

Foreword

This issue of *Water Resources Update* focuses on the critical issue of education and water resources. Charles Glassick and **C. Eugene Allen** provide overviews of the challenges facing higher education in the 1990s. **Faye Anderson** summarizes some of the teaching materials being developed to improve water resources education in the K-12 grades. James R. Groves discusses the education of civil engineers in the water resources specialty. L. Douglas James provides an historical perspective on water resources education.

These papers present a prelude to the UCOWR annual conference, “U.S. and International Water Resources Education” to be held August 3-6, 1993 in San Francisco, California. Complete program and registration information is contained on pages 22-29 herein.

The staff at *Water Resources Update* would like to thank all of the authors for their fine papers. We would also like to thank Howard Peavy for his help in initiating this issue of *Update*.

We look forward to our *first* summer issue of *Update* which will feature Water Pricing and Marketing themes.
