Take down policy

While the University of Birmingham exercises care and attention in making items available there are rare occasions when an item has been uploaded in error or has been deemed to be commercially or otherwise sensitive.

If you believe that this is the case for this document, please contact UBIRA@lists.bham.ac.uk providing details and we will remove access to the work immediately and investigate.

Description of Additional Supplementary Files

Supplementary Data 1: Additional clinical and demographic information of children included in this study. (a) Clinical symptoms, SARS-Cov-2 status and treatment information for the MIS-C patients in the whole blood functional assay study. (b) Demographics of paediatric fever controls (n=16) used in the whole blood functional assay study. (c) Demographics of LRTI Cohort (n=22) used in the 48-plex cytokine array study. (d) Demographics of general infection (non-covid) cohort (n=14) used in mass cytometry study.
