- 142:222 Organelle Biogenesis** 1 s.h.  
Biogenesis of mitochondria, peroxisomes, nucleus, and phagosomes; membrane trafficking; mitochondrial division, mitosis and cell division, entry into lysosomes via autophagy and endocytic pathways; host/pathogen interactions, function of macrophages and neutrophils. Prerequisites: 099:130. Same as 060:222, 072:222.
- 142:225 Growth Factor Receptor Signaling** 1 s.h.  
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Recommendations: 156:201, 156:202, and 156:203. Same as 060:225, 072:225.
- 142:226 Cell Cycle Control** 1 s.h.  
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Recommendations: 156:201, 156:202, and 156:203. Same as 060:226, 072:226.
- 142:227 Cell Fate Decisions** 1 s.h.  
Cellular fate decisions, including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Recommendations: 156:201, 156:202, and 156:203. Same as 060:223, 072:227.
- 142:230 Cell Migration from Development to Metastasis** 1 s.h.  
Introduction to major cell migration events during development, culminating in how such principles of migration are reutilized during cancer metastasis; emphasis on utilizing current literature in the field to understand how to study cell migration, questions that can be asked, and what remains to be determined.
- 142:280 Topics in Molecular and Cellular Biology** 1 s.h.  
Opportunity to work closely with participating faculty to gain skill in critical reading of research literature and facility in presenting the material to an audience. Repeatable. Requirements: advanced graduate standing.
- 142:290 Seminars in Molecular and Cellular Biology** 1 s.h.  
Research findings in molecular biology. Requirements: molecular and cellular biology graduate standing.
- 142:299 Mechanisms of Parasitism Journal Club** 1 s.h.  
Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students. Same as 061:299.
- 142:301 Directed Study in Molecular and Cellular Biology** arr.
- 142:305 Molecular and Cellular Biology Research** arr.  
Requirements: molecular and cellular biology graduate standing.

**Graduate degree:** Ph.D. in Neuroscience

**Web site:** <http://neuroscience.grad.uiowa.edu>

The Neuroscience Program provides an interdisciplinary and interdepartmental approach to graduate education and research training in the structure, function, and development of the nervous system and its role in cognition and behavior. Students obtain training at all levels of the nervous system, from cellular/molecular to behavioral/cognitive.

## Graduate Program

The Neuroscience Program offers a Ph.D. in neuroscience.

### Doctor of Philosophy

The Doctor of Philosophy in neuroscience requires a minimum of 72 s.h. of graduate credit. The program's curriculum is designed around three tracks: molecular/cellular, developmental/systems, and cognitive/behavioral. Following broad-based instruction in a core curriculum, students specialize in one of the tracks.

Within a framework of core, track-specific, and elective courses, each student pursues a program of study individually designed according to his or her undergraduate training and graduate research goals. After enrolling in the Neuroscience Program, entering students consult with the advisory committee regarding their level of preparation for the program's required courses.

The Student Advisory Committee meets with all first- and second-year graduate students once each semester, helping each student explore his or her research interests and select faculty mentors for the required laboratory rotations. Each student is expected to complete three rotations in faculty laboratories before selecting a thesis advisor. Rotations ordinarily last 12 weeks but may last from 8 to 16 weeks. Under special circumstances, two rotations may be in the same laboratory, an arrangement that permits the student to learn a variety of techniques and approaches before settling down to work on the dissertation project. Students usually choose a dissertation lab at the end of their first year.

### BACKGROUND REQUIREMENTS

Students are expected to demonstrate competency, through prerequisites or course work, in each of four fields: biochemistry, general physiology, cell biology, and statistics. These requirements ordinarily should be fulfilled by the end of the first year of graduate study. Waivers of background course requirements may be requested by students who have taken equivalent courses before entering the Neuroscience Program.

### NEUROSCIENCE CORE

The following courses form the core of the neuroscience graduate curriculum.

031:278 Principles of Neuropsychology	3 s.h.
132:180 Fundamental Neurobiology	4 s.h.
132:181 Neurophysiology	3-4 s.h.
132:184 Developmental Neurobiology	3 s.h.
132:234 Medical Neuroscience	4 s.h.
132:235 Neurobiology of Disease	3 s.h.
156:201 Fundamentals of Gene Expression (molecular track)	1 s.h.
156:202 Fundamentals of Protein Regulation	1 s.h.
156:203 Fundamentals of Dynamic Cell Processes	1 s.h.
650:270 Principles of Scholarly Integrity	1 s.h.
One statistics course	3-4 s.h.

In addition, students register for the following two courses each semester.

132:265 Neuroscience Seminar  
132:305 Neuroscience Research

0-1 s.h.  
arr.

## ELECTIVES

Elective requirements may be met with three or more courses from a list of courses offered by the Departments of Anatomy and Cell Biology, Biology, Molecular Physiology and Biophysics, Pharmacology, Psychology, and other departments as appropriate. Students must take electives in at least two of the program's three tracks, ensuring that they receive advanced training both in their area of specialization and in related areas of neuroscience. With permission of the Student Advisory Committee, students may satisfy the elective requirement wholly or in part by registration in 132:301 Directed Study in Neuroscience.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

For information about predoctoral training opportunities in neuroscience, contact the Neuroscience Program or visit its web site.

## Financial Support

Full-time Neuroscience Program students receive stipends and full tuition scholarships through fellowships and research assistantships. Awards are renewed annually, based on continued satisfactory progress and availability of funds. The standard stipend for graduate students is \$25,000 for 2010-11.

The Neuroscience Program is committed to supporting its graduate students for their entire training period. Students normally are supported in the first year by the program. After that, support is expected to come from the student's primary research mentor. Occasionally, advanced students are supported through teaching assistantships. Tuition is paid for all students.

## NIH TRAINING GRANT

The Neuroscience Program is supported by a training grant from the National Institutes of Health. The grant provides stipend and tuition support for a select group of first- and second-year graduate students.

## Facilities

Training is conducted primarily in the laboratories and teaching facilities of the Carver College of Medicine graduate Departments of Anatomy and Cell Biology, Biochemistry, Molecular Physiology and Biophysics, and Pharmacology; clinical Departments of Internal Medicine, Neurology, and Psychiatry; and the College of Liberal Arts and Sciences graduate Departments of Biology, Communication Sciences and Disorders, Health and Human Physiology, and Psychology. Students use faculty laboratories and central research facilities for ultrastructural analysis; histochemistry and immunocytochemistry; electrophysiology; fluorescence-activated cell sorting; cellular and subcellular biochemistry; cell, tissue, and organ culture; operant and classical conditioning; molecular biology; behavioral genetics; neural substrates of complex behavior; brain-behavior relationships in humans; neuropsychology; and functional neuroimaging (PET, fMRI).

## Neuroscience Courses

**132:161 Undergraduate Research in Neuroscience**  
Experimental research under faculty supervision.

arr.

**132:180 Fundamental Neurobiology**

4 s.h.

Neuronal function, plasticity, and development at the molecular and cellular levels. Prerequisites: 002:145. Recommendations: 002:114 and 099:110. Same as 002:180.

**132:181 Neurophysiology**

3-4 s.h.

Physiological properties of nerve cells, nervous systems; axonal conduction, synaptic transmission, sensory transduction, integrative processes, higher functions. Prerequisites: 002:180, 22M:025, and 029:012 or 029:082. Same as 002:181.

**132:184 Developmental Neurobiology** 3 s.h.

Neural induction and nervous system patterning; neurogenesis, axon and dendrite outgrowth and targeting; synapse formation, specificity, refinement; mechanisms of neuronal cell death; myelination; neural stem cells; introduction to cellular, molecular, and genetic techniques in studies of neural development. Requirements: grade of B- or higher in 002:180 or graduate standing. Same as 002:184, 072:184.

**132:209 Steroid Receptor Signaling** 1 s.h.

Structure-function relationship and genomic and nongenomic actions of the steroid hormone receptor family; basis for actions of novel new ligands on these receptors. Offered spring semesters. Same as 071:209, 072:209.

**132:234 Medical Neuroscience** 4 s.h.

Basic principles of neurophysiology, neuroanatomy; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord, brain. Offered spring semesters. Requirements: (for 060:234) M.D. or Physical Therapy and Rehabilitation Science Program enrollment. Same as 060:234.

**132:235 Neurobiology of Disease** 3 s.h.

Broad, thematic understanding of disease mechanisms in neurobiological disorders.

**132:240 Topics in Cognitive Neuroscience** 3 s.h.

Key topics in the neural basis of human cognition; research literature. Recommendations: graduate courses in basic neuroscience and cognitive psychology. Same as 064:240.

**132:241 Fundamentals of Behavioral Neuroscience** 3 s.h.

Concepts, methods, and findings in behavioral and cognitive neurosciences; emphasis on principles of neuroscience, sensation, motivation, emotion. Same as 031:241.

**132:242 Fundamentals of Learning and Behavior** 3 s.h.

Concepts, methods, and findings in behavioral and cognitive neurosciences; emphasis on principles of comparative psychology, motor control, learning. Same as 031:242.

**132:245 Applied Statistics for Cognitive Neuroscience** 2 s.h.

Talks by neuroscience researchers on types of statistics they regularly use in their research.

**132:250 Functional Magnetic Resonance Imaging** 2-3 s.h.

Basic physics principles of functional magnetic resonance imaging and approaches to data acquisition, including BOLD imaging, arterial spin labeling, and magnetic source imaging; data analysis strategies; paradigm design and development. Same as 051:280.

**132:265 Neuroscience Seminar** 0-1 s.h.

Research presentations. Offered fall and spring semesters. Same as 002:265, 031:265, 060:265, 072:265.

**132:277 Mechanisms of Pain Transmission** 3 s.h.

Anatomical, physiological, and pharmacological mechanisms underlying peripheral and central neuronal processing of pain; emphasis on neuronal changes that occur during pathological conditions such as inflammation/arthritis, peripheral neuropathy. Offered fall semesters of even years. Same as 071:277, 101:277.

**132:301 Directed Study in Neuroscience** arr.

**132:305 Neuroscience Research** arr.

Requirements: neuroscience graduate standing.

**132:365 Seminar: Neuropsychology and Neuroscience** arr.

Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as 031:365, 064:365.

## Rhetorics of Inquiry (POROI)

**Director:** David Depew  
**Graduate nondegree program:** Certificate in Rhetorics of Inquiry  
**Web site:** <http://poroi.grad.uiowa.edu>

The Project on Rhetorics of Inquiry (POROI) is an interdisciplinary program whose aim is to improve academic inquiry and scholarly writing in the arts, humanities, sciences, and professions, especially at the intersections between disciplines. POROI explores how scholarship and professional discourse are conducted through argument, how paradigms of knowledge are sensitive to social-political contexts, and how the presentation of scholarly and professional findings is an audience-sensitive process. The program offers classes, seminars, workshops, conferences, and a peer-reviewed online journal, *Poroi: An Interdisciplinary Journal of Rhetorical Analysis and Invention*.

POROI also collaborates with the Graduate College to offer a certificate for graduate students.

### Certificate

The Certificate in Rhetorics of Inquiry requires completion of four POROI courses (normally a minimum of 12 s.h.). Students may pursue the certificate in conjunction with a graduate degree in any field. The interdisciplinary program helps students hone their skills for arguing in oral, written, and multimedia forms within their own disciplines, and broaden their understanding of the similarities and differences among various fields.

The certificate program's objectives are to:

- help students cultivate habits of interdisciplinary study and research through reading, writing, and conversation;
- encourage students to cross conceptual and institutional boundaries that often appear to separate the arts, humanities, and professions from each other and from the social, natural, and formal sciences;
- improve students' awareness of the rhetorical dimensions of argumentation and inquiry; and
- certify that students who have completed the program are prepared to do rhetorical and cross-disciplinary work after they graduate.

All certificate students must complete 160:200 Introduction to Rhetorics of Inquiry and three additional POROI courses of their choice. See "Courses" below.

### Admission

Master's and doctoral candidates in good standing are eligible to enter the certificate program. To enroll, contact the Project on Rhetorics of Inquiry.

## Rhetorics of Inquiry (POROI) Courses

POROI courses are open to certificate students and to those not enrolled in the certificate program.

**160:110 Undergraduate Independent Study on Rhetoric of Inquiry** arr.  
 Independent study on the rhetoric of inquiry; connections between discourses that at first may not seem connected. Requirements: undergraduate standing.

**160:130 Performing Culture, Language, and Literature** 3 s.h.  
 Performance of self in everyday life; performance in/of literature; performance as an aesthetic act; performance as a way to understand and represent identities, languages and cultures; students participate in performance as a mode of literary and rhetorical interpretation, cultural and political intervention, and artistic-embodied public presentation. Requirements: (for 036:130) g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 010:130, 036:130, 049:160.

**160:160 Issues in Rhetoric and Culture** 3 s.h.  
 Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Communication studies majors may apply this course to the following area requirement. AREA: Context. Requirements: (for 036:146) g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 010:160, 036:146, 048:160.

**160:161 Rhetorical Issues in Health Care** 3 s.h.

Role of rhetoric in health care practice, decisions, and ethics; rhetorical production of patient and professional selves in health care; varied practices, diverse perspectives, and situated production of medical and health care knowledge.

Requirements: satisfactory completion of rhetoric General Education requirement. Same as 010:161, 153:161.

**160:165 Feminism and Philosophy** 3 s.h.

Classical and contemporary Western philosophies concerning questions about the nature of justice, knowledge, value, truth, personal identity; feminist philosophers who develop them. Prerequisites: 131:010. Same as 131:155.

**160:170 Philosophy of the Body** 3 s.h.

Philosophical treatment of the body; perspectives from classical, modern, and contemporary texts from Western philosophy, and texts from feminist theory, critical race theory, cultural studies, and disability studies. Prerequisites: 131:010. Same as 131:170.

**160:180 Literature and Translation** 3 s.h.

Translation in the broadest sense; originality, authority, authorship, accuracy, ownership, audience; issues problematizing differences between medium and message. Same as 041:180, 048:180.

**160:182 Honors Seminar on Political Theory** 3 s.h.

**160:183 Invention** 3 s.h.

How to get writing going, keep it going, and write in an authentic meaningful way. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Same as 08N:183.

**160:200 Introduction to Rhetorics of Inquiry** 2-4 s.h.

How connections between discourses that don't seem connected suggest innovative arguments and ways of crossing boundaries between disciplines. Same as 036:210.

**160:210 Independent Study Rhetorics of Inquiry** arr.

Repeatable.

**160:216 Conflict, Negotiation, and Planning** 3 s.h.

Conflict within communities, and planners' responses; networking, negotiating, mediating, coalition building, consensus building; case studies, role playing. Requirements: (for 102:216) 102:203. Same as 102:216.

**160:223 Deliberation, Advocacy, Civic Engagement** 3 s.h.

Practices of public deliberation in governance and civil society; counterpublic sphere discourses. Same as 036:223.

**160:230 Analysis of Scholarly Domains** 3 s.h.

Information transfer in academic disciplines; scientific method, other means of knowledge construction, resulting literatures; reference tools used to control literature for a variety of audiences; emphasis on humanities, social sciences, or sciences. Requirements: (for 021:254) 021:141. Same as 021:254.

**160:232 Race, Gender, and Technology** 3 s.h.

Brief, critical look at the ways race and gender shape the uses and design of information and communication technologies (ICTs); ICTs as a part of our social infrastructure; how the integration of ICTs into Western culture has affected, transformed, or been transformed by interactions with racial groups, men, and women; interrogate assumptions behind technology's promises of efficiency and progress--what are the norms and values embodied within the artifacts we use every day? Same as 021:232.

**160:239 Topics** 3 s.h.

Topics vary.

**160:243 Feminist Cultural Studies** 3 s.h.

Same as 008:243, 010:243, 036:222, 131:243.

**160:247 Crossing Borders Seminar** 2-3 s.h.

Repeatable. Same as 008:231, 013:262, 016:247, 01H:247, 030:242, 035:273, 044:286, 048:247, 113:247, 129:231, 181:247.

- 160:250 Introduction to Rhetoric of Science** 3 s.h.  
How science is related to social and political practices, examined by placing philosophical and pedagogical controversies about scientific method into their historical and rhetorical contexts. Same as 036:250.
- 160:258 Feminist Critical Theory** 3 s.h.  
Questions of difference, the body, agency, identity politics, gender performativity, power as both productive and oppressive; perspectives from texts in poststructuralist and feminist philosophy. Same as 131:258.
- 160:262 Readings in Nonfiction** 3 s.h.  
Same as 08N:262.
- 160:280 Postcolonial Feminist Theory** 3 s.h.  
Role of colonial histories and postcolonial legacies on past and contemporary relations of power in varied geographical contexts, through interdisciplinary feminist perspective; processes of gender and racialization relative to uneven global flows of media, capital, people. Requirements: 131:151 or cultural studies course. Same as 010:264, 131:264.
- 160:300 Writing for Learned Journals** 1-4 s.h.  
Help for graduate students in bringing written work to publishable form; analysis of target journals' audiences and interests; submission, response to criticism. Same as 08N:340, 650:300.
- 160:302 Writing Political Science** 2-4 s.h.  
Practice in planning and completing political inquiries; emphasis on writing for scholarly publication. Requirements: political science Ph.D. enrollment.
- 160:311 Modern Rhetoric** 2-4 s.h.  
History of modernist rhetorical theory in the 20th century; relationships with philosophy, social and physical sciences, cultural change. Same as 036:311.
- 160:313 Digital Rhetoric** 3 s.h.  
Current discourse (utopic, dystopic, other strands) about the Internet as it shapes and is shaped by competing forces. Repeatable. Same as 008:313, 650:313.
- 160:325 Rhetorics of the Body** 3 s.h.  
The body as a shifting signifier: gendered, raced, classed, sexualized, discursively constructed, materially impacted; multiple and constantly shifting dimensions and interpretations; exploration of ways the body is inscribed in culture via various theories of the body--biological, postmodern, virtual.
- 160:331 Studies in Language Theory** 2-4 s.h.  
Semiotics, speech acts, philosophy of language; emphasis on their relationship to rhetoric. Same as 036:331.
- 160:332 Critical Ethnography** 3 s.h.  
How power relations constitute the work of ethnographic research; ethnography as a rhetorical form--how ethnographic inscription renders self, other, culture, and the world intelligible in ways that reinscribe and/or challenge dominant social relations; axes of power such as race, class, gender, sexuality, and nation within postcolonial, feminist, and antiracist approaches to ethnographic/autoethnographic theory and praxis; negotiating researcher privilege and epistemic violence; crisis of representation. Same as 010:332, 036:378.
- 160:335 Proseminar: Contemporary Rhetorical Studies** 2-4 s.h.  
Problems in contemporary rhetorical studies; may include works of Kenneth Burke, Wayne Booth, deconstructionists, feminist theorists and critics, critics of communication technologies. Same as 036:335.
- 160:338 Colloquium in Political Theory** 1-4 s.h.
- 160:340 Current Issues in Rhetoric** 3 s.h.  
Ethical, social, or cultural issues; rhetoric's role in their contemporary significance; traditional aspects of rhetoric, their pertinence to present concerns. Same as 010:340, 036:317.
- 160:353 Seminar: Intellectual Property** 3 s.h.

Areas of cultural production that have been affected by intellectual property law; notions of authorship and ownership that lie at the heart of intellectual property law, how they affect varied areas of cultural production. Same as 036:353.

**160:360 Issues in Rhetoric and Culture**

3 s.h.

Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Repeatable. Same as 010:360.

**160:370 Medical Writing and Publishing**

3 s.h.

Current state of medical writing; varied industries involving medical writing; styles and techniques for honing writing skills.

**160:400 Writing Dissertations**

3-4 s.h.

Peer criticism of draft dissertation chapters and prospectuses; associated activities, such as construction of the curriculum vitae, letters of application, interview strategies, presentations at campus visits.

## Second Language Acquisition

**Directors:** Judith E. Liskin-Gasparro (Spanish and Portuguese), Roumyana Slabakova (Linguistics)

**Affiliated faculty:** Stephen M. Alessi (Psychological and Quantitative Foundations), Jill N. Beckman (Linguistics), William D. Davies (Linguistics), Michael E. Everson (Teaching and Learning), Elena Gavrusheva (Linguistics), Richard Hurtig (Communication Sciences and Disorders), Chuanren Ke (Asian and Slavic Languages and Literatures), Paula Kempchinsky (Spanish and Portuguese), Judith E. Liskin-Gasparro (Spanish and Portuguese), Sue K. Otto (Spanish and Portuguese), Jason Rothman (Spanish and Portuguese), Leslie Schrier (Teaching and Learning), Kathy L. Schuh (Psychological and Quantitative Foundations), Carol Severino (Rhetoric), Helen Shen (Asian and Slavic Languages and Literatures), Roumyana Slabakova (Linguistics), Bruce H. Spencer (German), Ikuko Yuasa (Asian and Slavic Languages and Literatures)

**Graduate degree:** Ph.D. in Second Language Acquisition

**Web site:** <http://international.uiowa.edu/centers/flare/default.asp>

Second language acquisition (SLA) is a multidisciplinary field whose goal is to understand the processes that underlie non-native language learning. The Second Language Acquisition Program draws from varied academic disciplines, among them linguistics, psychology, psycholinguistics, sociology, sociolinguistics, discourse analysis, conversation analysis, and education.

## Graduate Program

The Second Language Acquisition Program offers a Ph.D. in second language acquisition.

### Doctor of Philosophy

The Ph.D. in second language acquisition requires 72 s.h., including a maximum of 33 s.h. earned in work toward the master's degree. The program is interdisciplinary and focuses on languages other than English. Students interested in pursuing the Ph.D. must hold a master's degree in an appropriate field (e.g., linguistics, foreign language education, English as a second language) or have equivalent academic experience. Students begin the program in fall.

Doctoral students may specialize in one of three areas: linguistics, language program direction, or technology. They may pursue their interdisciplinary interests in courses offered by the College of Liberal Arts and Sciences Departments of Asian and Slavic Languages and Literatures, Communication Sciences and Disorders, French and Italian, German, Linguistics, Rhetoric, and Spanish and Portuguese, and the College of Education Departments of Psychological and Quantitative Foundations, and Teaching and Learning.

The program is divided into foundation courses (13 courses, or 39 s.h.); specialization courses (5 courses, or 15 s.h.), and dissertation work (18 s.h.). A course may be used to fulfill only one requirement.

### FOUNDATION COURSES

All of these:

164:201 Second Language Acquisition Research and Theory I	3 s.h.
164:202 Second Language Acquisition Research and Theory II	3 s.h.
164:211 Multimedia and Second Language Acquisition	3 s.h.

Two of these:

07S:184 Reading in a Second Language (or 164:226, but not both)	3 s.h.
164:221 Topics in Second Language Acquisition: Speaking	3 s.h.
164:223 Topics in Second Language Acquisition: Listening	3 s.h.
164:225/013:259 Grammar in Second Language Teaching/Learning	3 s.h.
164:226 Reading in Non-Roman Scripts (or 07S:184, but not both)	3 s.h.
164:227 Topics in Second Language Acquisition: Writing	3 s.h.
164:229 Cultural Curriculum	3 s.h.

To complete the foundation requirement, students select one course from each of the following eight areas, in consultation with their advisor. With the advisor's approval, students may use courses not listed here to fulfill the requirement.

### Curriculum

07E:300 Design and Organization of Curriculum	3 s.h.
07S:186 Curriculum Foundations	2-3 s.h.
07S:197 Principles of Course Design for Second Language Instruction	3 s.h.

07S:208 Designing Materials for Second Language Instruction 3 s.h.

#### **Quantitative Research Tools**

07P:220 Quantitative Educational Research Methodologies 3 s.h.  
 07P:243 Intermediate Statistical Methods 4 s.h.  
 07P:244 Correlation and Regression 4 s.h.  
 07P:246 Design of Experiments 4 s.h.  
 08N:355 Nonfiction Writing Workshop arr.  
 039:209 Teaching Chinese as a Foreign Language V 3 s.h.

#### **Qualitative Research Tools**

07B:373 Qualitative Research Design and Methods 3 s.h.  
 07S:310 Mixed Methods Research 3 s.h.  
 07S:370 Introduction to Qualitative Methods in Literacy Research 3 s.h.  
 164:205 Analysis of L1 and L2 Data 3 s.h.

#### **Testing, Evaluation, Measurement**

07P:150 Introduction to Educational Measurement 3-4 s.h.  
 07P:165 Introduction to Program and Project Evaluation 3 s.h.  
 07P:255 Construction and Use of Evaluation Instruments 3 s.h.  
 07P:257 Educational Measurement and Evaluation 3 s.h.  
 07P:258 Theory and Technique in Educational Measurement 3 s.h.  
 07P:265 Program Evaluation 3 s.h.  
 07S:200 Fundamentals of Second Language Assessment 3 s.h.

#### **Methodology**

009:234/013:221/039:234/041:234 Principles of Teaching and Learning Foreign Languages 3 s.h.  
 035:200 Foreign Language Teaching Methods 3 s.h.  
 039:202 Teaching Chinese as a Foreign Language I: Theories/Research 3 s.h.  
 039:203 Teaching Chinese as a Foreign Language II 3 s.h.  
 039:204 Teaching Chinese as a Foreign Language III 3 s.h.  
 39J:202 Japanese as a Foreign Language: Practical Applications 3 s.h.  
 103:145 Methods of Teaching English as a Second Language 3 s.h.  
 164:222 Advanced Japanese Pedagogy 3 s.h.

#### **Phonetics, Phonology**

013:258 Modern German Phonetics and Phonology 3 s.h.  
 035:189 Introduction to Spanish Phonology 3 s.h.  
 035:209 Spanish Phonology 3 s.h.  
 103:110 Articulatory and Acoustic Phonetics 3 s.h.  
 103:112 Phonological Analysis 3 s.h.  
 103:203 Introduction to Phonology 3 s.h.  
 103:204 Phonological Theory 3 s.h.  
 103:214 Advanced Phonological Theory 3 s.h.

**Morphology, Syntax**

013:256 Modern German Syntax	3 s.h.
013:257 Morphology	3 s.h.
035:186 Introduction to Spanish Syntax	3 s.h.
035:207 Topics in Comparative Romance Linguistics	3 s.h.
035:210 Spanish Syntax	3 s.h.
103:111 Syntactic Analysis	3 s.h.
103:201 Introduction to Syntax	3 s.h.
103:202 Syntactic Theory	3 s.h.
103:212 Advanced Syntactic Theory	3 s.h.

**General Linguistics**

003:218 Psycholinguistics	3 s.h.
013:255 Semantics	3 s.h.
013:299 Special Topics in German Linguistics	3 s.h.
035:206 Spanish Language Acquisition	3 s.h.
039:202 Teaching Chinese as a Foreign Language I: Theories/Research	3 s.h.
039:144 Introduction to Chinese Linguistics	3 s.h.
103:176 Language Development	1-3 s.h.
103:206 First Language Acquisition	3 s.h.
103:211 Generative Second Language Acquisition	3 s.h.
103:216 Topics in Second Language Acquisition	3 s.h.
103:312 Seminar: Problems in Linguistics	2-3 s.h.
164:157 Linguistic Theory and Second Language Acquisition	3 s.h.
164:207 Sociolinguistics	3 s.h.
164:228 Special Topics in Japanese Linguistics	3 s.h.

**SPECIALIZATION COURSES**

Each student selects one of three specialization areas--linguistics, language program direction, or technology--and takes five courses (total of 15 s.h.) in that area.

**Linguistics Specialization**

Requirements for the linguistics specialization are as follows.

One of the following three-course sequences (Group 1 or Group 2):

**Group 1**

103:203 Introduction to Phonology	3 s.h.
103:204 Phonological Theory	3 s.h.
103:214 Advanced Phonological Theory	3 s.h.

**Group 2**

103:201 Introduction to Syntax	3 s.h.
103:202 Syntactic Theory	3 s.h.
103:212 Advanced Syntactic Theory	3 s.h.

One of these:

103:211 Generative Second Language Acquisition	3 s.h.
An alternate course on linguistic theory and second language acquisition	

One of these:

031:122 Language Development	3 s.h.
031:218 Cognitive Development	3 s.h.
An alternate course on parsing/psycholinguistic mechanisms	

#### Language Program Direction Specialization

Students who choose the language program direction specialization take five of the following courses (chosen from those not taken to satisfy the foundation requirements).

07P:205 Design of Instruction	3 s.h.
07P:215 Web-Based Learning	3 s.h.
07S:180 Issues in Foreign Language Education	3 s.h.
07S:183 Second Language Classroom Learning	3 s.h.
07S:184 Reading in a Second Language	3 s.h.
07S:197 Principles of Course Design for Second Language Instruction	3 s.h.
07S:202 Second Language Program Management	3 s.h.
07S:203 Second Language Planning in Education	3 s.h.
07S:208 Designing Materials for Second Language Instruction	3 s.h.
07S:415 Ph.D. Seminar in Language, Literacy, and Culture	arr.
039:204 Teaching Chinese as a Foreign Language III	3 s.h.
164:205 Analysis of L1 and L2 Data	3 s.h.
164:221 Topics in Second Language Acquisition: Speaking	3 s.h.
164:222 Advanced Japanese Pedagogy	3 s.h.
164:223 Topics in Second Language Acquisition: Listening	3 s.h.
164:225 Grammar in Second Language Teaching/Learning	3 s.h.
164:226 Reading in Non-Roman Scripts	3 s.h.
164:227 Topics in Second Language Acquisition: Writing	3 s.h.
164:228 Special Topics in Japanese Linguistics	3 s.h.
164:229 Cultural Curriculum	3 s.h.

Some students may include an internship experience as part of the specialization.

164:230 Internship	arr.
--------------------	------

#### Technology Specialization

Requirements for the technology specialization are as follows.

A three-course sequence in psychological and quantitative foundations:

One of these:

07P:205 Design of Instruction	3 s.h.
07P:275 Constructivism and Design of Instruction	3 s.h.

Both of these:

07P:208 Designing Educational Multimedia	3 s.h.
07P:215 Web-Based Learning	3 s.h.

Students choose their remaining specialization course work from the following (others may be approved by the student's advisor).

07P:203 Learning, Technology, and Effective Teaching	3 s.h.
021:120 Computing Foundations	3 s.h.
22C:104 Introduction to Informatics	3 s.h.

103:157 Linguistic Theory and Second Language Acquisition	3 s.h.
164:212 Practicum in CALL Software Development	1-4 s.h.
164:214 Advanced CALL Curriculum Development	3 s.h.
A practicum course	3 s.h.

Either of these (if not taken for the three-course sequence in psychological and quantitative foundations, above):

07P:205 Design of Instruction	3 s.h.
07P:275 Constructivism and Design of Instruction	3 s.h.

\*Either of these:

07P:293 Individual Instruction in Psychological and Quantitative Foundations	3 s.h.
164:302 Special Projects in Second Language Acquisition	3 s.h.

\*May be taken after students have completed the core design and technology courses (07P:205 Design of Instruction or 07P:275 Constructivism and Design of Instruction, 07P:208 Designing Educational Multimedia, 07P:215 Web-Based Learning).

### THESIS

All candidates must complete a thesis (164:303 Ph.D. Thesis), for which they may earn up to 18 s.h.

### OPTIONAL COURSE WORK

Students may include the following optional course work in their degree programs.

164:300 Special Topics in Second Language Acquisition	arr.
164:301 Readings in Second Language Acquisition	arr.
164:302 Special Projects in Second Language Acquisition	arr.

## Admission

Admission is for fall semester; students are admitted only for full-time study. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Strong applicants hold a master's degree in a related area, have a cumulative g.p.a. of at least 3.50 in master's degree work, and speak and write English and another language at a professional level. Applicants must submit a writing sample that demonstrates their ability to synthesize and analyze information using standard academic English.

## Financial Support

Teaching assistantships are available through the Foreign Language Acquisition Research and Education Program (FLARE). Assistantships usually involve teaching elementary or intermediate language courses. FLARE also offers a limited number of research assistantships. Visit the FLARE web site for details.

## Second Language Acquisition Courses

### 164:081 Autonomous Language Learning 1-3 s.h.

The art and science of self-directed language study in conjunction with work on a less-commonly-taught language; independent study; for experienced language learners. Same as 187:081.

### 164:101 Intensive Less-Commonly-Taught Languages 4-6 s.h.

Intensive study in varied less-commonly-taught languages; emphasis on speaking, listening, and reading in preparation for academic study or research abroad. Requirements: completion of GE foreign language component. Same as 187:101.

### 164:111 Conversation in Less Commonly Taught Languages arr.

Foreign languages not commonly taught on campus; beyond elementary level; content adapted to enrolled students. Requirements: previous study of the language indicated for the section. Same as 187:111.

- 164:120 Elementary Indonesian I** 4 s.h.  
Bahasa Indonesian language for those with no prior study of the language; emphasis on functional communication skills (listening, speaking, reading, writing). Same as 187:120.
- 164:121 Elementary Indonesian II** 4 s.h.  
Continuation of 164:120; emphasis on functional communication skills (listening, speaking, reading, writing). Same as 187:121.
- 164:125 Conversational Indonesian** 1 s.h.  
Open conversation in Indonesian language; active participation. Prerequisites: 164:121. Same as 187:125.
- 164:130 Elementary Turkish I** 4 s.h.  
Turkish language for those with no prior study of the language; emphasis on functional communication skills (listening, speaking, reading, writing). Same as 187:130.
- 164:131 Elementary Turkish II** 4 s.h.  
Continuation of 164:130; emphasis on functional communication skills (listening, speaking, reading, writing). Prerequisites: 164:130 or 187:130. Same as 187:131.
- 164:135 Conversational Turkish** 1 s.h.  
Open conversation in Turkish language; active participation. Prerequisites: 164:131. Same as 187:135.
- 164:140 Language Development** 3 s.h.  
Introduction to first language acquisition, with focus on infancy through five years; sound discrimination abilities, word learning, babbling and speech production, acquisition of grammar; perspectives from psychology, audiology, linguistics, speech pathology. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:014 or 031:016. Same as 031:122.
- 164:157 Linguistic Theory and Second Language Acquisition** 3 s.h.  
Introduction of research results obtained by generative second language acquisition framework and their implications for classroom teaching methods; current views of language architecture; focus on inflectional morphology and linguistic interfaces, which have been proposed to be severe bottlenecks for acquisition; research findings on acquisition of syntax, phonology, semantics, linguistic pragmatics; pedagogical implications of these findings. Prerequisites: 103:111 and 103:112. Same as 103:157.
- 164:160 Articulatory and Acoustic Phonetics** 3 s.h.  
Production and transcription of sounds in human languages; physics of sound, computer analysis of speech sounds. Offered fall semesters. Same as 103:110.
- 164:163 Methods of Teaching English as a Second Language** 3 s.h.  
Observations of ESL and intensive English classes at the University; design and presentation of short lessons, text evaluation, demonstrations of innovative approaches of the last decade; materials. Offered spring semesters. Prerequisites: 103:110 and 103:141. Same as 103:145.
- 164:170 Issues in Foreign Language Education** 3 s.h.  
Theoretical perspectives of pivotal research issues at the forefront of foreign language education; systems available to foreign language professionals for disseminating research. Same as 07S:180.
- 164:171 Second Language Classroom Learning** 3 s.h.  
Synthesis of empirical findings on children's and adults' learning of a second or foreign language; emphasis on theoretical underpinnings of approaches, methods, techniques in language teaching. Same as 039:177, 07S:183.
- 164:172 Reading in a Second Language** 3 s.h.  
Current theory, research, practice in second language reading field; role of textual features and the reader in reading comprehension. Same as 07S:184.
- 164:173 Curriculum Foundations** 2-3 s.h.

Elementary and secondary background developments in curriculum; definitions, historical perspective, philosophies, theories of knowledge, models, learning theories, directions of development and shaping forces; emphasis on development of a curriculum project. Same as 07S:186.

**164:174 Principles of Course Design for Second Language Instruction** 3 s.h.

Contemporary views of second language curriculum design; guidelines necessary for the creation of prototypical curriculum units to be transposed into classroom-ready forms; for individuals interested in foreign language materials development. Same as 07S:197.

**164:181 Introduction to Chinese Linguistics** 3 s.h.

Aspects of modern Chinese linguistics, such as Chinese phonology, syntax, pedagogical grammar, history of the language. Taught in English. Same as 039:144, 103:144.

**164:186 Introduction to Spanish Syntax** 3 s.h.

Basic principles of generative syntax as applied to analysis of Spanish syntactic structure; extensive syntactic analysis. Prerequisites: 035:121. Same as 035:186.

**164:189 Introduction to Spanish Phonology** 3 s.h.

Sound patterns of Spanish; how various theoretical approaches solve basic problems in Spanish phonology; identification of linguistic universals, how they are manifested in the sound structure of Spanish. Prerequisites: 035:121 or 035:122. Same as 035:189.

**164:201 Second Language Acquisition Research and Theory I** 3 s.h.

Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Same as 009:237, 035:201, 039:200, 39J:201.

**164:202 Second Language Acquisition Research and Theory II** 3 s.h.

Continuation of 164:201. Prerequisites: 164:201. Same as 035:202, 039:201.

**164:203 Introduction to Phonology** 3 s.h.

Analysis of sound systems, focus on early generative phonological theory; extensive practice in analysis using data from a variety of languages; linguistic argumentation. Prerequisites: 103:110. Same as 103:203.

**164:205 Analysis of L1 and L2 Data** 3 s.h.

Issues in qualitative and quantitative analysis of first- and second-language data; data collection, analytical frameworks and approaches. Prerequisites: 164:201. Same as 039:205.

**164:207 Sociolinguistics** 3 s.h.

Topics such as discourse and conversation analyses, linguistic pragmatics, linguistic variations, issues of language and gender. Prerequisites: 103:100. Same as 039:207.

**164:211 Multimedia and Second Language Acquisition** 3 s.h.

Foreign language multimedia in the context of current second language acquisition theories and research; readings on interactivity, interface design, feedback, learner control, and acquisition of vocabulary, grammar, and culture; multimedia development project. Requirements: foreign language teaching methodology course. Same as 009:238, 013:253, 035:212.

**164:212 Practicum in CALL Software Development** 1-4 s.h.

Supervised experience in an applied setting involving development of computer-assisted language learning (CALL) software. Repeatable. Prerequisites: 164:211. Requirements: faculty sponsor.

**164:214 Advanced CALL Curriculum Development** 3 s.h.

Advanced instruction in a variety of software and hardware tools for development of multimedia computer-assisted language learning (CALL) courseware; students develop software for a General Education Program or third-year language course in collaboration with course supervisor. Prerequisites: 164:212. Same as 009:239, 013:254, 035:214.

**164:221 Topics in Second Language Acquisition: Speaking** 3 s.h.

Theory, pedagogy, research, and assessment in second language speaking. Same as 009:236, 035:228.

**164:222 Advanced Japanese Pedagogy** 3 s.h.

Instructional methods and management issues relevant to teaching Japanese language at advanced levels.

Prerequisites: 39J:202. Same as 39J:203.

**164:223 Topics in Second Language Acquisition: Listening**

3 s.h.

Theory, pedagogy, research, and assessment in second language listening. Same as 039:223.

**164:225 Grammar in Second Language Teaching/Learning**

3 s.h.

Grammar, second language acquisition, and teaching. Taught in English, projects in varied languages. Same as 013:259.

**164:226 Reading in Non-Roman Scripts**

3 s.h.

Theory and practice of reading in languages that use non-Roman alphabets, syllabary, logographic systems; reading in first and second language contexts; instructional and literacy development issues. Prerequisites: 07E:171 or 07P:270 or 07S:184. Same as 07S:207.

**164:227 Topics in Second Language Acquisition: Writing**

3 s.h.

Theory, pedagogy, research, and assessment in second language writing. Taught in English. Same as 010:275, 035:227.

**164:228 Special Topics in Japanese Linguistics**

3 s.h.

Topics in applied linguistics and language pedagogy related to Japanese language. Same as 39J:239.

**164:229 Cultural Curriculum**

3 s.h.

Culture's role in foreign/second language teaching; definition, pedagogy, assessment, and materials that allow culture to be taught and learned. Same as 07S:209.

**164:230 Internship**

arr.

**164:240 Cognitive Development**

3 s.h.

Theoretical and empirical analyses of children's cognitive development; spatial and numerical concepts, causal reasoning, categorization, metacognition, memory. Same as 031:218.

**164:241 Introduction to Syntax**

3 s.h.

Methods and argumentation for formal analysis of sentence structure through induction from language data of central concepts and relations; hypothesis testing, empirical bases of theoretical concepts. Corequisites: 103:200. Same as 103:201.

**164:242 Syntactic Theory**

3 s.h.

Current syntactic theory examined through analysis of data sets, readings in recent research; emphasis on argument construction, statement of formal principles. Offered spring semesters. Prerequisites: 103:201. Same as 103:202.

**164:244 Phonological Theory**

3 s.h.

Post-SPE phonological theory, including autosegmental phonology, feature geometry, the syllable, optimality theory. Prerequisites: 103:203. Same as 103:204.

**164:245 First Language Acquisition**

3 s.h.

Child language from a crosslinguistic perspective. Prerequisites: 103:110, and 103:141 or 103:201. Same as 103:206.

**164:246 Generative Second Language Acquisition**

3 s.h.

Overview of current second-language acquisition research in the generative linguistic framework; focus on characterizing second language learners' linguistic competence and how it is constrained by principles of universal grammar. Offered fall semesters. Prerequisites: 103:111 or 103:201, and 103:112 or 103:203. Same as 103:211.

**164:247 Advanced Syntactic Theory**

2-3 s.h.

Recent developments in syntax; comparison of theories, argumentation, and uses of data. Repeatable. Same as 103:212.

**164:248 Advanced Phonological Theory**

2-3 s.h.

Current issues. Repeatable. Prerequisites: 103:204. Same as 103:214.

- 164:249 Topics in Second Language Acquisition** 3 s.h.  
Recent developments of selected issues in second language acquisition. Repeatable. Prerequisites: 103:211. Same as 103:216.
- 164:260 Foreign Language Teaching Methods** 3 s.h.  
Readings in pedagogical theory and practice and second language acquisition; experience designing activities for teaching and assessment, with critiques based on current theories and approaches; development of reflective practices toward one's own language teaching. Same as 035:200.
- 164:261 Spanish Language Acquisition** 3 s.h.  
Theoretical linguistic approaches to monolingual, bilingual, and second language acquisition of Spanish and Portuguese; varied topics. Prerequisites: 035:204. Same as 035:206.
- 164:262 Topics in Comparative Romance Linguistics** 3 s.h.  
Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Repeatable. Prerequisites: 035:204. Recommendations: additional graduate course work in linguistics. Same as 035:207, 103:262, 20E:201.
- 164:263 Spanish Phonology** 3 s.h.  
Modern approaches to synchronic phonology as applied to Spanish; focus on traditional descriptive problems, recent generative analyses. Requirements: phonology or linguistics course. Same as 035:209.
- 164:264 Spanish Syntax** 3 s.h.  
Spanish syntactic constructions examined in framework of selected syntactic theory; emphasis on development of syntactic argumentation. Requirements: one course in syntax. Same as 035:210.
- 164:270 Fundamentals of Second Language Assessment** 3 s.h.  
How to write language tests; discussion of fundamental issues in development of new tests or selection of existing tests. Same as 07S:200.
- 164:271 Second Language Program Management** 3 s.h.  
Preparation for supervising, administering foreign language programs at all levels; for precollegiate language teachers and graduate students. Same as 07S:202.
- 164:272 Designing Materials for Second Language Instruction** 3 s.h.  
Critical perspective on creating and using media for second language learning and teaching; research on materials design, development of media. Prerequisites: 07S:183. Same as 07S:208.
- 164:274 Teaching Chinese as a Foreign Language IV** 3 s.h.  
Overview of goals, concepts, principles, research, and issues in assessment and testing of Chinese as a foreign language. Same as 039:208.
- 164:275 Teaching Chinese as a Foreign Language V** 3 s.h.  
Seminar on research design; for M.A. students planning to write a thesis or project, or graduate students seeking knowledge in designing qualitative or quantitative studies. Prerequisites: 07P:143 and 039:202. Same as 039:209.
- 164:276 Japanese as a Foreign Language: Practical Applications** 3 s.h.  
Instructional methodology, curriculum, and material design; hands-on experience. Prerequisites: 39J:122. Same as 39J:202.
- 164:281 Teaching Chinese as a Foreign Language I: Theories/Research** 3 s.h.  
Research, theory on acquisition of Chinese as a non-native language. Same as 039:202.
- 164:282 Teaching Chinese as a Foreign Language II** 3 s.h.  
Multiple levels of major Chinese textbooks, curricular organizational schemes, language programs, communicative language instruction; development of supplementary materials for a University of Iowa Chinese course. Same as 039:203.
- 164:298 Semantics** 3 s.h.

Meaning in natural language, with focus on German; lexical semantics (sense relations, semantic fields, componential analysis), modality, temporal and spatial deixis, aspect. Same as 013:255.

**164:299 Special Topics in German Linguistics**

3 s.h.

Repeatable. Same as 013:299, 103:232.

**164:300 Special Topics in Second Language Acquisition**

arr.

Repeatable.

**164:301 Readings in Second Language Acquisition**

arr.

Repeatable.

**164:302 Special Projects in Second Language Acquisition**

arr.

Repeatable.

**164:303 Ph.D. Thesis**

arr.

**164:342 Seminar: Problems in Linguistics**

2-3 s.h.

Intensive study of theoretical and practical problems. Same as 103:312.

## Translational Biomedicine

**Interim chair:** Gary Rosenthal (Internal Medicine)

**Executive committee:** Nancy Andreasen (Psychiatry), David Eichmann (Library and Information Science/Computer Science), Sarah England (Physiology), Janet Fairley (Dermatology), Vicki Grassian (Chemistry), William Haynes (Internal Medicine), Steven Maravetz (Health Science Relations), Jeff Murray (Pediatrics/Biology/Pediatric Dentistry/Epidemiology), Michael O'Hara (Psychology), Gary Rosenthal (Internal Medicine), James Torner (Epidemiology), Donald Yarbrough (Psychological and Quantitative Foundations/Educational Policy and Leadership Studies)

**Affiliated faculty:** Francois M. Abboud (Internal Medicine/Molecular Physiology and Biophysics), Nancy Andreasen (Psychiatry), Michael A. Apicella (Microbiology), Gale A. Bishop (Microbiology/Internal Medicine), Joseph A. Buckwalter (Orthopaedics and Rehabilitation), Garry R. Buettner (Free Radical and Radiation Biology), Trudy L. Burns (Biostatistics), John J. Callaghan (Orthopaedics and Rehabilitation/Biomedical Engineering), Kevin P. Campbell (Molecular Physiology and Biophysics), Barry Carter (Pharmacy), Thomas L. Casavant (Electrical and Computer Engineering/Biomedical Engineering/Ophthalmology and Visual Sciences), Michael B. Cohen (Pathology), Elizabeth Chrischilles (Epidemiology), Beverley L. Davidson (Internal Medicine), David Eichmann (Library and Information Science/Computer Science), Bruce Gantz (Otolaryngology--Head and Neck Surgery), Gerald F. Gebhart (Pharmacology), E. Peter Greenberg (Microbiology), Gregory S. Hageman (Ophthalmology and Visual Sciences), William Haynes (Internal Medicine), Donald D. Heistad (Internal Medicine/Pharmacology), Eric A. Hoffman (Radiology/Biomedical Engineering), Matthew A. Howard III (Neurosurgery), Gary Hunninghake (Internal Medicine), Joel Kline (Internal Medicine), Ronald M. Lauer (Pediatrics), Steven R. Lentz (Internal Medicine), Steven M. Levy (Dentistry), Charles F. Lynch (Epidemiology), Allyn L. Mark (Internal Medicine), Paul B. McCray (Pediatrics), Geoffrey McLennan (Internal Medicine), Jeff Murray (Pediatrics/Biology/Pediatric Dentistry/Epidemiology), Larry W. Oberley (Free Radical and Radiation Biology), M. Sue O'Dorisio (Pediatrics), Michael O'Hara (Psychology), Stanley Perlman (Pediatrics/Microbiology), Timothy L. Ratliff (Urology), Matthew Rizzo (Neurology/Industrial Engineering), Robert G. Robinson (Psychiatry), Gary Rosenthal (Internal Medicine), Andrew F. Russo (Molecular Physiology and Biophysics), D. Michael Shasby (Internal Medicine), Curt D. Sigmund (Internal Medicine/Molecular Physiology and Biophysics), Richard J.H. Smith (Otolaryngology--Head and Neck Surgery), Arthur A. Spector (Biochemistry/Internal Medicine), Clark M. Stanford (Dentistry), Jack T. Stapleton (Internal Medicine), John B. Stokes III (Internal Medicine), Edwin M. Stone (Ophthalmology and Visual Sciences), William T. Talman (Neurology), Marita G. Tittler (Nursing), Veronica Vieland (Biostatistics/Psychiatry), Robert B. Wallace (Epidemiology/Internal Medicine), George J. Weiner (Internal Medicine), Joel V. Weinstock (Internal Medicine), Jerrold P. Weiss (Internal Medicine), Michael J. Welsh (Internal Medicine/Molecular Physiology and Biophysics), Mary E. Wilson (Internal Medicine/Microbiology), Fred Wolinsky (Health Management and Policy), Joseph Zabner (Internal Medicine)

**Graduate degrees:** M.S., Ph.D. in Translational Biomedicine

**Web site:** <http://icts.uiowa.edu>

The Translational Biomedicine Program prepares skilled clinicians to pursue new knowledge about health and disease through patient-based research. The program's goal is to support the medical research enterprise in its efforts to advance the prevention, treatment, and cure of disease.

Students in the program are trained to conduct rigorous, original clinical investigations using basic biological and physiological principles. They receive didactic training and engage in substantial mentored research opportunities in the areas of disease mechanisms, or etiology; new clinical insights into diagnosis or natural history of disease; objective assessment and outcome of therapeutic intervention; medical informatics; and development of new approaches to therapeutics.

## Graduate Programs

The program offers a Master of Science and a Doctor of Philosophy in translational biomedicine.

### Master of Science

The Master of Science in translational biomedicine requires course work and research equivalent to 54 s.h. of graduate credit. Each student's plan of study for the three-year program is based on his or her chosen discipline.

All students take background courses in epidemiology, study design, and statistics as well as advanced courses in basic sciences relevant to their individual research areas.

Students also must write a proposal for a K23 Mentored Patient-Oriented Research Career Development Award from the National Institutes of Health. For M.S. students, the K23 proposal replaces the thesis. A draft of the K23 proposal must pass an internal review by the end of the student's second year.

Students may choose to pursue research areas in any of the health sciences disciplines, and they enjoy considerable flexibility in scheduling course work and beginning research.

The following courses are required. All students must register for 163:225 Translational Biomedical Research and 173:163 Seminar in Clinical and Translational Research each semester in the program.

173:140 Epidemiology I: Principles	3 s.h.
173:150 Introduction to Clinical Epidemiology	2-3 s.h.
173:152 Clinical Research Career Development	1 s.h.
171:161 Introduction to Biostatistics	3 s.h.
173:161 Patient-Oriented Research Data Analysis	3 s.h.
173:163 Seminar in Clinical and Translational Research	1 s.h.
173:211 Grant Writing for Clinical Investigators	1 s.h.
163:225 Translational Biomedical Research	arr.
173:240 Epidemiology II: Advanced Methods	4 s.h.
173:290 Intervention and Clinical Trials	3 s.h.
173:295 Clinical Research Ethics	2 s.h.

The following is a sample schedule for the Master of Science.

**FIRST YEAR****Summer Session**

173:140 Epidemiology I: Principles	3 s.h.
173:152 Clinical Research Career Development	1 s.h.
171:161 Introduction to Biostatistics	3 s.h.

**Fall Semester**

051:121 Introduction to Bioinformatics	4 s.h.
173:150 Introduction to Clinical Epidemiology	2-3 s.h.
173:290 Intervention and Clinical Trials	3 s.h.
173:163 Seminar in Clinical and Translational Research	1 s.h.
163:225 Translational Biomedical Research	arr.

**Spring Semester**

173:161 Patient-Oriented Research Data Analysis	3 s.h.
173:240 Epidemiology II: Advanced Methods	4 s.h.
173:295 Clinical Research Ethics	2 s.h.
173:163 Seminar in Clinical and Translational Research	1 s.h.
163:225 Translational Biomedical Research	arr.

**SECOND YEAR****Summer Session**

173:211 Grant Writing for Clinical Investigators	1 s.h.

**Fall Semester**

173:163 Seminar in Clinical and Translational Research 1 s.h.  
163:225 Translational Biomedical Research arr.

**Spring Semester**

173:163 Seminar in Clinical and Translational Research 1 s.h.  
163:225 Translational Biomedical Research arr.

**Doctor of Philosophy**

The Doctor of Philosophy in translational biomedicine requires a minimum of 72 s.h. of graduate credit. Ph.D. students build on their M.S. study plan with more advanced work. For information about the Ph.D., contact the Translational Biomedicine Program.

**Admission**

The Translational Biomedicine Program welcomes students with diverse educational and scientific backgrounds and varied research interests. Applicants to the program should have a strong interest and background in a health science profession and knowledge of basic sciences and medicine. They should hold an advanced degree in one of the health sciences (e.g., M.D., D.O., D.D.S., D.V.M., M.S.N., Pharm.D., Ph.D.).

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Admission is based on applicants' undergraduate and graduate academic achievement, performance on the Graduate Record Examination (GRE) General Test, and letters of recommendation. Applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL).

The program helps applicants find suitable mentors. All prospective students, and their mentors, must guarantee that once they are accepted as students in the program, they will be able to devote essentially all of their time over a three-year period to training. For instance, a fellow in the Carver College of Medicine could spend no more than two months each year working on clinical assignments (e.g., two months of inpatient assignments or one month of inpatient assignments and one-half day per week in a clinic).

**Financial Support**

Funding of tuition and salaries or stipends is available from a number of sources. Contact the Translational Biomedicine Program for information.

**Facilities**

Training is conducted mainly in the laboratories and teaching facilities of the Carver College of Medicine and the College of Public Health. The University of Iowa Institute for Clinical and Translational Science Clinical Research Unit is available for research training. The program also is linked with the Carver College of Medicine's graduate training program in clinical research.

**Associated Courses**

173:163 Seminar in Clinical and Translational Research 1 s.h.

## Transportation Studies

**Director:** Paul F. Hanley

**Affiliated faculty:** Marc P. Armstrong (Geography), M. Asghar Bhatti (Civil and Environmental Engineering), John W. Fuller (Urban and Regional Planning/Economics), Paul F. Hanley (Urban and Regional Planning), Jon G. Kuhl (Electrical and Computer Engineering), Hosin David Lee (Civil and Environmental Engineering), Miwa Matsuo (Urban and Regional Planning), Wilfrid A. Nixon (Civil and Environmental Engineering), Gerard Rushton (Geography/Health Management and Policy), Thomas Schnell (Mechanical and Industrial Engineering), James W. Stoner (Civil and Environmental Engineering/Urban and Regional Planning)

**Graduate nondegree program:** Certificate in Transportation Studies

**Web site:** <http://ppc.uiowa.edu>

Transportation is vital to modern society. The United States, like other nations, faces many critical transportation problems and issues. The highway system is reaching an advanced stage of its life cycle, public transit operating deficits are growing, the quality of transportation available to many citizens is unacceptably low, serious inequities exist between transportation modes, and extensive changes are called for in traditional transportation institutions. New approaches to financing the nation's road system are badly needed.

Transportation engineers and planners draw on a number of skills to respond to the challenges they face. They must analyze and forecast the movement of people and goods within and between cities; identify effective and efficient means for providing desired transportation services; price these services properly; and evaluate the impact that transportation changes have on land use, environmental quality, the local or regional economy, and various subgroups within society.

No single academic discipline can supply all of the theories, principles, or methods needed to address the varied and complex problems in transportation. Recognizing this, the Department of Civil and Environmental Engineering and the Urban and Regional Planning Program participate in the interdisciplinary Transportation Studies Program, through which students in the participating units can earn the Certificate in Transportation along with their graduate degrees.

The Department of Mechanical and Industrial Engineering also participates in the transportation certificate program, offering courses in human factors and safety issues in transportation, and the Department of Geography offers courses in geographic information systems (GIS), location theory, and other related areas.

### Certificate

The Certificate in Transportation Studies requires 18 s.h. of graduate credit. Students may earn the certificate in conjunction with an M.S. or Ph.D. in civil and environmental engineering, or with an M.A. or M.S. in urban and regional planning.

The Certificate in Transportation Studies is coordinated by the Public Policy Center in conjunction with the Graduate College. Completion of the certificate requirements is noted on the student's transcript. The certificate is awarded in conjunction with the established degree requirements of the individual academic units.

Students who enroll in a course of study leading to the certificate also may wish to participate in faculty-led transportation research, which may explore topics such as system planning, traffic operations and engineering, spatial data systems and analysis, simulation applications, and policy issues.

### Certificate with M.S. or Ph.D. in Civil and Environmental Engineering

The Department of Civil and Environmental Engineering offers a subtrack in transportation at both the Master of Science and Doctor of Philosophy levels. The M.S. requires a minimum of 30 s.h. of graduate credit and may be earned either with or without thesis. Thesis students may count up to 6 s.h. of credit for thesis research toward the 30 s.h. required for the degree. Nonthesis students usually are required to complete a research paper based on independent study and to defend the paper in an oral examination.

Students who wish to complete the M.S. in a single academic year must complete 15 s.h. during both the fall and spring semesters.

The Ph.D. degree requires a minimum of 72 s.h. of graduate credit; up to 18 s.h. may be earned for dissertation research. A minimum of one year of campus residency is required. For detailed information on the residency requirement, see section XII.C of the Manual of Rules and Regulations of the Graduate College.

Individuals with degrees in other transportation-related disciplines are encouraged to apply to the Transportation Studies Program. Depending on a student's background, additional course work in statistics, computer programming, simulation, mathematics, and operations research may be required for the certificate. Credit earned in these courses may not be applicable to the student's degree program.

Students pursuing an M.S. or Ph.D. in civil and environmental engineering must complete 18 s.h. from the following courses in order to earn the Certificate in Transportation Studies. Not all courses are offered every semester; consult ISIS to determine when specific courses are offered.

### Fall Semester

053:163 Traffic Engineering	3 s.h.
053:164 Winter Highway Maintenance	3 s.h.
053:165 Pavement Analysis and Design	3 s.h.
102:266 Transportation and Land Use Planning	3 s.h.

#### Spring Semester

053:162 Design of Transportation Systems	3 s.h.
053:163 Traffic Engineering	3 s.h.
053:167 Public Transit Operations and Planning	3 s.h.
053:262 Transportation Demand Analysis	3 s.h.

Engineering students may apply to the certificate program through the Graduate College and the Department of Civil and Environmental Engineering.

#### Certificate with M.A. or M.S. in Urban and Regional Planning

The graduate Urban and Regional Planning Program offers Master of Arts and Master of Science degrees with a transportation concentration. Both degrees require 50 s.h. of graduate credit. During the first year, students complete an integrated core curriculum (21 s.h.) consisting of courses in planning economics and public finance, analytic methods, planning theory, and law. Beginning in the second semester, students take courses in an area of concentration (minimum of 9 s.h.), such as transportation, where core concepts are applied to a selected specialization. The planning curriculum is intended to provide students with the capability to examine policy in transportation, devise workable options, evaluate these optional courses of action, and work toward the implementation of policy solutions.

Electives complete the remaining credit. Students who select the thesis option may register for up to 6 s.h. of thesis credit and 8 s.h. of readings. Students may apply 3 s.h. of readings to the area of concentration requirement and substitute the thesis for the portfolio.

Students pursuing an M.A. or M.S. in urban and regional planning must complete 18 s.h. from the following courses in order to earn the Certificate in Transportation Studies. Not all courses are offered every semester; consult ISIS to determine when specific courses are offered.

#### Fall Semester

102:263 Application Simulation to Transportation	3 s.h.
102:265 Planning Sustainable Transportation	1-3 s.h.
102:266 Transportation and Land Use Planning	3 s.h.
102:268 Freight Transportation Planning	3 s.h.
102:269 Transportation Program Seminar	1 s.h.

#### Spring Semester

102:133 Transportation Economics	3 s.h.
102:195 Public Transit Operations and Planning	3 s.h.
102:260 Transportation Policy and Planning	2 s.h.
102:262 Transportation Demand Analysis	3 s.h.
102:264 Transportation Planning Process	2-3 s.h.

Urban and regional planning students may apply to the certificate program through the Graduate College and the Urban and Regional Planning Program.

# Urban and Regional Planning

**Director:** Charles E. Connerly

**Professors:** Charles E. Connerly, John W. Fuller

**Professors emeriti:** Peter S. Fisher, James A. Throgmorton

**Associate professors:** Jerry A. Anthony, Paul F. Hanley, Lucie Laurian, James W. Stoner

**Assistant professors:** Richard Funderburg, Miwa Matsuo, Phuong Nguyen, Aaron Strong

**Adjunct lecturers:** Leslie Beck, Josh Busard, Hilary Copeland, Bart Cramer, Rick Havel, Christina Kuecker, Ron Mirr, Jeffrey Schott, Jim Schwab, Dan Swartzendruber, David Swenson

**Graduate degrees:** M.A., M.S. in Urban and Regional Planning

**Web site:** <http://www.urban.uiowa.edu>

Urban and regional planning encompasses the development and implementation of public policies that improve the quality of life in cities and regions. Today's planners find themselves in demand for such diverse jobs as transport planner, zoning administrator, environmental analyst with a natural resources agency, economic development planner, regional solid waste management coordinator, state public health planner, neighborhood planner, state legislative analyst, and transportation consultant.

## Graduate Programs

The Urban and Regional Planning Program offers a Master of Arts and a Master of Science in urban and regional planning. It also offers several joint degree programs with other academic units: B.S.E./M.A. or M.S. with the College of Engineering; J.D./M.A. or M.S. with the College of Law; M.H.A./M.A. or M.S. and M.S./M.A. or M.S. with the College of Public Health; and M.S.W./M.A. or M.S. with the School of Social Work. Students also may pursue the Certificate in Transportation Studies in conjunction with an M.A. or M.S. in planning. Joint programs and the certificate are described later in this section.

The Master of Arts and Master of Science are two-year degree programs fully accredited by the Planning Accreditation Board. Each is built on the premise that planners must be educated in methods of policy analysis and that there is a common body of knowledge, represented in the core curriculum, that provides a solid foundation for all specializations in the field.

A wide range of educational backgrounds provide good preparation for graduate study in urban and regional planning. Students with undergraduate majors such as geography, economics, English, political science, engineering, architecture, sociology, urban studies, and history currently study in the program. Usually up to 60 full-time and a few part-time students are enrolled. About half of them are women, and about 10 percent are international students.

The common core of courses and the design of the facilities allow students to get to know each other quickly. Students interact closely with faculty members in the classroom, in informal conversation, and while working on research projects.

Recent graduates of the program have taken positions with city, metropolitan, and regional planning agencies, state and federal government, nonprofit organizations, and private consulting firms. They work in all geographic regions of the United States and in several countries around the world.

### Master of Arts, Master of Science

The Master of Arts and Master of Science require 50 s.h. of graduate credit, including 23 s.h. of core courses, 9 s.h. of courses in an area of concentration, and 18 s.h. of electives. A final examination is required for both degrees. A thesis is not required, although students may petition to write one; see "Thesis" below.

Students may choose to earn 2 s.h. by completing an approved internship with a planning agency during summer or the academic year. They also may elect to complete a practicum consisting of at least five months of employment in a planning-related organization, for 5 s.h. of credit. See "Internship" and "Practicum" below.

All students, including those in joint degree programs, must complete a minimum of 35 s.h. of planning courses (prefix 102). Students must earn a grade of B-minus or higher in all core and concentration area courses and must maintain an overall graduate g.p.a. of at least 3.00.

The curriculum is based on the philosophy that planners must develop the theoretical and analytic skills that will permit them to analyze social problems and evaluate public policies. Planners also must cultivate professional skills such as report writing, oral presentation, computer use, and team management in order to work effectively in various organizational and political environments.

### CORE CURRICULUM

The core curriculum helps students develop an understanding of the institutions--social, economic, political, administrative, and legal systems--that provide the context for policy analysis and that constrain public choices. It also promotes development of the ability to identify social goals and normative criteria for evaluating public policies, as well

as the analytic skills to perform such investigations.

The core requires a total of 23 s.h. (14 s.h. in the first fall semester, 3 s.h. in the spring semester, and 6 s.h. in the second year). First-semester courses are drawn primarily from traditional disciplines, particularly economics and statistics, and include an introduction to land use planning and to theories and practice of planning. As students proceed through the curriculum, increasing emphasis is placed on the development of critical judgment and insight, achieved through the application of theory and methods to realistic planning problems and case studies.

Students may request a waiver of selected core courses on the basis of previous course work.

Core courses and required semester hours are noted in the following typical class schedule.

#### **First Semester**

102:200 Analytic Methods in Planning I	3 s.h.
102:202 Land Use Planning: Law and Practice	4 s.h.
102:203 History and Theories of Planning	3 s.h.
102:205 Economics for Policy Analysis	3 s.h.
102:208 Program Seminar in Planning Practice	1 s.h.

#### **Second Semester**

102:201 Analytic Methods in Planning II	3 s.h.
Electives and area of concentration courses	9 s.h.

#### **Third Semester**

102:209 Field Problems in Planning I	3 s.h.
Electives and area of concentration courses	7 s.h.
Internship	2 s.h.

#### **Fourth Semester**

102:210 Field Problems in Planning II	3 s.h.
Electives and area of concentration courses	9 s.h.

#### **CONCENTRATION AREA**

Beginning in the second semester of the program, students develop an area of concentration by applying the concepts and skills developed in the core to a specific field of planning. Currently, there are five concentration areas supported by faculty and course offerings in the planning program: transportation planning, housing and community development, economic development, land use and environmental planning, and geographic information systems.

Students complete at least 9 s.h. of courses in their concentration area. Courses offered by other University departments may supplement those offered by the planning program.

Students may combine two concentration areas. Examples of combined areas are environmental and economic development planning, and transportation and community development planning. Students also may design other concentration areas, subject to faculty approval. For example, students can specialize in health services planning with appropriate course work in the Department of Health Management and Policy or Occupational and Environmental Health, or in human services planning with courses in the School of Social Work.

#### **THESIS**

A thesis is not required, although students may petition to write one. Students may register for up to 6 s.h. of thesis credit. In addition, they may take up to 8 s.h. of readings to develop a thesis topic and prepare a literature review.

#### **INTERNSHIP**

Students are encouraged to complete an internship in a planning agency or related organization. To earn 2 s.h. of credit for the internship, students must submit a brief paper summarizing and evaluating their experience. Internships usually are paid staff positions and are completed during the summer between the first and second years or during the academic year.

### **PRACTICUM**

An extended internship, consisting of at least five months of full-time employment in a planning-related organization, may qualify as a practicum. A practicum generally takes place during the summer and into the fall semester of the second year. It carries 5 s.h. of credit and substitutes for the required field problems courses, 102:209 Field Problems in Planning I and 102:210 Field Problems in Planning II, and the internship.

### **FINAL EXAM**

A final examination is required for all M.A. and M.S. students. An oral exam constitutes the final exam for students who do not write a thesis.

## **Joint Degrees and Certificates**

### **Joint B.S.E./M.A. or M.S. in Urban and Regional Planning**

Students pursuing a B.S.E. in civil and environmental engineering may apply for admission to the joint B.S.E./master's degree program with urban and regional planning, during the second semester of their junior year. Graduates of the joint program with engineering have technical skills and an understanding of policy development and implementation, a combination of skills that prepares them for employment as public works directors, city engineers, transportation engineers, or in public utilities.

For information on B.S.E. requirements, see Bachelor of Science in Engineering (College of Engineering) in the Catalog.

Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program. See Civil and Environmental Engineering (College of Engineering) in the Catalog.

### **Joint J.D./M.A. or M.S. in Urban and Regional Planning**

The Juris Doctor/Master of Arts or Master of Science is the planning program's most popular joint degree. Its graduates typically seek employment as city managers, city attorneys, city planners, planning administrators, or positions as land use or environmental law specialists in legal firms or advocacy organizations.

The joint J.D./M.A. or M.S. requires a minimum of 107 s.h. of graduate credit, including 72 s.h. for the J.D. and 35 s.h. for the M.A. or M.S. It normally is completed in four years. Completion of both programs separately requires a total of 134 s.h. and five years.

Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program. See College of Law in the Catalog.

### **Joint M.H.A./M.A. or M.S. in Urban and Regional Planning**

Students interested in community and health planning may pursue a joint master's degree offered by the Urban and Regional Planning Program and the Department of Health Management and Policy in the College of Public Health. This three-year program requires 75 s.h. of graduate credit and leads to an M.A. or M.S. in planning and an M.H.A. (Master of Health Administration). Completing the joint program takes one year less than completion of the two programs separately. Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

The health management and policy degree enables students to strengthen their credentials as health planners or expand their job options to include administrative positions in the health field as well as health planning jobs. Graduates of the joint program typically find employment in hospitals, state departments of health, and other private, nonprofit, or public health agencies. See Health Management and Policy (College of Public Health) in the Catalog.

### **Joint M.S. in Occupational and Environmental Health/M.A. or M.S. in Urban and Regional Planning**

Students interested in environmental health may elect to pursue a joint master's degree offered by the Urban and Regional Planning Program and the College of Public Health. This option results in an M.A. or M.S. in planning and an M.S. in occupational and environmental health. The joint program requires 65 s.h. of credit, including 35 s.h. earned in urban and regional planning and 30 s.h. earned in occupational and environmental health. The program can be completed in five semesters. Separate application to each degree program is required. Applicants must be admitted to

both programs before they can be admitted to the joint degree program.

Graduates of the program typically find employment in the public health field, with state health and human services departments, or as health or environmental planners. See Occupational and Environmental Health (College of Public Health) in the Catalog.

### **Joint M.S.W./M.A. or M.S. in Urban and Regional Planning**

For those interested in a career in social service delivery or human services planning, a joint program is offered by urban and regional planning and the School of Social Work, leading to an M.A. or M.S. in planning and an M.S.W. in social work. Up to 12 s.h. earned in one discipline can be applied to the other. It is possible to complete the program in three years, although some students may require an additional semester. Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

Graduates of this joint program find careers as human services planners for local planning agencies, nonprofit social service agencies, and state governments. See Social Work (College of Liberal Arts and Sciences) in the Catalog.

### **M.A. or M.S. in Urban and Regional Planning/Certificate in Transportation Studies**

Urban and regional planning students who satisfactorily complete a prescribed set of transportation courses can earn the Certificate in Transportation Studies. The certificate program includes courses in urban and regional planning, engineering, and economics. Completion of the certificate is noted on the student's transcript.

The Transportation Studies Program is administered through the University's Public Policy Center. See Transportation Studies (Graduate College) in the Catalog.

## **Admission**

Admission to the Urban and Regional Planning Program is open to students from any undergraduate major or concentration area.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Admission is based on Graduate Record Examination (GRE) General Test scores (verbal, quantitative, and analytical writing), letters of recommendation, previous academic performance, and a written statement of purpose. International applicants whose first language is not English are required to submit official TOEFL scores.

Applicants should submit the application form, GRE General Test scores, TOEFL score (for students whose first language is not English), recommendation letters, statement of purpose, and transcripts. For fall admission, applications should be submitted to arrive early in the year (preferably by January 15), although applications are accepted until July 15 (April 15 for international students). Applications for spring admission should be received by October 1 and no later than December 1. Fall admission is strongly preferred. Students applying for financial aid should submit their materials by January 15.

## **Financial Support**

Students in the Urban and Regional Planning Program receive financial support from the program primarily in the form of teaching or research assistantships and contract or grant-funded assistantships. Assistantships typically require 10 hours of work per week under the direction of a faculty member. A few full or partial tuition scholarships also are available.

Students initiate applications for financial support, and awards are made on the basis of merit, experience, and interests. Assistantships may be renewed for a total of up to four semesters. The planning program has been successful in providing support to the majority of its students.

Students applying for financial support are encouraged to submit application materials and requests for support by January 15. Students who apply after that date are considered only as remaining funds permit. Financial support usually is not available for students beginning the program in the spring semester.

## **Urban and Regional Planning Courses**

### **102:050 Cinema in the City**

3 s.h.

Introduction to city issues and how planners help resolve those issues; range of urban issues faced by cities, including congestion, pollution, economic decline, sprawl, affordable housing, lack of sustainability, and equity; films, readings, directed small-group discussion.

**102:055 The Splendor of Cities**

3 s.h.

Evolution of city structure in response to social, cultural, political, and economic forces; cities through time and across continents; varied resource materials, including video, novels, texts. Same as 033:056.

**102:100 Special Topics in Planning: Campus Planning**

3 s.h.

Physical design and planning of a campus, with focus on the University of Iowa campus; origins of campus as an idea, key exemplars (e.g., Universities of Virginia and Chicago), key transitions in the campus planning, especially in relation to the city; the University of Iowa campus, with attention to its neoclassical, Gothic, modernist, and more contemporary design features; the 2008 flood and its implications for UI campus planning.

**102:101 Planning Livable Cities**

3 s.h.

Development of livable cities in the United States; economic, physical, environmental, and political forces that shape their growth; impact of planning, how it shapes the future of cities. Same as 044:136.

**102:125 Environmental Impact Analysis**

4 s.h.

Environmental impact assessment methodologies; emphasis on cost-benefit-risk, cost-effectiveness and incremental analysis, and overlay and graphic techniques; optimal resource use, system simulation; field trips to local environmental control facilities. Prerequisites: 044:019. Same as 044:125.

**102:126 International Perspectives: Xicotepec**

arr.

Introduction to providing service to communities in underdeveloped countries through discipline-specific projects to improve community life in Xicotepec, Mexico; cultural and professional preparation for team work in an international environment; service-learning course in collaboration with Rotary International. Spring break in Xicotepec, Mexico.

**102:128 Design Europe: Spatial Planning and Identity**

3 s.h.

Interaction between physical/spatial design and construction of identity in Europe; how spatial planning helps construct identities at local, national, and continental scales; how diverse communities and their concepts of identity influence spatial planning; what can be learned for planning in the United States, especially regarding city planning and Latino in-migration.

**102:133 Transportation Economics**

3 s.h.

Overview of transportation markets--intercity, rural, urban; transportation modes--rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Prerequisites: 06E:001 and 06E:002. Same as 044:133, 06E:145.

**102:140 Planning for Sustainability**

2-3 s.h.

How planners are pursuing sustainable futures for cities and regions; green building, alternative forms of transportation, sustainable management of natural resources, renewable energy opportunities, urban form, natural hazard mitigation, waste management, smart growth; U.S. and international practice.

**102:195 Public Transit Operations and Planning**

3 s.h.

Bus, light and heavy rail, and paratransit modes; transit operations, planning, modeling and optimization, transit agency economics, transit finance, and evolving transportation policy; skills essential to planners and engineers who intend to work for a either planning agency, transportation provider, or a transportation or planning consulting firm; individual and group projects involving transit operations. Requirements: undergraduate or graduate standing in engineering, or graduate standing in urban and regional planning. Same as 053:167.

**102:199 Readings/Independent Study for Undergraduates**

arr.

**102:200 Analytic Methods in Planning I**

1-3 s.h.

Methods used in planning and policy analysis; emphasis on application of statistical techniques and quantitative reasoning to planning problems; use of computers and data systems in planning analysis.

**102:201 Analytic Methods in Planning II**

2-3 s.h.

Integration of methods with the planning process; application of multiple regression, population estimation and projection, survey methods, time series analysis, industrial growth and change; presentation of results to decision makers and the public.

**102:202 Land Use Planning: Law and Practice**

4 s.h.

Legal, social foundations of land use planning; comprehensive planning, zoning and subdivision review; legal aspects of land use, environmental planning; ordinance drafting; staff report writing; citizen participation.

**102:203 History and Theories of Planning** 3 s.h.

History of urban planning in America as a reflection of social and economic forces; alternative planning philosophies, roles, and ethical choices open to planners.

**102:205 Economics for Policy Analysis** 1-3 s.h.

Principles of economics for planners; concepts and techniques of microeconomic analysis; income inequality; the role of government in the economy; tax and pricing policy; project evaluation; externalities.

**102:208 Program Seminar in Planning Practice** 1 s.h.

Planning process, roles of planners, professional ethics and standards. Repeatable.

**102:209 Field Problems in Planning I** 3 s.h.

Experience working on a two-semester project involving a current planning issue, usually for a client. Requirements: urban and regional planning graduate standing.

**102:210 Field Problems in Planning II** 3 s.h.

Continuation of 102:209. Prerequisites: 102:209. Requirements: urban and regional planning graduate standing.

**102:211 Community Outreach Practicum** 1-3 s.h.

Application of planning skills to community work by non-profit organizations in local area; urban planners contributing to their communities; community outreach.

**102:214 Land Use Policy and Planning** 1-3 s.h.

Environmental preservation, site development concepts, downtown revitalization, historic preservation, brownfields.

**102:215 Applied GIS for Planners** 2-3 s.h.

Analysis of Census of Population data using GIS software; data and analytical needs of urban planners; coverage of GIS topics to plan functions of GIS and spatial analysis, varied GIS software in a planning organization; structure of the Census. Prerequisite: 102:201.

**102:216 Conflict, Negotiation, and Planning** 3 s.h.

Conflict within communities, and planners' responses; networking, negotiating, mediating, coalition building, consensus building; case studies, role playing. Requirements: (for 102:216) 102:203. Same as 160:216.

**102:217 Spatial Analysis in Planning** 2-3 s.h.

Data bases, GIS, planning support systems; spatial model building and use of spatial statistics; applications to substantive problems in transportation, environment, housing, economic development. Prerequisites: 102:215.

**102:218 GIS for Local Government** 1-2 s.h.

Development, maintenance, and operation of an enterprise-wide Geographic Information System (GIS); implementation of a parcel-based data system model common to government entities; practical experience using data for land-use planning analysis.

**102:219 Practicum** 5 s.h.

Full-time internship of at least five months with a planning-related organization. Requirements: urban and regional planning graduate standing.

**102:220 Virtual Reality and Urban Development** 2-3 s.h.

Creation of terrain models from DEMs and CAD-based site plans, panoramas, incorporation of existing and proposed buildings into virtual reality models; use of VRML and presentation strategies, including digital movies.

**102:221 Poverty, Planning, and Public Policy** 1-3 s.h.

Who and where the poor are in the United States; consequences of poverty; competing explanations of poverty; historical survey and critique of antipoverty policies at federal, state, and city levels; role of urban development policies. Prerequisites: 102:200, 102:203, and 102:205.

**102:223 Financing Local Government** 3 s.h.

Financing of local government infrastructure through property taxes, bonding, impact fees, pricing, tax increment financing; institutional alternatives--downtown improvement districts, special districts, homeowners' associations; fiscal disparities and regional finance; case studies. Prerequisites: 102:205.

**102:224 Spatial Patterns, Networks, and Dynamics** 3 s.h.

Basic tools for understanding if, when, and how reliability of information is affected by spatial considerations; examples drawn from the spatial organization of businesses, communities, spatial inequalities, environmental quality, health, and mobility; focus on visualization and applied analysis. Requirements: introductory statistics and geographic information systems.

**102:225 Geodatabases and GIS** 1 s.h.

Geodatabase implementation in the management of large GIS data sets. Prerequisites: 102:215.

**102:227 Shaping Spaces, Making Places** 3 s.h.

Structure of cities from historical and contemporary perspectives; elements that define the built-form character of cities, forces that shape urban spaces, techniques to transform spaces and places; presentations by urban designers; background in architecture or urban design theory not required.

**102:232 Planning and City Administration** 1 s.h.

Relationship of planners and other local government personnel; how planning fits into city management; city management view of local political process, provision of city services, finance and budgeting, human resources, intergovernmental relations, how meetings are run, dealing with the public.

**102:233 The Land Development Process** 2-3 s.h.

How land is developed; analysis of site suitability, preparation of subdivision plan, site plan review, development approval process, infrastructure and site preparation, negotiating local development politics; field trips. Prerequisites: 102:202.

**102:235 Growth Management** 3 s.h.

Causes and consequences of urban sprawl, shortfalls in conventional land use planning; local and state growth management policies, techniques of policy implementation, positive and negative impacts of such policies; Smart Growth; emerging challenges. Prerequisites: 102:202.

**102:242 Planning for Sustainable City--Regions** 3 s.h.

Understanding and improving the practice of urban environmental planning; techniques and politics of planning drinking water supply, sewage treatment, natural areas conservation.

**102:243 Healthy Cities and the Environment** 3 s.h.

Foundations of environmental planning for healthy cities and communities; how urban form, air and water quality, and natural hazards affect environmental planning and health.

**102:244 Global Perspectives on Environmental Planning** 3 s.h.

Environmental issues such as sprawl, loss of open space, metropolitan traffic congestion, inefficient resource management, limited use of renewable energy, natural disaster mitigation and preparedness; solutions drawn from international planning practice.

**102:246 Environmental Policy** 3 s.h.

Environmental policy formation and politics; comparative international perspective on the United States' experience.

**102:247 Environmental Management** 3 s.h.

Environmental best management practices for sustainable management of natural resources; open space and habitat protection, prairie and wetland restoration, water supplies management, natural hazard mitigation, farmland protection.

**102:260 Transportation Policy and Planning** 3 s.h.

Institutional setting for transportation planning, evolution of domestic transportation policy, international influences, transportation modes and markets, current sources of transportation planning information, emerging policy issues.

**102:262 Transportation Demand Analysis** 3 s.h.

City planning procedures and traffic engineering techniques applied to transportation problems; trip generation, distribution, assignment, mode choice models; travel surveys, data collection techniques; arterial flow, intersection performance, parking; transit system analysis. Requirements: (for 053:262) 22S:039. Same as 053:262.

**102:263 Application Simulation to Transportation**

3 s.h.

Transportation system management and traffic engineering; application of real-time simulation and visualization.

Prerequisites: 053:063 or 053:163. Same as 053:263.

**102:264 Transportation Planning Process**

2-3 s.h.

Technical issues, political interface, citizen involvement, intermodal questions, public versus private roles; review and critique of transportation plans.

**102:265 Planning Sustainable Transportation**

1-3 s.h.

Theories and methods of exerting public control over passenger and freight transportation; social and environmental regulation; effects of changing finance, regulation, and pricing policies, including privatization, tolls, impact fees. Same as 044:265.

**102:266 Transportation and Land Use Planning**

3 s.h.

Policies and interactions between transportation and land use; location theories and practices; transportation infrastructure, land use, travel behavior modeling; current policies that influence travel behavior and urban form.

**102:268 Freight Transportation Planning**

3 s.h.

Freight transportation planning in the United States; surface modes, primarily trucking and rail, as well as trade-offs in bulk movements by inland waterways and pipelines; comparison with recent developments in policy, planning, and practice for surface transportation in other developed economies (e.g., Europe).

**102:269 Transportation Program Seminar**

1 s.h.

Transportation finance, safety and economic regulation, planning processes, management, government policy issues at federal, state, and local levels. Repeatable.

**102:271 Housing Policy**

3 s.h.

Recent housing policy initiatives at federal, state, and local levels.

**102:273 Community Development**

1-3 s.h.

Community Development Corporation involvement in housing and neighborhood revitalization; infill housing development and preservation; comprehensive community development initiatives.

**102:277 Affordable Housing Finance**

3 s.h.

Financing development or rehabilitation of affordable housing; low-income housing tax credits, the housing finance system and current regulatory issues, mortgage discrimination, improving financing for rental housing.

**102:290 Economic Impact Assessment**

2-3 s.h.

Economic impact and growth analysis, including economic base, income expenditure, input-output analysis; use of economic impact analysis in a cost-benefit context; industrial location and mobility theory with statistics applications.

Prerequisites: 102:205.

**102:295 Economic Development Policy**

2-3 s.h.

Analysis of policies and programs at national, regional, state, and local levels that address problems of economic growth, development, decline.

**102:297 Community Development Finance**

2-3 s.h.

Financial statements and small business finance; local revolving loan funds for small businesses; evaluation of loan proposals; community development agency financing of commercial redevelopment; case studies of community development lending. Prerequisites: 102:205.

**102:300 Special Topics in Planning**

0-3 s.h.

**102:301 International Seminar**

1-2 s.h.

**102:305 Readings**

arr.

**102:315 Independent Study in Planning**

1-6 s.h.

Research and analysis of a special planning problem; opportunity for student to apply knowledge in area of specialization.

**102:325 Thesis: Urban and Regional Planning**

arr.

**102:335 Internship**

2 s.h.

Work in a planning or related agency or nonprofit organization.

The University of Iowa College of Law, founded in 1865, is the oldest law school in continuous operation west of the Mississippi River. More than 650 students and a full-time faculty of around 50 are engaged at the college in a cooperative study of law, legal institutions, professional ethics, the role of law in public policy matters, and the intersection of law and other disciplines.

The college's student/faculty ratio of 15-to-1 is one of the best in American legal education.

Through traditional Socratic classes, research seminars, closely supervised writing exercises, ambitious professional skills training programs, and clinical experiences, the college seeks to produce public-spirited leaders who will be rigorous thinkers, trusted advisors, forceful advocates, creative policy makers, and innovative scholars.

The Boyd Law Building, a 200,000-square-foot facility, provides a home for the college and its programs. Its spacious library, three courtrooms, clinic suite, building-wide audiovisual system, and extensive computer technologies are recognized as outstanding features in an educational facility specially designed for modern legal training.

The Iowa Law Library, one of the nation's premier law libraries, has the largest collection of legal volumes and volume equivalents among all public law schools. Its staff numbers 29.5 full-time-equivalent library professionals and other personnel, and it provides comfortable seating for more than 700 patrons, with 441 private study carrels, each equipped with its own data port. The library boasts a fully computerized information retrieval system. The online electronic card catalog provides instant information about all cataloged materials. The library also is on the University's wireless network.

The college celebrates diversity. In 1967 it undertook one of the nation's first and most aggressive affirmative action programs aimed at attracting a more racially and ethnically diverse student body. Its success in this continuing effort has resulted in a minority student population that makes up approximately 18 percent of the law college's current student body (the State of Iowa's minority population is around 5 percent).

The faculty also is diverse. Among the college's full-time professors, seven are from minority backgrounds, including African American, Asian American, and Hispanic American, and 18 are women. There are specialists in many area of the law, and four professors hold Ph.D. degrees in law-related disciplines in addition to their J.D. degrees.

The college offers a challenging curriculum that is carefully balanced between substantive courses, perspective offerings, examination of ethical values and professionalism, and skills-training programs, including a highly active in-house legal clinic. Iowa's writing program—one of the strongest among law schools nationwide—is an integral part of all students' academic experience. During both semesters of their first year, students take one small-section class taught by a full-time professor and one small-section course in legal analysis, writing, and research.

A requirement of four additional writing units at the upper level must be fulfilled with at least two units of faculty-supervised written work. The remaining two units may be completed through a range of options, including writing for one of the school's four law journals, participating in the clinical program, exercises in appellate advocacy, or specific seminars or independent writing projects.

The Writing Resource Center supports and builds upon classroom writing instruction and assists students with a broad range of writing tasks (see "Resources"/"Writing Resource Center" later in this section). The center and the writing program as a whole exemplify the personalized attention and dedication to individual learning for which the college is renowned in legal circles.

The college is proud of its four student-run scholarly journals. The Iowa Law Review has served as a scholarly legal journal since 1915, analyzing developments in the law and recommending new paths for the law to follow. It frequently

is ranked among the top 20 legal periodicals in the country, based on the frequency with which it is cited.

The Journal of Corporation Law is the nation's oldest student-run legal periodical specializing in corporate law. It provides the legal and academic communities with high-quality articles on corporate issues and business law.

Transnational Law & Contemporary Problems addresses legal issues confronting the global community. Since it began publication in 1991, it has earned an excellent reputation based on its symposiums on issues such as world food policy and global environmental regulation.

The Journal of Gender, Race & Justice hosts a symposium at the college each year, attracting nationally renowned legal scholars and practitioners who discuss topics such as criminal justice, education, and critical race feminism. The journal publishes the papers presented at the symposium.

In keeping with its educational mission of encouraging the acquisition of broad social awareness and technical professional competence, the University of Iowa College of Law offers a strong program of study in the rapidly expanding fields of international and comparative law. It does so for three reasons: in an era of global interdependence, an effective lawyer must understand international law and foreign legal systems; as professionals and community leaders, lawyers familiar with international and comparative law are crucial to the formulation of public policy at all levels of society; and the study of international and comparative law provides an essential theoretical foundation for all lawyers by affording unique insight into the nature of law and legal process.

All College of Law students benefit from international exposure through association with students in the college's Master of Laws program in international and comparative law. LL.M. students take most of their classes with J.D. students. In addition, each year foreign-trained law professors and jurists pursue research in the Law Library; they also may audit or speak in classes.

The journal Transnational Law & Contemporary Problems offers students a law review experience dedicated to international issues, and the college fields a team every year in the Philip C. Jessup International Moot Court Competition. Students also have opportunities to get involved with two faculty-run centers, the University of Iowa Center for Human Rights and the University of Iowa Center for International Finance and Development, as well as student groups such as the International Law Society and the Iowa Campaign for Human Rights.

Over the years, the college has enjoyed great success in preparing women and men to be professional and civic leaders. In the 20th century, Iowa graduates served as U.S. senators and representatives, state governors, and presidents of the American Bar Association, of major universities, and of the country's largest corporations. Iowa also has been a leader in preparing American law teachers. The college is resolved to continue its traditional role of training future lawyers for positions of professional and community leadership in the 21st century.

## **Professional Programs (J.D., LL.M.)**

The College of Law offers the Juris Doctor (J.D.), and the Master of Laws (LL.M.) in international and comparative law. It also collaborates with a variety of University of Iowa graduate programs to offer joint J.D./graduate degree programs. See "Joint J.D./Graduate Degrees" later in this section.

### **Full-Time Policy**

The faculty believes that students receive a better legal education when they devote substantially all of their time to educational pursuits. For this reason, students are expected to pursue their law training full time. This policy is consistent with the accreditation standards of the American Bar Association and the Association of American Law Schools.

In extraordinary circumstances, it may be possible for students to enroll for fewer than 10 s.h. per semester. Students who believe they may be unable to attend full time should contact the dean's office before registering for classes.

### **Entrance Date**

Approximately 195 students enroll in late August, at the beginning of the fall semester. All students attend courses full time during fall and spring semesters and may attend the summer term at any point during their academic careers. Entrants can expect to graduate no earlier than 27 months after beginning law study.

### **Admission to the Iowa Bar**

A rule adopted by the Iowa Supreme Court requires all law students who intend to apply for admission to the Iowa Bar to register that intention with the court by November 1 of the year they begin law school. Details are available from the College of Law registrar or the clerk of the Iowa Supreme Court.

### **Juris Doctor**

The Juris Doctor requires 84 s.h., including required and elective courses. All entering students are expected to take

all courses designated as first-year courses and may not register for different courses or fewer semester hours without permission of the associate dean. No student may be enrolled during any fall or spring semester for more than 15 s.h. applicable to the J.D., or for more than 12 s.h. during any two adjacent summer sessions.

To be eligible for the J.D., a student must:

- receive course credit for 84 s.h.;
- take and complete all required courses;
- satisfy the writing requirements;
- complete the course of study required for the degree in no fewer than 27 months after commencing law study at the College of Law or at a law school from which transfer credit has been accepted and no later than 84 months;
- achieve a cumulative g.p.a. of at least 2.10 (a C average); and
- satisfy the requirement of receiving "substantial instruction in other professional skills generally regarded as necessary for effective and responsible participation in the legal profession," as set forth in ABA accreditation Standard 302(a)(4) and ABA Standard Interpretations 302-2 & 302-3.

Receiving credit in a course is dependent upon successful completion of a final examination, or all assigned work, or both. In order to take the final examination, students must satisfy all requirements established by the instructor, including class attendance, written work, special readings, oral reports, and so forth.

### **First-Year Curriculum**

One of the distinctive benefits of law study at Iowa is the College of Law's focus on providing students with a foundation in basic skills that will support more advanced study and professional work. The first-year curriculum emphasizes careful reading, essential writing skills, legal research, and argumentation. Students concentrate on developing analytical skills (for example, reading and understanding judicial opinions), gain a sense of the role of legal institutions in society, and focus on developing good writing and research skills.

All first-year students take 091:130 Legal Analysis Writing and Research I and 091:131 Legal Analysis Writing and Research II (LAWR), a two-semester, 4 s.h. course designed to equip them with effective skills in oral and written communication, legal research, and analysis. LAWR is staffed by full-time faculty members with expertise in teaching legal research and writing. Class size is small, with around 20 students in each section of the course.

LAWR helps students develop legal analysis skills gradually. It teaches the value of critical reading, how to analyze facts and frame legal issues, how to determine which facts are legally significant, and how to extract legal rules from judicial opinions. As the year progresses, students learn how to generate arguments and counter arguments, and how to interpret facts in order to predict the likely outcome of a client's case. They also learn varied methods of legal analysis, including precedential analysis and analysis by analogy.

The first-year program emphasizes writing in small increments, with short assignments, frequent feedback, and revisions of written assignments. Because students will eventually practice in a range of legal settings, the program exposes them to varied forms of written documents, such as memoranda, trial briefs, client letters, motions, and appellate briefs, and provides instruction in appropriate formats for the varied documents (e.g., questions presented, argument headings).

LAWR uses peer review, requiring students to assess, discuss, and critique their peers' writing assignments. This cooperative process helps students gain insight into their own legal writing abilities and learn to appreciate different approaches to the same task. It also prepares them for the experience of collaborating as practicing lawyers.

Students begin to learn about research early in the first year, completing increasingly complex research tasks as the year progresses. LAWR reinforces research techniques covered in the classroom by integrating them into written assignments. It also teaches students the fundamentals of legal research by requiring hands-on library workshops.

First-year courses are as follows. Entering first-year students are expected to take all first-year courses and may not register for different courses or fewer hours without the associate dean's permission.

### **Fall Semester**

091:102 Introduction to Law and Legal Reasoning	1 s.h.
091:120 Contracts and Sales Transactions	4 s.h.
091:130 Legal Analysis Writing and Research I	2 s.h.
091:132 Property	4 s.h.
091:364 Torts	4 s.h.

**Spring Semester**

091:104 Civil Procedure	4 s.h.
091:116 Constitutional Law I	3 s.h.
091:124 Criminal Law	3 s.h.
091:131 Legal Analysis Writing and Research II	2 s.h.
One elective	3 s.h.

A mandatory curve is applied to the grade distribution in all courses.

**Upperclass Curriculum**

In the second and third years, students take courses in a broad array of substantive areas of the law, with focus on fact gathering, interviewing, counseling, drafting, transaction planning, negotiation, and litigation. They also concentrate course work or writing and research opportunities in particular areas of interest.

Very few common requirements exist in the second and third years. All students must take 091:232 Constitutional Law II and a course in professional ethics.

**Writing Requirement**

All students must earn four upper-level writing units in order to graduate. At least two of the four units must be earned under direct faculty supervision, in courses, seminars, research projects, or legal clinical work. The remaining two may be earned through a combination of courses and activities that carry writing credit, including 091:402 Moot Court Board, advanced appellate advocacy activities, and journals, including the Iowa Law Review, The Journal of Corporation Law, The Journal of Gender, Race & Justice, and Transnational Law & Contemporary Problems.

**Concentrated Study Opportunities**

Students may pursue their interest in a particular subject area by selecting appropriate course work and independent research projects. For example, in the intellectual property and competition law focus area, students may take several courses: 091:208 Antitrust Law (3 s.h.), 091:283 Copyrights (3 s.h.), 091:286 Introduction to Intellectual Property Law (3 s.h.), 091:324 Patent Law (2 s.h.), 091:369 Trademarks and Unfair Competition Law (2 s.h.), 091:608 Advanced Topics in Intellectual Property (arr. s.h.), 091:604 Patent Prosecution Seminar (3 s.h.), 091:241 Business Associations (3 s.h.), 091:306 The Law of Electronic Media (2 s.h.), 091:355 Securities Regulation (arr. s.h.), 091:618 Cultural Property/Heritage (arr. s.h.), and 091:624 Cyberspace Law Seminar (arr. s.h.).

**Seminars**

Students should direct questions about a seminar's requirements to the College of Law registrar or the instructor before the seminar begins, because they may not be permitted to drop the class after it meets the first time.

Seminars usually offer up to 4 s.h., including up to two writing units. Seminar formats vary widely; consult the College of Law Guide to Courses and semester registration materials for details. Students are graded on the basis of a research paper, and at the instructor's discretion, for class participation and other seminar requirements.

A common seminar format consists of a class portion for 2 s.h., and a writing portion for 2 s.h. Reduction of credit for seminars requires the instructor's consent. In some seminars, the instructor may permit the student to enroll for the class portion but not the writing portion. The students' performance in the class portion is evaluated on the same basis as for other courses--by examinations, papers, class participation, or other methods at the faculty member's discretion. Students must obtain the instructor's consent before registering.

Papers produced for seminars may be eligible for entry in competitions sponsored by varied groups. Cash prizes frequently are available. Competition announcements are posted on the bulletin boards outside the college's Writing Resource Center.

**Clinical Programs, Internships, Clerkships, Externships**

Students who have completed the equivalent of three semesters toward the J.D. (at least 39 s.h.) are eligible to apply their theoretical knowledge to real cases and projects under the supervision of faculty members and other attorneys through participation in the College of Law's Clinical Law Programs.

Some 30 students participate each semester and summer session in the in-house programs. They may represent individual and organizational clients in a variety of areas including immigration, domestic violence, criminal defense, consumer law, disability, civil rights, employment law, and general civil practice.

Other students may enroll in externships in Iowa City and the surrounding area, where they act as staff attorneys,

assisting in all phases of the legal process. Typical placements include the City Attorney's Office, the Human Rights Commissions, and Student Legal Services in Iowa City; the federal public defender, Iowa Legal Aid, and Kids First in Cedar Rapids, Iowa; and HELP Legal Services and the U.S. Attorney's Office, Davenport, Iowa. A clinical semester also is available, in which students spend an entire semester in the Iowa Attorney General's Office, the U.S. Attorney's Office, the Youth Law Center, or the federal court, all in Des Moines.

Some students find placements in judicial externships, which provide opportunities to work closely with a federal district court judge or state appellate judge. Students register for 091:407 Clinical Law Program--Externship and earn 9 s.h. per semester; in some cases, they may arrange to earn 15 s.h. with an independent writing component. Under the supervision of the judge and the judge's staff, the student researches and drafts a wide variety of legal memoranda, orders, and opinions. The extern also assists in hearings and performs other duties associated with a judicial clerkship. Each judicial extern meets weekly with a faculty supervisor to discuss the externship work in chambers and takes part in biweekly classroom discussions with other externs.

Judicial externs must have strong research and writing skills and must be able to produce acceptable work under tight deadlines. Externs conduct much of their work independently. Only students who are able to meet these requirements should apply for judicial externships.

Students may earn a total of up to 15 s.h. in the Clinical Law Programs and up to 20 s.h. for clinic and non-law courses offered in other University of Iowa colleges.

The College of Law also is involved in programs that do not carry academic credit. Each summer it participates in the County Attorney Internship Program, through which students work as paid employees for county attorneys throughout the state, and in the Poverty Law Internship Program, which places students in Iowa Legal Aid offices. The college also helps place students in a variety of unpaid clerkships and internships nationwide that provide insight into the workings of the legal system.

### Academic Advising

The **associate dean for academic affairs** works with the dean on academic programs and issues of the law school.

The **associate dean of students** provides academic advice and counseling to students; advocates for student concerns; offers information and makes referrals for students with professional, personal, or family problems; facilitates operation of the student discipline system; and arranges reasonable accommodations for disabled students. The associate dean of students also advises law students pursuing combined degrees in University of Iowa graduate programs and serves as the liaison with those programs.

**Small section instructors** advise students enrolled in their small sections during students' first year of study.

Each year one or two tenured faculty members are selected by the Iowa Student Bar Association to serve as College of Law **ombudspersons**. Students who have a problem or grievance should seek an ombudsperson's help. All complaints are handled in strict confidence.

The College of Law **registrar** is in charge of student record keeping and should be students' first recourse for information about course enrollment, scheduling, combined program status, student certification for state bar applications, and progress toward graduation.

The **Student Services Committee** oversees coordination and periodic review of how the college provides academic and curricular counseling to law students. The committee reviews and coordinates the college's efforts to provide information, offer services and programs, and make referrals regarding its students' mental and emotional health. The committee has oversight for assignment of faculty academic advisors to law students, for matters of faculty/student collegiality, and for the Academic Achievement Program.

### Academic Achievement Program

The College of Law Academic Achievement Program (AAP) helps students achieve their potential as they go from successful undergraduate careers to the unique challenges of law study. Although AAP focuses on helping first-year students, its programs are open to all.

AAP presents a variety of programs, including a fall-semester lecture series for new students. Examples of content areas include time management for law study, developing effective study groups, outlining and organizing class notes and course materials, taking essay exams, and answering multiple choice tests. Several weeks before exams, a voluntary practice exam is administered.

Spring semester programming responds to special challenges of the second semester, including reviewing and learning from fall exams, refining study habits, preparing for exams, and other matters.

In addition to offering group programs, AAP provides individual help with study skills. When personal issues affect a student's concentration or studying, the program provides direct help and refers students to University and community support resources.

## Joint J.D./Graduate Degrees

The college has developed joint degree programs with a number of University graduate programs through the Graduate College, under which students pursue degrees simultaneously in both colleges.

Joint degree candidates may count up to 6-12 s.h. earned for the graduate degree toward the 84 s.h. required for the J.D., providing the courses are relevant to both degrees and the 12 s.h. are earned after admission to the combined degree program and after matriculation at the College of Law.

Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program. Applicants to graduate programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or Graduate College section of the Catalog.

Graduate departments establish their own requirements for the joint degree program, including the number of semester hours taken for the J.D. that may be counted toward the graduate degree.

The College of Law offers joint graduate programs with several colleges, departments, and schools. Among them are the Tippie College of Business and its Departments of Accounting and Management and Organizations; the Schools of Journalism and Mass Communication and Social Work; and the Departments of American Studies, Anthropology, Chemistry, English, History, Philosophy, Political Science, Religious Studies, Sociology, and Spanish and Portuguese (College of Liberal Arts and Sciences); the Departments of Educational Policy and Leadership Studies and Rehabilitation and Counselor Education (College of Education); the School of Library and Information Science and the Department of Urban and Regional Planning (Graduate College); the Carver College of Medicine; and the College of Public Health and its Department of Health Management and Policy.

Many departments have advisors for their joint programs. For more information, consult the associate dean of the College of Law and the individual academic units.

## Master of Laws in International and Comparative Law

The Master of Laws (LL.M.) in international and comparative law is an important component of the College of Law's international approach to legal education. The program is designed for graduates of J.D. programs in the United States who wish to deepen their understanding of international and comparative law, including the law pertaining to international business transactions, and for foreign-trained jurists who wish to receive advanced training in these areas or a comparative orientation to and specific training in U.S. law and legal institutions.

The LL.M. program admits 10-15 students per year, allowing each student to receive substantial attention from the faculty. Admission is competitive.

The LL.M. requires a minimum of 24 s.h. earned in College of Law courses that include a strong focus on international and comparative law. With their advisor's approval, LL.M. students may count up to 6 s.h. of law study abroad, or non-law graduate-level courses or externships, toward the degree.

LL.M. students take courses (except 091:504 Tutorial and 091:657 LL.M. Seminar) together with J.D. students, from the law school's rich offerings on U.S., international, and comparative law. This method of instruction ensures that the foreign-trained students have an effective comparative experience through broad contact with U.S. law students and professors, and the U.S. students benefit similarly from close contact with the foreign-trained lawyers.

LL.M. applicants who are graduates of U.S. law schools must have been granted a J.D. from a school that is a member of the Association of American Law Schools or is approved by the American Bar Association. Graduates of foreign law schools must have completed the basic course of university studies that qualifies them to sit for the bar examination (e.g., the French *maîtrise*, the German first state bar examination). If the home country bar exam does not require a specific degree, applicants should be experienced members of the bar or have completed at least the first university degree in law. Applicants without a degree from a four-year English-language university must score at least 580 (paper-based), 237 (computer-based), or 92 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants who score lower than 600 (paper-based), 250 (computer-based), or 100 (Internet-based) may be required to take English language course work upon entering the University. In place of TOEFL scores, the college accepts International English Testing System (IELTS) scores of 7.0 or higher, with no subscore below 6.0.

All applicants must present evidence of high academic potential, such as high class rank in their previous law studies; strong recommendations, especially from law professors who supervised their work in classes or seminars; and challenging professional work experience. The College of Law relies heavily on academic references to assess applicants' credentials. Because U.S. applicants and all others with first-language fluency in English are required to produce a substantial publishable paper in the program, **these** applicants must show evidence of ability to carry out complex research and writing projects.

## Cocurricular Programs

Students may earn a maximum of 6 s.h. of the 84 s.h. required for the J.D. through participation in the college's rich cocurricular programs and/or non-law classes.

### Moot Court

The Moot Court appellate advocacy programs familiarize students with writing appellate briefs, acquaints them with citation form, develops research skills, and strengthens persuasive ability in oral argument at the appellate court level.

Each academic year, the Moot Court office administers 091:210 Appellate Advocacy I in the fall semester, and two Moot Court competitions in the spring semester. Students who rank in the top scoring positions of Appellate Advocacy I are eligible for the advanced competitions in the spring semester. Advanced competitions include 091:404 Van Oosterhout Baskerville Moot Court Competition and 091:430 Jessup International Moot Court Competition.

The appellate advocacy program is administered by the Moot Court Board, which consists of student judges and an executive board.

### Trial Advocacy

The Trial Advocacy Program (091:370 Trial Advocacy) is a student-run, faculty-supervised program in which students develop and refine skills used to prepare and try civil and criminal cases. The heart of the program is the 2 s.h. course in trial advocacy taught by law school faculty, federal and state judges, and experienced trial attorneys. Students are on their feet during most class sessions, practicing the arts of jury selection, opening statement, direct and cross examination, introduction of exhibits, use of expert testimony, and closing argument. The course culminates with a full-scale trial--from the filing of pretrial motions to the rendering of a jury verdict--conducted by student cocounsel before a visiting judge and a jury of laypersons.

The Stephenson Competition is named after Judge Roy L. Stephenson, a U.S. District Court and Eighth Circuit Court of Appeals judge and a 1940 graduate of the College of Law. Students who demonstrate superior ability in advocacy skills during the trial advocacy courses participate in a series of mock trials judged by local members of the bench and bar. Individuals selected from the competition represent The University of Iowa in the national trial competition.

### Journals

#### IOWA LAW REVIEW

Since its inception in 1915, the *Iowa Law Review* has served as a scholarly legal journal, noting and analyzing developments in the law and suggesting future paths for the law to follow. Students have managed the *Review* since 1935, editing and publishing articles by professors and students. The *Review* is published five times annually and is staffed by second-year student writers and third-year editors. To learn more, visit the *Iowa Law Review* web site.

#### TRANSNATIONAL LAW & CONTEMPORARY PROBLEMS

*Transnational Law & Contemporary Problems (TLCP)* is produced three times a year by Iowa law students. *TLCP* content includes matters that are of interest to the international and comparative law community and that are not commonly found in other journals and reviews. The journal features symposia with articles by distinguished legal scholars and practitioners; living history interviews with people of international accomplishment; and articles reviewing foreign legislative developments, treaties, conventions, and other international agreements. The journal also publishes articles written by Iowa law students and sponsors an internationally-advertised student writing competition each year. The journal annually organizes and sponsors a symposium on a contemporary international issue. Past conference symposia topics include climate change, international subprime mortgage crisis and war crimes.

Law students who have completed at least two semesters may earn up to 2 s.h. of credit by writing for *TLCP*. Highly qualified students who complete the writing and secondary hour requirements may be chosen to fill an editorial position, for which they earn additional credit. They also may be eligible for a monetary stipend. For more information, visit the *Transnational Law & Contemporary Problems* web site.

#### THE JOURNAL OF CORPORATION LAW

*The Journal of Corporation Law* is the nation's oldest and most cited student-published legal periodical specializing in corporate law. The journal's scope includes antitrust, intellectual property, labor law, securities, taxation, employment discrimination, insurance, products liability, and regulated industries, as well as traditional corporate topics. Selected articles submitted from practitioners and academics are published in each of four annual issues. Several student articles also are selected for publication.

All students who have completed two semesters of class work are eligible to write for the journal. Students who have achieved third-year status at the College of Law are eligible for selection to the journal's editorial board and may

receive additional academic credit. They also may be eligible for a monetary stipend. See the *Journal of Corporation Law* web site.

## THE JOURNAL OF GENDER, RACE & JUSTICE

*The Journal of Gender, Race & Justice* pushes at the boundaries of traditional legal scholarship and theory in its focus on social justice issues. Each spring the journal hosts a live symposium, bringing nationally renowned legal scholars and practitioners to the college to discuss topics such as race, gender, economic class, ability, and identity. The journal publishes the papers presented at the symposium. Each issue also includes articles written by Iowa law students.

All students completing two semesters are eligible to write for the journal. Students who have third-year standing at the College of Law are eligible for a position on the editorial board. Visit the *Journal of Gender, Race & Justice* web site.

## Study Abroad

A consortium of six American law schools, coordinated through The University of Iowa College of Law, offers an annual study abroad program in which students attend a spring semester at Florida State University's London study center. There they study American and English law with faculty from the American schools and the University of London. Students participating in the program register for 660:824 London Law Consortium.

The College of Law also offers up to 8 s.h. of credit for intensive course work at Arcachon, France, in conjunction with the University of Bordeaux. Courses are offered for four weeks in May and June and are taught in English by professors from Iowa and Bordeaux. Application deadline is February 1. Students participating in the program register for 660:823 Program in Comparative Law in Bordeaux, France.

Two Iowa law students may attend the Bucerius Law School in Hamburg, Germany, each fall semester in an exchange program with that school. Students earn 12-15 s.h. of credit through course work taught in English.

Two students may attend the Universidade Católica Portuguesa School of Law (Lisbon Campus) each fall semester in an exchange program. Students earn 12-15 s.h. of credit through courses taught in English.

Three students each year may participate in an exchange program at the Radboud University in Nijmegen, The Netherlands, during fall and spring semesters. They earn 12-15 s.h. of credit in courses taught in English.

## Academic Recognition

### Order of the Coif

The Order of the Coif, a national legal honor society, has a chapter at The University of Iowa. The order is dedicated to scholarship and advancement of high ethical standards in the legal profession. Membership is drawn from the top 10 percent of the graduating class. Initiates are selected by the faculty after graduation.

### Prizes and Awards

**Hancher-Finkbine Medallions** are awarded each year by the University to outstanding graduates; honorees are chosen from nominations made by University departments and colleges based on learning, leadership, and loyalty.

The **Philip G. Hubbard Human Rights Award** is presented each year by the University to recognize outstanding contributions to human rights and equal opportunity, as described in the University's Human Rights Policy.

The **Sandy Boyd Prize** is presented to the student who has demonstrated outstanding ability and creativity in the development of written legal scholarship.

The **Alan I. Widiss Faculty Scholar Award** is presented to the student who has made an especially outstanding and distinctive contribution to the development of written legal scholarship.

The **Randy J. Holland Award for Corporate Scholarships** is presented to the student who has written an outstanding scholarly paper in the area of corporate law.

The **Robert S. Hunt Legal History Award** is presented to a student who has written an outstanding scholarly paper in the field of legal history.

The **Donald P. Lay Faculty Recognition Award** is presented to the student who has made distinctive contributions to the College of Law's cocurricular, community, or education programs.

The **Iowa State Bar Association Prize** is presented to the student who possesses the attitude, ability, and other qualities that indicate success as a future leader of the bar association.

The **Antonia "D.J." Miller Award for Advancement of Human Rights** recognizes outstanding contributions by a student to the advancement of human rights in the law school community.

The **Dean's Achievement Award** is presented each year to a student, who, through his or her achievements, has

exemplified, promoted, or contributed to cultural, racial, or ethnic diversity in the law school.

The **National Association of Women Lawyers Award** is presented to a law student who contributes to the advancement of women in society and women in the legal profession and who also has attained high academic achievement.

The **Erich D. Mathias Award for International Social Justice** is presented to a student who has made an outstanding contribution or demonstrated commitment to attaining international social justice.

The **John F. Murray Award** recognizes the student with the highest academic standing in the graduating class.

The **ALI-ABA Scholarship and Leadership Award** is presented to a student who represents an outstanding combination of scholarship and leadership, the qualities embodied by the American Law Institute and the American Bar Association.

The **Russell Goldman Award** recognizes the student who has demonstrated the most improved academic performance after the first year.

The **Iowa College of Law Appellate Advocacy Award** is presented to a student for outstanding achievement in and service to the appellate advocacy program.

The **Iowa Academy of Trial Lawyers Award** is presented to a student for outstanding achievement in the Roy L. Stephenson Trial Advocacy Competition.

The **International Academy of Trial Lawyers Award** is presented to a student who has demonstrated distinction in trial advocacy skills.

The **Michelle R. Bennett Client Representation Award** recognizes outstanding service in the college's clinical law programs.

The **ABA/BNA Award for Excellence in the Study of Intellectual Property** is presented to a student who has demonstrated excellence in the study of intellectual property law.

The **American Bankruptcy Institute Medal for Excellence in Bankruptcy Studies** is presented to a student who has demonstrated excellence in the field of bankruptcy.

The **Joan Hueffner and Stephen Steinbrink Real Estate Law and Property Award** is presented to a student who has demonstrated excellence and promise in the field of real estate law.

## Student Organizations

Link to the student organizations' web sites on the college's Journals & Student Groups web page.

The **Alternative Dispute Resolution Society** promotes awareness of varied alternative dispute resolution processes, including arbitration, mediation, and other forms of negotiation; explores legal and other careers in alternative dispute resolution; and equips students with the knowledge and practical skills necessary for effective participation in alternative dispute resolution.

The **American Constitution Society (ACS)** is a new nonpartisan organization whose goal is to foster discussion of important issues of law and policy.

The **Asian American Law Students Association (AALSA)** seeks to instill greater awareness among law students of the needs of the Asian American community, and to encourage a greater commitment toward meeting those needs.

The Iowa chapter of the **Black Law Students Association (BLSA)** focuses on the relationship of black attorneys to the American legal structure and works to foster an attitude of professional competence. BLSA strives to promote the needs and goals of black law students, instill a greater awareness among law students of the needs of the black community, and encourage a greater commitment toward meeting those needs. The chapter seeks involvement in the local community and in recruitment programs. Membership is open to all students who support the association's goals.

The **Christian Legal Society** maintains a Christian law fellowship at the College of Law whose mission is to enable its members to love their Lord and to love their neighbors as themselves.

The college's **Equal Justice Foundation (EJF)**, a chapter of the national foundation, supports public interest law concerns, with emphasis on promoting equal access and adequate representation in the courts and other forums for citizens and citizens' groups. The UI chapter's professional activities are aligned with those of the national organization. They include work in varied legal activities statewide; College of Law activities, including coordination with other student organizations to provide the college with a better public interest support base; promotion of public interest career opportunities; and provision of information about public interest activities and concerns. Membership is open to all College of Law students.

The **Environmental Law Society** provides an educational forum for environmental law topics. During spring

semester, the organization sponsors a lecture series featuring professors and experts in environmental law. The group also provides limited legal research and counseling services for attorneys, organizations, and citizens who have questions concerning environmental law. Membership is open to all College of Law students.

**The Federalist Society** fosters critical thought and debate about the application of conservative and libertarian principles to the law. Its mission is to promote, advocate, and defend its founding principles and further their application through its activities, which are aimed at reordering the legal system's priorities to place a premium on individual liberty and the rule of law, and restoring recognition of those principles among law students, faculty members, lawyers, and judges.

The **Intellectual Property Law Society (IPLS)** promotes exploration of traditional areas of intellectual property law (patent, trademark, copyright) and related areas such as antitrust and entertainment law. The society provides a forum for faculty and student discussion of contemporary issues relating to intellectual property law and its practice; fosters interaction between law students and intellectual property law practitioners through a mentor program that pairs members with intellectual property law practitioners; and offers symposia. All members of the University community are welcome to attend a Society meeting or symposium.

The **International Law Society** aims to increase student and faculty awareness of international law and related issues. The society's brown bag lunch lecture series and annual spring conference expose students and faculty to a wide variety of contemporary legal issues surrounding the study and practice of international law. Members also work to support the activities of the University of Iowa Center for Human Rights; promote the Iowa-Arcachon, France, summer program in comparative and international law; participate in the annual Philip C. Jessup International Moot Court Competition; and bring together faculty members and students who share an interest in international affairs.

The **Iowa Campaign for Human Rights (ICHR)** promotes human rights awareness and education at the College of Law, among University of Iowa students, and across the Iowa City community.

The **Iowa Student Bar Association (ISBA)** acts as the College of Law's student government. Governed by an executive council, the association provides a collective voice for the student body and a source of organization and funding for a variety of college activities and programs. Law students may get involved with the association by serving as class representatives or on faculty-student committees, which deal with admissions, curriculum, financial aid, placement, and so forth. The association presents speakers, sponsors events with other organizations, publishes a newsletter, and sponsors social events. Its legal guardian program assigns entering law students to upperclass students, who provide encouragement and information.

The **J. Reuben Clark Law Society** emphasizes three basic values and attitudes toward the practice of law and the place of law in modern society: public service, loyalty to the rule of the law and the Constitution of the United States, and appreciation for the religious dimension in American society and in lawyers' personal lives.

The **Jewish Law School Association (JLSA)** strives to provide social, educational, religious, political, cultural, and professional resources and opportunities for all Jewish law students at Iowa. The society educates and involves its members in the social, moral, and ethical obligations of the profession; plans and implements programming to facilitate a sense of community among Jewish law students; and raises awareness of Jewish cultural and educational issues at the college.

The **Latino/a Law Student Association (LLSA)** promotes viable changes within existing legal institutions in order to develop constructive legal and community programs, produce competent and effective Latino and Latina attorneys, and utilize available resources--activities necessary to safeguard and advance the rights and opportunities of oppressed peoples. To achieve these goals, LLSA recruits for the law school. LLSA's philosophy is that national unity is fundamental for the collective awareness needed to bring about progressive policies in legal education. The association welcomes all students.

**Law Students for Reproductive Justice (LSRJ)** is committed to increasing education and professional training in reproductive rights law. The society supports Iowa law student activism, advocacy, and networking in order to ensure that new lawyers can successfully defend and expand family planning rights and reproductive freedoms.

The **Middle Eastern Legal Student Association (MELSA)** aims to increase student and faculty awareness of issues pertaining to the Middle East and how they affect the legal profession.

The **Native American Law Students Association (NALSA)** promotes awareness of legal, political, cultural, and social issues that affect Native Americans, Alaskan Natives, Native Hawaiians, and other indigenous peoples. NALSA also seeks to promote the study of federal Indian law and provides a forum for the exploration of issues in tribal sovereignty, natural resources, family law, trust obligations, and cultural identity.

The **National Lawyers Guild (NLG)** is dedicated to the use of law as a means to promote progressive social change. Iowa's student chapter sponsors discussion panels on topics such as South African divestment and has cosponsored events with other student organizations. It also invites faculty members to speak in the college's student lounge on topics ranging from the political aspects of selecting Supreme Court justices to employment discrimination. Membership in the Iowa chapter is open to all College of Law students. Membership in the national organization is

optional.

The **Organization for Women Law Students and Staff** (OWLSS) aims to address the changing needs and problems of women in the legal profession and to develop, recommend, and implement new programs, especially those that meet the needs of women at the College of Law. It also sponsors programs of interest to the general law school community. OWLSS has sponsored fall recruitment of prospective women law students, a safety-in-numbers program, brown bag lunches with guest speakers, sponsorship of members to the annual National Women and the Law Conference, a support network, a regular newsletter, and joint programs with women student groups in medicine and dentistry. Membership is open to all College of Law students, faculty members, and staff members.

**The Outlaws** provides a common forum for gay, lesbian, bisexual, and transgendered persons interested in the law, and promotes a climate of mutual support, protection, and professional advancement. Membership is open to all College of Law students and faculty members.

Founded in 1902, **Phi Alpha Delta** (PADS) is the nation's oldest and largest law fraternity. It was the first law fraternity to remove membership restrictions based on race, color, creed, national origin, and grade-point average. Iowa's Hammond Chapter was established in 1908 and became the first PADS chapter to accept students of all races and religions. It participates in fund-raisers and other service projects to benefit local and national service organizations. Membership is open to all College of Law students.

**Phi Delta Phi** (PHIDS) promotes the highest standards of ethics and professionalism in law schools and the legal profession. Since its establishment in 1869, the fraternity has initiated more than 200,000 members. It has more judges, American presidents, governors, senators, representatives, and cabinet members among its membership than does any other legal fraternity.

The **Pro Bono Society** exists to reinforce the value of public service and volunteerism in the legal profession. Membership in the *Pro Bono* Society is earned through objectively measured activities during the academic year. Iowa law students who complete and report 15 hours of voluntary public service in each of two consecutive semesters are considered for membership. Time donated to a charitable or public service cause, which may be law-related or not, is considered voluntary public service; the requirement is interpreted broadly, so that students may volunteer in an area of interest to them. Members receive a certificate of membership and are invited to attend the annual recognition dinner. The society is a project of the Iowa Student Bar Association.

## Admission

### Undergraduate Education and Law School

Applicants for admission to The University of Iowa College of Law must complete all requirements for the baccalaureate degree before beginning law school. In addition, the baccalaureate degree must be earned from an undergraduate institution that is accredited by an accrediting agency recognized by the Department of Education. This is in line with standards that are set by the College of Law's primary accrediting agency, the American Bar Association.

Fulfillment of the basic requirements does not guarantee admission. The College of Law Admissions Committee selects applicants it deems best able to help the college fulfill its primary mission of providing a high quality legal education in a diverse and stimulating environment and preparing students to serve as leaders in their professional and civic communities. Some additional consideration is given to applicants who are residents of Iowa.

The services that College of Law graduates are called upon to perform are so varied, and the possible fields of endeavor so broad and diverse, that the college prescribes no uniform undergraduate program for those planning to enter law school. With the assistance of faculty advisors, each student should develop an undergraduate program that explores and develops that student's particular intellectual interests. Reading, writing, research, public speaking, critical thinking, and a healthy respect for the historical perspective are important academic skills for students considering law school.

Iowa strongly endorses the three basic objectives recommended by a committee of the Association of American Law Schools: education for comprehension and expression in words; education for a critical understanding of the human institutions and values with which the law deals; and education for greater power in thinking. Anyone thinking of attending law school should keep these objectives in mind while planning an undergraduate course of study.

The association's recommendations emphasize that undergraduate education of students for a full life through liberal education is far more important than education directed too pointedly toward later professional training and practice. Students are urged not to sacrifice broad perspective for detailed specialization.

### Selection of Applicants

The college uses multiple criteria in evaluating applicants for admission. Part of the entering class is admitted under a "presumptive admit" process, in which the faculty admissions committee admits students primarily, but not solely, on the strength of their numbers, namely the cumulative undergraduate grade-point average and LSAT score (see "Law School Admission Test" below). Before admission offers are made, each applicant's complete file is reviewed to

ensure that the overall record suggests the applicant's suitability for admission, in keeping with the primary mission of the law school.

Although undergraduate academic record and performance on the LSAT are both important admission criteria, the college recognizes that in some circumstances they do not accurately reflect an applicant's potential to succeed in the study of law, develop skills as a leader, enrich the learning environment of his or her fellow students, and serve the public interest as a lawyer.

To evaluate applicants' total suitability for admission, the college has developed a "numbers-plus" admissions policy, under which part of each entering class is admitted. Under the "numbers-plus" policy, undergraduate record and LSAT scores are supplemented by nonquantifiable factors that may provide insight to an applicant's overall potential for success in the study and practice of law.

For example, an applicant who can substantiate that his or her standardized test scores are not predictive of academic performance in law school may receive proportionately greater consideration from the committee for his or her grade-point average. Other factors the committee may consider include special academic or professional abilities not reflected in the grade-point average, disability or serious health factors that affected prior academic performance, extracurricular activities, exceptional school-year work commitments due to family financial circumstances, postbaccalaureate academic success (including graduate study), law-related employment experience, public service commitment, leadership in groups historically underrepresented in the legal profession, educational or socioeconomic disadvantage, native language other than English, unusual motivation or perseverance in overcoming obstacles to law study, and any other information the committee considers relevant to the applicant's potential for law study.

Candidates who wish to bring such factors to the committee's attention may do so by including addenda and other documentation with their applications.

### **Entrance Date**

Admission is for August. Applications are accepted beginning September 1 of the year before admission, with an application deadline of March 1 in the year of admission. Because the college has a rolling admissions process, applicants are encouraged to submit their applications as early as possible.

Each application must include an application fee, which is nonrefundable. Students from disadvantaged backgrounds who cannot afford the fee should apply for a waiver. If you seek a waiver, you must submit a written request and a recent FAFSA or income tax statement along with your application.

For additional information, contact the College of Law Office of Admissions and Financial Aid, c/o College of Law, The University of Iowa, Iowa City, IA 52242-1113. Applications are available online at <http://www.law.uiowa.edu/admissions>.

### **Application Process**

#### **LSDAS REPORT AND TRANSCRIPTS**

The University of Iowa College of Law participates in the Law School Data Assembly Service (LSDAS). Applicants must register for this service through the Law School Admission Council (LSAC); foreign-educated applicants are exempt from this requirement. Prospective law applicants can find the information they need to complete their application for admission to the law school in the council's free, annual publication, *Law School Admission Information Book*, and on LSAC's web site. It takes approximately three weeks from the time the College of Law requests the LSDAS report until it arrives.

Applicants whose fall course work does not appear on the Law School Data Assembly Service report should send an official transcript of that course work to the LSDAS.

Applicants are responsible for submitting an official transcript from each college or university they have attended to Law School Admission Council, Box 2000, Newtown, PA 18940-0998.

Each applicant's undergraduate institution must forward the applicant's class rank or the grade distribution for the applicant's class to the College of Law, if such information is available. Information about class rank is helpful in the application process, but not required. Currently enrolled or former University of Iowa students need not provide this information.

Before classes begin, every applicant who accepts admission to the College of Law must file official transcripts showing conferral of degree with the University's Office of Admissions.

#### **LETTERS OF RECOMMENDATION**

The college requires applicants to submit at least two, but not more than three, letters of recommendation. Recommendations from professors or others who can comment on the candidate's critical thinking, writing skills, and potential for success in law school are particularly welcome.

The college participates in the Letter of Recommendation Service offered by the Law School Admission Council. A letter of recommendation form can be downloaded on the council's web site. Individuals writing letters of recommendation should send their letters, with the required forms, to Law School Admission Council, P.O. Box 8508, Newtown, PA 18940-8508.

#### **LAW SCHOOL ADMISSION TEST**

Applicants for admission must take the Law School Admission Test (LSAT). The test is given several times each year and may be taken at numerous locations in the United States and abroad. Test application forms may be obtained from the Law School Admission Council.

Applicants are urged to take the test no later than the fall preceding the fall semester for which they are applying. Applicants' LSAT scores may not be available until approximately four weeks after their test date.

The February test date is the last one that the admissions committee can consider for applicants requesting admission the following fall. Scores more than five years old are not accepted.

Applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL) or the International English Testing System (IELTS) exam.

#### **DEFERRALS**

Admission is for the year of application; deferrals are granted only in extraordinary circumstances.

#### **DEPOSIT UPON ACCEPTANCE**

All applicants must make a nonrefundable deposit of \$250 (U.S.). Fall entrants accepted before March 15 must submit the deposit by April 1; those accepted after March 15 have two weeks to submit the deposit.

Fall entrants must pay a second nonrefundable deposit of \$150 (U.S.) by June 1.

For those who enroll, the deposit is credited toward tuition and fees. All accepted applicants, including recipients of scholarships, fellowships, and loans, are required to pay the deposit. Applicants who fail to make the deposit by the specified time forfeit their place in the entering class.

### **Financial Support**

The College of Law administers its substantial financial aid program to advance the goals of its selective admission policy. Scholarships, fellowships, work-study funds, and loans are awarded on the basis of need or merit to provide access to legal education for the talented and diverse students admitted to the college. A number of part-time employment opportunities also are available to upper-level students.

Inquiries regarding financial aid should be directed either to the University's Office of Student Financial Aid or to the College of Law Office of Financial Aid.

All financial aid information is subject to change without notice.

#### **Application for Financial Aid**

Eligibility for financial aid is based on need established by completion of the Free Application for Federal Student Aid (FAFSA) and the required supporting documents. The FAFSA should be completed online at [www.fafsa.ed.gov](http://www.fafsa.ed.gov) after January 1 each year and should be completed as soon as possible thereafter, since some financial aid is subject to the availability of funds.

Although financial aid awards are not made until after applicants are admitted to the College of Law, applicants should not wait for the notice of admission before filing the FAFSA. Admitted students who provide the required documents are informed of their eligibility for financial aid on the award notification letter. Students must reapply for aid every year.

Applicants are urged to investigate other sources of aid. Public libraries, private and civic organizations, and the Internet are excellent sources for information about financial aid resources.

#### **Scholarships, Fellowships**

##### **MERIT-BASED SUPPORT**

All students admitted to the College of Law are considered for merit-based scholarships and fellowships based on their academic achievement. A separate application is not required. Recipients are notified by letter. Awards may range from \$500 to full tuition with a research assistantship component in upper-level years.

**NEED-BASED SCHOLARSHIPS**

All admitted students who file a Free Application for Federal Student Aid (FAFSA) and required supporting documents are considered automatically for need-based scholarships. Recipients are notified by award letter. Awards may range from \$500 to full tuition.

**IOWA LAW SCHOOL FOUNDATION SCHOLARSHIPS**

The University of Iowa Law School Foundation Scholarships include scholarships based on need, merit, or a combination of need and merit. These scholarships are available to a limited number of students who meet the criteria established by the scholarship donors. All admitted students are considered for the merit-based scholarships, and all admitted students who file the FAFSA and required supporting documents are considered automatically for the need-based scholarships. A separate application is not required. Recipients are notified by award letter. Awards may range from \$200 to full tuition.

**LAW OPPORTUNITY FELLOWSHIP**

The College of Law is committed to affording opportunity for a legal career to persons historically underrepresented in the legal profession. The Law Opportunity Fellowship Program was established by the University to provide access to law school for students from groups and backgrounds historically underrepresented within the legal community. Among criteria considered in awarding the fellowships are educationally and/or socioeconomically disadvantaged backgrounds, leadership potential, academic merit, and importance of the fellowship award to the student's financial ability to attend law school.

The Law Opportunity Fellowship may provide up to full tuition for three years and the opportunity to hold a research assistant position for the second and third years. All admitted students who file the FAFSA and required supporting documents are considered for the Law Opportunity Fellowship. A separate application is not required. Recipients are notified by award letter.

**Employment**

The College of Law does not employ students during their first year of law school, due to the intensive course schedule. In no event may a full-time student work more than 20 hours per week.

**RESEARCH ASSISTANT POSITIONS**

Research assistant positions are available with many faculty members for second- and third-year students. Students classified as nonresidents who hold one-quarter-time research assistantships (10 hours per week) automatically qualify for resident tuition status during the semester(s) in which they serve as research assistants.

**UI PART-TIME EMPLOYMENT**

The University offers a variety of part-time employment positions for students. Students do not need to apply for financial aid in order to work in these positions. Information about part-time employment is available from the University's Office of Student Financial Aid.

**FEDERAL WORK-STUDY PROGRAM**

The Federal Work-Study Program provides a need-based employment opportunity for a limited number of students in their second and/or third year at the law college. College Work-Study may reduce the student's William D. Ford Federal Direct Loan eligibility. Students must demonstrate financial eligibility for work-study through the FAFSA and its required documents.

**Loans**

All admitted students who file the FAFSA and required supporting documents are considered for the University of Iowa Law Foundation Loan, the Federal Perkins Loan, and the William D. Ford Federal Direct Loans.

**IOWA LAW SCHOOL FOUNDATION LOAN, FEDERAL PERKINS LOAN**

These are low-interest loans based on exceptional financial need. Interest does not accrue and payments are not required until the student is no longer enrolled at least half-time in school.

**FEDERAL DIRECT FORD/STAFFORD LOANS AND FEDERAL GRADUATE/PROFESSIONAL PLUS LOANS**

The Federal Direct Ford/Stafford Loans (subsidized and unsubsidized) and the Federal Graduate/Professional PLUS

Loans are funded by the federal government. The three loan programs have different interest rates and interest subsidies based on eligibility as determined by the FAFSA and other required documents, and based on the annual maximum loan amounts. Interest on the Unsubsidized Direct Stafford Loan and the Graduate/Professional PLUS Loan accrues while a student is in school, but principal and interest payments may be deferred while a student is in school. Eligibility for the Graduate/Professional PLUS Loan also includes a determination that the applicant does not have an adverse credit history.

## **Academic Rules and Procedures**

### **Transfer Credit**

No more than 30 s.h. may be transferred to Iowa from another law school. To qualify for transfer credit, courses must have been completed at a law school accredited by the American Bar Association. Grades received at another law school are not counted in calculating the cumulative grade-point average.

### **Courses Taken Before Admission to the College of Law**

Students may not count toward the J.D. any credit they earned in courses they took before matriculating at the College of Law, with the exception of transfer students from other law schools.

### **Courses Taken Outside the College of Law**

Students who take courses outside the College of Law must first obtain permission from the associate dean. If "special permission of the instructor required" is indicated on ISIS (Iowa Student Information Services web site), the student also must obtain the instructor's signature.

Students not enrolled in a joint degree program may apply toward the J.D. a maximum of 6 s.h. earned in courses outside the College of Law or through cocurricular hours. Such courses are approved only if they contribute directly to the professional competence of an attorney or broaden the student's understanding of law, the legal process, or any particular legal subject. More information about limitations on accreditation of non-College of Law courses is available from the associate dean.

### **Courses Taken at Another Law School After Enrollment at Iowa**

With the permission of the dean, enrolled students may receive credit for courses taken and passed at other law schools accredited by the American Bar Association, up to a maximum of 30 s.h. Grades of C and higher are reflected on the student's transcript as credit for the designated semester hours.

### **Externships and Summer Legal Placements**

Students may earn academic credit for externships with nonprofit or governmental organizations throughout the United States, and in some circumstances, abroad. Externship credit counts toward the maximum of 20 s.h. that may be earned for clinical work, nonclinical externships, and non-law classes. Students may earn credit for only one nonclinical externship during their law school tenure, no matter what amount of credit that externship carries.

Most externships are done during summer, with students registering for 091:395 Summer Legal Placement in order to earn 3 s.h. of credit. Students must spend at least 150 hours on site. They are assigned to a section supervised by a faculty member, who conducts a virtual seminar for the section's students during the externship. The faculty supervisor also conducts regular conferences with individual students (usually by telephone) and reviews their written reports on the work in progress.

Some summer externships offer 6 s.h. of credit. Students in these externships register for 091:267 Legal Externship. They must arrange their own faculty supervision and are required to write a 40-page research paper that satisfies the faculty-supervised writing project requirement for the J.D. degree. A faculty site visit also is required.

Externships also may be scheduled for the fall or spring semester. In unusual circumstances, externships for up to 15 s.h. of credit may be approved.

Students considering externships are responsible for initiating contact with appropriate sponsoring organizations and for securing an externship position. The College of Law Career Services Office offers assistance with arranging externships. Information also is available at Legal Externships on the college's web site.

Applications for summer externships are due by April 1, except in extraordinary circumstances. Students interested in externships should contact the College of Law Career Services Office.

### **Grading Policy**

The College of Law has adopted a numbering system for grading, effective for students who entered the college in May 2004 and later.

A numerical grade is assigned to each student in each course, except as otherwise provided (e.g., for courses graded

pass/fail, for courses that continue the following term, for grades of incomplete). Grades are recorded in the University's permanent record.

The highest grade awarded at the College of Law is 4.3, the lowest 1.5. No academic credit is given for grades below 1.8 or for grades of "fail."

Numerical grades may be translated into a letter grade as follows.

4.3–4.2 = A+  
4.1–3.9 = A  
3.8–3.6 = A-  
3.5–3.3 = B+  
3.2–3.0 = B  
2.9–2.7 = B-  
2.6–2.4 = C  
2.3–2.1 = C-  
2.0–1.8 = D  
1.7–1.5 = F

Professors may disenroll students for cause or reduce grades for inappropriate academic conduct, for example, plagiarism. Such measures are subject to appropriate due process.

With the dean's permission, a student may retake a course in which he or she has received a failing grade. The second grade is recorded either as pass--a grade of 2.1 or higher--or fail and is not used in computing the student's cumulative grade-point average. Rather, the first grade received for the course remains on the transcript and is used in computing the grade-point average.

If the course being retaken is sectioned, the dean designates the section to which the student will be assigned.

The faculty has adopted a mandatory grade curve for all courses.

### **Pass/Fail Grades**

Credit for certain courses is offered only on a pass/fail basis. In the case of a failing academic performance in a pass/fail course, the faculty supervisor or instructor may assign a failing numerical grade, i.e., between 1.7 and 1.5. Individual faculty members may allow students to withdraw from a course rather than receive a failing grade.

### **Miscellaneous Grading Marks**

Marks other than pass, fail, and numerical grades are as follows.

R means registered. It indicates that a student has completed the first half of a year-long program, such as a seminar or journal, for which a grade cannot be assigned until the second half of the program has been completed.

W means withdrawn. It carries no course credit and is not used in computing the cumulative grade-point average.

I means incomplete. It carries no course credit toward a degree until it is changed, nor is it used in computing the cumulative grade-point average. A mark of I may be reported only in exceptional cases and only if the unfinished part of the work is small and is unfinished for reasons acceptable to the instructor, and if the student's standing in the course is satisfactory. Students remove an incomplete by completing the unfinished work during their next period of residence.

### **Class Ranking**

Students in the top 10 percent in each class may be informed of their exact rank; grade-point averages at the 12.5 percentile and 37.5 percentile are posted.

Students are ranked following the fall semester and spring semester each year. Final class standing is determined each August and is available in September. It includes students who completed all graduation requirements in August, May, and the previous December. For purposes of ranking underclass students, the same system is used, based on the expected graduation date.

### **Release of Transcripts**

A student's grades are not given to persons outside the College of Law, including prospective employers, without written permission of the student.

### **Class Attendance and Preparation**

Students must be regular and punctual in attending classes and must be prepared to participate in class discussions. Students may be dropped from a course or failed, at the discretion of the instructor, for excessive absence or repeated lack of preparation. Students also are expected to attend special class meetings and be punctual in submitting course assignments, memos, and papers.

## Examination Policy

One examination is given in each course, with few exceptions. Before taking an exam, each student is assigned an identification number for that exam, to ensure anonymity in grading. Students must write their examination number on scratch paper and any other materials that are distributed at the start of the examination and collected at its conclusion. The instructor submits a grade for each identification number. The grade is kept on file for two years at the College of Law.

To preserve anonymous grading, students must not identify themselves and must not place their name on the examination answer or other materials that the instructor might see. They also may not discuss the examination with their instructors until the exam has been graded and the grades released. Students who have questions should pose them to a proctor during the examination or to the College of Law registrar or dean of students after the exam.

Students may be offered the option of taking some exams on their personal laptops. Each course's instructor determines whether this option is available for his or her specific course.

Students who have more than one examination scheduled for the same day, two consecutive exams (i.e. Wednesday afternoon, Thursday morning), or exams four days in a row may schedule a make-up time for one of the exams. Students who have exams three days in a row may reschedule one only with permission of the instructor.

Students are expected to take the exam on the next scheduled makeup date immediately following the regularly scheduled exam. Whenever possible, the dean sets aside one to three days as an upperclass study period between the end of regular classes and the first regularly scheduled upperclass exam.

### Extra Exam Time for Students Whose First Language Is Not English

Students who are at a substantial disadvantage in taking a timed exam because their first language is not English may receive additional time to complete the exam, commensurate with the extent of their disadvantage.

Students seeking additional time must make a written request in the dean's office by the deadline announced for the semester in which the exam is to be taken. An undergraduate degree from an English-speaking college or university is considered *prima facie* evidence that the student is not qualified for extra time.

### Exam Accommodations for Students with Disabilities

The College of Law is committed to making all of its programs, activities, and services accessible to students with disabilities. In compliance with the Americans with Disabilities Act of 1990 and Section 504 of the Rehabilitation Act of 1973, it strives to provide equal access to all academically qualified students and does not discriminate against students on the basis of disability. The college provides reasonable accommodations to students with disabilities, commensurate with the nature and extent of the disability and consistent with federal law, state law, and policies of The University of Iowa and the College of Law. Students may request accommodations for any University of Iowa sponsored curricular, cocurricular, or extracurricular program, including those in the College of Law.

The College of Law's cocurricular and extracurricular programs include, but are not limited to, Appellate Advocacy I, Trial Advocacy Board, the *Iowa Law Review* and its editorial board, Moot Court Board, Advanced Moot Court Competition, Van Oosterhout-Baskerville Moot Court Competition, National Moot Court Competition, Client Counseling Board, Client Counseling Competition, *The Journal of Corporation Law* and its editorial board, *Transnational Law & Contemporary Problems* and its editorial board, *The Journal of Gender Race & Justice* and its editorial board, Jessup International Moot Court Competition, and Jessup International Law Moot Court team.

### Withdrawal

First-year students who withdraw during the academic year or who fail to reenroll for the second semester are not eligible to return to school. Instead, they must compete with other applicants for the year in which they wish to return. The reason for the withdrawal and the quality of work done before withdrawal or failure to reenroll are considered when students reapply.

Unless granted a leave of absence by the dean, second- and third-year students who fail to enroll for any semester during the academic year must obtain permission from the admissions committee if they wish to reenroll. (Students are considered first-year if they have less than 27 s.h. of credit at the time of withdrawal or failure to enroll.)

The associate dean of students may grant a second- or third-year student a leave of absence for up to one year, if the student shows good cause.

### Student Conduct

Students are expected to act in a manner appropriate at a professional school. An act or omission that is dishonest or designed to take unfair advantage may subject a student to sanctions as serious as expulsion from school. Misconduct policies and procedures are published annually in the college's *Student Handbook*.

## Research Centers

Research centers and outreach programs are an important part of the College of Law's service to professional and civic communities. The college was home to the nation's first agricultural law center. Since that center's closing, several new centers and institutes have been founded in diverse fields such as child and maternal health care, disability law and policy, human rights law, not-for-profit entities, public affairs, and public international finance. Located in and around the Boyd Law Building, these programs enjoy increasing national and international recognition for their specialized research projects and service activities. Several have enjoyed success in attracting competitive grants from state, federal, and private sources. See Research Centers on the college's web site for links to the following centers.

### Center for Human Rights

The University of Iowa Center for Human Rights was founded in 1999 as an outgrowth of the University's year-long commemoration celebrating the 50th anniversary of the Universal Declaration of Human Rights. The center's mission is to promote and protect human rights at home and abroad by providing distinguished multidisciplinary leadership in human rights research, education, and public service. Its focus includes all categories of human rights, from first-generation civil and political rights, to second-generation economic, social, and cultural rights, to third-generation group or community rights.

### Center for International Finance and Development

The University of Iowa Center for International Finance and Development is a project to help laypersons understand the often impenetrable world of international finance and development. The center's web site features a 300-page e-book, written by a University of Iowa law professor and a group of his students, that explains the complex world of international finance and development in plain language. It also offers related news, issues discussions, briefing papers, frequently asked questions, and links to other useful sites.

### Institute of Public Affairs

The Institute of Public Affairs provides services and information to help maintain and strengthen the effectiveness of Iowa's local governments. Efforts include facilitation of goal setting and strategic planning, public policy and organizational assistance, professional development and training, timely and topical conferences and workshops, publications, outreach, and linkage with other University programs and activities. The Institute provides training for newly elected mayors and council members through a municipal leadership academy and publishes the *Iowa Municipal Policy Leader's Handbook* for city officials. It also holds the annual Iowa Municipal Management Institute, a professional development conference for city and county managers and administrators in Iowa.

### Larned A. Waterman Iowa Nonprofit Resource Center

The Larned A. Waterman Iowa Nonprofit Resource Center was created in 2000 to help nonprofit organizations throughout Iowa. The interdisciplinary center works to increase accessibility to educational and service programs focused on strengthening nonprofit organizations. It collaborates with government agencies, nonprofit organizations, and educational institutions. It also introduces students to the nonprofit sector and develops their sense of public and community service.

### Law, Health Policy & Disability Center

The Law, Health Policy & Disability Center is an emerging leader in law, technology, education, and research. Its aim is to improve quality of life for persons living with disabilities. Based at the University of Iowa College of Law, with offices in Washington, D.C., and elsewhere, the center concentrates on public policy and its impact on persons with disabilities, with emphasis on employment, self-determination, and self-sufficiency.

### National Health Law and Policy Resource Center

The National Health Law and Policy Resource Center promotes laws and public policies that foster and facilitate accessible, affordable, high-quality health care for all Americans, particularly members of vulnerable and disadvantaged populations. It provides a nonpartisan forum for informed dialogue on health law and policy issues, based on the best available data and information, between academics, practitioners, and public policy makers.

## Facilities and Resources

### Boyd Law Building

The Willard L. Boyd Law Building exemplifies Iowa's continuing commitment to legal education and the legal profession. The large, circular structure reflects the special character of the Iowa law school and allows the college to operate in a physical environment in which every square foot of space is designed to promote the college's academic and professional programs.

Classrooms in the Boyd Law Building provide an atmosphere conducive to the college's goals. They are air conditioned, carpeted, and properly lit. The building's largest classroom seats only 100 people. Small seminar rooms and special-purpose learning areas are distributed throughout the building, permitting students and faculty members to work together in close professional interaction. The newly renovated clinic suite functions as a teaching law firm, offering ease of access, usability, and visibility. The student lounge, faculty lounge, and faculty offices are located on the same floor, encouraging interaction between students and faculty members.

### **Iowa Law Library**

The centerpiece of the Boyd Law Building is the University of Iowa Law Library, which occupies space on four floors and is one of the major repositories of legal materials in the United States. Iowa's collection, containing 1,260,524 volumes and volume equivalents, is ranked second in the number of volumes and volume equivalents and second in the number of titles among all U.S. law school libraries. The collection covers a full range of Anglo-American, foreign, international, and comparative law; contains in-depth collections on law of the United States and of every state and territory; and has extensive holdings of early English legal source materials. Since 1968 the library has been a selective Federal Documents Depository.

The Law Library has an open-stack policy that makes its collection accessible to all patrons, who are served by a full staff of professional librarians. The Westlaw and LexisNexis computerized information retrieval systems are available for training and research activities, and a full range of legal and nonlegal databases are available through the online catalog.

The library's entire collection is cataloged on the University's InfoHawk database, including the collection of U.S. government documents. InfoHawk also features an automated circulation system for checking materials out of the library. The library uses OCLC (Online Computer Library Center) for online cataloging and interlibrary loan.

### **Writing Resource Center**

The Writing Resource Center is dedicated to strengthening law students' command of writing skills central to the study and practice of law. The first writing center in the country established specifically for a law school community, the Writing Resource Center serves as an extension of the classroom and supplements the college's first-year legal writing, analysis, and research program.

Members of the Writing Resource Center staff help law students with a broad range of writing, including class assignments, seminar papers, law journal articles, and symposium presentations. They also assist students with résumés, application letters, and writing samples.

In addition to helping students with general writing skills in one-on-one tutorial sessions, the center's staff members train editors in editing skills, set up individualized programs of study, offer grammar and style workshops, provide guidance on avoiding plagiarism, and suggest strategies for overcoming writer's block and adapting material for varied audiences.

The Writing Resource Center is staffed by writers, including graduate students enrolled in the Iowa Writers' Workshop, second- and third-year law students, lawyers, and a director who holds a Ph.D. in the area of writing instruction.

### **Career Services Office**

The College of Law Career Services Office provides career planning and job search assistance to law students. Each year the office sponsors a comprehensive series of programs on career options and job search skills. It also maintains a library of resources and provides individual advising by professional staff. Job search assistance also is available to alumni.

The special rigor that characterizes Iowa's distinctive brand of legal education attracts a wide variety and growing number of recruiters to campus each year. During a typical academic year, approximately 150 employers send representatives to Iowa City to conduct job interviews, and many more firms use the college's Career Services Office to search for prospective employees through written inquiries and off-campus interviews.

Iowa graduates traditionally have had excellent success in finding employment; usually, more than 98 percent are employed within a few months of graduation. The career services staff is happy to talk with prospective students regarding the college's programs and the success of its graduates.

### **Bookstore**

The College of Law has its own bookstore, which carries all assigned texts and materials for law classes. It also stocks a variety of professionally prepared outlines, hornbooks, and other study aids, as well as a limited selection of school supplies and merchandise, including pens, notebook paper, binders, computer disks, exam software, stamps, t-shirts, and sweatshirts. The bookstore also can make change.

Photocopied handouts and teaching materials assigned by course instructors are available through the bookstore.

Students may charge costs for books, class materials, supplies, and merchandise directly to their University accounts. The bookstore does not accept credit cards.

### **Information Technology**

Since electronic information technologies are vital in legal and business work, the College of Law encourages all law students to become proficient with computers. Access to word processing software also helps law students draft the many papers, articles, and other manuscripts that are a regular part of the law curriculum. The college has installed 41 personal computers attached to a local area network for use by its students. Students also are encouraged to purchase personal computers and Microsoft Windows software, if possible, and to use them in connection with their law school work.

The law college provides network and Internet access from all student library carrels. To participate, law students supply their own laptop computers, which must meet required specifications. Specifications are available from the Law Library computer support office. Wireless Internet access is available in the Law Library, the fourth-floor student lounge, journal offices, and other areas of the law building.

The college's computers are loaded with WordPerfect and Microsoft Office software, and the college provides training for and access to the two major online computer research databases, West Publishing Company's WESTLAW and Mead Data's LEXIS. Once students complete the training, they have unlimited free access to these services at home via their own PCs and on the student and public workstations in the Law Library.

The Law Library also provides CD-ROM workstations that allow access to databases in CD-ROM formats. Some of the titles available are United Nations documents, complete from 1945; Index to Legal Periodicals; TIARA, a database containing treaties; and numerous U.S. government documents published on CD-ROM.

The University provides free e-mail accounts to its students, faculty, and staff through its Information Technology Services office (ITS). Students can sign up for e-mail accounts online or at the ITS offices in University Capitol Centre. ITS advises University of Iowa students, faculty, and staff on computer hardware and software needs and can provide information about educational discounts on some purchases. ITS also offers a wide variety of free computer short courses throughout the year. For information on computing resources at the University, consult the Information Technology Services web site.

### **Copy Services**

Networked copy machines are available on each floor of the Law Library. Students may set up a copying account at the circulation desk. They also may use networked printers in the library and charge them to their University account.

A University-operated copy service on the first floor of the Boyd Law Building provides high-volume, high-quality copying. Prices are comparable to those at commercial concerns, and students may charge copying to their University accounts.

### **Legal Aid for Students**

Students in need of legal assistance may consider turning to the University's Student Legal Services. The Legal Services Corporation of Iowa also provides civil representation to indigent clients.

## **College of Law Events**

### **Parents and Partners Day**

Each fall, the parents, spouses, and friends of all students are invited to the campus for activities sponsored by the Iowa Student Bar Association and the Iowa Law School Foundation. Past activities have included a simulated class, a brunch, an auction, and a tour of the college. The weekend is a good opportunity for families and friends to see what the life of a law student is really like.

### **Supreme Court Day**

The College of Law hosts the Iowa Supreme Court on The University of Iowa campus each fall. Third-year students present oral arguments in a moot case to the court, and faculty members host receptions at their homes for the justices, attorneys, and students, providing an opportunity for informal visits with members of the court.

## **Iowa Law School Foundation**

During the three years that students spend at the College of Law, many of the classes, programs, and projects in which they participate are partially or totally supported by private gifts from law alumni and friends.

The Iowa Law School Foundation was created by the 1952 graduating class to promote close relations between the

college and its alumni and to solicit gifts for scholarships, faculty support, and other projects that benefit the college.

Foundation funding benefits faculty positions, student scholarships, loans, research assistantships, guest speakers, and student orientation activities; the clinical law, Moot Court, Trial Advocacy, and Client Counseling programs; and the student-edited law journals. It also helps support *Iowa Advocate*, the law school's alumni magazine. Published once a year, the magazine features articles and news about the college and its alumni, faculty, and students.

In order to support these programs and activities, the Iowa Law School Foundation actively solicits contributions from the college's approximately 9,600 alumni.

## College of Law Courses

The following list includes all approved College of Law courses. The college does not offer each course every year. For information on current course offerings, consult the College of Law registrar. The College of Law Guide to Courses contains a list of courses that have been offered within the past two academic years. It also lists courses the college expects to offer during the next academic year.

In-depth look at an issue or set of issues in family law; relevant cases, statutes, scholarship; class visits or on-the-job observations with community members who play roles in the family law process being examined.

**091:673 Sentencing Law and Policy Seminar**

arr.

Sentencing as a key stage of the criminal-justice process; the purposes of sentences, guilty pleas and plea bargaining, procedural rights during the sentencing process, types of sentencing statutes and guidelines, community-based sanctions, death penalty, what constitutes cruel and unusual punishment in noncapital cases; parole release, probation and parole revocation, collateral sanctions and consequences.

**091:674 Poverty Law**

arr.

Governmental responses to poverty in the United States; federal, state, and local social welfare programs for low-income persons; policy issues, history of welfare provision; state responses to federal welfare devolution, women and welfare, immigration.

**091:677 Selected Topics in Consumer Law**

arr.

Topics relevant to broad issues in consumer law--effects of deregulating the consumer credit industry, rapid growth of consumer borrowing in other nations, merits of proposed policy reforms in consumer law; may include credit cards, usury regulation, disclosure requirements for consumer transactions, unfair and deceptive practices lawmaking, expansive uses of credit reporting; focus intersection of economic, social, and political consequences of current approach to consumer law; interdisciplinary perspectives. Recommendations: course in consumer law, debt transactions, or bankruptcy.

**091:680 Supreme Court Seminar**

arr.

Supreme Court practice, procedure, jurisdiction; the art of opinion writing; in-depth analysis of cases on the court's pending docket; writing briefs, conducting research, conferencing cases sitting as a mock Supreme Court, assigning and preparing opinions, soliciting votes of colleagues; preparation of two opinions.

**091:683 Rethinking Public International Law**

arr.

Major transformations of public international law; how to integrate human rights into a system designed to secure world peace; transformation of laws of war; emergence of new sites of authority (supranational, international); blurring of line between public international law and constitutional law; conflicts of interpretation in relations between major players (United States, European and Asian countries).

**091:685 Seminar: Religion and Law**

3-4 s.h.

The role of law in ongoing conflicts over the relationship between religion, morality, and society in the United States. Same as 032:240.

**091:693 Transitional Justice**

arr.

How states resolve and manage tensions between objectives of social peace, justice, reconciliation (e.g., redress past abuses of basic rights); judicial and nonjudicial responses, including criminal prosecution, truth-seeking initiatives, private lawsuits for compensation from wrongdoers, monetary reparations by states to victims, displacement of perpetrators from prominent positions; strengths and weaknesses of each approach and conditions under which an approach is suitable, examined through countries including South Africa, Peru, Chile, Argentina, Rwanda, Sierra Leone, former Yugoslavia; how methods increasingly are combined to achieve comprehensive societal remediation in aftermath of abuse.

**Law Study Abroad****660:823 Program in Comparative Law in Bordeaux, France**

arr.

Intensive course work in France taught by professors from Iowa and France. Five-week courses in May and June.

**660:824 London Law Consortium**

arr.

Study abroad program for students from seven law schools (Iowa, Georgia, Utah, Kansas, Missouri-Columbia, Indiana-Bloomington, Chicago-Kent); American and British law taught by faculty drawn from the seven schools and British universities; clinical law program, work with British barristers and solicitors.

The Roy J. and Lucille A. Carver College of Medicine is an integral part of The University of Iowa. It contributes to the education of several thousand University students, is home to ground-breaking research in a wide array of disciplines, and provides a statewide educational health care resource.

The Carver College of Medicine is the only college in Iowa that offers a curriculum leading to the Doctor of Medicine. It also offers a Bachelor of Science in clinical laboratory sciences, nuclear medicine technology, and radiation sciences (see "Undergraduate Programs" later in this Catalog section) as well as Master of Science and Doctor of Philosophy degrees in several disciplines, the Master of Physician Assistant Studies, and the Doctor of Physical Therapy (see "Graduate Programs" later in this section).

The college participates in the education of students in the Colleges of Dentistry, Nursing, Pharmacy, and Public Health, and in the life-sciences and health-related programs of the College of Liberal Arts and Sciences, the College of Engineering, and the Graduate College.

Health professionals from throughout the Midwest take part in the college's year-round program of continuing medical education. They update their knowledge and skills through refresher courses, clinics, and conferences.

Doctor of Medicine and other health science students have a number of opportunities to gain experience in private medical offices and community hospitals. M.D. graduates may pursue further training in the specialties of family medicine, internal medicine, surgery, and pediatrics at one of 10 University of Iowa-affiliated residency programs in six Iowa cities. They also have access to two transitional-year programs. The Carver College of Medicine also offers a variety of services in support of Iowa physicians and community hospitals.

In addition to its responsibilities for educating physicians, the college addresses broad public issues of distribution and organization of health care services. Its faculty members advise and serve on national, state, and regional health planning councils, health boards, and various health agencies; some faculty members also take part in the University's Center for Health Services Research.

Accredited by the Liaison Committee on Medical Education of the American Medical Association and the Association of American Medical Colleges, the Carver College of Medicine meets the requirements of all state licensing boards. Its M.D. diploma admits the holder to all privileges granted to graduates of all medical colleges before such boards. All other professional programs administered by the college are accredited by their respective accrediting bodies.

## Professional Program (M.D.)

### Doctor of Medicine

The Carver College of Medicine accepts 148 first-year students annually into its four-year course of study leading to the Doctor of Medicine (M.D.).

#### First and Second Years: Basic Medical Sciences and Clinical Foundations

The first three semesters present a core of sciences basic to the study of medicine and introduce students to the foundations of clinical practice.

#### FIRST SEMESTER

**099:163 Medical Biochemistry** presents concepts concerning structures of biological macromolecules, cellular metabolism, elements of human nutrition, molecular biology and genetics, and extra- and intracellular signaling mechanisms. It uses clinical examples to illustrate how alterations in these molecules and pathways can lead to pathological conditions.

**060:103 Medical Gross Human Anatomy** includes complete dissection of the human body with a regional focus that emphasizes relationships to the living system. Clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations complement the dissection experience. Students acquire anatomical knowledge

through lectures, small group work, and independent activities.

**050:120 Medical Cell Biology** presents concepts concerning the structure and function of the cell and its organelles at the molecular level. The course consists of basic science lectures and clinical correlations and relates basic cell biological concepts to the understanding and treatment of human disease.

**070:110 Medical Genetics** is integrated with ongoing classes in anatomy, biochemistry, and cell biology. It provides an overview of clinical and medical genetics, with particular emphasis on recent changes that affect clinical practice with respect to common diseases that have a genetic component.

**050:162 Foundations of Clinical Practice I** is the first semester of a sequential four-semester course that introduces clinical skills students need in order to become practicing primary care physicians.

The five major goals for students over the four-semester course are to develop knowledge, attitudes, and skills that are necessary for:

- maturation into a competent and confident clinician;
- maintaining a lifelong process of learning the practice of medicine;
- application of relevant basic science and clinical concepts and other scientific advances to the practice of medicine;
- application of the principles of health promotion and disease prevention to the practice of medicine; and
- increasing awareness of the ethical and social context in which medicine is practiced.

Through large group lectures, small case-based learning groups, and small-group skill building sessions, students focus on communication in the doctor-patient relationship, accessing and managing medical information, and applying basic principles of evidence-based medicine and medical ethics.

## SECOND SEMESTER

**060:234 Medical Neuroscience** is a course for medical students, physical therapy students, and graduate students in the basic medical or related sciences. Through lectures, clinical correlate presentations, laboratories, and small group discussion sessions, the course emphasizes the interdisciplinary and integrated study of the human central nervous system. Its faculty is drawn from basic science and clinical departments.

**148:251 Principles of Medical Immunology** is offered by the interdisciplinary Immunology Program. Its goals are to teach basic components and mechanisms of the immune response as well as medical principles of normal and abnormal immunity. The course consists of lectures by Immunology Program faculty and small group case analysis sessions.

**050:240 Human Organ Systems** is an interdepartmental course that presents the normal structure (histology) and function (physiology) of human organ systems in a coordinated and integrated organ systems approach. The course is designed to emphasize structure/function relationships by integrating the microscopic anatomic and physiologic function of normal human organ systems. The course's faculty includes members of basic science departments and clinical departments.

**050:163 Foundations of Clinical Practice II** is the second semester of a sequential, four-semester course that introduces clinical skills students need in order to become practicing primary care physicians (see 050:162 for overall course goals). In this semester, students continue to work toward course goals through small case-based learning groups, large-group lectures, and small-group skill acquisition sessions. They also are introduced to clinical medicine in a shadowing experience with health care providers. Principles of doctor-patient communication are reinforced and performance of the components of the general physical examination are taught and practiced. Other topics include multiculturalism, preventive medicine, the social context of medicine, and health across the lifespan.

## THIRD SEMESTER

**071:105 Pharmacology for Health Sciences: Medical** introduces basic principles of drug action and drug disposition through discussion of mechanisms of action, therapeutic uses, and side effects for a wide variety of commonly used medications. Lectures integrate knowledge from related scientific disciplines, including biochemistry, microbiology, pathology, and physiology. Students acquire knowledge of rationale and basis for appropriate selection of medications in clinical situations and an understanding of the basis for common drug-drug interactions and adverse drug reactions.

**061:103 Principles of Infectious Diseases** presents a comprehensive approach to the microbiology of infectious diseases, covering infectious agents at both the organismic and molecular levels. The molecular aspects of pathogenesis are presented as the basis for present and future preventive and therapeutic measures. The laboratory includes hands-on experiments ranging from principles of aseptic technique to the most modern molecular aspects of diagnostic microbiology.

**069:205 Medical Pathology I** starts with general principles of disease: cell injury, inflammation, immune mechanisms, neoplasia, and hemodynamic disorders, followed by etiology, pathogenesis, epidemiology, and major clinical and

morphologic manifestations of disease by organ systems. The course combines lecture information, small group analytic skills, and observation of current laboratory procedures.

**050:164 Foundations of Clinical Practice III** is the third semester of a sequential, four-semester course that introduces clinical skills students need in order to become practicing primary care physicians (see 050:162 Foundations of Clinical Practice I for overall course goals). This semester continues the knowledge, attitude, and skill acquisition begun in the preceding two semesters. Students continue to learn through small patient-centered learning groups as well as lecture and clinical skill-building small groups. Content areas include human sexuality, biomedical ethics, and problem-specific medical history and physical exams. Students begin to apply clinical history taking and physical exam skills learned in preceding semesters by taking complete histories and performing physical exams on simulated and real patients.

Some elective courses are available to students during the first and second years. These normally carry 1 or 2 s.h. of credit. Topics include areas not specifically covered in the regular curriculum and areas related to medical practice and the role of the physician. Course offerings vary from year to year, but typical subject areas are global health issues, U.S. health care systems, and community health outreach.

#### FOURTH SEMESTER

**069:206 Medical Pathology II** is a continuation of 069:205 Medical Pathology I.

**050:183 Healthcare Ethics, Law, and Policy** introduces M.D. and physician assistant students to health care ethics, law, and policy. Students learn to appreciate the inseparable relationship between medicine and ethics, recognize key ethical obligations and challenges common in medical practice, identify sources of ethical value commonly used in ethical reasoning, and apply a systematic approach to clinical ethical reasoning. They learn fundamental legal doctrines and theories that relate to business and professional aspects of the law pertaining to health care delivery. They also develop an understanding of the relationship and contrasts between ethics and law in medical practice, and they gain familiarity with the ways in which health policy influences medical practice. Through small group discussions about ethical challenges in patient care, they learn to interact respectfully with peers and faculty when discussing controversial issues.

**050:165 Foundations of Clinical Practice IV ICD** is the final course in the foundation series. The fourth semester is devoted primarily to this major interdisciplinary course, which includes participation by a large proportion of the faculty and is vital in providing students with the tools for a lifetime of patient care.

Mornings are devoted to intensive review of the diagnostic and therapeutic aspects of organ-system-based clinical medicine. The reviews are presented by teams of specialty and subspecialty clinicians. Students spend afternoons acquiring and practicing the clinician's skills in history taking and physical examination and in learning specialized exams. Small group learning and clinical case conferences take place throughout.

Each student is evaluated individually during the semester. Evaluations include the student's approach to the patient, accuracy of history and physical examination, precision in communicating gathered data, ability to synthesize available data into a realistic differential diagnosis, and ability to apply the process of problem-based learning to the understanding of patient-based problems. Cognitive knowledge of topics covered in the morning lecture and small group sessions is assessed through computer-based multiple-choice examinations. Students who need further work receive guidance and assistance.

All M.D. students are required to pass Step 1 of the United States Medical Licensing Examination before they may be promoted to the third year of the curriculum.

#### Third and Fourth Years: Clinical Training

The clinical courses take place during the last two years of the medical curriculum. In order to qualify for graduation with the M.D., students must complete satisfactorily a total of 81 weeks of courses during the two clinical years: 69 weeks of required courses and 12 weeks of electives. Course distribution is 49 weeks in the first clinical year and 32 weeks in the second.

Clinical Beginnings (050:170), a required, 1 s.h. course, follows the first two years and precedes the start of clinical clerkships in the third year. Clinical Beginnings helps students make the transition between the first and the second years of the curriculum by emphasizing the "four Cs": Clinical reasoning and reflection; the core Competencies (patient care, medical knowledge, practice-based learning and improvement, interpersonal and communications skills, professionalism, and systems-based practice); interdisciplinary Collaboration and teamwork; and Critical appraisal of the literature and lifelong learning.

The required clerkships are as follows.

**Seven core clerkships:** internal medicine, obstetrics and gynecology, pediatrics, surgery, outpatient internal medicine, community-based primary care, and family practice preceptorship; each course includes a mix of inpatient and outpatient activities, introduces the student to a specific discipline or to the practice of medicine in the community,

and presents the opportunity to develop and practice clinical skills.

**Required subspecialty clerkships:** anesthesia, dermatology, neurology, ophthalmology, orthopaedics, otolaryngology, psychiatry, radiology, and urology, and courses in laboratory medicine and electrocardiography.

**Advanced clerkships:** subinternship, in which the student assumes responsibility for managing patients in a variety of approved medical disciplines, supervised by a senior resident and a faculty physician; emergency room or intensive care rotation.

**Three electives:** electives chosen from clerkships listed in the course book distributed by the Carver College of Medicine.

#### **FIRST CLINICAL YEAR COURSE REQUIREMENTS**

All medical students must complete satisfactorily 49 weeks of courses, including 050:170 Clinical Beginnings (one week), 40 weeks of core clerkships, and 8 weeks of courses chosen from the required subspecialty clerkships.

#### **SECOND CLINICAL YEAR COURSE REQUIREMENTS**

All medical students must complete satisfactorily 32 weeks of clerkships chosen from those not completed in the first clinical year, including the required subspecialty clerkships and electives.

Primary venues for clinical training of medical students are the University of Iowa Hospitals and Clinics, the Iowa City Veterans Affairs Medical Center, and the Des Moines Area Medical Education Consortium Inc.. Students also participate in the family practice preceptorship and the community-based primary care clerkship, which are off-campus rotations. Other courses may be assigned to off-campus sites, as well.

### **Admission to the M.D. Program**

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS), a nonprofit centralized application processing service for applicants to U.S. medical schools. AMCAS applications are available for completion in May of the year preceding the beginning of the class for which application is being made. Prospective students are urged to apply as early as possible. The deadline for AMCAS submission is November 1.

Secondary applications are forwarded to applicants whose AMCAS applications pass a review conducted by the college. A \$60 fee must accompany the secondary application from all applicants.

Admitted applicants must have an official transcript from each college they have attended sent to the University's Office of Admissions.

#### **Technical Standards for Admission and Retention**

The Carver College of Medicine seeks students who will serve the needs of society best, and it strives to graduate skilled and effective physicians. To achieve these goals, it applies the following principles and technical standards to candidates for admission and to continuing students.

##### **PRINCIPLES**

Technical standards refer to criteria that go beyond academic requirements for admission and are essential to meeting the academic requirements of the M.D. program.

Applicants to the Carver College of Medicine and students continuing in the college, with or without disabilities, are expected to meet the same requirements.

Matriculation and continuation in the college assume a certain level of cognitive and technical skill. Medical students with disabilities are held to the same fundamental standards as their nondisabled peers. Although not all students should be expected to gain the same level of proficiency with all technical skills, some skills are so essential that mastery must be achieved, with the assistance of reasonable accommodations where necessary.

Reasonable accommodations are provided to assist in learning, performing, and satisfying the technical standards.

Every reasonable attempt is made to facilitate the progress of students, providing that such efforts do not compromise collegiate standards or interfere with the rights of other students and patients.

##### **TECHNICAL STANDARDS**

Applicants for admission to the Carver College of Medicine and continuing students must possess the capability to complete the entire medical curriculum and be granted the degree. To this end, they must complete all courses in the curriculum successfully. In order to acquire the knowledge and skills to function in a broad variety of clinical situations

and to provide a wide spectrum of patient care, M.D. students must have abilities and skills in six areas, including observation; communication; motor skills; intellectual, conceptual, integrative, and quantitative abilities; behavioral and social attributes; and cultural competence.

Technological compensation can be made for some disabilities in certain areas, but each student must meet the essential technical standards in such a way that he or she is able to perform in a reasonably independent manner. The use of a trained intermediary is not acceptable in many clinical situations, because it implies that the student's judgment must be mediated by someone else's power of selection and observation.

**Observation:** Students must have the functional ability to observe demonstrations and experiments in the basic sciences and must have sufficient use of the senses necessary to perform a physical examination.

**Communication:** Students must be able to relate reasonably to patients and establish sensitive, professional relationships with patients, colleagues, and staff. They are expected to communicate the results of the history and examination to the patient and to their colleagues with accuracy, clarity, and efficiency.

**Motor:** Students are expected to participate in basic diagnostic and therapeutic maneuvers and procedures. Those who cannot perform these activities independently should be able to understand and direct the methodology involved in such activities.

**Intellectual, conceptual, integrative, and quantitative abilities:** Students must be able to learn to analyze, synthesize, solve problems, and reach reasonable diagnostic and therapeutic judgments. Students are expected to be able to display good judgment in the assessment and treatment of patients. They must be able to learn to respond with prompt and appropriate action in emergency situations.

**Behavioral and social attributes:** Students are expected to be able to accept criticism and respond with appropriate modification of their behavior. Students also are expected to possess the perseverance, diligence, and consistency necessary to complete the M.D. curriculum and enter the independent practice of medicine in a reasonable period of time. They must demonstrate professional and ethical demeanor and behavior in all dealings with peers, faculty, staff, and patients.

**Cultural Competence:** Medical students must be able to communicate with and care for persons whose culture, sexual orientation, or religious beliefs are different from their own. They must be able to perform a complete history and physical exam on any patient regardless of the student's or the patient's race, religion, ethnicity, socioeconomic status, gender, age, or sexual preference. Similarly, students must be able to interact professionally with colleagues and other health care professionals without regard to race, religion, ethnicity, socioeconomic status, gender, age, or sexual preference.

Applicants who may not meet these standards are encouraged to contact the college's admissions office.

### Admission Requirements

Applicants for admission to the Carver College of Medicine must have a baccalaureate degree; or they must be enrolled in a baccalaureate degree program, have earned at least 94 s.h. of credit or the equivalent, and expect to receive their degree before enrolling in the Carver College of Medicine. They must have earned college credit in the following courses.

**Physics:** a complete introductory course (one year), including lab instruction.

**Mathematics:** college algebra and trigonometry; applicants who completed college algebra and trigonometry in high school must take a course in advanced college mathematics or in statistics.

**Chemistry:** a minimum of one complete introductory course in organic chemistry (one year), ordinarily following a complete introductory course in modern general chemical principles, each with the appropriate laboratories.

**Biological sciences:** a complete introductory course in the principles of biology, or zoology and botany (one year), each with the appropriate laboratories; and an advanced biology course (one semester or quarter); recommended advanced biology courses include biochemistry, molecular and cell biology, human physiology, genetics, and microbiology.

**English:** two courses (including composition and literature); the requirement may be waived if the applicant's school has an integrated writing requirement in courses across its curriculum.

**Social and behavioral sciences, and humanities:** four courses; because writing skills are important in the study and practice of medicine, prospective applicants are encouraged to fulfill this requirement with courses that include a writing component; recommended courses include behavioral psychology, foreign language, and other courses that encourage appreciation for diversity and cultural competency.

Fulfillment of these requirements does not guarantee admission to the Carver College of Medicine. The college's admissions committee selects applicants who appear to be best qualified to study and practice medicine.

Applicants must have a cumulative g.p.a. of at least 2.50 for all college work. Applicants should have taken the required science courses for a grade rather than electing pass/fail grading.

Preference is given to Iowa residents with high scholastic standing. Consideration also is given to outstanding nonresidents.

Applicants are required to take the Medical College Admission Test (MCAT) no earlier than five years before and no later than September of the year of application. MCAT registration is available on the Association of American Medical Colleges web site.

Personal interviews are part of the admission process. Candidates invited for an interview are contacted by the admissions committee.

An external criminal background check is performed for all admitted students at the time of admission.

Applicants accepted on or before February 15 must submit an advance payment of \$50 by March 1. Applicants accepted after February 15 must submit the \$50 payment within two weeks after they receive notification of acceptance. The advance payment is credited toward tuition and fees.

All students who enter the Carver College of Medicine are required to comply with the pre-entrance and annual health screening program developed by the University's Student Health Service in cooperation with University of Iowa Hospitals and Clinics.

All registered Carver College of Medicine students are required to maintain health insurance (or an equivalent care plan) that satisfies minimum standards of coverage. Insurance coverage must be maintained continuously throughout each year of attendance at The University of Iowa.

## **Financial Support**

The Carver College of Medicine's philosophy is that no student should be denied a medical education due to a lack of financial resources. Admissions decisions at the Carver College of Medicine are made without consideration of financial need. Therefore, the Carver College of Medicine financial aid staff actively seeks financial aid sources so every student interested in a medical education can finance that education.

Financial assistance is provided by the Carver College of Medicine primarily on the basis of demonstrated financial need. Although a limited number of collegiate or institutional grants are available for the most economically disadvantaged students, most aid is in the form of loans. Examples of federal loan programs are the Federal Direct Stafford/Ford Student Loan, the Federal Direct Unsubsidized Stafford/Ford Student Loan, the Federal Perkins Loan, and the Primary Care Loan (PCL). Students also may qualify for Federal Direct Grad PLUS Loans or private loans to supplement their financial aid package.

In addition, the college supports scholarship and loan programs through permanent endowments and/or contributions from alumni and friends of the Carver College of Medicine. These funds are administered by the college's financial aid office and are awarded as a part of a student's total financial aid package. Funds to support short-term emergency loans are available for students with immediate financial need.

A small number of Dean's Scholarships are awarded by the college's admissions office to highly qualified candidates on the basis of their academic excellence, leadership abilities, and their potential to enrich the college. Dean's Scholarships are included in the recipient's overall financial aid package.

To learn more about financial aid, contact the Carver College of Medicine Office of Student Affairs and Curriculum financial services department.

## **Academic Rules and Procedures**

### **Student Promotion**

The Carver College of Medicine has established promotion policies and procedures to ensure that each of its graduates has adequate skills, knowledge, judgment, ethical standards and personal integrity to assume the responsibilities of a medical doctor. The student promotions committee, made up of seven faculty members and two students, performs these duties with the cooperation, advice, and judgment of course directors, faculty members, students, and administrators.

The committee recommends specific actions to be taken when a student's skills, knowledge, judgment, or ethical behavior is in any way considered consistently marginal or unsatisfactory. Possible recommendations include dismissal of the student from the college; suspension for a specified period of time; requiring the student to repeat all or any part of the curriculum on academic probation; and allowing the student to continue on academic probation with a full or partial course load. The committee's recommendations are forwarded for action to the executive dean of the Carver College of Medicine.

Medical students have the right to appeal a promotion decision. They must submit the appeal in writing to the Carver College of Medicine's executive dean within five days of notification of the decision. Appeals are considered by the

Appeals Committee, made up of faculty representatives of the Medical Council and the Executive Committee, a medical student, a lay member, and the associate dean for student affairs (ex officio). Students may request an opportunity to appear before the Appeals Committee to make a statement and answer questions. The committee then makes its recommendation to the college's dean, who is the final authority.

Specific information about student promotion policies and procedures is available from the Office of Student Affairs and Curriculum and is online in the Medical Student Handbook. See Office of Student Affairs and Curriculum/Student Handbook on the college's web site.

### **Leaves of Absence, Withdrawal, Reinstatement**

The Carver College of Medicine has established policies regarding leaves of absence, dropping courses, withdrawal from the college, and reinstatement to the college. Information about each of these policies is available at the college's Office of Student Affairs and Curriculum and is published annually in the Medical Student Handbook.

### **Disputes and Complaints**

Student complaints concerning actions of faculty members or departments are pursued first through mechanisms established in the Carver College of Medicine. These procedures allow the greatest flexibility for all concerned in resolving a conflict. They are intended for situations such as grading disputes, alleged academic dishonesty, alleged dishonesty during a clinical rotation, alleged unethical or unprofessional conduct, and perceived discrimination or harassment.

Complaints regarding sexual harassment are handled confidentially in accordance with University policy and procedures; see the University's Policy on Sexual Harassment.

For information about the established informal mechanisms, contact the Office of Student Affairs and Curriculum or see the Medical Student Handbook.

## **Undergraduate Programs**

The Carver College of Medicine offers a Bachelor of Science with majors in clinical laboratory science, nuclear medicine technology, and radiation sciences. The clinical laboratory sciences major is offered through a partnership with the University of Nebraska Medical Center. Each program offers a certificate of completion in addition to the bachelor's degree. See Clinical Laboratory Sciences, Nuclear Medicine Technology, and Radiation Sciences in the Catalog.

Undergraduate study in the Carver College of Medicine is guided by the following academic rules and procedures.

### **Health Insurance, Immunizations**

All health professions students are required to provide proof of health insurance coverage annually. Contact the University Benefits Office or see For Students/Health Insurance/Health Science Major on its web site (<http://www.uiowa.edu/hr/benefits/index.html>).

All health sciences students must show proof of health examinations and screenings annually. For more information, contact Student Health Service or see Forms, Documents, and Reports on its web site.

### **Application for Degree**

Students who want to be considered for graduation must file an Application for Degree with the Office of the Registrar before the deadline for the session in which the degree is to be conferred. Students who want to have a minor listed on their transcript must indicate this on the degree application form so that completion of the requirements for the minor can be verified.

### **Academic Recognition**

The University of Iowa and the Carver College of Medicine recognize academic achievement every fall and spring semester.

### **GRADUATION WITH DISTINCTION**

Graduating students may be recognized for their scholastic achievement upon recommendation by their academic program and with the dean's approval. Graduation with distinction, high distinction, or highest distinction is determined by cumulative and University of Iowa grade-point average. Highest distinction requires a g.p.a. of 3.85 or higher; high distinction requires a g.p.a. of 3.75 to 3.84; and distinction requires a g.p.a. of 3.65 to 3.74. Radiologic technology course grades are not included in grade-point-average.

To graduate with distinction, students must have completed a minimum of 60 s.h. in residence at The University of Iowa and must have completed 45 of the final 60 s.h. before their final semester of registration.

Students graduating with distinction are recognized at graduation and a notation is added to their transcript and diploma.

#### **DEAN'S LIST**

Students in the undergraduate Tippie College of Business, Colleges of Engineering, Liberal Arts and Sciences, and Nursing, and undergraduate programs in the Carver College of Medicine who achieve a grade-point average of 3.50 or higher on 12 s.h. or more of University of Iowa graded course work (including Guided Independent Study courses) during a semester (or summer session) and who have no hours of I (incomplete) or O (no grade reported) for that enrollment are recognized by inclusion on the Dean's List for that semester (or session).

#### **PRESIDENT'S LIST**

University of Iowa undergraduate students who achieve a grade-point average of 4.00 on 12 s.h. or more of University of Iowa graded course work (including Guided Independent Study courses) and who have no hours of I (incomplete) or O (no grade reported) for two consecutive semesters (including summer session) are recognized by inclusion on the President's List.

#### **Financial Support**

Students are eligible to apply for undergraduate financial aid. Scholarships, grants, loans, and part-time job placement are administered by the University's Office of Student Financial Aid. Part-time work in related areas is sometimes available.

#### **Degrees, Minors**

#### **GRADING, RESIDENCY**

Students must earn a g.p.a. of at least 2.00 each semester in all college work attempted, all work undertaken at The University of Iowa, and all graded work attempted after admission to the Carver College of Medicine. Students enrolled in a program that uses the pass/fail/honors grading system must pass all courses required to complete the program.

Students must earn a C or higher in professional specialty (modality) courses.

The residence requirement may be met by earning the final consecutive 30 s.h. in residence at The University of Iowa, or 45 of the last 60 s.h. in residence, or an overall total of 90 s.h. in residence.

Nonresident instruction includes course work and correspondence study at other colleges, universities, and institutions. Undergraduate course work in other University of Iowa colleges counts toward residency requirements.

#### **DOUBLE MAJORS**

Students may earn more than one major in the Carver College of Medicine by meeting the requirements for each major.

#### **TWO BACHELOR'S DEGREES**

Students who want to earn two bachelor's degrees, each from a different college, may do so under a joint degree program. They must have their combined course of study approved by the dean of the Carver College of Medicine and the dean of the other college to be eligible for a joint degree program.

#### **SECOND BACHELOR'S DEGREE**

Students who already hold a bachelor's degree and wish to earn an additional bachelor's degree must complete at least 30 s.h. consecutively in the Carver College of Medicine. Students who hold a B.A. or B.S. are considered to have completed the College of Liberal Arts and Sciences General Education Program except for the foreign language requirement. Holders of other degrees must meet college and program degree requirements. Students with a B.A. or B.S. must satisfy the residence requirement for a bachelor's degree at Iowa. Individuals interested in earning a second bachelor's degree must apply for admission to the degree program at the University's Office of Admissions.

#### **JOINT BACHELOR'S DEGREE**

Students may earn two University of Iowa bachelor's degrees in a joint degree program in the Carver College of Medicine and the College of Liberal Arts and Sciences. Students generally begin their academic program in the College of Liberal Arts and Sciences and must be eligible for admission to the Carver College of Medicine Bachelor of Science program they wish to enter.

Students enrolled in a joint degree program must meet the bachelor's degree requirements specified by both colleges. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the joint degree program are assigned two faculty advisors, one in the major department of the Carver College of Medicine and the other in the major department of the College of Liberal Arts and Sciences.

Students interested in a joint degree program should see the director of the Bachelor of Science program of their choice in the Carver College of Medicine.

#### **MINORS**

Students graduating from the Carver College of Medicine may earn a minor or minors in any degree-granting department or program in the college outside of their major department or in another college of the University by meeting that department's requirements for the minor. Generally, students must earn a minimum of 15 s.h. in the minor.

#### **DUPLICATION AND REGRESSION**

Duplication occurs when students take the same course more than once or when they take a course that duplicates the content of a course they already have completed satisfactorily. Regression occurs when students take a course that is less advanced or at a lower level than one in the same subject that they already have completed satisfactorily. Duplication and regression are assessed by the registrar at the time of graduation analysis. Semester hours earned by duplication or regression do not count toward graduation.

#### **COURSES OFFERED BY OTHER UNIVERSITY OF IOWA COLLEGES**

Students who enroll in courses offered by other University of Iowa colleges are governed by those colleges' rules in matters regarding the courses. See Policy Governing Students Enrolled in Courses Outside Their Own College or Degree Program.

#### **Registration and Grading**

Information about tuition and fees, registration, and deadlines is available from the Office of the Registrar. Students who add or drop a course after registration or who register late are assessed a fee. Each course dropped after the deadline results in a W (withdrawal) on the transcript (see Changes in Registration below). Students are not allowed to register for full-semester courses after the second week of the semester or the first week of the summer session. Students must register for off-cycle courses before the first day of the course. The maximum permitted registration is 20 s.h. in a regular semester and 10 s.h. in the summer session. Students must obtain permission from the head of the division to register for more than the maximum semester hours allowed.

#### **CHANGES IN REGISTRATION**

Courses may be added with the signatures of the advisor and the course instructor at any time during the first one-fifth of the course. They may be dropped at any time during the first two-thirds of the course. Approval is required from the dean of the Carver College of Medicine for all other changes in registration and is granted only in extraordinary circumstances. Students are assigned a mark of W (withdrawn) for any course dropped after the first one-fifth of the course.

Students who have registered for courses offered for variable or arranged credit may change the number of semester hours with the signatures of the instructor, the advisor, and the head of the division at any time before the end of the first two-thirds of the course.

Other changes in registration (such as to audit for zero credit) may be made only during the first one-fifth of the course.

It is the student's responsibility to see that the change of registration form is approved by the necessary individuals and is delivered to the Registration Center. Changes in registration become effective on the date the completed form is submitted to the Registration Center.

#### **WITHDRAWAL OF REGISTRATION**

Students may withdraw registration without academic penalty at any time before the end of the first four-fifths of the course, but no credit is given for the course. Later withdrawal results in automatic assignment of an F. Students who withdraw are not reinstated after the deadline for that session.

#### **GRADING PROCEDURES**

Grading procedures vary from program to program. Students should consult individual program policy statements for

information.

#### **AUDITING COURSES**

Students may register to audit a course with approval of the appropriate program director and course instructor. In addition to obtaining these signatures, students must register for zero credit in the course to be audited. The mark of R (registered) is assigned if the student's attendance and performance are satisfactory; if they are unsatisfactory, the mark of W (withdrawn) is assigned. Courses completed with a mark of R do not meet any college requirement and carry no credit toward graduation. Auditing may not be used as a second-grade-only option.

#### **SECOND-GRADE-ONLY OPTION**

Repeating courses for the second-grade-only option is allowed in extraordinary circumstances. To repeat a course for the second-grade-only option, students must obtain the signatures of the course instructor, the program director, and the dean on a form available from the Office of the Registrar; the signed form must be returned to the Registrar's office before the end of the first one-fifth of the course. Both grades remain on the permanent record, but only the second one is used to calculate grade-point average and credit earned.

#### **INCOMPLETES**

A grade of I (incomplete) may be reported if the reasons for inability to finish the course satisfactorily are acceptable to the program director and the course instructor. There also must be evidence that the course work will be finished within a reasonable length of time, usually by the end of the next academic session. Incompletes not removed by the deadline for submission of final grades for the next session result in the assignment of a grade of F. Changing the grade when an incomplete has been converted to an F requires the signature of the dean on a change-of-grade form.

#### **REPORTS TO STUDENTS**

Instructors notify any student whose work falls below the minimum acceptable level once the problem is recognized. Grades are reported on the student's transcript, following University protocol. No formal midterm reports are given.

#### **Academic Progress, Probation, Dismissal**

Students are expected to maintain satisfactory academic and professional standards and to demonstrate reasonable progress toward the Bachelor of Science and certificate of completion. Students who fail to maintain satisfactory academic progress or professional standards of behavior as determined by their program may be placed on probation or dismissed from the program. Probation serves as a warning that the student will not graduate unless his or her academic performance and/or professional behavior improves.

Students on probation are restored to good standing by the program director upon evidence that the problem has been corrected. Such action is usually taken at the end of a semester or session. Entering students may be admitted on probation if they fail to meet the minimum stated standards for admission.

Continued unsatisfactory scholarship or unprofessional behavior may result in dismissal from a program. Students dismissed from a program must reapply for admission through the regular, established program admissions process, following review by a faculty committee, at least four months before the requested date of readmission.

Students placed on probation or dismissed from a program are notified in writing by the dean; copies are placed in their files.

In order to be restored to good standing, students placed on academic probation during a semester or summer session must have a University of Iowa g.p.a. and a cumulative g.p.a. of at least 2.00 by the end of the next semester (for full-time students) or by the time they have earned the next 8 s.h. (for part-time students). Students on academic probation who fail to meet the grade-point average requirement in the designated time frame for restoration to good standing are subject to dismissal at the end of the semester.

Students are expected to attend classes regularly. Students who miss classes or examinations because of illness are expected to present evidence that they have been ill. Any other absences must be approved in advance by the course instructor.

Any offense against good order committed by a student in a classroom, clinical setting, or laboratory may be dealt with by the instructor or referred to the program director. The instructor reports in writing any disciplinary action taken against a student to the program director. Repeated or exceptional instances are reported to the dean.

#### **Academic Misconduct**

#### **PLAGIARISM AND CHEATING**

All cases of plagiarism and cheating in the Carver College of Medicine are reported to the dean with a statement of relevant facts. The program director and the instructor may submit recommendations for appropriate disciplinary action.

The individual instructor may reduce the student's grade, including assignment of the grade of F in the course. A report of this action is sent to the student, the program director, and the dean.

The dean, or a faculty committee appointed by the dean, may impose the following or other penalties, as the offense warrants: disciplinary probation, requirement of additional hours for the degree, suspension from the program for a period of time, or recommendation of expulsion from the program.

#### **APPEALS PROCEDURE**

Students who want to appeal a decision should appeal in writing to the dean within two weeks after the date of receipt of the decision in writing.

## **Graduate Programs**

The Carver College of Medicine offers graduate programs leading to the M.S. in pathology; the M.S. and Ph.D. in biochemistry, free radical and radiation biology, microbiology, molecular physiology and biophysics, and pharmacology; the Ph.D. in anatomy and cell biology and physical rehabilitation science; the Master in Medical Education (M.M.E.); the Master of Physician Assistant Studies (M.P.A.S.); and the Doctor of Physical Therapy (D.P.T.).

Many of the college's faculty members participate in the Graduate College's interdisciplinary programs in genetics, immunology, molecular and cellular biology, and neuroscience, and in its Biosciences Program.

The Biosciences Program gives graduate students the opportunity to become acquainted with basic molecular research in the Departments of Anatomy and Cell Biology, Biochemistry, Biology, Chemistry, Speech and Hearing, Microbiology, Molecular Physiology and Biophysics, Pharmacology, and the Programs in Free Radical and Radiation Biology, Genetics, Human Toxicology, Immunology, Molecular and Cellular Biology, and Neuroscience. The Biosciences Program offers graduate students flexibility during their first year of study, after which they select the department or program in which they will earn their Ph.D. degree. See Biosciences (Graduate College) for details.

### **Joint Degree Programs**

Students who wish to pursue an M.D. in combination with a graduate degree must be admitted to both degree programs and must make arrangements with the graduate department and with the Carver College of Medicine associate dean for student affairs and curriculum. Students must be admitted to both programs before they can be admitted to the joint degree program. Examples of joint degree programs are the joint M.D./Ph.D. offered through the Medical Scientist Training Program; the joint M.D./M.P.H. with the College of Public Health; joint M.D./M.B.A. with the Tippie College of Business; and the joint M.D./J.D. with the College of Law.

## **Faculty**

Carver College of Medicine faculty members are committed to the college's missions of education, research, and clinical service.

Faculty members teach more than 600 medical students and 250 associated health sciences students, and they lead basic science courses for more than 5,000 students from colleges across the university. They also serve the lifelong educational needs of physicians and allied health personnel; the college is accredited by the Accreditation Council for Continuing Medical Education.

The college's faculty members are dedicated researchers. Among them are leaders in biomedical imaging, cancer, cardiovascular disease, brain imaging and neurosciences, cystic fibrosis, hearing loss and deafness, muscular dystrophy, macular degeneration and other blinding eye diseases, and Huntington's disease. Faculty members are key to the extramural support the college receives for research and scholarship and to the University's rank as 11th among public institutions in National Institutes of Health funding. Four faculty members are Howard Hughes Medical Institute investigators; ten have been inducted into the Institute of Medicine; three have been named to the National Academy of Sciences; and ten are fellows of the American Association for the Advancement of Science.

Faculty who have clinical care responsibilities are members of University of Iowa Physicians, the largest multispecialty medical practice group in Iowa. They provide specialized comprehensive care at University of Iowa Hospitals and Clinics, whose clinical services are directed by the heads of the Carver College of Medicine's corresponding academic departments. In addition to educating Iowa's medical students, faculty physicians train and instruct more than 700 resident physicians and fellows in medical specialties, subspecialties, and research. Nearly 300 faculty members are listed in the national 2009-10 Best Doctors in America database.

The Office of Faculty Affairs and Development supports faculty in their specific areas of teaching, research, clinical care, administration, and professional service.

## Interdisciplinary Programs, Centers

The college's interdisciplinary programs and centers draw strength from college faculty members and the facilities available to them, without regard to departmental units or to the distinction between graduate and postgraduate training. For more information, contact the senior associate dean for scientific affairs.

The following centers are subdivisions of the Carver College of Medicine.

### **Alzheimer's Disease Research Center**

The Alzheimer's Disease Research Center studies Alzheimer's disease and related neurological conditions from the viewpoint of neuroanatomy, neuroimaging, neuropsychology, and neurochemistry. The center's purposes are to improve the diagnosis and treatment of these conditions, to disseminate information on new research to the public, and to contribute to a better understanding of the neural basis of cognition.

### **Carver Family Center for Macular Degeneration**

The Carver Family Center for Macular Degeneration was organized to prevent the devastating consequences of macular degeneration in the majority of people at risk. For those already affected by the disease, the center works to develop sight-saving medical, pharmacological, and surgical treatments.

### **Holden Comprehensive Cancer Center**

The Holden Comprehensive Cancer Center (HCCC) coordinates the efforts of University of Iowa faculty and staff in research, education, and clinical programs related to all aspects of cancer. The HCCC is recognized by the National Cancer Institute as an NCI-designated cancer center and has "comprehensive" status, a designation that recognizes the depth and breadth of interdisciplinary cancer research activity taking place at the University of Iowa.

### **Iowa Cardiovascular Center**

The Iowa Cardiovascular Center coordinates research and training programs related to cardiovascular diseases. It encompasses several programs: Program Project Grant on Integrative Neurobiology of Cardiovascular Function, Program Project Grant on Cerebral Blood Vessels, Program Project Grant on Oxidative Mechanisms in Vascular Disease, Program Project Grant on Genetic and Signaling Mechanisms in the Central Regulation of Blood Pressure, Program Project Grant on Airway Physiology and Pathophysiology in a Porcine CF Model, Program Project Grant on Gene Therapy for Cystic Fibrosis Lung Disease, a Leducq Fondation Consortium grant, and a Cystic Fibrosis Foundation research and development program. It also coordinates several training programs and a program of other interdisciplinary research supported by a number of individual project grants. The center occupies two floors of cardiovascular research laboratories and administrative offices in the Medical Research Center.

### **Iowa Mental Health Clinical Research Center**

The major emphasis of the Iowa Mental Health Clinical Research Center is the study of schizophrenia. The center provides the facilities for research linking the clinical picture of the illness with its underlying neurobiology. The center's seven research units conduct the necessary integrative and interdisciplinary research to advance knowledge about the disease.

## Facilities

### **Education and Patient Care Facilities**

Carver College of Medicine classes are taught in the Medical Education and Research Facility, Bowen Science Building, Medical Education Building, Medical Laboratories, and in University of Iowa Hospitals and Clinics classrooms and conference rooms.

The Medical Education and Research Facility contains the college's four learning communities. The communities group students who are at different stages in their medical education, encouraging peer-to-peer learning and emphasizing leadership and community service. Each learning community features small-group rooms, study and social spaces, computer workstations, a kitchen area, and staff offices. The Medical Education and Research Facility also houses the Performance-Based Assessment Program, which evaluates students' clinical and communications skills by reviewing simulated physician-patient encounters recorded in mock patient examination suites.

The Hardin Library for the Health Sciences is centrally located on the health sciences campus.

Students acquire clinical-skills experience at the 729-bed University of Iowa Hospitals and Clinics, the Iowa City Veterans Affairs Medical Center, and in affiliated hospitals and ambulatory care centers throughout Iowa.

University of Iowa Hospitals and Clinics (UIHC) serves as a tertiary care center for Iowa and portions of adjoining states. Many patients are referred to UIHC for care and treatment not available in their home communities.

### Research Facilities

The Eckstein Medical Research Building provides space, mechanical systems, and support services that offer flexibility and adaptability for current and future research. The facility enables interdisciplinary groups of faculty scientists, each of whom is researching a human biology problem at the advancing edge of science, to conduct research in close proximity to other select researchers. It also is home to the Biomedical Research Store, which provides University of Iowa investigators with common molecular and cell biology enzymes, reagents, and kits.

The Medical Education and Research Facility houses research laboratories in addition to space for medical education. Connected to it is the Carver Biomedical Research Building. With a state-of-the-art nuclear magnetic resonance facility on its lower level and five floors of laboratories above, the Carver Biomedical Research Building greatly expands the college's research capabilities.

Other buildings that house research labs include Medical Laboratories, Bowen Science Building, Medical Education Building, Medical Research Facility, Medical Research Center, and buildings at the University of Iowa Research Park (formerly the Oakdale Research Park).

The Office of Consultation and Research in Medical Education is staffed by education specialists from a range of disciplines who serve the faculty, staff, and administrators of all Carver College of Medicine programs. The office provides educational consultation, initiates and cooperates in educational research endeavors, and conducts faculty development activities.

Core Research Facilities are centralized laboratories dedicated to developing and providing resources that facilitate biomedical research. They are available on a fee-for-service basis to University of Iowa investigators as well as to entities outside the University.

Currently under construction is the Pappajohn Biomedical Discovery Building. The 200,000-square-foot, six-story facility, located adjacent to the Medical Education and Research Facility and the Carver Biomedical Research Building, is scheduled for completion in 2014. It will contain laboratories and office space and will house the Pappajohn Biomedical Institute, which will bring together scientists from across campus to collaborate on high-risk, high-yield life sciences research.

## Nondepartmental Courses

<b>050:001 Medical Elective</b>	arr.
<b>050:003 Clinical Clerkships</b>	arr.
<b>050:005 Medical Student Research Fellowships</b>	0 s.h.
<b>050:006 Doris Duke Clinical Research Fellowship</b>	0 s.h.
Clinical research projects under University of Iowa faculty mentorship. Requirements: leave of absence from Carver College of Medicine.	
<b>050:120 Medical Cell Biology</b>	2 s.h.
<b>050:147 End-of-Life Care for Adults and Families</b>	2-4 s.h.
End-of-life issues in care of adults, older adults, and their families. Requirements: 096:135 and 096:136, or RN standing. Same as 046:146, 096:147, 153:147.	
<b>050:162 Foundations of Clinical Practice I</b>	5 s.h.
<b>050:163 Foundations of Clinical Practice II</b>	5 s.h.
<b>050:164 Foundations of Clinical Practice III</b>	5 s.h.
Experience practicing and expanding clinical skills and self-directed learning skills in clinical medicine; understanding medical practice in a social context. Prerequisites: 050:162 and 050:163. Requirements: second-year M.D. enrollment.	
<b>050:165 Foundations of Clinical Practice IV ICD</b>	arr.
Basic diagnostic considerations in each of medicine's clinical disciplines, as required of primary care providers. Prerequisites: 050:162, 050:163, and 050:164. Requirements: second-year M.D. enrollment.	

- 050:168 Teaching of Physical Exam Skills** 1-2 s.h.  
Components of complete physical exam and educational techniques for teaching such skills: teaching of physical exam components to first-year students. Requirements: fourth-year M.D. enrollment.
- 050:170 Clinical Beginnings** 1 s.h.  
Orientation to third-year clerkships; technical skills, simulated patient activities, competence with the physical exam.
- 050:174 Foundations of Clinical Practice for Physician Assistants** 5 s.h.  
Practice and expansion of clinical skills; development of broad understanding of the practice of medicine in social context; strengthening of self-directed learning skills in clinical medicine. Prerequisites: 117:101. Requirements: Physician Assistant Program enrollment.
- 050:175 Foundations of Clinical Practice IV for Physician Assistants** arr.  
Basic diagnostic considerations in each of medicine's clinical disciplines, as required of primary care providers.
- 050:178 Facilitation of Patient-Centered Learning** 1-2 s.h.  
Experience in facilitating patient-centered learning groups; case discussion, critique of student presentations and assignments, clinical insight, evaluation of student performances.
- 050:180 Community-Based Primary Care** arr.  
Introduction; clinical activities, work with community agencies and resources, didactic and conferences. Requirements: M.D. enrollment.
- 050:183 Healthcare Ethics, Law, and Policy** 2 s.h.  
Ethical and legal aspects of health care delivery.
- 050:185 The Examined Life: Writing and Medicine** 1 s.h.  
Literature, essays, poetry; discussion of participants' writing; students prepare portfolios of their own writing.
- 050:188 Career Life Planning** 1 s.h.  
Students' individual interests, values, and decision-making processes important in selecting a specialty, engaging in the match process, and integrating oneself into the medical profession; personal career development, culture and climate in which physicians work and learn.
- 050:189 Medical Research Seminar** 1 s.h.  
Evaluation of literature and development of critical thinking skills necessary for evidence-based medical practice.
- 050:190 Introduction to Medical Education at Iowa** 0 s.h.  
Introduction to first-year fall courses; advanced concepts in anatomy, biochemistry, cell biology, and clinical reasoning skills; for M.D. students.
- 050:191 Biomedical Innovation** 1 s.h.  
Introduction to all phases of medical device/technology development; development of knowledge of entire medical innovation process through didactic sessions, faculty, interactions, and interdisciplinary collaboration; interdisciplinary approach; research and development of a novel medical device, therapy, or model of care. Requirements: M.D. enrollment.
- 050:195 Community Health Outreach I** 0-1 s.h.  
Presentations and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.
- 050:196 Community Health Outreach II** 1-2 s.h.  
Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.
- 050:197 Community Health Outreach III** 1-2 s.h.

Presentations, patient-based learning groups, readings, and practical experience working with agencies that provide health care and wellness promotion to communities; substance abuse; child, adolescent, and adult health; aging; interpersonal violence; homelessness.

- 050:203 Clinical Dietetics** 1 s.h.  
Nutritional aspects of health and disease, with emphasis on medical nutrition therapy; human nutrition in the clinical state as it relates to physiology and biochemistry.
- 050:211 MSTP Research** arr.  
Research experience. Requirements: Medical Scientist Training Program enrollment.
- 050:212 MSTP Clinical Connections** arr.  
Experience with physician-scientist preceptor in medical interviewing, physical examination, patient presentation through direct patient interaction. Requirements: Medical Scientist Training Program graduate phase enrollment.
- 050:213 Analyzing and Presenting Medical Research** 1 s.h.  
How to read, interpret, and present medical and scientific literature; students read and present representative papers from scientific and medical literature.
- 050:240 Human Organ Systems** 8 s.h.  
Microscopic structure and function of major and specialized human organ systems; approach integrating normal microscopic anatomy and human physiology. Requirements: M.D. enrollment.
- 050:270 Responsible Conduct in Research** 0 s.h.  
Ethical issues; misconduct and fraud; proper handling of data; responsible authorship; conflict of interest; research on animals and human subjects.
- 050:280 Medicine, Literature, and Writing** arr.  
Insights, freedom, joy, responsibilities, and challenges of a life in medicine; reading, discussion, individual creative writing.
- 050:281 Global Health Issues--International** 1 s.h.  
Global health topics; theoretical structure for interpreting global health care issues; for medical students.
- 050:282 Global Cross-Cultural Clerkship** arr.  
Cross-cultural medical program at an international site; focus on health care problems of a specific community; individual educational objectives set in advance.
- 050:283 Health Informatics I** 3 s.h.  
Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as 021:275, 051:187, 056:186, 074:191, 096:283, 174:226, 200:110.
- 050:284 Global Cross-Cultural Elective** arr.  
Cross-cultural medical program with focus on health care problems of a domestic or international community; individually arranged.
- 050:285 Global Health Issues: Domestic Communities** 1 s.h.  
Domestic health topics that illustrate health care needs of diverse domestic communities.
- 050:286 Introduction to U.S. Health Care System** 1 s.h.  
Structure, function, and finance of U.S. health care system; access, cost, quality, finance mechanisms, reform process.
- 050:287 Global Health Seminar** 1 s.h.  
Presentations by faculty members, University special guests, and alumni on their current work in global medicine/global health; implementation of global health concepts. Requirements: M.D. enrollment.
- 050:300 Teaching Skills for Medical Students** 4 s.h.  
Practical teaching techniques; opportunity for students to develop teaching skills before they become medical residents.

<b>050:701 Instructional Design and Technology</b>	3 s.h.
Skills and techniques necessary for analysis, design, development, implementation, and evaluation of effective instruction.	
<b>050:702 Clinical Teaching in Medical Education</b>	3 s.h.
Principles and methods for teaching individuals and small groups in outpatient and inpatient settings. Prerequisites: 050:701 or 07P:205. Recommendations: educational psychology course.	
<b>050:703 Educational Research and Evaluation</b>	3 s.h.
Research design and program evaluation; approaches relevant to medical education.	
<b>050:711 Teaching Methods in Medical Education</b>	3 s.h.
Principles and methods for teaching in large and small classrooms. Recommendations: educational psychology course.	
<b>050:712 Introduction to Educational Measurement in Medical Education</b>	3 s.h.
Classical test theory; overview of medical education assessment methods; practical information for designing and critiquing assessments.	
<b>050:713 Assessment in Medical Education</b>	3 s.h.
Medical education assessment methods; research methods and literature that support current practices; research project. Prerequisites: 050:712.	
<b>050:714 Current Issues in Medical Education</b>	3 s.h.
Selected issues, policies, and research.	
<b>050:720 Portfolio Project</b>	3 s.h.
Production of individual student portfolios used to integrate knowledge across courses; capstone activity.	
<b>050:721 Study in Faculty Development</b>	3 s.h.
Academic credit for approved project or other assigned activities for students in the Teaching Scholars program.	
<b>050:722 Independent Study</b>	arr.
Repeatable.	
<b>050:723 Medical Education Project</b>	3 s.h.
Experience working with a faculty mentor to design and implement a curriculum or educational research project.	
<b>050:724 Leadership in Medicine</b>	3 s.h.
Introduction to basic leadership and management theories pertaining to a health care setting; focus on the history of leadership development, various components of leadership, and how these components can be used to be a successful leader/administrator. Requirements: Master in Medical Education degree program enrollment.	
<b>050:999 Special Study Off Campus</b>	arr.
Arranged by student with department's approval.	

## Hospital Certificate Programs

The following courses are conducted by University of Iowa Hospitals and Clinics staff.

<b>670:901 Radiologic Technology I</b>	0 s.h.
Patient care and ethics, radiographic positioning, radiographic critique, medical terminology, radiologic physics, anatomy and physiology, radiographic technique, computer technology, radiation biology, radiographic processing, imaging equipment, quality assurance; supervised clinical education; two-year program; national board examination required at completion.	
<b>670:902 Radiologic Technology II</b>	0 s.h.
Prerequisites: 670:901.	
<b>671:902 Orthoptics Program</b>	0 s.h.

Clinical science of binocular vision, ocular motility, and related eye disorders; practical, theoretical training in the Department of Ophthalmology and Visual Sciences two-year program; written, oral and practical national board examinations required at completion. Requirements: bachelor's degree with specific class recommendations.

**672:803 Radiation Therapy I** 0-12 s.h.

Theory and techniques of radiation therapy technology; emphasis on areas of oncology treatment planning, treatment set-up, dosimetry, use of megavoltage radiation-producing equipment to administer treatments. Requirements: completion of radiologic technology program and eligibility for registration with a national certification program.

**672:804 Radiation Therapy II** 0-12 s.h.

Theory and techniques of radiation therapy technology; emphasis on areas of oncology treatment planning, treatment set-up, dosimetry, use of megavoltage radiation-producing equipment to administer treatment; one-year program ending in eligibility for national certification examination in radiation therapy. Prerequisites: 672:803. Requirements: graduation from an accredited radiography program and eligibility for registration with a national certification program.

**672:805 Radiation Therapy III** 0-6 s.h.

Prerequisites: 672:804.

**673:110 Foundations of Sonography** 3 s.h.

Sonography history, ergonomics, terminology, image orientation; basic theories of sound waves, echo production, transducers, equipment operation, body imaging, Doppler, hemodynamics. Requirements: 029:008 or radiologic technology program physics course or diagnostic sonography physics course.

**673:115 Abdominal Sonography I** 3 s.h.

Embryology, anatomy, and physiology of various abdominal structures imaged sonographically; abdominal vasculature, hepatobiliary system, pancreas, urinary system, adrenals, spleen, male anatomy; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings. Prerequisites: 676:100. Requirements: successful completion of a two-year radiologic technology or diagnostic medical sonography program. Corequisites: 673:110, if not taken as a prerequisite.

**673:120 Obstetrical and Gynecological Sonography I** 3 s.h.

Embryology, anatomy, and physiology of the female reproductive system and developing fetus; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings. Prerequisites: 676:100. Requirements: successful completion of a two-year radiologic technology or diagnostic medical sonography program. Corequisites: 673:110, if not taken as a prerequisite.

**673:125 Vascular Sonography I** 3 s.h.

Embryology, anatomy, and physiology of peripheral and cerebral vascular system; normal and abnormal hemodynamics, Doppler waveforms, pressure measurements, plethysmography, sonographic appearance, scanning techniques; common types of pathology of the lower extremity arterial and venous system, cerebrovascular system. Prerequisites: 675:110. Requirements: successful completion of a two-year radiologic technology or diagnostic medical sonography program. Corequisites: 673:110, if not taken as a prerequisite.

**673:140 Sonography Principles, Physics, and Instrumentation** 3 s.h.

Physical principles of sound waves, their applications to imaging of the human body, operation and physical characteristics of various ultrasound transducers, method by which the sound wave is converted into a visual image, instrumentation components and their functions, Doppler principles, image artifacts, advanced hemodynamics, and spectral Doppler waveform analysis. Prerequisites: 673:110.

**673:145 Abdominal Sonography II** 3 s.h.

Pathophysiology of abdominal structures imaged sonographically, including the GI system, abdominal wall, peritoneal, retroperitoneal, and superficial structures from 673:115; interventional sonographic procedures (aspirations, biopsies, intraoperative procedures, sterile technique, needle-guide use); post-procedure protocol; clinical findings, laboratory studies, prognosis correlated with sonographic findings; appropriate image analysis and documentation of pathology. Prerequisites: 673:115.

**673:150 Obstetrical and Gynecological Sonography II** 3 s.h.

Sonographically-related pathological and abnormal congenital conditions of gynecology and obstetrics, infertility, assisted reproductive therapy, invasive procedures in obstetrics and gynecology, postpartum complications and maternal-fetal bonding; clinical findings, laboratory studies, and prognosis correlated with sonographic findings; appropriate image analysis and documentation of pathology. Prerequisites: 673:120.

**673:152 Breast Sonography**

2 s.h.

Embryology, anatomy, physiology, and pathophysiology of the breast as it relates to sonographic imaging; proper sonographic imaging techniques, including appearance of normal anatomy, imaging protocol, proper instrument settings; sonographic findings of diseases involving the breast. Prerequisites: 673:110. Requirements: successful completion of a two-year radiologic technology or diagnostic medical sonography program.

**673:155 Vascular Sonography II**

3 s.h.

Pathophysiology of peripheral, cerebral, and abdominal vascular systems as evaluated sonographically; normal and abnormal hemodynamics, Doppler waveforms, pressure measurements, plethysmography, sonographic appearance, scanning techniques; sonographic findings of diseases involving the lower extremity arterial and venous system, upper extremity arterial and venous system, cerebrovascular system, and abdominal vascular system. Prerequisites: 673:125.

**673:803 Diagnostic Medical Sonography I**

0-9 s.h.

**673:804 Diagnostic Medical Sonography II**

0-9 s.h.

Principles and methods in using ultrasound as an imaging modality; abdomen, obstetrics and gynecology, neurosonography, and vascular technology specialties; 18-month program; national certification required at completion. Prerequisites: 673:803. Requirements: completion of an allied health program or bachelor's degree with course work in physics, anatomy, patient care, and algebra.

**673:805 Diagnostic Medical Sonography III**

0-3 s.h.

Prerequisites: 673:804. Requirements: completion of an allied health program or bachelor's degree with course work in physics, anatomy, patient care, medical technology, and algebra.

**673:806 Diagnostic Medical Sonography IV**

0-9 s.h.

Principles and methods in using ultrasound as an imaging modality; specialties including abdomen, pediatrics, obstetrics, gynecology, interventional procedures, vascular imaging, neurosonography; 18-month program; national certification examination required at completion. Prerequisites: 673:805. Requirements: completion of an allied health program or bachelor's degree with course work in physics, anatomy, patient care, medical technology, and algebra.

**673:807 Diagnostic Medical Sonography V**

0-6 s.h.

Prerequisites: 673:806. Requirements: completion of an allied health program or bachelor's degree with course work in physics, anatomy, patient care, medical technology, and algebra.

**673:911 Diagnostic Cardiac Sonography**

0 s.h.

Principles, methods in using ultrasound; specialties including adult and stress echocardiography; six-month program; national certification examination required at completion of program. Requirements: completion of an accredited medical sonography or vascular technology program.

**673:912 Cardiac Sonography Clinical Course**

0 s.h.

Using ultrasound as an imaging modality; specialties, including adult echocardiography, stress echocardiography; six-month program; national certification examination required at completion. Requirements: completion of an accredited medical sonography or vascular technology program.

**674:110 Fundamentals for the MRI Technologist**

3 s.h.

Care-giving skills specific to patients undergoing MRI examinations; techniques in effectively communicating for safety and comfort; maintaining patient and personnel safety; patient preparation, monitoring, and venipuncture; technologist's role in a wide variety of MRI examinations and patient conditions. Requirements: ARRT primary certification in radiologic technology, nuclear medicine, sonography, or radiation therapy.

**674:120 MRI Procedures I**

4 s.h.

Imaging techniques related to central nervous and musculoskeletal systems; specific clinical applications; available coils and their use; considerations in imaging parameters; specific choices in protocols and positioning criteria; anatomical structures and the plane that best demonstrates anatomy; signal characteristics of normal and abnormal structures. Requirements: 676:100 or minimum of three months of fulltime MRI clinical work experience; and 674:110, if not taken as a prerequisite, or minimum of six months of MRI clinical work experience.

**674:130 MRI Procedures II**

3 s.h.

MRI techniques related to neck, thorax, breast, abdomen, and pelvis; specific clinical applications; available coils and their use; considerations in imaging parameters; specific choices in protocols and positioning criteria. Prerequisites: 674:120.

**674:140 MRI Acquisition and Principles I**

3 s.h.

Physics and hardware used in obtaining a magnetic resonance signal, including magnetism, NMR signal production, tissue characteristics, spatial localization, pulse sequencing, imaging parameters and options, and special applications; exploration of skills useful in maximizing MR image quality. Corequisites: 674:110.

**674:150 MRI Acquisition and Principles II**

3 s.h.

Advanced MRI techniques; MR angiography and further investigation of fast image acquisition sequences; overview of MR magnets, installation, operation, and facility design; computers and digital image acquisition as they apply to MR; outline of quality assurance procedures. Prerequisites: 674:140.

**674:160 MRI Clinical Internship I**

3-6 s.h.

Work in UI Healthcare's MRI department, completing clinical documentation needed to take the ARRT certification examination in MRI; 36 hours per week. Requirements: 674:110 and pre-acceptance into the MRI Clinical Internship. Corequisites: 674:120 and 674:140, if not taken as prerequisites.

**674:170 MRI Clinical Internship II**

3-6 s.h.

Work in UI Healthcare's MRI department, completing clinical documentation needed to take the ARRT certification examination in MRI; 36 hours per week. Prerequisites: 674:160. Corequisites: 674:140, if not taken as a prerequisite.

**675:110 Vascular Anatomy**

3 s.h.

Normal arterial and venous anatomy of the circulatory system, illustrated through angiographic, magnetic resonance imaging (MRI), and computed tomography (CG) images; common variants. Prerequisites: 027:053. Requirements: Radiologic Technology Program anatomy course.

**675:120 CVI Principles**

4 s.h.

Imaging and accessory equipment for vascular interventional and cardiac interventional procedures; imaging equipment quality control; fundamental principles of vascular and cardiac procedures, including patient preparation and care, radiation safety, contrast medium, pharmacology, and sedation. Requirements: ARRT primary certification in radiologic technology. Corequisites: 675:110.

**675:130 Electrocardiogram and Hemodynamics**

3 s.h.

ECG analysis, hemodynamic principles and waveform analysis, cardiac output, vascular resistance, calculations of stenotic valves. Corequisites: 675:110, if not taken as a prerequisite.

**675:140 CVI Peripheral Procedures and Pathology**

3 s.h.

Angiographic and interventional procedures of the abdomen, thorax, and upper and lower extremities; associated pathologies. Prerequisites: 675:110. Corequisites: 675:120.

**675:150 CVI Neurology and Nonvascular Procedures and Pathology**

3 s.h.

Angiographic and interventional procedures of the head and neck; associated pathologies. Prerequisites: 675:110. Corequisites: 675:120.

**675:160 CVI Cardiac Procedures and Pathology**

4 s.h.

Cardiac diagnostic and interventional procedures; associated pathologies. Prerequisites: 675:110. Corequisites: 675:120 and 675:130.

**675:170 Cardiac Interventional Clinical Internship**

6 s.h.

Cardiac interventional (CI) clinical setting; practical experience on CI exams; 36 hours per week. Prerequisites: ARRT primary certification in radiologic technology and acceptance to UI Hospitals and Clinics CVI internships. Corequisites: 675:130 and 675:160, if not taken as prerequisites.

**675:180 Vascular Interventional Clinical Internship** 6 s.h.

Vascular interventional (VI) clinical setting; practical experience on VI exams; 36 hours per week. Prerequisites: ARRT primary certification in radiologic technology and acceptance to UI Hospitals and Clinics CVI internships. Corequisites: 675:140 and 675:150, if not taken as prerequisites.

**675:808 Cardiovascular Interventional I** 0-8 s.h.

Imaging equipment, intervention, techniques, digital angiography, vascular anatomy and physiology, pharmacology, sterile techniques, cardiac monitoring; six-month program; national recognition examination recommended at completion. Requirements: completion of radiologic technology program.

**675:809 Cardiovascular Interventional II** 0-7 s.h.

Prerequisites: 675:808. Requirements: completion of radiologic technology program.

**676:100 Sectional Anatomy for Imaging Sciences** 3 s.h.

Sectional anatomy identifiable on computed tomography and magnetic resonance imaging, including transverse, coronal, and sagittal planes.

**676:110 Pathology for Imaging Sciences** 3 s.h.

Common pathological conditions found in CT and MRI images; protocol appearance variations; units of CNS, musculoskeletal, neck/thorax, and abdominopelvic pathology; textbook readings, in-class discussions, special projects including case studies and presentations. Requirements: 676:100 or minimum of three months of fulltime CT or MRI clinical work experience.

**676:120 Computed Tomography Procedures** 5 s.h.

Computed tomography exam information, including the CNS, musculoskeletal system, neck, thorax, mediastinum, abdomen, and pelvis; positioning techniques, patient preparation, monitoring and care, indications and contraindications for procedures, contrast media usage; basic protocol information, how adjustments can be tailored as needed for patient indications; pediatric patients and how the exam is altered to provide optimal care to pediatrics; special exams. Requirements: ARRT primary certification in radiologic technology, nuclear medicine, or radiation therapy.

**676:130 Computed Tomography Physical Principles and QC** 4 s.h.

Historical development and evolution of CT; characteristics of x-ray, beam attenuation, linear attenuation coefficients, tissue characteristics, Hounsfield numbers application, data acquisition, image reconstruction, image manipulation techniques, tube configuration, collimator design and function, detector type; characteristics, image quality factors, and functions of CT computer and array processor; CT image processing and display examined from data acquisition through post-processing and archiving; radiation protection practices and QC. Requirements: ARRT primary certification in radiologic technology, nuclear medicine, or radiation therapy.

**676:140 Computed Tomography Clinical Internship** 6 s.h.

Spend 36 hours per week in UI Healthcare's CT department, completing the clinical documentation needed to take the ARRT certification examination in CT. Prerequisites: ARRT primary certification in radiologic technology, nuclear medicine, or radiation therapy; and acceptance into the CT internship. Corequisites: 676:120 and 676:130, if not taken as prerequisites.

**677:101 Emergency Medical Technician--Paramedic I** 0 s.h.

Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Requirements: certification as an emergency medical technician--basic.

**677:102 Emergency Medical Technician--Paramedic II** 0 s.h.

Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisites: 677:101.

**677:103 Emergency Medical Technician--Paramedic III** 0 s.h.

Preparation for role of entry-level paramedic: comprehension, application, and evaluation of the clinical role; demonstration of technical proficiency in all required skills; demonstration of personal behaviors consistent with professional and employer expectations. Prerequisites: 677:102.

**679:915 Principles of Breast Imaging**

3 s.h.

Comprehensive treatment of Mammography Quality Standards Act (MQSA) initial training requirements for X-ray technologists. Requirements: ARRT certification.

# Anatomy and Cell Biology

**Head:** John F. Engelhardt

**Professors:** Adel K. Affi, Ramesh C. Bhalla, Jackie Bickenbach, Martin D. Cassell, Paul M. Heidger Jr., Masataka Kawai, Nicholas J. Pantazis, Alexander Sandra

**Professors emeriti:** Ronald Bergman, Frank J. Longo, Jeanne M. Snyder, Robert J. Tomanek, Gary W. Van Hoesen

**Associate professors:** Botond B. Banfi, Robert A. Cornell, Charles A. Yeaman

**Assistant professors:** Amit Choudhury, Adam J. Dupuy, C. Andrew Frank, Fang Lin, D. Thomas Rutkowski, Tina Tootle

**Lecturers:** Kathleen Andersen, Darren S. Hoffmann, Justin Sipla

**Associates:** Gregory H. Leno, Marc Pizzimenti

**Graduate degree:** Ph.D. in Anatomy and Cell Biology

**Web site:** <http://www.anatomy.uiowa.edu>

The Department of Anatomy and Cell Biology performs three major functions. It teaches human anatomy to students preparing for careers in the health care professions; provides advanced courses, teaching experience, and research training to graduate students preparing for careers in academic research and related scientific fields; and conducts original research on the biological basis of cellular functions and human disease processes.

## Preclinical Study

The department contributes to the preclinical education of health care professionals by providing major courses in gross anatomy, cell biology, histology, and neuroscience. The department participates in the Carver College of Medicine's Medical Scientist Training Program and the Graduate College's Biosciences, Molecular and Cellular Biology, Immunology, Genetics, and Neuroscience Programs.

## Graduate Program

The department offers a Doctor of Philosophy in anatomy and cell biology.

### Doctor of Philosophy

The Doctor of Philosophy in anatomy and cell biology requires a minimum of 72 s.h. of graduate credit. Students in the Ph.D. program work toward the doctorate without an intermediate master's degree program. They complete courses focused in one of three major areas--molecular medicine and gene therapy, developmental and stem cell biology, or cancer biology--in addition to related background and elective courses. Students also teach in lecture and laboratory courses under faculty supervision. The program may be completed in four or five years of intensive, full-time residence.

Students interested in pursuing graduate study in anatomy and cell biology spend their first year in the University of Iowa Biosciences Program, where they investigate different disciplines by performing research rotations in three of the program's affiliated laboratories. They also take courses that introduce them to basic principles in the biosciences; participate in the biosciences seminar, where they learn how to evaluate scientific literature critically; and attend departmental seminars.

Students are assigned an advisor to assist in their selection of courses and research rotations during the Biosciences Program year. The curriculum is tailored to fit each student's individual interests. For more detailed information about the program, see Biosciences (Graduate College) in the Catalog.

Students enter the Biosciences Program in fall semester. The following May, after completing three research rotations, each student is expected to select a research laboratory and program affiliation and to begin his or her thesis research project. Students who choose to pursue a Ph.D. in anatomy and cell biology may apply all credit earned in the Biosciences Program toward requirements for the degree.

By the end of their second year of graduate study, anatomy and cell biology students take the comprehensive examination, which assesses their ability to analyze, organize, and apply the information, concepts, and skills acquired during the first two years of study. They define a research problem with their major advisor and formulate a research prospectus.

Subsequent years are devoted primarily to research.

The final Ph.D. examination consists of a public oral defense of the dissertation. The dissertation is based on original research conducted with the guidance of the major advisor and at least four other faculty members on the thesis committee.

### Admission

Individuals interested in pursuing a Ph.D. in anatomy and cell biology must apply to and be accepted by the University's Biosciences Program, where they will spend their first year of graduate study. The program accepts applicants with a variety of backgrounds in the biological and physical sciences.

The Biosciences Program has specific admission requirements, including a bachelor's degree and certain undergraduate course work; specific scores on the Graduate Record Examination (GRE) General Test; and for applicants whose first language is not English, specific scores on the Test of English as a Foreign Language (TOEFL). For detailed admission requirements and application information, see Biosciences (Graduate College) in the Catalog.

Admission to the Department of Anatomy and Cell Biology, after completion of the biosciences year, is based on evaluation of each applicant's credentials by the department's faculty. In addition to having met all admission requirements of the Biosciences Program, applicants to the Ph.D. program in anatomy and cell biology must have completed a bachelor's degree with the following undergraduate course work: chemistry through organic chemistry, one semester of biochemistry or the equivalent, one semester of another advanced biology course, mathematics through calculus, one year of physics, and one semester of statistics or the equivalent. Desirable qualifications include an undergraduate major in the biological sciences or chemistry; a master's degree in the biological sciences, chemistry, or a related area; and scores from a GRE Advanced Test in the applicant's major area.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Financial Support

All students in the Department of Anatomy and Cell Biology receive stipends and tuition support. Sources include training grants from the National Institutes of Health, University of Iowa and departmental fellowships and graduate research assistantships, and individual faculty research grants.

## Facilities

The department occupies more than 35,000 square feet in the Bowen Science Building on the health sciences campus. The building houses modern teaching facilities and well-equipped research laboratories. The most modern instrumentation is available, including facilities and equipment for digital microscopic imaging, confocal microscopy, molecular biological techniques, tissue culture, and protein chemistry. Other specialized equipment (e.g., electron microscopes, mass spectrophotometers) is available in other facilities. Through collaborative programs with the Holden Comprehensive Cancer Center and Iowa Cardiovascular Center, faculty and students also have access to outstanding research facilities throughout the University of Iowa health sciences campus.

## Anatomy and Cell Biology Courses

- 060:101 Human Gross Anatomy for Dental Students** 6 s.h.  
Regional dissection, lectures, demonstrations, with emphasis on head and neck; neuroanatomy. Offered spring semesters. Requirements: D.D.S. enrollment.
- 060:103 Medical Gross Human Anatomy** 6 s.h.  
Complete dissection of the body with regional emphasis stressing relationships to the living system; clinically relevant areas of radiologic imaging, surface anatomy, embryology, and clinical correlations; anatomical knowledge through lectures, small group work, independent activities. Offered fall semesters. Requirements: M.D. enrollment.
- 060:108 Human Anatomy** 5 s.h.  
Regional dissection, lectures, demonstrations; areas important to physical therapists, particularly the upper and lower extremities. Offered fall semesters. Requirements: Physical Therapy Program enrollment.
- 060:109 Human Anatomy Lab for Health Professions** 1 s.h.  
Regional and systemic approaches to the study of human anatomy, using histological (microscopic) as well as gross (macroscopic) studies. Prerequisites: 002:002. Requirements: 060:110 for pre-nursing students.
- 060:110 Principles of Human Anatomy** 3 s.h.  
Gross and microscopic human anatomy; systemic approach to regional anatomy, with emphasis on clinical relevance; optional tutorial sessions. Offered fall and spring semesters. Prerequisites: 002:002 or 002:010. Requirements: pharmacy, pre-nursing, or associated medical sciences major.
- 060:111 Gross Human Anatomy Physician Assistant Students** 6 s.h.

Focused regional dissection with clinical integration through lectures, demonstrations, and tutorials; neuroanatomy, radiology. Offered summer sessions. Requirements: Physician Assistant Program or Graduate College or M.D. enrollment.

**060:112 General Histology for Dental Students** 4 s.h.  
Microscopic study of cells, fundamental tissues, organ systems; emphasis on tooth-related structures. Offered spring semesters. Requirements: D.D.S. enrollment or anatomy and cell biology graduate standing.

**060:113 Human Anatomy Online** 4 s.h.  
Integrative systemic and regional study of the human body's structure. Prerequisites: 002:002.

**060:122 Independent Study in Anatomy and Cell Biology** arr.  
Projects arranged with department faculty members.

**060:153 Hard Cases: Science Policy and Values** 3 s.h.  
Major issues in practical ethics through difficult case studies in fields such as law, medicine, business, politics; readings in classic authors; recent contributions from several disciplines. Same as 033:153.

**060:156 Scanning Electron Microscopy and X-Ray Microanalysis** arr.  
Microscopy methods for research; all aspects of research, from sample preparation to imaging to data analysis; when to use a particular microscopy procedure; theory, operation, and application of scanning electron microscopy, scanning probe microscopy, laser scanning microscopy, X-ray microanalysis. Requirements: a physical science course. Same as 012:156, 052:156.

**060:200 Special Topics in Genetics** 1 s.h.  
Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series. Same as 127:200.

**060:203 Gross Human Anatomy for Graduate Students** 6 s.h.  
Regional dissection, lectures, demonstrations, tutorials, discussions, seminars; clinically relevant areas of anatomical radiology, surface anatomy with clinical correlations. Requirements: anatomy and cell biology graduate standing.

**060:205 General Histology for Graduate Students** 1-4 s.h.  
Structure and function of cells, tissues, and organs studied at light and electron microscopic levels. Offered spring semesters. Requirements: anatomy and cell biology graduate standing. Corequisites: 050:240.

**060:206 Graduate Research in Anatomy and Cell Biology** arr.  
Individual laboratory research training in anatomical sciences.

**060:207 Human Organ Systems for Graduate Students** 8 s.h.  
Integration of basic concepts of the physiology and microscopic anatomy of tissues and organ systems, utilizing didactic lectures, small group discussion, and laboratory exercises; emphasis on the relevance of altered morphology and physiology to pathologic processes, at both the light and electron microscopic level. Requirements: graduate standing in anatomy and cell biology.

**060:208 Current Topics in Anatomy and Cell Biology** 2 s.h.  
Review of current literature related to a weekly topic, followed by discussion of a journal article. Requirements: enrollment in a graduate program.

**060:216 Protein Biogenesis, Transport, and Degradation in the Secretory/Endocytic System** 1 s.h.  
Models for translocation across the ER membrane, quality control/protein folding in the ER lumen, ER associated degradation; mechanisms of vesicle biogenesis, cargo selection, vesicle fusion, regulation of Golgi and trans-Golgi Network biogenesis; protein internalization from the cell surface. Prerequisites: 099:130. Same as 072:220, 142:220.

**060:218 Microscopy for Biomedical Research** arr.  
Preparation, analysis of biomedical projects by light and electron microscopy. Prerequisites: 002:114. Same as 061:218.

**060:220 Advanced Microscopy Biomedical Research** arr.

Technically advanced microscopy methods for research; individualized laboratory experience with opportunity to explore application of microscopy methods. Requirements: (for 060:220) an introductory microscopy course; (for 002:220) 002:218 or 060:218 or 061:218 or 012:156 or 052:156 or 060:156; (for 061:220) an introductory EM course. Same as 002:220, 061:220.

**060:221 Control of Subcellular Motility**

1 s.h.

Actin filaments and microtubules in terms of their assembly dynamics and regulation; how motor proteins are controlled and adapted for movement of specific proteins and vesicles within cells; signaling through GTPases; cell motility; biogenesis, regulation of cilia and flagella. Prerequisites: 099:130. Same as 072:221, 142:221.

**060:222 Organelle Biogenesis**

1 s.h.

Biogenesis of mitochondria, peroxisomes, nucleus, and phagosomes; membrane trafficking; mitochondrial division, mitosis and cell division, entry into lysosomes via autophagy and endocytic pathways; host/pathogen interactions, function of macrophages and neutrophils. Prerequisites: 099:130. Same as 072:222, 142:222.

**060:223 Cell Fate Decisions**

1 s.h.

Cellular fate decisions, including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Recommendations: 156:201, 156:202, and 156:203. Same as 072:227, 142:227.

**060:224 Graduate Student Seminar**

0-1 s.h.

Current research, literature. Requirements: anatomy and cell biology graduate standing.

**060:225 Growth Factor Receptor Signaling**

1 s.h.

Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Recommendations: 156:201, 156:202, and 156:203. Same as 072:225, 142:225.

**060:226 Cell Cycle Control**

1 s.h.

Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Recommendations: 156:201, 156:202, and 156:203. Same as 072:226, 142:226.

**060:227 Anatomic Study for Teaching**

2-3 s.h.

Experience completing a detailed dissection of a region of the human body; opportunity to create models depicting anatomical concepts. Requirements: enrollment in teaching certificate program.

**060:230 Molecular Basis Vertebrate Development**

2 s.h.

Fundamentals of human embryology, concepts in developmental biology; current literature. Offered fall semesters of odd years. Requirements: graduate standing.

**060:232 Advanced Human Anatomy**

arr.

Regional dissection of the body with emphasis on systems relevant to student's specialty interests; discussion, reading, clinically relevant imaging, embryology. Offered spring semesters. Requirements: fourth-year M.D. enrollment or graduate standing.

**060:234 Medical Neuroscience**

4 s.h.

Basic principles of neurophysiology, neuroanatomy; emphasis on human central nervous system; laboratory emphasis on anatomical study of spinal cord, brain. Offered spring semesters. Requirements: (for 060:234) M.D. or Physical Therapy and Rehabilitation Science Program enrollment. Same as 132:234.

**060:265 Neuroscience Seminar**

0-1 s.h.

Research presentations. Offered fall and spring semesters. Same as 002:265, 031:265, 072:265, 132:265.

**060:270 Human Anatomy, Physiology, Pathophysiology, and Assessment for Advanced Practice Nursing**

3-6 s.h.

Interrelationships between anatomic structure and physiological function in health and disease; clinical assessment of functional integrity of organ systems; implications of pathophysiology for anesthesia. Requirements: admission to anesthesia nursing program. Same as 096:270.

## Anesthesiology

**Head:** Michael M. Todd

## M.D. Student Training

The Department of Anesthesiology introduces second-year medical students to anesthesia as a specialty; helps third-year students develop concepts and technical skills related to resuscitation, airway management, and care of the unconscious patient; and offers fourth-year students intensive study in the specialty. It offers the following courses for medical students. For course descriptions and prerequisite information, see "Courses" below.

116:006 Clinical Anesthesia (required)	2 s.h.
116:010 Clinical Anesthesia Senior	arr.
116:011 Intensive Care	arr.
116:333 Intensive Care off Campus	arr.
116:998 Anesthesia on Campus	arr.
116:999 Anesthesia off Campus	arr.

## Postgraduate and Residency Program

Diverse clinical experiences, seminars and teaching conferences, and ongoing research activities help postgraduate students and residents develop the knowledge and skills required of an anesthesia specialist.

## Anesthesia Nursing Program

The department coordinates the Anesthesia Nursing Program, a collaboration between the Carver College of Medicine and the College of Nursing. The program, open to nurses who hold a bachelor's degree, prepares nurse anesthetists to serve rural hospitals in Iowa and nationwide. The curriculum provides intensive training in didactic and clinical anesthesia and includes diverse clinical experience as well as classroom instruction, seminars, and clinical case conferences. It includes the following courses. For course descriptions and prerequisite information, see "Courses" below.

116:271 Chemical and Physical Principles of Anesthesia Practice	3 s.h.
116:272 Pharmacology of Anesthesia Practice I	3 s.h.
116:273 Pharmacology of Anesthesia Practice II	2 s.h.
116:274 Basic Principles of Anesthesia Practice	5 s.h.
116:275 Advanced Principles of Anesthesia Practice I	2 s.h.
116:276 Advanced Principles of Anesthesia Practice II	2 s.h.
116:277 Advanced Principles Anesthesia Practice III	1 s.h.
116:278 Professional Aspects of Anesthesia Nursing Practice	2 s.h.
116:279 Equipment and Technological Principles of Anesthesia Practice	3 s.h.
116:287 Pharmacology of Anesthesia Practice III	2 s.h.
116:290 Introductory Clinical Anesthesia	1 s.h.
116:291 Clinical Anesthesia I	1 s.h.
116:292 Clinical Anesthesia II	1 s.h.
116:293 Advanced Clinical Anesthesia	1 s.h.
116:294 Obstetrical Anesthesia	1 s.h.
116:295 Rural Anesthesia	1 s.h.

## Anesthesiology Courses

### For M.D. Students

**116:006 Clinical Anesthesia**

2 s.h.

Clinical instruction in perioperative care of the surgical patient; preoperative evaluation, consideration of coexisting medical problems, intraoperative care, postoperative management; basic airway management; introduction to clinical management of acute and chronic pain; case conferences, simulator training.

**116:010 Clinical Anesthesia Senior**

arr.

Advanced clinical experience in anesthesia management of surgical patients with coexisting medical problems; clinical experience in various forms of anesthesia; general, regional (spinal, epidural, peripheral nerve block) anesthesia; practical experience in airway management; mask ventilation, endotracheal intubation, LMA placement, other alternative airway techniques; medical management of surgical patient under anesthesia; pharmacology, cardiovascular and pulmonary physiology; case conferences.

**116:011 Intensive Care**

arr.

Evaluation, treatment of seriously ill patients in intensive care; ventilator management, evaluation of pulmonary function, monitoring of cardiovascular status, fluid balance and acid base problems, advance monitoring techniques.

**116:333 Intensive Care off Campus**

arr.

Evaluation and treatment of seriously ill patients in an intensive care unit (other than University of Iowa Hospitals and Clinics); artificial ventilation, evaluation of pulmonary function, monitoring of cardiovascular status, fluid balance and acid base problems, advance monitoring techniques. Requirements: 4 s.h. of 116:010.

**116:998 Anesthesia on Campus**

arr.

Well defined research project relating to anesthesia; arranged by student with departmental approval.

**116:999 Anesthesia off Campus**

arr.

Knowledge development in anesthesia work and monitor use; ability to identify respiratory, cardiovascular, and neurologic effects of anesthetic agents; skill in airway management; basic skills in general, spinal, epidural, and peripheral nerve block anesthesia.

### For Anesthesia Nursing Students

**116:271 Chemical and Physical Principles of Anesthesia Practice**

3 s.h.

Chemistry and physics, as applied to anesthesia. Requirements: admission to anesthesia nursing program. Same as 096:271.

**116:272 Pharmacology of Anesthesia Practice I**

3 s.h.

Mechanism and action of drugs; focus on pharmacotherapeutic principles, including pharmacokinetics, pharmacodynamics, receptor binding, cell signaling; principles of uptake, distribution, elimination of anesthetic and adjunctive agents. Requirements: grade of 2.67 or higher in 096:271 or 116:271, and admission to anesthesia nursing program. Same as 096:272.

**116:273 Pharmacology of Anesthesia Practice II**

2 s.h.

Continuation of 096:272 or 116:272; vascular, hepatic, renal, GI, endocrine aspects; cellular mechanisms, electrolytes alterations. Requirements: grade of 2.67 or higher in 096:272 or 116:272, and admission to anesthesia nursing program. Same as 096:273.

**116:274 Basic Principles of Anesthesia Practice**

5 s.h.

Overview of anesthesia as a nursing specialty; patient assessment, anesthetic planning and management, pertinent regulations; principles of general and regional anesthesia for surgical specialties. Requirements: (for 096:274) grade of 2.67 or higher in 096:272, or concurrent enrollment in 096:273; (for 116:274) grade of 2.67 or higher in 116:272 and concurrent enrollment in 116:273. Same as 096:274.

**116:275 Advanced Principles of Anesthesia Practice I**

2 s.h.

Special needs and intraoperative management of obstetric, pediatric, and neurological patients; emphasis on pathophysiology, monitoring, ancillary requirements. Prerequisites: 096:274 or 116:274. Requirements: grade of 2.67 or higher in 096:273 or 116:273. Same as 096:275.

**116:276 Advanced Principles of Anesthesia Practice II**

2 s.h.

Special needs and intraoperative management of patients in cardiac, vascular, thoracic, and other surgical specialties; focus on altered pathophysiology, anesthetic requirements; strategies for special surgical situations. Prerequisites: 096:274 or 116:274. Requirements: grade of 2.67 or higher in 096:273 or 116:273. Same as 096:276.

**116:277 Advanced Principles Anesthesia Practice III**

1 s.h.

Acute and chronic pain management; anesthetic problems with concurrent multisystem disease, advanced age, altered physical and/or mental status. Prerequisites: 096:274 or 116:274. Requirements: grade of 2.67 or higher in 096:273 or 116:273. Same as 096:277.

**116:278 Professional Aspects of Anesthesia Nursing Practice**

2 s.h.

Issues in contemporary anesthesia nursing practice: historical development; ethical, legal, and political aspects; evaluation; quality management; responsibilities; career expectations and development; role of professional organization. Requirements: anesthesia nursing program enrollment. Same as 096:278.

**116:279 Equipment and Technological Principles of Anesthesia Practice**

3 s.h.

Anesthesia delivery systems, ancillary equipment, monitoring devices; correlation of applicable chemical and physical principles for use, safe operation, care, and cleaning of anesthesia-related equipment. Prerequisites: 116:271. Requirements: anesthesia nursing program enrollment. Same as 096:279.

**116:287 Pharmacology of Anesthesia Practice III**

2 s.h.

Drugs specific to various specialty areas: tocolytics, vasoactive and cardioactive agents, drugs that alter clotting, chronic pain therapy agents. Requirements: grade of 2.67 or higher in 096:273 or 116:273, and anesthesia nursing program enrollment. Same as 096:287.

**116:290 Introductory Clinical Anesthesia**

1 s.h.

Initial anesthesia preceptorship; development of basic clinical skills for work as a nurse anesthetist. Requirements: basic science core courses and anesthesia nursing program enrollment. Same as 096:290.

**116:291 Clinical Anesthesia I**

1 s.h.

Supervised anesthesia clinical experience for general, orthopedic, gynecologic, pediatric, urologic, dental, EENT, ambulatory surgery, or invasive diagnostic procedures. Prerequisites: 096:290 or 116:290. Requirements: anesthesia nursing program enrollment. Same as 096:291.

**116:292 Clinical Anesthesia II**

1 s.h.

Clinical anesthesia experience under faculty supervision at University Hospitals and Clinics, in surgical subspecialty rotations not completed in 096:291 or 116:291. Prerequisites: 096:291 or 116:291. Requirements: anesthesia nursing program enrollment. Same as 096:292.

**116:293 Advanced Clinical Anesthesia**

1 s.h.

Clinical anesthesia experiences in neurologic surgery, cardiovascular/thoracic surgery; experience providing anesthesia for patients with complex pathophysiology in varied surgical settings. Requirements: (for 096:293) anesthesia nursing program senior standing, anesthesia nursing concentration courses, and g.p.a. of 2.67 or higher; (for 116:293) anesthesia nursing program enrollment, anesthesia nursing concentration courses, and g.p.a. of 2.67 or higher. Same as 096:293.

**116:294 Obstetrical Anesthesia**

1 s.h.

Experience providing anesthesia for the parturient, initial neonatal care; two one-month rotations off campus. Requirements: (for 096:294) anesthesia nursing program enrollment; (for 116:294) anesthesia nursing courses and anesthesia nursing program enrollment. Same as 096:294.

**116:295 Rural Anesthesia**

1 s.h.

Anesthesia experience in community hospitals; three one-month rotations at UI-affiliated clinical sites in rural Iowa. Requirements: (for 096:295) anesthesia nursing program enrollment; (for 116:295) anesthesia nursing courses and anesthesia nursing program enrollment. Same as 096:295.

**Graduate degrees:** M.S., Ph.D. in Biochemistry

**Web site:** <http://www.biochem.uiowa.edu/>

Biochemistry is the study of the basic chemical processes that occur in all living systems. It is one of the most active sciences, and it provides a foundation for other biosciences.

Biochemists generally work in laboratories and/or classrooms. Those with a bachelor's degree are often employed as research assistants in industry, government, education, and health service, or in secondary school teaching, for which licensure is required.

Biochemists with advanced degrees—usually a doctorate—pursue teaching, research, and/or administrative careers in universities, medical schools, hospitals, private research agencies, government laboratories, biotechnology companies, and in food, drug, cosmetics, chemical, petroleum, and allied industries.

The Department of Biochemistry offers degree programs for undergraduates and for graduate students and administers the academic curriculum at both levels. The College of Liberal Arts and Sciences grants undergraduate degrees in biochemistry and oversees undergraduate academic policy relating to the student record. The Graduate College grants graduate degrees in biochemistry.

## Undergraduate Programs

The Department of Biochemistry offers a Bachelor of Science and a Bachelor of Arts in biochemistry.

Students choose advanced science electives to supplement biochemical studies or to satisfy requirements of a double major or a minor in another discipline. In order to count science electives numbered below 100 toward a degree in biochemistry, students must have their advisor's approval.

Transfer credit for biochemistry courses requires the approval of an undergraduate advisor in biochemistry.

Students, especially those in the B.A. program, may include courses from other disciplines, such as business, pre-law, psychology, or journalism. This prepares them for one of the many vocations on which biochemistry has an impact.

### Bachelor of Science

The Bachelor of Science in biochemistry requires a total of 120 s.h., including 73 s.h. of work for the major. The program prepares students to work in positions that require a mastery of general biochemistry. It is also excellent preparation for graduate study in biochemistry and related sciences or for study toward a professional degree in the health sciences.

The B.S. major in biochemistry requires the following course work. Biochemistry students also must complete the College of Liberal Arts and Sciences General Education Program.

All of these:

002:010-002:011 Principles of Biology I-II	8 s.h.
004:011-004:012 Principles of Chemistry I-II	8 s.h.
22M:025-22M:026 Calculus I-II	8 s.h.
029:081-029:082 Introductory Physics I-II	8 s.h.
099:101 Technical Communication in Biochemistry	1 s.h.
099:120 Biochemistry and Molecular Biology I	3 s.h.
099:130 Biochemistry and Molecular Biology II	3 s.h.
099:140 Experimental Biochemistry	4 s.h.
099:155 Research, Independent Study (required of all honors students)	6 s.h.
Advanced science electives, chosen in consultation with advisor	9 s.h.

One of these sequences:

004:121-004:122 Organic Chemistry I-II	6 s.h.
--	--------

004:123-004:124 Organic Chemistry I for Majors - Organic Chemistry II for Majors (preferred) 6 s.h.

Two of these:

004:131 Physical Chemistry I	3 s.h.
004:132 Physical Chemistry II	3 s.h.
099:241 Biophysical Chemistry I	3 s.h.
099:242 Biophysical Chemistry II	3 s.h.

One of these:

004:141 Organic Chemistry Laboratory	3 s.h.
004:142 Organic Chemistry Laboratory for Majors (preferred)	3 s.h.

Students may register for 099:155 Research, Independent Study only if they have earned an average grade of B or higher in 099:120 Biochemistry and Molecular Biology I, 099:130 Biochemistry and Molecular Biology II, and 099:140 Experimental Biochemistry and a grade of B-minus or higher in each 099:120 Biochemistry and Molecular Biology I, 099:130 Biochemistry and Molecular Biology II, and 099:140 Experimental Biochemistry; or have consent of advisor and instructor. Students may register for 099:115 Undergraduate Independent Study any time.

Students are encouraged to begin research by taking 099:115 Undergraduate Independent Study (may be taken for a total of 6 s.h.). There are no prerequisites. Students may arrange independently to take this course, or they may request assistance from an undergraduate advisor.

## Bachelor of Arts

The Bachelor of Arts in biochemistry requires a total of 120 s.h., including 57 s.h. of work for the major. The B.A. major requires the following course work. Biochemistry students also must complete the College of Liberal Arts and Sciences General Education Program.

All of these:

002:010-002:011 Principles of Biology I-II	8 s.h.
004:011-004:012 Principles of Chemistry I-II	8 s.h.
22M:025-22M:026 Calculus I-II	8 s.h.
029:011-029:012 College Physics I-II	8 s.h.
099:120 Biochemistry and Molecular Biology I	3 s.h.
099:130 Biochemistry and Molecular Biology II	3 s.h.
099:140 Experimental Biochemistry	4 s.h.
Advanced science electives, chosen in consultation with advisor	6 s.h.

One of these sequences:

004:121-004:122 Organic Chemistry I-II	6 s.h.
004:123-004:124 Organic Chemistry I for Majors - Organic Chemistry II for Majors (preferred)	6 s.h.

One of these:

004:131 Physical Chemistry I	3 s.h.
004:132 Physical Chemistry II	3 s.h.
099:241 Biophysical Chemistry I	3 s.h.
099:242 Biophysical Chemistry II	3 s.h.

In addition, B.A. students intending to go on to advanced degrees in the biological or health sciences are advised to include 4 s.h. or more of 099:115 Undergraduate Independent Study or 099:155 Research, Independent Study (senior research) in their programs.

## B.A. or B.S. with Teacher Licensure

Biochemistry majors, especially those in the B.A. program, may qualify for teacher licensure by taking additional courses in teacher education. Consult the College of Education for details.

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

### Bachelor of Science

**Before the third semester begins:** 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II, 22M:025 Calculus I and 22M:026 Calculus II, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** the courses listed above, plus 002:010 Principles of Biology I and 002:011 Principles of Biology II; 004:121 Organic Chemistry I and 004:122 Organic Chemistry II, and 004:141 Organic Chemistry Laboratory; and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** the courses listed above, plus 029:081 Introductory Physics I and 029:082 Introductory Physics II, 099:120 Biochemistry and Molecular Biology I, 099:130 Biochemistry and Molecular Biology II, 099:101 Technical Communication in Biochemistry, and 099:140 Experimental Biochemistry, two science electives, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** the courses listed above, plus 004:131 Physical Chemistry I or 004:132 Physical Chemistry II or 099:241 Biophysical Chemistry I or 099:242 Biophysical Chemistry II, a science elective, and at least 3 s.h. of 099:155 Research, Independent Study

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

### Bachelor of Arts

**Before the third semester begins:** 004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II; math through 22M:026 Calculus II or above; and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** the courses listed above, plus 002:010 Principles of Biology I and 002:011 Principles of Biology II, 004:121 Organic Chemistry I and 004:122 Organic Chemistry II, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** the courses listed above, plus 029:011 College Physics I and 029:012 College Physics II, 099:120 Biochemistry and Molecular Biology I, 099:130 Biochemistry and Molecular Biology II, and 099:140 Experimental Biochemistry, two science electives, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** the courses listed above, plus 004:131 Physical Chemistry I or 004:132 Physical Chemistry II or 099:241 Biophysical Chemistry I or 099:242 Biophysical Chemistry II, and a science elective

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

### Honors

Qualified students may earn an honors degree in biochemistry. They must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Honors students in biochemistry must complete 099:155 Research, Independent Study. They must present their research results in a report written in the form of a journal article and in an oral report presented at a special open departmental seminar.

## Graduate Program

The Department of Biochemistry offers a Master of Science and a Doctor of Philosophy in biochemistry. Students admitted to the graduate program usually pursue the Ph.D. Qualified students may pursue a combined program leading to the M.D./Ph.D. (Medical Scientist Training Program).

### Master of Science

The Master of Science in biochemistry requires a minimum of 30 s.h. of graduate credit, thesis research, and a thesis. See "Doctor of Philosophy" for information about the graduate curriculum.

### Doctor of Philosophy

The Doctor of Philosophy in biochemistry requires a minimum of 72 s.h. of graduate credit. The focus of the graduate program is on the individual student.

The 72 s.h. required for the degree includes 34 s.h. of course work and 38 s.h. of research credit. Students may take courses that enhance their educational goals. All Ph.D. students take the following 19 s.h. of course work; they choose an additional 13 s.h. from courses offered by the Department of Biochemistry and other University of Iowa departments.

099:261 Research Techniques (first-year laboratory rotation)	1-5 s.h.
650:270 Principles of Scholarly Integrity	0-1 s.h.
Biophysical chemistry (students typically earn 6 s.h.)	3 s.h.
Molecular or cellular biology (students typically earn 6-8 s.h.)	4 s.h.
Graduate seminar	3 s.h.

The following is a typical first-year curriculum.

First semester:

099:243 Biophysical Chemistry Module 1	1 s.h.
099:245 Biophysical Chemistry Module 2	1 s.h.
099:247 Biophysical Chemistry Module 3	1 s.h.
099:261 Research Techniques	1-5 s.h.
156:201 Fundamentals of Gene Expression	1 s.h.
156:202 Fundamentals of Protein Regulation	1 s.h.
156:203 Fundamentals of Dynamic Cell Processes	1 s.h.
156:204 Biostatistics for Biomedical Research	1 s.h.
156:265 Biosciences Critical Thinking and Communication	2 s.h.
650:270 Principles of Scholarly Integrity	0-1 s.h.

Second semester:

099:226 Enzyme Kinetics and Bioorganic Mechanisms	1-2 s.h.
099:246 Biophysical Chemistry Module 5	1 s.h.
099:248 Biophysical Chemistry Module 6	1 s.h.
099:261 Research Techniques	1-5 s.h.
142:215 Transcription and Multifunctional Regulation by RNA	1 s.h.
142:216 Chromatin Structure and Disease	1 s.h.
142:217 Cancer, Epigenetics, and Genetic Manipulations in Mice	1 s.h.
156:205 Practical Bioinformatics	1 s.h.
156:265 Biosciences Critical Thinking and Communication	2 s.h.

099:282 Seminar	0-1 s.h.
-----------------	----------

or

156:265 Biosciences Critical Thinking and Communication	2 s.h.
---	--------

Once students are promoted to the second year of study, they choose research laboratories for Ph.D. thesis research and begin their thesis projects. They take courses that supplement their interests and preparation, including the following.

099:282 Seminar	1 s.h.
099:292 Research Biochemistry	arr.
Graduate-level science electives	6 s.h.

Students take the comprehensive examination before the end of June in their second year, after which they are admitted formally to degree candidacy and begin to concentrate on thesis research. The program culminates in successful defense of completed thesis work before an examining committee.

In addition to meeting these requirements and those of the Graduate College, students are expected, as part of their training, to assist in teaching biochemistry for one semester.

Throughout the program, students are associated with faculty-directed research groups. They receive close personal attention from the biochemistry faculty members who serve as research advisors.

## Admission

The graduate program in biochemistry is flexible enough to accommodate students with bachelor's degrees in any of the biological, biochemical, or physical sciences. Appropriate preparation includes one-year, college-level courses in

organic and physical chemistry, biology, physics, and mathematics through calculus. Students are expected to have had one or more introductory courses in biochemistry.

Applicants must have an undergraduate g.p.a. of at least 3.00 and must submit acceptable verbal, quantitative, and analytical scores on the Graduate Record Examination (GRE) General Test. Applicants are encouraged to submit their scores on the GRE Subject Test in Chemistry; Biology; or Biochemistry, Cell, and Molecular Biology.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Financial Support

Students admitted to the Ph.D. program in biochemistry routinely receive a stipend and tuition support.

## Research

The department's current research interests include protein structure and function, protein folding, DNA bending, complex carbohydrate structure and function, chromatin, regulation of gene expression, mechanisms of transcription and replication, enzyme reaction mechanisms, intracellular signaling, differentiation, and membrane determinants of cell shape and motility. Visit the Department of Biochemistry web site for details.

## Facilities

The Department of Biochemistry is located on the University of Iowa health sciences campus, where it has administrative, research, and teaching facilities in the Bowen Science Building. Departmental research groups also are located in the adjacent Medical Education and Research Facility and in other research facilities.

The University of Iowa maintains a number of central research support facilities and equipment that promote campuswide interactions between research groups. These include the facilities for electron and confocal microscopy, fermentation, image analysis, high field NMR, high resolution mass spectrometry, and academic computing (through Information Technology Services). Carver College of Medicine research facilities are available to biochemistry researchers for nuclear magnetic resonance spectroscopy, flow cytometry, DNA synthesis, tissue culture hybridoma, gene transfer, X-ray crystallography analysis, and transgenic and gene targeting.

Individual faculty research laboratories are well-equipped for modern research, and there are many common-use laboratories, including instrument rooms, a reading room, cold rooms, tissue culture areas, preparation rooms, and a stockroom. Research is supported by office staff, stockroom supervisors, and a purchasing agent.

Together, the department and the central support facilities provide virtually all of the equipment required for modern biochemical research. Examples of such equipment include analytical and preparative ultracentrifuges; fluorescence, optical rotatory dispersion, high-field NMR, and rapid kinetic instruments; tissue culture rooms, gas chromatographs, preparative high performance liquid chromatographs, liquid scintillation counters, electrophoresis equipment, instrumentation for protein X-ray crystallography and microcalorimetry, automated DNA sequencers, and facilities for microarray analysis.

The department maintains a reading room stocked with primary books and journals used by biochemists. The Hardin Library for the Health Sciences is a large, complete library located on the health sciences campus. Excellent resources also are provided by branches of the University of Iowa Libraries and by computer access to bibliographic retrieval services.

## Biochemistry Courses

### 099:001 Orientation and Introduction to the Field of Biochemistry

0 s.h.

Biochemistry and its application to other areas of basic sciences; biochemical studies, research, careers.

### 099:101 Technical Communication in Biochemistry

1 s.h.

Practical aspects of writing formal scientific papers and giving oral presentations on technical topics. Prerequisites: 099:120 or 099:130 or 099:140.

### 099:110 Biochemistry

3 s.h.

Basic concepts in modern biochemistry and molecular biology; understanding of life processes in molecular terms. Requirements: one year each of college-level biology and chemistry. Recommendations: one semester of organic chemistry.

**099:115 Undergraduate Independent Study**

arr.

Experience in an active biochemistry research lab, learning and performing experiments relevant to the current projects in that lab; exploration of scientific literature on topic of interest; arranged in advance by student and faculty member. Requirements: first-year, sophomore, or junior standing.

**099:120 Biochemistry and Molecular Biology I**

3 s.h.

Physical and chemical foundations of biochemistry, structure of biological molecules, catalysis, transport, and oxidative reactions in biology; first course of two-semester sequence that concludes with 099:130. Requirements: two semesters of general chemistry and one of organic chemistry. Recommendations: 002:010, 002:011, and an additional organic chemistry course.

**099:130 Biochemistry and Molecular Biology II**

3 s.h.

Carbohydrate biosynthesis, lipid metabolism, hormone regulation and integration of metabolism, signal transduction, genes and chromosomes, DNA replication and repair, transcription, RNA processing, protein translation and regulation of gene expression. Prerequisites: 099:120.

**099:140 Experimental Biochemistry**

2 s.h.

Use of modern instruments and techniques to fractionate, identify, and characterize constituents of biochemical systems. Prerequisites: 099:120. Requirements: two semesters of general chemistry and one semester of organic chemistry.

**099:155 Research, Independent Study**

2-6 s.h.

Independent study and research in areas of interest to the student; arranged in advance by student and biochemistry honors advisor. Requirements: grade of B- or higher in 099:120; and g.p.a. of B or higher in 099:120, 099:130, and 099:140.

**099:161 Biochemistry for Dental Students**

4 s.h.

Biochemical concepts and application to clinical problems. Prerequisites: 004:121. Requirements: D.D.S. enrollment. Recommendations: 004:122.

**099:162 Biochemistry for Pharmacy Students**

4 s.h.

Biochemical concepts and application to clinical problems. Prerequisites: 004:121. Requirements: Pharm.D. enrollment. Recommendations: 004:122.

**099:163 Medical Biochemistry**

4 s.h.

Biochemical concepts and application to clinical problems. Requirements: M.D. enrollment.

**099:164 Biochemistry for Physician Assistant Students**

3 s.h.

Aspects of general biochemistry necessary for understanding the biochemical basis of human disease; analysis of appropriate clinical cases. Prerequisites: 099:110.

**099:226 Enzyme Kinetics and Bioorganic Mechanisms**

1-2 s.h.

Principles and applications of steady-state and transient enzyme kinetics; mechanisms of catalysis of biochemical reactions. Prerequisites: 099:120.

**099:237 Topics in Biochemistry and Molecular Biology**

1-2 s.h.

Current topics in transcriptional regulation, chromatin structure and function, cell signaling pathways, regulation of development, molecular mechanisms of disease. Repeatable. Prerequisites: 156:201.

**099:238 Topics in Biophysical Chemistry**

1-2 s.h.

Current topics in structure and function of membranes or proteins; DNA-protein interactions; computational biochemistry; applications of NMR, X-ray diffraction, calorimetry, or spectroscopy. Repeatable. Prerequisites: 099:241 or 099:242.

**099:241 Biophysical Chemistry I**

3 s.h.

Experimental and theoretical techniques used to study structure and function of biological macromolecules; UV/Vis absorbance, circular dichroism, and fluorescence spectroscopies; X-ray crystallography of proteins, ultracentrifugation; application of thermodynamics to understand protein folding and protein-ligand binding. Requirements: one year of biochemistry. Recommendations: physical chemistry course.

**099:242 Biophysical Chemistry II**

3 s.h.

Enzyme kinetics and mechanisms, macromolecular interactions and dynamics, NMR spectroscopy.

**099:243 Biophysical Chemistry Module 1**

1 s.h.

Overview of basic principles and practices of biophysical chemistry; biophysical approaches to studying proteins and nucleic acids; critical evaluation of structural models derived from X-ray crystallography and NMR, quantification of molecular interactions; taken alone or as part of 099:241. Requirements: introductory course in biochemistry.

**099:244 Biophysical Chemistry Module 4**

1 s.h.

Principles and applications of steady-state and transient enzyme kinetics; mechanisms of catalysis of biochemical reactions.

**099:245 Biophysical Chemistry Module 2**

1 s.h.

In-depth examination of protein stability as well as thermodynamics and kinetics of protein folding; statistical thermodynamics, the physical chemistry of biomolecular interactions, experimental approaches to measuring protein stability, protein folding kinetics, molecular dynamics simulations, protein structural predictions; taken alone or as part of 099:241. Requirements: introductory course in biochemistry and one semester of calculus.

**099:246 Biophysical Chemistry Module 5**

1 s.h.

Overview of membrane proteins; basic principles of membrane proteins, including structure and lipid compositions of cell membranes, membrane protein folding and stability, methods of membrane proteins production, general techniques to study structure and function of membrane proteins; structure and function of biologically significant membrane transporters and receptors. Requirements: one year of biochemistry.

**099:247 Biophysical Chemistry Module 3**

1 s.h.

In-depth examination of principles and practices of studying ligand binding and macromolecular interactions; experimental approaches to study interactions with small molecules, proteins, and nucleic acids; approaches to analyze binding data; structural basis of protein/protein and protein/nucleic acid interactions; taken alone or as part of 099:241. Requirements: introductory course in biochemistry and one semester of calculus.

**099:248 Biophysical Chemistry Module 6**

1 s.h.

Basic principles of NMR and applications important for the understanding of structure and function of biological macromolecules; emphasis on methodology and experimental design, interpretation of data, and critical reading of literature; intended for advanced undergraduates and graduate students with an interest in applications of nuclear magnetic resonance (NMR) to problems of structural biology. Requirements: one year of biochemistry and one semester of calculus. Recommendations: a basic knowledge of biochemistry, spectroscopy, and some previous exposure to NMR from basic chemistry courses.

**099:261 Research Techniques**

1-5 s.h.

Laboratory rotation for first-year graduate students in biochemistry.

**099:275 Perspectives in Biocatalysis**

1-3 s.h.

Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Repeatable. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as 004:275, 046:275, 052:275, 053:275, 061:275.

**099:282 Seminar**

0-1 s.h.

How to evaluate reports of scientific investigations critically; techniques for presenting scientific information.

**099:283 Thesis Seminar**

1 s.h.

Preparation and oral presentation of thesis proposal. Requirements: second-year graduate standing in biochemistry.

**099:292 Research Biochemistry**

arr.

Thesis research.

# Cardiothoracic Surgery

**Head:** Mark D. Iannettoni

**Professors:** Mark Iannettoni, Wayne Richenbacher

**Associate professors:** James Davis, William Lynch

**Assistant professors:** Domenico Calcaterra, R. Saeid Farivar, Kalpaj Parekh, Yoshikazu Suzuki

**Web site:** <http://www.uihealthcare.com/depts/med/cardiothoracicsurgery/index.html>

The University of Iowa cardiothoracic surgery program is the third oldest program of its kind in the United States. Since its establishment in 1948 as the Division of Cardiothoracic Surgery, the program has advanced from providing operative interventions for patients with diseases of the chest to performing a broad range of the most current and innovative surgical procedures.

The Department of Cardiothoracic Surgery's facilities are located at University of Iowa Hospitals and Clinics. Each year cardiothoracic surgeons at the hospitals perform more than 500 adult and pediatric heart surgeries, including coronary bypasses, transplants, and placement of mechanical cardiac assist devices; minimally invasive procedures such as mitral valve replacement and epicardial lead placement; and more than 600 general thoracic surgeries with emphasis on esophageal and lung diseases. Preparations are under way for providing coronary artery bypass grafting using robotics.

## M.D. Student Training

The department trains fourth-year M.D. students in two courses, 193:232 Subinternship in Cardiothoracic Surgery and 193:233 Research in Cardiothoracic Surgery.

## Residency Program

Iowa's cardiothoracic surgery residency program was established in 1948 and is fully accredited by the Accreditation Council for Graduate Medical Education. It is the only cardiothoracic surgery training program in Iowa. Two residents are accepted into the two-year program each year.

## Postbaccalaureate Training

The department plays a primary instructional role in University of Iowa Hospitals and Clinics' 20-month postbaccalaureate Perfusion Technology Program; see the department's perfusion technology courses (193:161 through 193:171) under "Courses" later in this section. For more information about the Perfusion Technology Program, contact the Department of Cardiothoracic Surgery or visit the Perfusion Technology Program web site.

## Research

University of Iowa cardiothoracic surgeons are leaders in clinical research, particularly in oncologic surgery, diseases of the esophagus, artificial organs, pediatric cardiac surgery, and transplantation. Research also is under way in the sequence of mutations and in localization of genes predisposed to cancer.

## Facilities

The Department of Cardiothoracic Surgery has specialty laboratories in gastric motility, analytical chemistry, transplantation, tissue culture, surgical bacteriology, shock, and cardiac bypass. These facilities permit study of experimental procedures such as heart valve replacement in large animals and heterotopic heart transplantation in mice and rats.

The laboratories also are used for supervised teaching exercises in surgical technique for medical students and junior residents, and for refinement of technique for senior residents and faculty members.

## Cardiothoracic Surgery Courses

### 193:161 Instrumentation in Perfusion Technology

3 s.h.

Electrical circuitry, filters, pressure transducers, thermistors, cardiac output computers, fluid dynamics, intra-aortic balloon pumps, blood gas analyzers. Requirements: Perfusion Technology Program enrollment.

### 193:162 Pathophysiology of Perfusion Technology

5 s.h.

Hemostasis, acid base physiology, gas transfer, heart anatomy, heart embryology, congenital cardiac defects. Requirements: Perfusion Technology Program enrollment.

- 193:163 Clinical Experience I** 2 s.h.  
Perfusion in operating room: patient workup, observation, and reporting on extracorporeal setup, surgical procedure.  
Requirements: Perfusion Technology Program enrollment.
- 193:164 Clinical Experience II** 3 s.h.  
Continuation of 193:163; setup of the extracorporeal circuit, ancillary duties of perfusionist. Prerequisites: 22S:101, 069:133, 193:161, 193:162, and 193:163.
- 193:165 Clinical Experience III** 12 s.h.  
Continuation of 193:164; management of cardiopulmonary bypass system. Prerequisites: 071:130, 193:164, 193:170, and 193:171.
- 193:166 Clinical Experience IV** 12 s.h.  
Continuation of 193:165; emphasis on supply maintenance, perfusion department management. Prerequisites: 193:165.
- 193:167 Perfusion Seminar** 1 s.h.  
Ethics in perfusion. Requirements: Perfusion Technology Program enrollment.
- 193:168 Research in Perfusion** 1 s.h.  
From topic selection to manuscript. Requirements: Perfusion Technology Program enrollment.
- 193:169 Clinical Experience V** 12 s.h.  
Continuation of 193:166. Prerequisites: 193:166.
- 193:170 Principle and Practice of Perfusion Technology** 6 s.h.  
Hypothermia, hemodilution, left heart bypass, dialysis, ultrafiltration, membrane and bubbler oxygenation.  
Prerequisites: 22S:101, 069:133, 193:161, 193:162, and 193:163.
- 193:171 Devices in Perfusion Technology** 3 s.h.  
Components of extracorporeal circuit; in vitro laboratory evaluation of components. Prerequisites: 22S:101, 069:133, 193:161, 193:162, and 193:163.
- 193:232 Subinternship in Cardiothoracic Surgery** arr.  
Participation in diagnosis, preoperative, operative, and postoperative care of thoracic and cardiac patients.
- 193:233 Research in Cardiothoracic Surgery** arr.  
Participation in diagnosis, preoperative, operative, and postoperative care of thoracic and cardiac patients.

# Clinical Laboratory Sciences

**Site coordinator:** Judith Kittleson (Pathology)  
**Undergraduate degree:** B.S. in Clinical Laboratory Science  
**Web site:** <http://www.medicine.uiowa.edu/clsp>

Clinical laboratory scientists and medical technologists perform the laboratory tests that provide physicians with information vital for accurate diagnosis and proper treatment of disease. They are in demand in hospital, private, and government laboratories; clinics; physicians' offices; and industrial, pharmaceutical, biological, and environmental research laboratories. Clinical laboratory scientists and medical technologists are highly skilled health team members who use a battery of sophisticated procedures and instruments in their work and who possess specialized knowledge and skills acquired through completion of a formal program of academic and clinical study.

## Undergraduate Program

The Carver College of Medicine offers a Bachelor of Science in clinical laboratory sciences through a partnership with the University of Nebraska Medical Center (UNMC). The UNMC program is fully accredited by the National Accrediting Agency for Clinical Laboratory Sciences. All graduates are eligible for national certification examinations in clinical laboratory sciences and medical technology.

Undergraduate study in the college is guided by the academic rules and procedures outlined in the Carver College of Medicine section of the Catalog, under "Undergraduate Programs."

### Bachelor of Science

The Bachelor of Science in clinical laboratory sciences requires a minimum of 131 s.h., including 86 s.h. of preparatory study and the 45 s.h. professional (clinical) program, which consists of 12 months of didactic and practical instruction and clinical rotations.

Bachelor of Science students who have completed all preparatory study (years one through three) begin the fourth-year professional program in May with an 11-week summer session of lecture and student laboratory courses. In mid-August they begin clinical rotations in the laboratories of University of Iowa Hospitals and Clinics, the University Hygienic Laboratory, and the Iowa City Veterans Affairs Medical Center. They also complete additional University of Nebraska Medical Center course work online during fall and spring. Students complete the program the first week in May.

University of Iowa students who successfully complete the 12-month professional program graduate with a Bachelor of Science from The University of Iowa and a letter of completion from the UNMC clinical laboratory sciences program.

Non-University of Iowa students may enroll in a clinical laboratory sciences certificate-only program if they hold a baccalaureate degree from an accredited institution of higher education or are enrolled at an affiliated institution that will grant them a baccalaureate at the completion of the certificate program. Contact the Clinical Laboratory Sciences Program for more information.

### FOURTH YEAR (PROFESSIONAL PROGRAM)

The professional program requires the following course work. Students must have completed 86 s.h., including all prerequisites (see "Admission" below), in order to enter the professional program. These courses are open only to Clinical Laboratory Sciences Program students in the fourth year (professional program).

069:150 Clinical Laboratory Skills	6 s.h.
069:152 CLS Theory, Application, and Correlation	5 s.h.
069:154 Clinical Chemistry I	4 s.h.
069:155 Clinical Chemistry II	3 s.h.
069:156 Clinical Hematology I	4 s.h.
069:157 Clinical Hematology II	3 s.h.
069:158 Clinical Microbiology I	4 s.h.
069:159 Clinical Microbiology II	3 s.h.
069:160 Clinical Immunology and Molecular Diagnostics	1 s.h.
069:162 Clinical Immunohematology I	3 s.h.
069:163 Clinical Immunohematology II	2 s.h.
069:164 Phlebotomy for Clinical Laboratory Science	1 s.h.
069:166 Urine and Body Fluid Analysis	1 s.h.
069:170 Clinical Laboratory Management I	2 s.h.

## 069:171 Clinical Laboratory Management II

3 s.h.

For course descriptions and prerequisites, see Pathology in the Catalog.

**Admission**

Admission to the clinical laboratory sciences professional program is competitive; enrollment may be limited. Applications are reviewed yearly beginning October 15 for students planning to begin the program the following May. Applications are accepted until the class is filled.

Applicants must have completed all of the following prerequisites and must have earned at least 86 s.h. of college credit by the beginning of the professional program (fourth year).

Biological sciences--must include microbiology (with lab), genetics, and immunology	16 s.h.
Chemistry--must include two semesters of general chemistry, two semesters of organic chemistry, and one semester of organic chemistry lab or biochemistry	16 s.h.
Mathematics through precalculus	3 s.h.
Statistics	3 s.h.
English	6 s.h.
Public speaking/oral communication	3 s.h.

Applicants must have a cumulative grade-point average of at least 2.70 both overall and in science. Those who intend to receive a Bachelor of Science from The University of Iowa must fulfill all College of Liberal Arts and Sciences General Education Program requirements before beginning the professional program. University of Iowa students satisfy the English and public speaking requirements by fulfilling the General Education Program rhetoric requirement. Students must satisfy any English as a Second Language requirements specified by the University before beginning the professional program.

Students should consult with a Clinical Laboratory Sciences Program advisor as early as possible to plan preclinical studies that meet all requirements.

**Expenses**

Students are responsible for buying textbooks and paying University of Iowa tuition and student fees. Students who intend to receive a Bachelor of Science in clinical laboratory science from The University of Iowa at the end of the professional program must pay full-time study University tuition and fees. Students in the clinical laboratory sciences certificate-only program may pay reduced tuition and fees. Contact the Clinical Laboratory Sciences Program for more information.

Students must arrange and pay for their own meals and housing, including meals and lodging during the summer session.

The Clinical Laboratory Sciences Program provides laboratory coats for professional program students.

## Dermatology

**Head:** Janet A. Fairley

**Professors:** George J. Giudice, Kathi C. Madison, Thomas L. Ray, Mary S. Stone

**Professors emeriti:** Richard M. Caplan, John S. Strauss

**Adjunct clinical professors:** Marc E. Boddicker, Roger I. Ceilley

**Visiting professor:** C. William Hanke

**Clinical associate professor:** Vincent Liu

**Adjunct clinical associate professors:** Dan A. Bovenmyer, Robert F. Godwin, Susan Wall

**Assistant professor:** Marta J. Van Beek

**Assistant professor (research):** Kelly A. N. Messingham

**Adjunct assistant professor:** Laura M. Myers

**Clinical assistant professor:** Brian L. Swick

**Adjunct clinical assistant professors:** Timothy G. Abrahamson, Mark G. Cleveland, David A. Davis, Gary Quinby

**Web site:** <http://www.uihealthcare.com/depts/med/dermatology/>

The Department of Dermatology instructs M.D. students and trains dermatology residents in the care of patients with skin diseases. It also provides researchers with an opportunity to develop their skills in dermatology.

## M.D. Student Training

The Carver College of Medicine is one of the few medical colleges in the country with a required dermatology rotation for students. Each third-year M.D. student spends two weeks in the clinic and attends around 10 one-hour lectures. Students see a good cross-section of patients, including those receiving primary or tertiary care at University of Iowa Hospitals and Clinics and a large number of patients referred from Student Health Service. Additional patients are seen at the nearby Iowa City Veterans Affairs Medical Center.

Varied electives are open to fourth-year M.D. students, including further clinical experience, dermatologic research, and special studies.

## Dermatology Courses

### 062:001 Clinical Dermatology

2 s.h.

Basic dermatology; lectures, independent study, clinical experience. Requirements: third-year M.D. enrollment.

### 062:002 Dermatology Elective

arr.

Advanced clinical experience, dermatologic surgery, special assignments. Requirements: fourth-year M.D. enrollment.

### 062:004 Research in Dermatology

arr.

General principles of medical research; clinical or laboratory projects; individual study.

### 062:999 Dermatology off Campus

arr.

Arranged by student with departmental approval.

## Dietetic Internship

**Director:** Laurie Kroymann

**Web site:** <http://www.healthcare.uiowa.edu/fns/internship/internship.htm>

University of Iowa Hospitals and Clinics offers a Dietetic Internship Program that is fully accredited by the American Dietetic Association Commission on Accreditation for Dietetics Education. It qualifies graduates to take the exam for qualification as a Registered Dietitian (RD). Clinical dietitians and food service operation managers of the Department of Food and Nutrition Services at University of Iowa Hospitals and Clinics provide the teaching for the program. Graduate courses in the program are administered by the Carver College of Medicine and the College of Public Health. See "Associated Courses" below.

Students generally complete the program with 9 s.h. of graduate credit, which may be applied toward an advanced degree. Approximately half of the program's graduates go on to complete advanced degree programs, typically a master's degree in health promotion, public health, or business.

University of Iowa Hospitals and Clinics awards a certificate to the program's graduates.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They also must complete a didactic program in dietetics that has approval of the ADA Commission on Accreditation for Dietetics Education.

Students enter the program in the fall semester. The postmark deadline for applications is February 15.

## Associated Courses

For course descriptions, see "Nondepartmental Courses" in the Carver College of Medicine section of the Catalog and "Courses" in the Epidemiology section (College of Public Health).

050:203 Clinical Dietetics	1 s.h.
173:230 Principles of Dietary Assessment	1 s.h.
173:235 Nutritional Epidemiology	2 s.h.
173:236 Nutrition Intervention in Clinical Trials Research	2 s.h.
173:237 Nutrition Intervention in Research Lab	3 s.h.

## Emergency Medicine

**Director:** Andrew Nugent

**Clinical professor:** Mark Graber

**Associate professors (clinical):** Azeem Ahmed, Hans House, Charles Jennissen

**Assistant professors (clinical):** Agustin Aguilar, Olivia Bailey, Gregory Bell, Chris Buresh, Carlyn Christensen-Szalanski, Dana Collaguazo, Harlo Hove, Mike Miller, Christine Miyake, Bobby Peters, Shoshone Richardson, Mike Takacs, Jon Van Heukelom

**Web site:** <http://www.uihealthcare.com/emergencymedicine>

The Department of Emergency Medicine prepares new physicians to recognize and treat a variety of urgent and emergent conditions. The program fosters basic science and clinical research relevant to emergency medicine and is dedicated to the education and training of Emergency Medical Services (EMS) personnel through the Emergency Medical Services Learning Resources Center (EMSLRC).

## M.D. Student Training

Elective rotations for Doctor of Medicine students are available at University of Iowa Hospitals and Clinics and at several other sites throughout Iowa, including St. Luke's Hospital, Cedar Rapids; Great River Medical Center, Burlington; Covenant Medical Center, Waterloo; Broadlawns Medical Center, Des Moines; and Mercy Medical Center, Sioux City. Students also may arrange an off-service elective independently with established residency programs throughout the United States.

The program offers an annual introductory month to emergency medicine; advanced life support; and Wilderness Medicine, a rotation that includes a trip to wilderness areas such as the Death Valley and Mount Whitney areas of California.

## Residency Program

The emergency medicine faculty directs the Iowa Emergency Medicine Residency, Iowa's only emergency medicine residency. The residency is a three-year program that prepares residents for careers in diverse areas of emergency medicine, from rural practice to academics. The program emphasizes critical care training and rotations in a wide variety of specialties. Part of the clinical component is spent at St. Luke's Hospital, Cedar Rapids.

## Resources

The Emergency Treatment Center, located on the first floor of Roy Carver Pavilion, is a Level I Adult and Pediatric Trauma Center. It serves as a referral center for communities across Iowa.

## Emergency Medicine Courses

**184:220 Emergency Medicine: St. Luke's, Cedar Rapids** 4 s.h.

Preceptorship with full-time emergency department physicians; clinical shifts, case conferences, simulations, exams. Requirements: completion of M.D. third year.

**184:221 Emergency Medicine UIHC** arr.

Preceptorship with residents and faculty; emphasis on principles of acute medicine; clinical shifts, case conferences, simulations, exams. Requirements: completion of M.D. third year.

**184:222 Emergency Medicine off Campus** arr.

Preceptorship with residents and faculty; emphasis on principles of acute medicine. Requirements: completion of M.D. third year.

**184:223 Rural Emergency Medicine at Burlington, Iowa** 4 s.h.

In-depth clinical experience in a busy rural hospital emergency department under supervision of residency-trained emergency physicians; lectures, skill labs, projects. Requirements: completion of M.D. third year.

**184:224 Introduction to Advanced Life Support Skills** 4 s.h.

Experience managing acute threats to life, including trauma, respiratory failure, poisoning, sepsis, stupor/coma, and acute MI, using ACLS and PALS courses and clinical manikin work with EMS staff. Requirements: completion of M.D. third year.

**184:225 Wilderness Medicine** 4 s.h.

Didactic and scenario training in physiology, diagnosis, and emergency treatment of heat- and cold-related illnesses, high altitude disorders, wilderness trauma, envenomations, and immersion injuries. Taught in wilderness areas. Requirements: completion of M.D. third year.

**184:402 Emergency Medicine Des Moines**

4 s.h.

Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Broadlawns Hospital, Des Moines. Requirements: completion of M.D. third year.

**184:425 Emergency Medicine Waterloo**

4 s.h.

Participation in acute emergency care, management of acute illnesses, follow-up care when possible; Covenant Medical Center, Waterloo. Requirements: completion of M.D. third year.

**184:430 Emergency Medicine Sioux City**

4 s.h.

Experience with a routine cross section of emergency problems in a regional trauma center and with functions of area resource hospitals (St. Luke's Medical Center, Mercy Medical Center); option to accompany ambulance crews. Requirements: completion of M.D. third year and basic life support certification.

**184:998 Emergency Medicine on Campus**

arr.

Clinical research experience with a mentor in the Emergency Treatment Center and the Department of Emergency Medicine; principles of design, methodology, basic statistics.

## M.D. Student Training

The Department of Family Medicine trains primary care physicians. The department offers course work that is included throughout the four-year M.D. program. Twenty-one elective senior rotations give students opportunities for exposure to various Iowa communities through work in affiliated hospitals or connected facilities, in the department's model office on the University campus, and in preceptorships with selected family physicians throughout the state. There also is the opportunity for independent study during the fourth year.

## Residency Program

### Family Practice Residency

The Department of Family Medicine directs a three-year residency program whose graduates are eligible for certification by the American Board of Family Medicine. The residency program trains physicians to provide continuous and comprehensive medical care to patients and their families. Residents are educated in all areas of family medicine—adult medicine, maternal and child health, behavioral science, surgical specialties, and community medicine. Training emphasizes the value of wellness and preventive medicine as well as curative medicine.

The program is organized as a progressive educational experience. It consists of formal teaching and clinical experiences on assigned rotations, structured conferences, and patient care in the Family Care Center. As residents develop clinical skills, medical judgment, and competence, their patient responsibilities increase. Some patients at the Family Care Center are assigned to residents, who provide medical care under faculty supervision. Each resident is responsible for his or her patients for the duration of the residency program.

Residents also learn the principles of practice management, including organizational and administrative decision making, patient record and bookkeeping procedures, and chart auditing methodologies.

Residents are expected to take responsibility for their learning environment, to avail themselves of the department's diverse resources, and to collaborate with the faculty in order to have the best possible learning experience.

### Family Practice-Psychiatry Residency

The Department of Family Medicine and the Department of Psychiatry cosponsor the combined Family Practice-Psychiatry Residency Program. The program's residents acquire broad-based training in both disciplines, including focused training in geriatrics and geriatric psychiatry, substance and alcohol abuse, diagnosis and treatment of depression, delirium, eating disorders, panic disorders, and neurotic and somatizing behavior. Graduates are eligible for certification by the American Board of Family Medicine and the American Board of Psychiatry and Neurology.

## Facilities

The Department of Family Medicine is located on the University of Iowa health sciences campus. Faculty offices are close to the Family Care Center, where patients are seen by appointment. The department also has community-based

clinics in southeast Iowa City and North Liberty, Iowa, and a rural satellite office located in Lone Tree, Iowa.

## Family Medicine Courses

- 115:203 Medical Education Community Orientation** 0 s.h.  
Experience in a local health care delivery system away from the University setting, between first and second year of M.D. program.
- 115:300 Preceptorship in Family Medicine** arr.  
One-on-one experience with a practicing physician in his or her office; exposure to illnesses, conditions often seen in primary care; realistic background for evaluation of family medicine as a career alternative.
- 115:401 Family Medicine Clerkship, Broadlawns Hospital, Des Moines Family Health Center** 4 s.h.  
Clinical experience in inpatient and outpatient care.
- 115:403 Lone Tree Family Medicine Clerkship** 4 s.h.  
Experience providing patient care in a rural setting; continuity of care for patients of all ages. Requirements: fourth-year M.D. enrollment.
- 115:404 Advanced Preceptorship in Family Medicine** 4 s.h.  
Experience in community practice of family medicine.
- 115:405 Subinternship in Family Medicine, University of Iowa** arr.  
Inpatient aspects of family medicine's key components; experience on the family medicine inpatient service.
- 115:406 Subinternship in Family Medicine, Iowa Lutheran** 4 s.h.  
Patient-oriented interactive experience in an inpatient family practice environment. Requirements: fourth-year M.D. enrollment.
- 115:407 Family Medicine, Iowa Lutheran** arr.  
Requirements: fourth-year M.D. enrollment.
- 115:408 U of I Family Medicine Clerkship** 4 s.h.  
Work with family practice residents and staff in day-to-day delivery of primary medical care at Family Practice Center; experience in the Family Stress Clinic observing family-centered counseling; nursing home visits, work with departmental social worker and sports medicine specialist.
- 115:409 Family Medicine, Mason City** 4 s.h.  
Work with family physicians on staff at Mercy or other affiliated community hospitals; management of all patients admitted by the family physicians, participation in care rendered by consultants; primary care experience in family practice office.
- 115:410 Independent Studies** arr.  
Work with departmental researcher on investigation in family medicine, community medicine, health care delivery, health maintenance, and other areas.
- 115:411 Rural Preceptorship in Family Medicine** 4 s.h.
- 115:415 Subinternship in Family Medicine--Cedar Rapids** 4 s.h.  
Experience as a junior resident in all areas of inpatient family medicine, including maternity care, child and adolescent health, adult medicine.
- 115:416 Clerkship in Family Medicine--Cedar Rapids** 4 s.h.  
Experience as a junior resident in all areas of family medicine, including maternity care, child and adolescent health, adult medicine.
- 115:417 Continuity of Care - Family Medicine** 4 s.h.  
Longitudinal continuity of care experience for fourth-year M.D. students in an outpatient family medicine setting.

- 115:419 Family Medicine Clerkship, Davenport** 4 s.h.  
Assignment to problems commonly seen in family practice office; supervision by residents and faculty for history and physical evaluation and diagnostic workups and treatment of each specific problem; exposure to acutely ill patients in services of medicine, surgery, obstetrics, pediatrics.
- 115:420 Family Medicine Clerkship, Sioux City** 4 s.h.  
Methods common in family practice medicine; participation in care of patients seen by family practice physicians and residents.
- 115:423 Subinternship in Family Medicine, Waterloo** 4 s.h.  
Experience working as a member of family practice inpatient team at Allen Memorial Hospital and Covenant Medical Center, following patients from admission through discharge.
- 115:424 Family Medicine Clerkship, Waterloo** 4 s.h.  
Rotation at the Northeast Iowa Family Practice Center; work with patients from outpatient care through hospitalization; basic concepts of family practice, team concept in medical care.
- 115:426 Geriatrics Elective** arr.  
Experience in monitoring and evaluating health and functional status of patients age 65 and older in the UI Geriatric Assessment Clinic and community settings. Same as 078:800.
- 115:427 FM Geriatrics Davenport** 4 s.h.  
Geriatric, palliative, and end-of-life care issues; assessment of competency in evaluation and management of patients; interdisciplinary nature of geriatric and palliative care.
- 115:429 Subinternship in Family Practice, Sioux City** 4 s.h.  
Experience as a junior resident in all areas of family medicine. Requirements: fourth-year M.D. enrollment.
- 115:430 Subinternship in Family Medicine, Davenport** 4 s.h.  
Experience in inpatient family medicine; assessing and managing hospitalized patients, evaluating and treating patients in the emergency room, participating in call coverage with family medicine residents.
- 115:431 Primary Care Sports Medicine** 4 s.h.  
Comprehensive, diverse, and educational experience in the field of sports medicine; clinical competence to diagnose and manage medical illnesses and injuries related to sports and exercise in varied patients, recreational and organized athletes, and teams. Requirements: medical student.
- 115:999 Family Medicine off Campus** arr.  
Clerkships; may include community hospitals.

**Professors:** John Buatti, Garry R. Buettner, Joseph Cullen, Frederick E. Domann Jr., John F. Engelhardt, Gerry Funk, Michael Graham, Richard Hichwa, Henry T. Hoffman, Kevin C. Kregel, Larry W. Robertson, Milan Sonka, Douglas R. Spitz, Timothy Tewson

**Professors emeriti:** Frank Hsieh-Fu Cheng, James W. Osborne

**Associate professors:** Kyle E. Brown, Brent Carter, Gary E. Christensen, Prabhat C. Goswami, Aloysius J. Klingelutz, Michael Knudson, Francis J. Miller, Aliye Uc

**Assistant professors:** Paloma Giangrande, Apollina Goel, Fiorenza Ianzini, Yusuf Menda, Xiaodong Wu

**Adjunct assistant professors:** Nukhet Aykin-Burns, Andrian L. Burnett, Melissa Fath, Michael L. McCormick, Michael Schultz, Damon C. Shutt, Melissa Laitee Teoh

**Graduate degrees:** M.S., Ph.D. in Free Radical and Radiation Biology

**Web site:** <http://www.uiowa.edu/~frrbp/>

The Free Radical and Radiation Biology Program provides in-depth training and research experience in the physical, chemical, and biological effects of radiation. It also focuses on free radical biology. Free radicals, which are generated in great number by radiation, play a major role in the interaction of radiation with biological systems. Free radicals are of great interest to basic researchers and clinicians because of their role in a variety of diseases and pathological states, including aging and cancer. The program stresses the importance of all of these areas to scientific research, clinical medicine, and public health.

## Undergraduate Education

Three courses, 077:103 Radiation Biology, and 077:107 Special Topics: Advanced Undergraduates and 077:108 Special Topics: Advanced Undergraduates, are open to University of Iowa undergraduates. Students who want an overview of the biological effects of radiation, including the role of free radicals, will find 077:103 Radiation Biology especially appropriate. All three courses are appropriate for students who plan to enter medicine, nuclear medicine technology, environmental health, or related programs.

## Graduate Programs

The Carver College of Medicine administers graduate programs in free radical and radiation biology; graduate degrees are granted through the Graduate College. See Carver College of Medicine and Graduate College in the Catalog for general information about study in medicine and graduate study at the University.

The Master of Science requires a minimum of 30 s.h. of graduate credit; the Doctor of Philosophy requires a minimum of 72 s.h. of graduate credit.

The M.S. and Ph.D. programs in free radical and radiation biology are open to graduate students with a background in physics, chemistry, mathematics, biology, health sciences, veterinary medicine, or engineering.

After completing the introductory course 077:103 Radiation Biology, students typically concentrate on a particular aspect of the field. Some students elect to focus on radiation biology, while others choose to emphasize free radical biology.

In addition to formal lectures and some structured laboratory exercises, plans of study for free radical and radiation biology students involve small-group conferences, discussions, and seminars. Students are encouraged to spend at least one semester as a teaching assistant, for which no registration is required and no academic credit is given.

Many of the department's graduate students elect to take 074:220 Radiation Safety and Radiobiology, a Department of Radiology course that covers safe operation of radiation-producing equipment and handling of radioactive materials, regulations and regulatory agencies, formulas and techniques in radiation protection programs, radiation protection, and other topics.

## Postgraduate Training

Postdoctoral training is available by arrangement with the program's director and individual faculty members. Contact the Free Radical and Radiation Biology Program.

## Financial Support

Graduate students are supported as graduate assistants from funds available through research grants and contracts or from departmental funds. Individual postdoctoral awards also may be available; the candidate and his or her faculty sponsor apply for them jointly.

## Facilities

The Free Radical and Radiation Biology Program has a 300 kVp orthovoltage X-ray generator and other radiation

sources, including a kilo-Curie Cs-137 irradiator. Students and staff also have access to other radiation sources, such as the Co-60 gamma source and linear accelerators in the Department of Radiation Oncology.

The program has a number of radiation detectors and counters, including liquid scintillation counters. It also has ultraviolet/visible spectrophotometers; various types of equipment for densitometry, chromatography, and electrophoresis; molecular biology equipment, including thermal cyclers; an automatic cell counter and particle sizer; tissue culture facilities; Typhoon Phosphoimager; HPLC; Electron Spin Resonance Spectrometers; and nitric oxide analyzers.

Internal medicine is concerned with the diagnosis, prevention, and treatment of diseases of adults. The Department of Internal Medicine's educational, patient care, and research activities cover all facets of the discipline, including general internal medicine and primary care as well as the specialized areas of allergy and immunology, cardiology, clinical pharmacology, endocrinology and metabolism, gastroenterology and hepatology, hematology, oncology, blood and marrow transplant, infectious diseases, nephrology, pulmonary, critical care, occupational medicine, and rheumatology.

The department is committed to the complete spectrum of medical education, from didactic and clinical education of M.D. students to resident and fellowship training.

## M.D. Student Training

Department of Internal Medicine faculty members bear a major share of teaching first- and second-year M.D. students. In the first year, faculty members participate in 050:120 Medical Cell Biology, 050:240 Human Organ Systems, and 148:251 Principles of Medical Immunology. In the second year, they participate in 071:105 Pharmacology for Health Sciences: Medical and 061:103 Principles of Infectious Diseases. They are key participants in 050:162 Foundations of Clinical Practice I, 050:163 Foundations of Clinical Practice II, 050:164 Foundations of Clinical Practice III, and 050:165 Foundations of Clinical Practice IV ICD.

In the third year, the department's faculty members teach students for six focus weeks in 078:101 Inpatient Internal Medicine and for four weeks in 078:102 Outpatient Internal Medicine at University of Iowa Hospitals and Clinics, the Iowa City Veterans Affairs Medical Center, or hospitals of the Des Moines Area Medical Education Consortium. M.D.

students actively participate as members of an inpatient ward team in 078:101 Inpatient Internal Medicine and in the evaluation and management of patients at outpatient internal medicine clinics in 078:102 Outpatient Internal Medicine.

In the fourth year, M.D. students may select a clinical experience to fit their own career goals from courses offered in general medicine, subspecialties, intensive care, and a subinternship program.

## Residency Program, Postgraduate Work

The department offers a three-year residency training program in internal medicine. In addition, most of the department's specialty divisions offer two- and three-year clinical and research fellowships, in which fellows develop special knowledge and skills relevant to their specialties. Fellows who hold doctoral degrees may be accepted to programs whose major focus is laboratory research.

## Facilities

Teaching takes place in the medical services and laboratories of University of Iowa Hospitals and Clinics and the Iowa City Veterans Affairs Medical Center, and in Des Moines at the Veterans Affairs Central Iowa Health Care System and Iowa Methodist Medical Center.

## Internal Medicine Courses

- |  |          |
|--|----------|
| <b>078:101 Inpatient Internal Medicine</b>   | arr.     |
| Development of knowledge, diagnostic and management skills vital to care of hospitalized patients; clinical responsibilities, educational conferences, independent study.  |          |
| <b>078:102 Outpatient Internal Medicine</b>  | 3-4 s.h. |
| Development of knowledge, diagnostic and management skills in the outpatient clinical setting; clinical activities, discussion of problems, independent study.   |          |
| <b>078:199 Learning About Living From the Dying</b>  | 1 s.h.   |
| Hospice training, monthly classes, experience volunteering in the community; focus on writing for self-reflection or publication.  |          |
| <b>078:202 Subinternship in Internal Medicine</b>  | 4 s.h.   |
| Student responsibility for evaluating, treating, and following patients admitted to inpatient general medicine services. Requirements: fourth-year medical student standing.   |          |
| <b>078:204 Community-Based General Internal Medicine</b>   | 4 s.h.   |
| Primary care internal medicine in a community setting. Requirements: fourth-year medical student standing.   |          |
| <b>078:205 Continuity of Care in Outpatient Internal Medicine</b>  | 4 s.h.   |
| Experience with longitudinal continuity of care for patients in the outpatient setting; clinical and didactic exposure to broad spectrum of general internal medicine problems. Requirements: fourth-year M.D. enrollment. |          |
| <b>078:210 Alternative and Complementary Medicine</b>  | arr.     |

| <b>078:217 Integrated Topics in Infectious Diseases</b>  | 4 s.h.   |
| Questions in host-parasite interactions; monthly case study followed by journals club discussions.   |          |
| <b>078:218 Critical Care Rotation, IMMC, ICU, DM</b>   | 4 s.h.   |
| Subinternship on medical critical care team, with daily rounds, teaching. Requirements: fourth-year M.D. enrollment.   |          |
| <b>078:219 Subinternship in Internal Medicine at VAMC, Des Moines</b>  | arr.     |
| Rotation at the Veterans Affairs Central Iowa Health Care System; subinternship on general internal medicine ward. Requirements: fourth-year M.D. enrollment.  |          |
| <b>078:220 Subinternship in General Internal Medicine and ICU, Des Moines</b>  | arr.     |

Four-week rotation at Des Moines Medical Education Consortium; experience as a subintern in general internal medicine and the ICU. Requirements: fourth-year M.D. enrollment.

**078:221 Public Health Medicine**

arr.

Participation in ongoing projects related to public health issues of acute disease; training and career opportunities in public health practice.

**078:225 General Medicine Consult Service, IMMC**

arr.

Principles of consultative medicine provided by general internists to non-internal medicine patients; how to assess perioperative risk for patients evaluated before surgery.

**078:250 Clinical Allergy Immunology**

arr.

Pathogenesis, diagnosis, and management of asthma and allergic and immunologic diseases; conducting and interpreting relevant specialized clinical and laboratory tests; emphasis on outpatients; formal and informal teaching sessions.

**078:290 Research in Allergy Immunology**

arr.

Faculty-directed investigations for students interested in complement, peptides, molecular biology studies, molecular biology of C1 inhibitor and properdin, primary immunodeficiency diseases, tumor immunology, immune parameter of alcohol-related diseases, transplantation immunology.

**078:300 Clinical Cardiology**

arr.

Development of breadth and depth in diagnostic and therapeutic problems encountered in clinical cardiology; participation in evaluation and decisions regarding patients seen sometimes in the cardiovascular clinic, inpatient cardiology wards, and electrophysiology service.

**078:304 Electrocardiography**

arr.

Scalar electrocardiography with option of viewing exercise studies including treadmill testing; initial interpretation of current tracings and daily staff conferences.

**078:325 Clinical Cardiology Coronary Care Experience, Iowa Methodist, Des Moines**

arr.

**078:333 Internal Medicine ICU off Campus**

arr.

Experience as subintern in the ICU/MICU; daily rounds and teaching with medical critical care staff.

**078:400 Clinical Endocrinology**

arr.

New patient evaluation, inpatient referral; returning patients in diabetes, endocrine clinics; complete patient evaluations, charts; participation in clinical conferences.

**078:440 Endocrine Research**

arr.

Participation in all organized educational division activities, suitable clinical activities; work in research laboratory of senior staff member, participation in ongoing project.

**078:450 Clinical Gastroenterology**

arr.

Work in consultation service at University Hospitals and Clinics or Veterans Affairs Iowa City Health Care System; assistance in diagnostic procedures for patients examined as part of consultation service; participation in patient follow-up through weekly return clinic.

**078:490 Research in Gastroenterology**

arr.

**078:501 Hematology Oncology**

arr.

Diagnostic skills in hematology and oncology.

**078:503 Palliative Care**

4 s.h.

**078:550 Clinical Infectious Disease**

arr.

Diagnosis, treatment, follow-up, study of patients with infectious diseases, under staff guidance; techniques of diagnostic microbiology; participation in conferences, teaching activities.

**078:590 Research in Infectious Disease**

arr.

Projects in molecular pathogenesis of infectious diseases and/or cell biology of host defense mechanisms; additional projects in application of hospital epidemiology techniques to clinical aspects of infectious diseases.

**078:600 Pulmonary Disease**

arr.

Breadth, depth in diagnostic, therapeutic problems encountered in clinical pulmonary disease; evaluation of outpatients and inpatients under staff supervision; interpretation of special studies carried out in pulmonary function laboratory, fiber-optic bronchoscopy and brush biopsy of lung; exposure to diagnosis and management of acute respiratory failure in intensive care units at University of Iowa Hospitals and Clinics, Veterans Affairs Iowa City Health Care System.

**078:601 Research in Pulmonary Disease**

arr.

Faculty-directed investigations; clinical pulmonary physiology, biopsy procedures in lung disease, pulmonary pathology, metabolic behavior of mycobacterium tuberculosis, clinical pharmacology.

**078:602 Medical Intensive Care Unit**

arr.

**078:650 Nephrology**

arr.

Evaluation of patients from University of Iowa Hospitals and Clinics inpatient service, Veterans Affairs Iowa City Health Care System, clinics; emphasis on early kidney disease, all varieties of hypertension.

**078:652 Clinical Nephrology, Iowa Methodist, Des Moines**

4 s.h.

Exposure to common nephrology problems, including acute renal failure, chronic renal failure, acid-base disorders, common electrolyte disorders.

**078:653 Adult and Pediatric Nephrology and Hypertension**

arr.

Requirements: (for 070:653) fourth-year M.D. enrollment. Same as 070:653.

**078:662 Medical and Pediatric Endocrinology**

arr.

Requirements: (for 070:662) fourth-year M.D. enrollment. Same as 070:662.

**078:690 Research in Renal, Hypertension, and Electrolyte Disorders**

arr.

Laboratory investigation of renal physiology; participation in ongoing research involving large and small animals, using classical clearance methodology for studying aspects of sodium metabolism, influence of drugs. Requirements: fourth-year M.D. enrollment.

**078:700 Clinical Rheumatology**

arr.

Clinical features of rheumatic diseases, their differential diagnosis, principles of management; patients from arthritis clinic, inpatient consultation service of University of Iowa Hospitals and Clinics, Veterans Affairs Iowa City Health Care System.

**078:800 Geriatrics Elective**

arr.

Experience in monitoring and evaluating health and functional status of patients age 65 and older in the UI Geriatric Assessment Clinic and community settings. Same as 115:426.

**078:998 Internal Medicine on Campus**

arr.

**078:999 Internal Medicine off Campus**

## Medical Education Program

**Director:** Kristi J. Ferguson

**Affiliated faculty:** Rick Axelson (Family Medicine), Kristi J. Ferguson (Internal Medicine/Community and Behavioral Health), Clarence Kreiter (Family Medicine), Jeff Pettit (OCRME), Marcy Rosenbaum (Family Medicine)

**Graduate degree:** M.M.E.

**Graduate nondegree program:** Certificate in Medical Education

**Web site:** <http://www.healthcare.uiowa.edu/ocrme/masters/programoverview.htm>

The Medical Education Program is dedicated to providing medical faculty members with formal training in medical education. The program is coordinated through the Office of Consultation and Research in Medical Education.

## Graduate Program

The program offers the Master in Medical Education and the graduate Certificate in Medical Education.

### Master in Medical Education

The Master in Medical Education requires a minimum of 30 s.h. of graduate credit. The program is designed to prepare medical faculty members to educate health professionals. It offers an opportunity to specialize in theory and practice of curriculum design, effective teaching, assessment, and other aspects of medical education.

Graduates of the program should be able to:

- design evidence-based education programs and materials with appropriate scope, sequence, and focus for intended learners;
- deliver effective instruction to individuals and small or large groups in classroom, laboratory, or clinical settings;
- evaluate the effectiveness of educational instruction, using formative and summative methods;
- understand basic principles of educational measurement and be able to apply them to medical education;
- use assessments to promote learning and to assess learning progress and status; and
- understand basic principles of, and be able to interpret and use, educational research.

The M.M.E. may be completed in as few as two years or as many as five. Students may begin the program in fall semester, spring semester, or summer session. Some of the required courses are offered online, and required on-campus courses have evening meeting times.

The curriculum includes 24 s.h. of required courses and 6-9 s.h. of electives. Students must register for at least one course each academic year in order to maintain satisfactory progress toward the degree. The program's faculty provides substantial student advising and consultation.

During their first semester, students file a plan of study. Each student's plan must include a description of the student's goals, intended graduation date, and a list of courses the student plans to take each semester he or she is working toward the degree. The study plan must incorporate all of the courses required for the degree and must include any requests for transfer credit. The plan must be approved by the director of the M.M.E. program and by the student's advisor. Subsequent revisions of the plan must have the advisor's approval.

The Master in Medical Education requires the following course work.

050:701 Instructional Design and Technology	3 s.h.
050:702 Clinical Teaching in Medical Education	3 s.h.
050:703 Educational Research and Evaluation	3 s.h.
050:711 Teaching Methods in Medical Education	3 s.h.
050:712 Introduction to Educational Measurement in Medical Education	3 s.h.
050:713 Assessment in Medical Education	3 s.h.
050:714 Current Issues in Medical Education	3 s.h.
050:720 Portfolio Project	3 s.h.
Electives	6-9 s.h.

Students who do not do clinical teaching may substitute another course for 050:702 Clinical Teaching in Medical Education.

Students must have completed at least 18 s.h. before enrolling in 050:720 Portfolio Project. In the portfolio, students integrate the materials they have developed over the course of the program into a document. Three faculty members review the project and evaluate the student's participation in the program.

Electives require approval of the student's advisor. They may include courses in the M.M.E. program as well as those offered by relevant departments and programs (e.g., College of Education, Tippie College of Business). Graduate-level courses are numbered 100 or above.

For application requirements, see "Admission" below.

## **Certificate in Medical Education**

The Certificate in Medical Education requires a minimum of 12 s.h. of graduate credit. The certificate program is designed to help participants find new ways to enhance their scholarship and skills in teaching, curriculum design, and education assessment. It is intended for Carver College of Medicine faculty and professional staff as well as for University of Iowa resident physicians and fellows.

Required course work for the certificate is taken from the Master of Medical Education program. Individuals who complete the certificate and then decide they would like to earn the master's degree may apply their certificate course work toward the M.M.E.

The Certificate in Medical Education requires the following course work.

Methods—one of these:

050:701 Instructional Design and Technology	3 s.h.
050:702 Clinical Teaching in Medical Education	3 s.h.
050:711 Teaching Methods in Medical Education	3 s.h.

Research and measurement—one of these:

050:703 Educational Research and Evaluation	3 s.h.
050:712 Introduction to Educational Measurement in Medical Education	3 s.h.

And:

Additional courses chosen from M.M.E. requirements	6 s.h.
--	--------

For application requirements, see "Admission" below.

## **Admission**

Application requirements are the same for the M.M.E. degree and the certificate program. Applicants should hold an M.D. degree and must have performed satisfactorily on the Medical College Admission Test (MCAT). Basic sciences applicants without an M.D. must hold an equivalent degree and must have performed satisfactorily on an admission test equivalent to the MCAT.

Applicants whose first language is not English and who do not hold a baccalaureate or advanced degree from an accredited university in the United States, English-speaking Africa, Australia, Canada (except Quebec), New Zealand, or the United Kingdom must submit scores on the Test of English as a Foreign Language (TOEFL).

Application materials must include an official transcript showing medical course work and medical degree, or equivalent for basic sciences applicants (current and former University of Iowa students do not need to request a UI transcript or transcripts previously submitted to the University); a letter of reference from the applicant's department head and one additional letter of reference; and a 300-500 word essay describing the applicant's interest in medical education and in the Master in Medical Education program or the Certificate in Medical Education program.

Application forms for each program are available on the Medical Education Program web site; apply to the M.M.E. or apply to the Certificate in Medical Education. Application materials should be submitted to the University of Iowa Office of Admissions.

Application deadlines are July 15 for fall semester entry, November 15 for spring semester entry, and April 15 for summer session entry.

# Medical Scientist Training Program

**Codirectors:** C. Michael Knudson (Pathology), Michael Welsh (Internal Medicine)

## Professional/Graduate Program

The Iowa Medical Scientist Training Program (MSTP) offers a joint Doctor of Medicine/Doctor of Philosophy. The program prepares trainees for careers in academic medicine, with emphasis on basic and clinical research.

### Joint M.D./Ph.D.

The joint Doctor of Medicine/Doctor of Philosophy normally requires seven to eight years of continuous study. It provides an effective and efficient means to integrate graduate and clinical training, combining the scientific approach with clinical medicine.

In the first two years of the program, trainees enroll in the basic science and introductory clinical portions of the Carver College of Medicine Doctor of Medicine curriculum. This provides a broad exposure to the language and organizing concepts that form the foundation for a career as a physician scientist. Trainees begin the research component of the graduate phase of the program during the first two years as well, through summer laboratory rotations, enrollment in 050:213 Analyzing and Presenting Medical Research, research presentations by MSTP faculty and students, and a student-sponsored seminar series. They also attend MSTP grand rounds, a forum for patient-based discussions that emphasizes how science and medicine intersect.

The first-year curriculum addresses normal structure and function of human organ systems and emphasizes relationships among different disciplines. During the first semester, trainees take courses in biochemistry, gross anatomy, cell biology, and medical genetics. The second semester presents an integrated systemic core, which incorporates physiology, histology, and embryology and focuses on the development, structure, and function of human organ systems. Discipline-specific basic science instruction continues through the second semester with medical neuroscience and immunology courses.

The second-year curriculum emphasizes abnormal structure and function of human organ systems. Trainees take courses in pathology, microbiology, and pharmacology.

Throughout the first two years of study, students receive instruction in the foundations of clinical practice, including patient experience in medical history taking and physical examination. At the end of the second year, all trainees take Step 1 of the U.S. Medical Licensing Exam and then complete the basic core clinical clerkship in internal medicine. They gain broad exposure to the spectrum of human disease and experience with direct patient care before they enter the graduate phase of training.

At the beginning of the third year, trainees enroll in a graduate department or interdisciplinary graduate program.

The focus of the graduate years of study is engagement in academic and research experiences that promote the trainees' development into independent investigators. Clinical contact is maintained during this phase of training through participation in seminar programs, MSTP grand rounds, and 050:212 MSTP Clinical Connections, a course that provides the opportunity for mentored clinical experiences.

Upon completing the Ph.D. dissertation, trainees return to the Carver College of Medicine curriculum to complete the clinical clerkship requirements for the joint M.D./Ph.D. program. During this phase, trainees bring a sophistication in the scientific approach to problem solving that they apply to human disease. They renew and develop clinical skills acquired in their early training and reinforce their understanding of the scientific basis of disease through continued participation in MSTP grand rounds. Upon completion of the clinical curriculum, trainees are awarded the M.D. and Ph.D.

Most graduates of the program elect to enter residency programs in clinical medicine and embark on careers as medical school faculty members in clinical disciplines with opportunities for basic and applied research. Other graduates accept academic appointments in basic science departments and spend a major part of their professional activity in biomedical research and teaching.

### Admission

Applicants must meet requirements for admission to the M.D. program in the Carver College of Medicine; see "Admission to the M.D. Program" under Doctor of Medicine in the Catalog. They also must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants should have completed requirements for a bachelor's degree at an accredited academic institution. In

addition to outstanding academic credentials, including strength in biological, physical, and mathematical sciences, they must demonstrate aptitude for and commitment to scientific research through productive research experience during their undergraduate years or after. Admission normally is made for entry to the first year of the program, but applicants already enrolled in the Carver College of Medicine may request admission with advanced standing.

### **Application**

The Carver College of Medicine participates in the American Medical College Application Service (AMCAS). Program applicants should select M.D./Ph.D. Program-Type on their AMCAS application and instruct AMCAS to forward their credentials to the Carver College of Medicine (IA131). Applications should be submitted as early as possible to allow careful review by the admissions committees of the Medical Scientist Training Program and the Carver College of Medicine.

All candidates must take the Medical College Admission Test (MCAT), according to Carver College of Medicine requirements. The Graduate Record Exam (GRE) is not required for admission.

Application to the Graduate College is not required before acceptance to the MSTP. Trainees admitted to the program receive assistance with Graduate College enrollment.

### **Financial Support**

Trainees receive stipend and full tuition support from a National Institutes of Health MSTP training grant to The University of Iowa, supplemented by other institutional and individual awards. Students in the graduate phase of training receive support from their graduate departments or interdisciplinary programs, and their research advisors. The program office also helps selected trainees apply for competitive national awards for outstanding academic and research achievement.

## **Medical Scientist Training Program Courses**

### **050:211 MSTP Research**

arr.

Research experience. Requirements: Medical Scientist Training Program enrollment.

### **050:212 MSTP Clinical Connections**

arr.

Experience with physician-scientist preceptor in medical interviewing, physical examination, patient presentation through direct patient interaction. Requirements: Medical Scientist Training Program graduate phase enrollment.

### **050:213 Analyzing and Presenting Medical Research**

1 s.h.

How to read, interpret, and present medical and scientific literature; students read and present representative papers from scientific and medical literature.

Study in the Department of Microbiology is dedicated to the branch of biological sciences that deals with the smallest living things: bacteria, archaea, fungi, algae, protozoa, and viruses. It is coupled with immunology, the study of the response of higher organisms to foreign substances.

Microbiology and immunology are at the forefront of the modern biological revolution. Microbes are often the experimental subjects of choice for examining basic genetic and biological phenomena because of their small size, rapid growth rate, and relative simplicity. A significant portion of contemporary biochemical research employs microbiological and immunological methods.

Current research is making theoretical and practical advances concerning microbial species and viruses that infect animals, including man, plants, and other microbes; the use of comparative genomics, gene expression profiling, and recombinant DNA methods to analyze basic biological processes and generate valuable products; the nature and occurrence of microbial life in extreme or unusual environments; microbial synthesis and modification of antibiotics and other natural products; the role of microbes in stabilization of the biosphere by recycling and detoxifying waste products; the genetics and regulation of metabolic processes; and the genetics and regulation of the immune response, including characterization of mechanisms used by bacteria to signal one another and characterization of interactions between different types of immune cells and their targets.

The Department of Microbiology offers degree programs for undergraduates and for graduate students and administers the academic curriculum at both levels. The College of Liberal Arts and Sciences grants undergraduate degrees in microbiology and oversees undergraduate academic policy relating to the student record. The Graduate College grants graduate degrees in microbiology.

## Undergraduate Program

The Department of Microbiology offers a Bachelor of Science and a minor in microbiology.

Microbiology is an excellent major for undergraduate students who want a good general education with emphasis on an important and interesting branch of biological sciences. Graduates find employment opportunities in government, hospitals, public health laboratories, research laboratories, and industrial laboratories (food, dairy, chemical, pharmaceutical, and genetic engineering companies). Those who pursue advanced degrees have more advanced career opportunities in these same areas as well as in college and university teaching.

### Bachelor of Science

The Bachelor of Science in microbiology requires a minimum of 120 s.h., including 64 s.h. of work for the major (21 s.h. in microbiology and 43 s.h. in supporting course work). Students also must complete the College of Liberal Arts and Sciences General Education Program.

The required 21 sh. of microbiology must include at least 12 s.h. earned in University of Iowa courses numbered 061:147 Survey of Immunology and above, except 061:164 Nursing Microbiology; students may count 061:218 Microscopy for Biomedical Research toward the requirement but not 061:220 Advanced Microscopy Biomedical Research. No more than 2 s.h. of 061:161 Undergraduate Research in Microbiology (or 061:171 Honors Undergraduate Research in Microbiology for honors students) and no more than 2 s.h. of 061:163 Seminar: Microbiology may be counted toward the requirement. In order to take microbiology courses more advanced than 061:157 General Microbiology, students must earn a grade of C or higher in 061:157 General Microbiology. The supporting science and mathematics course work required for the major may not be taken pass/nonpass.

Students must include 061:163 Seminar: Microbiology (2 s.h.) in the required 21 s.h. of microbiology; they must take the course for credit once during their last two semesters before graduation, but they are encouraged to take it for 0 s.h. during other semesters, once they have completed 061:157 General Microbiology.

In addition to the required 21 s.h. of microbiology, the major requires supporting course work as follows.

002:010-002:011 Principles of Biology I-II	8 s.h.
004:011-004:012 Principles of Chemistry I-II	8 s.h.
004:121-004:122 Organic Chemistry I-II	6 s.h.
004:141 Organic Chemistry Laboratory	3 s.h.
029:011-029:012 College Physics I-II	8 s.h.
099:120 Biochemistry and Molecular Biology I	3 s.h.
099:130 Biochemistry and Molecular Biology II	3 s.h.

One of these:

22M:016 Calculus for the Biological Sciences	4 s.h.
22M:025 Calculus I	4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus	4 s.h.

In addition, the following courses may be recommended for some students.

08N:080 Nonfiction Writing	3 s.h.
171:161 Introduction to Biostatistics (some medical schools require a biostatistics course for admission)	3 s.h.

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Before the third semester begins:** 002:010 Principles of Biology I; 004:011 Principles of Chemistry I, and 004:012 Principles of Chemistry II; an approved calculus class; and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 002:011 Principles of Biology II; 004:121 Organic Chemistry I, 004:122 Organic Chemistry II, and 004:141 Organic Chemistry Laboratory; 061:157 General Microbiology; and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** five more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** another 10-12 s.h. of course work

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining required General Education courses, and a sufficient number of semester hours to graduate

## Honors

Microbiology majors who are members of the University of Iowa Honors Program may enroll in the honors program in microbiology. Membership in the University Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33. Microbiology honors students also must maintain a g.p.a. of at least 3.33 in microbiology courses. The program requires 25 s.h. of course work in microbiology, including 6 s.h. in 061:171 Honors Undergraduate Research in Microbiology, which introduces students to experimental research. At the end of the research, students present written and oral reports. Students who successfully complete these requirements receive the B.S. with honors.

## Minor

The minor in microbiology requires a minimum of 15 s.h. in microbiology courses, including 12 s.h. in advanced courses taken at The University of Iowa. For the minor, courses numbered 061:147 Survey of Immunology and above, except 061:164 Nursing Microbiology, are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Students may count a maximum of 2 s.h. earned in 061:161 Undergraduate Research in Microbiology or 061:171 Honors Undergraduate Research in Microbiology, and 2 s.h. earned in 061:163 Seminar: Microbiology, toward the minor. They also may count 061:218 Microscopy for Biomedical Research, but not 061:220 Advanced Microscopy Biomedical Research.

## Graduate Programs

The Department of Microbiology offers a Master of Science and a Doctor of Philosophy in microbiology. Graduate study in the department is designed to help students become highly qualified in microbiology research and teaching.

Admitted graduate students usually pursue the Ph.D.

Graduate study is offered in six subdisciplines: pathogenic bacteriology, microbial genetics, immunology, microbial physiology, animal virology, and bioinformatics. Several areas involve interdisciplinary training both within and outside the department, so students gain broad experience during their course of study. Students also may pursue interdisciplinary Ph.D. programs in genetics, immunology, and molecular and cellular biology.

During their first year, students rotate in three laboratories of their choice and are advised by the Graduate Student Advisory Committee. At the end of the first year, they choose a research supervisor who chairs their advisory committee. The committee provides intellectual and research guidance for the student's training.

The Department of Microbiology cooperates with other University of Iowa departments to give students ample access to diverse course offerings, seminars, and research programs. For example, microbiology students may participate in courses and seminars in immunology, genetics, molecular and cellular biology, biocatalysis/biotechnology, and electron microscopy.

All students admitted to advanced degree programs are expected to assist in departmental teaching.

## Master of Science

The Master of Science in microbiology requires a minimum of 30 s.h. of graduate credit. M.S. students are required to earn a minimum of 12 s.h. in microbiology courses chosen from three of the department's six subdisciplines. They may substitute a course they have already taken (at The University of Iowa or elsewhere) for a course requirement, with the M.S. advisory committee's approval. Additional course requirements depend on students' interests and the advice of the examining committee.

Students must write a thesis based on their own research and defend it satisfactorily in an oral examination. No more than 9 s.h. of credit for thesis research may be counted toward the 30 s.h. required for the Master of Science.

## Doctor of Philosophy

The Doctor of Philosophy in microbiology requires a minimum of 72 s.h. of graduate credit. Ph.D. students are required to earn a minimum of 15 s.h. of credit in graduate-level microbiology courses. They may substitute a course they have already taken (at The University of Iowa or elsewhere) for a course requirement, with the Ph.D. advisory committee's approval.

Students must pass a comprehensive examination before their sixth semester in the program and write a thesis based on their own research. The thesis must be defended satisfactorily in an oral examination.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They should have a cumulative g.p.a. of at least 3.00 and must have completed courses in biology, chemistry (inorganic and organic), mathematics including calculus, and physics. Those admitted with deficiencies must complete the relevant course work during their first year of graduate study. Admission is determined through a review and formal vote by the faculty. Preference is given to students applying for the Ph.D. program.

## Facilities

The Department of Microbiology is situated on the University of Iowa health sciences campus, where it shares the Bowen Science Building with the Departments of Anatomy and Cell Biology, Biochemistry, Molecular Physiology and Biophysics, and Pharmacology. Laboratory space and modern equipment are available for teaching and research.

## Microbiology Courses

- |   |        |
|---|--------|
| <b>061:005 Microbes and Our World</b>   | 2 s.h. |
| Bacteria, viruses, and parasites and their role in shaping human health, industry, current affairs, history.  |        |
| <b>061:015 Web-Based Microbes and Our World</b>   | 2 s.h. |
| Bacteria, viruses, and other microorganisms; ways in which microbes affect our health, economy, and environment; how humans have harnessed microbial growth; how microbes have shaped human experience and continue to play key roles in modern life. |        |
| <b>061:103 Principles of Infectious Diseases</b>  | 5 s.h. |

Principles and methods essential to study of microorganisms, their isolation and identification; microorganisms in infectious diseases; current immunology concepts. Requirements: M.D. enrollment.

**061:104 Principles Infectious Diseases--Physician Assistant** 5 s.h.

Principles and methods essential to study of microorganisms, their isolation and identification; microorganisms in infectious diseases; current immunology concepts. Requirements: Physician Assistant Program enrollment.

**061:112 Pharmacy Microbiology** 4 s.h.

Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Requirements: pre-pharmacy standing.

**061:113 Dental Microbiology** 3 s.h.

Medical microbiology: bacteriology, immunology, pathogenic bacteriology, virology, mycology, parasitology. Requirements: D.D.S. enrollment.

**061:147 Survey of Immunology** 4 s.h.

Major features of the evolutionary, ontogenic, and comparative development of innate and adaptive immune systems and their functions at the cellular and molecular levels. Prerequisites: 002:010 and 002:011.

**061:157 General Microbiology** 5 s.h.

Principles of microbial diversity, microbial genetics, physiology and metabolism, pathogenic microbiology, virology, immunology, industrial and environmental microbiology; laboratory emphasis on basic techniques. Prerequisites: 002:010 and 002:011. Corequisites: 004:121.

**061:159 Pathogenic Bacteriology** 5 s.h.

Pathogenic bacteria, with emphasis on mechanisms of pathogenicity, laboratory methods for isolation, identification; laboratory emphasis on advanced methods for study of pathogenic bacteria. Requirements: grade of C or higher in 061:157.

**061:160 Microbial Physiology** 3 s.h.

Bacterial genomes, cell structure, growth, energy metabolism, biosynthesis, mechanisms of signal transduction and regulation; laboratory supplement in 061:180. Requirements: grade of C or higher in 061:157.

**061:161 Undergraduate Research in Microbiology** arr.

Experimental research under faculty supervision. Requirements: grade of C or higher in 061:157.

**061:163 Seminar: Microbiology** 2 s.h.

Current topics in microbiology, immunology. Requirements: grade of C or higher in 061:157 and senior standing.

**061:164 Nursing Microbiology** 4 s.h.

Overview of bacteria, viruses, and eukaryotic microorganisms that cause human disease; microbial structure, growth control and reproduction; immunology in the context of host defense mechanisms. Requirements: pre-nursing student standing. Corequisites: 002:002 or 002:010 or 002:021, if not taken as a prerequisite.

**061:168 Introduction to Animal Viruses** 3-5 s.h.

Basic physical, chemical, biological properties of animal viruses, their association with human disease; optional laboratory with emphasis on methods in basic, clinical, and molecular virology. Requirements: grade of C or higher in 061:157.

**061:170 Microbial Genetics** 3 s.h.

Genetics of bacteria, bacteriophages. Requirements: grade of C or higher in 002:128 or 061:157.

**061:171 Honors Undergraduate Research in Microbiology** arr.

Experimental research under faculty supervision. Prerequisites: 061:157. Requirements: microbiology major, junior or senior standing, 3.33 overall g.p.a, and 3.33 g.p.a. in microbiology courses.

**061:175 Microbial Genetics Laboratory** 3 s.h.

Basic principles of genetic analysis of bacteria and bacteriophage. Prerequisites: 061:170.

**061:179 Bacterial Diversity** 3-5 s.h.

Analysis of bacteria from varied habitats; emphasis on the physiological basis and molecular characteristics of diversity. Prerequisites: 061:157.

**061:180 Microbial Physiology Laboratory** 2 s.h.  
Isolation and growth of bacteria, bacterial function products, nutrient transport, metabolic pathways, enzymes. Corequisites: 061:160.

**061:190 Web-Based Nursing Microbiology** 4 s.h.  
Nursing microbiology, principles of immunology; web-based instruction. Requirements: pre-nursing standing. Corequisites: 002:002 or 002:010 or 002:021, if not taken as a prerequisite.

**061:201 Graduate Immunology** 3 s.h.  
Ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes, B lymphocytes; emphasis on experimental methods for analysis of these processes. Requirements: (for 148:201) college biology, general chemistry, and introductory immunology courses; (for 061:201) courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: (for 148:201) courses in biochemistry and genetics; (for 061:201) biochemistry course. Same as 148:201.

**061:207 Advanced Topics in Immunology** 3 s.h.  
In-depth analysis of selected areas. Requirements: (for 148:221) 148:201 or 148:202; (for 061:207) 061:201 and 061:202, or 148:201 and 148:202. Same as 148:221.

**061:210 Advance Prokaryotic Molecular Biology** 3 s.h.  
Mechanism and regulation of DNA, RNA, and protein synthesis in bacteria. Requirements: (for 142:210) 156:201, or 002:128 and 099:130; (for 061:210) 002:128 and 099:130. Same as 142:210.

**061:217 Integrated Topics in Infectious Diseases** 1 s.h.  
Clinical cases used to raise questions in host-parasite interactions; case/scientific exposés followed by related journal club discussions at next class session. Same as 148:217.

**061:218 Microscopy for Biomedical Research** arr.  
Preparation, analysis of biomedical projects by light and electron microscopy. Prerequisites: 002:114. Same as 060:218.

**061:220 Advanced Microscopy Biomedical Research** arr.  
Technically advanced microscopy methods for research; individualized laboratory experience with opportunity to explore application of microscopy methods. Requirements: (for 060:220) an introductory microscopy course; (for 002:220) 002:218 or 060:218 or 061:218 or 012:156 or 052:156 or 060:156; (for 061:220) an introductory EM course. Same as 002:220, 060:220.

**061:227 Advanced Topics in Microbiology** 1 s.h.  
Presentations by graduate students on selected research topics in microbiology; different topics each semester. Offered fall and spring semesters. Requirements: graduate standing in microbiology.

**061:247 Graduate Survey of Immunology** 4 s.h.  
Major features of evolutionary, ontogenic, and comparative development of innate and adaptive immune systems; their functions at cellular and molecular levels. Offered fall semesters. Same as 148:247.

**061:259 Graduate Pathogenic Bacteriology** 4 s.h.  
Pathogenic bacteria, with emphasis on mechanisms of pathogenicity, laboratory methods for isolation, identification; laboratory emphasis on advanced methods for study of pathogenic bacteria; research literature.

**061:260 Graduate Microbial Physiology** 3 s.h.  
Bacterial genomes, cell structure, growth, energy metabolism, biosynthesis, mechanisms of signal transduction and regulation; laboratory supplement in 061:280.

**061:261 Graduate Research in Microbiology** arr.  
Requirements: microbiology graduate standing.

**061:263 Graduate Student Research Seminar**

1 s.h.

Presentation of thesis work in progress. Requirements: microbiology graduate standing.

**061:264 Directed Study in Microbiology**

arr.

**061:265 Topics in Virology Literature**

1 s.h.

Papers of current interest in primary virology literature.

**061:267 Graduate Introduction to Animal Viruses**

3-5 s.h.

Basic physical, chemical, biological properties of animal viruses, their association with human diseases; optional laboratory with emphasis on methods in basic, clinical, and molecular virology; discussion topics in the primary literature. Requirements: grade of C or higher in 061:157.

**061:268 Biology and Pathogenesis of Viruses**

2 s.h.

Molecular biology of animal DNA and RNA viruses, interaction of these viruses with eucaryotic cells; mechanisms of viral latency, persistence, cellular transformation, oncogenesis; virology literature. Prerequisites: 061:168 or 061:267.

**061:270 Graduate Microbial Genetics**

3 s.h.

Genetics of bacteria, bacteriophages.

**061:271 Graduate Microbial Genetics Laboratory**

3 s.h.

Basic principles of genetic analysis in bacteria. Prerequisites: 061:270.

**061:275 Perspectives in Biocatalysis**

1-3 s.h.

Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Repeatable. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as 004:275, 046:275, 052:275, 053:275, 099:275.

**061:279 Graduate Bacterial Diversity**

4-6 s.h.

Analysis of bacteria from varied habitats; emphasis on the physiological basis and molecular characteristics of diversity.

**061:280 Graduate Microbial Physiology Laboratory**

2 s.h.

Isolation and growth of bacteria, bacterial function products, nutrient transport, metabolic pathways, enzymes.

**061:299 Mechanisms of Parasitism Journal Club**

1 s.h.

Reviews of recent publications in molecular parasitology research and thesis research by training grant or journal club students. Same as 142:299.

**Associate professors:** Michael Anderson, Michael Henry, Anne Kwitek (Internal Medicine), Amy Lee, Peter Mohler (Internal Medicine), Robert Mullins (Ophthalmology and Visual Sciences), Erwin F. Shibata, Mark Stamnes, Christopher Stipp (Biology), Rams Subramanian (Biochemistry)

**Assistant professors:** Christopher Adams (Internal Medicine), N. Charles Harata, Shahram Khademi (Biochemistry), Michael Wright

**Graduate degrees:** M.S., Ph.D. in Molecular Physiology and Biophysics

**Web site:** <http://www.physiology.uiowa.edu>

The Department of Molecular Physiology and Biophysics offers graduate study leading to the Master of Science and Doctor of Philosophy. It participates in interdisciplinary graduate programs, including the Medical Scientist Training Program, a combined M.D./Ph.D. program offered by the Graduate College and the Carver College of Medicine, and it provides instruction in molecular physiology and biophysics for M.D., D.D.S., and other health professions students. The department also conducts a co-op exchange, a vigorous training program that gives undergraduate students the opportunity to develop as independent researchers in preparation for graduate studies.

The department's principal research areas include cell biology, genetics, endocrinology, neuroscience, and membrane physiology and biophysics; the unifying theme is the understanding of signal transduction mechanisms involved in regulating function at the cellular and molecular levels.

## Graduate Program

The department offers a Master of Science and a Doctor of Philosophy in molecular physiology and biophysics.

Graduate study in molecular physiology and biophysics provides students with fundamental knowledge of life processes at molecular, cellular, and integrative levels of biological function. It also imparts knowledge of modern research skills applicable to contemporary problems.

Students may enter the graduate program through the Biosciences Program (Graduate College) or directly through the Department of Molecular Physiology and Biophysics. Those who enter directly are advised by the department's director of graduate studies, who guides them in planning required course work and introduces them to research activities of the department's faculty members.

All degree candidates have experience as classroom instructors, under faculty supervision, as part of their training.

### Master of Science

The Master of Science in molecular physiology and biophysics requires a minimum of 30 s.h. beyond the bachelor's degree and is offered with and without thesis. Thesis students complete laboratory research and write a thesis that fulfills the requirements of the Graduate College (see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog). Nonthesis students complete a library research report, and a written examination on the research report area and the graduate program in physiology.

University of Iowa research assistants may pursue an M.S. in molecular physics and biophysics while continuing to work in their research laboratories. Research assistants interested in the M.S. program must submit a letter of support from their supervisor.

### Doctor of Philosophy

The Doctor of Philosophy in molecular physiology and biophysics requires a minimum of 72 s.h. beyond the bachelor's degree. The core curriculum includes graduate-level courses in cell biology, molecular biology, human physiology, and neurophysiology. Advanced electives, offered by the Department of Molecular Physiology and Biophysics and other departments, cover a wide range of topics, including receptors and signal transduction, and developmental neurophysiology.

After successful completion of required course work and the comprehensive examination, students devote full time to thesis research, which culminates in preparation of a doctoral dissertation and its defense in a final oral exam.

### Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They must have a bachelor's degree from an accredited institution, with an undergraduate major in one of the biological, chemical, physical, mathematical, or

engineering sciences and one or more years of course work in biology, physics, biochemistry, and calculus. They also must have a cumulative science g.p.a. of at least 3.00 and a combined verbal and quantitative score above 1200 on the Graduate Record Examination (GRE) General Test.

## Financial Support

All full-time students receive financial aid in the form of tuition and stipend support from the Department of Molecular Physiology and Biophysics. Support is renewed annually based on satisfactory progress in meeting degree requirements.

## Research

Faculty research interests in the Department of Molecular Physiology and Biophysics encompass molecular and cellular endocrinology, cellular and developmental neurophysiology, and membrane structure and function. Within these, there are multiple areas of interest, including hormone receptors, reproductive endocrinology, signal transduction, regulation of gene expression, synaptic transmission, neuronal differentiation, membrane ion channels, regulation of excitability, and cardiovascular electrophysiology and regulation. Experimental models currently being investigated include rodents, yeast, drosophila, and cultured cell lines from a variety of species.

## Facilities

Two floors of the Bowen Science Building are devoted to research and teaching in the Department of Molecular Physiology and Biophysics. Department faculty members also occupy laboratory facilities in the Eckstein Medical Research Building and the Carver Biomedical Research Building. In addition to specialized equipment in faculty research laboratories, the department provides equipment for fluorescence microscopy, isotope analysis, cell culture, and molecular biology. It also has access to the University network and the multimedia education facilities. Additional resources are available at the Hardin Library for the Health Sciences.

## Molecular Physiology and Biophysics Courses

**072:152 Human Physiology for Dental Students** 4 s.h.  
Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grade of C- or higher in 002:010, 004:121, and 004:122; and D.D.S. enrollment.

**072:153 Graduate Physiology** 4 s.h.  
Principles of human physiology, organ systems, cell function. Offered fall semesters. Requirements: grade of C- or higher in 002:010, 004:121, and 004:122; and graduate standing.

**072:164 Human Physiology for Physician Assistant Students** 4 s.h.  
Principles of human physiology, organ systems, cell function. Offered summer sessions. Requirements: grade of C- or higher in 002:010, 004:121, and 004:122; and Physician Assistant Program enrollment.

**072:165 Advanced Human Physiology** 4 s.h.  
Requirements: matriculation to the anesthesiology C.R.N.A. program.

**072:180 How the Brain Works** 1 s.h.  
Brief, integrated look at how the brain works, based on recent neuroscience research; how the brain's biochemistry, anatomy, and physiology change constantly due to interaction with physical, emotional, and social environments; does the world we see around us exist outside the brain; does the mind exist; is emotion necessary for learning and memory; are we born with pre-existing circuits and codes in the brain for language, recognition of faces, and other complex behaviors; can aging of the brain be delayed; approach relevant for sciences, humanities.

**072:184 Developmental Neurobiology** 3 s.h.  
Neural induction and nervous system patterning; neurogenesis, axon and dendrite outgrowth and targeting; synapse formation, specificity, refinement; mechanisms of neuronal cell death; myelination; neural stem cells; introduction to cellular, molecular, and genetic techniques in studies of neural development. Requirements: grade of B- or higher in 002:180 or graduate standing. Same as 002:184, 132:184.

**072:199 Research, Independent Study** arr.

Recommendations: closed to molecular physiology and biophysics graduate students.

- 072:209 Steroid Receptor Signaling** 1 s.h.  
Structure-function relationship and genomic and nongenomic actions of the steroid hormone receptor family; basis for actions of novel new ligands on these receptors. Offered spring semesters. Same as 071:209, 132:209.
- 072:211 Biophysics of Excitable Membranes** 3 s.h.  
Selected electrophysiological and biophysical topics from published research. Prerequisites: 027:130.
- 072:220 Protein Biogenesis, Transport, and Degradation in the Secretory/Endocytic System** 1 s.h.  
Models for translocation across the ER membrane, quality control/protein folding in the ER lumen, ER associated degradation; mechanisms of vesicle biogenesis, cargo selection, vesicle fusion, regulation of Golgi and trans-Golgi Network biogenesis; protein internalization from the cell surface. Prerequisites: 099:130. Same as 060:216, 142:220.
- 072:221 Control of Subcellular Motility** 1 s.h.  
Actin filaments and microtubules in terms of their assembly dynamics and regulation; how motor proteins are controlled and adapted for movement of specific proteins and vesicles within cells; signaling through GTPases; cell motility; biogenesis, regulation of cilia and flagella. Prerequisites: 099:130. Same as 060:221, 142:221.
- 072:222 Organelle Biogenesis** 1 s.h.  
Biogenesis of mitochondria, peroxisomes, nucleus, and phagosomes; membrane trafficking; mitochondrial division, mitosis and cell division, entry into lysosomes via autophagy and endocytic pathways; host/pathogen interactions, function of macrophages and neutrophils. Prerequisites: 099:130. Same as 060:222, 142:222.
- 072:225 Growth Factor Receptor Signaling** 1 s.h.  
Mechanisms of signaling by growth factors; cytokines and related molecules that regulate cell proliferation, development, differentiation, and survival; emphasis on molecular mechanisms of signaling, relevance of these signaling processes to various human diseases. Recommendations: 156:201, 156:202, and 156:203. Same as 060:225, 142:225.
- 072:226 Cell Cycle Control** 1 s.h.  
Cell cycle regulation, DNA damage-dependent cell cycle regulation, redox-dependent cell cycle regulation, cellular senescence. Recommendations: 156:201, 156:202, and 156:203. Same as 060:226, 142:226.
- 072:227 Cell Fate Decisions** 1 s.h.  
Cellular fate decisions, including signal integration, terminal differentiation in development, mechanisms of embryonic stem cell gene regulation/cellular reprogramming, cell death paradigms, and cell death in development and cancer. Recommendations: 156:201, 156:202, and 156:203. Same as 060:223, 142:227.
- 072:240 Physiology Workshop** 1 s.h.  
Presentations by faculty, postdoctoral fellows, graduate students, and scientists. Repeatable. Requirements: graduate standing.
- 072:250 Topics in Molecular Physiology** 1 s.h.  
Current issues in molecular physiology; seminar. Prerequisites: 156:201.
- 072:265 Neuroscience Seminar** 0-1 s.h.  
Research presentations. Offered fall and spring semesters. Same as 002:265, 031:265, 060:265, 132:265.
- 072:302 Research Physiology and Biophysics** arr.  
Requirements: molecular physiology and biophysics graduate standing.
- 072:342 Biosciences Critical Thinking and Communication** 2 s.h.  
Selected papers and oral and written presentations tied to students' research rotations; introductory seminar. Repeatable. Same as 002:270, 156:265.
- 072:402 Thesis** arr.  
Requirements: molecular physiology and biophysics Ph.D. candidacy.

# Neurology

**Head:** George Richerson

**Professors:** Harold P. Neurology is the branch of medical science concerned with diagnosis and management of disorders of the brain, spinal cord, peripheral nervous system, and muscle.

The Department of Neurology's hallmark is its history of carefully integrating patient care, scientific investigation, and the education of medical, postdoctoral, and graduate students.

## M.D. Student Training, Graduate Education

The department provides clinical and clinical research training to third- and fourth-year M.D. students. The department also offers research opportunities in various fields of neuroscience, including neuropsychology, neuroimaging, and neuroanatomy, to Ph.D. students in neuroscience and psychology.

## Residency Program

An active, four-year approved residency program qualifying physician trainees for board certification in neurology is a major aspect of the department's activity; experience in clinical electrophysiology, pediatric neurology, psychiatry, and neuropathology is part of this training.

## Research

The faculty's investigative interests center on cognitive neuroscience, degenerative diseases, cerebrovascular disease, neurogenetics, neuromuscular diseases, electrophysiological correlates of central and peripheral nervous system disease, growth factors in the nervous system, control and regulation of autonomic functions, neuro-ophthalmology, movement disorders, epilepsy, and pain management. For more information see the Department of Neurology web site.

## Neurology Courses

### 064:011 Clinical Neurology

2-4 s.h.

Experience in clinical neurology through ward work and case-based conferences linked to required reading; focus on neurologic examination, diagnosis of neurologic problems; four-week clerkship.

### 064:238 Introduction to Neuropsychological Assessment

arr.

Standard behavioral assessment procedures; administration of neuropsychological tests under staff supervision; preparation of integrated reports on collected data; involvement in research project.

### 064:239 Advanced Neuropsychological Assessment

arr.

Continuation of 064:238.

### 064:240 Topics in Cognitive Neuroscience

3 s.h.

Key topics in the neural basis of human cognition; research literature. Recommendations: graduate courses in basic neuroscience and cognitive psychology. Same as 132:240.

### 064:302 Advanced Inpatient Neurology

4 s.h.

Experience managing patients with seizure disorders, headache, cerebrovascular diseases; conferences, clinical rounds; two weeks on each inpatient service for a total of four weeks. Prerequisites: 064:011.

### 064:303 Advanced Outpatient Neurology

4 s.h.

Experience in evaluation, management of patients with various neurologic diseases; four weeks in clinic patient care.  
Prerequisites: 064:011.

**064:310 Cerebrovascular Disease**

arr.

Experience in evaluation, management of patients with cerebrovascular diseases; conferences, clinical rounds.  
Prerequisites: 064:011.

**064:365 Seminar: Neuropsychology and Neuroscience**

arr.

Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as 031:365, 132:365.

**064:998 Neurology on Campus**

arr.

**064:999 Neurology off Campus**

# Neurosurgery

**Head:** Matthew A. Howard III

**Professors:** Patrick W. Hitchon, Matthew A. Howard III, Arnold H. Menezes

**Assistant professors:** Jeremy Greenlee, David Hasan, Hiroto Kawasaki, Hiroyuki Oya

**Web site:** <http://www.uihealthcare.com/depts/med/neurosurgery>

The Department of Neurosurgery provides an experience oriented toward patient care and basic research concerning diseases and physiology of the nervous system. Students develop awareness of neurosurgery's role in treating head and spine trauma, vascular disorders, brain and spinal cord tumors, pain and peripheral nerve abnormalities, degenerative spine pathology, and surgical treatment of epilepsy and movement disorders.

Clinical courses are designed around patient-centered discussions interwoven with operating room experiences. Lectures and conferences are scheduled on specific topics.

## M.D. Student Training

The department provides fourth-year M.D. students with access to special expertise in selected topics of investigation regarding the central nervous system and to a clinical course through special arrangements with the faculty.

## Faculty

Neurosurgery faculty strengths are centered in physiology of spinal cord trauma, epilepsy, auditory brain function and pain, primary brain tumor genetics, central nervous system tissue culture, spinal column biomechanics, and movement disorders. The department has expertise in clinical management across the spectrum of central nervous system diseases.

## Facilities

Multiple, fully equipped laboratory space is available to support scientific research of the central nervous system. Faculty and technical assistance is available in all laboratories.

## Neurosurgery Courses

Neurosurgery courses are open only to M.D. and qualified associated health sciences students.

### **183:227 Subinternship in Neurosurgery**

4 s.h.

Advanced clinical clerkship in neurological surgery; emphasis on diagnosis and operative management of surgical neurological disease.

### **183:228 Research in Neurological Surgery**

arr.

Laboratory investigation of spinal cord injury, spinal column biomechanics and instrumentation, electrophysiology of pain, epilepsy and hearing, molecular genetics and physiology of brain tumors.

### **183:999 Neurosurgery off Campus**

arr.

Arranged by student with department approval.

# Nuclear Medicine Technology

**Director:** Anthony W. Knight

**Medical director:** Michael M. Graham

**Technical director:** John A. Bricker

**Professors:** David L. Bushnell, Michael M. Graham, Malik E. Juweid, Daniel Kahn, Mark T. Madsen

**Professor emeritus:** Frank H. Cheng

**Clinical professor:** James A. Ponto (Pharmacy)

**Assistant professor:** Yusef Menda

**Clinical instructors:** John A. Bricker, Dean A. Clermont, Ashley B. Heid, Lisa A. Ireland, Bethany K. Johnson, Gregory T. Kelly, Richard C. Langholdt, Angela K. LaPorte, Ashley S. Long, Christine A. Mundt, Jeffrey S. Murguia, Daniel T. Petersen, Michelle L. Petersen, James A. Ponto, John C. Richmond, Julie A. Riggert, Kelli E. Schlarbaum, Jay J. Smith, Jeffery B. Snell

**Adjunct lecturers:** Gregory T. Kelly, Anthony W. Knight

**Undergraduate degree:** B.S. in Nuclear Medicine Technology

**Web site:** [http://www.medicine.uiowa.edu/RadSci/nuclear\\_medicine/index.html](http://www.medicine.uiowa.edu/RadSci/nuclear_medicine/index.html)

Nuclear medicine technologists are professionals in a medical specialty that uses radioactive tracers for diagnostic, therapeutic, and research purposes. Technologists generally are employed in hospitals and clinics. They work hand-in-hand with nuclear medicine physicians, health physicists, radiopharmacists, and radiochemists as an integral part of a highly trained specialty team.

In addition to using sophisticated detectors and computers to trace the movement and localization of radioactive tracers in the human body, nuclear medicine technologists have responsibilities that include radiation safety; quality control testing; radiopharmaceutical preparation and administration; and general patient care.

The Nuclear Medicine Technology Program is part of the Carver College of Medicine on the University of Iowa health sciences campus, which includes University of Iowa Hospitals and Clinics, one of the nation's largest university-owned teaching hospitals. For information about the college's academic programs and resources, see Carver College of Medicine in the Catalog.

## Undergraduate Program

The Carver College of Medicine offers a Bachelor of Science in nuclear medicine technology. Upon satisfactory completion of the four-year program, students receive the degree and a certificate of training. Graduates are eligible for national certification as nuclear medicine technologists.

The Nuclear Medicine Technology Program is fully accredited by the Joint Review Committee on Educational Programs in Nuclear Medical Technology (JRCNMT). Fulfillment of the requirements established by the JRCNMT Accreditation Board involves three years of preclinical work in the College of Liberal Arts and Sciences and the Carver College of Medicine, and a minimum of 12 months of professional clinical experience, available at University of Iowa Hospitals and Clinics and the Iowa City Veterans Affairs Medical Center.

Undergraduate study in the college is guided by the academic rules and procedures outlined in the Carver College of Medicine section of the Catalog, under "Undergraduate Programs."

### Bachelor of Science

The Bachelor of Science in nuclear medicine technology requires a minimum of 124 s.h., including 30 s.h. in radiology course work (prefix 074). Required courses in the first and sophomore years emphasize the physical and biological sciences, which provide a basic background for further development in the junior year.

Applicants are strongly advised to pursue a course of study that is applicable to a baccalaureate degree, most commonly in biology, chemistry, biochemistry, or microbiology. In this way, students who are not admitted to the Nuclear Medicine Technology Program can complete a degree in their chosen area.

The following are recommended courses.

#### FIRST YEAR

004:011 Principles of Chemistry I	4 s.h.
004:012 Principles of Chemistry II	4 s.h.

#### SECOND YEAR

002:010 Principles of Biology I	4 s.h.
002:011 Principles of Biology II	4 s.h.
22S:102 Introduction to Statistical Methods	3 s.h.

One of these:

22C:001 Computer Literacy	3 s.h.
22C:005 Introduction to Computer Science	3 s.h.
22C:016 Computer Science I: Fundamentals	4 s.h.

### THIRD YEAR

029:011 College Physics I	4 s.h.
029:012 College Physics II	4 s.h.
027:053 Human Anatomy	3 s.h.
027:054 Human Anatomy Laboratory	1 s.h.
027:130 Human Physiology	3 s.h.
027:132 Human Physiology Laboratory	2 s.h.

### FOURTH YEAR

The curriculum of the clinical year is organized in accordance with the JRCNMT Essentials of an Accredited Educational Program in Nuclear Medicine Technology. Courses are taught in the following areas: radiopharmacy, radiobiology, radiation safety, patient care, medical terminology, anatomic and physiologic bases of nuclear medicine procedures, physics and instrumentation, administration and management, medical and professional ethics, mathematics and statistics of nuclear medicine, and computer applications in nuclear medicine. Clinical rotations focus on nuclear and positron emission tomography (PET) imaging, clinical radiopharmacy, computer applications, and quantification of radioactivity in vivo and in vitro.

The clinical year consists of these courses.

074:101 Principles of Nuclear Medicine I	6 s.h.
074:102 Introductory Clinical Nuclear Medicine	6 s.h.
074:103 Principles of Nuclear Medicine II	3 s.h.
074:104 Intermediate Clinical Nuclear Medicine	9 s.h.
074:105 Advanced Clinical Nuclear Medicine	6 s.h.

For course descriptions and prerequisites, see Radiology in the Catalog.

### Admission

Prerequisites for admission to the Nuclear Medicine Technology Program include the following:

- a minimum of 94 s.h. of college credit, with a cumulative g.p.a. of at least 2.50;
- fulfillment of the College of Liberal Arts and Sciences General Education Program requirements in rhetoric, interpretation of literature, humanities, historical perspectives, quantitative or formal reasoning, social sciences (sociology and psychology are recommended), and distributed general education;
- a minimum of 20 s.h. in three science areas, including a complete introductory course with laboratory in chemistry, physics, and biology; and
- a minimum of 3 s.h. in mathematics, including at least elementary functions.

Fulfillment of these basic admission requirements does not guarantee acceptance into the Nuclear Medicine Technology Program.

A new class begins every August. Application deadline is February 1. Personal interviews are scheduled in February, and the class is selected by March 15. Class size is limited to 10 students. Prospective students are encouraged to consult the Nuclear Medicine Technology Program office to plan an appropriate preprofessional program.

## Obstetrics and Gynecology

**Head:** Kimberly Leslie

**Professors:** Jo Ann Benda (Pathology), Susan R. Johnson, Kimberly Leslie, Jennifer R. Niebyl, Elaine Smith (Epidemiology), Craig H. Syrop, Bradley Van Voorhis, Roger A. Williamson, Jerome Yankowitz

**Professors (clinical):** Noelle C. Bowdler, Koen DeGeest, Jane Engeldinger

**Adjunct clinical professor:** Robert M. Kretzschmar

**Associate professors:** Catherine Bradley, Donghai Dai, Stephen K. Hunter, Asha Rijhsinghani, Baoli Yang

**Associate professors (clinical):** Thomas Buekers, William Davis, Marygrace Elson, Colleen Stockdale, Jill Vibhakar

**Adjunct clinical associate professors:** Lloyd Holm, Grant Paulsen, Charles W. Schauburger, Rebecca Shaw, Gerald Shirk

**Assistant professors:** Janet I. Andrews, Kristi Borowski, Michael Goodheart, Victoria Korovkina, Xiangbing Meng, Barbara Stegmann

**Assistant professors (clinical):** David P. Bender, Laura Dellos, Andrea Greiner, Lynne Himmelreich, Veronika Kolder, Ali Luck, Rachel Maassen, Merida Miller, Elizabeth Potter, Gregory Skopec, Kelly Ward

**Associates:** Ginny Ryan, Mark Santillan

## M.D. Student Training

Courses in the Department of Obstetrics and Gynecology are designed to give M.D. students a comprehensive survey of reproductive medicine. This is done through a series of didactic lectures, inpatient and outpatient assignments, ward rounds, teaching seminars, and special elective courses.

The third-year clerkship 066:004 Clinical Obstetrics and Gynecology gives students the core knowledge, skills, and attitudes needed to provide primary health care to female patients.

The department offers fourth-year medical students a variety of electives that provide advanced training in the special areas of obstetrics and gynecology. In addition to clerkships at University of Iowa Hospitals and Clinics, these electives include a rotation at the Washington County Hospital and Clinics and other arranged off-campus courses.

## Residency Program

The department offers a four-year residency. Upon completion, graduates are eligible for the written and oral examinations leading to certification by the American Board of Obstetrics and Gynecology.

Residents are assigned to the various divisions and clinical services of the department; they care for both hospital inpatients and outpatients. Training is provided in normal and abnormal obstetrics, gynecologic surgery, office gynecology, ultrasound, reproductive endocrinology, gynecologic oncology, urogynecology, family planning, and endoscopic procedures.

## Obstetrics and Gynecology Courses

### 066:004 Clinical Obstetrics and Gynecology

arr.

Proficiency in evaluation and management of core women's health care relating to the reproductive tract; special history taking, physical examination, laboratory and imaging assessment of obstetric and/or gynecological patients, application of current concepts to well women's health care and to management of diseases and pathologies; outpatient and inpatient obstetrics and gynecology; family planning, screening and early detection of cancer and other diseases.

### 066:006 High Risk Antepartum Obstetrics Subinternship

arr.

Experience in evaluating new patients in a high-risk obstetric clinic; continuing antepartum care; doing work-up, ordering diagnostic studies, and following course of complicated patients admitted to obstetric ward; assisting in diagnostic, therapeutic procedures such as fetal heart rate testing, amniocentesis, ultrasonography, intrauterine fetal transfusion.

### 066:010 Gynecologic Oncology Subinternship

arr.

Experience on a gynecologic oncology service, including operating room, inpatient and outpatient care; team management approach to gynecologic cancer patients, treatment and follow-up of invasive gynecologic malignancies, etiology and risk factors for gynecologic neoplasias, pre- and postoperative evaluation and treatment of surgical management of gynecologic neoplasias; research project encouraged.

### 066:013 Reproductive Endocrinology Senior Elective

arr.

Experience evaluating new and returning patients in the Reproductive Endocrinology and Infertility Clinic; participation in preoperative, operative, and inpatient postoperative care; advanced gynecologic ultrasonography, in vitro fertilization services.

**066:015 Urogynecology Advanced Elective**

4 s.h.

Experience as active member of urogynecology clinical team, participating in clinical care activities including outpatient clinic, outpatient procedures, inpatient surgery, hospital care; presentation to team on topic chosen by student.

**066:017 Continuity of Care in Outpatient Gynecology**

4 s.h.

M4 students work with experienced gynecologist in longitudinal clinical experience for the academic year; students paired with faculty member to see patients in weekly clinic and provide clinical care to defined patient population.

**066:018 Community-Based Ob/Gyn, Washington**

4 s.h.

Varied out-patient and in-patient obstetric and gynecologic patients in the Washington County Hospital and Clinic; perform and master OB/GYN histories and examinations; frequent supervised active participation of procedures where appropriate.

**066:998 Ob/Gyn on Campus**

arr.

**066:999 Ob/Gyn off Campus**

# Ophthalmology and Visual Sciences

**Head:** Keith D. Carter

**Professors:** Wallace L.M. Alward, H. Culver Boldt, Keith D. Carter, Thomas L. Casavant (Electrical and Computer Engineering), James C. Folk, Kenneth M. Goins, A. Tim Johnson, Chris A. Johnson, Randy H. Kardon, Stephen A. Kuusisto (Disabilities and Diversity Awareness/Non-Fiction Writing), Young H. Kwon, Thomas A. Oetting, Steven R. Russell, Val C. Sheffield (Pediatrics/Genetics), Milan Sonka (Electrical and Computer Engineering), Edwin M. Stone, Michael D. Wagoner, Michael Wall (Neurology), Thomas A. Weingeist, Mark E. Wilkinson

**Professors emeriti:** Sohan S. Hayreh, G. Frank Judisch, Hansjoerg E. Kolder, Karl C. Ossoinig, Edward S. Perkins, William E. Scott, H. Stanley Thompson

**Associate professors:** Michael M. Abramoff, Richard C. Allen, Terry A. Braun, Arlene V. Drack, Patricia A. Kirby, Robert F. Mullins, Richard J. Olson, Todd E. Scheetz, Christine W. Sindt

**Assistant professors:** Michael G. Anderson (Physiology), John H. Fingert, Brian R. Kirschling, Anna S. Kitzmann, Markus H. Kuehn, Reid A. Longmuir, Susannah Q. Longmuir, Vinit B. Mahajan, Steven F. Stasheff (Pediatrics), Nasreen A. Syed

**Web site:** <http://webeye.ophth.uiowa.edu>

Ophthalmology is a medical and surgical specialty concerned with the diagnosis and treatment of diseases of the eye and its adnexa. The Department of Ophthalmology and Visual Sciences combines postgraduate training with research and patient care in all aspects of the visual sciences. Subspecialties represented in the department include cataract surgery, comprehensive ophthalmology, cornea and external diseases, contact lens and refraction services, genetics and molecular biology, glaucoma, laser refractive surgery, neuro-ophthalmology, oculoplastic surgery, ocular echography, ocular pathology, ocular vascular diseases, optometric services, pediatric ophthalmology and adult strabismus, vitreoretinal disorders, and vision rehabilitation.

## M.D. Student Training, Graduate Education

The department offers clinical and research training to M.D. students and limited graduate studies for Ph.D. students in Anatomy and Cell Biology, Molecular and Cellular Biology, and Genetics. A three-year residency program with clinical experience in the ophthalmic subspecialties is offered to physician trainees. Graduates qualify for the written and oral examinations leading to certification by the American Board of Ophthalmology. Postgraduate fellowships of one to two years are available for qualified ophthalmologists in most subspecialty areas.

## Continuing Education

The department sponsors clinical conferences open to community ophthalmologists in Iowa and surrounding states where physicians can earn continuing medical education credits. The department also sponsors an annual alumni meeting with participation by nationally and internationally recognized ophthalmologists and vision scientists.

## Facilities

The department maintains research laboratories for cell biology, biochemistry, morphology, tumor diagnosis, pathology, electrophysiology, pupillography, molecular biology, and vascular disease. Clinical facilities in ophthalmology are available at University of Iowa Hospitals and Clinics in the Pomerantz Family Pavilion and at the Iowa City Veterans Affairs Medical Center and the Veterans Affairs Central Iowa Health Care System in Des Moines. The department also manages an eye clinic at the Broadlawns Medical Center in Des Moines as well as outreach programs in other communities. The department houses the University of Iowa Carver Family Center for Macular Degeneration.

The Department of Orthopaedics and Rehabilitation offers training for residents and provides education for undergraduate students.

## Residency Programs

The department offers two programs for postgraduate trainees. The first is a five-year integrated clinical program, in which interns and residents participate simultaneously in inpatient and outpatient care, surgery, and sciences related to the neuromusculoskeletal system. The second provides the same training as the first, but includes an additional one to two years of research.

### Clinical Residency

Trainees enter this program directly from medical school through the National Internship Matching Plan.

During the first year, trainees gain experience not only in clinical orthopaedics but also in medicine, pediatrics, surgical specialties, intensive care, anesthesiology, and other services.

During years two through five, residents gain experience in trauma, musculoskeletal oncology, children's orthopaedics, adult orthopaedics, neuromuscular disorders, rehabilitation, prosthetics and orthotics, rheumatology, and basic science related to orthopaedics. They take specialized courses in anatomy, bone histology, biochemistry, physiology, and pathology.

Weekly seminars cover biomechanics, kinesiology, and selected clinical subjects.

### Residency with Research

In addition to the training described for the clinical program, this program includes an additional one or two years of research in a field that interests the resident and is related to the musculoskeletal system. The research may be done in one of the orthopaedic laboratories.

## Undergraduate Education

At the undergraduate level, the Department of Orthopaedics and Rehabilitation participates in the Bachelor of Science in athletic training, which is offered by the Department of Health and Human Physiology (College of Liberal Arts and Sciences). Members of the orthopaedics and rehabilitation sports medicine faculty teach 076:187 Practicum in Athletic Training IV, a two-semester advanced clinical sequence (8 s.h.). Students who complete the program are eligible to apply for national certification in athletic training and pursue employment opportunities as health care professionals for sports medicine clinics and hospitals, as well as in academic settings.

## Laboratories

The orthopaedics laboratories deal with problems in these major subject areas.

**Biochemistry:** the biochemistry of proteoglycans, collagens, and matrix proteins, both normal and altered in musculoskeletal disorders

**Biomechanics:** problems of the upper extremity; biomechanics of the spine, hip, and gait; total joint replacements (in conjunction with the College of Engineering)

**Cell and molecular biology:** studies of normal bone, cartilage, tendon, muscle, and tissues altered by experiment and disease

## Facilities

The department is housed in the John Pappajohn Pavilion of University of Iowa Hospitals and Clinics and has an active service in the Iowa City Veterans Affairs Medical Center.

Facilities include 48 orthopaedic beds, five outpatient clinics, inpatient and outpatient operating rooms, a specialty library, a specialty radiology unit, and physical therapy and rehabilitation facilities.

Specialty clinics deal with disorders such as scoliosis, club feet, congenital dislocated hip, neuromuscular disease, metabolic disease, amputation, neoplasm, trauma, and neck, back, hip, foot, knee, and hand problems.

Physicians in the outpatient clinic see approximately 175 patients per day. Approximately 5,000 major operations are performed each year under the auspices of the department.

The department provides consulting service to the Center for Disabilities and Development, Child Health Specialty Clinics, and two state programs that serve people with mental retardation.

## Otolaryngology--Head and Neck Surgery

**Head:** Bruce J. Gantz

**Professors:** Paul J. Abbas, John Buatti, John W. Canady, Keith D. Carter, Gerry F. Funk, Bruce J. Gantz, Scott M. Graham, Henry T. Hoffman, Jeffrey A. Nerad, Michael P. Karnell, Richard J.H. Smith, Richard S. Tyler

**Associate professors:** Carolyn J. Brown, Kristi E. Chang, Anjali Gupta, Marlan R. Hansen, José M. Manaligod

**Assistant professors:** Daniel F. Eberl, Eileen M. Finnegan, Grant S. Hamilton III, Erin K. O'Brien, Nitin A. Pagedar, Douglas J. Van Daele

**Clinical assistant professors:** Jeffrey Carithers, Thomas A. Ericson, Steven R. Herwig, Brenton Koch, Richard B. Merrick, Irving E. Peterson, Russell E. Schurtz, Mark K. Zlab

**Web site:** <http://www.uihealthcare.com/depts/med/otolaryngology/index.html>

The Department of Otolaryngology--Head and Neck Surgery is one of the most comprehensive otolaryngology departments in the world. Founded in 1922, it also is among the oldest in the United States. *US News & World Report* has consistently ranked the department's program among the top three in the nation.

The department's facilities are situated at University of Iowa Hospitals and Clinics.

The department's chief focus areas are education and training, patient care, and research. M.D. students in the Carver College of Medicine, residents, and fellows benefit from a faculty dedicated to providing thorough training in all aspects of otolaryngology and patient care. Patients in the otolaryngology clinic enjoy access to comprehensive care in any of five subspecialties: pediatric otolaryngology, otology/neurotology, general otolaryngology and rhinology, head and neck oncology, and facial plastic and reconstructive surgery. University of Iowa faculty members from ophthalmology and radiation oncology hold joint appointments in otolaryngology, adding depth to the department's resources.

The department is home to prominent research programs in cleft palate and other craniofacial defects, head and neck oncology, cochlear implants, and molecular genetics. It also offers fellowships in otology/neurotology, pediatric otolaryngology, and head and neck oncology.

### Residency Program

Each year the Department of Otolaryngology--Head and Neck Surgery accepts five applicants to its residency program, which is accredited by the Accreditation Council for Graduate Medical Education. Three residents are matched to the four-year clinical track, and two are matched to the six-year research track.

The clinical track provides four years of concentrated clinical study and application in all aspects of otolaryngology. Residents begin their training with a seven-week intensive basic science course divided into an anatomy component and a 160-hour lecture series. The anatomy component includes a supervised cadaver dissection, and the lecture series details the study of otolaryngology and related disciplines. Each resident also completes two research rotations in order to explore research areas that interest him or her.

The research track is a combined clinical-research program designed for residents interested in an otolaryngology research career. After an internship year, residents complete two years of research followed by four years of clinical training. The interaction of clinicians and basic scientists from several departments affords residents the opportunity for involvement in a wide spectrum of current research in areas such as electrophysiology of the auditory system, the genetics of head and neck cancer, and gene therapy.

### Fellowships

The Department of Otolaryngology--Head and Neck Surgery offers two-year fellowships in otology/neurotology and in pediatric otolaryngology, which are accredited by the Accreditation Council for Graduate Medical Education, and a one- or two-year fellowship in head and neck oncology accredited by the Advanced Training Council of the American Head and Neck Society.

One applicant is admitted to the otology/neurotology fellowship program every two years. Otolaryngology fellows spend a minimum of 20 months on the clinical service. They attend all otology/neurotology clinics and neurotology cases in the operating room and are responsible for inpatient service. They also have one day of dedicated research time each week.

The pediatric otolaryngology fellowship program admits one applicant each year. Fellows spend a minimum of 18 months on the clinical service, where they have the opportunity to train with all pediatric otolaryngology faculty members. Each fellow also has six months of dedicated time for academic research.

One applicant is accepted as a head and neck oncology fellow each year. Training is largely clinical, allowing fellows the opportunity to participate in a variety of procedures, ranging from skull base resection to laryngeal rehabilitation. Fellows routinely perform 35 to 45 free-tissue transfers during one year of training. They also complete a clinical and/or basic science research project relating to head and neck oncology.

## Pathology

**Head:** Michael B. Cohen

**Professors:** Gary L. Baumbach, Jo Ann Benda, Michael B. Cohen, Robert T. Cook, Barry De Young, Daniel Diekema, Siegfried Janz, Chris Jensen, John D. Kemp, Patricia Kirby, Charles F. Lynch, Frank A. Mitros, Steven Moore, Marcus Nashelsky, Tom Raife, Robert A. Robinson, Nancy Rosenthal, Mary Stone, Lubomir P. Turek, Steven Vincent, Thomas Waldschmidt

**Professors emeriti:** Fred Dee, Gary Doern, James A. Goeken, George F. Johnson, Thomas H. Kent, George D. Penick, Michael Pfaller, Charles E. Platz, Earl F. Rose, Marian Schwabbauer, Ronald G. Strauss

**Adjunct clinical professor:** Oskar W. Rokhlin

**Associate professors:** Jackie R. Bickenbach, Leslie A. Bruch, Laila Dahmouch, Morris O. Dailey, Thomas H. Haugen, Michael Henry, Michael Knudson, Kevin Legge, Vincent Liu, Ramesh Nair, Dawn Quelle, Sandra Richter, Annette Schlueter, Sergei Syrbu, Robert D. Tucker, Steve Varga

**Adjunct clinical associate professor:** Julia C. Goodin

**Assistant professors:** Ryan Askeland, Vladimir Badovinac, Aaron Bossler, Adam Dupuy, Yasuko Erickson, Leana Guerin, Hasem Habelhah, Jonathan Heusel, Fiorenza Ianzini, Michael Icardi, Toshiki Itoh, Stacey Klutts, Matthew Krasowski, Tomomi Kuwana, David Meyerholz, Vishala Neppalli, Brian Swick, Nasreen Syed,

**Adjunct clinical assistant professors:** Michelle Catellier, Timothy Drevankyo, Dennis Klein, Jerri McLemore, L. Jeffrey Rissman, Jonathan Thompson

**Adjunct clinical lecturer:** Judith Kittleson

**Graduate degree:** M.S. in Pathology

**Web site:** <http://www.medicine.uiowa.edu/pathology>

The Department of Pathology offers basic pathology courses to health sciences students; a clinical training program for clinical laboratory scientists; a Master of Science in pathology; residency training programs leading to American Board of Pathology certification in anatomic pathology, clinical pathology, and neuropathology; fellowship training in pathology subspecialties; and postdoctoral research training in cellular and molecular pathology.

## Clinical Education

See Clinical Laboratory Sciences in the Catalog.

## M.D. Student Training

The department provides seven 12-month medical student fellowships for M.D. students: the Emory Warner Fellowship, a full-time research position in a facet of experimental pathology; and six pathology externships, for students interested in careers as pathologists. It also offers a varying number of clerkships for M.D. students in any of the areas of anatomical and clinical pathology.

## Residency Program

The department offers 20 residency positions in pathology, covering a training span of up to four years. Patients of University of Iowa Hospitals and Clinics and the Iowa City Veterans Affairs Medical Center are integral to the program.

Residents gain experience in systematic rotation through the varied laboratory services, including surgical pathology, autopsy pathology, neuropathology, cytology, clinical chemistry, clinical microbiology, hematology, immunopathology, and transfusion medicine. They also have the opportunity to pursue one to three years of additional fellowship training in most pathology subspecialties.

## Graduate Program

The department offers a Master of Science in pathology.

### Master of Science

The Master of Science in pathology requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of classroom work and 9 s.h. earned for research. The program trains graduate students in cell and molecular biology. Graduates work as research scientists in a range of academic and commercial laboratories, including those in the rapidly expanding biotechnology sector. Others advance to doctoral-level study.

M.S. students take a core curriculum in cell and molecular biology as well as electives suited to their individual interests. They acquire contemporary research skills by pursuing a laboratory thesis project under the guidance of a faculty member. Currently, there are active research programs in immunology, microbiology, neuroscience, signaling and apoptosis, inflammation and vascular biology, tumor biology and cancer, and virology.

Most M.S. students complete their course of study in three years.

The department encourages applicants with Bachelor of Science degrees in biology, chemistry, biochemistry, clinical laboratory science, microbiology, and zoology. Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They should have an undergraduate g.p.a. of at least 3.00 and a combined verbal and quantitative score of at least 1100 on the Graduate Record Exam (GRE) General test.

## Postgraduate Training

The Department of Pathology offers postgraduate clinical fellowship programs in hematopathology, transfusion medicine, clinical microbiology, cytopathology, molecular genetics pathology, and surgical pathology for physicians who have completed residency training in pathology. These fellowships consist of one to two years of diagnostic work and up to two years of laboratory research.

The department provides postdoctoral research training in immunology, neuropathology, apoptosis, cancer biology, and clinical microbiology as well as in other areas of cellular and molecular pathology. These positions are open to individuals with either a Ph.D. or M.D.

## Facilities

The Department of Pathology is well-equipped to carry out the sophisticated technology of modern cellular and molecular pathology. It administers more than 90,000 square feet of clinical laboratories at University of Iowa Hospitals and Clinics and has individual research and core facility laboratories, including histopathology and laser capture microscopy for cellular and molecular pathology research, in the Medical Research Center, Medical Laboratories, and at the Iowa City Veterans Affairs Medical Center. Also available are Carver College of Medicine research facilities for nucleic acid chemistry, hybridoma production, flow cytometry, ultrastructural studies, protein structure, image analysis, electron spin resonance, mass spectroscopy, nuclear magnetic resonance, and laboratory animal care.

## Pathology Courses

- 069:130 Clinical Laboratory Medicine for Physician Assistants** 1 s.h.  
Theory and practice of selected clinical laboratory techniques and procedures; emphasis on effective use of clinical laboratory in diagnosis and management of disease. Requirements: Physician Assistant Program enrollment.
- 069:133 Introduction to Human Pathology for Graduate Students** 4 s.h.  
Human disease; basic disease processes, organ-related and multisystem diseases; case analysis. Offered fall semesters.
- 069:143 Hemostasis and Thrombosis for CLS** 0-1 s.h.  
Laboratory hemostasis and thrombosis; theory and practice.
- 069:150 Clinical Laboratory Skills** 0-6 s.h.  
Summer clinical laboratory science instruction in Iowa City. Requirements: acceptance to Clinical Laboratory Science Program.
- 069:152 CLS Theory, Application, and Correlation** 0-5 s.h.  
Theory, application, and correlation of clinical laboratory science. Prerequisites: 069:150.
- 069:154 Clinical Chemistry I** 0-4 s.h.  
Theory, practical application, technical performance, and evaluation of clinical chemistry laboratory procedures; correlation of laboratory data with diagnosis of disease. Prerequisites: 069:150.
- 069:155 Clinical Chemistry II** 0-3 s.h.  
Advanced theory, practical application, technical performance, and evaluation of clinical chemistry laboratory procedures; correlation of laboratory data with diagnosis of disease. Prerequisites: 069:154.
- 069:156 Clinical Hematology I** 0-4 s.h.  
Introduction to theory, practical application, technical performance, and evaluation of hematological and hemostasis procedures; correlation of laboratory data with disease diagnosis. Prerequisites: 069:150.
- 069:157 Clinical Hematology II** 0-3 s.h.  
Advanced theory, practical application, technical performance, and evaluation of hematological and hemostasis procedures; correlation of laboratory data with disease diagnosis. Prerequisites: 069:156.
- 069:158 Clinical Microbiology I** 0-4 s.h.  
Introduction to theory, practical application, technical performance, and evaluation of procedures for isolation, identification, and susceptibility testing of infectious disease organisms in humans. Prerequisites: 069:150.

<b>069:159 Clinical Microbiology II</b>	0-3 s.h.

<b>069:160 Clinical Immunology and Molecular Diagnostics</b>	0-1 s.h.
Theory, application, and evaluation of immunological components, principles, and methodologies used to assess immune dysfunction; theory and application of molecular diagnostic tools. Prerequisites: 069:150.	
<b>069:162 Clinical Immunohematology I</b>	0-3 s.h.
Introduction to theory, practical application, technical performance, and evaluation of blood bank procedures required for storage and transfusion of blood and blood components. Prerequisites: 069:150.	
<b>069:163 Clinical Immunohematology II</b>	0-2 s.h.
Clinical immunohematology for laboratory science. Prerequisites: 069:162.	
<b>069:164 Phlebotomy for Clinical Laboratory Science</b>	0-1 s.h.
Theory, practical application, technical performance, and evaluation of procedures used in collecting, handling, and processing blood specimens. Prerequisites: 069:150.	
<b>069:166 Urine and Body Fluid Analysis</b>	0-1 s.h.
Theory, practical application, technical performance, and evaluation of procedures used in analyzing urine and other body fluids, including cerebrospinal, synovial, serous, and amniotic fluids. Prerequisites: 069:150.	
<b>069:170 Clinical Laboratory Management I</b>	0-2 s.h.
Theory, practical application, technical performance, and evaluation of laboratory management principles and associated models; critical thinking, problem solving, leadership skills. Prerequisites: 069:150.	
<b>069:171 Clinical Laboratory Management II</b>	0-3 s.h.
Advanced theory, application, technical performance, and evaluation of laboratory management principles and associated models; critical thinking, problem solving, leadership skills. Prerequisites: 069:170.	
<b>069:205 Medical Pathology I</b>	5 s.h.
Mechanisms of disease, etiology, pathogenesis, epidemiology, major clinical manifestations of disease in organ systems. Requirements: M.D. enrollment or graduate standing.	
<b>069:206 Medical Pathology II</b>	5 s.h.
Mechanisms of disease, etiology, pathogenesis, epidemiology, major clinical manifestations of disease in organ systems. Requirements: 069:205 and M.D. enrollment, or graduate standing.	
<b>069:211 Research in Pathology</b>	arr.
Basic aspects of pathology or clinical patient material; emphasis on experimental design, methods, literature review, obtaining formal answers to specific questions. Requirements: M.D. enrollment or graduate standing.	
<b>069:220 Seminar in Pathology</b>	1 s.h.
Current research and literature. Repeatable. Requirements: pathology graduate standing.	
<b>069:240 Laboratory Medicine in Clinical Practice</b>	arr.
Issues in appropriate use of clinical laboratory and pathology resources in the primary care setting; case-based approach. Requirements: third- or fourth-year M.D. enrollment.

**069:260 Translational Histopathology**

3 s.h.

Didactic sessions on human comparative histology, molecular and cellular pathology, and animal model applications; laboratory sessions on microscopy, histology, histotechnology, and immunohistochemistry, with group discussions of model papers; experience in scientific writing and oral presentation skills; for students who plan to investigate experimental models of human disease. Prerequisites: 156:201, 156:202, and 156:203.

**069:270 Pathogenesis of Major Human Diseases**

3 s.h.

Critical analysis of pathogenesis models in a series of major human diseases; clinical presentation, analysis of cellular and molecular events leading to the disease, discussion of key papers. Prerequisites: 156:201, 156:202, and 156:203.

**069:272 Cancer Molecular Epidemiology Seminar**

2 s.h.

Basic tumor biology and lab-based methods applied to development of translational approaches to prevention, early diagnosis, and treatment of human cancers. Offered fall semesters of even years. Same as 173:272.

**069:288 Molecular and Cellular Biology of Cancer**

3 s.h.

Fundamental aspects of oncology at the cellular and molecular levels; mechanisms of cancer initiation and progression, oncogene action, DNA damage and repair, carcinogenesis by radiation, chemicals, viruses; tumor immunology, anticancer therapies. Offered spring semesters of odd years. Requirements: strong basic science background. Same as 077:288.

**069:290 Medical Student Fellowships in Pathology (Externships)**

0 s.h.

First-hand experience in autopsy, surgical and clinical pathology, teaching, and research to further understanding of disease mechanisms, normal and pathologic anatomy, laboratory use.

**069:291 Warner Fellowship in Experimental Pathology**

0 s.h.

One-year, full-time membership in established research laboratory in the Department of Pathology or collaborating laboratory. Requirements: M.D. enrollment.

**Web site:** <http://www.uihealthcare.com/depts/med/pediatrics/index.html>

The Department of Pediatrics provides a solid foundation for M.D. students and postgraduate trainees. It offers extensive opportunities for general pediatrics and subspecialties.

Affiliated programs add depth to the educational program in community pediatrics and primary care. The department is affiliated with the child and material health programs of the Bureau of Family Health, Iowa Department of Public Health; the University of Iowa regional Child Health Specialty Clinics and Center for Disabilities and Development; Blank Children's Hospital in Des Moines; and community sites.

## M.D. Student Training

Didactic lectures and physical examination of the newborn, toddler, and older child provide M.D. students with their initial pediatric patient contact. This experience includes taking a history, performing a physical examination, appraisal of growth and development, nutrition, and symptomatology of newborns, toddlers, and adolescents.

For junior and senior medical students, the inpatient service provides training in the complex problems of disease and critical illness. Students participate in daily rounds involving general pediatrics and all subspecialties. Challenging and interesting cases are presented for discussion of diagnosis and treatment.

Outpatient experience, available in the junior clerkship and fourth-year electives, stresses principles and practices required for the maintenance of children's health, treatment of common general pediatric disorders, and the diagnosis and treatment of subspecialty ambulatory patients.

## Residency Program, Fellowships

The department offers an accredited three-year residency program designed to prepare trainees for professional careers in general pediatrics or for further fellowship training. The program meets the eligibility requirements of the American Board of Pediatrics (ABP).

Fellowships are available in many pediatrics subspecialties. Fellowship programs encourage development of knowledge and skill through research and clinical orientations in the chosen discipline. Upon satisfactory completion of the program, fellows meet the ABP eligibility requirements in their subspecialty.

## Facilities

The Department of Pediatrics is located in the University of Iowa Children's Hospital at University of Iowa Hospitals and Clinics. Inpatient and outpatient areas are adjacent to faculty offices.

The pediatric inpatient service has approximately 120 beds, and more than 50,000 patients are seen each year in the general, specialty, continuity care, and field clinics and in the Emergency Treatment Center. The Center for Disabilities and Development provides resources for children with developmental disabilities, cerebral palsy, or mental retardation.

The department maintains laboratories that perform both clinical and research studies.

## Pediatrics Courses

Principles, practices of health maintenance and treatment of acute and chronic illnesses in children; emphasis on diagnosis and evaluation, nutrition, behavior problems, disorders affecting children; patient care, daily rounds, ward work. Requirements: third-year M.D. enrollment.
- 070:013 Subinternship in Pediatrics: Blank Children's Hospital, Des Moines** arr.  
Experience in the care of general pediatric inpatients; daily rounds and teaching by senior residents and faculty members; daily didactic conferences. Requirements: fourth-year M.D. enrollment.
- 070:014 Emergency Room Blank Children's Hospital, Des Moines** arr.  
Pediatric emergencies and urgent care, proficiency in pediatric medicine procedures; expansion of basic knowledge. Requirements: fourth-year M.D. enrollment.
- 070:015 Neonatal Intensive Care Unit, Blank Children's Hospital** 4 s.h.  
Experience equivalent to intern on neonatal intensive care unit teaching service at Blank Children's Hospital, Des Moines; four-week rotation.
- 070:016 Pediatric Hematology/Oncology** arr.  
Basic concepts of clinical approach to hematologic and oncologic problems in children and adolescents; primarily outpatient experience. Requirements: fourth-year M.D. enrollment.
- 070:017 Pediatric Neurology** arr.  
Participation in outpatient and inpatient activities, teaching, morning ward rounds. Requirements: fourth-year M.D. enrollment.
- 070:019 Pediatric Cardiology** arr.  
Participation in clinical activities; observation of cardiac catheterization; experience in cardiac auscultation, ECG, radiography; emphasis on physical diagnosis, approach to heart disease and murmurs in children. Requirements: fourth-year M.D. enrollment.
- 070:023 Developmental and Behavioral Pediatrics** 4 s.h.  
Normal developmental sequence of gestation and early childhood, impact of environmental influences; antecedents of developmental disabilities; methods to detect cognitive and motor delays in preschool children; long-term consequences of developmental disabilities for children, their families; advantages of interdisciplinary teamwork. Requirements: fourth-year M.D. enrollment.
- 070:025 Child Abuse and Neglect** 4 s.h.  
Hospital- and community-based multidisciplinary responses to child abuse and neglect; experience developing diagnostic skills to recognize, assess, and report cases of child abuse and neglect. Requirements: fourth-year M.D. enrollment.
- 070:027 Neonatology (NICU)** arr.  
Experience caring for ill neonates, proficiency in using diagnostic tests and procedures; responsibility for care of several infants; reference and literature review, conferences, teaching, clinical rounds. Requirements: fourth-year M.D. enrollment.
- 070:028 Pediatric Inpatient Care Subinternship** arr.  
Experience on pediatric inpatient team caring for patients ranging from infants through adolescents; evaluation, formulation of differential diagnoses, diagnostic workups, appropriate therapy programs. Requirements: fourth-year M.D. enrollment.

- 070:029 Critical Care (PICU)** 4 s.h.  
Direct care of critically ill children in a multidisciplinary medical/surgical/cardiac intensive care unit, under supervision of pediatric residents and staff; participation in educational activities and formal clinical rounds. Requirements: fourth-year M.D. enrollment.
- 070:030 Medical Genetics for the Senior Student** arr.  
Participation in diagnostic, therapeutic problems; techniques for evaluation, appropriate counseling in genetic cases; conferences. Requirements: fourth-year M.D. enrollment.
- 070:033 Pediatric Gastroenterology** arr.  
Diagnosis, management, treatment of diseases of gastrointestinal tract, liver, pancreas in children; ward rounds, consultations, clinics, diagnostic procedures, conferences. Requirements: fourth-year M.D. enrollment.
- 070:040 Infectious Disease Consults** 4 s.h.  
Requirements: fourth-year M.D. enrollment.
- 070:043 Pediatric Allergy** arr.  
Experience in evaluating and treating respiratory and allergic diseases in infants, children, and adolescents. Requirements: fourth-year M.D. enrollment.
- 070:055 General Pediatric Outpatient Clinic** 4 s.h.  
Work in general pediatric outpatient clinics with acutely or chronically ill patients and with well children. Requirements: fourth-year M.D. enrollment.
- 070:060 Continuity of Care in Outpatient General Pediatrics** 4 s.h.  
Work with experienced general pediatrician in a longitudinal clinical experience for the academic year; paired with faculty pediatrician to see patients in a weekly clinic, provide clinical care to a defined patient population; growth and development, health supervision, and management of common acute and chronic clinical problems. Requirements: fourth-year M.D. enrollment.
- 070:110 Medical Genetics** 2 s.h.  
Gene structure and function, basic genetics concepts, application to problems in human disease. Offered fall semesters. Requirements: M.D. enrollment or graduate standing in related health field.
- 070:201 Primary Care: Infants, Children, and Adolescents II** 3 s.h.  
Enhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Requirements: (for 096:220) 096:219 or 096:280; (for 070:201) 096:219 and 096:280. Same as 096:220.
- 070:245 Evaluation of Children with ADHD and LD** arr.  
Clinical experience in conducting pediatric neuropsychology examinations in the Pediatric Attention/Learning Disorders Clinic. Requirements: course on psychological testing (including IQ) and graduate psychology standing (school, counseling, rehabilitation, clinical). Same as 07P:207.
- 070:247 Neuropsychology of Learning Seminar** arr.  
Research and theory on varied approaches to learning disability; language disability, visual/perceptual disability, serial order and memory deficits. Prerequisites: 070:245 or 070:251. Requirements: course on psychological testing including IQ.
- 070:251 Clinical Pediatric Neuropsychology** arr.  
Learning and behavior disorders resulting from central nervous system dysfunction; clinical experience in assessment of cognitive, behavioral patterns.
- 070:252 Assessment of Attention Deficit Disorder** 3 s.h.  
Participation in clinical, research, didactic work in evaluating children with attention deficit disorder. Requirements: experience in intellectual assessment of children.
- 070:253 Assessment of Behavior Disorders** arr.  
Experience in diagnostic and behavioral assessments of children with conduct disorders.

**070:255 Autism Spectrum Disorders**

2 s.h.

Overview of autism spectrum disorders (ASDs), including autistic disorder, Asperger's disorder, other pervasive developmental disorders; ASD diagnoses and their etiology; tools used in assessing individuals with ASDs; common interventions for ASDs; resources for work with individuals who have ASDs.

**070:256 Pediatric Psychology Inpatient Practicum**

1-3 s.h.

Knowledge and practical skills in implementing psychological practice with hospitalized pediatric patients; referrals include challenging behaviors (e.g., treatment adherence, disruptive behaviors), neuropsychological assessment (e.g., child with seizure disorder, child with TBI), and social-emotional evaluation; how to consult with medical teams and work with families with children who have acute and chronic health conditions, including asthma, diabetes, cancer, brain tumors, burns, head injury. Requirements: enrollment in an applied doctoral program in a psychological field. Recommendations: completion of a practicum in an outpatient Pediatric Psychology Clinic.

**070:258 Seminar in Pediatric Psychology**

2 s.h.

Basic introduction to the field of pediatric psychology; professional issues in pediatric psychology; consultation and professional relations with physicians; psychological services in pediatric psychology; specialized populations, such as childhood chronic illness, children's hospitalization and surgery. Requirements: enrollment in an applied doctoral program in a psychological field.

**070:260 Neurobehavioral Assessment and Intervention**

1-3 s.h.

Experience evaluating the interaction between a child's neurocognitive profile and their behavior at school and home; interviews with parents/children, assessments to assist in identifying cognitive and learning disorders, behavior analyses to identify interventions; follow-up with families and school teams.

**070:261 Autism Assessment and Behavioral Intervention**

1-3 s.h.

Experience evaluating children suspected of having an autism spectrum disorder; behavioral assessments/interventions with children who have been diagnosed with an autism spectrum disorder and who display challenging behaviors in home and/or school; interviews with parents, assessments to assist in the diagnosis of autism spectrum disorders, behavioral assessments/interventions; follow-up with families and school teams.

**070:262 Biobehavioral Assessment and Intervention**

1-3 s.h.

Experience conducting brief functional assessments and behavioral treatments for children and adults with developmental disabilities; interviews with caregivers, behavioral assessments, matched treatments (e.g., functional communication training); follow-up with caregivers.

**070:263 Evaluation and Treatment of Pediatric Feeding Disorders**

1-3 s.h.

Experience evaluating children with varied feeding disorders, such as food overselectivity by texture or type, dependence on gastrostomy or nasogastrostomy tubes, failure to grow adequately due to inadequate caloric intake; methods to evaluate feeding behaviors, evaluate design interventions, and measure outcomes; caregiver training and follow-up.

**070:264 Clinical Applications of Applied Behavior Analysis**

1-3 s.h.

Experience behavioral observations, consultation, and/or conducting behavioral assessments (including preference assessments and functional analyses), matched treatments; interviews with care providers, collect behavioral data, conduct behavioral assessments, matched treatments; follow-up with care providers.

**070:265 Research in Applied Behavior Analysis**

1-3 s.h.

Experience developing and conducting research in applied behavior analysis; conduct behavioral observations, behavioral assessments, matched treatments; weekly readings and lab meetings; participate in research sessions as data collector or therapist.

**070:300 Pediatric Independent Study**

arr.

**070:333 Pediatric Intensive Care off Campus**

arr.

Arranged by student and department. Requirements: fourth-year M.D. enrollment.

**070:653 Adult and Pediatric Nephrology and Hypertension**

arr.

Requirements: (for 070:653) fourth-year M.D. enrollment. Same as 078:653.

**070:662 Medical and Pediatric Endocrinology**

arr.

Requirements: (for 070:662) fourth-year M.D. enrollment. Same as 078:662.

**070:998 Pediatrics on Campus**

arr.

Requirements: fourth-year M.D. enrollment.

**070:999 Pediatrics off Campus**

arr.

Requirements: fourth-year M.D. enrollment.

# Pharmacology

**Head:** Curt D. Sigmund

**Professors:** Mario Ascoli, Timothy Brennan, Frank Faraci, Rory Fisher, Donna L. Hammond, Donald Heistad, Raymond Hohl, A. Kim Johnson, Ulla Kopp, Curt D. Sigmund

**Professors emeriti:** Jeffrey Baron, Ranbir Bhatnagar, Gary R. Dutton, Gerald F. Gebhart, Herbert K. Proudfit, Thomas Shires, James Spratt, Thomas Tephly, Harold Williamson

**Associate professors:** Minnetta Gardinier, Barry Kasson, John Koland, Kathryn G. Lamping, Dawn E. Quelle, Frederick W. Quelle, Stefan Strack, Yuriy Usachev

**Assistant professors:** Songhai Chen, D.P. Mohapatra, David Sheff

**Graduate degrees:** M.S., Ph.D. in Pharmacology

**Web site:** <http://www.medicine.uiowa.edu/pharmacology>

The Department of Pharmacology provides professional training in pharmacology for health science students and participates with other departments in educational and research activities such as the Medical Scientist Training Program, the Physician Scientist Training Program, the Molecular and Cellular Biology Program, the Neuroscience Program, the Holden Comprehensive Cancer Center, and the Iowa Cardiovascular Center.

The department was a pioneer in offering pharmacology to undergraduate students with little or no science background. The lecture and discussion sessions in 071:120 Drugs: Their Nature, Action, and Use emphasize the mechanisms of drug action and give students a background for rational decisions concerning use of drugs. Undergraduates interested in science careers may attend an eight-week summer research program that provides opportunities for outstanding students to conduct research in faculty laboratories.

Pre- and postdoctoral students can pursue research training in all areas of pharmacology in the department in preparation for career opportunities in academia, government, and industry.

## Graduate Programs

The Department of Pharmacology offers graduate study programs leading to the M.S. and Ph.D. These programs include both didactic and research experience. Qualified students may pursue an M.S. in clinical pharmacology or a combined M.D./Ph.D. in the Medical Scientist Training Program.

### Master of Science

The Master of Science in pharmacology requires a minimum of 30 s.h. of graduate credit. Core course requirements are as follows.

071:135 Principles of Pharmacology	1 s.h.
071:136 Pharmacogenetics and Pharmacogenomics	1 s.h.
071:137 Neurotransmitters	1 s.h.
071:203 Pharmacology Research	arr.
071:204 Pharmacology Seminar	1 s.h.
071:250 Advanced Problem Solving in Pharmacological Sciences	1 s.h.
071:302 Pharmacology for Graduate Students	6 s.h.
072:153 Graduate Physiology	4 s.h.
156:201 Fundamentals of Gene Expression	1 s.h.
156:202 Fundamentals of Protein Regulation	1 s.h.
156:203 Fundamentals of Dynamic Cell Processes	1 s.h.
156:204 Biostatistics for Biomedical Research	1 s.h.

Students also are expected to gain maximum experience in laboratory research while completing their course work. Satisfactory preparation and oral defense of a thesis based on the student's own research are required for completion of the program.

### Doctor of Philosophy

The Doctor of Philosophy in pharmacology requires a minimum of 72 s.h. of graduate credit. Core course requirements are as follows.

071:135 Principles of Pharmacology	1 s.h.
071:136 Pharmacogenetics and Pharmacogenomics	1 s.h.
071:137 Neurotransmitters	1 s.h.
071:138 Ion Channels	1 s.h.
071:203 Pharmacology Research	arr.
071:204 Pharmacology Seminar	1 s.h.
071:208 G Proteins and G Protein-Coupled Receptors	1 s.h.

071:209 Steroid Receptor Signaling	1 s.h.
071:250 Advanced Problem Solving in Pharmacological Sciences	1 s.h.
071:302 Pharmacology for Graduate Students	6 s.h.
072:153 Graduate Physiology	4 s.h.
142:225 Growth Factor Receptor Signaling	1 s.h.
156:201 Fundamentals of Gene Expression	1 s.h.
156:202 Fundamentals of Protein Regulation	1 s.h.
156:203 Fundamentals of Dynamic Cell Processes	1 s.h.
156:204 Biostatistics for Biomedical Research	1 s.h.

Individual faculty research advisors may require additional courses.

During the first semester in the program, students are required to work in two different faculty laboratories before selecting a laboratory in which to pursue thesis research. Students then are expected to gain maximum laboratory research experience while completing course work. The Ph.D. comprehensive examination (written and oral) is given at the end of the fourth semester. Satisfactory preparation and oral defense of the thesis complete the program.

There is no departmental foreign language requirement.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They should have a g.p.a. of at least 3.00 and a combined verbal and quantitative score of at least 1200 on the Graduate Record Examination (GRE) General Test. They should have completed undergraduate courses in chemistry, biology, biochemistry, and mathematics.

Admission to the graduate programs is determined by the faculty after receipt of a completed formal application and interview (if appropriate) by faculty members or other designated individuals. Each application is reviewed individually. Some standard admission criteria may be set aside for applicants who possess outstanding credentials in other areas.

## Financial Support

The department provides all Ph.D. students and some M.S. students with financial support in the form of stipends and tuition support. Support is renewed annually based on satisfactory progress toward meeting degree requirements.

## Pharmacology Courses

<b>071:105 Pharmacology for Health Sciences: Medical</b>	5 s.h.
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: 050:240 and 099:163. Requirements: M.D. enrollment.	
<b>071:111 Pharmacology for Dental Students</b>	5 s.h.
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered spring semesters. Prerequisites: 072:152 and 099:161. Requirements: D.D.S. enrollment.	
<b>071:115 Pharmacology for Health Sciences--Nurse Anesthetist</b>	5 s.h.
Principles of pharmacology; pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: 060:270 or 096:270. Requirements: enrollment in Anesthesia Nursing Program.	
<b>071:120 Drugs: Their Nature, Action, and Use</b>	2 s.h.
Principles of drug action, toxicity; sedatives, stimulants, hallucinogens, narcotics, over-the-counter agents, antibiotics, oral contraceptives. Offered spring semesters. Recommendations: closed to Pharm.D. students.	
<b>071:125 Pharmacology for Health Sciences: Physician Assistant Students</b>	6 s.h.
Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters. Prerequisites: 072:164 and 099:164. Requirements: Physician Assistant Program enrollment.	
<b>071:130 Drug Mechanisms and Actions</b>	3 s.h.
Introduction to principles of pharmacology, pharmacologic actions of drugs. Offered spring semesters. Requirements: undergraduate biochemistry and physiology courses.	

- 071:135 Principles of Pharmacology** 1 s.h.  
Basic pharmacological principles underlying drug absorption, drug distribution throughout the body, drug metabolism, and drug elimination; how these processes determine drug dosing and the means by which dosing parameters are characterized; drug receptor interactions and their quantitation. Offered spring semesters.
- 071:136 Pharmacogenetics and Pharmacogenomics** 1 s.h.  
Impact of genetic variation on the actions and metabolism of drugs; database search techniques to identify variants. Offered spring semesters. Prerequisites: 071:135. Recommendations: undergraduate or graduate biochemistry.
- 071:137 Neurotransmitters** 1 s.h.  
Mechanisms of neurotransmission focusing on mechanisms of synthesis, regulation of release, mechanisms of action, means of degradation, and CNS pathways for major neurotransmitters; disease states involving various neurotransmitter systems. Offered spring semesters.
- 071:138 Ion Channels** 1 s.h.  
A heuristic, semiquantitative approach to concepts in ion channel physiology and pharmacology; discussions on up-to-date physical principles, classification, and structure/function relationships for major voltage-gated ion channels that facilitate the application of abstract concepts to physiological, pharmacological, and general biological problems. Offered spring semesters.
- 071:180 Pharmacology for Pharmacy Students I** 3 s.h.  
Principles of pharmacology, toxicology; drug and toxic mechanisms; systemic and organ-specific pharmacologic and toxic responses. Offered spring semesters. Requirements: first-year Pharm.D. enrollment or graduate standing.
- 071:181 Pharmacology for Pharmacy Students II** 4 s.h.  
Continuation of 071:180. Offered fall semesters. Requirements: second-year Pharm.D. enrollment or graduate standing.
- 071:203 Pharmacology Research** arr.
- 071:204 Pharmacology Seminar** 1 s.h.
- 071:208 G Proteins and G Protein-Coupled Receptors** 1 s.h.  
Structure and function of small molecular weight G proteins; heteromeric G proteins and G protein-coupled receptors. Offered spring semesters. Prerequisites: 156:201 (BISC:5201), 156:202 (BISC:5202), and 156:203 (BISC:5203). Recommendations: 142:225 (MCB:6225).
- 071:209 Steroid Receptor Signaling** 1 s.h.  
Structure-function relationship and genomic and nongenomic actions of the steroid hormone receptor family; basis for actions of novel new ligands on these receptors. Offered spring semesters. Same as 072:209, 132:209.
- 071:210 Special Topics in Pharmacology** arr.
- 071:215 Topics in Neuropharmacology** 1 s.h.  
Recent advances in neuropharmacology, developmental neurobiology, neuroendocrinology, related neurosciences.
- 071:225 Topics in Molecular Pharmacology** 1 s.h.  
Recent advances in molecular pharmacology; receptor, postreceptor events in stimulus coupling.
- 071:235 Topics in Pain Analgesia** 1 s.h.  
Recent advances in pain research, therapy.
- 071:250 Advanced Problem Solving in Pharmacological Sciences** 1 s.h.  
Discussion of methodologies, strategies, and approaches commonly used to solve pharmacological sciences problems; use of interpersonal problem-solving skills to develop experimental study plans for solving contemporary scientific problems in pharmacology.
- 071:277 Mechanisms of Pain Transmission** 3 s.h.

Anatomical, physiological, and pharmacological mechanisms underlying peripheral and central neuronal processing of pain; emphasis on neuronal changes that occur during pathological conditions such as inflammation/arthritis, peripheral neuropathy. Offered fall semesters of even years. Same as 101:277, 132:277.

**071:302 Pharmacology for Graduate Students**

6 s.h.

Principles of pharmacology, pharmacologic actions of drugs, correlation with therapeutic uses. Offered fall semesters.

Prerequisites: 072:153, 156:201, 156:202, and 156:203.

# Physical Therapy and Rehabilitation Science

**Director:** Richard K. Shields

**Professors:** Annunziato Amendola (Orthopaedics and Rehabilitation), Thomas Cook (Occupational and Environmental Health), Warren Darling (Health and Human Physiology), Richard K. Shields, Kathleen Sluka

**Professors emeriti:** David H. Nielsen, Gary L. Smidt, Gary L. Soderberg

**Associate professors:** David Asprey (Physician Assistant Program), Kelly Cole (Health and Human Physiology), H. John Yack

**Adjunct associate professor:** Bryon Ballantyne

**Clinical associate professor:** Joseph Chen (Orthopaedics and Rehabilitation)

**Assistant professors:** Laura Frey Law, Susanne M. Morton, Barbara Rakel (Nursing), Glenn N. Williams, Brian R. Wolf (Orthopaedics and Rehabilitation)

**Adjunct assistant professor:** Pamela A. Duffy

**Lecturer:** Byron Bork

**Adjunct lecturer:** Donald Shurr

**Associates:** Karla Laubenthal, Erin Pazour, Kelly Sass, Carol Vance, David Williams

**Adjunct associates:** Lisa Ainsworth, Amy Baker, Rhonda Barr, Sarah Bengtson, Kathryn Bewyer, Wendy Craft, Kim Eppen, Richard Evans, Julie Fitzpatrick, Jerry F. Gillon, James Holte, Melanie House, Alexas Ihrig, Patrick Johnston, Carol Kelderman, Janine Kelly, Lisabeth Kestel, Jill Kilkenny, Ken Leo, Joseph A. Leone, Mary Milavetz, Bruce Miller, Joy Miller, Shelley Mockler, David Reese III, Mike Reiling, Elayne Sexsmith, Michael Shaffer, Mary Shephard, Elizabeth Vermeer

**Graduate degrees:** D.P.T.; M.A. in Physical Therapy, Ph.D. in Physical Rehabilitation Science

**Web site:** <http://www.healthcare.uiowa.edu/PhysicalTherapy>

Physical therapists provide services to patients and clients who have impairments, functional limitations, disabilities, pain, or changes in physical function resulting from injury, disease, or other causes. Physical therapists practice and collaborate with a variety of health professionals. In the area of health promotion and wellness, they provide screening examinations, prescribe fitness programs, and educate the public regarding healthy lifestyles. Research, teaching, consultation, and administration also are parts of a physical therapist's professional role.

A wide variety of opportunities exist for professional practice in inpatient, outpatient, and community-based settings. Examples include practice in general or specialized hospitals, programs for children with disabilities, private physical therapy clinics, extended care facilities, nursing homes, community and governmental agencies, rehabilitation centers, the armed forces, foreign service, home health agencies, school systems, fitness centers, and athletic facilities. Research and teaching careers in academic institutions are available for those who earn a Ph.D. in rehabilitation science.

The Physical Therapy and Rehabilitation Science Program is located in the Carver College of Medicine on the University of Iowa health sciences campus, which includes University of Iowa Hospitals and Clinics, one of the nation's largest university-owned teaching hospitals. The program has eight state-of-the-art independent research laboratories and is well equipped for classroom and laboratory instruction and innovative research. Students have access to faculty members in the basic sciences and medicine, basic sciences courses, clinical specialty expertise, and innovative learning experiences associated with a medical college environment.

## Graduate Programs

The Physical Therapy and Rehabilitation Science Program offers the Doctor of Physical Therapy (the entry-level professional degree), Doctor of Philosophy in physical rehabilitation science, and Master of Arts in physical therapy (for students working toward the Ph.D.). The D.P.T. program admits 36 students each year. Around 20 physical therapists are enrolled in the Ph.D. program each year.

### Doctor of Physical Therapy

The Doctor of Physical Therapy (D.P.T.) professional program requires a minimum of 101 s.h. and is completed in two and one-half years. The program is fully accredited by the Commission on Accreditation in Physical Therapy Education. Satisfactory completion of the professional program qualifies candidates to take the National Physical Therapy Examination for licensure to practice. The minimum passing score on the exam is the same in all jurisdictions.

### Technical Standards for Graduation

Doctor of Physical Therapy graduates must possess and demonstrate the physical and cognitive skills and character attributes required to provide physical therapy services in a broad variety of clinical situations and environments. All D.P.T. candidates must perform, with or without reasonable accommodation, the following skills safely, effectively, efficiently, and in compliance with the legal and ethical standards set by the American Physical Therapy Association Code of Ethics and Standards of Practice.

- communicate effectively through appropriate verbal, nonverbal, and written communication with patients, families, and others;
- demonstrate ability to apply universal precautions;
- utilize appropriate tests and measures in order to perform a physical therapy examination; examples include, but are not limited to, examination and evaluation of cognitive/mental status, vital signs, skin and vascular integrity, wound status, endurance, segmental length, girth, volume, sensation, strength, tone, reflexes, movement patterns, coordination, balance, developmental stage, soft tissue, joint motion/play, cranial and peripheral nerve function, posture, gait, functional abilities, assistive devices fit/use, psychosocial needs, and the pulmonary system;

- demonstrate the ability to reach diagnostic and therapeutic judgments through analysis and synthesis of data gathered during patient/client examination in order to develop an appropriate plan of care;
- perform fully, or in a reasonably independent manner, physical therapy interventions appropriate to the patient's status and desired goals;
- apply teaching/learning theories and methods in health care and community environments;
- accept criticism and respond by appropriate behavior modification;
- possess the perseverance, diligence, and consistency to complete the physical therapy curriculum and enter the practice of physical therapy.

Applicants with health conditions or disabilities who need accommodation to meet the technical standards for graduation should contact the University's Student Disability Services office.

### Curriculum

D.P.T. students earn the required 101 s.h. by completing the following curriculum. Students have the option to earn a total of 3 s.h. in electives.

#### First Summer Session

101:140 Introduction to Physical Therapy Practice	2 s.h.
101:141 Principles of Physical Therapy I	2 s.h.
101:205 Health Promotion and Wellness	3 s.h.

#### First Semester (Fall)

060:108 Human Anatomy	5 s.h.
069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
101:120 Professional Issues and Ethics	1 s.h.
101:142 Principles of Physical Therapy II	2 s.h.
101:189 Clinical Education I	1 s.h.
101:209 Surface Anatomy	1 s.h.
101:210 Kinesiology and Pathomechanics	4 s.h.
101:235 Case-Based Learning I	1 s.h.

#### Second Semester (Spring)

060:234 Medical Neuroscience	4 s.h.
101:131 Therapeutic Physical Agents	2 s.h.
101:185 Musculoskeletal Therapeutics I	3 s.h.
101:190 Clinical Education II	1 s.h.
101:201 Applied Clinical Medicine	2 s.h.
101:206 Cardiopulmonary Therapeutics	3 s.h.
101:236 Case-Based Learning II	1 s.h.
Elective (optional)	1 s.h.

#### Second Summer Session

101:119 Physical Therapy Management and Administration I	2 s.h.
101:143 Selected Topics in Physical Therapy Practice	2 s.h.
101:176 Pharmacology for Physical Therapists	3 s.h.
101:194 Clinical Internship	3 s.h.

#### Third Semester (Fall)

101:122 Psychosocial Aspects of Patient Care	1 s.h.
101:133 Pain Mechanisms and Treatment	2 s.h.
101:134 Physical Therapy Management of Integumentary System	2 s.h.
101:170 Prosthetics and Orthotics	2 s.h.
101:202 Musculoskeletal Therapeutics II	3 s.h.

101:224 Principles of Motor Control	4 s.h.
101:237 Service Learning I	1 s.h.
101:248 Research in Physical Therapy	2 s.h.
Elective (optional)	1 s.h.

**Fourth Semester (Spring)**

101:121 Physical Therapy Management and Administration II	1 s.h.
101:151 Progressive Functional Exercise	2 s.h.
101:172 Radiology/Imaging for Physical Therapists	2 s.h.
101:173 Differential Diagnosis in Physical Therapy	2 s.h.
101:191 Clinical Education III	1 s.h.
101:200 Pediatric Physical Therapy	1 s.h.
101:203 Musculoskeletal Therapeutics III	4 s.h.
101:225 Neuromuscular Therapeutics	3 s.h.
101:238 Service Learning II	1 s.h.
101:251 Critical Inquiry in Physical Therapy I	2 s.h.
Elective (optional)	1 s.h.

**Third Summer Session**

101:194 Clinical Internship	7 s.h.
-----------------------------	--------

**Fifth Semester (Fall)**

101:194 Clinical Internship	5 s.h.
101:252 Critical Inquiry in Physical Therapy II	1 s.h.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They must have completed a baccalaureate degree from an accredited institution in the United States, or anticipate completing the degree before enrolling in the D.P.T. program. They must have a cumulative g.p.a. of at least 3.00 and must have completed the following prerequisite course work, preferably with a g.p.a. of at least 3.00. All science courses must include the appropriate laboratory instruction. The prerequisite courses must have been taken for a letter grade. Credit awarded through advanced placement testing may be applied only to the mathematics requirement.

**Biological sciences:** a complete introductory course in principles of general biology or zoology, and advanced course work in biology or zoology (for which an introductory course is prerequisite) equivalent to 12 s.h.

**Physics:** a complete introductory course equivalent to 8 s.h.

**Chemistry:** a complete introductory course equivalent to 8 s.h.

**Physiology:** a systemic human physiology course equivalent to 3 s.h.

**Psychology:** courses equivalent to 6 s.h.

**Mathematics:** a college-level mathematics course, at the level of trigonometry or higher, equivalent to 3 s.h.

**Statistics:** a statistical methods course equivalent to 3 s.h.

The program recommends that applicants have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test. They must take the test early enough for their scores to be received by the University in time for the November 1 application deadline.

Applications are submitted online through the Physical Therapist Centralized Application Service (PTCAS). PTCAS allows applicants to use a single application and one set of materials to apply to multiple physical therapy programs. Once the application portfolio is complete, PTCAS forwards it to The University of Iowa.

Personal interviews are required of applicants selected for consideration by the admissions committee. Interviews are conducted at The University of Iowa. The physical therapy admissions committee selects applicants who appear to be best qualified for the study and practice of the profession. Some preference is given to Iowa residents.

Applications are accepted from July 1 to November 1 for entry the following summer. Prospective students should apply as early as possible.

#### **EARLY ADMISSION**

The Doctor of Physical Therapy early admission plan is available to outstanding applicants. Generally, applicants have a g.p.a. of 3.75 or higher and a combined verbal and quantitative score above 1100 on the Graduate Record Examination (GRE) General Test. Application materials are the same as those for regular admission. Application deadline is September 15; applicants are notified of admission by November 1. Those who are interviewed but are not selected for early admission are automatically placed in the final general applicant pool. Contact the Physical Therapy and Rehabilitation Science Program for more information.

#### **Background Checks**

Enrollment in the Doctor of Physical Therapy program is contingent on a successful criminal background check. Drug screening may be required for some clinical rotations.

#### **Expenses**

Applicants admitted to the D.P.T. program must make an advance tuition payment of \$300, which is forfeited if the applicant does not enroll. In addition to paying University tuition and fees, students are assessed laboratory fees for the human anatomy and medical neuroscience courses and are responsible for purchasing lab coats, patient evaluation kits, and course syllabi.

All students are required to comply with the pre-entry and periodic health screening program developed by Student Health Service in cooperation with University of Iowa Hospitals and Clinics. Students must pay for the health screenings. Students also are required to have health insurance.

#### **Ph.D. in Physical Rehabilitation Science**

The Doctor of Philosophy in physical rehabilitation science requires a minimum of 72 s.h. of graduate credit. The program is designed to advance the student's ability to independently develop and carry out research that establishes the scientific basis for prevention, evaluation, and treatment of impairments, functional limitations, and disability. The curriculum is flexible enough to accommodate research focusing on basic, applied, or clinical studies in the rehabilitation sciences. Students have access to the program's research laboratories (see "Research Facilities" later in this section).

Graduates who complete the program are prepared for academic appointments that emphasize research, scholarship, and teaching. They possess:

- theoretical and scientific knowledge to perform basic, applied, or clinical-level original research that leads to scientific presentations, publication in peer-reviewed journals, and competition for extramural funding through scientific grant writing;
- breadth of knowledge in exercise physiology, biomechanic, neuroscience, or motor control specialty areas as they relate to impairment, functional limitation, and disability; and
- theoretical and practical skills required for college or university teaching at the professional entry and advanced graduate levels.

#### **Curriculum**

Ph.D. students complete a minimum of 72 s.h. beyond the baccalaureate. Each student and his or her faculty advisor develop an individualized study plan. A preliminary study plan is developed within the first 9 s.h. of graduate study; a final plan is submitted to the Graduate College when the Ph.D. comprehensive examination is scheduled.

To ensure breadth of knowledge, all students complete specific core, research, and scientific specialty area content courses. Elective courses are selected to provide in-depth study of the specialty; they are complemented by an advanced seminar course specific to the student's specialty and taken in preparation for the comprehensive examination.

Students must satisfactorily complete the comprehensive examination, which is taken after all required course work is completed. Doctoral study culminates with 12 s.h. of thesis research and an oral examination.

#### **GENERAL CORE REQUIREMENT**

Ph.D. students must complete the following core requirements. Exception: the capstone course (101:300 Rehabilitation Research Capstone Project) is recommended but not required for students who enter the program with a master's or doctoral-level degree; however, it is required for all students who enter the program with a bachelor's degree.

101:212 Biomedical Instrumentation and Measurement	3 s.h.
101:220 Seminar in Rehabilitation Science (taken twice)	2 s.h.
101:280 Teaching Practicum	arr.
101:300 Rehabilitation Research Capstone Project	arr.
101:326 Scientific Writing in Rehabilitation Science	3 s.h.
650:270 Principles of Scholarly Integrity	1 s.h.

171:161 Introduction to Biostatistics	3 s.h.
or	
22S:102 Introduction to Statistical Methods	3 s.h.

171:162 Design and Analysis of Biomedical Studies	3 s.h.
or	
22S:148 Intermediate Statistical Methods	4 s.h.

#### RESEARCH REQUIREMENT

Students complete at least 24 s.h. from the following.

101:214 Advanced Seminar in Rehabilitation Science	3 s.h.
101:284 Practicum in Research	arr.
101:301 Thesis: Rehabilitation Science	12 s.h.
101:325 Independent Study	arr.
101:327 Research in Rehabilitation Science	arr.

#### SPECIALTY CONTENT REQUIREMENT

Each student must complete at least 9 s.h. in his or her scientific specialty area. Students may choose courses from the following list, but other courses suited to the student's background knowledge and interest area are considered.

##### Physical Therapy

101:210 Kinesiology and Pathomechanics	4 s.h.
101:224 Principles of Motor Control	4 s.h.
101:275 Analysis of Sensori-Motor Systems in Health and Disease	3 s.h.
101:277 Mechanisms of Pain Transmission	3 s.h.
101:285 Biomechanical Analysis in Rehabilitation	3 s.h.

##### Health and Human Physiology

027:141 Exercise Physiology	3 s.h.
027:145 Cardiovascular Physiology	3 s.h.
027:155 Skeletal Muscle Biology	3 s.h.
027:160 Motor Control I: Neurophysiological Basis	3 s.h.
027:197 Biomechanics of Human Motion	4 s.h.
027:314 Seminar in Motor Control	1 s.h.

##### Pharmacology

071:235 Topics in Pain Analgesia	1 s.h.
071:250 Advanced Problem Solving in Pharmacological Sciences	1 s.h.

##### Neuroscience

132:180 Fundamental Neurobiology	4 s.h.
132:234 Medical Neuroscience	4 s.h.
132:235 Neurobiology of Disease	3 s.h.

**Epidemiology**

173:290 Intervention and Clinical Trials 3 s.h.

**Occupational and Environmental Health**

175:190 Occupational Ergonomics I 3 s.h.

175:294 Occupational Ergonomics II 3 s.h.

175:295 Clinical Ergonomics 3 s.h.

**Civil and Environmental Engineering**

053:190 Readings in Civil and Environmental Engineering 2 s.h.

**Biomedical Engineering**

051:121 Introduction to Bioinformatics 4 s.h.

**Anatomy and Cell Biology**

060:232 Advanced Human Anatomy arr.

**Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They should have a cumulative g.p.a. of at least 3.00 and a combined verbal and quantitative score of at least 1100 on the Graduate Record Exam (GRE) General Test. A minimum of two years of clinical experience is desirable.

Applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a complete Graduate College application form, test scores, transcripts, three letters of recommendation, and a statement of purpose. Completed applications should be sent to the Physical Therapy and Rehabilitation Science Program.

Personal interviews are required of all applicants selected for consideration by the admissions committee. On-campus interviews are preferred, but telephone interviews may be substituted when necessary.

Application deadlines are October 15 for spring semester entry (notification by December 15); March 15 for summer entry (notification by May 15); and May 15 for fall semester entry (notification by July 15).

**Financial Support**

A number of research assistantships are available for Ph.D. students. Faculty advisors provide guidance for students seeking external scholarship support through foundations and federal programs that support Ph.D. training.

**Research Facilities**

The program's state-of-the-art research facilities include the Orthopedic Gait Analysis Laboratory and a spinal cord research laboratory at University Hospitals and Clinics; the Neuromuscular Research/Motor Control Laboratory; the Musculoskeletal Biomechanics and Sports Medicine Research Laboratory; the Neurobiology of Pain Laboratory; the Neural Control of Movement Laboratory; and the Neuromuscular Biomechanics Laboratory. Use of other laboratories may be arranged.

**Physical Therapy and Rehabilitation Courses**

- 101:119 Physical Therapy Management and Administration I** 2 s.h.  
The changing U.S. health care system; access to physical therapy services, reimbursement to health care providers, mechanisms for controlling costs while providing quality care; clinical vignettes, small group problem solving. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:120 Professional Issues and Ethics** 1 s.h.  
Evolution of physical therapy and rehabilitation science as a profession; contemporary issues in education and practice; ethical theory and approaches to analyzing and acting on ethical problems; professional and peer relationships. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:121 Physical Therapy Management and Administration II** 1 s.h.  
Principles of management in physical therapy practice; historical perspective, current health care environment; business principles; marketing, managing risk, medical/legal concerns, preparing for the future. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:122 Psychosocial Aspects of Patient Care** 1 s.h.  
Emotional reactions to disability, psychosocial aspects of disability as they relate to patient-physical therapist interaction; specific problems of the angry, non-compliant, or chronic-pain patient; complementary roles of other health professionals; cultural competence in professional behavior and patient treatment; importance of holistic health care. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:131 Therapeutic Physical Agents** 2 s.h.  
Theoretical and practical applications for safe, effective use of physical agents (superficial and deep heat, cold, hydrotherapy), electrotherapeutic modalities (biofeedback, NMES, TENS, iontophoresis); massage and soft tissue mobilization; emphasis on problem solving, clinical decision making. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:133 Pain Mechanisms and Treatment** 2 s.h.  
Introduction to basic science mechanisms, assessment, and management of pain; basic science mechanism involved in transmission and perception of painful stimuli after tissue injury, assessment and physical therapy management of pain; emphasis on scientific principles and published literature to support treatment techniques. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:134 Physical Therapy Management of Integumentary System** 2 s.h.  
Overview of physical therapy examination and management of the integumentary system; wound pathology, diagnosis associated with the integumentary system, inflammation and repair, examination and reexamination techniques, documentation, clinical decision making, lecture and laboratory formats; interventions, including patient/client information, physical agents, electrotherapy, wound dressing. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:140 Introduction to Physical Therapy Practice** 2 s.h.  
Lectures, case presentations, and group activities using the Guide to Physical Therapist Practice; elements of the patient/client management model, concepts of the disablement model, preferred practice patterns as applied in clinical problems; importance of professionalism, professional socialization; introduction to evidence-based practice; competence in medical terminology. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:141 Principles of Physical Therapy I** 2 s.h.  
Patient management skills: interviewing, medical history taking, vital signs, positioning, draping, transfers, body mechanics, assisted gait, wheelchairs, and negotiation of architectural barriers. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:142 Principles of Physical Therapy II** 2 s.h.  
Continuation of 101:141; expansion of existing skills and provides new learning experiences in documentation, assessment of joint range of motion/goniometry, manual muscle testing, preambulatory intervention strategies, gait analysis; musculoskeletal, neuromuscular, and integumentary systems review. Prerequisites: 101:141. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:143 Selected Topics in Physical Therapy Practice** 2 s.h.  
Specialty topics in physical therapy, such as women's health, aquatic therapy, patient care across the lifespan, alternative or new treatments; guest lectures, lab component.

- 101:151 Progressive Functional Exercise** 2 s.h.  
Therapeutic exercise options (e.g., isometrics, isotonic, isokinetic, plyometric, endurance exercises, stretching exercises) and training principles; application to functional activities, including those of daily living, work, recreation, and sport; laboratory component. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:170 Prosthetics and Orthotics** 2 s.h.  
Physical therapy management and assessment of patients in need of prosthetic and orthotic devices; principles and components of prosthetic and orthotic design and use. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:172 Radiology/Imaging for Physical Therapists** 2 s.h.  
Basic principles and procedures for acquisition and interpretation of radiology and imaging in clinical practice and research; plain film radiographs, CT, MRI, other common imaging modalities; case-based, multidisciplinary approach. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:173 Differential Diagnosis in Physical Therapy** 2 s.h.  
Use of physical therapy examination and evaluation skills to diagnose physical therapy problems; focus on use of good clinical decision-making skills when analyzing a patient's history and administering physical therapy tests and measures to confirm or rule out differential diagnoses; components of the medical examination; importance of collaboration between therapists and other health professionals; interactive case studies presented by clinical experts. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:176 Pharmacology for Physical Therapists** 3 s.h.  
Contemporary pharmacology; overview of basic pharmacokinetic and pharmacodynamic principles; relation of drug therapy to therapeutic interventions provided by physical therapists; small group clinical case presentations. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:185 Musculoskeletal Therapeutics I** 3 s.h.  
Musculoskeletal techniques and biomechanical principles applied to assessment and evaluation of common orthopedic problems of the spine; problem solving, case-study approach to clinical methods, skill acquisition. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:189 Clinical Education I** 1 s.h.  
Integrated clinical experiences in area physical therapy clinics; overview of the diverse nature of practice through half- or full-day experience; basic skills in examination, intervention, documentation. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:190 Clinical Education II** 1 s.h.  
Continuation of 101:189; integrated half-day clinical experiences. Prerequisites: 101:189. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:191 Clinical Education III** 1 s.h.  
Two-week, full-time clinical experience in physical therapy clinics in Iowa, under the guidance of physical therapists; theory and practice of physical therapy procedures, competence building in basic skills. Prerequisites: 101:190. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:194 Clinical Internship** arr.  
Full-time clinical education divided among varied settings; development of competence in independent examination, evaluation, and treatment of patients under supervision of clinical faculty. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:200 Pediatric Physical Therapy** arr.  
Preparation for physical therapy practice in pediatric settings using interdisciplinary family-centered practice; normal and abnormal development, standardized assessment, service-delivery settings, interventions, management strategies specific to pediatrics. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.
- 101:201 Applied Clinical Medicine** 2 s.h.

Pathological disorders frequently encountered by physical therapists in clinical practice, addressed by physicians and health professionals who are not physical therapists; physical therapy management. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:202 Musculoskeletal Therapeutics II** 3 s.h.

Pathology, assessment, management of orthopedic disorders of the upper quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions. Prerequisites: 101:185. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:203 Musculoskeletal Therapeutics III** 4 s.h.

Pathology, assessment, management of orthopedic disorders of the lower quarter; problem-solving approach to evaluation and management of patients with musculoskeletal conditions. Prerequisites: 101:202. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:205 Health Promotion and Wellness** 3 s.h.

Overview of health promotion, fitness, and wellness strategies, including information on levels of health promotion, risk assessment, applied physiology (skeletal muscle, energy metabolism, and physiological responses to exercise), exercise testing and training guidelines, body composition assessment, and development of individual weight management and exercise training programs; classroom and laboratory experiences. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:206 Cardiopulmonary Therapeutics** 3 s.h.

Cardiorespiratory anatomy, physiology, and application of basic concepts, techniques in management of patients with acute and chronic cardiac, pulmonary disorders; laboratories. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:209 Surface Anatomy** 1 s.h.

Laboratory teaching activities that parallel the human anatomy course; observation, palpation, and problem solving skills; upper- and lower-limb, head and neck, thorax, and abdomen. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:210 Kinesiology and Pathomechanics** 4 s.h.

Normal and pathological movement based on understanding of muscle mechanics, segment and joint mechanics, muscle function; instructor- and student-centered learning experiences; EMG laboratories. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:212 Biomedical Instrumentation and Measurement** 3 s.h.

Introduction to biomedical instrumentation and measurement, with focus on understanding sources of error and noise in biomedical research applications; basic circuit analysis, calibration of measurement tools, A/D conversion, digital filtering; lab components. Offered fall semesters of even years.

**101:214 Advanced Seminar in Rehabilitation Science** arr.

Current status of research for biological, mechanical, psychological components pertinent to cardiopulmonary, musculoskeletal, neuromuscular areas of rehabilitation science; preparation for comprehensive exam.

**101:220 Seminar in Rehabilitation Science** 1 s.h.

Exploration of research related to rehabilitation science; lectures by faculty, graduate students, and guest scholars with expertise in areas relevant to rehabilitation science (e.g., neuroscience, physiology, medicine, engineering, pharmacology, integrated physiology).

**101:224 Principles of Motor Control** 4 s.h.

Sensorimotor mechanisms involved with normal and abnormal neuromuscular systems function; skeletal muscle properties/plasticity, muscle fatigue, neural mechanisms of muscle strengthening, spinal circuitry, simple and complex reflexes, spasticity, rigidity, posture control/balance, motor learning, applied neurological assessment of pathological conditions, such as stroke, SCI. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:225 Neuromuscular Therapeutics** 3 s.h.

Application of clinical neuroscience knowledge and motor control and motor learning concepts to the practice of neurological physical therapy; emphasis on diagnosis and therapeutic intervention for persons with central nervous system dysfunction of adult onset. Prerequisites: 101:224. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:235 Case-Based Learning I**

1 s.h.

Small group case study seminars and simulated patient instructor learning experiences; clinical problems coordinated with concurrent courses; student-centered, problem-based learning format with emphasis on evidence-based practice objectives. First in a two-course sequence. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:236 Case-Based Learning II**

1 s.h.

Small-group seminars, consisting of six students and one faculty facilitator per group, and simulated patient clinical assessment labs; three clinical cases presented each semester with three one-and-one-half hour seminars per case; simulated patient experience; clinical problems coordinated with concurrent courses taken in the curriculum; student centered, problem-based learning format; emphasis on evidence-based practice objectives. Second in a two-part series of integrated courses. Prerequisites: 101:235. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:237 Service Learning I**

1 s.h.

Service-learning work experience with one of four community partners (Miracles in Motion, Camp Courageous, Elder Services, Pathways Adult Daycare); students develop individual learning goals for the semester-long experiences; classroom reflection on service activities, experiences with the elderly and/or disabled, and on social responsibility, advocacy, and professionalism in physical therapy; written reflection assignments. First in a two-course sequence. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:238 Service Learning II**

1 s.h.

Service-learning work experience with a community partner; learning goals, papers, journals, final project poster presentation. Prerequisites: 101:237. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:248 Research in Physical Therapy**

2 s.h.

Topics relevant to evidence-based practice and research design; identification of appropriate questions for research and clinical applications, location and evaluation of available evidence, identification of issues that affect validity of research designs, interpretation of basic statistical analyses. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:251 Critical Inquiry in Physical Therapy I**

2 s.h.

Experience conducting group research projects under faculty supervision; data collection and analysis, manuscript preparation, oral defense of research findings during a formal poster presentation. Prerequisites: 101:248. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:252 Critical Inquiry in Physical Therapy II**

1 s.h.

Principles and procedures learned in 101:248 and 101:251 applied to a clinical setting; students write and present a case report with an evidence-based practice focus, using a clinical case from their final internships. Requirements: Physical Therapy and Rehabilitation Science Program enrollment.

**101:275 Analysis of Sensori-Motor Systems in Health and Disease**

3 s.h.

Neurophysiological mechanisms underlying posture, movement in normal and pathologic conditions; systems approach to neuromuscular system function, including skeletal muscle plasticity, muscle fatigue, neurological adaptations to strengthening, spinal circuitry, complex reflexes, spasticity, rigidity, posture/balance, motor learning; specific applications to CNS disease states (SCI, stroke, degenerative diseases). Offered fall semesters.

**101:277 Mechanisms of Pain Transmission**

3 s.h.

Anatomical, physiological, and pharmacological mechanisms underlying peripheral and central neuronal processing of pain; emphasis on neuronal changes that occur during pathological conditions such as inflammation/arthritis, peripheral neuropathy. Offered fall semesters of even years. Same as 071:277, 132:277.

**101:280 Teaching Practicum**

arr.

Individual instruction, observation, experimentation in teaching, guidance, analysis of evaluation processes in Physical Therapy and Rehabilitation Science Program.

**101:284 Practicum in Research**

arr.

Laboratory experiences connected with investigative process; individual instruction, observation, activities in methodological development, data acquisition, data analysis aspects of research.

**101:285 Biomechanical Analysis in Rehabilitation**

3 s.h.

Assessment of pathological movement through human movement analysis techniques, including link segment modeling and analysis, mechanical energy and power analysis, electromyography and muscle modeling.

**101:300 Rehabilitation Research Capstone Project**

arr.

Specific phases of the research process; development of a research question and associated hypotheses, collection and analysis of data, interpretation and discussion of the information's meaning; presentation to sponsoring mentor's laboratory/program, and written document.

**101:301 Thesis: Rehabilitation Science**

arr.

Investigative process: formulation of problem, literature search and analysis, procedure for collecting data, data analysis, organization and writing of thesis proposal, thesis.

**101:325 Independent Study**

arr.

Problem-solving experience in physical therapy; commensurate with student's interest, ability.

**101:326 Scientific Writing in Rehabilitation Science**

3 s.h.

Knowledge of and experience related to scientific writing, critical review of scientific literature, publication in the biomedical sciences, thesis/dissertation writing, grant writing, scientific presentation, writing used in academic and scientific careers.

**101:327 Research in Rehabilitation Science**

arr.

Placement of physical therapy on sound scientific base; therapy; initiation, refinement, establishment of methods in physical therapy evaluation, treatment; direct clinical and laboratory approach, philosophical treatise, or research proposal.

## Physician Assistant Program

The physician assistant profession is one of the newest and most exciting in health care. Physician assistants (PAs) are licensed to practice medicine with physician supervision. They are responsible for making medical decisions and providing a broad range of diagnostic and therapeutic services.

Physician assistants work in a variety of settings, including medical offices, hospital emergency rooms, nursing homes, rural satellite clinics, health maintenance organizations, and patients' homes.

In the traditional office setting, PAs see patients, obtain histories, perform physical examinations, and order necessary laboratory and/or radiological studies. Based on this information, the PA establishes a diagnosis, develops an appropriate management plan, and initiates treatment that may include prescribing medications. The physician is consulted as needed and remains ultimately responsible for the care provided by the physician/PA team. PAs also are involved in both patient and community health education.

The Physician Assistant Program is part of the Carver College of Medicine on the University of Iowa health sciences campus, which includes University of Iowa Hospitals and Clinics, one of the nation's largest university-owned teaching hospitals. For information about the college's academic programs and resources, see Carver College of Medicine in the Catalog.

## Graduate Program

The Physician Assistant Program offers the Master of Physician Assistant Studies (M.P.A.S.). The program emphasizes primary care medicine, particularly family medicine. It also offers elective clinical rotations in selected medical subspecialties.

Students who complete the program are eligible to take the National Certifying Examination for Primary Care Physician Assistants, which they must complete successfully in order to register as physician assistants in the United States.

The Physician Assistant Program is accredited by the Accreditation Review Commission on Education for the Physician Assistant, Inc., and is a member of the Physician Assistant Education Association.

### Master of Physician Assistant Studies

The Master of Physician Assistant Studies requires a minimum of 104 s.h. The curriculum spans 25 months and is divided into two phases: didactic and clinical. Both phases emphasize primary health care delivery and the physician assistant's role as a member of the health care team. The program is integrated with teaching at the Carver College of Medicine, permitting interdisciplinary activities between Doctor of Medicine and health care professions students. Physician assistant students complete approximately 65 percent of the curriculum's didactic phase with second-year M.D. students.

The first phase is conducted on the University's health sciences campus. It begins in late May with seven months of course work in a number of basic science areas, including anatomy, biochemistry, infectious disease, pathology, pharmacology, and physiology. Whenever appropriate, related subjects are integrated to provide sequential lecture and laboratory experience. This session also includes courses in clinical decision making and an introductory course on taking a medical history and performing a physical examination.

The program's patient assessment curriculum couples a sequence of didactic instruction with practical experiences involving simulated and real patients. The level and intensity of patient interactions increase throughout the curriculum as the student gains confidence and clinical competence.

The spring semester of the first phase consists of 050:175 Foundations of Clinical Practice IV for Physician Assistants for Physician Assistants, an 18-week course. Three interrelated courses focus on the application of basic science knowledge to understanding clinical-pathologic correlations of common and/or catastrophic disorders encountered in clinical medicine's major disciplines. The courses continue with instruction in obtaining a problem-oriented medical history and performing a physical examination. The semester also includes continuation of the clinical decision-making course and a short course in clinical pathology.

Before clinical rotations begin, students complete 117:110 Introduction to Clinical Skills, which includes instruction in

several skill areas (e.g., suturing, injections, prescription writing, medical orders, Advanced Cardiac Life Support).

The program's second phase concentrates on clinical education. In 117:201 Clinical Decision Making III, students select a pertinent health question and apply an evidence-based medicine review of the data. They give a PowerPoint presentation of their findings to their colleagues, write a paper for submission to a journal, or prepare a poster presentation for a conference. They also complete 117:107 Seminar for Physician Assistant Students, in which they research and discuss professional issues that will affect their practice as physician assistants.

Students complete a 40-week core of required primary care clinical rotations, including six weeks each of general internal medicine and surgery and four weeks each of family medicine I, family medicine II, pediatrics, long-term care, emergency medicine, gynecology, and psychiatry. Students also select eight weeks of electives, which may include rotations such as geriatrics, cardiology, dermatology, and orthopaedics.

The primary care clinical rotations are designed to provide instruction and experience in caring for patients in a way that enables students to integrate the knowledge, skills, behaviors, and attitudes they learned in the program's didactic phase. Clinical training is provided at University of Iowa Hospitals and Clinics, the Iowa City Veterans Affairs Medical Center, the Veterans Affairs Central Iowa Health Care System and Broadlawns Medical Center in Des Moines, and other affiliated hospitals throughout Iowa. In elective rotations, students gain additional clinical experience through placement with selected preceptors involved in office-based practices, typically in medically underserved rural areas.

The curriculum is as follows.

### **FIRST YEAR (PHASE I)**

#### **Summer and Fall**

050:174 Foundations of Clinical Practice for Physician Assistants	5 s.h.
060:111 Gross Human Anatomy Physician Assistant Students	6 s.h.
061:104 Principles Infectious Diseases--Physician Assistant	5 s.h.
069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
071:125 Pharmacology for Health Sciences: Physician Assistant Students	6 s.h.
072:164 Human Physiology for Physician Assistant Students	4 s.h.
099:164 Biochemistry for Physician Assistant Students	3 s.h.
117:101 Introduction to Medical History and Physical Examination for Physician Assistant Students	3 s.h.
117:103 Clinical Decision Making I	1 s.h.

#### **Spring**

050:175 Foundations of Clinical Practice IV for Physician Assistants	13 s.h.
050:183 Healthcare Ethics, Law, and Policy	2 s.h.
069:130 Clinical Laboratory Medicine for Physician Assistants	1 s.h.
117:104 Clinical Decision Making II	1 s.h.

### **SECOND YEAR (PHASE II)**

117:107 Seminar for Physician Assistant Students	1 s.h.
117:110 Introduction to Clinical Skills	1 s.h.
117:201 Clinical Decision Making III	1 s.h.

The following are required clinical rotations.

117:300 Emergency Medicine for Physician Assistant Students	4 s.h.
117:301 Gynecology for Physician Assistant Students	4 s.h.
117:302 Family Practice I for Physician Assistant Students	4 s.h.
117:303 Family Practice II for Physician Assistant Students	4 s.h.
117:304 General Surgery for Physician Assistant Students	6 s.h.
117:305 Internal Medicine for Physician Assistant Students	6 s.h.

117:307 Psychiatry for Physician Assistant Students	4 s.h.

## 117:308 Long-Term Care for Physician Assistant Students

4 s.h.

Elective clinical rotations are selected from the following.

117:321 Dermatology Elective for Physician Assistant Students	arr.
117:322 Neurology Elective for Physician Assistant Students	arr.
117:323 Obstetrics for Physician Assistant Students	arr.
117:324 Ophthalmology Elective for Physician Assistant Students	arr.
117:325 Otolaryngology Elective for Physician Assistant Students	arr.
117:326 Pediatric Elective for Physician Assistant Students	arr.
117:327 Radiology Elective for Physician Assistant Students	arr.
117:328 Pediatric Elective (Bone Marrow Transplant) for Physician Assistant Students	arr.
117:329 Pediatric (Cardiology) Elective for Physician Assistant Students	arr.
117:330 Psychiatry Elective for Physician Assistant Students	arr.
117:331 Surgery Elective for Physician Assistant Students	arr.
117:332 Surgery Elective (Transplant/Organ Retrieval) for Physician Assistant Students	arr.
117:333 Surgery Elective (Burn Unit) for Physician Assistant Students	arr.
117:334 Surgery Elective (Cardiac Surgery) for Physician Assistant Students	arr.
117:335 Orthopedics Elective for Physician Assistant Students	arr.
117:336 Internal Medicine Elective for Physician Assistant Students	arr.
117:337 Internal Medicine (Cardiology) Elective for Physician Assistant Students	arr.
117:338 Internal Medicine (EKG) Elective for Physician Assistant Students	arr.
117:339 Internal Medicine (Gastroenterology) Elective for Physician Assistant Students	arr.
117:340 Internal Medicine (Oncology) Elective for Physician Assistant Students	arr.
117:341 Internal Medicine (Geriatrics) Elective for Physician Assistant Students	arr.
117:342 Internal Medicine (Pulmonary) Elective for Physician Assistant Students	arr.
117:343 Internal Medicine (Hospice) Elective for Physician Assistant Students	arr.
117:344 Internal Medicine (Infectious Disease) Elective for Physician Assistant Students	arr.
117:345 Internal Medicine (Correctional Medicine) Elective for Physician Assistant Students	arr.
117:347 Urology Elective for Physician Assistant Students	arr.
117:348 Family Practice Elective for Physician Assistant Students	arr.
117:349 Gynecology Elective (Women's Health) for Physician Assistant Students	arr.
117:350 Migrant Health Elective for Physician Assistant Students	arr.
117:351 Occupational Medicine Elective for Physician Assistant Students	arr.
117:352 Pediatrics (Neonatology) Elective for Physician Assistant Students	arr.
117:353 Internal Medicine (Rheumatology) for Physician Assistant Students	arr.
117:354 Medical Intensive Care for Physician Assistant Students	arr.
117:355 International Medicine for Physician Assistant Students	arr.
117:356 Interventional Radiology for Physician Assistant Students	arr.
117:357 Gynecologic Oncology Elective for Physician Assistant Students	arr.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants must be citizens or permanent residents of the United States. Applicants whose first language is not English and who do not hold a master's or doctoral degree from an accredited U.S. institution must score at least 93 (total score, Internet-based) and 26 (speaking score, Internet-based) on the Test of English as a Foreign Language (TOEFL). Only the Internet-based test is accepted. Scores must be sent to the Physician Assistant Program by the Educational Testing Service.

Applicants must have taken the Graduate Record Examination (GRE) General Test or the Medical College Admission Test (MCAT) within the 10 years before they apply. They must hold a baccalaureate degree from an accredited institution in the United States and have a cumulative g.p.a. and a science g.p.a. of at least 3.00 on a 4.00 scale or a g.p.a. of at least 3.00 on their last 40 s.h. of college-level science course work. They must have completed preparatory science courses in organic and inorganic chemistry, introductory animal biology or zoology, and general statistics or biostatistics. They also must have completed upper-level courses in human or animal physiology (lower-level combined anatomy/physiology courses do not satisfy this requirement); three upper-level courses in endocrinology, microbiology, histology, and/or related disciplines; and an introductory biochemistry course (combined organic/biochemistry courses do not satisfy this requirement). Courses in cell biology, cell physiology, genetics, immunology, molecular biology,

neurobiology, and parasitology are recommended.

Applicants must have at least 1,200 hours of health care experience.

The admissions committee gives special attention to applicants' performance in science courses. Some successful applicants have had a cumulative and science g.p.a. of at least 3.70; up to 141 s.h. of college credit, including at least 81 s.h. in the sciences; and more than 3,000 hours of clinical and/or research experience.

Satisfaction of the basic admission requirements does not ensure acceptance to the program. The admissions committee selects the applicants it considers best qualified. Previous health care experience involving direct patient contact is preferred. The committee requests interviews with the most qualified applicants.

Applications are accepted from April 1 to November 1 for entry the following May. Each applicant must complete the Physician Assistant Education Association centralized application, which includes three letters of recommendation, GRE scores, and transcripts. The majority of prerequisite course requirements must be completed by the November 1 application deadline.

## Expenses

In addition to University of Iowa tuition and fees, Physician Assistant Program students must purchase their medical uniforms and diagnostic equipment, an expense of approximately \$1,700. Microscopes are not required.

## Physician Assistant Program Courses

- 117:001 Physician Assistant Clinical Second Year** arr.
- 117:101 Introduction to Medical History and Physical Examination for Physician Assistant Students** 0-3 s.h.  
Development of skills vital to taking a comprehensive medical history, psychomotor skills, and physical examination techniques necessary for conducting a comprehensive physical exam.
- 117:103 Clinical Decision Making I** 1 s.h.  
Review of basic concepts of research design and statistics as they apply to medical research literature; formation of a basis for sound, evidence-based, clinical decision making. Repeatable.
- 117:104 Clinical Decision Making II** 1 s.h.  
Core concepts of evidence-based medicine; development of the knowledge and practical skills to search the medical literature for answers to clinical questions and critically appraise the evidence found. Repeatable.
- 117:107 Seminar for Physician Assistant Students** 1 s.h.  
Professional issues that affect the physician assistant's practice of medicine.
- 117:110 Introduction to Clinical Skills** 1 s.h.  
Suturing, injections, prescription and order writing, medical records, patient confidentiality, Iowa Law governing physician assistant practice, completion of the American Heart Association's Advanced Cardiac Life Support Program. Requirements: completion of physician assistant curriculum phase I.
- 117:201 Clinical Decision Making III** 1 s.h.  
Asking appropriate clinical questions in the course of patient care; gathering information from multiple sources to answer questions.
- 117:300 Emergency Medicine for Physician Assistant Students** arr.  
Obtaining and recording pertinent historical data, obtaining indicated laboratory studies, assessing the results, arriving at a diagnosis, formulating a treatment plan, implementing appropriate therapy.
- 117:301 Gynecology for Physician Assistant Students** 4 s.h.  
Opportunity to develop proficiency in history and physical exams of gynecological patients; outpatient, family planning, gynecological cancer, concepts of diagnostic techniques and therapy.
- 117:302 Family Practice I for Physician Assistant Students** 4 s.h.

Obtaining and recording complete history and physical exams; formulation of differential diagnosis and problem list; ordering, obtaining, and interpreting lab and diagnostic studies; implementation of therapeutic procedures and treatment plans.

**117:303 Family Practice II for Physician Assistant Students** 4 s.h.  
Opportunity to participate in delivery of ambulatory primary care; at a different site from 117:302.

**117:304 General Surgery for Physician Assistant Students** 6 s.h.  
Preparation for work as an assistant to the generalist; outpatient and inpatient surgical services, including surgical procedures and management of postoperative course.

**117:305 Internal Medicine for Physician Assistant Students** 6 s.h.  
Eliciting a medical history, doing a pertinent physical exam, obtaining indicated lab studies, assessment of results, formulation of management plan and implementation of appropriate therapy for common internal medicine problems.

**117:306 Pediatrics for Physician Assistant Students** arr.  
Knowledge and skills required for providing appropriate medical care to infants, children, and adolescents; initiation and promotion of interpersonal relationships.

**117:307 Psychiatry for Physician Assistant Students** 4 s.h.  
Training in history and physical exams of psychiatry patients, including individual and family therapy, vocational testing and guidance, development of interviewing skills.

**117:308 Long-Term Care for Physician Assistant Students** arr.  
Development of clinical knowledge and skill in diagnosing, treating, and performing procedures for patients of long-term care settings; knowledge of relevant conditions.

**117:321 Dermatology Elective for Physician Assistant Students** arr.  
Recognizing dermatologic diseases and disorders, instituting appropriate management of patients with dermatologic problems.

**117:322 Neurology Elective for Physician Assistant Students** arr.  
Performing general and neurological exams, establishing diagnosis, recommending lab studies, instituting appropriate management of common neurological diseases and disorders, recognizing the need for urgent treatment.

**117:323 Obstetrics for Physician Assistant Students** arr.  
Proficiency in physical exam of OB patients; applying concepts of diagnostic techniques and therapy; following patients' course, including labor, delivery, and postpartum care.

**117:324 Ophthalmology Elective for Physician Assistant Students** arr.  
Proficiency in recognizing ophthalmology problems; how to institute appropriate management of these conditions.

**117:325 Otolaryngology Elective for Physician Assistant Students** arr.  
Proficiency in recognizing otolaryngology problems; how to institute appropriate management of these conditions; opportunity for involvement in varied surgical procedures.

**117:326 Pediatric Elective for Physician Assistant Students** arr.  
Experience working with children and adolescents.

**117:327 Radiology Elective for Physician Assistant Students** arr.  
Proficiency in systematic evaluation of normal and abnormal routine radiologic examinations; listing indications for special exam procedures, including details of prepping the patient.

**117:328 Pediatric Elective (Bone Marrow Transplant) for Physician Assistant Students** arr.  
Basic clinical knowledge and skills for diagnosis, treatment, and management of pre- and post-bone-marrow transplant patients.

**117:329 Pediatric (Cardiology) Elective for Physician Assistant Students** arr.  
Cardiovascular assessment and problem management of pediatric patients; experience with a range of acute, chronic, common, and rare cardiology diseases.

- 117:330 Psychiatry Elective for Physician Assistant Students** arr.  
Training in evaluation and treatment of psychiatry patients.
- 117:331 Surgery Elective for Physician Assistant Students** arr.  
Experience in a wide range of surgical problems, procedures, and treatments, including diagnosis, care and treatment, and postoperative courses of surgical patients.
- 117:332 Surgery Elective (Transplant/Organ Retrieval) for Physician Assistant Students** arr.  
Extensive experience in care of patients with end-stage organ failure; evaluation of potential transplant candidates, participation in surgical procedures on transplant service.
- 117:333 Surgery Elective (Burn Unit) for Physician Assistant Students** arr.  
Involvement in care on burn unit and in operating room; skills in burn debridement, grafting techniques, skin storage techniques, dressing changes, tub baths, and physical therapy procedures.
- 117:334 Surgery Elective (Cardiac Surgery) for Physician Assistant Students** arr.  
Development of technical skills in operating room; essentials of preoperative evaluation and postoperative management of cardiac surgical patient.
- 117:335 Orthopedics Elective for Physician Assistant Students** arr.  
Recognition of varied orthopedic problems and treatments; musculoskeletal diseases and disorders, both emergencies and common conditions, and how to establish appropriate management.
- 117:336 Internal Medicine Elective for Physician Assistant Students** arr.  
Training in varied internal medicine problems; recognition, appropriate treatment.
- 117:337 Internal Medicine (Cardiology) Elective for Physician Assistant Students** arr.  
Cardiovascular assessment and problem management; experience with wide range of acute, chronic, common, and rare diseases.
- 117:338 Internal Medicine (EKG) Elective for Physician Assistant Students** arr.  
Experience reading electrocardiograms, interpreting cardiac arrhythmias, performing and evaluating EKG stress tests.
- 117:339 Internal Medicine (Gastroenterology) Elective for Physician Assistant Students** arr.  
Experience with a wide range of gastrointestinal pathology; history and physical exams of gastrointestinal diagnostic procedures, follow-up care of patients through outpatient clinics.
- 117:340 Internal Medicine (Oncology) Elective for Physician Assistant Students** arr.  
Experience to develop diagnostic skills in clinical oncology and gain familiarity with methods of staging common cancers; assistance in therapy and outpatient management of cancer patients.
- 117:341 Internal Medicine (Geriatrics) Elective for Physician Assistant Students** arr.  
Familiarity with broad spectrum of medical conditions among the elderly; experience in history and physical exams, diagnosis of geriatric patients along with follow-up visits.
- 117:342 Internal Medicine (Pulmonary) Elective for Physician Assistant Students** arr.  
Development of basic clinical knowledge and skills for diagnosis, treatment, and management of pulmonary diseases.
- 117:343 Internal Medicine (Hospice) Elective for Physician Assistant Students** arr.  
Work on a hospice care team performing evaluation, treatment, and education of patients with terminal illnesses; dealing with the prospect of death.
- 117:344 Internal Medicine (Infectious Disease) Elective for Physician Assistant Students** arr.  
Development of basic clinical knowledge and skills for diagnoses, treatment, and management of infectious diseases.
- 117:345 Internal Medicine (Correctional Medicine) Elective for Physician Assistant Students** arr.  
Experience with ambulatory medicine in a correctional institution; management of acute and chronic diseases, including HIV, hepatitis B&C, psychiatric conditions; focus on confidentiality, security.

- 117:347 Urology Elective for Physician Assistant Students** arr.  
Proficiency in managing patients with urologic conditions; skill in taking a urologic history, performing physical exams, interpreting laboratory studies and data.
- 117:348 Family Practice Elective for Physician Assistant Students** arr.  
Proficiency in delivering ambulatory primary care.
- 117:349 Gynecology Elective (Women's Health) for Physician Assistant Students** arr.  
Experience in annual gynecologic exams, PAP screening, gynecology problems, contraception issues, STD screening and counseling, common gynecologic procedures.
- 117:350 Migrant Health Elective for Physician Assistant Students** arr.  
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions related to environmental exposure in migrant worker populations.
- 117:351 Occupational Medicine Elective for Physician Assistant Students** arr.  
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of work-related diseases, injuries, and conditions related to environmental exposure.
- 117:352 Pediatrics (Neonatology) Elective for Physician Assistant Students** arr.  
Basic clinical knowledge and skill for diagnosis, treatment, and management of critically ill infants.
- 117:353 Internal Medicine (Rheumatology) for Physician Assistant Students** arr.  
Basic clinical knowledge and skills for diagnosis, treatment, and management of rheumatologic diseases.
- 117:354 Medical Intensive Care for Physician Assistant Students** arr.  
Basic clinical knowledge and skills for diagnosis, treatment, and management of critically ill patients.
- 117:355 International Medicine for Physician Assistant Students** arr.  
Basic clinical knowledge and skills for diagnosis, treatment, and prevention of diseases, injuries, and conditions relevant to international medicine. Repeatable.
- 117:356 Interventional Radiology for Physician Assistant Students** arr.  
Basic clinical knowledge and skills for diagnosis and treatment of conditions requiring interventional therapy. Repeatable.
- 117:357 Gynecologic Oncology Elective for Physician Assistant Students** arr.  
Experience developing diagnostic skills in clinical gynecologic oncology, learning methods of staging specific cancers; and assisting in therapy and outpatient management of patients with varied cancers.
- 117:358 Wilderness Medicine for Physician Assistant Students** arr.  
Four-week emergency medicine elective taken in conjunction with Carver College of Medicine; mix of didactic and experiential learning; ten-day trip to Colorado to learn about hypothermia, altitude medicine, search and rescue, field evaluation, treatment and evacuation of common back country injuries; lectures and simulations.

## Psychiatry

**Head:** Robert G. Robinson

**Professors:** Nancy Andreasen, Stephan Arndt, George Bergus, Donald Black, Kathleen Buckwalter, Brian Cook, William Coryell, Samuel Kuperman, Douglas Langbehn, Delwyn Miller, Peggy Nopoulos, Daniel O'Leary, Jane S. Paulsen, Bruce Pfohl, Robert Philibert, Susan Schultz, Scott Stuart

**Professors emeriti:** Arnold Andersen, Arthur Canter, Raymond Crowe, Michael Garvey, Harold Mulford, Herbert Nelson, Russell Noyes, Paul Perry, Robert Smith

**Clinical professors:** Bruce Alexander, John Bayless, Wayne Bowers, Judith Crossett, Michael Flaum, Jerry Lewis, Scott Temple

**Associate professors:** Thad Abrams, Leigh Beglinger, Yelena Chistyakova, Gary Gaffney, Beng Choon Ho, Ricardo Jorge, David Moser, Sergio Paradiso, Victor Swayze, Carolyn Turvey, Thomas Wassink, John Wemmie, Catherine Woodman

**Adjunct associate professors:** Tracy Gunter, Janeta Tansey, Kevin Took

**Clinical associate professors:** James Amos, James Beeghly, Thomas Brashers-Krug, Jill Liesveld, Linda Madson, Anthony Miller, Karen Nelson, Debra Suda, Jodi Tate, Beth Troutman, Nancy Williams

**Assistant professors:** Chadi Calarge, Lilian Dindo, Eric Epping, Jess Fiedorowicz, Hans Johnson, Laurie McCormick, Megan Smith

The Department of Psychiatry teaches M.D. students, principally during their third year, and trains resident physicians for academic and clinical careers in psychiatry. It offers no degree program.

## Residency Programs

The department maintains a four-year training program approved by the Residency Review Committee of the American Medical Association. Training experiences are available at University of Iowa Hospitals and Clinics and at the Iowa City Veterans Affairs Medical Center. Additional experiences are available at affiliated institutions: Broadlawns Medical Center in Des Moines, the Iowa Medical and Classification Center at Oakdale, the Mid-Eastern Iowa Community Mental Health Center in Iowa City, and the Independence Mental Health Institute (Iowa Department of Human Services).

The department also offers an approved two-year residency in child psychiatry. Fellowships in geriatrics and psychosomatic medicine are available after residency training.

## Research

Department of Psychiatry staff members are involved in genetic and family studies of psychiatric disorders, and research in genetic and biological psychiatry, neurochemistry, neuroimaging, neurophysiology, neuropsychiatry, and psychosocial aspects of behavior.

Many research opportunities in psychiatry are available to students and residents, and the basic science areas of neurochemistry, neurophysiology, and electrophysiology offer additional opportunities. The clinical areas of psychology, child psychiatry, and psychotherapy also offer opportunities to a limited number of students for research and further study.

## Psychiatry Courses

### 073:255 Psychiatric Epidemiology

3 s.h.

Population-based studies of psychiatric disorders and associated etiologic tools; diagnostic criteria used in psychiatric research, common structured interviews and rating scales; recent research relevant to common psychiatric disorders; experience writing a research idea using NIH PHS grant form. Offered spring semesters. Prerequisites: 173:140. Recommendations: 173:240 or two years of resident training in psychiatry. Same as 173:267.

### For M.D. Students

#### 073:005 Clinical Psychiatry

4 s.h.

Requirements: third-year M.D. enrollment.

#### 073:033 Adult Psychiatry, Pappajohn Pavilion

arr.

Requirements: M.D. enrollment.

#### 073:035 Child Psychiatry, Pappajohn Pavilion

arr.

Roles of child psychiatry as a consultation service. Requirements: M.D. enrollment.

#### 073:045 Adult Outpatient Psychiatry and Psychotherapy

4 s.h.

Diagnostic assessment, evaluation, treatment of psychiatric patients; exposure to both psychotherapeutic, psychopharmacologic treatments. Requirements: M.D. enrollment.

**073:047 Women's Wellness and Counseling Service**

4 s.h.

Experience evaluating and treating women with mental illness, with some emphasis on practitioner's autonomy; four-week rotation. Requirements: psychiatry clerkship.

**073:049 Eating Disorders**

4 s.h.

Inpatient rotation emphasis on co-occurring psychiatric and comorbid medical conditions associated with eating disorders; patient assessment and management at an advanced level; direct patient care and engagement in clinical decision making for complex patients with substantial comorbidity; call is required; student experience maximizes autonomy and responsibility; didactic curriculum; focus on critical appraisal of relevant medical literature. Prerequisites: 073:005. Requirements: fourth-year M.D. enrollment.

**073:053 Advanced Clinical Psychiatry, Des Moines**

4 s.h.

Work in adult psychiatry setting and/or child-adolescent psychiatry setting for a four-week rotation; optional participation in psychiatric emergency/crisis care team, substance abuse clinics, and/or ECT treatment sessions.

**073:105 Research Psychiatry**

arr.

Experience, training in practical application of scientific methodology; work with research project at Psychiatric Service or affiliated cooperating research centers. Requirements: fourth-year M.D. enrollment.

**073:835 Subinternship in Medical Psychiatry**

4 s.h.

Hands-on experience in evaluation and treatment of patients with combined medical and psychiatric disease; decisions regarding appropriate consultations, diagnostic tests, treatment; etiology and pathophysiology. Requirements: M.D. enrollment.

**073:836 Subinternship in Mood/Psychotic Disorders**

4 s.h.

Subinternship in adult psychiatry; experiences that maximize autonomy and responsibility; inpatient rotation focuses on one subspecialty area (psychotic disorders or mood disorders); emphasis on substantial medical comorbidity; assess and address medical and psychiatric needs of assigned patients in a collaborative and integrative fashion; assess and manage patients independently at the level of a psychiatry intern, reporting directly to the attending; call is required; didactic curriculum focuses on critical appraisal of medical literature. Prerequisites: 073:005. Requirements: fourth-year M.D. enrollment.

**073:998 Psychiatry on Campus**

arr.

Arranged by student with departmental approval. Requirements: M.D. enrollment.

**073:999 Psychiatry off Campus**

arr.

Requirements: M.D. enrollment.

## Radiation Oncology

**Head:** John M. Buatti

**Professors:** John M. Buatti, Garry R. Buettner, Frederick E. Domann Jr., Douglas R. Spitz

**Professor emeritus:** James W. Osborne

**Clinical professor:** Geraldine M. Jacobson

**Associate professors:** John E. Bayouth, Prabhat Goswami

**Associate professor emeritus:** J. Fred Doornbos

**Clinical associate professor:** William McGinnis

**Assistant professors:** Carryn M. Anderson, Sudershan Bhatia, Apollina Goel, Yuseung Kim, Sarah McGuire, R. Alfredo C. Siochi

**Clinical assistant professors:** Mark W. Dion, Ryan Flynn, Joseph Modrick, Manickam Muruganandham, Mark C. Smith

**Associates:** Earl Nixon, Edward Pennington, Timothy J. Waldron

**Web site:** <http://www.uihealthcare.com/depts/med/radiationoncology/index.html>

Radiation oncology specializes in the delivery of radiation treatments for cancer patients. It includes treatments with linear accelerators as well as isotopes and temporary and permanent surgically implanted sources. Radiation oncologists also use these methods to treat some benign diseases, such as Graves' ophthalmopathy and trigeminal neuralgia.

The Department of Radiation Oncology is dedicated to educating graduate students, radiation therapy technology students, physics students, medical residents, and medical students. Its faculty members provide instruction for Master of Science and Doctor of Philosophy students in the Free Radical and Radiation Biology Program, through their participation in 077:103 Radiation Biology, 077:211 Medical Physics, 077:222 Free Radicals in Biology and Medicine, and 077:288 Molecular and Cellular Biology of Cancer. The faculty also provides instruction for Carver College of Medicine students.

The department's professional staff provides training in radiation therapy technology for undergraduate students in the Radiation Sciences Program by teaching courses 672:803 Radiation Therapy I and 672:804 Radiation Therapy II.

The department provides a four-year physician residency training program in radiation oncology that includes clinical care and education. It also has a residency program in medical physics. M.D. students can elect a two- or four-week radiation oncology rotation. Nursing students, dental residents, and fellows in gynecologic oncology and in adult and pediatric hematology and oncology do rotations in the department.

The department also offers specialized research projects and sponsors postdoctoral students in biology, physics, and clinical disciplines by arrangement with the instructor or mentor.

## Radiation Oncology Courses

### 186:202 Radiation Oncology

4 s.h.

Integration of clinical oncology, physics, and cancer biology; clinical work with faculty mentors; experience in clinical evaluation, technical physics, biological application.

### 186:998 Radiation Oncology on Campus

arr.

Development of new markers for normal tissue toxicity following radiation treatment.

### 186:999 Radiation Oncology off Campus

arr.

Arranged by the student with department approval.

# Radiation Sciences

**Interim director:** Jennifer Maiers

**Director, radiologic technology program:** Kathy Martensen

**Director, diagnostic medical sonography program:** Stephanie Ellingson

**Director, nuclear medicine technology program:** Anthony Knight

**Director, radiation therapy program:** Mindi TenNapel

**Undergraduate degree:** B.S. in Radiation Sciences

**Web site:** <http://www.medicine.uiowa.edu/RadSci/bsrs>

Radiation sciences professionals work with physicians to gather accurate patient information for diagnosis, treatment, and/or research of disease and injury. They provide direct patient care, producing quality images and delivering treatment using a variety of radiation sources. The radiation sciences professional must apply knowledge, skill, and mature judgment while operating complex equipment safely and efficiently.

The University of Iowa's radiation science educational programs are designed to provide students with opportunities for intellectual, professional, and social growth. Students learn with faculty members and instructors who are committed to radiation science education.

## Undergraduate Program

The Carver College of Medicine offers a Bachelor of Science in radiation sciences. Undergraduate study in the college is guided by the academic rules and procedures outlined in the Carver College of Medicine section of the Catalog, under "Undergraduate Programs."

### Bachelor of Science

The Bachelor of Science with a major in radiation sciences requires a minimum of 124 s.h. The program has a dual focus on radiologic technology and a professional specialty (modality).

Radiation sciences students complete specific requirements of the College of Liberal Arts and Sciences General Education Program, a professional radiography program, a professional specialty (modality program), and advanced course work. The modality program requirement must be completed at The University of Iowa. All students must meet admission, credit, residency, and g.p.a. requirements as detailed in this Catalog section and in the Carver College of Medicine section under "Undergraduate Programs."

Students who wish to complete all requirements for the Bachelor of Science at The University of Iowa must enroll first in the College of Liberal Arts and Sciences, declaring a radiation sciences interest. While they are liberal arts students, they complete the required General Education courses. During the fall semester of their first year, students apply to the University of Iowa Hospitals and Clinics Radiologic Technology Program. Admission is selective. Accepted students enroll for their second and third years as nondegree students in the Carver College of Medicine. After completing the Radiologic Technology Program, they apply to the Carver College of Medicine as Bachelor of Science students with a major in radiation sciences. Once admitted, they complete the modality and advanced course requirements.

Radiographers who hold national certification from the American Registry of Radiologic Technologists and student radiographers intending to take the national certification exam must be admitted to the Carver College of Medicine as undergraduate students with a major in radiation sciences. Students must meet all University of Iowa admission requirements. Once they have completed a professional modality program through The University of Iowa and all other requirements for the major and for graduation, they receive a Bachelor of Science from the Carver College of Medicine.

Requirements for the major are as follows.

#### GENERAL EDUCATION COURSES

Radiation sciences students must complete the following course work in rhetoric, natural and social sciences, quantitative or formal reasoning, and distributed education from the College of Liberal Arts and Sciences General Education Program.

Rhetoric (4 s.h.):

010:003 Rhetoric

4 s.h.

Natural sciences—two of these (6 s.h.):

004:007 General Chemistry I

3 s.h.

004:008 General Chemistry II

3 s.h.

027:053 Human Anatomy

3 s.h.

027:130 Human Physiology

3 s.h.

Students interested in nuclear medicine must complete a chemistry course and lab as well as a physics course.

Social sciences (3 s.h.):

031:001 Elementary Psychology 3 s.h.

Quantitative or formal reasoning—one of these (4 s.h.):

22M:009 Elementary Functions 4 s.h.

22M:015 Mathematics for the Biological Sciences 4 s.h.

Distributed education (6 s.h.):

Two courses, one from each of two of the following General Education areas: cultural diversity, historical perspectives, humanities, and social sciences 6 s.h.

Students may not use 031:001 Elementary Psychology to fulfill the distributed education requirement. For a list of approved courses in these areas, see General Education Program in the Catalog.

### **RADIOLOGIC TECHNOLOGY PROGRAM**

Students must complete a radiologic technology program and pass the American Registry of Radiologic Technologists national certification exam. In the Radiologic Technology Program, students complete 670:901 Radiologic Technology I and 670:902 Radiologic Technology II, which provide education in pathology, radiation biology, radiation protection, patient care, and ethics. Students learn about anatomy and physiology, medical terminology, and radiographic procedures, imaging, and evaluation. They become acquainted with imaging equipment, study quality assurance, and participate in supervised clinical education. The 24-month program begins in July. Graduates of the program are eligible to take the national certification exam; upon successful completion of the exam, they are granted 60 s.h. of credit toward the B.S. in radiation sciences.

### **SPECIALTY (MODALITY PROGRAM)**

Radiation sciences students must complete one of the following specialties, or modality programs, at University of Iowa Hospitals and Clinics. Students must apply to and be accepted by the program of their choice; distance education courses do not require application or have a selection process, except for the elective clinical internships. Program duration varies, as does the number of students accepted. Each program offers modality-specific didactic and supervised clinical education courses. Graduates of the modality programs and associated internships are eligible to take certification exams.

#### **Nuclear Medicine Technology Modality**

The nuclear medicine technology modality program provides instruction in radiopharmacy, radiobiology, radioimmunology, radiation protection, patient care, medical terminology, instrumentation, computer applications, administration, and ethics. The 12-month program (30 s.h.) begins in August and includes the following courses.

074:101 Principles of Nuclear Medicine I 6 s.h.

074:102 Introductory Clinical Nuclear Medicine 6 s.h.

074:103 Principles of Nuclear Medicine II 3 s.h.

074:104 Intermediate Clinical Nuclear Medicine 9 s.h.

074:105 Advanced Clinical Nuclear Medicine 6 s.h.

#### **Radiation Therapy Modality**

The radiation therapy modality program teaches theory and techniques of radiation therapy technology, with emphasis on competence in areas of oncology treatment planning, treatment delivery, dosimetry, and use of megavoltage radiation-producing equipment to administer treatment. The 12-month program (30 s.h.) begins in August and includes the following courses.

672:803 Radiation Therapy I 12 s.h.

672:804 Radiation Therapy II 12 s.h.

672:805 Radiation Therapy III 6 s.h.

**Diagnostic Medical Sonography Modality**

The diagnostic medical sonography modality program focuses on principles and methods in using ultrasound and offers specialties in abdominal, pediatric, obstetric, and gynecologic imaging as well as interventional procedures and vascular technology. The 18-month program (36 s.h.) begins in August and includes the following courses.

673:803 Diagnostic Medical Sonography I	9 s.h.
673:804 Diagnostic Medical Sonography II	9 s.h.
673:805 Diagnostic Medical Sonography III	3 s.h.
673:806 Diagnostic Medical Sonography IV	9 s.h.
673:807 Diagnostic Medical Sonography V	6 s.h.

**Magnetic Resonance Imaging Modality**

The magnetic resonance imaging modality program features distance education courses and elective clinical internships. It offers intensive study and practice in magnetic resonance imaging, including patient care procedures, pathophysiology, physics, sectional anatomy, and instrumentation. It includes the following courses (22 s.h.) and clinical internships (9 s.h.). Internships begin in August and February.

674:110 Fundamentals for the MRI Technologist	3 s.h.
674:120 MRI Procedures I	4 s.h.
674:130 MRI Procedures II	3 s.h.
674:140 MRI Acquisition and Principles I	3 s.h.
674:150 MRI Acquisition and Principles II	3 s.h.
676:100 Sectional Anatomy for Imaging Sciences	3 s.h.
676:110 Pathology for Imaging Sciences	3 s.h.

Recommended elective clinical internships for the Magnetic Resonance Imaging program:

674:160 MRI Clinical Internship I	3-6 s.h.
674:170 MRI Clinical Internship II	3-6 s.h.

**Cardiovascular Interventional Modality**

The cardiovascular interventional modality program features distance education courses and elective clinical internships. It teaches about imaging equipment, pharmacology, sterile techniques, cardiac monitoring, vascular anatomy and physiology, cardiovascular intervention technology imaging procedures, therapeutic intervention techniques, and digital angiography. It includes the following courses (20 s.h.) and recommended elective clinical internships (12 s.h.). Internships begin in August.

675:110 Vascular Anatomy	3 s.h.
675:120 CVI Principles	4 s.h.
675:130 Electrocardiogram and Hemodynamics	3 s.h.
675:140 CVI Peripheral Procedures and Pathology	3 s.h.
675:150 CVI Neurology and Nonvascular Procedures and Pathology	3 s.h.
675:160 CVI Cardiac Procedures and Pathology	4 s.h.

Recommended elective clinical internships for the Cardiovascular Interventional Program:

675:170 Cardiac Interventional Clinical Internship	6 s.h.
675:180 Vascular Interventional Clinical Internship	6 s.h.

**Computed Tomography Modality**

The computed tomography modality program features distance education courses and an elective clinical internship. It concentrates on sectional anatomy, single and multislice computed tomography (CT), electron beam CT, physiologic and 3-D imaging, CT simulation, physics and imaging, and procedures and pathology. The program includes the following courses (15 s.h.) and a recommended elective clinical internship (6 s.h.). The internship begins in August and January.

676:100 Sectional Anatomy for Imaging Sciences	3 s.h.
--	--------

676:110 Pathology for Imaging Sciences	3 s.h.
676:120 Computed Tomography Procedures	5 s.h.
676:130 Computed Tomography Physical Principles and QC	4 s.h.
Recommended elective clinical internship for the Computed Tomography Program:	
676:140 Computed Tomography Clinical Internship	6 s.h.

#### **ADVANCED COURSES**

Management and leadership—one of these:

06J:048 Introduction to Management	3 s.h.
036:019 Organizational Leadership	2-3 s.h.
06J:147 Nonprofit Organizational Effectiveness I	3 s.h.

Statistics—one of these:

22S:025 Elementary Statistics and Inference	3 s.h.
22S:102 Introduction to Statistical Methods	3 s.h.

Informatics:

074:150 Medical Imaging and Radiology Informatics	3 s.h.
---	--------

#### **ELECTIVES**

Elective course work, to complete the minimum of 124 s.h. required for the Bachelor of Science, should be planned in consultation with the student's advisor.

#### **Advising**

Students who have declared a radiation science interest and are completing the General Education Program requirements before admission to the Radiologic Technology Program are advised at the University's Academic Advising Center. After admission to the Radiologic Technology Program, they are advised by the program's director. Students admitted to the radiation sciences major are advised by Radiation Sciences Program personnel.

#### **Admission**

Students who wish to complete all requirements for the Bachelor of Science at The University of Iowa must be admitted to the College of Liberal Arts and Sciences, with a radiation sciences interest. For information on admission requirements, contact the University's Office of Admissions.

Admission to the Radiologic Technology Program is competitive; enrollment is limited. Applications to the program must be submitted in time to meet the December application deadline. Students accepted to the program are admitted to the Carver College of Medicine as nondegree students and must meet specific program requirements; see the Radiologic Technology Program web site. A g.p.a. of at least 2.50 in General Education courses is recommended.

Admission to specialties (modality programs) is competitive; enrollment is limited. See "Clinical Internships" and "Distance Education" on the Radiation Sciences Program web site or contact the individual modality program directors for more information. The application deadline for modality programs is February 1. Acceptance to a modality program does not guarantee acceptance to the radiation sciences major.

Admission to the Carver College of Medicine radiation sciences major requires national certification in radiologic technology from the American Registry of Radiologic Technologists and a cumulative g.p.a. of at least 2.50, excluding grades earned in radiologic technology courses. Admission to the major does not guarantee admission to a professional specialty (modality) program. Deadlines for application to the radiation sciences major are April 1 for summer or fall entry and November 15 for spring entry.

To learn more about radiation sciences study at Iowa, visit the Radiation Sciences Program web site.

## Undergraduate Education

The Department of Radiology offers clinical education to students in the Nuclear Medicine Technology and Radiation Sciences Programs.

## Radiology Courses

### 074:006 Clinical Radiology

2 s.h.

Two-week clerkship. Requirements: M.D. enrollment.

### 074:101 Principles of Nuclear Medicine I

0-6 s.h.

Didactic and laboratory work in radiopharmacy, patient care, radiation protection, math and statistics, radiation physics, anatomy and physiology, radiochemistry and tracer techniques, medical terminology, computer applications. Requirements: Nuclear Medicine Technology Program enrollment.

### 074:102 Introductory Clinical Nuclear Medicine

0-6 s.h.

Experience in preparing radiopharmaceuticals, performing routine nuclear imaging and in vitro procedures; work with clinical instructors. Requirements: Nuclear Medicine Technology Program enrollment.

### 074:103 Principles of Nuclear Medicine II

0-3 s.h.

Didactic and laboratory work in nuclear medicine instrumentation, radiobiology, professional ethics, administration and management, computer applications. Requirements: Nuclear Medicine Technology Program enrollment.

### 074:104 Intermediate Clinical Nuclear Medicine

0-9 s.h.

Progressive responsibility in radiopharmacy, nuclear and P.E.T. imaging, cardiac stress testing. Requirements: Nuclear Medicine Technology Program enrollment.

### 074:105 Advanced Clinical Nuclear Medicine

0-6 s.h.

Proficiency in performance, quality assurance of all radiopharmacy and nuclear medicine procedures; opportunities for independent study, research. Requirements: Nuclear Medicine Technology Program enrollment.

### 074:150 Medical Imaging and Radiology Informatics

3 s.h.

Issues in informatics used in medical imaging and radiology; basic concepts, principles, terminology, and technology in medical imaging informatics; PACS operation, design, implementation; digitalization and acquisition of medical images; storage retrieval; image data formation and conversion, image data communication, workflow, visualization and display; medical imaging informatics; web application/services-based telemedicine and teleradiology.

### 074:191 Health Informatics I

3 s.h.

Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as 021:275, 050:283, 051:187, 056:186, 096:283, 174:226, 200:110.

### 074:192 Health Informatics II

3 s.h.

Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as 021:280, 051:189, 056:287, 096:289, 200:120.

## M.D. Student Training

The Department of Surgery offers courses that provide a unique combination of experience oriented toward patient care and understanding of surgery's place among the physician's skills. Surgery courses are open only to M.D. students and qualified students in associated health sciences.

Students develop an awareness of surgery's role in the treatment of disease. Emphasis is placed on general surgery, basic emergency surgery, trauma, oncology, burns, gastrointestinal and biliary tract disease, endocrine disease, pediatric surgery, transplantation, plastic and reconstructive surgery, and peripheral vascular surgery.

The majority of surgery courses involve patient-centered discussions and practical exercises interwoven with operating room experience. Lectures and conferences are scheduled regularly on specific topics.

The department offers independent study courses in selected surgery topics and clinical experiences; some are available to fourth-year M.D. students by arrangement with the faculty.

## Faculty

The faculty's strengths center in pathophysiology and problems of severe burns, trauma, organ transplantation, surgical control of morbid obesity, surgical oncology, bowel disease, biliary tract disease, pediatric surgery, endocrine disease, plastic surgery, and vascular surgery.

## Facilities

Abundant patient contact provides education in a wide variety of surgical diseases. The Department of Surgery provides training in the only burn unit in Iowa approved by the American College of Surgeons and in the Level I Trauma Center at University of Iowa Hospitals and Clinics.

Laboratories provide equipment, space, and technical expertise to support teaching and a wide spectrum of clinical and scientific research. Projects are available in gastrointestinal surgery, surgical microbiology, peripheral vascular surgery, transplantation, wound healing, organ preservation, vascular surgery, pediatric surgery, and surgical oncology.

## Surgery Courses

### 075:005 Clinical Surgery

6 s.h.

Experience as active member of surgical team; work on inpatient units, in clinics and operating room; assist in elective and emergency patient care.

### 075:216 Subinternship in General Surgery

4 s.h.

Responsibility for management of selected surgical inpatients, on a surgical service. Prerequisites: 075:005.

### 075:217 Advanced General Surgery

4 s.h.

Opportunity to strengthen clinical skills through experiences in the operating rooms, clinics, wards, and intensive care units of University of Iowa Hospitals and Clinics.

## Urology

**Interim head:** Karl J. Kreder

**Professors:** James A. Brown, Michael B. Cohen, Christopher S. Cooper, Karl J. Kreder, David M. Lubaroff, Michael A. O'Donnell

**Professors emeriti:** Bernard Fallon, Charles E. Hawtrey

**Clinical professor:** Victoria Sharp

**Associate professors:** Thomas S. Griffith, Yi Luo

**Assistant professors:** Brad Erickson, Moshe Wald

**Clinical assistant professors:** Kathleen Kieran, Elizabeth B. Takacs, Chad Tracy

**Web site:** <http://www.uihealthcare.com/depts/med/urology/index.html>

Urology encompasses the subspecialty areas of urologic nephrology, oncology, and endocrinology; male reproductive physiology; erectile dysfunction; neurourology; pediatric urology; urinary tract stone and infection, including endourology; laparoscopic urology; diagnostic urology, and urinary tract obstruction.

The Department of Urology offers instruction in all of these areas at both the undergraduate and graduate levels and provides continuing education for the delivery of urologic care.

## M.D. Student Training

The department cooperates with several University of Iowa basic science departments to educate first-year M.D. students in the relationship between urology and the basic sciences. It collaborates with the Department of Microbiology in teaching and research concerning immunology of genitourinary cancers and renal transplantation.

In the second-year M.D. course, 050:165 Foundations of Clinical Practice IV ICD, the department presents illustrative lectures and demonstrations related to diagnosis and treatment of genitourinary tract diseases.

Third- and fourth-year M.D. students take Department of Urology courses that provide experience in all areas of urology. The required third-year clerkship covers the fundamentals of these areas through experience in outpatient clinics and inpatient units at University of Iowa Hospitals and Clinics and the Iowa City Veterans Affairs Medical Center, as well as in daily interactive teaching seminars. Fourth-year M.D. students can take advanced elective courses of intensive study in any of the urologic subspecialties.

## Continuing Education

The department offers continuing education activities throughout the year for urologic and family practitioners. These activities are conducted by the senior staff, whose interests include pediatric urology, reproductive physiology, urologic oncology, urinary tract stone (including endourology/laparoscopy), and prostatic diseases.

## Research

The department has earned international recognition for its studies of prostatic diseases. The urological laboratories conduct research and offer instruction in experimental oncology, cellular immunology, and infertility.

The College of Nursing is an integral part of the University of Iowa health science campus, sharing in and contributing to teaching, research, and patient care resources that have earned international recognition. The University provides an unusually fine setting for nursing preparation because the educational and clinical resources vital to educating nurses are available on or near the campus. Faculty and students participate fully in University life and contribute their time, interests, and abilities to the many general and special activities of a major research university.

The college's Bachelor of Science in Nursing (B.S.N.), Master of Science in Nursing (M.S.N.), and entry-into-practice M.S.N.: Clinical Nurse Leader programs are accredited by the Commission on Collegiate Nursing Education (CCNE), an autonomous accrediting arm of the American Association of Colleges of Nursing (AACN). They also are approved by the Iowa Board of Nursing. The anesthesia nursing program is accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs.

Graduates of the B.S.N. and entry-into-practice M.S.N. programs qualify to take the licensure examination required for practice as registered nurses (RN). Graduates of advanced practice majors in the graduate program are eligible to take certification examinations and apply for Advanced Registered Nurse Practitioner (ARNP) licensure.

## Undergraduate Program

The college offers the Bachelor of Science in Nursing (B.S.N.). The program provides preparation for careers in the hospital care of patients and in community agencies such as public health services, schools, homes, and industries. It also provides a base for graduate study in nursing.

In addition to the advantages of combining general education with specialized career preparation, a college or university program offers the advantages of full participation in the social, cultural, and recreational activities of a highly diverse campus community. In nursing, no less than in other pursuits, a college or university background enables people not only to prepare for a career but to achieve a life of thought and action informed by knowledge, introspection, and contemplation.

The nursing major provides a basis for nurses' roles in wellness and health promotion, in acute care, and in long-term care for chronic illness. The professional nurse provides care to individuals, families, groups, and communities along a continuum of health, illness, and disability in any sector of the health care system.

In addition to providing care, the nurse serves as a coordinator of health care by organizing and facilitating the delivery of comprehensive, efficient, and appropriate service to individuals, families, groups, and communities. The nurse demonstrates the ability to conceptualize the total continuing health needs of the patient, including legal and ethical aspects of care. The University of Iowa program's goal is to produce graduates who are competent, committed, creative, and compassionate.

## Bachelor of Science in Nursing

The Bachelor of Science in Nursing requires 128 s.h., including 68 s.h. in the nursing major and 60 s.h. in the College

of Liberal Arts and Sciences General Education Program and supporting pre-nursing courses.

B.S.N. students may complete their entire program at Iowa, enrolling for their first year in the College of Liberal Arts and Sciences, or they may transfer from an institution that offers comparable courses approved by the University of Iowa and the College of Nursing. Highly qualified applicants may be admitted to the College of Nursing directly from high school. See "Admission to the B.S.N." later in this section.

Students who are part of the B.S.N. early admission program can expect to complete their plan of study in four academic years after enrolling at The University of Iowa. Other students who win admission to the college may expect to complete the degree in three academic years after they enter the B.S.N. program.

Nursing courses are based on concepts of health, deviations from health, and nursing intervention. Course work progresses in complexity from the sophomore through the senior year. The curriculum reflects the current trend in health care delivery toward emphasis on nursing as a service provided both inside and outside hospitals. Students have access to clinical experiences selected from a multitude of agencies in Iowa, and around the country.

### **Advising**

Advisors from the University's Academic Advising Center advise students who have declared a nursing interest. After admission to the College of Nursing, each student is assigned a College of Nursing faculty advisor and a professional advisor in the college's Office of Student Services.

### **RN/B.S.N. for Registered Nurses**

The RN/B.S.N. progression program is designed to offer registered nurses the opportunity to build on their nursing knowledge and experience by earning a Bachelor of Science in Nursing. Much of the program is offered online. RN/B.S.N. students take courses that focus on professional aspects of nursing, nursing process and health assessment, community/public health, leadership and management, research, and nursing issues. Each student is assigned to a College of Nursing faculty member for academic advising and curriculum planning.

The College of Nursing participates as a receiving institution in the Iowa Statewide Articulation Plan for Nursing Education: RN to Baccalaureate.

Students may transfer course work completed at other colleges and universities to satisfy prerequisites and degree requirements other than those for the nursing major. Once they satisfy prerequisites, students may complete the RN/B.S.N. in one calendar year in a sequence that begins each summer and includes three clinical and seven nonclinical nursing courses.

The RN/B.S.N. program uses online educational technologies. Face-to-face meetings are limited to physical assessment lab practice and testing each summer, available at support centers across Iowa. Students may be required to do a practicum presentation in fall and spring semesters. Presentations are flexibly scheduled and may be done on site, at a support center, or using online presentation software.

Registered nurses who plan to enter the baccalaureate program should contact the College of Nursing Office of Student Services for information and early advising.

### **Honors**

The College of Nursing Honors Program provides seminars and independent study experience for qualified students. In order to pursue honors studies in nursing, students must have completed the first clinical nursing course and must maintain a University of Iowa g.p.a. of at least 3.33 and a nursing major g.p.a. of at least 3.50.

The honors program enables students to explore subject matter based on individual interests, needs, and goals. It provides opportunities for self-initiative, research experience, and intellectual and personal development, and challenges students to grow and excel. Students who fulfill the requirements of the program graduate with honors in nursing.

### **Certificate or Minor in Aging Studies**

Students in the College of Nursing may participate in the Aging Studies Program, which provides undergraduate students with a multidisciplinary approach to gerontology. Students plan their course of study with their academic advisor in close cooperation with the Aging Studies Program coordinator. Nursing students who successfully complete 21 s.h. of approved course work in aging studies are awarded the Certificate in Aging Studies. Nursing students also may complete a minor in aging studies by taking 15 s.h. outside of their major in courses approved by the Aging Studies Program. See Aging Studies (College of Liberal Arts and Sciences) in the Catalog.

### **Study Abroad**

The College of Nursing advocates study abroad as a rich educational experience for students. Nursing students have the opportunity to encounter another culture directly through the college's cultural nursing experiences abroad. The intent of these regular programs is to introduce students to health care systems in other countries. In addition, students learn about health conditions and circumstances not widely prevalent in the United States (e.g., diphtheria, nutritional deficiencies). For more information, contact the College of Nursing Office of Student Services.

## **Expenses and Insurance**

Students pay University of Iowa student fees throughout the B.S.N. program. They also must purchase uniforms, white shoes, a stethoscope, a watch with a full-sweep second hand, and supplies and materials for required nursing courses. Students arrange and pay for their own health screening requirements, health insurance, and transportation once they are enrolled in clinical nursing courses. Students pay fees that cover the cost of computer testing, criminal background checks, and laboratory equipment. The fees also pay for a professional liability insurance group policy for students who do not yet hold an RN license; see "Professional Liability Insurance" below.

### **Mandatory Health Insurance**

All students must show upon admission to the College of Nursing and each August afterward verification that they have obtained and currently hold health insurance sufficient to satisfy the following minimal standards of coverage (or an equivalent alternative care plan):

- \$250,000 lifetime benefit;

- coverage for hospitalization, including coverage for room and board, physician visits, surgeon services, X-ray, and lab services;

- inpatient deductible under an individual policy not exceeding \$500 per admission and a 20 percent copayment/coinsurance requirement;

- coverage for medically necessary care, including both physician services for treatment of emergencies, illness, accident, injury, X-ray, and lab services.

### **Professional Liability Insurance**

All students in the College of Nursing are required to carry professional liability insurance throughout the duration of their program. Agencies in which students are involved in clinical practicums require that students have insurance coverage. The College of Nursing provides entering students with information about this requirement. Students who hold an RN license must show verification that they have purchased and currently hold professional liability insurance with a minimum coverage of \$1 million per single occurrence. Students without an RN license are covered by a group policy supported by student fees.

## **Undergraduate Student Organizations**

All College of Nursing undergraduate students are members of the National Student Nurses' Association and its local chapter, the Iowa Association of Nursing Students. The University of Iowa Association of Nursing Students (UIANS) provides opportunities for professional growth and development in nursing. UIANS representatives are members of the University of Iowa Student Government (UISG), and there is a UIANS representative on the Academic Council of the College of Nursing.

The University of Iowa Minority Student Nurse Association (UIMNSA) provides opportunities for professional growth and development for students from populations underrepresented in nursing. UIMNSA board members are members of the University of Iowa Student Government.

University of Iowa Men in Nursing (UIMiN) provides opportunities for nurses to meet, to recruit, to talk, and to influence the environment for men in nursing. It is open to all nursing students.

## **Admission to the B.S.N.**

B.S.N. students may complete their entire program at Iowa, enrolling for their first year in the College of Liberal Arts and Sciences. Contact the College of Nursing or the University of Iowa Office of Admissions. Highly qualified applicants may be admitted to the College of Nursing directly from high school; see "B.S.N. Early Admission Program" below.

To apply for admission to the B.S.N. program in nursing, each student must qualify for admission to The University of Iowa and must meet these requirements:

- completion of all prerequisites for admission to the College of Nursing, or current enrollment in any remaining prerequisites;

a grade of C or higher in all prerequisite courses;

a g.p.a. of at least 2.70 (recommended).

Applicants whose first language is not English must score at least 550 (paper-based), 213 (computer-based), or 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Registered nurses educated outside the United States are required to present verification of having passed the Commission on Graduates of Foreign Nursing Schools (CGFNS) examination and specified Excelsior baccalaureate nursing examinations. They also must meet the University's English proficiency requirements.

A criminal background check is conducted for all prelicensure and undergraduate students upon admission.

#### **HIGH SCHOOL BACKGROUND**

Currently, admission to the College of Nursing requires completion of the following minimum high school course requirements.

**English:** four years

**Foreign language:** two years of the same language

**Mathematics:** three years (a minimum of algebra I-II and geometry)

**Science:** one year of biology, one year of chemistry, and at least one semester of physics

**Social science:** three years

**Other college preparatory courses** selected with the help of the high school counselor

Effective for fall 2012 entry to the B.S.N., some high school background requirements will change: four years of the same foreign language and one full year of physics will be required.

#### **PRECLINICAL BACKGROUND**

Currently, students must complete the following requirements before they may begin nursing course work.

**Rhetoric:** 4 s.h. or its equivalent

**Mathematics:** three years of high school mathematics, or a score of 26 or higher on the mathematics battery of the ACT, or completion of a college mathematics course comparable to or more advanced than 22M:008 Intermediate Algebra

**Physics:** one-half year of high school physics or the equivalent

**Other course work:** animal biology, inorganic chemistry I, microbiology, human anatomy, psychology, and human development and behavior

Effective for fall 2012 entry to the B.S.N., some preclinical background requirements will change, as follows:

**Physics:** one full year of high school physics or the equivalent

**Other course work:** animal biology, inorganic chemistry, organic chemistry, microbiology, human anatomy, human physiology, math for the biological sciences, sociology, psychology, human development and behavior, economics, all General Education requirements, and all non-nursing electives

#### **AMERICAN COLLEGE TESTS**

All entering first-year and undergraduate transfer students who have earned fewer than 24 s.h. when they apply for admission to The University of Iowa must complete the American College Test (ACT) or the Scholastic Aptitude Test (SAT). For information on the ACT, write to ACT Inc., Box 451, Iowa City, Iowa 52243.

#### **B.S.N. Early Admission Program**

Highly qualified applicants may be admitted to the college of Nursing directly from high school through the B.S.N. early admission program. Early admission applicants must qualify for admission to The University of Iowa. They must have an ACT composite score of at least 28, an ACT science reasoning score of at least 25, and a g.p.a. of 3.8 or higher.

Currently, they also must have completed the following minimum high school course requirements.

**English:** four years

**Foreign language:** two years of the same language (Effective fall 2012 four years of the same foreign language will be

required.)

**Mathematics:** three years, including algebra I, algebra II, and geometry

**Science:** one year of biology, one year of chemistry, and at least one semester of physics

**Social studies:** three years

Effective for fall 2012 entry to the B.S.N., some high school background requirements will change: four years of the same foreign language and one full year of physics will be required.

### **Core Performance Standards**

Applicants to the College of Nursing are expected to be capable of completing the entire nursing curriculum and of earning a B.S.N. The nursing curriculum requires demonstrated proficiency in a variety of cognitive, problem-solving, manipulative, communicative, and interpersonal skills. Therefore, College of Nursing students must meet the following performance standards.

- Possess and use critical thinking skills sufficient for clinical judgment (e.g., identify cause-effect relationships in clinical situations, develop nursing care plans)
- Demonstrate interpersonal abilities sufficient for interaction with individuals, families, and groups from a variety of social, emotional, cultural, and intellectual backgrounds (e.g., establish rapport with patients, clients, colleagues)
- Possess and use communication skills sufficient for interacting with others (e.g., explain treatment procedures, initiate health teaching, observe patient/client responses, document and interpret nursing actions and patient/client responses)
- Administer cardiopulmonary procedures and other clinical procedures necessary for nursing care; calibrate and use equipment, position patients and clients
- Possess the tactile abilities (with or without an assistive device) sufficient for performing physical assessment (e.g., perform palpation functions of physical exam and those related to nursing interventions)

The examples above are not all-inclusive.

Applicants who may not meet these standards are encouraged to contact the College of Nursing associate dean for academic affairs for a personal interview.

### **Selection**

The college's admission committee recommends to the dean the applicants who appear to be best qualified. Fulfillment of minimum admission requirements does not guarantee admission to the College of Nursing. The committee may require personal interviews. A physical examination report and specific health screening requirements must be on file at the University of Iowa Student Health Service 10 days before the class opens for the first clinical nursing course.

### **Application Deadlines**

Fall semester (for pre-licensure B.S.N. students only): April 1

Summer session (RN-BSN students only): January 15

### **Financial Aid**

In addition to general assistance available to University students, there are assistance programs specifically for nursing students. Information about financial aid is available from the University's Office of Student Financial Aid.

## **Graduate Programs**

The college offers the Master of Science in Nursing (M.S.N.), including an entry-into-practice M.S.N. program, the Doctor of Nursing Practice, and a Doctor of Philosophy in nursing. The college also offers a joint M.S.N./M.P.H. with the College of Public Health. See "Joint M.S.N./M.P.H." later in this section.

Graduate students in the College of Nursing must adhere to all Graduate College policies regarding academic standing, probation, and dismissal; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

### **Master of Science in Nursing**

The Master of Science in Nursing (M.S.N.) requires a minimum of 33 s.h. of graduate credit. The program is designed to build on general and professional baccalaureate study. Graduation from an approved baccalaureate degree program is one of the admission requirements. Options are available for registered nurse applicants with a

nonaccredited B.S.N., a non-nursing B.A. or B.S., or a B.S.N. from a foreign country.

The college also offers the entry-into-practice M.S.N.: Clinical Nurse Leader program for individuals who hold a bachelor's or more advanced degree in a field other than nursing and who do not hold an RN license. The program's graduates are prepared for RN licensure and clinical nursing leadership, including faculty positions in Iowa community colleges.

The M.S.N. ordinarily requires four semesters of full-time study. Part-time study is available for some specializations. The entry-into-practice M.S.N.: Clinical Nurse Leader program requires six sessions of full-time study; students begin the program in spring semester and finish at the end of the next year's summer session.

The M.S.N. curriculum consists of a core component and areas of specialization enhanced by supporting course work in the College of Nursing or in related disciplines. Students may take two to three supporting courses related to their nursing specialization in the social, behavioral, or biological sciences or in business administration, law, or health management and policy.

Students must maintain a g.p.a. of at least 2.75 and must successfully complete a thesis, project, or portfolio.

The M.S.N. curriculum consists of the following components.

#### **NURSING SPECIALIZATION**

Specialization allows students to build a specialized area of knowledge and practice that extends beyond the advanced nursing core. Students may pursue clinical specialization in genetics nursing or occupational health nursing. Nonclinical specializations include nursing administration, nursing education, and the M.S.N./M.P.H. joint degree program. Some areas of specialization require special acceptance procedures. Students with unique career goals have the option of modifying their plans of study under the direction of their academic advisors.

#### **SUPPORTING COURSES**

Supporting course work varies with each specialization area. Supporting courses can be selected from varied academic departments at the University and should relate to the student's interest and specialization area.

Some specialization areas require students to take some courses in other departments. For example, students in the administration option select supporting courses from business, health management and policy, or allied study areas. Students select supporting course work in collaboration with their faculty advisors.

#### **THESIS, PROJECT, OR PORTFOLIO**

All M.S.N. students must take a final examination. Students satisfy this requirement by completing a thesis, project, or portfolio. Students, with their advisors, select the option that best serves their individual career objectives.

The master's thesis is a systematic inquiry into a nursing problem. Methodologies may include historical research, case studies, analytical literature review, surveys, or experimental studies that meet the requirements of the University of Iowa Graduate College. Students earn a total of 5 s.h. for the thesis.

The master's project is an in-depth synthesis and analysis of a chosen topic in nursing. The 15-to-20-page paper of publishable quality may not replicate previous course assignments. Students earn 2-3 s.h. for the project.

The master's clinical portfolio is a written description of the clinical experiences that contributed to the development of the advanced practice role and a self-assessment of clinical competencies and areas for future growth. Students in the clinical nurse leader and clinical specialty tracks are eligible to complete the clinical portfolio.

The master's professional portfolio is a written description of practicum experiences and competencies. Students in the nonclinical tracks are eligible to complete the professional portfolio.

Students earn no credit for the portfolio.

#### **Admission**

Applicants to the M.S.N. must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Applicants must have a g.p.a. of at least 3.00.

In addition, the College of Nursing requires the following:

- a bachelor's degree with a major in nursing from an accredited program (options are available for registered nurse applicants with a non-accredited B.S.N., a non-nursing B.A. or B.S., or a B.S.N. from a foreign country);

- the legal requirements for the practice of nursing in Iowa;

current written recommendations from three persons familiar with the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required);

current résumé, goal statement, and supplemental/information form;

completion of an upper-division nursing research course in the undergraduate program (not required for entry-into-practice M.S.N.: Clinical Nurse Leader applicants); and

successful completion of an upper-level statistics course (or equivalent) within five years of registering for 096:211 Research for Evidence-Based Practice I.

Applicants whose first language is not English must score at least 550 (paper-based), 213 (computer-based), or 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Applications for admission to the M.S.N. program are reviewed once a year. In order to be reviewed, the applicant's file must be complete, with all materials submitted. Application deadlines are as follows:

M.S.N.: October 26

Entry-into-practice M.S.N.: Clinical Nurse Leader (spring admission): June 1

A criminal background check is conducted for all graduate students upon admission.

All Graduate College policies pertaining to academic standing, probation, and dismissal are applicable to graduate students in nursing. Transfer credit applicable to the master's degree program is limited and must be approved by the director of the graduate program in nursing and by the student's advisor. Course work taken 10 years or more before the final examination must be updated, according to University policy.

### **Joint M.S.N./M.P.H.**

The joint Master of Science in Nursing/Master of Public Health requires 60 s.h. The program is designed for students who want to pursue careers that include professional activities in nursing and public health. Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program. See Master of Public Health Program (College of Public Health) in the Catalog and contact the College of Nursing Graduate Programs Office for more information.

### **M.S.N. and Nursing Home Administrator Licensure**

The nursing home administrator program offers students an efficient option for completing requirements for licensure examination while obtaining a M.S.N. Students may complete the requirements for licensure by supplementing study in adult and gerontology health nursing, adult/gerontology nurse practitioner, or nurse manager.

### **Doctor of Nursing Practice**

The Doctor of Nursing Practice requires 72-78 s.h. The degree is designed for nurses who wish to prepare for leadership roles. The program is intended to be completed in three years of full-time study. Students may arrange with their advisors to study part time. Individuals who have completed an M.S.N. with a nurse practitioner or advanced practice specialty program have the option to complete the D.N.P. with 29-32 s.h. of course work.

In addition to clinical specialization in advanced practice, the D.N.P. program provides education in evidence-based practice, economics, finance, and policy. It includes a practicum as well as didactic courses exploring clinical leadership, public policy and advocacy, specialty systems, change theory, finance and business, and entrepreneurial tools. Students have a number of advanced practice options, including psychiatric/mental health nursing, anesthesia nursing, pediatric nurse practitioner, adult/gerontology nurse practitioner, neonatal nurse practitioner, and family nurse practitioner.

All D.N.P. students complete 12 s.h. of general core courses, including leadership in nursing (3 s.h.), research application (3 s.h.), health policy and economics (3 s.h.), and nursing informatics in nursing and health care (3 s.h.). The advanced practice nursing core consists of 19 s.h. of course work that includes physiology/pathophysiology, health promotion, pharmacology, health assessment, and professional role courses.

D.N.P. students must complete 1,000 clinical hours. Individuals who enter the program having completed an M.S.N. with a nurse practitioner or advanced practice specialty program may transfer the clinical hours from their M.S.N. program to the D.N.P. program. The clinical hours requirement is evaluated for each individual who has completed an M.S.N. with specialty program. Students who completed more than 1,000 clinical hours in an M.S.N. advanced practice program still must complete a number of D.N.P. practicum and capstone project hours determined in consultation with their advisor and the D.N.P. program's director.

Other transfer credit applicable to the D.N.P. is limited and must be approved by the advisor and the D.N.P. program's

director. Transcripts for individuals who have completed an M.S.N. with a nurse practitioner or advanced practice specialty program are evaluated individually.

### Admission

Applicants to the D.N.P. must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Applicants must have a g.p.a. of at least 3.00.

In addition, the College of Nursing requires the following:

- a bachelor's degree with a major in nursing from an accredited program (options are available for registered nurse applicants with a non-accredited B.S.N., a non-nursing B.A. or B.S., or a B.S.N. from a foreign country);
- the legal requirements for a practice of nursing in Iowa;
- current written recommendations from three persons familiar with the applicant's competence in the practice of nursing and potential for leadership and scholarship (forms required);
- current résumé, goal statement, and supplemental/information form;
- completion of an upper-division nursing research course in the undergraduate program; and
- successful completion of an upper-level statistics course (or equivalent) within five years of registering for 096:211 Research for Evidence-Based Practice I.

Applications must include transcripts for all undergraduate and graduate course work. The goal statement and self-assessment should be two or three pages describing the applicant's nurse practitioner clinical specialization interest, the applicant's goals, and how the D.N.P. will influence the applicant's practice.

Applicants whose first language is not English must score at least 550 (paper-based), 213 (computer-based), or 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Applications for admission to the D.N.P. program are reviewed once a year. In order to be reviewed, the applicant's file must be complete, with all materials submitted. Application deadline is October 26 for all options except anesthesia nursing, which has a June 1 application deadline. Applicant interviews are required; in some cases, telephone interviews can be arranged.

A criminal background check is conducted for all graduate students upon admission.

Course work taken 10 or more years before the student plans to graduate from the D.N.P. program must be updated, according to University policy.

Post M.S.N./N.P. graduates from nurse practitioner programs at other schools must provide verification of completed clinical hours from their school's nurse practitioner director.

### Doctor of Philosophy

The Doctor of Philosophy in nursing requires a minimum of 72 s.h. of graduate credit. The program prepares scientists to conduct research in nursing, extend their knowledge base relevant to nursing, and contribute to the body of knowledge in the discipline of nursing. Ph.D. study requires expertise in clinical nursing and competence in research that relates to nursing practice and health care delivery.

B.S.N. students who intend to pursue a Ph.D. in nursing may be eligible to enter the doctoral program directly, once they have completed the B.S.N. Contact the College of Nursing Graduate Programs Office for more information.

Students choose from the curriculum's five focal areas: nursing in aging, nursing administration, nursing informatics, child and family nursing, and an individualized focus. Graduates of the program aspire to careers as researchers, college and university faculty members, consultants, and as leaders in the nursing profession, in health policy-making agencies, and in health care delivery systems.

All students must take the following courses.

096:340 Nursing Theory Construction I	3 s.h.
096:342 Qualitative Research	3 s.h.
096:344 Quantitative Research	3 s.h.
A graduate-level course in nursing/health informatics	3 s.h.
A graduate-level course in each of two of these areas: health economics, health policy	6 s.h.
Cognate minor courses	12 s.h.
Cognate research sequence: research methods and statistics	9 s.h.
096:490-096:491 Research Practicum-Research Practicum	0 s.h.

B.S.N. graduates who enter the Ph.D. directly must take the following course in addition to those listed above.

096:208 Leadership for Advanced Nursing Practice 3 s.h.

Two masters-level specialization courses, such as one of the following pairs:

096:219-096:220 Primary Care: Infants, Children, and Adolescents I-II 6 s.h.

096:260-096:261 Nursing Systems Administration I-II 6 s.h.

096:280 & 096:284 Primary Care: Adults and Older Individuals I-II 6 s.h.

In addition, all Ph.D. students must take the seminars and practicums appropriate for their focus area.

#### **AGING FOCUS**

096:410 Nursing Research of Biological Phenomena and Interventions for the Elderly 3 s.h.

096:420 Geriatric Mental Health Research 3 s.h.

096:430 Nursing Research in Sociocultural Phenomena and Interventions for the Elderly 3 s.h.

096:440 Research Utilization Residency in Care of the Elderly 3 s.h.

#### **NURSING ADMINISTRATION FOCUS**

096:450 Research Seminar in Nursing Administration I: Organizational Systems Concepts 3 s.h.

096:451 Research Seminar in Nursing Administration II: Health Care System Concepts 3 s.h.

096:460 Innovations in Nursing Management 3 s.h.

096:480 Residency in Nursing Service Administration 3 s.h.

#### **NURSING INFORMATICS FOCUS**

096:310 Advanced Nursing Informatics 3 s.h.

096:462 Research in Nursing Informatics I 3 s.h.

096:465 Residency in Nursing Informatics 3 s.h.

One additional course chosen by advisor

#### **CHILD AND FAMILY NURSING FOCUS**

096:405 Family Nursing Research 3 s.h.

096:445 Research Residency in Child and Family Nursing 3 s.h.

Two of these:

096:415 Genetic Nursing Research 3 s.h.

096:425 Research in Sociocultural Perspectives for Family and Women's Health 3 s.h.

096:435 Research in Cognitive and Behavioral Interventions for Children 3 s.h.

#### **COMPREHENSIVE EXAM, DISSERTATION**

All Ph.D. students must complete a written comprehensive examination. They earn 12 s.h. for work on the dissertation by completing 096:497 Dissertation Research Seminar I: Scholarship Development, 096:498 Dissertation Research Seminar II, and 096:499 Dissertation Research, which includes a dissertation prospectus, the dissertation, and an oral defense.

#### **Admission**

All applicants to the Ph.D. program must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Applicants must have

taken the Graduate Record Examination (GRE) General Test, preferably within the preceding five years. They must have completed an accredited basic nursing program and must hold a current license to practice nursing (special license for international students). Applicants must submit:

- a two-to-three-page statement describing their educational objectives and identifying a focal area for their doctoral study;

- three recommendations from nursing professionals that speak to the applicant's potential as a scholar;

- a current résumé or curriculum vitae; and

- a complete transcript of all college programs and courses.

Applicants who hold a master's degree must have a g.p.a. of at least 3.00. They must have successfully completed at least one graduate-level course in research and inferential statistics (3 s.h.) and at least one graduate-level course in information systems/informatics (3 s.h.).

B.S.N. graduates who apply directly to the Ph.D. program must have a grade-point average of at least 3.00 and must have successfully completed an upper-division course in statistics. They also must submit a strong statement of their research focus and career goals.

Applicants whose first language is not English must score at least 550 (paper-based), 213 (computer-based), or 81 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Applications for admission to the Ph.D. program are reviewed once a year. In order to be reviewed, the applicant's file must be complete, with all materials submitted. Application deadline is November 15.

A criminal background check is conducted for all graduate students upon admission.

### **Certificate in Advanced Practice Nursing**

The Certificate in Advanced Practice Nursing allows nurses who hold a master's degree to pursue advanced clinical training in one of four specialty tracks: pediatric nurse practitioner, adult/gerontology nurse practitioner, family nurse practitioner, or psychiatric/mental health nursing. Certificate requirements include advanced clinical core courses and a sequence of specialty courses. Students formulate a plan of study with the advice and counsel of their advisor and/or the director of the master's program. Successful completion of the specialty sequence qualifies a student to sit for professional certification examinations. Completion of the certificate program is noted on the student's transcript.

### **Certificate in Health Informatics**

The Certificate in Health Informatics is open to graduate students. The certificate requires 20 s.h. in courses numbered 100 or above, including two required core courses.

Health Informatics I (096:283) 3 s.h., is an interdisciplinary course intended primarily for graduate students, faculty, and health care clinicians. It explores decision-making processes and technological tools to support health care administration, management, and practice.

Health Informatics II (096:289) 3 s.h., is an interdisciplinary course focused on field projects related to one or more health informatics topics under the direction of established researchers/educators. It includes a seminar.

Students select electives (9-14 s.h.) from outside their major program of study. For example, a student working toward a nursing degree and the Certificate in Health Informatics can use only non-nursing electives for the certificate. Students choose electives with the guidance of their academic and certificate advisors.

Students who earn credit for a thesis, project, or independent study in their major program of study may apply the credit to the Certificate in Health Informatics if the certificate advisor determines that the subject matter is pertinent.

### **Professional Improvement**

Registered nurses who wish to take University of Iowa course work to fulfill professional or personal improvement objectives may request admission in the professional improvement (PI) category. This admission status allows students to take some graduate courses at the University without committing to a degree objective.

Admission as a nursing professional improvement student requires a formal application, including submission of three current written recommendations and all academic transcripts. GRE General Test scores, required by the University, must be submitted before the end of first semester registration. Deadlines are July 15 for fall semester admission, December 1 for spring semester admission, and May 1 for summer session admission.

Since acceptance as a PI student does not influence acceptance to the M.S.N. or Ph.D. programs, PI students interested in master's or doctoral study in nursing must follow the application procedures for those programs (see the

appropriate sections above). Only 6 s.h. or two required nursing core courses taken under professional improvement status may be used to fulfill M.S.N. requirements. Professional improvement students may not enroll in Ph.D. courses.

## Student Organizations

All College of Nursing undergraduate students are members of the National Student Nurses' Association and its local chapter, the Iowa Association of Nursing Students. The University of Iowa Association of Nursing Students (UIANS) provides opportunities for professional growth and development in nursing. UIANS representatives are members of the University of Iowa Student Government (UISG), and there is a UIANS representative on the Academic Council of the College of Nursing.

The University of Iowa Minority Student Nurse Association (UIMNSA) provides opportunities for professional growth and development for students from populations underrepresented in nursing. UIMNSA board members are members of the University of Iowa Student Government.

University of Iowa Men in Nursing (UIMiN) provides opportunities for nurses to meet, to recruit, to talk, and to influence the environment for men in nursing. It is open to all nursing students.

The college's Association of Graduate Nursing Students (AGNS) provides opportunities for professional growth sharing of research, and representation on varied college and University committees.

## Continuing Education

The college offers nonacademic, short-term continuing education programs for registered nurses. Continuing Education Units (CEUs) are awarded for each program on the basis of one unit per 10 clock hours of instruction. The College of Nursing is approved by the Iowa Board of Nursing as an approved provider, number 1, and is accredited by the American Nurses Association Board of Accreditation and the National Association of Pediatric Nurse Associates and Practitioners.

## Facilities

The Nursing Building is centrally located on the University's main campus, in close proximity to the Carver College of Medicine, the College of Dentistry, the College of Pharmacy, the College of Public Health, University of Iowa Hospitals and Clinics, Bowen Science Building, and the Hardin Library for the Health Sciences. Completed in 1971, the building consists of five floors with varied and specialized facilities. Administrative offices are located on the first floor. Faculty offices are located on every floor except the second, which is used entirely for classrooms and laboratories.

The Nursing Clinical Education Center provides clinical experiences for nursing students and serves as a resource for the University's professional nursing staff. Opened in 2006 at University of Iowa Hospitals and Clinics (UIHC), the center offers the latest technology in an 11-room clinical simulation lab. It also has an 86-seat classroom, a resource library, and gathering spaces for private study. The center is operated collaboratively by the College of Nursing and the UIHC Department of Nursing Services and Patient Care.

## College of Nursing Courses

### Primarily for Undergraduates

#### **096:029 First-Year Seminar**

1 s.h.

Introduces first-year undergraduate students to the intellectual life of the University of Iowa; provides an opportunity to work closely with a faculty member or senior administrator; seminars help students make the transition to college-level learning through active participation in their own learning.

#### **096:030 Human Development and Behavior**

3 s.h.

Normal developmental transitions experienced by individuals and family systems throughout the lifespan, including physical, cognitive, and social-emotional development. Prerequisites: 031:001. Same as 153:030.

#### **096:031 Adult Development and Aging**

1 s.h.

Completes the Human Development Life Span course requirement for students who have already had a child-adolescent development class; focus on physical, cognitive, and personality development in the adult; presents pressing social issues. Requirements: elementary or general psychology, and child development.

#### **096:108 Basic Aspects of Aging**

3 s.h.

Social, psychological, and biological aspects; demographics of aging, health, economic issues, primary relationships, social services. GE: Social Sciences. Same as 042:108, 153:108, 169:108.

**096:109 Leadership U** 1-3 s.h.  
Repeatable.

**096:112 Human Sexuality, Diversity, and Society** 1-3 s.h.  
Physiological, psychological aspects; parameters defined by students, instructor. Same as 042:112.

**096:114 Human Pathophysiology: Organ Systems** 3 s.h.  
Normal and abnormal functioning of human cells, tissues, and organ systems over the lifespan; focus on cardiovascular, respiratory, renal, gastrointestinal, endocrine, and reproductive systems, and on processes of metabolism and homeostasis of the internal milieu. Requirements: approved courses in biology, inorganic chemistry, microbiology, and human anatomy.

**096:115 Human Pathophysiology: Cellular/Neurology/Immunology** 3 s.h.  
Normal and abnormal functioning of human cells, tissues, and organ systems over the lifespan; focus on processes of communication, control, defense, and movement. Requirements: approved courses in biology, inorganic chemistry, microbiology, and human anatomy.

**096:116 Introduction to Human Genetics** 3 s.h.  
Introduction to organization of the human genome and basic principles of inheritance in humans; cells and development, chromosome structure and function, gene structure and function, genes in pedigrees and populations, implications of genetic variation on health.

**096:118 Pathophysiology** 3 s.h.  
Abnormal physiological health transitions; disorders in cells, organs; systems involved in vegetative functioning and biological defense of the human organism. Requirements: one course each in anatomy, chemistry, microbiology, physics, physiology, and psychology.

**096:119 Neurological and Behavioral Pathology** 1-2 s.h.  
Abnormal physiological and psychological health transitions that have well-documented physiological and/or behavioral bases; focus on neurological and behavioral disorders. Corequisites: 096:118, if not taken as a prerequisite.

**096:124 Pharmacotherapeutics in Nursing** 3 s.h.  
Basic principles of pharmacotherapeutics and pharmacologic interventions; focus on mechanism of drug actions in patient treatment. Prerequisites: 096:114 and 096:115.

**096:125 Health Disparities and Cultural Competence** 2-4 s.h.  
Characteristics, causes, and effects of health disparities in the U.S. health care system; foundation for development of knowledge, attitudes, and skills required of culturally competent health care providers; definitions and models of cultural competence, characteristics of culturally effective practitioners and workplaces; health disparities among specific populations, evidence for cultural competence as a remedy; taking a culturally appropriate history; working with interpreters; legal and professional imperatives for cultural competence. Same as 046:377, 172:135.

**096:126 Communication for Health Professionals** 2 s.h.  
The communication process in health care settings; emphasis on theory-based strategies to improve communication with individuals, families, other health care professionals.

**096:127 Health Assessment Across the Life Span** 4 s.h.  
Knowledge and skills health professionals need to perform holistic health assessments of individuals across the life span; emphasis on history taking, physical assessment skills; laboratory practices. Requirements: admission to the College of Nursing and courses in anatomy, human development and behavior, and animal biology.

**096:130 Teaching and Learning Online** 3 s.h.  
Synthesis and critical evaluation of current knowledge regarding use of online learning as a tool; empirical research, best practices, and available resources to support effective implementation and management of online learning; skill development and practice; web-based course.

**096:134 Basic Concepts of Nursing Care** 4 s.h.

Physiological and behavioral concepts, nursing interventions, and activities across settings and populations; based on nursing interventions classification taxonomy. First in a two-course sequence. Corequisites: 096:114 or 096:115, and 096:127, if not taken as prerequisites. Requirements: nursing major.

**096:135 Complex Concepts of Nursing Care** 4 s.h.

Continuation of 096:134; physiological and behavioral concepts, nursing interventions, and activities across settings and populations. Prerequisites: 096:134. Corequisites: 096:136, 096:114 or 096:115, and 096:124, if not taken as prerequisites. Requirements: nursing major

**096:136 Core Clinical Practicum** 4 s.h.

Acute care of adult clients in the clinical setting; in-depth practicum experience applying basic and complex concepts of nursing care; focus on clinical decision-making skills. Prerequisites: 096:126, 096:127, and 096:134. Corequisites: 096:135.

**096:137 Nursing Care of the Patient in Pain** 3 s.h.

Assessment, pharmacological and nonpharmacological nursing intervention, evaluation of acute, chronic-benign, and chronic-malignant pain. Requirements: RN license.

**096:138 Nursing Care of the Patient with Cancer** 3 s.h.

Basic understanding of the physiology of cancer and various treatment modalities, nursing interventions commonly used with cancer patients and their families, and psychosocial issues in cancer. Requirements: 096:124 and 096:135, or RN/BSN enrollment.

**096:139 Parent-Child Nursing** 3 s.h.

Health promotion, maintenance, and restoration for parents, infants, children, and adolescents in childbearing and child-rearing families. Prerequisites: 096:135. Corequisites: 096:124, if not taken as a prerequisite.

**096:140 Parent-Child Nursing Practicum** 3 s.h.

Principles of health promotion, maintenance, and restoration applied among parents, infants, children, and adolescents in childbearing and child-rearing families. Prerequisites: 096:135 and 096:136. Corequisites: 096:124 and 096:139, if not taken as prerequisites.

**096:141 Gerontological Nursing** 3 s.h.

Nurse's role in promoting, maintaining, and restoring the health of aging adults; nursing science applied to care of older adults in diverse settings. Prerequisites: 096:135. Corequisites: 096:124.

**096:142 Gerontological Nursing Practicum** 3 s.h.

Nursing process applied to promote, maintain, and restore health of older adults; opportunities to provide nursing care to well elderly and to acutely and/or chronically ill elderly in a variety of settings. Prerequisites: 096:135 and 096:136. Corequisites: 096:124 and 096:141, if not taken as prerequisites.

**096:143 Research for Nursing Practice** 1-3 s.h.

Introduction to the concepts and process of nursing research; focus on critique of published research and application to nursing practice. Prerequisites: 096:050. Requirements: an approved statistics course.

**096:146 Health Promotion for Older Adults** 3 s.h.

Problems, strategic efforts toward long-term goal of health promotion; disease prevention; slowing the decline caused by chronic conditions to extend independent, rewarding lives. Same as 153:146, 169:146.

**096:147 End-of-Life Care for Adults and Families** 2-4 s.h.

End-of-life issues in care of adults, older adults, and their families. Requirements: 096:135 and 096:136, or RN standing. Same as 046:146, 050:147, 153:147.

**096:150 Independent Study** arr.

Supervised study designed for individual undergraduate students.

**096:151 Honors Independent Study** 1-3 s.h.

Supervised study designed for individual honors students.

**096:152 Honors Seminar** 1 s.h.

Supervised study designed for individual honors students.

- 096:153 Community and Public Health Nursing Theory: Generalist** 3 s.h.  
Nursing's role in the relationship between community conditions and public health; principles of public health with nursing knowledge and skills to address health needs of individuals, families, communities, populations. Prerequisites: 096:135. Corequisites: 096:154.
- 096:154 Community and Public Health Nursing Practicum** 3 s.h.  
Application of public health principles with nursing knowledge and skills to address the health needs of communities and populations. Prerequisites: 096:135 and 096:136. Corequisites: 096:124 and 096:153.
- 096:155 Psychiatric/Mental Health Nursing** 3 s.h.  
General principles and practices of psychiatric/mental health nursing; psychiatric disorders, populations at risk, continuity of care, problems in daily living. Prerequisites: 096:135. Corequisites: 096:124, if not taken as a prerequisite.
- 096:156 Psychiatric/Mental Health Nursing Practicum** 3 s.h.  
Nursing process used to deliver nursing care to individuals and families with mental illness in a variety of clinical settings; focus on promotion, maintenance, restoration of the mental health of individuals and families. Prerequisites: 096:135 and 096:136. Corequisites: 096:124 and 096:155, if not taken as prerequisites.
- 096:157 Nursing Leadership and Care Management** 3 s.h.  
Analysis of nursing leadership, care management, and models of care in the context of society and the interdisciplinary health care system. Requirements: senior standing in nursing.
- 096:158 Clinical Nursing Internship** 5 s.h.  
Independent internship in one of a variety of health care settings to promote role transition, lifelong learning; emphasis on integration and application of knowledge and skills to design, provide, manage, and coordinate care. Requirements: senior standing in nursing.
- 096:159 Contemporary Nursing Practice Issues** 3 s.h.  
Identification, exploration, analyses of selected issues in nursing and health care; impact of significant historical, social, political, genetic, legal, and ethical factors on development of the nursing discipline. Requirements: senior standing in nursing.
- 096:163 Information Management and Patient Care Technology in Practice** 3 s.h.  
Information management, patient care technology; information systems for quality improvement data, regulatory reporting; range of technologies and infrastructure of evidence-based information for clinical care, including patient monitoring systems, medication administration systems, longitudinal electronic records, clinical decision support tools, and other data gathering devices to support patient care; open to continual learning. Prerequisites: 096:136. Requirements: admission to the prelicensure BSN program.
- 096:168 Nonprofit Organizational Effectiveness I** 3 s.h.  
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 024:147, 032:127, 042:157, 06J:147, 06T:144.
- 096:169 Nonprofit Organizational Effectiveness II** 3 s.h.  
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 024:148, 032:128, 042:158, 06J:148.
- 096:171 Nursing and Society** 3 s.h.  
Introduction to health care systems and the nursing profession; health care systems, resources, financing health care, and health care accessibility in the United States; the creative and scientific processes that underlie and guide the practice of nursing. Requirements: admission to the prelicensure BSN program.
- 096:172 Providing Culturally Congruent Care for Diverse Populations** 3 s.h.

Role of health care professionals in providing care that is culturally congruent with the client's values, beliefs, and traditions; opportunity to build knowledge, attitudes, awareness, and skills necessary in providing culturally congruent care for specific populations; demonstration of essential skills; exploration of personal attitudes, biases; issues and trends that impact delivery of care to specific populations. Offered online. Requirements: sophomore standing.

**096:173 Clinical Inquiry**

4 s.h.

Prerequisites: 22S:101 or 22S:102. Requirements: admission to MNHP program.

**096:175 Issues in International Nursing and Health Care**

3 s.h.

Same as 152:175.

**096:176 Clinical Reasoning**

4 s.h.

Skills to help nontraditional nursing students synthesize, expand, and refine nursing concepts and clinical reasoning competencies; development and application of cognitive and psychomotor skills necessary for performing systematic, holistic, and culturally competent health assessment. Prerequisites: 096:114 or 096:115, and 096:177. Requirements: admission to MSN:CNL program.

**096:177 Therapeutic Nursing Interventions I**

4 s.h.

Physiological and behavioral concepts, nursing diagnoses, interventions, and outcomes across settings and populations; nursing classifications; experience in the laboratory. Prerequisites: 096:114 or 096:115, and 096:176. Requirements: admission to MSN:CNL program.

**096:178 Therapeutic Nursing Interventions II**

4 s.h.

Continuation of 096:177. Prerequisites: 096:176 and 096:177. Corequisites: 096:124. Requirements: admission to MSN:CNL program.

**096:179 Selected Topics in Nursing**

1-2 s.h.

In-depth study of topics in professional nursing practice and health care; workshop format.

**096:180 Intensive Practicum I**

3 s.h.

Applications of health care concepts, nursing diagnoses, interventions, and outcomes presented in 096:176 and 096:177; focus on clinical decision-making skills. Prerequisites: 096:176 and 096:177. Corequisites: 096:124 and 096:178. Requirements: admission to MSN:CNL program.

**096:181 Clinical Instruction in Nursing Education**

3 s.h.

Role and functions of the nurse educator in the clinical setting; development of teaching strategies and learning activities that support effective clinical and laboratory instruction; evidence-based teaching and evaluation practices; how to incorporate the core concepts of critical thinking for clinical decision-making, effective communication, and cultural competence into clinical experiences; learners with diverse learning styles and backgrounds; ethical and legal implications in clinical teaching and evaluation of learning; technology and emerging trends that impact teaching in the clinical setting. Requirements: RN-BSN or graduate standing.

**096:182 Alternative and Complementary Medicine**

arr.

Requirements: (for 046:105) P4 standing. Same as 046:105, 078:210.

**096:183 Intensive Practicum II**

3 s.h.

Experience in varied acute and community-based settings; opportunity to apply principles to the care of diverse populations, consistent with the three specialty theory courses; proficiency with advanced care management interventions and technologies. Prerequisites: 096:180. Corequisites: 096:139, 096:141, and 096:155. Requirements: admission to MSN:CNL program.

**096:184 Hairitage: African American Women's Hair Culture**

2-3 s.h.

Hair and its centrality to the experience of women of African descent; emotional, political, economical, and historical significance; political, legal, and educational implications; connections to ideas of aesthetics, race relations, family dynamics, consumerism, and so forth.

**096:186 Cultural Expeditions in Nursing**

3 s.h.

Multicultural awareness, recognition of specific health care beliefs and values; online course. Prerequisites: 096:135.

**096:187 Legal Issues for Health Care Providers**

3 s.h.

Legal issues faced by health care providers, counselors, and social services providers; administrative and regulatory requirements, civil lawsuits, issues that affect students as providers, advocates, and individuals.

**096:190 Dimensions of Professional Nursing**

3 s.h.

The nursing discipline; identification, exploration, analysis of contemporary issues and trends in nursing; professional roles and responsibilities; the health care environment; importance of nursing science, theory, and research to nursing practice. Requirements: computer literacy and RN/BSN standing.

**096:191 Health Assessment**

4 s.h.

Health assessment of adults; experience demonstrating assessment skills, compiling a health history, conducting a physical exam, and developing nursing diagnoses for clients. Requirements: RN/BSN standing.

**096:194 Leadership and Care Management in Professional Nursing Practice**

3 s.h.

Nursing leadership and management in a dynamic practice environment; focus on context in which nurses practice, leadership and management principles in changing health care system. Prerequisites: 096:192, 096:193, and 096:197; or 096:143.

**096:195 Practicum for Leadership and Care Management in Professional Nursing**

3 s.h.

Experience applying concepts of leadership, management, and evidence-based practice in a variety of settings; development of individualized plan of study for the experience. Prerequisites: 096:192, 096:193, and 096:197; or 096:143. Corequisites: 096:194, if not taken as a prerequisite. Requirements: RN licensure in state of practicum.

**096:196 Special Studies in Nursing**

3 s.h.

Identification, exploration, and analysis of contemporary issues that confront the professional nurse; the practice of nursing, regulation of health care systems, available resources. Prerequisites: 096:192.

**096:198 Rural Clinical Leadership Practicum**

3 s.h.

Nursing leadership preparation; observation of health professional role models, hands-on interdisciplinary experience in a rural Iowa hospital system; complex leadership roles, unique health care needs and opportunities in rural nursing and health care; contact with a faculty mentor by telephone and e-mail; clinical course. Prerequisites: 096:050, 096:051, and 096:136.

**096:199 Intensive Practicum III**

4 s.h.

Intensive clinical experience in nursing care management in collaboration with nurse preceptors; complex, collaborative nursing care management of diverse populations; enhancement of care management skills as a basic foundation for achieving optimal clinical outcomes; experience in application of evidence-based practice, clinical decision making, delegation and supervision, fiscal accounting; focus on interdisciplinary collaboration within complex organizational systems. Prerequisites: 096:139, 096:141, 096:153, 096:155, and 096:183. Requirements: admission to MSN:CNL program.

**Primarily for Graduate Students**

Courses are offered only if minimum enrollments are maintained.

**096:200 Capstone: Clinical Immersion and Microsystem Improvement Leadership**

6 s.h.

Intensive immersion into role and practice expectations of clinical nurse leaders (CNL) at microsystem level; mentoring in design and delivery of care; application of evidence-based practice; collection and evaluation of client-outcomes data; assessment and mitigation of cohort risk; interdisciplinary collaboration; client advocacy; client and staff education; direct provision of care in complex situations; principles of effective use of resources; application of systems thinking to capstone project; improvement science and quality tools to address Institute of Medicine aims for health care improvement. Prerequisites: 096:208, 096:209, 096:263, and 096:266. Requirements: all didactic and clinical courses for general and specialty practice (gerontology, parent-child, mental health, and community); and master's portfolio.

**096:205 Clinical Practicum: Health of Children in Schools**

3 s.h.

Delivery of health care in school settings; educational, legal, cultural, ethical issues in school nursing practice; developmental issues and their relationship to risk factors and the school population's health; application of nursing interventions, evaluation of nursing and educational outcomes; clinical practicum with children in a school setting; seminar, 90 clock hours in clinical practicum. Requirements: MSN enrollment with school health focus.

- 096:208 Leadership for Advanced Nursing Practice** 3 s.h.  
Roles and behaviors for leading others and influencing health care delivery.
- 096:209 Health Systems/Economics/Policy** 3 s.h.  
Global, economic, organizational, political, and technological contexts for advanced nursing practice.
- 096:211 Research for Evidence-Based Practice I** 3 s.h.  
Opportunity for clinicians to develop proficiency in use of research- and evidence-based practice; essentials of the research process, qualitative and quantitative research, components of evidence-based practice; acquisition of knowledge and skills necessary for research (knowledge) utilization initiatives and application of evidence-based practice principles in clinical settings; identification of appropriate research questions, synthesis of knowledge base for evidence-based practice, revision of clinical practice guidelines, and evaluation of research utilization and evidence-based practice initiatives. Requirements: successful completion of two posttests for 096:143.
- 096:212 Research for Evidence-Based Practice II** 3 s.h.  
Innovation models applied to nursing practice; implementation and evaluation research applied to planning, initiating, and monitoring best-care practices; factors that impede or facilitate evidence-based practice changes within and across health care systems; strategies for successful implementation of evidence-based practice change in organizations; students participate in evidence-based implementation process. Requirements: DNP enrollment or 096:211.
- 096:213 Physiology and Pathophysiology for Advanced Clinical Practice** 3 s.h.  
Regulation of cellular, organ, and system function; regulation of internal milieu; functional interrelationships among body systems; cellular and body-wide mechanisms of self-defense; illustrative examples of pathological phenomena. Requirements: courses in anatomy, physiology, microbiology, and pathophysiology.
- 096:214 Advanced Health Assessment for Clinical Practice** 3 s.h.  
Knowledge and skills necessary for advanced health assessment of individuals and families across the life span. Requirements: graduate standing in the College of Nursing.
- 096:216 Group Facilitation in Human Sexuality** 0-3 s.h.  
Principles of group dynamics, group process; leadership skills for small, task-oriented discussion groups on human sexuality. Prerequisites: 042:112. Same as 042:216.
- 096:219 Primary Care: Infants, Children, and Adolescents I** 2-3 s.h.  
Enhancement of clinical knowledge and skills for infant, child, adolescent care. Prerequisites: 096:213, 096:214, 096:222, and 096:224.
- 096:220 Primary Care: Infants, Children, and Adolescents II** 3 s.h.  
Enhancement of clinical knowledge and skills for infant, child, adolescent care; development and refinement of knowledge and skills in primary health care delivery. Requirements: (for 096:220) 096:219 or 096:280; (for 070:201) 096:219 and 096:280. Same as 070:201.
- 096:222 Health Promotion and Intervention for Primary Care** 3 s.h.  
Theories of health promotion in primary care, levels of prevention, epidemiological principles and methods; specific interventions designed to maintain, promote, optimize health across the lifespan.
- 096:223 Clinical Applications for Health Assessment and Health Promotion** 1-3 s.h.  
Advanced health assessment and promotion skills applied to planning, implementing, and evaluating interventions designed to maintain, promote, and optimize health across the lifespan. Corequisites: 096:214 and 096:222, if not taken as prerequisites. Requirements: graduate standing in the College of Nursing.
- 096:224 Pharmacotherapeutics for Advanced Clinical Practice** 4 s.h.  
Pharmacologic, pharmacokinetic, and pharmacodynamic principles essential for advanced clinical practice; classes of drugs frequently used in management of common clinical conditions; legal considerations in prescriptive authority. Prerequisites: 096:213.
- 096:225 Biopsychosocial Dimensions of Healthy Aging** 3 s.h.

Biopsychosocial dimensions of healthy aging in individuals; healthy aging, including behavior and normal age-related physiological changes, psychosocial and cultural implications of aging; expansion of gerontological nursing based on integration of theory, research, standardized nursing languages.

**096:228 Advanced Practice Genetic Nursing I** 1-3 s.h.

Advanced practice genetic nursing for those at risk for genetic conditions or a condition with a genetic component; application of genetic/genomic science to nursing practice including chromosomal variations; Mendelian and nontraditional inheritance; preconception and prenatal health care in genetics; dysmorphology examinations; developmental delay associated with genetic conditions; application of molecular methodology to clinical and research practice; beliefs about race and ethnicity in the genomic era; ethical, legal, and social implications of genetic nursing. Prerequisites: 096:214 and 096:223. Corequisites: 096:116. Requirements: enrollment in APN-Genetics MSN program.

**096:229 Advanced Practice Genetic Nursing Practicum I** 2 s.h.

Integration and application of advanced practice in genetic nursing assessment and counseling skills with individuals and families. Corequisites: 096:228.

**096:230 Advanced Practice Genetic Nursing II** 1-3 s.h.

Advanced practice genetic nursing for individuals, families, and populations who are at risk for genetic conditions or who have a condition with a genetic component; application of genetic science to nursing assessments, interventions, and outcomes; genomics and the delivery of health care in primary and public health; pharmacogenetics; genomic therapeutics; childhood onset genetic disorders; adult onset genetic disorders; part two of the Advanced Practice Nursing Genetics course series. Prerequisites: 096:116, 096:214, 096:223, and 096:228. Requirements: enrollment in APN-Genetics MSN program.

**096:231 Advanced Practice Genetic Nursing Practicum II** 2 s.h.

Application of advanced practice in genetic nursing; emphasis on conditions that present in the adult years and the nurse's role in an interdisciplinary genetic delivery system. Prerequisites: 096:229. Corequisites: 096:230.

**096:232 Professional Aspects of Clinical Nursing Practice** 3 s.h.

Advanced nursing role competencies and related settings in which advanced nursing practice occurs; history and development, core competencies, advanced practice roles, practice management issues. Prerequisites: 096:208.

**096:234 Advanced Community Health Assessment** 3 s.h.

Health of communities, process of assessment; emphasis on conceptual models from public health that focus on select populations, community assessment. Requirements: epidemiology course.

**096:235 Advanced Community Health Nursing Practicum I** 2 s.h.

Integration and application of advanced community health assessment knowledge, skills; nurse's role in population-focused practice. Corequisites: 096:234. Requirements: epidemiology course and MSN enrollment.

**096:236 Advanced Community Health Intervention and Evaluation** 3 s.h.

Development, implementation, evaluation of health promotion and disease prevention strategies for select populations, communities. Prerequisites: 096:234.

**096:237 Advanced Community Health Nursing Practicum II** 2 s.h.

Integration and application of knowledge and skills for advanced community health intervention, outcome evaluation. Offered spring semesters of odd years. Corequisites: 096:236, if not taken as a prerequisite. Requirements: MSN enrollment.

**096:238 Intensive Practicum in Advanced Community Health** 3 s.h.

Synthesis of advanced public health theory, nursing knowledge; in-depth experience synthesizing clinical management, role enactment. Offered summer sessions of odd years. Prerequisites: 096:235 and 096:237.

**096:241 The Care of the Frail Elderly** 3 s.h.

Clinical management of the elderly; emphasis on economic considerations, principles of gerontological care, common syndromes, ethical issues; clinical application experience in a long-term care setting. Prerequisites: 096:214, 096:222, and 096:224. Same as 153:241.

**096:246 Nursing Education: Process, Roles, and Strategies** 3 s.h.

Role of nurse educator through study, application of teaching/learning theories; learning tasks of students in nursing education programs. Corequisites: 096:208, if not taken as a prerequisite.

**096:247 Curriculum Development in Nursing Education** 3 s.h.

Societal, educational, professional factors in undergraduate curriculum design; evaluation of components in basic nursing education programs. Prerequisites: 096:246.

**096:250 Psychiatric/Mental Health Nursing Theory I** 3 s.h.

Basic psychological principles, theories related to mental health and intersections between physical and mental health; psychological theory viewed through framework of lifespan development, infancy through adulthood.

**096:251 Psychiatric/Mental Health Nursing Theory II** 3 s.h.

Advanced psychiatric nursing practice with selected populations; definition and expansion of practice based on the integration of theory, standardized languages, research, self-evaluation. Prerequisites: 096:250.

**096:254 Psychiatric/Mental Health Nursing Practice with Groups** 3 s.h.

Experience using group process as a treatment modality; relevance of group intervention models for meeting mental health needs of clients across the life span. Prerequisites: 096:251. Requirements: admission to psychiatric/mental health nursing program.

**096:256 Occupational Health Nursing I** 3 s.h.

Framework for occupational health nursing practice and evolving role of the occupational health nurse; focus on health in the workplace. Prerequisites: 175:230. Corequisites: 096:257.

**096:257 Occupational Health Practicum I** 3 s.h.

Concepts and theories of 096:256 integrated with professional nursing practice in the workplace; clinical focus on environmental perspective of worker health and role of occupational health nurse at worksite. Prerequisites: 175:230 and 173:140. Corequisites: 096:256.

**096:258 Occupational Health Nursing II** 3 s.h.

Framework for implementing and evaluating risk reduction program in the workplace; compliance with regulatory entities in occupational health, quality assurance, surveillance, injury prevention. Prerequisites: 096:206, 096:208, and 096:256. Corequisites: 096:259.

**096:259 Occupational Health Practicum II** 3 s.h.

Transition from student role to clinical specialist role in occupational health nursing; in-depth experience in student's interest area. Corequisites: 096:258.

**096:260 Nursing Systems Administration I** 1-4 s.h.

Leadership concepts and theories, and their application to the nurse administrator's unique roles in community and institutional health care organizations; environmental, technological, and professional influences on structure and functions of health care and nursing service organizations and on the nurse administrator's role; course modules on leading patient care delivery, health care systems, and strategic management; practicum component for nurse administrator students. Prerequisites: 096:208.

**096:261 Nursing Systems Administration II** 1-5 s.h.

Concepts and theories regarding administration of financial, material, and human resources and quality of service, related to selected functions of the nurse administrator; course modules on financial management, human resources management, and outcomes and safety management; financial, human resources, and outcomes management in context of institutional settings (hospitals, nursing homes) or community and ambulatory care settings; influence of economic and social forces on administration of resources, personnel, and quality of service; research in nursing, business, and behavioral science related to administrative functions; practicum component for nurse administrator students. Prerequisites: 096:208 or 096:260.

**096:263 Informatics in Nursing and Health Care** 3 s.h.

Foundation of information management and processing principles that support data, information, and knowledge in provision and delivery of nursing and health care. Requirements: competence in computer use and nursing major.

**096:266 Advanced Case Management: Interdisciplinary Approach** 3 s.h.

Theory, evidence, and strategies for health care coordination and integration examined through analysis of case management and disease management interventions; interdisciplinary approach; leadership for interdisciplinary teamwork; analysis and critique of case and disease management theory and models; synthesis of case and disease management principles as a framework for managing health care outcomes for cost and quality, identification of evidence-based clinical care guidelines; analysis of financial, legal, ethical, and outcomes management components of case and disease management practice. Same as 174:266.

**096:269 Human Physiology, Pathology, and Assessment for Advanced Practice Nursing** 3 s.h.

Detailed study of normal and abnormal human physiology, including mechanisms that govern and support cell, organ, and system function; builds on basic sciences required for undergraduate nursing curriculum and on clinical skills from experience in intensive care setting. Requirements: admission to anesthesia nursing program.

**096:270 Human Anatomy, Physiology, Pathophysiology, and Assessment for Advanced Practice Nursing** 3-6 s.h.

Interrelationships between anatomic structure and physiological function in health and disease; clinical assessment of functional integrity of organ systems; implications of pathophysiology for anesthesia. Requirements: admission to anesthesia nursing program. Same as 060:270.

**096:271 Chemical and Physical Principles of Anesthesia Practice** 3 s.h.

Chemistry and physics, as applied to anesthesia. Requirements: admission to anesthesia nursing program. Same as 116:271.

**096:272 Pharmacology of Anesthesia Practice I** 3 s.h.

Mechanism and action of drugs; focus on pharmacotherapeutic principles, including pharmacokinetics, pharmacodynamics, receptor binding, cell signaling; principles of uptake, distribution, elimination of anesthetic and adjunctive agents. Requirements: grade of 2.67 or higher in 096:271 or 116:271, and admission to anesthesia nursing program. Same as 116:272.

**096:273 Pharmacology of Anesthesia Practice II** 2 s.h.

Continuation of 096:272 or 116:272; vascular, hepatic, renal, GI, endocrine aspects; cellular mechanisms, electrolytes alterations. Requirements: grade of 2.67 or higher in 096:272 or 116:272, and admission to anesthesia nursing program. Same as 116:273.

**096:274 Basic Principles of Anesthesia Practice** 5 s.h.

Overview of anesthesia as a nursing specialty; patient assessment, anesthetic planning and management, pertinent regulations; principles of general and regional anesthesia for surgical specialties. Requirements: (for 096:274) grade of 2.67 or higher in 096:272, or concurrent enrollment in 096:273; (for 116:274) grade of 2.67 or higher in 116:272 and concurrent enrollment in 116:273. Same as 116:274.

**096:275 Advanced Principles of Anesthesia Practice I** 2 s.h.

Special needs and intraoperative management of obstetric, pediatric, and neurological patients; emphasis on pathophysiology, monitoring, ancillary requirements. Prerequisites: 096:274 or 116:274. Requirements: grade of 2.67 or higher in 096:273 or 116:273. Same as 116:275.

**096:276 Advanced Principles of Anesthesia Practice II** 2 s.h.

Special needs and intraoperative management of patients in cardiac, vascular, thoracic, and other surgical specialties; focus on altered pathophysiology, anesthetic requirements; strategies for special surgical situations. Prerequisites: 096:274 or 116:274. Requirements: grade of 2.67 or higher in 096:273 or 116:273. Same as 116:276.

**096:277 Advanced Principles Anesthesia Practice III** 1 s.h.

Acute and chronic pain management; anesthetic problems with concurrent multisystem disease, advanced age, altered physical and/or mental status. Prerequisites: 096:274 or 116:274. Requirements: grade of 2.67 or higher in 096:273 or 116:273. Same as 116:277.

**096:278 Professional Aspects of Anesthesia Nursing Practice** 2 s.h.

Issues in contemporary anesthesia nursing practice: historical development; ethical, legal, and political aspects; evaluation; quality management; responsibilities; career expectations and development; role of professional organization. Requirements: anesthesia nursing program enrollment. Same as 116:278.

**096:279 Equipment and Technological Principles of Anesthesia Practice** 3 s.h.

Anesthesia delivery systems, ancillary equipment, monitoring devices; correlation of applicable chemical and physical principles for use, safe operation, care, and cleaning of anesthesia-related equipment. Prerequisites: 116:271. Requirements: anesthesia nursing program enrollment. Same as 116:279.

**096:280 Primary Care: Adults and Older Individuals I** 3 s.h.

Pathophysiologic alterations and clinical management of associated health care problems in adults, the elderly. Prerequisites: 096:213, 096:214, 096:222, and 096:224.

**096:283 Health Informatics I** 3 s.h.

Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as 021:275, 050:283, 051:187, 056:186, 074:191, 174:226, 200:110.

**096:284 Primary Care: Adults and Older Individuals II** 3 s.h.

Continuation of 096:280. Prerequisites: 096:280.

**096:287 Pharmacology of Anesthesia Practice III** 2 s.h.

Drugs specific to various specialty areas: tocolytics, vasoactive and cardioactive agents, drugs that alter clotting, chronic pain therapy agents. Requirements: grade of 2.67 or higher in 096:273 or 116:273, and anesthesia nursing program enrollment. Same as 116:287.

**096:289 Health Informatics II** 3 s.h.

Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as 021:280, 051:189, 056:287, 074:192, 200:120.

**096:290 Introductory Clinical Anesthesia** 1 s.h.

Initial anesthesia preceptorship; development of basic clinical skills for work as a nurse anesthetist. Requirements: basic science core courses and anesthesia nursing program enrollment. Same as 116:290.

**096:291 Clinical Anesthesia I** 1 s.h.

Supervised anesthesia clinical experience for general, orthopedic, gynecologic, pediatric, urologic, dental, EENT, ambulatory surgery, or invasive diagnostic procedures. Prerequisites: 096:290 or 116:290. Requirements: anesthesia nursing program enrollment. Same as 116:291.

**096:292 Clinical Anesthesia II** 1 s.h.

Clinical anesthesia experience under faculty supervision at University Hospitals and Clinics, in surgical subspecialty rotations not completed in 096:291 or 116:291. Prerequisites: 096:291 or 116:291. Requirements: anesthesia nursing program enrollment. Same as 116:292.

**096:293 Advanced Clinical Anesthesia** 1 s.h.

Clinical anesthesia experiences in neurologic surgery, cardiovascular/thoracic surgery; experience providing anesthesia for patients with complex pathophysiology in varied surgical settings. Requirements: (for 096:293) anesthesia nursing program senior standing, anesthesia nursing concentration courses, and g.p.a. of 2.67 or higher; (for 116:293) anesthesia nursing program enrollment, anesthesia nursing concentration courses, and g.p.a. of 2.67 or higher. Same as 116:293.

**096:294 Obstetrical Anesthesia** 1 s.h.

Experience providing anesthesia for the parturient, initial neonatal care; two one-month rotations off campus. Requirements: (for 096:294) anesthesia nursing program enrollment; (for 116:294) anesthesia nursing courses and anesthesia nursing program enrollment. Same as 116:294.

**096:295 Rural Anesthesia** 1 s.h.

Anesthesia experience in community hospitals; three one-month rotations at UI-affiliated clinical sites in rural Iowa. Requirements: (for 096:295) anesthesia nursing program enrollment; (for 116:295) anesthesia nursing courses and anesthesia nursing program enrollment. Same as 116:295.

**096:296 Independent Study** arr.

Supervised study and/or clinical practice adjusted to needs of master's degree students. Requirements: MSN enrollment.

**096:298 Master's Project** 2-3 s.h.

**096:299 Thesis** arr.

## For Doctoral Students

Open to doctoral students or to others with consent of instructor.

**096:300 Classics in the Social Evolution of Modern American Nursing** 3 s.h.  
From 1870 to present; writings, classic books, documents; influence of societal conditions on expansion of nursing services, education.

**096:303 DNP: Advanced Role Development I** 3 s.h.  
Organizational and leadership skills that enhance practice and emphasize clinical care, ongoing improvement of health outcomes, and patient safety; case management, business practices, multidisciplinary role setting, leadership and ethics, conflict resolution, community or aggregate populations, vulnerable populations. Corequisites: 096:304. Requirements: admission to Doctor of Nursing Practice program.

**096:304 DNP: Adv Role Development Practicum I** 3 s.h.  
Opportunities to apply advanced leadership and clinical knowledge in health care systems; application of content from 096:303; identification of needs and/or interests to define student's clinical practice; experience in selected clinical or agency sites to increase competencies in areas such as clinical acumen, case management, leadership, business practices. Corequisites: 096:308. Requirements: admission to Doctor of Nursing Practice program.

**096:305 Emerging Science** 3 s.h.  
Acquisition of emerging scientific knowledge in health care and application to individuals, families, populations; integration of epidemiologic approaches, genomic factors, and socio-cultural influences in processes of conducting risk assessment, intervention implementation, and health care delivery evaluation; importance of research and statistical methods in establishing risk profiles; studies of clinical, community, vulnerable, and marginalized populations as essential for developing and implementing individualized health care plans for populations, family units, and individuals. Corequisites: 096:211. Requirements: admission to Doctor of Nursing Practice program.

**096:306 DNP: Advanced Role Development II** 3 s.h.  
Builds on 096:304; continued development of in-depth clinical knowledge and skills in student's interest area; advanced levels of interprofessional collaborative skills and team building. Prerequisites: 096:303. Corequisites: 096:307.

**096:307 DNP: Advanced Role Development Practicum II** 3 s.h.  
Builds on 096:304; advanced leadership skills and clinical knowledge applied at practicum site; enhancement of competencies in areas such as clinical acumen, case management, leadership, business practices. Prerequisites: 096:303 and 096:304. Corequisites: 096:306.

**096:308 Clinical Leadership Project** 1-5 s.h.  
Opportunity for in-depth analysis and synthesis of a topic that contributes to an aspect of advanced nursing practice; students relate projects to evidence-based practice/translational science courses and/or 096:303 and 096:306.

**096:309 Data Mining and Machine Learning** 3 s.h.

**096:310 Advanced Nursing Informatics** 3 s.h.  
Management and processing of data and information, evaluation of information systems; related informatics research methods that support knowledge development. Requirements: graduate-level informatics course.

**096:312 Advanced Practice in Clinical Information Systems** 3 s.h.  
Nursing informatics theory applied to design, modification, implementation, and evaluation of nursing and health information systems; supervised clinical preceptorship. Prerequisites: 096:263 and 096:310.

**096:313 Computational Intelligence** 3 s.h.  
Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Prerequisites: 056:171. Same as 056:235.

- 096:314 Integrated Seminar in Nursing Informatics** 3 s.h.  
Topics focused on problems related to nursing and health informatics theory, measurement, methodology, ethics, and policy issues. Requirements: Ph.D. enrollment.
- 096:315 Advanced Practice Clinical Practicum I** 3 s.h.  
Application of advanced physical assessment, pathophysiology, and diagnostic reasoning in a clinical setting appropriate to a specific population.
- 096:316 Advanced Practice Clinical Practicum II** 3 s.h.  
Continuation of 096:315; emphasis on diagnostic reasoning and formulation of treatment plans.
- 096:317 Advanced Practice Clinical Practicum III** 3-4 s.h.  
Synthesis of role expectations for advanced practice with focus on clinical competencies appropriate to the specialization.
- 096:320 Economics of Health Care and Nursing** 3 s.h.  
Economic principles: demand, supply for health manpower; insurance; costs, financing of health care services; contemporary hospital structures, organization; role of government.
- 096:330 Nursing and Health Policy, Law, and Advocacy** 3 s.h.  
Knowledge and skill in three areas that promote effective policy making--health care policy, legislative and rule-making processes at state and federal levels, role of nursing in public policy; issues that shape health care economics and policy development; the health care system--economics, financing, role of government, not-for-profit entities, nongovernmental organizations; global health issues in developing countries. Requirements: Ph.D. standing.
- 096:340 Nursing Theory Construction I** 3 s.h.  
Foundation of theory for professional practice; history, philosophy, sociology of science; development of a scientific community in nursing; relationship between theory construction, research; methods for generating specific theories.
- 096:342 Qualitative Research** 3 s.h.  
Overview of qualitative research; ethnography, grounded theory, historiography, phenomenology, and variations within each approach; philosophical underpinnings and research design across traditions; participant recruitment and selection, modes of data collection, management, and analysis, and evaluation criteria; issues in qualitative research, including integrated methods, metasynthesis, work with vulnerable populations. Prerequisites: 096:340.
- 096:344 Quantitative Research** 3 s.h.  
Refinement of students' understanding of the application of scientific logic; criteria for casualty, its application in health-related research; quantitative research designs and corresponding methods of analysis, sampling theory, approaches to sample selection and recruitment, methods to avoid bias; instrument selection, reliability and validity, management of large data sets and maintenance of data integrity. Prerequisites: 096:340.
- 096:405 Family Nursing Research** 3 s.h.  
Family theories and empirical research from nursing and related disciplines; mid-range family theories; issues in research methodology.
- 096:410 Nursing Research of Biological Phenomena and Interventions for the Elderly** 3 s.h.  
Analysis, evaluation of research on health of elderly, aging process; emphasis on methodological issues, instrumentation appropriate for study of biological phenomena. Requirements: (for 153:410) Ph.D. enrollment. Same as 153:410.
- 096:415 Genetic Nursing Research** 3 s.h.  
Concepts in human genetics integrated with nursing research; methodological issues in study of populations with specific genetic problems; generation of testable hypotheses.
- 096:420 Geriatric Mental Health Research** 3 s.h.  
Analysis, evaluation; emphasis on program evaluation, geriatric mental health services research, methodological issues. Requirements: (for 153:420) Ph.D. enrollment. Same as 153:420.
- 096:425 Research in Sociocultural Perspectives for Family and Women's Health** 3 s.h.

Health experiences of U.S. women and families from oppressed, marginalized cultural and social groups; approaches to developing and testing interventions, outcomes promoting and enhancing health of women and families; mid-range theory related to health care access and utilization.

**096:430 Nursing Research in Sociocultural Phenomena and Interventions for the Elderly** 3 s.h.  
Sociocultural issues for aging clients, corresponding nursing interventions; theoretical orientations to dynamics of aging, transitions and role changes, social/environmental issues. Requirements: (for 153:430) Ph.D. enrollment. Same as 153:430.

**096:435 Research in Cognitive and Behavioral Interventions for Children** 3 s.h.  
Research on cognitive and behavioral problems in children, research designs and data analysis, evaluation of instruments, areas that need further development, development of testable research questions.

**096:440 Research Utilization Residency in Care of the Elderly** 3 s.h.  
Project based on relevant gerontological nursing research. Requirements: two courses from 096:410, 096:420, or 096:430.

**096:445 Research Residency in Child and Family Nursing** 3 s.h.  
Research or research utilization project based on relevant child and/or family nursing research; guided by preceptor.

**096:450 Research Seminar in Nursing Administration I: Organizational Systems Concepts** 3 s.h.  
Health care organization, nurses in the organization; data collection instruments; directions for further research, implications for model building, research methods, practice.

**096:451 Research Seminar in Nursing Administration II: Health Care System Concepts** 3 s.h.  
Management concepts, health care factors that influence delivery of care systems; patient outcomes; measurement of quality nursing care. Prerequisites: 096:450.

**096:460 Innovations in Nursing Management** 3 s.h.  
Current and emerging issues that affect functions, responsibilities of nurse administrator; research base for recent innovations in nursing management; delivery of care systems for high-risk populations.

**096:462 Research in Nursing Informatics I** 3 s.h.  
Fundamental theoretical research regarding study of symbolic representation (text, image, voice), comprehending and communicating nursing phenomena, developing methods to build databases, and developing prototypes of decision support systems and workstations. Prerequisites: 096:310. Requirements: Ph.D. enrollment.

**096:463 Research in Nursing Informatics II** 3 s.h.  
Builds on 096:462; clinical applications, related research. Prerequisites: 096:462.

**096:464 Nursing and Health Representation and Knowledge Building** 3 s.h.  
Structure and content of health and nursing representation schemes, knowledge retrieval, and knowledge building; strategies for implementing and evaluating representation schemes in health delivery and knowledge development contexts. Corequisites: 096:463, if not taken as a prerequisite.

**096:465 Residency in Nursing Informatics** 3 s.h.  
Application of nursing informatics in a practice setting.

**096:470 Methods and Issues in Nursing Interventions Effectiveness Research** 3 s.h.  
Issues in conducting research on nursing management and on clinical interventions cost effectiveness; methods and issues in classification of nursing, health, health systems phenomena. Requirements: Ph.D. enrollment or postdoctoral standing.

**096:475 Leadership Institute and Career Development** 3 s.h.  
Four demands of leadership: purpose, direction, and meaning; trust and accuracy; optimism; action and results. Ten-day course. Requirements: Ph.D. enrollment or postdoctoral standing.

**096:480 Residency in Nursing Service Administration** 3 s.h.  
Application of administrative skills in a practice setting.

<b>096:485 Research Residency for Individualized Option</b>	3 s.h.
Participation in a research project based on an individualized plan of study, under guidance of a preceptor.	
<b>096:490 Research Practicum</b>	0 s.h.
Participation in ongoing investigative team as research assistant; followed by 096:491.	
<b>096:491 Research Practicum</b>	0 s.h.
Continuation of 096:490.	
<b>096:496 Independent Study</b>	arr.
Supervised study adjusted to needs of doctoral degree students. Requirements: Ph.D. enrollment.	
<b>096:497 Dissertation Research Seminar I: Scholarship Development</b>	1 s.h.
Preparation for successful completion of doctoral course work and dissertation, establishment of career research direction. Corequisites: 096:499.	
<b>096:498 Dissertation Research Seminar II</b>	0 s.h.
Research methods, analysis procedures.	
<b>096:499 Dissertation Research</b>	arr.

The pharmacy profession is concerned with a wide variety of activities, from developing new drug products to caring for patients. An important concept in the delivery of pharmacy services is medication therapy management--the responsible provision of drug therapy to achieve defined outcomes that improve patients' quality of life. These outcomes include preventing, arresting, or curing a disease, and/or eliminating or reducing its symptoms.

In order to carry out these activities, pharmacists specialize in the science of drugs and drug information.

The dispensing of medications and information at the corner pharmacy is just one aspect of the profession.

Pharmacists work in many health care settings, engaging in research, clinical practice, teaching, and counseling. Along with their training in science and drug preparation, they learn the business and communication skills necessary for their

multifaceted careers.

Demand for qualified pharmacists is high. Iowa's pharmacy students study with professors who, in many cases, are pioneering the development of new drugs and are defining the appropriate use of others to solve chronic health problems. They also enjoy advanced research facilities, including those of Iowa's drug research and manufacturing area, where experimental drugs are produced for testing and licensing by manufacturers before being introduced worldwide.

The University of Iowa College of Pharmacy is accredited by the Accreditation Council for Pharmacy Education.

### **College Organization**

The College of Pharmacy's faculty and programs are organized in two academic departments, each with two divisions. These units provide course work for the Doctor of Pharmacy curriculum and for the college's graduate programs.

#### **PHARMACY PRACTICE AND SCIENCE DEPARTMENT**

Faculty in the Pharmacy Practice and Science Department provide expertise and education in the professional practice of pharmacy. They specialize in a wide variety of clinical pharmacy practices; conduct research on patient and population outcomes related to medication therapy; and provide instruction in the pharmacist's professional role and the safe, effective use of medications.

The department offers Master of Science and Doctor of Philosophy curricula in pharmaceutical socioeconomics, which encompasses the behavioral, economic, social, and administrative sciences; elements of pharmacy practice; and health services research. It offers course work through its Applied Clinical Sciences Division and its Health Services Research Division.

**Applied Clinical Sciences Division:** Teaching and research in this division focus on the delivery of care and related services to patients and the education of student and resident pharmacists in practice settings. Courses are offered in pharmacotherapy, communication and practice skill development, clinical problem solving, and patient care. Professional practice mentoring and education are provided in introductory and advanced pharmacy practice experiences.

**Health Services Research Division:** Teaching and research in this division involve economic, social, behavioral, and administrative components of pharmacy practice and medication use. Courses are offered on the health care system, practice management, the professional and business aspects of pharmacy practice, and on learning and applying economic and social psychological theories to the study of health services and medication use.

To learn more about the department and its two divisions, visit the Pharmacy Practice and Science Department web site.

#### **PHARMACEUTICAL SCIENCES AND EXPERIMENTAL THERAPEUTICS DEPARTMENT**

Faculty in the Pharmaceutical Sciences and Experimental Therapeutics Department provide expertise and education in clinical pharmaceutical sciences, medicinal and natural products chemistry, and pharmaceuticals. Their interests include dosage form development and performance, industrial and manufacturing pharmacy, pharmacokinetics and pharmacodynamics, and the chemistry of drugs and their action on human systems. The department offers courses through its Medicinal and Natural Products Chemistry Division and its Pharmaceuticals and Translational Therapeutics Division.

**Medicinal and Natural Products Chemistry Division:** Course work in this division relates to understanding the chemistry of drugs and their action on human systems, principles of drug discovery and drug design, natural product chemistry, and biotechnology and genomic strategies for producing new drug molecules. The division's curricula for the M.S. and Ph.D. programs provide abundant opportunities for interface with researchers in other areas, including medicine, pharmacology, biochemistry, chemistry, and pharmaceuticals.

**Pharmaceuticals and Translational Therapeutics Division:** This division prepares students to become leaders in developing and evaluating drugs, drug products, and drug delivery systems. It offers two M.S. and Ph.D. subtracks: the pharmaceuticals subtrack, which focuses on characterization of pharmaceuticals and their component materials, development of delivery systems for optimal human or veterinary use, and the pharmacokinetic and pharmacodynamic evaluation of drug actions and interactions; and the clinical pharmaceutical sciences subtrack, which focuses on investigating drug therapy outcomes in patients and identifying factors responsible for specific drug actions in individual patients, related patient groups, and large patient populations. The division also offers multidisciplinary opportunities with programs in chemistry, engineering, biomedical science, dentistry, and veterinary medicine. Its national and international collaborations enhance the breadth of research activities available to students.

For more about the department and its two divisions, visit the Pharmaceutical Sciences and Experimental Therapeutics Department and the Medicinal and Natural Products Chemistry Division web sites.

## Professional Program (Pharm.D.)

The College of Pharmacy offers the Doctor of Pharmacy and collaborates with the College of Public Health to offer the joint Doctor of Pharmacy/Master of Public Health (Pharm.D./M.P.H.).

### Doctor of Pharmacy

The Doctor of Pharmacy program prepares students for careers in pharmacy. It provides professional education in a number of areas, including pharmaceutical technology, biopharmaceutics, medicinal chemistry and natural products, pharmaceutical socioeconomics, pharmacotherapy, patient care, clinical and hospital pharmacy, and aspects of biotechnology.

The program requires four years of full-time study preceded by at least two years of pre-pharmacy study in the College of Liberal Arts and Sciences at The University of Iowa or at any accredited community or liberal arts college in the United States or Canada. Graduates of the program are qualified to take the Iowa Board of Pharmacy examination that is required for licensure as a pharmacist.

The Pharm.D. requires satisfactory completion of required courses, including at least 12 s.h. of professional electives and 20 s.h. of general education courses; a cumulative g.p.a. of at least 2.00; and a pharmacy g.p.a. of at least 2.00. The pharmacy grade-point average is computed from grades earned in all required courses that students have completed while enrolled in the College of Pharmacy, excluding general education electives and professional electives.

Students must earn a grade of C-minus or higher in transfer courses applied to the Pharm.D.

Rules and regulations concerning academic probation, pass/nonpass, credit by examination, maximum schedule, second-grade-only option, waiver or substitution of courses, cancellation of registration, drop date, and correspondence study are provided in the College of Pharmacy section of the ISIS Student Handbook and in the College of Pharmacy Student Handbook.

The Tippie College of Business, the Carver College of Medicine, the College of Dentistry, and the College of Liberal Arts and Sciences contribute to the education of pharmacy students by providing instruction in the physical sciences, basic medical sciences, business, the humanities, and social sciences.

The College of Pharmacy provides students with the highest possible quality in the professional experiential program. Faculty and adjunct faculty serve as preceptors, providing advanced-practice experience at institutions and pharmacies in Iowa, nationwide, and around the world.

### Professional Curriculum

In addition to the specific courses listed here, students must complete 20 s.h. of general education courses chosen from behavioral, social, humanistic, and business disciplines.

#### FIRST YEAR

Students must complete one semester of 046:001 Introduction to Pharmacy Practice during the first professional year. They also complete 046:004 Student Pharmacist Professionalism throughout the first, second, and third professional years.

#### First Semester

046:001 Introduction to Pharmacy Practice	1 s.h.
046:004 Student Pharmacist Professionalism	1 s.h.
046:050 Pharmacy Practice Lab I	2 s.h.
046:103 Fundamentals of Evaluating Clinical Research	1 s.h.
046:123 Pharmaceutics I: Solutions	4 s.h.
069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
099:162 Biochemistry for Pharmacy Students	4 s.h.

#### Second Semester

046:001 Introduction to Pharmacy Practice (if not taken first semester)	1 s.h.
046:004 Student Pharmacist Professionalism (if not taken first semester)	1 s.h.
046:051 Pharmacy Practice Lab II	2 s.h.
046:122 Social Aspects of Pharmacy Care	2 s.h.

046:124 Pharmaceutics II: Solids and Semi-solids	4 s.h.
046:128 Medicinal and Natural Products Chemistry I: Biotechnology and Chemotherapy	3 s.h.
071:180 Pharmacology for Pharmacy Students I	3 s.h.

**SECOND YEAR**

Students must complete 046:002 Introduction to Community Pharmacy Practice and 046:008 Introduction to Hospital Pharmacy Practice during the second professional year. These practice experiences are delivered in set time blocks over the winter break or during the summer before or after the P2 year.

**First Semester**

046:002 Introduction to Community Pharmacy Practice	3 s.h.
046:004 Student Pharmacist Professionalism	1 s.h.
046:116 Pharmacy Practice Lab III	2 s.h.
046:131 Medicinal and Natural Products Chemistry II: Pharmacodynamic Agents	3 s.h.
046:138 Pharmacokinetics and Biopharmaceutics	3 s.h.
046:149 Introduction to Therapeutics/Special Population	2 s.h.
046:154 Endocrinology, Ophthalmology, Women's and Men's Health Therapeutics	2 s.h.
071:181 Pharmacology for Pharmacy Students II	4 s.h.

**Second Semester**

046:004 Student Pharmacist Professionalism (if not taken first semester)	1 s.h.
046:008 Introduction to Hospital Pharmacy Practice	2 s.h.
046:106 Clinical Practice Skills I: Theory and Application	2 s.h.
046:117 Pharmacy Practice Lab IV	2 s.h.
046:132 Medicinal and Natural Products Chemistry III: Medicinal Neurochemistry	3 s.h.
046:155 Respiratory and Dermatologic Therapeutics	2 s.h.
046:156 Cardiovascular Therapeutics	2 s.h.
046:170 Clinical Pharmacokinetics	3 s.h.
Professional electives	3 s.h.

**THIRD YEAR**

Students must complete one semester of 046:003 Introduction to Clinical Pharmacy Practice during the third professional year.

**First Semester**

046:003 Introduction to Clinical Pharmacy Practice	1 s.h.
046:004 Student Pharmacist Professionalism	1 s.h.
046:107 Clinical Practice Skills II: Critical Patient Analysis	2 s.h.
046:115 Drug Literature Evaluation	2 s.h.
046:118 Pharmacy Practice Lab V	2 s.h.
046:129 Pharmaceutical Economics and Insurance	3 s.h.
046:158 FEN, GI, and Renal Therapeutics	2 s.h.
046:159 Rheumatology, Immunology, Hematology, Oncology, and Transplantation Therapeutics	2 s.h.
Professional electives	4 s.h.

**Second Semester**

046:003 Introduction to Clinical Pharmacy Practice (if not taken first semester)	1 s.h.
046:004 Student Pharmacist Professionalism (if not taken first semester)	1 s.h.
046:104 Pharmacy Law and Ethics	2 s.h.
046:108 Clinical Practice Skills III: Applied Patient Management	2 s.h.
046:119 Pharmacy Practice Lab VI	2 s.h.
046:139 Pharmacy Management and Marketing	2 s.h.

046:164 Neurology/Psychiatry Therapeutics	2 s.h.
046:165 Infectious Disease Therapeutics	2 s.h.
Professional electives	5 s.h.

#### FOURTH YEAR: ADVANCED PHARMACY PRACTICE ROTATIONS

During the fourth year, students are required to complete eight advanced pharmacy practice rotations. All students must complete the first four rotations listed below (18 s.h.); they also must complete an additional four rotations of their choice (minimum of 16 s.h.).

All of these (18 s.h.):

046:178 Hospital Pharmacy Rotation	6 s.h.
046:179 Community Pharmaceutical Care Rotation	6 s.h.
046:180 Acute Care Medicine Rotation	6 s.h.
046:181 Elective: Family Medicine Rotation	6 s.h.

Four of these (minimum of 16 s.h.):

046:136 Elective: Academic Rotation	6 s.h.
046:140 Elective: Ambulatory Care Rotation	6 s.h.
046:142 Elective: Compounding/Complimentary Alternative Medicine Rotation	6 s.h.
046:143 Elective: Critical Care Medicine Rotation	6 s.h.
046:161 Elective: Drug Information Rotation	6 s.h.
046:182 Elective: Pediatrics Rotation	6 s.h.
046:184 Elective: Psychiatry Rotation	6 s.h.
046:185 Elective: Neurology Rotation	6 s.h.
046:186 Elective: Surgery Rotation	6 s.h.
046:187 Elective: Nuclear Pharmacy Rotation	6 s.h.
046:188 Elective: Pharmacy Practice Underserved Population Rotation	6 s.h.
046:189 Elective: Pharmacy Rotation	6 s.h.
046:192 Elective: Long Term Care Rotation	6 s.h.
046:193 Elective: Home Health Care Rotation	6 s.h.
046:194 Elective: Managed Care Rotation	6 s.h.
046:196 Ambulatory Care Rotation	6 s.h.
046:197 Elective: Hematology/Oncology Rotation	6 s.h.
046:199 Elective: Research Rotation	6 s.h.
046:300 Elective: Emergency Medicine Rotation	6 s.h.
046:301 Elective: Hospital Management Rotation	6 s.h.
046:302 Elective: Infectious Disease Rotation	6 s.h.
046:303 Elective: Medication Use Evaluation Rotation	6 s.h.
046:304 Elective: Pharmacy Industry Rotation	6 s.h.
046:305 Elective: Pharmacy Regulatory Rotation	6 s.h.
046:306 Elective: Professional Association Rotation	6 s.h.
046:307 Elective: Veterinary Pharmacy Rotation	6 s.h.
046:308 Elective: Advanced Community Pharmacy Rotation	6 s.h.

#### PROFESSIONAL ELECTIVES

Pharm D. students must complete 12 s.h. of professional electives, which may be chosen from the following list.

046:005 Dean's Pharmacy Forum I	2 s.h.
046:006 Dean's Pharmacy Forum II	2 s.h.
046:007 Career Pathways in Pharmacy	1 s.h.
046:011 Web 2.0 and Pharmacy Drug Information	2 s.h.
046:012 Survey of Basic Pharmaceutical Sciences	1-2 s.h.
046:013 Ambulatory Care Pharmacy	2 s.h.
046:014 Special Topics in Acute Care	2 s.h.
046:018 Journey Through Illness	1 s.h.
046:101 Pharmacy Projects	1-3 s.h.
046:102 Pharmacy Workshop	1 s.h.
046:105 Alternative and Complementary Medicine	arr.

046:121 Substance Abuse	3 s.h.
046:126 International Perspectives: Xicotepec	2 s.h.
046:127 Pharmaceuticals Management for Underserved Populations	3 s.h.
046:135 Perspectives in MNPC Research	1 s.h.
046:146 End-of-Life Care for Adults and Families	2-4 s.h.
046:157 Quantitative Research Methods in Pharmacy	4 s.h.
046:169 Introduction to Pharmacogenomics	2 s.h.
046:171 Nonprescription Pharmacotherapy	2 s.h.
046:173 Parenteral Products and Technology	2 s.h.
046:176 Immunization Theory and Practice	2 s.h.
046:198 Elective: Hospital Pharmacy Practice Management	2 s.h.
046:211 Total Synthesis of Natural Products	3 s.h.
046:215 Current Medicinal Chemistry	3 s.h.
046:219 Analytical Biochemistry	3 s.h.
046:227 Medicinal and Natural Products Chemistry Seminar	1-2 s.h.
046:255 Social Aspects of Pharmacy Care	2 s.h.
046:357 Topics in Community Pharmacy Management	2 s.h.
046:377 Health Disparities and Cultural Competence	2-4 s.h.

### Joint Pharm.D./M.P.H.

The College of Pharmacy and the College of Public Health offer the joint Doctor of Pharmacy/Master of Public Health. The joint Pharm.D./M.P.H. requires 42 s.h. of graduate credit. In addition to the requirements of the Pharm.D. degree; see "Pharm.D. Requirements" below. Students who complete the program are granted both degrees.

The Pharm.D./M.P.H. program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety. Its graduates may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities are available in hospitals and clinics and with health care providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate admission to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

Admission requirements include a bachelor's degree or a minimum of 120 s.h. of undergraduate course work; an undergraduate cumulative g.p.a. of at least 3.00; one semester each of college algebra and biology; transcripts of all college course work; scores (preferably at or above the national median) on the Graduate Record Exam or the Pharmacy College Admission Test (PCAT); and three professional recommendations (University of Iowa recommendation forms are required).

Contact the College of Pharmacy and the College of Public Health for details.

### Curriculum

Students in the Pharm.D./M.P.H. program must complete M.P.H. core courses, practicum, and public health electives in addition to courses required for the Pharm.D.

#### M.P.H. CORE COURSES

Students must earn a B or higher on each core course. Students may repeat core courses to achieve this standard.

All of these:

170:101 Introduction to Public Health	3 s.h.
171:161 Introduction to Biostatistics	3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
174:102 Introduction to the U.S. Health Care System	3 s.h.

One of these:

174:200 Introduction to Health Care Organization and Policy	3 s.h.
175:197 Environmental Health	3 s.h.

**M.P.H. PRACTICUM**

The practicum is a fieldwork experience in which students show proficiency in applying academic principles in community settings. Students must have completed or be enrolled in all six M.P.H. core courses before registering for the practicum. A poster presentation or a final written report with oral presentation is required. The practicum constitutes the final examination for the M.P.H.

The setting for the 200-hour Pharm.D./M.P.H. practicum must have both public health and pharmacy components.

170:299 M.P.H. Practicum Experience 3 s.h.

**M.P.H. ELECTIVES**

Students select electives totaling 9 s.h. from one of the following public health areas: biostatistics, community and behavioral health, epidemiology, health communication, health policy and administration, occupational and environmental health, public health genetics, or an approved M.P.H. focus area (aging studies; global health; maternal, child, and family health; or nutrition and exercise). Electives are chosen in consultation with the student's advisors in the College of Pharmacy and Public Health.

**COURSES THAT COUNT TOWARD BOTH DEGREES**

The following required courses from the Pharm.D. curriculum also count as credit toward the M.P.H.

046:129 Pharmaceutical Economics and Insurance	3 s.h.
046:154 Endocrinology, Ophthalmology, Women's and Men's Health Therapeutics	2 s.h.
046:156 Cardiovascular Therapeutics	2 s.h.
046:165 Infectious Disease Therapeutics	2 s.h.

**PHARM.D. REQUIREMENTS**

The joint Pharm.D./M.P.H. program requires students to complete the professional curriculum of the Pharm.D. program (see "Doctor of Pharmacy (Pharm.D.);" earlier in this section).

Students must be enrolled in the College of Pharmacy in order to take College of Pharmacy courses.

**Admission to the Pharm.D.**

Application deadline for the Pharm.D. program is December 1.

Students admitted to the College of Pharmacy are required to submit a \$250 admission acceptance fee. The fee is applied to tuition for the student's first semester of enrollment in the college. The deposit is not refunded to applicants who do not enroll in the College of Pharmacy.

The college-level course work outlined below is the minimum academic requirement for admission to the College of Pharmacy. The Pharmacy College Admission Test (PCAT), a personal statement, personal interviews, and two letters of reference are required for admission. Students must have an overall cumulative g.p.a. of at least 2.50 to be considered for admission.

Fulfillment of these requirements does not ensure admission to the college; the admission committee selects the best-qualified applicants. Questions concerning satisfaction of degree requirements should be directed to the College of Pharmacy Office of Academic Affairs.

**Rhetoric:** 4 s.h. (010:003 Rhetoric) or 6 s.h. of transfer credit in English composition and rhetoric and 3 s.h. in speech

**Human anatomy:** 3 s.h. (060:110 Principles of Human Anatomy)

**General biology:** 8 s.h. (002:010 Principles of Biology I and 002:011 Principles of Biology II)

**General chemistry:** 8 s.h. (004:011 Principles of Chemistry I and 004:012 Principles of Chemistry II)

**Organic chemistry:** 6 s.h. (004:121 Organic Chemistry I and 004:122 Organic Chemistry II)

**Mathematics:** 3-4 s.h. of a satisfactory differential and integral calculus course (22M:016 Calculus for the Biological Sciences)

**Microbiology:** 4 s.h. (061:112 Pharmacy Microbiology)

**Microeconomics:** 3-4 s.h. (06E:001 Principles of Microeconomics)

**Physics:** one year of high school physics or one semester of college-level physics with a lab (029:008 Basic Physics)

**Human physiology:** 3 s.h. (027:130 Human Physiology)

**Statistics:** 3 s.h.

**General education electives:** at least 12 s.h.

Each student must complete 20 s.h. of general education courses in order to graduate. Courses in moral reasoning or ethics, communications, computer science, and business are recommended. Courses in the behavioral and social sciences and the humanities are acceptable. Courses in physical education skills, applied music, and studio art are not acceptable.

Students must earn a grade of C-minus or higher in transfer courses applied to the Pharm.D.

## Financial Support

All second-, third-, and fourth-year pharmacy students are encouraged to apply for College of Pharmacy scholarships. Applications are available each April from the Pharmacy Office of Academic Affairs. Students complete a single application form in order to be considered for all scholarships. Award amounts vary. The Awards and Recognition Committee selects the best-qualified applicant for each scholarship.

**Seymour M. Blaug Memorial Award:** for a pharmacy student with above-average academic achievement.

**Ilse O. Buckner Scholarship:** for a pharmacy student who maintains satisfactory academic progress; nonrenewable, financial need is considered.

**Burroughs Wellcome Scholarship:** for a pharmacy student in good academic standing who demonstrates financial need and leadership.

**Class of 2009 Scholarship:** criteria to be determined.

**Class of 2010 Scholarship:** criteria to be determined.

**David and James Carlson Scholarship:** for two pharmacy students interested in clinical or hospital practice; preference given to students from north of U.S. Interstate 80 and west of U.S. Interstate 35 who show financial need.

**Jordan and Jana Cohen Doctor of Pharmacy Scholarship:** for a pharmacy student in good academic standing; based on merit and need; renewable.

**Vernon Conzemius Scholarship:** for a pharmacy student who demonstrates financial need; preference given to students in the upper half of their class.

**Ben M. Cooper Memorial Award:** for an academically outstanding pharmacy student; preference is given to students from Scott County, Iowa; financial need is considered.

**John and Margo Daniel Scholarship:** preference given to a student from Webster County, Iowa.

**Alice Coxon Gates Scholarship:** for a pharmacy student in good academic standing.

**CVS Scholarship:** for five pharmacy students in good academic standing who are interested in community pharmacy.

**Max Eggleston Scholarship:** for a student who has completed one year; preference is given to students from Iowa; based on financial need.

**Lori A. Grimes Memorial Scholarship:** based on financial need; renewable.

**Gary Hadley Scholarship:** for a student of the committee's choice.

**Dick and Brenda Hartig Scholarship:** for a student who demonstrates financial need; preference is given to students from Dubuque, Waukon, Dyersville, and Iowa City, Iowa; and Galena and Stockton, Illinois; based on financial need.

**Thomas D. Hill Scholarship:** for a pharmacy student in good academic standing.

**Janet Hinderliter Scholarship:** for a P3 or P4 student with a g.p.a. of at least 3.00 and demonstrated involvement in campus and community affairs.

**Frances T. and Charles Holub Memorial Award:** for a third-year pharmacy student; financial need is considered; renewable once.

**Iowa Pharmacy Foundation Scholarship:** for selected pharmacy students who are residents of Iowa and who demonstrate outstanding academic ability; financial need is considered.

**Johnson County Pharmacists Association Scholarship:** for any student member of JCPS with a grade-point

average of at least 3.00.

**Kuever Scholarship Fund:** for a pharmacy student from Iowa who is in good academic standing.

**Ernest Kyle Memorial Scholarship:** for a student of the committee's choice.

**Ronald Madden Scholarship:** for an Iowa high school graduate in good academic standing.

**Charles J. Malecek Pharmacy Scholarship:** for a student of the committee's choice.

**Lloyd E. Matheson and Randal P. McDonough Honorary Scholarship:** for a student who demonstrates financial need.

**Carleton Mikkelsen Scholarship:** for the top P4 student based on final P3 grade-point average; in case of a tie, the committee chooses the recipient.

**Miller-Ruegnitz Scholarships:** based on financial need, non-renewable.

**NACDS Scholarship:** for a student interested in community pharmacy.

**Petersen Linder Scholarship:** for a pharmacy student in excellent academic standing who has outstanding leadership skills; based on financial need.

**Pharmacists Mutual Scholarship:** committee choice

**Quad Cities Area Pharmacists Association Scholarships:** for students who demonstrate financial need; preferably one student from Iowa and one from Illinois.

**Sattler Family Scholarship:** for a student of the committee's choice, alternates with the Carver College of Medicine.

**Scherling Prize:** for a student who demonstrates superior academic achievement in organic chemistry.

**Hal Schimmelpfenning Scholarship:** for a high school senior from Sigourney, Iowa.

**Gordon H. Sheffield Scholarship:** for a P3 or P4 student from Iowa; preference given to a student who demonstrates leadership and financial need.

**ShopKo Scholarship:** preference given to students who reside or have resided in a state where Shop-Ko is located.

**Shutt Pharmacy Scholarship:** preference is given to Iowa residents; based on financial need.

**H. Curtis Snyder Award:** for a pharmacy student in good standing.

**Supervalu Scholarship:** for a student in good academic standing who is employed in a community pharmacy setting.

**Wilber J. Teeters Scholarship:** for a pharmacy student who has completed at least one year in the college; financial need is considered.

**Teeters/Wahl Scholarship:** for pharmacy students based on outstanding academic ability, U.S. citizenship, and financial need.

**John Stanley Thor Memorial Award:** for a pharmacy student in good standing.

**Colonel Thomas C. Veach Class of 1952 Scholarship Fund:** preference given to a student interested in compounding or industrial pharmacy.

**Wal-Mart Scholarship:** for a P3 or P4 student with high scholastic standing who demonstrates strong leadership, desire to enter a community pharmacy practice, and financial need.

**Louis C. Zopf Memorial Award:** for a pharmacy student who is academically qualified; financial need is considered.

**John D. Zuelke Scholarship:** for a P3 or P4 student from Wapello County, Iowa.

## Graduate Programs

The college offers a Master of Science and a Doctor of Philosophy in four areas: clinical pharmaceutical science, medicinal and natural products chemistry, pharmaceutical socioeconomics, and pharmaceuticals.

Advanced study in the pharmaceutical sciences prepares students for research, teaching, and administrative positions in the pharmaceutical industry, in colleges and universities, in government agencies, and in health-related institutions and organizations.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Academic requirements for maintaining graduate registration are determined by the Graduate College and by the individual divisions of the College of

Pharmacy.

For more information about graduate study, visit the College of Pharmacy web site.

## Facilities and Resources

### Pharmacy Building

The Pharmacy Building is located on the University's Health Science Campus, in close proximity to the Carver College of Medicine, College of Dentistry, College of Nursing, and College of Public Health. Also nearby are University of Iowa Hospitals and Clinics, the Bowen Science Building, and the Hardin Library for the Health Sciences.

The Pharmacy Building is a five-story structure designed to provide modern facilities for a comprehensive program of pharmacy education. In addition to classrooms and auditoriums, there are well-equipped separate laboratories for instruction at the professional and graduate levels.

The college operates small and large classrooms with state-of-the-art technology. The student practice lab is a technologically advanced licensed pharmacy that provides real and simulated practice experiences. The Banker Student Activity Center provides quiet individual and small-group study environments and houses College of Pharmacy Student Organizations offices.

The building also houses a fully supported Instructional Technology Center (Pharmacy ITC) in the Learning Resource Center. The ITC provides state-of-the-art desktop workstations and laptop computers are available for student checkout. Both desktop and laptop computers have secure connections to the University network for online drug information searching and printing.

### University of Iowa Pharmaceuticals

University of Iowa Pharmaceuticals, a pharmaceutical manufacturing facility registered with the U.S. Food and Drug Administration, develops pharmaceutical dosage forms and has manufactured clinical supplies in compliance with Good Manufacturing Practices since 1974. University of Iowa Pharmaceuticals has clients worldwide, including pharmaceutical companies, biotechnology firms, medical departments, and government agencies. Its staff works closely with clients and pharmaceuticals faculty members to produce virtually every type of pharmaceutical dosage form, supplying new pharmaceutical agents for use in clinical trials and other research. The facility combines the former Center for Advanced Drug Development and Division of Pharmaceutical Service. For more information, visit the University of Iowa Pharmaceuticals web site.

### Division of Drug Information Service

The Division of Drug Information Service publishes the IDIS (Iowa Drug Information Service), a bibliographical database that provides full-text access to specialized information related to drugs and drug therapy. IDIS reaches subscribers throughout the world. The division also is home to the Iowa Drug Information Network, which serves a network of community pharmacies and family practice sites with drug information resources, educational programs, and direct-response consultations that support the pharmaceutical care initiatives at the network's sites. In addition, the Division of Drug Information Service plays an important educational role for pharmacy students by providing both didactic and experiential teaching in drug information. The division is located on the University's Oakdale Campus.

## College of Pharmacy Courses

Students must be enrolled in the College of Pharmacy to take the college's courses. Undergraduate and graduate students in other majors must have the instructor's consent to take College of Pharmacy courses.

- 046:011 Web 2.0 and Pharmacy Drug Information** 2 s.h.  
Introduction to challenges and opportunities of social Internet applications, electronic drug information sources, and mobile technologies available to healthcare providers and patients; creation, use, and critical evaluation of web-based products; lectures, class discussions, required readings, reflection blogs, and group projects. Corequisites: 046:116 or 046:118. Requirements: P2 or P3 standing.
- 046:013 Ambulatory Care Pharmacy** 2 s.h.  
Additional experience in the practice of clinical pharmacy; focus on key therapeutic areas where ambulatory care clinical pharmacists currently have a significant impact improving patient care, including anticoagulation management, hyperlipidemia management, and diabetes management; opportunity to develop expertise in clinical decision making, improve problem solving abilities, and continued development in writing and oral presentation skills. Prerequisites: 046:154 and 046:156. Requirements: P3 standing.
- 046:014 Special Topics in Acute Care** 2 s.h.  
Pharmacology for common but varied acute care medicine topics; review of disorder, therapeutic goals, treatment plans, patient counseling, monitoring patient outcomes; lecture or case-based classes; acute and chronic renal failure; peritoneal and hemodialysis; diabetic ketoacidosis; rabies; shock, vasopressors, fluids; ACLS; deep venous thrombosis, stress ulcer prophylaxis; burns; sedation, neuromuscular blockage; opioids; multiple sclerosis. Prerequisites: 046:149, 046:154, 046:155, 046:156, 046:158, and 046:159. Corequisites: 046:164 and 046:165. Requirements: BLS certification.
- 046:018 Journey Through Illness** 1 s.h.  
Chronic illness from a patient's perspective; discussion with patients.
- 046:050 Pharmacy Practice Lab I** 2 s.h.  
Practical application of scientific and clinical knowledge used in the provision of pharmaceutical care; activities include communication with patients and members of the healthcare team, sterile product and prescription compounding, pharmacy calculations, and use of drug information resources. Requirements: P1 standing.
- 046:051 Pharmacy Practice Lab II** 2 s.h.  
Practical application of scientific and clinical knowledge used in the provision of pharmaceutical care; activities include prescription compounding, pharmacy calculations, communication skills, prescription counseling, and applications of drug information skills through secondary searching of the primary literature. Prerequisites: 046:050. Requirements: P1 standing.
- 046:066 Pharmacy Computer Systems** 2 s.h.  
Fundamentals of data storage and retrieval for pharmacy information systems.
- 046:101 Pharmacy Projects** 1-3 s.h.  
Basic and applied research problems of pharmaceutical interest.
- 046:102 Pharmacy Workshop** 1 s.h.

Independent study.

- 046:103 Fundamentals of Evaluating Clinical Research** 1 s.h.  
Basic concepts for evaluation of clinical trials published in primary biomedical and pharmacy literature; design, methods, outcomes, statistical analysis, and generalizability of results. Requirements: P1 standing.
- 046:104 Pharmacy Law and Ethics** 2 s.h.  
Legal and moral aspects involved in the practice of pharmacy. Requirements: P1 standing.
- 046:105 Alternative and Complementary Medicine** arr.  
Requirements: (for 046:105) P4 standing. Same as 078:210, 096:182.
- 046:106 Clinical Practice Skills I: Theory and Application** 2 s.h.  
Exploration and development of professional skills required for delivery of patient care; patient assessment, clinical decision making, communication (written and oral), teamwork. Corequisites: 046:155.
- 046:107 Clinical Practice Skills II: Critical Patient Analysis** 2 s.h.  
Continuation of 046:106; development of professional skills required for delivery of patient care; patient assessment, clinical decision making, communication (written and oral) skills. Corequisites: 046:158. Requirements: P3 standing.
- 046:108 Clinical Practice Skills III: Applied Patient Management** 2 s.h.  
Continuation of 046:107; development of professional skills required for delivery of patient care; patient assessment, clinical decision making, communication (written and oral), teamwork. Corequisites: 046:164. Requirements: P3 standing.
- 046:115 Drug Literature Evaluation** 2 s.h.  
Study design methods, drug information techniques and skills; skill development in critical analysis and evaluation of published reports of drug use and drug trials, assessment of validity of reports, trials and studies, assessment of generalizability of results to individual patients and patient groups; laboratory experience in biomedical literature analysis, evaluation.
- 046:116 Pharmacy Practice Lab III** 2 s.h.  
Practical application of scientific and clinical knowledge in the provision of patient-centered care; activities include prescription interpretation and counseling, compounding, applications of drug information, use of patient screening tools, physical assessment, and pharmacy law. Corequisites: 046:149 and 046:154, if not taken as prerequisites.
- 046:117 Pharmacy Practice Lab IV** 2 s.h.  
Practical application of scientific and clinical knowledge in the provision of patient-centered care; activities include providing medication therapy management for patients, prescription and self-care counseling, and application of drug information skills. Corequisites: 046:155 and 046:156, if not taken as prerequisites.
- 046:118 Pharmacy Practice Lab V** 2 s.h.  
Practical application of scientific and clinical knowledge in the provision of patient-centered care; activities include medication therapy management for patients, prescription and self-care counseling, and application of drug information skills. Corequisites: 046:158 and 046:159, if not taken as prerequisites.
- 046:119 Pharmacy Practice Lab VI** 2 s.h.  
Practical application of scientific and clinical knowledge in the provision of patient-centered care; activities include medication therapy management for patients, prescription and self-care counseling, and application of drug information skills. Corequisites: 046:164 and 046:165, if not taken as prerequisites.
- 046:121 Substance Abuse** 3 s.h.  
Themes and concepts in substance abuse and treatment; stimulants, depressants, alcohol, opiates, hallucinogenics, steroids; drug abuse prevention and treatment, including dual diagnosis, from cradle to the grave.
- 046:122 Social Aspects of Pharmacy Care** 2 s.h.  
Conceptual issues related to social and behavioral components of pharmacy care; social construction of health and illness, medication use process, health communications, cultural competence, health disparities and public health. Requirements: P1 standing.

- 046:126 International Perspectives: Xicotepec** 2 s.h.  
Introduction to providing service to a community in a less developed country; student projects intended to improve community life in Xicotepec. Corequisites: 165:126. Requirements: P3 standing. Same as 053:126.
- 046:127 Pharmaceuticals Management for Underserved Populations** 3 s.h.  
Experience analyzing problems and developing strategies based on real-world drug management cycle issues; the role of WHO-TRIPS, government, and NGOs in the selection and use of pharmaceuticals.
- 046:129 Pharmaceutical Economics and Insurance** 3 s.h.  
Financing of health care in the U.S.; insurance and reimbursement in pharmacy and pharmacoeconomics.
- 046:139 Pharmacy Management and Marketing** 2 s.h.  
Application of management principles to pharmacy practice; marketing techniques for pharmacy practice; operations, human resources, finance, quality improvement and service marketing management.
- 046:146 End-of-Life Care for Adults and Families** 2-4 s.h.  
End-of-life issues in care of adults, older adults, and their families. Requirements: 096:135 and 096:136, or RN standing. Same as 050:147, 096:147, 153:147.
- 046:149 Introduction to Therapeutics/Special Population** 2 s.h.  
Treatment modalities that promote health and treat common diseases; common laboratory and diagnostic procedures used to diagnose and monitor diseases; basic types of adverse drug reactions. Requirements: P2 standing.
- 046:151 Current Topics in Health Policy** 2 s.h.  
Legislative process and broad range of current issues in health policy; general- and pharmacy-specific health policy topics at state and federal levels. Requirements: P1, P2, P3, or graduate standing.
- 046:154 Endocrinology, Ophthalmology, Women's and Men's Health Therapeutics** 2 s.h.  
Pharmacotherapy for endocrine and ophthalmologic disorders; review of disorders, treatment goals, treatment plans, patient counseling, monitoring of patient outcomes. Requirements: P2 standing.
- 046:155 Respiratory and Dermatologic Therapeutics** 2 s.h.  
Pharmacotherapy for respiratory and dermatology disorders; review of disorders, treatment goals, treatment plans, patient counseling, monitoring of patient outcomes. Requirements: P2 standing.
- 046:156 Cardiovascular Therapeutics** 2 s.h.  
Pharmacotherapy for cardiovascular disorders; review of disorders, treatment goals, treatment plans, patient counseling, monitoring of patient outcomes. Requirements: P2 standing.
- 046:158 FEN, GI, and Renal Therapeutics** 2 s.h.  
Pharmacotherapy for fluid/electrolyte/nutrition disorders; gastrointestinal and renal diseases; review of disorders, treatment goals, treatment plans, patient counseling, monitoring of patient outcomes. Requirements: P3 standing.
- 046:159 Rheumatology, Immunology, Hematology, Oncology, and Transplantation Therapeutics** 2 s.h.  
Pharmacotherapy for rheumatology, immunology, hematology, oncology, and transplantation; review of disorders, treatment goals, treatment plans, patient counseling, monitoring of patient outcomes. Requirements: P3 standing.
- 046:164 Neurology/Psychiatry Therapeutics** 2 s.h.  
Pharmacotherapy for psychiatric and neurologic disorders; review of disorders, therapeutic goals, treatment plans, patient counseling, monitoring of patient outcomes. Requirements: P3 standing.
- 046:165 Infectious Disease Therapeutics** 2 s.h.  
Pharmacotherapy for infectious diseases; review of disease, therapeutic goals, treatment plans, patient counseling, monitoring of patient outcomes. Requirements: P3 standing.
- 046:171 Nonprescription Pharmacotherapy** 2 s.h.  
Introduction to nonprescription medications; development of patient assessment and consultation skills; understanding of pharmacist's role in patient self-care. Requirements: P3 standing.
- 046:174 Pharmacy Service Development** 3 s.h.

Issues and approaches used to develop pharmacy services; planning, service design, payment, promotion, quality improvement. Requirements: P3 standing.

**046:176 Immunization Theory and Practice** 2 s.h.

Preparation for administering routine immunizations safely and responsibly under specific order of a prescriber; preparation for administering vaccinations under protocol according to rules of the Iowa Boards of Pharmacy and Medical Examiners. Prerequisites: 046:159. Requirements: P3 standing.

**046:190 Overview of Pediatric Pharmacotherapy** 2 s.h.

Discussion of issues and problems in pediatric pharmacotherapy; clinical practicum. Prerequisites: 046:149 and 046:170. Requirements: P3 standing.

**046:191 Health Coaching and Wellness** 2 s.h.

Develop expertise in health coaching and wellness to care for patients with chronic diseases; in-depth look at lifestyle changes recommended for patients with chronic diseases; discuss and investigate nutrition and exercise guidelines for patients with chronic diseases; motivational interviewing technique and incorporation of chronic care model for patients. Requirements: P2 or P3 standing.

**046:195 Contemporary Issues and Leadership** arr.

Introduction to leadership applications inside and outside of pharmacy; speaker series presents live interviews of prominent leaders; course work focuses on application of leadership principles and theories to contemporary pharmacy issues. Requirements: P2 standing.

**046:357 Topics in Community Pharmacy Management** 2 s.h.

Focus on building practical knowledge and understanding of business principles. Prerequisites: 046:130.

**046:377 Health Disparities and Cultural Competence** 2-4 s.h.

Characteristics, causes, and effects of health disparities in the U.S. health care system; foundation for development of knowledge, attitudes, and skills required of culturally competent health care providers; definitions and models of cultural competence, characteristics of culturally effective practitioners and workplaces; health disparities among specific populations, evidence for cultural competence as a remedy; taking a culturally appropriate history; working with interpreters; legal and professional imperatives for cultural competence. Same as 096:125, 172:135.

**046:398 Hospital Pharmacy Practice Management Elective** 2 s.h.

Organizational structure of pharmacy departments in hospitals and health care systems; models for delivery of pharmaceutical care; pharmacy's role in drug-policy decision making; provision of drug information; clinical and distributive pharmacy services; control of pharmacy and pharmacy costs; use of information technology and automation for service delivery; supervisory management; quality improvement. Requirements: P3 standing.

**Pharmacy Practice and Science Professional Experience**

**046:001 Introduction to Pharmacy Practice** 1 s.h.

Exposure to the pharmacy profession through varied shadowing experiences in practice settings. Requirements: P1 standing.

**046:002 Introduction to Community Pharmacy Practice** 3 s.h.

Exposure to community pharmacy through activities focusing on drug distribution, legal requirements, communication, patient interaction; during breaks in P2 year. Requirements: P2 standing.

**046:003 Introduction to Clinical Pharmacy Practice** 1 s.h.

Clinical practice experience observing and participating in clinical activities with P4 students, faculty, and other health care providers. Requirements: P3 standing.

**046:004 Student Pharmacist Professionalism** 1 s.h.

Participation in activities promoting leadership and professional learning, and service learning; required participation P1 through P3 years.

**046:008 Introduction to Hospital Pharmacy Practice** 2 s.h.

Exposure to hospital pharmacy through activities focusing on drug distribution, legal requirements, communication, patient interaction; during breaks in P2 year. Requirements: P2 standing.

**046:136 Elective: Academic Rotation** 6 s.h.  
Practice experience delivering pharmacy education with a College of Pharmacy faculty member. Requirements: P4 standing.

**046:140 Elective: Ambulatory Care Rotation** 6 s.h.  
Clinical experience providing pharmaceutical care in specialty outpatient settings. Requirements: P4 standing.

**046:141 Elective: Community Management Rotation** 6 s.h.  
Practice exposure to community pharmacy operations and management at the store, district, or corporate level. Requirements: P4 standing.

**046:142 Elective: Compounding/Complimentary Alternative Medicine Rotation** 6 s.h.  
Clinical work in a community setting with focus on team approach; experience developing extemporaneous compounds to optimize patient care and/or integrating traditional and nontraditional medicine. Requirements: P4 standing.

**046:143 Elective: Critical Care Medicine Rotation** 6 s.h.  
Practice experience providing pharmaceutical services to intensive care unit patients. Requirements: P4 standing.

**046:161 Elective: Drug Information Rotation** 6 s.h.  
Practice experience applying drug information knowledge to service and research projects. Requirements: P4 standing.

**046:178 Hospital Pharmacy Rotation** 6 s.h.  
Instruction and practical experience in various components of hospital pharmacy; emphasis on hospital organization, inpatient and outpatient services, IV admixtures, unit dose, and clinical services. Requirements: P4 standing.

**046:179 Community Pharmaceutical Care Rotation** 6 s.h.  
Clinical experience in the community setting; emphasis on delivery of pharmaceutical care. Requirements: P4 standing.

**046:180 Acute Care Medicine Rotation** 6 s.h.  
Clinical experience applying therapeutic skills for the pharmacotherapeutic management of patients on general medicine or specialty inpatient areas. Requirements: P4 standing.

**046:181 Elective: Family Medicine Rotation** 6 s.h.  
Clinical practice experience applying primary care therapeutics in family medicine practice settings. Requirements: P4 standing.

**046:182 Elective: Pediatrics Rotation** 6 s.h.  
Clinical experience in drug therapy management of general and specialty pediatric patients. Requirements: P4 standing.

**046:184 Elective: Psychiatry Rotation** 6 s.h.  
Clinical experience in the rational use of drugs in psychiatric disorders. Requirements: P4 standing.

**046:185 Elective: Neurology Rotation** 6 s.h.  
Clinical experience in the pharmacotherapeutic and pathophysiologic considerations of neurological disorders. Requirements: P4 standing.

**046:186 Elective: Surgery Rotation** 6 s.h.  
Clinical experience in drug therapy management on a surgery unit. Requirements: P4 standing.

**046:187 Elective: Nuclear Pharmacy Rotation** 6 s.h.  
Practical experience in the handling and clinical use of radiopharmaceuticals. Requirements: P4 standing.

**046:188 Elective: Pharmacy Practice Underserved Population Rotation** 6 s.h.  
Opportunity to learn the best practices for pharmaceutical management; approaches to enhance access to and appropriate use of medicines in underserved and resource-limited environments. Requirements: P4 standing.

<b>046:189 Elective: Pharmacy Rotation</b>	6 s.h.
Selected practice experiences in various pharmacy practice settings. Requirements: P4 standing.	
<b>046:192 Elective: Long Term Care Rotation</b>	6 s.h.
Practice in consulting and providing services to varied long-term patient care environments. Requirements: P4 standing.	
<b>046:193 Elective: Home Health Care Rotation</b>	6 s.h.
Clinical experience in the team approach to health care delivery, including total parenteral nutrition, chemotherapy, intravenous antibiotics, lab analysis, hospice care, and pain management. Requirements: P4 standing.	
<b>046:194 Elective: Managed Care Rotation</b>	6 s.h.
Practice experience in providing pharmaceutical care or pharmacy-related services in a managed care organization. Requirements: P4 standing.	
<b>046:196 Ambulatory Care Rotation</b>	6 s.h.
Clinical experience in providing pharmaceutical care in outpatient clinic settings. Requirements: P4 standing.	
<b>046:197 Elective: Hematology/Oncology Rotation</b>	6 s.h.
Drug therapy management of oncology patients and patients with hematologic malignancies, aplastic anemia, sickle cell disease, hemophilia. Requirements: P4 standing.	
<b>046:198 Elective: Hospital Pharmacy Practice Management</b>	2 s.h.
Practice management issues; organizational structure, service delivery models, drug policy, drug and pharmacy costs, use of technology and informatics, supervision, quality improvement.	
<b>046:199 Elective: Research Rotation</b>	6 s.h.
Practice experience in basic pharmaceutical or clinical research; proposal, study design, data collection and analysis, presentation of results. Requirements: P4 standing.	
<b>046:300 Elective: Emergency Medicine Rotation</b>	6 s.h.
Clinical experience providing pharmaceutical care for patients treated in the emergency department. Requirements: P4 standing.	
<b>046:301 Elective: Hospital Management Rotation</b>	6 s.h.
Practice experience in hospital pharmacy operations and management. Requirements: P4 standing.	
<b>046:302 Elective: Infectious Disease Rotation</b>	6 s.h.
Clinical experience providing pharmacotherapeutic management of patients receiving antimicrobial medications. Requirements: P4 standing.	
<b>046:303 Elective: Medication Use Evaluation Rotation</b>	6 s.h.
Practical experience in drug use evaluation to improve patient outcomes. Requirements: P4 standing.	
<b>046:304 Elective: Pharmacy Industry Rotation</b>	6 s.h.
Practice experience in an area of the pharmaceutical industry. Requirements: P4 standing.	
<b>046:305 Elective: Pharmacy Regulatory Rotation</b>	6 s.h.
Practice experience with a pharmacy regulatory body. Requirements: P4 standing.	
<b>046:306 Elective: Professional Association Rotation</b>	6 s.h.
Practice experience in professional association management environment at the state or national level. Requirements: P4 standing.	
<b>046:307 Elective: Veterinary Pharmacy Rotation</b>	6 s.h.
Practice experience in managing drug therapy for animals. Requirements: P4 standing.	
<b>046:308 Elective: Advanced Community Pharmacy Rotation</b>	6 s.h.
Community pharmacy experience emphasizing patient-centered care. Requirements: P4 standing.	

**Medicinal and Natural Products Chemistry****046:128 Medicinal and Natural Products Chemistry I: Biotechnology and Chemotherapy** 3 s.h.

Organic and inorganic medicinal and therapeutic agents of natural and synthetic origin; physical, chemical, biological, and biochemical properties as they relate to medicinal and therapeutic effects; comparative biological activity and toxicity; detoxication mechanisms; functional group chemistry; nomenclature; chemistry of radiodiagnostic and therapeutic agents; introduction to biopharmaceutical analysis. First in a three-course sequence. Prerequisites: 004:122, 061:112, and 099:162. Requirements: P1 standing.

**046:131 Medicinal and Natural Products Chemistry II: Pharmacodynamic Agents** 3 s.h.

Medicinal chemistry of pharmacodynamic agents; introduction to peptides and proteins, thyroid hormone, diabetes, vaccines, gene therapeutics, NSAIDs, cardiovascular drugs, antihistamines, anticancer drugs. Second in a three-course sequence. Prerequisites: 046:128. Requirements: P2 standing.

**046:132 Medicinal and Natural Products Chemistry III: Medicinal Neurochemistry** 3 s.h.

Receptor site theory; steroids, lipids, and prostaglandins; sedatives and hypnotics; drugs of abuse; cholinergics; excitatory amino acids and anticonvulsants; major analgesics; adrenergics; psychotherapeutics. Third in a three-course sequence. Prerequisites: 046:128 and 046:131. Requirements: P2 standing.

**Pharmaceutics and Translational Therapeutics****046:012 Survey of Basic Pharmaceutical Sciences** 1-2 s.h.

Aspects of drug discovery and development; seminar with guest speakers from industry. Requirements: admission to Pharm.D. program.

**046:123 Pharmaceutics I: Solutions** 4 s.h.

Application of physical and chemical principles to formulation, preparation of liquid dosage forms, including solution, colloids, ointments, emulsions. Requirements: P1 standing.

**046:124 Pharmaceutics II: Solids and Semi-solids** 4 s.h.

Properties of solids; formulation, preparation, evaluation of solid dosage forms. Requirements: P1 standing.

**046:138 Pharmacokinetics and Biopharmaceutics** 3 s.h.

Qualitative and quantitative description of kinetics of drug absorption, distribution, and elimination, including physiological factors that influence each process; adjustment of dosing regimens for optimizing therapeutic drug levels in the body. Prerequisites: 046:123 and 046:124.

**046:169 Introduction to Pharmacogenomics** 2 s.h.

Introduction to pharmacogenetics in pharmacy; laboratory techniques, application of pharmacogenetics to clinical pharmacy.

**046:170 Clinical Pharmacokinetics** 3 s.h.

Application of pharmacokinetics to the clinical setting. Requirements: P3 standing.

**046:173 Parenteral Products and Technology** 2 s.h.

Knowledge and application of parenteral products and the technology used to compound and administer them. Requirements: 046:051 and 046:123.

**046:238 Drug Delivery: Principles and Applications I** arr.

Advanced design and development of drug delivery systems with emphasis on selection of materials and designs suitable for specific applications; comparison and evaluation of available and emerging technologies.

**046:239 Drug Delivery: Principles and Applications II** arr.

Continuation of 046:238. Prerequisites: 046:238.

## For Graduate Students

### Pharmacy Practice and Science

**046:147 Introduction to Research Methods** 3 s.h.

Scientific inquiry, experimental design, data collection, statistical methods used in the study of health services and clinical investigations; focus on understanding the research process and evaluating published studies.

Recommendations: introductory statistics.

**046:213 Pharmaceutical Socioeconomics Seminar** 1-2 s.h.

Recent research in pharmacy administration. Repeatable.

**046:251 Pharmaceutical Socioeconomics Research** arr.

**046:255 Social Aspects of Pharmacy Care** 2 s.h.

Conceptual issues related to social and behavioral components of pharmacy care; social construction of health and illness, medication use process, health communications, cultural competence, public health.

**046:257 Foundation Literature in Pharmaceutical Socioeconomics** arr.

Issues related to pharmacy administration, social and behavioral pharmacy, pharmacy education.

**046:261 Analytic Issues in Health Services Research I** 3 s.h.

Analytic tools used in health services research; focus on applications in nonexperimental research settings, such as analyses using administrative claims data or preexisting public use data sets. Prerequisites: 171:162. Same as 174:261.

**046:262 Analytic Issues in Health Services Research II** 3 s.h.

Continuation of 174:261; advanced applications, including panel data and qualitative response models. Prerequisites: 174:261. Same as 174:262.

**046:263 Models of Patient Behavior and Choice** 3 s.h.

Theoretical models used to describe behavior and choice in pharmaceutical socioeconomic research; models from economics, health services research, health behavior, clinical decision making.

**046:264 Models of Provider Behavior and Choice** 3 s.h.

Theoretical background for study of provider decision making and behavior; models based on a classic economic approach, models used to study provider behavior.

### Medicinal and Natural Products Chemistry

**046:135 Perspectives in MNPC Research** 1 s.h.

Contemporary research in medicinal chemistry and natural products.

**046:137 Enzymatic Basis of Drug Metabolism** 3 s.h.

Current literature on catalytic and physical properties, distribution, and substrate specificity of enzymes involved in mammalian drug metabolism. Prerequisites: 004:122 and 099:162.

**046:150 Synthetic Strategies in Medicinal Chemistry** 3 s.h.

Modern chemical methods for construction of carbon-carbon bonds commonly used in synthesis of natural products; strategic disconnections for the syntheses of these molecules. Prerequisites: 004:122 and 046:132.

**046:209 Drug Discovery and Mechanisms** 3 s.h.

Process of modern drug discovery, focus on high throughput screening strategies, target validation, pharmacological characterization of new compounds; mechanism of drugs targeting G protein coupled receptors, ion channels and transporters, targets in biological systems.

- 046:211 Total Synthesis of Natural Products** 3 s.h.  
Total synthesis of natural products; use of strategies, tactics, efficiency, selectivity, synthetic maneuvering.
- 046:214 Pharmaceutical and Chemical Toxicology** 3 s.h.  
Principles and mechanisms of chemical toxicology related to drugs and environmental agents; modern toxicological research methods.
- 046:215 Current Medicinal Chemistry** 3 s.h.  
Modern techniques used in drug discovery; important drug classes, their chemical mechanism of action. Prerequisites: 046:132.
- 046:217 Medicinal and Natural Products Chemistry Research** arr.
- 046:219 Analytical Biochemistry** 3 s.h.  
Application of modern chromatographic and detection methods used to isolate, characterize, and quantify drugs and macromolecules.
- 046:227 Medicinal and Natural Products Chemistry Seminar** 1-2 s.h.
- 046:275 Perspectives in Biocatalysis** 1-3 s.h.  
Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Repeatable. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as 004:275, 052:275, 053:275, 061:275, 099:275.

## Pharmaceutics

- 046:148 Pharmacokinetics and Pharmacodynamics** 3 s.h.  
Kinetics of drug absorption, distribution, and elimination, including development of mathematical models. Requirements: two semesters of calculus and one semester of statistics.
- 046:157 Quantitative Research Methods in Pharmacy** 4 s.h.  
Collection and interpretation of analytical data; instrumental analysis as applied to pharmaceutical quality control; separation techniques; lecture and laboratory.
- 046:200 Special Topics in Nanotechnology** 1 s.h.  
Special topics in nanotechnology.
- 046:202 Selected Topics in Pharmaceutics and Clinical Pharmaceutical Sciences** 1-4 s.h.  
Recent advances and contemporary research in pharmaceutics. Repeatable.
- 046:206 Stability of Pharmaceuticals** 3 s.h.  
Mechanisms of degradation of pharmaceuticals; prediction of shelf life of pharmaceuticals, stabilization. Prerequisites: 004:132.
- 046:207 Polymers in Pharmaceutics** 3 s.h.  
Polymer science, its implications in pharmaceutics; polymers useful as excipients in design of controlled and/or sustained release products.
- 046:223 Quantitative Research Methods II: Materials Characterization** 2 s.h.  
Introduction to physical methods of pharmaceutical materials characterization; thermal, electrochemical, and spectrophotometric methods; lecture, discussion, and laboratory activities.
- 046:225 Product Development** 3 s.h.  
Application of physico-chemical principles to formulation and design of pharmaceutical dosage forms.

<b>046:229 Advanced Pharmacokinetics and Pharmacodynamics</b> Selected topics, including nonlinear curve fittings. Prerequisites: 046:148.	3 s.h.
<b>046:231 Pharmaceutics Seminar</b> Repeatable.	1-2 s.h.
<b>046:233 Pharmaceutics Research</b>	arr.
<b>046:235 Equilibria Processes</b> Equilibria pertaining to ionic systems, complexation, partitioning, solubility. Prerequisites: 004:131.	3 s.h.
<b>046:236 Surface Phenomena</b> Behavior of matter in phase boundaries, especially adsorptive processes at liquid-solid and vapor-solid interfaces. Prerequisites: 004:131.	arr.
<b>046:237 Transport Phenomena</b> Diffusion and mass transport phenomena related to pharmaceutical systems. Prerequisites: 004:131.	3 s.h.
<b>046:243 Clinical Pharmaceutical Sciences Research</b>	arr.
<b>046:245 Analytical Techniques in Therapeutics</b> Basic concepts of cell culture, animal models, and biochemical techniques for mechanistic evaluation of drug actions.	2 s.h.
<b>046:269 Introduction to Clinical Pharmacogenomics</b> Basic pharmacogenetic techniques; use of pharmacogenomics in clinical pharmacy. Prerequisites: 002:128.	3 s.h.
<b>046:280 Clinical Pharmaceutical Sciences Seminar</b> Research by faculty, graduate students.	1-2 s.h.
<b>046:284 Introduction to Pharmaceutical Sciences Research</b> Key principles and methods in pharmaceutical sciences research.	2 s.h.
<b>046:290 Tissue Engineering</b> Introduction to tissue engineering; scaffolds, fundamentals, principles. Same as 051:175, 052:227.	3 s.h.
<b>046:378 Translation Research and Clinical Drug Development</b> Clinical drug development; preclinical studies and clinical trials; phase I, II, and III clinical trials, including regulatory considerations.	3 s.h.
<b>046:379 Principles of Experimental Therapeutics</b> Introduction to key principles and concepts for research in experimental therapeutics; basic principles related to drug disposition, toxicity, and efficacy.	3 s.h.
<b>046:380 Applied Clinical and Translational Science</b> Application of clinical and translational science in a multidisciplinary collaborative environment to develop, conduct, and report research.	3 s.h.

**Associate dean, faculty affairs and research:** Leon F. Burmeister

**Associate dean, education and student affairs:** Tanya Uden-Holman

**Associate dean, public health practice:** Christopher G. Atchison

**Associate dean, M.P.H. and undergraduate programs:** Mary Lober Aquilino

**Assistant dean, administration:** Ann M. Coady

**Graduate degrees:** M.H.A., M.P.H., M.S., Ph.D.

**Nondegree programs:** Certificate in Agricultural Safety and Health, Certificate in Public Health, Certificate in Emerging Infectious Disease Epidemiology

**Web site:** <http://www.public-health.uiowa.edu>

The College of Public Health, established in 1999, is a partner with the Carver College of Medicine and the Colleges of Dentistry, Nursing, and Pharmacy in striving to improve human health and well-being. Consistent with the interdisciplinary traditions of public health, the college also collaborates with non-health science colleges across the University and with other Board of Regents, State of Iowa institutions, state and local agencies, and the private sector.

A population-based approach to health is a distinguishing feature of public health and of the college. For public health practitioners--a wide range of professionals including physicians, nurses, dentists, pharmacists, social workers, nutritionists, environmental scientists, health educators, and health service administrators--the primary focus is on the health of entire communities rather than individual patients. Tools that public health professionals use to improve and enhance quality of life include analytical methods to identify, describe, and monitor the health of communities and populations at risk; education and prevention programs, methods of assuring access to appropriate and cost-effective care; and formulation of sound public policies.

The public health approach has led to many important health improvements over the past century. Vaccination campaigns, improved sanitation, fluoridation of drinking water, and efforts to reduce tobacco use are among the most recognizable public health initiatives. Public health programs also have led to safer workplaces, reduction of deaths from coronary heart disease and stroke, improved motor vehicle safety, and creation of effective health systems to provide care to those who need it. In the future, public health professionals will play an important role worldwide in seeking better approaches to complex issues such as quality of life for the elderly, drug and alcohol abuse, teen pregnancy, new and emerging infectious diseases, food safety, effects of bioterrorism, and nutrition.

The College of Public Health provides educational opportunities to students campuswide. In addition to training and educating public health students, the college welcomes students from the Tippie College of Business, the Carver College of Medicine, and the Colleges of Dentistry, Education, Engineering, Law, Nursing, and Pharmacy who enroll in public health classes. Undergraduate students in the College of Liberal Arts and Sciences and graduate students from programs such as anthropology, microbiology, and statistics also register for public health courses. The college's faculty members, staff members, and graduate and postdoctoral students contribute to teaching and research activities throughout the health sciences campus and provide services to Iowa and the nation. Partnerships for teaching and research extend across the campus. This background provides a rich array of educational opportunities.

The college includes the Departments of Biostatistics, Community and Behavioral Health, Epidemiology, Health Management and Policy, and Occupational and Environmental Health. It offers four graduate degrees: Master of Health Administration (M.H.A.), Master of Public Health (M.P.H.), Master of Science (M.S.), and Doctor of Philosophy (Ph.D.). It also offers the Certificate in Agricultural Safety and Health, the Certificate in Public Health, and the Certificate in Emerging Infectious Disease Epidemiology.

The college is accredited by the Council on Education for Public Health (CEPH), the accrediting body for the nation's schools and colleges of public health. Two programs in the college currently are accredited: the industrial hygiene program is accredited by the Accreditation Board for Engineering and Technology (ABET) and the American Board of Industrial Hygiene (ABIH), and the Master of Health Administration is accredited by the Commission on Accreditation of Healthcare Management Education (CAHME).

## Admission

Each department in the College of Public Health has an admission committee. Admission criteria usually include a satisfactory cumulative grade-point average; Graduate Record Examination scores; references; résumés; and for applicants whose first language is not English, scores on the Test of English as a Foreign Language (TOEFL). Other evaluation criteria may include oral and on-campus interviews, written statements, special emphasis on science and math courses, and a match of available faculty mentors with student interests. Application deadlines vary by department.

Applicants to College of Public Health programs must meet the admission requirements of the Graduate College. For detailed information about Graduate College policies, including application requirements and procedures, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Faculty

The college's faculty includes members with single appointments in the College of Public Health as well as those with joint appointments in other University of Iowa colleges, including the Carver College of Medicine and the Colleges of Dentistry, Engineering, Law, Liberal Arts and Sciences, Nursing, and Pharmacy. In addition, the college's faculty includes adjunct members from Drake University, Iowa State University, the University of Northern Iowa, the Iowa State Department of Public Health, the Iowa State Hygienic Laboratory, the Iowa Heart Center (in Des Moines), University of Iowa Hospitals and Clinics, and the National Institutes of Health.

## Research Centers and Institutes

The College of Public Health is home to 27 centers and institutes that conduct research and provide public service. These multidisciplinary centers and institutes--most of which are supported by federal grants--focus their investigative efforts on important public health topics. They conduct an array of outreach, service, and policy activities through which the College of Public Health engages with agencies, communities, and organizations throughout Iowa, the Midwest, the nation, and the world. Students are encouraged to explore opportunities for involvement with any of the college's centers and institutes.

For more information, see [College of Public Health-Based Centers and Institutes](#) on the college's web site.

## Facilities

The college's administrative offices are housed in the University of Iowa Hospitals and Clinics, on the University's health sciences campus. Faculty offices are located on the health sciences campus in the College of Medicine Administration Building, General Hospital, John Colloton Pavilion, the Medical Education Building, Medical Laboratories, and Westlawn; on the main campus in the Jefferson Building, MacLean Hall, Schaeffer Hall, and University Capitol Centre; and on the Oakdale Campus in Oakdale Hall and at the Institute for Rural and Environmental Health. Specialized laboratories also are located on the Oakdale Campus.

Eight student computer laboratories are housed at the college. More than 55 software packages are available for student use, most without charge. Software includes Microsoft Office products, SAS, and S+. Some specialty labs are equipped with RedHat Linux and are loaded with R, Macanova, Xlispstat, Mathematica, and other software.

Students, faculty, and staff draw on extensive library resources available across campus. Hardin Library for the Health Sciences serves as a central resource for all of the health sciences colleges. Hardin Library's Information Commons, a state-of-the-art health sciences educational technology facility, provides central support and delivery for courseware development, classroom instruction, health-related research, and independent learning. It offers high-end multimedia development workstations, networked electronic classrooms, a case-based learning and conference room, and information research workstations for searching health-related databases and the Internet.

## Agricultural Safety and Health

**Director:** Kelly Donham

**Graduate nondegree program:** Certificate in Agricultural Safety and Health

**Web site:** <http://www.public-health.uiowa.edu/oeht/programs/certificate/>

The College of Public Health offers the Certificate in Agricultural Safety and Health via distance education. The graduate-level program trains students to detect safety and illness hazards and to treat and prevent farm-related illnesses, injuries, and deaths.

### Certificate in Agricultural Safety and Health

The Certificate in Agricultural Safety and Health requires 12 s.h. The program is intended for health and safety professionals nationwide as well as for students at The University of Iowa and other postsecondary institutions who are enrolled in health or safety programs and would like to add an agricultural health component to their training. Completion of the program may enhance employment opportunities in health care delivery, government, and the private sector.

The certificate program is accredited by the Council on Education in Public Health.

Students complete six courses, listed below. Although the certificate is offered via distance education, off-campus students are encouraged to take 175:209 Rural Health and Agricultural Medicine on campus; the course is offered twice yearly, once during spring semester and again as an intensive five-day workshop in June. Students may be able to complete 175:203 Preceptorship in Occupational and Environmental Health in their own communities.

175:172 Independent Study in Occupational and Environmental Health	1 s.h.
175:196 Agricultural Safety: Theories and Practice	2 s.h.
175:203 Preceptorship in Occupational and Environmental Health	2 s.h.
175:209 Rural Health and Agricultural Medicine	3 s.h.
175:180 Occupational and Environmental Health Seminar	1 s.h.
or	
175:210 Current Topics in Agricultural Health	1 s.h.
175:192 Occupational Safety	3 s.h.
or	
175:230 Occupational Health	3 s.h.

Applicants to the certificate program should hold a bachelor's degree from an accredited university with a g.p.a. of at least 2.50, or have equivalent experience and education. Application materials must include the program's application form, a résumé, and a letter of interest explaining the applicant's current position and education objectives.

For more information about the program's curriculum or faculty, visit the Certificate in Agricultural Safety and Health web site.

## Biostatistics

**Head:** Kathryn Chaloner

**Deputy head:** William R. Clarke

**Professors:** Stephan Arndt (Psychiatry), Leon F. Burmeister, Joseph E. Cavanaugh (Statistics and Actuarial Science), Kathryn Chaloner (Statistics and Actuarial Science), William R. Clarke, Christopher S. Coffey, Jeffrey J. Dawson, Jian Huang (Statistics and Actuarial Science), Michael P. Jones (Statistics and Actuarial Science), Joseph B. Lang (Statistics and Actuarial Science), Douglas Langbehn (Psychiatry), Jane F. Pendergast, Bruce Pfohl (Psychiatry), Ying Zhang, Dale Zimmerman (Statistics and Actuarial Science)

**Professors emeriti:** George Woodworth (Statistics and Actuarial Science), Robert F. Woolson (Statistics and Actuarial Science/Epidemiology)

**Adjunct professor:** Daniel J. Sargent

**Clinical professor:** M. Bridget Zimmerman

**Associate professors:** M. Kathryn Cowles (Statistics and Actuarial Science), Brian J. Smith, Kai Wang

**Assistant professors:** Dawei Liu, Jacob J. Oleson, Yi Xing (Internal Medicine/Biomedical Engineering), Gideon K.D. Zamba

**Adjunct assistant professors:** Hyonggin An, Michelle A. Larson, Stephen Hillis

**Associate:** Emine O. Bayman (Anesthesiology)

**Graduate degrees:** M.S., Ph.D. in Biostatistics

**Web site:** <http://www.public-health.uiowa.edu/biostat>

The Department of Biostatistics prepares students for professional and academic careers in biostatistics. Graduates find positions in pharmaceutical, health care, and research companies and institutions; in universities and government agencies; and as consultants. The department also provides training for non-biostatistics students.

Current research interests in the Department of Biostatistics include computer intensive statistics, Bayesian methods, design and analysis of clinical trials, longitudinal data analysis, survival analysis, spatial modeling, analysis of data subject to missingness, time series, model selection, quality control, survey sampling, and public health statistics. Biostatistics faculty members work closely with both clinical and basic science investigators on the University of Iowa health sciences campus in the design and analysis of research projects.

## Graduate Programs

The department offers a Master of Science and a Doctor of Philosophy in biostatistics. It also offers the biostatistics subtrack for the Master of Public Health; see "M.P.H." Subtrack" below.

### Master of Science

The Master of Science in biostatistics requires a minimum of 38 s.h. of graduate credit. The program provides training in the design of experiments and in analysis of data related to biomedical or public health problems. It emphasizes mathematical, statistical, and computer methods for dealing with quantitative information, and provides opportunities for students to gain statistical consulting experience with a variety of problems.

Graduates find career opportunities in many areas, including pharmaceuticals, health care, research companies and institutions, consulting firms, universities, and government agencies.

All M.S. students are required to complete an in-depth preceptorship under the direction of a departmental faculty member and a final comprehensive-style examination.

Graduate students in biostatistics must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. of course work may be dismissed from the program.

### CORE COURSES

All of these:

171:178 Biostatistical Computing	3 s.h.
171:201-171:202 Biostatistical Methods I-II	8 s.h.
171:203 Biostatistical Methods in Categorical Data	3 s.h.
171:266 Statistical Methods in Clinical Trials	3 s.h.
171:280 Preceptorship in Biostatistics	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.

One of these sequences:

22S:153-22S:154 Mathematical Statistics I-II	6 s.h.
22S:193-22S:194 Statistical Inference I-II (preferred for Ph.D. students)	6 s.h.

One of these:

002:169 Introduction to Bioinformatics	4 s.h.
055:122 Computational Genomics	3 s.h.
061:157 General Microbiology	5 s.h.
069:133 Introduction to Human Pathology for Graduate Students	4 s.h.

096:114 Human Pathophysiology: Organ Systems	3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology	3 s.h.
127:191 Human Molecular Genetics	3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention	3 s.h.
174:102 Introduction to the U.S. Health Care System	3 s.h.
175:197 Environmental Health	3 s.h.

### ELECTIVES

At least 3 s.h. from these:

22S:138 Bayesian Statistics	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.
22S:248 Computer Intensive Statistics	3 s.h.
22S:255 Linear Models	4 s.h.
171:173 Design of Sample Surveys	3 s.h.
171:174 Introductory Longitudinal Data Analysis	3 s.h.
171:185 Microarray Data Analysis	3 s.h.
171:230 Statistical Data Mining in Public Health	3 s.h.
171:242 Applied Survival and Cohort Data Analysis	3 s.h.
171:251 Theory of Biostatistics I	4 s.h.
171:252 Theory of Biostatistics II	4 s.h.
171:261 Survival Data Analysis	3 s.h.
171:262 Analysis of Categorical Data	3 s.h.
171:264 Longitudinal Data Analysis	3 s.h.
171:282 Problems/Special Topics in Biostatistics	1 s.h.

### M.P.H. Subtrack

The Department of Biostatistics offers the biostatistics subtrack for the Master of Public Health. The subtrack focuses on applying biostatistical methods to public health and biomedical sciences, and applying methodology for design and analysis of research investigations in the health sciences. Graduates of the program are prepared for work as statistical consultants and data analysts for public health projects. See Master of Public Health Program in the Catalog.

### Doctor of Philosophy

The Doctor of Philosophy in biostatistics requires a minimum of 79 s.h. of graduate credit, including credit from a master's degree. The program prepares students for professional and academic careers in biostatistics, especially for positions that emphasize developing and applying statistical methodology to solve important biological and public health problems.

All Ph.D. students must successfully complete a qualifying examination, a comprehensive examination, and a dissertation—a substantial scholarly treatise. The research topic and content, which vary depending on the program of study, must be approved by the student's dissertation committee. Other degree requirements include approved electives chosen from Department of Biostatistics and other University of Iowa courses.

Graduate students in biostatistics must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. of course work may be dismissed from the program.

Requirements for the Ph.D. are as follows.

#### MASTER OF SCIENCE BACKGROUND

Ph.D. students must take the following courses (26 s.h.) required for the Master of Science in biostatistics. Students who have completed equivalent course work at other institutions may request waivers and/or transfers of credit. Students who earned a Master of Science in biostatistics at The University of Iowa automatically receive credit for these courses.

One of these sequences:

22S:153-22S:154 Mathematical Statistics I-II	6 s.h.
22S:193-22S:194 Statistical Inference I-II	6 s.h.

All of these:

171:201-171:202 Biostatistical Methods I-II	8 s.h.
171:203 Biostatistical Methods in Categorical Data (171:241 may be substituted if taken fall 2006 or earlier)	3 s.h.
171:280 Preceptorship in Biostatistics	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
One approved biology/public health course	

#### CORE COURSES

22S:255 Linear Models	4 s.h.
171:251 Theory of Biostatistics I	4 s.h.
171:252 Theory of Biostatistics II	4 s.h.
171:261 Survival Data Analysis	3 s.h.
171:262 Analysis of Categorical Data	3 s.h.
171:264 Longitudinal Data Analysis	3 s.h.

#### ELECTIVES

With approval of their advisors, students choose 15-22 s.h. of graduate-level courses in biostatistics, statistics, genetics, microbiology, and so forth. They may count a maximum of 5 s.h. earned in nonquantitative courses (e.g., community and behavioral health, epidemiology, microbiology) toward the requirement. They also may count courses required for the Master of Science that are not listed under "Master of Science Background," above, toward the requirement.

Ph.D. students may take the following courses.

002:170 Bioinformatics	3 s.h.
22S:138 Bayesian Statistics	3 s.h.
22S:156 Applied Time Series Analysis	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.
22S:195 Probability and Stochastic Processes I	3 s.h.
22S:248 Computer Intensive Statistics	3 s.h.
171:243 Cohort Data Analysis	1 s.h.
171:280 Preceptorship in Biostatistics (in addition to preceptorship required for M.S.)	3 s.h.
171:290 Advanced Biostatistics Seminar	0-3 s.h.

#### DISSERTATION

171:300 Thesis/Dissertation (at least two semesters in residence)	10-17 s.h.
---	------------

#### Admission

The biostatistics faculty considers several factors when evaluating applications for admission, including GRE scores, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area *may* be admitted if all other components of his or her application are very strong.

All M.S. and Ph.D. program applicants must hold a baccalaureate degree, have a cumulative g.p.a. of at least 3.00, and have taken the Graduate Record Examination (GRE) General Test. Applicants whose first language is not English and who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants who score 550-599 (paper-based), 213-249 (computer-based), or 81-99 (Internet-based) on TOEFL are required to take English fluency courses. Applicants who score below those ranges are not considered for admission. In place of TOEFL scores, the department accepts International English Testing System (IELTS) scores of 7.0 or higher, with no subscore below 6.0.

All biostatistics applicants and students are required to have strong written and oral communication skills.

All M.S. applicants must be competent in at least one computer programming language. They also must have mathematical sciences training in methods and techniques of single variable and multivariable differential and integral calculus, and in linear algebra.

Completion of an M.S. program in statistics or biostatistics generally is required for admission to the Ph.D. program.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

#### **APPLICATION DEADLINES**

M.S. (fall entrance): January 15 (early), March 15 (late)

Ph.D. (fall entrance): January 15 (early), March 15 (late)

#### **Financial Support**

A limited number of teaching and research assistantships are available. Assistantships offer financial support and resident tuition with a partial tuition scholarship, and provide valuable on-the-job training experiences.

For information on financing education through jobs, grants, and loans, contact the Office of Student Financial Aid.

### **Resources**

Department of Biostatistics resources and activities include the Biostatistics Consulting Center, the Clinical Trials Statistical and Data Management Center, and the Center for Public Health Statistics. The Biostatistics Consulting Center provides opportunities for students to gain valuable experience working with faculty and staff in the health sciences at The University of Iowa. The Clinical Trials Statistical and Data Management Center serves the statistical design, data management, and analysis needs of a variety of multicenter clinical trials, including studies of new treatments for acute ischemic stroke and studies of islet transplantation. The Center for Public Health Statistics facilitates the collection, statistical analyses, and dissemination of health data in support of the University's research, teaching, and service missions and in partnership with the Iowa Department of Public Health.

### **Biostatistics Courses**

- 171:121 General Biostatistics** 4 s.h.  
Biostatistics and biostatistical computation; biostatistical aspects of health-related areas--clinical trials, disease modeling, disease mapping, genetics, and epidemiology; brief introduction to survival and longitudinal analyses.
- 171:151 Biostatistics for Biomedical Research** 1 s.h.  
Application of statistical techniques to biological data analysis; normal distribution, sampling distribution of the mean, variance, nonparametric methods, linear regression, power, and sample size. Same as 156:204.
- 171:161 Introduction to Biostatistics** 3 s.h.  
Application of statistical techniques to biological data, including descriptive statistics; probability; normal, binomial, and Poisson distributions; sampling distributions; tests of significance; confidence intervals; analysis of frequency data; simple linear regression. Offered fall and spring semesters. Requirements: college algebra.
- 171:162 Design and Analysis of Biomedical Studies** 3 s.h.  
Simple and multiple linear regression and correlation; one- and two-way layout considerations in planning experiments; factorial experiments; multiple comparison techniques; orthogonal contrasts. Offered spring semesters. Prerequisites: 171:161. Same as 22S:140.
- 171:164 Research Data Management** 3 s.h.  
Overview of problems encountered in gathering and processing data from biomedical investigations; introduction to data management techniques useful in biomedical studies; introduction to Microsoft Access. Offered fall semesters of odd years. Requirements: Fortran or C programming capability.
- 171:173 Design of Sample Surveys** 3 s.h.  
Challenges in designing sample surveys; emphasis on construction and number of strata, unbiased ratio estimators, multistaged sampling, estimation of variance in complex surveys, double sampling, sampling frame construction problems, panel studies, and problems due to nonresponse. Offered fall semesters. Prerequisites: 22S:154 or 22S:194 or 171:202.
- 171:174 Introductory Longitudinal Data Analysis** 3 s.h.

Statistical models and estimation methods used to analyze correlated data (e.g., same subject measured repeatedly); emphasis on use of statistical software. Offered fall semesters of even years. Prerequisites: 171:161, and 171:162 or 22S:152. Same as 22S:160.

**171:178 Biostatistical Computing** 3 s.h.

Groundwork in SAS and R programming; emphasis on data management, Monte Carlo simulations, and expectation maximization techniques. Offered fall semesters. Corequisites: 171:201. Recommendations: C and C++ skills.

**171:185 Microarray Data Analysis** 3 s.h.

Basic statistical principles and techniques used in bioinformatics, including analyzing microarray gene expression data. Offered spring semesters. Prerequisites: 22S:030 or 22S:101 or 171:161. Same as 002:176, 127:176.

**171:201 Biostatistical Methods I** 4 s.h.

Problem-oriented probability distributions, moments, estimation, parametric and nonparametric inference for one-sample and two-sample problems, analysis of frequency data, linear regression, and correlation analysis, with emphasis on use of computers. Offered fall semesters. Requirements: two semesters of calculus.

**171:202 Biostatistical Methods II** 4 s.h.

Continuation of 171:201, which is prerequisite; linear regression and correlation, multiple linear regression, multiple factor experiments, multiple comparisons, orthogonal contrasts, block and split-plot designs, confounding interactions, and mixed models. Offered spring semesters. Prerequisites: 171:201.

**171:203 Biostatistical Methods in Categorical Data** 3 s.h.

Introduction to methods for allied categorical data analysis; estimation of proportions, rates, and risks; measures of relative risk and odds ratios, stratified analysis, case control studies, logistic regression. Offered spring semesters. Prerequisites: 171:178 and 171:201. Corequisites: 22S:154 or 22S:194, and 171:202.

**171:230 Statistical Data Mining in Public Health** 3 s.h.

Introduction to a set of supervised statistical methods (e.g., regression, decision tree, neural network) and some unsupervised methods (e.g., association rules, and clustering) for data analysis in health-related applications. Offered spring semesters of even years. Prerequisites: 171:202, and 22S:153 or 22S:193.

**171:241 Applied Categorical Data Analysis** 3 s.h.

Overview of methods to analyze categorical data from health science investigations; estimation of rates and risks, measures of relative risk, stratified analysis, logistic regression analysis. Offered fall semesters. Prerequisites: 171:162 and 173:140.

**171:242 Applied Survival and Cohort Data Analysis** 3 s.h.

Nonparametric and semiparametric methods for survival data; methods of directly comparing standardized rates and standardization mortality ratios; Poisson regression for cohort data. Offered spring semesters of odd years. Prerequisites: 171:203 and 171:241.

**171:243 Cohort Data Analysis** 1 s.h.

Methods of comparing direct standardized rates and standardized mortality ratios; Poisson regression for cohort data. Offered spring semesters of odd years. Prerequisites: 171:241.

**171:251 Theory of Biostatistics I** 4 s.h.

Intermediate study of sufficiency, exponential families, methods of estimation, uniform minimum variance unbiasedness, information, likelihood theory, confidence intervals, the Neyman-Pearson lemma, asymptotic theory and its applications. Offered fall semesters of even years. Prerequisites: 22S:154 or 22S:194, and 171:202.

**171:252 Theory of Biostatistics II** 4 s.h.

Nonparametric hypothesis tests, semiparametric estimation, generalized linear models, generalized estimation equations, generalized linear mixed models, EM algorithm, computer-intensive methods; application of theory learned in 171:251 to classical and new methods in biostatistics. Offered spring semesters of odd years. Prerequisites: 171:251.

**171:261 Survival Data Analysis** 3 s.h.

Types of censoring and truncation; survival function estimation; life tables; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; analysis of correlated survival data. Offered fall semesters. Prerequisites: 22S:154 or 22S:194, and 171:202. Same as 22S:225.

**171:262 Analysis of Categorical Data**

3 s.h.

Models for discrete data, distribution theory, maximum likelihood and weighted least squares estimation for categorical data, tests of fit, models selection. Offered spring semesters. Prerequisites: 22S:154 or 22S:194, and 22S:164 or 171:202. Same as 22S:220.

**171:264 Longitudinal Data Analysis**

3 s.h.

Introduction to statistical methodology for analyzing data from observational and experimental studies in which the response variable from each subject is measured repeatedly; emphasis on use of statistical software packages and specialized programs. Offered spring semesters of odd years. Prerequisites: 22S:154 or 22S:194, and 171:202.

**171:266 Statistical Methods in Clinical Trials**

3 s.h.

Survey of statistical methods commonly used in clinical trials; methodologic perspective on the design, conduct, and analysis of trials; emphasis on Phase III randomized controlled clinical trials. Offered spring semesters. Prerequisites: 22S:154 or 22S:194, and 171:202.

**171:271 Advanced Survival Analysis**

3 s.h.

Counting process/martingale theory leading to asymptotic results of survival methods; semiparametric regression of accelerated failure time and additive hazard models; multivariate survival models for clustered, multiple event, and recurrent event data; special topics. Prerequisites: 171:261.

**171:280 Preceptorship in Biostatistics**

arr.

Work experience using knowledge and skill acquired in classroom; arranged in conjunction with ongoing departmental or collegiate activities or with governmental agencies or private industry; preparation of prospectus and presentation of research results in a department seminar. Repeatable.

**171:281 Independent Study in Biostatistics**

arr.

In-depth pursuit of an area of special interest in biostatistics requiring substantial creativity and independence. Repeatable.

**171:282 Problems/Special Topics in Biostatistics**

arr.

Didactic material in biostatistics; may include tutorials, seminars, faculty-directed independent work (e.g. literature search, project, short research project). Repeatable.

**171:290 Advanced Biostatistics Seminar**

0-3 s.h.

Current topics; supervised experience in reading and interpreting biostatistical literature. Offered spring semesters.

**171:295 Research in Biostatistics**

arr.

Research that may lead to a dissertation. Repeatable.

**171:300 Thesis/Dissertation**

arr.

Repeatable.

## Certificate in Public Health

**Coordinator:** Katie Yamaki

**Undergraduate nondegree program:** Certificate in Public Health

**Graduate nondegree program:** Certificate in Public Health

**Web site:** [http://www.public-health.uiowa.edu/academics/certificate\\_ph/](http://www.public-health.uiowa.edu/academics/certificate_ph/)

The College of Public Health offers the Certificate in Public Health via distance education. The program is designed to improve public health practice and public health workforce capacity in Iowa and the upper Midwest. The Certificate in Public Health is intended primarily for individuals in public health practice, those in the workforce, and those interested in acquiring a basic knowledge of public health practice. The program is open to undergraduate and graduate students.

### Certificate in Public Health

The Certificate in Public Health requires 12 s.h. All certificate courses are offered on the Internet at least once a year. Some also are offered on the University of Iowa campus and during the College of Public Health Summer Institute.

In order to earn the certificate, students must complete the required course work in less than five years and must maintain a g.p.a. of at least 2.75 in work for the certificate. Students must have access to a computer and the Internet.

The following courses are required.

Both of these:

170:101 Introduction to Public Health	3 s.h.
173:099 Evidence-Based Public Health Methods	3 s.h.

Two of these:

172:101 Introduction to Health Promotion and Disease Prevention	3 s.h.
174:102 Introduction to the U.S. Health Care System	3 s.h.
175:197 Environmental Health	3 s.h.

Applicants to the certificate program must have completed at least 60 s.h. of postsecondary education course work and must have a cumulative g.p.a. of at least 2.75. They must submit official transcript(s), a statement of purpose, two reference letters, a résumé, and an application form.

Students who have graduate standing when they complete the certificate course work, and are admitted to the M.P.H. program after earning the certificate, may apply 9 s.h. of credit from the certificate program toward the M.P.H.

## Community and Behavioral Health

**Head:** Edith A. Parker

**Professors:** Elizabeth Altmaier (Psychological and Quantitative Foundations), Julie Andsager (Journalism and Mass Communication), Leslie Baxter (Communication Studies), Joe D. Coulter (Anatomy and Cell Biology), Karen Farris (Pharmacy), Kristi Ferguson (Internal Medicine), Paul Greenough (History), Ann Marie McCarthy (Nursing), Edith A. Parker, Jerry Suls (Psychology), Michael Teague (Health and Human Physiology)

**Professors emeriti:** Melanie Dreher (Nursing), Peter Nathan

**Adjunct professor:** Frank Boster

**Adjunct professor (clinical):** Gene Lutz

**Associate professors:** Shelly Campo, Faryle Nothwehr, Nancy Thompson, Jingzhen Yang

**Associate professors (clinical):** Mary Aquilino, Anne Helene Skinstad, Deb Waldron (Pediatrics)

**Adjunct associate professors:** Kevin Kelly, Connie Kohler

**Adjunct associate professor (clinical):** Mary Losch

**Assistant professors:** Yong-Chan Kim, Erica Prussing (Anthropology), Sandra Ramey (Nursing)

**Adjunct lecturers:** Ro Foege, Dawn Gentsch, Kevin Teale, Laurie Walkner

**Graduate degrees:** M.S., Ph.D. in Community and Behavioral Health

**Web site:** <http://www.public-health.uiowa.edu/cbh>

The Department of Community and Behavioral Health examines the relationship between human behavior and community health and focuses on creating effective strategies for change. Its faculty members come from a variety of disciplines within the social and health sciences, drawn together by an interest in health behavior and promoting healthy communities.

Community and behavioral health students learn how to design, implement, and evaluate interventions directed toward identified public health problems in communities. They learn how public and institutional policy, the media, and community organizations can promote healthy behavior and effect positive change.

## Graduate Programs

The department offers a Master of Science in community and behavioral health, with a subtrack in health communication; and a Doctor of Philosophy in community and behavioral health, with an addiction studies subtrack and a health communication subtrack.

It also offers two subtracks for the Master of Public Health: the community and behavioral health subtrack and the health communication subtrack. See "M.P.H. Subtracks" below.

### Master of Science

The Master of Science in community and behavioral health requires 35 s.h. of graduate credit, including a thesis. The program prepares students for research and professional positions in community and behavioral health or for Ph.D. study in community and behavioral health. The degree is offered with an optional subtrack in health communication; see "M.S. Subtrack in Health Communication" below.

During the first semester, M.S. students work with their academic advisor to develop a plan of study that satisfies their interests and professional goals as well as the program's requirements. Students are required to attend departmental seminars and to complete the following courses.

#### COLLEGE OF PUBLIC HEALTH CORE

All of these (9 s.h.):

171:161 Introduction to Biostatistics	3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.

#### BEHAVIORAL AND SOCIAL SCIENCES CORE

Three of these (9 s.h.):

172:106 Designing and Implementing Interventions	3 s.h.
172:110 Community Development in Public Health	3 s.h.
172:130 Social Determinants of Health	3 s.h.
172:135 Health Disparities and Cultural Competence	2-4 s.h.
172:150 Health Behavior and Health Education	3 s.h.
172:185 Communicating with the Community	3 s.h.
172:240 Health Communication	3 s.h.
172:242 Persuasion and Health	3 s.h.
172:246 Health Communication Campaigns	3 s.h.

**RESEARCH METHODS CORE**

Two of these (6 s.h.):

07P:243 Intermediate Statistical Methods	4 s.h.
07P:249 Factor Analysis and Structural Equation Models	3 s.h.
07P:252 Introduction to Multivariate Statistical Methods	3 s.h.
044:106 Foundations of GIS	3 s.h.
171:162 Design and Analysis of Biomedical Studies	3 s.h.
171:241 Applied Categorical Data Analysis	3 s.h.
172:181 Evaluation I: Theory and Applications	3 s.h.
172:183 Qualitative Research for Public Health	3 s.h.
172:202/113:202 Ethnographic Field Methods	3 s.h.
172:282 Evaluation II: Design and Methods	3 s.h.
172:285 Research Methods in Community and Behavioral Health	3 s.h.

**CONTENT AREA ELECTIVES**

Students work with their advisors to select at least 5 s.h. of course work appropriate to their educational goals and emphasis areas. They may choose from any community and behavioral health courses not already taken, other College of Public Health courses, or other University of Iowa graduate-level courses.

**THESIS**

The thesis requirement is 6 s.h.

**M.S. Subtrack in Health Communication**

The M.S. subtrack in health communication is designed for students who wish to gain knowledge and skill in designing, evaluating, and implementing effective communication strategies and messages that use mediated and interpersonal channels to address the health needs of diverse audiences. The program focuses on clinician-patient interaction, family communication, group and organizational communication, and mass media and web-based campaigns.

The health communication subtrack combines the M.S. core course work with additional concentrated learning opportunities. Students fulfill the regular M.S. requirements, using the health communication core to satisfy the content area electives requirement.

**HEALTH COMMUNICATION CORE**

Four of these (12 s.h.):

036:371 Communication Theory	3 s.h.
172:140/019:160 Media and Health	3 s.h.
172:240/036:270 Health Communication	3 s.h.
172:242 Persuasion and Health	3 s.h.
172:246/036:379 Health Communication Campaigns	3 s.h.

**M.P.H. Subtracks**

The Department of Community and Behavioral Health offers two subtracks for the Master of Public Health: the community and behavioral health subtrack, and the health communication subtrack.

The M.P.H. subtrack in community and behavioral health prepares public health practitioners for a variety of positions in community development, health program implementation, and health education.

The M.P.H. subtrack in health communication prepares public health practitioners for a variety of employment opportunities in health communication strategies, health communication in groups and organizations, and mass media/web-based campaigns in health promotion.

For detailed information about the M.P.H. degree, see Master of Public Health Program in the Catalog.

**Doctor of Philosophy**

The Doctor of Philosophy in community and behavioral health requires at least 75 s.h. of graduate credit, including credit from a master's degree. The program prepares individuals for academic, research, and policy-making work in the

social and behavioral health sciences. This fast-growing academic specialty offers many career opportunities in academic and research institutions. The Ph.D. is offered with subtracks in addiction studies and health communication; see "Ph.D. Subtrack in Addiction Studies" and "Ph.D. Subtrack in Health Communication" below

Ph.D. students must successfully complete a qualifying exam, a comprehensive exam, and a dissertation--a substantial scholarly treatise. The research topic must be approved by the student's dissertation committee.

During the first semester, students work with their academic advisors to develop a plan of study that satisfies their interests and professional goals as well as the program's requirements. Students are required to attend departmental seminars and to complete the following courses.

#### **COLLEGE OF PUBLIC HEALTH CORE**

All of these (9 s.h.):

171:161 Introduction to Biostatistics	3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.

#### **BEHAVIORAL AND SOCIAL SCIENCES CORE**

Seven of these (21 s.h.):

172:106 Designing and Implementing Interventions	3 s.h.
172:110 Community Development in Public Health	3 s.h.
172:130 Social Determinants of Health	3 s.h.
172:131/113:184 Anthropology and International Health	3 s.h.
172:135 Health Disparities and Cultural Competence	2-4 s.h.
172:150 Health Behavior and Health Education	3 s.h.
172:173/113:185 Medical Anthropology	3 s.h.
172:185 Communicating with the Community	3 s.h.
172:240 Health Communication	3 s.h.
172:242 Persuasion and Health	3 s.h.
172:246 Health Communication Campaigns	3 s.h.

#### **RESEARCH METHODS CORE**

Five of these (15 s.h.):

07P:243 Intermediate Statistical Methods	4 s.h.
07P:249 Factor Analysis and Structural Equation Models	3 s.h.
07P:252 Introduction to Multivariate Statistical Methods	3 s.h.
034:214 Introduction to Sociological Data Analysis	3 s.h.
034:215 Sampling, Measurement, and Observation Techniques	3 s.h.
034:216 Linear Models in Sociological Research	3 s.h.
034:218 Advanced Statistical Modeling of Data	3 s.h.
034:219 Structural Equation Modeling	3 s.h.
044:106 Foundations of GIS	3 s.h.
171:162 Design and Analysis of Biomedical Studies	3 s.h.
171:241 Applied Categorical Data Analysis	3 s.h.
172:181 Evaluation I: Theory and Applications	3 s.h.
172:183 Qualitative Research for Public Health	3 s.h.
172:202/113:202 Ethnographic Field Methods	3 s.h.
172:282 Evaluation II: Design and Methods	3 s.h.
172:285 Research Methods in Community and Behavioral Health	3 s.h.

#### **CONTENT AREA ELECTIVES**

Students work with their advisors to select at least 18 s.h. of course work appropriate to their educational goals and emphasis areas. They may choose from any Department of Community and Behavioral Health courses they have not already taken, other College of Public Health courses, or other University of Iowa graduate-level courses.

#### **DISSERTATION**

The dissertation requirement is 12 s.h.

### **Ph.D. Subtrack in Addiction Studies**

The Ph.D. subtrack in addiction studies is designed for students who wish to gain skill in developing and evaluating addiction prevention and intervention programs. This area of study and practice examines addiction prevention and treatment from both a public health and a biopsychosocial perspective.

The addiction studies subtrack combines core course work from the Ph.D. curriculum with additional specialized training. Students fulfill the regular Ph.D. requirements, using the addiction studies core to satisfy the content area electives requirement.

#### **ADDICTION STUDIES CORE**

Students work with their advisor to select 18 s.h. of addictions studies course work offered by the department. Courses focusing on treatment of substance abuse and comorbid psychopathology, prevention of substance abuse and comorbid psychopathology, and assessment and diagnosis of addiction and comorbid psychopathology are under development.

### **Ph.D. Subtrack in Health Communication**

The Ph.D. subtrack in health communication is designed for students who wish to prepare for academic, research, and policy-making careers in the area of health communication.

The health communication subtrack combines the core course work from the Ph.D. curriculum with additional specialized training. Students fulfill the regular Ph.D. requirements, using the health communication core to satisfy the content area electives requirement.

#### **HEALTH COMMUNICATION CORE**

Four of these (12 s.h.):

036:371 Communication Theory	3 s.h.
172:140/019:160 Media and Health	3 s.h.
172:240/036:270 Health Communication	3 s.h.
172:242 Persuasion and Health	3 s.h.
172:246/036:379 Health Communication Campaigns	3 s.h.

### **Admission**

The community and behavioral health faculty considers several factors when evaluating applications for admission, including scores on the Graduate Record Exam, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All applicants must submit academic transcripts, three letters of recommendation, and a statement of purpose. Forms are available from the Department of Community and Behavioral Health or on its web site (see "Prospective Students").

Applicants to the M.S. program must have a cumulative grade-point average of at least 3.00 and should hold a bachelor's degree from an accredited college or university. No specific undergraduate major is required. Preference is given to applicants with Graduate Record Exam verbal scores of at least 520, quantitative scores of at least 600, and analytical writing scores of at least 4.0.

Applicants to the Ph.D. program must have a graduate grade-point average of at least 3.40 and should hold a graduate degree from an accredited college or university--ideally, an M.S. in community and behavioral health, or another public health degree, or a related social science degree, or a clinical health degree. Applicants who do not hold a graduate degree should apply to the M.S. program. Preference is given to applicants with Graduate Record Exam verbal scores of at least 520, quantitative scores of at least 620, and analytical writing scores of at least 4.0. Ph.D. program applicants also must submit their master's thesis, or if no thesis is available, a sample of their scholarly writing.

Applicants whose first language is not English and who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants who score 550-599 (paper-based), 213-249 (computer-based), or 81-99 (Internet-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations

of the Graduate College or the Graduate College section of the Catalog.

#### APPLICATION DEADLINES

Fall entry: April 1

Applications received by January 20 receive maximum consideration for financial aid.

#### Financial Support

Several forms of financial support are available, including scholarships and awards, student loans, and graduate assistantships.

Graduate assistantships provide a stipend and entitle students to resident tuition and reduced health insurance costs. Research assistantships are competitive and are awarded according to department need and student merit.

Scholarships and fellowships are available through federal agencies, such as the Centers for Disease Control and the National Institutes of Health, and from private foundations.

#### Resources

The department houses the Center for Health Communication and Social Marketing, the Iowa Tobacco Research Center, the Prairielands Addiction Technology Transfer Center, and the Prevention Research Center.

The Center for Health Communication and Social Marketing promotes communication research to address today's public health challenges. The Iowa Tobacco Research Center supports research and education on tobacco use and prevention of tobacco use. It also supports culturally competent and accessible smoking cessation services. The Prairielands Addiction Technology Transfer Center provides state-of-the-art training, curricula, and resources on substance use issues for counselors, health care professionals, and members of the community. The Prevention Research Center focuses on improving the health of rural Iowans.

Graduate students may have opportunities to work with ongoing research projects in the centers.

#### Community and Behavioral Health Courses

##### **172:101 Introduction to Health Promotion and Disease Prevention** 3 s.h.

Basic concepts, strategies, and methods of health promotion and disease prevention; health promotion in the context of public health, theories and principles that underpin health promotion; overview of policy formation and health promotion planning, implementation, evaluation. Offered spring semesters. Requirements: graduate standing.

##### **172:106 Designing and Implementing Interventions** 3 s.h.

Background and skills necessary to plan a public health intervention program; program planning models. Offered fall semesters. Prerequisites: 172:150. Requirements: admission to College of Public Health.

##### **172:110 Community Development in Public Health** 3 s.h.

Concepts, strategies, and methods of community development as major approaches to creating healthy communities and promoting social change; role of public health practitioners as agents of change in organizations, communities. Offered fall semesters. Requirements: graduate standing.

##### **172:115 Community Preventive Programs and Services** 3 s.h.

Current public health problems and associated community preventive interventions. Offered fall semesters.

##### **172:122 Maternal, Child, and Family Health** 3 s.h.

Major issues, policies, and programs for health of women, children, and families in the United States; social, political, and economic determinants. Offered spring semesters. Prerequisites: 096:030 and 173:140.

##### **172:130 Social Determinants of Health** 3 s.h.

Relationship between social factors and health, with focus on family, neighborhood, community, and social group levels. Offered spring semesters. Requirements: graduate standing.

##### **172:131 Anthropology and International Health** 3 s.h.

Anthropological contributions to and critiques of the international health enterprise; case studies illustrating anthropology and international health's intersection, and their differences. Offered spring semesters. Same as 113:184, 152:184.

**172:133 The Anthropology of Women's Health** 3 s.h.  
How female gender intersects with culture, environment, and political economy to shape health and illness; reproductive health, violence, drug use, cancer; readings in anthropology, public health. Prerequisites: 113:003 or 113:010 or 131:010. Same as 113:133.

**172:135 Health Disparities and Cultural Competence** 2-4 s.h.  
Characteristics, causes, and effects of health disparities in the U.S. health care system; foundation for development of knowledge, attitudes, and skills required of culturally competent health care providers; definitions and models of cultural competence, characteristics of culturally effective practitioners and workplaces; health disparities among specific populations, evidence for cultural competence as a remedy; taking a culturally appropriate history; working with interpreters; legal and professional imperatives for cultural competence. Same as 046:377, 096:125.

**172:140 Media and Health** 3 s.h.  
Potential and limits of mass media's ability to educate the public about health; research and theory on the influence of information and entertainment media; theories, models, assumptions of mass communication in relation to public health issues. Same as 019:160.

**172:150 Health Behavior and Health Education** 3 s.h.  
Common theories of health behavior and health education and their application to varied public health problems and settings. Offered spring semesters. Requirements: graduate standing.

**172:155 Public Health Issues in Overweight Management** 3 s.h.  
Overview of overweight and obesity from a public health perspective, including epidemiology, measurement issues, and intervention approaches at individual, community, and policy levels. Prerequisites: 170:101 or 172:101.

**172:160 Substance Use and Misuse in America** 3 s.h.  
Current data on epidemiology, assessment and diagnosis, treatment, prevention of substance misuse. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:013. Recommendations: 031:163. Same as 031:173.

**172:161 Substance Abuse Prevention and Intervention** 3 s.h.  
Prevalence and characteristics of several substance use disorders and the impact of such disorders on the individual, the community, and public health workers; how prevalence of substance use disorders varies among different ethnic and cultural groups, between men and women, across the life span, and through different socio-economic levels; how outcomes of substance abuse disorders vary at both the individual and community level as a function of these factors. Requirements: graduate standing and substance abuse course.

**172:162 Prevention and Early Intervention of Mental Health Disorders** 3 s.h.  
Prevalence and characteristics of mental health disorders; differences between ethnicity and culture, gender, age, and socioeconomic background; primary and secondary prevention; assessment and tertiary treatment approaches to mental health disorders.

**172:163 Tobacco Use: Prevention and Control** 3 s.h.  
Tobacco use, particularly cigarette smoking, as a major public health concern; key factors contributing to tobacco use; strategies to reduce smoking in communities.

**172:170 Special Topics** arr.  
Didactic material in community and behavioral health that may include tutorial, seminar, or faculty-directed independent work (e.g., literature search, project, short research project).

**172:173 Medical Anthropology** 3 s.h.  
Major theoretical, methodological approaches; international health and development; biomedicine as a cultural system; ethnomedicine; anthropology and AIDS, human reproduction, epidemiology, ethnopsychiatry. Prerequisites: 113:003 or 113:010. Same as 113:185, 152:185.

**172:181 Evaluation I: Theory and Applications** 3 s.h.

Program evaluation methods in public health; overview of evaluation theory and models of program evaluation, examples of public health program evaluation, criteria for judging evaluation methods and products. Offered fall semesters. Prerequisites: 172:150 and 173:140. Requirements: public health student.

**172:183 Qualitative Research for Public Health** 3 s.h.

Introduction to methods and theories of qualitative research that facilitate description and explanation of social phenomena related to health behavior, illness, prevention, and treatment in the public health domain. Offered fall semesters. Requirements: graduate standing.

**172:185 Communicating with the Community** 3 s.h.

Communication skills for research and practice settings, taught from a cultural perspective with reference to gender, age, ethnicity; individual and constructive interviewing, public speaking, conducting focus groups. Offered fall semesters. Requirements: graduate standing.

**172:202 Ethnographic Field Methods** 3 s.h.

Basic data-gathering techniques for field research in sociocultural anthropology. Requirements: anthropology graduate standing. Same as 113:202.

**172:240 Health Communication** 3 s.h.

Theories, concepts, research associated with health communication; interpersonal and mass communication approaches. Offered summer sessions. Same as 036:270.

**172:242 Persuasion and Health** 3 s.h.

Theories of persuasion and social influence; attitude formation, relationship between attitudes and behavior, persuasion theories and their applications across health topics. Offered spring semesters.

**172:246 Health Communication Campaigns** 3 s.h.

Design and analysis of health campaigns; theory, practice, methods; mass media, community, organization, and interpersonal approaches. Offered spring semesters. Same as 036:379.

**172:248 Health Information and Health Literacy** 3 s.h.

How health information is accessed, sought, used, and delivered in various health information contexts; current issues about health information and literacy, including concepts, measures, factors, consequences, interventions.

**172:270 Independent Study in Community and Behavioral Health** arr.

Pursuit of an interest in community and behavioral health requiring substantial creativity and independence. Repeatable.

**172:282 Evaluation II: Design and Methods** 3 s.h.

Research design and methodology for evaluation of public health and related programs; causality, evaluation theory, threats to validity, selection and comparison of research designs, sample selection and size, survey and scale construction, quantitative and qualitative data collection and analysis, data management, reporting; based on case study of an infant mortality prevention program. Offered spring semesters. Prerequisites: 172:181. Requirements: biostatistics or statistics course.

**172:285 Research Methods in Community and Behavioral Health** 3 s.h.

Overview of quantitative research methods for community and behavioral health; major elements of behavioral and social science research, critical evaluation of research related to community and behavioral health, application of research methods in public health practice; opportunities for students to build skills for evaluation of research and application of quantitative research methods. Prerequisites: 171:161 and 173:140.

**172:300 CBH Thesis/Dissertation** arr.

Work on M.S. thesis or Ph.D. dissertation in community and behavioral health, with thesis/dissertation advisor.

# Emerging Infectious Disease Epidemiology

**Coordinator:** Katie Yamaki

**Graduate nondegree program:** Certificate in Emerging Infectious Disease Epidemiology

**Web site:** [http://www.public-health.uiowa.edu/academics/certificate\\_eide.html](http://www.public-health.uiowa.edu/academics/certificate_eide.html)

The College of Public Health offers the Certificate in Emerging Infectious Disease Epidemiology. The graduate-level program provides basic information and training related to infectious diseases. It has a required on-campus component (summer), but the remaining work may be done either on campus or by distance education.

Emerging infectious diseases increasingly are recognized as global and regional issues. Some infectious diseases are controlled effectively with the help of modern technology. But new diseases—such as SARS, West Nile, and avian influenza virus infections—appear frequently, and older ones, including malaria, tuberculosis, and bacterial pneumonia, are now appearing in forms that are resistant to drug treatments. All of them have the potential to seriously affect human and animal health as well as economies locally and worldwide. They pose novel and unceasing challenges for professionals in health care, government, and private agencies.

The certificate program is designed for a broad range of individuals, including graduate students, international public health professionals, laboratory professionals, physicians, nurses, veterinarians, and medical technologists who seek graduate-level training in emerging infectious diseases.

## Certificate in Emerging Infectious Disease Epidemiology

The Certificate in Emerging Infectious Disease Epidemiology requires 12 s.h. of graduate credit. Students must maintain a g.p.a. of at least 2.75 in work toward the certificate and must complete the required courses within five years after beginning the program. Students who complete the certificate and are admitted subsequently to the Master of Public Health program may count a maximum of 9 s.h. of certificate work toward the M.P.H. requirements. Those working concurrently toward the certificate and the M.P.H. may apply a maximum of 3 s.h. of certificate work toward the M.P.H. requirements.

Three required certificate courses must be completed on campus during the two-week College of Public Health Summer Institute: 173:157 Zoonotic Diseases, 173:158 Public Health Laboratory Techniques, and 173:159 Applied Infectious Disease Epidemiology. The remaining courses may be completed on campus or by distance education.

The certificate requires the following courses.

All of these (6 s.h.):

173:157 Zoonotic Diseases	2-3 s.h.
173:158 Public Health Laboratory Techniques	1 s.h.
173:159 Applied Infectious Disease Epidemiology	2 s.h.

Two of these (6 s.h.):

171:161 Introduction to Biostatistics	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
173:155 Diagnostic Microbiology for Epidemiology	3 s.h.
175:197 Environmental Health	3 s.h.

Applicants to the certificate program must hold a baccalaureate degree from an accredited college or university and must have a g.p.a. of at least 2.75 (or foreign equivalent). Detailed information about the application process, including deadlines, is available from the program's coordinator.

# Epidemiology

**Head:** James C. Torner

**Professors:** Trudy Burns (Pediatrics/Nursing), Elizabeth Chrischilles (Pharmacy), Michael Cohen (Pathology/Urology), William Field (Occupational and Environmental Health), Laurence Fuortes (Occupational and Environmental Health/Internal Medicine/International Programs), Fredric Gerr (Occupational and Environmental Health/Internal Medicine), Loreen Herwaldt (Internal Medicine), Kathleen Janz (Health and Human Physiology), Susan Johnson (Obstetrics and Gynecology), Louis Kirchhoff (Internal Medicine), Steven Levy (Preventive and Community Dentistry), Charles Lynch (Pathology), Larry Mahoney (Pediatrics), Jody Murph (Pediatrics), Jeffrey Murray (Pediatrics/Biology/Pediatric Dentistry/Anatomy and Cell Biology), Corinne Peek-Asa (Occupational and Environmental Health/Nursing), Jennifer Robinson (Internal Medicine), Gary Rosenthal (Internal Medicine/Health Management and Policy), Audrey Saftlas, Elaine Smith (Preventive and Community Dentistry/Obstetrics and Gynecology), Linda Snetselaar (Internal Medicine), James Torner (Education/Surgery/Neurosurgery), Robert Wallace (Internal Medicine), Mary Wilson (Internal Medicine/Microbiology/International Programs), Craig Zwerling (Occupational and Environmental Health/Internal Medicine)

**Professors emeriti:** Gary Doern (Pathology), Claibourne Dungey (Pediatrics), James Hanson (Pediatrics), Herman Hein (Pediatrics), Michael Pfaller (Pathology), Helmut Schrott (Internal Medicine), Don VanDyke (Pediatrics), Robert Woolson (Biostatistics/Statistics and Actuarial Science)

**Adjunct professors:** James Cerhan, James Dickson, Bradley Doebbeling, Gregory Gray, Susan Joseph, Paul Pomrehn (Community and Behavioral Health), M. Patricia Quinlisk, James Roth, Wayne Sanderson (Occupational and Environmental Health)

**Associate professors:** Catherine Bradley (Obstetrics and Gynecology), John Brooks (Pharmacy/Health Management and Policy), Leslie Dennis, Peter Kaboli (Internal Medicine), David Katz (Internal Medicine), Paul Romitti, Neil Segal (Orthopaedics and Rehabilitation/Radiology), Carolyn Turvey (Psychiatry)

**Adjunct associate professors:** Caroline Doebbeling, Neal Kohatsu, Badrinath Konety, Annette O'Connor, Mario Schootman

**Clinical associate professor:** Michael Pentella

**Assistant professors:** Jess Fiedorowicz (Psychiatry), Philip Polgreen (Internal Medicine), Tara Smith, Anne Wallis

**Assistant professor (clinical):** Mary Charlton

**Adjunct assistant professors:** Lucy DesJardin, Daniel Gregory, Valerie Hoffman (Internal Medicine), Jesse Hostetter, Brian Lund (Pharmacy), Maureen McCue (International Programs), Christine Petersen, Shannon Putnam, Sheila Riggs, Kathleen Schneider, Anne Tabor

**Clinical assistant professor:** Ryan Carnahan

**Adjunct lecturers:** Glenda Dvorak, Tara Shochet, Phyllis Stumbo

**Adjunct instructor:** Kirk Phillips (Nursing)

**Associate:** Marin Schweizer

**Graduate degrees:** M.S., Ph.D. in Epidemiology; M.S. in Clinical Investigation

**Web site:** <http://www.public-health.uiowa.edu/epi>

The Department of Epidemiology focuses on surveillance for disease, risk factors for disease in the general population, behavioral factors in disease, use and outcome of health interventions and care, and the establishment and evaluation of disease control measures in the community. Students are guided by faculty members whose research interests include epidemiology of communication disorders, pharmacoepidemiology, cancer epidemiology, infectious disease epidemiology, adverse reproductive outcome epidemiology, anatomic pathology, genetics, cardiovascular disease, nutrition, smoking cessation, epidemiology of reproduction, dental epidemiology, clinical epidemiology, neuroepidemiology, meta-analysis, intervention trials, international health, and effects of aging.

## Graduate Programs

The department offers a Master of Science and a Doctor of Philosophy in epidemiology, and a Master of Science in clinical investigation. It also offers the epidemiology subtrack for the Master of Public Health; see "M.P.H. Subtrack" below.

### Master of Science in Epidemiology

The Master of Science in epidemiology requires 38 s.h. of graduate credit and is offered with or without thesis. The program prepares graduate students for professional careers in which specialized knowledge of epidemiological methods and analytic techniques are essential. Graduates find employment in local, state, and federal health agencies, academic institutions, and private enterprise.

Graduate students in epidemiology must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. of course work may be dismissed from the program. Students who choose to complete the degree without thesis are required to pass a comprehensive examination.

Students are required to attend 80 percent, for three semesters, of all Department of Epidemiology seminar meetings and journal club meetings. They also must present one scientific poster at an international, national, regional, state, University, or departmental level before they may graduate.

The 38 s.h. of graduate credit for the M.S. includes 30-31 s.h. in the required core and 7-8 s.h. of electives, as follows.

#### CORE COURSES

All of these:

171:161 Introduction to Biostatistics	3 s.h.
171:162 Design and Analysis of Biomedical Studies	3 s.h.
171:241 Applied Categorical Data Analysis	3 s.h.
173:140 Epidemiology I: Principles (web-based course cannot be used)	3 s.h.
173:160 Introduction to Epidemiology Data Analysis With Computers	2 s.h.
173:240 Epidemiology II: Advanced Methods	4 s.h.

One of these:

069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
---	--------

069:270 Pathogenesis of Major Human Diseases 3 s.h.

One of these:

173:255 Epidemiology of Infectious Diseases 3 s.h.

173:260 Epidemiology of Chronic Diseases 3 s.h.

One of these:

172:150 Health Behavior and Health Education 3 s.h.

173:280 Introduction to Health Care Organization and Policy 3 s.h.

175:197 Environmental Health 3 s.h.

One of these:

173:195 Preceptorship in Epidemiology (for nonthesis students) 3 s.h.

173:300 Thesis/Dissertation (for thesis students, may be taken twice) 3 s.h.

## ELECTIVES

Students must earn a total of 7-8 s.h. in elective course work, including at least 5 s.h. in Department of Epidemiology courses (prefix 173) and 2 s.h. in additional graduate-level course work pertinent to the student's educational goals and background (the additional 2 s.h. may be earned in an epidemiology course or in another graduate course, with the advisor's approval). The following courses are recommended.

171:164 Research Data Management 3 s.h.

171:174 Introductory Longitudinal Data Analysis 3 s.h.

171:242 Applied Survival and Cohort Data Analysis 3 s.h.

Students may need to do additional elective course work in order to complete the minimum 38 s.h. required for the degree.

## Master of Science in Clinical Investigation

The Master of Science in clinical investigation requires 30 s.h. of graduate credit. The program is designed for clinicians interested in pursuing careers in clinical research. It includes in-depth training in biostatistics, epidemiology, research ethics, and academic survival skills as well as didactic training applicable to clinical research careers.

Graduates of the program are able to critically evaluate clinical literature, write competitive grant proposals, design and conduct clinical research projects, work effectively with other researchers and support staff, and disseminate research results through manuscripts and presentations.

Applicants to the program must have completed at least 6 s.h. of pathology, physiology, and/or pharmacology. Students must remedy deficiencies by taking courses that fill this requirement during their enrollment in the program.

Graduate students in epidemiology must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. of course work may be dismissed from the program.

The M.S. in clinical investigation requires the following course work.

## CORE COURSES

Students earn a minimum of 15 s.h. as follows.

All of these:

173:150 Introduction to Clinical Epidemiology 2 s.h.

173:152 Clinical Research Career Development 1 s.h.

173:163 Seminar in Clinical and Translational Research (four semesters, 1 s.h. each) 4 s.h.

173:211 Grant Writing for Clinical Investigators 1 s.h.

173:295 Clinical Research Ethics 2 s.h.

One of these:

173:160 Introduction to Epidemiology Data Analysis With Computers 2 s.h.

173:161 Patient-Oriented Research Data Analysis 3 s.h.

One of these:

173:195 Preceptorship in Epidemiology 3-6 s.h.

173:300 Thesis/Dissertation

3-6 s.h.

**EPIDEMIOLOGY CORE**

Students earn a minimum of 12 s.h. as follows.

Both of these:

171:241 Applied Categorical Data Analysis (or approved substitute)

3 s.h.

173:140 Epidemiology I: Principles

3 s.h.

One of these:

171:161 Introduction to Biostatistics

3 s.h.

171:201 Biostatistical Methods I

4 s.h.

One of these:

171:162 Design and Analysis of Biomedical Studies

3 s.h.

171:202 Biostatistical Methods II

4 s.h.

**FOCUS AREA ELECTIVES**

Students earn a minimum of 3 s.h. from one focus area.

**General (Applicable to More Than One Focus Area)**

06J:269 Meta-Analysis in Behavioral Social Sciences (Ph.D.)

3 s.h.

171:242 Applied Survival and Cohort Data Analysis

3 s.h.

171:266 Statistical Methods in Clinical Trials

3 s.h.

172:183 Qualitative Research for Public Health

3 s.h.

173:210 Writing a Research Protocol

3 s.h.

173:290 Intervention and Clinical Trials

3 s.h.

174:221 Evaluation and Outcomes in Health Care

2 s.h.

**Patient-Oriented Research**

031:270 Clinical Research Methods

3 s.h.

142:215 Transcription and Multifunctional Regulation by RNA

1 s.h.

173:236 Nutrition Intervention in Clinical Trials Research

2 s.h.

**Epidemiology and Behavioral Research**

031:263 Psychological Appraisal I

3 s.h.

044:131 Geography of Health

1-3 s.h.

111:204 Principles of Oral Epidemiology

arr.

172:101 Introduction to Health Promotion and Disease Prevention

3 s.h.

172:150 Health Behavior and Health Education

3 s.h.

173:150 Introduction to Clinical Epidemiology

2 s.h.

173:225 Genetics and Epidemiology

4 s.h.

173:235 Nutritional Epidemiology

2 s.h.

173:240 Epidemiology II: Advanced Methods

4 s.h.

173:251 Injury Epidemiology

3 s.h.

173:253 Epidemiology of Occupational Injuries

3 s.h.

173:255 Epidemiology of Infectious Diseases

3 s.h.

173:256 Hospital Epidemiology

2 s.h.

173:260 Epidemiology of Chronic Diseases

3 s.h.

173:261 Epidemiology of Aging

1-2 s.h.

173:262 Neuroepidemiology

2 s.h.

173:263 Epidemiology of Reproductive Diseases

2 s.h.

173:265 Cardiovascular Disease Epidemiology

3 s.h.

173:267 Psychiatric Epidemiology	3 s.h.
173:270 Cancer Epidemiology and Control	3 s.h.
173:291 Pharmacoepidemiology	3 s.h.

#### Outcomes and Health Services Research

06J:270 Methods for Field Research (Ph.D.)	2 s.h.
07B:222 Introduction to Policy Analysis and Evaluation	3 s.h.
07P:165 Introduction to Program and Project Evaluation	3 s.h.
07P:265 Program Evaluation	3 s.h.
050:283 Health Informatics I (or II)	3 s.h.
172:181 Evaluation I: Theory and Applications	3 s.h.
172:282 Evaluation II: Design and Methods	3 s.h.
173:276 Health Care Utilization Outcomes	3 s.h.
173:280 Introduction to Health Care Organization and Policy	3 s.h.
174:204 Quantitative Management in Health Care	2-3 s.h.
174:212 Health Economics I	3 s.h.
174:228 Cost Effectiveness and Decision Analysis	3 s.h.
174:261 Analytic Issues in Health Services Research I	3 s.h.
174:268 Health Care Utilization Outcomes	3 s.h.

#### M.P.H. Subtrack

The Department of Epidemiology offers the epidemiology subtrack for the Master of Public Health. The subtrack focuses on fundamental concepts and methods and provides training in the use of data and methods for disease assessment and for evaluation of programs and interventions. Graduates of the program work in public health departments and other health care settings. See Master of Public Health Program in the Catalog.

#### Doctor of Philosophy

The Doctor of Philosophy in epidemiology requires a minimum of 75 s.h. of graduate credit. The program prepares graduate students for careers as scientists, teachers, and practitioners of epidemiologic methods. Employment opportunities exist in academic institutions; local, state, and federal health agencies; and in commercial enterprises.

Graduate students in epidemiology must maintain a g.p.a. of at least 3.00. Those who receive a grade of C on 7 s.h. of course work may be dismissed from the program.

All doctoral students must successfully complete a qualifying examination, a comprehensive examination, and a dissertation—a substantial scholarly treatise. The research topic and content, which vary depending on the program of study, must be approved by the student's dissertation committee. Other degree requirements include approved electives chosen from Department of Epidemiology courses and other University of Iowa courses.

Students are required to attend 80 percent, for three semesters, of all Department of Epidemiology seminar meetings and journal club meetings. They also must present one scientific poster at an international, national, regional, state, University, or departmental level before they may graduate.

The 75 s.h. of graduate credit for the Ph.D. includes 39-41 s.h. in the required core, 23-25 s.h. of electives, and a dissertation, as follows.

#### CORE COURSES

All of these:

171:161 Introduction to Biostatistics	3 s.h.
171:162 Design and Analysis of Biomedical Studies	3 s.h.
171:164 Research Data Management	3 s.h.
171:241 Applied Categorical Data Analysis	3 s.h.
171:242 Applied Survival and Cohort Data Analysis	3 s.h.
173:140 Epidemiology I: Principles (web-based course cannot be used)	3 s.h.
173:160 Introduction to Epidemiology Data Analysis With Computers	2 s.h.
173:205 Research in Epidemiology	3 s.h.
173:210 Writing a Research Protocol	3 s.h.

173:240 Epidemiology II: Advanced Methods	4 s.h.
173:340 Epidemiology III: Theories	3 s.h.

One of these:

069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
069:270 Pathogenesis of Major Human Diseases	3 s.h.

One of these:

027:130 Human Physiology	3 s.h.
072:153 Graduate Physiology	4 s.h.

Ph.D. students also must earn 3 s.h. in epidemiology courses outside their emphasis area.

## **ELECTIVES**

Students must complete a total of 23-25 s.h. of elective course work. They must earn 3 s.h. in a Department of Epidemiology course (prefix 173) outside their emphasis area and at least 20 s.h. in courses in their emphasis area. Course selection must be approved by the student's advisor and Ph.D. plan of study committee.

## **DISSERTATION**

All doctoral students must successfully complete a Ph.D. thesis.

173:300 Thesis/Dissertation	10-18 s.h.
-----------------------------	------------

## **Admission**

### **M.S. and Ph.D. in Epidemiology**

The epidemiology faculty considers several factors when evaluating applications for admission, including GRE scores, grade-point average, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All M.S. program applicants must hold a baccalaureate degree and have a cumulative g.p.a. of at least 3.00. Undergraduate preparation must include two semesters of biological sciences, and mathematics through algebra.

Ph.D. program applicants must hold a baccalaureate degree (an M.S. or M.P.H. usually is required), and must have a cumulative g.p.a. of at least 3.00. Courses in the biological, physical, and mathematical sciences provide important background; one semester of calculus and two semesters of biological sciences are highly recommended. Computing skills also are desirable.

All applicants to the M.S. or Ph.D. program must have taken the Graduate Record Examination (GRE) General Test.

Applicants whose first language is not English and who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants who score 550-599 (paper-based), 213-249 (computer-based), or 81-99 (Internet-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission. In place of TOEFL scores, the department accepts International English Testing System (IELTS) scores of 7.0 or higher, with no subscore below 6.0.

All M.S. and Ph.D. applicants and students are required to have strong written and oral communication skills.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Application deadlines for fall entrance to the M.S. in epidemiology are July 1 for U.S. citizens, April 15 for international applicants. Application deadlines for spring entrance are April 15 for U.S. citizens, March 1 for international applicants.

Application deadline for fall entrance to the Ph.D. in epidemiology is April 1. Application deadline for spring entrance (not encouraged) is October 1.

### **M.S. in Clinical Investigation**

Applicants to the M.S. program in clinical investigation must hold a doctoral-level degree in a clinical discipline (e.g., M.D., D.O., D.D.S., Ph.D., Pharm.D., D.V.M) or be enrolled in the Medical Scientist Training Program (Carver College of Medicine). They must hold a baccalaureate degree with a cumulative g.p.a. of at least 3.00; foreign-trained applicants must have an outstanding doctoral training record.

All applicants must have taken the Graduate Record Examination (GRE), Medical College Admission Test (MCAT), or Dental Admission Test (DAT). Applicants whose first language is not English and who do not hold a degree from an accredited English-speaking college or university must have taken the Test of English as a Foreign Language (TOEFL).

Applicants are considered based on their credentials, prior training, and research training plans. An applicant with deficiencies in one area may be admitted if all other components of his or her application are strong.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

The M.S. in clinical investigation accepts students only for summer entrance. Application deadlines are April 15 for U.S. citizens, March 1 for international applicants.

## Financial Support

A limited number of graduate research assistantships are available for advanced M.S. and Ph.D. students; for information, consult the department. For information on financing education through jobs, grants, and loans, contact the Office of Student Financial Aid.

Opportunities for funded predoctoral fellowships are available. Funded positions sponsored by federal agencies are available only to U.S. citizens.

## Resources

Department of Epidemiology resources and activities include the State Health Registries of Iowa, the Preventive Intervention Center, the Lipid Research Clinic, the Health Effectiveness Research Center, the Center for Emerging Infectious Diseases, and the Nutrition Center.

The State Health Registries of Iowa, which encompasses the Iowa Cancer Registry and the Iowa Registry for Congenital and Inherited Disorders, works in cooperation with the Iowa Department of Public Health to collect medical data on Iowans. It is one of 10 registries nationwide that report data to the National Cancer Institute.

The Preventive Intervention Center conducts population-based intervention trials to prevent occurrence and recurrence of disease and to promote wellness, with a focus on the elderly. The Lipid Research Clinic specializes in research promoting prevention of cardiovascular disease and provides an interdisciplinary approach to risk factor interventions. The Healthcare Effectiveness Research Center is a collaborative research enterprise with the College of Pharmacy that studies whether particular health care treatments or services are over- or underutilized. The Center for Emerging Infectious Diseases employs epidemiological methods, laboratory technologies, and clinical evaluations to achieve a better understanding of emerging infectious diseases. The Nutrition Center provides expertise in nutrition and dietary assessment, dietary interventions, and nutrition lifestyle change strategies.

## Epidemiology Courses

### **173:099 Evidence-Based Public Health Methods** 3 s.h.

How to choose, conduct, and evaluate evidence-based programs and policies in public health; finding and using scientific evidence, implementing and evaluating interventions that produce new evidence. Offered summer sessions. Requirements: Certificate in Public Health enrollment.

### **173:111 International Health** 3 s.h.

Urgent health problems in the developing world and among disadvantaged populations in developed countries; biological, social, cultural, political aspects of international health problems; applications of research methods from epidemiology, environmental health, social sciences. Same as 152:111, 175:111.

### **173:120 Principles of Public Health Informatics** 3 s.h.

Systematic applications of information science, computer science, and technology to public health practice, research, and learning; methods of disease surveillance, data collection, analysis, and reporting with health informatics.

### **173:130 Food Safety** 3 s.h.

Current issues and concepts of food safety in the United States, from plant to table; foodborne illness from microbial agents, food toxins, adulterants; disease investigation, risk analysis, risk mitigation, prevention.

### **173:132 Exotic and Emerging Diseases of Animals** 1 s.h.

Major exotic and emerging animal diseases; veterinarian's role in recognizing and diagnosing such diseases; how outbreaks affect economies and veterinary medicine; public health concerns; responding agencies and their roles in control and eradication.

**173:140 Epidemiology I: Principles**

3 s.h.

Epidemiological concepts and methods; design of descriptive and analytic studies, such as aggregate, case series, cross-sectional, case-control, cohort studies, clinical trials; application of epidemiology to public health practice; communication and dissemination of epidemiological findings.

**173:145 Public Health Data**

2 s.h.

Concepts and methods of obtaining and using public health data in community settings; how public health data are used for epidemiologic investigations and prevention programs. Offered spring semesters. Corequisites: 171:161 and 173:140, if not taken as prerequisites.

**173:147 Applied Veterinary Epidemiology/Biostatistics**

3 s.h.

Epidemiology and biostatistics applied to veterinary public health; outbreak investigations, surveillance, analyzing and evaluating diagnostic tests, translation methodology, risk assessment, data analysis software programs. Prerequisites: 171:161 and 173:140.

**173:150 Introduction to Clinical Epidemiology**

2-3 s.h.

Epidemiologic applications and methods used in clinical settings to evaluate clinical medicine and other health profession disciplines, including health measurement, health outcome determination, diagnostic process, risk assessment and communication, prognosis, study design, patient surveys, clinical trials, decision analysis and meta-analysis, health services research. Offered fall semesters. Corequisites: 171:161 and 173:140, if not taken as prerequisites.

**173:152 Clinical Research Career Development**

1 s.h.

Practical skills of clinical research; grant development and management, data management, communication of research findings, and academic career development. Offered summer sessions.

**173:153 Surveillance Internship: IRCID**

2 s.h.

Experience in the Iowa Registry for Congenital and Inherited Disorders; active, population-based surveillance for selected congenital and inherited disorders. Prerequisites: 173:140, 173:160, and 173:240.

**173:154 Cancer Registration Internship**

2 s.h.

Sources of data necessary for operation of a population-based cancer registry; potential uses of the data; methods and personnel required for collecting, editing, storing, reporting, and assuring quality of data. Prerequisites: 173:140.

**173:155 Diagnostic Microbiology for Epidemiology**

3 s.h.

Introduction to microbiological culture, antigen detection, immunological and molecular amplification laboratory techniques for bacteria, viruses, parasites, fungi. Offered spring semesters. Prerequisites: 061:103 or 061:112 or 061:157 or 061:164.

**173:156 Introduction to Molecular Epidemiology**

3 s.h.

Introduction to basic techniques of molecular biology (DNA, RNA, protein techniques) and their use in epidemiological research (e.g., diagnosis of disease, biomarker discovery and validation). Corequisites: 173:140, if not taken as a prerequisite.

**173:157 Zoonotic Diseases**

2-3 s.h.

Introduction to the epidemiology and control of zoonotic diseases; zoonoses endemic to the midwestern United States. Offered summer sessions. Prerequisites: 061:103 or 061:112 or 061:157 or 061:164 or 173:155 or 173:255.

**173:158 Public Health Laboratory Techniques**

1 s.h.

Common laboratory techniques in emerging infectious respiratory disease research and epidemiologic surveillance laboratories; emphasis on techniques for culturing, characterization, and serological surveillance of exposure to influenza viruses. Requirements: completion of online Basic Biological Safety and Blood-borne Pathogens courses; completed certificates must be brought to class.

**173:159 Applied Infectious Disease Epidemiology**

2 s.h.

Introduction to infectious disease surveillance, diagnostic tools, outbreak investigations, vaccine trials, public health interventions, biodefense, emerging infectious diseases, and analytical approaches pertaining to infectious disease prevention and control; emphasis on respiratory viral diseases. Duplicates 173:255.

**173:160 Introduction to Epidemiology Data Analysis With Computers** 2 s.h.  
Organization, collection, management, and analysis of epidemiological data using computer programs. Offered fall semesters. Corequisites: 171:161 and 173:140, if not taken as prerequisites.

**173:161 Patient-Oriented Research Data Analysis** 3 s.h.

**173:163 Seminar in Clinical and Translational Research** 1 s.h.  
Presentation of ongoing clinical research projects, grant applications, and methodological articles, with emphasis on works in progress.

**173:170 Injury and Violence Prevention** 3 s.h.  
Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as 175:170.

**173:175 Research Methods in Disaster Studies** 3 s.h.  
Epidemiologic study of disasters and their health consequences; research to identify and reduce health effects, research in context of response and preparedness. Same as 175:175.

**173:190 Problems and Special Topics in Epidemiology** arr.  
Didactic material in epidemiology; may include tutorial, seminar, faculty-directed independent work (e.g. literature search, project, short research project).

**173:195 Preceptorship in Epidemiology** arr.  
Quantitative research-oriented project performed with a preceptor; preparation of prospectus, presentation of research results in a publication-quality report and a scientific poster session.

**173:199 Practicing Evidence-Based Public Health** 3 s.h.  
How epidemiologic and other scientific studies underlie public health practice; relationship between evidence and action; controversies at interface of science and policy. Offered spring semesters.

**173:200 Independent Study in Epidemiology** arr.  
In-depth pursuit of an area of special interest in epidemiology requiring substantial creativity and independence. Repeatable.

**173:205 Research in Epidemiology** arr.  
Research that may lead to a dissertation. Repeatable.

**173:207 Social Epidemiology** 3 s.h.  
Introduction with global focus and emphasis on methodological issues, including definition/measurement of social constructs, appropriate research designs, analytic approaches. Prerequisites: 173:140 and 171:161.

**173:208 Conducting Literature Syntheses** 1 s.h.  
Opportunity to develop skills for conducting literature searches and writing literature summaries or reviews, for grant or thesis background sections. Prerequisites: 171:161 and 173:140. Recommendations: 173:160 or Hardin Library Reference Works course.

**173:209 Behavioral Epidemiology** 3 s.h.  
Behavioral epidemiology, including diet, exercise, smoking, social support; use of design and measurement concepts and problem-solving skills in research, including focus groups, cognitive interviewing, and pilot studies that use qualitative methods to design quantitative questions regarding behavior. Prerequisites: 171:161 and 173:140.

**173:210 Writing a Research Protocol** 3 s.h.  
Small group projects to develop research protocols using epidemiological study designs; presentation and defense of proposals before faculty site visitors. Offered fall semesters. Prerequisites: 171:161, 173:140, and 173:240.

- 173:211 Grant Writing for Clinical Investigators** 1 s.h.  
Development of skills for writing effective, scientifically sound applications for external research grants; for students who have completed the literature review section for their topic. Prerequisites: 171:161 and 173:140.
- 173:215 Writing for Medical Journals** 1 s.h.  
Skill development in writing medical journal articles for publication.
- 173:220 Environmental and Occupational Epidemiology** 3 s.h.  
Environmental and occupational epidemiologic study designs; basic and novel methods of exposure assessment; methodologies to improve study validity. Prerequisites: 173:140. Corequisites: 171:161 and 175:197. Same as 175:220.
- 173:225 Genetics and Epidemiology** 4 s.h.  
Basic human genetic and population genetics principles; methods of integrating genetic principles into epidemiological studies; analytical methods for case control and family data. Prerequisites: 171:161 and 173:140.
- 173:230 Principles of Dietary Assessment** 1 s.h.  
Overview of current dietary assessment methods; evaluation of dietary records, dietary recall, food frequency questionnaires, brief dietary scanners, nutrient database, nutrient intakes standards. Offered spring semesters. Requirements: 3 s.h. of college nutrition courses.
- 173:233 Evidence-Based Nutrition Policy** 3 s.h.  
Concepts and methods used in setting public health nutrition policy; evidence-based aspects of nutrition policy formation in public health settings; evaluation of nutritional public health policy implementation. Offered summer sessions.
- 173:235 Nutritional Epidemiology** 2 s.h.  
Application of epidemiology study designs to nutrition variables and chronic disease; analysis of nutrition epidemiology studies; research protocol design. Offered spring semesters. Recommendations: a basic nutrition course.
- 173:236 Nutrition Intervention in Clinical Trials Research** 2 s.h.  
Nutrition interventions in clinical trials; disease related to nutrition variables; research that links effects of diet on chronic diseases. Offered fall semesters. Recommendations: a basic nutrition course.
- 173:237 Nutrition Intervention in Research Lab** 3 s.h.  
Development, demonstration of group counseling skills in ongoing nutrition research projects at The University of Iowa. Offered fall semesters. Corequisites: 173:236, if not taken as a prerequisite.
- 173:240 Epidemiology II: Advanced Methods** 4 s.h.  
Epidemiologic study design and analysis; bias, confounding, effect modification; case-control studies; cohort studies; field methods; measurement principles; exposure and disease classification; acute and chronic disease examples. Offered spring semesters. Prerequisites: 171:161, 173:140, and 173:160.
- 173:241 Statistical Methods in Epidemiology** 3 s.h.  
Overview of methods to analyze data from epidemiologic investigations; estimation of relative measures of risk, attributable risk, stratified analysis, model-fitting approaches using logistic and Poisson regression analysis; confounding and effect modification; analysis of epidemiologic data sets. Prerequisites: 171:161 and 171:162.
- 173:245 Epidemiology of Physical Activity** 3 s.h.  
Physical activity/disease relationships examined through application of epidemiologic methods, including research design, interpretation of studies, selection of measures to fit research questions. Same as 027:249.
- 173:251 Injury Epidemiology** 3 s.h.  
How epidemiology can be applied to injury prevention and control: epidemiology literature, specific methodological problems involved in the epidemiology of injuries, critical evaluation of research articles. Offered spring semesters of odd years. Prerequisites: 173:140. Same as 175:251.
- 173:253 Epidemiology of Occupational Injuries** 3 s.h.  
Epidemiological literature on occupational injuries and their prevention; focus on research methods. Offered spring semesters of even years. Prerequisites: 173:140. Same as 175:253.

- 173:255 Epidemiology of Infectious Diseases** 3 s.h.  
Underlying epidemiological concepts of infection disease, including causation and surveillance; prevention and control; case studies. Offered fall semesters. Prerequisites: 173:140. Same as 152:257.
- 173:256 Hospital Epidemiology** 2 s.h.  
Health care-associated infections; surveillance, investigative methods, resistant organisms, molecular epidemiology; methods for preventing spread of pathogens, including isolation precautions; environmental issues, construction, sterilization; interactive exercises. Prerequisites: 173:140.
- 173:257 Infectious Causes of Chronic Disease** 3 s.h.  
Evidence linking various infectious agents with the development of different types of chronic disease. Offered even years. Corequisites: 173:140, if not taken as a prerequisite.
- 173:260 Epidemiology of Chronic Diseases** 3 s.h.  
Chronic disease epidemiology; survey of leading chronic diseases, including measurement of disease, lifestyle, nutrition, occupation, family history. Offered spring semesters. Prerequisites: 173:140.
- 173:261 Epidemiology of Aging** 1-2 s.h.  
Epidemiologic methods for studying health and social problems of older persons; applications including research and public health practice and policy. Offered spring semesters. Prerequisites: 173:140. Same as 153:261.
- 173:262 Neuroepidemiology** 2 s.h.  
Basic epidemiologic concepts of neurologic disease; concepts, methods, examples of neuroepidemiology; varied diseases, methods. Prerequisites: 173:140 and 173:160.
- 173:263 Epidemiology of Reproductive Diseases** 2 s.h.  
Evaluation of methodological issues and current findings for reproductive diseases and conditions; etiological mechanisms, including behavioral and genetic. Offered fall semesters of odd years. Prerequisites: 173:140.
- 173:264 Epidemiology of Maternal and Infant Health** 2 s.h.  
Overview of maternal and infant epidemiologic and methodologic issues; prevalence and trends; risk factors; data sources, including limitations and availability; relevant measurement issues; directions for future research. Prerequisites: 171:161 and 173:140.
- 173:265 Cardiovascular Disease Epidemiology** 3 s.h.  
Natural history of atherosclerotic disease in humans and risk factors affecting its development; atherosclerotic disease by age, sex, and in varied populations worldwide; recent guidelines and clinical trials to delay onset, reduce incidence, improve outcome of cardiovascular disease. Offered fall semesters of odd years. Prerequisites: 171:161 and 173:140.
- 173:267 Psychiatric Epidemiology** 3 s.h.  
Population-based studies of psychiatric disorders and associated etiologic tools; diagnostic criteria used in psychiatric research, common structured interviews and rating scales; recent research relevant to common psychiatric disorders; experience writing a research idea using NIH PHS grant form. Offered spring semesters. Prerequisites: 173:140. Recommendations: 173:240 or two years of resident training in psychiatry. Same as 073:255.
- 173:270 Cancer Epidemiology and Control** 3 s.h.  
Incidence, mortality, survival; risk factors, cancer control options for major cancer sites; principles and methods of cancer registration; research examples by type of study design. Offered spring semesters of even years. Prerequisites: 069:133, 171:161, and 173:140.
- 173:272 Cancer Molecular Epidemiology Seminar** 2 s.h.  
Basic tumor biology and lab-based methods applied to development of translational approaches to prevention, early diagnosis, and treatment of human cancers. Offered fall semesters of even years. Same as 069:272.
- 173:276 Health Care Utilization Outcomes** 3 s.h.  
Research tools to assess changes in health care use and cost as outcomes of treatment; theories of health outcomes; analysis of hospital discharge data sets. Requirements: knowledge of SAS or SPSS. Same as 174:268.
- 173:280 Introduction to Health Care Organization and Policy** 3 s.h.

Organization of U.S. health care system, health policies that shape its development; historical, socioeconomic, political, environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy concepts, and terminology, including health determinants, access to care, system integration, policy development, federalism. Same as 174:200.

**173:290 Intervention and Clinical Trials**

3 s.h.

Methodologic introduction to rationale, design, conduct, analysis, and presentation of clinical trials; basics of clinical trial design, variety of designs, examples from clinical trials; biostatistical methods, including sample size determination. Offered fall semesters. Prerequisites: 171:161 and 173:140.

**173:291 Pharmacoepidemiology**

3 s.h.

Drug approval process, methods for identification and attribution of adverse drug events, current understanding of the epidemiology of adverse drug events; study designs, data sources for pharmacoepidemiology, pharmacoeconomics. Offered fall semesters of even years. Prerequisites: 173:140.

**173:295 Clinical Research Ethics**

2-3 s.h.

Ethical and regulatory aspects of clinical research; historical background, current regulations, Institutional Review Board requirements related to human subjects protection issues. Requirements: K30 training grant or enrollment in degree program with clinical research project.

**173:300 Thesis/Dissertation**

arr.

Repeatable.

**173:320 Teaching in Epidemiology**

3 s.h.

Teaching methods in epidemiology; guided practicum experience in teaching epidemiology, in preparation for academic careers. Prerequisites: 173:140, 173:160, and 173:240.

**173:340 Epidemiology III: Theories**

3 s.h.

How epidemiology fits into the wider context of scientific inquiry. Offered fall semesters of odd years. Prerequisites: 171:241, 173:140, and 173:240.

## Health Management and Policy

**Head:** Keith J. Mueller

**Professors:** Kathleen Buckwalter (Nursing/Law/Psychiatry/Internal Medicine), Susan J. Curry, Franklin Dexter (Anesthesiology), Josephine Gittler (Law/Pediatrics/Nursing), Dennis Harper (Teaching and Learning/Rehabilitation and Counselor Education/Pediatrics), Charles Helms (Internal Medicine), Diane Huber (Nursing), Michael Kienzie (Medicine/Nursing), Samuel Levey (Distinguished Professor in Health Management and Policy), Keith J. Mueller (Gerhard Hartman Professor), Gary E. Rosenthal (Internal Medicine/Epidemiology), Gerard Rushton (Geography), Marcia M. Ward, Fredric D. Wolinsky (John W. Colloton Chair/Internal Medicine/)

**Professors emeriti:** Barry Greene, Larry D. Prybil

**Professor (clinical):** Christopher Atchison (Nursing)

**Adjunct professors:** William W. Hesson, Donna Katen-Bahensky, John H. Staley

**Associate professors:** Rachel L. Anderson (Nursing), John Brooks (Pharmacy/Epidemiology), Brian Kaskie, Thomas E. Vaughn (Nursing)

**Associate professor (clinical):** Tanya Uden-Holman (Nursing)

**Adjunct associate professors:** James Bahensky, Douglas Beardsley, Thomas Evans, Kenneth Fisher, Ian Montgomery, William D. Petasnick, Peter Roberts

**Adjunct associate professors (clinical):** Michelle Robnett (Nursing), Peter Wallace

**Assistant professors:** Jason Hockenberry, George Wehby

**Assistant professor (clinical):** Mary Charlton

**Adjunct assistant professors:** Lee Carmen, Shane Cerone, Thomas Clancy (Nursing), Mark Moser, Brian White, Ralph Wilmoth

**Adjunct instructor:** Thomas Persoon (Industrial Engineering)

**Adjunct lecturers:** Timothy Ahlers, Richard C. Breon, Charles E. Brown, Russell Cooner, Eric T. Crowell, Stacey T. Cyphert, Mary L. Hensley, Kenneth Kates, Thomas W. Keel, Christopher Klitgaard, Todd C. Linden, Duncan Moore, David Olson, Ronald R. Reed, Sarabdeep Singh, James H. Skogsbergh, Julie A. Stark Manas, Thomas F. Tibbitts, James A. Tinker, Stephen L. Ummel, John C. Woher

**Graduate degrees:** M.H.A.; Ph.D. in Health Services and Policy

**Web site:** <http://www.public-health.uiowa.edu/hmp>

The Department of Health Management and Policy educates health care professionals to assume leadership roles in an increasingly complex and dynamic health care system. Graduates hold key executive, academic, research, government, and consulting positions in all areas of health management and policy, both in the United States and abroad.

## Graduate Programs

The department offers the Master of Health Administration and a Doctor of Philosophy in health services and policy. It also offers joint degree programs with the Tippie College of Business (M.H.A./M.B.A.), the College of Law (M.H.A./J.D.), and the Graduate College's Urban and Regional Planning Program (M.H.A./M.A. or M.S.); see "Joint M.H.A. Degrees" below.

In addition, the department offers the policy subtrack for the Master of Public Health; see "M.P.H. Subtrack" below.

The department's degree programs rank among the foremost in the field. The M.H.A. is accredited by the Commission on Accreditation of Healthcare Management Education.

### Master of Health Administration

The Master of Health Administration requires 60 s.h. of graduate credit over two academic years of full-time study. The program prepares students for a wide variety of positions in health care management. It is designed to provide a comprehensive understanding of issues encountered by health care delivery organizations, and strong business skills. Graduates are well prepared to advance to senior executive roles in a variety of health care organizations.

Students work with their advisors to create a plan of study that incorporates required and elective course work that supports their career goals in areas such as operations management, managed care, or financial management. Required courses in management, economics, law, managerial finance, and financial accounting focus on health care applications. Students also may take course work in other University of Iowa departments and programs, such as business, urban and regional planning, and aging studies.

During the first year, students are introduced to the social, political, economic, and financial environments of health care organizations. The concepts, tools, and techniques necessary for effective management also are presented. During the second year, courses focus on in-depth health care applications of management concepts that integrate prior course work and develop skills in areas relating to students' special interests and career objectives.

Transfer credit and course waivers may be accepted, but all students are expected to complete a minimum of 54 s.h. at The University of Iowa during their course of study.

### CORE COURSES

06N:215 Corporate Financial Reporting	3 s.h.
06N:225 Managerial Finance	3 s.h.
171:161 Introduction to Biostatistics	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
174:100 Executive Seminar Series	0 s.h.
174:200 Introduction to Health Care Organization and Policy	3 s.h.
174:201 Health Care Management	3 s.h.

174:203 Strategic Planning and Marketing	3 s.h.
174:204 Quantitative Management in Health Care	2 s.h.
174:205 Issues in Health Management and Policy	3 s.h.
174:208 Health Services Information Systems	2 s.h.
174:212 Health Economics I	3 s.h.
174:216 Financial Management of Health Institutions	3 s.h.
174:221 Evaluation and Outcomes in Health Care	2 s.h.
174:223 Seminar in Health Care Ethics	2 s.h.
174:224 Human Resources for Health Organizations	2 s.h.
174:237 Legal Aspects of Health and Medical Care	3 s.h.
174:243 Health Policy	2 s.h.
175:101 Health, Work, and the Environment	3 s.h.

## **ELECTIVES**

Students choose 14 s.h. of elective course work, which must include 8 s.h. in Department of Health Management and Policy courses.

### **Summer Internships, Fellowships, Residencies**

The department facilitates placement of M.H.A. students in required summer internships between the first and second years of study. Internships offer opportunities for practical experience interacting with executives in a health care setting. Internships are full-time positions that usually last 10-12 weeks and may carry up to 3 s.h. of credit. Students normally receive a salary or stipend, and in some cases, assistance with living arrangements.

Most M.H.A. students complement their academic training with a postgraduate fellowship or residency. Such experiences provide opportunities to observe, develop, and demonstrate management skills and to develop connections with colleagues. The department takes an active role in helping students identify and secure fellowship and residency positions.

### **Joint M.H.A. Degrees**

The Department of Health Management and Policy offers joint degree programs with the Tippie College of Business, the College of Law, and the Department of Urban and Regional Planning. Students who wish to pursue an integrated program combining an M.H.A. with a master's or professional degree in another field should discuss their plans with both academic units and indicate their interest when they apply to the M.H.A. program.

#### **Joint M.H.A./M.B.A.**

Students interested in combining the traditional strengths of health management and policy with additional management course work may pursue the joint master's degree program with the Tippie College of Business.

This combination leads to a Master of Health Administration (M.H.A.) in health management and policy and a Master of Business Administration (M.B.A.). It requires 75 s.h. of graduate credit and normally is completed in two and a half to three years. Separate admission to each degree program is required. For information about the M.B.A., see Master of Business Administration Program in the Catalog.

#### **Joint M.H.A./J.D.**

The joint program with the College of Law is highly individualized, allowing students to gain training in both health care management and law.

The program leads to a Master of Health Administration (M.H.A.) in health management and policy and the Juris Doctor (J.D.). It requires a minimum of 126 s.h. of postbaccalaureate credit and usually takes four years to complete. Separate admission to each degree program is required. Students register only for law courses during their first year. For information about the J.D., see Juris Doctor in the Catalog.

#### **Joint M.H.A./M.A. in Urban and Regional Planning**

Students interested in developing special expertise in community and health planning may pursue a joint master's degree with the Graduate College's Urban and Regional Planning Program. They prepare to develop public policy alternatives that help improve the quality of life in cities and throughout regions.

The joint program leads to a Master of Health Administration (M.H.A.) in health management and policy and a Master of Arts or Master of Science in urban and regional planning. It requires 76 s.h. of graduate credit and can be completed in three years. Separate admission to each degree program is required. See Urban and Regional Planning in the Catalog.

## M.P.H. Subtrack

The Department of Health Management and Policy offers the policy subtrack for the Master of Public Health. The subtrack prepares individuals for careers in health policy analysis, system and organizational planning, and program evaluation. Graduates find positions in federal, state, and local government as well as in professional associations and private agencies. See Master of Public Health Program in the Catalog.

## Doctor of Philosophy

The Doctor of Philosophy in health services and policy requires a minimum of 77 s.h. of graduate credit, which may include up to 30 s.h. earned for a master's degree. The program, established in 1950, was the nation's first doctoral program in health care management. It prepares students for careers in health services research, education, and policy leadership in universities, government agencies, and health organizations.

The program is oriented toward applied, interdisciplinary research. Students develop mastery of theories and research methodologies necessary to study the complex American health system. Students work closely with faculty mentors on research projects and develop research design and methodology skills through course work and an apprenticeship model of training.

The program's faculty members are committed to interdisciplinary scholarly inquiry and research. Individual plans of study allow students to prepare for specific careers, and small class size encourages frequent student-faculty interaction, including participation in research projects as well as scholarly publications.

### CORE COURSES

Ph.D. students take course work in core content areas covering health care systems, health economics, health outcomes, and health policy. Courses in research design and statistical analysis are required. Credit may be awarded for guided and independent research project work. Students may waive specific courses, depending on their background.

173:140 Epidemiology I: Principles	3 s.h.
171:161 Introduction to Biostatistics	3 s.h.
171:162 Design and Analysis of Biomedical Studies	3 s.h.
171:174 Introductory Longitudinal Data Analysis	3 s.h.
174:200 Introduction to Health Care Organization and Policy	3 s.h.
174:212 Health Economics I	3 s.h.
174:213 Health Economics II	3 s.h.
174:217 Health Insurance and Managed Care	3 s.h.
174:221 Evaluation and Outcomes in Health Care	2 s.h.
174:242 Federalism and Health Policy	3 s.h.
174:243 Health Policy	3 s.h.
174:245 Seminar in Health Policy	3 s.h.
174:252 Organizational Behavior and Theory in Health Care	3 s.h.
174:255 Seminar in Contemporary Health Issues (two semesters)	0 s.h.
174:257 Ph.D. Guided Research	3 s.h.
174:259 Design Issues in Health Service Research	3 s.h.
174:260 Ph.D. Independent Research	3 s.h.
174:261 Analytic Issues in Health Services Research I	3 s.h.
174:262 Analytic Issues in Health Services Research II	3 s.h.
174:268 Health Care Utilization Outcomes	3 s.h.
174:270 Seminar in Health Research and Instruction	3 s.h.
174:285 Ph.D. Dissertation	8-15 s.h.
650:270 Principles of Scholarly Integrity	1 s.h.

### EXAMINATIONS

All Ph.D. students must pass a preliminary examination that tests the student's mastery of core material covered during the first year in the department, including American health systems and health services research methods.

Students take the comprehensive examination at or near the end of their formal course work. The comprehensive exam focuses on the student's specific area of research and theoretical interest.

### DISSERTATION

Doctoral candidates prepare dissertations based on original research that tests, extends, or applies concepts or principles to a problem in health care. Students may choose to complete a traditional dissertation or may complete a dissertation based on three publishable papers.

## **Admission**

Applicants to the M.H.A. program must hold a bachelor's degree from an accredited college or university. No specific undergraduate major is required, but prospective applicants are strongly advised to complete introductory courses in accounting, economics, and statistics and to gain facility in using spreadsheet and presentation software. A cumulative g.p.a. of at least 3.00 is expected. M.H.A. program applicants must submit scores on the Graduate Record Exam (GRE) General Test (a combined verbal and quantitative score of 1100 or above is preferred) or the Graduate Management Admission Test (a score of 600 or above is preferred); official MCAT, VAT, LSAT, or DAT scores are accepted in place of GRE or GMAT scores. Previous work experience in health care is desirable.

Applicants to the Ph.D. program must have a bachelor's or master's degree. Experience in health care and a master's degree in health administration, public health, or health planning are excellent preparation for the program. A graduate degree in social science, management, economics, or law is acceptable, depending on the applicant's background and career goals. A cumulative g.p.a. of at least 3.25 is usually required. All Ph.D. applicants must submit GRE scores (a combined verbal and quantitative score of 1100 or above is preferred).

All applicants must submit academic transcripts, a resume, three letters of recommendation, and a statement of objectives form (contact the Department of Health Management and Policy).

Applicants whose first language is not English and who do not hold a baccalaureate or more advanced degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants who score 550-599 (paper-based), 213-249 (computer-based), or 81-99 (Internet-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Students begin the program in fall semester. Campus visits are encouraged, and personal interviews are required before admission. The admissions committee conducts telephone interviews with applicants unable to interview on campus.

## **Financial Support**

A variety of financial assistance is available, including scholarships and awards, student loans, and research assistantships. Every effort is made to provide financial support to students who demonstrate need and maintain satisfactory academic standards. Some awards are offered in recognition of outstanding scholarship and experience, regardless of need.

Research assistantships generally are awarded on the basis of student merit and the department's need. Assistantships afford valuable experience in health services research and management projects. Research assistants work 10-20 hours per week and must apply for reappointment each year. Research assistantships provide a stipend and some tuition assistance and entitle students to resident tuition.

Opportunities also exist for part-time employment both on and off campus. For information and financial aid application forms, contact the Office of Student Financial Aid.

## **Resources**

The Center for Health Policy and Research is the research arm of the Department of Health Management and Policy and a University-wide interdisciplinary research facility. The center collaborates with health provider associations, policy and planning groups, insurance organizations, health delivery institutions, and other members of the health services research community. It also sponsors educational activities, including weekly seminars.

Department of Health Management and Policy faculty members are involved in a wide range of research topics and methodologies and have research grants and contracts of \$7 million in the center. This large research portfolio provides excellent training opportunities for students.

## **Alumni Relations**

An active alumni association with more than 1,000 members supports the program in a number of ways, including

scholarships, consultation on curriculum, continuing education, research, and fund development. Alumni serve as visiting faculty, consultants, mentors, and preceptors for summer internships, residencies, and fellowships. The alumni association also provides a network for graduates entering the profession.

Graduates maintain their Iowa connection and learn about news of their classmates, the department, and faculty members and students through the *Alumni Newsletter*.

The Department of Health Management and Policy and its alumni association jointly sponsor the Annual Iowa Healthcare Executive Symposium each fall. Renowned speakers from across the country present a variety of symposium topics. Health care leaders, alumni, educators, students, and friends of the department attend the symposium, which offers students a high quality educational experience in addition to the opportunity to network with faculty and alumni.

## Health Management and Policy Courses

- 174:100 Executive Seminar Series** 0 s.h.  
Issues in the health care industry; presentations by executives from health care fields including academic health centers, multihospital systems, government agencies, community hospitals, and health insurance industry.
- 174:102 Introduction to the U.S. Health Care System** 3 s.h.  
The U.S. health care system; socioeconomic, political, and environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy, concepts, terminology. Same as 06J:159.
- 174:144 Medicare and Medicaid Policy** 3 s.h.  
Health policies most pertinent to Americans over age of 65. Same as 153:144.
- 174:200 Introduction to Health Care Organization and Policy** 3 s.h.  
Organization of U.S. health care system, health policies that shape its development; historical, socioeconomic, political, environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy concepts, and terminology, including health determinants, access to care, system integration, policy development, federalism. Same as 173:280.
- 174:201 Health Care Management** 3 s.h.  
Application of basic management principles such as leadership, goal setting, decision making, human resource management, to health care organizations.
- 174:202 Hospital Organization and Management** 2-3 s.h.  
Role of hospitals, governance, organizational structure, medical staff organization, departmental operations. Prerequisites: 174:200 and 174:201.
- 174:203 Strategic Planning and Marketing** 3 s.h.  
Strategy in health care including role of mission, vision, values, environmental analysis, strategic alternatives, organizational design, and evaluation of strategic decisions. Prerequisites: 174:201.
- 174:204 Quantitative Management in Health Care** 2-3 s.h.  
Quantitative analysis techniques used by managers in health care settings to assist with planning, decision making, resource allocation.
- 174:205 Issues in Health Management and Policy** 3 s.h.  
Integration and application of theories, concepts, principles; case studies. Prerequisites: 174:201 and 174:203.
- 174:207 Group Practice and Ambulatory Care Administration** 3 s.h.  
Delivery of ambulatory health care services, for-profit, and not-for-profit organizations; emphasis on structures, payment mechanism, compensation, effects of managed care, other internal issues. Prerequisites: 174:200, 174:201, and 174:202.
- 174:208 Health Services Information Systems** 2-3 s.h.  
Conceptual, practical aspects of analysis, development, and use of computer-based information systems; emphasis on application to the health sciences environment.

- 174:212 Health Economics I** 3 s.h.  
Microeconomic principles applied to health care, health insurance, information and uncertainty, models of physician and hospital behavior, theory of the firm, market structure, regulation, competitive reform, managed care.
- 174:213 Health Economics II** 3 s.h.  
Economic theory and its application to health behavior, markets for health care and health insurance, public policy related to health. Prerequisites: 174:212.
- 174:216 Financial Management of Health Institutions** 3 s.h.  
Issues in working capital management, capital financing, cost analysis and rate setting, budgeting, reimbursement, managed care contracting and health reform initiatives; emphasis on use of information from accounting, financial management systems.
- 174:217 Health Insurance and Managed Care** 3 s.h.  
History and theory of insurance, comparative health systems, health systems and networks, HMOs, public health insurance, care for uninsured; emphasis on public policy. Prerequisites: 046:263 or 174:212, and 174:200. Same as 152:217.
- 174:218 Topics in Health Administration** 1-3 s.h.  
Topics related to contemporary problems that concern health care students, administrators. Repeatable.
- 174:221 Evaluation and Outcomes in Health Care** 2 s.h.  
Qualitative and quantitative methods for evaluating health care quality, effectiveness; program evaluation, health outcomes, clinical and cost effectiveness, evaluation across health care delivery systems. Prerequisites: 174:102 or 174:200.
- 174:223 Seminar in Health Care Ethics** 1-2 s.h.  
Biomedical and organization ethics in the contemporary health care environment; ethical concepts and principles, ethical issues that confront executive, clinical, and governance leaders in context of complex health organizations.
- 174:224 Human Resources for Health Organizations** 2-3 s.h.  
Overview of human resource management theories and practices for health care organizations; strategic human resource management, equal employment, staffing, training and development, appraisal, compensation. Prerequisite: 174:201.
- 174:225 Decision Modeling and Project Management** 1-3 s.h.  
Basic project management skills to ensure benefits from health care projects; quantitative decision modeling for a scientific approach to decision making.
- 174:226 Health Informatics I** 3 s.h.  
Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as 021:275, 050:283, 051:187, 056:186, 074:191, 096:283, 200:110.
- 174:228 Cost Effectiveness and Decision Analysis** 3 s.h.  
Methods of cost-effectiveness analysis and decision analysis; applications to resource allocation decisions in public health and medicine.
- 174:229 Lean Sigma Principles: Applications in Health Care** 1-3 s.h.  
General lean and six sigma principles (1 s.h.); application to health care situations (3 s.h.); examples from University of Iowa Hospitals and Clinics, other institutions.
- 174:234 Administrative Internship** arr.
- 174:235 Administrative Residency/Fellowship** arr.
- 174:236 Administrative Practicum** 3 s.h.  
Experience with operational and planning matters in a health care setting. Requirements: second-year standing and g.p.a. of at least 3.00 for two consecutive semesters.

- 174:237 Legal Aspects of Health and Medical Care** 3 s.h.  
Statutory, common law frameworks applicable to health care system; court decisions that illustrate applications of general legal doctrines in hospital, health settings.
- 174:242 Federalism and Health Policy** 3 s.h.  
How American government's organization shapes development and implementation of health policy, programs, services.
- 174:243 Health Policy** 1-3 s.h.  
Policy process, policies and programs that shape provision of health care in the United States; health policies such as Medicare, Medicaid, Older Americans Act.
- 174:245 Seminar in Health Policy** 3 s.h.  
Contemporary health policy issues; theoretical and applied perspectives; social justice and health care for vulnerable populations (e.g., mental health, nursing homes); readings, discussion. Prerequisites: 174:243.
- 174:247 Nonprofit Organizational Effectiveness I** 3 s.h.  
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 021:263, 024:247, 028:257, 032:227, 042:247, 06J:247, 091:320, 102:278.
- 174:248 Nonprofit Organizational Effectiveness II** 3 s.h.  
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: (for 091:322) 091:320; (for 174:248) 06J:247 or 024:247 or 174:247. Same as 021:265, 024:248, 028:258, 032:228, 042:248, 06J:248, 091:322, 102:279.
- 174:252 Organizational Behavior and Theory in Health Care** 3 s.h.  
Key concepts of organizational behavior and organizational theory and their application to health care organizations and health services; perspectives from theoretical writings and empirical studies. Requirements: Ph.D. standing and knowledge of human services organizations.

Books, articles, other readings on history of the medical and nursing professions, evolution of the hospital and other key sectors of the health economy; health policy issues and their implications.
- 174:255 Seminar in Contemporary Health Issues** 0 s.h.  
Review of relevant literature on methodological substantive issues in health care, presentations by researchers on health services and policy research.
- 174:257 Ph.D. Guided Research** 1-3 s.h.  
Experience with empirical research, guided by a faculty mentor; structured and supervised research activities.
- 174:259 Design Issues in Health Service Research** 3 s.h.  
Design and causal inference reliability and validity in measurement; rules of evidence; research design for randomized-control trials, observational studies, meta-analysis.
- 174:260 Ph.D. Independent Research** 1-3 s.h.  
Experience in empirical research through one or more substantive research experiences, with faculty mentor; authorship or coauthorship of at least one manuscript suitable for publication in peer review journal. Requirements: Ph.D. in health services and policy and satisfactory completion of Ph.D. preliminary exams.
- 174:261 Analytic Issues in Health Services Research I** 3 s.h.  
Analytic tools used in health services research; focus on applications in nonexperimental research settings, such as analyses using administrative claims data or preexisting public use data sets. Prerequisites: 171:162. Same as 046:261.
- 174:262 Analytic Issues in Health Services Research II** 3 s.h.  
Continuation of 174:261; advanced applications, including panel data and qualitative response models. Prerequisites: 174:261. Same as 046:262.

**174:266 Advanced Case Management: Interdisciplinary Approach**

3 s.h.

Theory, evidence, and strategies for health care coordination and integration examined through analysis of case management and disease management interventions; interdisciplinary approach; leadership for interdisciplinary teamwork; analysis and critique of case and disease management theory and models; synthesis of case and disease management principles as a framework for managing health care outcomes for cost and quality, identification of evidence-based clinical care guidelines; analysis of financial, legal, ethical, and outcomes management components of case and disease management practice. Same as 096:266.

**174:268 Health Care Utilization Outcomes**

3 s.h.

Research tools to assess changes in health care use and cost as outcomes of treatment; theories of health outcomes; analysis of hospital discharge data sets. Requirements: knowledge of SAS or SPSS. Same as 173:276.

**174:270 Seminar in Health Research and Instruction**

1-3 s.h.

Opportunity for Ph.D. students to develop research and teaching skills through presentations, readings, workshops. Requirements: satisfactory completion of Ph.D. preliminary exams.

**174:280 Independent Study and Research**

arr.

Supervised tutorial.

**174:285 Ph.D. Dissertation**

arr.

Research for preparation of dissertation; seminar presentation.

# Master of Public Health Program

**Director:** Mary L. Aquilino  
**Graduate degree:** M.P.H.  
**Web site:** <http://www.public-health.uiowa.edu/mph/>

The Master of Public Health is recognized as the primary professional degree in public health. The objective of Iowa's M.P.H. program is to provide education and practical training in public health to students who will be leaders in their respective communities. The program is appropriate for individuals who already have professional experience and/or training in public health as well as for those whose expertise lies outside of public health.

The M.P.H. is awarded by the University of Iowa Graduate College. Combined degree programs for law, medical, nursing, and pharmacy students are available; see "Joint J.D./M.P.H.," "Joint M.D./M.P.H.," "Joint M.S.N./M.P.H.," and "Joint Pharm.D./M.P.H." in this section of the Catalog. The M.P.H. Program also offers two programs in collaboration with the College of Veterinary Science at Iowa State University; see "M.P.H. for Practicing Veterinarians" and "Joint D.V.M./M.P.H.".

## Master of Public Health

The Master of Public Health requires 42-59 s.h. of graduate credit, depending on the choice of specialization. Students must choose one of seven subtracks: biostatistics, community and behavioral health, epidemiology, ergonomics, health communication, occupational and environmental health, and policy.

Degree requirements include a core course in public health practice and in each of the five core disciplines of public health (epidemiology, biostatistics, environmental health, health administration, and social and behavioral sciences); a practicum; a set of content-specific required courses; and a set of content-specific electives. Students in the epidemiology subtrack and the occupational and environmental health subtrack also must complete a bioscience course. A final written report with oral presentation or a poster presentation related to the practicum constitutes the final examination.

All M.P.H. students complete the course work listed under "Common Requirements." In addition, each student completes the course work listed for his or her chosen subtrack.

### Common Requirements

The following course work is required for all M.P.H. students. Students must earn a B-minus or higher on each core course. Students may repeat courses to achieve this standard.

#### CORE COURSES

All of these (15 s.h.):

170:101 Introduction to Public Health	3 s.h.
171:161 Introduction to Biostatistics (biostatistics subtrack students must substitute 171:201 for 4 s.h.)	3 s.h.
172:101 Introduction to Health Promotion and Disease Prevention	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
175:197 Environmental Health	3 s.h.

One of these (3 s.h.):

174:102 Introduction to the U.S. Health Care System	3 s.h.
174:200 Introduction to Health Care Organization and Policy	3 s.h.

#### PRACTICUM

The practicum is a fieldwork experience in which students show proficiency in applying academic principles in community settings. There are many practicum opportunities for M.P.H. students in Iowa and surrounding states; the college's Institute for Public Health Practice coordinates placements. The practicum is the culmination of the M.P.H. program.

Students must choose an approved topic and complete the six core courses before registering for and beginning the practicum. A final written report with an oral presentation or a poster presentation is required. The practicum constitutes the final examination for the M.P.H.

170:299 M.P.H. Practicum Experience	3 s.h.

## Biostatistics Subtrack

The Master of Public Health with biostatistics subtrack requires 44 s.h. of graduate credit. The subtrack is offered by the Department of Biostatistics (College of Public Health).

The subtrack focuses on application of biostatistical methods to public health and biomedical sciences, and applications of methodology for design and analysis of research investigations in the health sciences. It also provides fundamental training in the public health sciences, core biostatistical theory, and core biostatistical methods vital for health science investigations. Graduates of the program are prepared for work as statistical consultants and data analysts for public health projects.

Applicants to the biostatistics subtrack should have a bachelor's degree or equivalent in the biological, mathematical, or physical sciences. Applicants should have mathematics training in methods and techniques of single variable and multivariable differential and integral calculus, and in linear algebra. They also should be competent in at least one computer language, preferably FORTRAN, Pascal, or C.

Applicants with deficiencies in any of these areas may apply for admission and make up the deficiencies during the first year of graduate study. The following University of Iowa courses provide training at the required level.

22M:025 Calculus I	4 s.h.
22M:026 Calculus II	4 s.h.
22M:027 Introduction to Linear Algebra	4 s.h.
22M:028 Calculus III	4 s.h.

In addition to the M.P.H. course work listed under "Common Requirements" above, the biostatistics subtrack requires the following courses.

### SUBTRACK CORE

All of these (13 s.h.):

22S:153-22S:154 Mathematical Statistics I-II	6 s.h.
171:202 Biostatistical Methods II	4 s.h.
171:241 Applied Categorical Data Analysis	3 s.h.

One of these (3 s.h.):

171:173 Design of Sample Surveys	3 s.h.
171:242 Applied Survival and Cohort Data Analysis	3 s.h.

### ELECTIVES

At least 6 s.h. chosen from these:

22S:138 Bayesian Statistics	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.
22S:255 Linear Models	4 s.h.
171:164 Research Data Management	3 s.h.
171:242 Applied Survival and Cohort Data Analysis	3 s.h.
171:261 Survival Data Analysis	3 s.h.
171:262 Analysis of Categorical Data	3 s.h.
171:264 Longitudinal Data Analysis	3 s.h.
171:266 Statistical Methods in Clinical Trials	3 s.h.
171:271 Advanced Survival Analysis	3 s.h.

## Community and Behavioral Health Subtrack

The Master of Public Health with community and behavioral health subtrack requires 42 s.h. of graduate credit. The subtrack is offered by the Department of Community and Behavioral Health (College of Public Health).

The subtrack prepares public health practitioners for a variety of positions related to community development, health program implementation, and health education. Students learn how to design, implement, and evaluate evidence-based interventions directed toward identified public health problems in populations.

A bachelor's degree in the social and behavioral sciences is good preparation for this program, but students come from a variety of educational backgrounds. Preference is given to applicants who have professional experience.

In addition to the M.P.H. course work listed under "Common Requirements" above, the community and behavioral

health subtrack requires the following courses.

#### **SUBTRACK CORE**

At least 12 s.h. chosen from these:

172:106 Designing and Implementing Interventions	3 s.h.
172:130 Social Determinants of Health	3 s.h.
172:135 Health Disparities and Cultural Competence	3 s.h.
172:150 Health Behavior and Health Education	3 s.h.
172:181 Evaluation I: Theory and Applications	3 s.h.
172:183 Qualitative Research for Public Health	3 s.h.
172:185 Communicating with the Community	3 s.h.
172:240 Health Communication	3 s.h.

#### **ELECTIVES**

At least 9 s.h. chosen from these:

044:106 Foundations of GIS	3 s.h.
172:110 Community Development in Public Health	3 s.h.
172:115 Community Preventive Programs and Services	3 s.h.
172:122 Maternal, Child, and Family Health	3 s.h.
172:131 Anthropology and International Health	3 s.h.
172:133 The Anthropology of Women's Health	3 s.h.
172:140 Media and Health	3 s.h.
172:161 Substance Abuse Prevention and Intervention	3 s.h.
172:170 Special Topics	arr.
172:202/113:202 Ethnographic Field Methods	3 s.h.
172:242 Persuasion and Health	3 s.h.
172:246 Health Communication Campaigns	3 s.h.
172:270 Independent Study in Community and Behavioral Health	arr.
172:282 Evaluation II: Design and Methods	3 s.h.
172:285 Research Methods in Community and Behavioral Health	3 s.h.

#### **Epidemiology Subtrack**

The Master of Public Health with epidemiology subtrack requires 42 s.h. of graduate credit. The subtrack is offered by the Department of Epidemiology (College of Public Health).

The subtrack focuses on fundamental epidemiological concepts and methods and provides training in the use of public health data and methods for disease assessment and in methods for evaluating the need and outcome of programs and interventions. Graduates of the program work in public health departments and other health care settings.

Epidemiology subtrack students are required to attend departmental seminars and journal club. They also must present one scientific poster at an international, national, regional, state, university, or departmental poster session.

In addition to the M.P.H. course work listed under "Common Requirements" above, the epidemiology subtrack requires the following courses.

#### **SUBTRACK CORE**

All of these (10 s.h.):

171:162 Design and Analysis of Biomedical Studies	3 s.h.
173:158 Public Health Laboratory Techniques	1 s.h.
173:160 Introduction to Epidemiology Data Analysis With Computers	2 s.h.
173:240 Epidemiology II: Advanced Methods	4 s.h.

One of these (2-3 s.h.):

173:145 Public Health Data	2 s.h.
173:199 Practicing Evidence-Based Public Health	3 s.h.

One of these (2 s.h.):

173:153 Surveillance Internship: IRCID	2 s.h.
173:154 Cancer Registration Internship	2 s.h.

Bioscience—one of these (3-4 s.h.):

069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
069:270 Pathogenesis of Major Human Diseases	3 s.h.
096:114 Human Pathophysiology: Organ Systems	3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology	3 s.h.

Students who already have completed a course equivalent to one of these bioscience courses may substitute an additional elective.

### **ELECTIVES**

Students earn at least 2 s.h. in elective courses (or 5 s.h. if they substitute an elective for the bioscience requirement). At least 3 s.h. of elective credit must be earned in courses offered by the Department of Epidemiology (prefix 173) or in one of the following biostatistics courses.

171:241 Applied Categorical Data Analysis	3 s.h.
171:242 Applied Survival and Cohort Data Analysis	3 s.h.

### **Ergonomics Subtrack**

The Master of Public Health with ergonomics subtrack requires 42 s.h. of graduate credit. The subtrack is offered by the Department of Occupational and Environmental Health (College of Public Health).

The subtrack takes advantage of interdisciplinary faculty strengths in the Colleges of Public Health and Engineering and the Carver College of Medicine. Ergonomics students gain a thorough understanding of workplace physical environments that contribute to musculoskeletal injuries and illness. They also acquire knowledge of engineering and administrative methods to control workplace risk factors. The program prepares students for work in industry and government agencies, as well as for further academic training.

In addition to the M.P.H. course work listed under "Common Requirements" above, the ergonomics subtrack requires the following courses.

### **SUBTRACK CORE**

All of these (16 s.h.):

050:270 Responsible Conduct in Research	0 s.h.
056:144 Human Factors	3 s.h.
056:147 Ergonomics	3 s.h.
175:180 Occupational and Environmental Health Seminar	1 s.h.
175:190 Occupational Ergonomics I	3 s.h.
175:230 Occupational Health	3 s.h.
175:295 Clinical Ergonomics	3 s.h.

### **ELECTIVES**

Ergonomics subtrack students earn 5 s.h. in elective courses. Electives may be chosen from the following list or may include a related course approved by the student's advisor.

175:192 Occupational Safety	3 s.h.
175:231 Industrial Hygiene Fundamentals	3 s.h.
175:251 Injury Epidemiology	3 s.h.
175:253 Epidemiology of Occupational Injuries	3 s.h.

### **Health Communication Subtrack**

The Master of Public Health with health communication subtrack requires 42 s.h. of graduate credit. The subtrack is offered by the Department of Community and Behavioral Health (College of Public Health).

The subtrack provides opportunities for students to develop knowledge and skill in designing, evaluating, and implementing effective communication strategies and messages that speak to the health needs of diverse audiences. The program addresses clinician-patient interaction, family communication, group and organizational communication, and mass media and web-based campaigns. The M.P.H. may be of interest to clinicians, such as physicians, nurses, pharmacists, and dentists, as well as other professionals who do not wish to earn a Ph.D.

In addition to the M.P.H. course work listed under "Common Requirements" above, the health communications subtrack requires the following courses.

#### **SUBTRACK CORE: HEALTH COMMUNICATION**

Four of these (12 s.h.):

036:371 Communication Theory	3 s.h.
172:140/019:160 Media and Health	3 s.h.
172:185 Communicating with the Community	3 s.h.
172:240/036:270 Health Communication	3 s.h.
172:242 Persuasion and Health	3 s.h.
172:246/036:379 Health Communication Campaigns	3 s.h.

#### **SUBTRACK CORE: COMMUNITY AND BEHAVIORAL HEALTH**

Three of these (9 s.h.):

044:106 Foundations of GIS	3 s.h.
172:106 Designing and Implementing Interventions	3 s.h.
172:130 Social Determinants of Health	3 s.h.
172:135 Health Disparities and Cultural Competence	3 s.h.
172:150 Health Behavior and Health Education	3 s.h.
172:181 Evaluation I: Theory and Applications	3 s.h.
172:183 Qualitative Research for Public Health	3 s.h.
172:202/113:202 Ethnographic Field Methods	3 s.h.

#### **Occupational and Environmental Health Subtrack**

The Master of Public Health with occupational and environmental health subtrack requires 42 s.h. of graduate credit. The subtrack is offered by the Department of Occupational and Environmental Health (College of Public Health).

The subtrack provides students with a broad perspective on public health and career preparation for a variety of professional positions in occupational and environmental health. Public health experience provides desirable background for this subtrack.

In addition to the M.P.H. course work listed under "Common Requirements" above, the occupational and environmental health subtrack requires the following courses.

#### **SUBTRACK CORE**

All of these (18-22 s.h.):

050:270 Responsible Conduct in Research	0 s.h.
175:180 Occupational and Environmental Health Seminar	1 s.h.
Occupational and environmental health courses not already listed, or other approved courses	17-21 s.h.

Bioscience—one of these (3-4 s.h.):

069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
069:270 Pathogenesis of Major Human Diseases	3 s.h.
096:114 Human Pathophysiology: Organ Systems	3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology	3 s.h.

Students who already have completed a course equivalent to one of these bioscience courses may substitute an additional elective.

#### **Policy Subtrack**

The Master of Public Health with policy subtrack requires 59 s.h. of graduate credit. The subtrack is offered by the Department of Health Management and Policy (College of Public Health).

The subtrack offers course work and applied learning experiences that prepare students for careers in health policy analysis, system and organizational planning, and program evaluation. Graduates of the program find positions in federal, state, and local government; professional associations; and private agencies. Varied academic backgrounds are appropriate preparation for this program, including business, liberal arts and sciences, and the health professions.

In addition to the M.P.H. course work listed under "Common Requirements" above, the policy and administration subtrack requires the following courses.

#### **SUBTRACK CORE**

All of these:

174:144 Medicare and Medicaid Policy	3 s.h.
174:212 Health Economics I	3 s.h.
174:217 Health Insurance and Managed Care	3 s.h.
174:221 Evaluation and Outcomes in Health Care	2 s.h.
174:223 Seminar in Health Care Ethics	1-2 s.h.
174:237 Legal Aspects of Health and Medical Care	3 s.h.
174:242 Federalism and Health Policy	3 s.h.
174:243 Health Policy	3 s.h.
174:245 Seminar in Health Policy	3 s.h.

#### **ELECTIVES**

At least 6 s.h. chosen from these:

030:113 American State Politics	3 s.h.
030:120 Public Administration and Bureaucratic Politics	3 s.h.
030:125 Interest Groups	3 s.h.
030:126 American Public Policy	3 s.h.
030:150 Public Policy Around the World	3 s.h.
030:151 Political Leadership	3 s.h.
030:152 The Legislative Process	3 s.h.
030:153 The Judicial Process	3 s.h.
030:200 Introduction to Political Analysis	4 s.h.
030:310 Modeling American Politics	4 s.h.
030:315 The Presidency	4 s.h.
030:319 Problems in American Politics	4 s.h.
030:339 Problems in Political Theory	4 s.h.
030:352 Legislative Behavior	4 s.h.
091:261 Health Law	3 s.h.
091:650 Law and Colonialism	arr.

Policy courses not already listed in the required section, or other approved courses.

### **M.P.H. for Practicing Veterinarians**

The University of Iowa College of Public Health, in collaboration with the College of Veterinary Medicine at Iowa State University, offers a Master of Public Health for practicing veterinarians. The degree requires a minimum of 42 s.h. of graduate credit. The program, which is offered primarily through distance learning, enables students to prepare for new career opportunities and equips them to respond to public health challenges such as zoonotic diseases, food security and foodborne illnesses, bioterrorism, and environmental health.

Students participate in two summer institutes, one on each campus during consecutive summers (two weeks in May and June); the rest of the program is Internet-based, so students may complete requirements at times that fit their schedules. Specific courses are required each semester of the program.

The M.P.H. Program for practicing veterinarians requires the following course work.

#### **M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under "Common Requirements" for the Master of Public Health; see the beginning of this Catalog section.

#### **ADDITIONAL REQUIRED COURSES**

All of these (21 s.h.):

170:175 Public Health Emergency Preparedness for Veterinarians and Other Public Health Disciplines	2 s.h.
--	--------

173:120 Principles of Public Health Informatics	3 s.h.
173:130 Food Safety	3 s.h.
173:132 Exotic and Emerging Diseases of Animals	1 s.h.
173:147 Applied Veterinary Epidemiology/Biostatistics	3 s.h.
173:155 Diagnostic Microbiology for Epidemiology	3 s.h.
173:159 Applied Infectious Disease Epidemiology	2 s.h.
175:209 Rural Health and Agricultural Medicine	3 s.h.
175:211 Veterinary Public Health: The Profession	1 s.h.

### **Joint D.V.M./M.P.H.**

The University of Iowa College of Public Health and the College of Veterinary Medicine at Iowa State University (ISU) offer the joint Doctor of Veterinary Medicine/Master of Public Health degree. The joint D.V.M./M.P.H. requires a minimum of 42 s.h. in addition to the requirements of the D.V.M. degree; see Doctor of Veterinary Medicine in the Iowa State University catalog. Students who complete the program are granted both degrees. The program prepares students for work as state veterinarians, as college and university faculty members, in local and state departments of public health, in the Public Health Commissions Corp., in state agricultural departments, and for public health positions in the military.

Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program. For M.P.H. admission requirements, see "Admission" later in this section.

The joint D.V.M./M.P.H. requires the following course work.

#### **M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under "Common Requirements" for the Master of Public Health; see the beginning of this Catalog section.

#### **M.P.H. ELECTIVES**

Students must earn at least 9 s.h. from the following courses.

173:130 Food Safety	3 s.h.
173:147 Applied Veterinary Epidemiology/Biostatistics	3 s.h.
173:155 Diagnostic Microbiology for Epidemiology (offered by distance education)	3 s.h.
173:159 Applied Infectious Disease Epidemiology	2 s.h.
173:255 Epidemiology of Infectious Diseases (offered by distance education)	3 s.h.
175:170 Injury and Violence Prevention (offered by distance education)	3 s.h.
175:209 Rural Health and Agricultural Medicine (offered by distance education)	3 s.h.
175:210 Current Topics in Agricultural Health (offered by distance education)	0-1 s.h.
175:211 Veterinary Public Health: The Profession	1 s.h.

#### **REQUIRED D.V.M. COURSES**

All of these (ISU courses):

Principles of Public Health (VMPM 388)	3 s.h.
Small Animal Internal Medicine (VCS 436)	2 s.h.
Infectious Diseases and Preventive Medicine (VMPM 437)	3 s.h.
Pharmacology and Therapeutics (BMS 443)	3 s.h.
Laboratories in Public Health (VMPM 486)	1 s.h.

### **Joint J.D./M.P.H.**

The College of Law and the College of Public Health offer the joint Juris Doctor/Master of Public Health. The joint J.D./M.P.H. requires a minimum of 42 s.h. of graduate credit in addition to the requirements of the J.D. degree. Students who complete the program are granted both degrees.

The joint J.D./M.P.H. program helps students develop special expertise in public health legal issues. It is designed to train qualified students for leadership roles in both the public and private sectors.

Separate application to each degree program is required. Applicants must be admitted to both programs before they

can be admitted to the joint degree program.

Contact the College of Law and the College of Public Health for details. For detailed information about the J.D., see Juris Doctor (College of Law) in the Catalog.

The joint J.D./M.P.H. requires the following course work.

#### **M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under "Common Requirements" for the Master of Public Health; see the beginning of this Catalog section.

#### **M.P.H. ELECTIVES**

Students earn 9 s.h. in elective courses chosen from one of the following public health areas: aging studies; biostatistics; community and behavioral health; epidemiology; global health; health policy; maternal, child, and family health; nutrition and exercise; or occupational and environmental health. Students choose electives in consultation with their advisors in the College of Law and the College of Public Health.

#### **J.D. REQUIREMENTS**

J.D./M.P.H. students must complete the professional curriculum of the J.D. program; see Juris Doctor (College of Law) in the Catalog. Students must be enrolled in the College of Law to take College of Law courses.

#### **COURSES THAT COUNT TOWARD BOTH DEGREES**

Students may count up to 12 s.h. earned in any of the following College of Law courses toward the M.P.H.

091:204 Administrative Law	3 s.h.
091:245 Domestic Abuse Law	arr.
091:250 Employment Law	2, 3 s.h.
091:251 Topics in Employee Benefits Law	arr.
091:255 Environmental Law	3 s.h.
091:261 Health Law	2, 3 s.h.
091:262 Federal Regulations of Health Care Industry: Fraud and Abuse	2, 3 s.h.
091:268 Family Law	3, 4 s.h.
091:284 Insurance	1, 2, 3 s.h.
091:291 International Environmental Law	3 s.h.
091:292 Labor Law	3, 4 s.h.
091:320 Nonprofit Organizational Effectiveness I	3 s.h.
091:322 Nonprofit Organizational Effectiveness II	3 s.h.
091:341 Managing National Security	1, 2, 3 s.h.
091:342 Negotiations	2, 3, 4 s.h.
091:354 State and Local Government	1, 2, 3 s.h.
091:409 Child and Family Advocacy Clinic	arr.
091:455 Health Law and Policy Practicum	1, 2, 3 s.h.

#### **Joint M.D./M.P.H.**

The Carver College of Medicine and the College of Public Health offer the joint Doctor of Medicine/Master of Public Health. The joint M.D./M.P.H. requires a minimum of 42 s.h. of graduate credit in addition to the requirements of the M.D. degree. Students who complete the program are granted both degrees. They enjoy expanded career opportunities and are well prepared to apply the principles of medicine and public health in their work.

Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the combined program.

Contact the Carver College of Medicine and the College of Public Health for details. For detailed information about the M.D. program, see Doctor of Medicine (Carver College of Medicine) in the Catalog.

The joint M.D./M.P.H. requires the following course work.

#### **M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under "Common Requirements" for the Master of Public Health; see the beginning of this Catalog section.

#### **M.P.H. ELECTIVES**

Students earn 9 s.h. in elective courses chosen from one of the following public health areas: biostatistics, community and behavioral health, epidemiology, health communication, health policy, occupational and environmental health. Students choose electives in consultation with their advisors in the Carver College of Medicine and the College of Public Health.

#### **M.D. REQUIREMENTS**

Students in the joint M.D./M.P.H. program must complete the professional curriculum of the M.D. program; see Doctor of Medicine (Carver College of Medicine) in the Catalog.

#### **COURSES THAT COUNT TOWARD BOTH DEGREES**

Students may count up to 12 s.h. earned in the following courses, which are required for the M.D. degree, toward the M.P.H.

050:180 Community-Based Primary Care (up to 10 s.h.)	arr.
050:183 Healthcare Ethics, Law, and Policy	2 s.h.
078:101 Inpatient Internal Medicine	arr.
078:102 Outpatient Internal Medicine	3, 4 s.h.

#### **Joint M.S.N./M.P.H.**

The College of Nursing and the College of Public Health offer the joint Master of Science in Nursing/Master of Public Health. The joint M.S.N./M.P.H. requires a minimum of 60 s.h. of graduate credit. Students who complete the program are granted both degrees. The program prepares students for positions such as director of a public or community health agency, director of occupational health for a company or corporation, case manager for specific populations, information systems specialist for a public health agency or organization, or advanced nurse practitioner in a school, occupational, or public health organization.

Separate application to each degree program is required; applicants must be admitted to both programs before they can be admitted to the joint degree program. Each college's admission committee reviews each candidate independently.

Applicants must hold a baccalaureate degree in nursing from an accredited program and have an undergraduate g.p.a. of at least 3.00 and satisfactory Graduate Record Exam (GRE) General Test scores. They must submit a formal application, complete transcripts from each undergraduate and graduate school they have attended, and three professional recommendations (University of Iowa recommendation forms are required).

Contact the College of Nursing and the College of Public Health for details.

In addition to M.P.H. common requirements and M.S.N. core courses, students complete 9-12 s.h. in a nursing focus and 3 s.h. in an M.P.H. capstone project. A master's project or nursing portfolio is required. The remaining credit is earned in elective courses. Areas of emphasis are informatics, nursing administration, community health, and occupational health/ergonomics.

For availability of nursing courses, contact the College of Nursing or see "Courses" in the College of Nursing section of the Catalog.

#### **M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under "Common Requirements" for the Master of Public Health; see the beginning of this Catalog section.

#### **M.S.N. CORE COURSES**

All of these:

096:208 Leadership for Advanced Nursing Practice	3 s.h.
096:209 Health Systems/Economics/Policy	3 s.h.

**Joint Pharm.D./M.P.H.**

The College of Pharmacy and the College of Public Health offer the joint Doctor of Pharmacy/Master of Public Health. The joint Pharm.D./M.P.H. requires 42 s.h. of graduate credit in addition to the requirements of the Pharm.D. degree; see "Professional Program (Pharm.D.)" in the College of Pharmacy section of the Catalog. Students who complete the program are granted both degrees.

The joint Pharm.D./M.P.H. program helps students develop expertise in public health related to pharmacotherapy, health promotion, disease prevention, and medication safety. Its graduates may work in areas of interest common to pharmacy and public health, such as spread and treatment of disease, community health, and immunology; bioterrorism, terrorism, and preparedness; genetics; insurance; managed care; family and juvenile health; and protection of special populations. Employment opportunities are available in hospitals and clinics and with health care providers; private practice; insurance and managed care organizations; local, county, state, and federal government; public health governmental agencies; and colleges and universities.

Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

Admission requirements include a bachelor's degree or a minimum of 120 s.h. of undergraduate course work; an undergraduate cumulative g.p.a. of at least 3.00; one semester each of college algebra and biology; transcripts of all college course work; scores (preferably at or above the national median) on the Graduate Record Exam or the Pharmacy College Admission Test (PCAT); and three professional recommendations (University of Iowa recommendation forms are required).

Contact the College of Pharmacy and the College of Public Health for details.

The joint Pharm.D./M.P.H. requires the following course work.

**M.P.H. COMMON REQUIREMENTS**

Students must complete courses listed under "Common Requirements" for the Master of Public Health; see the beginning of this Catalog section.

**M.P.H. ELECTIVES**

Students select electives totaling 9 s.h. from one of the following public health areas: biostatistics, community and behavioral health, epidemiology, health communication, health policy, or occupational and environmental health. Electives are chosen in consultation with the student's advisors in the Colleges of Pharmacy and Public Health.

**PHARM.D. REQUIREMENTS**

Joint Pharm.D./M.P.H. program students must complete the professional curriculum of the Pharm.D. program; see "Doctor of Pharmacy (Pharm.D.)" in the College of Pharmacy section of the Catalog).

Students must be enrolled in the College of Pharmacy in order to take College of Pharmacy courses.

**COURSES THAT COUNT TOWARD BOTH DEGREES**

Students may count up to 12 s.h. earned in the following courses, which are required for the Pharm.D. degree, toward the M.P.H.

046:129 Pharmaceutical Economics and Insurance	3 s.h.
046:154 Endocrinology, Ophthalmology, Women's and Men's Health Therapeutics	2 s.h.
046:156 Cardiovascular Therapeutics	2 s.h.
046:165 Infectious Disease Therapeutics	2 s.h.
069:133 Introduction to Human Pathology for Graduate Students	4 s.h.

**Admission**

Applicants to the M.P.H. program must have successfully completed one semester each of college algebra and biology.

All M.P.H. applicants must submit a Graduate College application form, three letters of reference, a statement of

purpose that describes their interest in public health and identifies a specialty area, and a résumé highlighting professional experience in public health or in nursing. They also must submit scores on the Graduate Record Exam (GRE) General Test, LSAT, DAT, VCAT, GMAT, or another professional placement exam; scores must be at or above the median scores for test takers applying to similar programs.

Applicants whose first language is not English and who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants who score 550-599 (paper-based), 213-249 (computer-based), or 81-99 (Internet-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Students may enter the M.P.H. program in fall and summer. Application deadlines for fall entrance to the M.P.H. program are May 1 for U.S. citizens and permanent residents, April 1 for international applicants. Application deadlines for summer entrance are April 1 for U.S. citizens and permanent residents, March 15 for international applicants.

Application deadline for the M.P.H. for practicing veterinarians is March 1.

Students may enter the M.P.H. joint programs in fall, spring, and summer. Contact the individual joint programs for deadline information.

## Financial Support

A limited number of modest tuition awards are available each year for M.P.H. students. For information on financing education through jobs, grants, and loans, contact the University's Office of Student Financial Aid.

## Occupational and Environmental Health

**Head:** Peter Thorne

**Professors:** Thomas Cook (Physical Therapy and Rehabilitation Science/International Programs), Kenneth Culp (Nursing), Kelley Donham (Nursing), William Field (Epidemiology), Laurence Fuortes (Epidemiology/International Programs), Fredric Gerr (Epidemiology/Internal Medicine), Vicki Grassian (Chemistry/Chemical and Biochemical Engineering/Education), Keri Hornbuckle (Civil and Environmental Engineering), Paul James (Family Medicine), Joel Kline (Internal Medicine), James Merchant (Nursing/Internal Medicine), Patrick O'Shaughnessy (Civil and Environmental Engineering), Gene Parkin (Civil and Environmental Engineering), Corinne Peek-Asa (Epidemiology/Nursing), Larry Robertson (Radiation Oncology), Jerald Schnoor (Civil and Environmental Engineering), Peter Thorne (Civil and Environmental Engineering), Craig Zwerling

**Professors emeriti:** L.W. Knapp Jr., Nancy Sprince

**Adjunct professor:** Wayne Sanderson (Epidemiology)

**Clinical professor:** Patrick Hartley (Internal Medicine)

**Associate professors:** Gabriele Ludewig, Thomas Schnell (Neurology/Electrical and Computer Engineering/Industrial Engineering), David Wilder (Biomedical Engineering)

**Adjunct associate professors:** Kevin Kelly (Anthropology/Community and Behavioral Health), Burton Kross, Kenneth McMains, Michael Rosmann

**Clinical associate professors:** Henri Cuddihy (Internal Medicine), David Osterberg (Geography), George Phillips (Pediatrics)

**Adjunct clinical associate professor:** Craig Bainbridge (Internal Medicine)

**Assistant professors:** Renee Anthony, Nathan Fethke, Marizen Ramirez

**Assistant professor emerita:** Pamela Willard

**Adjunct assistant professors:** Chandran Achutan, Danelle Bickett-Weddle, Razvan Chereches, Gregory Couser, Christine Deignan, Gregory Flamme, Dian Gottlob, Carrie LaSeur, Hans-Joachim Lehmler, Murray Madsen, John Rosecrance, Donald Simmons, Laurie Taylor, John Vargo, Londa Wanderwal, Peter Weyer, Michael Wichman, Catherine Zeman

**Adjunct clinical assistant professor:** Edward Bottei (Emergency Medicine/Pediatrics/Pharmacy)

**Adjunct associate:** Daniel McGehee

**Graduate degrees:** M.S., Ph.D. in Occupational and Environmental Health

**Web site:** <http://www.public-health.uiowa.edu/oeH>

The Department of Occupational and Environmental Health focuses on assessment of risk factors in the physical environment and their relationship to disease—particularly health problems of agricultural and industrial workers. Students are guided by faculty members whose research interests include rural health care delivery, agricultural health, environmental health, occupational medicine, occupational lung disease, mammalian toxicology, inhalation toxicology, ergonomics, indoor air quality, occupational injury, injury epidemiology, injury prevention programs, aerosol physics, air and water quality, environmental chemistry, analytical toxicology, and environmental health in developing countries.

## Graduate Programs

The department offers a Master of Science and a Doctor of Philosophy in occupational and environmental health. Both programs include an optional agricultural safety and health subtrack and an optional industrial hygiene subtrack. The department also offers a joint M.S./M.A. or M.S. with the Graduate College's Urban and Regional Planning Program; see "Joint M.S./M.A. in Urban and Regional Planning" below.

In addition, the department offers two subtracks for the Master of Public Health: the ergonomics subtrack and the occupational and environmental health subtrack. See "M.P.H. Subtracks" below. It also participates in the College of Public Health's graduate Certificate in Agricultural Safety and Health; see Agricultural Safety and Health in the Catalog.

Individuals who are not enrolled in one of the department's degree programs but wish to take departmental courses may apply for professional improvement status. The department also offers an occupational medicine residency training program.

### Master of Science

The Master of Science in occupational and environmental health requires a minimum of 38 s.h. of graduate credit. It is offered with two optional subtracks: agricultural safety and health and industrial hygiene. The M.S. with agricultural safety and health subtrack requires a minimum of 38 s.h. of graduate credit; the M.S. with industrial hygiene subtrack requires a minimum of 43 s.h. of graduate credit. All M.S. students are required to complete a thesis.

Requirements for the M.S. without a subtrack are as follows.

#### CORE COURSES

All of these:

175:197 Environmental Health	3 s.h.
175:230 Occupational Health	3 s.h.
175:260 Environmental Toxicology	3 s.h.
175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.)	1 s.h.
171:161 Introduction to Biostatistics	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
650:270 Principles of Scholarly Integrity	0 s.h.

One of these:

069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
096:114 Human Pathophysiology: Organ Systems	3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology	3 s.h.

**ELECTIVES**

Credit earned in elective courses and the thesis completes the 38 s.h. required for the degree. Students work with their advisors to select electives appropriate for their professional goals.

**THESIS**

A thesis is required. Students may earn a maximum of 6 s.h. for the thesis. Additional thesis credit may be allowed for students who earn more than 38 s.h.

175:300 Thesis/Dissertation	arr.
-----------------------------	------

**M.S. with Subtrack in Agricultural Safety and Health**

The M.S. with subtrack in agricultural safety and health requires a minimum of 38 s.h. of graduate credit. The program prepares students for careers in education, health care, insurance, and agribusiness as specialists in agricultural safety and health.

Requirements are as follows.

**SUBTRACK CORE**

175:196 Agricultural Safety: Theories and Practice	2 s.h.
175:209 Rural Health and Agricultural Medicine	3 s.h.
175:210 Current Topics in Agricultural Health (seminar, taken two times, once for 0 s.h. and once for 1 s.h.)	1 s.h.
175:197 Environmental Health	3 s.h.
175:230 Occupational Health	3 s.h.
175:260 Environmental Toxicology	3 s.h.
175:203 Preceptorship in Occupational and Environmental Health	1 s.h.
175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.)	1 s.h.
171:161 Introduction to Biostatistics	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
650:270 Principles of Scholarly Integrity	0 s.h.

One of these:

096:114 Human Pathophysiology: Organ Systems	3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology	3 s.h.

**ELECTIVES**

Credit earned in elective courses and the thesis completes the 38 s.h. required for the degree. Agricultural safety and health subtrack students must complete elective course work from one of five focus areas. The amount of credit required varies by focus area, as follows.

Industrial hygiene: 9 s.h.  
 Ergonomics: 9 s.h.  
 Occupational and environmental health: 9 s.h.  
 Occupational epidemiology: 9 s.h.  
 Occupational injury prevention: 8 s.h.

**THESIS**

A thesis is required. Students earn a minimum of 3 s.h. for the thesis.

175:300 Thesis/Dissertation	arr.
-----------------------------	------

### **M.S. with Subtrack in Industrial Hygiene**

The M.S. with subtrack in industrial hygiene requires a minimum of 43 s.h. of graduate credit. The program prepares students for careers in industrial hygiene as well as the broad field of occupational and environmental health. Career opportunities are available in health and safety departments of industries; in consulting firms; in academic institutions; and in local, state, and federal public health agencies.

Requirements are as follows.

#### **SUBTRACK CORE**

175:231 Industrial Hygiene Fundamentals	3 s.h.
175:232 Assessing Physical Agent Hazards	3 s.h.
175:233 Control of Occupational Hazards	3 s.h.
175:221 Aerosol Technology	3 s.h.
175:230 Occupational Health	3 s.h.
175:192 Occupational Safety	3 s.h.
175:190 Occupational Ergonomics I	3 s.h.
175:260 Environmental Toxicology	3 s.h.
175:197 Environmental Health	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.)	1 s.h.
175:182 Statistics for Experimenters	3 s.h.
650:270 Principles of Scholarly Integrity	0 s.h.

#### **ELECTIVES**

Credit in elective courses and the thesis completes the 43 s.h. required for the degree. Students work with their advisors to select electives appropriate for their professional goals.

#### **THESIS**

A thesis is required. Students may earn a maximum of 6 s.h. for the thesis.

175:300 Thesis/Dissertation	arr.
-----------------------------	------

### **Joint M.S./M.A. or M.S. in Urban and Regional Planning**

The Department of Occupational and Environmental Health offers a joint master's degree program with the Graduate College's Urban and Regional Planning Program. The joint program leads to an M.S. in occupational and environmental health and an M.A. or M.S. in urban and regional planning. It requires a minimum of 65 s.h. of graduate credit. Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program. See Urban and Regional Planning Program in the Catalog.

### **M.P.H. Subtracks**

The Department of Occupational and Environmental Health offers two subtracks for the Master of Public Health: the ergonomics subtrack and the occupational and environmental health subtrack.

The ergonomics subtrack focuses on understanding how workplace environments contribute to musculoskeletal injuries and illness and on control of workplace risk factors. Graduates are prepared to work in industry and government agencies or pursue further academic training.

The occupational and environmental health subtrack provides a broad perspective on public health and career preparation for a variety of professional positions in occupational and environmental health.

For detailed information about the M.P.H. degree, see Master of Public Health Program in the Catalog.

### **Doctor of Philosophy**

The Doctor of Philosophy in occupational and environmental health requires 72 s.h. of graduate credit. The program prepares students for professional and academic careers in environmental and occupational health. It is offered with two optional subtracks: agricultural safety and health, and industrial hygiene.

All doctoral students must complete a dissertation--a substantial scholarly treatise. Ph.D. requirements are as follows.

### CORE COURSES

All of these:

175:197 Environmental Health	3 s.h.
175:230 Occupational Health	3 s.h.
175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.)	1 s.h.
171:161 Introduction to Biostatistics	3 s.h.
171:162 Design and Analysis of Biomedical Studies	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
650:270 Principles of Scholarly Integrity	0 s.h.

One of these:

069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
096:114 Human Pathophysiology: Organ Systems	3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology	3 s.h.

### ELECTIVES

Students must earn a minimum of 24 s.h. in non-research-related courses, including classroom courses or equivalent web-based courses. Students work with their advisors to select courses appropriate for their professional goals.

### RESEARCH CREDIT

Students earn the remaining credit for the Ph.D. by completing any combination of the following courses or other classroom courses. All Ph.D. students must complete a dissertation.

175:172 Independent Study in Occupational and Environmental Health	arr.
175:201 Research in Occupational and Environmental Health	arr.
175:300 Thesis/Dissertation	arr.

### Ph.D. with Subtrack in Agricultural Safety and Health

The Ph.D. with subtrack in agricultural safety and health prepares doctoral students for academic, research, and policy-making careers in occupational and environmental health, with specialty in agricultural safety and health.

Requirements are as follows.

### SUBTRACK CORE

175:196 Agricultural Safety: Theories and Practice	2 s.h.
175:209 Rural Health and Agricultural Medicine	3 s.h.
175:210 Current Topics in Agricultural Health (seminar, taken two times, once for 0 s.h. and once for 1 s.h.)	1 s.h.
173:157 Zoonotic Diseases	2 s.h.
175:197 Environmental Health	3 s.h.
175:230 Occupational Health	3 s.h.
175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.)	1 s.h.
175:203 Preceptorship in Occupational and Environmental Health	1 s.h.
171:162 Design and Analysis of Biomedical Studies	3 s.h.
171:161 Introduction to Biostatistics	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
650:270 Principles of Scholarly Integrity	0 s.h.

One of the following:

096:114 Human Pathophysiology: Organ Systems	3 s.h.
096:115 Human Pathophysiology: Cellular/Neurology/Immunology	3 s.h.

**ELECTIVES**

Agricultural safety and health subtrack students must complete elective course work from one of five focus areas. The amount of credit required varies by focus area, as follows.

Industrial hygiene: 24 s.h.

Ergonomics: 15 s.h.

Occupational and environmental health: 24 s.h.

Occupational epidemiology: 11 s.h.

Occupational injury prevention: 11 s.h.

**RESEARCH CREDIT**

Students earn the remaining credit for the Ph.D. by completing any combination of the following courses or other classroom courses. All Ph.D. students must complete a dissertation.

175:172 Independent Study in Occupational and Environmental Health	arr.
175:201 Research in Occupational and Environmental Health	arr.
175:300 Thesis/Dissertation	arr.

**Ph.D. with Subtrack in Industrial Hygiene**

The Ph.D. with subtrack in industrial hygiene provides doctoral students with specialized knowledge in industrial hygiene in addition to their expertise in the broad field of occupational and environmental health.

Requirements are as follows.

**SUBTRACK CORE**

175:231 Industrial Hygiene Fundamentals	3 s.h.
175:232 Assessing Physical Agent Hazards	3 s.h.
175:233 Control of Occupational Hazards	3 s.h.
175:221 Aerosol Technology	3 s.h.
175:230 Occupational Health	3 s.h.
175:192 Occupational Safety	3 s.h.
175:190 Occupational Ergonomics I	3 s.h.
175:260 Environmental Toxicology	3 s.h.
175:197 Environmental Health	3 s.h.
175:180 Occupational and Environmental Health Seminar (taken three times, twice for 0 s.h. and once for 1 s.h.)	1 s.h.
171:162 Design and Analysis of Biomedical Studies	3 s.h.
173:140 Epidemiology I: Principles	3 s.h.
650:270 Principles of Scholarly Integrity	0 s.h.

One of these:

175:182 Statistics for Experimenters	3 s.h.
171:161 Introduction to Biostatistics	3 s.h.

**ELECTIVES**

Students must earn a minimum of 12 s.h. in non-research-related courses, including classroom courses or equivalent web-based courses. Students work with their advisors to select courses appropriate for their professional goals.

**RESEARCH CREDIT**

Students earn the remaining credit for the Ph.D. by completing any combination of the following courses or other classroom courses. All Ph.D. students must complete a dissertation.

## Admission

The occupational and environmental health faculty takes several factors into consideration when evaluating applications for admission, including Graduate Record Exam (GRE) General Test scores, grade-point averages, letters of recommendation, intent and motivation for graduate study, and research interests. A student with deficiencies in one area may be admitted if all other components of his or her application are very strong.

All M.P.H., M.S., and Ph.D. program applicants must hold a baccalaureate degree and have a cumulative g.p.a. of at least 3.00 (M.P.H. and M.S. applicants) or at least 3.25 (Ph.D. applicants). All applicants must have taken the GRE General Test. A minimum GRE score of 1050 (verbal plus quantitative) is recommended for master's applicants, 1100 for doctoral applicants.

Applicants whose first language is not English and who do not hold a baccalaureate degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants who score 550-599 (paper-based), 213-249 (computer-based), or 81-99 (Internet-based) are required to take English fluency courses. Applicants who score below those ranges are not considered for admission.

Undergraduate preparation for M.P.H. and M.S. applicants must include course work in mathematics, biology, chemistry, and either physical sciences or engineering, depending on the applicant's chosen specialty area.

M.S. applicants who intend to pursue the industrial hygiene subtrack also must have taken physics and mathematics through calculus; course work in biology, microbiology, and computer programming is highly recommended.

Completion of the M.S. program before beginning Ph.D. study is recommended. Undergraduate preparation for doctoral applicants must include at least two semesters of chemistry, one semester of physics, and one semester of calculus. Course work in biological sciences, microbiology, and computer programming are highly recommended, particularly for students interested in some specialized areas.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Application deadlines for fall entrance for graduate study are July 1 for U.S. citizens and permanent residents, April 1 for international applicants. Application deadlines for spring entrance are December 1 for U.S. citizens and permanent residents, October 1 for international applicants.

## Financial Support

Several graduate student awards, including tuition and stipend support, are available for individuals interested in industrial hygiene, agricultural safety and health, ergonomics, occupational epidemiology, or occupational injury prevention. Both stipend and tuition support are available for all occupational medicine residents. Full-time graduate students in good academic standing (those not admitted on conditional status) are eligible for a stipend and tuition support. All other students are eligible for tuition support only; requests are considered case-by-case. All recipients must be U.S. citizens or permanent residents.

## Postdoctoral Positions

The College of Public Health's Environmental Health Sciences Training Program offers postdoctoral positions in environmental health/toxicology. Appointments are made for two years with the possibility of an additional year. Applicants must be U.S. citizens or permanent residents.

## Residency Program

In cooperation with University of Iowa Hospitals and Clinics, the department offers residency training in occupational medicine for physicians seeking specialty training in occupational medicine. For information contact the director of the Occupational Medicine Residency Program.

## Facilities and Resources

The Department of Occupational and Environmental Health is housed on the University's Oakdale Research Campus in the Institute for Rural and Environmental Health. College of Public Health-based laboratory facilities give researchers and students access to cutting-edge technologies for the study of occupational and environmental health.

The Inhalation Toxicology Facility (ITF) provides a full array of inhalation toxicology, aerosol science, and bioaerosol

assay services. A primary focus of the ITF is the study of toxicants found in the agricultural environment and related exposure situations. The facility is particularly well-equipped for studying organic dusts and bioaerosols.

The Occupational Hygiene Laboratory (OHL) provides expertise and equipment for exposure assessment in occupational settings. The OHL provides a range of sample collection capabilities and an extensive inventory of sampling equipment. The field and laboratory services available through the laboratory support exposure-response studies and control technology development studies in a variety of occupational arenas, including agriculture, construction, and indoor environments (home and office).

A computer laboratory is available for student use, and a library collection is located in the Institute for Rural and Environmental Health.

### **Heartland Center for Occupational Health and Safety**

The Heartland Center for Occupational Health and Safety, one of 16 education and research centers funded by the National Institute of Occupational Safety and Health (NIOSH), provides training, education, and outreach. Its program areas are occupational health nursing, industrial hygiene, occupational medicine, ergonomics, agricultural safety and health, occupational injury prevention research, occupational epidemiology, and continuing education/outreach.

## **Occupational and Environmental Health Courses**

### **175:101 Health, Work, and the Environment** 3 s.h.

Current topics in occupational and environmental health; how the United States protects workers, protects people from environmental agents, and reduces environmental harm. Same as 044:174.

### **175:111 International Health** 3 s.h.

Urgent health problems in the developing world and among disadvantaged populations in developed countries; biological, social, cultural, political aspects of international health problems; applications of research methods from epidemiology, environmental health, social sciences. Same as 152:111, 173:111.

### **175:170 Injury and Violence Prevention** 3 s.h.

Theory, research, and practice of injury control; unintentional and intentional injuries; local, national, international injury issues. Same as 173:170.

### **175:171 Problems in Occupational and Environmental Health** arr.

Didactic material in occupational and environmental health; may include tutorial, seminar, faculty-directed independent work (e.g., literature search, project, short research project).

### **175:172 Independent Study in Occupational and Environmental Health** arr.

In-depth pursuit of an area in occupational and environmental health requiring substantial creativity and independence.

### **175:175 Research Methods in Disaster Studies** 3 s.h.

Epidemiologic study of disasters and their health consequences; research to identify and reduce health effects, research in context of response and preparedness. Same as 173:175.

### **175:180 Occupational and Environmental Health Seminar** 0-1 s.h.

Contemporary topics in occupational health, agricultural and comparative medicine, environmental health.

### **175:182 Statistics for Experimenters** 3 s.h.

Application of statistical techniques to evaluate data derived from experimental samples designs; use of spreadsheets, statistical software; design and analysis of experiments; regression analysis; model building; practical applications.

### **175:185 Occupational Health Research Seminar** 2 s.h.

Tools necessary for making critical assessment of published scientific research reports from a methodological perspective; examples from recently published research studies in occupational and environmental health. Corequisites: 171:161 and 173:140.

### **175:190 Occupational Ergonomics I** 2-3 s.h.

Principles of ergonomics, with focus on physical capabilities of workers and their interactions with their work environment; physiological basis of work, patterns of work, occupational risk factors for musculoskeletal and neurovascular disorders, workplace and equipment design, integration of ergonomics in manufacturing processes.

- 175:192 Occupational Safety** 3 s.h.  
Principles and practices of occupational safety; applications in industrial and other occupational settings; interactions with other disciplines.
- 175:195 Global Environmental Health** 2 s.h.  
Current problems, including transboundary movement of pollutants, vectors of infectious agents, global warming and climatic change. Prerequisites: 175:111 or 175:197.
- 175:196 Agricultural Safety: Theories and Practice** 2 s.h.  
General theories and practice of injury prevention from varied fields, including industrial safety, engineering, regulation, education, epidemiology, social psychology; strategic application in agriculture.
- 175:197 Environmental Health** 3 s.h.  
Survey of the field; assessment of contemporary human health issues associated with biological, chemical, physical factors of environment; critical review of environmental factors that affect health; public policies governing recognition, intervention, control.
- 175:198 Solid and Hazardous Wastes** 3 s.h.  
Sources, characteristics, collection, disposal of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Requirements: (for 053:158) 053:050; (for 175:198) 175:197. Same as 053:158.
- 175:201 Research in Occupational and Environmental Health** arr.  
Research that may lead to a dissertation. Repeatable.
- 175:203 Preceptorship in Occupational and Environmental Health** arr.  
Work experience using knowledge and skills acquired in the classroom; arranged in conjunction with departmental or collegiate activities or with governmental agencies or private industry. Repeatable.
- 175:209 Rural Health and Agricultural Medicine** 3 s.h.  
Clinical orientation of specific health problems of rural residents, agricultural workers; rural health care delivery, socioeconomic issues in agriculture and their effects on health and safety of the agricultural population; occupational health problems, environmental health hazards in rural areas. Requirements: 173:140 or medicine enrollment.
- 175:210 Current Topics in Agricultural Health** 0-1 s.h.  
Issues that affect the health of agricultural populations, such as agro-terrorism, antibiotic resistance, genetically modified organisms; current scientific literature.
- 175:211 Veterinary Public Health: The Profession** 1 s.h.  
History and overview of veterinary public health and the American College of Veterinary Preventive Medicine (ACVPM); preparation for ACVPM board of certification.
- 175:220 Environmental and Occupational Epidemiology** 3 s.h.  
Environmental and occupational epidemiologic study designs; basic and novel methods of exposure assessment; methodologies to improve study validity. Prerequisites: 173:140. Corequisites: 171:161 and 175:197. Same as 173:220.
- 175:221 Aerosol Technology** 3 s.h.  
Particle statistics and physics of aerosols, including inertia, diffusion, nucleation, evaporation, condensation, optics, electrical properties; relationship to fields such as agriculture, nanotechnology, environmental and occupational health, atmospheric chemistry, drug delivery.
- 175:230 Occupational Health** 3 s.h.  
Principles, practice of occupational medicine, fundamentals of industrial hygiene and safety, occupational health management, ergonomics, occupational health nursing. Offered fall semesters.
- 175:231 Industrial Hygiene Fundamentals** 3 s.h.  
Principles, with emphasis on recognition of chemical health hazards, physical health hazards at work. Corequisites: 175:230, if not taken as a prerequisite.
- 175:232 Assessing Physical Agent Hazards** 3 s.h.

Basic principles of recognizing and evaluating hazards presented by physical agents in occupational environments. Prerequisites: 175:230.

**175:233 Control of Occupational Hazards** 3 s.h.

Physical science concepts applied to control of occupational hazards ranging from dusts to mists to vapors; strategies, management issues, personal protective equipment, implementation skills; in-depth instruction on local exhaust ventilation system design. Prerequisites: 175:230 or 175:231.

**175:234 Quantitative Exposure Assessment: Study Design and Evaluation** 3 s.h.

Principles of designing occupational and environmental exposure assessment studies, analyzing exposure data, and conducting exposure-response evaluations. Prerequisites: 171:161 or 175:182.

**175:251 Injury Epidemiology** 3 s.h.

How epidemiology can be applied to injury prevention and control: epidemiology literature, specific methodological problems involved in the epidemiology of injuries, critical evaluation of research articles. Offered spring semesters of odd years. Prerequisites: 173:140. Same as 173:251.

**175:252 Environmental Health Policy** 3 s.h.

Major concerns in environment and human health, legislation enacted to deal with these concerns; emphasis on contemporary issues. Offered fall semesters of odd years. Requirements: (for 175:252) 175:197; (for 053:204) 053:050. Same as 053:204, 152:252.

**175:253 Epidemiology of Occupational Injuries** 3 s.h.

Epidemiological literature on occupational injuries and their prevention; focus on research methods. Offered spring semesters of even years. Prerequisites: 173:140. Same as 173:253.

**175:260 Environmental Toxicology** 3 s.h.

Sources, routes of absorption, effects of environmental toxicants affecting man; pathophysiology of toxicant actions, including those of air and water pollutants, metals, pesticides, solvents, food toxicants, chemicals. Requirements: college organic and inorganic chemistry, or physiology, or biochemistry.

**175:265 Advanced Toxicology** 4 s.h.

Hepatic metabolism and toxification mechanisms, pulmonary and immunotoxicology, nervous system poisons and their mechanisms of action, general and molecular concepts of chemical carcinogenesis. Prerequisites: 175:260.

**175:285 Advanced Topics in Occupational Medicine** 2 s.h.

Skills and knowledge for evaluating and treating patients with work-related illness.

**175:294 Occupational Ergonomics II** 3 s.h.

Application of ergonomic principles in varied work settings, through case study approach; participatory ergonomics, economics of ergonomics, workforce issues, psychosocial factors, shift work, integration of ergonomics into business models, current legislative issues, legal aspects of ergonomics, international perspectives; biomedical instrumentation used for risk factor exposure measurements.

**175:295 Clinical Ergonomics** 3 s.h.

Clinical orientation to specific ergonomic problems and issues; preparation for conducting independent on-site ergonomic evaluations in occupational settings; experience developing and evaluating ergonomic inventions in an occupational setting; rotation through an occupational medicine clinic. Prerequisites: 175:190.

**175:300 Thesis/Dissertation** arr.

Repeatable.

**175:996 Occupational Medicine** arr.

In-depth study of an area in occupational and environmental medicine, with clinical experience in an outpatient community setting. Four-week course. Requirements: M.D. enrollment.

# Public Health Genetics

**Interim head:** Leon Burnmeister

**Graduate degree:** Ph.D. in Statistical Genetics

**Graduate nondegree program:** Certificate in Statistical Genetics

## Graduate Programs

The Public Health Genetics Program offers a Doctor of Philosophy and a graduate certificate, both in statistical genetics. Admission to both programs has been suspended.

### Doctor of Philosophy

The Doctor of Philosophy in statistical genetics requires a minimum of 82 s.h. of graduate credit. The program prepares students for professional and academic careers in statistical genetics. It provides training in the development and evaluation of new statistical methods for analyzing human genetic data, and the application of those methods to discovering and understanding the genes underlying human disease. It also prepares students to contribute to collaborative clinical research by providing them with training in genetics and with opportunities to participate in research involving collaboration with molecular and clinical geneticists and genetic epidemiologists.

Students complete a 42 s.h. core; 9-12 s.h. in a concentration area outside statistical genetics (biostatistics/statistics, computer science/bioinformatics, biology/bioinformatics, or epidemiology/biostatistics); up to 25 s.h. of elective course work chosen in consultation with their advisors; and at least 6 s.h. of dissertation credit. They also must successfully complete a comprehensive examination and a dissertation--a substantial scholarly treatise for which they must earn at least 6 s.h. The dissertation research topic and content must be approved by the student's dissertation committee.

Ph.D. requirements are as follows.

#### CORE COURSES

All Ph.D. students must complete the following courses (42 s.h.).

22C:104 Introduction to Informatics	3 s.h.
22S:153 Mathematical Statistics I	3 s.h.
22S:154 Mathematical Statistics II	3 s.h.
070:110 Medical Genetics	2 s.h.
171:201 Biostatistical Methods I	4 s.h.
173:225 Genetics and Epidemiology	4 s.h.
185:272 Population and Quantitative Genetics	3 s.h.
185:274 Theory of Statistical Genetics	3 s.h.
185:276 Statistical Genetics Laboratory (taken three times)	9 s.h.
185:278 Computing Algorithms in Statistical Genetics	3 s.h.
185:285 Clinical Genetics Practicum	1 s.h.
650:270 Principles of Scholarly Integrity	1 s.h.

#### CONCENTRATION AREA

All Ph.D. students complete one of the following concentration areas.

##### Biostatistics/Statistics

Both of these:

171:251 Theory of Biostatistics I	4 s.h.
171:252 Theory of Biostatistics II	4 s.h.

One of these:

22S:138 Bayesian Statistics	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.
22S:248 Computer Intensive Statistics	3 s.h.

171:261 Survival Data Analysis 3 s.h.

#### **Biology/Bioinformatics**

Both of these:

002:128 Fundamental Genetics 4 s.h.

002:170 Bioinformatics 3 s.h.

One of these:

002:131 Evolution 4 s.h.

002:162 Population Genetics and Molecular Evolution 3 s.h.

127:191 Human Molecular Genetics 3 s.h.

#### **Computer Science/Bioinformatics**

All of these:

002:170 Bioinformatics 3 s.h.

06K:272 Database Analysis and Design 3 s.h.

06K:275 Knowledge Discovery 3 s.h.

#### **Epidemiology/Biostatistics**

Both of these:

171:241 Applied Categorical Data Analysis 3 s.h.

173:140 Epidemiology I: Principles 3 s.h.

One of these:

173:255 Epidemiology of Infectious Diseases 3 s.h.

173:265 Cardiovascular Disease Epidemiology 3 s.h.

173:267 Psychiatric Epidemiology 3 s.h.

173:270 Cancer Epidemiology and Control 3 s.h.

#### **ELECTIVES**

Students select up to 25 s.h. of elective courses from this list. They also may substitute other courses with written approval of the program's director and their advisors.

22S:138 Bayesian Statistics 3 s.h.

22S:161 Applied Multivariate Analysis 3 s.h.

22S:255 Linear Models 4 s.h.

171:185 Microarray Data Analysis 3 s.h.

171:261 Survival Data Analysis 3 s.h.

171:262 Analysis of Categorical Data 3 s.h.

171:264 Longitudinal Data Analysis 3 s.h.

185:281 Independent Study in Statistical Genetics arr.

185:295 Research in Statistical Genetics arr.

#### **DISSERTATION**

Students must earn at least 6 s.h. for the dissertation and must be in residence a minimum of two years.

185:300 Dissertation in Statistical Genetics

6 s.h.

## Certificate

The Certificate in Statistical Genetics requires 16 s.h. of graduate credit. The program prepares students for careers as data analysts on research projects involving human genetic data.

The certificate is designed to complement an M.S. in biostatistics or a related field, such as statistics. It can be completed either in conjunction with or after completing an M.S. The certificate cannot be awarded before completion of an M.S.

The certificate requires the following course work. Students must maintain a g.p.a. of at least 3.00 in the required courses.

070:110 Medical Genetics	2 s.h.
173:225 Genetics and Epidemiology	4 s.h.
185:276 Statistical Genetics Laboratory	3 s.h.
185:280 Preceptorship in Statistical Genetics (must be approved by the head of the Program in Public Health Genetics)	3 s.h.
185:285 Clinical Genetics Practicum	1 s.h.

## Admission

Admission to the Ph.D. in statistical genetics has been suspended.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Public Health Genetics Courses

185:272 Population and Quantitative Genetics	3 s.h.
185:274 Theory of Statistical Genetics	3 s.h.
185:276 Statistical Genetics Laboratory	3 s.h.
185:278 Computing Algorithms in Statistical Genetics	3 s.h.
185:280 Preceptorship in Statistical Genetics	arr.
185:281 Independent Study in Statistical Genetics	arr.
185:285 Clinical Genetics Practicum	1 s.h.
Clinical case conferences, participation in clinical genetics journal club. Prerequisites: 650:270. Corequisites: 070:110. Requirements: statistical genetics Ph.D. standing.	
185:290 Statistical Genetics Seminar	1 s.h.
185:295 Research in Statistical Genetics	arr.
185:300 Dissertation in Statistical Genetics	arr.

# University College

**Dean:** Beth F. Ingram

University College is home to a wide range of programs for University of Iowa students and precollege students. It includes major college-level programs such as the University of Iowa Honors Program, Study Abroad, Career Center Programs, and study at Iowa Lakeside Laboratory.

University College offers a program leading to the Bachelor of Applied Studies (B.A.S.), which is designed for graduates of community college technical programs who wish to complete a bachelor's degree by distance education. The B.A.S. provides alternatives to traditional majors. Students work with their advisors to plan their own emphasis areas, which may help them advance in their chosen careers, begin new careers, or prepare for graduate or professional study.

The college also offers undergraduate certificate programs in Leadership Studies, Nonprofit Management, and Sustainability.

Some University College programs are designed to smooth entering students' transition to college life, such as the College Success Initiatives program and the First-Year Programs, or to provide opportunities for populations underrepresented in the sciences and engineering, such as Iowa Biosciences Advantage.

Lifetime Leisure Skills courses in a broad range of sport and fitness activities are offered through University College, as are special courses for student orientation advisors, residence hall assistants, fraternity and sorority community leaders, and students who design web sites for University departments and offices.

The University's Reserve Officer Training Corps programs, Aerospace Studies and Military Science, reside in University College.

In addition, University College offers courses in several precollege programs: the Belin-Blank Center for Gifted Education, the Center for Diversity & Enrichment, the Iowa Young Writers' Studio, the Secondary Student Training Program, and University of Iowa Upward Bound.

Courses offered through University College programs are taught by University of Iowa faculty and staff members.

## Aerospace Studies (Air Force ROTC)

**Head:** Lt. Col. Steven R. Nielsen

**Assistant professors:** Capt. Chris Klaiber, Capt. Randy Larson

**Web site:** <http://www.uiowa.edu/~afrotc>

The Aerospace Studies Program administers the Air Force Reserve Officer Training Corps (AFROTC) at The University of Iowa. AFROTC educates highly qualified students who are working toward a degree and a commission as an officer in the United States Air Force.

AFROTC is voluntary, with courses open to all undergraduate and graduate students. The amount of AFROTC academic credit that may be applied toward a degree varies from college to college at the University. The College of Liberal Arts and Sciences, for example, accepts a maximum of 20 s.h.

In order to receive a commission, AFROTC cadets must complete all University of Iowa requirements for a degree as well as courses specified by the U.S. Air Force.

### Programs

AFROTC offers programs lasting two years, three years, and four years. Joining early gives students the opportunity to try AFROTC without obligation. It also can give them an advantage in the scholarship selection process.

The AFROTC program's three main components are the general military course (GMC), the professional officer course (POC), and field training (FT).

#### General Military Course

The general military course (GMC) consists of one AFROTC course (1 s.h.) and a leadership laboratory taken each semester for two years. Any student who meets AFROTC qualifications and is in good academic standing is eligible to participate in the GMC. Students normally apply for the GMC up to the time they earn 60 s.h. Students who have earned more than 60 s.h. may enroll in the GMC if they are willing to extend their academic plan by a semester or more.

#### Professional Officer Course

The professional officer course (POC) consists of one AFROTC course (3 s.h.) and a leadership laboratory taken each semester for two years. Students accepted into the POC make a commitment to serve a minimum of four years as U.S. Air Force officers. To enter the POC, students must be selected to attend and must successfully complete field training. Students generally take the POC during their last 60 s.h.

#### Field Training

All POC applicants must successfully complete field training at a U.S. Air Force base. Field training is an intensive, four-week program completed the summer after the sophomore year. It provides a first-hand look at the active duty Air Force and develops military leadership and discipline. Students participate in aircraft and aircrew orientation, junior officer education, marksmanship, survival training, and physical fitness training. When they complete the program, they are ready to return to school and assume a leadership position in the AFROTC program.

Students receive authorized pay and allowances when they attend field training.

#### Activities

Students have the option to compete for acceptance to a variety of optional AFROTC summer training programs. They can shadow a junior officer in a career field of interest, or they can compete to attend the Air Force Academy's free-fall parachute, glider, or combat survival schools. Students can return to field training as cadet training assistants, go to the Pentagon to see how the Air Force operates, or travel to a foreign country for a cultural immersion program. The Air Force provides transportation, meals, lodging, and a daily expense allowance for all summer programs.

Throughout the year, students may learn more about the Air Force by choosing to participate in base visits, aircraft orientation rides, a Dining Out (a formal ball in Air Force tradition), and other activities.

The AFROTC Cadet Corps also sponsors many social events, including informal parties, formal dinners, and intramural athletics.

#### Education Delay

Cadets may request an education delay to postpone entry to active duty until after completion of an advanced degree or professional training program.

## Financial Aid

Merit scholarships are available for one, two, and three years of study. They provide tuition, fees, a \$900 stipend for books, and a tax-free subsistence allowance of \$300-500 per month. Applicants are selected based on objective and subjective factors. Students should apply directly to the head of aerospace studies. Students majoring in certain high-demand disciplines may be eligible for an express scholarship upon acceptance to AFROTC.

All cadets in the last two years of AFROTC are eligible for some financial assistance. They receive a tax-free subsistence allowance of \$450-500 per month. Uniforms are furnished as well as all books for AFROTC classes.

## Aerospace Studies Courses

- 23A:010 Foundations of the U.S. Air Force I** 1 s.h.  
Introduction to U.S. Air Force: military customs and courtesies, basic oral and written communication techniques, careers available to Air Force officers. Requirements: first-year or sophomore standing.
- 23A:011 AFROTC Leadership Laboratory (LLAB) AS 100-FA** 1 s.h.  
A progression of experiences designed to develop leadership ability; military customs and courtesies, drill and ceremonies, military professional development, the life and work of a junior officer; leadership skills in a practical, supervised military lab setting. Offered fall semesters. Corequisites: 23A:010. Requirements: first-year or sophomore standing.
- 23A:012 Foundations of the U.S. Air Force II** 1 s.h.  
Continuation of 23A:010; leadership theory and practice, team building, diversity in the work force. Requirements: first-year or sophomore standing.
- 23A:013 AFROTC Leadership Laboratory (LLAB) AS 100-SP** 1 s.h.  
A progression of experiences designed to develop leadership ability; military customs and courtesies, drill and ceremonies, military professional development, the life and work of a junior officer; leadership skills in a practical, supervised military lab setting. Offered spring semesters. Corequisite: 23A:012. Requirements: first-year or sophomore standing.
- 23A:020 Evolution of USAF Air and Space Power I** 1 s.h.  
Air power from Civil War hot air balloons through World War II; emphasis on developments in U.S. Air Force.
- 23A:021 AFROTC Leadership Laboratory (LLAB) AS 200-FA** 1 s.h.  
See 23A:011. Offered fall semesters. Corequisites: 23A:020.
- 23A:022 Evolution of USAF Air and Space Power II** 1 s.h.  
Continuation of 23A:020; air power from post-World War II to present; emphasis on developments in U.S. Air Force.
- 23A:023 AFROTC Leadership Laboratory (LLAB) AS 200-SP** 1 s.h.  
See 23A:011. Offered spring semesters. Corequisites: 23A:022.
- 23A:130 Air Force Leadership Studies I** 3 s.h.  
Emphasis on management, leadership, communication skills required of an Air Force officer. Requirements: junior or higher standing.
- 23A:131 AFROTC Leadership Laboratory (LLAB) AS 300-FA** 1 s.h.  
See 23A:011. Offered fall semesters. Corequisites: 23A:130.
- 23A:132 Air Force Leadership Studies II** 3 s.h.  
Continuation of 23A:130; leadership topics in counseling, accountability, ethics. Requirements: junior or higher standing.

**23A:133 AFROTC Leadership Laboratory (LLAB) AS 300-SP**

1 s.h.

See 23A:011. Offered spring semesters. Corequisites: 23A:132.

**23A:140 National Security Affairs and Active Duty Preparation I**

3 s.h.

America's evolving national security policy; structure of national security agencies, development of national security strategies; global regions and their historical and current importance to U.S. security policies. Requirements: junior or higher standing.

**23A:141 AFROTC Leadership Laboratory (LLAB) AS 400-FA**

1 s.h.

See 23A:011. Offered fall semesters. Corequisites: 23A:140.

**23A:142 National Security Affairs and Active Duty Preparation II**

3 s.h.

Continuation of 23A:140; Department of Defense structure, missions, and responsibilities, with emphasis on role of the U.S. Air Force; Air Force standards; preparation for active duty as Air Force junior officers. Requirements: junior or higher standing.

**23A:143 AFROTC Leadership Laboratory (LLAB) AS 400-SP**

1 s.h.

See 23A:011. Offered spring semesters. Corequisites: 23A:142.

**23A:150 Readings in Contemporary Military Issues**

1-4 s.h.

Independent research on the U.S. Air Force; historical topics, current missions, future technologies, comparisons to other nations.

## Bachelor of Applied Studies

**Coordinator:** Nancy Romine  
**Undergraduate degree:** B.A.S.  
**Web site:** [http://continuetolearn.uiowa.edu/ccp/blsbas/bas\\_introduction.htm](http://continuetolearn.uiowa.edu/ccp/blsbas/bas_introduction.htm)

The Bachelor of Applied Studies (B.A.S.) is designed for graduates of community college technical programs who wish to complete a bachelor's degree by distance education. The B.A.S. is a general undergraduate degree without a traditional academic major. Students work with their academic advisors to structure programs that meet their individual objectives.

B.A.S. students may plan programs designed to help them advance in their chosen careers, begin new careers, or prepare for graduate or professional study. Students who have specific career goals or advanced degree programs in mind should learn what educational background they will need in order to achieve their goals, and they should include appropriate course work in their B.A.S. programs.

Students may earn credit toward the degree through several types of courses, including Saturday & Evening Classes, web-based independent study courses, semester-based web courses, extension courses at sites throughout Iowa, and regular session courses.

B.A.S. students may not earn minors.

Individuals interested in applying to the B.A.S. program should hold an A.A.S., an A.A., or an A.S. degree; see "Admission" below for more detailed admission requirements.

The B.A.S. is awarded by University College and is administered by the Division of Continuing Education.

### Bachelor of Applied Studies

The Bachelor of Applied Studies requires a minimum of 120 s.h. and is intended to be completed entirely by distance education. Students must earn at least 30 s.h. of credit toward the degree in University of Iowa courses after admission to the B.A.S. program. They must earn at least 60 s.h. of the minimum 120 s.h. at four-year colleges, including 45 s.h. in course work defined as upper-level. For the B.A.S., University of Iowa courses are considered upper-level if they are numbered 100 and above. Some courses numbered below 100 may be considered upper-level for the B.A.S.; for a list of these courses, contact Distance Education.

The program of study requires that students complete 12 s.h. in three of the following five distribution areas (total of 36 s.h.). In each distribution area, 6 of the required 12 s.h. must be earned in upper-level courses.

Humanities (e.g., literature, history, philosophy, religion)

Communication and arts (e.g., journalism, speech, drama, art, music)

Natural sciences and mathematics (e.g., geology, biology, statistics, computer science)

Social sciences (e.g., geography, psychology, economics, political science, anthropology)

Professional fields (e.g., business, education, nursing, social work, library science)

Students must maintain a cumulative g.p.a. of 2.00 or higher in all course work attempted, work undertaken at The University of Iowa, and all upper-level course work.

All Division of Continuing Education policies regarding pass/nonpass and satisfactory/fail grading, academic standards, and so forth apply to B.A.S. students; see the Center for Credit Programs Student Handbook.

### Optional Certificate or Focus Area

Students may incorporate one of three online certificate programs into their B.A.S. studies: the Certificate in Entrepreneurial Management, the Certificate in Nonprofit Management, or the Certificate in Public Health. Or they may use an interdisciplinary approach to plan an individualized focus area.

#### CERTIFICATE IN ENTREPRENEURIAL MANAGEMENT

The Certificate in Entrepreneurial Management is offered by the Tippie College of Business. It requires 18-20 s.h. Courses are offered via the World Wide Web. See Entrepreneurship (Tippie College of Business) in the Catalog or contact the Tippie College of Business for details.

#### CERTIFICATE IN NONPROFIT MANAGEMENT

The Certificate in Nonprofit Management is offered by University College in collaboration with Distance Education and

the Larned A. Waterman Iowa Nonprofit Resource Center. The certificate requires 18 s.h. Courses are offered primarily on the World Wide Web. See Nonprofit Management (University College) in the Catalog or contact Distance Education for details.

#### **CERTIFICATE IN PUBLIC HEALTH**

The Certificate in Public Health is offered by the College of Public Health and is designed primarily for individuals working in public health practice and for those considering public health careers. The certificate requires 12 s.h. Courses are offered via the World Wide Web. Applicants must have substantial relevant work experience. Contact the College of Public Health for details.

#### **INTERDISCIPLINARY FOCUS AREA**

In collaboration with their B.A.S. advisor, students may design a focus in one of a variety of interdisciplinary areas (e.g., aging studies, human services, technical writing, family studies).

#### **Admission**

Individuals who wish to earn a B.A.S. must apply formally for admission to the program. Prospective students should contact the Distance Education office before applying.

The B.A.S. is designed for students who need to earn a bachelor's degree by distance education. Individuals who have access to the full range of the University's on-campus daytime classes should seek admission to the College of Liberal Arts and Sciences in order to earn a degree with a major. The interdepartmental studies major allows students to tailor a degree program to their individual interests (see Interdepartmental Studies in the Catalog).

Applicants to the B.A.S. program must have earned an Associate of Applied Science (A.A.S.) degree, an Associate of Arts (A.A.), or an Associate of Science (A.S.) from a community college that participates in the Iowa Community College/Regents Articulation Agreement. They must have a minimum of 60 s.h. of approved transfer credit. Applicants who graduated from an Iowa community college must have a cumulative g.p.a. of at least 2.00; those who graduated from a community college outside Iowa must have a cumulative g.p.a. of at least 2.50. The program recommends that applicants have three or more years of work experience.

It is recommended that B.A.S. applicants complete the following B.A.S. minimum core requirements before entering the program.

Rhetoric (course work equivalent to composition I, composition II, and speech)

Quantitative or formal reasoning (3 s.h.)

Social sciences (3 s.h.)

Cultural diversity (3 s.h.)

Business/management (6 s.h.)

See a B.A.S. advisor for a list of other acceptable courses.

Contact Distance Education for more information about the B.A.S. program.

The Connie Belin & Jacqueline N. Blank International Center for Gifted Education and Talent Development is dedicated to serving the needs of the gifted community at local, national, and international levels. It offers courses for preservice and inservice educators, services for parents, and programs for students grades K–16, including those described below. The center is home to the Assessment and Counseling Clinic, the Institute for Research and Policy on Acceleration (IRPA), and the National Institute for Twice-Exceptionality (NITE).

The Belin-Blank Center offers the following residential summer programs held on the University of Iowa campus. Students in each program participate in cultural and recreational activities and have access to the University's libraries, computer facilities, and study areas. Housing and meals are provided at the University's residence halls.

For more information about the center's programs, contact the Belin-Blank Center for Gifted Education and Talent Development or visit the center's web site.

## Blank Summer Institute

The Blank Summer Institute for the Arts & Sciences (BSI) is a one-week program that provides an intensive, advanced educational experience designed to enhance exceptionally talented students' intellectual and social growth. The BSI study plan, which complements the regular school curriculum, consists of eight courses that explore advanced science, math problem solving, social sciences, creative writing, invention and innovation, visual arts, performing arts, and global and cultural studies.

To be eligible for the institute, students must be Iowa residents, must be completing grade 7 or 8, and must be nominated by their schools. Students selected for the institute receive a Myron and Jacqueline Blank Summer Scholarship to cover part of the institute's cost.

## Iowa Governor's Institute

The Iowa Governor's Institute for the Gifted and Talented (IGI) is a one-week program that provides an intensive, advanced educational experience designed to enhance exceptionally talented students' intellectual and social growth as leaders.

To be eligible for the institute, students must be Iowa residents, must be completing grade 7 or 8, and must submit a nomination packet. Students selected for the institute receive a Governor's Scholarship to cover part of the institute's cost.

## Junior Scholars Academy

The Junior Scholars Academy (JSA) is a one-week program in which students take a single advanced course and attend 12 class sessions over the week. JSA students may apply to attend one or two of the one-week sessions. Financial support is available.

## National Scholars Institute

The National Scholars Institute (NSI) is a one-week program that provides an advanced educational experience designed to enhance the development of talent in one advanced-level course and to encourage positive social interaction. Students select one of the following four courses: Visual Arts Studio, Creative Writing, Asian and Pacific Studies, or Advanced Leadership.

To be eligible for the institute, students must be completing grade 9, 10, or 11 and must submit a nomination packet. Students selected for the institute receive a scholarship to cover part of the institute's cost.

## Iowa Talent Project

The Belin-Blank Center collaborates with the Des Moines and Cedar Rapids school districts through the Iowa Talent Project (ITP) to identify talented and gifted students from underrepresented populations who are taking upper-level or advanced courses as they progress through secondary school. The project's goal is to help students recognize their potential and take advantage of rigorous courses of study that challenge them.

Participants attend a residential summer program at The University of Iowa that focuses on college preparation. In addition to enjoying recreational and cultural experiences on campus, they complete advanced placement (AP) courses and take at least three AP exams. The cost of attending the session is covered by the University.

Upon finishing high school, successful ITP students are admitted to The University of Iowa and are given financial aid based on need and merit. Once enrolled at the University, students must maintain a designated grade-point average

while taking approved courses as full-time students and must meet other specified requirements.

## Career Center Programs

**Director:** David Baumgartner  
**Web site:** <http://www.careers.uiowa.edu>

The University of Iowa Marvin A. and Rose Lee Pomerantz Career Center administers the University's Career Center Programs. The center helps students explore and plan careers, search for employment and internship opportunities, and prepare for interviews. Students may use the Pomerantz Career Center's services at any time during their academic careers, but the center encourages entering first-year and transfer students to visit after they arrive on campus and to make use of all of the center's services throughout their study at Iowa.

The center offers online workshops throughout the year on a variety of topics, including résumé writing, job and internship search techniques, employer research, interviewing skills, and more. It hosts several career fairs each fall and spring, offering students the opportunity to talk with and learn about prospective employers.

The Pearson Library contains career-related books, periodicals, and online resources--some broad in scope, others targeted to specific careers or jobs. Employer recruiting brochures join information on salaries, geographical cost of living, resources for jobs and internships, graduate schools, and other topics.

The Pomerantz Career Center facilitates job and internship interviewing with a wide range of employers--regional, national, and international; profit and nonprofit; state and federal government. Employers conduct on-campus interviews at specific times during the year, and many post immediate openings year-round, for internships and for full-time positions. On-campus recruiting and job postings are available on the center's web site. The center also offers career-related courses.

The center helps students find internships in Iowa, the Midwest, nationwide, and sometimes in other countries. For a list of discipline-related internships (all require course registration), see "Career Center Programs Courses"/"Internships" below.

For more information about the center's services and facilities, contact the Pomerantz Career Center.

# Human Rights

**Director:** Greg Hamot

**Undergraduate nondegree program:** Certificate in Human Rights

**Web site:** <http://international.uiowa.edu/centers/human-rights/education/humanrightscertificate.asp>

Human rights concern the inherent dignity of all human beings and the promotion and protection of that dignity irrespective of race, color, gender, sexual orientation, religion, culture, nationality, birth, or other statuses. The Certificate in Human Rights program seeks to broaden students' understanding of human rights issues and to help them identify solutions using an interdisciplinary approach.

Course work for the certificate is drawn from units across the University. It prepares students to examine societal problems critically and to design specific solutions to human rights dilemmas in a wide range of areas, for example, civil governance, the situations of women and racial and sexual minorities, child welfare, socioeconomic development and well-being, hunger and poverty, education, health, immigration, ecological sustainability, and mass violence.

## Certificate

The Certificate in Human Rights requires 18 s.h. of credit, with a g.p.a. of at least 2.00. Students take two core courses and complete the certificate requirements with approved electives (see "Elective Courses" below).

Certificate courses may be used to fulfill requirements of the College of Liberal Arts and Sciences General Education Program or requirements of a major or minor. Students may count a maximum of 6 s.h. of transfer credit toward the certificate; they must have approval from the certificate program's faculty advisory group. A maximum of 3 s.h. of credit earned under satisfactory/unsatisfactory grading may be counted toward the certificate.

Current University of Iowa undergraduate students may complete the certificate as they work toward their bachelor's degree; the certificate is awarded upon completion of the degree. Holders of University of Iowa bachelor's degrees may return to the University to complete the certificate. Individuals who hold bachelor's degrees from other institutions and are not enrolled in a graduate or professional program at The University of Iowa may earn the certificate; they must apply for admission to the College of Liberal Arts and Sciences.

The Certificate in Human Rights requires the following course work.

### CORE COURSES

Philosophical foundations and contemporary issues in human rights—one of these (students who wish to take both courses may use one as a certificate elective):

091:193 Human Rights in the World Community 3 s.h.

187:080 Introduction to Human Rights 3 s.h.

Human rights in practice—all students must take this course:

187:180 Human Rights Advocacy 3 s.h.

### ELECTIVE COURSES

Certificate students must earn 12 s.h. of credit in elective course work chosen from the following lists. The courses below are grouped by theme to help students choose electives that meet their interests and objectives, but some courses could fit into more than one of these groupings. Each course's content is described on ISIS.

Students who would like to take a course not included in the following lists may submit a petition to the certificate's faculty advisory group. The petition should state the course's number and name and tell why the student wishes to include the course in his or her certificate electives. The petition should be submitted before the preregistration period for the session in which the course will be offered. Students must receive approval from the advisory group in order to count the course toward the certificate. Many courses have prerequisites, and some require enrollment in certain programs or colleges; students should consult the certificate program advisor to be sure they meet the registration requirements for the course they are petitioning to count toward the certificate.

Iowa Biosciences Advantage (IBA) is a highly competitive undergraduate research and academic enrichment program funded by the National Institutes of Health. The program identifies academically talented undergraduate, underrepresented minority students who aspire to research careers and gives them first-rate training that facilitates entry into doctoral programs in biomedical, behavioral, and biophysical sciences.

Iowa Biosciences Advantage students have opportunities to work in research laboratories with faculty mentors during the course of their undergraduate careers. The program's faculty represents a broad range of disciplines in the basic and biomedical sciences. IBA students also benefit from specialized course work, career workshops, and academic advising for biomedical and bioscience careers.

Students selected for IBA must maintain good standing in academics and research. Good academic standing requires a g.p.a. of at least 3.00 and is evaluated at the end of each semester. Good research standing is determined by each student's research mentor. Students work with their mentors throughout the academic year and summer.

### STUDENTS ACCEPTED FROM HIGH SCHOOL

Students admitted to IBA from high school spend their first year at The University of Iowa establishing good academic standing and conducting laboratory rotations.

During fall semester, IBA students enroll in 407:001 The College Transition (2 s.h., graded satisfactory/unsatisfactory), which covers topics such as defining college culture, discovering University resources, refining study skills, taking tests, and setting goals.

During spring semester, IBA students enroll in two courses. They take 168:041 IBA Student Development Seminar (1 s.h.), an extension of subject matter introduced in The College Transition. They also take a special section of 168:047 IBA Research in Biomedical Science (0 s.h.) and complete two research rotations. The rotations, which are set up by IBA staff, introduce students to laboratory research at the University.

At the end of the first year, each student is evaluated for admission to the IBA Scholar Program. Students selected as IBA scholars remain on campus for the eight-week summer session and continue in the program throughout the year. They earn wages for laboratory work with their research mentors, live in the IBA Summer Learning Community, and participate in IBA events.

### STUDENTS ACCEPTED FROM COLLEGE

Applications also are accepted from current University of Iowa undergraduates majoring in the sciences as well as students transferring to Iowa. Students accepted to IBA during their first, second, or third year of college join the appropriate cohort of IBA scholars. During their first semester of participation, new undergraduates complete lab rotations and establish good academic standing. They also enroll in 168:041 IBA Student Development Seminar. Once students are matched with a research mentor, they earn wages for their laboratory work during summer and the academic year.

### Admission

Students apply to Iowa Biosciences Advantage during their senior year of high school or once they are undergraduate students.

Applicants must:

- have a strong interest in pursuing a research career;
- have a qualifying academic major;
- be in good academic standing;
- submit an IBA application, including short essays and a release for IBA to obtain the applicant's transcripts; and
- submit one letter of recommendation from a science or math instructor.

Admission requires an interview. Admission decisions are made throughout the year.

### Faculty

Faculty members from the University's broad range of basic and biomedical science disciplines serve as teachers and mentors to IBA students. They represent many departments, including anatomy and cell biology, biochemistry, biology,

biomedical engineering, chemistry, integrative physiology, microbiology, molecular physiology and biophysics, neuroscience, and psychology.

## Iowa Biosciences Advantage Courses

### **168:039 Introduction to Laboratory Techniques**

2 s.h.

Exercises that teach basic laboratory techniques through experimentation with biological materials; preparation for conducting research in the mentor's laboratory.

### **168:041 IBA Student Development Seminar**

0-1 s.h.

Academic and professional development; presentations by faculty researchers, admissions representatives, or students in graduate bioscience programs; discussions about succeeding at the University; talks by professional educators on topics such as effective study skills.

### **168:047 IBA Research in Biomedical Science**

arr.

Registration in a section taught by the student's research mentor. Requirements: enrollment in IBA.

## Iowa Lakeside Laboratory

**Director:** Peter J. van der Linden

**University of Iowa coordinator:** Diana Horton (Biology)

**Iowa State University participating faculty:** Bonnie S. Bowen (Ecology, Evolution, and Organismal Biology), Lee Burras (Agronomy)

**University of Iowa participating faculty:** John F. Doershuk (Anthropology)

**University of Northern Iowa participating faculty:** John R. Groves (Earth Science), Thomas Hockey (Earth Science), Lee S. Potter (Earth Science), Daryl D. Smith (Biology), De Anna Tibben (Earth Science)

**Web site:** <http://www.continuetolearn.uiowa.edu/lakesidelab/>

Iowa Lakeside Laboratory is a field station run cooperatively by The University of Iowa, Iowa State University, and the University of Northern Iowa. Iowa Lakeside Laboratory courses can be taken for credit through all consortium member schools. Students should check with their advisors to determine whether Iowa Lakeside Laboratory courses can be used to satisfy requirements of their academic majors or minors, or college or university general education requirements.

The laboratory was established in 1909 for the conservation and study of the rich flora and fauna of northwest Iowa, especially the numerous lakes, wetlands, and prairies of the Iowa Great Lakes region. The campus is located on approximately 140 acres of restored prairie, wetland, and gallery forest along the west shore of West Okoboji Lake. Lakeside's mission is to provide undergraduate and graduate students an opportunity for hands-on experience in a variety of natural and human environments through its field-oriented summer courses, and to provide research facilities and support for graduate students and faculty members working on research projects in northwestern Iowa.

Each summer Iowa Lakeside Laboratory offers students a unique educational experience--small, full-immersion, field-oriented courses in the natural sciences (archaeology, ecology, environmental science, evolution, geology, hydrology, soils, taxonomy). Courses are taught at the undergraduate level (sophomore and junior) and the senior/graduate level. Most courses meet all day Monday through Friday, last four weeks, and are limited to eight to ten students. Students usually earn 1 s.h. for each week (40 hours) in class. One- and two-week courses also are available, including courses designed especially for teachers.

Weather permitting, students normally spend at least part of each day doing fieldwork, either as part of their class work or for individual or group projects.

Not all courses are offered every year; visit the Iowa Lakeside Laboratory web site or consult the University of Iowa summer course offerings on ISIS (Iowa Student Information Services) to learn which courses will be offered during a particular summer session.

Research projects by undergraduates, graduate students, and faculty members can be completed either on the Iowa Lakeside Laboratory campus or at many nearby natural areas. Undergraduate and graduate students are strongly encouraged to do independent projects at the laboratory, and graduate students are welcome to use Lakeside as a base for their thesis and dissertation research. Laboratory space and other facilities are available for long-term or short-term research projects.

Teaching and research facilities include eight laboratory buildings, a library, and a lecture hall. Living accommodations include cottages, motel-style units, and a large mess hall. All students are encouraged to stay at Lakeside while they are taking courses to derive full advantage of its educational, professional, and social life.

## Registration

Students can enroll in Iowa Lakeside Laboratory courses only by submitting an Iowa Lakeside Laboratory Registration and Scholarship Form and the Lakeside housing form to the Iowa Lakeside Laboratory Administrative Office. Forms and information on registration and current courses are available on the Iowa Lakeside Laboratory web site.

Early registration is advisable. Because enrollment in Lakeside courses is limited, students should register before May 1 for the following summer session. Housing is limited at Lakeside. When students register for courses, they must either apply for housing or state that they plan to live off campus.

## Financial Support

Iowa Lakeside Laboratory scholarships are available to undergraduates and graduate students. Scholarships cover basic room and board; in some cases, they help reduce the cost of tuition. For information about how to apply for Iowa Lakeside Laboratory scholarships, see the Iowa Lakeside Laboratory web site. For information about other scholarships, work-study, and loan programs, consult the Office of Student Financial Aid.

The University of Iowa provides Thomas H. Macbride Scholarships in Natural Science for qualified students attending Lakeside. Application deadline is April 1.

## Iowa Lakeside Laboratory Courses

- 00L:010 Earth, Air, and Sky** 3 s.h.  
Essentials of earth science, including astronomy, meteorology, geology, and paleontology; includes laboratory and fieldwork.
- 00L:019 Soils and Environmental Quality** 3-4 s.h.  
The role of soils in environmental quality and natural resources management; soil erosion and conservation, water quality, environmental planning; weekend field trip.
- 00L:030 Natural History Workshop** 1-2 s.h.  
A specific aspect of the upper Midwest's natural history, or techniques for studying natural history; amphibians and reptiles, birds and birding, nature photography, mushrooms and other fungi, Iowa's trees and forests, fish biology, prairies, common algae, common insects, aquatic plants, life in rivers, life in lakes, mosses and liverworts, natural history of Iowa Great Lakes region, field archaeology, scuba diving, astronomy, nature sketching; five-day, nontechnical introductions.
- 00L:040 Archaeology** 4 s.h.  
Nature of cultural and environmental evidence in archaeology, how such evidence is used to model past human behavior and land use; emphasis on Iowa prehistory; basic reconnaissance surveying, excavation techniques.
- 00L:043 Illustrating Nature--Sketching** 2 s.h.  
Sketching plants, animals, terrain; visual communication, development of a personal style, integration of typographic and visual elements on a page.
- 00L:044 Illustrating Nature--Photography** 2 s.h.  
Beginning/intermediate technique and composition in color photography of natural areas, their plants and animals.
- 00L:050 Undergraduate Internship** 1-4 s.h.  
Placement with county conservation boards, camps, parks, and other agencies for experience as interpreters, rangers, technicians. Requirements: sophomore standing.
- 00L:064 Biology of Aquatic Plants** 4 s.h.  
Field-oriented introduction to the taxonomy and ecology of aquatic plants in lakes, wetlands, rivers; individual or group projects.
- 00L:100 Techniques for Biology Teaching** 1-2 s.h.  
Development and implementation of laboratory exercises suitable for inclusion in elementary, middle, high school, and community college biology and environmental courses; exercises built around common organisms and ecosystems in Iowa; animal biology, plant biology, fungi and lichens, aquatic ecology, prairie ecology, wetland ecology, limnology, animal behavior, insect ecology, biology of invertebrates, noninvasive use of living organisms, Project WET; field trips.
- 00L:102 Plant-Animal Interactions** 4 s.h.  
Introduction to ecology and co-evolution of plants and animals; emphasis on dispersal, pollination, plant-herbivore interactions; field and laboratory work, reading, discussion. Requirements: one biological science course.
- 00L:103 Aquatic Ecology** 4 s.h.  
Analysis of aquatic ecosystems; emphasis on basic ecological principles; ecological theories tested in the field; identification of common plants and animals. Requirements: ecology, chemistry, and physics courses.
- 00L:105 Plant Taxonomy** 4 s.h.  
Principles of classification and evolution of vascular plants; taxonomic tools and collection techniques; use of keys; field and laboratory studies emphasizing identification of local flowering plants, recognition of major plant families.
- 00L:109 Freshwater Algae** 4 s.h.  
Structure and taxonomy of freshwater algae based on field material collected; emphasis on genus-level identifications; habitat visits to lakes, fens, streams, rivers; algal ecology.

**00L:111 Summer Writing Festival at Iowa Lakeside Laboratory**

1 s.h.

Application of imagination to life experiences to become more effective writers; writing exercises invite imaginative leaps, thoughtful reflections, humor, and seriousness; participants work in various forms of expression, including personal essay, poetry, and short fiction; designed for young adult to adult writers of all levels. One week.

**00L:113 Undergraduate Independent Study**

1-4 s.h.

Requirements: junior or senior standing.

**00L:115 Field Mycology**

4 s.h.

Identification and classification of the common fungi; techniques for identification, preservation, and culture practiced with members of the various fungi groups.

**00L:117 Ecology and Systematics of Diatoms**

4 s.h.

Field and laboratory study of freshwater diatoms; techniques in collection, preparation, and identification of diatom samples; study of environmental factors affecting growth, distribution, taxonomic characters; project design and execution, including construction of reference and voucher collections; data organization and analysis.

**00L:119 Evolution**

4 s.h.

Mechanisms and patterns in microevolution, macroevolution; field exercises emphasizing studies of natural selection, adaptation, genetic variation, and population genetics of local plant, animal populations.

**00L:120 Freshwater Invertebrates**

4 s.h.

Field-oriented introduction to identification, life history, and ecology of common, free-living freshwater invertebrates of north-temperate lakes, rivers, wetlands; emphasis on invertebrates' role in aquatic food chains and litter processing. Requirements: an ecology course.

**00L:121 Plant Ecology**

4 s.h.

Principles of plant population, community, and ecosystem ecology illustrated through studies of native vegetation in local prairies, wetlands, forests; group or individual projects.

**00L:122 Prairie Ecology**

4 s.h.

Basic patterns, underlying physical and biotic causes of regional and local distributions of North American prairie plants and animals; field and laboratory analysis and projects. Prerequisite: familiarity with basic principles of biology and ecology.

**00L:124 Wetland Ecology**

4 s.h.

Ecology, classification, creation, restoration, and management of wetlands; field studies on composition, structure, and function of local natural wetlands, restored prairie pothole wetlands; individual or group projects. Prerequisites: 00L:031.

**00L:126 Ornithology**

4 s.h.

Biology, ecology, and behavior of birds; emphasis on field studies of local avifauna; group projects with focus on techniques of population analysis and methodology for population studies.

**00L:127 Introduction to Insect Ecology**

4 s.h.

Insects; their diversity and life history; emphasis on ecology and behavior; field, laboratory study.

**00L:128 Fish Ecology**

4 s.h.

Basic principles of fish interaction with biotic and abiotic environments; field methods, taxonomy, and biology of fish with emphasis on the fish fauna of northwestern Iowa.

**00L:129 Vertebrate Ecology and Evolution**

4 s.h.

Field and laboratory study of representative vertebrates of northwestern Iowa; observations and experimentation emphasize ecological histories by integrating concepts of functional morphology, behavioral ecology, evolutionary biology.

**00L:131 Ecology**

4 s.h.

Introduction to the principles of ecology at the population, community, ecosystem levels; field studies of local lakes, wetlands, and prairies used to examine factors that control distributions, interactions, and roles of plants and animals in native ecosystems. Requirements: two semesters of introductory biology.

**00L:133 Animals and Their Ecosystems**

4 s.h.

Vertebrate and invertebrate animals of the Midwest; observation of animals in nature, either through passive observational techniques or active trapping exercises; once identified, placement of animals in proper taxonomic position (i.e., "Tree of Life"); ecological perspective, including habitat preferences (i.e., wetland, lake, prairie, forest, river, edge), trophic position, and activity patterns; discussion and emphasis on conservation status. Requirements: introductory biology course.

**00L:135 Aquatic Toxicology and Wetland Dynamics in Freshwater Systems**

2-4 s.h.

Fundamental knowledge and understanding of scientific concepts related to the physio-chemical and biological environment; problems and issues (global, national, regional, and local) of freshwater systems; how wetland restoration is used to ameliorate problems; basic tools used to assess aquatic toxicological problems. Requirements: one year of biology and one year of chemistry.

**00L:140 Water Policy and Politics**

1 s.h.

Historical, legal, economic, cultural, and political dimensions of water resources; public perception and enjoyment of this abundant and important natural resource; how public policy developed; private rights; differences between the previous appropriation system in the western U.S. and eastern riparian rights law; public rights regarding water for navigation, recreation, and environmental protection; water-related institutions such as suppliers of municipal water and irrigation water; interbasin transport of water.

**00L:142 Watershed Hydrology and Surficial Processes**

4 s.h.

Effects of geomorphology, soils, and land use on transport of water and materials (nutrients, contaminants) in watersheds; fieldwork emphasizing investigations of the Iowa Great Lakes watershed. Requirements: four courses in physical or biological sciences or engineering.

**00L:144 Ecosystems of North America**

2-4 s.h.

Extended field trip for study of an ecosystem type (e.g., prairie, coastal wetland, forest, alpine, coral reef) or the ecosystems of a specific region (e.g., Rocky Mountains, Gulf Coast, Appalachian Mountains, deserts of the Southwest, Central America); pre-trip orientation, post-trip review and synthesis. Field trip fee. Requirements: an ecology course.

**00L:151 Analysis of Environmental Data**

2 s.h.

Theory and application of statistical techniques for analysis of ecological and paleoecological data.

**00L:156 Advanced Field Ornithology**

2 s.h.

Field study of birds of the upper Midwest; extended field trip to Minnesota, Wisconsin; individual or group project. Field trip fee. Corequisites: 00L:126.

**00L:160 Restoration Ecology**

4 s.h.

Ecological principles for restoration of native ecosystems; establishment (site preparation, selection of seed mixes, planting techniques) and management (fire, mowing, weed control) of native vegetation; evaluation of restorations; emphasis on prairie restoration, wetland vegetation. Requirements: an ecology course.

**00L:161 Introduction to GIS**

4 s.h.

Descriptive and predictive geographic information system (GIS) modeling techniques, spatial statistics, map algebra; application of GIS modeling techniques to environmental planning and resource management.

**00L:163 Conservation Biology**

4 s.h.

Population- and community-level examination of factors influencing viability of plant and animal populations from demographic and genetic perspectives; assessment of biodiversity; design, management of preserves. Offered summer sessions of odd years. Prerequisites: 00L:031.

**00L:165 Behavioral Ecology**

4 s.h.

Ecological and evolutionary theories of animal behavior examined through field studies of animal coloniality, courtship, territoriality, predator defense, habitat selection, foraging, mating systems, parental care. Requirements: two biology courses.

**00L:166 Amphibians and Reptiles**

4 s.h.

Ecology, behavior, and conservation biology of amphibians and reptiles, with focus on their anatomy, morphology; temperature and water regulation, locomotion, life history, reproduction, population and community ecology, conservation. Requirements: two biology courses.

**00L:175 Soil Genesis and Landscape Relationships**

4 s.h.

Relationships between soil formation, geomorphology, environment; soil description, classification, geography, mapping, interpretation for land use. Prerequisites: 00L:142.

**00L:199 Undergraduate Research**

1-4 s.h.

Requirements: junior or senior standing.

**00L:210 Global Climate Change: Causes, Connections, and Cures**

2 s.h.

Underlying causes of global climate change, both natural and human; web of interrelated links affecting the physical and living world, including human society; cause-and-effect relationships and interventions that may reduce negative consequences; for teachers of grades 7-12 and students enrolled in teacher education programs for those grades. Requirements: bachelor's degree.

**00L:213 Graduate Independent Study**

1-4 s.h.

**00L:217 Ecology and Systematics of Diatoms**

4 s.h.

**00L:225 Physical Limnology**

2-4 s.h.

Mechanisms of physical transport of heat and contaminants in lakes; temperature cycle and stratification; disturbances to seasonal temperature structure, including the diurnal mixed layer, waves, upwelling, differential heating; turbulence, mixing, transport; field measurements of physical processes, computer models of transport.

**00L:240 Natural History Workshop**

1-3 s.h.

An aspect of the upper Midwest's natural history, or techniques for studying natural history.

**00L:250 Graduate Internship**

1-5 s.h.

Experience as interpreters, rangers, technicians, and teachers through placement with county conservation boards, camps, parks, schools, other agencies.

**00L:299 Research**

1-4 s.h.

## Iowa Young Writers' Studio

**Director:** Stephen Lovely

**Web site:** <http://www.uiowa.edu/youngwriters>

The Iowa Young Writers' Studio is a two-week summer residential program for high school students who love to write. Students build a community of peers while working with experienced writing teachers, primarily students and graduates of the University's M.F.A. program in creative writing.

The studio offers three courses of study: poetry, fiction, and creative writing (a mix of poetry, fiction, and creative nonfiction). Each course consists of a seminar and a workshop. In seminars, students read literature by established writers. In workshops they share their own writing, get feedback from their classmates and teacher, and discuss issues of narrative and form.

The studio offers two two-week sessions: one in June and one in July.

Young writers who have completed grade 10, 11, or 12 are eligible to attend the studio. Application materials include an application form, a creative writing sample, a statement of purpose, a high school transcript, and a letter of recommendation from an English teacher or another instructor familiar with the applicant's writing. For complete application information, contact the Iowa Young Writers' Studio or visit its web site.

# Leadership Studies

**Director:** David Baumgartner

**Undergraduate nondegree program:** Certificate in Leadership Studies

**Web site:** <http://www.careers.uiowa.edu/leadershipstudies>

Leadership studies is a multidisciplinary academic field that draws upon theories and applications from a wide variety of related disciplines, such as the social sciences (e.g., psychology, sociology, political science, and anthropology) and the humanities (e.g., philosophy and history), as well as professional fields, including management and education. The University of Iowa's Leadership Studies Program examines ethical issues, principles, theories, and styles of leadership; the dynamics of interactions between leaders, followers, and group members; leaders' impact on organizations and communities; and leadership skills such as goal setting, communicating effectively, creating a vision, and empowering others.

The Leadership Studies Program offers the undergraduate Certificate in Leadership Studies, an interdisciplinary program coordinated by the Pomerantz Career Center and supported by the Tippie College of Business, the College of Education, the College of Liberal Arts and Sciences, and the Office of Student Life. The program also offers Career Leadership Academy, a four-course sequence designed to help undergraduate students develop leadership and employment skills, and the online course Global Leadership Initiative. See "Other Programs" later in this section.

## Certificate

The Certificate in Leadership Studies requires 21 s.h., including an interdisciplinary core course (3 s.h.), area electives (15 s.h.), an experiential learning course (3 s.h.), and a final personal and program evaluation. Students must maintain a g.p.a. of at least 2.00 in work for the certificate.

The certificate program provides a structure for involvement and commitment to leadership. It introduces students to leadership concepts and offers them hands-on leadership experiences they will need in order to begin the life-long development of these skills.

The certificate requires the following course work.

### INTERDISCIPLINARY CORE COURSE

All certificate students are required to complete the interdisciplinary core course (3 s.h.). In order to enroll in the course, they must have earned a minimum of 30 s.h. of credit and must be in good academic standing as defined by the College of Liberal Arts and Sciences (cumulative g.p.a. of at least 2.00).

421:072 Perspectives on Leadership: Principles and Practices 3 s.h.

The core course provides students with a broad foundation of leadership knowledge. It introduces diverse approaches to studying and practicing leadership and gives students a structure for organizing knowledge and skills from other leadership courses and experiences. The course features presentations by guest instructors from across the University, offering students an interdisciplinary perspective on leadership.

Certificate students must complete 421:072 before they may enroll in the required experiential learning or service learning course.

### AREA ELECTIVES

Area electives are drawn from five developmental areas central to effective leadership: self-leadership, group leadership, communication, cultural competence, and ethics and integrity. Students must complete 3 s.h. from each of these areas (total of 15 s.h.).

#### Self-Leadership

At least 3 s.h. from these:

023:101 Leadership and Personal Development MSL101	1 s.h.
023:102 Introduction to Tactical Leadership MSL102	1 s.h.
056:056 Leadership in Engineering	1 s.h.
06J:162 Leadership and Personal Development	3 s.h.
410:045 Leadership in the Outdoors	3 s.h.
413:050 Introduction to Leadership	3 s.h.
413:100 President's Leadership Class (PLC)	3 s.h.

421:071 Global Leadership Initiative	1 s.h.
421:106 Career Leadership Academy - Phase 1	2 s.h.
421:107 Career Leadership Academy - Phase 2	1 s.h.
421:108 Career Leadership Academy - Phase 3	1 s.h.
421:109 Career Leadership Academy - Phase 4	1 s.h.

### **Group Leadership**

At least 3 s.h. from these:

023:103 Innovative Team Leadership MSL201	2 s.h.
023:104 Foundations of Tactical Leadership MSL202	2 s.h.
23A:130 Air Force Leadership Studies I	3 s.h.
23A:132 Air Force Leadership Studies II	3 s.h.
030:151 Political Leadership	3 s.h.
031:015 Introduction to Social Psychology	3 s.h.
034:020 Principles of Social Psychology	3 s.h.
034:164 Organizations and Modern Society	3 s.h.
036:019 Organizational Leadership	3 s.h.
042:157 Nonprofit Organizational Effectiveness I	3 s.h.
042:158 Nonprofit Organizational Effectiveness II	3 s.h.
06J:048 Introduction to Management	3 s.h.
06J:130 Individuals, Teams, and Organizations	3 s.h.
169:061 Recreation Leadership and Programming	3 s.h.
410:067 Team Building Challenge Course	1 s.h.

### **Communication**

At least 3 s.h. from these:

06B:100 Business Communication and Protocol	3 s.h.
033:115 What is Storytelling For?	3 s.h.
036:001 Core Concepts in Communication Studies	3 s.h.
036:012 Interpersonal Communication	3 s.h.
036:017 Theory and Practice of Argument	4 s.h.
036:018 Leadership and Organizational Procedures	2 s.h.
036:030 The Art of Persuading Others	3 s.h.
036:070 Communication Theory in Everyday Life	3 s.h.
036:091 Organizational Communication	3 s.h.
06J:156 Dynamics of Negotiations	3 s.h.

### **Cultural Competence**

At least 3 s.h. from these:

07B:150-07B:151 Leadership and Public Service I-II (both courses are required)	5 s.h.
208:120 Foundations of Critical Cultural Competence	3 s.h.
One elective approved for the Certificate in Critical Cultural Competence	3 s.h.

The elective must be chosen from the list Elective Courses for Selected Categories: Certificate in Critical Cultural Competence.

### **Ethics and Integrity**

At least 3 s.h. from these:

019:140 Media Law and Communication	3 s.h.
019:168 Journalism Ethics	3 s.h.
024:161 Art, Law, and Ethics	3 s.h.

026:001 Matters of Life and Death	3 s.h.
026:034 Philosophy and the Just Society	3 s.h.
026:036 Principles of Reasoning: Argument and Debate	3 s.h.
026:102 Introduction to Ethics	3 s.h.
026:132 Introduction to Political Philosophy	3 s.h.
026:135 Philosophy of Law	3 s.h.
06J:132 Law and Ethics in Management	3 s.h.
07C:195 Ethics in Human Relations and Counseling	3 s.h.
101:120 Professional Issues and Ethics	1 s.h.
174:223 Seminar in Health Care Ethics	2-3 s.h.

## EXPERIENTIAL LEARNING

Certificate students must earn 3 s.h. in a course focused on experiential, or hands-on, learning. They may select a service learning course or an experiential learning course to satisfy this requirement; an experiential learning course may take different forms, commonly an internship or an on-campus leadership practicum.

Before they may enroll in the hands-on course, students must have completed at least 9 s.h. of work toward the certificate, including the core course 421:072 Perspectives on Leadership: Principles and Practices, so that they have a solid foundation of knowledge to apply to the experience.

### Service Learning Course

Service learning courses incorporate community engagement with academic course work. They allow students to gain hands-on experience along with a deeper understanding of course content while responding to real community needs. Students may satisfy the certificate's 3 s.h. experiential learning requirement by completing one or more service learning courses approved by their leadership certificate advisor.

### Internship

Internships consist of preapproved, supervised on-the-job learning; they may be paid or unpaid.

Students register for 421:073 Leadership Certificate Internship in order to receive certificate credit for the internship; they must complete all course assignments and must earn 3 s.h. in order to fulfill the experiential learning requirement.

To meet the certificate's experiential learning requirement, an internship must consist of professional experience that relates to the student's major field of study or career interest area and allows the student to build on the academic course work he or she has completed in the certificate program. At least 80 percent of the student's internship duties must be professional-level work, and the student must receive continuous supervision by a professional (not a student) in the internship field. The internship must last an entire fall or spring semester (minimum of 10 weeks) or summer session (minimum of eight weeks) and must require at least 10 hours of work per week.

Internships that fulfill the certificate's experiential learning requirement must be approved in advance by one of the certificate program's internship advisors, and the internship site supervisor must agree to the terms of the internship and must complete the required form before the internship may be approved. Students may work with staff at the Pomerantz Career Center to find an approved internship opportunity, or they may develop their own internship.

For more information about internships, see Internships/Students on the Pomerantz Career Center web site.

### On-Campus Leadership Practicum

Students who wish to fulfill the experiential learning requirement with an on-campus leadership practicum must engage in a formal, approved experience that is meaningful, educational, and cocurricular. It must require the student to take initiative and pursue active leadership roles and responsibilities. Examples include positions as student organization leaders, student government leaders, University Housing resident assistants, student orientation advisors, peer educators, and fraternity and sorority leaders. Practicums may be paid or unpaid.

Students register for 413:125 Leadership Certificate Practicum Class in order to receive certificate credit for the practicum; they must earn 3 s.h. in order to fulfill the experiential learning requirement. Students meet weekly in the practicum course to discuss topics related to the academic course work as applied in practice, and they must successfully complete a goal-setting assignment and a reflection assignment.

To meet the certificate's experiential learning requirement, a practicum must last at least 10 weeks during the semester in which 413:125 is offered and must require 10 hours of work per week (413:125 is not offered every semester).

Practicums that fulfill the certificate's experiential learning requirement must be approved in advance by the leadership practicum instructor in the University's Office of Student Life. Students must submit a list of goals and assignments and/or duties they will complete during the practicum, to demonstrate that the practicum will provide substantive work assignments and opportunities to build on the academic course work they have completed in the certificate program.

Each student also must identify a practicum supervisor and demonstrate that the supervisor will be willing to guide and evaluate the student's work and development of leadership skills, and will participate in reviewing the student's goal-setting assignment and in the final review of the student's reflection assignment.

#### **PERSONAL AND PROGRAM EVALUATION**

In order to be awarded the Certificate in Leadership Studies, students must complete a final report detailing how they completed the certificate requirements. The report should include:

- a list of all courses taken for the certificate, indicating the requirement each course met, when each course was taken, and what grade the student earned for each course;

- a copy of the goal-setting and reflection exercises the student completed for the course focused on experiential learning;

- a document reflecting on additional progress toward these goals over the student's entire time at The University of Iowa; and

- a document reflecting on the most and least useful elements of the Certificate in Leadership Studies experience.

#### **ADMISSION TO THE CERTIFICATE PROGRAM** Admission to the certificate program

For additional information about the Leadership Studies Program and admission requirements, see Certificate in Leadership Studies on the Pomerantz Career Center web site.

### **Other Programs**

#### **CAREER LEADERSHIP ACADEMY**

The Career Leadership Academy is a four-semester sequence of courses designed to help undergraduate students develop vital skills for leadership and employment: communication, interpersonal, and presentation skills and the ability to work well with others. The program consists of weekly seminars, activities, and events. Participants also have access to exclusive programs such as career exploration opportunities, networking events, and leadership development experiences. Students earn 5 s.h. for the four-course sequence.

421:106 Career Leadership Academy - Phase 1	2 s.h.
421:107 Career Leadership Academy - Phase 2	1 s.h.
421:108 Career Leadership Academy - Phase 3	1 s.h.
421:109 Career Leadership Academy - Phase 4	1 s.h.

For more information, see Career Leadership Academy on the Pomerantz Career Center web site.

#### **GLOBAL LEADERSHIP INITIATIVE**

The Leadership Studies Program offers 421:071 Global Leadership Initiative (1 s.h.), an online course designed to help those engaged in international experiences develop their leadership knowledge, awareness, and skills. Individuals involved in study abroad, international internships, international exchange programs, or employment opportunities that involve international cooperation may enroll in the course concurrently with their international experiences. The course includes online discussion with other students, guided reflection, access to guest speakers who are successful in their leadership roles, pre- and postexperience assessment, and direction for continued development of global leadership competence after the course concludes.

## Military Science (Army ROTC)

**Head:** LTC David Deyak

**Professor:** LTC David Deyak

**Assistant professors:** MAJ Mike Belin, LTC Dave Lewis, MAJ Gregory Murphy, CPT Benjamin Owen, LTC Tony Wolf

**Web site:** <http://armyrotc.com/edu/univia/index.htm>

The Military Science Program administers Iowa Army ROTC. It gives students who wish to serve on active or reserve status in the U.S. Army the opportunity to earn commissions as army officers. It also administers merit scholarships from the United States government to qualified students.

Although the Military Science Program does not offer degrees, its courses provide education in the military's role and instruction in leadership and management. The program's courses are an essential part of the Iowa ROTC program, which competes annually in national leadership assessments.

Military Science courses are open to all students. Course credit that counts toward graduation varies by college. Students in the College of Liberal Arts and Sciences may count up to 20 s.h. toward graduation.

## Programs

### Basic Course

The ROTC basic course is designed primarily for first- and second-year students. It provides the fundamentals of leadership and management and introduces the roles of the military as influenced by national and foreign policy. Students incur no obligation to the military for participation in the basic course.

The following courses satisfy the basic course requirement. Some of these courses are prerequisites to others, so students must be careful to take courses in the correct order. Courses 023:101 Leadership and Personal Development MSL101 and 023:102 Introduction to Tactical Leadership MSL102 are prerequisite to 023:103 Innovative Team Leadership MSL201; courses 023:101 Leadership and Personal Development MSL101, 023:102 Introduction to Tactical Leadership MSL102, and 023:103 Innovative Team Leadership MSL201 are prerequisite to 023:104 Foundations of Tactical Leadership MSL202.

023:101 Leadership and Personal Development MSL101	1 s.h.
023:102 Introduction to Tactical Leadership MSL102	1 s.h.
023:103 Innovative Team Leadership MSL201	2 s.h.
023:104 Foundations of Tactical Leadership MSL202	2 s.h.

The basic course requirements may be taken over a one- or two-year period or during a four-week paid summer camp, the Leader's Training Course (LTC), at Fort Knox, Kentucky. Students with prior military training normally are exempt from the basic course requirements.

### Advanced Course

The ROTC advanced course is open to any student who meets the prerequisites, but is designed primarily for cadets who wish to pursue a commission as a lieutenant in the U.S. Army upon graduation. It is open to both undergraduate and graduate students. Most cadets in the advanced course incur an obligation to the military that can be satisfied in the Active Army, Army Reserve, or Army National Guard.

To enter the advanced course, students must satisfy the basic course requirements, earn at least 54 s.h., and have a cumulative g.p.a. of at least 2.00. In order to become U.S. Army officers, cadets must complete the Leadership Development and Assessment course (LDAC), a five-week session held at Fort Lewis, Washington. Cadets normally attend LDAC during the summer between their third and fourth years. With the military science professor's permission, cadets may delay LDAC until the summer after their final ROTC class.

A tax-free monthly stipend is provided to cadets who enter a contractual agreement with ROTC to serve in the armed forces. Additional financial assistance may be provided through scholarships.

The following courses are the academic requirements for completion of the advanced course. Some of these courses have prerequisites and corequisites, so students must be careful to take courses in the correct order. Prerequisites and corequisites for each course are listed with course descriptions; see "Courses" at the end of this section.

023:090 Leadership Laboratory	0 s.h.
023:095 Advanced Military Fitness Training	1 s.h.
023:105 Adaptive Tactical Leadership MSL301	3 s.h.
023:106 Leadership in Changing Environments MSL302	3 s.h.
023:107 Developing Adaptive Leaders MSL401	3 s.h.

023:108 Leadership in a Complex World MSL402

3 s.h.

### Additional Course Work

Cadets whose aim is a commission must satisfy a Professional Military Education (PME) requirement. They must complete at least one course in military history from the following list. This course may be the same as one used to complete the College of Liberal Arts and Sciences General Education Program. Cadets may use other courses to meet the requirement, with the military science professor's approval.

016:011 Issues in Human History: The Vietnam War in Historical Perspective	3 s.h.
016:014 Issues in Human History: Europe's Expansion Overseas	3 s.h.
16A:153 U.S.A. in a World at War 1931-1945	3 s.h.
16A:162 American Revolutionary Period 1740-1789	3 s.h.
16A:166 The Progressive Era in America	3 s.h.
16A:168 The Contemporary U.S. 1940-Present	3 s.h.

### Financial Aid

Military Science offers two-, three-, and four-year ROTC scholarships for students who enter the ROTC program. These scholarships pay tuition at The University of Iowa, an allotment for books and supplies each semester, most mandatory educational fees, and a tax-free monthly stipend during the academic year. Scholarships also are available for nursing students who wish to become Army nurses.

# Nonprofit Management

**Coordinator:** Dian M. Gottlob

**Undergraduate nondegree program:** Certificate in Nonprofit Management

**Web site:** <http://www.continuetolearn.uiowa.edu/ccp/de/NonprofitCertificate.htm>

Nonprofit organizations play vital roles in our communities and contribute to our quality of life. Nonprofit organizations have unique management, funding, and finance issues that require specialized training. The Certificate in Nonprofit Management is designed to help staff members, board members, and volunteers develop the business and leadership skills necessary for building a successful nonprofit organization. The program provides a balance of academic principles and real-world experience as well as a fundamental understanding of how nonprofit organizations participate in building communities.

Certificate courses cover a wide range of topics and issues, such as community and government partnerships, organizational leadership, planning, human resources, financial accountability, grant writing, and web site creation and maintenance.

Courses are offered primarily on the World Wide Web.

The certificate is available to undergraduate students. Bachelor of Applied Studies and Bachelor of Liberal Studies students may incorporate certificate courses into their degree programs.

The program is presented by the Division of Continuing Education and the Larned A. Waterman Iowa Nonprofit Resource Center, in collaboration with University College.

## Certificate

The Certificate in Nonprofit Management requires 18 s.h. Students must complete the following course work. It is recommended that they take 06J:147 Nonprofit Organizational Effectiveness I, 06J:148 Nonprofit Organizational Effectiveness II, and 06T:120 Entrepreneurship and Innovation before enrolling in the remaining four courses.

06J:147 Nonprofit Organizational Effectiveness I	3 s.h.

## Research Experiences for Undergraduates in Microbiology

**Web site:** <http://www.uiowa.edu/microbiology/summer.shtml>

The Department of Microbiology offers 403:030 Undergraduate Research Fellowship Program, a 10-week summer program for qualified undergraduate students who are studying microbiology or other biological sciences and are interested in pursuing careers in science. Participants conduct research on a project they select, under the direct supervision of a faculty member.

Each participant receives a stipend and an allowance for food. The program reimburses participants for travel expenses and provides housing.

Applicants must be U.S. citizens or permanent residents who have completed their sophomore or junior year in a bachelor's degree program in the biological sciences. Applications should include a completed application form and two letters of recommendation. Deadline to apply is mid-February for the following summer.

Visit the program's web site or contact the Department of Microbiology, Carver College of Medicine, for more information.

## Secondary Student Training Program

**Director:** William Swain

**Web site:** <http://www.continuetolearn.uiowa.edu/sstp/>

The Secondary Student Training Program (SSTP) provides opportunities for high school students to conduct research in a University of Iowa laboratory under the guidance of a faculty mentor. Students attend faculty seminars, science communication workshops, and many social and recreational activities during the six-week program. During the final week, they present their research results in a formal symposium attended by other SSTP students and the program's faculty and research staff. All SSTP students write a formal abstract summarizing their six weeks of research.

SSTP students live on the University campus during the program.

The University of Iowa's Carver College of Medicine, the Graduate College, and the Colleges of Dentistry, Engineering, Liberal Arts and Sciences, Pharmacy, and Public Health all participate in the Secondary Student Training Program.

Students may enroll in 418:001 Secondary Student Training Program for 0 s.h., or instead, they may choose to take 002:002 Secondary Student Training Program for 3 s.h. and a grade.

## Summer Undergraduate MSTP Research Program

**Web site:** <http://www.healthcare.uiowa.edu/mstp/>

The Summer Undergraduate MSTP Research Program is an intensive eight-week experience for undergraduates interested in pursuing combined M.D./Ph.D. training. Participants gain experience in research laboratories and exposure to clinical medicine and medically relevant research in preparation for careers as physician-scientists.

Students conduct research in the laboratory of a biomedical sciences faculty member, shadow physician-scientists in clinical settings, participate in career development seminars, and attend a weekly seminar series focusing on the intersection of science and medicine.

Participants receive a stipend for the program and live on campus in University housing.

Applicants must be U.S. citizens or permanent residents who have completed their junior year in a bachelor's degree program in the biological or physical sciences. Applicants should submit an application form (available on the program's web site); an official college transcript; and two letters of recommendation. Application deadline is early February for the following summer.

Contact the Medical Scientist Training Program, Carver College of Medicine, for more information.

# Sustainability

**Coordinator:** Franklin L. Yoder

**Undergraduate nondegree program:** Certificate in Sustainability

**Web site:** <http://sustainability.uiowa.edu>

For decades, world leaders have defined sustainability as the implementation of policies, processes, and practices that meet the needs of the present without compromising the ability of future generations to meet their own needs.

Achievement of sustainability requires an understanding of human and environmental systems and the complex interactions between them.

The Certificate in Sustainability provides students with the knowledge and skills they will need in order to contribute to sustainable systems and their interactions, especially those related to energy, society, culture, economics, the built environment, health, and public policy. The program helps students become effective leaders and agents of change for sustainability in a wide range of vocations, such as academic researcher, teacher, corporate officer, technology specialist, farmer, grassroots advocate, or government official.

The certificate program is open to undergraduate students across the University. It is offered by University College.

## Certificate

The Certificate in Sustainability requires 24 s.h. of course work. Because sustainability embraces many disciplines, methodologies, and institutional practices, certificate students must have knowledge of the multidisciplinary breadth of the field, which is represented by the program's four areas of breadth electives: changing environments and human health; energy, climate, and built environments; the power of culture and society; and ethics, economics, and public policy. They also must have experience with analyzing real-life problems in and outside of the classroom and with working collaboratively to solve such problems.

Students complete three introductory course courses; four breadth electives—one from each of the program's four elective areas; and one project course. They may be able to count some courses taken for the certificate toward requirements for their major or for a minor. No more than three certificate courses may be taken from a single department or program. Students must maintain a g.p.a. of at least 2.00 in all certificate course work. A maximum of 6 s.h. of approved transfer credit may be counted toward the certificate.

The certificate requires the following course work.

### introductory core

Students complete the following three introductory core courses.

012:008/159:008 Introduction to Environmental Science	3-4 s.h.
044:019 Contemporary Environmental Issues	3 s.h.
057:013 Introduction to Sustainability	arr.

### breadth electives

Students complete one course (at least 3 s.h.) from each of the following four breadth areas.

#### Changing Environments and Human Health

One of these:

002:103/044:103 Biogeography	3 s.h.
002:108 Vertebrate Zoology	4 s.h.
002:134/159:134 Ecology	3-4 s.h.
004:173 Atmospheric and Environmental Chemistry	3 s.h.
012:004 Evolution and the History of Life	3-4 s.h.
012:107 Marine Ecosystems and Conservation	3 s.h.
012:108 & 159:100 Introduction to Oceanography - Environmental Sciences Seminar	3 s.h.
012:139 Integrated Watershed Analysis	3 s.h.
012:140 Natural Hazards	3 s.h.

# University Housing

**Director:** Von Stange  
**Assistant director:** Kathleen A. Fitzgerald  
**Course facilitator:** Gregory R. Thompson  
**Web site:** <http://housing.uiowa.edu/>

University Housing courses are designed to help students involved in the resident assistant (RA) program become effective RAs. Students learn how to establish healthy student communities in the residence halls, how to confront crises and emergencies, and how to develop leadership skills. Enrollment is open only to students who have been selected to serve as resident assistants.

## University Housing Courses

**415:001 Issues in College Residence Halls I** 1 s.h.

Development of knowledge and skills required for work as a resident assistant; creating community, handling crises and emergencies; leadership.

**415:002 Issues in College Residence Halls II** 1 s.h.

Continuation of 415:001.

**415:003 Issues in College Residence Halls** 2 s.h.

Content of 415:001 and 415:002 in one semester--development of knowledge and skills required for work as a resident assistant, creating community, handling crises and emergencies, leadership.

## University Libraries

**Coordinator:** Kathy Magarrell

**Web site:** <http://www.lib.uiowa.edu/instruction/lrc.html>

University Libraries offers two courses intended for undergraduates: 417:001 Library Research in Context and 417:096 Focused Academic Research for International Studies Majors.

Library Research in Context is an activity-based course that helps students integrate information skills and concepts into their academic tool kit, enabling them to develop habits of critical inquiry and accomplish course goals. Designed primarily for sophomores and juniors, the course introduces students to the basic research process and helps them formulate research questions and evaluate information. It also touches on the social and ethical contexts of information. Subject-specialist librarians present the course, using in-class activities and assignments and class discussion.

For information about Focused Academic Research for International Studies Majors, contact University Libraries or the International Studies Program.

## University Libraries Courses

### **417:001 Library Research in Context**

1 s.h.

Academic research, effective use of the library and its resources, basic research methods, process of scholarly communication; content may be keyed to a discipline-specific course; students apply concepts and processes to their research projects; transferable skills.

### **417:096 Focused Academic Research for International Studies Majors**

1 s.h.

Same as 187:096.

**Web site:** <http://honors.uiowa.edu>

The University of Iowa Honors Program provides talented-and-gifted education for college students. Honors enriches the intellectual and personal lives of outstanding undergraduates across the University. It provides academic opportunities, extracurricular programs, special recognitions, and social events, many held in the award-winning Blank Honors Center. It sponsors two living-learning communities: Honors House in Daum Hall and Honors Nexus in Mayflower Hall. It also includes all members of Iowa Writers, a living-learning community for students with talent and interest in writing.

The Honors Program welcomes students into a community of opportunity that features learning by doing. Its many course sections and seminars connect small classes with some of the top teachers on campus. Honors designations let students turn any other course into an honors course through extra projects. The staff helps students create their own honors majors and arrange internships, service learning, study abroad, teaching, and other experiences in order to explore their interests within and beyond the classroom.

Within the Honors Program, the Iowa Center for Research by Undergraduates matches students with mentors and money for research. Honors Writing Fellows and Honors Editing Fellows refine writing skills. Participants in the Iowa Policy Research Organization analyze policies for Iowa's legislature. Members of the Aces Program for Analysis, Advocacy, and Action prepare for public argument and scholarship competitions. Guests at Honors Dinners practice intellectual conversation. A host of honors activities engage students in the arts, sciences, politics, international relations, mock trials, diverse cultures, varied cuisines, movie making and watching, and field trips. Honors also offers inventive programs for campus and community volunteering.

Honors admits students who show great academic promise for college learning and further achievement. Its members include National Merit Scholars, Presidential Scholars, Old Gold Scholars, National Hispanic Scholars, Tippie Scholars, China Scholars, National Achievement Scholars, and students in the National Academy of Arts, Sciences, and Engineering.

Based on grades and test scores, the Honors Program admits many students directly and automatically from high school. Entering students also may become members by submitting a high school transcript, a letter of recommendation from a teacher, and a personal letter saying how the student expects to gain from participation in the University of Iowa Honors Program.

Honors offers membership to students who earn high grades at the University. New transfer students who have a cumulative g.p.a. of at least 3.50 and have earned at least 24 s.h. of college credit may be admitted to honors. (Transfer students with fewer than 24 s.h. of college credit enter honors on the same basis as do students who enter the University directly from high school.)

To remain in the Honors Program, students must maintain a University of Iowa cumulative g.p.a. of 3.33 or higher. To graduate as a member of the University of Iowa Honors Program, students also must complete at least one Honors Commendation, awarded for 12 s.h. sets of courses or experiences provided by the Honors Program. For more information, see Admissions—University of Iowa Honors Program on the honors web site.

## Academic Opportunities

The University of Iowa Honors Program helps tailor opportunities to different educational needs and goals. Its curricula are broad, flexible, and challenging. Students can take honors courses in any and every semester at Iowa. Most connect small, highly interactive classes of honors students with especially distinguished professors. Many offer new topics each term.

Honors encourages early connections among honors students. In 143:020 Honors Primetime Workshop, entering students can earn an initial semester hour of honors credit for a short course a few days before fall classes begin; each section of 143:030 Honors First-Year Seminar awards 1 s.h. for fall semester work with a top professor on current

inquiries; and all honors sections of 010:003 Rhetoric (usually taken during the first or second semester at the University) meet the rhetoric requirement of the College of Liberal Arts and Sciences General Education Program. Early help for planning projects in art, research, or service is provided in 143:043 Honors Developing an Idea; and 143:044 Honors Writing Workshop helps students refine their talent for writing, focusing on a distinct kind of creative composition each time the course is offered. In addition, there are honors sections of courses approved for other areas of the General Education Program and for the Courses in Common program.

Honors designations can complement further honors opportunities: honors advanced seminars, honors major seminars, honors studies, even honors practicums (for research, teaching, or service). Many students crown their educations with an honors thesis or project in their major.

Students learn about such opportunities in weekly e-mails from the Honors Program. Honors peer advisors and the honors professional staff offer guidance in personal meetings and group presentations. Each major has an honors advisor to explain options and standards for graduating with honors in that major. Research ambassadors from the Iowa Center for Research by Undergraduates tell students how to get engaged in research. The honors staff can help students design individualized curricula for their special interests. See Academics on the Honors Program web site for more information.

### **Honors Commendations**

The Honors Program and the University president join in awarding Honors Commendations to students who complete at least 12 s.h. of honors course work with a grade of B-minus or higher in each honors course or a comparable level of accomplishment in honors experiences beyond the classroom. There are many ways to earn an Honors Commendation, and many students complete several. Students who entered the University in fall 2008 or later must earn at least one Honors Commendation in order to graduate as a member of the Honors Program. Beginning spring 2011, the University will record Honors Commendations on students' transcripts. See Academics—Commendations on the honors web site for more information.

### **Honors in the Major**

Most majors offer upper-level honors courses, honors seminars, independent research, or opportunities to pursue an original honors thesis or senior project under the guidance of a faculty member. Each college and department determines its own requirements for graduation with honors from that unit, and faculty members in each department serve as honors advisors.

After students declare a major in the College of Liberal Arts and Sciences or enter the Tippie College of Business or the Colleges of Education, Engineering, or Nursing, they should speak with their collegiate or departmental honors advisors about their academic programs. Students who graduate with honors in their majors receive special recognition during commencement, and their permanent academic records note their achievements. To graduate with honors in any major, students also must graduate as members of the University of Iowa Honors Program.

### **Extracurricular Programs**

The University of Iowa Honors Program offers honors students a rich variety of activities outside the classroom. Many honors students find extracurricular programming a good way to meet people, get involved, and learn more about the world around them.

**Honors Arts** sends groups of honors students to attend music, dance, and theater events at the University and in the community. Students have opportunities to interact with artists, faculty members, and other honors students through related discussions, lectures, and visits.

**Honors Discourses** stages small-group discussions with professors and other experts on hot topics of the day. Students tap the latest scholarship in developing their personal positions.

**Honors Diversity** offers a wide range of events to expand cultural horizons and enlarge personal perspectives. These include feasts, films, dances, documentaries, and more.

**Honors Gallery** takes advantage of the Blank Honors Center's design to display art. It exhibits student works throughout the year, and it complements these with receptions and other events.

**Honors Media** can record honors events of all kinds and help present them. Honors Media also holds movie nights, to screen and discuss feature-length films.

**Honors Volunteers** provides students with service opportunities at varied organizations in eastern Iowa. Honors students learn more about their communities and related needs, often continuing to volunteer on their own.

The **Iowa City Foreign Relations Council** hosts luncheon dialogues on relevant international issues. Past speakers include award-winning journalists, Nobel Peace Prize laureates, seasoned diplomats, prominent politicians, and policy

analysts. Honors students gain more textured understandings of world affairs by listening to and talking with these expert speakers.

The **Presidential Scholars Community** introduces recipients of Iowa's top merit scholarships to four years of adventures in service, team building, and more. Scholars participate in cookouts, arts events, canoeing adventures, legacy projects, pizza parties, dinners with faculty, mentoring programs, and volunteer projects.

**Honors** advises four major national and international honor societies: Phi Eta Sigma, National Society of Collegiate Scholars, Mortar Board, and Omicron Delta Kappa. It also works closely with Phi Beta Kappa in the College of Liberal Arts and Sciences. These societies provide select students with opportunities to lead, serve their communities, and cultivate academic excellence.

For more information, see Activities on the Honors Program web site.

## Financial Support

The Honors Program helps students apply for many scholarships, awards, and prizes. The program offers its own scholarships to selected continuing honors students across the University.

Iowa students win major national and international scholarships each year. Honors provides advising and nominations for Rhodes, Marshall, Gates Cambridge, Churchill, Truman, Udall, Goldwater, Fulbright, Humanity in Action, National Science Foundation, and other prominent scholarships. Its Aces Program for Analysis, Advocacy, and Action readies top students for national and international scholarship competitions by educating them for public participation. The Iowa Center for Research by Undergraduates provides research stipends for students and travel grants for those who present work at conferences. Announcements about scholarships and other awards appear on the Honors Program web site and electronic mailing list. Honors Program scholarships are not available to incoming first-year or transfer students.

See Scholarships on the Honors Program web site for more information.

## Facilities

### Blank Honors Center

The Honors Program makes its home in the Blank Honors Center, a new facility for fostering community among honors students. The Blank Honors Center offers extended hours, social areas, a kitchenette, quiet study areas, classrooms, a computer lab with 24 workstations, office space for honor societies, honors advising for students, and offices for Honors Program staff. The center also has rooms for meetings, events, presentations, and conversation. Honors staff members are always on hand to help students.

### Honors Living-Learning Communities

The Honors Program sponsors two University of Iowa living-learning communities. Living-learning communities are located in University residence halls. All members of Honors House and Honors Nexus are members of the Honors Program.

**Honors House** fills Daum Hall and links to the Blank Honors Center by a skywalk. Honors House provides a convenient place for residents to socialize and study with each other. It also sponsors cultural, academic, and social events for honors students living in Daum Hall. It organizes group outings to arts events, workshops on scholarship and research opportunities, volunteer activities, and dinners with faculty members. Honors House welcomes first-year, transfer, and returning honors students.

**Honors Nexus** occupies a wing of Mayflower Hall. This living-learning community helps its members launch individual and team projects in art, research, service, and leadership, providing a strong start for a university education. It holds a wide variety of social events, and its members participate in the full range of honors courses and activities. Honors Nexus welcomes first-year, transfer, and returning honors students.

Students must apply to join the University's living-learning communities; see Living-Learning Communities on the University Housing web site for application and other information about the communities. For additional information about the honors communities, see Places—Living-Learning Communities on the honors web site.

## University of Iowa Honors Program Courses

Honors courses are specifically for honors students.

### 143:020 Honors Primetime Workshop

Workshop to connect honors students, honors teachers, and staff members; preparation for honors opportunities, especially activities and courses; team work on projects that develop skills of invention and communication; presentation of products and performances.

**143:030 Honors First-Year Seminar** 1-2 s.h.  
Small discussion classes taught by faculty members on special topics; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

**143:031 Honors Readings for Writers** 1 s.h.  
Introduction to the Iowa City writing community; attendance at readings by professional, faculty, and student writers; journals.

**143:040 Honors Studies** arr.  
Independent studies arranged with faculty members who certify satisfactory completion of study plans and performance for topics not covered by other UI courses.

**143:041 Honors Internship** 0-3 s.h.  
Independent service internship arranged with faculty members, who certify satisfactory performance and completion of project.

**143:042 Honors Service Learning** arr.  
Service learning projects arranged with faculty members who certify satisfactory completion of study plans and service.

**143:043 Honors Developing an Idea** 1-3 s.h.  
Explore interests and imaginations to generate ideas, turn ideas into projects for action; collaborate with teachers, mentors, and students in small groups to develop brief personal or team proposals for action; ideas could target the campus, local community, country, or world; focus on planning efforts rather than completion; exercises on how to spot possibilities for productive leadership, service, art, research, publication, or performance; learn to present ideas to diverse audiences.

**143:044 Honors Writing Workshop** 1-3 s.h.  
Learn writing through the Iowa workshop tradition of sharing new work with colleagues who provide detailed, constructive suggestions in response; emphasis on invention, structure, style; each edition targets a distinct kind of writing; an experienced writer leads the workshop with meeting formats; credit suited to exercises for the type of featured writing.

**143:050 Honors Seminar in Humanities** 3 s.h.  
Small-class learning with a faculty member on humanities topics. GE: Humanities.

**143:060 Honors Seminar in Social Sciences** 3 s.h.  
Small-class learning with a faculty member on social science topics. GE: Social Sciences.

**143:070 Honors Seminar in Natural Sciences** 3 s.h.  
Small-class learning with a faculty member on natural science topics. GE: Natural Sciences.

**143:080 Honors Seminar in Quantitative and Formal Reasoning** 3 s.h.  
Patterns of reasoning useful for understanding and evaluating scientific evidence, theory, controversy; historical and contemporary examples from the physical, biological, behavioral, biomedical sciences. GE: Quantitative or Formal Reasoning.

**143:090 Honors Research Colloquium** 1-3 s.h.  
Small-class research with faculty members; advanced readings.

**143:100 Honors Research Practicum** 1-3 s.h.  
Individual research performed in conjunction with a faculty member's research.

**143:101 Honors Teaching Practicum** 1-3 s.h.  
Teaching internship in first- and second-year courses; may include providing tutorial assistance, conducting review sessions, aiding course organization.

**143:102 Honors Writing Fellows: Writing Theory and Practice**

3 s.h.

Preparation of honors students selected as writing fellows to serve as peer tutors in writing-intensive courses; theories of writing, evaluation of drafts, peer tutoring with students. Requirements: sophomore or junior honors standing, admission to Writing Fellows Program, and availability to work as a writing fellow in subsequent semesters.

**143:130 Mock Trial**

2 s.h.

Legal analysis and argumentation, public performance, participation in the University of Iowa Mock Trial Club; mock trial role preparation, tournament competition, stage annual club tournament.

**143:140 Honors Policy Research Practicum**

1 s.h.

Theory and practice of public policy research; development of policy-research skills; production of policy-research papers. Requirements: sophomore or junior standing.

**143:150 Honors Special Topics**

1-3 s.h.

Small-class learning with faculty members on advanced topics. Requirements: junior or senior honors standing.

**143:160 Honors Seminar in Public Scholarship**

1-3 s.h.

Preparation for public affairs activities drawing on scholarly resources; introduction to writing personal essays and proposals for scholarship, grant, and research competitions that may require explanation of the proposal's public benefit; techniques and practice for oral presentations, including public interviews, conversations, debates, discussions.

**143:161 Honors Seminar in Public Service**

1-3 s.h.

Preparation for public affairs activities through experience practicing modes of public service; principles of service learning and practical action; introduction to writing service proposals and reports; experience planning public sessions to assess service results and identify potential improvements; preparation for scholarship competitions through opportunities to conceive, conduct, and analyze public action projects.

**143:162 Honors Seminar in Public Policy**

1-3 s.h.

Preparation for analyzing and making public policy; techniques for assessing policy designs and outcomes; opportunity to develop in-depth knowledge of specific policies that are of personal interest to students; experience writing policy proposals and reports for different audiences; practice in public interviews, debates, policy discussions.

**143:163 Honors Exercise in Public Inquiry**

1-3 s.h.

Research with a faculty mentor on a major public affairs issue; definition of a public question; development of a method to address it, with written public account of what to do, how, and why; discussion of argument with mentor and audience arranged with honors director.

**143:185 ICRU Research Ambassadors**

1-3 s.h.

ICRU Research Ambassadors share knowledge and experiences in research; attend weekly meeting and interact with students through presentations, online chat, or in other venues to answer questions, provide information, and inform students about undergraduate research opportunities; student perspective on how to navigate research opportunities at The University of Iowa.

**143:190 Honors Peer Advising**

1-3 s.h.

Experience sharing knowledge and experiences of the Honors Program with other students in meetings during office hours, online chats, other venues; peer advisors answer questions, provide information, help students find honors opportunities in and out of class.

**143:199 Honors Thesis or Project**

1-3 s.h.

Culminating project of research or artistic creation; preparation and completion of the final product associated with graduation with honors in the student's major. Requirements: member of the University of Iowa Honors Program and junior or senior standing.

## University of Iowa Upward Bound

**Interim director:** Nancy Humbles  
**Web site:** <http://upwardbound.uiowa.edu>

University of Iowa Upward Bound is an academic program for eligible high school students from four southeastern Iowa communities. Students participate during the academic year at their local high school and attend a six-week residential program on the University of Iowa campus from mid-June through July. Participants take mathematics, science, language arts, computer technology, and foreign language courses to prepare them for classes they will take at their local high school in the fall. They also participate in extracurricular activities, field trips, and college visits.

Bridge students (those who will graduate from high school the following spring) enroll in a University course during the eight-week summer session. Bridge students participate in an on-campus job shadow and take a transition to college seminar.

Participants receive all services at no cost.

To be admitted to University of Iowa Upward Bound, students must:

- reside in the target area and attend a target school;
- be in grade 9 or 10;
- have a family income that meets U.S. Department of Education low-income guidelines;
- be a potential first-generation college student; and
- show need for Upward Bound services.

Upward Bound provides services to students until they graduate from high school and enroll in postsecondary education.

The University of Iowa Upward Bound Project serves students attending high schools in Columbus Junction, Davenport, Muscatine, and West Liberty, Iowa. Other postsecondary institutions in Iowa also sponsor Upward Bound programs. High school students who do not attend schools served by The University of Iowa's program should ask their counselors whether an Upward Bound program serves their area.

For more information, contact University of Iowa Upward Bound, The University of Iowa.

## VIGRE Heartland REU

**Director:** Jonathan Simon (Mathematics)

**Web site:** <http://www.uiowa.edu/~vigre>

The University of Iowa Department of Mathematics offers a summer program of research experience for undergraduates. VIGRE Heartland REU is designed for well-prepared students who have completed two years of college, but younger or more advanced students also may be admitted. Preference is given to students from Heartland Mathematics Partnership schools.

The eight-week program begins with three introductory workshops followed by work in a small research group with a faculty member. Students choose one of nine research projects that are connected to background developed in the introductory workshops.

Students participate in hands-on introduction to mathematical writing in LaTeX; experience using computer systems such as Maple, Mathematica, or MatLab; and talks and panels about subsequent research opportunities, graduate school, the Graduate Record Examination, and career opportunities. The program also offers cultural and social activities.

Instruction is provided by Department of Mathematics faculty members, Heartland Mathematics Partnership instructors, VIGRE trainees, and staff members of the National Alliance for Doctoral Studies in the Mathematical Sciences, which is supported by the National Science Foundation (NSF).

VIGRE Heartland REU is supported by Vertical Integration of Research and Education in the Mathematical Sciences, an NSF program. For more information visit the VIGRE Heartland REU web site.

## Division of Continuing Education

**Dean:** Chet S. Rzonca

**Web site:** <http://www.continuetolearn.uiowa.edu>

The Division of Continuing Education increases access to the services and resources of The University of Iowa. In partnership with the University's colleges and departments, the division provides high-quality credit and noncredit courses, workshops, and programs to traditional and nontraditional learners. Using a variety of locations, schedules, and technologies, the division helps provide a University of Iowa learning environment beyond the physical borders of campus.

The division's organization and services include the following.

### Center for Credit Programs

**Associate dean:** Doug Lee

**Web site:** <http://www.continuetolearn.uiowa.edu/ccp>

The Center for Credit Programs works with University of Iowa colleges and academic departments to offer for-credit courses in a variety of formats and schedules. Courses are offered on and off campus. Courses may be open to University of Iowa students and to persons not formally admitted to a degree program. For more information, contact the Center for Credit Programs or visit its web site.

#### Saturday & Evening Classes

**Director:** Marlys Boote

**Web site:** <http://www.continuetolearn.uiowa.edu/ccp/sande>

The Center for Credit Programs sponsors University courses on campus at times convenient for part-time or nontraditional students. Undergraduate and graduate course work is available in a wide range of academic disciplines. For more information, contact the Center for Credit Programs.

#### Summer and Winter Sessions

**Associate dean:** Doug Lee

**Web site, summer session:** <http://www.continuetolearn.uiowa.edu/ccp/summer>

**Web site, winter session:** <http://www.continuetolearn.uiowa.edu/ccp/winter>

The University of Iowa conducts a summer session through the Center for Credit Programs with terms of three, six, and eight weeks. Classes also are offered outside these normal summer session terms. A three-week winter session is offered during the break between the fall and spring semesters.

During the summer and winter sessions, students can take undergraduate and graduate course work. Classes during these sessions are taught mainly by University of Iowa faculty members, so students receive the same first-rate instruction provided during the spring and fall semesters. Courses are offered in a variety of formats both on and off campus. They are open to University of Iowa students and to persons not formally admitted to a degree program.

#### Distance Education Programs and Courses

**Associate dean:** Anne Zalenski

**Web site:** <http://www.continuetolearn.uiowa.edu/ccp/de>

The University of Iowa offers Guided Independent Study and online courses in a wide range of disciplines. For information about course listings (including courses offered on the World Wide Web), procedures, and enrollment, visit the Distance Education web site.

University extension classes are scheduled where they best serve off-campus students, at the request of public school officials, and/or where professional, business, industrial, or other qualified groups express a need for instruction. The center also sponsors courses via the Iowa Communications Network, the Internet, and other technologies. For more information, contact Distance Education or visit its web site.

#### Bachelor of Applied Studies

**Web site:** [http://www.continuetolearn.uiowa.edu/ccp/blsbas/bas\\_introduction.htm](http://www.continuetolearn.uiowa.edu/ccp/blsbas/bas_introduction.htm)

The Bachelor of Applied Studies (B.A.S.) is a bachelor's degree that may be completed entirely by distance education. The degree requires a minimum of 120 s.h. and is offered without an academic major. Students may earn credit toward

the degree by taking courses offered in varied distance education formats; they also may use courses offered in on-campus formats. Applicants must hold an Associate of Applied Science (A.A.S.), an Associate of Arts (A.A.), or an Associate of Science (A.S.) degree. The B.A.S. is awarded by University College and is administered by the Division of Continuing Education. For a detailed program description, see Bachelor of Applied Studies (University College) in the Catalog or visit the Distance Education web site.

## **Bachelor of Liberal Studies**

**Web site:** [http://www.continuetolearn.uiowa.edu/ccp/blsbas/bls\\_introduction.htm](http://www.continuetolearn.uiowa.edu/ccp/blsbas/bls_introduction.htm)

The Bachelor of Liberal Studies (B.L.S.) is a bachelor's degree that may be completed entirely by distance education. The degree requires a minimum of 120 s.h. and is offered without an academic major. Students may earn credit toward the degree by taking courses offered in varied distance education formats; they also may use courses offered in on-campus formats. Applicants must have either an Associate of Arts (A.A.) degree or have earned at least 60 s.h. of credit. The B.L.S. is awarded by the College of Liberal Arts and Sciences and is administered by the Division of Continuing Education. For a detailed program description, see Bachelor of Liberal Studies (College of Liberal Arts and Sciences) in the Catalog or visit the Distance Education web site.

## **A. Craig Baird Debate Forum**

**Coordinator of forensics:** Paul Bellus

**Web site:** <http://www.continuetolearn.uiowa.edu/debate/>

The A. Craig Baird Debate Forum provides a forum for advancement in argumentation theory and practice. It provides nationally renowned advocacy training programs on issues of public concern and supports an atmosphere of civil discourse. The forum's local, regional, national, and international outreach programs enhance students' learning environment and reach beyond the physical borders of the University of Iowa campus.

The A. Craig Baird Debate Forum administers the following programs.

**Intercollegiate debate:** provides coaching and research to advance students' competitive success; includes attendance at 10-15 collegiate debate tournaments yearly; the program has won two national championships.

**International parliamentary debate:** participation in the world tournament.

**National Summer Institute in Forensics:** a summer program in which students live on the Iowa campus; features Lincoln-Douglas debate and a policy debate institute; the 77-year-old program draws top scholars to campus and has counted students and teachers from every state of the nation and from Japan, Korea, and Guam as participants.

**Iowa High School Forensics League:** a partnership between Iowa high schools and The University of Iowa that promotes scholarship, communication and expression, and leadership in forensics; founded in 1906, the league holds three tournaments and an academic conference each year that bring more than 1,000 participants to the Iowa campus.

**University public debate series:** founded in 1960, the series presents 12 radio broadcast debates each year, investigating local, regional, national, and international controversies; debate attendance is required for some University of Iowa courses.

**Community public debate series:** a forum in which local political, social, economic, and intellectual controversies are debated.

**International public debate series:** engages in cross-cultural exchanges and provides a forum for high school debaters to participate with The University of Iowa in international debates.

**The National Lincoln-Douglas Debate Round-Robin:** brings the nation's top 28 high school Lincoln-Douglas debaters to campus for the national competition.

**Urban debate initiative:** provides coaching, judging, and instructional support to underrepresented populations in the Chicago, Kansas City, and St. Louis areas.

**Online at the National Forensics League:** provides online instructional videos and commentary in support of high school debate.

## **Secondary Student Training Program**

**Director:** Will Swain

**Web site:** <http://www.continuetolearn.uiowa.edu/sstp>

The Secondary Student Training Program (SSTP) provides opportunities for high school students to conduct research in a University of Iowa laboratory under the guidance of a faculty mentor. Students attend faculty seminars, science

communication workshops, and many social and recreational activities during the six-week program. During the final week, they present their research results in a formal symposium attended by other SSTP students and the program's faculty and research staff. All SSTP students write a formal abstract summarizing their six weeks of research.

SSTP students live on the University campus during the program.

The University of Iowa's Carver College of Medicine, the Graduate College, and the Colleges of Dentistry, Engineering, Liberal Arts and Sciences, Pharmacy, and Public Health all participate in the Secondary Student Training Program.

Research projects typically are available in biochemistry, biology, biomedical engineering, chemistry, computer science, dentistry, environmental engineering, hydroscience, integrative physiology, internal medicine, microbiology, pediatrics, physics and astronomy, psychology, and speech pathology. Students may earn up to 3 s.h. of University of Iowa credit during the program. See Secondary Student Training Program (University College) in the Catalog.

## Center for Conferences

**Director:** Jo Dickens

**Web site:** <http://www.continuetolearn.uiowa.edu/conferences>

The University of Iowa Center for Conferences (UICC) is the University's principal agency for initiating, coordinating, conducting, and supporting noncredit continuing education programs. It also serves as the University of Iowa's Continuing Education Unit (CEU) database.

UICC coordinates national and international conferences for University faculty, departments, colleges, administrative units, student groups and related academic societies, professional associations, and other groups sponsored by the University. Its services include initial planning, site location, budget development, income and expense management, and online conference registration.

The Center for Conferences uses facilities on the University of Iowa campus as well as those located in Iowa City and Coralville, throughout Iowa, and nationwide. For more information, visit the Center for Conferences web site.

## Iowa Lakeside Laboratory

**Executive director:** Peter J. van der Linden

**Web site:** <http://www.continuetolearn.uiowa.edu/lakesidelab/>

Iowa Lakeside Laboratory is a field station run cooperatively by The University of Iowa, Iowa State University, and the University of Northern Iowa and administered by The University of Iowa. The laboratory offers summer courses and research opportunities for undergraduate and graduate students. Courses focus on the ecology, taxonomy, and conservation of northern plains animals, plants, microorganisms, and ecosystems. Students take one course at a time, 40 hours per week, for one to four weeks. Class sizes are small, and most students spend at least part of every day outdoors.

The Board of Regents, State of Iowa, has designated Lakeside Laboratory a Regents Resource Center, dedicated to providing lifelong learning opportunities for Iowans.

For information about academic programs and courses at the laboratory, see Iowa Lakeside Laboratory (University College) in the Catalog or visit the Iowa Lakeside Laboratory web site.

## Iowa Summer Writing Festival

**Director:** Amy Margolis

**Website:** <http://www.continuetolearn.uiowa.edu/iswfest/>

The Iowa Summer Writing Festival is a short-term, noncredit creative writing program for adults. It brings some 1,400 writers to the University of Iowa campus each summer to participate in weeklong and weekend workshops. The program is open to individuals age 21 and older; the sole requirement is the desire to write.

Participants choose from more than 130 workshops across the genres, including the novel, short fiction, poetry, memoir, essay, screenwriting, playwriting, travel writing, humor, writing for children, mystery, science fiction, and more. There are sessions for all skill levels and objectives. In the workshop format, participants read and discuss each other's own creative work.

Weeklong sessions meet for three hours each day, Monday through Friday, with individual student/instructor conferences as well. Weekend sessions meet for eight hours over two days.

Visit the Iowa Summer Writing Festival web site for information about workshops, schedule, and registration. Information about the coming summer festival workshops and dates usually is posted in February or March.

## Iowa Young Writers' Studio

**Director:** Stephen Lovely

**Web site:** <http://www.uiowa.edu/youngwriters>

The Iowa Young Writers' Studio is a two-week summer residential program for high school students who love to write. Students build a community of peers while working with experienced writing teachers, primarily students and graduates of the University's M.F.A. program in creative writing.

The studio offers three courses of study: poetry, fiction, and creative writing (a mix of poetry, fiction, and creative nonfiction). Each course consists of a seminar and a workshop. In seminars, students read literature by established writers. In workshops they share their own writing, get feedback from their classmates and teacher, and discuss issues of narrative and form.

The studio offers two two-week sessions: one in June and one in July. Young writers who have completed grade 10, 11, or 12 are eligible to attend the studio. Application materials include an application form, a creative writing sample, a statement of purpose, a high school transcript, and a letter of recommendation from an English teacher or another instructor familiar with the applicant's writing. For complete application information, contact the Iowa Young Writers' Studio or visit its web site.

## John and Mary Pappajohn Education Center

**Director:** Chet Rzonca

**Manager:** Richard Gardner

**Web site:** <http://www.continuetolearn.uiowa.edu/jmpec>

The John and Mary Pappajohn Education Center (JMPEC) serves a wide range of adult learning needs. It also provides central Iowa students with access to a variety of University of Iowa undergraduate and graduate degree programs and courses. The center is located in downtown Des Moines, Iowa, close to many corporate businesses and government offices. With classrooms that can accommodate groups of up to 80 people, JMPEC is ideal for small conferences, educational workshops, and meetings. It is equipped to handle on-site instructional technology and to deliver distance education to students anywhere. JMPEC also makes noncredit learning opportunities for professional and workforce development available to corporations and individuals. Learn more at the John and Mary Pappajohn Education Center web site.

## Labor Center

**Director:** Jennifer Sherer

**Web site:** <http://www.continuetolearn.uiowa.edu/laborctr>

The University of Iowa Labor Center provides educational programs and research support to Iowa's working people and their organizations. The center offers a wide range of noncredit courses designed for labor union members and leaders; they cover steward education and contract administration, collective bargaining, labor and employment law, public policy issues, leadership development, organizing and mobilizing, economics, labor history, workplace health and safety, and other topics relevant to union members. Courses are offered both on and off campus at times and locations convenient to working adults. The Labor Center also provides research assistance and technical information.

## Noncredit Educational Opportunities

The Division of Continuing Education partners with vendors outside the University to provide noncredit educational opportunities for individuals seeking personal development and for organizations interested in workforce development skills. The division offers online programs with two vendors, Skillsoft and Ed2Go.

Skillsoft's Continue to Learn online courses are self-paced. Learners choose courses from catalogs, which they purchase through an annual subscription. For details, see Continue to Learn with Skillsoft on the division's web site.

Ed2Go provides structured online courses facilitated by an instructor. Each course lasts six weeks and has a preset start and end date. Courses cover personal and workforce development topics. Learn more at Ed2Go on the division's web site.

Certification preparation opportunities may be available through other partnerships. Contact Distance Education or

visit its web site.

# Iowa Administrative Code

The following is extracted from the Board of Regents section of the Iowa Administrative Code as of August 5, 2010. Some changes are pending Board of Regents approval.

## Admission Rules Common to the Three State Universities

### 681--1.1(262) Admission of undergraduate students directly from high school

Students desiring admission to the University of Iowa, Iowa State University, or the University of Northern Iowa must meet the requirements in this rule and also any special requirements for the curriculum, school, or college of their choice.

#### 1.1(1) Application

Applicants must submit a formal application for admission, together with the appropriate application fee as approved by the state board of regents pursuant to Iowa Code subsection 262.9(18) and detailed in rule 681.1.7(262), and have their secondary school provide a transcript of their academic record, including credits and grades, rank in class, and certification of graduation. Applicants must also submit SAT Reasoning Test or ACT scores. Applicants whose primary language is not English must also meet the English language proficiency requirement specified by each university. Applicants may be required to submit additional information or data to support their applications.

#### 1.1(2) Admission criteria

*a. Effective for students who seek admission prior to fall 2009.* Graduates of approved Iowa high schools who have the subject matter background required by each university and who rank in the upper one-half of their graduating class will be admitted to any regent university. Applicants who are not in the upper one-half of their graduating class may, after an individual review of their academic and test records, and at the discretion of the admissions officers:

- (1) Be admitted unconditionally,
- (2) Be admitted conditionally,
- (3) Be required to enroll for a tryout period during a preceding summer session, or
- (4) Be denied admission.

*b. Effective for students who seek admission in fall 2009 and thereafter.*

(1) Decisions on admission to a regent university are based on the following four factors: performance on standardized tests (SAT Reasoning Test or ACT); high school grade point average (GPA); high school percentile rank in class; and number of high school courses completed in the core subject areas. These factors are used in the following equation to calculate a regent admission index (RAI):

$$\text{RAI} = (2 \times \text{ACT composite score}) + (1 \times \text{high school rank expressed as a percentile}) + (20 \times \text{high school grade point average}) + (5 \times \text{number of high school courses completed in the core subject areas})$$

Note: For purposes of calculating the regent admission index, the ACT composite score has a top value of 36 (SAT scores will be converted to ACT composite equivalents); high school rank is expressed as a percentile with 99 percent as the top value; high school GPA is expressed in a four-point scale; and number of high school courses completed in the core subject areas is expressed in terms of years or fractions of years of study.

(2) Graduates of approved Iowa high schools who have the subject matter background required by each university and who meet the regent admission index of 245 required for automatic admission will be admitted to any regent university. Applicants who do not meet the regent admission index of 245 for automatic admission or for whom a regent admission index cannot be calculated may, after an individual review of their academic and test records, and at the discretion of the admissions officers:

1. Be admitted unconditionally,
2. Be admitted conditionally,
3. Be required to enroll for a tryout period during a preceding summer session, or
4. Be denied admission.

**1.1(3)** Graduates of approved high schools in other states may be held to higher academic standards, but must meet at least the same requirements as graduates of Iowa high schools. The options for conditional admission or summer tryout enrollment may not necessarily be offered to these students.

**1.1(4)** Applicants who are graduates of nonapproved high schools will be considered for admission in a manner similar to applicants from approved high schools, but additional emphasis will be given to scores obtained on standardized examinations.

**1.1(5)** Applicants who are not high school graduates, but whose classes have graduated, may be considered for admission. These applicants will be required to submit all academic data to the extent that it exists and achieve scores

on standardized examinations which will demonstrate that they are adequately prepared for academic study.

**1.1(6) Early admission** a. Students with superior academic records may be admitted, on an individual basis, for part-time university study while enrolled in high school or during the summers prior to high school graduation.

b. In rare situations, exceptional students may be admitted as full-time students to a regent university before completing high school. Early admission to a regent university is provided to serve persons whose academic achievement and personal and intellectual maturity clearly suggest readiness for collegiate level study. Each university will specify requirements and conditions for early admission.

This rule is intended to implement Iowa Code section 262.9(3).

### **681--1.2(262) Admission of undergraduate students by transfer from other colleges**

Students desiring admission to the University of Iowa, Iowa State University, or the University of Northern Iowa must meet the requirements in this rule and also any special requirements for the curriculum, school, or college of their choice.

Applicants must submit a formal application for admission, together with the appropriate application fee as approved by the state board of regents pursuant to Iowa Code subsection 262.9(18) and detailed in rule 681-1.7(262), and request that each college they have attended send an official transcript of record to the admissions office. High school academic records and standardized test results may also be required. The Test of English as a Foreign Language (TOEFL) is required of foreign students whose first language is not English.

**1.2(1)** Transfer applicants with a minimum of 24 semester hours of graded credit from regionally accredited colleges or universities, who have achieved for all college work previously attempted the grade point required by each university for specific programs, will be admitted. Higher academic standards may be required of students who are not residents of Iowa.

Applicants who have not maintained the grade point required by each university for specific programs or who are under academic suspension from the last college attended may, after a review of their academic and test records, and at the discretion of the admissions officers:

- a. Be admitted unconditionally,
- b. Be admitted conditionally,
- c. Be required to enroll for a tryout period during a preceding summer session, or
- d. Be denied admission.

**1.2(2)** Admission of students with fewer than 24 semester hours of college credit will be based on high school academic and standardized test records in addition to review of the college record.

**1.2(3)** Transfer applicants under disciplinary suspension will not be considered for admission until information concerning the reason for the suspension has been received from the college assigning the suspension. Applicants granted admission under these circumstances will be admitted on probation.

**1.2(4)** Transfer applicants from colleges and universities not regionally accredited will be considered for admission on an individual basis taking into account all available academic information.

This rule is intended to implement Iowa Code section 262.9(3).

### **681--1.3(262) Transfer credit practices**

The regent universities endorse the Joint Statement on Transfer and Award of Academic Credit approved in 1978 by the American Council on Education (ACE), the American Association of Collegiate Registrars and Admissions Officers (AACRAO), and the Council on Postsecondary Accreditation (COPA). The current issue of Transfer Credit Practices of Selected Educational Institutions, published by the American Association of Collegiate Registrars and Admissions Officers (AACRAO), and publications of the Council on Postsecondary Accreditation (COPA) are examples of references used by the universities in determining transfer credit. The acceptance and use of transfer credit is subject to limitations in accordance with the educational policies operative at each university.

#### **1.3(1) Students from regionally accredited colleges and universities**

Credit earned at regionally accredited colleges and universities is acceptable for transfer except that credit in courses determined by the receiving university to be of a remedial, vocational, or technical nature, or credit in courses or programs in which the institution granting the credit is not directly involved, may not be accepted, or may be accepted to a limited extent.

Of the course work earned at a two-year college, students may apply up to one-half but no more than 65 hours of the credits required for a bachelor's degree toward that degree at a regent university. This policy became effective

September 29, 1993.

### **1.3(2) Students from colleges and universities which have candidate status**

Credit earned at colleges and universities which have become candidates for accreditation by a regional association is acceptable for transfer in a manner similar to that from regionally accredited colleges and universities if the credit is applicable to the bachelor's degree at the receiving university.

Credit earned at the junior and senior classification from an accredited two-year college which has received approval by a regional accrediting association for change to a four-year college may be accepted by a regent university.

### **1.3(3) Students from colleges and universities not regionally accredited**

When students are admitted from colleges and universities not regionally accredited, they may validate portions or all of their transfer credit by satisfactory academic study in residence, or by examination. Each university will specify the amount of the transfer credit and the terms of the validation process at the time of admission.

In determining the acceptability of transfer credit from private colleges in Iowa which do not have regional accreditation, the regent committee on educational relations, upon request from the institutions, evaluates the nature and standards of the academic program, faculty, student records, library, and laboratories.

In determining the acceptability of transfer credit from colleges in states other than Iowa which are not regionally accredited, acceptance practices indicated in the current issue of Transfer Credit Practices of Selected Educational Institutions will be used as a guide. For institutions not listed in the publication, guidance is requested from the designated reporting institution of the appropriate state.

### **1.3(4) Students from foreign colleges and universities**

Transfer credit from foreign educational institutions may be granted after a determination of the type of institution involved and after an evaluation of the content, level, and comparability of the study to courses and programs at the receiving university. Credit may be granted in specific courses, but is frequently assigned to general areas of study. Extensive use is made of professional journals and references which describe the education systems and programs of individual countries.

This rule is intended to implement Iowa Code section 262.9(3).

## **Residence**

### **681--1.4(262) Classification of residents and nonresidents for admission, tuition, and fee purposes**

#### **1.4(1) General**

a. A person enrolling at one of the three state universities shall be classified as a resident or nonresident for admission, tuition, and fee purposes by the registrar or someone designated by the registrar. The decision shall be based upon information furnished by the student and other relevant information.

b. In determining resident or nonresident classification, the issue is essentially one of why the person is in the state of Iowa. If the person is in the state primarily for educational purposes, that person will be considered a nonresident. For example, it may be possible that an individual could qualify as a resident of Iowa for such purposes as voting, or holding an Iowa driver's license, and not meet the residency requirements as established by the Board of Regents for admission, tuition, and fee purposes.

c. The registrar, or designated person, is authorized to require written documents, affidavits, verifications, or other evidence deemed necessary to determine why a student is in Iowa. The burden of establishing that a student is in Iowa for other than educational purposes is upon the student.

A student may be required to file any or all of the following:

- (1) A statement from the student describing employment and expected sources of support;
- (2) A statement from the student's employer;
- (3) A statement from the student's parents verifying nonsupport and the fact that the student was not listed as a dependent on tax returns for the past year and will not be so listed in future years;
- (4) Supporting statements from persons who might be familiar with the family situation;
- (5) Iowa state income tax return.

d. Applications for resident classification for a given semester or session are due no later than the fifteenth class day of that semester or session. Applications received after the fifteenth class day of that semester or session will be

considered for the next semester or session. Appeals of any nonresident classification decision resulting from applications for resident classifications are due no later than midterm of that semester or session. Change of classification from nonresident to resident will not be made retroactive beyond the term in which application for resident classification is made.

e. A student who gives incorrect or misleading information to evade payment of nonresident fees shall be subject to serious disciplinary action and must also pay the nonresident fees for each term previously attended.

f. Review Committee. These regulations shall be administered by the registrar or someone designated by the registrar. The decision of the registrar or designated person may be appealed to a university review committee. The finding of the review committee may be appealed to the state board of regents.

#### **1.4(2) Guidelines**

a. The following guidelines are used in determining the resident classification of a student for admission, tuition, and fee purposes:

(1) A financially dependent student whose parents move from Iowa after the student is enrolled remains a resident provided the student maintains continuous enrollment. A financially dependent student whose parents move from Iowa during the senior year of high school will be considered a resident provided the student has not established domicile in another state.

(2) In deciding why a person is in the state of Iowa, the person's domicile will be considered. A person who comes to Iowa from another state and enrolls in any institution of postsecondary education for a full program or substantially a full program shall be presumed to have come to Iowa primarily for educational reasons rather than to establish a domicile in Iowa.

(3) A student who was a former resident of Iowa may continue to be considered a resident provided absence from the state was for a period of less than 12 months and provided domicile is reestablished. If the absence from the state is for a period exceeding 12 months, a student may be considered a resident if evidence can be presented showing that the student has long-term ties to Iowa and reestablishes an Iowa domicile.

A person or the dependent of a person whose domicile is permanently established in Iowa, who has been classified as a resident for admission, tuition, and fee purposes, may continue to be classified as a resident so long as domicile is maintained, even though circumstances may require extended absence of the person from the state. It is required that a person who claims Iowa domicile while living in another state or country will provide proof of the continual Iowa domicile as evidence that the person:

1. Has not acquired a domicile in another state,
2. Has maintained a continuous voting record in Iowa, and
3. Has filed regular Iowa resident income tax returns during absence from the state.

(4) A student who moves to Iowa may be eligible for resident classification at the next registration following 12 consecutive months in the state provided the student is not enrolled as more than a half-time student (6 credits for an undergraduate or professional student, 5 credits for a graduate student) in any academic year term, is not enrolled for more than 4 credits in a summer term for any classification, and provides sufficient evidence of the establishment of an Iowa domicile.

(5) A student who has been a continuous student and whose parents move to Iowa may become a resident at the beginning of the next term provided the student is dependent upon the parents for a majority of financial assistance.

(6) A person who has been certified as a refugee or granted asylum by the appropriate agency of the United States who enrolls as a student at a university governed by the Iowa state board of regents may be accorded immediate resident status for admission, tuition, and fee purposes when the person:

1. Comes directly to the state of Iowa from a refugee facility or port of debarkation, or
2. Comes to the state of Iowa within a reasonable time and has not established domicile in another state.

Any refugee or individual granted asylum not meeting these standards will be presumed to be a nonresident for admission, tuition, and fee purposes and thus subject to the usual method of proof of establishment of Iowa residency

(7) An alien who has immigrant status establishes Iowa residency in the same manner as a United States citizen.

(8) At the regent institutions, American Indians who have origins in any of the original people of North America and who maintain a cultural identification through tribal affiliation or community recognition with one or more of the tribes or nations connected historically with the present state of Iowa, including the Iowa, Kickapoo, Menominee, Miami, Missouri, Ojibwa (Chippewa), Omaha, Otoe, Ottawa (Odawa), Potawatomi, Sac and Fox (Sauk, Meskwaki), Sioux, and Winnebago (Ho Chunk), will be assessed Iowa resident tuition and fees.

b. Additional guidelines are used in determining the resident classification of a veteran, qualified military person, and

dependent children and spouses of a veteran or qualified military person for purposes of admission and undergraduate tuition and mandatory fees:

(1) A person who is stationed on active duty at the Rock Island arsenal as a result of military orders, or the dependent child or spouse of such person, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled. If the qualified military person is transferred, deployed, or restationed while the person's spouse or dependent child is enrolled in an institution of higher education under the control of the board of regents, the spouse or dependent child shall continue to be classified as a resident under this subparagraph until the close of the fiscal year in which the spouse or dependent child is enrolled.

(2) A veteran who is domiciled or moves to the state of Iowa and who is eligible for benefits, or has exhausted benefits under the federal Post-9/11 Veterans Educational Assistance Act of 2008, is entitled to resident status for purposes of undergraduate tuition and mandatory fees. The dependent child or spouse of a veteran who meets these requirements is entitled to resident status for undergraduate tuition. However, if the arrival of the veteran in Iowa is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases for the dependent child or spouse until the beginning of the next term in which the dependent child or spouse is enrolled.

(3) A person who is moved into the state as the result of military or civil orders from the government for other than educational purposes, or the dependent child or spouse of such a person, is entitled to resident status. However, if the arrival of the person under orders is subsequent to the beginning of the term in which the dependent child or spouse is first enrolled, nonresident fees will be charged in all cases until the beginning of the next term in which the dependent child or spouse is enrolled. Legislation, effective July 1, 1977, requires that military personnel who claim residency in Iowa (home of record) will be required to file Iowa resident income tax returns.

#### **1.4(3) Facts**

a. The following circumstances, although not necessarily conclusive, have probative value in support of a claim for resident classification:

- (1) Reside in Iowa for 12 consecutive months, and be primarily engaged in activities other than those of a full-time student, immediately prior to the beginning of the term for which resident classification is sought.
- (2) Reliance upon Iowa resources for financial support.
- (3) Domicile in Iowa of persons legally responsible for the student.
- (4) Former domicile in the state and maintenance of significant connections therein while absent.
- (5) Acceptance of an offer of permanent employment in Iowa.
- (6) Military orders, if for other than educational purposes.
- (7) Other facts indicating the student's domicile will be considered by the universities in classifying the student.

b. The following circumstances, standing alone, do not constitute sufficient evidence of domicile to effect classification of a student as a resident under these regulations:

- (1) Voting or registration for voting.
- (2) Employment in any position normally filled by a student.
- (3) The lease of living quarters.
- (4) Admission to a licensed practicing profession in Iowa.
- (5) Automobile registration.
- (6) Public records, for example, birth and marriage records, Iowa driver's license.
- (7) Continuous presence in Iowa during periods when not enrolled in school.
- (8) Ownership of property in Iowa, or the payment of Iowa taxes.

This rule is intended to implement Iowa Code section 262.9(3).

#### **681--1.5(262) Registration and transcripts--general**

A person may not be permitted to register for a course or courses at a state board of regents institution until any delinquent accounts owed by the person to an institution or any affiliated organization for which an institution acts as fiscal agent have been paid.

A state board of regents institution may withhold official transcripts of the academic record of a person until any delinquent accounts owed by the person to an institution or any affiliated organization for which an institution acts as fiscal agent have been paid.

This rule is intended to implement Iowa Code section 262.9.

## **Supplemental Specific Rules to The University of Iowa**

**681--1.6(262) College-bound program****1.6(1) Definitions.**

"Accredited private institution" means an institution of higher education as defined in Iowa Code section 261.9, subsection 5.

"Commission" means the college aid commission.

"Financial need" means the difference between the student's financial resources, including resources available from the student's parents and the student, as determined by a completed parents' financial statement and including any non-campus-administered federal or state grants and scholarships, and the student's estimated expenses while attending the institution. A student shall accept all available federal and state grants and scholarships before being considered eligible for grants under the Iowa minority academic grants for economic success program. Financial need shall be reconsidered on at least an annual basis.

"Full-time student" means an individual who is enrolled at an accredited private institution or board of regents university for at least 12 semester hours or the trimester or quarter equivalent.

"Minority person" means an individual who is black, Hispanic, Asian, or a Pacific Islander, American Indian, or an Alaskan Native American.

"Part-time student" means an individual who is enrolled at an accredited private institution or board of regents university in a course of study including at least three semester hours or the trimester or quarter equivalent of three semester hours.

"Program" means the Iowa minority academic grants for economic success program established in this division.

**1.6(2) Policy on college-bound program.**

a. The regent institutions will cooperate with other state and local agencies, including the department of education, the college aid commission, and educational institutions in implementing the college-bound program.

b. The universities will develop programs for elementary, middle and secondary school students and their families in the following areas:

- (1) Encouragement to consider attending a postsecondary institution;
- (2) Enrichment and academic preparation;
- (3) Information about how to apply for admission.

c. College-bound program vouchers will be awarded to students on the basis of the participation of the student and the student's family in the college-bound program. One voucher will be awarded for participation in each college-bound program sponsored by a university.

(1) Each university will maintain records concerning those students who participate in the college-bound program, according to its established policies and procedures. The records will include information on those students who have received college-bound program vouchers which are described in Iowa Code section 262.92(2). The University of Iowa will maintain a central record on all students who have received college-bound program vouchers on behalf of all regent institutions and will make appropriate information available to the college aid commission.

(2) College-bound program vouchers may be used by students enrolled at a regent institution or at a private college or university in Iowa.

(3) A student holding vouchers and enrolling at a regent institution will receive priority in the award of funds under the Iowa minority academic grants for economic success (IMAGES) program. Awards under the IMAGES program are made on the basis of financial need. A student may be eligible for an additional award from the institution in which the student is enrolled.

(4) A student holding vouchers and enrolling at a private college or university in Iowa will receive priority in the award of funds under the Iowa minority academic grants for economic success program as provided by the rules of the college aid commission.

(5) The presidents, or their designees, will administer and coordinate the college-bound program at the universities. As part of the coordination, they will establish liaison with the appropriate state and local agencies, serve as the university contact and promote collaborative efforts among the regent universities and other appropriate agencies and institutions. Annual reports to the board of regents shall be prepared by each regent university. The reports shall contain relevant information as to the accomplishments of the program in the past year and a plan of action with goals and objectives for the forthcoming year. Reports shall be submitted to the board of regents on October 1 of each year.

This rule is intended to implement Iowa Code section 262.92.

**681--1.7(262) Application fees**

Application fees required for admission to the University of Iowa, Iowa State University and the University of Northern Iowa are as follows:

**University of Iowa**

Undergraduate domestic student: \$40

Undergraduate international student: \$60

Graduate/professional domestic student: \$60

Graduate/professional international student: \$85

Pharm.D. student: \$100 (pending Board of Regents approval)

Re-entry fee: \$20

This rule is intended to implement Iowa Code section 262.9(3).

**681--2.1(262) Formal application for admission**

All applicants for admission to any college of the University of Iowa must submit a formal application for admission with the required official transcripts and other supporting material as required to the director of admissions. Students may not be registered until they have been issued an admission statement by the director of admissions.

**681--2.3(262) College of Business Administration****2.3(1) Application for admission**

Applications for admission to the college of business administration should be submitted to the director of admissions.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

**2.3(2) Requirements for admission**

For admission to the college of business administration an applicant must have--

- a. Completed specific course work as prescribed by the faculty of the college.
- b. Attained satisfactory scores on the university's required admission examinations.
- c. Maintained a satisfactory grade-point average on all courses undertaken, and on all courses undertaken at the University of Iowa, and on all courses undertaken in business and economics.

Applications from students who have minor deficiencies in meeting grade-point requirements specified above will be reviewed by the admissions committee of the college, and upon favorable recommendation of the committee, such students may be granted conditional or probationary admissions.

Fulfillment of the minimal requirements listed above, however, does not assure admission to the college of business administration. From those applicants who meet the minimum requirements, the admissions committee will select the applicants who, in their judgment, appear to be best qualified.

**681--2.4(262) College of Dentistry****2.4(1) Application for admission**

Address all inquiries regarding admission to the Director of Admissions, University of Iowa.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

Applicants for admission to dentistry are encouraged to complete a program leading to a baccalaureate degree before entering dentistry. Applicants should consider a combined program of liberal arts and dentistry which would qualify them for a baccalaureate degree upon the completion of the freshman year in dentistry. Preference will be given to students who have the baccalaureate degree or who have completed the requirements for the degree in a combined program.

Fulfillment of the specific requirements for admission listed does not ensure admission to the college of dentistry. From the applicants meeting the minimum requirements, the admissions committee will select the applicants who in their judgment appear to be best qualified for the study and practice of dentistry.

Each applicant must place on file in the office of the director of admissions the completed application form and an official transcript from each college attended.

The college work outlined below will suffice to meet the minimal academic requirements for admission to the college of dentistry.

The college curriculum must include at least three academic years of accredited work comprising not less than 96 semester hours and including specific required science courses as prescribed by the faculty of the college. Electives should be chosen so as to give the applicant a well-rounded educational background.

In order to meet minimum scholarship requirements, the applicant should attain a cumulative grade-point average of 2.5. Since the quality of course work in pre dental science is basic to success in dentistry, special consideration to such college work is given by the admissions committee. The grade-point average is based upon the University of Iowa's marking system in which a grade of "A" is equivalent to four points. Other marking systems will be evaluated by the office of admissions and the committee on admissions of the college of dentistry.

Applicants who have completed the requirements for admission to dentistry five or more years prior to seeking admission to this college of dentistry will be considered by the admissions committee only under exceptional conditions.

Preference will be given to applicants who are residents of Iowa, but consideration will also be given to outstanding nonresidents.

Personal interviews will be required of applicants for admission to the college of dentistry. Applicants will be notified when they should appear for the required interviews with members of the admissions committee.

All applicants must complete the dental aptitude tests sponsored by the council on dental education of the American Dental Association. Tests are given three times annually. The University of Iowa is a testing center.

To facilitate early selection, applicants for admission to the college of dentistry are urged to complete the aptitude test no later than October to enable the admissions committee to begin its selection in December.

Accepted applicants are required to make the required deposit within two weeks after notification of favorable action on their applications. This deposit is not refundable but is credited toward the first fee payment. The applicant who fails to make the deposit within the time specified forfeits a place in the entering class.

Applicants accepted for admission are required to submit a satisfactory physical examination report to the university student health service within two weeks following notification of acceptance.

All applicants must also complete, through student health service, an X-ray film of the chest and a successful vaccination against smallpox prior to registration.

#### **2.4(2) Advanced standing**

Applications for admission with advanced standing are handled as individual cases.

### **681--2.5(262) College of Engineering**

Address all inquiries regarding admission to the Director of Admissions, University of Iowa, Iowa City, Iowa.

Closing dates for receiving applications will be announced well in advance of the opening date of any session.

#### **2.5(1) Admission of freshman students**

The applicant must submit a formal application for admission and must have the secondary school provide a certificate of high school credits, including a complete statement of the applicant's high school record, rank in class, scores on standardized tests, and certification of high school graduation. The applicant must also submit any other evidence such as a certificate of health that may be required by this university.

Each applicant must have attained satisfactory scores on the university's required admission examinations, maintained a satisfactory cumulative grade-point average, achieved satisfactory rank in graduating class, and successfully completed all prerequisite courses. The university with the approval of the state board of regents shall establish and periodically review specific minimum requirements for admission to the college of engineering. Among the items to be so determined are test score, grade-point average, class rank and prerequisite courses. These specific determinations will be published in the university catalog.

From applicants who do not meet minimum admission requirements, the director of admissions may after a review of the applicant's record: (a) Admit unconditionally, (b) admit on probation, (c) require enrollment for a tryout period during a preceding summer session, or (d) deny admission.

#### **2.5(2) Admission of undergraduate students by transfer**

The applicant must submit a formal application and official transcript of college work. Each applicant should have:

- a. Maintained satisfactory progress in mathematics.
- b. Attained satisfactory scores on the university's required admission examinations.
- c. Maintained a satisfactory cumulative grade-point average on all college work undertaken.

From applicants who do not meet recommended requirements, the director of admissions will review individual records and may offer probationary admission.

### **681--2.6(262) Graduate College**

Graduates of any college or university accredited by regional accrediting associations may if the academic record is satisfactory be admitted to the graduate college. Admission to the graduate college is not the equivalent of acceptance as a candidate for an advanced degree. Such acceptance is given usually after the completion in residence of work at the university and upon recommendation of the major department and approval by the dean of the graduate college. The acceptance of a student as a degree candidate is determined upon the merits of each individual case.

A student who is within four semester hours of having satisfied all the requirements for the bachelor's degree at the University of Iowa may be given a tentative admission to the graduate college.

### **681--2.7(262) College of Law**

#### **2.7(1) Application for admission**

Address all inquiries concerning admission to the Director of Admissions, University of Iowa, Iowa City, Iowa. Beginning students may enter the college of law only in the summer session or the fall semester. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

To be considered for admission, an applicant should have attained a cumulative grade-point average of at least 2.3 on all college work undertaken. The grade-point average is based upon the University of Iowa's marking system in which a grade of "A" is equivalent to four points. Other marking systems will be evaluated by the office of admissions.

Applicants for admission must present a baccalaureate degree from an approved college or university prior to commencing work in the college of law.

Each applicant for admission must take the Law School Admission Test administered by the Educational Testing Service, Princeton, New Jersey, and have the score forwarded to the college of law. The test is given several times per year and may be taken at numerous locations in the United States and throughout the world. Applicants are urged to take the test in the fall or winter preceding the fall semester for which they are making application. Except upon a showing acceptable to it, the admissions committee will not consider applications from students who fail to take the test prior to the June 1 preceding the fall semester in which they wish to enter.

Fulfillment of the specific requirements for admission listed above does not ensure admission to the college of law. From the applicants meeting the minimum requirements, the admissions committee of the college of law will select those applicants who, in their judgment, appear to be best qualified for the study and practice of law. The law admissions committee may require personal interviews of applicants.

#### **2.7(2) Admission with advanced standing**

A transfer student may be eligible for admission if the student (a) has attended a school approved by the Association of American Law Schools; (b) is in good standing at the time of withdrawal (evidenced by a letter from the dean of the school from which transferring); (c) meets the admission requirements for beginning students; and (d) has done substantially above average work in the law school the student attended. Where an applicant has completed more than one year of law study, advanced standing will be permitted only in exceptional cases. Applicants for admission with advanced standing should comply with the procedures required for admission to the first-year class.

### **681--2.8(262) College of Medicine**

#### **2.8(1) Application for admission**

Address all inquiries regarding admission to the Director of Admissions, University of Iowa.

Applicants are urged to apply as early as possible, since this will give the admissions committee more time to devote to each application. Closing dates for receiving applications will be announced well in advance of the opening date of any session.

Fulfillment of the specific requirements for admission listed below does not ensure admission to the college of medicine. From the applicants meeting the specific requirements, the admissions committee of the college of medicine

will select those applicants who in their judgment appear to be best qualified for the study and practice of medicine.

Prior to entrance an applicant must:

- a. Have received the baccalaureate degree; or
- b. Have completed three years of a combined baccalaureate-medicine curriculum which qualifies the applicant to receive the baccalaureate degree on completion of the first year in medicine; or
- c. Have completed three years of a baccalaureate program which includes the general graduation requirements of the college of liberal arts of the University of Iowa for the combined baccalaureate degree.

Each applicant must place on file in the office of the director of admissions the completed application form and an official transcript from each college attended.

The college work as outlined below will suffice to meet the minimal academic requirements for admission to the college of medicine.

Applicants who have completed the baccalaureate degree and required courses five or more years prior to seeking admission to this college of medicine will be considered by the admissions committee only under exceptional conditions.

The college curriculum must include at least three years (equivalent to 96 semester hours) including specific required science courses as prescribed by the faculty of the college.

Students planning to study medicine should bear in mind that other college work is required in addition to prerequisite sciences because it offers an opportunity to secure a well-rounded education, which is of special importance to those entering the medical profession. In the selection of applicants, preference will be given to those who give evidence of having obtained such a broad education.

To be considered for admission, an applicant must have attained a grade-point average of at least 2.5 for all college work undertaken. As the quality of work in premedical science is very basic to success in medicine, special attention will be given by the admissions committee to grades in science. The grade-point average is based upon the University of Iowa's marking system in which a grade of "A" is equivalent to four points. Other marking systems will be evaluated by the office of admissions and the committee on admissions of the college of medicine.

Preference will be given to applicants with high scholastic standing who are residents of Iowa, and consideration will also be given to outstanding nonresidents. Applicants for admission are required to take the medical college admissions test which is administered for the Association of American Medical Colleges. Applicants are requested to complete this test in May or October of the year preceding that for which they are applying for admission. Students may make arrangements to apply for this examination through the university examination service, the University of Iowa.

Personal interviews will be required. Applicants will be contacted for the appointment for required interviews.

Applicants accepted for admission are required to submit a satisfactory physical examination report to the university student health service within two weeks following notification of acceptance.

All applicants must also complete, through student health service, an X-ray film of the chest and successful vaccination against smallpox prior to registration.

#### **2.8(2) Admission to advanced standing**

If their work preparatory to entering a college of medicine would have met entrance requirements of this college, students from other approved medical colleges may be admitted to advanced standing according to the following conditions:

Only applicants of high scholastic standing will be considered.

They must present certificates showing that they have satisfactorily completed courses equivalent to those already pursued by the class they wish to enter.

The committee on admission to advanced standing will decide in each case whether examinations in the various subjects will be required.

Applications will be considered only upon receipt of a statement from the dean or registrar of the college from which the applicant comes, showing the actual amount of time the student has spent in the study of medicine, the courses taken, and the grades received, together with a statement of the work preparatory to entering upon the course in medicine.

No advanced standing will be granted to students from other than approved medical schools. Students may be granted subject credit upon recommendation of the head of the department concerned, for work taken in other than

medical schools.

### **2.8(3) Unclassified students**

Applicants for admission to the college of medicine who are not candidates for a degree but who desire to register for special subjects, will be admitted to any lecture or laboratory course only upon complying with all the regular requirements for admission to such course or by action of the faculty upon recommendation of the professor in charge of the course.

### **681--2.9(262) College of Nursing**

Applications for admission to the college of nursing should be submitted to the Director of Admissions, The University of Iowa, Iowa City, Iowa. Applicants for admission to the undergraduate program in nursing must present a minimum of 30 semester hours completed in an accredited college. For admission to the college of nursing an applicant must have:

1. Completed specific course work as prescribed by the faculty of the college. The director of admissions will provide a list of the course work required.
2. Completed the American College Tests.
3. Performed satisfactorily on all courses undertaken.

Applications from students who have minor deficiencies in meeting grade-point requirements specified above will be reviewed by the admissions committee of the college, and, upon favorable recommendation of the committee, such students may be granted conditional or probationary admissions.

Fulfillment of the minimum requirements listed above, however, does not assure admission to the college of nursing. From those applicants who meet the minimum requirements, the admissions committee will select the applicants who, in their judgment, appear to be best qualified.

### **681--2.10(262) College of Pharmacy**

#### **2.10(1) General basis for admission**

Fulfillment of the specific requirements for admission does not ensure admission to the college of pharmacy. From the applicants meeting the specific requirements, the admissions committee will select those applicants who in their judgment appear to be best qualified. Applicants for admission to pharmacy should have graduated from an approved high school or have an equivalent amount of training.

#### **2.10(2) College work**

The college work as outlined below will meet the minimum academic requirements for admission to the college of pharmacy. The minimum should include 32 semester hours of college level work exclusive of credit in military and air science and physical education. The 32 semester hours must include:

Communication skills. Applicants must have demonstrated satisfactory achievement in communication skills according to the requirements of the college of liberal arts at the state University of Iowa. Applicants from other institutions may meet this requirement by presenting six semester hours of credit in English composition and rhetoric and two semester hours of credit in speech or an eight-semester-hour year course in communication skills.

Inorganic chemistry and qualitative analysis, eight semester hours.

College mathematics, eight semester hours.

Physics or zoology, eight semester hours.

Students from other institutions may substitute a comparable eight-semester-hour course in biology in lieu of zoology.

Military or air science (if available), zero to two semester hours.

Students who present minor deficiencies in meeting the above requirements may be admitted to the college of pharmacy upon the recommendation of the dean of admissions and the college of pharmacy.

#### **2.10(3) Scholarship and application deadline**

To be considered for admission to the college of pharmacy, students must have earned a 2.0 or "C" average on all collegiate work undertaken. The minimum grade-point average of 2.0 is based on the state University of Iowa's marking system in which the grade of "A" is equivalent to four points. Applications for admission and the required official transcripts should be filed before March 1 for the class to enter pharmacy in September.

**2.10(4) Required tests**

Applicants for admission are required to take the American College Testing Program test.

**2.10(5) Current requirements**

Applicants who have completed work in a college of pharmacy accredited by the American Council on Pharmaceutical Education may if their college academic average is acceptable be admitted and granted advanced standing toward the degree of bachelor of science in pharmacy.

**681--2.11(262) College of Liberal Arts and Sciences**

Applicants for admission to liberal arts and sciences must meet the rules that are common to the three state institutions in Iowa as listed in 681--1.1(262), 1.2(262) and 1.3(262).

**681--2.12(262) College of Education**

Students at the university desiring professional work in education are registered in the college of liberal arts and sciences or the graduate college. Requirements for permission to take teacher-training courses are listed in the university catalog.
