports on individual and assigned reading with AADS core and affiliated faculty.

AFA 6911 Research Paper/Proposal Writing in African and African Diaspora Studies (3). Development of skills in writing research papers and/or proposals. Prerequisite: Graduate standing.

AFA 6920 African and African Diaspora Studies Graduate Colloquium (1-3). Colloquia, symposia, lectures, conferences presented by faculty, visiting scholars, and graduate students on topics of current research interest. May be repeated with departmental approval. Prerequisites: Graduate standing, graduate advisor approval.

AFA 6940 Community Project/Internship Research in African and African Diaspora Studies (0-6). Qualitative and quantitative research using a variety of sources. Research projects conducted in the field by students under faculty supervision. May be repeated. Prerequisite: Permission of the department required.

AFA 6971 Thesis Research in African and African Diaspora Studies (1-6). Quantitative and qualitative research using a variety of sources, e.g. primary and secondary documents, filed research under faculty supervision. May be repeated with departmental approval. Prerequisites: Graduate standing, graduate advisor approval.

Master of Arts in Asian Studies

The M.A. degree in Asian Studies is an interdisciplinary program that draws on faculty from the Steven J Green School of International and Public Affairs and professional schools at FIU. The courses are coordinated by Asian Studies, which also sponsors workshops, lectures, cultural events, and study abroad programs.

The master's program provides students with a rich learning experience about a fascinating and increasingly important region of the world, and is intended to enhance the student's competitiveness upon graduation. The program provides a multidisciplinary approach covering the philosophy, religion, art history, language and literature of Asia as well as issues in history, politics, geography, sociology/anthropology, and international relations.

For further information please contact the Asian Studies office, located at SIPA 505, at asian@fiu.edu or at (305) 348-1914. Also, visit our website at: <http://asian.fiu.edu>.

Admission Requirements

Applications to the Master of Arts in Asian Studies Program must be made through the FIU University Graduate School (UGS) online portal. Applicants must also submit the following materials, as required by UGS:

1. Statement of Purpose
2. One Letter of Recommendation
3. Transcripts from previous accredited institution(s)

As required by the Asian Studies Program, applicants must meet one of the following minimum requirements for admission to the MAAS program:

1. A Bachelor's degree from an accredited institution;
2. 3.2 GPA in undergraduate degree program;
3. 3.0 GPA in undergraduate degree program with appropriate language or study abroad background as determined by examination or evaluated by the program faculty committee.
4. A Master's degree in the humanities or social sciences from an accredited institution;

The above admission requirements are minimums and not all students meeting them are assured admission. The GRE is not required.

International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System

(IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Degree Requirements (both concentrations)

The MAAS program offers two graduation exit options:

1. 30 credits - Completion of thesis project
2. 30 credits - Completion of a master's essay

Language Requirements

Students choosing the Master's Thesis option will be asked to demonstrate competence in an Asian language relevant to their thesis project when appropriate (e.g. for pre-modern studies or fieldwork research). Proficiency requirements will be determined by the thesis committee. Credits earned in meeting the language requirement will not count towards the credit hours required for the degree.

Core Courses: (9 credits)

Choose three of the following:

ASN 5315	Topics in Modern Asia
ASN 5050	Methods in Asian Studies
ASN 5815	Studies of East Asian Texts
SYD 6901	Cities in Asia
ASN 5213	Asian Studies Colloquium
ASN 5910	Independent Research in Asian Studies
ASN 6930	Seminar in Asian Studies
ASN 6940	Internship in Asian Studies

Other Coursework: (15 credits)

Students must complete 15 credits of additional coursework relevant to their research topic. Students may receive credit through independent study, study abroad, or internship approved by the program advisor.

An additional research methods course in a discipline related to the student's primary area of study may be taken as an elective, such as HIS 6059 (Historical Methods), INR 5615 (Research Design in International Relations), POS 5706 (Research Methodology), RLG 6013 (Modern Analysis of Religion), RLG 6935 (Seminar in Sacred Texts), SYA 6305 (Research Methods I), or equivalent.

Master's Thesis Option: (6 credits)

ASN 6972 Thesis

Please visit the FIU Graduate School website for up to date information on thesis guidelines and deadlines.

<http://gradschool.fiu.edu/thesis-dissertation/>

Non-Thesis Option: Master's Essay (6 credits)

1. ASN 6912 Master's Essay in Asian Studies 3 credits
2. Additional graduate-level Asia-specific course 3 credits

Master's Essay can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course.

Please visit the Asian Studies website for up to date information on guidelines and deadlines for the master's essay.

<https://asian.fiu.edu/>

Important Note about Program Options: At mid-course in the program (15 credits) the student must meet with the Program Director or Graduate Director who will determine whether the student is recommended for the thesis option or the non-thesis option.

Graduate Courses

ASH 5446 Readings in Japanese History

ASH 5905	Readings in Asian History
ASN 5130	Zen and the Arts
ASN 5131	Zen and the Arts II
ASN 5431	Studies of Women in East Asia
ASN 5815	East Asian Texts
ASN 5932	Special Topics
ECO 5709	World Economy
ECO 5735	Multinational Corporations
ECP 5707	International Economic Problems and Policies
HIS 5289	Comparative History
IDS 6938	Great Ideas Seminar: Human Nature
INR 5086	Islam in International Relations
INR 5315	Foreign Policy Analysis
INR 5544	The New Asian Century
INR 6205	World Politics
INR 6706	Political Economy of International Relations
MUH 5057	Music of the World
MUH 5575	Survey of Asian Music
RLG 5331	Religions of India
RLG 5346	Seminar on Buddhism
RLG 5352	Religions of East Asia
RLG 6319	Seminar in Asian Religions
SYD 6655	Seminar on Social Change in Asia

For more information, contact the Asian Studies office, SIPA 505. Email: asian@fiu.edu; phone: (305) 348-1914; website: <http://asian.fiu.edu>.

Combined BA/MA in Asian Studies Degree Pathway

The combined BA/MA degree pathway allows highly qualified undergraduate students to pursue an accelerated MA degree in Asian Studies. Students accepted into this pathway will be able to complete the MA degree as early as one year sooner than would otherwise be possible. Students accepted into the Asian Studies Honors track are particularly encouraged to apply for this pathway.

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees. A complete application requires:

1. Current enrollment in BA program in Asian Studies at FIU
2. Completion of 75 credits of undergraduate coursework
3. Overall GPA of 3.2 (including undergraduate and graduate courses)
4. One letter of recommendation

5. Statement of purpose discussing interests in the field

Students should consult the graduate catalog and the Asian Studies website for a more comprehensive discussion of admission requirements (<http://asian.fiu.edu>).

The program gives students the opportunity to take up to 12 credits of graduate coursework that will count towards both the BA and the MA. Students may take up to four 5000-level or higher graduate courses their senior year and follow the regular MA curriculum after they earn their BA degree.

Undergraduate Senior Year

Fall Semester – apply to the program by the end of the semester

Spring Semester – take 12 credits, including 9 graduate credits in 5000-level or higher courses

Graduate Program

Summer Semester – take 3 graduate credits (5000-level or higher)

Fall Semester – take 9 graduate credits (5000-level or higher)

Spring Semester – take 9 graduate credits (5000-level or higher, including thesis or master's essay)

Students in the combined BA/MA pathway in Asian Studies must complete all other requirements for the MA degree in Asian Studies (please consult the graduate catalog and the program's online graduate handbook). Students in this program have up to a year to complete the master's degree after receipt of the bachelor's degree. Students who fail to meet this year post BA requirement or who elect to leave the combined pathway at any time and earn only the BA degree will have the same access requirements to regular graduate programs as any other student, but will not be able to use the 12 graduate credits in both the bachelor's and master's degrees.

M.A. in Asian Studies/Ph.D. in Global and Sociocultural Studies Combined Degree Pathway

The combined Asian Studies MA/Global & Sociocultural Studies PhD pathway allows qualified graduate students to pursue both degrees at the same time. Students can develop an expertise in Asian Studies while progressing towards a PhD in one of the three majors in the Global and Sociocultural Studies PhD: geography, sociology, or anthropology.

Admission Requirements

Applicants must meet the following minimum requirements of Global and Sociocultural Studies to be considered for admission:

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.5 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores;
4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for

the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet-based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Admission Procedure

To be accepted into this pathway, students must submit an application to the PhD in Global and Sociocultural Studies with a sub-plan for a MA in Asian Studies. This designation will appear in the menu of programs in the graduate application. To be accepted into this pathway, students must submit an application by February 1st in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the online application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable;
5. Statement of purpose explaining his/her interest for enrolling in both the AS MA program and in the Ph.D. program in GSS. The statement of purpose must clearly address the applicant's academic and professional objectives for enrolling in both fields of inquiry. The statement of purpose must also indicate the intended major (international political economy or Asian cultural studies for the AS MA ,and anthropology, geography, or sociology for Ph.D. in GSS) the applicant plans to select while engaged in the PhD in GSS;
6. Three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability;
7. A curriculum vitae or resume; and
8. Writing samples and other relevant professional work that may support their applications.

Degree Requirements for M.A. in Asian Studies

(30 credits Thesis Option/30 credits Non-Thesis Option)
Up to 30 credits earned for the M.A. in AS will count towards the 75 credits required for the Ph.D. in GSS. Exceptions can be made based on the needs of the doctoral program

Core (6 credits)

ASN 5050	Methods in Asian Studies
ASN 5213	Asian Studies Colloquium
ASN 5315	Topics in Modern Asia
ASN 5910	Independent Research in Asian Studies
ASN 6930	Seminar in Asian Studies
ASN 6940	Internship in Asian Studies

Courses required for GSS Track (12 credits)

ISS 6305	Research Design and Methods
SYA 6127	Theory and Inquiry
ISS 6317	Social Research Quantitative Methods
SYA 6959	Writing Research Proposals

Asian Studies Courses (6 credits)

6 credits Asia-specific courses pertaining to main concentration (from courses listed below)

- SYD 6418 Urban Sociology in Global Perspective

- SYD 6655 Seminar on Social Change in Asia
- SYD 6901 Japanese Society in Global Perspective
- SYD 4654 State and Society in China

Language Requirement

Depending on the research topic students may be required to demonstrate language competency by the Asian Studies Graduate Committee.

MAAS Exit Options, Thesis or Non-Thesis

Thesis Exit Option (6 credits):

ASN 6972 Thesis

Non-Thesis Exit Option (6 credits):

ASN 6912 Master's Essay (3 credits) and one additional Asia-specific course (3 credits)

Master's Essay can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course.

Application for Graduation from MA in AS

Students should apply for graduation for the MA in AS as soon as they have completed all requirements for the degree – including the exit option.

Matriculation to PhD in GSS

All students must undergo a successful M.A. review upon completion of the AS Master's Program requirements in order to continue toward the Ph.D. in GSS. The GSS Graduate Committee, along with an appointee from AS, conducts these reviews. The purpose of the M.A. review is to determine the ability of the student to do Ph.D. level work with the department's faculty. Among the information considered during the review are student's performances and grades in courses, and faculty recommendations.

Degree Requirements for Ph.D. in Global and Sociocultural Studies

The doctorate in Global and Sociocultural Studies requires a minimum of 75 credits beyond the baccalaureate including a dissertation based on original research, up to 30 credits of the MA in AS will count toward the 75-credit minimum. Thus, a minimum of 42 credits must be earned beyond the MA.

Major Courses (36 credits)

All doctoral students will choose a major in Anthropology, Geography, or Sociology. The following distribution of coursework is required:

- a) Major theory methods (3)
- b) Major methods (3)
- c) Major course electives (9 minimum)
 - Doctoral Exam Preparation (6 maximum)
 - Doctoral Dissertation (15 minimum)

General Electives (6 credits)

GSS and non-GSS Department electives

Ph.D. General Examination

After successfully completing the common core requirements, the major's course requirements, and electives, a student prepares for the Ph.D. General Exam by enrolling in a maximum of six credits of exam preparation for their major. In preparation for the exam, a student forms a dissertation committee according to the regulations published on the University Graduate School web page (<http://gradschool.fiu.edu>). The Ph.D. General

Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate School Policies and Procedures Manual and the Department's Ph.D. General Exam guidelines.

The Dissertation Proposal and Defense/Candidacy Exam

After passing the Ph.D. General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the Ph.D. program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG 7980, GEO 7980, or SYA 7980). The Ph.D. program requires a student to be continuously enrolled in a minimum of 3 hours of Doctoral Dissertation each semester from the time of advancement to candidacy until completion of the dissertation, including summers. Upon completion of the dissertation manuscript and authorization by the committee, a student defends the dissertation before the committee and the University community. The University Graduate School's regulations governing the dissertation are described at <http://gradschool.fiu.edu>.

Combined Master of Arts in Asian Studies/Doctor of Philosophy in International Relations Degree Pathway

The combined M.A. in Asian Studies/Ph.D. in International Relations pathway allows qualified graduate students to pursue both degrees simultaneously. To be accepted into this pathway, students must submit an application for the M.A. in Asian Studies/Ph.D. in International Relations by January 15 in the year in which they wish to begin their studies. Applicants must meet the admission eligibility requirements and follow the admission procedures for both programs.

Students must fulfill the requirements for both programs, and up to 33 credits may count for both degrees. To graduate, students must complete the requirements of the International Relations doctoral program, including the required 75 hours.

In addition to the requirements for the two degrees, during their first two years of enrollment in this combined degree pathway, students will enroll in the following course which fulfills the M.A. in Asian Studies methods requirement:

INR 5615 Research Design in International Relations

The following International Relations courses will also be taken by M.A. in Asian Studies students during the first two years of the program and will count toward the M.A.:

INR 5609 Contemporary Dynamics of International

Relations
INR 6706 Political Economy of International Relations

Master of Arts in Asian Studies

Requirements

(30 credits Thesis Option / 30 credits Non-Thesis Option)

Core Courses: (24 credits)

- 9 credits of ASN 5000 or 6000 courses approved by the director
- 9 credits pertaining to world affairs
- 6 credits in Asian area studies

MAAS offers two exit options, Thesis or Non-Thesis

Thesis Exit Option: (6 credits)

ASN 6972 Master's Thesis

Non-Thesis Exit Option: (6 credits)

ASN 6912 Master's Essay (3 credits and one additional course (3 credits))

Master's Essay can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course.

Doctor of Philosophy in International Relations (75 credits)

Core Courses: (15 credits)

INR 5609	Contemporary Dynamics of International Relations	3
INR 5615	Research Design in International Relations	3
INR 6604	International Relations Theory I	3
INR 6608	Contemporary International Relations Theory	3

Second methods course from the following list (or another methods course approved by the Graduate Program Director):

INR XXXX	Qualitative and Interpretive Methods in International Relations
POS 5706	Graduate Seminar in Political Science Research Methods
ECO 7424	Econometric Methods I
ANG 6480	Ethnohistorical Research Methods
ANG 6497	Qualitative Research Methods
GIS 5935	Topics in GIS
PAD 7705	Applied Quantitative Analysis I
PAD 7707	Applied Quantitative Analysis II
PAD 7703C	Empirical Methods in Public Administration

Gateway courses (9 credits)

There are four major field of study: (1) Global Political Economy and Development (2) Comparative Area Studies (3) Foreign Policy and Security Studies, and (4) Global Governance, International Law and International Ethics. Student must take one gateway course for three of these fields. Gateway courses for each field are:

(1) INR 6706 Political Economy of International Relations

(2) INR 5017 Approaches to Area Studies

(3) INR 6338 Strategic Studies

(4) INR 5409 International Law I

or

INR 5507 International Organizations

Major and Minor Fields: (15 credits)

9 credits in major field of study
6 credits in minor field of study

Electives: (15 credits)

Additional elective coursework

Comprehensive Exams (6 credits)

Once students have achieved 60 credits, they must sit for written examination on the core sequence of their fields

Dissertation: (15 credits)

INR 7980 Ph.D. Dissertation

Combined Master of Arts in Asian Studies/Doctor of Philosophy in History Degree Pathway

The combined M.A. in Asian Studies/Ph.D. in History program allows qualified graduate students to pursue both degrees simultaneously. To be accepted into this pathway, students must simultaneously submit applications for the M.A. in Asian Studies and the Ph.D. in History. Applicants must meet the admission eligibility requirements and follow the admission procedures for both programs.

Students must fulfill the requirements for both programs, and up to 36 credits may count for both degrees. To graduate, students must complete the requirements of the History doctoral program, including the required 75 hours.

During their first two years of enrollment in this dual degree program, students will enroll in the following coursework which fulfills the Asian Studies M.A. requirements:

Master of Arts in Asian Studies**Requirements**

(30 credits Thesis Option / 30 credits Non-Thesis Option)

Core Courses: (24 credits)

- 9 credits of ASN 5000 or 6000 courses approved by the director
- 9 credits pertaining to world affairs
- 6 credits in Asian area studies

MAAS offers two exit options, Thesis or Non-Thesis

Thesis Exit Option: (6 credits)

ASN 6972 Master's Thesis

Non-Thesis Exit Option: (6 credits)

ASN 6912 Master's Essay (3 credits and one additional course (3 credits))

Master's Essay can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course

Students will begin study towards the Ph.D. in History immediately following their satisfactory completion of MAAS degree requirements. Students are expected to meet at the degree requirements for the Ph.D. in History, which requires a total of 75 credits.

Doctor of Philosophy in History

Courses required in addition to the degree requirements for the M.A. in Asian Studies (minimum 42-45 credits depending on MA Option selected)

- 3 credits Advanced Readings in Atlantic Civilization (HIS 6906)

- 3 credits Research in Atlantic Civilization (HIS 6918)
- 6 credits outside of Asian Studies and Atlantic Civilization (also excluding Methods), 3 credits of which must be in a comparative course (HIS or WOH prefix)
- 15-18 credits electives depending on MA option
- 15 credits Ph.D. Dissertation (HIS 7980)

Course Descriptions**Definition of Prefixes**

ASN-Asian Studies; FLE-Foreign Language Education

ASN 5050 Methods in Asian Studies (3). An examination of interdisciplinary methods for studies of Asia covering premodern and modern, language and area studies, fieldwork and deskwork, and qualitative and quantitative approaches.

ASN 5130 Zen and the Arts (3). Examines the history, theory, and practice of Chado (Way of Tea), a Zen-inspired art that has had, and still exerts, a long-lasting influence on Japanese society.

ASN 5131 Zen and the Arts II (3). Theory, practice, aesthetics and cultural history of Chado the Tea Ceremony of Zen Buddhism.

ASN 5149 Topics in Modern China (3). Advanced studies in contemporary Chinese society from the early period of the People's Republic to the period since economic reforms in 1978.

ASN 5171 International Relations of Contemporary China (3). Survey of the dynamic interaction between external and internal factors on China's international relations.

ASN 5211 Asian Cultures and Influences (3). Examines diverse forms of Asian cultural manifestations and examples of self-expression, and the manner in which these styles have influenced modern Western movements (Transcendentalism and the Beats).

ASN 5213 Asian Studies Colloquium (1-3). Graduate students will develop applied knowledge of various aspects of Asian culture as well as Asia's role in contemporary world affairs.

ASN 5306 Applying Asian Cultural Values in Business (3). Critical survey of traditional Asian values. Topics to include the way they have been applied to the world of entrepreneurship, cultural constructions of the Asian business community and philosophical approaches to the formation of entrepreneurial strategies.

ASN 5315 Topics in Modern Asia (3). Focus on modernization, or the transition from pre-modern (classical and medieval) to elements of the modern, including westernization, industrialization, and the roles of capitalism, communism, imperialism, and colonialism, as well as the impact of post-colonialism and post-modern society in Asia.

ASN 5431 Studies of Women in East Asia (3). Provides a multidisciplinary examination of the experience and representations of women in East Asia with a focus on the traditional and contemporary periods.

ASN 5605 Silk Road: Then and Now (3). Examination of the historical and contemporary significance of the Silk

Road as an avenue for commercial and cultural exchange between East and West.

ASN 5815 Studies of East Asian Texts (3). Advanced studies of classical and contemporary East Asian readings, including interpretation and analysis from traditional and contemporary perspectives. Prerequisite: Permission of the instructor.

ASN 5910 Independent Research in Asian Studies (1-6). Topics will be selected to meet academic needs for students doing research in some specialized area of Asian studies. Prerequisite: Permission of the instructor.

ASN 5932 Special Topics in Asian Studies (3). An examination of specific topics in Asian Studies. The content to be determined by instructor.

ASN 6912 Master's Essay in Asian Studies (1-6). Supervised research project. Requires prior approval by instructor. May be retaken for credit. Prerequisite: Graduate standing.

ASN 6930 Seminar in Asian Studies (3). Content to be determined by the instructor. May be repeated for credit when content changes.

ASN 6940 Internship in Asian Studies (0-3). Students intern in local, national and international organizations with ties to Asia. The nature of the work to be determined in conjunction with the advisor. May be repeated. Prerequisite: Permission of the department required.

ASN 6972 Master's Thesis (1-6). Writing and completion of thesis. Students must have completed all other requirements for Master of Arts degree in Asian Studies. Prerequisite: Permission of the Thesis director.

FLE 5855 Pedagogical Methods for Chinese Language (3). Introduction to Chinese language pedagogy, providing knowledge and tools for teaching Chinese language and culture in a classroom and a variety of pedagogical settings. Prerequisite: Permission of the instructor.

Criminology and Criminal Justice

Lisa Stolzenberg, Professor and Chair

Carleen Vincent Robinson, Teaching Professor and Associate Chairperson

Candice A. Blanford, Assistant Teaching Professor

Ana Carazo, Co-Director, Center for the Administration of Justice

Rosa Chang, Associate Teaching Professor and Graduate Program Director

Ellen G. Cohn, Associate Professor

G. Alexander Crowther, Visiting Research Professor

Erik Cruz, Post-Doctoral Research Associate

Stewart J. D'Alessio, Professor

Kristin Elink-Schuurman-Laura, Assistant Teaching Professor

Jamie L. Flexon, Professor

Amy Hyman Gregory, Assistant Teaching Professor and Undergraduate Program Director

Tim Goddard, Associate Professor

Rob Guerette, Professor

Suman Kakar Sirpal, Associate Professor

Besiki Luka Kutateladze, Associate Professor

Lin Liu, Assistant Professor

Ryan C. Meldrum, Professor and Director of Research and Communications

Robert Peacock, Assistant Professor

Melba Pearson, Senior Fellow

Stephen Pires, Associate Professor

Rebecca Richardson Dunlea, Assistant Professor

Juan M. Saiz, Teaching Professor

Luis P. Salas, Professor and Associate Vice President for Research

Theodore Shields, Associate Teaching Professor and Technology Liaison

Kristen Zgoba, Assistant Professor

Master of Science in Criminal Justice

Admissions Requirements

1. Bachelor's degree from an accredited institution.
2. GPA of 3.2 or higher in upper division coursework.
3. Grade of "B" or better in an undergraduate research methods course.
4. Statement of purpose describing the reasons for pursuing an advanced degree, research interests, and career plans.
5. Example of your written work judged by the admission committee to be of sufficient quality.
6. Two letters of recommendation from professors or employers familiar with your academic and professional qualifications.

Degree Credit Requirements

The Master of Science degree in Criminal Justice requires 36 credit hours (12 courses). All students entering the program are required to complete five courses (15 credits) of core requirements, four electives (12 credits) in criminal justice, and three courses (9 credits) in general electives.

Core Requirements

All candidates must take five core courses (15 credits)

CCJ 6025 Criminological Theory

CCJ 6676	Transnational Crime and National Security	3
CCJ 6705	Research Methods in Criminal Justice	3
CCJ 6706	Data Analysis in Criminal Justice	3
CCJ 6485	Criminal Justice Policy Analysis	3

Criminal Justice Electives

Four courses (12 credits). All elective credits must be earned at the graduate level in criminal justice (i.e., course numbers of 5000 and higher with the prefixes CCJ, CJC, CJE, CJJ, CJL, DSC).

College teaching preparation: Students interested in college teaching should complete the Graduate Teaching Certificate Program offered by the Center for the Advancement of Teaching and CCJ 6926 Teaching Methods and Strategies.

Doctoral studies preparation: Advanced students intending to enroll in a doctoral degree program should complete CCJ 6915 Supervised Research.

General Electives

Students must select three additional elective courses (9 credits). These courses may be taken outside of criminal justice, if no credits have been transferred in from another degree program or included in a joint degree program. All courses taken from outside fields must be relevant to criminal justice and approved by the graduate director. All elective credits must be earned at the graduate level (i.e., course numbers of 5000 and higher).

Graduation Requirements

To receive the Master's degree in Criminal Justice, a student must satisfy all University regulations governing graduate study. All students must complete the five core courses, four electives in criminal justice, and three courses in general electives. A minimum graduate GPA of 3.0 is required.

Accelerated MS in Criminal Justice Programs Pathways

Combined BS/MS in Criminal Justice Degree Pathway: This pathway accelerates completion of the MS in Criminal Justice for qualified students enrolled in the BS in Criminal Justice at FIU.

Criminal Justice 4+1 Degree Pathway: This pathway accelerates completion of the MS in Criminal Justice for qualified students enrolled in an approved bachelor's degree program at FIU (other than the BS in Criminal Justice).

Admission Requirements: Students must have completed 75 credits, have a minimum of a 3.2 cumulative GPA, and meet the admissions criteria for the MS in Criminal Justice. Only 5000-level or higher courses, and no more than 12 credits may be applied toward both degrees.

Completion Requirements: Students must complete their bachelor's degree at FIU, including up to 12 credits of graduate criminal justice courses.

Juris Doctor/Master of Science in Criminal Justice Joint Degree Pathway

The faculties of the College of Law and the Department of Criminology and Criminal Justice at Florida International University have approved a joint degree pathway

culminating in both a Juris Doctor degree (JD), awarded by the College of Law, and a Master of Science in Criminal Justice degree (MSCJ), awarded by the Department of Criminology and Criminal Justice. Under the joint degree program, a student can obtain the degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Essential criteria relating to the joint degree pathway are as follows:

1. Candidates for the pathway must meet the entrance requirements for and be accepted by both programs. Both programs must be informed by the student at the time of application to the second program that the student intends to pursue the joint degree.
2. The joint degree pathway is not open to students who have already earned a JD or a MSCJ.
3. For law students, enrollment in the MSCJ program is required no later than the completion of 63 credit hours in the JD program. For MSCJ students, enrollment in the JD program is required no later than the completion of 24 credit hours in the MSCJ program.
4. A student must satisfy the curriculum requirements for each degree before either degree is awarded. The Department of Criminology and Criminal Justice will allow 12 credit hours of College of Law criminal law and jurisprudence courses to be credited toward both the MSCJ and JD degrees. These 12 credit hours of law classes will be in lieu of four elective courses. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the JD degree for courses taken in the MSCJ curriculum upon completion of the MSCJ degree with a grade point average of 3.0 or higher. Subject to prior approval, law school students are normally allowed 6 credit hours from graduate level courses offered by other units of the University as counting toward the JD degree.
5. A full-time law student enrolled in the joint degree pathway may spend the first year in either the College of Law or the Department of Criminology and Criminal Justice. A part-time law student enrolled in the joint degree pathway may begin the student's studies in either program, but must take the first three semesters of law study consecutively. Students admitted to one program may enter the second program thereafter without once again qualifying for admission so long as they have notified the second program before the end of the first week of the first semester in the second program and are in good academic standing when studies commence in the second program.
6. A student enrolled in the joint degree pathway will not receive either degree until the student has satisfied all of the requirements for both degrees, or until the student has satisfied the requirements of one of the degrees as if the student had not been a joint degree pathway candidate.

Master of Science in Criminal Justice/Master of Public Administration Joint Degree Pathway

The Department of Criminology and Criminal Justice and the Department of Public Policy and Administration have a joint degree pathway culminating in both a Master of

Science in Criminal Justice (MSCJ) and a Master of Public Administration (MPA). The joint degree pathway prepares graduate students for overlapping careers in criminal justice and public management. It is intended to prepare students for positions in public, private, and nonprofit organizations that require both criminal justice and management knowledge. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Important criteria relating to the joint degree pathway are as follows:

1. Candidates in the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate in the application their intention to pursue the joint degree option. Students deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.
2. Applicants for a joint degree pathway will not be accepted from candidates who have already completed either degree. MSCJ or MPA students must apply and be admitted by no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first-degree program requirements as if the student had never been a joint degree pathway candidate.
4. The joint degree pathway requires a total of 60 credit hours. Candidates must complete 14 core courses included in the MSCJ and MPA programs (42 credits) and 6 electives (18 credits). A minimum of 2 electives must be taken within the CCJ and 2 electives in PA.

Doctor of Philosophy in International Crime and Justice

The PhD program in International Crime and Justice focuses on international areas of study within the criminology and criminal justice field.

Admission Standards

To be considered for admission to the doctoral program, applicants must fulfill these minimum requirements:

1. A bachelor's degree from an accredited institution.
2. A GPA of 3.2 or higher in upper division coursework or a 3.2 or higher for all master's degree coursework.
3. Graduate Record Exam (GRE) All sections of the exam must be taken within the last five years.
4. Two letters of recommendation from professors or employers familiar with your academic and professional qualifications.
5. A 300- to 500-word statement that describes the student's interests in pursuing an advanced degree in international crime and justice, including any specific research interests, as well as your ultimate career goals.
6. Completed research paper or thesis that demonstrates writing skills.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language

Testing System (IELTS). Minimum required scores is 550 on the paper-based TOEFL, 80 on the internet-based TOEFL (iBT) or 6.5 overall on the IELTS.

CCJ 7980

Ph.D. Dissertation

15

Graduation Requirements

The Ph.D. in International Crime and Justice requires a minimum of 75 credits hours of graduate course work beyond the bachelor's degree, including a comprehensive exam and dissertation based on the student's original research. A maximum of 36 credits are transferrable from a completed master's degree program with the approval of the graduate director. A minimum of 30 credit hours must be earned in academic courses that are part of the doctoral program (excludes, comprehensive exam and dissertation credits). Doctoral programs normally include courses at the 6000 level and above. Courses at the 5000 level may be included in a doctoral degree program in appropriate cases. A cumulative GPA of 3.0 or higher is required for graduation. All program requirements, including the dissertation, must be approved by the University Graduate School.

Award of M.S. en route to Ph. D.: Students directly admitted into the Ph.D. program may apply to be awarded the M.S. degree in Criminal Justice. To be eligible students must have completed all degree requirements of the M.S. in Criminal Justice.

Required Courses (30)

CCJ 6025	Criminological Theory	3
CCJ 6705	Research Methods in Criminal Justice	3
CCJ 6706	Data Analysis in Criminal Justice	3
CCJ 6741	Advanced Data Analysis in Criminal Justice	3
CCJ 6079	Geospatial Crime Analysis	3
CCJ 6485	Criminal Justice Policy Analysis	3
CCJ 6040	Comparative Crime and Criminal Justice Systems	3
CCJ 6675	Applied Research on Human Rights and Rule of Law	3
CCJ 6676	Transnational Crime and National Security	3
CCJ 6926	Teaching Methods and Strategies.	3

Research Tools Requirement (9): Classes that may satisfy the research tools requirement include quantitative analysis, legal research, grant writing, qualitative research methods, program evaluation and performance measures, survey research and design, and secondary analysis. This listing is not intended to be exhaustive. Approval of the research tools by the graduate director is required.

International Crime and Justice Electives (9 credits)

Students must complete 9 credits from the following list:

CCJ 6047	International Criminal Justice	3
CCJ 6620	Immigration and Crime	3
CCJ 6696	Human Trafficking	3
CJE 6025	Comparative Policing	3
DSC 6020	Terrorism and Homeland Security	3

Other course approved by the graduate director.

General Electives (9 credits)

Any courses taken outside of criminology and criminal justice must be approved by the Graduate Director.

Comprehensive Exam and Dissertation (18)

CCJ 7960	Comprehensive Exam	3
----------	--------------------	---

Course Descriptions

Definition of Prefixes

CCJ-Criminology and Criminal Justice; CJC-Corrections; CJE-Law Enforcement; CJJ-Juveniles; CJL-Law and Process; DSC-Domestic Security

CCJ 5669 Minorities in Justice Administration (3). This course focuses on current research and theories of racial, ethnic, and gender discrimination within America's criminal justice system.

CCJ 6025 Criminological Theory (3). The study of theoretical and research issues related to the nature and causes of crime and the administration of justice.

CCJ 6040 Comparative Crime and Criminal Justice Systems (3). This course provides a cross-national survey of crime and criminal justice. Emphasis will be on crime rates, forms of criminality, police, courts, and corrections.

CCJ 6047 International Criminal Justice (3). A study of international crimes, international criminal tribunals, and the prosecution and punishment of persons alleged to have committed international crimes.

CCJ 6056 History of the American Criminal Justice System (3). Focuses on the history and evolution of the American criminal justice system.

CCJ 6079 Geospatial Crime Analysis (3). Exploration and examination of patterns of crime through a geographical lens using the Geographic Information System (GIS) software.

CCJ 6362 Death Penalty (3). This course examines legal, empirical, and policy issues related to the death penalty in the United States.

CCJ 6485 Criminal Justice Policy Analysis (3). An overview of the formation, implementation, quantitative and qualitative evaluation, and ethical aspects of policy making in the criminal justice system. Prerequisite: 15 criminal justice graduate credit hours.

CCJ 6486 The Global Search for Justice and Legitimate Policing (3). Analyzes different paths that democratic societies across the globe have pursued to promote greater justice in police-citizen interactions in order to develop more legitimate police agencies.

CCJ 6489 Ethics in Criminal Justice (3). This course is designed to introduce students to ethical decision-making in the criminal justice system.

CCJ 6620 Immigration and Crime (3). This course explores the relationship between immigration and crime and the nature and extent of crime in immigrant communities.

CCJ 6635 Biosocial Criminology (3). Overview of current thinking, research, and debate centered on the overlapping role that genes, biology, the brain, and environmental factors play in the commission of violent and antisocial behavior.

CCJ 6665 Victimology and the Criminal Justice System (3). An examination of the relationship between victims and offenders and the manner in which the criminal justice system responds to victims of crime.

CCJ 6675 Applied Research on Human Rights and Rule of Law (3). Students will develop a greater understanding of pressing human rights problems and how to define and study them, design programs to address them, monitor program implementation, and measure impact.

CCJ 6676 Transnational Crime and National Security (3). Examination of the nature of transnational crime and the manner in which it relates to national security.

CCJ 6696 Human Trafficking (3). An investigation of the origins and current trends in the trafficking of humans for profit.

CCJ 6705 Research Methods in Criminal Justice (3). An intensive introduction to the methods used in criminal justice research.

CCJ 6706 Data Analysis in Criminal Justice (3). An applied introduction to multivariate statistical analysis in criminal justice research.

CCJ 6741 Advanced Data Analysis in Criminal Justice (3). An applied introduction to longitudinal analysis in criminal justice research. Prerequisite: CCJ 6706.

CCJ 6915 Supervised Research (1-3). Graduate students engage in criminal justice research under the direction of a faculty member. May be repeated for credit. Prerequisites: CCJ 6705, CCJ 6706.

CCJ 6926 Teaching Methods and Strategies. (3). Introduces students to effective pedagogical, teaching, and learning strategies used across the higher education continuum. Prerequisite: 18 graduate credit hours in criminal justice.

CCJ 6935 Special Topics (3). An intensive analysis of a particular topic in criminal justice. May be repeated for different topics.

CCJ 6946 Internship Program (0-6). Provides graduate student with the opportunity to gain work experience in an organization. Prerequisite: Student must have a minimum of 3.0 GPA.

CCJ 7960 Comprehensive Exam (3-9). Completion of a research study suitable for submission to an academic journal, including an oral presentation and defense (pass/fail grading). Corequisite: Completion of all required coursework.

CCJ 7980 Ph.D. Dissertation (1-12). Supervised research on an original research project submitted in partial fulfillment of doctoral degree requirements, including an oral presentation and defense (pass/fail grading). Prerequisites: CCJ 7960

CJE 5024 Violent Crime & Criminal Behavior (3). This course deals with violent criminal behavior and the criminal justice system's reaction to violence.

CJE 6025 Comparative Policing (3). An examination of key police systems across the globe with a focus on rule-of-law policing. Emphasis will be on how police agencies differ in their organization, administration, and procedures.

CJE 6446 Seminar on Crime Prevention (3). An in depth study of current approaches and practices in crime prevention, historical trends, and the future of crime prevention policy and practice.

CJE 6628 Cold Case Investigation (3). Covers best practice cold case investigation techniques and discusses resources available to investigators.

CJE 6695 Cybercrime (3). Examines criminality in online environments, including hacking, online identity theft, fraud, terror, trade in illicit substances/items, sexual crimes, and responses to cyber criminality.

CJE 6708 Efficacy of Forensics in Investigations (3). Discussion of forensic evidence efficacy, issues facing evidence collection and examination, use of forensic evidence in the investigative process, and courtroom challenges.

CJE 6716 Law Enforcement Practicum (3-6). Combines classroom instruction with specialized police training and workplace experience to produce successful law enforcement professionals and future leaders in the field.

CJJ 6040 Juvenile Justice Administration and Policy Analysis (3). This course is designed to provide students with an understanding of the juvenile justice system administration and the various cases and legislative initiatives that have affected juvenile justice.

CJL 6418 Law and Social Control (3). This course examines law as an instrument of social control. It explores the effectiveness of law in controlling criminal behavior and its impact on the criminal justice system.

CJL 6421 Legal Issues in Criminal Justice Administration (3). This course examines diverse and frequently debated legal topics from both legal and sociological perspectives.

CJL 6522 Courts and Sentencing (3). Examines the role of criminal courts in the administration of justice, with a special focus on contemporary research and theory about courtroom decision making.

DSC 6020 Terrorism and Homeland Security (3). This course focuses on the domestic and international threats of terrorism and the basic security issues that surround terrorism today.

Hakan Yilmazkuday, *Professor and Program Director for Research, Reputation, and Communication*

The Department of Economics has a group of faculty who are interested in a variety of applied and theoretical topics. The graduate programs in Economics place strong emphasis on exploiting synergies between fields such as international economics, industrial organization, and technological change, and development economics (including Latin American and Caribbean studies as well as regional development problems). Issues are analyzed using modern economic tools from fields such as econometrics, game theory, and economic dynamics. While these are the department's areas of greatest emphasis, graduate course work in other fields can also be undertaken. The department's graduate programs are further enhanced by the presence of complementary graduate programs in the Green School, College of Arts and Sciences, College of Business, the Robert Stempel College of Public Health and Social Work, and the Kimberly Green Latin American and Caribbean Center.

The Master's Program provides additional training in economics beyond the undergraduate degree. It provides a degree of expertise that would not be obtained in an undergraduate education. This additional expertise enhances your prospects for a successful career in the private sector, and in governmental or international agencies.

The objective of the Doctoral Program is to offer advanced training in economic analysis. It provides an excellent background for a professional career at academic institutions, in the private sector, or in governmental and international agencies.

Master of Arts in Economics

To be admitted into the Master's degree program in Economics, a student must meet the University's graduate admission requirements and:

1. Have a Bachelor's Degree from an accredited institution.
2. Have a 'B' average (3.0) or higher during the last two years of undergraduate studies, and submit official Graduate Record Examination (GRE) scores. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
3. Receive approval of the departmental graduate committee.
4. Have taken as prerequisites Statistics and Calculus I. Students who have not fulfilled all these prerequisites may be admitted on a provisional basis. Unless specifically exempted, such students must take these courses as required, obtaining no credit for them in the program.

Master's Tracks

The Department of Economics offers two tracks: A general economics track, and a track specializing in applied economics. Although the general requirements are the same for both tracks, students opting to follow the applied economics track must write a Master's Thesis, take a fourth core course, and include four of the applied track courses listed below among their electives. The applied track courses are also open to students following the general economics track.

Degree Requirements

The Master's degree program will consist of 30 semester hours of course work, at a graduate level (course numbers 5000 or above). A maximum of six semester hours may be transferred into the program subject to the approval of the graduate committee. All courses listed below carry 3 credits, except the thesis (6 credits). The specific requirements are:

Core Courses

All Master's students must take the following seven courses	
ECO 6112	Fundamentals of Microeconomic Theory 3
ECO 6204	Fundamentals of Macroeconomic Theory 3
ECO 7115	Microeconomic Theory I 3
ECO 7206	Macroeconomic Theory I 3
ECO 7405	Mathematical Methods in Economic Analysis I 3
ECO 7424	Econometric Methods I 3
ECO 7425	Econometric Methods II 3

Research Requirements: (3-6 credits)

Students must either write a thesis for 6 credits (ECO 6971), or take an advanced course in applied economics (7000-level or approved by the Graduate Director) which involves writing a research paper (3 credits).

Electives: (3-6 credits)

A student must take at least one elective in advanced field in economics. The additional course required to complete

the Master's program may be taken in Mathematics, International Studies, Social Work, Criminal Justice, Public Administration, the College of Business Administration, or in the other college or schools of the University. The graduate director must approve courses taken outside the department. ECP 6705 and ECP 6432 do not count as electives.

Additional Applied Track Courses

An M.A. student wishing to follow the applied economics track will be required to take, in addition to the three core courses above, a fourth core course:

ECO 6416	Applied Quantitative Methods in Economics	3
----------	---	---

Applied track students must choose their remaining four electives from the following courses:

ECP 6305	Advanced Environmental Economics	3
ECS 5027	Economics of Emerging Nations	3
ECP 5704	International Economic Problems and Policy	3
ECO 6225	Economics of Asset Markets	3
ECO 7236	Money, Banking and Monetary Policy	3

Graduation Requirements

To receive the Master's degree in Economics, the student must complete 30 hours of course work with a 'B' (3.0) average or higher; and must receive a grade of 'C' or higher in each course. If the student decides to write a thesis, he/she must receive the grade of 'P'(pass) for ECO 6971.

Combined BA/MA in Economics Pathway

The Combined Bachelor of Arts/Master of Arts (BA/MA) in Economics pathway is designed for outstanding undergraduate students. It provides a strong base of knowledge and skills in economics, and at the same time accelerates completion of the Master of Arts degree. Students may take advantage of the overlap of courses in the BA and MA pathway to receive their MA degree in a shorter period than it would otherwise be possible.

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

The BA program in economics requires that students take 9 upper division elective courses. Students in the BA/MA program would take elective courses that would satisfy both the BA and MA requirement.

To apply their GPA needs to be significantly above average (3.25). Students would also be required to maintain a high GPA (3.0) to remain in the pathway. The grade requirements for an MA in economics would apply to courses that are counted toward the MA degree.

Admission Requirements

1. Current enrollment in the Bachelor's degree program in economics at FIU.
2. Completed Calculus I (MAC 2311) or equivalents.
3. Current GPA of 3.25 or higher.
4. Three letters of recommendation.
5. Approval of the Graduate Committee.
6. Official GRE scores.

General Requirements

Meet the requirements of both the BA and the MA degree in economics.

Overlap: Up to 4 courses (12 credits) may be used in satisfying **both** the Bachelor's and Master's degree requirements in economics.

Doctor of Philosophy in Economics

The admission requirements to the Ph.D. program in Economics are:

1. Have a Bachelor's Degree from an accredited institution.
2. A minimum GPA of 3.0 for the last two years of undergraduate education and submit official Graduate Record Examination (GRE) scores. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
3. Three letters of recommendation, using the form provided by the Department, from people in a position to judge the applicant's suitability for graduate studies in economics.
4. Receive approval of the departmental graduate committee.
5. Completion of the following courses at the undergraduate level: statistics, two semesters of calculus, and a semester of linear algebra. Unless exempted, the student must take these courses as required, obtaining no graduate credit for them in the program.

The GRE and GPA stated above are minimum requirements. All applications are reviewed by the Graduate Studies Committee, which makes the final admission decisions. Since admission to the program is competitive, the committee's requirements are normally higher than the minimum standards. Meeting the minimum requirements does not guarantee admission.

Degree Requirements

To obtain the Ph.D. in Economics, students must complete the required course work and fulfill dissertation requirements.

Ph.D. students who have satisfied the requirements for the Master's degree are eligible to receive the Master's degree. Ph.D. students who have satisfied the Master's

degree requirements should consult with the Graduate Program Director about the necessary paperwork and procedure to receive the Master's degree in the course of their Ph.D. studies.

Coursework Requirements

Students must complete 42 hours (14 courses) of graduate level course work. Supervised research, independent study, seminars, and dissertation credit do not count towards this objective.

This required minimum of 14 courses consists of ten courses in the Core and four field courses.

No credit toward a graduate degree is given for any course in which a grade of 'C' or less is obtained. A graduate student who receives a grade lower than 'B-' in a course must retake that course; if a retake also results in a grade lower than 'B-', the student will not be permitted to continue in the Ph.D. Program. A graduate student who receives a grade lower than 'B-' in more than two courses will not be allowed to stay in the Economics Ph.D. Program.

Students are required to maintain a minimum GPA of 3.0 (of 4) in their coursework.

Core Courses

ECO 6112	Fundamentals of Microeconomic Theory	3
ECO 7115	Microeconomic Theory I	3
ECO 7116	Microeconomic Theory II	3
ECO 6204	Fundamentals of Macroeconomic Theory	3
ECO 7206	Macroeconomic Theory I	3
ECO 7207	Macroeconomic Theory II	3
ECO 7405	Mathematical Methods in Economic Analysis I	3
ECO 7424	Econometric Methods I	3
ECO 7425	Econometric Methods II	3
ECO 7426	Econometrics III	3

Core Study

During the first four semesters, students are required to take courses which include the ten core courses listed above. Following the second semester, students are required to pass a comprehensive qualifying examination on core theory—(ECO 6112, ECO 7115, ECO 6204, ECO 7206). A student who fails twice will not be allowed to remain in the program. A student must receive at least a 'B' (3.0) average in the first four courses in order to participate in the comprehensive core theory qualifying examination.

Field Study

During the fourth and fifth semesters, students will complete course work in four field courses. Students must write a field paper. The field paper must be completed, presented in a workshop, and accepted by the student's field paper committee by the end of the third year. Students who fail twice their field requirements will not be allowed to continue in that field.

Dissertation Work

Upon completion of field paper requirement, students will be required to choose a specific area of doctoral research. During this phase, which will normally have a total length of two years, the student will:

- Conduct research and complete a dissertation

- Continue taking courses to complete a minimum of 15 credits of Advanced Workshop and 18 credits of dissertation.
- Attend Advanced Workshops by enrolling in ECO 7925 in the dissertation area and present at least one paper a year on the work in that workshop.

Students will normally be required to be enrolled as fulltime students at the University for at least a year during the dissertation period. Except under abnormal circumstances, the maximum number of years during which a student may do dissertation work is five years.

Graduation Requirements

To graduate, students must complete all course requirements; fulfill workshop presentation requirements, pass the comprehensive examination and have their field paper accepted, and complete the oral defense and acceptance of the Ph.D. dissertation.

Course Descriptions

Definition of Prefixes

ECO-Economics; ECP-Economic Problems and Policy; ECS-Economic Systems and Development.
F-Fall semester offering; S-Spring semester offering; SS Summer semester offering.

ECO 5206 Economics of Asia (3). Overview of the opportunities and challenges presented by the Asian-Pacific economies.

ECO 5709 The World Economy (3). Designed to give an overview of the crucial issues in the world economy. The course covers trade, capital, labor, and technology flows; transnational economic organizations; current economic crisis; global economic interdependence; and the nature and characteristics of international economic order. Required for MIB Program. (S)

ECO 5735 Multinational Corporations (3). Economic theory and multinational corporations. Economic effects. Consequences of nationalization. Spread of the multinational form. State-owned multinational corporations. Prerequisite: Permission of the instructor for undergraduates. (S)

ECO 5906 Advanced Individual Study (1-6). Supervised readings, individual tutorial, and preparation of report. Requires consent of faculty supervisor and Department Chairperson. Open to seniors and graduate students.

ECO 5945 Internship (3). Directed individual study which assists the student in using economic analysis in his employment. Prerequisite: Permission of the chair.

ECO 6019 Macroeconomics I (3). Advanced macroeconomic analysis of income, employment, prices, interest rates and economic growth rates. Prerequisite: ECO 6204 or equivalent; Calculus I

ECO 6076 Teaching Economics (1). This course, required of all graduate assistants, is designed to introduce students to the pedagogical and practical aspects of teaching economics. It is coordinated with the Academy for the Art of Teaching.

ECO 6112 Fundamentals of Microeconomic Theory (3). Consumer theory, producer theory and the introduction of

uncertainty and dynamics. Market equilibrium and welfare properties of perfect competition and monopoly. Public goods and externalities. Prerequisites: One semester of Calculus and Statistics.

ECO 6174 Microeconomics I (3). Microeconomic behavior of consumers, producers, and resource suppliers, price determination in output and factor markets, general market equilibrium. Prerequisite: ECO 6112 or equivalent, Calculus I

ECO 6204 Fundamentals of Macroeconomic Theory (3). Consumption, investment and growth; equity premium puzzle; taxation and social security; monetary policy rules, currency and inflation; the IS-LM model; real business cycles and models with nominal rigidities. Prerequisites: Calculus and Statistics.

ECO 6225 Economics of Asset Markets (3). Economic analysis of the asset markets; risk, return and intertemporal choice; mean variance analysis; asset pricing models and properties of asset returns; market efficiency and market anomalies. Prerequisites: Calculus or permission of the instructor.

ECO 6405 Mathematical Economics (3). Introduces the use of mathematical economic models, equilibrium analysis, linear algebra, comparative static analysis, optimization problems, and dynamic problems. Prerequisite: ECO 3101 and ECO 3203. or equivalents: Calculus I

ECO 6416 Applied Quantitative Methods in Economics (3). Types of economic data; the WWW as a tool for data collection; database construction and maintenance; use of statistical software for graphical and descriptive methods; large sample inference for one population mean vector; introduction to economic time series and regression models. Prerequisites: One semester of Calculus and Statistics or permission of the instructor.

ECO 6420 Econometrics I (3). An introduction to econometric methods focusing on the statistical foundation for estimation and inference in the classical regression model. Prerequisite: ECO 4410 or equivalent, Calculus I.

ECO 6425 Econometrics II (3). Introduces advanced concepts and methods employed in empirical economic analysis. Examines logit, probit, tobit, and categorical dependent variable models. Examines estimation of economic panel data. Prerequisite: ECO 6420.

ECO 6705 International Trade for Global Governance I (3). Designed for MA students in the Global Governance program, the course provides an introduction to the modern theory and application of the economics of international trade. Prerequisite: ECO 6025.

ECO 6716 International Macroeconomics for Global Governance (3). Designed for MA students in the Global Governance program, the course provides an introduction to the modern theory and applications of international macroeconomics. Prerequisite: ECO 6025.

ECO 6936 Special Topics (3). A course designed to give students a particular topic or a limited number of topics not otherwise offered in the curriculum.

ECO 6938 Individual Graduate Study (3-9). Supervised readings, tutorial, and preparation of report. Open only to

graduate students. Requires consent of supervisor and approval of Department Chairperson.

ECO 6939 Advanced Seminar in Applied Economics (3). Variable-topic study group in application of economic analysis to specific problems. Open to seniors and graduate students. (S)

ECO 6971 Thesis (1-6). Writing and completion of thesis by candidate for a Master of Arts. Prerequisites: Student must be a Master's degree candidate, have had at least 15 hours of graduate work in economics; have a thesis topic approved by the Department's Graduate Committee and permission from the instructor.

ECO 7110 Industrial Organization: Firms (3). Theoretical and empirical analysis of firm organization and development. Topics include entrepreneurship, firm survival and evolution, spinoffs, industrial geography and dynamics. Prerequisites: ECO 6112 (or equivalent), ECO 7405 (or equivalent), and ECO 7424 (or equivalent).

ECO 7115 Microeconomic Theory I (3). Game theory. Analysis of static and dynamic games of complete and incomplete information. Introduction to contracts and mechanism design. Prerequisites: ECO 3101 or equivalent, Calculus I; Calculus II recommended. (F)

ECO 7116 Microeconomic Theory II (3). The General equilibrium and welfare economics. Economics of uncertainty. Economic dynamics including capital accumulation, optimal growth, and dynamic equilibrium. Uncertainty and incomplete markets. Prerequisites: ECO 7115 and ECO 7405. (S)

ECO 7118 Graduate Seminar in Economic Theory (3). Variable-topic graduate study group in theoretical problems. Open only to students with graduate standing.

ECO 7135 Growth, Distribution and Prices (3). Alternative theories of growth, income distribution and prices. Basic growth models; neoclassical capital theory and Cambridge controversies; neo-Marxian, neo-Keynesian and other approaches. Prerequisites: ECO 7116, ECO 7207, ECO 7405.

ECO 7136 Classical and Marxian Economic Theory (3). Classical and Marxian theories of value and capital in a mathematical mode. The Transformation Problem. Simple and expanded reproduction. The falling rate of profit and other Marxian crises. Prerequisites: ECO 7115, ECO 7206, ECO 7405, ECO 7116.

ECO 7206 Macroeconomic Theory I (3). Analysis of macroeconomic models of income determination and the price level, microeconomic foundations of macro-behavior, macroeconomic models, and basic open economy macroeconomics. Prerequisites: ECO 3203, ECO 4410, or equivalents; Calculus I; Calculus II recommended. (F)

ECO 7207 Macroeconomic Theory II (3). Alternative approaches to macroeconomic theory. Business cycle theories and theories of growth and income distribution. Prerequisites: ECO 7115, ECO 7206, ECO 7405.

ECO 7216 Monetary Theory and Policy (3). Relationship of money supply and interest rate to economic stabilization. Consideration of federal reserve system, money market, and factors determining money supply and demand. Neo-Keynesian, Chicago, and radical policy views.

ECO 7236 Money, Banking, and Monetary Policy (3). Monetary theory and its application. Consideration of central banking in the U.S. and its relation to the international economy, money markets, and financial intermediaries. Survey of current policy views.

ECO 7305 History of Economic Thought (3). Exploration of the evolution of economic thought and analysis in the changing socio/historical, institutional and political setting in which it takes place. Prerequisite: Permission of the instructor. (S)

ECO 7405 Mathematical Methods in Economic Analysis I (3). Application of mathematical methods to economics. The topics and tools of mathematical economics are presented in a rigorous fashion within an economic context. Prerequisites: Calculus I, ECO 3101 and ECO 3203, or equivalents. (F)

ECO 7406 Mathematical Methods in Economic Analysis II (3). Selected topics in dynamic optimization and related topics, focusing on applications to economic problems and covering modeling in both continuous and discrete time. Prerequisites: ECO 6112, ECO 6204, ECO 7405.

ECO 7408 Industrial Organization: Markets (3). Analysis of the structure, behavior, and performance of industries and markets, and core issues in competition and regulatory policy. Prerequisites: ECO 6112 (or equivalent), ECO 7405 (or equivalent).

ECO 7424 Econometric Methods I (3). Formulation, estimation, evaluation of econometric models. Includes: review probability theory, OLS, properties of estimators, asymptotics, hypothesis tests, violations of classical assumptions, IV. Prerequisites: MAS 3105, ECO 7405. (S)

ECO 7425 Econometric Methods II (3). Builds on ECO 7424. Advanced single equation estimation, numerical estimation, maximum likelihood, GMM, test procedures, non-linear models, systems of equations, and simultaneous equations models. Prerequisite: ECO 7424. (F)

ECO 7426 Econometrics III (3). Continuation of ECO 7425. Topics include multivariate models, times series models, panel data models, test procedures and model selection. Prerequisite: ECO 7425.

ECO 7429 Topics in Econometrics (3). Selected topics in econometrics. Intended to acquaint students with current research in the field. Material covered will vary from year to year with instructor. Prerequisites: ECO 7424 and ECO 7425.

ECO 7505 Public Finance (3). Partial and general equilibrium analysis of tax incidence efficiency, public goods, public pricing problems, the social rate of discount, and non-market decision making.

ECO 7617 Seminar in Economic History (3). Topics in economic history, exploration of the economic history literature on a selected theme, student presentations. Prerequisite: Permission of the instructor for undergraduates.

ECO 7705 International Trade (3). Positive and normative aspects of international trade. Theories of comparative advantage, commercial policy, trade and

income distribution. Prerequisites: Advanced Microeconomic Theory; Calculus. (F)

ECO 7716 International Money (3). Theory of international monetary equilibrium. Problems of international payments and exchange rate control; their effect on international monetary problems. Analysis of short and long term monetary flows and macroeconomic adjustment. Prerequisites: Advanced Macroeconomics and Calculus. (S)

ECO 7717 Applied International Economics (3). Empirical international finance and international trade. Includes national accounts, exchange rates, dynamic stochastic general equilibrium models, variable markups, and gravity type methodologies. Prerequisites: ECO 7115, ECO 7206, ECO 7705, ECO 7716.

ECO 7925 Advanced Workshop (3). Enables students to attend advanced workshop presentations and to present the results of their own research. Prerequisite: Completion of field examination requirements. (F,S)

ECO 7980 Ph.D. Dissertation (1-12). To be taken every semester for research on, and writing of Ph.D. dissertation by candidates for the Ph.D. Prerequisite: Permission of Major Professor and Doctoral Candidacy.

ECP 5707 International Economic Problems & Policy (3). International trade and comparative advantage; commercial policy; foreign exchange markets; balance of payments; issues in trade & development. Prerequisites: ECO 2013 or ECO 3011, and ECO 2023 or ECO 3021.

ECP 6305 Advanced Environmental Economics (3). Economics of environmental pollution; theories of exhaustible and renewable resource extraction; issues in environmental valuation and policies. Prerequisites: ECP 3101 and ECP 3302 or ECP 4314 or permission of the instructor.

ECP 6432 Macroeconomic Forecasting for Management (3). Basic macroeconomics concepts as they apply to decision making within the firm. Traditional models of income determination and forecasting analysis. Prerequisite: ECP 6705. (F,S,SS)

ECP 6605 Urban and Regional Analysis (3). Application of economic analysis to urban growth and the urban/regional environment. Consideration of public services, transportation, ghetto problems, and urban organization. Analysis of environmental protection problems and policies. Recommended preparation: ECO 3101, ECO 3203 and ECP 3303.

ECP 6705 Managerial Economics (3). Basic microeconomic concepts as they apply to decision making within the organization; supply and demand; market structure and market behavior in specific industries. Recommended Preparation: Principles of Microeconomics and Calculus. Prerequisites: ECO 3021 and ECO 3011. (F,S,SS)

ECP 7035 Cost-Benefit Analysis (3). This course covers benefit-cost analysis, cost-effectiveness analysis, benefit risk analysis, risk-risk analysis, and systems analysis. All of these techniques are designed to provide guidance to decision makers, particularly in the government sector. Prerequisite: ECO 3101.

ECP 7205 Labor and Human Resources (3). Empirical and theoretical analysis of the factors determining employment and earnings, recent developments in the theory of labor supply, critiques of neoclassical theory, and current issues in public policy. Prerequisite: Calculus.

ECP 7405 Industrial Organization (3). The organization of the industrial economy with particular emphasis as to the type of competition, the bases of monopoly power and the extent of monopoly power. Prerequisites: Advanced Micro and Calculus.

ECP 7606 Urban and Regional Economics (3). The economics of urbanization processes, internal organization of cities, and regional settlement. Spatial growth models and spatial development planning. Prerequisites: ECO 7115, ECO 5205, ECS 4013 or equivalent; and ECO 6636. (F)

ECP 7636 Location Theory (3). Systematic exposition of urban and industrial location theory. Spatial price theory and spatial competition. Prerequisites: ECO 3101 or equivalent; Calculus I; Calculus II and ECO 7115 recommended. (S)

ECP 7706 Managerial Economics (3). Analysis of the economic decisions of firm managers, emphasizing the practical application of concepts to economic problem solving by managers, public administrators and other decision makers. Prerequisites: Ph.D. or advanced Masters.

ECS 5005 Comparative Economic Systems (3). A critical evaluation of the design, goals, and achievements of economic policies in capitalist and socialist economies. Prerequisite: Permission of the instructor for undergraduates.

ECS 5025 Economic Planning (3). Analysis of planning methods in capitalist and socialist economies. Evaluation of macro and micro economic planning tools (input-output) and programming techniques. Theory and practice of economic development planning of agriculture, industrialization, foreign trade, and manpower. Prerequisites: Graduate standing or permission of the instructor.

ECS 5027 Economic Development of Emerging Nations (3). Specific economic problems of emerging nations and national groupings. Basic approaches to economic development; major proposals for accelerating development. Role of planning. Trade, aid, and economic integration. (F)

ECS 5406 Latin American Economies (3). Economic theory and its applications to current economic issues of Latin America. Examines aggregate demand and supply, fiscal and monetary policies, international trade trends, and economic development. Taught in Spanish. May not be taken for credit towards a degree in Economics.

ECS 6015 Economic Development for Global Governance I (3). Designed for MA students in the Global Governance program, the course provides training in applied development economics. Prerequisite: ECO 6025.

ECS 6016 Economic Development for Global Governance II (3). Designed for MA students in the Global Governance program, the course provides training in applied development economics. Prerequisites: ECO 6025, ECS 6015.

ECS 6436 The Economics of Caribbean Migration (3). The course examines the economic causes and consequences of Caribbean immigration to the United States. Special emphasis on the effects of Caribbean migration on the United States economy.

ECS 7015 Development Economics: Theory (3). Analytical approaches to economic development. Analysis of macro models, specific resources and sectors, and trade and income distributional problems in relation to developing countries. Prerequisites: ECO 7115 and ECO 7116 or equivalents. (F)

ECS 7026 Development Economics: Planning and Policy (3). Planning and policy making in developing economies. Economy/wide planning models; project appraisal; financial, stabilization and trade policies. Prerequisites: ECO 7115, ECO 7116, and ECO 7405. (S)

ECS 7405 Economics of Latin America (3). Dependence, population explosion, urban migration, agricultural reform, industrialization and import substitution, common markets. Prerequisite: Permission of the instructor for undergraduates.

ECS 7435 Economics of the Caribbean (3). Macroeconomic assessment; income distribution, employment and migration; industrial and agricultural development; international trade, multinational and integration attempts. Prerequisite: Permission of the instructor.

ECS 7445 Economics of Central America (3). Recent economic events in the region dealing with institutional background and structure of current economic activities. Special emphasis on problems of growth, social transformation and economic integration. Prerequisite: Permission of the instructor. (F)

The Department of Global and Sociocultural Studies – a core department in FIU's Steven J. Green School of International and Public Affairs – provides a unique opportunity to integrate the disciplinary approaches of anthropology, geography, and sociology with cross-disciplinary theorizing and research. The department's research and teaching revolve around three overlapping themes: identities and inequalities; migrations and diasporas; and nature-society. Utilizing comparative, transnational, diasporic, and global perspectives, the department's faculty and graduate students pursue these themes through a variety of qualitative, quantitative, and applied research methods.

The department's research and teaching themes reflect FIU's location in one of the world's most dynamic regions: the greater metropolitan area of Miami – a hemispheric

crossroads of sociocultural, political, economic, and environmental forces, bridging the United States with the Caribbean and Latin America, the Atlantic region, and the world at large. In this setting, the department's inclusion within the Green School of International and Public Affairs affords students a wealth of research and associated opportunities through FIU's Kimberly Green Latin American and Caribbean Center; Program in African and African Diaspora Studies; Institute for Asian Studies; European Union Center; and Center for Labor Research and Studies, to name a few. The department maintains close relationships with its partner departments within the Green School of International and Public Affairs: Politics and International Relations, Public Administration, Religious Studies, and Criminal Justice. Joint faculty appointments and research-teaching collaborations link the department with the Department of Earth and Environment and the Women's Studies Center. The department also maintains close ties with the Department of History.

The graduate program in Global and Sociocultural Studies provides advanced training for myriad careers in higher education and in the government, non-profit, and corporate sectors.

Admission Process & Requirements

1. Application forms and fees:
 - a) Admissions Office: <https://fiuonline.fiu.edu/admissions/international-students.php>
2. Please send to the University's Admission Office:
 - a) Official transcripts from previous undergraduate and graduate programs. The minimum requirements are a cumulative grade point average of 3.2 in undergraduate courses and a cumulative grade point average of 3.5 in any prior graduate courses.
 - b) Official GRE verbal and quantitative scores, sent directly by the Educational Testing Service.
 - c) International graduate student applicants whose native language is not English: TOEFL or IELTS scores, sent directly by the Educational Testing Service. The minimum requirement is a total score 80 on the iBT TOEFL (equivalent to 550 on the paper-based version, or 213 on the computer-based version of TOEFL) or a total score of 6.5 on IELTS.
3. Additionally, please submit through the University's Admissions portal.
 - a) Research Statement (maximum of three single-spaced pages): describing your research interests and a potential research project; prior research/academic experience; and GSS faculty members with whom you would like to work.
 - b) Personal Statement (maximum of two single-spaced pages): describing your background, career goals and why you are interested in pursuing a graduate degree with GWW
 - c) One or more writing samples: course papers, thesis chapters, or other examples of writing and analytical abilities.
 - d) Unofficial (such as photocopied) copies of the academic transcripts, GRE scores, and TOEFL or IELTS scores.

4. Three letters of reference that comment on your potential for success in graduate studies and beyond.
5. Application Deadline: Students are admitted to begin the program in the fall semester only. The application deadline is February 1; January 1 to be considered for funding.

Financial Aid

Applicants to FIU may qualify for one of several different opportunities to finance their studies:

1. FIU's Presidential Fellowship for outstanding applicants, nominated by the Graduate Program Committee (see <http://www.fiu.edu/~ugs/financial.html>)
2. Departmental Teaching Assistantships (TAs). Teaching assistantships are allocated on a competitive basis and include a 12-month stipend, tuition waiver, and medical insurance. To be considered for an assistantship, the applicant must make such a request in writing to the Graduate Program Director **prior to April 1**. The awarding of teaching assistantships will be made by the Graduate Program Committee. Students receiving an assistantship are required to perform approximately 20 hours of teaching related duties per week during the 12-month appointment. TA positions are renewable on a competitive basis by annual application.
3. There are innumerable additional sources of funding for graduate students best researched by applicants. A good start is the UGS website at <http://www.fiu.edu/~ugs/financial.html>.
4. Graduate students are routinely employed as research assistants (RA) on faculty grants. Students in their second or later years are particularly encouraged to seek RA positions to enhance their research skills and career options. The hiring of research assistants is at the discretion of the project's principal investigators. While these arrangements vary, they usually cover the student's tuition and provide a stipend.

Transfer of Credits

Credits may be transferred in accordance with the FIU Graduate Policies and Procedures Manual (consult <http://www.fiu.edu/~ugs/gpm>). While a student may transfer credits into the program, the substitution of transferred credits for specific core and substantive area requirements is not generally allowed. A student seeking to transfer credits must submit a written petition to the Graduate Program Director detailing the courses and hours of credit s/he is seeking to transfer. In addition, students requesting substitution of transferred credits for program requirements must include supporting documentation as part of the petition. The screening and initial decision regarding transferring of credit and substitution will be made by the Graduate Program Director and the Graduate Program Committee. Final approval will be made by the University Graduate School.

Master of Arts in Global and Sociocultural Studies (36 credits)

The M.A. program includes common core requirements but does not include disciplinary major track requirements.

To remain in good academic standing and to qualify for graduation, students must maintain a minimum GPA of 3.0 and must receive a minimum grade of "B" in each common core required course.

Common Core Requirements (15 credits)

The core curriculum includes six required courses (this is the same core for the Ph.D. degree):

ISS 6346	Theory and Inquiry	3
ISS 6305	Research Methods and Design	3
ISS 6306	Writing Research Proposals	3

At least one theory course from the following:

ANG 6083	Theory in Anthropology	3
GEO 6118	Theory in Geography	3
SYA 6018	Theory in Sociology	3

At least one methods course from the following:*

ANG 6497	Qualitative Research Methods	3
ANT XXXX	Qualitative Data Analysis	3
SYA 6356	GIS and Social Research	3
SYA 6305	Research Methods I	3
SYA 6306	Research Methods II	3

* Or another approved methods course.

Electives (21 credits)

Seven elective courses*

*Includes a maximum of one directed studies course (3 credits) and two courses (6 credits) taken in other departments, as approved by the graduate director.

Master of Arts in Global and Sociocultural Studies- Applied Interdisciplinary Social Science Research Track

Common Core Requirements (24 credits)

All of the following (12 Credits):

ISS 6346	Theory and Inquiry	3
ISS 6305	Research Methods and Design	3
ISS 6317	Soc Res Quant Methods I	3
ISS 6XXX	Directed Research Project in Applied Interdisciplinary Social Science	3

At least one theory course from the following (3 credits):

ANG 6083	Theory in Anthropology	3
GEO 6118	Theory in Geography	3
SYA 6018	Theory in Sociology	3

At least three methods/research design courses from the following* (9 credits):

ANG 6480	Ethnohistorical Research Methods	3
ANG 6497	Qualitative Research Methods	3
GIS 5935	Topics in Geographic Information Systems	3
ISS 6306	Writing Research Proposals	3
SYA 5357	Graduate GIS and Latin American Societies	3
SYA 6317	Social Research Quantitative Methods II	3
SYA 6356	GIS and Social Research	3
SYA 6452	Topics in GIS and Social Research	3

* Or other methods/research design courses inside or outside GSS, if approved by the Graduate Program Director.

Four elective courses Electives (12 credits)

** **Includes a maximum of one directed studies course (3 credits) or 3 additional hours of ISS 6XXX Directed Research Project in Applied Interdisciplinary Social Science.

Doctor of Philosophy in Global and Sociocultural Studies

The Ph.D. in Global and Sociocultural Studies is an innovative interdisciplinary degree which combines the theories and practices of three key social science disciplines; geography, sociocultural anthropology, and sociology. All students receive interdisciplinary training and the opportunity to focus their coursework and dissertation research in one of the three disciplines. Of the minimum 75 semester hours required for the doctoral degree, 12 comprise the interdisciplinary core, 33 the major discipline, and 30 the electives inside and outside the Department of Global and Sociocultural Studies.

Admissions

Applicants are reviewed only in the spring term for fall admission. Admissions to the Ph.D. program are competitive. Meeting minimum requirements does not guarantee admission. See the Admissions Process & Requirements for the GSS Graduate Program for full details. Students who originally applied to the M.A. program must apply separately to be admitted into the Ph.D. program. A positive evaluation of the student's performance at the M.A. level (hereafter called the M.A. review) will be the most important of the factors considered in evaluating applications to the Ph.D. program. All students, including those who originally applied directly to the Ph.D. program, must undergo a successful M.A. review upon completion of the Masters Program requirements in order to continue toward the Ph.D. The Graduate Committee conducts these reviews. The purpose of the M.A. review is to determine the ability of the student to do Ph.D. level work with the department's faculty. Among the information considered during the review are students' performance and grades in courses and faculty recommendations.

Students who have obtained a Masters degree at another institution may be admitted directly into the Ph.D. program, but first must undergo the equivalent of the M.A. review.

The Ph.D. Degree Requirements

The Ph.D. program consists of 75 semester hours of course work (including the 36 hours a student may have earned in the Department's M.A. program). Students acquire competencies in theory, methods and proposal writing during the first two years of the Ph.D. program by successfully completing a common interdisciplinary core curriculum of 12 hours of coursework.

In addition to the common core curriculum, each Ph.D. program student declares a major in Geography, Sociocultural Anthropology, or Sociology. Each major consists of the corresponding disciplinary theory course; one additional theory course from the other departmental disciplines; one approved methods course; a minimum of two discipline-based seminars; and a dissertation supervised by a faculty member from the department. A student may declare only one major. As students progress through the program, they increasingly pursue their own

research interests by taking elective courses across the disciplines and by working with their committee to prepare a doctoral dissertation. A student takes a minimum of 30 hours of electives.

A grade of "B" or higher must be earned in all courses and a cumulative average of 3.0 or higher must be maintained. Students may apply to transfer a maximum of 6 graduate credit hours earned in another program or institution. An exception is made for courses contained within an earned master's or doctoral degree.

In the course of their studies, the student will have met the requirements for, and be awarded a M.A. in Global and Sociocultural Studies

A student should complete the Ph.D. General Exam and defend their Dissertation Proposal by the end of their third year of study. Then the student prepares a dissertation under the guidance of a faculty committee and defends the dissertation.

Core Courses (12 credits)

ISS 6346	Theory and Inquiry	3
ISS 6305	Research Methods and Design	3
ISS 6306	Writing Research Proposals	3
ISS 6317	Social Research Quantitative Methods I	3

Majors' Requirements (33)

Geography Major

GEO 6118	Theory in Geography	3
----------	---------------------	---

One additional theory course taught within the department:

SYA 6018	Theory in Sociology	3
----------	---------------------	---

or

ANG 6083	Theory in Anthropology	3
----------	------------------------	---

One additional methods course taught within the Department, for which GIS may be used. (3 credits)

Choose from:

ANG 6480	Ethnohistorical Research Methods	3
ANG 6497	Qualitative Research Methods	3
GIS 5038	Remote Sensing	3

GIS 5935	Topics in Geographic Information Systems	3
----------	--	---

SYA 5357	Graduate GIS and Latin American Societies	3
----------	---	---

SYA 6317	Social Research Quantitative Methods II	3
SYA 6356	GIS and Social Research	3

Geography course electives (6 minimum)

At least 2 seminars drawn from the following list.

GEA 6409	Landscapes of Violence and Healing in the Americas	3
----------	--	---

GEO 5415	Topics in Social Geography (may be repeated for credit)	3
----------	---	---

GEO 5557	Globalization	3
----------	---------------	---

GEO 6473	Space, Place and Identity	3
----------	---------------------------	---

GEO 6478	Critical Geopolitics	3
----------	----------------------	---

GEO 6603	Cities and Regions in Global Perspective	3
----------	--	---

GEO 5906	Directed Individual Studies	3
----------	-----------------------------	---

GIS 5038	Remote Sensing	3
----------	----------------	---

GIS 5620	Surveillance, Intelligence, and International Relations	3
----------	---	---

GIS 5935	Topics in Geographic Information Systems	3
----------	--	---

Exam Prep (6 maximum)

GEO 7964	Preparation: Preliminary Doctoral Exam	6
----------	--	---

Dissertation (15 minimum)

GEO 7980 Ph.D. Dissertation 15

Sociocultural Anthropology Major

ANG 6083 Theory in Anthropology 3

One additional theory course taught within the department:

SYA 6018 Theory in Sociology 3

or

GEO 6118 Theory in Geography 3

One additional methods course taught within the Department, for which GIS may be used. (3 credits)
Choose from:

ANG 6480 Ethnohistorical Research Methods 3

ANG 6497 Qualitative Research Methods 3

GIS 5038 Remote Sensing 3

GIS 5935 Topics in Geographic Information Systems 3

SYA 5357 Graduate GIS and Latin American Societies 3

SYA 6317 Social Research Quantitative Methods II 3

SYA 6356 GIS and Social Research 3

Anthropology course electives (6 minimum)

At least 2 seminars drawn from the following list.

ANG 5267 Environmental Anthropology 3

ANG 5396 Representations of Africa and Africans in Films 3

ANG 5397 Advanced African Diaspora Cultures and Performativity 3

ANG 6303 Comparative Feminisms 3

ANG 6339 Seminar on Latin America 3

ANG 6472 Anthropology of Globalization 3

ANG 6497 Qualitative Research Methods 3

ANT 6302 Gender Identity in Comparative Perspective 3

ANT 6319 The African Diaspora: Anthropological Perspectives 3

ANT 6469 Graduate Medical Anthropology 3

ANT 7491 Contemporary Theory in Social Anthropology 3

Exam Prep (6 maximum)

ANG 7964 Preparation: Preliminary Doctoral Exam 6

Dissertation (15 minimum)

ANG 7980 Ph.D. Dissertation 15

Sociology Major

SYA 6018 Sociocultural Theories A 3

One additional theory course taught within the department:

ANG 6083 Theory in Anthropology 3

or

GEO 6118 Theory in Geography 3

One additional methods course taught within the Department, for which GIS may be used. (3 credits)
Choose from:

ANG 6480 Ethnohistorical Research Methods 3

ANG 6497 Qualitative Research Methods 3

GIS 5038 Remote Sensing 3

GIS 5935 Topics in Geographic Information Systems 3

SYA 5357 Graduate GIS and Latin American Societies 3

SYA 6317 Social Research Quantitative Methods II 3

SYA 6356 GIS and Social Research 3

Sociology course electives (6 minimum)

At least 2 seminars drawn from the following list.

SYA 7205 Foundations of Social Theory Construction 3

SYA 5135 Sociology of Knowledge 3

SYA 6657 Evaluation of Organizations and Programs 3

SYA 6941 Internship in Applied Sociology 1-9

SYA 5357 Graduate GIS and Latin American Societies 3

SYA 6943 South Florida Area Study 3

SYA 7930 Special Topic in Comparative Sociological Research 3

SYA 7941 Field Research 1-9

SYG 6932 Special Topics in Disaster Studies 3

SYD 5045 Population and Society 3

SYD 5607 Advanced World Jewish Communities 3

SYD 5708 Advanced Race, Gender, Sexuality: Entanglements Across Time and Space 3

SYD 6236 International Migration and Refugees 3

SYD 6325 Seminar in the Comparative Sociology of Gender 3

SYD 6418 Graduate Seminar in Urban Sociology 3

SYD 6427 Seminar in Comparative Urban Issues 3

SYD 6615 Seminar in Comparative Analysis of Selected Regions 3

SYD 6625 South Florida Socio-cultural Systems 3

SYD 6626 Cuba Seminar 3

SYD 6655 Seminar on Social Change in Asia 3

SYD 6796 Sex, Race, and Power in Colonial Times 3

SYD 6816 Advanced Sociological Theories of Gender 3

SYO 6306 Political Sociology 3

SYO 6536 Comparative and Global Inequality 3

SYP 6457 Cities and Regions in Global Perspective 3

SYP 6907 Comparative and Global Change 3

Exam Prep (6 maximum)

SYA 7967 Preparation: Preliminary Doctoral Exam 6

Dissertation (15 minimum)

SYA 7980 Ph.D. Dissertation 15

General Electives (30)

Students will take 30 hours beyond the common core curriculum and the majors' requirements. This includes a maximum of one directed studies course (three hours). Students are allowed a maximum of two courses (six hours) taken in other departments. In some circumstances, such as the case of a student pursuing a graduate certificate, the Graduate Director may approve additional coursework outside of the department.

Ph.D. General Examination

After successfully completing the common core requirements, the major's course requirements, and electives, a student prepares for the Ph.D. General Exam. In preparation for the exam, a student forms a dissertation committee according to the regulations published on the University Graduate School web page (<http://gradschool.fiu.edu>). The Ph.D. General Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate Policies and Procedures Manual and the Department's Ph.D. General Exam guidelines.

Dissertation Proposal and Defense/Candidacy Exam

Concomitant with preparation for the Ph.D. General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the Ph.D. program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG 7980, GEO 7980, or SYA 7980). The Ph.D. program requires a student to be continuously enrolled in a minimum of 3 hours of Doctoral Dissertation each semester from the time of advancement to candidacy until completion of the dissertation, including summers. Upon completion of the dissertation manuscript and authorization by the committee, a student defends the dissertation before the committee and the University community. The University Graduate School's regulations governing the dissertation are described at <http://gradschool.fiu.edu>.

M.A. in African and African Diaspora Studies/Ph.D. in Global and Sociocultural Studies Combined Degree Pathway

The combined African & African Diaspora Studies MA/Global & Sociocultural Studies PhD pathway allows qualified graduate students to pursue both degrees at the same time. Students can develop an expertise in African & African Diaspora Studies while progressing toward a PhD in one of the three majors in the Global and Sociocultural Studies PhD: geography, sociology, or anthropology.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores;
4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet-based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Admission Procedure

To be accepted into this pathway, students must submit an application to the PhD in Global and Sociocultural Studies with a sub-plan for a MA in African & African Diaspora Studies. This designation will appear in the menu of programs in the graduate application. To be accepted into this program, students must submit an application by January 1 in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the on-line application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable;
5. Statement of purpose explaining his/her interest for enrolling in both the AADS MA program and in the PhD program in GSS. The statement of purpose must clearly address the applicant's academic and professional objectives for enrolling in both fields of inquiry. The statement of purpose must also indicate the intended major (anthropology, geography, or sociology) the applicant plans to select while engaged in the PhD in GSS;
6. Three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability;
7. A curriculum vitae; and
8. Writing samples and other relevant professional work that may support their applications.

Degree Requirements for M.A. in African and African Diaspora Studies

The 30-credit, one year, three semester program occurring over Fall, Spring, and Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 9 credits of core International Relations courses, and 12 credits of electives. There is also a Foreign Language Requirement.

MA in AADS Core (9 credits)

AFA 5005	African & African Diaspora Studies Theory (3 credits)
AFA 5855	Research Methods in African and African Diaspora Studies (3 credits)
AFA 6920	African & African Diaspora Studies Graduate Colloquium (3 credits — 1 credit over three semesters)

Combined MA in AADS/PhD in Global and Sociocultural Studies Core Courses: (6 credits)

SYA 6127	Theory and Inquiry (3 credits)
ANG 5093	Research Methods (3 credits)

MA in AADS Electives (15 credits)

Nine credits of elective courses with an AADS focus must be from the Global and Sociocultural Studies Department. Six credits may be from outside of the Department but within the Green School and/or the college of Arts & Sciences. Students wishing to take courses outside of the

Green School and the college of Arts & Sciences must seek prior approval.

Note: students are advised to take at least 9 of these elective credits in their chosen major discipline for GSS (anthropology, geography, or sociology).

MA in AADS Research Proposal option

To graduate from the MA in AADS, students enrolled in this combined MA/PhD pathway must elect to complete either a research proposal or research paper for their exit option. Those who elect to write a research proposal must take AFA 6911 Research Paper/Proposal Writing in African and African Diaspora Studies.

MA in AADS Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests.

Application for Graduation from MA in AADS

Students should apply for graduation for the MA in AADS as soon as they have completed all requirements for the degree – including the exit option. Ordinarily, the MA will be conferred before the student advances to candidacy for the PhD in Global and Sociocultural Studies.

Matriculation to PhD in GSS

All students must undergo a successful M.A. review upon completion of the AADS Master's Program requirements in order to continue toward the Ph.D. in GSS. The GSS Graduate Committee, along with an appointee from AADS, conducts these reviews. The purpose of the M.A. review is to determine the ability of the student to do Ph.D. level work with the department's faculty. Among the information considered during the review are students' performances and grades in courses, and faculty recommendations.

Degree Requirements for Ph.D. in Global and Sociocultural Studies

The doctorate in Global and Sociocultural Studies requires a minimum of 75 credits beyond the baccalaureate including a dissertation based on original research. 30 credits of the MA in AADS will count toward the 75-credit minimum. Thus, a minimum of 45 credits must be earned beyond the MA.

Major Courses (33 credits)

All doctoral students will choose a major in Anthropology, Geography, or Sociology. The following distribution of coursework is required.

- a). Major theory (3)
- b). Major methods (3)
- c). Major course electives (6 minimum)
- d). Exam and dissertation credits and GSS and non-GSS Department electives
 - Doctoral Exam Preparation (6 maximum)
 - Doctoral Dissertation (15 minimum)

General Electives (12 credits)

GSS and non-GSS Department electives

Ph.D. General Examination

After successfully completing the common core requirements, the major's course requirements, and

electives, a student prepares for the Ph.D. General Exam by enrolling in a maximum of six credits of exam preparation for their major. In preparation for the exam, a student forms a dissertation committee according to the regulations published on the University Graduate School web page (<http://gradschool.fiu.edu>). The Ph.D. General Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate School Policies and Procedures Manual and the Department's Ph.D. General Exam guidelines.

The Dissertation Proposal and Defense/Candidacy Exam

After passing the Ph.D. General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the Ph.D. program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG 7980, GEO 7980, or SYA 7980). The Ph.D. program requires a student to be continuously enrolled in a minimum of 3 hours of Doctoral Dissertation each semester from the time of advancement to candidacy until completion of the dissertation, including summers. Upon completion of the dissertation manuscript and authorization by the committee, a student defends the dissertation before the committee and the University community. The University Graduate School's regulations governing the dissertation are described at <http://gradschool.fiu.edu>.

M.A. in Asian Studies/Ph.D. in Global and Sociocultural Studies Combined Degree Pathway

The combined Asian Studies MA/Global & Sociocultural Studies PhD pathway allows qualified graduate students to pursue both degrees at the same time. Students can develop an expertise in Asian Studies while progressing towards a PhD in one of the three majors in the Global and Sociocultural Studies PhD: geography, sociology, or anthropology.

Admission Requirements

Applicants must meet the following minimum requirements of Global and Sociocultural Studies to be considered for admission:

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.5 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores;

4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet-based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Admission Procedure

To be accepted into this pathway, students must submit an application to the PhD in Global and Sociocultural Studies with a sub-plan for a MA in Asian Studies. This designation will appear in the menu of programs in the graduate application. To be accepted into this pathway, students must submit an application by February 15 in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the online application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable;
5. Statement of purpose explaining his/her interest for enrolling in both the AS MA program and in the Ph.D. program in GSS. The statement of purpose must clearly address the applicant's academic and professional objectives for enrolling in both fields of inquiry. The statement of purpose must also indicate the intended major (international political economy or Asian cultural studies for the AS MA ,and anthropology, geography, or sociology for Ph.D. in GSS) the applicant plans to select while engaged in the Ph.D. in GSS;
6. Three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability;
7. A curriculum vitae or resume; and
8. Writing samples and other relevant professional work that may support their applications.

Degree Requirements for M.A. in Asian Studies

(30 credits Thesis Option/30 credits Non-Thesis Option)
Up to 30 credits earned for the M.A. in AS will count towards the 75 credits required for the Ph.D. in GSS. Exceptions can be made based on the needs of the doctoral program.

Core (6 credits)

ASN 5050	Methods in Asian Studies
ASN 5315	Topics in Modern Asia
:	
ASN 5213	Asian Studies Colloquium
ASN 5910	Independent Research in Asian Studies
ASN 6930	Seminar in Asian Studies
ASN 6940	Internship in Asian Studies

Courses required for GSS Track (12 credits)

ISS 6305	Research Design and Methods
SYA 6127	Theory and Inquiry
ISS 6317	Social Research Quantitative Methods

SYA 6959 Writing Research Proposals

Asian Studies Courses (6 credits)

6 credits Asia-specific courses pertaining to main concentration (from courses listed below)

- SYD 6418 Urban Sociology in Global Perspective
- SYD 6655 Seminar on Social Change in Asia
- SYD 6901 Japanese Society in Global Perspective
- SYD 4654 State and Society in China

Language Requirement

Depending on the research topic students may be required to demonstrate language competency by the Asian Studies Graduate Committee.

MAAS Exit Options, Thesis or Non-Thesis

Thesis Exit Option (6 credits):

ASN 6972 Thesis

Non-Thesis Exit Option (6 credits):

ASN 6912 Master's Essay (3 credits) and one additional Asia-specific course (3 credits)

Master's Essay can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course.

Application for Graduation from MA in AS

Students should apply for graduation for the MA in AS as soon as they have completed all requirements for the degree – including the exit option.

Matriculation to Ph.D. in GSS

All students must undergo a successful M.A. review upon completion of the AS Master's Program requirements in order to continue toward the Ph.D. in GSS. The GSS Graduate Committee, along with an appointee from AS, conducts these reviews. The purpose of the M.A. review is to determine the ability of the student to do Ph.D. level work with the department's faculty. Among the information considered during the review are student's performances and grades in courses, and faculty recommendations.

Degree Requirements for Ph.D. in Global and Sociocultural Studies

The doctorate in Global and Sociocultural Studies requires a minimum of 75 credits beyond the baccalaureate including a dissertation based on original research, up to 30 credits of the M.A. in AS will count toward the 75-credit minimum. Thus, a minimum of 42 credits must be earned beyond the M.A.

Major Courses (36 credits)

All doctoral students will choose a major in Anthropology, Geography, or Sociology. The following distribution of coursework is required:

- a) Major theory methods (3)
- b) Major methods (3)
- c) Major course electives (9 minimum)
 - Doctoral Exam Preparation (6 maximum)
 - Doctoral Dissertation (15 minimum)

General Electives (6 credits)

GSS and non-GSS Department electives

Ph.D. General Examination

After successfully completing the common core requirements, the major's course requirements, and

electives, a student prepares for the Ph.D. General Exam by enrolling in a maximum of six credits of exam preparation for their major. In preparation for the exam, a student forms a dissertation committee according to the regulations published on the University Graduate School web page (<http://gradschool.fiu.edu>). The Ph.D. General Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate School Policies and Procedures Manual and the Department's Ph.D. General Exam guidelines.

The Dissertation Proposal and Defense/Candidacy Exam

After passing the Ph.D. General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the Ph.D. program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG 7980, GEO 7980, or SYA 7980). The Ph.D. program requires a student to be continuously enrolled in a minimum of 3 hours of Doctoral Dissertation each semester from the time of advancement to candidacy until completion of the dissertation, including summers. Upon completion of the dissertation manuscript and authorization by the committee, a student defends the dissertation before the committee and the University community. The University Graduate School's regulations governing the dissertation are described at <http://gradschool.fiu.edu>.

M.A. in Latin American and Caribbean Studies/Ph.D. in Global and Sociocultural Studies Combined Degree Pathway

The combined Latin American and Caribbean Studies M.A. (MALACS)/Global & Sociocultural Studies Ph.D. pathway allows qualified graduate students to pursue both degrees at the same time. Students can develop an expertise in Latin American and Caribbean Studies while progressing towards a Ph.D. in one of the three majors in the Global and Sociocultural Studies Ph.D.: geography, sociology, or anthropology.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;

3. Official Graduate Record Exam (GRE) scores;
4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet-based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Admission Procedures

To be accepted into this pathway, students must submit an application to the Ph.D. in Global and Sociocultural Studies with a sub-plan for a M.A. in Latin American and Caribbean Studies. This designation will appear in the menu of programs in the graduate application. To be accepted into this program, students must submit an application by March 1 in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the on-line application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable.
5. Statement of purpose explaining his/her interest for enrolling in both the MALACS program and in the Ph.D. program in GSS. The statement of purpose must clearly address the applicant's academic and professional objectives for enrolling in both fields of inquiry. The statement of purpose must also indicate the intended major (anthropology, geography, or sociology) the applicant plans to select while engaged in the Ph.D. in GSS;
6. Three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability;
7. A curriculum vitae; and
8. Writing samples and other relevant professional work that may support their applications.

Degree Requirements for M.A. in Latin American and Caribbean Studies

The 36 credits earned for the M.A. in LACC (MALACS) will count towards the 75 credits required for the Ph.D. in GSS.

MALACS Core (9 credits)

LAS 6003	Survey of Latin America
LAS 6934	Research Seminar
ISS 6305	Research Methods and Design
or	
ISS 6317	Social Research Quantitative Methods I

Courses Required for GSS Track (9 credits)

SYA 6127	Theory and Inquiry
ISS 6305	Research Methods and Design
or	
ISS 6317	Social Research Quantitative Methods I
SYA 6959	Writing Research Proposals

Electives (12 credits)

- 6 credits of elective courses with a clear MALACS focus from within the Department of Global and Sociocultural Studies
- 6 credits of elective Courses from outside that Department and within the Green School and/or the College of Arts & Sciences (see the MALACS Humanities and Social Sciences lists of approved graduate courses).

MALACS Research Proposal

To graduate from the MALACS program, students enrolled in this combined M.A./Ph.D. pathway must elect the research proposal option and take the proposal writing course SYA 6959 Writing Research Proposals during the semester prior to enrolling in the required exit options in the MALACS program.

MALACS Exit Options (6 credits)

Students may choose any of the exit options offered by the MALACS degree.

LAS 6790 Thesis (minimum 6 credits) See the MALACS program description for more information. The thesis is publically defended and approved by a committee of three graduate faculty members;

LAS 6905 (6 credits) Preparation of two directed research papers. Both papers require an oral presentation, defense and approval by a committee of three graduate faculty members;

LAS 6942 Internship and major research paper (6 credits). Supervised internship leading to a major research paper based upon the student's work during the internship. The research paper requires an oral presentation and approval by a committee of three graduate faculty members.

MALACS Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests.

Application for Graduation from MALACS program

Students should apply for graduation for the MALACS degree as soon as they have completed all requirements for the degree – including the exit option. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in GSS.

Matriculation to Ph.D. in GSS

All students must undergo a successful M.A. review upon completion of the MALACS Program requirements in order to continue toward the Ph.D. in GSS. The GSS Graduate Committee, along with an appointee from LACC, conducts these reviews. The purpose of the M.A. review is to determine the ability of the student to do Ph.D. level work with the department's faculty. Among the information considered during the review are a student's overall performance, grades in courses, and faculty recommendations.

Degree Requirements for Ph.D. in Global and Sociocultural Studies

The doctorate in Global and Sociocultural Studies requires a minimum of 75 credits beyond the baccalaureate

including a dissertation based on original research. 36 credits of the MALACS program will count toward the 75-credit minimum. Thus, a minimum of 39 credits must be earned beyond the M.A.

Major Courses (33 credits)

All doctoral students will choose a major in Anthropology, Geography, or Sociology. The following distribution of coursework is required.

- Major theory (3)
- Major methods (3)
- Major course electives (6 minimum)
- Exam and dissertation credits and GSS and non-GSS Department electives
 - Doctoral Exam Preparation (6 maximum)
 - Doctoral Dissertation (15 minimum)

General Electives (6 credits)

GSS and non-GSS Department electives

Ph.D. General Examination

After successfully completing the common core requirements, the major's course requirements, and electives, a student prepares for the Ph.D. General Exam by enrolling in a maximum of six credits of exam preparation for their major. In preparation for the exam, a student forms a dissertation committee according to the regulations published on the University Graduate School web page (<http://gradschool.fiu.edu>). The Ph.D. General Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate School Policies and Procedures Manual and the Department's Ph.D. General Exam guidelines.

The Dissertation Proposal and Defense/Candidacy Exam

After passing the Ph.D. General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the Ph.D. program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG 7980, GEO 7980, or SYA 7980). The Ph.D. program requires a student to be continuously enrolled in a minimum of 3 hours of Doctoral Dissertation each semester from the time of advancement to candidacy until completion of the dissertation, including summers. Upon completion of the dissertation manuscript and authorization by the committee, a student defends the dissertation before the committee and the University community. The University Graduate School's regulations governing the dissertation are described at <http://gradschool.fiu.edu>.

Combined M.A. in Religious Studies/Ph.D. in Global and Sociocultural Studies Degree Pathway

The combined Religious Studies M.A./Global and Sociocultural Studies Ph.D. pathway allows qualified graduate students to pursue both degrees at the same time. Students can develop an expertise in Religious Studies while progressing towards a Ph.D in one of the three majors in the Global and Sociocultural Studies Ph.D. geography, sociology, or anthropology. The dissertation may be directed by a qualified professor in either department

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission

1. Baccalaureate degree from an accredited institution for higher education (or equivalent)
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores,
4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Admission Procedures

To be accepted into this pathway, students must submit an application to the Ph.D. in Global and Sociocultural Studies with a sub-plan for a M.A. in Religious Studies. This designation will appear in the menu of programs in the graduate application. To be accepted into this pathway, students must submit an application by March 1 in the year in which they wish to begin their studies. The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the on-line application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable;
5. Statement of purpose explaining their interest for enrolling in both the M.A. Religious Studies program in the Department of Religious Studies and in the Ph.D. program in GSS. The statement of purpose must clearly address the applicant's academic and professional objectives for enrolling in both fields of inquiry. The statement of purpose must also indicate the intended major (anthropology, geography, or sociology) the applicant plans to select while engaged in the Ph.D. in GSS;
6. Three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability;

7. A curriculum vitae; and
8. Writing samples and other relevant professional work that may support their applications

Degree Requirements for M.A. in Religious Studies

The 36 credits earned for the M.A. in Religious Studies will count towards the 75 credits required for the Ph.D. in GSS.

Religious Studies Core (9 credits)

RLG 6935	Seminar in Sacred Sources	3
RLG 6013	Modern Analysis of Religion	3
RLG 5038	Advanced Fieldwork in Religious Studies	3

Courses Required for GSS Track (12 credits)

ISS 6346	Theory and Inquiry (Fall)
ISS 6306	Writing Research Proposals (Spring)
ISS 6305	Research Methods and Design (Spring)
ISS 6317	Social Research Quantitative Methods I (Fall)

Electives (9 or 12 credits depending on exit option)

9 or 12 credits or elective courses from within the Department of Religious Studies Department

Religious Studies MA Exit Options (6 or 3 credits)

Students may choose any of the exit options offered by the Religious Studies degree.

RLG 6971 Thesis (minimum 6 credits) See the Religious Studies program description for more information. The thesis is publicly defended and approved by a committee of three graduate faculty members

RLG XXXX (3 credits) Preparation of two directed research papers. Both papers require an oral presentation, defense and approval by a committee of three graduate faculty members;

RLG XXXX Internship and major research paper (3 credits). Supervised internship leading to a major research paper based upon the students work during the internship. The research paper requires an oral presentation and approval by a committee of three graduate faculty members.

SIPA Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests.

Application for Graduation from Religious Studies program

Students should apply for graduation for the Religious Studies degree as soon as they have completed all requirements for the degree – including the exit option. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in GSS.

Matriculation to Ph.D. in GSS

All students must undergo a successful M.A. review upon completion of the Religious Studies Program requirements in order to continue toward the Ph.D. in GSS. The GSS Graduate Committee, along with an appointee from Religious Department conducts these reviews. The purpose of the M.A. review is to determine the ability of the student to do Ph.D. level work with the department's faculty. Among the information considered during the

review are a student's overall performance, grades in courses, and faculty recommendations.

Degree Requirements for Ph.D. in Global and Sociocultural Studies

The doctorate in Global and Sociocultural Studies requires a minimum of 75 credits beyond the baccalaureate including a dissertation based on original research. A maximum of 36 credits of the Religious Studies Master program will count toward the 75-credit minimum. Thus, a minimum of 39 credits must be earned beyond the M.A.

Major Requirements (33 credits)

All doctoral students will choose a major in Anthropology, Geography, or Sociology. The following distribution of coursework is required.

- (a) Major theory (3)
- (b) Additional methods (3)
- (c) Major course electives (6 minimum)
- (d) Exam and dissertation credits
 - a. Doctoral Exam Preparation (6 maximum)
 - b. Doctoral Dissertation (15 minimum)

General Electives (6 credits)

GSS and non-GSS Department electives

Ph.D. General Examination

After successfully completing the common core requirements, the major's course requirements, and electives, a student prepares for the Ph.D. General Exam by enrolling in a maximum of six credits of exam preparation for their major. In preparation for the exam, a student forms a dissertation committee according to the regulations published on the University Graduate School web page (<http://gradschool.fiu.edu>). The Ph.D. General Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate School Policies and Procedures Manual and the Department's Ph.D., General Exam guidelines.

The Dissertation Proposal and Defense/Candidacy Exam

After passing the Ph.D. General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the Ph.D. program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG 7980, GEO 7980, or SYA 7980). The Ph.D. program requires a student to be continuously enrolled in a minimum of 3 hours of Doctoral Dissertation each semester from the time of advancement to candidacy until the completion of the dissertation, including summers. Upon completion of the dissertation manuscript and authorization by the committee, a student defends the dissertation before the committee and the University community. The University Graduate School's regulations

governing the dissertation are described at <http://gradschool.fiu.edu>.

Course Descriptions

Definition of Prefixes

ANG-Anthropology Graduate; ANT-Anthropology; GEA-Geography: Regional Areas; GEO-Geography: Systematic; GIS-Geography: Information Science; ISS-Interdisciplinary Social Sciences; SYA-Sociological Analysis; SYD-Sociology of Demography and Area Studies; SYG-Sociology, General; SYO-Social Organization; SYP-Social Processes
F-Fall semester offering; S-Spring semester offering; SS-Summer semester offering.

ANG 5267 Environmental Anthropology (3). Theories of human adaptation, including environmental determinism, possibilism, cultural ecology, materialism, and evolutionary ecology. Credit for both ANT 3403 and ANT 5548 will not be granted. Prerequisites: Graduate standing or permission of the instructor. (SS)

ANG 5355 Ethnographies of Sub-Saharan Africa (3). Critical reading of selected "historical" and contemporary ethnographies of Sub-Saharan Africa.

ANG 5396 Representations of Africa and Africans in Films (3). Analyzes representations of Sub-Saharan Africa and Africans in various cinematic traditions (including documentaries) and examines these representations in socioeconomic and political contexts. Prerequisite: Permission of the instructor.

ANG 5397 Advanced African Diaspora Cultures and Performativity (3). Examines different approaches adopted by African diaspora studies scholars in social and cultural anthropology, and recent theoretical texts and debates in Performance Studies. Prerequisite: Permission of the instructor.

ANG 5905 Directed Individual Study (1-20). Supervised readings and/or field research and training. Prerequisite: Permission of the instructor. (F,S,SS)

ANG 5906 Directed Individual Studies (3). Supervised readings and/or field research and training.

ANG 5915 Directed Field Research (1-20). Permission of the instructor required.

ANG 6083 Theory in Anthropology (3). Examines the relationship between theory and research in the social sciences, focusing on the historical, contemporary, and philosophical foundations of anthropological thought. Prerequisites: Graduate standing in the department or permission of the instructor.

ANG 6303 Comparative Feminisms (3). Course examines feminisms and feminist movements in a global context. Taking several geocultural areas as examples, the course analyzes the discourse of cultures, feminisms, and feminist movements. Prerequisites: One graduate level course on gender or permission of the instructor. (S)

ANG 6305 Queer Lives/Queer Theories (3). Introduces key arguments, theories, and methods of queer studies through an examination of the social, economic, and

cultural construction/organization of sexual identities and politics.

ANG 6339 Seminar on Latin America (3). Analysis of Latin American cultures and classes using case studies. Students read a series of anthropological or sociological works and discuss them in a seminar format. Prerequisites: Graduate standing or permission of the instructor. (F)

ANG 6472 Anthropology of Globalization (3). Examination of global economic, political, and cultural processes including the movements of people, commodities, and capital. Study of formation of identities, consumption practices, and gender dynamics.

ANG 6473 Diasporas, Migration, and Globalization (3). Examines a variety of theories of "Diaspora" that have proliferated during the last few decades, as the concept relates to processes of transnational migration and globalization.

ANG 6480 Ethnohistorical Research Methods (3). Ethnohistorical research methods enable the compilation and analysis of a wide array of data sources for the production of sociocultural theories, histories, processes and contexts. Prerequisites: Graduate standing or permission of the instructor.

ANG 6497 Qualitative Research Methods (3). Qualitative research methods in anthropology and sociology. Includes participant-observation, field work, key informants and in-depth interviewing, visual techniques, ethical issues, and reflexivity. (F)

ANG 7964 Preparation: Preliminary Doctoral Exam (1-9). Preparation for the preliminary doctoral exam under the direction of a faculty member. Hours may vary. Prerequisite: Permission of major professor.

ANG 7980 Ph.D. Dissertation (1-20). Completion of doctoral dissertation. Hours may vary. Prerequisite: Permission of major professor and doctoral candidacy.

ANT 6302 Gender Identity in Comparative Perspective (3). Comparative examination of cultural and socio-economic factors defining gender identities and relations in western and non-western societies. Includes selected cross-cultural case studies. Prerequisites: Graduate standing or permission of the instructor. (S)

ANT 6319 The African Diaspora: Anthropological Perspectives (3). History and cultures of Africans outside of Africa, with a special emphasis on the African experience in the Americas. Topics covered include slavery, class, gender, ethnicity, and religion. Prerequisite: Graduate standing.

ANT 6469 Graduate Medical Anthropology (3). Concepts and methods in the field of medical anthropology. Importance of culture in governing the type and frequency of disease in a population, the way people explain and treat disease, and responses to the delivery of modern medicine. Prerequisite: Graduate standing. (S)

ANT 7491 Contemporary Theory in Social Anthropology (3). Graduate seminar examining current theoretical issues in social anthropology. Prerequisites: SYA 6018 or permission of the instructor.

GEA 6409 Landscapes of Violence and Healing in the Americas (3). Nation building in the Americas cycles

between violence (political, economic, cultural) and healing (through magic, rituals, religion or the arts). Prerequisite: Graduate standing.

GEO 5415 Topics in Social Geography (3). Topics discussed include geographic aspects of population and ethnicity, with emphasis on sources and analysis of data and pertinent concepts. Prerequisites: GEA 2000, graduate standing, or permission of the instructor.

GEO 5479 Advanced Political Ecology (3). People are often engaged in conflict over nature and the landscapes where they would live, work, and recreate. Seminar illuminates roles of geography, history, and power in these conflicts. Prerequisite: Graduate status.

GEO 5557 Globalization (3). Examines the transformation of the world economy and of global finance, the changing significance of sovereignty and territoriality, the effects of space-time compression on everyday life, and associated shifts in culture and identity.

GEO 5906 Directed Individual Studies (3). Supervised readings and/or field research and training.

GEO 6113 Qualitative Research Methods in Geography (3). Workshop class on qualitative research methods including archival analysis, participant observation, interviewing, and focus groups.

GEO 6118 Theory in Geography (3). Examines the relationship between theory and research in the social sciences, focusing on theoretical perspectives in geography. Prerequisites: Graduate standing in the department or instructor's permission.

GEO 6405 Geographies of Resilience in the Anthropocene (3). Examines the emergence of resilience within the context of new understandings of nature connected with the Anthropocene, and explores alternative ways of living in a dynamic world.

GEO 6413 Feminist Geographies (3). Examines key contributions of feminist theory and scholarship to the discipline of Geography.

GEO 6473 Space, Place and Identity (3). Explores space, place and identity in international relations. Focus is on the importance of the spatial relations instructing the politics of nationalisms, ethnicities, and genders.

GEO 6478 Critical Geopolitics (3). Examines the school of thought that emerged in the 1980s challenging hegemonic ways of representing the world. Topics include feminist geopolitics, war on terror, critical geopolitics in Latin America. Prerequisite: Graduate standing.

GEO 6603 Cities and Regions in Global Perspective (3). Examines the interplay of cities and regions with the world political economy, past and present. Emphasizes theoretical perspectives on conditions underlying inequalities between cities and regions. Prerequisite: Graduate standing.

GEO 7964 Preparation: Preliminary Doctoral Exam (1-9). Preparation for the preliminary doctoral exam under the direction of a faculty member. Hours may vary. Prerequisite: Permission of major professor.

GEO 7980 Ph.D. Dissertation (1-20). Completion of doctoral dissertation. Hours may vary. Prerequisites: Permission of major professor and doctoral candidacy.

GIS 5038 Remote Sensing (3). Satellite image and aerial photo interpretation and analysis fundamentals.

GIS 5620 Surveillance, Intelligence, and International Relations (3). This seminar focuses on the role of advanced technology in obtaining information via orbital or land-based surveillance systems on issues of international relations such as warfare and globalization. Prerequisites: Graduate standing or permission of the instructor.

GIS 5935 Topics in Geographic Information Systems (3). Geographic concepts are studied in a computer-based mapping environment. Both social and physical data are used. Students receive a background in spatial analysis and basic cartography.

ISS 5309 Visual Methods in Social Sciences Research (3). Interdisciplinary course explores use of visual methods in social sciences research, focusing on documentary film and PhotoVoice techniques.

ISS 6305 Research Methods and Design (3). Logic and procedures in conceptualizing and conducting empirical social research. Emphasizes the relationship of research design and methods to theoretical perspectives. Prerequisites: Graduate standing or permission of the instructor.

ISS 6306 Writing Research Proposals (3). Development of skills in writing research proposals. Prerequisites: Graduate standing in the department and three semesters of completed graduate studies, or instructor's permission.

ISS 6317 Social Research Quantitative Methods I (3). First course in the graduate program's sequence in social research quantitative methods. Prerequisites: Graduate standing or permission of the instructor.

ISS 6346 Theory and Inquiry (3). First semester required core seminar. Introduces issues and controversies concerning the relationship between theory and research. Prerequisites: First year graduate standing in the department or permission of the instructor.

SYA 5135 Sociology of Knowledge (3). The study of the theoretical basis of knowledge and the inter-relatedness of knowledge and social factors, particularly as knowledge relates to institutional forms of behavior. (F)

SYA 5357 Graduate GIS and Latin American Societies (3). Introduces geographic information systems (GIS) in the context of Latin American socio-spatial and environmental problems and transformations.

SYA 5909 Directed Individual Study (VAR). Supervised readings and/or field research and training. Prerequisite: Permission of the instructor. (F,S,SS)

SYA 5941 Directed Field Research (VAR). Permission of the instructor required. (F,S,SS)

SYA 6018 Sociocultural Theories A (3). One of two courses designed to prepare students with a thorough understanding of the key theories and theorists of both sociology and anthropology typically offered in the fall semester. Prerequisites: Graduate standing or permission of the instructor. (F)

SYA 6127 Theory and Inquiry (3). First semester required core seminar. Introduces issues and controversies concerning the relationship between theory

and research. Prerequisites: First year graduate standing in the department or permission of the instructor.

SYA 6305 Research Methods I (3). The first in a two-course sequence in applied social science research methods in comparative sociology emphasizes quantitative skills needed to design, implement and analyze data. Prerequisites: Graduate standing or permission of the instructor. (F)

SYA 6306 Research Methods II (3). The second in a two-course sequence on research methods in comparative sociology. Includes the quantitative analysis of sociological research data, and the preparation of written reports and articles. Prerequisites: SYA 6305 and equivalent. (S)

SYA 6317 Social Research Quantitative Methods II (3). Second course in the graduate program's sequence in social research quantitative methods. Discusses the relationship between theory and research, and quantitative in relation to qualitative methods. Prerequisites: ISS 6317 or permission of the instructor.

SYA 6356 GIS and Social Research (3). Focuses on applications of GIS in social research; includes applying critical perspective on space, place, cartography to GIS social research projects. Prerequisites: GIS 3048 or EVR 4XXX or permission of the instructor.

SYA 6657 Evaluation of Organizations and Programs (3). Conceptual frameworks and methods for evaluating the performance and impacts of organizations and programs.

SYA 6941 Internship in Applied Sociology (1-9). Practical application in a supervised setting outside of the classroom of knowledge acquired in the classroom. Hours may vary.

SYA 6943 South Florida Area Study (3). Current issues in South Florida studied through large-scale survey research conducted by class members. Provides experience in research techniques and the development and testing of theory. Prerequisites: SYD 6625 and SYA 6305. (S)

SYA 6959 Writing Research Proposals (3). Development of skills in writing research proposals. Prerequisite: Three completed semesters of graduate work.

SYA 6975 Thesis (1-6). Registration for students working on the thesis for the M.A. in Comparative Sociology or the M.A. in International Studies. Prerequisites: All other course work for the M.A. in Comparative Sociology or International Studies. (F,S,SS)

SYA 7205 Foundations of Social Theory Construction (3). Seminar exams assumptions of social theory. Topics include objectivity in the social sciences, social science concepts and explanations, reductionism, and the bases of social theory construction. (S)

SYA 7930 Special Topic in Comparative Sociological Research (3). A detailed exploration into particular research methodologies, approaches and techniques relevant to Comparative Sociology. Topic will vary depending upon the instructor. Course may be repeated. Prerequisites: SYA 6305 and SYA 6306 or permission of the instructor.

SYA 7941 Field Research (1-9). Research projects or certain aspects of research in a field situation carried out by one or more students under the direction of a faculty member. Topics vary. Usually selected on an individual basis. Hours may vary. (F,S,SS)

SYA 7967 Preparation: Preliminary Doctoral Exam (1-9). Preparation for the preliminary doctoral exam under the direction of a faculty member. Hours may vary. (F,S)

SYA 7979 Advanced Research (1-9). Research projects or certain aspects of research carried out by one or more students under the direction of a faculty member. Topics vary; selected on an individual basis. Hours may vary. (F,S,SS)

SYA 7980 Ph.D. Dissertation (1-12). Hours taken by students to work on the dissertation under the supervision of a major professor and the doctoral committee. Hours may vary. Prerequisites: Permission of Major Professor and Doctoral Candidacy. (F,S)

SYD 5045 Population and Society (3). The study of the processes that determine the size and composition of human populations. Emphasis on demographic transition theory and the antecedents and consequences of differential growth rates throughout the world. Prerequisites: Graduate standing or permission of the instructor.

SYD 5607 Advanced World Jewish Communities (3). Overview of Jewish communities throughout the world. Analyzes their origins, migrations, demographic and social characteristics. Covers Ashkenazi, Sephardi, and Oriental communities. Prerequisite: Graduate Standing.

SYD 5656 Global Japan (3). An examination of the dynamics of contemporary social issues in Japan and Japan's role in a globalized society.

SYD 5708 Advanced Race, Gender, Sexuality: Entanglements Across Time and Space (3). Examines the transnational, interrelated history of race and gender from the 16th century to the present.

SYD 6236 International Migration and Refugees (3). Comparative analysis of the causes, consequences, and policies concerning population movements across national borders. Includes review of various theories of labor migration. Students will conduct research on a migration or refugee topic. Prerequisites: Graduate standing or permission of the instructor. (F)

SYD 6325 Seminar in the Comparative Sociology of Gender (3). The examination of women's and men's roles, statuses, and life opportunities from a historical and comparative perspective. Current theoretical developments in the study of gender are emphasized. Prerequisites: Graduate standing or permission of the instructor. (S)

SYD 6418 Graduate Seminar in Urban Sociology (3). Presents an overview of the major subtopics and debates in urban sociology, including comparative, transnational, and global perspectives.

SYD 6427 Seminar in Comparative Urban Issues (3). Current theoretical developments in the study of urbanism, including the evolution and growth of cities, spatial and social structures, migration, and the critical problems of

social life in cities. Prerequisites: Graduate standing or permission of the instructor. (F)

SYD 6615 Seminar in Comparative Analysis of Selected Regions (3). Comparative social analysis using studies from two or more world regions. Students read a series of works on issues such as bureaucracy, modernization, and development, and discuss them in a seminar format. Prerequisites: Graduate standing or permission of the instructor. (S)

SYD 6625 South Florida Socio-cultural Systems (3). The sociological and anthropological analysis of South Florida. Presents tools for regional study including demography, cultural ecology, and ethnic group-centered symbolic systems. Prerequisites: Graduate standing or permission of the instructor. (F)

SYD 6626 Cuba Seminar (3). Examines the culture and social structure of the Cuban Republic; the antecedents and consequences of the profound process of social change initiated in 1959; and Cuban emigration. Prerequisites: Graduate standing or permission of the instructor.

SYD 6639 Seminar in Societies and Cultures of the Caribbean (3). This course examines the Caribbean's relationship to global social and cultural processes. It focuses both on the region's history and present day, with emphasis on sociological perspectives.

SYD 6655 Seminar on Social Change in Asia (3). An examination of social change in contemporary Asia, including the relationships between states, the changing political economies, and the role of social movements and cultural institutions in change. Prerequisites: Graduate standing or permission of the instructor.

SYD 6705 Comparative Analysis of Ethnicity and Race (3). Consideration of major theories of ethnicity and race and analysis of selected ethnic groups in various world regions. Includes the study of race and ethnic issues in Miami and the South Florida region. (S)

SYD 6796 Sex, Race, and Power in Colonial Times (3). Critical examination of sexual intimacy in colonial contexts between colonizers and colonized people. Explores the intersection between racialization and sexualization and white male power over black and brown male and female bodies. Prerequisite: Graduate standing.

SYD 6816 Advanced Sociological Theories of Gender (3). Examines sociological theory as it deals with gender from a feminist perspective. Prerequisite: Graduate standing. (S)

SYD 6901 Special Topics in Sociology (3). An examination of specific themes and topics in sociology. The theme may vary from semester to semester. With a change in content, the course may be repeated. Can be taken for credit no more than twice with any given instructor. Prerequisites: SYA 6018 or permission of the instructor.

SYD 7903 Directed Readings (1-9). Readings under the direction of a faculty member focusing on one of the tracks in the Ph.D. program. Hours may vary. (F,S,SS)

SYG 6932 Special Topics in Disaster Studies (3). Case studies of major disasters used to explore topics such as impact of gender, class, ethnicity, and age on vulnerability,

response, and outcome; effects of larger political and economic systems; and relationship to social change. May be repeated with change of topic.

SYO 6306 Political Sociology (3). Examines social relations of power in groups, organizations, and national and global structures; also patterns of state formation, state-society relations, and sources of political change. Prerequisite: Graduate standing. (S)

SYO 6405 Graduate Medical Sociology (3). Examination of the social significance of health, illness, and medicine in the U.S. as compared to other societies. Includes disease type and distribution as well as a critique of health care professions, organizations, and policies. Prerequisite: Graduate standing. (F)

SYO 6536 Comparative and Global Inequality (3). Addresses theoretical approaches and empirical studies concerning socioeconomic, political, and local/regional inequalities in comparative, transnational, and global perspective. Prerequisites: Graduate standing or permission of the instructor. (S)

SYP 5447 Development and Post-Development (3). Examines theories and case studies concerning development and post-development in global perspective. (S)

SYP 6457 Cities and Regions in Global Perspective (3). Examines the interplay of cities and regions with the world political economy, past and present. Prerequisite: Graduate standing.

SYP 6907 Comparative and Global Social Change (3). Examines examples of social change in comparative, transnational, diasporic, and global perspective. Prerequisites: Graduate standing or permission of the instructor. (F)

Master of Arts in History

The Department of History offers the on-campus and fully online M.A. degree, with coursework in five culture areas: Africa, Asia, Europe, Latin America, and United States. Students will choose a Thesis, Report, or Internship in Public History option, in consultation with the Department's Graduate Program Director. The degree requirements for the M.A. vary according to the option taken (see under Degree Requirements).

Entrance Requirements

Requirements for admission into the M.A. degree program in History are the same regardless of the option selected. Applicants must also satisfy any additional requirements the University sets for admission to graduate work. Applications should include transcripts from any postsecondary institutions attended, two (2) letters of recommendation, a writing sample, and a 2-4 page statement of purpose describing the applicant's academic plans and long-term career goals.

Admissions into the on-campus and online M.A. programs are generally conducted once a year and only for the Fall term. Applicants seeking entrance for the Fall term should prepare all application materials in time for the Department of History and the Office of Graduate Admissions to receive them no later than February 1. Completed applications generally receive notification of admission by March 30. For Spring term admissions to the fully online M.A. degree program, submit all application

materials no later than September 1. Completed applications generally receive notification of admission by October 31.

1. Applicants must hold a bachelor's degree from an accredited institution and have a 3.25 GPA in upper-level work (UG 60). Applicants who believe their applications would be strengthened by high GRE scores may also submit them. The GRE is not, however, required.
2. Two letters of recommendation with waiver forms.
3. Applicants must have completed 12 semester-hours of credit (on the basis of 3-hour courses) in upper division undergraduate courses in History, or the equivalent, as approved in writing by the Graduate Program Director.

Any applicant with fewer than twelve (12) semester-hours of upper division undergraduate courses in History, or the equivalent, should consult the Graduate Program Director about the possibility taking at least six (6) semester-hour graduate credits as a Non-Degree Seeking Student (consult the University Catalog and the Office of Graduate Admissions). After completing this work with an average grade of "B+" (3.3), the student may apply for regular admission. Other methods may also be pursued with the written permission of the Graduate Program Director.

The above admissions criteria are only minimum requirements. All applications are reviewed by the Graduate Committee which makes the final admissions recommendations to the University Graduate School.

Degree Requirements

Thesis Option

1. A minimum of 30 semester-hours for the degree, including the maximum of six semester-hours of Thesis Research. All course work must be taken at FIU.
2. A minimum of 24 semester-hours of course work, including one two-semester Research Seminar.
3. Reading competence in a foreign language, demonstrated by achieving a Pass or High Pass on the departmental examination. Courses taken to attain language competency do not count towards the degree. The Latin American concentration requires proficiency in Spanish, Portuguese, or another language appropriate to the student's field; the modern European concentration requires proficiency in an appropriate European language; the United States concentration requires proficiency in any of the above, or competency in social science quantitative skills, demonstrated by receiving a grade of "B" or higher in an appropriate course approved for this purpose by the Graduate Program Director; the medieval or ancient concentration in two languages; one of Hebrew, Latin, Greek or another ancient language as deemed appropriate by the student's advisor, and one modern European language.
4. The following limits are placed in accumulating credits toward the M.A. degree:
 - a. No more than six semester-hours of HIS 5908 (Independent Study) are permitted.
 - b. Students must receive the grade of "B" (3.0) or better in order for any course to count toward the degree.

- c. Students are prohibited from taking graduate-level cross-listed courses that they have already taken at the undergraduate level.
5. All students are required to take HIS 6059 (Historical Methods).
6. Core Area. Students will select one core area for concentration in United States History, European History, African History or Latin American and Caribbean History, in consultation with the Graduate Advisor. Twelve semester-hours of course work will be taken within the core area.
7. Breadth Areas. Students will take six semester-hours in breadth areas. These may be courses taken within the Department of History that are outside the culture area of concentration, or in associated disciplines outside of the Department (with the approval of the Graduate Advisor), or a combination of the two.
8. Students will take one elective course for 3 semester-hours.
9. Students will register for up to six semester-hours of HIS 6970 (Thesis Research).
10. At least one course must be comparative. Comparative courses must have HIS or WOH prefixes, or else be approved for this purpose by the Graduate Program Director.
11. The thesis must be successfully defended and formally approved by a Thesis Committee composed of three members, two of whom must be graduate faculty members of the Department of History. The Thesis Committee is convened and headed by the thesis supervisor.
12. The degree candidate will prepare the thesis in accordance with the regulations stipulated in the University's Graduate Policies Manual. The degree will be conferred after the approval of the final version of the thesis by the Offices of the Dean of the Steven J. Green School of International and Public Affairs and the University Graduate School.

Report Option

1. A minimum of 30 semester-hours of course work are needed for the M.A. degree. The report option does not set requirements for Core/Breadth area distribution. Students will design their course work in consultation with the Graduate Program Director and the relevant faculty. All courses must be taken in the Department of History at FIU, or else be approved in writing by the Graduate Program Director.
2. Students must complete one two-semester research seminar. With the consent of the professor for whom it was written, students may revise the report and submit it to the Graduate Committee for final approval.
3. HIS 6059 (Historical Methods) is required of all students.
4. 6 semester-hours, not including Historical Methods, must be comparative. Comparative courses must have HIS or WOH prefixes, or else be approved for this purpose by the Graduate Program Director.
5. The following limits are placed on accumulating credits towards the Master's degree:
 - a. Students must receive the grade of "B" (3.0) or better for the course to count toward the degree.
 - b. HIS 5908 (Independent Study) is limited to six semester-hours.

Internship in Public History Option

1. A minimum of 30 semester hours for the degree, including 6 semester hours of Independent Study tied to an internship in the fields of Museum Studies or Public History. The internship requires a minimum of 300 hours of work that is to be documented by the project supervisor or museum director. The internship must be approved by the Public History Coordinator and supervised by a regular member of the department's faculty. Students must defend a written report following departmental regulations of their internship activities before a committee of faculty before the degree can be awarded.
2. A minimum of 24 semester hours of course work, of which 6 credit hours must be taken from the following list of courses: HIS 5067 (Public History Theory and Practice), HIS 5084 (History, Memory and the Public), ARH 5850 (Introduction to Museum Studies), ARH 5851 (Museum Ethics). Other appropriate courses may be substituted with permission of the Graduate Program Director.
3. Students must complete one two-semester research seminar.
4. HIS 6059: Historical Methods.

History M.A. Option

Only students who have been admitted to the Ph.D. program without previously receiving an M.A. in History are eligible to pursue this track.

1. Completion of 39 hours of course work for graduate history credit. All course work must be taken at FIU, and receive a grade of "B" (3.0) or better.
2. Completion of one two-semester Research Seminar.
3. Completion of Historical Methods.
4. Reading competency in a language other than English.
5. Approval of this option by the Graduate Program Director, who will determine if the student is making satisfactory progress towards the Ph.D.

Combined BA/MA in History Pathway

This accelerated BA/MA degree pathway allows our highly qualified undergraduate students the opportunity to pursue a Master's degree in History while they are completing their undergraduate studies. Applicants must meet the admissions criteria for the graduate degree program to which they are applying.

Students who pursue this track must complete all requirements for the undergraduate history major, including the prerequisites and the senior seminar, our capstone course. As part of their combined pathway, students also will enroll in three 5000-level courses (9), which will count towards the B.A. and the M.A. After completing all undergraduate credits, including the double counted courses, students will receive the B.A. In their final year, they will take a total of 21 credit hours at the graduate level, including a two-semester Research Seminar (6 hours), Historical Methods (3 hours), and graduate seminars (12 hours).

Entrance Requirements

1. At the time of application, students must be scheduled to complete a minimum of 75 credits towards their

bachelors' degree by the end of the current semester. These credits must include at least 4 upper-division history courses (preferably at FIU). Students generally begin the application process at the beginning of first semester of their 3rd year.

2. Students who satisfy the above requirement may submit an application on a rolling basis, but the admission decision will not be finalized until the current semester's grades are posted.

3. Applicants must have at least a 3.25 upper-division GPA (UG60) and a minimum 3.5 GPA in upper-division FIU history courses. (Upper-division courses not taken at FIU may be considered at the discretion of the Graduate Committee.) These GPA requirements are minimum requirements, and admission is not guaranteed to students who meet those thresholds.

4. Applicants must provide two letters of recommendation from full-time FIU History faculty. (Letters from full-time faculty not at FIU may be considered at the discretion of the Graduate Committee.)

5. Applicants must write a statement of purpose and submit a writing sample that is relevant to the discipline.

The History Department's Graduate Committee will make the final decision regarding admission to the program. Students should consult the graduate catalog, the History Department website, and the Graduate Program Director for a more comprehensive discussion of admission and program requirements.

Credit/Course Requirements

Senior Year

In their senior year, students will complete three History courses at the 5000 level (9 credits) and complete the exit requirement for the undergraduate History major, the Senior Seminar, HIS 4935 (3 credits). Students will be advised to take one graduate class and the senior seminar in the first semester of their senior year, and two graduate classes in the second semester of their senior year.

Students must apply for graduation so that they will receive the B.A. at the end of their senior year.

Fifth Year

During the fifth year, students will complete 21 hours of graduate level work, including the following:

One two-semester; History Graduate Research Seminar (begins in Fall only)	6
Graduate Methods Course, HIS 6059	3
Four Courses at the 5000 or 6000 level, 5000-level courses taken in the fifth year may not be cross-listed with 4000-level courses	12

Students are expected to finish their MA coursework within a year of receiving their B.A.. Students who do not finish with a year may continue in the program at the discretion of the Graduate Program Director.

Doctor of Philosophy in History

The doctoral program in History offers students opportunities to concentrate on the areas of Latin America, Africa, the United States, or Europe. The program contains an underlying comparative framework based on the civilizations of the Atlantic, which allows students to explore the many dimensions of cross-cultural exchanges. The curriculum thus emphasizes the comparative

framework around the Atlantic experience, and reflects the vitality of a cross-disciplinary approach, while allowing students to focus on their areas of interest.

Admission to the Program

Every applicant must complete an application form, and submit college transcripts, GRE scores and the application fee to the Office of Graduate Admissions. The online application includes curriculum vitae, writing sample, statement of research interests, and at least two letters of recommendation together with the waiver forms. For those transferring into the program who already hold the M.A., the thesis, when available, should be submitted as the sample. Admission requires a GRE score and a minimum undergraduate GPA of 3.25 in the upper level work. Applicants with the M.A. degree are required to have a graduate GPA of at least 3.25. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the iBT TOEFL (equivalent to 575 on the paper-based version of the Test of English as a Foreign Language) is required.

Admission into the doctoral program takes place once a year for entry in the Fall semester. Applicants should prepare all application materials in time for the Department of History and the Office of Graduate Admissions to receive them no later than January 15 for the following academic year's fall admissions. Applicants will usually be notified of the Department's recommendation regarding their application no later than March 15.

Degree Requirements

Number of Credits Required

A minimum of 75 credits are required for students entering the Ph.D. program without a M.A. in History, or 54 for those entering with a History M.A. from an accredited institution.

Language Requirements

All students must acquire reading competence in two languages other than English. The language requirement may be fulfilled in one of two ways: 1) achieving a High Pass on the departmental examination in one language, and at least a Pass on the second, or by receiving a grade of "B" or "B+", for Pass, and "A" or "A-", for High Pass, in an appropriate course approved for this purpose by the Director of Graduate Studies.; or 2) achieving a Pass or High Pass on the departmental examination in one language, and competency in social science quantitative skills, demonstrated by receiving a grade of "B" or "B+", for Pass, and "A" or "A-", for High Pass, in an appropriate course approved for this purpose by the Director of Graduate Studies. At least one High Pass must be received. Language requirements vary, according to the concentration fields. In cases where the dissertation will be in the history of US or English-speaking countries, one language plus the quantitative skill is sufficient. In Latin American history, either Spanish or Portuguese, and a second language appropriate to the student's field are required. Language exams will be graded on a High Pass, Pass, and Fail basis; a High Pass is required in the student's primary language. Students should check with the Department's Graduate Program Director to determine

which languages are appropriate for their program of studies.

Composition of Course Work

Course requirements for students entering the Ph.D. program without an M.A. are as follows:

1. HIS 6059 (Historical Methods), 3 credits.
2. Readings and Research in Atlantic Civilization (HIS 6906 and HIS 6918), 6 credits.
3. 24 credits are required in the student's core culture area to be chosen from the United States, Latin America and the Caribbean, Africa, or Europe, including at least 6 credits in a research seminar.
4. 15 credits are required in geographical/topical areas outside the culture area of concentration, 3 of which must be in comparative course (WOH or HIS, not including Historical Methods or Atlantic Civilization).
5. 12 elective credits, 9 of which may be taken outside the department with the permission of the Director of Graduate Studies.
6. 15 credits of dissertation research.

Course requirements for students entering the Ph.D. program with an M.A. in History are as follows:

1. HIS 6059 (Historical Methods), 3 credits. If HIS 6059 or an equivalent class from another institution has been taken previously, then 3 credits of comparative history (HIS or WOH) should be taken in lieu.
2. Readings and Research in Atlantic Civilization (HIS 6906 and HIS 6918), 6 credits.
3. 15 credits are required in the student's core culture area to be chosen from the United States, Latin America and Caribbean, Africa, or Europe, including at least 6 credits in a research seminar. If, however, students did not have at least 12 credits in their area of concentration in their MA, they must take an additional 3-6 credits in their area of concentration in lieu of the elective and comparative history requirements specified below.
4. 6 credits of outside culture area or of comparative history.
5. A minimum of 15 credits of dissertation research.

Comprehensive Examinations and the Dissertation

Following completion of all course work, satisfaction of language requirements, and the constitution of a dissertation committee, students will be required to pass a written and an oral comprehensive examination. After the completion of their comprehensive examinations and the approval of a dissertation proposal by their dissertation committee, students will write a doctoral dissertation. The time needed for the research and writing of dissertations in History is variable, although doctoral candidates normally spend one year engaged in continuous field research and a second year in full-time writing.

Restrictions

1. The grade of "B" or better is required for graduate credit.
2. At the end of the second semester of residence, or upon completion of the first 18 credit-hours of work, and every year thereafter, Ph.D. students must undergo an annual evaluation as required by the University Graduate School. The Graduate Program Director, the student's primary adviser, and/or the

Dissertation Committee will examine and evaluate the student's progress and prospects. Students whose progress is deemed insufficient may be advised to withdraw from the program.

3. No more than 6 semester-hours of Topics (5935) courses toward meeting the degree requirements, without written permission of the Graduate Program Director.
4. No more than 6 semester-hours of HIS 5908 (Independent Study) toward meeting the degree requirements, without written permission of the Graduate Program Director.

MA in African and African Diaspora Studies/Ph.D. in History Combined Degree Pathway

The Combined African and African Diaspora Studies M.A./Ph.D. in History pathway allows qualified graduate students to complete the M.A. in Combined African and African Diaspora Studies (M.A. in AADS) en route to the Ph.D. in History. This pathway will train doctoral students within the discipline of Atlantic History while giving them area studies expertise in African and African Diaspora Studies in order to help them stay competitive in seeking careers with an international focus in today's global cultural and intellectual environment. In tandem, these two programs can offer students an unusually close fit and remarkably beneficial synthesis in interdisciplinary approaches to both the Atlantic world and the African diasporic experience.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.0 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.25 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores;
4. International graduate student applicants whose native language is not English and have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the IBT TOEFL (equivalent to 575 on the paper-based version of the Test of English as a Foreign Language) is required.

Admission Procedure

To be accepted into this pathway, students must submit an application to the Ph.D. in History with a sub plan for a M.A. in African and African Diaspora Studies. This designation will appear in the menu of programs in the graduate application. Applicants should prepare all application materials in time for the Department of History and the Office of Graduate Admissions to receive them no later than January 15 for the following year's fall admissions. Applicants will be notified of the Department's recommendation regarding their application no later than March 15.

The following documents must be submitted as part of the application. They will be reviewed by the Admissions Committee from both units.

1. Official transcripts of all prior college-level work (undergraduate Bachelor's degree and any graduate transcripts);
2. Official GRE scores or equivalent;
3. Official TOEFL scores, if applicable;
4. A curriculum vita;
5. A detailed statement of research interests, reasons for seeking the M.A./Ph.D., future career goals, a summary of scholarly and extra-curricular activities, and the names of History Department faculty members who would be appropriate dissertation advisors (Note: Consult the department website for information about faculty members)
6. A writing sample (such as a seminar paper) which demonstrates the ability to conduct research and write effectively; and
7. Three letters of reference from academic sources or others able to judge academic abilities and potential.

In addition, an interview (in person or phone) with members of the M.A. in AADS Program and/or appropriate faculty in the Department of History is highly recommended.

M.A. in African and African Diaspora Studies (M.A. in AADS)

This 30-credit, one year, three-semester program occurring over the Fall, Spring, Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 9 credits of core History courses, and 12 credits of electives. There is also a Foreign Language Requirement.

M.A. in AADS Core Courses: (9 credits)

AFA 5005	African and African Diaspora Studies Theory (3 credits)
AFA 5855	Research Methods in African and African Diaspora Studies (3 credits)
AFA 6920	AADS graduate colloquium (3 credits – 1 credit over three semesters)

Combined M.A. in AADS/PhD in History Core Courses: (9 credits)

HIS 6059	Historical Methods (3 credits)
6 credits in any of the following courses, or any other graduate History courses with an AADS focus.	
AFA 6851	Advanced Seminar in African and African Diaspora Studies
AFH 5905	Readings in African History
AFH 5935	Topics in African History
AFH 6915	Research in African History
AFH 6932	Research Seminar in African History I
AFH 6933	Research Seminar in African History II
WOH 5236	The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807
WOH 5237	The African Diaspora Since the End of the Slave Trade

M.A. in AADS Elective (12 credits)

12 credits of elective courses with an AADS focus, at least 6 credits of which are from within the Department of History (making a total of 15 History credits) such as those on the following list:

AFA 6851	Advanced Seminar in African and
----------	---------------------------------

	African Diaspora Studies
AFH 5905	Readings in Asian History
AFH 5935	Topics in African History
AFH 6915	Research in African History
AFH 6932	Research Seminar in African History I
AFH 6933	Research Seminar in African History II
WOH 5236	The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807
WOH 5237	The African Diaspora Since the End of the Slave Trade

Students wishing to take courses outside of the Green School and/or the College of Arts & Sciences must seek prior approval from the Graduate Program Directors of the M.A. and PhD programs.

M.A. in AADS Research Proposal Option

To graduate from the M.A. in AADS, students enrolled in this combined M.A./Ph.D. pathway must either elect a research proposal option or research paper for their exit option. Those who elect to write a research proposal must take AFA 6911 Research Paper/ Proposal Writing in African and African Diaspora Studies.

M.A. in AADS Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests.

Application for Graduation from M.A. in AADS

Students should apply for graduation for the M.A. in AADS as soon as they have completed all requirements for the degree – including the exit option. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in History.

Ph.D. in History

Students will begin study towards the Ph.D. in History immediately following their satisfactory completion of M.A. in AADS degree requirements. Students are expected to meet all the degree requirements for the Ph.D. in History, which requires a total of 75 credits.

Courses required *in addition to* the degree requirements for the M.A. in African and African Diaspora Studies (minimum 45 credits)

HIS 6906	Advanced Readings in Atlantic Civilization	3
HIS 6918	Research in Atlantic Civilization	3
6 credits outside of AADS and Atlantic Civilization (also excluding Methods), 3 credits of which must be in a comparative course (HIS or WOH prefix)		
	Electives	18
HIS 7980	Dissertation	15

Language Requirements

All students must acquire reading competence in two languages other than English. The language requirement may be fulfilled in one of two ways: 1) achieving a High Pass on the department examination in one language, and at least a Pass on the second; or 2) achieving a Pass or High Pass in departmental examination in one language, and competency in social science quantitative skills, demonstrated by receiving a grade of "B" or "B+", for Pass, and "A" or "A-", for High pass, in an appropriate course approved for this purpose by the Graduate Program

Director. At least one High Pass must be received. Language requirements vary, according to the concentration fields. In cases where the dissertation will be in the history of US or English-speaking countries, one language plus the quantitative skill is sufficient. In Latin American history, either Spanish or Portuguese, and a second language appropriate to the student's field are required. Language exams will be graded on a High Pass, Pass, and Fail basis; a High pass is required in the student's primary language. Students should check with the Department's Graduate Program Director to determine which languages are appropriate for their program of studies.

Comprehensive Examinations and the Dissertation

Following completion of all course work, satisfaction of language requirements, and the constitution of a dissertation committee, students will be required to pass a written and an oral comprehensive examination. After the completion of their comprehensive examinations and the approval of a dissertation proposal by their dissertation committee, students will write a doctoral dissertation. The time needed for the research and writing of dissertations in History is variable, although doctoral candidates normally spend one year engaged in continuous field research and a second year in full-time writing.

Restrictions

1. The grade of "B" or better is required for graduate credit.
2. At the end of the second semester of residence, or upon completion of the first 18 credit-hours of work, the Graduate Committee will examine and evaluate the student's progress and prospects. Professors will provide detailed written evaluations of the work of all first-year Ph.D. students they have taught. Students whose progress is deemed insufficient will be advised to withdraw from the program.
3. No more than 6 semester-hours of Topics (5935) courses toward meeting the degree requirements, without permission of the Graduate Program Director.
4. No more than 6 semester-hours of HIS 5908 (Independent Study) toward meeting the degree requirements, without permission of the Graduate Program Director.

Combined Master of Arts in Asian Studies/Doctor of Philosophy in History Degree Pathway

The combined M.A. in Asian Studies/Ph.D. in History pathway allows qualified graduate students to pursue both degrees simultaneously. To be accepted into this pathway, students must simultaneously submit applications for the M.A. in Asian Studies and the Ph.D. in History. Applicants must meet the admission eligibility requirements and follow the admission procedures for both programs.

Students must fulfill the requirements for both programs, and up to 36 credits may count for both degrees. To graduate, students must complete the requirements of the History doctoral program, including the required 75 hours.

During their first two years of enrollment in this combined degree pathway, students will enroll in the

following coursework which fulfills the Asian Studies M.A. requirements:

Master of Arts in Asian Studies

Requirements

(30 credits Thesis Option / 30 credits Non-Thesis Option)

Core Courses: (24 credits)

- 9 credits of ASN 5000 or 6000 courses approved by the director
- 9 credits pertaining to world affairs
- 6 credits in Asian area studies

MAAS offers two exit options, Thesis or Non-Thesis

Thesis Exit Option: (6 credits)

ASN 6972 Master's Thesis

Non-Thesis Exit Option: (6 credits)

ASN 6912 Master's Essay (3 credits and one additional course (3 credits)

Master's Essay can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course.

Students will begin study towards the Ph.D. in History immediately following their satisfactory completion of MAAS degree requirements. Students are expected to meet at the degree requirements for the Ph.D. in History, which requires a total of 75 credits.

Doctor of Philosophy in History

Courses required in addition to the degree requirements for the M.A. in Asian Studies (minimum 42-45 credits depending on MA Option selected)

- 3 credits Advanced Readings in Atlantic Civilization (HIS 6906)
- 3 credits Research in Atlantic Civilization (HIS 6918)
- 6 credits outside of Asian Studies and Atlantic Civilization (also excluding Methods), 3 credits of which must be in a comparative course (HIS or WOH prefix)
- 15-18 credit electives depending on MA Option
- 15 credits Ph.D. Dissertation (HIS 7980)

M.A. in Latin American and Caribbean Studies/Ph.D. in History Combined Degree Pathway

The Combined Latin American and Caribbean Studies M.A./Ph.D. in History pathway allows qualified graduate students to complete the M.A. in Latin American and Caribbean Studies (MALACS) IN route to the Ph.D. in History. Capitalizing on the intellectual affinities between the graduate programs in Latin American and Caribbean Studies and in Atlantic History, the pathway allows students to enroll simultaneously in both programs and to count 30 credits of coursework toward fulfillment of the requirements for both graduate degrees. The M.A. program provides a multi-disciplinary perspective on the region as well as deep expertise on the region's history, culture and political economy, while the Ph.D. Program in Atlantic History is aimed at honing students' skills in historical methods while training them to approach individual nations and regions of Latin America and the Caribbean as sites of broader exchanges along the Atlantic corridor.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.0 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.25 on any previous graduate work;
3. (Verbal and Quantitative) Official Graduate Record Exam (GRE) scores, for International students, a minimum score of 525 on the EXADEP (Spanish version of the GRE); or a minimum of 590 on the GMAT;
4. International graduate student applicants whose native language is not English and have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the IBT TOEFL (equivalent to 575 on the paper-based version of the Test of English as a Foreign Language) is required.

Admission Procedure

To be accepted into this pathway, students must submit an application to the Ph.D. in History with a sub plan for a M.A. in Latin American and Caribbean Studies. This designation will appear in the menu of programs in the graduate application. Applicants should prepare all application materials in time for the Department of History and the Office of Graduate Admissions to receive them no later than January 15 for the following year's fall admissions. Applicants will be notified of the Department's recommendation regarding their application no later than March 15.

The following documents must be submitted as part of the application. They will be reviewed by the Admissions Committee from both units.

1. Official transcripts of all prior college-level work (undergraduate Bachelor's degree and any graduate transcripts);
2. Official GRE scores or equivalent;
3. Official TOEFL scores, if applicable;
4. A curriculum vita;
5. A detailed statement of research interests, reasons for seeking the M.A./Ph.D., future career goals, a summary of scholarly and extra-curricular activities, and the names of History Department faculty members who would be appropriate dissertation advisors (Note: Consult the department website for information about faculty members)
6. A writing sample (such as a seminar paper) which demonstrates the ability to conduct research and write effectively; and
7. Three letters of reference from academic sources or others able to judge academic abilities and potential.

In addition, an interview (in person or phone) with members of the MALACS Program and/or appropriate faculty in the Department of History is highly recommended.

M.A. in Latin America and Caribbean Studies

Thirty graduate credits are required for the MALACS, including 9 credits of core courses, 15 credits within an area of focus, 3 credits of breadth courses and 3 credits for the directed research paper or internship exit options. There is also a Foreign Language Requirement. The thesis exit option requires 6 exit option credits, but reduces the area of focus requirement to 12 credits.

MALACS Core Courses: (9 credits)

LAS 6003	Survey of Latin America
LAS 6934	Research Seminar in Latin American and Caribbean Studies
HIS 6059	Historical Methods

MALACS Focus Courses: (12 to 15 credits total depending on the exit option)

LAH 6932	Research Seminars in Latin American History I
LAH 6933	Research Seminars in Latin American History II

6 credits from the following list:

LAH 5905	Readings in Latin American History
LAH 5935	Topics in Latin American History
LAH 6906	Advanced Readings in Latin American History
LAH 6915	Research in Latin American History

MALACS Breadth Courses: (3 credits from other areas)

MALACS Exit Option for Combined Degree Program: (3 to 6 credits)

Students select one of the following options:

LAS 6970	Thesis	6
Students complete a thesis paper supervised by three committee members. All members of the committee must have FIU Graduate Faculty Status.		

or

LAS 6942	Internship in Latin American and Caribbean Studies	3
Supervised internship leading to a major research paper in Latin American and Caribbean Studies		

or

LAS 6905	Directed Research in Latin American and Caribbean Studies	3
Students complete one directed research paper of about 35-40 pages.		

MALACS Language Requirement

Each student is required to demonstrate proficiency in either Spanish or Portuguese, or in another language such as French or Haitian Creole when justified by research interests. Proficiency demonstrated by scoring an advanced level on the ACTFL exam for Spanish, Portuguese, or French administered by FIU's Department of Modern Languages. Other tests of proficiency may be accepted upon approval of the graduate advisor.

Application for Graduation from MALACS

Students should apply for graduation for the MALACS as soon as they have completed all requirements for the degree – including the exit option. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in History.

Ph.D. in History

Students will begin study towards the Ph.D. in History immediately following their satisfactory completion of MALACS degree requirements. Students are expected to meet all the degree requirements for the Ph.D. in History, which requires a total of 75 credits.

Courses required *in addition to* the degree requirements for the M.A. in Latin American and Caribbean Studies (minimum 45 credits)

HIS 6906	Advanced Readings in Atlantic Civilization	3
HIS 6918	Research in Atlantic Civilization	3
3 credits in LACS		
9 credits outside of LACS and Atlantic Civilization (also excluding Methods), 3 credits of which must be in a comparative course (HIS or WOH prefix)		
Electives		12
HIS 7980	Dissertation	15

Language Requirements

All students must acquire reading competence in two languages other than English. The language requirement may be fulfilled in one of two ways: 1) achieving a High Pass on the department examination in one language, and at least a Pass on the second; or 2) achieving a Pass or High Pass in departmental examination in one language, and competency in social science quantitative skills, demonstrated by receiving a grade of “B” or “B+”, for Pass, and “A” or “A-”, for High pass, in an appropriate course approved for this purpose by the Graduate Program Director. At least one High Pass must be received. Language requirements vary, according to the concentration fields. In cases where the dissertation will be in the history of US or English-speaking countries, one language plus the quantitative skill is sufficient. In Latin American history, either Spanish or Portuguese, and a second language appropriate to the student’s field are required. Language exams will be graded on a High Pass, Pass, and Fail basis; a High pass is required in the student’s primary language. Students should check with the Department’s Graduate Program Director to determine which languages are appropriate for their program of studies.

Comprehensive Examinations and the Dissertation

Following completion of all course work, satisfaction of language requirements, and the constitution of a dissertation committee, students will be required to pass a written and an oral comprehensive examination. After the completion of their comprehensive examinations and the approval of a dissertation proposal by their dissertation committee, students will write a doctoral dissertation. The time needed for the research and writing of dissertations in History is variable, although doctoral candidates normally spend one year engaged in continuous field research and a second year in full-time writing.

Restrictions

1. The grade of “B” or better is required for graduate credit.
2. At the end of the second semester of residence, or upon completion of the first 18 credit-hours of work, the Graduate Committee will examine and evaluate

the student’s progress and prospects. Professors will provide detailed written evaluations of the work of all first-year Ph.D. students they have taught. Students whose progress is deemed insufficient will be advised to withdraw from the program.

3. No more than 6 semester-hours of Topics (5935) courses toward meeting the degree requirements, without permission of the Graduate Program Director.
4. No more than 6 semester-hours of HIS 5908 (Independent Study) toward meeting the degree requirements, without permission of the Graduate Program Director.

Course Descriptions

Definition of Prefixes

AFH-African History; AMH-American History; ASH-Asian History; EUH- European History; HIS-General; LAH-Latin American History; WOH-World History.

AFH 5905 Readings in African History (3). An examination of historiographical traditions within African history. Topics will vary; with a change in theme, the course may be repeated. Prerequisite: Graduate standing.

AFH 5935 Topics in African History (3). An examination of specific themes in African history. Topics will vary. With a change in theme, the course may be repeated. Prerequisite: Graduate standing.

AFH 6915 Research in African History (3). Research in primary and secondary sources on African History. Subjects may vary. May be repeated with departmental approval. Prerequisite: Graduate standing.

AFH 6932 Research Seminar in African History I (3). Semester one of a two-semester research seminar investigating topics in African history. Topics may vary. May be repeated with approval of Graduate Program Director.

AFH 6933 Research Seminar in African History II (3). Semester two of a two-semester research seminar investigating topics in African history. Prerequisite: AFH 6932. May be repeated with approval of Graduate Program Director.

AMH 5905 Readings in American History (3). Students read books from different historiographical traditions and with conflicting interpretations about an important subject in American history. Subjects will vary according to professor. Course may be repeated with departmental approval. Prerequisite: Graduate standing.

AMH 5935 Topics in American History (3). An examination of specific themes or topics in American history. The theme will vary from semester to semester. With a change in theme, the course may be repeated. (The theme will be announced in the yearly schedule). Prerequisite: Graduate standing.

AMH 6906 Advanced Readings in American History (3). Detailed analysis of a selected topic in American History. May be repeated as topics vary. Prerequisite: Graduate standing.

AMH 6915 Research in American History (3). Students conduct research in primary and secondary sources on aspects of important subjects in American History. Subjects will vary according to professor. Course may be

repeated with departmental approval. Prerequisite: Graduate standing.

AMH 6932 Research Seminar in American History I (3). Semester one of a two-semester research seminar investigating topics in American history. Topics may vary. Semester one of a two-semester research seminar investigating topics in American history. Topics may vary. May be repeated with approval of Graduate Program Director.

AMH 6933 Research Seminar in American History II (3). Semester two of a two-semester research seminar investigating topics in American history. Topics may vary. Prerequisite: AMH 6932. May be repeated with approval of Graduate Program Director.

ASH 5446 Readings in Japanese History (3). Students read books from different historiographical traditions and with conflicting interpretations about a subject in Japanese history. Subject will vary according to professor. Repeat with approval. Prerequisite: Graduate standing.

ASH 5905 Readings in Asian History (3). Graduate reading seminar dedicated to issues of gender, identity, and authority in China, Japan, and other regions of Asia.

ASH 5930 Topics in Asian History (3). An examination of topics in Asian history such as gender, modernization, transnational encounters, or the intersection of culture and politics. Comparative approach emphasized.

EUH 5905 Readings in European History (3). Students read books from different historiographical traditions and with conflicting interpretations about an important subject in European history. Subjects will vary according to professor. Course may be repeated with departmental approval. Prerequisite: Graduate standing.

EUH 5935 Topics in European History (3). An examination of specific themes or topics in European history. The theme will vary from semester to semester. With a change in theme, the course may be repeated. (The theme will be announced in the yearly schedule). Prerequisite: Graduate standing.

EUH 6906 Advanced Readings in European History (3). Detailed analysis of a selected topic in European history. May be repeated as topics vary. Prerequisite: Graduate standing.

EUH 6915 Research in European History (3). Students conduct research in primary and secondary sources on aspects of important subjects in European History. Subjects will vary according to professor. Course may be repeated with departmental approval. Prerequisite: Graduate standing.

EUH 6932 Research Seminar in European History I (3). Semester one of a two-semester research seminar investigating topics in history. Topics may vary. May be repeated with approval of Graduate Program Director.

EUH 6933 Research Seminar in European History II (3). Semester two of a two-semester research seminar investigating topics in European History. Topics may vary. May be repeated with approval of Graduate Program Director. Prerequisite: EUH 6932. May be repeated with approval of Graduate Program Director.

HIS 5067 Public History Theory and Practice (3). Theory and methods of history in non-academic settings,

with practical interactions with professional and institutions such as museums, monuments, archives, parks, and government. Prerequisite: Graduate standing. May be repeated with approval of Graduate Program Director.

HIS 5084 History, Memory and the Public (3). Critical examination of theories and texts on museums, monuments, archives, historical sites, community organizations, and/or oral histories. Specific topical focus to be determined by instructor. Prerequisite: Graduate standing, may be repeated with approval of Graduate Program Director.

HIS 5289 Comparative History (3). A study of specific topics in history that cut across regional, national, and chronological lines. The topics will change from semester to semester, and with a change in content, the course may be repeated. (The topic of the course will be announced in the yearly schedule). Prerequisite: Graduate standing.

HIS 5347 History of Social Thought (3). Examines the evolution of major currents in Western social thought from the nineteenth century to the present, emphasizing how these ideas have influenced historians' work.

HIS 5908 Independent Study (VAR). Individual conferences, assigned readings and reports on independent investigations, with the consent of the instructor. Prerequisite: Graduate standing.

HIS 5910 Advanced Research Seminar (3). Small group sessions will analyze particular subject areas in history, with the consent of the instructor. Prerequisite: Graduate standing.

HIS 5930 Special Topics (3). An examination of specific themes or topics in history. The theme will vary from semester to semester, and with a change in content, the course may be repeated. (The theme will be announced in the yearly schedule). Prerequisite: Graduate standing.

HIS 5940 Supervised Teaching (1-3). The students will work under the close supervision of a regular member of the faculty in a mentorship fashion. The supervision will cover various aspects of course design and delivery in history. Prerequisite: Graduate standing.

HIS 6059 Historical Methods (3). A seminar designed to introduce the beginning graduate student to the technical aspects of the study of history. Prerequisite: Graduate standing.

HIS 6159 Historiography (3). An introduction to the discipline of history, with primary and secondary readings allowing exploration of the evolution of historical schools of thought over several generations. Prerequisite: Graduate standing.

HIS 6906 Advanced Readings in Atlantic Civilization (3). A team-taught, comparative course dealing with the interactions between at least two of the geographical fields of concentration. May focus on one or more topics. Required of all Ph.D. students during their first term of study in the program. Prerequisite: Graduate standing. May be repeated with approval of Graduate Program Director.

HIS 6909 Summer Doctoral Study Seminar (3). Doctoral students work under the close supervision of a member of the Graduate Faculty in a mentorship fashion in designing pre-dissertation research, preparation for comprehensive

exams, and/or proposal writing for grants and fellowships to fund dissertation research. Prerequisite: Graduate standing.

HIS 6918 Research in Atlantic Civilization (3). A research seminar on cross-cultural topics, involving the comparative method. Required of all Ph.D. students in the program, during second term of residence. Topics will vary. Prerequisite: Graduate standing. May be repeated with approval of Graduate Program Director.

HIS 6942 Internship in Public History (3-6). Offers hands-on experience in public history and museum studies to students in public history option. Prerequisites: Enrollment in History MA Option in Public History; permission of the instructor.

HIS 6970 Thesis Research (1-10). Research toward completion of Master's Thesis. May be repeated. Prerequisite: Permission of Department.

HIS 7980 Ph.D. Dissertation (1-12). Completion of Doctoral Dissertation. Prerequisite: Permission of Major Professor and Doctoral Candidacy.

LAH 5905 Readings in Latin American History (3). Students read books from different historiographical traditions and with conflicting interpretations about an important subject in Latin American history. Subjects will vary according to professor. Course may be repeated with departmental approval. Prerequisite: Graduate standing.

LAH 5935 Topics in Latin American History (3). An examination of specific themes or topics in Latin American history. The theme will vary from semester to semester. With a change in theme, the course may be repeated. (The theme will be announced in the yearly schedule). Prerequisite: Graduate standing.

LAH 6906 Advanced Readings in Latin American History (3). Detailed analysis of a selected topic in Latin American history. May be repeated as topics vary. Prerequisite: Graduate standing.

LAH 6915 Research in Latin American History (3). Students conduct research in primary and secondary sources on aspects of important subjects in Latin American history. Subjects will vary according to professor. Course may be repeated with departmental approval. Prerequisite: Graduate standing.

LAH 6932 Research Seminar in Latin American History I (3). Semester one of a two-semester research seminar investigating topics in Latin American History. Topics may vary. May be repeated with approval of Graduate Program Director.

LAH 6933 Research Seminar in Latin American History II (3). Semester two of a two-semester research seminar investigating topics in Latin American history. Topics may vary. May be repeated with approval of Graduate Program Director. Prerequisite: LAH 6932.

WOH 5236 The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807 (3). Topics include slavery and economy in Africa and the Diaspora, as well as Diasporic religion, kinship, gender, sexuality, language, oral tradition, resistance, and creolization.

WOH 5237 The African Diaspora Since the End of the Slave Trade (3). Primary emphasis on history of social and intellectual movements. Topics include slave

resistance, black nationalism, socialism, anticolonialism, gender, art and literature, and afrocentrism.

WOH 5935 Topics in World History (3). An examination of specific themes in World History. Topics will vary with a change in theme, the course may be repeated. Prerequisites: Permission of the instructor or graduate standing.

WOH 6227 Global Economic History (3). Global economy 1500-present. Industrialization, trade, finance, and labor in Europe, US, Asia, Latin America. Comparative economic systems. Prerequisite: Graduate standing.

WOH 6932 Research Seminar in World History I (3). Semester one of a two-semester research seminar investigating topics in World history. Topics may vary.

WOH 6933 Research Seminar in World History II (3). Semester two of a two-semester research seminar investigating topics in World history. Topics may vary. Prerequisite: WOH 6932.

The Master of Arts in Latin American and Caribbean Studies (MALACS) is a unique interdisciplinary program that allows students to design their program based on their own research and career interests. The Program is particularly valuable to those students whose research and professional interests cannot be accommodated within a single discipline. MALACS students study the religious, political, economic, social and cultural processes shaping Latin America and the Caribbean and emerge from the program with the expertise required to become leaders in a variety of fields, including education, government, non-governmental business and social services organizations, among others. Students may choose to focus on a particular country, region, discipline, or topic such as, but not limited to, migration, comparative sociology, Cuban studies, cultural studies, economics, environmental studies, foreign policy and security studies, Haitian studies, Hispanic literature, history, international

business, international development, and politics/international relations.

MALACS is administered by the FIU Kimberly Green Latin American and Caribbean Center (LACC), one of the largest area and language studies centers in the US that specializes in the region. In addition to the MALACS degree, LACC also administers joint JD/MALACS and MBA/MALACS degree programs that allow the student to receive both degrees in substantially less time than would be required to pursue each degree individually. LACC also administers partnership degree programs with the Joint Forces Staff College and the Western Hemisphere Institute for Security Cooperation (WHINSEC). More information on joint and partnership degrees is found at the end of this section.

For further information please contact LACC Academic Programs Director, Kimberly Green Latin American and Caribbean Center, Florida International University, Modesto A. Maidique Campus DM 353, Miami, Florida 33199. Phone: (305) 348-2894; Fax: (305) 348-3593; email: MALACS@fiu.edu, or see the MALACS web site at <http://lacc.fiu.edu>.

Admission Requirements

Applicants must meet the following minimum admissions requirements:

1. Completed FIU graduate application.
2. A baccalaureate degree from an accredited institution for higher education, or equivalent.
3. A grade-point average of at least 3.0 on a 4.0 scale (or equivalent) for the last two years of undergraduate study and for any post baccalaureate study.
4. Official GRE scores or other exams such as EXADEP, GMAT or LSAT.
5. A statement of purpose consistent with the goals of the program.
6. Three letters of recommendation, at least two of which must come from current or former professors.
7. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
8. Application for M.A. assistantship or fellowship (if applicable).
9. Approval by the program admissions committee.

Note: The above admission requirements are minimums and not all students meeting them are assured admission. Students with either a grade-point average or GRE score below the above minimums may still apply and request conditional admission. The student must provide an explanation of why the waiver is being requested.

Degree Requirements

The MA in Latin American and Caribbean Studies (MALACS) program is a highly flexible program requiring a total of 30 graduate credits. Required core courses include two research methods courses and an interdisciplinary course (9 credits). Students work with the Graduate Program advisor to design a cohesive and focused program. Twelve to Fifteen credits are taken in a depth area, and three credits are comprised of breadth courses. All courses must be passed with a grade of "B" or better. MALACS offers three graduation exit options that

comprise either six (thesis) or three credits (internship or directed research paper). All courses to be counted towards the degree must have a minimum of 25% Latin American and Caribbean content and/or be a LACC approved course. Course requirements are distributed as follows:

- 9 credits, core
- 12 to 15 credits, depth (area of focus)
- 3 credits, breadth (electives)
- 3 to 6 credits, exit option

Required Core Courses (9 credits)

The core courses consist of an interdisciplinary overview course in Latin America and the Caribbean and two courses in MALACS approved research methods. First-year MALACS students enroll in a required interdisciplinary research methods course. In their second year, students select a research methods course in their depth area from the approved list and/or with the approval of the graduate advisor. The core courses and credits are distributed as follows:

LAS 6003	Survey of Latin America and the Caribbean	3
LAS 6934	Latin American and Caribbean Research Seminar	3
Research Methods*		3

**(selected from approved list and/or with the approval of the graduate advisor)*

MALACS Depth Courses or Area of Focus (12 to 15 credits)

MALACS students choose to concentrate on a particular country, region, discipline, or topic that serves as the focus of their study of Latin America or the Caribbean. Disciplinary areas (e.g. business, religious studies, art history, anthropology, history, political science) emphasize training and research within a particular academic department, while topical and regional areas (e.g. migration, Cuban studies, public policy, international relations, and gender studies) cluster coursework and research around specific issues or geographic regions. A primary goal of the coursework is to advance the student's core research area and expertise.

Breadth Requirements (3 credits)

Students select three credits from the MALACS approved course list.

All courses to be counted toward the degree must have a minimum of 25% Latin American and/or Caribbean course content.

Foreign Language

Each student is required to demonstrate proficiency in either Spanish or Portuguese, or in another language such as French or Haitian Creole when justified by research interests. Proficiency demonstrated by scoring an advanced level on the ACTFL exam for Spanish, Portuguese, or French administered by FIU's Department of Modern Languages. Other tests of proficiency may be accepted upon approval of the graduate advisor.

Advanced level on the ACTFL exam (2+ on the US government scale) can normally be attained by students with six undergraduate semesters of language instruction (in basic, intermediate and advanced level). Attainment of

the required language proficiency is the responsibility of the student and extra instruction to achieve the required proficiency level must be taken outside the MALACS curriculum. Fellowships and scholarships to study Portuguese and Haitian Creole are available to selected MALACS students. Opportunities for students to improve their language proficiency is provided in courses offered by the FIU Modern Languages Department, through special summer institute language programs, and by taking designated Foreign Language Across Curriculum (FLAC) courses. Completion of a FLAC course meets the MALACS language proficiency requirement.

Exit Options (3 to 6 credits)

MALACS students select one of the following options:

LAS 6970 Thesis 6

Students complete a thesis paper supervised by three committee members. All members of the committee must have FIU Graduate Faculty Status.

or

LAS 6942 Internship in Latin American and Caribbean Studies 3

Supervised internship leading to a major research paper in Latin American and Caribbean Studies

or

LAS 6905 Directed Research in Latin American and Caribbean Studies 3

Students complete one directed research papers of about 35-40 pages each.

Professional Development Activities

Students must complete a minimum of 39 points of professional development prior to graduation. A short 1-2 page response paper submitted to MALACS graduate directors and/or advisors is required as documentation for participation in the non-research paper activities. Activities may consist of the following:

- Published article (25 pts.)
- Public research proposal presentation at a conference (15 pts. per student conference; 20 for professional conference presentation)
- MALOKA (graduate student organization), University Graduate School, or other approved FIU community service, professional development or peer mentoring activities (3 pts. per activity)
- Attendance at LACC lectures, symposiums, colloquiums, conferences or other approved scholarly events (3 pts. per lecture; 6-9 pts. per conference or extended event)

Students should meet with their graduate advisor during advising sessions twice per year to discuss options for the completion of professional development points.

M.A. in Latin American and Caribbean Studies/Ph.D. in Global and Sociocultural Studies Combined Degree Pathway

The combined Latin American and Caribbean Studies M.A. (MALACS)/Global & Sociocultural Studies Ph.D. pathway allows qualified graduate students to pursue both degrees at the same time. Students can develop an expertise in Latin American and Caribbean Studies while

progressing towards a Ph.D. in one of the three majors in the Global and Sociocultural Studies Ph.D.: geography, sociology, or anthropology.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores;
4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet-based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Admission Procedures

To be accepted into this pathway, students must submit an application to the Ph.D. in Global and Sociocultural Studies with a sub-plan for a M.A. in Latin American and Caribbean Studies. This designation will appear in the menu of programs in the graduate application. To be accepted into this pathway, students must submit an application by March 1 in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the on-line application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable.
5. Statement of purpose explaining his/her interest for enrolling in both the MALACS program and in the Ph.D. program in GSS. The statement of purpose must clearly address the applicant's academic and professional objectives for enrolling in both fields of inquiry. The statement of purpose must also indicate the intended major (anthropology, geography, or sociology) the applicant plans to select while engaged in the Ph.D. in GSS;
6. Three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability;
7. A curriculum vitae; and
8. Writing samples and other relevant professional work that may support their applications.

Degree Requirements for M.A. in Latin American and Caribbean Studies

The 30 credits earned for the M.A. in LACC (MALACS) will count towards the 75 credits required for the Ph.D. in GSS.

MALACS Core (9 credits)

LAS 6003	Survey of Latin America
LAS 6934	Research Seminar
ISS 6305	Research Methods and Design
or	
ISS 6317	Social Research Quantitative Methods I

Dept Courses or Area of Focus (12 to 15 credits)

These must include courses Required for GSS Track

SYA 6127	Theory and Inquiry
ISS 6305	Research Methods and Design
or	
ISS 6317	Social Research Quantitative Methods I
SYA 6959	Writing Research Proposals

Breadth Requirements (3 credits)

Students select three credits from the MALACS approved course list.

MALACS Research Proposal

To graduate from the MALACS program, students enrolled in this combined M.A./Ph.D. pathway must take the proposal writing course SYA 6959 Writing Research Proposals during the semester prior to enrolling in the required exit options in the MALACS program.

MALACS Exit Options (3 to 6 credits)

Students select one of the following options:

LAS 6790	Thesis	6
Students complete a thesis paper supervised by three committee members. All members of the committee must have FIU Graduate Faculty status.		

or

LAS 6942	Internship in Latin American and Caribbean Studies	3
Supervised internship leading to a major research paper in Latin American and Caribbean Studies.		

or

LAS 6905	Directed Research in Latin American and Caribbean Studies	3
Students complete one directed research paper of about 35 -40 pages.		

MALACS Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests.

Application for Graduation from MALACS program

Students should apply for graduation for the MALACS degree as soon as they have completed all requirements for the degree – including the exit option. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in GSS.

Matriculation to PhD in GSS

All students must undergo a successful M.A. review upon completion of the MALACS Program requirements in order to continue toward the Ph.D. in GSS. The GSS Graduate Committee, along with an appointee from LACC, conducts these reviews. The purpose of the M.A. review is to determine the ability of the student to do Ph.D. level work with the department's faculty. Among the information considered during the review are a student's overall

performance, grades in courses, and faculty recommendations.

Degree Requirements for Ph.D. in Global and Sociocultural Studies

The doctorate in Global and Sociocultural Studies requires a minimum of 75 credits beyond the baccalaureate including a dissertation based on original research. 30 credits of the MALACS program will count toward the 75-credit minimum. Thus, a minimum of 45 credits must be earned beyond the M.A.

Major Courses (33 credits)

All doctoral students will choose a major in Anthropology, Geography, or Sociology. The following distribution of coursework is required.

- (a) Major theory (3)
- (b) Major methods (3)
- (c) Major course electives (6 minimum)
- (d) Exam and dissertation credits and GSS and non-GSS Department electives
 - Doctoral Exam Preparation (6 maximum)
 - Doctoral Dissertation (15 minimum)

General Electives (6 credits)

GSS and non-GSS Department electives

Ph.D. General Examination

After successfully completing the common core requirements, the major's course requirements, and electives, a student prepares for the Ph.D. General Exam by enrolling in a maximum of six credits of exam preparation for their major. In preparation for the exam, a student forms a dissertation committee according to the regulations published on the University Graduate School web page (<http://gradschool.fiu.edu>). The Ph.D. General Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate School Policies and Procedures Manual and the Department's Ph.D. General Exam guidelines.

The Dissertation Proposal and Defense/Candidacy Exam

After passing the Ph.D. General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the Ph.D. program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG 7980, GEO 7980, or SYA 7980). The Ph.D. program requires a student to be continuously enrolled in a minimum of 3 hours of Doctoral Dissertation each semester from the time of advancement to candidacy until completion of the dissertation, including summers. Upon completion of the dissertation manuscript and

authorization by the committee, a student defends the dissertation before the committee and the University community. The University Graduate School's regulations governing the dissertation are described at <http://gradschool.fiu.edu>.

MA in Latin American and Caribbean Studies/Ph.D. in History Combined Degree Pathway

The Combined Latin American and Caribbean Studies M.A./Ph.D. in History pathway allows qualified graduate students to complete the M.A. in Latin American and Caribbean Studies (MALACS) in route to the Ph.D. in History. Capitalizing on the intellectual affinities between the graduate programs in Latin American and Caribbean Studies and in Atlantic History, the pathway allows students to enroll simultaneously in both programs and to count 30 credits of coursework toward fulfillment of the requirements for both graduate degrees. The M.A. program provides a multi-disciplinary perspective on the region as well as deep expertise on the region's history, culture and political economy, while the Ph.D. Program in Atlantic History is aimed at honing students' skills in historical methods while training them to approach individual nations and regions of Latin America and the Caribbean as sites of broader exchanges along the Atlantic corridor.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.0 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.25 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores or, for International students, a minimum score of 525 on the EXADEP (Spanish version of the GRE); or a minimum of 590 on the GMAT;
4. International graduate student applicants whose native language is not English and have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the IBT TOEFL (equivalent to 575 on the paper-based version, or 232 on the computer-based version of the Test of English as a Foreign Language) is required.

Admission Procedure

To be accepted into this pathway, students must submit an application to the Ph.D. in History with a sub plan for a M.A. in Latin American and Caribbean Studies. This designation will appear in the menu of programs in the graduate application. Applicants should prepare all application materials in time for the Department of History and the Office of Graduate Admissions to receive them no later than December 1 for the following year's fall admissions. Applicants will be notified of the Department's recommendation regarding their application no later than March 15.

The following documents must be submitted as part of the application. They will be reviewed by the Admissions Committee from both units.

1. Official transcripts of all prior college-level work (undergraduate Bachelor's degree and any graduate transcripts);
2. Official GRE scores or equivalent;
3. Official TOEFL scores, if applicable;
4. A curriculum vita;
5. A detailed statement of research interests, reasons for seeking the M.A./Ph.D., future career goals, a summary of scholarly and extra-curricular activities, and the names of History Department faculty members who would be appropriate dissertation advisors (Note: Consult the department website for information about faculty members)
6. A writing sample (such as a seminar paper) which demonstrates the ability to conduct research and write effectively; and
7. Three letters of reference from academic sources or others able to judge academic abilities and potential.

In addition, an interview (in person or phone) with members of the MALACS Program and/or appropriate faculty in the Department of History is highly recommended.

MA in Latin America and Caribbean Studies

Thirty graduate credits are required for the MALACS, including 9 credits of core courses, 15 credits within an area of focus, 3 credits of breadth courses and 3 credits for the directed research paper or Internship exit options. There is also a Foreign Language Requirement. The thesis exit option requires 6 exit option credits, but reduces the area of focus requirement to 12 credits.

MALACS Core Courses: (9 credits)

LAS 6003	Survey of Latin America
LAS 6934	Research Seminar in Latin American and Caribbean Studies
HIS 6059	Historical Methods

MALACS Focus Courses: (12 to 15 credits total depending on the exit option)

LAH 6932	Research Seminars in Latin American History I
LAH 6933	Research Seminars in Latin American History II

9 credits from the following list:

LAH 5905	Readings in Latin American History
LAH 5935	Topics in Latin American History
LAH 6906	Advanced Readings in Latin American History
LAH 6915	Research in Latin American History

MALACS Breadth Courses: (3 credits from other areas)

MALACS Exit Option for Combined Degree Pathway: (3 to 6 credits)

Students select one of the following options:

LAS 6790	Thesis	6
----------	--------	---

Students complete a thesis paper supervised by three committee members. All members of the committee must have FIU Graduate Faculty status.

or

LAS 6942	Internship in Latin American and Caribbean Studies	3
----------	--	---

Supervised internship leading to a major research paper in Latin American and Caribbean Studies.

or

LAS 6905	Directed Research in Latin American and Caribbean Studies	3
----------	---	---

Students complete one directed research paper of about 35 -40 pages.

MALACS Language Requirement

Each student is required to demonstrate proficiency in either Spanish or Portuguese, or in another language such as French or Haitian Creole when justified by research interests. Proficiency demonstrated by scoring an advanced level on the ACTFL exam for Spanish, Portuguese, or French administered by FIU's Department of Modern Languages. Other tests of proficiency may be accepted upon approval of the graduate advisor.

Application for Graduation from MALACS

Students should apply for graduation for the MALACS as soon as they have completed all requirements for the degree – including the exit option. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in History.

Ph.D. in History

Students will begin study towards the Ph.D. in History immediately following their satisfactory completion of MALACS degree requirements. Students are expected to meet all the degree requirements for the Ph.D. in History, which requires a total of 75 credits.

Courses required *in addition to* the degree requirements for the M.A. in Latin American and Caribbean Studies (minimum 45 credits)

HIS 6906	Advanced Readings in Atlantic Civilization	3
HIS 6918	Research in Atlantic Civilization	3

3 credits in LACS
9 credits outside of LACS and Atlantic Civilization (also excluding Methods), 3 credits of which must be in a comparative course (HIS or WOH prefix)

Electives		12
HIS 7890	Dissertation	15

Language Requirements

All students must acquire reading competence in two languages other than English. The language requirement may be fulfilled in one of two ways: 1) achieving a High Pass on the department examination in one language, and at least a Pass on the second; or 2) achieving a Pass or High Pass in departmental examination in one language, and competency in social science quantitative skills, demonstrated by receiving a grade of "B" or "B+", for Pass, and "A" or "A-", for High pass, in an appropriate course approved for this purpose by the Graduate Program Director. At least one High Pass must be received. Language requirements vary, according to the concentration fields. In cases where the dissertation will be in the history of US or English-speaking countries, one language plus the quantitative skill is sufficient. In Latin American history, either Spanish or Portuguese, and a second language appropriate to the student's field are

required. Language exams will be graded on a High Pass, Pass, and Fail basis; a High pass is required in the student's primary language. Students should check with the Department's Graduate Program Director to determine which languages are appropriate for their program of studies.

Comprehensive Examinations and the Dissertation

Following completion of all course work, satisfaction of language requirements, and the constitution of a dissertation committee, students will be required to pass a written and an oral comprehensive examination. After the completion of their comprehensive examinations and the approval of a dissertation proposal by their dissertation committee, students will write a doctoral dissertation. The time needed for the research and writing of dissertations in History is variable, although doctoral candidates normally spend one year engaged in continuous field research and a second year in full-time writing.

Restrictions

1. The grade of "B" or better is required for graduate credit.
2. At the end of the second semester of residence, or upon completion of the first 18 credit-hours of work, the Graduate Committee will examine and evaluate the student's progress and prospects. Professors will provide detailed written evaluations of the work of all first-year Ph.D. students they have taught. Students whose progress is deemed insufficient will be advised to withdraw from the program.
3. No more than 6 semester-hours of Topics (5935) courses toward meeting the degree requirements, without permission of the Graduate Program Director.
4. No more than 6 semester-hours of HIS 5908 (Independent Study) toward meeting the degree requirements, without permission of the Graduate Program Director.

Combined M.A. in Latin American and Caribbean Studies (MALACS)/Ph.D. in International Relations Degree Pathway

The Combined Latin American and Caribbean Studies M.A./International Relations Ph.D. pathway allows qualified graduate students to pursue graduate degrees in both areas simultaneously rather than sequentially. Students must fulfill the requirements for both programs, and up to 30 credits completed as part of the M.A. in MALACS will be counted toward the 75 credit Ph.D. in International Relations.

To be considered for admission, students must meet the following requirements:

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;

3. (Verbal and Quantitative) Graduate Record Exam (GRE) scores;
4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the internet-based TOEFL (equivalent to 575 on the paper-based version) or 6.5 overall on the IELTS is required.

Although admissions decisions typically are made in the spring, decisions for students who have not yet received their bachelor's degree will be conditional, pending confirmation of the B.A. Meeting the minimum requirements does not guarantee admission into the program. All applications are subject to review by the members of the Department of Politics and International Relations and the MALACS admissions committee.

Admission Procedures

To be accepted into this pathway, students must submit an application to the Ph.D. in International Relations with a sub-plan for a M.A. in LACS. This designation will appear in the menu of programs in the graduate application. The application must be submitted by January 15 in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the on-line application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable.
5. A statement of research interests, including reasons for seeking the M.A./Ph.D., future career goals, and a summary of scholarly preparation for this pathway;
6. Three letters of reference from academic sources or others able to judge academic abilities and potential; and
7. A curriculum vitae.

Masters of Arts in Latin America and Caribbean Studies Degree Requirements (30 credits)

During their first two years of enrollment in the Combined Degree Pathway, students must complete 30 credits for an M.A. in Latin America and Caribbean Studies with depth or focus courses in International Relations.

MALACS Core Courses (9 credits)

During their first two years of enrollment in this combined degree pathway, students take three core courses as follows:

LAS 6003	Survey of Latin America and the Caribbean (first year, fall semester)	3
LAS 6934	Research Seminar (first year, spring semester)	3
INR 5615	Research Design in International Relations	3

MALACS Focus Courses (12 to 15 credits)

Students will take a minimum of 12 to 15 credits within the Department of Politics and International Relations with a Latin American and/or Caribbean focus.

MALACS Breadth Courses (3 credits)

Student may take courses from other areas.

MALACS Exit Options for Combined Degree Pathway (3 to 6 credits)

Students select one of the following options:

LAS 6790 Thesis 6
Students complete a thesis paper supervised by three committee members. All members of the committee must have FIU Graduate Faculty status.

or

LAS 6942 Internship in Latin American and Caribbean Studies 3
Supervised internship leading to a major research paper in Latin American and Caribbean Studies.

or

LAS 6905 Directed Research in Latin American and Caribbean Studies 3
Students complete one directed research paper of about 35 -40 pages.

Each student is required to demonstrate proficiency in either Spanish or Portuguese, or in another language such as French or Haitian Creole when justified by research interests. Proficiency demonstrated by scoring an advanced level on the ACTFL exam for Spanish, Portuguese, or French administered by FIU's Department of Modern Languages. Other tests of proficiency may be accepted upon approval of the graduate advisor.

Students should apply for graduation for the MALACS M.A. as soon as they have completed all requirements for the degree – including the exit requirements. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in International Relations.

Doctor of Philosophy in International Relations Degree Requirements

Students will begin study towards the Ph.D. in International Relations immediately following their satisfactory completion of MALACS requirements. A minimum of 45 credits beyond the 30 credits required for the MALACS degree will be necessary to satisfy the requirements of the Ph.D. Program in International Relations.

Program Requirements

15 Core Course credits:

GEO 6473	Space, Place and Identity	3
INR 6604	International Relations Theory I	3
INR 6608	Contemporary International Relations Theory	3
INR 5609	Contemporary Dynamics of International Relations	3
INR 6706	Political Economy of International Relations	3

12 Major Field credits in either:

1. Global Institutions and Issues,
2. Comparative Area Studies,
3. Foreign Policy and Security Studies, or
4. International Law.

With advisor approval, these 12 credits may include some or all of the coursework (except INR 5615) taken in satisfaction of the requirements for the MALACS degree.

9 Minor Field credits in either:

1. a second field from the above major field list, or
2. a field offered within another Ph.D. program at FIU (with approval of the Graduate Program Director), or
3. a petition field (with approval of the Graduate Program Director).

With advisor approval, these 9 credits may include some or all of the coursework (except INR 5615) taken in satisfaction of the requirements for the MALACS degree.

Elective Credits:

Elective credits necessary to bring total credits earned beyond the MALACS degree to a minimum of 24.

Dissertation:

15 credits of dissertation research.

Comprehensive Exams

After completing 60 hours of course work (or in the semester in which they expect to do so), students may take their written comprehensive examinations on the core sequence and in both of their fields. Students must sit for these examinations within 6 months of completing the minimum 60 hours of coursework unless granted an extension by the International Relations Graduate Program Director.

Dissertation

Within 3 months of passing the comprehensive examinations, students should publicly present a dissertation proposal that is acceptable to a committee of at least four qualified scholars. Three members of the committee, including the dissertation supervisor, must be graduate faculty members of the Department of Politics and International Relations. One must be from outside the department, but inside FIU. Other members must be approved by the International Relations Graduate Program Director. To complete program requirements, Ph.D. degree candidates must enroll for a minimum of 15 dissertation credits and maintain enrollment for 3 credits every semester until the degree is awarded.

Combined M.A. in Latin American and Caribbean Studies (MALACS)/Ph.D. in Political Science Degree Pathway

The Combined M.A. in Latin American and Caribbean Studies/Ph.D. in Political Science pathway allows qualified graduate students to pursue graduate degrees in both areas simultaneously. Students must fulfill the requirements for both programs, and up to 30 credits completed as part of the M.A. in MALACS will be counted toward the 76 credit Ph.D. in Political Science.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

Baccalaureate degree from an accredited institution for higher education (or equivalent);

1. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of

- undergraduate work and/or a GPA of 3.25 on any previous graduate work;
- (Verbal and Quantitative) Graduate Record Exam (GRE) scores;
 - International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet-based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Although admissions decisions typically are made in the spring, decisions for students who have not yet received their bachelor's degree will be conditional, pending confirmation of the B.A. Meeting the minimum requirements does not guarantee admission into the program. All applications are subject to review by both the members of the Department of Politics and International Relations and the MALACS Graduate Committee.

Admission Procedure

To be accepted into this pathway, students must submit an application to the Ph.D. in Political Science with a sub-plan for a M.A. in LACS. This designation will appear in the menu of programs in the graduate application. The application must be submitted by February 1 in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

- Online application and application fee;
- Official transcripts for all undergraduate and graduate coursework;
- Official GRE scores;
- Official TOEFL scores, if applicable.
- A statement of research interests, including reasons for seeking the M.A./Ph.D., future career goals, and a summary of scholarly preparation for this pathway;
- Three letters of reference from academic sources or others able to judge academic abilities and potential.
- A curriculum vitae; and
- A writing sample (such as a seminar paper) which demonstrates the ability to conduct research and write effectively.

Masters of Arts in Latin America and Caribbean Studies Degree Requirements (30 credits)

During their first two years of enrollment in the Combined Degree Program, students must complete 30 credits for an M.A. in Latin America and Caribbean Studies with depth or focus courses in Political Science.

MALACS Core Courses (9 credits)

During their first two years of enrollment in this combined degree pathway, students take three core courses as follows:

LAS 6003	Survey of Latin America and the Caribbean (first year, fall semester)	3
LAS 6934	Research Seminar (first year, spring semester)	3
POS 5706	Research Methods	3

MALACS Focus Courses (12 to 15 credits)

Students will take a minimum of 12 to 15 credits within the Department of Politics and International Relations with a Latin American and/or Caribbean focus.

MALACS Breadth Courses (3 credits)

Student can take courses from other areas

MALACS Exit Options for Combined Degree Pathway (3 to 6 credits)

Students select one of the following options:

LAS 6790 Thesis 6
Students complete a thesis paper supervised by three committee members. All members of the committee must have FIU Graduate Faculty status.

or

LAS 6942 Internship in Latin American and Caribbean Studies 3
Supervised internship leading to a major research paper in Latin American and Caribbean Studies.

or

LAS 6905 Directed Research in Latin American and Caribbean Studies 3
Students complete one directed research paper of about 35 -40 pages.

Each student is required to demonstrate proficiency in either Spanish or Portuguese, or in another language such as French or Haitian Creole when justified by research interests. Proficiency demonstrated by scoring an advanced level on the ACTFL exam for Spanish, Portuguese, or French administered by FIU's Department of Modern Languages. Other tests of proficiency may be accepted upon approval of the graduate advisor.

Students should apply for graduation for the M.A. in LACS as soon as they have completed all requirements for the degree – including the exit requirements. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in Political Science.

Doctor of Philosophy in Political Science Degree Requirements

Students will begin study towards the Ph.D. in Political Science immediately following their satisfactory completion of MALACS requirements. A minimum of 46 credits beyond the 30 credits required for the MALACS degree will be necessary to satisfy the requirements of the Ph.D. Program in Political Science.

The total of 76 credits for a Ph.D. in Political Science include the following:

Program Requirements:

7 Required Course Credits:

POS 5702	Teaching Political Science	1
POS 5716	Foundations of Political Science	3
POS 6918	Seminar in Political Science Research Methods	3

12 Common Core Course credits:

CPO 5091	Seminar in Comparative Politics	3
INR 5007	Seminar in International Politics	3
POS 5045	Seminar in American Politics	3
POT 5007	Seminar in Political Theory	3

12 Credits in Two Examination Fields from the following:

- American Politics,

2. Comparative Politics,
3. International Politics, and
4. Political Theory.

With advisor approval, these 12 credits may include some or all of the coursework (except POS 5706) taken in satisfaction of the requirements for the MALACS degree.

9 Credits in Third Area Specialization:

With advisor approval, these 9 credits may include some or all of the coursework (except POS 5706) taken in satisfaction of the requirements for the MALACS degree.

Elective Credits:

Elective credits necessary to bring total credits earned beyond the MALACS degree to a minimum of 40.

Dissertation:

24 Dissertation course credits.

Comprehensive Examination

After satisfactory completion of course work, students will take comprehensive exams in their two chosen subfields before being admitted to candidacy and defending a dissertation proposal. The comprehensive exams will cover core courses and broad knowledge of the two examination fields. They will be written and oral. Comprehensive examinations are given twice yearly, in mid-September and mid-January.

Dissertation (Minimum 24 credits)

After being admitted to candidacy, students enroll for dissertation credits under the supervision of their dissertation advisors. Candidates will prepare and defend a dissertation proposal. Upon completion of the dissertation itself, a public defense of the dissertation will be scheduled in accordance with University policy.

MALACS Joint and Partnership Degree Pathways

Joint JD/MALACS Degree Pathway

An agreement approved by the University Graduate School, between the FIU College of Law and the Steven J. Green School of International and Public Affairs allows students to pursue simultaneously the Juris Doctor (JD) and MALACS degrees, thereby saving considerable time over pursuing each degree separately. Students must meet the entrance requirements for both the JD and MALACS programs. Fifteen credits from the law school curriculum will be allowed toward the MALACS program and will constitute a MALACS concentration in International and Comparative Law. Nine credits from the MALACS program will also count toward the law school curriculum requirements. All other requirements to receive either the JD or MALACS degree must be met. Additional information on the joint degree program is available on the College of Law and MALACS web sites.

Joint MBA/MALACS Degree Pathway

An agreement approved by the University Graduate School, between the FIU Alvah H. Chapman, Jr. Graduate School of Business and the Steven J. Green School of International and Public Affairs allows students to pursue simultaneously the Master's in Business Administration (MBA) and MALACS. In doing so the student will finish

both programs much sooner than if they pursue each degree separately. Students must meet the entrance requirements for both the MBA and MALACS programs. Twelve credits from the MBA curriculum will be allowed toward the MALACS program and will constitute a MALACS concentration in International Business. Nine credits from the MALACS program will also count toward the MBA curriculum requirements. All other requirements to receive either the MBA or MALACS degree must be met. Additional information on the joint degree pathway is available on the Chapman Graduate School of Business and MALACS web sites.

MALACS Partnership with the Joint Forces Staff College

An agreement between FIU and the Joint Forces Staff College (JFSC) of the National Defense University allows JFSC graduates to transfer 15 JFSC credits toward the MALACS degree completion requirements. Students will receive a MALACS concentration in Foreign Policy and Security Studies from JFSC courses. Students wishing to take advantage of this partnership must be accepted into the MALACS program through normal application procedures. Once accepted, students are required to take 15 credit hours of MALACS courses (5 classes): a research methods class, LAS 6003, LAS 6930, and two breadth courses in at least two MALACS concentrations other than Security Studies. JFSC students must also complete a MALACS exit option (6 credit hours) and meet MALACS language proficiency requirements. Additional information on the JFSC partnership degree pathway is available on the MALACS web site.

Course Descriptions

Definitions of Prefixes

FLAC – Foreign Language Across Curriculums;
LAS – Latin American and Caribbean Studies.

F – Fall semester offering; S – Spring semester offering;
SS – Summer semester offering.

LAS 5120 Ecuador Abroad: Andean Shamanism, Religion, and Ritual (3). Offered in conjunction with the study abroad program in Ecuador and focuses on the indigenous spirituality and religion on the Andes. Field experience includes community service, lectures, workshops. Prerequisite: Graduate standing.

LAS 5301 Culture and Society in the Rio de la Plata (3). Argentinean and Uruguayan societies through an interdisciplinary approach and a series of relevant texts. Prerequisite: Permission of the instructor.

LAS 5907 Independent Study (1-3). Supervised readings or field research and training. Prerequisite: Permission of the instructor. (F,S,SS)

LAS 5920 Teaching Latin American Studies (1). Fundamentals in the teaching of Latin American Studies. Relevance and effectiveness of various methods and strategies, as well as pedagogy-related exercises. Prerequisite: Graduate standing. (F)

LAS 5931 Special Topics in Latin America and the Caribbean (3). Topics in Latin America and the Caribbean

will be selected to meet the academic needs of groups of students.

LAS 5933 Graduate Seminar in Latin American Studies (3). Exposes graduate students to interdisciplinary issues for students pursuing the MA in Latin American and Caribbean Studies. May be repeated up to 3 times with change of topic. Prerequisite: Graduate Standing. (F,S,SS)

LAS 5955 Haiti Study Abroad (3). Study abroad examination of Haitian Politics and Society. Part of Haitian Summer Institute. Prerequisite: Graduate standing.

LAS 6003 Survey of Latin America (3). A multidisciplinary, multimedia survey of the history, politics, societies and cultures of the countries of Latin America and the Caribbean. Prerequisite: Graduate standing. (F)

LAS 6905 Directed Research in Latin American and Caribbean Studies (3). Directed research under a major professor conducted to meet MALACS graduation requirements instead of a thesis. Two directed research courses are required. Prerequisite: Completion of all MALACS courses. (F,S,SS)

LAS 6930 Latin American and Caribbean Data Analysis (3). This course introduces students to basic empirical data analysis techniques while they complete an empirical research project in a Latin American or Caribbean topic. Prerequisite: Recommend a graduate research design course. (S)

LAS 6934 Research Seminar in Latin American and Caribbean Studies (3). Introduces students to intermediate level research methods while they complete a directed research project in Latin American and Caribbean studies. Prerequisites: LAS 6930 or equivalent. (F)

LAS 6942 Internship in Latin American and Caribbean Studies (1-6). Supervised internship leading to a major research paper in Latin American and Caribbean Studies. Prerequisite: All MALACS coursework completed. (F,S,SS)

LAS 6970 Thesis (1-6). Requires students to enroll for thesis research for at least one credit hour every semester until thesis is completed. Prerequisite: Completion of all MALACS courses. (F,S,SS)

MALACS Approved Courses

A sample of courses approved for each MALACS concentration is provided on the MALACS web site at <http://lacc.fiu.edu>.

Courses approved for the MALACS program are posted each semester on the FIU Class Schedule at <http://lacc.fiu.edu/catalog/>. (Under "Special Programs and Certificate Programs" select "Latin American & Caribbean Studies.") All courses listed from 5000 through 7000 series may be applied to the degree program. Approved courses are also posted each semester outside LACC (DM 353) or are available from the Graduate Program Director.

Master of Arts in Spanish

Admission Requirements

To be admitted into the Master's degree program, a student must:

1. Hold a Bachelor's degree in Spanish from an accredited university or college. Special cases, such as holders of a degree in a related field, will be evaluated individually by the Department.
2. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
3. Have attained a minimum 3.0 grade point average (B average), during the last two years of her/his undergraduate program as determined by the FIU Graduate Admissions Office.
4. Demonstrate the ability to speak and write in Spanish with native or near-native fluency. Demonstrate the ability to read English with excellent proficiency. An examination may be necessary. Contact the Director of Graduate Study (305-348-2851; Modern Languages, FIU, Miami, FL, 33199). Students with deficiencies will be required to complete certain course work before beginning graduate study.
5. Apply for graduate admission to the Graduate Admissions Office and submit to the Department of Modern Languages the following documentation: a) two letters of recommendation from former professors in the format required by the Graduate Studies Committee, b) a resume, c) a statement of purpose in

English or Spanish, addressing the candidate's goals and objectives in pursuing a master's degree in Spanish, and d) a writing sample in Spanish, preferably a term paper or thesis, of analytical nature, on a literary subject.

6. Receive approval of the departmental graduate committee. **Admission is competitive and meeting all minimum requirements does not guarantee automatic entrance into the program.**

Degree Requirements

The Master's degree program consists of 33 semester hours of graduate level work. A maximum of six credits of graduate course work may be transferred into the program from other institutions, subject to the approval of the departmental graduate committee. Six core courses and three elective courses are required at the 5000-and 6000-level. Some courses have prerequisites which do not count toward the degree. All core courses in literature must be taken with or after SPW 5806. Courses taken before SPW 5806 are considered to be electives.

Core Courses: (18 credits)

SPW 5806	Methods of Literary Research	3
FOL 5800	Foreign Language Teaching	
	Methodology	3
	One course in peninsular Spanish Literature of the 19th or 20 th -21 st centuries.	3
	One course in either Medieval Spanish Literature or Literature of the Golden Age.	3
	Two courses in Spanish American Literature. (Colonial or 20 th -21 st centuries)	6

Electives

A student must take at least nine graduate credits of electives, as follows: three in Spanish or Latin American literature, and six from one or more of the following areas: Spanish or Spanish American literature, Linguistics, Translation/Interpretation, or Culture of Spain, Latin America or Hispanics in the United States.

Graduation Requirements

To receive the M.A. degree in Spanish, a student must complete all the course work with a 3.0 GPA or higher, and receive a minimum grade of 'B' in every course. Upon completion of 27 graduate credits (core and elective courses), students will have the option of writing a thesis (equivalent to six credits), or taking two elective courses and writing a research paper. The thesis will be presented to an ad hoc committee chosen by the student and his or her advisor. The research paper must be submitted to a committee of two professors of the Department. Upon completion of 33 credits, the student will be required to take Comprehensive Examinations, based on course work and on the Department's Graduate Reading List (the exams must be passed with a minimum grade of 'B'; they may be taken no more than twice).

Master of Arts in Spanish (*en route* Ph.D. track)

Admission Requirements

Only students who have been admitted to the Ph.D. program without previously receiving an M.A. in Spanish or Spanish-American literature are eligible to pursue this track.

Degree Requirements

1. Completion of 39 hours of graduate course work in Spanish and Spanish-American Literature, including 18 credits of core courses:

SPW 5806	Methods of Literary Research	3
FOL 5800	Foreign Language Teaching Methodology	3

One course in peninsular Spanish Literature of the 19th or 20th-21st centuries. 3

One course in either Medieval Spanish Literature or Literature of the Golden Age. 3

Two courses in Spanish American Literature. (Colonial or 20th-21st centuries) 6

All course work must be taken at FIU, and receive a grade of "B" (3.0) or better.
2. Approval of this option by the Spanish Graduate Committee members, who will determine if the student is making satisfactory progress towards the Ph.D.

Master of Arts in Spanish with an Emphasis in Spanish Applied Language, Culture, and Literature**Core Courses: (6 credits)**

FOL 5800	Foreign Language Teaching Methodology	3
SPW 5806	Methods of Literary Research	3

Graduate Spanish courses in Spanish Applied Language/Linguistics. Courses must be taught in Spanish. (9 credits)**Graduate Spanish courses in Literature, Spanish Culture, and/or Spanish Film courses. Courses must be taught in Spanish. (9 credits)****Graduate English course in Linguistics or Literature. (3 credits)****Elective Courses from Modern Languages and/or any FIU School or Department**

Up to 6 credits of electives. Elective courses can be taken in Modern Languages and/or any School or Department at FIU. Electives from outside MOL must be approved by the Graduate Program Director.

Graduation Requirements To receive the M.A. degree in Spanish Applied Language, Culture, and Literature, a student must complete all the course work with a 3.0 GPA or higher, and receive a minimum grade of 'B' in every course. Upon completion of 27 graduate credits (core and elective courses), students will prepare a fully online portfolio in Spanish to be assessed.

Combined BA/MA in Spanish Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway, but the application must be submitted to

Graduate Admissions before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Current enrollment in the BA in Spanish at FIU.
2. Current GPA must be 3.5 or higher.
3. Completed at least 75 credits of course work.
4. Two letters of recommendation.
5. A writing sample consisting of a research paper in Spanish of an analytical nature – preferably a term paper or thesis – on a literary subject.
6. A resume.
7. A statement of purpose, addressing the candidate's goals and objectives in pursuing a master's degree in Spanish.
8. Approval of the Spanish Graduate Committee.

Completion Requirements**Required Courses for the BA: (33 credits)**

SPN 3301	Review Grammar and Writing*	3
	or	
SPN 3343	Advanced Spanish for Native Speakers*	3
SPN 3422	Advanced Grammar and Composition*	3
SPW 3820	Peninsular Spanish Literature	3
SPW 3130	Spanish American Literature	3
SPN 3733	General Linguistics (or equivalent)	3
	One additional course in Spanish Linguistics	3
	One additional course in Spanish	3
	or	
	Spanish American Literature	3

*(Students who have advanced proficiency in Spanish may replace the six language credits with electives in Spanish at the 3000 or 4000 level with the written permission of their advisors).

Electives

Twelve credits of electives

Overlap

Nine credits will be taken at the 5000 or 6000 level and may be used to satisfy both the Bachelor's and Master's degree requirements.

Required Courses for the MA: (33 credits)

SPW 5806	Methods of Literary Research	3
FOL 5800	Foreign Language Teaching Methodology	3
	One course in either Medieval Spanish Literature	3
	or	
	Literature of the Golden Age	3
	One course in Peninsular Spanish Literature of the 19th or the 20th centuries	3
	Two courses in Spanish American Literature	6

Electives

Six graduate credits of electives, as follows: 3 in Spanish or Spanish American Literature, and 3 from one or more of the following areas: Spanish or Spanish American

Literature, Linguistics, Translation/Interpretation, or Spanish American Culture.

Comprehensive Exams

The comprehensive examinations should be taken the semester immediately following the completion of all course work.

Doctor of Philosophy in Spanish

The doctoral program in Spanish offers students the opportunity to specialize in one of two major fields: Peninsular Spanish Literature or Spanish American Literature.

Admission Requirements

To be admitted to the doctoral program, a student must:

1. Hold a Bachelor's degree in Spanish from an accredited college or university. Special cases, such as holders of a degree in a related field, will be evaluated individually by the Department.
2. Demonstrate the ability to speak, understand, read, and write in Spanish with native or near-native fluency. Demonstrate the ability to speak and read in English with excellent proficiency. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.
3. Have attained a minimum 3.0 grade point average (B average), during the last two years of her/his undergraduate program as determined by the FIU Graduate Admissions Office, and submit GRE or EXADEP scores. Applicants with Master's degrees are required to have a graduate GPA of 3.5 in all graduate courses.
4. Apply for graduate admission to the Admissions Office and submit to the Department of Modern Languages the following documentation: a) two letters of recommendation from former professors in the format required by the Graduate Studies Committee, b) a resume, c) a statement of purpose in English, addressing the candidate's goals and objectives in pursuing a doctorate in Spanish, and d) a writing sample in Spanish, preferably a term paper or thesis, of analytical nature, on a literary subject.
5. Receive approval of the departmental Graduate Studies Committee. **Admission is competitive, and meeting all minimum requirements does not guarantee automatic entrance to the program.**

Degree Requirements

The doctoral program consists of 75 semester hours of graduate level work beyond the Bachelor's degree, distributed as follows: 57 graduate credits of courses and 18 credits of dissertation. Students holding Master of Arts degrees in Spanish or Hispanic Studies will be considered for admission and some or all of their graduate credits may be counted toward the doctoral degree after being evaluated and approved by the Graduate Studies Committee. Students will be able to transfer a maximum of 36 graduate credits from an earned graduate degree.

Core Courses: (9 credits)

All core courses must be taken as graduate courses offered by the university and may not be taken as independent studies:

1. SPW 5806 Methods of Literary Research
2. FOL 5800 Foreign Language Teaching Methodology
3. SPW 6825 Literary Theory and Criticism

Distribution Requirement: (15 credits)

All students must take:

One course in Medieval or Golden Age Peninsular Spanish Literature

One course in Peninsular Spanish Literature of the 18th-21st century

One course in Colonial/19th century Spanish American Literature

One course in 20th century Spanish American Literature

One additional course in Spanish American Literature

Electives: (33 credits)

Students may choose from graduate courses in Hispanic literature, linguistics, culture, and translation/interpretation.

Dissertation: (18 credits)

Graduation Requirements

To receive a Ph.D. in Spanish, a student must complete all courses with a GPA of 3.0 or higher, and receive a minimum grade of 'B' in every course. Before graduation the student must demonstrate a reading knowledge of a language other than English or Spanish, chosen by the student in consultation with her/his adviser. Upon completion of 57 graduate credits beyond the Bachelor's degree, students must take a qualifying written examination which will determine whether they are permitted to continue their studies toward the doctorate or whether they should be terminated, with or without a master's degree. Qualifying examinations must be passed with a minimum grade of 'B' and may not be taken more than twice. A student is formally considered a doctoral candidate upon successful completion of the examinations. Students must write and successfully defend a doctoral dissertation before a committee of three graduate faculty members from the Department of Modern Languages and an FIU graduate faculty member from a different department.

Course Descriptions

Definition of Prefixes

CAT-Catalan Language; FIL-Film; FOL-Foreign Languages; FOT-Foreign Languages in Translation; FOW-Foreign Languages, Comparative Literature; FRE-French Language; FRT-French Translation; FRW-French Literature (Writings); GER-German Language; HAI-Haitian Creole Language; JPT-Japanese Culture in Translation or Translation Skills; JPW-Japanese Literature (Writings); LIN-Linguistics; SPN-Spanish Language; SPT-Spanish Translation; SPW-Spanish Literature (Writings); TSL-Teaching English as a Second Language.

(See English listing for additional Linguistics courses.)
Application of basic language skills.

CAT 5505 Introduction to Catalan Culture, Literature and Language (3). Catalan culture and society through literary and visual texts. Provides also an introduction to

Catalan language. Prerequisite: Advanced level of Spanish.

FIL 5825 Spanish Film (3). The history of film in Spain and discussions of films by the most important 20th Century directors.

FIL 5846 Latin American Film (3). The study of 20th Century films and documentaries produced by leading Latin American directors. Films are examined in relation to Latin American Society and its literary creations.

FOL 5735 Romance Linguistics (3). The common and distinctive Romance features. Survey of linguistic geography and internal/external influences.

FOL 5800 Foreign Language Teaching Methodology (3). Introduction to the theory and practice of teaching foreign language methodology. Prerequisite: Graduate standing.

FOL 5906 Independent Study (1-3). Project, field experience, readings, or research.

FOL 5945 Foreign Exchange Internship (0). Foreign exchange students perform graduate research in the Department of Modern Languages and English as a co-requisite to their assistantship in the Modern Languages Department.

FOT 5125 Literature in Translation (3). Masterpieces of world literature. Open to students who are proficient in more than one language.

FOT 5805 Translation/Interpretation Arts (3). The language barrier and translation and interpretation. Types, modes, and quality of T/I: philological, linguistic, and sociolinguistic theories. History of T/I from Rome to date. The impact of T/I on Inter-American developments. Prerequisites: Graduate standing or permission of the instructor.

FOW 5395 Genre Studies (3). Examination of a single literary form (e.g. short story, poetry), or the study of interaction between literary types (e.g. novel and drama).

FOW 5545 Bicultural Writings (3). Experiment in linguistic pluralism. Content and focus to be determined by the international community.

FOW 5587 Comparative Studies (3). Cross-over and distinctiveness in a multi-language problem, period, or aesthetic.

FOW 5934 Special Topics in Language/Literature (3). Content and objectives to be determined by students and teacher.

FOW 5938 Graduate Seminar (3). Topic and approach to be determined by students and instructor. (Approval of the Department required.)

FRE 5060 Language for Reading Knowledge I (3). Designed primarily for graduate students who wish to attain proficiency for M.A. and Ph.D. requirements. Open to any student who has no prior knowledge of the language.

FRE 5061 Language for Reading Knowledge II (3). Emphasis on translation of materials from the student's field of specialization. Prerequisites: FRE 5060 or equivalent..

FRE 5508 La Francophonie (3). Analysis of the different varieties of French spoken outside of France. Includes Quebec French, African French, and French Creoles. Also examines the political alliance of Francophone countries. Credit will not be given for both FRE 4503 and FRE 5508. Prerequisite: Graduate standing.

FRE 5735 Special Topics in Linguistics (3). Content to be determined by students and instructor. Prerequisite: Graduate standing.

FRE 5755 Old French Language (3). Introduction to the phonology, morphology, and syntax of the Old French language. Reading and analysis of the 12th and 13th century texts in their original. Comparison of major medieval dialects. Prerequisite: Graduate standing.

FRE 5845 History of the Language I (3). The internal and external history of the French language from Latin to Old French. Examination of some of the first texts written in French. Credit will not be given for both FRE 4840 and FRE 5845. Prerequisite: Graduate standing.

FRE 5846 History of the Language II (3). External and internal history of the French language from 1400 to the present. Examination of first dictionaries and grammars of French. Survey of recent linguistic legislation concerning the French language. Credit will not be given for both FRE 4841 and FRE 5846. Prerequisite: Graduate standing.

FRE 5855 Structure of Modern French (3). Systematic study of the phonology, morphology, syntax, and lexicon of Modern French. Taught in English. Credit will not be given for both FRE 4850 and FRE 5855. Prerequisite: Graduate standing.

FRE 5908 Independent Study (1-3). Project, field experience, readings, or research. Prerequisite: Graduate standing.

FRT 5805 Translation/Interpretation Arts (3). Techniques of professional translation and interpretation. Prerequisite: FRT 4801.

FRW 5395 Genre Studies (3). Examination of a single literary form (e.g. short story, poetry), or the study of interaction between literary types (e.g. novel and drama). Prerequisite: Graduate standing.

FRW 5934 Special Topics in Language Literature (3). Content and objectives to be determined by student and instructor. Prerequisite: Graduate standing.

FRW 5938 Graduate Seminar (3). Topic and approach to be determined by students and instructor. Prerequisite: Graduate standing.

GER 5060 German for Reading Knowledge (3). Designed primarily for graduate students who wish to attain proficiency for M.A. or Ph.D. requirements. Open to any student who has no prior knowledge of the language.

GER 5061 German for Reading Knowledge (3). Emphasis on translation of materials from the student's field of specialization. Prerequisites: GER 5060 or the equivalent.

HAI 5235 Haitian Creole Seminar (3). A study of the phonological and morpho-syntactic structures of Haitian Creole. Patterns of language usage and attitude. Prerequisite: Graduate standing.

JPN 5907 Independent Study (1-3). Designed for advanced Japanese language proficiency utilizing specialized research projects, field experience, readings and other area studies.

JPT 5396 Japanese Literature and Film (3). A critical overview of modern Japanese literature and film, addressing socio-cultural and philosophical issues in the context of historical and cultural transformations. Prerequisites: Graduate student status or permission of the instructor.

Close reading of wide range of literacy texts in Japanese across genres. Students will learn to read and analyze authentic material in the original language, as well as the methods and techniques of literacy translation. Prerequisites: Graduate student status or permission of the instructor.

LIN 5207C Acoustic Phonetics (3). Introduction to principles of acoustic and instrumental phonetics, including the physics of speech sounds and use of the sound spectrograph and other instruments. Prerequisites: LIN 3010, LIN 3013, or SPN 3733, or the equivalent, plus one additional course in phonetics or phonology. Co-requisite: One of the prerequisites may be counted as a co-requisite.

LIN 5601 Sociolinguistics (3). Principles and theories of linguistic variation with special attention to correspondences between social and linguistic variables. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5603 Language Planning: Linguistic Minority Issues (3). Introduction to the field of language planning. Minority linguistic issues in developing and developed nations: official languages, endangered languages, and language as problem and/or resource. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5604 Spanish in the United States (3). An examination of the sociolinguistic research into Spanish in the U.S.: varieties of Spanish, language attitudes, language contact and change, and aspects of language use. Prerequisites: LIN 3010, LIN 3013, or SPN 3733 or the equivalent.

LIN 5613 Dialectology (3). The geography of language variation: linguistic geography, atlases, national and regional studies. Dialectology within a modern sociolinguistic frame work; research approaches. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5625 Studies in Bilingualism (3). Readings and analysis of bilingual programs and binational goals. Prerequisites: LIN 3010, LIN 3013, LIN 5018 or the equivalent.

LIN 5689 Seminar in Lexicon Grammar (3). This course introduces students to research in Lexicon Grammar -- syntactic analyses based on a formal classification of large portions of the lexicon. Idioms and NLP applications are also discussed. Prerequisites: LIN 5018 and one structure course (e.g. LIN 5501, SPN 5705, or FRE 5855).

LIN 5720 Second Language Acquisition (3). Research, theories, and issues in second language acquisition. Topics include the Monitor Model, the role of the first

language, motivation, age, individual differences, code-switching, and the environment; affective variables and attitudes.

LIN 5725 Seminar: Issues in Language Learning (3). Seminar in applied linguistics to serve as introduction to theory, research, and practice in language. Examines difficulties experienced in learning syntax, oral comprehension, usage, etc. Prerequisites: LIN 3010, LIN 3013, SPN 3733 or equivalent.

LIN 5760 Research Methods in Language Variation (3). Research in sociolinguistics, dialectology, bilingualism: problem definition, instrument design, data collection and analysis, including sampling techniques and statistical procedures. Prerequisites: LIN 5601, LIN 5625, LIN 5613 or other course in variation.

LIN 5825 Pragmatics (3). Study of the relationships between language form, meaning, and use. Special emphasis on speech act theory. Prerequisites: LIN 3010, LIN 3013, or SPN 3733 or the equivalent.

LIN 6571 Discourse Analysis (3). The study of the organization of language above the sentence level, such as conversational interactions and written texts. Prerequisites: LIN 3010, LIN 3013, or the equivalent.

LIN 6608 Seminar on Language, Race Identity, Nation and Power (3). Explores the historical and social use of language in the construction of race, nation, identity and power. Prerequisite: Graduate standing.

LIN 6934 Special Topics in Linguistics (3). Content to be determined by students and instructor. (Approval of the Department required.) (See English listing for additional Linguistics courses.)

SPN 5060 Language for Reading Knowledge (3). Designed primarily for graduate students who wish to attain proficiency for M.A. or Ph.D. requirements. Open to any student who has no prior knowledge of the language.

SPN 5061 Language for Reading Knowledge (3). Emphasis on translation of materials from the student's field of specialization. Prerequisites: SPN 5060 or the equivalent.

SPN 5515 Cultural Representations of the Spanish Civil War (3). Representations for the Spanish Civil War in literature, film, and the other arts.

SPN 5525 Spanish American Culture (3). A graduate survey of the major artistic phenomena in Latin America. Art, music, film, and literature will be discussed in their cultural context. Prerequisites: Graduate standing and permission of the instructor.

SPN 5536 Afro-Cuban Culture (3). Explores the role played by blacks in Cuban culture. Issues studied include: Afro-Cuban religions, languages, and music, as well as the Afro-Cuban presence in literature and the arts.

SPN 5539 Special Topics in Afro-Hispanic Culture (3). Close examination of various topics related to the culture of African Diaspora groups in the Hispanic world.

SPN 5705 The Structure of Spanish (3). Diachronic and synchronic study of the structures of the Spanish language (phonetic, morphosyntactic, and lexical). Also considers pedagogical considerations for teaching structures.

Prerequisites: LIN 3010, LIN 3013, SPN 3733 or equivalent.

SPN 5725 Syntactic Structures of Spanish and English (3). An in-depth study of syntactic structures in Spanish and English, with an emphasis on how linguistic theory can account for the similarities and differences between the two languages. Prerequisites: LIN 3010, LIN 3013, SPN 3733 or equivalent.

SPN 5736 Spanish as a Heritage Language: Acquisition and Development (3). Examines applied linguistics research and practice concerning acquisition, retention and literacy development of Spanish as a minority or heritage language in the United States. Prerequisites: LIN 3010, LIN 3013, SPN 3733 or equivalent or permission of instructor.

SPN 5805 Morphological Structures of Spanish and English (3). A survey of the morphologies of Spanish and English. Topics include the difference between isolating and synthetic languages, rich vs. impoverished agreement, and syntactic ramifications of morphology. Prerequisites: LIN 3010, LIN 3013, SPN 3733 or equivalent.

SPN 5807 Syntactic Structures of Spanish (3). The study of syntactic structures in Spanish, topics include different syntactic approaches to current issues in Spanish syntax. Prerequisites: LIN 3010, LIN 3013, SPN 3733 or equivalent.

SPN 5845 History of the Language (3). Historical development of the Spanish language, primarily from the point of view of internal linguistic change. Spanish as an example of general processes of language development. Prerequisites: LIN 3010, LIN 3013, SPN 3733 or equivalent.

SPN 5908 Independent Study (1-3). Project, field experience, readings, or research.

SPN 6395 Latin American Literature and Film in an Age of Globalization (3). Examines the latest trends in Latin American literature and film in light of the cultural dynamics of globalization.

SPN 6505 Spanish Culture (3). Selected development in language, literature, art, music, film, and the social institutions of Spain. Prerequisites: Graduate standing or permission of the instructor.

SPN 6535 Hispanic Culture in the U.S. (3). Readings in literature, culture, and language to illustrate the experience of the major Hispanic groups in the United States. Prerequisites: Graduate standing or permission of the instructor.

SPN 6795 Phonological Structure of Spanish (3). Approaches to current issues in Spanish phonology. Linguistic methodology for the analysis of phonological processes in Spanish. Prerequisite: Graduate standing.

SPN 6825 Hispanic Dialectology (3). A study of the principal varieties of the Spanish language in the Spanish-speaking world, with special emphasis on Latin American Spanish. Prerequisite: Graduate standing.

SPN 6930 Special Topics in Linguistics (3). Content to be determined by students and instructor. (Approval of the Department required.)

SPN 6970 Thesis Research (1-10). Research toward completion of Master's Thesis. Repeatable. Prerequisite: Permission of the Department.

SPN 7980 Ph.D. Dissertation (1-12). Research toward the completion of a doctoral dissertation. Repeatable. Prerequisite: Permission of the Major Professor and Doctoral Candidacy.

SPT 5118 Literature in Translation (3). Masterpieces of world literature. Open to students who are proficient in more than one language.

SPT 5715 Hispanic Women Writers in Translation (3). Readings and analysis of Spanish and Spanish American women writers in translation. Emphasis on cultural and linguistic considerations involved in the translation of literary texts. Prerequisites: Graduate standing or permission of the instructor.

SPW 5135 Spanish American Literature for Teachers (3). Overview of major trends in Spanish American literature. Especially designed for school teachers and majors in modern language education. Not for M.A. or Ph.D. Spanish majors. Prerequisite: Permission of the instructor.

SPW 5155 Comparative Studies (3). Cross-over and distinctiveness in a multi language problem, period, or aesthetic.

SPW 5225 Textual Reading and Analysis (3). Studies how texts are constructed, the role played by Poetics and Rhetoric in their formulation, and the context in which they were produced. Prerequisite: Graduate standing.

SPW 5237 The Traditional Spanish American Novel (3). Study and analysis of the traditional Spanish novel as a form of art, from 19th century Lizardi's "El periquillo sarniento", to 1950. The novels and authors studied are representative of 'costumbrismo', 'romanticismo', 'naturalismo', 'modernismo', and 'criollismo'.

SPW 5277 Twentieth Century Spanish Narrative (3). Analysis of the Spanish novel from Ferlosio's "El Jarama" to the present. The perspective will be focused within historical, social, and artistic context. Representative authors such as Cela, Martin Santos, Umbral, Delibes, Benet, Goytisolo, and others will be included.

SPW 5286 Contemporary Spanish American Novel (3). A study of the Spanish American Novel from 1950. The course will intensively and extensively focus on the novelists who are best known for their innovations, defining and analyzing the qualities which give originality and newness both in themes and language.

SPW 5348 Avant-Garde Spanish Poetry: From Creacionismo to Lorca (3). Analysis of the significance of the avant-garde as well as vanguard poetry during Spain's Silver Age. Contrast Spanish avant-garde poetry with modernism. Discuss F.G. Lorca and the Generation of 1927. Prerequisites: Graduate status. Advanced knowledge of Spanish language. At least one course in Spanish literature (level 4 or higher).

SPW 5349 Modern Spanish Poetry: The 19TH and 20TH Centuries (3). A complete examination of the 19th and 20th century Spanish peninsular poetry and related critical studies. Prerequisite: Graduate students status.

SPW 5358 Graduate Seminar: Prose and Poetry of Jorge Luis Borges (3). Close readings of short stories and poetry. Emphasis on Borge's linguistic and cultural pluralism and the interplay of philosophy with fabulation.

SPW 5388 Travel Writing and Cultures in Spanish Literatures (3). Studies Spanish and Spanish American travel literature and representation of otherness through different literary critical approaches.

SPW 5396 History of Cuban Cinema (3). Overview of Cuban Cinema, from its origins to the present.

SPW 5398 Africanism in Spanish Literature and Film (3). Studies the literary and artistic production generated by Spanish relationship with African cultures, as well as Afro-Spanish literature.

SPW 5405 Medieval Spanish Literature (3). Readings in Medieval literature of Spain including the epic, the learned poetry of the XIIIth and XIVth Centuries, and the literature of Juan II's court. Prerequisites: Graduate standing or permission of the instructor.

SPW 5407 The Renaissance in Spain (3). Readings in the literature and cultural expressions of the Spanish Renaissance. Prerequisites: Graduate standing or permission of the instructor.

SPW 5428 Theatre in Calderon and Lope (3). The creation of verbal theatrical technique in the Baroque masters Calderon de la Barca and Lope de Vega.

SPW 5436 Poetry Writing in Spanish (3). Readings from Spanish and Latin American texts; description and recreation of traditional and experimental metrics. Students will exchange critiques of original poems. Prerequisites: sample of unpublished poems; word-processing literacy; permission of the instructor.

SPW 5475 19th Century Latin American Literature (3). A study of the main literary works of Spanish speaking 19th Century Latin America: Romanticism, Realism, Naturalism and Modernism. Prerequisites: Upper level and graduate standing.

SPW 5486 Modern Spanish Women Writers (3). Analysis of narrative works by Spain's most representative women writers from the 19th century to the present. Emphasis on the novel. Includes works by Pardo Bazan, Matute, Laforet, Martin Gaité. Prerequisites: Graduate standing or permission of the instructor.

SPW 5515 Advanced Studies in Hispanic Folklore (3). Studies the oral literary and linguistic tradition of the Hispanic world. Prerequisites: Graduate standing or permission of the instructor.

SPW 5535 Hispanic Romanticism (3). A transatlantic approach to literary production of Hispanic Romanticism. Prerequisite: Graduate standing.

SPW 5546 Hispanic Neoclassicism (3). Study of major Spanish and Spanish-American Neoclassic writers: Cadalso, Moratin, Jovellanos, Carrio de la Vandra, Mier and Lizardi. Prerequisite: Graduate Standing.

SPW 5556 Spanish Realism and Naturalism (3). Readings in Spanish XIXth Century Novel of Realism and Naturalism including Alarcon, Perez Galdos, Pardo Bazan, Clarin and Blasco Ibanez. Prerequisites: Graduate standing or permission of the instructor.

SPW 5575 Spanish American Modernism (3). An in-depth study of prose and poetry of one of the most important periods of Spanish American literature, focusing on Marti, Dario, Najera, Casals, Silva, Valencia, Lugones, and Herrera y Reissig.

SPW 5585 Learning Technology in Spanish Pedagogy and Research (3). Exploration of the role of technology in today's language and literature learning environment. Overview of the WWW, Network-based communication, and electronic databases related to Hispanic language and literature. Prerequisites: Graduate standing or advanced undergraduate with permission of the instructor.

SPW 5595 Magical Realism and Typologies of Non-Realist Fiction (3). Theories of magical realism, fantastic and non-realist fiction, focusing on narrative technique. Authors may include Onetti, Borges, Cortázar, Asturias, Carpentier, Rulfo, Márquez, Allende or others. Prerequisites: Graduate standing or permission of the instructor.

SPW 5606 Cervantes (3). A comprehensive introduction to the master-pieces of Cervantes as the creator of the modern novel, and to critical theories about his art.

SPW 5727 Hispanic Noventaiochism (3). Studies in narrative tendencies at turn of the century in Spanish and Spanish American literary production.

SPW 5729 Major Writers of the Generation of '98 (3). Study of the social and political circumstances of Spain at the turn of the XIX Century, and analysis of the work of Ganivet, Azorin, Baroja. Machado, Maeztu, Unamuno and Valle-Inclan. Prerequisites: Graduate standing or permission of the instructor.

SPW 5735 Hispanic Literature of the United States (3). Readings in the literature of Hispanics in the United States. Prerequisites: Graduate standing or permission of the instructor.

SPW 5776 Black Literature in Latin America (3). An examination of the different genres in Latin American literature focusing on the life of Afro-Hispanics, from the beginning of this literary tradition to the present time. Prerequisite: Graduate standing.

SPW 5781 The Representation of Women in Spanish Literature and Film (3). Study of cinematographic adaptations of Spanish novels, plays and short stories. Analyzes the representation of the female subject in both literary and film works. Prerequisites: Graduate standing or permission of the instructor.

SPW 5786 Spanish American Women Writers (3). Through a selection of poems, plays and novels, this course studies Spanish American women production from Independence to the present times. Prerequisite: Graduate students only.

SPW 5806 Methods of Literary Research (3). Introduction to bibliography, methods of research, the composition of essays, rhetoric, and the presentation of documentation. Theory of literary criticism, and its practical application to texts in Spanish.

SPW 5934 Special Topics in Language/Literature (3). Content and objectives to be determined by student and instructor.

SPW 6238 Spanish American Historical Novel (3). The evolution of the historical novel in Spanish America from the Romantic period to the present. Stylistic, literary, and theoretical analysis of selected traditional and recent historical novels. Prerequisite: Graduate standing.

SPW 6216 Golden Age Prose (3). Analysis of representative prose works from 16th and 17th century Spain. Emphasis will be on the picaresque novel, the pastoral novel, autobiography, and the short story. Prerequisite: Graduate standing.

SPW 6335 Golden Age Poetry (3). An examination of major poetics (1450-1650); emphasis on historical/cultural contexts. Prerequisite: Graduate standing.

SPW 6345 Twentieth Century Spanish Poetry (3). Close reading of two of the greatest poets of the 20th century (Jorge Guillen; F. Garcia Lorca) and of major voices from the Generation of 1927 and from post-Franco Spain. Emphasis on cultural contexts. Prerequisite: Graduate standing.

SPW 6366 Studies in the Spanish American Essay (3). Stylistics of the essay, neoclassic to postmodern, as reflecting the intellectual spirit of the times. Analysis of arguments and methods of cultural epistemology in Bolivar, Marti, Paz and others. Prerequisite: Graduate standing.

SPW 6367 Prose and Poetry of Jose Marti (3). Study of Jose Marti's prose and poetry within the aesthetic and ideological contexts which characterize the discourse of Spanish American Modernism. Prerequisite: Graduate standing.

SPW 6368 19th Century Spanish-Caribbean Narrative (3). Studies the most popular literary trends of 19th century literature through the works of various Spanish-Caribbean writers. Prerequisite: Graduate standing.

SPW 6389 Cuban Novel and Short Story (3). Critical reading of representative texts of the Cuban novel and short story from XIX century to contemporary narrative expressions, within historical, social and artistic context. Prerequisite: Graduate standing.

SPW 6395 Genre Studies (3). Examination of a single literary form (e.g. short story, poetry,) or the study of interaction between literary types (e.g. novel and drama).

SPW 6495 The Latin American Experience Literature and Film (3). Literary and cinematic representations of significant periods in the formation of Latin American politics, culture, and identity. Prerequisite: Graduate standing.

SPW 6716 Seminar in Galdós (3). An in-depth study of the novels by Benito Pérez Galdós. Stylistic and theoretical analysis of a selection of Galdós' works, especially his *novelas españolas contemporáneas* (contemporary Spanish novels). Prerequisite: Graduate standing.

SPW 6775 Literature of the Spanish Caribbean (3). Close readings of representative texts of the literature of the Dominican Republic, Cuba and Puerto Rico. Emphasis on the characteristics of the literary discourse within the context of a regional literature. Prerequisite: Graduate standing.

SPW 6825 Literary Theory and Criticism (3). Study of the theoretical foundation of literature and contemporary systems of critical approach to literary discourse. Prerequisite: Graduate standing.

SPW 6826 The Historiography of Literature (3). Methodology and theory in the writing of literary history: periodization, continuity and change, literature in intellectual history. Prerequisite: Graduate standing.

SPW 6936 Graduate Seminar (3). Topic and approach to be determined by students and instructor. Prerequisite: Approval of the Department.

SPW 7910 Pre-Dissertation Research (1-9). Enables students to concentrate on completion of their dissertation prospectus during the term in which they take Ph.D. comprehensive exams. Prerequisite: Completion of all other Ph.D. coursework.

TSL 6348 Task-Based Language Teaching (3). Introduction to task-based approaches to language teaching and learning. Prerequisite: Graduate Standing.

Politics and International Relations

Barry Levitt, *Associate Professor and Chairperson*
Iqbal S. Akhtar, *Associate Professor*
Astrid Arrarás, *Teaching Professor*
Nima Baghdadi, *Visiting Assistant Teaching Professor*
Alexander Barder, *Associate Professor and Graduate Program Director, International Relations*
Thomas A. Breslin, *Professor*
John F. Clark, *Professor*
Ronald Cox, *Professor*

Dario Moreno, *Associate Professor*
John Oates, *Associate Professor*
Richard S. Olson, *Professor and Director of the Extreme Events Institute*
Joquin A. Pedroso, *Assistant Teaching Professor*
Mark Rosenberg, *Professor and University President*
Naisy Sarduy, *Associate Teaching Professor*
John F. Stack, Jr., *Professor and Founding Dean, Steven J. Green School of International and Public Affairs*
Charles Shields, *Visiting Assistant Teaching Professor*
Judith H. Stiehm, *Professor*
Markus Thiel, *Associate Professor and Director of the EU-Jean Monnet Center of Excellence*
Chantalle F. Verna, *Associate Professor*
Marcie Washington, *Associate Teaching Professor and Associate Undergraduate Program Director*
Jin Zeng, *Associate Professor*
Susanne Zwingel, *Associate Professor*

Faculty Emeriti

Kenneth I. Boodhoo, *Professor Emeritus*
Charles MacDonald, *Professor Emeritus*
Brian Nelson, *Associate Professor Emeritus*
Nicholas Onuf, *Professor Emeritus*

The Department of Politics and International Relations offers four advanced degrees: a Master of Arts in International Studies, a Master of Arts in Political Science, a Doctor of Philosophy in International Relations, and a Doctor of Philosophy in Political Science.

The Department emphasizes a multi-disciplinary approach to graduate education. This emphasis reflects the many disciplines and perspectives represented in the Department, and it results in a vital and challenging exchange of ideas among students and faculty members. Together they investigate a stimulating range of topics, from the traditional concerns of foreign policy and national security to contemporary global issues such as democratization, the environment, human rights, globalization, and social movements. These scholarly inquiries are generally informed by an engagement with social and political theory, to which students are exposed through a closely coordinated set of graduate seminars. Many members of the Department have longstanding regional interests, as do many other members of the University faculty. The program boasts of strengths in Africa, Central Asia, East Asia, Latin America and the Caribbean, the Middle East, and Europe.

The Department of Politics and International Relations is an affiliate member of the Association of Professional Schools of International Affairs.

Master of Arts in International Studies

The M.A. program is designed to prepare students for careers in government, the private sector, or international agencies, or for professional and doctoral studies.

The Steven J. Green School of International and Public Affairs offers certificate programs in African and African Diaspora Studies, Asian Studies, Latin American and Caribbean Studies, and Transnational and Regional Studies, among others. The graduate program encourages its M.A. students to pursue regional certification in conjunction with their work in the M.A. program.

Admission Requirements

To be considered for admission to the M.A. program, applicants must have a GPA of 3.0 in upper-level work, or its equivalent, from a recognized institution of higher education, and acceptable Graduate Record Examination (GRE) scores. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A minimum score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required. Admissions requirements are minimums and even if the minimums are met, admission is not assured. The application deadline is March 15 for Fall semester admission and September 1 for Spring semester admission.

Degree Requirements

The M.A. program requires a minimum of 36 semester hours of credit at the graduate level. Undergraduate courses taken to satisfy prerequisites for graduate courses will not count toward the 36 hour minimum requirement. The Graduate Advisory Committee may approve the transfer of a maximum of six graduate credits earned at another recognized institution of higher education.

Core Sequence: (15 credits)

All MA students must complete a core sequence of five courses (15 credits), each of which reflects a distinctive disciplinary point of view. These courses are:

GEO 6473	Space, Place and Identity
INR 6706	Political Economy of International Relations
INR 5609	Contemporary Dynamics of International Relations
INR 5615	Research Design in International Relations
INR 5017	Approaches to Area Studies

Major Field: (9 credits)

M.A. students also must select a major field of study in either (1) Global Institutions and Issues, or (2) International Relations and Foreign Policy, by taking three courses (9 credits) from an extensive list of approved courses in the social sciences. Students must take at least two courses offered by the Department of Politics and International Relations to satisfy the field requirement.

Electives: (6 credits)

To satisfy the program's elective requirement, students may take two additional courses (6 credits) from the field lists. Students wishing to elect other graduate-level courses offered by the University may do so with permission of the Graduate Program Director.

Thesis and Alternatives (6 credits)

To complete degree requirements, M.A. students have the option of (a) writing a thesis or (b) taking a comprehensive examination. Before electing either of these options, students must demonstrate competence in the use of a foreign language other than English.

Any student electing (a) to write a thesis will normally take 6 credit hours of thesis supervision and prepare a thesis proposal subject to the approval of three members of the University graduate faculty. A graduate faculty member of the Department of Politics and International Relations must chair any thesis committee thus constituted. No thesis may be approved until the student has defended it in a public examination. Any student electing (b) to take a comprehensive examination must have 6 semester hours of course work in preparation for the exam. One half of the comprehensive examination will cover the core sequence of courses, and the other half will cover the student's major field.

Combined B.A. in International Relations/M.A. in International Studies Degree Pathway

The combined B.A./M.A. degree pathway allows highly qualified undergraduate students to pursue an accelerated M.A. degree in International Studies. Students accepted into this pathway will be able to complete the M.A. degree as much as one year sooner that would otherwise be possible. Students accepted into the International Relations Honors Track are particularly encouraged to apply for this program.

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree

program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway, the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

To be accepted into the combined B.A./M.A. degree pathway, students must submit an M.A. program application by March 15 in their junior year (to apply, students must already have completed 75 credits in their undergraduate degree program). A complete application requires:

1. Current enrollment in the B.A. program in International Relations at FIU
2. GRE scores
3. Minimum GPA of 3.5
4. Two letters of recommendation
5. Statement of purpose discussing research interests

All components of the application must be complete by the March 15 application date. Students should consult the graduate catalog and the International Relations Program website for a more comprehensive discussion of admission requirements. Students in the combined B.A./M.A. degree pathway must apply for their undergraduate degree as soon as possible after having satisfied the degree requirements.

The program gives students the opportunity to take up to 9 credits of graduate coursework in their senior year that will be shared with the B.A. and the M.A. Successful completion of the B.A./M.A. pathway will therefore require a total of 147 unduplicated credit hours. Students will take three 5000-level graduate courses in their senior year and follow the regular M.A. curriculum after they earn their B.A. degree. A typical course of study is as follows:

Undergraduate Junior Year: apply to the program (March 15 deadline)

Undergraduate Senior Year

Fall Semester – take 12 credits, including one 5000-level course

Spring Semester – take 12 credits, including two 5000-level courses

Graduate Program

Summer – take 3 graduate credits (5000-level or higher)

Fall – take 9 graduate credits (5000-level or higher)

Spring – take 9 graduate credits (5000-level or higher)

Summer – take 6 graduate credits (thesis or comps preparation)

Students in the combined B.A./M.A. pathway in International Studies must complete all other requirements for the M.A. degree in International Studies (please consult the graduate catalog and the Department's online graduate handbook).

Master of International Business/Master of Arts in International Studies Joint Degree Pathway

The Department of Politics and International Relations and The Alvah H. Chapman Jr. Graduate School of Business at Florida International University offer a joint degree pathway culminating in both a Master in International Business (MIB), and a Master of Arts in International Studies (MAIS). Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. The joint degree pathway will use existing faculty, courses, and resources. Important criteria relating to the joint degree pathway are as follows:

1. Candidates to the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate on the application their intention to pursue the joint degree option. Students deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.
2. Applications for the joint degree pathway will not be accepted from candidates who have already graduated with either degree. MIB or MAIS students must apply and be admitted no later than the second to last semester in which they are expected to complete their original degree requirements, including the comprehensive examination for the MAIS degree.
3. Candidates must satisfy all requirements for each degree. The two degrees will have four common courses. All courses transferred between degrees must be completed with a grade point average of 3.0 or higher. Courses transferred to meet elective credits must be 5000 or 6000 level courses. Directors of the MAIS and MIB degree programs may adjust these exact course requirements as a result of future changes to the MAIS or MIB curriculums.

3.1. **To obtain the MIB degree**, MAIS students who have successfully completed the required 36 credits must, additionally, complete 24 credit hours in the MIB program as follows:

MAR 6158	International Marketing	3
MAN 6635	Global Strategy and Business Models	3
MAN 6679	Master's Project in International Business	3
MAN 6601	Global Management Skills	3
FIN 6644	Global Financial Strategy	3
ACG 6255	International Accounting	3
MAN 6930A	Master's Seminar in Management 1 1	
MAN 6930B	Master's Seminar in Management 2 1	
MAN 6930C	Master's Seminar in Management 3 1	

In order to satisfy the 36 credits hours required by the MIB program, 12 credit hours will be transferred from the MAIS program as follows:

INR 5017	Approaches to Area Studies	3
INR 5409	International Law	3
Elective 1		3
Elective 2		3

3.2. **To obtain the MAIS degree**, MIB students who have successfully completed the required 36 credits must, additionally, complete 24 credit hours in the MAIS program as follows:

INR 6706	Political Economy of International Relations	3
INR 5615	Research Design and International Relations	3
GEO 6473	Space, Place and Identity	3
INR 5609	Contemporary Dynamics of International Relations	3
INR 5017	Approaches to Area Studies	3
Field course 1		3
Field course 2		3
Field course 3		3

In order to satisfy the 36 credits hours required by the MAIS program, 12 credit hours will be transferred from the MIB program as follows:

MAN 6606	Fundamentals of International Business	3
BUL 6850	International Business Law	3
Elective 1		3
Elective 2		3

All MAIS students coming into the MIB program will be required, during the first month of classes, to take a 16-hour workshop in Accounting and a 16-hour workshop in Quantitative Methods. The purpose of these workshops is to ascertain whether that students have the necessary background in both of these fields. Students must pass each workshop with at least a B grade (there is no charge for this workshop). Otherwise, they must register, and pay the corresponding tuition for the Accounting class (ACC 6026) and/or the Quantitative Methods class (QMB 6357) in the Evening MBA program, and earn a grade of B or higher.

Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all of the program requirements for the first degree program as if they had never been a joint degree pathway candidate.

Doctor of Philosophy in International Relations

The Ph.D. program is designed to prepare students for careers as scholars and teachers. It provides students with a solid theoretical foundation while allowing individual latitude for rigorous research on a wide range of subjects. Students work closely with dedicated, internationally recognized scholars.

Admission Requirements

To be considered for admission to the Ph.D. program, all applicants must have a bachelor's degree, or its equivalent, from a recognized institution of higher education, or have received a bachelor's degree before they matriculate in the program.

Applicants should have a minimum undergraduate grade point average of 3.2, or its equivalent, a minimum grade point average of 3.5 for all combined graduate work, and acceptable Graduate Record Examination (GRE) scores. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the iBT TOEFL (equivalent to 575 on the paper-based version of the Test

of English as a Foreign Language) or 6.5 overall on the IELTS is required.

Applications will be reviewed only in the spring term for fall admission. Students who wish to be considered for graduate assistantships must submit an application by January 15 for admission in the following Fall semester.

Degree Requirements

The Ph.D. requires a minimum of 75 semester hours of credit at the graduate level.

Undergraduate courses taken to satisfy prerequisites for graduate courses will not count toward the 75 hour minimum requirement. Students earning a M.A. degree may transfer up to a maximum of 36 credits toward the 75 hour minimum requirement. The Graduate Advisory committee may approve the transfer of a maximum of 12 graduate credits earned in a non-degree seeking status at FIU.

Ph.D. students who have satisfied all other requirements for the M.A. apart from the exit requirement (i.e. all coursework and the foreign language competency) are eligible to receive an M.A. degree en route. Passing the doctoral comprehensive examinations serves as equivalent to the M.A. comprehensive examination. Ph.D. students who have satisfied their requirements should consult with the Graduate Program Director about the necessary paperwork and procedures to receive the M.A. degree in the course of their Ph.D. studies.

Core Sequence (15 credits)

All Ph.D. students must complete a core sequence of five courses (15 credits). These courses are:

INR 5609	Contemporary Dynamics of International Relations
INR 5615	Research Design in International Relations
INR 6604	International Relations Theory I
INR 6608	Contemporary International Relations Theory

Second methods course from the following list (or another methods course approved by the Graduate Program Director):

INR 5616	Qualitative and Interpretive Methods in International Relations
POS 5706	Graduate Seminar in Political Science Research Methods
ECO 7424	Econometric Methods 1
ANG 6480	Ethnohistorical Research Methods
ANG 6497	Qualitative Research Methods
GIS 5935	Topics in GIS
PAD 7705	Applied Quantitative Analysis I
PAD 7707	Applied Quantitative Analysis II
PAD 7703C	Empirical Methods in Public Administration

Fields selection:

- Global Political Economy and Development
- Comparative Area Studies
- Foreign Policy and Security Studies
- Global Governance, International Law and International Ethics

Gateway courses (9 credits)

Each field has one or two gateway courses. Students take three gateway courses out of four fields.

- Global Political Economy and Development:
INR 6706 Political Economy of IR
- Comparative Area Studies:
INR 5017 Approaches to Area Studies
- Foreign Policy and Security Studies:
INR 6338 Strategic Studies
- Global Governance, International Law and International Ethics
INR 5409 Int'l Law I
OR
INR 5507 Int'l Organizations

Major and Minor Fields: (15 credits)

Students must select a major field of study in (1) Global Political Economy and Development (2) Comparative Area Studies (3) Foreign Policy and Security Studies, or (4) International Law by taking three courses (9 credits) from a list of approved courses. Students must also select a minor field of study consisting of at least two courses (6 credits), (a) by choosing a second field from the above list, (b) by taking a Ph.D. field in some other teaching unit of the University, or (c) by creating a field in consultation with the Graduate Program Director and three members of the University faculty.

Electives: (15 credits)

To satisfy the Ph.D. program's elective requirement, students must take 15 credits of additional course work, including independent study courses. Students wishing to elect a course or courses offered elsewhere in the University may do so with permission of the Graduate Program Director. Students must demonstrate the ability to use a foreign language other than English for scholarly purposes.

Comprehensive Exams (6 credits)

Within 6 months of completing the foreign language requirement and 60 hours of course work, students must sit for written comprehensive examinations on the core sequence and in both of their fields. Students may sit for their comprehensive examination during the term in which they complete these requirements.

Dissertation (15 credits)

Within 3 months of passing the comprehensive examinations, students should publicly present a dissertation proposal that is acceptable to a committee of at least four qualified scholars. Three members of the committee, including the dissertation supervisor, must be graduate faculty members of the Department of Politics and International Relations. One must be from outside the department, but inside FIU. Other members must be approved by the Graduate Program Director.

To complete program requirements, Ph.D. degree candidates must enroll for a minimum of 15 dissertation credits and maintain matriculation until the degree is awarded.

Combined Master of Arts in Asian Studies/Doctor of Philosophy in International Relations Degree Pathway

The combined M.A. in Asian Studies/Ph.D. in International Relations pathway allows qualified graduate students to

pursue both degrees simultaneously. To be accepted into this pathway, students must submit an application for the M.A. in Asian Studies/Ph.D. in International Relations by January 15 in the year in which they wish to begin their studies. Applicants must meet the admission eligibility requirements and follow the admission procedures for both programs.

Students must fulfill the requirements for both programs, and up to 33 credits may count for both degrees. To graduate, students must complete the requirements of the International Relations doctoral program, including the required 75 hours.

In addition to the requirements for the two degrees, during their first two years of enrollment in this combined degree pathway, students will enroll in the following course which fulfills the M.A. in Asian Studies methods requirement:

INR 5615 Research Design in International Relations

The following International Relations courses will also be taken by M.A. in Asian Studies students during the first two years of the program and will count toward the M.A.:

INR 5609 Contemporary Dynamics of International Relations

INR 6706 Political Economy of International Relations

Master of Arts in Asian Studies Requirements

(30 credits Thesis Option/30 credits Non-Thesis Option)

Core Courses: (24 credits)

- 9 credits of ASN 5000 or 6000 courses approved by the Director
- 9 credits pertaining to world affairs
- 6 credits in Asian area studies

MAAS offers two exit options, Thesis or Non-Thesis

Thesis Exit Option (6 credits):

ASN 6972 Master's Thesis

Non-Thesis Exit Option: (6 credits)

ASN 6912 Master's Essay (3 credits and one additional course (3 credits))

Master's Essay can be taken multiple times. Some students may be encouraged to develop their research projects by taking this course

Doctor of Philosophy in International Relations (75 credits)

Core Courses: (15 credits)

INR 5609	Contemporary Dynamics of International Relations	3
INR 5615	Research Design in International Relations	3
INR 6604	International Relations Theory I	3
INR 6608	Contemporary International Relations Theory	3

Second methods course from the following list (or another methods course approved by the Graduate Program Director):

INR 5616	Qualitative and Interpretive Methods in International Relations
POS 5706	Graduate Seminar in Political Science Research Methods

ECO 7424	Econometric Methods I
ANG 6480	Ethnohistorical Research Methods
ANG 6497	Qualitative Research Methods
GIS 5935	Topics in GIS
PAD 7705	Applied Quantitative Analysis I
PAD 7707	Applied Quantitative Analysis II
PAD 7703C	Empirical Methods in Public Administration

Gateway courses (9 credits)

There are four major field of study: (1) Global Political Economy and Development (2) Comparative Area Studies (3) Foreign Policy and Security Studies, and (4) Global Governance, International Law and International Ethics. Student must take one gateway course for three of these fields. Gateway courses for each field are:

(1) INR 6706	Political Economy of International Relations
(2) INR 5017	Approaches to Area Studies
(3) INR 6338	Strategic Studies
(4) INR 5409	International Law I
	or
INR 5507	International Organizations

Major and Minor Fields: (15 credits)

9 credits in major field of study

6 credits in minor field of study

Electives: (15 credits)

Additional elective coursework

Comprehensive Exams (6 credits)

Once students have achieved 60 credits, they must sit for written examination on the core sequences and both of their fields

Dissertation: (15 credits)

INR 7980 Ph.D. Dissertation

M.A. in African and African Diaspora Studies/Ph.D. in International Relations Combined Degree Pathway

The dual African and African Diaspora Studies M.A./International Relations Ph.D. pathway allows qualified graduate students to pursue both degrees at the same time.

Admission Requirements

To be accepted into this pathway, students must submit an application for the M.A. in African and African Diaspora Studies/Ph.D. in International Relations by January 15 in the year in which they wish to begin their studies.

To be considered for admission, students must meet the following requirements:

1. Minimum cumulative grade point average of 3.2 in undergraduate work.
2. Minimum cumulative grade point average of 3.5 in any prior graduate work.
3. Official Graduate Record Exam (GRE) scores.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the IBT TOEFL (equivalent to 575 on the paper-based

version of the Test of English as a Foreign Language) is required.

Applicants must follow the admission procedures for both programs (see the appropriate sections in this graduate catalog). Only applications to begin studies in the fall semester will be considered. This designation will appear in the menu of programs in the graduate application, and students must indicate their intention to apply for this combined degree pathway.

Each applicant must complete an online graduate application form and arrange to send transcripts of all prior college (undergraduate and graduate) work and official reports of the Graduate Records Exam (GRE) and TOEFL (if applicable) to FIU's Office of Graduate Admissions.

Each applicant should also submit a separate statement of purpose, along with copies of the above material. The letter of application should include a statement expressing the applicant's academic and professional objectives. Applicants must include writing samples and other relevant professional work that may support their applications. Applicants must request three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability. The letters of recommendation should be sent directly to the Director of the African and African Diaspora Studies Graduate Program. AADS will photocopy the recommendation letters once they are all in and send them to the International Relations Graduate Program Director.

The application file must be complete before the African and African Diaspora Studies/International Relations Graduate Program Committees will consider the applicant for admission. We encourage applicants to send their application material sooner.

Required Credits

Students must fulfill the requirements for both programs. The 30 credits for the M.A. in AADS earned by students will count toward the 75 credits required for the Ph.D. in INR.

Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests. The AADS Graduate Program Director will ask a university faculty member fluent in the language of interest to the student, to evaluate the student's fluency by asking her/him to summarize or synthesize the content of a text of between 10 to 20 pages, published in that language, in no more than one page. That exercise will have to take place at the university during a limited period of time. The text will be given to the student at the beginning of the exercise. The chosen text will have some connection to the student's research interest. Once a student has demonstrated proficiency for the M.A. in African and African Diaspora Studies, that proficiency will be recognized by the International Relations Ph.D. program. Therefore, proficiency in a foreign language will not be part of the candidacy exam. Credit hours earned in meeting the language requirement will not count towards the 30 credit hours required for the M.A. degree.

Students should apply for graduation with the M.A. in African and African Diaspora Studies as soon as they have completed all requirements for the degree –

including the exit requirements, as specified for the M.A. in African and African Diaspora Studies. Ordinarily, students will complete these requirements and earn their M.A. before advancing to candidacy for the Ph.D. in International Relations. The research paper/proposal option is the only option available for students enrolled in this dual M.A./Ph.D. pathway.

Masters of Arts in African and African Diaspora Studies Requirements

This 30-credit, one year, three-semester program occurring over the Fall, Spring and Summer includes 9 credits of core AADS courses, which includes 3 credits for the directed research paper exit option, 6 credits of core International Relations courses, and 15 credits of electives. There is also a Foreign Language Requirement.

M.A. in AADS Core Courses: (9 credits)

AFA 5005	African and African Diaspora Studies Theory (3 credits)
AFA 5855	Research Methods in African and African Diaspora Studies (3 credits)
AFA 6920	African and African Diaspora Studies Graduate Colloquium (3 credits — 1 credit over three semesters)

Combined M.A. in AADS/PhD in International Relations Core Courses: (6 credits)

INR 5609	Contemporary Dynamics of International Relations (3 credits)
INR 6706	Political Economy of International Relations (3 credits)

M.A. in AADS Elective (15 credits)

15 credits of elective courses with an AADS focus may be from outside the International Relations Department and within the Green School and/or the College of Arts & Sciences. Students wishing to take courses outside of the Green School and the college of Arts & Sciences must seek prior approval.

M.A. in AADS Research Proposal or Paper Option

To graduate from the M.A. in AADS, students enrolled in this combined M.A./PhD pathway must elect to complete either a research proposal or research paper for their exit option. Those who elect to write a research proposal must take AFA 6911 Research Paper/Proposal Writing in African and African Diaspora Studies.

Doctor of Philosophy in International Relations (75 credits)

The following courses in addition to all 30 M.A. credits:

INR 5615	Research Design in International Relations	3
INR 6604	International Relations Theory I	3
INR 6608	Contemporary International Relations Theory	3

Second methods course from the following list (or another methods course approved by the Graduate Program Director):

INR 5616	Qualitative and Interpretive Methods in International Relations
POS 5706	Graduate Seminar in Political Science Research Methods
ECO 7424	Econometric Methods I
ANG 6480	Ethnohistorical Research Methods

ANG 6497	Qualitative Research Methods
GIS 5935	Topics in GIS
PAD 7705	Applied Quantitative Analysis I
PAD 7707	Applied Quantitative Analysis II
PAD 7703C	Empirical Methods in Public Administration

Gateway courses (6 credits)

Two out of INR 5017 Approaches to Area Studies, INR 6338 Strategic Studies, and either INR 5409 International Law I or INR 5507 International Organizations.

Major and Minor Fields: (9 credits)

Major field of study	6
Minor field of study	3

Comprehensive Examinations (6 credits)

Once students have achieved 60 credits of course work, they must sit for written examinations on the core sequence of their fields as per the Ph.D. in INR section of the catalog.

Dissertation: (15 credits)

See the university catalog for relevant sections of the Ph.D. Program in International Relations for details.

Combined M.A. in Latin American and Caribbean Studies (MALACS)/Ph.D. in International Relations Degree Pathway

The Combined Latin American and Caribbean Studies M.A./International Relations Ph.D. pathway allows qualified graduate students to pursue graduate degrees in both areas simultaneously rather than sequentially. Students must fulfill the requirements for both programs, and up to 36 credits completed as part of the M.A. in MALACS will be counted toward the 75 credit Ph.D. in International Relations.

To be considered for admission, students must meet the following requirements:

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;
3. Verbal and Quantitative portions of the Graduate Record Exam (GRE) scores;
4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the internet-based TOEFL (equivalent to 575 on the paper-based version) or 6.5 overall on the IELTS is required.

Although admissions decisions typically are made in the spring, decisions for students who have not yet received their bachelor's degree will be conditional, pending confirmation of the B.A. Meeting the minimum requirements does not guarantee admission into the

program. All applications are subject to review by the members of the Department of Politics and International Relations and the MALACS admissions committee.

Admission Procedures

To be accepted into this pathway, students must submit an application to the Ph.D. in International Relations with a sub-plan for a M.A. in LACS. This designation will appear in the menu of programs in the graduate application. The application must be submitted by January 15 in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the on-line application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable.
5. A statement of research interests, including reasons for seeking the M.A./Ph.D., future career goals, and a summary of scholarly preparation for this pathway;
6. Three letters of reference from academic sources or others able to judge academic abilities and potential; and
7. A curriculum vitae.

Masters of Arts in Latin America and Caribbean Studies Degree Requirements (36 credits)

During their first two years of enrollment in the Combined Degree Pathway, students must complete 36 credits for an MA in Latin America and Caribbean Studies with depth or focus courses in International Relations.

MALACS Core Courses (9 credits)

During their first two years of enrollment in this combined degree pathway, students take three core courses as follows:

LAS 6003	Survey of Latin America and the Caribbean (first year, fall semester)	3
LAS 6934	Research Seminar (first year, spring semester)	3
INR 5615	Research Design in International Relations	3

MALACS Focus Courses (12 -15 credits)

Students will take a minimum of 12-15 credits within the Department of Politics and International Relations with a Latin American and/or Caribbean focus.

MALACS Elective Courses (6-9 credits)

Student may take courses from other areas.

MALACS Exit Options for Combined Degree Pathway (6 credits)

Students may choose one of three exit options:

LAS 6970	Thesis	6
----------	--------	---

See the MALACS program description for more information. The thesis is publicly defended and approved by a committee of three graduate faculty members.

LAS 6905	Directed Research in Latin American and Caribbean Studies	3
----------	---	---

Preparation of two directed research papers. Both papers require an oral presentation and approval by a committee of three graduate faculty members.

LAS 6942 Internship in Latin American and Caribbean Studies 6

Supervised internship leading to a major research paper in Latin American and Caribbean Studies. The research paper requires an oral presentation and approval by a committee of three graduate faculty members.

Each student is required to demonstrate proficiency in either Spanish or Portuguese, or in another language such as French or Haitian Creole when justified by research interests. Proficiency demonstrated by scoring an advanced level on the ACTFL exam for Spanish, Portuguese, or French administered by FIU's Department of Modern Languages. Other tests of proficiency may be accepted upon approval of the graduate advisor.

Students should apply for graduation for the MALACS M.A. as soon as they have completed all requirements for the degree – including the exit requirements. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in International Relations.

Doctor of Philosophy in International Relations Degree Requirements

Students will begin study towards the Ph.D. in International Relations immediately following their satisfactory completion of MALACS requirements. A minimum of 39 credits beyond the 36 credits required for the MALACS degree will be necessary to satisfy the requirements of the Ph.D. Program in International Relations.

Program Requirements

12 Core Course credits:

INR 6604	International Relations Theory I	3
INR 6608	Contemporary International Relations Theory	3
INR 5609	Contemporary Dynamics of International Relations	3

Second methods course from the following list (or another methods course approved by the Graduate Program Director):

INR 5616	Qualitative and Interpretive Methods in International Relations
POS 5706	Graduate Seminar in Political Science Research Methods
ECO 7424	Econometric Methods I
ANG 6480	Ethnohistorical Research Methods
ANG 6497	Qualitative Research Methods
GIS 5935	Topics in GIS
PAD 7705	Applied Quantitative Analysis I
PAD 7707	Applied Quantitative Analysis II
PAD 7703C	Empirical Methods in Public Administration

Gateway courses (9 credits)

There are four major field of study: (1) Global Political Economy and Development (2) Comparative Area Studies (3) Foreign Policy and Security Studies, and (4) Global Governance, International Law and International Ethics. Student must take one gateway course for three of these fields. Gateway courses for each field are:

(1) INR 6706 Political Economy of International Relations

(2) INR 5017 Approaches to Area Studies
(3) INR 6338 Strategic Studies
(4) INR 5409 International Law I or
INR 5507 International Organizations

9 Major Field credits in either:

1. Global Political Economy and Development
2. Comparative Area Studies
3. Foreign Policy and Security Studies
4. Global Governance, International Law and International Ethics.

With advisor approval, these 9 credits may include some or all of the coursework (except INR 5615) taken in satisfaction of the requirements for the MALACS degree.

6 Minor Field credits in either:

1. a second field from the above major field list, or
2. a field offered within another Ph.D. program at FIU (with approval of the Graduate Program Director), or
3. a petition field (with approval of the Graduate Program Director).

With advisor approval, these 6 credits may include some or all of the coursework (except INR 5615) taken in satisfaction of the requirements for the MALACS degree.

Elective Credits:

Elective credits necessary to bring total credits earned beyond the MALACS degree to a minimum of 24.

Dissertation:

15 credits of dissertation research.

Comprehensive Exams (6 credits)

After completing 60 hours of course work (or in the semester in which they expect to do so), students may take their written comprehensive examinations on the core sequence and in both of their fields. Students must sit for these examinations within 6 months of completing the minimum 60 hours of coursework unless granted an extension by the International Relations Graduate Program Director.

Dissertation

Within 3 months of passing the comprehensive examinations, students should publicly present a dissertation proposal that is acceptable to a committee of at least four qualified scholars. Three members of the committee, including the dissertation supervisor, must be graduate faculty members of the Department of Politics and International Relations. One must be from outside the department, but inside FIU. Other members must be approved by the International Relations Graduate Program Director. To complete program requirements, Ph.D. degree candidates must enroll for a minimum of 15 dissertation credits and maintain enrollment for 3 credits every semester until the degree is awarded.

Combined M.A. in Religious Studies/Ph.D. in International Relations Degree Pathway

The combined M.A. in Religious Studies/Ph.D. in International Relations pathway allows qualified graduate students to pursue both degrees simultaneously. Students must fulfill the requirements for both programs, and up to 36 credits completed as part of the M.A. in Religious

Studies will be counted toward the 75 credit Ph.D. in International Relations.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;
3. Verbal and Quantitative portions of the Graduate Record Exam (GRE);
4. Minimum 156 GRE verbal score or a minimum 3.5 on a 4.0 scale (or equivalent) for the last two years of undergraduate work.
5. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the internet-based TOEFL (equivalent to 575 on the paper-based version) or 6.5 overall on the IELTS is required.

Although admissions decisions typically are made in the spring, decisions for students who have not yet received their bachelor's degree will be conditional, pending confirmation of the B.A. Meeting the minimum requirements does not guarantee admission into the program. All applications are subject to review by the members of the Department of Politics and International Relations and the Religious Studies Department.

Admission Procedures

To be accepted into this pathway, students must submit an application to the Ph.D. in International Relations with a sub-plan for a M.A. in Religious Studies. This designation will appear in the menu of programs in the graduate application. The application must be submitted by January 15 in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the on-line application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable;
5. A statement of research interests, including reasons for seeking the M.A./Ph.D., future career goals, and a summary of scholarly preparation for this pathway;
6. Three letters of reference from academic sources or others able to judge academic abilities and potential; and
7. A curriculum vitae.

Masters of Arts in Religious Studies Degree Requirements (36 credits)

REL 6935	Seminar in Sacred Sources	3
RLG 6013	Modern Analysis of Religion	3
RLG 5038	Advanced Fieldwork in Religious	

	Studies	3
	12 credit hours of electives approved by the Graduate Program Director	12
RLG 6971	Thesis or 6 additional hours of elective credits	6
INR 5615	Research Design in International Relations	3
INR 5609	Contemporary Dynamics of International Relations	3
INR 6706	Political Economy of International Relations	3

Students who choose the thesis exit option must include at least one Politics and International Relations faculty member, though the majority must be from Religious Studies.

Doctor of Philosophy in International Relations Degree Requirements

Students will begin study towards the Ph.D. in International Relations immediately following their satisfactory completion of M.A. in Religious Studies requirements. A minimum of 39 credits beyond the M.A. degree in Religious Studies will be necessary to satisfy the requirements of the Ph.D. Program in International Relations.

Degree Requirements beyond the M.A. in Religious Studies are the following:

9 Core Course credits:

GEO 6473	Space, Place and Identity	3
INR 6604	International Relations Theory I	3
INR 6608	Contemporary International Relations Theory	3

Second methods course from the following list (or another methods course approved by the Graduate Program Director):

INR 5616	Qualitative and Interpretive Methods in International Relations
POS 5706	Graduate Seminar in Political Science Research Methods
ECO 7424	Econometric methods I
ANG 6480	Ethnohistorical Research Methods
ANG 6497	Qualitative Research Methods
GIS 5935	Topics in GIS
PAD 7705	Applied Quantitative Analysis I
PAD 7707	Applied Quantitative Analysis II
PAD 7703C	Empirical Methods in Public Administration

Gateway courses (6 credits)

Two out of INR 5017 Approaches to Area Studies, INR 6338 Strategic Studies, and either INR 5409 International Law I or INR 5507 International Organizations.

9 Major Field credits in either:

1. Global Political Economy and Development
2. Comparative Area Studies
3. Foreign Policy and Security Studies, or
4. Global Governance, International Law and International Ethics.

With advisor approval, these may include 3 credits taken in satisfaction of the requirements for the M.A. in Religious Studies.

6 Minor Field credits in either:

1. a second field from the above major field list, or
2. a field offered within another Ph.D. program at FIU (with approval of the Graduate Program Director), or
3. a petition field (with approval of the Graduate Program Director).

With advisor approval, these may include 3 credits taken in satisfaction of the requirements for the M.A. in Religious Studies.

Elective Credits:

Elective credits necessary to bring total credits earned beyond the M.A. in Religious Studies to a minimum of 24.

Dissertation Credits:

15 credits of dissertation research.

Comprehensive Exams (6 credits)

After completing 60 hours of course work (or in the semester in which they expect to do so), students may take their written comprehensive examinations on the core sequence and in both of their fields. Students must sit for these examinations within 6 months of completing the minimum 60 hours of coursework unless granted an extension by the International Relations Graduate Program Director. Before advancing to candidacy, students must also demonstrate an ability to use a foreign language other than English for scholarly purposes.

Dissertation

Within 3 months of passing the comprehensive examinations, students should publicly present a dissertation proposal that is acceptable to a committee of at least four qualified scholars. Three members of the committee, including the dissertation supervisor, must be graduate faculty members of the Department of Politics and International Relations. One must be from outside the department, but inside FIU. Other members must be approved by the International Relations Graduate Program Director. To complete program requirements, Ph.D. degree candidates must enroll for a minimum of 15 dissertation credits and maintain enrollment for 3 credits every semester until the degree is awarded.

Joint Certificate in Integrated Marketing Communications: Latin American Certification

The Joint Graduate Certificate in Integrated Marketing Communications: Latin American Certification is an 18-hour program with two required courses each from ICAP and International Relations, plus several electives from both areas. The objective of this graduate level certificate program is to prepare working communications professionals with the skills necessary to develop and implement communications programs in Latin America. It is also appropriate to provide international relations professionals who have gained communications responsibilities with a broad overview of the basic concepts and tasks of mass communications.

Required Courses – ICAP Program

PUR 6806	Global Account Planning (Prerequisite: Permission of the instructor)	3
PUR 6607	Global Strategic Communication Management (Prerequisite: PUR 6806)	3

Elective Courses – ICAP Program

MMC 6402	Theories of Mass Communication (Prerequisite: Permission of the instructor)	3
PUR 6935	Advanced Communications Seminar (Prerequisite: Permission of the instructor)	3

Required Courses – International Relations

INR 6107	U.S. Foreign Policy: Processes and Institutions	3
INR 6609	Dynamics of International Relations in the 20th Century	3

Elective Courses – International Relations

INR 4031	The Media and International Relations	3
INR 6089	International Relations and Human Rights	3
INR 6209	Comparative Foreign Policy of Latin America	3
INR 6604	International Relations Theory I	3
INR 6606	Political Psychology of International Relations	3

Current selections from the Latin American and Caribbean Center as offered.

Master of Arts in Political Science

The Master of Arts degree in Political Science at Florida International University is designed to provide students with a comprehensive knowledge of the discipline. The department's graduate program in Political Science builds on faculty strengths and distinguishes itself by stressing a comparative approach to the study of politics. The program is designed to equip its graduates with a solid foundation in the basic theories and methods of Political Science, in conjunction with an in-depth education in selected traditional subfields.

Admission Procedures

Applicants seeking admission for the Fall semester must submit all application materials by March 15th (February 15 for international students). Incomplete applications cannot be considered by the Graduate Admissions Committee. Admission decisions will be announced no later than April 15th. Applicants must apply online using the website of the FIU University Graduate School. The following items should be submitted to the FIU University Graduate School:

1. Official transcripts of all university-level work, including undergraduate or professional school courses.
2. An official report of Graduate Record Examination (GRE) scores.
3. For International graduate student applicants whose native language is not English, a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS).

It is advised to send copies of the above items to the Political Science Graduate Admissions Committee at the following address: Department of Politics and International Relations, Modesto A. Maidique Campus, 11200 S.W. 8th Street, SIPA 436, Miami, Florida 33199. Telephone: (305) 348-1077; Fax: (305) 348-3765. In

addition, applicants must submit the following directly to the Political Science Graduate Admissions Committee:

1. Two letters of reference from former instructors who are able to evaluate the applicant's potential for graduate study. Applicants should ensure that each letter is signed by the author along the sealed flap of the envelope.
2. A personal statement of intent, including a discussion of education and career objectives and the specific relationship of a Master's degree in Political Science to the achievement of those objectives. The personal statement should not exceed three typewritten, double-spaced pages.

Admission Requirements

Admission to the Master's program is competitive. Meeting the minimum requirements does not guarantee acceptance.

The minimum requirements for admission to the M.A. program include:

1. A baccalaureate degree from an accredited college or university.
2. A minimum 3.2 grade point average (on a 4.0 scale) during the last two years of a student's undergraduate program (students with graduate or professional course work will be evaluated individually).
3. Verbal and Quantitative sections of the GRE.
4. Graduates of non-U.S. institutions must be academically eligible for further study in the country where the degree was earned.
5. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Degree Requirements

The course of study for the M.A. in Political Science requires 30 credit hours. A final research project and research seminar are required components:

Required Courses: (9 credits)

POS 5716	Foundations of Political Science	3
POS 5706	Research Methodology	3
POS 6976	Research Seminar	3

Core Courses: (9 credits)

Each student is required to take three of the following four core courses:

POS 5045	Seminar in American Politics	3
CPO 5091	Seminar in Comparative Politics	3
INR 5007	Seminar in International Politics	3
POT 5007	Seminar in Political Theory	3

Electives: (12 credits)

Students are required to take four elective courses. A student may take a maximum of six credit hours in a cognate field or in an approved cognate program.

Combined B.A./M.A. in Political Science Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the

graduate degree program to which they are applying. Students need only apply once to the combined degree pathway, but the application must be submitted to Graduate Admissions before the student starts the last 30 credits of the bachelor's degree program. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Students must have completed 75 credit hours.
2. Students must have been admitted to the Steven J. Green School of International and Public Affairs.
3. A 3.5 GPA overall in college work, and a 3.75 GPA in Political Science courses taken at FIU, are required.
4. Three letters of recommendation, at least two of which must be from FIU Politics and International Relations faculty, are required.
5. Students must meet admissions requirements for the M.A. in Political Science.
6. Finally, a favorable decision into the pathway by the Political Science graduate committee is required.
7. Students will be awarded the B.A. degree upon completion of the B.A. requirements, prior to completing the requirements for the M.A. degree.

Common Prerequisites and Departmental Requirements (3 courses/9 credits)

The Common Prerequisites are required introductory courses for the undergraduate major and should be among the first Political Science courses taken. The department requires one additional 2000-level course beyond the Common Prerequisites. In order to conform with both state and departmental requirements, students must take the following:

POS 2041	American Government (or its equivalent)
and two of the following three courses:	
CPO 2002	Introduction to Comparative Politics (or its equivalent)
INR 2001	Introduction to International Relations (or its equivalent)
POT 2002	Introduction to Political Theory (or its equivalent)

Some transfer students will have already taken these or equivalent courses at other institutions, and should not repeat them at FIU. Students with questions about course equivalencies should contact the Political Science undergraduate advisor.

Breadth Requirement (8 courses/24 credits)

The Breadth Requirement is intended to expose majors to each of the four major sub-fields of Political Science. Two three-hour courses must be taken in each of the following subfields, for a total of 24 semester hours. These courses may not include independent studies, internships or POS 4784 Analytic Writing in Political Science.

American Politics - Any two 3000-level or above courses with a POS prefix, except POS 4784. PUP 4004 may be

used as one of the required two American Politics courses. (6 credits)

Comparative Politics - Any two 3000-level or above courses with a CPO prefix. (6 credits)

International Politics - Any two 3000-level or above courses with an INR prefix. (6 credits)

Political Theory - Any two 3000-level or above courses with a POT prefix. (6 credits)

II. Political Science Electives Requirement (6 credits)

Two upper division courses with POS, CPO, INR, or POT prefixes, for a total of 6 credits. Independent studies, internships and/or POS 4784 can be applied toward the Political Science Electives Requirement.

Political Science Graduate/Undergraduate Electives Requirement (3 courses/9 credits)

Students in the combined bachelor's/master's degree pathway will take three 3-credit graduate Political Science courses at the 5000-level to satisfy this requirement. Students must be advised by the departmental Graduate Program Director before enrolling in these 5000-level courses.

The 9 hours of graduate credit taken to satisfy the undergraduate Political Science major requirement will also count as 9 credit hours toward the 30 hours of graduate courses required for the M.A. degree.

M.A. Courses

A total of 30 hours of graduate-level courses is required for the successful completion of the M.A. degree. Nine of these 30 hours will have been completed at the undergraduate level by students in the combined bachelor's/master's degree pathway.

Required Core Graduate Courses

POS 5706	Research Methodology
POS 5716	Foundations of Political Science
POS 6976	Research Seminar (to be taken during last term)

Secondary Core Graduate Courses – Choose three of the following:

CPO 5091	Seminar in Comparative Politics
INR 5007	Seminar in International Politics
POS 5045	Seminar in American Politics
POT 5007	Seminar in Political Theory

Electives – Four courses (12 credit hours)

Any 5000- or 6000-level Political Science courses. Two courses (6 credit hours) may be taken from outside the Department, with prior approval from the Graduate Program Director.

Research Project

A final research project must be completed in POS 6976 under the supervision of a Politics and International Relations faculty member. M.A. candidates are required to formally present the results of their research to faculty and peers at the end of the semester. The M.A. project will be evaluated by a three-member faculty panel.

Doctor of Philosophy in Political Science

The Doctor of Philosophy degree in Political Science at Florida International University is designed to provide students with a comprehensive knowledge of the discipline. The department's graduate program in Political

Science builds on faculty strengths and distinguishes itself by stressing a comparative approach to the study of politics. The program is designed to equip its graduates with a solid foundation in the basic theories and methods of Political Science, in conjunction with an in-depth education in selected traditional subfields.

Admission Requirements

Admission to the Ph.D. program is competitive. Meeting minimum requirements does not guarantee acceptance.

The minimum requirements for admission to the Ph.D. program include:

1. A baccalaureate degree from an accredited college or university;
2. An undergraduate GPA of 3.2 and/or a graduate GPA of 3.25;
3. Verbal and Quantitative sections of the GRE.
4. Graduates of non-U.S. institutions must be academically eligible for further study in the country where the degree was earned.
5. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Degree Requirements

The Ph.D. program requires a minimum of 76 credit hours beyond the Bachelor's degree.

The Doctor of Philosophy in Political Science is conferred based on satisfactory completion of required coursework, a demonstrated mastery of a broad field of knowledge, and successful completion and defense of the dissertation. The degree provides graduates with a solid foundation in the basic theories and methodologies of Political Science in conjunction with specialization in traditional subfields. Students will, in consultation with their faculty advisors, determine the contents of their course work. Students will specialize in two examination fields drawn from the four principal subfields of Political Science: American Politics, Comparative Politics, International Politics, and Political Theory. Students are also required to take additional coursework in a third, non-examined field of specialization. The third specialization field is satisfied by a minimum of 9 credit hours in a regionally or topically defined area.

Students' proposed programs must be approved by their advisors and the Political Science Graduate Studies Committee.

Ph.D. students who have satisfied all other requirements for the M.A. apart from the exit requirement (i.e. all coursework and the foreign language competency) are eligible to receive an M.A. degree. Passing the doctoral comprehensive examinations serves as equivalent to the M.A. comprehensive examination. Ph.D. students who have satisfied these requirements should consult with the Graduate Program Director about the necessary paperwork and procedures to receive the M.A. degree in the course of their Ph.D. studies.

Required Courses: (13 credits)

POS 5702	Teaching Political Science	1
POS 5706	Research Methodology	3
POS 5716	Foundations of Political Science	3
POS 6918	Seminar in Political Science	

	Methodology	3
One course* among the following:		
POS 6725	Formal Political Modeling	3
PAD 7707	Applied Quantitative Analysis II	
SYA 6317	Social Research Quant. Methods II	
ANG 6497	Qualitative Research Methods	
POS 5745	Quantitative Content Analysis	

*The third method course requirement can be waived for students with Political Theory as their major field.

Common Core Courses: (12 credits)

CPO 5091	Seminar in Comparative Politics	3
INR 5007	Seminar in International Politics	3
POS 5045	Seminar in American Politics	3
POT 5007	Seminar in Political Theory	3

Two Examination Fields (minimum 12 credits)

Third Specialization (minimum 9 credits)

Approved Electives (minimum 6 credits)

Language Requirement

The Political Science Ph.D. program requires competency in one foreign language or demonstrated competency in computer and methodological techniques when considered more appropriate. Language competency must be demonstrated prior to taking the comprehensive examinations.

Comprehensive Examination

After satisfactory completion of course work, students will take comprehensive exams in their two chosen subfields before being admitted to candidacy and defending a dissertation proposal. The comprehensive exams will cover core courses and broad knowledge of the two examination fields. They will be written and oral.

Comprehensive examinations are given twice yearly, in mid-September and in mid-January.

Dissertation: (minimum 24 credits)

After passing the comprehensive exams, students are admitted to candidacy and enroll for dissertation credits under the supervision of their dissertation advisors. Candidates will prepare and defend a dissertation proposal. Upon completion of the work, a public defense of the dissertation will be scheduled in accordance with university policy.

Financial Aid

The program has a limited number of graduate assistantships available for qualified students.

Assistantships are awarded on a competitive basis only to full-time students. Students applying for full-time status are considered automatically for these awards.

Assistantships are renewable each year for up to four years based on satisfactory progress and performance.

Combined M.A. in Latin American and Caribbean Studies (MALACS)/Ph.D. in Political Science Degree Pathway

The Combined M.A. in Latin American and Caribbean Studies/ Ph.D. in Political Science pathway allows qualified graduate students to pursue graduate degrees in both areas simultaneously. Students must fulfill the requirements for both programs, and up to 36 credits

completed as part of the M.A. in MALACS will be counted toward the 76 credit Ph.D. in Political Science.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.25 on any previous graduate work;
3. Verbal and Quantitative portions of the Graduate Record Exam (GRE);
4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet-based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Although admissions decisions typically are made in the spring, decisions for students who have not yet received their bachelor's degree will be conditional, pending confirmation of the B.A. Meeting the minimum requirements does not guarantee admission into the program. All applications are subject to review by both the members of the Department of Politics and International Relations and the MALACS Graduate Committee.

Admission Procedure

To be accepted into this pathway, students must submit an application to the Ph.D. in Political Science with a sub-plan for a M.A. in LACS. This designation will appear in the menu of programs in the graduate application. The application must be submitted by February 1 in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable.
5. A statement of research interests, including reasons for seeking the M.A./Ph.D., future career goals, and a summary of scholarly preparation for this pathway;
6. Three letters of reference from academic sources or others able to judge academic abilities and potential.
7. A curriculum vitae; and
8. A writing sample (such as a seminar paper) which demonstrates the ability to conduct research and write effectively.

Masters of Arts in Latin America and Caribbean Studies Degree Requirements (36 credits)

During their first two years of enrollment in the Combined Degree Program, students must complete 36 credits for an M.A. in Latin America and Caribbean Studies with depth or focus courses in Political Science.

MALACS Core Courses (9 credits)

During their first two years of enrollment in this combined degree pathway, students take three core courses as follows:

LAS 6003	Survey of Latin America and the Caribbean (first year, fall semester)	3
LAS 6934	Research Seminar (first year, spring semester)	3
POS 5706	Research Methods	3

MALACS Focus Courses (12 -15 credits)

Students will take a minimum of 12-15 credits within the Department of Politics and International Relations with a Latin American and/or Caribbean focus.

MALACS Elective Courses (6-9 credit)

Student can take courses from other areas

MALACS Exit Options for Combined Degree Pathway (6 credits)

Students may choose one of three exit options:

LAS 6970	Thesis	6
----------	--------	---

See the MALACS program description for more information. The thesis is publicly defended and approved by a committee of three graduate faculty members.

LAS 6905	Directed Research in Latin American and Caribbean Studies	6
----------	---	---

Preparation of two directed research papers. Both papers require an oral presentation and approval by a committee of three graduate faculty members.

LAS 6942	Internship in Latin American and Caribbean Studies	6
----------	--	---

Supervised internship leading to a major research paper in Latin American and Caribbean Studies. The research paper requires an oral presentation and approval by a committee of three graduate faculty members.

Each student is required to demonstrate proficiency in either Spanish or Portuguese, or in another language such as French or Haitian Creole when justified by research interests. Proficiency demonstrated by scoring an advanced level on the ACTFL exam for Spanish, Portuguese, or French administered by FIU's Department of Modern Languages. Other tests of proficiency may be accepted upon approval of the graduate advisor.

Students should apply for graduation for the M.A. in LACS as soon as they have completed all requirements for the degree – including the exit requirements. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in Political Science.

Doctor of Philosophy in Political Science Degree Requirements

Students will begin study towards the Ph.D. in Political Science immediately following their satisfactory completion of MALACS requirements. A minimum of 40 credits beyond the 36 credits required for the MALACS degree will be necessary to satisfy the requirements of the Ph.D. Program in Political Science.

The total of 76 credits for a Ph.D. in Political Science include the following:

Program Requirements:**10 Required Course Credits:**

POS 5702	Teaching Political Science	1
POS 5716	Foundations of Political Science	3

POS 6918	Seminar in Political Science Research Methods	3
One course among the following:		
POS 6725	Formal Political Modeling	3
PAD 7707	Applied Quantitative Analysis II	
SYA 6317	Social Research Quant. Methods II	
ANG 6497	Qualitative Research Methods	
POS 5745	Quantitative Content Analysis	

12 Common Core Course credits:

CPO 5091	Seminar in Comparative Politics	3
INR 5007	Seminar in International Politics	3
POS 5045	Seminar in American Politics	3
POT 5007	Seminar in Political Theory	3

12 Credits in Two Examination Fields from the following:

1. American Politics,
2. Comparative Politics,
3. International Politics, and
4. Political Theory.

With advisor approval, these 12 credits may include some or all of the coursework (except POS 5706) taken in satisfaction of the requirements for the MALACS degree.

9 Credits in Third Area Specialization:

With advisor approval, these 9 credits may include some or all of the coursework (except POS 5706) taken in satisfaction of the requirements for the MALACS degree.

Elective Credits:

Elective credits necessary to bring total credits earned beyond the MALACS degree to a minimum of 40.

Dissertation:

24 Dissertation course credits.

Comprehensive Examination

After satisfactory completion of course work, students will take comprehensive exams in their two chosen subfields before being admitted to candidacy and defending a dissertation proposal. The comprehensive exams will cover core courses and broad knowledge of the two examination fields. They will be written and oral. Comprehensive examinations are given twice yearly, in mid-September and mid-January.

Dissertation (Minimum 24 credits)

After being admitted to candidacy, students enroll for dissertation credits under the supervision of their dissertation advisors. Candidates will prepare and defend a dissertation proposal. Upon completion of the dissertation itself, a public defense of the dissertation will be scheduled in accordance with University policy.

Course Descriptions**Definition of Prefixes**

CPO-Comparative Politics; INR-International Relations; POS-Political Science; POT-Political Theory; PUP-Public Policy.

CPO 5036 Politics of Development (3). This course examines divergent explanations for development and underdevelopment. Of central importance are the concepts and theories that emphasize the political dimensions of development processes of development, and actors in the development process.

CPO 5091 Seminar in Comparative Politics (3). A foundation in the development of the field of comparative politics and in the major schools of thought that have molded perspectives on comparative political analysis.

CPO 5325 Politics of the Caribbean (3). Examines the structural and institutional aspects of the politics of the
Prerequisite: Graduate standing.

CPO 5745 Political Economy of Disaster Risk Reduction (3). Examines the political economy of attempts, or lack thereof, to reduce the exposures and vulnerabilities to natural and/or technological hazards of communities across world regions. Prerequisite: Graduate standing.

CPO 5934 Topics in Comparative Politics (3). A rigorous examination of a topic in comparative politics. Subject matter varies according to instructor. Topic will be announced in advance.

CPO 5936 Seminar in Comparative Political Parties (3). Students read and discuss major works on parties by conservative, liberal, and Marxist authors.

CPO 6062 Seminar in Comparative Judicial Politics (3). An examination of judicial structures, legal traditions, judicial behavior and judicial power cross culturally.

CPO 6066 Comparative Constitutional Law (3). An examination of constitutionalism in both established and developing democracies. Particular emphasis on the role of courts, judicial review and judicial remedies using doctrinal, contextual and theoretical analysis.

CPO 6084 War, Peace and the Military (3). Examines theories of the relationship between societies, governments and their militaries. Emphasis on relationship between militaries and a nation's experience with peace and participation in war. Prerequisite: Graduate standing.

CPO 6092 Seminar in Comparative Political Culture (3). Examines culturalist theories in comparative politics, including postmaterialism, social capital, and civic culture. Students test hypothesis using survey data from prominent cross-national datasets. Prerequisites: POS 5706 or equivalent.

CPO 6105 Politics of the European Union (3). Examines the development and operation of the world's most successful experiment in regional cooperation, the European Union (EU), including political economy, institutions, and policy-making. Prerequisite: Graduate Standing.

CPO 6106 Seminar on European Politics (3). Advanced discussion of major themes in European politics. Topics include corporatism, post-materialism, democratization, and European integration.

CPO 6206 Seminar in African Politics (3). Studies the crisis of African development. Topics include colonialism, internal cleavages, and impact of the global economy.

CPO 6307 Seminar on South American Politics (3). Explores the realities and myths of the democratization experience of South America.

CPO 6316 Seminar in Latin American Democratic Institutions (3). Reviews the role of institutional design in promoting accountability in Latin American democracy, including presidentialism, party systems, legislatures,

electoral laws, and federalism. Prerequisite: Graduate standing.

CPO 6350 Seminar in Brazilian Politics (3). The political development of Brazil, focusing on alternation between authoritarianism and democracy. Emphasis on clientelism, patrimonialism, civil-military relations, and political institutions.

CPO 6376 Seminar in Central American Politics (3). Central America's socio-political evolution. Attention is given to both the national and international politics of the region.

CPO 6407 Seminar in Politics of the Middle East (3). In depth analysis of comparative theoretical perspectives of political processes in the Middle East.

CPO 6546 Chinese Politics (3). The course examines key issues and challenges in contemporary Chinese politics, including corruption, economic inequality, state-society relations, and China's integration into the world economy.

CPO 6771 Politics of Disaster (3). Examines disaster and other extreme events as political system shocks. Analyzes disasters as crises of values, legitimacy, and agenda control. Evaluates policy alternatives in prevention, mitigation, and response. Prerequisite: Graduate Standing.

INR 5007 Seminar in International Politics (3). An advanced graduate course designed to give students a specialized knowledge of the classics in international politics. The course traces the development of international politics from Thucydides to the present.

INR 5012 Global Issues and Human Rights (3). Identification, articulation and clarification of global issues that affect Human Rights and the global strategies used to challenge and overcome obstacles. Prerequisite: Graduate standing.

INR 5017 Approaches to Area Studies (3). Provides students the necessary tools to approach global issues from the comparative perspective of how they play out in different regions of the world.

INR 5036 Politics of Globalization (3). Intensive examination of state and global institutions that have shaped process of economic globalization. Topics include impact on sovereignty, human rights, labor and agenda-setting of large and small nation-states.

INR 5062 War, Peace and Conflict Resolution in INR (3). Explores the genesis of interstate conflict, the evolution of crisis, the outbreak of war and peace. Analyzes conflict resolution and post-conflict reconstruction processes in international relations.

INR 5066 Global and Human Security (3). Global and human security is an emerging paradigm intensified by the process of globalization and epitomized by transnational issues affecting the individual, state, region, and global system.

INR 5072 The Media and International Relations (3). Explores impact of visual and print media on practice and theory of international relations. Encourages students to question how representation of international relations issues are produced by everyday media culture. Prerequisite: Graduate standing.

INR 5086 Islam in International Relations (3). Analysis of the role of Islam in shaping the dynamics of contemporary international relations. Emphasis on the ideological, cultural, and political role of Islamic movements and states, and their relations with the West.

INR 5087 Ethnicity and the Politics of Development (3). This course examines the conceptual and substantive dimensions of ethnicity in the context of world politics and political development. The course will highlight ethnicity and ethnic groups as critical factors in North-South politics.

INR 5088 Feminism and International Relations (3). Familiarizes students with major theoretical traditions of feminist thinking and surveys feminist literature in the sub-fields of security studies, political economy, and global governance. Prerequisites: Graduate standing or permission of the instructor.

INR 5105 American Foreign Policy (3). Compares different perspectives in foreign policy analysis. Provides a comprehensive understanding of major issues in U.S. policy.

INR 5255 Seminar in African Development (3). Examines political, economic and social development in Sub-Saharan Africa in an international context. Introduces students to sources for research in African international development. Prerequisite: Graduate standing.

INR 5256 Conflict and Peacemaking in Africa (3). An examination of the root and proximate causes of national and transnational conflict in Africa, and the range of approaches used to attempt to restore peace to such conflicts. Prerequisites: Graduate standing or permission of the instructor.

INR 5275 International Relations of the Middle East (3). Focuses on IR of the contemporary Middle East, the foreign policy of major regional states, regional conflicts, and the US and other great powers' involvement, and dynamics of social and religious movements and revolutions. Prerequisites: Graduate standing or permission of the instructor.

INR 5276 Graduate Seminar The International Relations of Iran and the Persian Gulf (3). Study of the contemporary international relations of Iran and the Persian Gulf since the Islamic Revolution in 1979, relations with the Middle East, Eurasia, the Western World and the United States.

INR 5315 Foreign Policy Analysis (3). Comparative examination of theories of foreign policy making, emphasizing the international, domestic, and organizational contexts in which national policies are formulated and enacted. Prerequisites: Graduate standing or permission of the instructor.

INR 5352 Environment and Security (3). Examines the relationship between environmental issues and international security. Surveys such topics as resource scarcity, environmental degradation, and deforestation and their implications for national and regional security. Considers such topics as international environmental law, and international environmental regimes.

INR 5409 International Law I (3). Role of international law in the relations of states; nature, development, theory,

sources of law; international personality; jurisdiction, including territory and nationality; dispute settlement.

INR 5507 International Organizations I (3). Study of international organizations and their role in international relations. Emphasis on their legal status, rule-making capacities and role in dispute settlement and maintenance of peace.

INR 5543 International Political Economy of East Asia (3). Introduction to the international political economy of East Asia with a focus on different paradigms that explain the rise and fall of the economy of a number of states in East Asia.

INR 5544 The New Asian Century (3). Critically examines Asian regional identity, Asia's role in the modern world economy, national and regional institution building, new security challenges, and the legacy of the past. Prerequisites: Graduate standing or permission of the instructor.

INR 5607 International Relations and Development (3). An analysis and conceptualization of the process of development as it takes place in the international context. Special attention given to the role of international organizations in promoting development and the manner in which differences in developmental levels conditions international relations.

INR 5609 Contemporary Dynamics of International Relations (3). Surveys the 20th century's large events and important tendencies decade by decade, as registered by intellectual and policy elites at the time.

INR 5615 Research Design in International Relations (3). Introduces graduate students to the principles of formulating and defending a compelling research design, gathering and analyzing evidence, and producing scholarship.

INR 5616 Qualitative and Interpretive Methods in International Relations (3). Advanced methods course that exposes students to the development and application of qualitative and interpretive methods in international relations and political science.

INR 5906 Independent Study (VAR). Directed independent research. Requires prior approval by instructor. Prerequisite: Graduate standing.

INR 5934 Topics in International Politics (3). A rigorous examination of a topic in international politics. Subject matter varies according to instructor. Topic to be announced in advance.

INR 5935 Topics in International Relations (3). Varies according to the instructor. Prerequisites: Graduate standing or permission of the instructor.

INR 5943 Internship in International Relations (1-6). Opportunity to gain practical experience in analysis and conduct of international relations by working at a consulate, governmental agency, non-governmental organization, or non-profit organization. Prerequisites: Graduate standing and permission of the instructor.

INR 5945 Graduate Pedagogy (1). The development of teaching skills required by graduate assistants, including classroom skills, designing examinations, etc. Prerequisite: Graduate Assistants.

INR 6008 Colloquium in International Studies (3). A systemic and International Relations theory supplemented with a consideration of legal, institutional and developmental issues. Prerequisite for MIB students: INR 6603 (World Politics).

INR 6010 Global Governance (3). Surveys contemporary writings on international regimes, global civil society, the relationship of global economics and politics, changing models of world order, and intergovernmental organizations. Prerequisite: Graduate standing.

INR 6019 Seminar in Comparative Area Studies (3). Examines contemporary issues in area studies, with focused attention on the interplay between domestic and international forces and the conditioning effects of global structures. Topics vary by instructor. Prerequisite: Graduate standing.

INR 6056 Environment and Development (3). Examines the relationship of development and the environment from a social theory perspective. Emphasizes Third World problems such as deforestation and soil erosion.

INR 6067 Human Security (3). Explores the debates and dilemmas of human security with an emphasis on the processes and policies actors develop in response to global threats.

INR 6092 Seminar on Non-State Actors (3). Explores the nature of non-state actors in international politics, including cities, interest groups, multi-nationals, and individuals.

INR 6089 International Relations and Human Rights (3). Examination of national and international factors affecting respect for human rights. Special emphasis on international human rights groups, foreign policy, and politics of policy implementation.

INR 6107 U.S. Foreign Policy: Processes and Institutions (3). Examines the structures and processes that shape U.S. policy toward other nations. Topics include: systemic constraints, state/society relations, interest groups, bureaucracy, and leadership.

INR 6209 Comparative Foreign Policy of Latin America (3). Theories, history, and political-economic dynamics of Latin American foreign policies and international relations. (S)

INR 6245 The Military, Latin America and International Security (3). Explores the supra-nationalization of the military institution in Latin America and how this has caused a transformation of its functional missions in the international and regional security and peace. Prerequisite: Graduate standing.

INR 6266 Seminar in Russian Foreign Policy (3). Close analysis of the theoretical foundation and policy evolution of the Soviet/Russian role in international affairs of the 20th century.

INR 6338 Seminar in Strategic Studies (3). Close analysis of key traditional and non-traditional concepts of the field of Strategic Studies, i.e. the genesis of power, war and peace, security and their relevance to and impact on International Relations.

INR 6406 International Law II (3). The course, which is the second of a two course graduate sequence, focuses on special topics, e.g., treaties, state responsibility, force

and jurisdiction. Prerequisites: INR 5409 or permission of the instructor.

INR 6604 International Relations Theory I (3). An analysis of the traditional approaches to international relations theory, beginning with the classic works in the field. Emphasizes the philosophical and normative underpinnings of realism, idealism, liberalism and radicalism.

INR 6605 Contemporary International System (3). Study of synthetic review of theories of development and approaches to the study of development as a process of social, political, and economic change. Prerequisites: CPO 5036 and ESC 5025.

INR 6606 Political Psychology of International Relations (3). Study of psychological explanations for political behavior in international relations. Topics include: cognitive, motivational, and bureaucratic decision theories; leadership; and public opinion.

INR 6608 Contemporary International Relations Theory (3). Surveys contemporary theories of International Relations, including neorealism, theories of cooperation among states, approaches to international political economy, and critical theories.

INR 6705 Seminar in International Political Economy (3). Theories of economic cooperation and conflict among nation-states. Liberal, economic nationalists and Marxist theoretical paradigms are explored in an examination of the internationalization of capital, trade and investment and the role of the State in the global economy.

INR 6706 Political Economy of International Relations (3). Examines contemporary theoretical and policy debates in the area of international political economy. Reviews key concepts, theories and approaches used in the study of IPE. Prerequisites: INR 6604 or permission of the instructor.

INR 6936 Seminar in Inter-American Politics (3). Focus on U.S.-Latin American relations. Attempts to link the theoretical literature on U.S. foreign policy with empirical developments.

INR 6967 Preparation: Comprehensive Examination (1-9). Students prepare for comprehensive examination under the direction of a faculty member.

INR 6975 Thesis (1-6). Registration for students working on their thesis. Prerequisite: All other course work for the Master's in International Studies.

INR 7910 Pre-Dissertation Research (1-9). Students develop a dissertation proposal under the direction of a faculty member.

INR 7980 Ph.D. Dissertation (1-12). Supervised research on an original research project to be submitted in partial fulfillment of doctoral degree requirements. Prerequisites: Permission of the Major Professor and Doctoral Candidacy.

ISS 6132 Intelligence Community Successes and Failure: Policy Implications (3). Reviews how historical United States Intelligence Community successes and failures shaped U.S. foreign and domestic policy and examines current organizational structures.

ISS 6384 Reputation and Crisis Management (3). Establish an understanding of mass communication

principles and how they can be utilized to implement strategies and tactics related to reputation management and crisis communications.

POS 5045 Seminar in American Politics (3). The advanced study of U.S. politics. Students read and discuss major works and theories concerning American politics and government.

POS 5146 Seminar in Urban Politics (3). Examination of processes by which urban areas are governed. Emphasis is on conflicts over structures, power, policy and the politics of ethnicity and class.

POS 5158 Topics in Politics (3). Subject matter varies according to instructor.

POS 5208 Seminar in Political Behavior (3). Analyzes the literature in political behavior. Special emphasis is on voting, socialization, attitudes, partisanship, campaigning, the media, and political participation in the developed democracies. Prerequisite: POS 5706.

POS 5447 Seminar in U.S. Political Parties (3). Students read and discuss the major works and theories on U.S. political parties.

POS 5638 Topics in Public Law (3). A rigorous examination of a topic in public law. Subject matter varies according to instructor. Topic will be announced in advance.

POS 5702 Teaching Political Science (1). Introduces graduate students to the pedagogical and practical aspects of teaching political science. Topics will include selecting books, writing a syllabus, lecturing, running discussion groups, and testing and grading. Covers professional ethics, and student rights and responsibilities.

POS 5706 Research Methodology (3). This course is an introduction to the principal concepts and techniques of quantitative and non-quantitative methodology in the social sciences. It is designed to familiarize the student with the language and format of quantitative and non-quantitative applications in order to permit students to deal effectively with the literature of their field.

POS 5716 Foundations of Political Science (3). Prepares students for the advanced study of politics. Areas of study include history of political science as a discipline, comparison of classical and modern sciences of politics and realpolitik, epistemological foundations.

POS 5728 Comparative Racial Politics (3). This course explores the ways race is socially constructed globally. It will discuss how race and racism are framed by states and different racial norms and patterns of mobilization in each country.

POS 5745 Quantitative Content Analysis (3). Provides a graduate-level introduction to content analysis. Students will build the skills necessary to conduct a systematic quantitative analysis of message characteristics.

POS 5785 Writing Professionally in Political Science (3). Focus on inductive research process. Refines technical skills for effective written communication. Best practice examples for preparing briefing papers, articles, books, and grant applications.

POS 5909 Independent Study (1-6). Designed for advanced students who wish to pursue specialized topics

in political science. Arrangements must be made with instructor during prior semester.

POS 5932 Topics in Urban Politics (VAR). An extensive examination of the processes by which social conflicts in American urban areas are represented and regulated. Emphasis is on the ways in which urban problems are identified and proposed solutions formulated, legitimized, and administered by urban policy-making processes. Includes a discussion of urban political culture.

POS 6286 Judicial Research (3). Examination of the methodological approaches used to study courts in a political context. Special attention to seminal works that focus on individual, small group and institutional behavior, and extra-legal influences.

POS 6415 Seminar on the U.S. Presidency (3). Examines the most important works on the U.S. Presidency and the evolution of the office since 1789.

POS 6427 Seminar on the U.S. Congress (3). Discussion of the scholarly literature on Congress. Students analyze trends in congressional power and possible reforms.

POS 6612 Seminar on U.S. Supreme Court (3). Seminar covers literature, both current and classic, on U.S. Supreme Court. Topics covered typically include the major paradigms, appointment process, access, agenda setting, decision making and impact.

POS 6639 Seminar in Public Law (VAR). Graduate seminar on special topic in public law. Topic to be announced in advance.

POS 6725 Formal Political Modeling (3). Introduces students to the foundations of public choice. Particular topics may include decision theory, social choice, spatial voting models, and game theory, among others.

POS 6918 Seminar in Political Science Research Methods (3). Examines the methods used to design, execute, and critique empirical research in political science, addressing a variety of methodological issues. Prerequisites: POS 5706 and POS 5716.

POS 6937 Seminar in Politics (VAR). Subject matter varies according to instructor.

POS 6971 Thesis (1-6). Requires students to enroll for thesis or dissertation research for at least one credit hour every semester in which they are engaged in such research. Prerequisite: All other course work for the Master's.

POS 6976 Research Seminar (3). Required course for all M.A. candidates during completion of their major research project. Also required for second-year Ph.D. students. The course guides student research while in progress. Prerequisite: POS 5706.

POS 7910 Pre-Dissertation Research (1-9). During the term in which students take Ph.D. comprehensive exams, this course enables them to concentrate on completion of their dissertation prospectus. Prerequisite: Completion of all other Ph.D. coursework.

POS 7980 Ph.D. Dissertation (1-12). Supervised research and writing of an original research project. Prerequisites: Permission of Major Professor and Doctoral Candidacy.

POT 5007 Seminar in Political Theory (3). An examination of writings from a diverse list of some of the major political theorists in the Western tradition from antiquity to the present.

POT 5307 Feminist Political Theory (3). Examines feminist political theory in the second half of the twentieth century with a focus on the work of U.S. scholars.

POT 5615 Political Theory and Modernity in a Transnational Perspective (3). Explores and critically evaluates late modern (20th and 21st century) social and political theories central to the thought and practice of international politics.

POT 5635 Islamic Political Thought (3). Intensive study of major thinkers and primary texts of Islamic civilization from the development of Islamic political thought in Late Antiquity to the contemporary era.

POT 5934 Topics in Political Theory (3). An intensive examination of selected topics dealing with political theory. Subjects will vary, depending upon the desires of students and faculty. Allows the student to choose topics of particular interest to him or her.

POT 6015 Seminar in Classical Political Thought (3). Examination of key elements of classical political thought from the Hellenic to early Christian periods.

POT 6056 Seminar in Modern Political Thought (3). Examines important works and theories of political thought from the renaissance to the early 19th century.

POT 6067 Seminar in Contemporary Political Thought (3). Examines political theories of the 19th and 20th centuries. Special emphasis on the tension between modern and post-modern theory.

POT 6208 Seminar in American Political Thought (3). Students read and discuss classic and contemporary interpretations of U.S. political thought, and apply those ideas to modern U.S. politics.

POT 6315 Democratic Theory (3). Examines various theories of democracy in modern and contemporary political thought, including liberal, civic republican, deliberative, and cosmopolitan conceptions of democracy. Prerequisite: Graduate standing.

POT 6416 Seminar in Marxism (3). Analysis of the evolution of Marxism from Marx to the present. Particular attention is given to contemporary Marxist debates.

POT 6603 Political Theory of the Modern State (3). Analyzes evolution and theories of the modern state from the high middle ages to the present. Pre-state formations, classical states, and social science theories of the state are also discussed.

PUP 5934 Topics in Public Policy (1-6). A rigorous examination of a topic in public policy. Subject matter varies according to instructor. Topic will be announced in advance.

PUP 6105 Urban Challenges and Policy Innovations (3). Addresses the changing role and function of U.S. metropolitan areas in an age of growing global competition and focuses on key contemporary policy problems facing cities and suburbs.

PUP 6007 Seminar in Public Policy (1-6). Graduate seminar on special topic dealing with public policy

analysis. Subject matter varies according to instructor. Topic to be announced in advance.

Travis Whetsell, Assistant Professor

Master of Public Administration

The Master of Public Administration prepares students for careers in public service and non-profit organizations. It also prepares students for private sector positions having significant contact with public organizations. The degree provides pre-service and mid-career students with an appropriate mix of technical and generalist skills needed for management and analytic positions in local, state, and federal government, as well as non-profit organizations. Students are given broad exposure to the field in the core and subsequently develop expertise within their areas of specialization. The degree also provides students with the necessary analytic and substantive background for successful pursuit of doctoral studies within the discipline. Graduates are well-prepared for positions as city manager, finance director, budget analyst, personnel director, special project coordinator and program analyst.

The MPA Program is accredited by the Network of Schools of Public Policy, Affairs, and Administration (NASPAA). NASPAA accreditation ensures that the MPA program has been reviewed and meets the national and global standards for graduate studies in the field

Admission Requirements

Applicants to the Master of Public Administration (MPA) program must:

1. Have earned a bachelor's degree from an accredited institution;
2. Have a GPA of 3.0 or better in all upper division (undergraduate) course work;
3. Take the Graduate Record Examination (GRE) if their GPA in the upper division 60 credits is less than 3.25, and submit the score by the application deadline; LSAT and GMAT Scores are also accepted as substitutes for the GRE Score. Students with more than three years of substantial administrative experience (as determined by MPA Director), and students who have more than 18 credits of graduate-level coursework with the grades of "B" or better, may be exempted from the GRE requirement by the MPA Director;
4. Submit three academic or professional letters of recommendation from faculty members at their

undergraduate institution or from employment supervisors;

5. Submit a current resume; and
6. Demonstrate graduate level writing competency and interest in public service values by submitting a letter-of-intent not to exceed three double-spaced pages explaining how earning the Master of Public Administration is consistent with long-term career goals. Students may also use this letter to discuss their passion for public issues or policies and to communicate to the admission committee if they feel that their admission file does not properly reflect their potential to succeed in graduate school.

All above documents must be submitted by the stated application deadline.

Degree Requirements

The Master of Public Administration (MPA) program requires 42 credit hours.

Students with less than three years of public service (public or non-profit sectors) experience in positions with some management or project management responsibilities may be required to complete a public service internship. PAD 6946, Public Administration Internship, may be used as an elective toward satisfaction of the 42 credit requirement for program completion.

Core Courses (27 credits)

(Core Courses may be restricted to Degree-seeking or Certificate graduate students in the Department of Public Policy and Administration. All other students must seek approval of Department)

The MPA core consists of the following nine courses:

PAD 6053	Political, Social and Economic Context of Public Administration	3
PAD 6056*	The Practice of Public Management	3
PAD 6227	Public Finance and the Budgetary Process	3
PAD 6417	Human Resource Policy and Management	3
PAD 6306	Policy Analysis	3
PAD 6701	Quantitative Methods in Public Administration	3
PAD 6434	Leadership and Decision-making	3
PAD 6726	Applied Research Methods for Accountability in Public and Non-Profit Organizations (Prerequisite: PAD 6701)	3
PAD 6718	Smart Governance	3

Electives (15 credits)

Five (5) elective courses required.

Grading, Sequencing, and Substitution Policy

PAD 6053, PAD 6701, and PAD 6726, must be taken during the first 18 credit hours of course work. PAD 6701 is a prerequisite for PAD 6726.

*PAD 6056, The Practice of Public Management is a capstone experience for the program and must be taken after the successful completion of MPA core or last semester of course work. The program reserves the right to withhold the awarding of credit for course work taken out of sequence and without appropriate prerequisites.

Any core course with the exception of PAD 6056 may be waived through petition to the MPA Program Director

or designee. The petitioner must demonstrate the equivalence of the previous coursework, and prove that their performance met or exceeded core requirements.

Students must maintain a 3.0 cumulative graduate GPA to graduate. A grade of 'C' or better is required for every core course. Note: A 'C-' is not acceptable.

Executive Master of Public Administration Track

The Executive MPA track (EMPA) builds upon the extensive knowledge base that experienced public service professionals possess. The EMPA curriculum provides a hands-on and in-depth exposure to the leadership, managerial and analytic skills critical to advanced public sector professionals. The core courses are the same courses required by the traditional MPA program. The difference between this track and the traditional MPA is the pedagogical approach, delivery format, scheduling, facility and the executive-level cohort.

Admission Requirements

Applicants to the Executive MPA track must:

1. Have earned a bachelor's degree from an accredited institution;
2. Have a GPA of 3.0 or better in all upper division (undergraduate) course work;
3. Take the Graduate Record Examination (GRE) if their GPA in the upper division 60 credits is less than 3.0, and submit the score by the application deadline; LSAT and GMAT Scores are also accepted as substitutes for the GRE Score. Students with more than 18 credits of graduate-level coursework with the grades of "B" or better, may be exempted from the GRE requirement by the MPA Director;
4. Submit three academic or professional letters of recommendation from faculty members at their undergraduate institution or from employment supervisors;
5. Submit a current resume showing five to ten years of cumulative experience with public or non-profit organizations and at least three years of middle-to-upper level managerial experience; and
6. Demonstrate graduate level writing competency and interest in public service values by submitting a letter-of-intent not to exceed three double-spaced pages explaining how earning the Master of Public Administration is consistent with long-term career goals. Students may also use this letter to discuss their passion for public issues or policies and to communicate to the admission committee if they feel that their admission file does not properly reflect their potential to succeed in graduate school.

Degree Requirements

The EMPA track requires 36 credit hours. The credit hour requirement is differentiated from that (42 credit hours) of the general MPA program because of Executive students' extensive and/or managerial work experience in public sector.

Core Courses: (27 credits)

(Core Courses may be restricted to Degree-seeking or Certificate-seeking graduate students in the Department of Public Policy and Administration. All other students must seek approval of Department)

The MPA core consists of the following nine courses:

PAD 6053	Political, Social and Economic Context of Public Administration	3
PAD 6056*	The Practice of Public Management	3
PAD 6227	Public Finance and the Budgetary Process	3
PAD 6417	Human Resource Policy and Management	3
PAD 6306	Policy Analysis	3
PAD 6701	Quantitative Methods in Public Administration	3
PAD 6434	Leadership and Decision-making	3
PAD 6726	Applied Research Methods for Accountability in Public and Non-Profit Organizations (Prerequisite: PAD 6701)	3
PAD 6718	Smart Governance	3

Electives (9 credits)

Three (3) elective courses required.

Grading, Sequencing, and Substitution Policy

The EMPA track is a cohort program. Classes are dynamically scheduled to meet on one weekday evening and on Saturdays. The program is designed with several weekends off in each semester. The EMPA is accelerated in that students can finish the entire program in 12 months.

Any core course with the exception of PAD 6056 may be waived through petition to the MPA Program Director or designee. The petitioner must demonstrate the equivalence of the previous coursework, and prove that their performance met or exceeded core requirements.

Students must maintain a 3.0 cumulative graduate GPA to graduate. A grade of 'C' or better is required for every core course. Note: A 'C-' is not acceptable.

Master of Science in Data Science - Public Policy Analytics Track

Students admitted to the Public Policy Analytics track in M.S. in Data Science will take five core/required graduate courses from the information science unit and another five elective graduate courses from the Department of Public Policy and Administration.

The five elective courses required for the track are:

1. PAD 6053: Political, Social and Economic Context of Public Administration
(prerequisite to all other Public Policy Analytics track courses; can be taken in concurrent with other PPA track courses)
2. PAD 6306: Policy Analysis
3. PAD 5256: Economic Thinking in Policy Making
4. PUP 6006: Public Policy Analysis and Evaluation
5. PAD 6434: Leadership and Decision-making

Accelerated 4+1 MPA Degree Pathway

The MPA program allows qualified students to earn both their Bachelor's and MPA degrees in a shorter amount of time than typically required for earning degrees sequentially. A student admitted to the Accelerated 4+1 MPA Degree Pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon

conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Students accepted into the Accelerated 4+1 MPA Degree Pathway may take up to four MPA courses, 12 graduate credits, which will be double counted for their Bachelor's and MPA degrees.

The Accelerated 4+1 MPA Degree Pathway is open to FIU undergrad students from all Bachelor's degree programs except the Bachelor of Public Policy and Service (BPPS). BPPS students should consult the catalog description on a Combined BPPS/MPA Degree Pathway.

Undergraduate students from BA in Psychology, BS in Criminal Justice, and BS in Crime Science should consult with their academic advisors on details of their program-specific Accelerated 4+1 MPA Degree Pathway programs. The program-specific pathways have the same admission and completion requirements, but offer streamlined admission, student service, advising, and program completion.

- Accelerated 4+1 BA in Psychology/MPA Degree Pathway
- Accelerated 4+1 BS in Criminal Justice (BSCJ) and BS in Crime Science (BSCS)/MPA Degree Pathway

Admissions Requirements for the Accelerated 4+1 MPA Degree Pathway:

1. The applicant must have an overall GPA of 3.25 or better.
2. Letter of recommendation from a faculty member at FIU or from a supervisor.
3. Current resume.
4. Letter-of-intent not to exceed three double-spaced pages explaining how earning the MPA is consistent with long-term career goals. Students may also use this letter to discuss their passion for public service or policies and to communicate to the admission committee if they feel that their admission file does not properly reflect their potential to succeed in graduate school.
5. Students can apply after having completed 75 credits in a bachelor's degree program.
6. Students must apply prior to the semester in which graduate credits will be counted towards their undergraduate degree program.

Students admitted into the Accelerated 4+1 MPA Degree Pathway should take up to four courses from the listed below toward satisfying both their Bachelor's and MPA degree requirements:

- PAD 6053: Political, Social and Economic Context of Public Administration must be taken within the first two semesters after a student is accepted into the Accelerated 4+1 MPA Degree Pathway.
- Students may select at least two of the following courses to be double counted (students may select three courses):
 - PAD 6227: Public Finance and the Budgetary Process
 - PAD 6306: Policy Analysis
 - PAD 6417: Human Resource Policy and Management
 - PAD 6434: Leadership and Decision-making
 - PAD 6701: Quantitative Methods in Public Administration

- PAD 6726: Applied Research Methods for Accountability in Public and Non-Profit Organizations (Prerequisite: PAD 6701)
- PAD 6718: Smart Governance

- If only two courses are selected from the above list, students may select one additional graduate-level course to be double counted. The course must have a course number of 5000 or higher and have a prefix of PAD, PUP, URP or URS.

Students in the Accelerated 4+1 MPA Degree Pathway should consult their advisor regarding substitutions of the courses mentioned above for undergraduate courses in their program.

Students must pass graduate courses with a grade of B or higher to count them toward their MPA degree. Students accepted into the Accelerated 4+1 MPA Degree Pathway must fulfill all the MPA requirements to receive their MPA degree.

Accelerated (4+1 degree) BA in Psychology/MPA Degree Pathway

The MPA program allows qualified students to earn both their Bachelor's and MPA degrees in a shorter amount of time than typically required for earning degrees sequentially. A student admitted to the Accelerated (4+1 degree) BA in Psychology/MPA Degree Pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students accepted into the Accelerated (4+1 degree) BA in Psychology/MPA Degree Pathway may take up to four MPA courses, 12 graduate credits, which will be double counted for their Bachelor's and MPA degrees.

Admissions Requirements for the Accelerated Degree Pathway:

1. The applicant must have an overall GPA of 3.25 or better.
2. Letter of recommendation from a faculty member at FIU or from a supervisor.
3. Current resume.
4. Letter-of-intent not to exceed three double-spaced pages explaining how earning the MPA is consistent with long-term career goals. Students may also use this letter to discuss their passion for public service or policies and to communicate to the admission committee if they feel that their admission file does not properly reflect their potential to succeed in graduate school.
5. Students can apply after having completed 75 credits in a bachelor's degree program.
6. Students must apply prior to the semester in which graduate credits will be counted towards their undergraduate degree program.

Students admitted into the Accelerated (4+1 degree) BA in Psychology/MPA Degree Pathway should take up to four courses from the listed below toward satisfying both their Bachelor's and MPA degree requirements:

- PAD 6053: Political, Social and Economic Context of Public Administration must be taken

within the first two semesters after a student is accepted into the Accelerated Degree Pathway.

- Students may select two of the following courses to be double counted:
 - PAD 6227: Public Finance and the Budgetary Process
 - PAD 6306: Policy Analysis
 - PAD 6417: Human Resource Policy and Management
 - PAD 6434: Leadership and Decision-making
 - PAD 6701: Quantitative Methods in Public Administration
 - PAD 6726: Applied Research Methods for Accountability in Public and Non-Profit Organizations (Prerequisite: PAD 6701)
 - PAD 6718: Smart Governance
- Students may select one additional graduate-level course to be double counted. The course must have a course number of 5000 or higher and have a prefix of PAD, PUP, URP or URS.

Students in the Accelerated (4+1 degree) BA in Psychology/MPA Degree Pathway should consult their advisor regarding substitutions of the courses mentioned above for undergraduate courses in their program.

Students must pass graduate courses with a grade of B or higher to count them toward their MPA degree. Students accepted into the Accelerated Degree Pathway must fulfill all the MPA requirements to receive their MPA degree.

Combined BPPS/MPA Degree Pathway

The combined BPPS/MPA degree pathway offered by the Department of Public Policy and Administration allows qualified students to earn both degrees in a shorter amount of time than typically required for earning degrees sequentially. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Admissions Requirements to the Combined Degree Pathway

1. Overall GPA of 3.2 or better.
2. Letter of recommendation from a faculty member at FIU or from a supervisor.
3. Current resume.
4. Letter-of-intent not to exceed three double-spaced pages explaining how earning the Master's of Public Administration is consistent with long-term career goals. Students may also use this letter to discuss their passion for public issues or policies and to communicate to the admission committee if they feel that their admission file does not properly reflect their potential to succeed in graduate school.
5. Application to the combined pathway after having completed at least 75 credit hours in the BPPS program.
6. Completion of at least 12 credits of Public Administration coursework and at least 24 credits of coursework at FIU.

7. Completion of all lower division requirements, including the University Core Curriculum, prior to acceptance to the combined pathway.
8. Attainment of a grade of 'B' or better on all graduate courses completed while in the BPPS program.

Courses Counted Toward both Degree Programs

Students accepted into the combined degree pathway may count no more than 4 of the master's courses (maximum of 12 credits) listed below toward satisfying **both** the BPPS and MPA degree requirements:

PAD 6053	Political, Social and Economic Context of Public Administration	3
<i>must be among the four double-counted courses</i>		
Students may select 3 of the following courses to be doubled-counted:		
PAD 6227	Public Finance and the Budgetary Process	3
PAD 6306	Policy Analysis	3
PAD 6417	Human Resource Policy and Management	3
PAD 6434	Leadership and Decision-Making	3
PAD 6701	Quantitative Methods in Public Administration (Prerequisite: PAD 4704)	3
PAD 6726	Applied Research Methods for Accountability in Public and Non-Profit Organizations (Prerequisite: PAD 6701)	3

With advisor approval, these graduate courses can be substituted for the equivalent required or any elective bachelor's in public administration courses listed in the program catalog, with the exception of PAD 4934 Integrative Seminar in Public Policy and Service, which must be taken by all BPPS majors. Students must maintain a cumulative GPA of 3.0 or better in all upper level and graduate level coursework completed as prior to admission to the MPA program.

Students accepted into the accelerate BPPS/MPA degree pathway must complete all of the requirements of the MPA to receive their graduate degree.

Accelerated (4+1) BSCJ/BSCS MPA Degree Pathway

The MPA program allows qualified students to earn both their Bachelor's and MPA degrees in a shorter amount of time than typically required for earning degrees sequentially. A student admitted to the Accelerated (4+1) degree BSCJ/BSCS MPA Degree Pathway will be considered to have undergraduate status until the student applies for graduation from bachelor's degree program.

Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships.

Students accepted into the Accelerated (4+1 degree) BSCJ/BSCS MPA Degree Pathway may take up to four MPA courses, 12 graduate credits, which will be double counted for their Bachelor's and MPA degrees.

Students accepted into the Accelerated (4+1 degree) BSCJ/BSCS MPA Degree Pathway may take up to four

MPA courses, 12 graduate credits, which will be double counted for their Bachelor's and MPA degrees.

Admissions Requirements for the Accelerated Degree Pathway:

- The applicant must have an overall GPA of 3.25 or better
- Letter of recommendation from a faculty member at FIU or from a supervisor
- Current resume
- Letter-of-intent not to exceed three double-spaced pages explaining how earning the MPA is consistent with long-term career goals. Students may also use this letter to discuss their passion for public service or policies and to communicate to the admission committee if they feel that their admission file does not properly reflect their potential to succeed in graduate school.
- Students can apply after having completed 75 credits in bachelor's degree program.
- Students must apply prior to the semester in which graduate credits will be counted towards their undergraduate degree program.

Students admitted into the Accelerated (4+1 degree) BSCJ/BSCS MPA Degree Pathway should take up to four courses from the listed below toward satisfying both their Bachelor's and MPA degree requirements:

- PAD 6053: Political, Social and Economic Context of Public Administration must be taken within the first two semester after a student is accepted into the Accelerated Degree Pathway.
- Students may select at least two of the following courses to be double counted (students may select three courses)
 - PAD 6227: Public Finance and the Budgetary Process
 - PAD 6306: Policy Analysis
 - PAD 6417: Human Resource Policy and Management
 - PAD 6434: Leadership and Decision-making
 - PAD 6701: Quantitative Methods in Public Administration
 - PAD 6726: Applied Research Methods for Accountability in Public and Non-Profit Organization (Prerequisite: PAD 6701)
 - PAD 6718: Smart Governance
- If only two courses are selected from the above list, students may select one additional graduate-level course to be double counted. The course must have a course number of 5000 or higher and have a prefix of PAD, PUP, URP, or URS.

Students in the Accelerated (4+1 degree) BSCJ/BSCS MPA Degree Pathway should consult their advisor regarding substitutions of the courses mentioned above for undergraduate courses in their program.

Students must pass graduate courses with a grade of B or higher to count them toward their MPA degree. Students accepted into the Accelerated Degree Pathway must fulfill all the MPA requirements to receive their MPA degree.

Juris Doctor/Master of Public Administration Joint Degree Pathway

The faculties of the College of Law and the Steven J. Green School of International and Public Affairs have approved a joint degree program culminating in both a Juris Doctor degree (J.D.), awarded by the College of Law, and a Master of Public Administration degree (MPA), awarded by the Steven J. Green School of International and Public Affairs. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Essential criteria relating to the joint degree program are as follows:

1. Candidates for the pathway must meet the entrance requirements for and be accepted by both programs. Both programs must be informed by the student at the time of application to the second program that the student intends to pursue the joint degree.
2. The joint degree pathway is not open to students who have already earned one degree.
3. For law students, enrollment in the MPA program is required no later than the completion of 63 credit hours in the J.D. program. For MPA students, enrollment in the J.D. program is required no later than the third semester after beginning the MPA program. A summer session is counted as half a semester.
4. A student must satisfy the curriculum requirements for each degree before either degree is awarded. The Department of Public Administration will allow 9 credit hours of College of Law courses, as approved by the MPA program Director, in consultation with the Dean of the Steven J. Green School of International and Public Affairs, to be credited toward both the MPA and J.D. degrees.
5. Reciprocally, law students may receive 9 hours of credit toward the satisfaction of the J.D. degree for courses taken in the MPA curriculum upon completion of the MPA degree with a grade point average of 3.0 or higher.
6. A student accepted by both degree programs may begin studies in either the College of Law or the Department of Public Administration, but full-time law students must take the first two semesters of law study consecutively and part-time law students must take the first three semesters of law study consecutively. Students electing to begin study in one school under the joint degree program may enter the second school thereafter without once again qualifying for admission so long as they have notified the second school before the end of the first week of the first semester in the second school and are in good academic standing when studies commence in the second school.
7. A student enrolled in the joint degree pathway will not receive either degree until the student has satisfied all of the requirements for both degrees, or until the student has satisfied the requirements of one of the degrees as if the student had not been a joint degree candidate.

Master of Science in Criminal Justice/Master of Public Administration Joint Degree Pathway

The Department of Criminology and Criminal Justice and the Department of Public Policy and Administration have a

joint degree pathway culminating in both a Master of Science in Criminal Justice (MSCJ) and a Master of Public Administration (MPA). The joint degree pathway prepares graduate students for overlapping careers in criminal justice and public management. It is intended to prepare students for positions in public, private, and nonprofit organizations that require both criminal justice and management knowledge. Under the joint degree pathway, a student can obtain both degrees in significantly less time than it would take to obtain both degrees if pursued consecutively. Important criteria relating to the joint degree pathway are as follows:

1. Candidates in the joint degree pathway must meet the entrance requirements established by each individual program. Candidates must indicate in the application their intention to pursue the joint degree option. Students deciding to pursue the joint degree option after having been admitted to one program will indicate this intention only on their second application.
2. Applicants for a joint degree pathway will not be accepted from candidates who have already completed either degree. MSCJ or MPA students must apply and be admitted by no later than the second to last semester in which they are expected to complete their original degree requirements.
3. Joint degree pathway candidates will not receive either degree until all requirements for both programs have been satisfied. Students deciding against completing a second degree must satisfy all first-degree program requirements as if the student had never been a joint degree candidate.
4. The joint degree pathway requires a total of 60 credit hours. Candidates must complete 14 core courses included in the MSCJ and MPA programs (42 credits) and 6 electives (18 credits). A minimum of 2 electives must be taken within the CCJ and 2 electives in PA.

Doctor of Philosophy in Public Affairs

The Doctor of Philosophy in Public Affairs (Ph.D.) is intended to prepare graduates for research and analytic positions in universities, public bureaucracies, and nonprofit organizations. The degree content provides a foundation for undertaking policy-oriented research with emphases on urban and comparative public management and related areas of public interest. Doctoral students will be expected to demonstrate the capacity for conducting this research through successful passing of coursework and comprehensive examinations, as well as the defense of a dissertation.

The Ph.D. program broadly encompasses public administration, management, policy and service.

Admission Requirements

Generally, applicants must have a Master's degree prior to program enrollment, though outstanding applicants may also be considered with only a baccalaureate degree. Admission is not restricted to students with prior course work in Public Administration. The program encourages applicants with diverse academic backgrounds, with preference given to those with grounding in the policy or administrative sciences.

In order to be admitted to the Ph.D. program, an applicant must submit the following materials:

1. Complete FIU Application for Doctoral Programs;

2. Transcripts (applicants must demonstrate excellence in prior academic work by an earned GPA of 3.5 or better in both the undergraduate degree and the graduate degree);
3. Official GRE or GMAT scores (applicant is expected to have 60 percentile scores in the verbal and quantitative sections);
4. A personal statement describing the applicant's background, career goals, and the reasons for pursuing a Ph.D. in Public Affairs. The statement should also indicate how research and career interests fit with those of current faculty;
5. A current resume;
6. Three references using the program's recommendation form;
7. At least one writing sample.

Foreign applicants must demonstrate proficiency in the English language by presenting a minimum score of a 100 on the TOEFL iBT (equivalent to 600 on the paper-based Test of English as a Foreign Language, TOEFL PBT. If applicants take the language proficiency assessment administered by the International English Language Testing System (IELTS), a minimum score of 7.0 is desirable. All students living within a 50-mile radius are strongly encouraged to interview with the Ph.D. Director during the admissions process. Telephone interviews may be arranged for students living outside a 50-mile radius.

The admission process is competitive and the program considers all of the evidence in the application file in making its decision. Meeting the minimum requirements does not guarantee admission and applicants failing to meet the minimum requirements may be admitted based on other evidence of potential, such as prior research or senior executive status.

Admitted students may transfer a maximum of 12 semester credits from other institutions towards Ph.D. degree requirements, subject to the approval of the Doctoral Committee. Admitted students must demonstrate knowledge of American political institutions, basic theories of public administration, social science research methods, and substantive areas of the student's research interest. Students with deficiencies in any of the above-mentioned areas may be assigned additional specific coursework.

Financial Aid

The objective of financial aid is to provide direct assistance to those students who require financial assistance to complete their doctoral programs, and to enhance the reputation of the program by attracting an outstanding cadre of students.

To receive financial aid from University and Program sources, doctoral students must be enrolled full-time (9 semester hours during the term in which they receive financial aid). Students having graduate assistantships cannot hold other employment.

The exact amount of financial assistance depends upon funding provided by the University and the legislature. The current level of Program assistance is approximately \$19,000 annually. Students on assistantships are eligible for tuition waivers. Assistantships do not cover additional student fees, such as health, parking, athletic fees, and per credit fees.

Program financial aid is awarded in one-year blocks, and is generally provided for up to three years of the student's doctoral study.

The University has a variety of other financial aid opportunities including graduate grants, scholarships, loans, work-study programs and targeted scholarships. Information on these and other opportunities are available through the University's financial aid offices. To apply for assistance, students should notify the Ph.D. Director of their intent at the time of application. For matriculation fee waivers and University assistance, students must file the University's Financial Aid Form (FAF) and the other University aid documents. Information on the university procedures is available in the University's Financial Aid office.

Degree Requirements

To obtain the degree, admitted students must complete at least 63 semester hours beyond the Master's degree or its equivalent, including 48 semester hours of approved course work and 15 hours of dissertation work after advancing to candidacy. In addition, there is a residency requirement of at least 18 semester hours in three consecutive semesters of study during the first year of enrollment in the Ph.D. Program and a minimum of six hours required in all subsequent semesters.

Successful completion of course work and passing scores on the comprehensive examination are required before students can advance to candidacy for the Ph.D. After advancing to candidacy, students must defend a dissertation proposal. Students are advised to consult the doctoral program handbook for any additional information regarding benchmarks for student progress in grade point average, course completion, comprehensive examinations and dissertation work.

Program of Study

The Doctor of Philosophy in Public Affairs is a 63 semester hour program beyond the Master's degree, with nine required courses (27 semester credit hours), five specialization elective courses (15 semester credit hours), a comprehensive examination (six semester hours), and dissertation (15 semester hours). Students without a Master's degree (i.e., those with a Bachelor's degree only) will need to take minimum of 75 semester credit hours in the doctoral program.

During the first semester of the program, students are required to select, with the assistance and approval of the Ph.D. Director, an Advisor who is a full-time faculty member in the program. By the end of the first year, students are required to develop a program of study with the assistance and approval of their Advisor and the Ph.D. Director. The Advisor may not necessarily be the same as the student's Dissertation Committee Chair at the later stage.

Principal Core Curriculum (21 credits)

PAD 7277	Public Administration and the American Political Economy	3
PAD 7155	Organizational Development and Change in Public and Nonprofit Organizations	3
PAD 7703C	Empirical Methods in Public Administration	3
PAD 7705	Applied Quantitative Analysis I	3
PAD 7707	Applied Quantitative Analysis II	3
PAD 7055	Scope and Theory of Public Administration	3

URS 7156	Research Practicum	3
----------	--------------------	---

Flexible Core Courses (6 credits)

Select two courses from the following:

PAD 7808	Economic Development and Urban Management	3
PAD 7865	Development Administration	3
PAF 7002	Foundations of Policy Analysis	3
URS 7644	Managing Public Financial Resources	3
URS 7380	Contemporary Management Issues and Problems	3

Specialization Courses (15 credits)

Students are required to take five courses in an area of specialization to be designed with the Advisor. The courses must be at the 5000, 6000, or 7000 level and may be taken within the University. These specialization electives may also be especially designed courses developed in conjunction with the student's Advisor and with approval of the Ph.D. Director. Specialization areas may include subfields within the discipline of Public Administration (e.g., human resource management; sub-national administration and policy) or may involve cognate disciplines (e.g., health services administration; criminal justice administration; environmental management). At least three hours must be URS 7926 (Supervised Readings).

In developing a specialization and program of studies, students may consult with Public Policy and Administration faculty (and faculty in their major's department, if appropriate). If the student's principal area of interest is in a cognate discipline outside of Public Administration or the major's department, the student and Ph.D. Director should consult with appropriate faculty in designing the study program.

Comprehensive Examination (6 credits)

Subsequent to completion of course work, students are required to pass a two-part comprehensive examination. The first component of the comprehensive examination is a written examination testing for knowledge of the Ph.D. core and related material. The second component is the submission of a research proposal that outlines the dissertation research problem, its significance, and the research method.

Students who fail the Comprehensive Examination on the first attempt must retake it at its next offering. Students who fail the examination twice are automatically dismissed in accord with general University policy.

Dissertation (15 credits)

In consultation with the Ph.D. Director and the Advisor, students should identify Dissertation Committee Chair during the first two years of the program. The student should also form the Dissertation Committee before the comprehensive examination. Upon successful completion of the comprehensive examination, students should defend their dissertation proposal. Students are expected to defend the proposal before the end of the first semester subsequent to passing the Comprehensive Examination.

Upon the public defense and approval of the proposal, the students will initiate formal work on the dissertation. During this time, the students are expected to make appropriate progress toward completing the dissertation, and to enroll continually (see continuous enrollment policy) until the degree is completed. Upon completion of the

dissertation, candidates will formally defend the research at a meeting conducted by the Dissertation Committee. The degree will be awarded upon a positive recommendation of the Committee and compliance with all policies and procedures required by the University.

Award of en route Master's Degree to Ph.D. Candidates: Under certain circumstances, individuals directly admitted into the Ph.D. program following completion of their bachelor's degree, may be awarded a Master's degree in Public Administration or the appropriate major. To be eligible, a student must complete core requirements in the master's program. Upon certification by the student's advisor that this requirement has been met, the Ph.D. committee will approve the award of the master's degree upon passing of comprehensive examinations.

Course Descriptions

Definition of Prefixes

PAD-Public Administration; PAF-Public Affairs; PUP-Public Policy; URP-Urban and Regional Planning; URS-Urban and Regional Studies.

PAD 5041 Values and Technology in Modern Society (3). Surveys personal and societal value assumptions in the context of the technological society. Examines organizational-societal value structures, and the ways in which technology creates rapid change and new alternatives in values. Also interrelationship of the past, present and future is explored, through futurism and forecasting techniques.

PAD 5043 Equitable and Inclusive Governance (3). Examines important principles, policies, and legislation focused on equity and inclusiveness in public service delivery to diverse and underrepresented groups.

PAD 5256 Economic Thinking in Policy Making (3). Provides an introduction to basic economic principles, applications, and tools in the policymaking process.

PAD 5416 Social Equity and Human Resource Management (3). The course deals with the human resource management issues arising from equity and affirmative action requirements in the workplace.

PAD 5427 Collective Bargaining in the Public Sector (3). The course deals with the nature and implications of collective bargaining for managers and employees in (and students of) public organizations. The course emphasizes similarities and differences between the private and public sectors, as they apply to collective bargaining.

PAD 5435 Gender Equity and Leadership in Public Administration (3). Explores the factors that impact women's career advancement and leadership opportunities, and examines both barriers and opportunities to career progression.

PAD 5443 The Public Administrator and Media Relations (3). Surveys the government-mass communication media relationship, and then concentrates on the ways in which public managers handle media relations. Emphasis throughout is placed on questions of information-handling unique to public organizations, involving, for example, adherence to Florida's Sunshine Law and the Federal Freedom of Information Act.

PAD 5460 Performance Management (3). Provides measures to improve organizational and worker productivity using applied behavioral science.

PAD 5616 Contracting and Managing Third Party Governments (3). Analyzes the legal foundations, administrative and economic characteristics of government instrumentality's as they are used to pursue public policy. Analyzes how and why different combinations of instrumentality's are used in different policy areas.

PAD 5660C Applied Legal Context of Public Administrators (3). An overview of constraints and latitude the legal system grants to public administrators and managers. Provides the applied legal information required to make effective decisions in the public sector.

PAD 5661C Management of Court-Agency Relations (3). Examines applied judicial-administrative relations with particular emphasis on administrative policymaking. Covers the legal, environmental, and political factors that influence administrative strategies of policy and program compliance.

PAD 5805 Economic Development and Urban Revitalization (3). This course is an interdisciplinary examination of research and practice in contemporary economic development, with emphasis on successful implementation in a variety of settings.

PAD 5934 Contemporary Issues in Public Administration (3). An analysis of major conceptual issues currently facing public administrators. May be repeated for credit.

PAD 6038 Policy Formulation and Legitimation (3). This course examines the social, political and economic factors which influence the development, formulation, and legitimation perspective of public policy with emphasis on public administrators.

PAD 6042 Democracy and the Administrative State (3). Juxtaposes the contemporary administrative condition of American government with the values of the democratic state. Different approaches to democracy - in practice as well as in theory - will be analyzed, and their implications for public organizations and individual administrators examined.

PAD 6053 Political, Social and Economic Context of Public Administration (3). Examines the context in which public organizations operate, stressing the relationship between such organizations and their multifaceted environment. Emphasis is on examining relevant social and cultural mores and patterns, political values and processes, governmental institutions, economic systems, resource availability, and other environmental factors currently significant to public organizations. Prerequisite: Admission to the majors.

PAD 6056 The Practice of Public Management (3). This capstone course for the MPA Program will deploy skills, concepts, and knowledge acquired in previous course work in analytic exercises related to students' areas of specialization. Prerequisite: Admission to the majors.

PAD 6142 Management of Nonprofit Organizations (3). Studies the characteristics, roles, and challenges of nonprofit entities. Topics include structure and governance, financial reporting and accountability,

financial development, and contract management. Prerequisite: Admission to the majors.

PAD 6156 Applied Organization Theory and Behavior (3). Contemporary approaches to improving the overall effectiveness of public organizations through the utilization of the applied behavioral sciences: personal and executive development programs, team building, action research, etc. Survey of research on the effects of organizational development programs, with special reference to public organizations.

PAD 6205 Public Financial Management (3). Capital asset administration, debt administration, revenue systems, public employee retirement programs, purchasing, inventorying, and risk management.

PAD 6209 Financial Management in Public and Nonprofit Organizations (3). Processes, tools and methods used in financial planning and control of public and nonprofit entities with focus on utilization of critical performance indicators deployed over agency budget and life cycles. Prerequisites: PAD 6227, admission to the majors.

PAD 6224 Advanced Seminar in Public Budgeting (3). A review of the state of the art in public budgeting, emphasizing conceptual areas for significant research and appropriate methodological design for addressing them. Prerequisites: PAD 6227, PAD 6229, and PAD 6205.

PAD 6225 Comparative Public Budgeting (3). Public budgeting is a common activity in all governments and international organizations. Covers the differences in budgeting and explores patterns implicit in those differences.

PAD 6227 Public Finance and the Budgetary Process (3). Examines the theory and practice of public budgeting and its relationship to the administrative processes of control, management and planning. Special emphasis will be given to the social balance question; the kinds and scope of government expenditures; the fiscal role of government in a mixed economy; sources of revenue available to government; administrative, political and institutional aspects of the budget and the budgetary process; and problems and trends in intergovernmental financial relations. Prerequisite: Admission to the majors.

PAD 6229 Advanced Management Techniques (3). Explores quantitative revenue and expenditure models and other techniques which address public sector decision making under conditions of resource constraint. Prerequisites: PAD 6205 or permission of the instructor.

PAD 6306 Policy Analysis (3). The focus is on conducting policy analysis for decision making in the public, nonprofit, and private sectors. Policy analysis tools are applied systematically and critically to arrive at policy advice for decision makers and citizens. Prerequisite: Admission to the majors.

PAD 6366 Policy and Program Implementation (3). This course examines and evaluates the legal, socio-political administrative factors influencing the implementation of public policy and programs. Prerequisite: PUP 6015. (S)

PAD 6379 Homeland Security Risk Assessment (3). Provide the technical framework needed for design, implementation, and evaluation of risk assessments used

in local, regional, and state Homeland Security administration.

PAD 6399 Homeland Security Management for State and Local Government (3). Provides a broad overview of the legal, technical, financial, and organizational environment in which Homeland Security initiatives are designed and successfully implemented.

PAD 6417 Human Resource Policy and Management (3). The course focuses on the role of the personnel manager and how the manager performs tasks connected to human resources development, policy and management in public and nonprofit organizations. Prerequisite: Admission to the majors.

PAD 6434 Leadership and Decision-making (3). Readings and case studies examine how effective leaders in the public and non-profit sectors make decisions in fluid and challenging environments. Prerequisite: Admission to the majors.

PAD 6436 Professionalism and Ethics (3). Examines behavioral approaches toward understanding the personal world of public managers with emphasis on knowledge, skills, and abilities which aid effective goal accomplishment.

PAD 6437 Dynamics of Individual Growth (3). This course focuses on the importance of small group theory to the personal growth of the administrator, and the role of interpersonal abilities in effectively serving client groups. The course also deals with the expansion of the phenomenological world view of each student; and will look at existential theory and the dilemma of personal growth.

PAD 6605 Administrative Law and Procedures (3). Emphasizes the responsibilities public administrators have under local, state, and federal laws. Explores such concepts as client responsiveness under the law; the regulatory process; state administrative law systems; the executive order process; the relationship between administrative law and the checks-and-balances system; discretionary justice; and others.

PAD 6701 Quantitative Methods in Public Administration (3). An intensive introduction to statistical and forecasting tools appropriate for public, nonprofit, and health professionals. Prerequisite: Admission to the majors.

PAD 6710 IT and E-government (3). Studies the electronic delivery of government information and services and the problems of managing information technology in the public sector. Survey technology principles of IT and E-government. Prerequisite: Admission to the majors.

PAD 6715 Public Monitoring Systems for Government Organizations (3). Focuses on the formal information system which is or can be used to guide a public organization and judge its performance.

PAD 6717 GIS Applications for Urban Management (3). Geographic Information System Applications for urban decision makers and social scientists.

PAD 6718 Smart Governance (3). Examines smart governance systems that use cyber technologies for organizational management and delivery of public services. It explores innovative designs for achieving democratic values effectively.

PAD 6726 Applied Research Methods for Accountability in Public and Nonprofit Organizations (3). Tools, methods, and concepts employed to reengineer public and nonprofit agencies and to design performance indicators needed to enhance customer satisfaction and strategic service delivery. Prerequisites: PAD 6701, admission to the majors.

PAD 6807 Urban and Municipal Government Administration (3). Detailed examination of problems facing the municipal administrator; of the pressures upon the contemporary urban environment; and of the administration of large metropolitan areas comprised of numerous entities. Emphasis will be on determination of current trends, discussion of cases, and arrival at suggested solutions.

PAD 6816 Regional and State Government Administration (3). Surveys the historical development of regional administration, analyzes present administrative problems of the states, and explores contemporary and suggested remedial policies. Emphasizes the complex problems of the institutional relationships among local, state and regional governments, and their implications for public policy-making.

PAD 6836 International Public Administration (3). The role of public administration systems around the world; and the impact of political and socio-cultural frameworks on administration. Focus on national and state organizations' politics, economics, problems, and possibilities. A review of scope and programs of contemporary international public administration organizations.

PAD 6838 Development Administration (3). The role of public administration in national development, with specific attention to theories of economic aid from external sources, and the effects of this aid. Theories and policies of economic and social development are explored; and particular attention is given to the role of the United States in strengthening administrative capabilities as an important means for achieving developmental goals in selected countries.

PAD 6839 Comparative Public Policy (3). This course addresses policy formulation and implementation as a general process of administrative action that can be investigated among the varying nation-states. It covers the differences in policy and explores patterns implicit in those differences. Prerequisites: PAD 6836 or PAD 6838.

PAD 6855 Introduction to Public Procurement (3). Course covers each phase of contract and project cycle, with an emphasis on tools and techniques to manage a public contract or project.

PAD 6856 Contract and Project Management (3). Overview of public procurement as a basic function of government. Public/private contracting arrangements studied in context of organizational structure, regulations, and current procurement issues.

PAD 6907 Independent Study in Public Administration (1-6). (Normally 3 credit hours) Individual conferences; supervised readings; reports on personal investigations and similar undertakings. Prerequisites: Completion of required courses in public administration is expected. Consent of faculty sponsor and Program Director required.

PAD 6915 Independent Research in Public Administration (1-6). (Normally 3 credit hours) An individualized research project and report which, if feasible, should include field work with a public organization. Prerequisites: Completion of required courses in public administration is expected. Consent of faculty sponsor and Program Director required.

PAD 6946 Public Administration Internship (0-3). (Normally 3 credit hours) Supervised work in a public or quasi-public organization. Should not be undertaken until completion of required courses in public administration program. May be repeated. Prerequisite: Approval of internship coordinator.

PAD 7026 Proseminar in Public Administration and Policy (3). An intensive introduction to American Public Administration and Public Policy making and implementation by "The Fourth Branch" of government.

PAD 7055 Scope and Theory of Public Administration (3). An integrative capstone seminar in which traditional models of Public Administration are explored and employed to analyze the structures and dynamics of public organizations and to develop alternative models and new theoretical perspectives concerning the scope and theory of the field.

PAD 7102 Advanced Organization Theory (3). Philosophical foundations of contemporary organization theory, with emphasis on dynamic interfaces between the environmental contexts and organizations, critical analysis of both the normative and incremental orientation of concepts, theories, models, and applications. Prerequisites: PAD 6106 or equivalent.

PAD 7155 Organizational Development and Change in Public and Nonprofit Organizations (3). Explores the unique challenges to implementing effective management environments in public and nonprofit organizations. Emphasis on organizational diagnosis and performance measures.

PAD 7257 Economic Context of Government (3). This course examines interdisciplinary approaches to collective decision making and the delivery of public goods and services.

PAD 7277 Public Administration and the American Political Economy (3). An analysis of the origins and growth of the American administrative state within the broader socioeconomic and cultural context, with particular emphasis on the post-World War II era.

PAD 7607 Legal Context of Public Administration (3). This course analyzes the administrative significance of delegation, judicial review, rule making, freedom of information and sunshine laws, legislative veto, and liability for administrators. Prerequisite: PAD 6053.

PAD 7703C Empirical Methods in Public Administration (3). An advanced research seminar focusing on research design and proposal development in public policy and administration. Particular attention is given to qualitative research methods.

PAD 7705 Applied Quantitative Analysis I (3). Introduction to and application of selected linear multivariate statistical and quantitative models to the field of public administration. Prerequisites: PAD 6701 and PAD 6726.

PAD 7707 Applied Quantitative Analysis II (3). Advanced non-linear statistical and quantitative modeling methods for public administration research; topics include regression models for count data and for discrete and limited dependent variables. Prerequisite: PAD 7705.

PAD 7808 Economic Development and Urban Management (3). Details the theory and practice of contemporary urban management, with particular emphasis on development of the economic base as a requisite in a competitive federal system.

PAD 7865 Development Administration (3). Policies and institutions fostering decentralization and the rise of civil society in less-developed nations; strategies for change and political, cultural, and economic drivers of progress.

PAD 7929 Dissertation Prospectus Development (3). To provide students with the analytic and conceptual frameworks needed for crafting defensible dissertation prospectuses.

PAD 7960 Comprehensive Examination in Public Affairs (6). Intensive preparation for the comprehensive examinations in Public Affairs in both the core and areas of specialization. Prerequisite: Completion of program of studies.

PAD 7980 Ph.D. Dissertation (1-12). This course provides dissertation guidance to doctoral candidates in the Ph.D. program in public administration. Prerequisite: Permission of Major Professor and Doctoral Candidacy.

PAF 7002 Foundations of Policy Analysis (3). Intensive exploration of models, theories, and designs applied to quantitative and qualitative methods of public policy analysis. Instruction and case studies cover a wide range of normative and policy issues. Prerequisites: PAD 6306 and PAD 6053.

PUP 6006 Public Policy Analysis and Evaluation (3). A framework for evaluating public policy-making will be presented. The emphasis will be on criteria and methodologies available for choosing among alternative courses of action. The systems approach, alternative futures, and nth-order consequences of policies will be analyzed.

PUP 6015 Public Policy (3). An intensive analysis of the normative theories of public policy making, with emphasis on the processes by which policy choices are made and implemented by government agencies. The current trends and perspectives of effective policy development (such as participatory democracy, multi-valued choice, etc.) are examined.

PUP 6105 Urban Challenges and Policy Innovations (3). Addresses the changing role and function of U.S. metropolitan areas in an age of growing global competition and focuses on key contemporary policy problems facing cities and suburbs.

URP 5426 Emergency Management and Planning (3). This course focuses on the concepts, processes, and techniques associated with developing and implementing emergency management plans in public, nonprofit, and health organizations.

URP 6315 Introduction to Urban Planning and Growth Management (3). An historic overview of land use planning and the rise of growth management with

emphasis on implementation in complex market and political environments.

URS 5645 Strategic Planning in Public and Non-Profit Organizations (3). This course exposes students to the concepts associated with strategic planning of public and nonprofit organizations and provides them with practical experience in their use.

URS 5647 Continuous Quality Improvement (3). This course provides an in-depth exposure to the concepts, principles, and techniques associated with continuous quality improvement (CQI) applied to public, nonprofit, and health organizations.

URS 6806 Applied Research and Evaluation Techniques (3). Theories and concepts of research and evaluation. Specific focus given to action components of the research process: design and formulation, strategies and methodological tools for conducting research. Discussion of the role of research in administrative decisions and in testing ways to implement public policy. A review of contemporary critiques on research design. Prerequisite: PAD 6701.

URS 6930 Special Topics in Urban and Regional Studies (3). Selected topics receiving current attention by leading scholars in the emerging urban and regional studies discipline.

URS 7031 Information and Telecommunications Design and Policy (3). The managerial and public policy implications of innovations in the 'information super highway'; establishment of intra and interorganization capacity for dealing with continued development in the field. Prerequisites: Ph.D. status or permission of the instructor.

URS 7156 Research Practicum (3-6). An integrative studio course intended to produce a defensible dissertation prospectus and significant empirical research project; may be repeated for credit. Prerequisites: Completion of Ph.D. tool requirement, and URS 7157.

URS 7157 Applied Research Methods (3). Extensive exploration of designs utilized in contemporary social and policy science research with emphasis on triangulated models. Prerequisites: Completion of tools requirement in program of studies or permission of the instructor.

URS 7379 Leadership Development and Decision-Making (3). Leadership as the focal point for organizational development, resource allocation, and 'fit' within the environment; emphasis on effective leadership in the public, health, and nonprofit sectors. Prerequisites: Ph.D. status or permission of the instructor.

URS 7380 Contemporary Management Issues and Problems (3). A proseminar on workplace issues such as AIDS, the Americans with Disability act, and 'the Glass Ceiling'. Special emphasis on diversity and increased utilization of contractual employees. Prerequisites: Ph.D. status or permission of the instructor.

URS 7644 Managing Public Financial Resources (3). An integrative seminar treating taxation, public budgeting, debt management, and evaluation, in the context of a globally competitive economy. Prerequisites: Ph.D. status or permission of the instructor.

URS 7655 Evaluating Organizational and Program Performance (3). Methodology and conceptual frameworks needed to augment organizational effectiveness while enhancing the accountability of public, health, and nonprofit organizations. Prerequisites: Ph.D. or permission of the instructor.

URS 7926 Supervised Readings (3). Extensive reading and review in area of concentration taken in preparation for comprehensive examinations; supervised by Chair of Program Advisory Committee, may be repeated for credit. Corequisite: URS 7156.

Master of Arts in Religious Studies

FIU's Master of Arts in Religious Studies is designed to give students maximum flexibility in pursuing their research interests, while providing a firm foundation in both the general academic study of religion and the student's area of specialization.

The M.A. is a 36-credit hour program: 9 hours of core seminars, 12 hours of 'track' courses, and either 9 hours of electives and 6 hours of thesis work, or 15 hours of electives.

Requirements for Admission

Application to the Master of Arts program in Religious Studies is made through FIU's Graduate Admissions Office. The usual minimum requirements for admission include a baccalaureate degree from an accredited college or university and:

1. A graduate degree in the humanities or social sciences from an accredited college or university or
2. A score of 156 or higher on the verbal portion of the Graduate Record Examination (GRE) or
3. A UG 60 GPA of 3.25

A student who does not meet any of these three requirements may qualify for admission with a UG 60 GPA of 3.0 and either:

- a. A GPA of at least 3.0 in 9 or more hours of graduate study in departmental courses (as a special student, excluding Independent Study courses) or
 - b. A score of at least 152 on the verbal portion of the GRE.
4. International graduate student applicants whose native language is not English are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language

Testing System (IELTS). A total score of 80 on the iBT TOEFL or 6.5 overall on the IELTS is required.

Applications for admission are available from the FIU Office of Graduate Admissions and are evaluated by the Departmental Graduate Studies Committee.

Degree Requirements

1. Prerequisite: undergraduate course REL 3308, Studies in World Religions, to be completed by the end of the first semester of graduate work.
2. Three core seminars: RLG 6935 "Seminar on Sacred Texts", RLG 6013 "Modern Analysis of Religion", and RLG 5038 "Advanced Fieldwork in Religious Studies".
3. A track of four related courses chosen in consultation with the Graduate Program Director.
4. *Either* 9 hours of elective courses and a thesis (involving either 6 hours of thesis credit or 3 of thesis and 3 of independent research), or 15 hours of electives and no thesis. Students must register with the Department's Graduate Committee for thesis track or non-thesis track during the semester in which they will complete 12 hours of credit in the program. Registration in the thesis track will require securing the agreement of a member of the Graduate Faculty to serve as Thesis Advisor.

All courses must be completed with a grade of "B" or above. The Department of Religious Studies does not regard the non-thesis track as appropriate preparation for further graduate study in Religious Studies.

Combined BA/MA in Religious Studies Degree Pathway

To be considered for admission to the combined bachelor's/master's degree pathway, students must have completed at least 75 credits in the bachelor's degree program at FIU and meet the admissions criteria for the graduate degree program to which they are applying. Students need only apply once to the combined degree pathway; the application is submitted to Graduate Admissions typically before the student starts the last 30 credits of the bachelor's degree pathway. A student admitted to the combined degree pathway will be considered to have undergraduate status until the student applies for graduation from their bachelor's degree program. Upon conferral of the bachelor's degree, the student will be granted graduate status and be eligible for graduate assistantships. Only 5000-level or higher courses, and no more than the number of credits specified by the program catalog, may be applied toward both degrees.

Admission Requirements

1. Current enrollment in the Bachelor's Degree program in Religious Studies, or any humanities major that allows at least 12 hours of electives.
2. Current GPA must be 3.4 or higher.
3. Two letters of recommendation.
4. Approval of the Graduate Committee.
5. Submission of acceptable writing sample, complete with bibliography, to Turnitin.com.

Requirements

Completed BA at FIU including,

REL 4931	Religious Studies Seminar or
REL 4030	Methods in the Study of Religion
At least two of the following three core courses:	
RLG 5038	Advanced Fieldwork in Religious Studies
RLG 6935	Seminar in Sacred Texts
RLG 6013	Modern Analysis of Religion

Three or six additional hours of graduate credit in Religious Studies (for majors, graduate level enrollment in three or six hours of Focus Courses) must also be taken as Graduate courses. The total number of graduate hours taken concurrently with the BA should be 12 credit hours.

Required for the MA:

The remaining core course (if not already taken).

- A four course track, either in one religious tradition, or one theme across religious traditions, approved by the Graduate Director.
- Six credits of electives selected from the Religious Studies Graduate Course Offerings.
- Six hours of thesis, or six additional hours from the Religious Studies Graduate Course Offerings.

Combined M.A. in Religious Studies/Ph.D. in International Relations Degree Pathway

The combined M.A. in Religious Studies/Ph.D. in International Relations pathway allows qualified graduate students to pursue both degrees simultaneously. Students must fulfill the requirements for both programs, and up to 36 credits completed as part of the M.A. in Religious Studies will be counted toward the 75 credit Ph.D. in International Relations.

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission.

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores;
4. Minimum 156 GRE verbal score or a minimum 3.5 on a 4.0 scale (or equivalent) for the last two years of undergraduate work.
5. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 90 on the internet-based TOEFL (equivalent to 575 on the paper-based version) or 6.5 overall on the IELTS is required.

Although admissions decisions typically are made in the spring, decisions for students who have not yet received their bachelor's degree will be conditional, pending confirmation of the B.A. Meeting the minimum requirements does not guarantee admission into the program. All applications are subject to review by the

members of the Department of Politics and International Relations and the Religious Studies Department.

Admission Procedures

To be accepted into this pathway, students must submit an application to the Ph.D. in International Relations with a sub-plan for a M.A. in Religious Studies. This designation will appear in the menu of programs in the graduate application. The application must be submitted by January 15 in the year in which they wish to begin their studies.

The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the on-line application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable;
5. A statement of research interests, including reasons for seeking the M.A./Ph.D., future career goals, and a summary of scholarly preparation for this pathway;
6. Three letters of reference from academic sources or others able to judge academic abilities and potential; and
7. A curriculum vitae.

Masters of Arts in Religious Studies Degree Requirements (36 credits)

RLG 6935	Seminar in Sacred Sources	3
RLG 6013	Modern Analysis of Religion	3
RLG 5038	Advanced Fieldwork in Religious Studies	3
12 credit hours of electives approved by the Graduate Program Director		12
RLG 6971	Thesis or 6 additional hours of elective credits	6
INR 5615	Research Design in International Relations	3
INR 5609	Contemporary Dynamics of International Relations	3
INR 6706	Political Economy of International Relations	3

Students who choose the thesis exit option must include at least one Politics and International Relations faculty member, though the majority must be from Religious Studies.

Doctor of Philosophy in International Relations Degree Requirements

Students will begin study towards the Ph.D. in International Relations immediately following their satisfactory completion of M.A. in Religious Studies requirements. A minimum of 39 credits beyond the M.A. degree in Religious Studies will be necessary to satisfy the requirements of the Ph.D. Program in International Relations.

Degree Requirements beyond the M.A. in Religious Studies are the following:

9 Core Course credits:

GEO 6473	Space, Place and Identity	3
INR 6604	International Relations Theory I	3
INR 6608	Contemporary International Relations Theory	3

12 Major Field credits in either:

1. Global Institutions and Issues,
2. Comparative Area Studies,
3. Foreign Policy and Security Studies, or
4. International Law.

With advisor approval, these may include 3 credits taken in satisfaction of the requirements for the M.A. in Religious Studies.

9 Minor Field credits in either:

1. a second field from the above major field list, or
2. a field offered within another Ph.D. program at FIU (with approval of the Graduate Program Director), or
3. a petition field (with approval of the Graduate Program Director).

With advisor approval, these may include 3 credits taken in satisfaction of the requirements for the M.A. in Religious Studies.

Elective Credits:

Elective credits necessary to bring total credits earned beyond the M.A. in Religious Studies to a minimum of 24.

Dissertation Credits:

15 credits of dissertation research.

Comprehensive Exams

After completing 60 hours of course work (or in the semester in which they expect to do so), students may take their written comprehensive examinations on the core sequence and in both of their fields. Students must sit for these examinations within 6 months of completing the minimum 60 hours of coursework unless granted an extension by the International Relations Graduate Program Director. Before advancing to candidacy, students must also demonstrate an ability to use a foreign language other than English for scholarly purposes.

Dissertation

Within 3 months of passing the comprehensive examinations, students should publicly present a dissertation proposal that is acceptable to a committee of at least four qualified scholars. Three members of the committee, including the dissertation supervisor, must be graduate faculty members of the Department of Politics and International Relations. One must be from outside the department, but inside FIU. Other members must be approved by the International Relations Graduate Program Director. To complete program requirements, Ph.D. degree candidates must enroll for a minimum of 15 dissertation credits and maintain enrollment for 3 credits every semester until the degree is awarded.

Combined M.A. in Religious Studies/Ph.D. in Global and Sociocultural Studies Degree Pathway

The combined Religious Studies M.A./Global and Sociocultural Studies Ph.D. pathway allows qualified graduate students to pursue both degrees at the same time. Students can develop an expertise in Religious Studies while progressing towards a Ph.D in one of the three majors in the Global and Sociocultural Studies Ph.D. geography, sociology, or anthropology. The dissertation

may be directed by a qualified professor in either department

Admission Requirements

Applicants must meet the following minimum requirements to be considered for admission

1. Baccalaureate degree from an accredited institution for higher education (or equivalent)
2. Minimum cumulative grade point average of 3.2 on a 4.0 scale (or equivalent) for the last two years of undergraduate work and/or a GPA of 3.5 on any previous graduate work;
3. Official Graduate Record Exam (GRE) scores,
4. International graduate student applicants whose native language is not English and who have not obtained a degree from an English-speaking academic institution are required to submit a score for the Test of English as a Foreign Language (TOEFL) or for the International English Language Testing System (IELTS). A total score of 80 on the internet based TOEFL (equivalent to 550 on the paper-based version) or a 6.5 overall on the IELTS is required.

Admission Procedures

To be accepted into this pathway, students must submit an application to the Ph.D. in Global and Sociocultural Studies with a sub-plan for a M.A. in Religious Studies. This designation will appear in the menu of programs in the graduate application. To be accepted into this pathway, students must submit an application by March 1 in the year in which they wish to begin their studies. The following documents must be submitted and will be reviewed by the Admissions Committees from both units.

The following must be submitted as part of the on-line application:

1. Online application and application fee;
2. Official transcripts for all undergraduate and graduate coursework;
3. Official GRE scores;
4. Official TOEFL scores, if applicable;
5. Statement of purpose explaining their interest for enrolling in both the M.A. Religious Studies program in the Department of Religious Studies and in the Ph.D. program in GSS. The statement of purpose must clearly address the applicant's academic and professional objectives for enrolling in both fields of inquiry. The statement of purpose must also indicate the intended major (anthropology, geography, or sociology) the applicant plans to select while engaged in the Ph.D. in GSS;
6. Three letters of recommendation from university professors who are able to comment on the various aspects of the student's academic ability;
7. A curriculum vitae; and
8. Writing samples and other relevant professional work that may support their applications

Degree Requirements for M.A. in Religious Studies

The 36 credits earned for the M.A. in Religious Studies will count towards the 75 credits required for the Ph.D. in GSS.

Religious Studies Core (9 credits)

RLG 6935 Seminar in Sacred Sources

RLG 6013	Modern Analysis of Religion	3
RLG 5038	Advanced Fieldwork in Religious Studies	3

Courses Required for GSS Track (12 credits)

ISS 6346	Theory and Inquiry (Fall)
ISS 6306	Writing Research Proposals (Spring)
ISS 6305	Research Methods and Design (Spring)
ISS 6317	Social Research Quantitative Methods I (Fall)

Electives (9 or 12 credits depending on exit option)

9 or 12 credits or elective courses from within the Department of Religious Studies Department

Religious Studies MA Exit Options (6 or 3 credits)

Students may choose any of the exit options offered by the Religious Studies degree.

RLG 6971 Thesis (minimum 6 credits) See the Religious Studies program description for more information. The thesis is publicly defended and approved by a committee of three graduate faculty members

RLG XXXX (3 credits) Preparation of two directed research papers. Both papers require an oral presentation, defense and approval by a committee of three graduate faculty members;

RLG XXXX Internship and major research paper (3 credits). Supervised internship leading to a major research paper based upon the students work during the internship. The research paper requires an oral presentation and approval by a committee of three graduate faculty members.

SIPA Language Requirement

Students must demonstrate proficiency in a language other than English according to the nature of their thesis or research paper/proposal and professional interests.

Application for Graduation from Religious Studies program

Students should apply for graduation for the Religious Studies degree as soon as they have completed all requirements for the degree – including the exit option. Ordinarily, the M.A. will be conferred before the student advances to candidacy for the Ph.D. in GSS.

Matriculation to Ph.D. in GSS

All students must undergo a successful M.A. review upon completion of the Religious Studies Program requirements in order to continue toward the Ph.D. in GSS. The GSS Graduate Committee, along with an appointee from Religious Department conducts these reviews. The purpose of the M.A. review is to determine the ability of the student to do Ph.D. level work with the department's faculty. Among the information considered during the review are a students overall performance, grades in courses, and faculty recommendations.

Degree Requirements for Ph.D. in Global and Sociocultural Studies

The doctorate in Global and Sociocultural Studies requires a minimum of 75 credits beyond the baccalaureate including a dissertation based on original research. A maximum of 36 credits of the Religious Studies Master program will count toward the 75-credit minimum. Thus, a minimum of 39 credits must be earned beyond the M.A.

Major Requirements (33 credits)

All doctoral students will choose a major in Anthropology, Geography, or Sociology. The following distribution of coursework is required.

- (a) Major theory (3)
- (b) Additional methods (3)
- (c) Major course electives (6 minimum)
- (d) Exam and dissertation credits
 - a. Doctoral Exam Preparation (6 maximum)
 - b. Doctoral Dissertation (15 minimum)

General Electives (6 credits)

GSS and non-GSS Department electives

Ph.D. General Examination

After successfully completing the common core requirements, the major's course requirements, and electives, a student prepares for the Ph.D. General Exam by enrolling in a maximum of six credits of exam preparation for their major. In preparation for the exam, a student forms a dissertation committee according to the regulations published on the University Graduate School web page (<http://gradschool.fiu.edu>). The Ph.D. General Exam addresses the student's anticipated dissertation topic, and is conducted according to the University Graduate School Policies and Procedures Manual and the Department's Ph.D., General Exam guidelines.

The Dissertation Proposal and Defense/Candidacy Exam

After passing the Ph.D. General Exam, a student works under the guidance of the dissertation committee to prepare a dissertation proposal and defend it orally before the committee. The chair of the dissertation committee must hold Dissertation Advisor Status from the University Graduate School. The proposal defense serves as the doctoral candidacy exam for the Ph.D. program in Global and Sociocultural Studies. Upon passing the proposal defense, a student is admitted to candidacy status.

The Dissertation and Dissertation Defense

After successfully defending a dissertation proposal, a student conducts the proposed research and completes a dissertation under the guidance of a dissertation committee. Only after successfully defending the dissertation proposal may a student register for dissertation hours (ANG 7980, GEO 7980, or SYA 7980). The Ph.D. program requires a student to be continuously enrolled in a minimum of 3 hours of Doctoral Dissertation each semester from the time of advancement to candidacy until the completion of the dissertation, including summers. Upon completion of the dissertation manuscript and authorization by the committee, a student defends the dissertation before the committee and the University community. The University Graduate School's regulations governing the dissertation are described at <http://gradschool.fiu.edu>.

Course Descriptions**Definition of Prefixes**

ASN-Asian Studies; RLG-Religion Graduate; SRK-Sanskrit Language

ASN 5120 Religion and Society in Japan (3). Examines the relation between religion and the state, the growth of new religious movements, the role of religion during times

of war and conflict, issues of religious freedom and legality, the impact of religious institutions on gender and ethnicity.

ASN 5130 Zen and the Arts (3). Examines the history, theory, and practice of Chado (Way of Tea), a Zen inspired art that has had, and still exerts, a long-lasting influence on Japanese society.

RLG 5018 Religion, Literature, and Critical Theory (3). Examines intersections between world religions and contemporary literature in light of modern theories of interpretation. Themes explored include scriptural rereadings and spiritual journeys. Prerequisites: Graduate standing or permission of the instructor.

RLG 5023 Religious Ritual (3). Examines the critical relationship of ritual, religious practice and belief, and culture, while introducing the principles and methods of ritual studies. Prerequisites: Graduate standing or permission of the instructor.

RLG 5025 Myth and Religion (3). Investigates the role, function, and meaning of myth in religious experience and practice through an examination of specific myths, mythic patterns, and critical theories. Prerequisites: Graduate standing or permission of the instructor.

RLG 5038 Advanced Fieldwork in Religious Studies (3). Techniques of ethnography used in Religious Studies beginning with research design and including participant observation, interviews, surveys.

RLG 5065 Latinas and Religion in the Americas (3). This course will review the practices, beliefs, social and political activism, and theological and biblical reflections of Latinas in the Americas from a historical perspective to modern day.

RLG 5106 Religions, Latino/as and Immigration (3). The course will analyze the relationships between the complex phenomenon of Latinos/as immigration and religions. This area of study necessarily demands an interdisciplinary approach including gender.

RLG 5122 African-American Religion (3). Survey of development of African-American Religions with emphasis on North American experience during slavery, Jim Crow and contemporary eras. Prerequisites: Graduate standing or permission of the instructor.

RLG 5125 Religion and Public Life (3). Examines the relationship of religion and government in the United States, with focus on the First Amendment and issues of separation of church and state. Prerequisites: Graduate standing or permission of the instructor.

RLG 5137 North American Religion (3). Historical examination of religious groups and influences in North America, focusing on their contributions and cultural impact. Prerequisites: Graduate standing or permission of the instructor.

RLG 5138 Sects, Cults, and New Religions (3). Explores and critically analyzes the multiplicity of new American religious movements and the unique combination of factors that has encouraged them. Prerequisites: Graduate standing or permission of the instructor.

RLG 5144 Women and Religion (3). Examines the influence of religion on social construction of gender and

the definition of woman's nature and role, with a focus on Western developments. Prerequisites: Graduate standing or permission of the instructor.

RLG 5149 Religion, Violence, and Conflict (3). Is religion peaceful or violent? Theoretical analysis of the role of religion in violent, social and political conflicts, such as the Crusades, the Arab-Israeli conflict, and the Haitian Revolution. Prerequisites: Graduate standing or permission of the instructor.

RLG 5165 Science and Religion (3). Surveys the interaction between science and religion from conflict models to integration; special attention to specific natural sciences including cosmology and biology. Prerequisites: Graduate standing or permission of the instructor.

RLG 5182 Religion and Ethics (3). Investigation of methods, resources for ethics in world religions, and some examples of issues. Prerequisites: Graduate standing or permission of the instructor.

RLG 5183 Religion, Nature, and Globalization (3). Through exploring sources for contemporary attitudes and values about "nature", this course examines environmental ethical issues surrounding the process commonly referred to as globalization. Prerequisites: Graduate standing or permission of the instructor.

RLG 5184 Sexuality, Religion and Social Change (3). Traces various religions' accommodation to and rejection of both new scientific research on sexuality and new economic and social trends. Prerequisites: Graduate standing or permission of the instructor.

RLG 5192 Seminar in Mysticism (3). The issues of consciousness, language, and morality in mystical tradition of the East and west, including Kabbalah, Neoplatonism, Sufism, Yoga, Taoism, and Zen. Prerequisites: Graduate standing or permission of the instructor.

RLG 5193 Brazil: Religion and Liberation (3). To study the genealogy of the Liberation Theology movement in Brazil as Second Vatican Council's resonance. The changes undertaken may be compared to the Reformation of the 16th century.

RLG 5211 Bible I: The Hebrew Scriptures (3). Extensive reading in the Hebrew Scriptures, how the various texts of the Hebrew Scriptures came to be written, and how they can be interpreted - both within the context of faith communities and within the cultural contexts out of which the texts were written. Prerequisites: Graduate standing or permission of the instructor.

RLG 5232 Hebrew Exegesis I (3). Provides a comprehensive survey of the fundamentals of the language of the Hebrew Bible designed to equip the student for the task of exegesis. Prerequisites: Graduate standing or permission of the instructor.

RLG 5233 Hebrew Exegesis II (3). A continuation of Hebrew Exegesis I emphasizing the reading of select passages of the Hebrew Bible to develop skills in translation and interpretation. Prerequisites: RLG 5232 and graduate standing.

RLG 5242 New Testament and Qumran (3). Detailed investigation of the possible contacts between the New Testament and Qumran in such areas as Biblical

Exegesis, Apocalypticism, Eschatology, and Messianism. Prerequisite: Graduate standing.

RLG 5244 Bible II: The New Testament (3). History, theology, and interpretation methods of the New Testament. Prerequisites: Graduate standing or permission of the instructor.

RLG 5262 New Testament Greek Exegesis I (3). A detailed overview of the principles of Greek grammar that shows the student how to use Greek in the study of the New Testament. Prerequisite: Graduate standing.

RLG 5263 New Testament Greek Exegesis II (3). Careful reading of selected passages of the New Testament and early Christian literature designed or selected to develop skills in translation and interpretation. Prerequisite: RLG 5262 and graduate standing.

RLG 5284 Studies of the Dead Sea Scrolls (3). Overview of the Dead Sea Scrolls explores the new techniques being used in their study. Prerequisites: Graduate standing or permission of the instructor.

RLG 5331 Religions of India (3). Topics include: religion in prehistoric and ancient India, classical Hindu texts and schismatic movements, medieval theism, the acculturation of extrinsic religions, Hindu-Muslim-Sikh syncretism, and the modern period. Prerequisites: Graduate standing or permission of the instructor.

RLG 5334 Studies in Diaspora Hinduisms (3). Research methods and theory in the study of Hinduisms in the Diaspora, with a special focus on Hindu institutions in Florida.

RLG 5338 Classical Hinduism (3). A study of the textual and philosophic traditions of classical India, as well as theoretical and methodological issues pertinent to their study. Prerequisites: REL 3330 or REL 3333 or RLG 5331.

RLG 5346 Seminar on Buddhism (3). The central doctrines and rituals of the Buddhist tradition, including the views on causality, mindfulness, monasticism, salvation, purity, and ethics in the Theravada, Tantric, and Zen schools. Prerequisites: Graduate standing or permission of the instructor.

RLG 5352 Religions of East Asia (3). The history, philosophy, and cultural impact of the major religious traditions of East Asia, including Confucianism, Taoism, Buddhism, Shinto, and syncretic folk religions. Prerequisites: Graduate standing or permission of the instructor.

RLG 5360 Classical Arabic (3). Introduces the grammar and vocabulary of classical Arabic necessary for developing the ability to read classical texts.

RLG 5364 Advanced Topics in Islamic Mysticism (Sufism) (3). Explores the depth and breadth of the mystical tradition of Islam (Sufism) through primary and secondary texts which look at the esoteric dimensions of mystical practice in the Islamic World.

RLG 5366 Advanced Interpretation of the Quran: Gender and Jihad (3). History, interpretation and translation of the Quran through a close examination of passages related to issues of gender and jihad.

RLG 5369 Voice of the Prophet (3). Familiarizes students with the position and history of prophetic traditions (Hadith) in Islam.

RLG 5372 The Globalizing of African Spirituality (3). Intensive investigation of select forms of traditional spirituality in sub-Saharan Africa, including ritual, sacrifice, and spirit possession, and Africanized Christian and Islamic devotion. Prerequisites: Graduate standing or permission of the instructor.

RLG 5384 Rasta, Vodou, Santeria (3). Critical, sociological and phenomenological analysis of the history, beliefs, rituals, and social significance of Rastafarianism, Vodou, and Santeria on the Caribbean and the United States. Prerequisites: Graduate standing or permission of the instructor.

RLG 5385 Native American Religions (3). An advanced study of Native American religions and the methods employed to investigate them. Attention will be given to traditional and contemporary expressions. Prerequisites: Graduate standing or permission of the instructor.

RLG 5387 Native Religions of Latin America (3). Focuses on major culture areas, history of tribes, changes in religious practice through contact with Christianity.

RLG 5388 Latinas' Religious Experience (3). Focus on the diversity of religious experiences among women born and educated in Latin cultures such as: Brazil, Haiti and Hispanic American, including Hispanic in the U.S.

RLG 5394 Jewish Mystical Texts (3). A study of the major movements and figures in the development of Jewish mysticism through its significant texts, from biblical times up to the present. Prerequisites: Graduate standing or permission of the instructor.

RLG 5397 Yoga Theory and Practicum (3). An in-depth graduate seminar addressing theory and practice of the eight limbs of yoga. Includes critical analysis of Patanjali's text, the Yoga Sutras.

RLG 5435 Feminist Theory and Religion (3). Surveys the development of feminist work in religion based in general feminist theory; includes work in major world religions. Prerequisite: Graduate standing.

RLG 5455 Seminar on Jain Sacred Sources (3). In depth study of selected primary texts of Jainism, examining diverse scriptures, including prose, verse, philosophical conversations, and narrative stories of different Jain sects. Basic knowledge of Jainism necessary.

RLG 5462 Religion and Philosophy (3). Examines the use of philosophical reasoning to justify religious belief or its rejection. Such topics as natural theology, atheism and fideism will be examined. Prerequisites: Graduate standing or permission of the instructor.

RLG 5465 Karma and Ethics in Indian Philosophy and Religion (3). Comparative examination of theories of karma and their relation to doctrines of ethical conduct and salvation in Indian religious and philosophical traditions. Comparison with Western ethics systems.

RLG 5488 Theology and Liberation Movements (3). Comparison of Latin American, feminist, and African American theologies of liberation, including methods, social analysis, social location, interlocutor, ecclesiology,

theology, eschatology and use of scripture. Prerequisites: Graduate standing or permission of the instructor.

RLG 5495 Interreligious Dialogue (3). The intellectual basis, the classical formulations, and the contemporary practice of interreligious dialogue in a variety of cultural settings. Prerequisites: Graduate standing or permission of the instructor.

RLG 5501 History of Christianity I (3). Christianity from its origins to the Middle Ages. Doctrinal and organizational development of the church and characteristic aspects of its spiritual life. Prerequisites: Graduate standing or permission of the instructor.

RLG 5502 Saints, Witches and Missionaries (3). Survey of movements, reforms, divisions, and major ideas within institutional Christianity, 1400 to present. Prerequisites: Graduate standing or permission of the instructor.

RLG 5515 History of Early Christianity (3). Origin and growth of Christianity from the first to the fifth century, and the adaptation of its message to the Greco-Roman world. Prerequisites: Graduate standing or permission of the instructor.

RLG 5520 Colonialism, Christianity, Globalization (3). It analyzes the European expansion since the 15th to the 20th centuries and the interrelation between religion, economic and politics in western and colonial societies.

RLG 5565 Modern Catholicism (3). Theology and liturgical practice in the Roman Catholic Church from Trent (16th c) to the present, with primary and secondary sources. Prerequisites: Graduate standing or permission of the instructor.

RLG 5605 Studies in Judaism (3). Historical overview of Jewish belief and practice, with special consideration of Jewish ritual life. Prerequisites: Graduate standing or permission of the instructor.

RLG 5606 Rabbinic Judaism (3). The theology and ideologies of the 1700-year period in the history of Judaism known as Rabbinic Judaism. Prerequisites: Graduate standing or permission of the instructor.

RLG 5613 Religion, Culture and Politics in Israel (3). Exploration of the history of modern Israel. Discussion of issues, state and religion, ethnic and denominational tensions, democratic characters of the state and the Israeli-Palestinian conflict.

RLG 5614 Ancient Judaism (3). The history, literature and characteristic institutions of Judaism from the Persian period to Amoraic times. Attention given to developments in the land of Israel and the diaspora. Prerequisites: Graduate standing or permission of the instructor.

RLG 5615 Medieval Judaism (3). The works of major thinkers in Medieval Judaism, including Maimonides, Nahmanides, Halevi, Luzatto, and such topics as Jewish mysticism (Kabbalah) and Hasidism. Prerequisites: Graduate standing or permission of the instructor.

RLG 5617 Jews and Muslims in the Middle Ages (3). Study of Jewish culture from the rise of Islam in the 7th century -- usually considered the start of Jewish Medieval Era -- to the end of the Middle Ages.

RLG 5618 Modern Judaism (3). Explores the ways in which religious beliefs and traditional concepts of Jewish

self-identity have changed as a result of emancipation and participation of Jews in the modern Western world. Prerequisites: Graduate standing or permission of the instructor.

RLG 5619 Holocaust Representations: Religion and Remembrance (3). Examines the symbolic and cultural representations of the Holocaust through its religious/theological discourse and its remembrance. Implications for Jewish life and thought are also explored. Prerequisites: Graduate standing or permission of the instructor.

RLG 5620 Kabbalah and Gender (3). Exploration of the theme of Gender within the context of Jewish mysticism. Analysis of central Kabbalistic texts pertaining to the issue of gender and sexuality.

RLG 5628 Jewish Thought and Thinkers (3). The principal of Sephardic and oriental thinkers since the Middle Ages includes philosophers, rabbis.

RLG 5629 Kabbalah, Peace and War (3). Study of the basic categories of Kabbalah as an esoteric doctrine and evaluate its unique approach to peace and war within the historical context of the Jewish mystical experience.

RLG 5698 Sephardic and Oriental Jewry Colloquium (3). In depth examination of important issues in the study of Sephardic and Oriental Jewry.

RLG 5907 Independent Study in Sephardic and Oriental Jewry (1-6). For advanced students who possess proven significant knowledge of the field of Sephardic and Oriental Jewry, to engage in a guided research on the topic of their choice within the field. Prerequisites: REL 4610, RLG 5617, REL 3695, SYD 4606.

RLG 5911 Independent Research (1-5). Topics are selected to meet the academic needs of the individual student. Prerequisites: Permission of the instructor is required.

RLG 5932 Sacred Image, Sacred Space in Indian Religions (3). Seminar on sacred images and architecture of South Asian religions-Hindu, Jain, Buddhist, and Muslim. Connects visual culture and devotional practices.

RLG 5934 Graduate Pedagogy (1-3). Advanced work in Religious Studies pedagogy, including classroom teaching, assignment development and grading, and seminar discussion of pedagogical issues.

RLG 5937 Special Topics (3). Topics will be selected to meet the academic needs of groups of students.

RLG 5945 Internship in Sephardic and Oriental Jewry (1-3). Work and study with the leadership of and research one of the Sephardic and Oriental communities in Florida. This serves as field study in which the classroom learning comes alive. Prerequisites: REL 4610, RLG 5617, REL 3695, SYD 4606.

RLG 6013 Modern Analysis of Religion: Classic Texts in Religious Studies (3). Surveys history of religious approaches to religion (Eliade, Otto), social scientific approaches to religion (Freud, Durkheim, Weber, Geertz), and postmodern / poststructuralist approaches (Foucault, de Certeau, Baumann, Braudillard, Butler etc.). Prerequisites: Graduate standing or permission of the instructor.

RLG 6094 Seminar in Religious Fundamentalism (3). Evolution of Fundamentalism from inception to our times as it began to encompass a wider umbrella of global organizations with a focus on the 3 Abrahamic traditions and advanced analysis of their texts.

RLG 6096 Advanced Religious Fundamentalism: A Viewpoint for National Security (3). Evolution of Fundamentalism from inception to our time as it began to encompass a wider umbrella of global organizations with a focus on the 3 Abrahamic traditions and advanced analysis of their texts.

RLG 6097 Muslim Concepts of War: A Perspective for National Security (3). Intended to acquaint students with the history and development of Muslim concepts of war prepare them to make meaningful contributions to policy deliberations.

RLG 6175 Ethics and Development (3). Examines problems in development programs, such as bribery and corruption, labor rights, child labor, gender justice, environmental sustainability, from both religious and secular justice traditions.

RLG 6176 Religions and Human Rights (3). Examines sources of human rights theory in the West and compares it to a variety of religious conceptions of the rights of human beings.

RLG 6195 Sociological Approaches to Religion (3). Sociological Method/Theory in religious studies scholarship on religious ritual around life cycle events. Individual and group projects. Prerequisites: Graduate standing or permission of the instructor.

RLG 6285 Biblical Archaeology (3). Introduces the methods used in archaeological excavations. Finds from the Bronze Age to the Greco-Roman period are examined for the ways they bring new understanding to the texts of the Bible. Prerequisites: Graduate standing or permission of the instructor.

RLG 6319 Seminar in Asian Religions (3). Asian religious traditions, texts, rituals, or artifacts. May be repeated with change in content. Prerequisites: Graduate standing or permission of the instructor.

RLG 6322 Seminar in Western Religions (3). Similarities and differences in the three Western monotheistic religions of Judaism, Christianity and Islam during their historical development. Prerequisites: Graduate standing or permission of the instructor.

RLG 6332 Studies in Modern Hinduisms (3). Research methods and theory in the study of modern Hindu movements and issues in contemporary Hinduism.

RLG 6348 Seminar on Tibetan Buddhism (3). Study of influential Tibetan texts in their historical contexts. Prerequisites: REL 4340 or REL 3344 or equivalent or permission of instructor.

RLG 6349 Seminar on Pali Buddhism (3). The "original" teachings of the Buddha as preserved in the Pali Tipitaka and its commentaries readings in translation. Students knowing Pali will work with instructor. Prerequisites: REL 4340 or equivalent or permission of instructor.

RLG 6442 Religion in the Contemporary World (3). Society and religion in processes of secularization and

pluralism. Attention to religious interpretations of sociocultural processes. Prerequisites: Graduate standing or permission of the instructor.

RLG 6697 Indian Judaism (3). The stories, rituals, interactions and identities of four Indian Jewish communities and their implications for Indo-Israeli relations and contemporary American Judaism. Prerequisite: Graduate standing.

RLG 6921 Colloquium (1). Students attend a minimum of three lectures, conferences, or professional presentations, with seminar report and discussion. May be repeated. Prerequisite: Graduate standing.

RLG 6930 Pedagogy Workshop (1). Two-day teaching workshop offered by the Academy for the Art of Teaching. Prerequisite: Graduate standing.

RLG 6931 Pedagogy Seminar (1). Provide Teaching Assistants with pedagogical skills, such as lecture preparation, exam preparation and grading, advising and small group work. Prerequisite: Graduate standing.

RLG 6935 Seminar in Sacred Texts (3). Sacred texts with a common theme from several religions. Problems of interpretation are a central concern. Prerequisites: Graduate standing or permission of the instructor.

RLG 6938 Pedagogy Forum (1). Students attend at least six (6) teaching forums for certificate offered by the Academy for the Art of Teaching. Prerequisite: AAT Summer Teaching Workshop.

RLG 6940 Teaching Religious Studies (3). Assist the instructor in an introductory course and attend seminar meetings. Topics: 'faith' vs 'objectivity' in the classroom; student diversity; religious studies as a profession; designing an introductory course. Prerequisites: Graduate standing or permission of the instructor.

RLG 6942 Teaching Internship (1-3). Advanced work in Religions Studies pedagogy, including classroom teaching, assignment development and grading, and seminar discussion of pedagogical issues. Prerequisite: Graduate standing.

RLG 6946 Advanced Field Work in Jain Studies (3). Supervised field work among Jain communities and institutions in India and in the Jain Diaspora. Prerequisites: Graduate standing, IRB project clearance, CU.

RLG 6971 Thesis (1-6). For students working on the thesis for the M.A. in Religious Studies. Prerequisites: Graduate standing and permission of the instructor.

RLG 6972 Thesis Proposal Development (3). Elements of thesis construction, including thesis statement, feasibility research, bibliography, methodology. Initial 3 credits of thesis may be required for some students by GPD and thesis advisor. Prerequisite: Permission of instructor.

SRK 5001 Sanskrit Exegesis I (3). Application of both modern and traditional interpretations of selected readings from classical Sanskrit texts. Prerequisites: SRK 2101 or permission of the instructor.

SRK 5002 Sanskrit Exegesis II (3). Reading of extended classical Sanskrit text (such as the Bhagavad Gita) with attention to exegetical methods, philology and advanced

grammar. Prerequisites: SRK 5001 or permission of the instructor.

SRK 5003 Sanskrit III: Reading Epic Sanskrit (3). Sanskrit grammar, its rules of transliteration and translation. The pronunciation and reading skills will be trained. Prerequisites: SRK 5002 or instructor permission.

SRK 5006 Sanskrit IV: Advanced Sanskrit Reading (3). Introduces techniques to read advanced styles of Sanskrit literature such as court poetry or philosophy. May be repeated with change in emphasis. Prerequisites: SRK 5003 or instructor permission.

SRK 5004 Introduction to the Prakrit Languages (3). Phonology, morphology and grammar of the Prakrit languages with emphasis on building reading competency in Buddhist and Jain literatures. Prerequisites: SRK 3202 or SRK 5202 or permission of the instructor.

SRK 5005 Advanced Prakrit Reading (3). Intensive reading of a text in a selected Prakrit language with emphasis on cultivating advanced reading techniques and the development of a research project. May be repeated with change in content. Prerequisites: SRK 3202 or SRK 5202 and SRK 5004, or permission of the instructor.

SRK 6106 Sanskrit II (3). Sanskrit grammar rules, rules of tense, rules of transliteration and translation.

Certificate Programs

Academic Certificates in:

African and African Diaspora Studies
 Afro-Latin American Studies
 Asian Globalization
 Asian Studies
 Conflict Resolution and Consensus Building
 European and Eurasian Studies
 Homeland Security and Emergency Management
 Human Resource Policy and Management
 Iberian Studies
 International and Comparative Public Administration
 Japanese Studies
 Latin American and Caribbean Studies
 Middle East and Muslim World Studies
 National Security Studies
 Nonprofit and Community Development
 Public Finance, Procurement, and Contract Management
 Public Management
 Religious Studies
 Urban Policy Innovations

African & African Diaspora Studies Graduate Certificate Program

Faculty:

Iqbal S. Akhtar, Associate Professor, *Religious Studies and International Relations*
Pascale S. Bécel, Associate Professor and Chairperson, *Modern Languages*
Jean-Robert J. Cadély, Associate Professor, *Modern Languages and African & African Diaspora Studies*
Phillip Carter, Associate Professor, *English and Linguistics; Director, Center for the Humanities in an Urban Environment*
John F. Clark, Professor, *Politics and International Relations*
Alexandra Cornelius, Associate Teaching Professor; *Director, Center for Women's and Gender Studies*
Jenna M. Gibbs, Associate Professor, *History*
Percy C. Hintzen, Professor, *Global and Sociocultural Studies*
Tometro Hopkins, Associate Professor, *English*
Keisha McIntyre-McCullough, Clinical Assistant Professor, *Teaching and Learning; Graduate Program Director, African and African Diaspora Studies*
Assefa Melesse, Associate Professor, *Earth and Environment*
Roderick Paul Neumann, Professor, *Global and Sociocultural Studies*
Ulrich Oslender, Associate Professor, *Global and Sociocultural Studies*
Okezi T. Otovo, Associate Professor, *History and African & African Diaspora Studies; Graduate Program Director, History*
Tudor Parfitt, Research Professor, *Religious Studies*
Vrushali B. Patil, Associate Professor, *Global and Sociocultural Studies and Women's and Gender Studies; Chairperson, Global and Sociocultural Studies*
Valerie L. Patterson, Clinical Associate Professor, *Public Administration; Director, African and African Diaspora Studies*
Andrea Queeley, Associate Professor, *African and*

African Diaspora Studies and Global and Sociocultural Studies.

Jean Muteba Rahier, Professor, *Global and Sociocultural Studies and African and African Diaspora Studies*
David Rifkind, Associate Professor, *Architecture*
Heather Russell, Professor, *English and Senior Associate Dean of the School of Environment, Arts and Society and Society*
Derrick Scott, Assistant Teaching Professor, *Global and Sociocultural Studies*
Vicky Silvera, Special Collection, *Library*
Chantalle F. Verna, Associate Professor, *History and Politics and International Relations*
Donna Weir-Soley, Associate Professor, *English*
Kirsten E. Wood, Associate Professor, *History*
Albert Kafui Wuaku, Associate Professor and Graduate Program Director, *Religious Studies*

The African & African Diaspora Studies (AADS) Graduate Certificate seeks to provide graduate-level multidisciplinary instruction in the diverse fields of African and African Diaspora Studies. Specifically, the Certificate seeks to provide students with an interdisciplinary approach to the study of the global, economic, cultural, and historical experiences of people of African descent, both in Africa and in the Diaspora. The Certificate complements students' work in their major fields of study. Thanks to the diversity of areas of research interests of the core and affiliate AADS faculty, students may choose courses that will allow them to focus more specifically on either U.S. born African Americans, Continental Africans, or communities of the African diaspora internationally. Students may also choose courses that will bring them to learn about all three or any other combination of these areas. This certificate program is open to degree-seeking students only.

Certificate Requirements: (15 credits)

Required Course

AFA 5005	African and African Diaspora Studies Theory (Offered every fall semester)	3
----------	---	---

The 12 remaining credit hours may be drawn from courses in the Humanities and Social Sciences as listed below. Note that students are expected to complete 6 credits from each list. Students should consult with advisors since new courses are frequently added, and special topic courses sometimes concern Africa and the African Diaspora. Students may also select other courses not listed below with approval from the Director of AADS or from the Director of AADS Graduate Programs after submitting the appropriate syllabus. Not all courses are offered every semester.

List I: The Humanities

Students must choose between 6 and 9 credits from the list below:

AFA 5932	Special Topics in African and African Diaspora
AFA 5107	Teaching the African American Experience
AFA 5341	Health Issues in the African World
AFA 6245	The African Diaspora in Latin America
AFH 5905	Readings in African History
AFH 5935	Topics in African History
FRE 5508	La Francophonie
HAI 5235	Haitian Creole Seminar

LIN 6602	Language Contact
LIT 5359	African Diaspora Women Writers
LIT 5358	Black Literature and Literacy/Cultural Theory
MUH 5025	History of Popular Music in the United States
MUH 5067	Music of the Caribbean
RLG 5122	African-American Religion
RLG 5372	The Globalizing of African Spirituality
RLG 5384	Rasta, Vodou, Santeria
RLG 5488	Theology and Liberation Movements
SPN 5536	Afro-Cuban Culture
SPN 5539	Special Topics in Afro-Hispanic Culture
SPW 5776	Black Literature in Latin America
SPW 6368	19th Century Spanish-Caribbean Narrative
WOH 5237	The African Diaspora Since the End Of the Slave Trade
WOH 5236	The Transatlantic Slave Trade and the Making of the African Diaspora, 1441-1807

List II: The Social Sciences

Students must choose between 6 and 9 credits from the list below:

AFA 5600	National and Transnational Policy Analysis: The African Diaspora
AFA 6851	Advanced Seminar in African and African Diaspora Studies
AFA 6217	Sex, Race, and Power in European Colonialisms
SYD 6796	Sex, Race, and Power in Colonial Times
ANG 6473	Diasporas, Migration, and Globalization
ANG 5397	Advanced African Diaspora Cultures and Performativity
ANG 5396	Representations of Africa and Africans in Films
ANT 6319	The African Diaspora: Anthropological Perspectives
CPO 5325	Politics of the Caribbean
CPO 6350	Seminar in Brazilian Politics
CPO 6376	Seminar in Central American Politics
CPO 6206	Seminar in African Politics
CYP 6766	The Psychology of Crosscultural Sensitization in a Multicultural Context
ECS 5406	Latin American Economies
ECS 6436	The Economies of Caribbean Migration
ECS 7435	Economics of the Caribbean
INR 5087	Ethnicity and the Politics of Development
INR 5255	Seminar in African Development
INR 6936	Seminar in Inter-American Politics
SYD 6705	Comparative Analysis of Ethnicity and Race

Graduate Certificate in Afro-Latin American Studies

Coordinating Committee

Ulrich Oslender, *Global & Sociocultural Studies*

Okezi Otovo, *History and African & African Diaspora Studies*

Jean Muteba Rahier, *Global & Sociocultural*

Studies and African and African Diaspora Studies
Vicky Silvera, *Head, Special Collections, Library*

African and African Diaspora Studies (AADS) encompasses the study of, and research on, the peoples of Sub-Saharan Africa and their experiences, and on communities of the African diaspora both in continental Africa and elsewhere in the Americas, Europe, Asia, and Australia. It also involves the dissemination of knowledge about Sub-Saharan continental African peoples and diasporic Africans internationally. Housed within the Steven J. Green School of International and Public Affairs, and more specifically in the African & African Diaspora Studies Program (AADS), the Afro-Latin American Studies Graduate Certificate provides students with an interdisciplinary approach to the study of the global, economic, cultural, and historical experiences of all peoples of African descent in the Latin American region. We understand these communities of the African diaspora in Latin America have encompassing both those communities issued from the Transatlantic slave trade and their descendants, and more recent migration movements. The Certificate complements students' work in their major fields of study at the graduate level while fostering greater understanding of traditionally marginalized topics. Thanks to the diversity of areas of research interests of the core and affiliate AADS faculty, students will be able to choose courses that focus more specifically on Afro-Latin Americans living in both the region and in other geographic areas where Afro-Latin Americans have migrated to.

The Certificate places a strong emphasis on Afro-Latin American cultural expressions in all their national, sub-regional, temporal, and socioeconomic diversities. It offers coordinated insights into the ongoing challenges Afrodescendant communities face locally, nationally, and internationally. It also focuses on the ways in which Afro-Latin American communities and individuals have developed political and creative strategies for survival in the midst of, and resistance to, racism and political, economic, and social oppression. The Certificate will provide numerous opportunities for enrolled students to explore Afro-Latin American populations in economic processes of various kinds, underlining the specific challenges they might face. The Certificate is based on a number of courses that can be combined as described below, and that come from both the social science and humanities. This certificate program is open to degree-seeking students only.

Certificate Requirements (18 credits)

General Requirements

Students complete 18 credit hours of study from disciplines as diverse as geography, history, international relations, journalism, sociology, anthropology, literature, music, and political science. The two required courses (6 credits) should be taken at the start of the Certificate Program. The other 12 credits must come from the elective courses, comprising both Arts and Humanities courses, and Social Sciences courses. The program director may approve other courses upon request. Students requesting an exception from these lists must present a syllabus for the course they would like to enroll in, prior to enrollment. The courses considered for such an

exception should have at least a 35% Afro-Latin American content. Not all courses are offered every semester.

Required Core Courses: (6 credits)

AFA 5005	African and African Diaspora Studies Theory and
AFA 6245	The African Diaspora in Latin America

Electives (Arts and Humanities, Social Sciences) Courses: (12 credits)

AFA 5302	Africana Visual Arts
AFA 5600	National and Transnational Policy Analysis: The African Diaspora (with relevant course focus)
AFA 5932	Special Topics in African and African Diaspora Studies (with relevant course focus)
AFA 6325	Pedagogy in the African Diaspora: Literacy, Culture, Race and Gender (with relevant course focus)
AFA 6905	Independent Study (with relevant course focus)
AFA 6911	Research Paper / Proposal Writing in African and African Diaspora Studies (with relevant course focus)
AFA 6920	African and African Diaspora Studies Graduate Colloquium
AFA 6940	Community Project/Internship Research in African and African Diaspora Studies (with relevant course focus)
ANT 6319	The African Diaspora: Anthropological Perspectives
ANG 5396	Representations of Africa and Africans in Films
ANG 5397	Advanced African Diaspora Cultures and Performativity
ANG 6339	Seminar on Latin America (with relevant course focus)
ANG 6472	Anthropology of Globalization (with relevant course focus)
ANG 6473	Diasporas, Migration, and Globalization
ECS 5406	Latin American Economies
LAS 5907	Independent Study (with relevant course focus)
LAH 5905	Readings in Latin American History (with relevant course focus)
LAH 5935	Topics in Latin American History (with relevant course focus)
LAH 6906	Advanced Readings in Latin American History (with relevant course focus)
LAH 6915	Research in Latin American History (with relevant course focus)
LAH 6932	Research Seminar in Latin American History I (with relevant course focus)
LAH 6933	Research Seminar in Latin American History II (with relevant course focus)
RLG 5384	Rasta, Vodou, Santeria
RLG 5488	Theology and Liberation Movements
SPN 5536	Afro-Cuban Culture
SPN 5539	Special Topics in Afro-Hispanic Culture
SPW 5776	Black Literature in Latin America
SPW 6368	19 th Century Spanish-Caribbean Narrative
SYD 6626	Cuba Seminar
WOH 5237	The African Diaspora Since the End of the Slave Trade

WOH 5236

The Transatlantic Slave Trade and the Making of African Diaspora, 1441-1807

Graduate Certificate in Asian Globalization

Steven Heine, *Director, Asian Studies*

Coordinating Committee

Oren Stier, *Religious Studies*

Matthew David Marr, *Global and Sociocultural Studies*

Mitzi Carter, *Asian Studies and Global and Sociocultural Studies*

Mohiaddin Mesbahi, *Politics and International Relations*

This certificate program offers a 15-credit sequence of courses that provides graduate students with an in-depth learning experience of an increasingly important region in comparison with another world region such as Africa, Europe, Latin America or the Middle East. The program requires students to take 9 credits of courses in Asian studies in addition to 6 credits of courses in another specific region. This program allows students the opportunity to study thematic issues related to Asia such as migration, identity, trade, education, technology, environment, and international affairs from a multidisciplinary, multiregional approach. This certificate program is open to degree-seeking students only.

Certificate Requirements (15 credits)

Electives in Asian Studies: (9 credits)

Three courses in Asian Studies. Can be ASN or other prefix. See Sample listing of courses below.

Electives in Globalization: (6)

See sample listing of courses below. For additional courses in other world regions inquire with the Department.

Sample Courses in Asian Studies

Courses in studies of Asia or a sub region. Choose from the following list (additional courses will be considered):

ASH 5446	Readings in Japanese History
ASH 5905	Readings in Asian History
ASN 5120	Religion and Society in Japan
ASN 5130	Zen and the Arts
ASN 5131	Zen and the Arts II
ASN 5171	International Relations of Contemporary China
ASN 5211	Asian Cultures and Influences
ASN 5306	Applying Asian Cultural Values in Business
ASN 5605	Silk Road: Then and Now
ASN 5815	Studies of East Asian Texts
ASN 5910	Independent Research in Asian Studies
ASN 5932	Special Topics in Asian Studies
ASN 6930	Seminar in Asian Studies
ECO 5206	Economics of Asia
INR 5544	The New Asian Century
INR 5086	Islam in International Relations
RLG 5346	Seminar on Buddhism
RLG 5352	Religions of East Asia
RLG 6319	Seminar in Asian Religions
SYD 6655	Seminar on Social Change in Asia

Sample of Courses in Globalization**African Studies**

AFH 5905	Readings in African History
CPO 6206	Seminar in African Politics
INR 5255	Seminar in African Development
RLG 5372	African Spirituality
ANT 6319	African Diaspora: Anthropological Perspectives

European Studies

ARH 5663	Graduate Art in Spain and Her Colonies
ENG 5220	Major British Literary Figures
ENL 5505	Periods in English Literature
EUH 5905	Readings in European History
EUH 5935	Topics in European History

Latin American Studies

ARH 5671	Seminar in 20th Century Latin American Art
LAH 5905	Readings in Latin American History
LAS 6003	Survey of Latin America
LAS 6017	Intelligence Issues in Latin America
INR 6936	Seminar in Inter-American Politics

Middle Eastern Studies

HIS 5930	Special Topics
CPO 6407	Seminar in Politics of the Middle East
INR 5086	Islam in International Relations
INR 5275	International Relation of the Middle East

In addition to the courses listed above, relevant special topics, independent study, study aboard credits, and area studies or comparative studies may also be applied.

Language

Language proficiency as appropriate for student's area specialization.

For more information, contact the Asian Studies office, SIPA 505. Email: asian@fiu.edu; phone: (305) 348-1914; website: <http://asian.fiu.edu>.

Graduate Certificate in Asian Studies

Steven Heine, *Director, Asian Studies*

Coordinating Committee

Matthew David Marr, *Global and Sociocultural Studies*

Jin Zeng, *Politics and International Relations*

The objective is to provide interdisciplinary graduate instruction in international/global studies that requires specialization in Asia or a sub-region such as East, South, Southeast, or Central Asia. The program is geared towards students whose studies emphasize a traditional area studies approach to culture and society. This certificate program is open to degree-seeking students only.

Certificate Requirements: (15 credits)

Five courses in Asian Studies. This can include courses on global or comparative topics that have a significant component on Asia. See sample listing of courses below:

ASH 5446	Readings in Japanese History
ASH 5905	Readings in Asian History
ASN 5120	Religion and Society in Japan
ASN 5130	Zen and the Arts
ASN 5131	Zen and the Arts II
ASN 5171	International Relations of Contemporary China

ASN 5211	Asian Cultures and Influences
ASN 5306	Applying Asian Cultural Values in Business
ASN 5605	Silk Road: Then and Now
ASN 5815	Studies of East Asian Texts
ASN 5910	Independent Research in Asian Studies
ASN 5932	Special Topics in Asian Studies
ASN 6930	Seminar in Asian Studies
ECO 5206	Economics of Asia
INR 5544	The New Asian Century
INR 5086	Islam in International Relations
RLG 5346	Seminar on Buddhism
RLG 5352	Religions of East Asia
RLG 6319	Seminar in Asian Religions
SYD 6655	Seminar on Social Change in Asia

For more information, contact the Asian Studies office, SIPA 505. Email: asian@fiu.edu; phone: (305) 348-1914; website: <http://asian.fiu.edu>.

Graduate Certificate in Conflict Resolution and Consensus Building

Judith Bernier, *Director, Center for Labor Research and Studies*

Faculty:

Danay Barata, *Labor Studies*

Nora Femenia, *Labor Studies*

George Gonos, *Labor Studies*

Abdolrahim Javadzadeh, *Labor Studies*

Gleema Nambiar, *Labor Studies*

Raquel Perez, *Communications*

The Conflict Resolution and Consensus Building Certificate offers students at the post-baccalaureate level the opportunity to pursue an interdisciplinary concentration in the study of conflict resolution and to gain an intellectual background in the theories and methodologies of conflict resolution and consensus building. The certificate enhances interdisciplinary connections among Business, Criminology, Education, Human Resource Management, International Relations, Labor Studies, Law, Political Science, Psychology, Public Administration, Sociology, Women's and Gender Studies, and complements studies in other areas. This certificate program is open to both degree- and non-degree seeking students.

Certificate Requirements

Students are required to take 15 credit hours (5 courses) of graduate level course work outlined below.

Two Required Core Courses: (6 credits)

LBS 5465	Mediation Techniques
LBS 5485	Fundamentals of Conflict Resolution

One Course from the list of classes: (3 credits)

LBS 5155	Workplace Diversity
LBS 5215	Women in the Workplace
LBS 5466	Family Mediation
LBS 5467	Civil Mediation
LBS 5486	Dynamics of Conflict Management
LBS 5488	Organizational Conflict and Dispute Resolution Systems
LBS 6945	Internship in Labor Studies/Alternative Dispute Resolution

Two Electives: (6 credits)

The courses should be understood to be a partial list; students should consult with the advisor of the certificate program about current course offerings. Students are required to take courses from a minimum of two departments. Other related courses may be accepted as electives pending approval from the Labor Center Director.

Labor Studies

LBS 5155	Workplace Diversity
LBS 5215	Women in the Workplace
LBS 5406	Collective Bargaining and Labor Relations
LBS 5464	Labor Arbitration
LBS 5466	Family Mediation
LBS 5486	Dynamics of Conflict Management
LBS 5488	Organizational Conflict and Dispute Resolution Systems
LBS 5507	Labor and Employment Law
LBS 5930	Topics in Labor Studies
LBS 5931	Topics in the Philosophy and Methods of Conflict Research or an equivalent research course
LBS 6906	Directed Individual Study
LBS 6945	Internship in Labor Studies/Alternative Dispute Resolution

Communication

MMC 6213	Ethics and Social Responsibility
MMC 6402	Theories of Mass Communication
PUR 5476	Communication for Change Management
PUR 6477	Strategic Facilitation
PUR 6607	Global Strategic Communication Management

Education

ADE 5387	Organizational Learning and Human Resource Development
ADE 6180	Organizational and Community Processes in AE/HRD
ADE 6260	Management of AE/HRD Programs
EDA 6225	Labor Relations in Education
EDA 6232	School Law
EDA 7233	Ethics and Educational Leadership
EDF 5880	Intercultural Education: National and International Perspectives
EDF 6365	Cultural Identities and Conflict
EDF 6366	Conflict Resolution: Negotiation-Based Perspectives
EDF 6367	Interactive Conflict Resolution: A Third-Party Perspective
EDF 6658	Selected Topics in International Development Education: Current Policy Issues and Problems
EDG 5707	Cultural and Cross-Cultural Studies
EDH 6055	Access and Choice in Higher Education
EDH 7405	Advanced Seminar on Law and Higher Education
EDS 6050	Supervision and Staff Development

Global and Sociocultural Studies

ANT 6302	Gender Identity in Comparative Perspective
ANT 6319	The African Diaspora
SYD 5447	Sociology of International Development
SYD 6236	International Migration and Refugees
SYD 6325	Seminar in Comparative Sociology of Gender

SYO 6536	Comparative and Global Inequality
SYD 6625	South Florida Socio-Cultural Systems
SYD 6705	Comparative Systems of Ethnicity and Race
SYP 6907	Comparative and Global Social Change

Hospitality

HMG 5547	Leadership Training for Team Building
HMG 6225	Multicultural Human Resources Management for the Hospitality Industry
HMG 6226	Motivation and Leadership
HMG 6246	Organizational Behavior in the Hospitality Industry

International Relations

INR 5007	Seminar in International Politics
INR 5xxx	International Negotiations and Conflict Resolution
INR 5062	War, Peace and Conflict
INR 5086	Islam and International Relations
INR 5087	Ethnicity and the Politics of Development
INR 5105	American Foreign Policy
INR 5275	International Relations of Middle East
INR 5315	Foreign Policy Making
INR 5409	International Relations Law I
INR 5507	International Organizations I
INR 6092	Seminar on Non-State Actors
INR 6089	International Relations and Human Rights
INR 6107	U.S. Foreign Policy: Processes and Institutions
INR 6338	Seminar in Strategic Studies
INR 6606	Political Psychology of International Relations
INR 6705	Seminar in International Political Economy

Management

MAN 6121	Interpersonal Behavior and Analysis
MAN 6209	Organizational Design and Behavior
MAN 6295	Conflict in Organizations
MAN 6405	Labor Relations
MAN 6411	Collective Bargaining Topics
MAN 6601	International Management
MAN 6615	International Labor-Management Relations
MAN 6703	Colloquium In Managing Organizational Ethics

Politics and International Relations

POS 5045	Seminar in American Politics
POS 5146	Seminar in Urban Politics
POS 5326	Seminar in Class Analysis
POS 5932	Topics in Urban Politics

Psychology

CYP 5534	Groups as Agents of Change
CYP 6766	The Psychology of Cross-cultural Sensitization in a Multi-cultural Context
SOP 6752	Psychology of Juries

Public Administration

PAD 5043	Equitable and Inclusive Governance
PAD 5427	Collective Bargaining in the Public Sector
PAD 6028	Policy Analysis and Planning
PAD 6417	Human Resource Policy and Management

PAD 6436	Professionalism and Ethics
PAD 6434	Leadership in Decision Making

Public Health

PHC 6115	International Public Health
PHC 6311	Environmental Health Risk Assessment
PHC 6355	Environmental Health and Safety
PHC 6356	Fundamentals of Industrial Hygiene

This multidisciplinary certificate brings together faculty expertise and student interest in European and Eurasian Studies. This Certificate is open to our Master's and Doctoral students and requires at least 15 credits of course work on Europe, from at least two disciplines. Certificate students are asked to take a variety of courses with European and Eurasian content from a number of disciplines that reach across the humanities, social sciences and the arts. This Graduate Certificate is designed so that students can demonstrate substantive knowledge about specific aspects of European culture, history, politics, economics and society, as well as demonstrate language competency and gain a broader understanding of Europe, the EU and its relationship to other parts of the globe.

This certificate program is open to degree-seeking students only. The program is ideal for students interested in a broader, multidisciplinary area studies perspective. At 15 credits (5 courses) this program provides both an overview of European history, culture, societies and politics and more nation-specific knowledge and training, as per the interests and goals of our students.

Admission Requirements

1. Baccalaureate degree from an accredited institution for higher education (or equivalent);
2. Minimum cumulative grade point average of 3.0 on a 4.0 scale (or equivalent) for the last two years of undergraduate work.

Prescribed Courses and Other Requirements

Students must take five European-content classes in at least two academic disciplines (different course prefixes). Available courses will be listed on our website www.europe.fiu.edu each semester. All students are to choose from the courses listed below and earn a grade of "B" or better. These courses represent a partial list. Courses not included on the semester lists of approved courses may count toward meeting the requirement of the

certificate only with the permission of the certificate director.

Sample Courses in European Studies**Social Sciences:**

CPO 6105	Politics of the European Union	3
CPO 6106	Seminar on European Politics	3
CPO 5091	Seminar in Comparative Politics	3
ECO 7617	Seminar in Economic History	3
INR 5507	International Organizations I	3
INR 6010	Global Governance	3

Humanities:

ENL 5220	Major British Literary Figures	3
EUH 5935	Topics in European History: Women & Gender in Europe	3
EUH 5935	Topics in European History: Russian Revolution	3
EUH 5905	Readings in European History: Early Modern Court Societies	3
EUH 5905	Readings in European History: European Historical Film	3
EUH 6932	Research Seminar in European History	3
FRW 5934	Special Topics in Language Literature	3
FRW 5938	Graduate Seminar on French Literature	3
RLG 5515	History of Early Christianity	3
RLG 5619	Holocaust Representations: Religion and Remembrance	3

Once all requirements have been fulfilled and graduation completed, the Graduate Certificate in European and Eurasian Studies will be awarded

For more information, contact the European and Eurasian Studies office, SIPA 513.

Graduate Certificate in Homeland Security and Emergency Management

Susannah Ali, *Co-Chair and MPA Director*

Nazife Emel Ganapati, *Co-Chair*

The Graduate Certificate in Homeland Security and Emergency Management is designed to provide critical analytic skills to "first-responders" and those in related fields. The certificate will help professionals navigate a complex intergovernmental policy framework with an eye to best practice allocation of scarce local and regional resources devoted to preventing or mitigating the potential impacts of natural and human-made perils. Coursework will focus on the roles and responsibilities of public, nonprofit, and private organizations in the context of South Florida's vulnerable operating environment. The content of this certificate is aligned with FIU's urban mission of providing engaged learning in its service as well as the Departmental mission of our accredited Master of Public Administration (MPA) program which primary student body is in the local government sector. This certificate program is open to degree seeking students only.

Admissions

All applicants must hold a baccalaureate degree from an accredited college or university and have an upper division GPA of at least 3.0. Applicants with GPA lower than 3.0 may be considered if they submit a GRE, LSAT or GMAT Score. Students must be admitted to the certificate

program to start taking classes. Admission to a certificate does not guarantee admission to the Master of Public Administration (MPA) program.

Note: Those students who apply for and are admitted to the Master of Public Administration degree program may have certificate courses credited toward the MPA degree provided each course has a grade of "B" or higher and the student is admitted to the master's degree program prior to the completion of no more than 12 Graduate Certificate credits.

Certificate Requirements (15 credits)

Required: (9 credits)

URP 5426	Emergency Management and Planning	3
PAD 6399	Homeland Security Management for State and Local Government	3
PAD 6379	Homeland Security Risk Assessment	3

Electives: (6 credits)

Certificate students who are not also MPA students must take PAD 6907 (Independent Study) as a certificate capstone. If they do, they will only have to take one additional elective course (3 credits).

URP 6315	Introduction to Urban Planning and Growth Management	3
PAD 5443	The Public Administrator and Media Relations	3
PAD 5043	Equitable and Inclusive Governance	3
PAD 6605	Administrative Law and Procedures	3
PAD 6710	IT and E-government	3
PAD 6717	GIS Applications for Urban Management	3
CPO 6771	Politics of Disaster	3
DSC 6020	Terrorism and Homeland Security	3
EVR 5122	Natural Disasters and Social Vulnerability	3
GIS 5050	Environmental GIS	3
INR 5066	Global and Human Security	3
INR 6067	Human Security	3
MAN 6706	Crisis Management	3
PHC 6251	Disaster and Emergency Epidemiology	3
PHC 6374	Environmental Disasters and Human Health	3
SYG 6932	Special Topics in Disaster Studies	3
PAD 5934*	Contemporary Issues in Public Administration	3
PAD 6946	Public Administration Internship	0-3

Students may take up to two electives outside the Department. These electives must be selected from a list of approved electives or must be approved by Certificate Co-Chairs.

*Depending on the topic of the course and pending MPA Program approval, PAD 5934 (Contemporary Issues) may be counted as a certificate elective.

Graduate Certificate in Human Resource Policy and Management

Susannah Ali, *Co-Chair and MPA Director*
Valerie Patterson, *Co-Chair*

Human Resource Policy and Management is designed to give graduate students a range of policy-analysis and management skills. It provides training in alternative personnel systems, (civil service, collective bargaining,

privatization and service contracting), personnel techniques for productivity improvement, current issues, and ethics and professionalism. This certificate emphasizes the application of behavioral science concepts and techniques to employers in a multicultural context. This certificate program is open to degree seeking students only.

Admissions

All applicants must hold a baccalaureate degree from an accredited college or university and have an upper division GPA of at least 3.0. Applicants with GPA lower than 3.0 may be considered if they submit a GRE, LSAT or GMAT Score. Students must be admitted to the certificate program to start taking classes. Admission to a certificate program does not guarantee admission to the Master of Public Administration (MPA) program.

Note: Those students who apply for and are admitted to the Master of Public Administration degree program may have certificate courses credited toward an outside specialization in Human Resource Policy and Management. All the credits earned in a Graduate Certificate Program may be used in a master's degree program provided the student is admitted to the master's degree program prior to the completion of no more than 12 Graduate Certificate credits. All transferred courses must have a grade of 'B' or better.

Certificate Requirements (15 credits)

The following three courses are required

PAD 6156	Applied Organization Theory and Behavior	3
PAD 5427	Collective Bargaining and the Public Sector	3
PAD 6605	Administrative Law	3

Electives (6 credits)

Certificate Students who are not also MPA students must take PAD 6907 (Independent Study) as a certificate capstone. If they do, they will only have to take one additional elective course (3 credits).

PAD 5043	Equitable and Inclusive Governance	3
PAD 5435	Gender Equity and Leadership in Public Administration	3
PAD 5460	Performance Management	3
PAD 5616	Contracting and Managing Third Party Governments	3
PAD 6436	Professionalism and Ethics	3
PAD 6710	IT & E Government	3
PAD 5934*	Contemporary Issues in Public Administration	3
PAD 6946	Public Administration Internship	0-3

Students may take up to two electives outside the Department. These electives must be selected from a list of approved electives or must be approved by Certificate Co-Chairs.

*Depending on the topic of the course and pending MPA Program approval, PAD 5934 (Contemporary Issues) may be counted as a certificate elective.

Students must earn a minimum of 3.0 cumulative GPA. All course grades must be "C" or better.

Graduate Certificate in Iberian Studies

Coordinating Committee

Ana María Bidegain, *Religious Studies*

Annette B. Fromm, *Art History*

María Gómez, *Modern Languages*

This Graduate Certificate will consider the importance of Iberian cultures and their strong Mediterranean roots in the context of debates on European histories and societies. Likewise, it will strengthen the Latin American and Caribbean scholarly expertise of our university. The Certificate also fits very well within the university's strategic pillar and mission of globalization. In particular, the Iberian Peninsula, as well as the Mediterranean, constitute more than just a geopolitical space but rather represent a regional *mélange* connecting among a variety of cultures. These two regions also connect to the Caribbean and the larger Florida peninsula in various ways that could in turn translate into an innovative and unique program for the Green School's interdisciplinary focus. This certificate program is open to degree-seeking students only.

Certificate Requirements

Students must be enrolled in a Master or Ph.D. program at FIU. A total of 18 credit hours (6 courses) of graduate course work, with a cumulative GPA of 3.25 and a grade of "B" or higher in all courses applied toward certificate requirements.

Language Requirement

Students must be proficient in reading and comprehension of Spanish and/or Portuguese to be able to undertake research.

Required Courses

The Graduate Certificate in Iberian Studies is 18 credits. Four (4) courses required. NINE credits from among the participating disciplines, no more than one per discipline: History, Art History, Religious Studies, and Modern Languages plus THREE internship course credits.

History

EUH 5935 Topics in European History 3

Religious Studies

RLG 5565 Modern Catholicism 3

RLG 5628 Jewish Thought and Thinkers 3

RLG 5698 Sephardic and Oriental Jewry Colloquium 3

Modern Languages

Graduate Certificate in International and Comparative Public Administration

Susannah Ali, *Chair and MPA Director*

The Certificate in International and Comparative Public Administration is designed as a specialization for students interested in international policy and administrative affairs. The certificate program will expose students to international policy aspects such as globalization, immigration, information technology, transnational institutions and other related areas. This certificate program is open to degree seeking students only.

Admission Requirements

All applicants must hold a baccalaureate degree from an accredited college or university and have an upper division GPA of at least 3.0. Applicants with GPA lower than 3.0 may be considered if they submit a GRE, LSAT or GMAT Score. Students must be admitted to the certificate program to start taking classes. Admission to a certificate program does not guarantee admission to the Master's Degree in Public Administration (MPA) program.

In order to have certificate courses credited toward the MPA, each course must have a grade of 'B' or higher and the student must be admitted to the master's degree program prior to the completion of no more than 12 Graduate Certificate credits.

Program Requirements (15 credits)

Three Required Courses

PAD 6836 International Public Administration 3

PAD 6838 Development Administration 3

PAD 6436 Professionalism and Ethics 3

Electives (6 credits)

Certificate Students who are not also MPA students must take PAD 6907 (Independent Study) as a certificate capstone. If they do, they will only have to take one additional elective course (3 credits).

GEO 5557	Globalization	3	INR 5543	International Politics Economy of East Asia	3
GEO 6603	Cities and Regions in Global Perspective	3	INR 5544	The New Asian Century	3
INR 5507	International Organizations I	3	RLG 5352	Religions of East Asia	3

PAD 5934*	Contemporary Issues in Public Administration	3	Other courses can be approved by permission of the Program Director and Coordinating Committee.		
PAD 6946	Public Administration Internship	0-3	For more information, contact the Asian Studies office, SIPA 505. Email: asian@fiu.edu ; phone: (305) 348-1914; website: http://asian.fiu.edu .		

Students may take up to two electives outside the Department. These electives must be selected from a list of approved electives or must be approved by Certificate Co-Chairs.

*Depending on the topic of the course and pending MPA Program approval, PAD 5934 (Contemporary Issues) may be counted as a certificate elective.

Students must earn a minimum of 3.0 cumulative GPA. All course grades must be "C" or better.

Graduate Certificate in Japanese Studies

Steven Heine, *Director, Asian Studies*

Coordinating Committee

Matthew Marr, *Global and Sociocultural Studies*

Asuka Mashav, *Modern Languages*

Eric Messersmith, *Asian Studies*

The objective is to provide interdisciplinary graduate instruction in the culture and society of Japan within the context East Asian area studies. This program is available to students who are enrolled in the Asian Studies M.A., as well as students in other programs who wish to develop a specialized focus on Japan. This certificate program is open to degree-seeking students only.

Certificate Requirements: (15 credits)

Core Courses: (9 credits)

Three courses on Japanese Studies. See Sample listing below:

ARH 5550	Advanced Arts of China and Japan	3
ASN 5129	Religion and Society in Japan	3
ASN 5130	Zen and the Arts	3
ASN 5131	Zen and the Arts II	3
ASN 5315	Topics in Modern Asia	3
ASH 5446	Readings in Japanese History	3
FOW 5934	Special Topics in Language/Literature	3
JPN 5907	Independent Study	1-3
INR 5543	International Politics Economy of East Asia	3
SYD 5656	Global Japan	3

Electives: (6 credits)

Two courses on Asian or comparative studies. See sample listing below:

ASH 5905	Readings in Asian History	3
ASH 5930	Topics in Asian History	3
ASN 5050	Methods in Asian Studies	3
ASN 5211	Asian Cultures and Influences	3
ASN 5306	Applying Asian Cultural Values in Business	3
ASN 5815	Studies of East Asian Texts	3
ASN 5910	Independent Research in Asian Studies	1-6
ASN 5932	Special Topics in Asian Studies	3
ASN 6930	Seminar in Asian Studies	3

Graduate Certificate in Latin American and Caribbean Studies

Luis Guillermo Solis Rivera, *LACC, Interim Director*

Liesl Picard, *Associate Director*

Joseph Holbrook, *Director of Academic Programs*

José Miguel Cruz, *Director of Research*

LACC Faculty Advisory Board

Alejandro Alvarado, *Associate Professor, Journalism and Media, College of Communication, Architecture and the Arts*

Ligia Collado-Vides, *Senior Lecturer, Department of Biological Sciences, College of Arts, Sciences and Education*

Jose Miguel Cruz, *Director of Research, Kimberly Green Latin American and Caribbean Center*

Andrea Fanta Castro, *Associate Professor, Department of Modern Languages, Steven J. Green School of International and Public Affairs*

Leonardo Ferreira, *Professor and Worlds Ahead Scholar, Journalism and Mass Communication*

Joseph Holbrook, *Director of Academic Programs,*

Kimberly Green Latin American and Caribbean Center

Manuel Gómez-Law, *Associate Dean, International and Graduate Studies and Associate Professor, College of Law*

Hilary Landorf, *Director, Global Learning Initiatives and Associate Professor, College of Education*

Mark B. Padilla, *Professor, Global and Sociocultural Studies*

Ronaldo Parente, *Associate Professor, College of Business*

Bianca Premo, *Professor, Department of History, Steven J. Green School of International and Public Affairs*

Augusta Maria S. Vono, *Instructor of Portuguese, Modern Languages*

Gayle Williams, *Librarian, Information & Research Service, Library Operations, Latin America & Caribbean Information Services Librarian*

Offered through the Kimberly Green Latin American and Caribbean Center (LACC), this graduate certificate provides an interdisciplinary approach to the study of Latin America and the Caribbean. The certificate may be awarded to both degree and non-degree seeking students who complete the requirements. For students pursuing a degree, the certificate is a complement to the student's discipline or major area of studies. For non-degree seeking students, the certificate provides a means for understanding more about Latin America and the Caribbean without pursuing a longer degree program.

Certificate Requirements

1. A total of 15 credit hours of graduate course work with a grade of 'B' or higher. Courses must come from the approved Latin American and Caribbean Studies course listing or be approved by the certificate faculty advisor. Courses may include those in the student's departmental major, but must be selected from at least two disciplines outside the student's major. A student may elect to focus on a country, region, or topic for the certificate (such as political science, Cuban studies, international business, art history, migration, etc.) or pursue a broader selection of courses in a variety of disciplines.
2. Each student is required to demonstrate reading proficiency in either Spanish or Portuguese, or in another regional language such as French, Haitian Creole, or Dutch when justified by research interests. Proficiency is demonstrated by scoring at least 'intermediate-high' on the ACTFL/ETS exam for Spanish, Portuguese, or French. Corresponding tests of proficiency may be accepted upon approval of the graduate advisor.

NOTE: Intermediate-high on the ACTFL/ETS exam (1-plus on the US government scale) can normally be attained by students with two undergraduate semesters of basic language instruction and at least one undergraduate semester of intermediate (3000/4000 level) instruction. Attainment of the required language proficiency is the responsibility of the student and extra courses to achieve the required proficiency level must be taken outside the certificate curriculum.

All LACC approved courses are posted at <https://lacc.fiu.edu/academics/courses/graduate/>.

All courses listed from 5000 through 7000 series may be applied to the certificate.

Students interested in pursuing a Latin American and Caribbean Studies Graduate Certificate should contact the certificate advisor at (305) 348-2894 or email lacc@fiu.edu.

Graduate Certificate in Middle East and Muslim World Studies

Mohiaddin Mesbahi, *Director, Mohsin and Fauzia Jaffer Center for Muslim World Studies*

Coordinating Committee

Iqbal Akhtar, *Religious Studies/Politics and International Relations*

Daniel R. Alvarez, *Religious Studies*

Cyra Choudhury, *College of Law*

Eric S. Lob, *Politics and International Relations*

Benjamin N. Smith, *Global and Sociocultural Studies*

Terrence Peterson, *History*

The Middle East is the most significant and consequential region shaping contemporary world politics and dynamics. Strong knowledge of the Middle East is a major asset to graduates seeking employment in governmental institutions and the private sector, or going on to graduate school and into academia. The Graduate Certificate in Middle East and Muslim World Studies, which is offered through the Mohsin and Fauzia Jaffer Center for Muslim World Studies at Florida International University provides students with the opportunity for a rich multidisciplinary learning experience. Students have a choice of courses in

the fields of international relations, geography, history, political science, religious studies, sociology/anthropology, and modern languages, among others. The program defines the "Middle East" broadly, encompassing the study of adjacent regions including Central Asia and the larger Muslim world. For more information contact the Mohsin and Fauzia Jaffer Center for Muslim World Studies at Florida International University at the Steven J. Green School of International and Public Affairs, SIPA 528. Email: jaffercenter@fiu.edu; phone: (305) 348-1792; Website: jaffercenter.fiu.edu

Admission Requirements

Baccalaureate degree from an accredited institution for higher education (or equivalent), with a minimum cumulative grade point average of 3.0 for the last two years of undergraduate work, and current enrollment in an FIU graduate program. This certificate program is open to degree seeking students only.

Certificate Requirements:

A total of 18 credit hours of graduate course work, with a cumulative GPA of 3.0 and a grade of C or higher in all courses applied toward certificate requirements.

1) Core Requirements (6 credits):

Three credits from each group below.

Group A (3 credits):

CPO 6407	Seminar in Middle East Politics
INR 5275	International Relations of the Middle East
INR 5086	Islam in International Relations
INR 5276	IR of Iran and the Persian Gulf

Group B (3 credits):

INR 5086	Islam in International Relations
RLG 6097	Muslim Concepts of War: A Perspective for National Security
RLG 6094	Seminar in Religious Fundamentalism
RLG 6096	Advanced Religious Fundamentalism: A Viewpoint for National Security

Note: Students may choose to take additional courses from Groups A and B as "Electives".

2) Elective Courses (12 credits):

Four courses (12 credits) from the courses listed below:

ASN 5605	Silk Road: Then and Now
CPO 6084	War, Peace and the Military
HIS 5289	Comparative History*
HIS 5930	Special Topics in History*
INR 5352	Environment and Security
INR 5062	War, Peace and Conflict Resolution in INR
INR 5276	Graduate Seminar the International Relations of Iran and the Persian Gulf
RLG 5907	Independent Study in Sephardic and Oriental Jewry
INR 6266	Seminar in Russian Foreign Policy
INR 6338	Seminar in Strategic Studies*
RLG 5394	Jewish Mystical Texts
RLG 5360	Classical Arabic
RLG 5366	Advanced Interpretation of the Quran: Gender and Jihad
RLG 5369	Voice of the Prophet
RLG 5613	Religion, Culture and Politics in Israel
RLG 5617	Jews and Muslims in the Middle Ages

RLG 5629	Kabbalah, Peace and War
RLG 6442	Religion in the Contemporary World
EVR 5353	International Energy Policy
SYD 5045	Population and Society*
SYD 6236	International Migration and Refugees*
SYO 6536	Comparative and Global Inequality*
WOH 5935	Topics in World History *

*Seminars and Special Topics are appropriate for certificate when dealing with issues of the broader Middle East (Eligibility to be determined by Program Director).

In addition to the courses listed above, new courses (as they become available), relevant special topics, independent studies, study abroad credits, and area studies or comparative studies courses may also be applied with the prior approval of the certificate program director. Students may consult the list of eligible courses announced at the beginning of the academic year or semester through the Jaffer Center at jaffercenter.fiu.edu.

Graduate Certificate in National Security Studies

Brian Fonseca, Director, Jack D. Gordon Institute for Public Policy

Coordinating Committee

John H. Boyd III, Economics

Edward Glab, College of Business

Christine E. Gudorf, Religious Studies

Steven Heine, Religious Studies and History

Mohiaddin Mesbahi, Politics and International Relations

Richard Olson, Politics and International Relations

Ediberto Roman, College of Law

Luis P. Salas, Criminal Justice

Richard S. Tardanico, Global and Sociocultural Studies

Victor Uribe, History

Offered through the Jack D. Gordon Institute for Public Policy, the certificate may be awarded to both degree and non-degree seeking students who complete the requirements. For students pursuing a degree, the certificate is a complement to a student's discipline or major area of studies. For non-degree seeking students, the certificate provides a means for understanding more about national security in the 21st century. For more information, contact the Gordon Institute, LC 220. Email: aji@fiu.edu; phone: (305) 348-2977; website: <http://gordoninstitute.fiu.edu>

Certificate Requirements

1. A total of 18 credit hours of graduate course work with a grade of "B" or higher. Courses must come from the approved GCNSS course listing or be approved by the certificate advisor. Courses may include those in the student's departmental major, but must also be selected from at least two disciplines outside the student's departmental major. With the approval of the Director, courses other than those listed herein may be substituted on a case-by-case basis.
2. A two-course introductory language sequence at FIU with a grade of "B" or higher. Exemption from this requirement may be obtained through a proficiency examination administered by the FIU Department of Modern Languages. Language courses may not be

counted toward the fulfillment of requirement #1 above.

Note: Intermediate-high on the ACTFL exam (1-plus on the US government scale) can normally be attained by students with two undergraduate semesters of basic language instruction and at least one undergraduate semester of intermediate (3000/4000) instruction. Attainment of the required language proficiency is the responsibility of the student, and extra courses to achieve the required proficiency level must be taken outside the GCNSS curriculum.

Skill Requirement: (3 credit hours)

POS 5785	Writing Professionally in Political Science

Graduate Certificate in Nonprofit and Community Development

Susannah Ali, Co-Chair and MPA Director
Sukumar Ganapati, Co-Chair

The Graduate Certificate in Nonprofit and Community Development is intended to provide critical tools and analytic frameworks useful to local decision-makers responsible for developing and managing sustainable, high-wage communities in an increasingly competitive world economy. Course material will address the critical drivers of local and regional development in the context of South Florida's "gateway" status for commerce and immigration. Content will address spatial, managerial, and social components of development. The certificate is aligned with FIU's urban mission of providing engaged learning in its service area as well as the Departmental mission of our NASPAA-accredited Master of Public Administration (MPA) program which primary student body is in the local government sector. This certificate program is open to degree seeking students only.

Admissions

All applicants must hold a baccalaureate degree from an accredited college or university and have an upper division GPA of at least 3.0. Applicants with GPA lower than 3.0 may be considered if they submit a GRE, LSAT or GMAT Score. Students must be admitted to the certificate program to start taking classes. Admission to a certificate does not guarantee admission to the Master of Public Administration (MPA) program.

Note: Those students who apply for and are admitted to the Master of Public Administration degree program may have certificate courses credited toward the MPA degree provided each course has a grade of "B" or higher and the student is admitted to the master's degree program prior to the completion of no more than 12 Graduate Certificate credits.

Certificate Requirements: (15 credits)

Required: (9 credits)

PAD 6142	Management of Nonprofit Organizations	3
PAD 5805	Economic Development and Urban Revitalization	3
PAD 6209	Financial Management in Public and Nonprofit Organizations	3

Electives: (6 credits)

Certificate students who are not also MPA students must take PAD 6907 (Independent Study) as a certificate capstone. If they do, they will only have to take one additional elective course (3 credits)

PAD 5043	Equitable and Inclusive Governance	3
PAD 5443	The Public Administrator & Media Relations	3
PAD 5616	Contacting & Managing Third Party Governments	3
PAD 6038	Policy Formation & Legitimization	3
PAD 6156	Applied Org Theory & Behavior	3
PAD 6366	Policy & Program Implementation	3
PAD 6436	Professionalism & Ethics	3
PAD 6437	Dynamics of Individual Growth	3
PAD 6807	Urban and Municipal Government Administration	3
PAD 6836	Development Administration	3
PAD 6946	Public Administration Internship	0-3
PAD 5934*	Contemporary Issues in Public Administration	3
PAD 6717	GIS Applications for Urban Management	3

URP 5426	Emergency Management and Planning	3
URP 6315	Introduction to Urban Planning and Growth Management	3

Students may take up to two electives outside the Department. These electives must be selected from a list of approved electives or must be approved by Certificate Co-Chairs.

*Depending on the topic of the course and pending MPA Program approval, PAD 5934 (Contemporary Issues) may be counted as a certificate elective.

Graduate Certificate in Public Finance, Procurement, and Contract Management

Susannah Ali, Co-Chair and MPA Director

David Guo, Co-Chair

The Certificate in Public Finance, Procurement and Contract Management is designed as a specialization for students interested in careers in budgeting, finance, purchasing, and contract management in the public and non-profit sectors. The certificate program will expose students to competencies in areas like contact and project management, public finance and the budgetary process, procurement and ethics, and legal aspects of procurement and public finance.

The Graduate Certificate in Public Finance, Procurement, and Contract Management has the following learning outcomes:

1. Appraise basic concepts in public finance and budgeting;
2. Evaluate the characteristics of a "good" public revenue system;
3. Understand of the field of public procurement and critical issues facing the field;
4. Know how to write a request for proposals/bid/quotes;
5. Learn how to solicit bids;
6. Understand different bases of accounting and their use by state/local governments and nonprofit organizations;
7. Apply various forecasting techniques and determine their accuracy;
8. Understand the basics of cash and debt management;
9. Assess the financial condition of an organization; and
10. Learn the basics of pension planning and administration.

Admissions

All applicants must hold a baccalaureate degree from an accredited college or university and have an upper division GPA of at least 3.0. Applicants with GPA lower than 3.0 may be considered if they submit a GRE, LSAT or GMAT Score. Students must be admitted to the certificate program to start taking classes. Admission to a certificate program does not guarantee admission to the Master of Public Administration (MPA) program.

Note: Those students who apply for and are admitted to the Master of Public Administration degree program may have certificate courses credited toward the MPA degree provided each course has a grade "B" or higher and the student is admitted to the master's degree program prior to the completion of no more than 12 Graduate Certificate credits.

This graduate certificate program will consist of four required courses and two electives (18 credits total) that are taken for-credit. This certificate program is open to degree seeking students only.

Certificate Requirements (15 credits)

Certificate students who are not also MPA students must take PAD 6907 (Independent Study) as a certificate capstone. If they do, they will only have to take one additional elective course (3 credits).

Required Courses (9 credits)

PAD 6209	Financial Management in Public and Nonprofit Organizations	3
PAD 6855	Introduction to Public Procurement	3
PAD 6856	Contract and Project Management	3

Electives (6 credits)

PAD 5256	Economic Thinking in Policy Making	3
PAD 5460	Performance Management	3
PAD 6229	Advanced Management Techniques	3
PAD 6436	Professionalism and Ethics	3
PAD 6605	Administrative Law and Procedures	3
PAD 6710	IT and E-government	3
PAD 5934*	Contemporary Issues in Public Administration	3
PAD 6946	Public Administration Internship	0-3

*Depending on the topic of the course and pending MPA Program approval, PAD 5934 (Contemporary Issues) may be counted as a certificate elective.

Graduate Certificate in Public Management

Susannah Ali, *Chair and MPA Director*

This graduate certificate program provides students with a thorough understanding of the managerial concepts and techniques of public administration and is designed particularly for those who already have a professional field of specialization. The Certificate is designed for non-Master of Public Administration (MPA) students, although students who are admitted into this Certificate program may apply for admission to the MPA program. Current MPA students may not be admitted to this Certificate.

Certificate Requirements

Admissions

All applicants must hold a baccalaureate degree from an accredited college or university and have an upper division GPA of at least 3.0. Applicants with GPA lower than 3.0 may be considered if they submit a GRE, LSAT or GMAT Score. Students must be admitted to the certificate program to start taking classes. Admission to a certificate program does not guarantee admission to the Master of Public Administration (MPA) program. This certificate program is open to degree seeking students only.

Note: Those students who apply for and are admitted to the Master of Public Administration degree program may have certificate courses credited toward the MPA core. All the credits earned in a Graduate Certificate Program may be used in a master's degree program provided the student is admitted to the master's degree program prior to the completion of no more than 12 Graduate Certificate credits. Courses with a grade of less than 'B' may not

count toward MPA program if they were taken as certificate courses.

Program of Study: (15)

The following four courses are required:

PAD 6053	Political, Social, and Economic Context of PA	3
PAD 6156	Applied Organization Theory and Behavior	3
PAD 6227	Public Finance and & Budgetary Process	3
PAD 6306	Policy Analysis	3

One of the following electives must be taken to complete the certificate:

Certificate Students who are not also MPA students must take PAD 6907 (Independent Study) as a certificate capstone. If they do, they will have no additional elective courses to choose.

PAD 5043	Equitable and Inclusive Governance	3
PAD 5435	Gender Equity and Leadership in Public Administration	3
PAD 6436	Professionalism and Ethics	3
PAD 6209	Financial Management in Public and Nonprofit Organizations	3
PAD 6605	Administrative Law and Procedures	3
PAD 6710	IT & E Government	3
PAD 6807	Urban and Municipal Government Administration	3

Students must earn a minimum of 3.0 cumulative GPA. All course grades must be "C" or better.

Graduate Certificate Program in Religious Studies

The purpose of the Graduate Certificate Program is to offer an alternative to the MA degree program for students who wish to pursue an organized program of study at the graduate level, but have no need of a degree and wish a shorter term project. This certificate program is open to degree-seeking students only.

Certificate Requirements

1. Students must either have taken the undergraduate course REL 3308 World Religions as a prerequisite before entering the certificate program, or must complete it within the program, usually in the first semester of coursework.
2. Students must complete 18 credit hours of graduate level courses in the general area of religion.
3. Students must have a minimum GPA of 3.0 in their graduate religion courses.
4. Earned grades in the 18 hours of graduate religion courses must be "B" or better; grades of "B-" or below will not be counted toward the 18.
5. Students in the Graduate Certificate Program in Religious Studies who wish to transfer into the MA program must meet the requirements for matriculation.

Graduate Certificate in Sustainable Communities

Coordinating Committee

Marta Canaves, *Landscape Architecture*

Richard S. Olson, *Politics and International Relations*

Christine E. Gudorf, *Religious Studies*

John H. Boyd, III, *Economics*

Joel Heinen, *Earth and Environment*

The Graduate Certificate in Sustainable Communities offers students an introduction to the theoretical and methodological tools necessary to critique and conduct research on society/environment interactions. The objective of the certificate is to prepare students to participate in current environmental debates, whether through scholarship and teaching, non academic professional activities or activism. The certificate requires eighteen credits of interdisciplinary courses.

This certificate will appeal to an interdisciplinary graduate student population at FIU drawing students from the Green School, the College of Arts and Sciences, as well as other schools and colleges (as reflected in the requirements below). In particular, the certificate will aid students interested in natural resource management and conservation, regional and urban planning, as well as domestic and international development and policy issues. This certificate program is open to degree-seeking students only. The certificate will serve students interested in pursuing careers in local, national and international government and non-governmental organizations, as well as academic careers.

Certificate Requirements

1. Application to the Certificate Program.
2. Acceptance to and good standing in a graduate degree program at FIU.

Core Course

ISS 5166 Seminar in Sustainable Communities

Electives

12 credit hours chosen from the list below. A 3 credit course can be substituted for any one of the listed electives with the approval of the Certificate Program Director.

Economics

ECP 6305 Advanced Environmental Economics

Earth and Environment

EVR 6330 Tropical Ecosystem Management
 EVR 5355 Environmental Resources Policy
 EVR 6360 Protected Area Management
 EVR 7322 Methods of Sustainable Resource Management

Parks and Recreation Management

LEI 5605 Philosophical and Social Basis of Parks and Recreation

Politics and International Relations

CPO 6771 Politics of Disaster

Religious Studies

RLG 5183 Religion, Nature, and Globalization

Global and Sociocultural Studies

ANG 5267 Environmental Anthropology
 SYD 6901 GIS and Social Research
 GEO 6473 Space, Place and Identity
 INR 6056 Environment and Development

Landscape Architecture

LAA 5243 Regional Landscape Issues
 LAA 6551 Sustainable Landscapes

LAA 5541 South Florida Landscapes

LAA 6521 Tropical Landscapes

Possible Further Course Offerings

Development and Indigenous Peoples (Dept. Global and Sociocultural Studies)

Historical Ecology/Landscape History (Dept. Global and Sociocultural Studies)

Eco-Capitalism and Cultural Politics (Dept. Global and Sociocultural Studies)

Latin American Social Movements (Dept. Global and Sociocultural Studies)

Political Ecology of the Environment (Dept. Earth and Environment)

Directed Research: (3 credits)

In consultation with the Certificate Program Director, student will produce an independent research paper or comparable piece of work on sustainable communities.

Graduate Certificate in Urban Policy Innovations

Susannah Ali, *Chair and MPA Director*

The Graduate Certificate in Urban Policy Innovations is designed to provide critical analytical and policymaking skills to public and nonprofit leaders and professionals. It prepares them to identify, analyze, and develop innovative policy solutions for urban issues and challenges in areas of, including but not limited to, housing, transportation, economic development, urban revitalization, sustainability and resilience, smart growth, social equity, law enforcement and crime, climate change, and health care. The certificate is devoted to developing the next generation of problem solvers, policy innovators, and public leaders. It provides professional training and career preparation for those seeking careers and advancements in the design, implementation, evaluation, and advocacy of public policies, as analysts, consultants, and elected officials in the local, state, and federal governments. The content of this certificate is aligned with FIU's urban mission of providing inclusive learning and with the mission of the NASPAA-accredited Master of Public Administration (MPA) program which develops quality workforce in public policy, administration and management. This certificate program is open to degree seeking students only.

Admissions

All applicants must hold a baccalaureate degree from an accredited college or university and have an upper division GPA of at least 3.0. Applicants with GPA lower than 3.0 may be considered if they submit a GRE, LSAT or GMAT Score. Students must be admitted to the certificate program to start taking classes. Admission to a certificate does not guarantee admission to the Master of Public Administration (MPA) program.

Note: Those students who apply for and are admitted to the Master of Public Administration degree program may have certificate courses credited toward the MPA degree provided each course has a grade of "B" or higher and the student is admitted to the master's degree program prior to the completion of no more than 12 Graduate Certificate credits.

Certificate Requirements (15 credits)**Required: (9 credits)**

PAD 5256	Economic Thinking in Policy Making	3
PUP 6105	Urban Challenges and Policy Innovations	3
PUP 6006	Public Policy Analysis and Evaluation	3

Electives: (6 credits)
