The series Lecture Notes in Computer Science (LNCS), including its subseries Lecture Notes in Artificial Intelligence (LNAI) and Lecture Notes in Bioinformatics (LNBI), has established itself as a medium for the publication of new developments in computer science and information technology research, teaching, and education.

LNCS enjoys close cooperation with the computer science R & D community, the series counts many renowned academics among its volume editors and paper authors, and collaborates with prestigious societies. Its mission is to serve this international community by providing an invaluable service, mainly focused on the publication of conference and workshop proceedings and postproceedings. LNCS commenced publication in 1973.

Preface

The Information Processing in Medical Imaging (IPMI) Conference series has a long-standing history and tradition. Since 1969, the conference took place on either side of the Atlantic and was organised in Asia for the first time in 2019. IPMI 2023 (https://www.ipmi2023.org), the twenty-eighth conference in the series, was the first in Latin America. The conference was held from June 18th to 23rd at Huinid Pioneros Hotel in San Carlos de Bariloche, Argentina.

Through the years, IPMI became a biennial beacon of foundational computational methods for medical imaging. IPMI's distinctive small-audience format enables extensive discussion time for selected oral presentations. The conference has a retreat-like ambience, which promotes a more intimate exchange and building personal and mentoring relationships across generations from our community.

IPMI 2023 featured traditional study groups, small groups of delegates who scrutinise manuscripts before their oral presentation. This leads to thorough debates enriching the authors and broader audience. Historically, discussions on each paper kick-start with early career delegates in each study group to elicit inclusive participation. Thus, every session becomes a forum for sharing, encouraging, and challenging new ideas.

For this year's edition, we received 240 submissions, of which 169 papers went through the double-blind peer review system, being evaluated by at least three reviewers each. Following the reviewing process, each manuscript having at least one weak accept in its reviews was evaluated by two or more members of the Paper Selection Committee and subsequently discussed at the paper selection meeting. Finally, 63 submissions were accepted for publication and presentation at the conference, resulting in a 26.

Three excellent keynote speakers joined us virtually. Gitta Kutyniok (Ludwig Maximilians Universität München), Petar Veličković (DeepMind), and Jong Chul Ye (Korea Advanced Institute of Science & Technology) enlightened us with various talks on the foundations of modern information processing ranging from the mathematics of machine learning to geometric deep learning and diffusion models in inverse problems in imaging.

The François Erbsmann Prize is awarded every edition to a young scientist of age 35 or below, the first author of a paper, giving their first oral presentation at IPMI. The prize was awarded to one of the 18 eligible oral presenters, and awards were given for the best poster presentations.

The IPMI 2023 Organising Team wants to express special gratitude to the Paper Selection Committee and the 186 reviewers, who did an outstanding job reviewing submissions, consolidating decisions, and designing the programme. We thank Albert Chung, Archana Venkataraman, Diana Mateus, Herve Lombaert, Ipek Oguz, Juan Eugenio Iglesias, Kaleem Siddiqi, Kevin Zhou, and Xavier Pennec, who decided on each paper based on the available reviews and thorough committee discussions. We also thank Andreas Maier, Ipek Oguz, and Archana Venkataraman for their leadership in organising the Study Groups and all the study group leaders. We also express our gratitude to Haoran Dou, Azade Farshad, and Yan Xia for their tireless work as Executive

Preface

vi

Assistants to the chairs. We are also indebted to Enzo Ferrante and Ariel Curiale for their engagement from its conception in IPMI 2023 and for their support with all the challenges of organising IPMI across the Atlantic. Finally, we are indebted to the team of Dekon Group, particularly to Mustafa Bay, Meltem Çakmak, and Mehmet Eldegez for their organisational support. This conference would not have been possible without the help of such a great team of colleagues. One of the defining priorities throughout the organisation was to maximise diversity across career stages, gender, and geographical spread in our Organising Committee, Paper Selection Committee, Study Groups, and generally wherever possible.

We have been delighted to organise IPMI 2023 and hope that the scientific and social activities programme made this conference an unforgettable experience. We hope that IPMI 2023, surrounded by the Andes mountain range and unique Patagonian lakes and forests, was an event conducive to scientific exchange and collegial sharing and challenging of ideas, which contributed to international cooperation, scientific progress, and understanding, and to nurturing of the next generation of researchers in information processing in medical imaging.

On Fairness of Medical Image Classification with Multiple Sensitive	
Attributes via Learning Orthogonal Representations	158
Wenlong Deng, Yuan Zhong, Qi Dou, and Xiaoxiao Li	
Pixel-Level Explanation of Multiple Instance Learning Models	
in Biomedical Single Cell Images	170
Ario Sadafi, Oleksandra Adonkina, Ashkan Khakzar, Peter Lienemann,	
Rudolf Matthias Hehr, Daniel Rueckert, Nassir Navab, and Carsten Marr	
Transient Hemodynamics Prediction Using an Efficient Octree-Based	
Deep Learning Model	183
Noah Maul, Katharina Zinn, Fabian Wagner, Mareike Thies,	
Maximilian Rohleder, Laura Pfaff, Markus Kowarschik,	
Annette Birkhold, and Andreas Maier	

Weakly Semi-supervised Detection in Lung Ultrasound Videos Jiahong Ouyang, Li Chen, Gary Y. Li, Naveen Balaraju, Shubham Patil, Courosh Mehanian, Sourabh Kulhare, Rachel Millin, Kenton W. Gregory, Cynthia R. Gregory, Meihua Zhu, David O. Kessler, Laurie Malia, Almaz Dessie, Joni Rabiner, Di Coneybeare, Bo Shopsin, Andrew Hersh, Cristian Madar, Jeffrey Shupp, Laura S. Johnson, Jacob Avila, Kristin Dwyer, Peter Weimersheimer, Balasundar Raju, Jochen Kruecker, and Alvin Chen	195
sEBM: Scaling Event Based Models to Predict Disease Progression via Implicit Biomarker Selection and Clustering Raghav Tandon, Anna Kirkpatrick, and Cassie S. Mitchell	208
Domain Adaptation	
Source-Free Domain Adaptation for Medical Image Segmentation via Selectively Updated Mean Teacher	225
UPL-TTA: Uncertainty-Aware Pseudo Label Guided Fully Test Time Adaptation for Fetal Brain Segmentation	237
Unsupervised Adaptation of Polyp Segmentation Models via Coarse-to-Fine Self-Supervision	250
Geometric Deep Learning	
Edge-Based Graph Neural Networks for Cell-Graph Modeling and Prediction Tai Hasegawa, Helena Arvidsson, Nikolce Tudzarovski, Karl Meinke, Rachael V. Sugars, and Aravind Ashok Nair	265
Heterogeneous Graph Convolutional Neural Network via Hodge-Laplacian for Brain Functional Data	278
Modeling the Shape of the Brain Connectome via Deep Neural Networks	291

TetCNN: Convolutional Neural Networks on Tetrahedral Meshes	303
Groupwise Atlasing	
BInGo: Bayesian Intrinsic Groupwise Registration via Explicit Hierarchical Disentanglement Xin Wang, Xinzhe Luo, and Xiahai Zhuang	319
Learning Probabilistic Piecewise Rigid Atlases of Model Organisms via Generative Deep Networks Amin Nejatbakhsh, Neel Dey, Vivek Venkatachalam, Eviatar Yemini, Liam Paninski, and Erdem Varol	332
Harmonization/Federated Learning	
Harmonizing Flows: Unsupervised MR Harmonization Based on Normalizing Flows Farzad Beizaee, Christian Desrosiers, Gregory A. Lodygensky, and Jose Dolz	347
Vicinal Feature Statistics Augmentation for Federated 3D Medical Volume Segmentation Yongsong Huang, Wanqing Xie, Mingzhen Li, Mingmei Cheng, Jinzhou Wu, Weixiao Wang, Jane You, and Xiaofeng Liu	360
Image Synthesis	
S2DGAN: Generating Dual-energy CT from Single-energy CT for Real-time Determination of Intracerebral Hemorrhage	375
SADM: Sequence-Aware Diffusion Model for Longitudinal Medical Image Generation Jee Seok Yoon, Chenghao Zhang, Heung-Il Suk, Jia Guo, and Xiaoxiao Li	388
Image Enhancement	
An Unsupervised Framework for Joint MRI Super Resolution and Gibbs Artifact Removal Yikang Liu, Eric Z. Chen, Xiao Chen, Terrence Chen, and Shanhui Sun	403

Contents	XV1
OTRE: Where Optimal Transport Guided Unpaired Image-to-Image Translation Meets Regularization by Enhancing	415
and Yalin Wang Super-Resolution Reconstruction of Fetal Brain MRI with Prior Anatomical Knowledge Shijie Huang, Geng Chen, Kaicong Sun, Zhiming Cui, Xukun Zhang, Peng Xue, Xuan Zhang, He Zhang, and Dinggang Shen	428
Multimodal Learning	
Q2ATransformer: Improving Medical VQA via an Answer Querying Decoder	445
Using Multiple Instance Learning to Build Multimodal Representations Peiqi Wang, William M. Wells, Seth Berkowitz, Steven Horng, and Polina Golland	457
X-TRA: Improving Chest X-ray Tasks with Cross-Modal Retrieval Augmentation Tom van Sonsbeek and Marcel Worring	471
Optimization	
Differentiable Gamma Index-Based Loss Functions: Accelerating Monte-Carlo Radiotherapy Dose Simulation Sonia Martinot, Nikos Komodakis, Maria Vakalopoulou, Norbert Bus, Charlotte Robert, Eric Deutsch, and Nikos Paragios	485
Scalable Orthonormal Projective NMF via Diversified Stochastic Optimization	497
Reconstruction	
Deep Physics-Informed Super-Resolution of Cardiac 4D-Flow MRI Fergus Shone, Nishant Ravikumar, Toni Lassila, Michael MacRaild, Yongxing Wang, Zeike A. Taylor, Peter Jimack, Erica Dall'Armellina, and Alejandro F. Frangi	511

Fast-MC-PET: A Novel Deep Learning-Aided Motion Correction and Reconstruction Framework for Accelerated PET Bo Zhou, Yu-Jung Tsai, Jiazhen Zhang, Xueqi Guo, Huidong Xie, Xiongchao Chen, Tianshun Miao, Yihuan Lu, James S. Duncan, and Chi Liu	523
MeshDeform: Surface Reconstruction of Subcortical Structures via Human Brain MRI	536
