<b>025:004 Musicianship and Theory III</b> Continuation of 025:002 and 025:003; focus on common-practice repertory. Offered fall semesters. Prerequisites: 025:003.	4 s.h.
<b>025:005 Musicianship and Theory IV</b> Continuation of 025:002, 025:003, and 025:004; focus on late 19th- and early 20th-century repertories. Offered spring semesters.	4 s.h.
<b>025:145 Counterpoint Before 1600</b> Two- and three-part counterpoint; Renaissance polyphony. Requirements: 025:004 for undergraduates; 025:240 for graduate students.	3 s.h.

**025:147 Counterpoint After 1600**

3 s.h.

Two- and three-part writing in the style of J.S. Bach; fugue. Requirements: 025:005 for undergraduates, 025:240 for graduate students.

**025:153 Keyboard Harmony**

1-2 s.h.

Melody harmonization and figured-bass realization at the keyboard. Requirements: 025:005 for undergraduates, 025:240 for graduate students; and keyboard proficiency.

**025:236 Music Theory Pedagogy**

3 s.h.

Methods and techniques of teaching college-level music theory, including harmony, sight singing, ear training. Prerequisites: 025:240. Corequisites: 025:237.

**025:237 Music Theory Colloquium**

arr.

Repeatable.

**025:240 Basic Analytical Techniques**

3 s.h.

Theories and strategies of analysis applied to tonal and post-tonal music.

**025:241 History of Music Theory I**

3 s.h.

Requirements: 025:240 or exemption from 025:240 on the Graduate Theory Advisory Examination.

**025:242 History of Music Theory II**

3 s.h.

Prerequisites: 025:240 and 025:241.

**025:247 Post-Tonal Analysis**

3 s.h.

Prerequisites: 025:240.

**025:249 Tonal Analysis**

3 s.h.

Requirements: 025:240 or exemption from 025:240 on the Graduate Theory Advisory Examination.

**025:256 Special Topics in Theory and Analysis**

3 s.h.

Repeatable. Requirements: 025:005 for undergraduates; 025:240 or exemption on Graduate Theory Advisory Exam for graduate students.

**025:311 Advanced Post-Tonal Theory and Analysis**

3 s.h.

Repeatable. Prerequisites: 025:247.

**025:312 Advanced Tonal Theory and Analysis**

3 s.h.

Repeatable. Prerequisites: 025:249.

**025:380 Readings in Music Theory**

arr.

**Voice and Opera****025:115 Diction for Singers I**

2 s.h.

Italian and German pronunciation for singing; basics of international phonetic alphabet; no previous background required.

**025:116 Diction for Singers II**

2 s.h.

French and English pronunciation for singing. Prerequisites: 025:115.

**025:150 Interpretation of German Art Song**

1 s.h.

Schubert, Schumann, Brahms, Wolf, Strauss, Mahler; appropriate diction, style. Prerequisites: 025:115 and 025:116.

**025:151 Interpretation of Non-German Art Song**

1 s.h.

Art songs in English, French, Italian, Spanish; appropriate diction, style. Prerequisites: 025:115 and 025:116.

**025:159 Graduate Diction**

2 s.h.

Advanced pronunciation of singing languages. Requirements: grade of B or higher in undergraduate diction in French, German, and Italian.

**025:165 Opera Workshop** 2 s.h.  
Opera performing techniques, including acting, aria interpretation, scene work. Requirements: vocal major or audition.

**025:169 Singing for Actors** 2 s.h.  
Skill development for healthy, effective singing in the musical theatre style; techniques of vocal production through breath management, resonance, articulation, flexibility; song interpretation and repertoire. Recommendations: (for 025:169) concurrent registration in 025:059. Same as 049:106.

**025:170 Opera Theater Chorus** 1 s.h.  
Requirements: audition.

**025:175 Acting for Singers** 2 s.h.  
Fundamentals of acting technique, with attention to demands on performers in opera and musical theater. Same as 049:102.

**025:201 Principles of Voice Production** 3 s.h.  
Basic physical, physiological, pedagogical principles in understanding professional, nonprofessional, impaired voice production; vocal anatomy, voice classification; control of loudness, pitch, register, quality; efficient, inefficient use of voice; instrumentation for voice analysis, synthesis. Offered fall semesters of odd years. Same as 003:201.

**025:202 Methods of Teaching Voice** 3 s.h.  
Attitude, musicianship, foreign language aptitude, physical and emotional characteristics; mental images used to modify respiratory, phonatory, articulatory behavior; vocal hygiene; performance anxiety; student-teacher relationships; administration in vocal schools, professional organizations. Offered spring semesters. Same as 003:202.

**025:216 Voice for Performers** 2 s.h.  
Comparison of Kinesthetic techniques for singing and acting voice; relaxation, posture, breathing, tone quality, diction, interpretation. Same as 003:204, 049:201.

**025:235 Topics in Vocal Performance** 2 s.h.  
Selected areas of vocal performance. Repeatable.

**025:245 Opera Production** 2-4 s.h.  
Preparation and rehearsals leading up to performance of full production; may include one-act opera, chamber opera, musical theater production, or full-length opera. Repeatable. Requirements: audition. Corequisites: 025:348.

**025:248 Opera Theater: Directing Seminar** arr.  
Exploration, discussion, experience using techniques unique to directing opera; score and libretto analysis, fundamentals of stagecraft, casting and management skills.

**025:339 Survey of Operatic Literature** 3 s.h.  
Important operatic scores examined from standpoint of performers, directors; production problems. Repeatable.

**025:348 Vocal/Operatic Coaching** 1 s.h.  
Professional-level vocal coaching in preparation for opera productions, opera workshop, degree recitals. Repeatable. Corequisites: 025:245.

**025:351 Survey of Song Literature I** 3 s.h.  
German language lieder from 18th century to present; French mélodie from Meyerbeer to present. Offered fall semesters of odd years.

**025:352 Survey of Song Literature II** 3 s.h.  
British, American, Italian, Spanish, Latin American, Scandinavian, and Russian art song from 18th century to present. Offered fall semesters of even years.

**025:356 Voice Habilitation** 2-3 s.h.

Application of methods of intervention in development, training, rehabilitation of vocal behavior; motor learning, efficacy of treatment strategies, factors affecting compliance with recommended therapy. Offered fall semesters. Prerequisites: 003:114 or 003:201. Requirements: enrollment in Summer Vocology Institute, Salt Lake City, Utah. Same as 003:213.

**025:357 Instrumentation for Voice Analysis**

2 s.h.

Glottographic, videostroboscopic, electromyographic, and acoustic analysis for assessment of vocal and respiratory function; using these techniques in conjunction with perceptual evaluation of voice; through the Vocology Institute in Utah. Offered summer sessions of even years. Same as 003:221.

# Performing Arts Entrepreneurship

**Director, Division of Performing Arts:** Alan MacVey

**Coordinator:** David McGraw

**Advisor:** David McGraw (Theatre Arts)

**Undergraduate degree:** B.A. in Performing Arts Entrepreneurship

**Undergraduate nondegree program:** Certificate in Performing Arts Entrepreneurship

**Web site:** <http://www.uiowa.edu/~dpa>

The Division of Performing Arts, in partnership with the John Pappajohn Entrepreneurial Center in the Tippie College of Business, offers the undergraduate Certificate in Performing Arts Entrepreneurship. The program gives students the opportunity to pursue professional studies in the performing arts, in the framework of a liberal arts education, and to develop the skills required for creating market-based opportunities in the arts.

The Bachelor of Arts major in performing arts entrepreneurship is closing; no new enrollments are being accepted in the major. Students who declared the major before the beginning of fall semester 2009 may complete the major. Some courses required by the program may be dropped, so students are urged to finish the major as quickly as possible. See "Bachelor of Arts" below.

## Certificate

The undergraduate Certificate in Performing Arts Entrepreneurship requires a minimum of 29-33 s.h. The program is designed for students of dance, music, and theatre arts who wish to learn about the business of the performing arts and to develop the entrepreneurial skills necessary for promoting their artistic work.

Certificate students take entrepreneurship-related course work in accounting, financial management, and marketing as well as courses focused on arts management and leadership practices in both commercial and nonprofit organizations (20-24 s.h.). They also must complete course work in dance, music, or theatre arts (9 s.h.) and an internship in an arts organization (0 s.h.).

Students are strongly encouraged, but not required, to pursue a major in one of the performing arts.

The certificate requires the following course work. Students may not use a single course to satisfy more than one certificate requirement (e.g., a business course required for the certificate that is cross-listed in dance, music, or theatre arts may not also be counted toward the performing arts course requirement).

## PERFORMING ARTS

Certificate students earn 9 s.h. in 100-level courses taken in one of three performing arts units: the Department of Dance, the School of Music, or the Department of Theatre Arts. Many 100-level courses have prerequisites; consult an advisor about course sequencing.

## BUSINESS AND ENTREPRENEURSHIP

Students complete one course in each of these areas: accounting, marketing, financial management, new ventures/entrepreneurship, entrepreneurial marketing, e-commerce, arts management, and arts leadership. They also must complete 06T:050 Foundations in Entrepreneurship, an entrepreneurship prerequisite that is offered both on campus and online.

Prerequisite:

06T:050 Foundations in Entrepreneurship	2 s.h.
---	--------

One of these:

06T:116 Basics of Small Business Marketing	1 s.h.
--	--------

06M:100 Introduction to Marketing Strategy	3 s.h.
--	--------

An approved college-level marketing course (transfer courses accepted)

One of these:

01P:185 Grant Writing in the Arts	3 s.h.
-----------------------------------	--------

06T:133 Entrepreneurial Finance	3 s.h.
---------------------------------	--------

One of these:

06T:120 Entrepreneurship and Innovation	3 s.h.
---	--------

188:111 New Ventures in the Arts

3 s.h.

All of these:

06T:134 Entrepreneurial Marketing

3 s.h.

06T:148 E-Commerce Strategies for Entrepreneurs

3 s.h.

188:109 Introduction to Arts Management

3 s.h.

188:195 Arts Leadership Seminar

3 s.h.

**INTERNSHIP**

Students may complete the required internship (0 s.h.) during any semester in the program. The Pomerantz Career Center coordinates a wide variety of internships; see Career Center Programs (University College) in the Catalog. Students also may choose other internship opportunities. The Iowa Arts Council and the Iowa Cultural Corridor Alliance maintain lists of recommended host organizations.

**Residence in Performing Arts Learning Community**

First- and second-year students studying performing arts entrepreneurship may apply to live in the Performing Arts Living-Learning Community, a coed floor in Currier Hall, across the Iowa River from the fine arts campus. The community includes students from art and art history, dance, film, music, and theatre arts.

**Bachelor of Arts**

The major in performing arts entrepreneurship is closing. The closure was approved by the Board of Regents, State of Iowa, in summer 2008. No new enrollments are being accepted in the major.

Students who previously declared the major in performing arts entrepreneurship must fulfill all requirements for the major and the Bachelor of Arts by July 27, 2012. Students who do not complete the major by this date will not be allowed to continue in the major and will need to declare a new program of study. The requirements for the major are stated below. They are the same as in previous years.

The Bachelor of Arts in performing arts entrepreneurship requires a minimum of 120 s.h., including 53-59 s.h. of work for the major. All students pursuing the major choose a primary area of study in dance, music, or theatre arts. They also choose a secondary area different from their primary area. All students complete three required courses in entrepreneurship, a capstone course, and an internship.

Students must complete the College of Liberal Arts and Sciences General Education Program.

Students may apply a maximum of 24 s.h. earned at other institutions toward the major in performing arts entrepreneurship. In order to be counted toward the major, all transfer course work must be reviewed and approved by the program.

Performing arts entrepreneurship students are advised by the Academic Advising Center until they have earned 24 s.h. Students are then assigned a faculty advisor from the Performing Arts Entrepreneurship Program.

Requirements for the major are as follows.

**PRIMARY AREA**

Students complete the requirements for the primary area of their choosing.

**Dance**

This primary area requires a total of 26 s.h., including at least 12 s.h. earned in University of Iowa courses numbered 137:100 or above. An audition is required; contact the Department of Dance for details.

Before enrolling in a course, students must satisfy the course's prerequisites. For course descriptions, including prerequisites, see the Department of Dance course listing in the Catalog.

One of these:

137:034 Beginning/Contact Improvisation

1-2 s.h.

137:134 Improvisation I

1-2 s.h.

All of these:

137:050 Dance Production	3 s.h.
137:080 Dance and Society: U.S. Forms in Transnational and Critical Contexts	3 s.h.
Dance technique (any level, from ballet, modern, jazz, or Afro-Cuban drum and dance)	9 s.h.

Dance electives--6 s.h. from these:

137:070 Choreography I	2 s.h.
137:071 Choreography II	2 s.h.
137:106 Dance Performance	1 s.h.
137:147/049:108 Dance Kinesiology	3 s.h.
137:149 Honors Studies in Dance	arr.
137:181 Dance History	3 s.h.
137:182 The Contemporary Dance Scene	3 s.h.
137:190 Independent Study	arr.
Additional dance technique courses (any level, from ballet, modern, jazz, or Afro-Cuban drum and dance)	1-3 s.h.

One of these:

137:147/049:108 Dance Kinesiology	3 s.h.
137:181 Dance History	3 s.h.
137:182 The Contemporary Dance Scene	3 s.h.

### Music

This primary area requires a total of 26 s.h. An audition is required. Contact the School of Music for details.

All of these:

025:001 Fundamentals of Music for Majors (unless exempted by proficiency exam)	3 s.h.
025:002 Musicianship and Theory I	4 s.h.
025:003 Musicianship and Theory II	4 s.h.
025:071 Group Instruction in Piano I (unless exempted by proficiency exam)	1 s.h.
025:072 Group Instruction in Piano II (unless exempted by proficiency exam)	1 s.h.

Music history--one of these:

025:103 World Music	3 s.h.
025:104 Music of Latin America and the Caribbean	3 s.h.
025:141 History of Jazz	3 s.h.
025:144 History of Music I	3 s.h.
025:146 History of Music II	3 s.h.
025:178 Music, Culture, and Identity	3 s.h.

All of these:

Applied music for lower-level undergraduates (students must audition to be accepted by a professor--register for 2 s.h. each for two semesters)	4 s.h.
Ensemble participation (placement by audition in choral, orchestra, band, or jazz ensembles)	4 s.h.
025:074 Recital Attendance (two sessions)	2 s.h.

Students who are exempted by proficiency exam from 025:001 Fundamentals of Music for Majors (3 s.h.), 025:071 Group Instruction in Piano I (1 s.h.), or 025:072 Group Instruction in Piano II (1 s.h.) must earn an equal number of semester hours in music electives.

### Theatre Arts

This primary area requires a total of 25 s.h.

All of these:

049:025 Acting I	3 s.h.
049:044 Theatre Crafts	3 s.h.
049:060 Playscript Analysis	3 s.h.
049:112 History of Theatre and Drama I	3 s.h.
049:113 History of Theatre and Drama II	3 s.h.

Design--one of these:

049:043 Elements of Design	3 s.h.
049:133 Theatre Design I	3 s.h.
049:134 Scene Design I	3 s.h.
049:135 Costume Design I	3 s.h.
049:136 Lighting Design I	3 s.h.
049:146 Drawing and Rendering for the Theatre	3 s.h.

One of these:

049:045 Production: Run Crew	1 s.h.
049:047 Production: Construction	1 s.h.

One of these:

049:130 Directing I	3 s.h.
049:172 Senior Seminar	3 s.h.
049:194 Dramaturgy	3 s.h.
A playwriting course (049:063 or 049:165)	3 s.h.

One of these:

049:109 Introduction to Arts Management	3 s.h.
049:125 Voice for the Actor	3 s.h.
049:127 Theatre Movement	3 s.h.
049:132 Stage Management	3 s.h.
049:133 Theatre Design I	3 s.h.
049:134 Scene Design I	3 s.h.
049:135 Costume Design I	3 s.h.
049:136 Lighting Design I	3 s.h.
049:140 Sound Design for the Theatre	3 s.h.
049:147 Technical Production I	3 s.h.
049:148 Technical Production: Special Topics	3 s.h.

## SECONDARY AREA

Students complete the requirements for the secondary area of their choosing.

### Dance

This secondary area requires at least 15 s.h. of course work in dance. The following courses are required.

137:034 Beginning/Contact Improvisation	2 s.h.
137:080 Dance and Society: U.S. Forms in Transnational and Critical Contexts	3 s.h.
Dance technique (any level, from ballet, modern, jazz, or Afro-Cuban drum and dance)	7 s.h.
Dance electives	3 s.h.

### Music

This secondary area requires at least 18 s.h. of course work (15 s.h. for students who are exempted from 025:001 Fundamentals of Music for Majors by proficiency exam). The following courses are required.

All of these:

025:001 Fundamentals of Music for Majors (unless exempted by proficiency exam)	3 s.h.
025:002 Musicianship and Theory I	4 s.h.
025:064 Recital Attendance for Non-Majors (taken twice)	2 s.h.
Ensemble or applied music courses	3 s.h.
Music electives	3 s.h.

Music history--one of these:

025:103 World Music	3 s.h.
---------------------	--------

025:104 Music of Latin America and the Caribbean	3 s.h.
025:141 History of Jazz	3 s.h.
025:144 History of Music I	3 s.h.
025:146 History of Music II	3 s.h.
025:178 Music, Culture, and Identity	3 s.h.

### Theatre Arts

This secondary area requires at least 15 s.h. of course work in theatre arts, excluding 049:001 Art of the Theatre, 049:002 Theatre and Society: Ancients and Moderns, and 049:003 Theatre and Society: Romantics and Rebels.

At least 12 of the 15 s.h. must be earned in University of Iowa courses chosen from the following list.

049:021 Basic Acting II	3 s.h.
049:025 Acting I	3 s.h.
049:043 Elements of Design	3 s.h.
049:044 Theatre Crafts	3 s.h.
049:060 Playscript Analysis	3 s.h.
049:062 Playwriting I	3 s.h.
049:063 Playwriting II	3 s.h.
049:101 Drama in the Classroom	3 s.h.
Courses numbered above 049:101	

### ENTREPRENEURSHIP STUDIES

Required courses total 9 s.h. Students also must complete 06T:050 Foundations in Entrepreneurship, an entrepreneurship prerequisite that is offered both on campus and online.

Prerequisite:

06T:050 Foundations in Entrepreneurship	2 s.h.
---	--------

Required courses:

06T:133 Entrepreneurial Finance	3 s.h.
06T:134 Entrepreneurial Marketing	3 s.h.

One of these:

06T:120 Entrepreneurship and Innovation	3 s.h.
06T:125/049:111/145:111/188:111 New Ventures in the Arts	3 s.h.

### CAPSTONE COURSE

One of these:

188:161/049:161 The Arts in Performance (or 137:161)	3 s.h.
188:195/049:195 Arts Leadership Seminar (or 145:195)	3 s.h.

### INTERNSHIP

409:188 Internship in Performing Arts	0 s.h.
---------------------------------------	--------

### Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to students pursuing the performing arts entrepreneurship major. Many students need an extra semester to complete the internship requirement. But some students may be able to graduate in four years by taking summer course work or a summer internship. Advisors work with students to develop individual graduation plans.

### Honors

Students who are members of the University of Iowa Honors Program, have a g.p.a. of at least 3.33 in the major, and have approval from their primary advisor may undertake an honors project. Projects may be analytical, creative, or a combination of the two. They ordinarily require an oral presentation or performance for designated faculty members as

well as a research and writing component, which is due upon the project's completion. Performing arts entrepreneurship majors who are members of the University of Iowa Honors Program may take honors courses in their primary and secondary areas. Courses can be designated honors courses with permission of the faculty member who teaches the course, the department offering the course, and the University of Iowa Honors Program. Honors Program membership requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

## Performing Arts Entrepreneurship Courses

### **188:029 First-Year Seminar**

1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

### **188:080 Dance and Society: U.S. Forms in Transnational and Critical Contexts**

3 s.h.

Dance and other physical endeavors as embodied forms of knowledge and culture; U.S. dance practices; European and African dance cultures; aesthetic and political issues raised by concert dance (i.e., performance, choreography, spectatorship, criticism); ethnographic methods to examine the function of dance in cultural formation (i.e., spiritual, celebratory, social, political contexts); lecture, discussion, viewing, movement workshops, formal and informal writing, field research, and WIKI construction. GE: Fine Arts, Humanities. Same as 137:080.

### **188:109 Introduction to Arts Management**

3 s.h.

Nonprofit performing arts management and administrative principles; practical applications, trends in the field; focus on arts organizations and their key administrative positions. Same as 049:109, 145:109.

### **188:111 New Ventures in the Arts**

3 s.h.

Arts administration principles and trends as applied to creation of an arts-related enterprise; case studies; students create business plan for a new arts organization. Duplicates 06J:125 and 06T:120. Corequisites: 06T:050, or 06A:001 and 06M:100. Same as 049:111, 06T:125, 145:111.

### **188:137 World of the Beatles**

3 s.h.

How the Beatles' music was influenced by American pop music, the drug culture, and the Avant Garde, nonwestern instruments and philosophy, anti-war sentiments, and world politics, and so forth; Beatlemania's impact on British and American cultures and its role in opening Eastern Europe to the West. Same as 025:137.

### **188:156 Stage Makeup**

3 s.h.

Same as 049:156.

### **188:161 The Arts in Performance**

3 s.h.

GE: Fine Arts, Humanities. Same as 033:161, 049:161, 137:161.

### **188:167 Introduction to Laban Movement Studies**

2-3 s.h.

Introduction to Bartenieff Fundamentals (BF) and Laban Movement Analysis (LMA) as methods of organizing and integrating movement to support artistic goals and expanding expressive range; BF teaches body awareness, breath support, developmental patterns, ergonomically-efficient alignment, balancing of muscular strength and stretch, and coordination; LMA teaches vocabulary of expressive movement and nonverbal communication, including effort (use of energy/dynamics for expression, stamina, stress relief) and shape (how posture and gesture communicate); quality of movement that supports individual goals in artistic expression, sound production, and wellness. Same as 025:167, 049:105, 137:160.

### **188:168 Introduction to the Alexander Technique**

3 s.h.

The Alexander Technique and "self-use"--how our movement choices affect the results we achieve; improving physical skills and presence; principles from the Alexander Technique in support of performing arts (e.g., speaking, singing, playing an instrument, dancing, acting) and applied to skills in daily life, addressing the underpinnings of movement; physical participation, including laying, rolling, sitting, standing, and locomotion. Same as 025:176, 049:170, 137:173.

### **188:173 Introduction to Afro-Cuban Drumming**

1 s.h.

Drumming, dance, songs from folkloric and ceremonial Afro-Cuban forms; emphasis on drumming; may include participation in Afro-Cuban drum and dance ensemble. Same as 025:173.

**188:174 Introduction to Afro-Cuban Dance**

1 s.h.

Introduction to the dance, drumming, and songs of the Afro-Cuban folkloric traditions; emphasis on dance. May participate in UI Afro-Cuban Drum and Dance ensemble. Corequisites: 137:175 or 188:175, if not taken as a prerequisite. Same as 137:174.

**188:175 Afro-Cuban Drum and Dance Performance**

1 s.h.

Dance repertory for the UI Afro-Cuban Drum and Dance Ensemble. Performance pieces based on dance, drumming, songs of the Afro-Cuban folkloric traditions. May participate in UI Afro-Cuban Drum and Dance Ensemble. Prerequisites: 025:173 or 137:174 or 188:173 or 188:174. Requirements: audition. Same as 137:175.

**188:182 The Contemporary Dance Scene**

3 s.h.

Historical, theoretical, and practical elements of contemporary dance; the term "postmodern" and its associations with dance, performing arts, contemporary culture; relationships between process and product, identity and subjectivity, artistic intent and authorship, meaning and intertextuality; possibility of art as a form of dissent; theory and practice placed in a dialectic; analysis and synthesis of previous research. Same as 137:182.

**188:195 Arts Leadership Seminar**

3 s.h.

Performing arts management and administrative principles, practical applications, trends in arts leadership and advocacy. Requirements: (for 049:195) 049:109 or 049:111 or graduate standing in an arts discipline. Same as 049:195, 06T:155, 145:195.

**188:198 Performance Practicum**

1-2 s.h.

Act in a faculty-directed production produced by the Theatre Arts Department. Same as 049:198.

**188:202 Theories of Dance and the Body**

3 s.h.

Theoretical trends in studies of dance and physical bodies; performative and choreographic aspects of being. Same as 137:202.

**188:275 Collaborative Performance**

1-4 s.h.

Collaborative experience with advanced artists from varied disciplines that culminates in a final performance; emphasis on sharing and investigating ideas, artistic intent, personal vision, and creating collaborative projects. Same as 049:275, 137:275.

# Philosophies and Ethics of Politics, Law, and Economics

**Coordinator:** Diane Jeske

**Undergraduate nondegree program:** Certificate in Philosophies and Ethics of Politics, Law, and Economics

**Web site:** <http://www.uiowa.edu/~people>

The certificate program in philosophies and ethics of politics, law, and economics is closing. Students who began working toward the certificate and were enrolled in certificate courses before the beginning of fall semester 2010 may complete the certificate. Some courses required by the program may be dropped, so students are urged to finish the certificate as quickly as possible. Certificate students should consult with their advisors.

## Certificate

The Certificate in Philosophies and Ethics of Politics, Law, and Economics requires 36 s.h. The final 18 s.h. used to complete the certificate must be taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the certificate.

Because of the program's multiple requirements, students are encouraged to begin the program as first-year students or sophomores; however, with careful planning, students who join the program as juniors can complete the requirements by their normal graduation date, especially if they already have taken several courses that satisfy PEOPLE requirements. Prospective certificate students should contact the PEOPLE program's coordinator.

The certificate program consists of two parts: the foundation, made up of six courses (18 s.h.), and the fields, also made up of six courses (18 s.h.). The foundation is the common element in the program. The five fields--economics, law, philosophy, political science, and sociology--provide opportunities for specialization.

## FOUNDATION

Students must take the following six courses. The first two (026:036 Principles of Reasoning: Argument and Debate or 026:103 Introduction to Symbolic Logic, and 026:001 Matters of Life and Death or 026:102 Introduction to Ethics) are best taken during the first or sophomore year.

One of these:

026:036 Principles of Reasoning: Argument and Debate	3 s.h.
026:103 Introduction to Symbolic Logic	3 s.h.

One of these:

026:001 Matters of Life and Death	3 s.h.
026:102 Introduction to Ethics	3 s.h.

One of these:

026:034 Philosophy and the Just Society	3 s.h.
026:132 Introduction to Political Philosophy	3 s.h.
026:135 Philosophy of Law	3 s.h.

One of these:

030:020 Introduction to Politics	3 s.h.
030:030 Introduction to Political Thought and Political Action	3 s.h.
030:050 Introduction to Political Behavior	3 s.h.
030:070 Introduction to Political Communication	3 s.h.

One of these:

06E:001 Principles of Microeconomics	4 s.h.
06E:002 Principles of Macroeconomics	4 s.h.

One of these:

026:149 Undergraduate Seminar in Philosophy (requires consent of PEOPLE program director)	3 s.h.
033:153 Hard Cases: Science Policy and Values	3 s.h.

033:175/01H:182/024:161/091:192 Art, Law, and Ethics

3 s.h.

**FIELDS**

Students must choose two of the following fields and complete three courses in each.

**Economics**

One of these:

06E:104 Microeconomic Theory (if 06E:001 was taken for foundation requirement)

3 s.h.

06E:105 Macroeconomics (if 06E:002 was taken for foundation requirement)

3 s.h.

Two of these:

06E:119 Policy Analysis

3 s.h.

06E:125 Global Economics and Business

3 s.h.

06E:172 Law and Economics (cannot be used to satisfy both economics and law field requirements)

3 s.h.

06E:176 Public Sector Economics

3 s.h.

06E:179 History of Economic Thought

3 s.h.

**Philosophy**

Three of these:

026:102 Introduction to Ethics (if not taken for foundation requirement)

3 s.h.

026:104 Introduction to Philosophy of Science

3 s.h.

026:132 Introduction to Political Philosophy (if not taken for foundation requirement)

3 s.h.

026:133 Philosophy of History

3 s.h.

026:135 Philosophy of Law (if not taken for foundation requirement)

3 s.h.

026:180 Analytic Ethics

3 s.h.

026:182 History of Ethics

3 s.h.

026:185 Political Philosophy

3 s.h.

026:196 Philosophy of the Human Sciences

3 s.h.

**Political Science**

One of these:

030:116 American Constitutional Law and Politics

3 s.h.

030:118 American Political Development

3 s.h.

030:119 Problems in American Politics

3 s.h.

One of these:

030:132 Modern Political Theory

3 s.h.

030:133 Postmodern Political Theory

3 s.h.

030:138 Current Political Theory

3 s.h.

One of these:

030:126 American Public Policy

3 s.h.

030:136 Strategy in Politics

3 s.h.

030:152 The Legislative Process

3 s.h.

030:153 The Judicial Process

3 s.h.

**Law**

One of these:

026:135 Philosophy of Law (if not taken for foundation or another field requirement)	3 s.h.
144:143/091:288 Jurisprudence	3 s.h.

Two of these:

06E:172 Law and Economics (if not taken for economics field requirement)	3 s.h.
030:116 American Constitutional Law and Politics (if not taken for political science field requirement)	3 s.h.
091:193 Human Rights in the World Community	3 s.h.
091:195 Introduction to Public International Law	3 s.h.
144:142/091:224 Comparative Law	3 s.h.

Semester hours earned in PEOPLE courses taught by College of Law faculty members normally do not count toward requirements for a law degree.

**Sociology**

One of these:

034:001 Introduction to Sociology Principles	3 s.h.
034:009 Sociological Theory	3 s.h.

Two of these:

034:040 Criminology	3 s.h.
034:066 Social Inequality	3 s.h.
034:141 Juvenile Delinquency	3 s.h.
034:149 Sociology of Criminal Punishment	3 s.h.
034:150 Political Sociology	3 s.h.
034:182 Sociology of Law	3 s.h.

## Philosophies and Ethics of Politics, Law, and Economics Courses

### **144:142 Comparative Law** 2-3 s.h.

Comparative study of origins, development, and principal features of the world's main legal systems; common and civil law traditions; historical development of the main legal systems, their sources, ideologies, techniques; subjects important to international legal practice (e.g., international judicial assistance, application of foreign law in American courts; in-depth study of modern legal systems of the United States, Britain, France, Germany, Japan, Russia; introduction to other legal traditions, including preliterate tribal law, traditional Chinese and Islamic law. Same as 091:224.

### **144:143 Jurisprudence** 2-3 s.h.

Selected legal philosophies, with emphasis on legal positivism and natural law; relationship between law and morality. Same as 091:288.

# Philosophy

**Chair:** Diane Jeske

**Professors:** James Duerlinger, Richard Fumerton, Gregory Landini, David Stern

**Professors emeriti:** Laird Addis, Panayot Butchvarov, Phillip Cummins

**Associate professors:** David Cunniff, Evan Fales, Diane Jeske

**Assistant professors:** Carrie Figdor, Ali Hasan

**Undergraduate degree:** B.A. in Philosophy

**Undergraduate nondegree program:** Minor in Philosophy

**Graduate degrees:** M.A., Ph.D. in Philosophy

**Web site:** <http://www.uiowa.edu/~phil>

## Undergraduate Programs

The department offers a Bachelor of Arts and a minor in philosophy.

It also administers the Bachelor of Arts in ethics and public policy, an interdisciplinary major presented jointly by the Departments of Economics, Philosophy, and Sociology; see Ethics and Public Policy in the Catalog.

Undergraduate courses in philosophy are designed to impart knowledge of fundamental issues and main developments in philosophy while strengthening logical and analytic skills. A major in philosophy develops abilities useful for graduate or professional work in many fields--law, for example--and for any situation requiring clear, systematic thinking. A graduate degree is necessary for college teaching in philosophy.

### Bachelor of Arts

The Bachelor of Arts in philosophy requires a minimum of 120 s.h., including at least 27 s.h. of work for the major. Courses numbered 026:061 Introduction to Philosophy through 026:198 Topics in Philosophy count toward the major. The final 12 s.h. in philosophy courses used to complete the major must be earned at The University of Iowa; the department may make exceptions for students who pursue approved study abroad during their senior year.

Students must complete the College of Liberal Arts and Sciences General Education Program.

The major in philosophy requires the following courses.

026:103 Introduction to Symbolic Logic	3 s.h.
--	--------

026:111 Ancient Philosophy	3 s.h.
----------------------------	--------

026:114 Seventeenth-Century Philosophy	3 s.h.
--	--------

or

026:115 Modern Philosophy	3 s.h.
---------------------------	--------

Additional philosophy courses (prefix 026) chosen from those numbered 061 through 198	18 s.h.
---	---------

In addition to prerequisites listed for individual courses, considerations such as the order in which historical courses are taken are relevant to the effective structuring of the undergraduate major in philosophy. A student's department advisor or the director of undergraduate studies can provide more information.

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least one course in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** at least five courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** at least six courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

### Honors

The department administers an honors program for undergraduate students of superior ability. In order to be admitted

to the honors program in philosophy, a student must be a member of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information), and must have taken and passed at least three philosophy courses for the major. In order to graduate with honors in philosophy, a student must complete the regular requirements for an undergraduate major in philosophy with a g.p.a. of at least 3.40 in philosophy courses and must write an acceptable honors thesis on a significant topic in philosophy that interests him or her. Contact the honors advisor for more information.

## **Minor**

The minor in philosophy requires a minimum of 15 s.h. in philosophy courses, including 12 s.h. in 100-level courses offered by the Department of Philosophy at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Contact the undergraduate studies director for more information.

## **Graduate Programs**

The department offers a Master of Arts and a Doctor of Philosophy in philosophy. Admission is granted only for the Ph.D. program. The M.A. is not offered as a terminal degree; it is awarded to students as they work successfully toward the Ph.D.

The graduate program is designed to train teachers and scholars in philosophy. The main areas in the graduate curriculum are metaphysics, epistemology, history of philosophy, logic, philosophy of science, and value theory.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

### **Master of Arts**

The Master of Arts in philosophy requires a minimum of 30 s.h. of graduate credit and is offered without thesis. The M.A. is not offered as a terminal degree; it is awarded to students as they work successfully toward the Ph.D. Requirements include courses in metaphysics, epistemology, history of philosophy, ethics, logic, philosophy of science, and value theory. There is no foreign language requirement. Students must take an oral final examination. Contact the graduate studies director for more information.

### **Joint M.A./J.D.**

The Department of Philosophy and the College of Law offer a joint Juris Doctor/Master of Arts. Students in the joint J.D./M.A. program may count 12 s.h. earned in the joint program toward both degrees. Students must earn 18 of the 30 s.h. required for the M.A. in graduate-level philosophy courses (the usual requirement is 24 s.h.). They also must earn a minimum of 36 s.h. in undergraduate and graduate philosophy courses combined (the usual requirement is 42 s.h.).

Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

See "Juris Doctor" and "Joint J.D./Graduate Degrees" in the College of Law section of the Catalog.

### **Doctor of Philosophy**

The Ph.D. requires a minimum of 72 s.h. of graduate credit. Candidacy for the doctoral program is determined by a formal vote of the entire faculty of the Department of Philosophy, usually after the student has completed three semesters of graduate study in residence.

Requirements include courses in metaphysics, epistemology, history of philosophy, logic, philosophy of science, and value theory. Students are required to take a comprehensive examination, including both written and oral components, that covers their area of specialization. Upon successfully completing the exam, students begin work on a prospectus for their dissertation. There is no foreign language requirement. Contact the graduate studies director for more information.

## **Philosophy Courses**

For more detailed descriptions of undergraduate and graduate courses offered during a given semester or summer session, visit the University's ISIS web site before early registration.

## For Undergraduates

The following courses are open only to undergraduates.

- 026:001 Matters of Life and Death** 3 s.h.  
Important ethical controversies with life and death implications (abortion, capital punishment, torture, terrorism and war) discussed and analyzed using philosophical reasoning.
- 026:029 First-Year Seminar** 1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.
- 026:033 The Meaning of Life** 3 s.h.  
Philosophical investigation of the nature of human life and of what makes human life valuable and/or meaningful. GE: Historical Perspectives.
- 026:034 Philosophy and the Just Society** 3 s.h.  
The nature of individuals and governments and the obligations they have to each other; philosophical and historical examination of theories from Plato through the 19th century. GE: Historical Perspectives.
- 026:036 Principles of Reasoning: Argument and Debate** 3 s.h.  
Elementary logic and its application to the evaluation of arguments and debates. GE: Quantitative or Formal Reasoning.
- 026:061 Introduction to Philosophy** 3 s.h.  
Issues and arguments; topics may include rational belief, evidence, the self, causation, and the presuppositions of religion. GE: Humanities.

## For Undergraduate and Graduate Students

The following courses are closed to first-year students.

- 026:102 Introduction to Ethics** 3 s.h.  
Analytical and historical introduction to ethical theories about issues such as the nature of goodness, the nature of right conduct. GE: Humanities.
- 026:103 Introduction to Symbolic Logic** 3 s.h.  
Main ideas and techniques of formal deduction.
- 026:104 Introduction to Philosophy of Science** 3 s.h.  
Fundamental issues in scientific method, inductive reasoning, explanation, the distinctive nature of science.
- 026:111 Ancient Philosophy** 3 s.h.  
Main trends and major figures, such as Plato and Aristotle.
- 026:112 Medieval Philosophy** 3 s.h.  
Main trends and major figures, such as Augustine and Aquinas. Same as 16E:114.
- 026:114 Seventeenth-Century Philosophy** 3 s.h.  
Main trends, central arguments, major positions; Bacon and Descartes to Leibniz and Locke.
- 026:115 Modern Philosophy** 3 s.h.  
Main trends and major figures from Descartes to Kant.
- 026:118 Twentieth-Century Philosophy** 3 s.h.  
Main trends and major figures.
- 026:131 Aesthetics** 3 s.h.

Major problems in philosophy of the arts.

<b>026:132 Introduction to Political Philosophy</b> Major problems.	3 s.h.
<b>026:133 Philosophy of History</b> Major problems: objectivity, historiographic methods and theory of interpretation, nature of historical explanations, reduction.	3 s.h.
<b>026:134 Philosophy of Religion</b> Medieval to contemporary treatments of central issues: the nature of faith; the existence and nature of God; religion and ethics; the interpretation of religious texts. Same as 032:146.	3 s.h.
<b>026:135 Philosophy of Law</b> Introduction; the nature of law, legal authority, legal reasoning; issues in criminal law, such as punishment, responsibility; issues in property law; constitutional law. Prerequisites: 026:034 or 026:102 or 026:132.	3 s.h.
<b>026:136 The Nature of Evil</b> The nature of evil explored through philosophical works, case studies of individuals, videos, and films.	3 s.h.
<b>026:138 Philosophical Problems of Artificial Intelligence</b> Major issues and controversies.	3 s.h.
<b>026:141 Existentialist Philosophy</b> Main ideas of existentialism; emphasis on Kierkegaard, Nietzsche, Heidegger, Sartre.	3 s.h.
<b>026:145 Buddhist Philosophy</b> Introduction to main ideas. Same as 032:175.	3 s.h.
<b>026:147 Philosophical Issues</b> A philosophical topic or controversy.	3 s.h.
<b>026:148 Readings in Philosophy</b> Requirements: honors standing.	arr.
<b>026:149 Undergraduate Seminar in Philosophy</b> Selected problems.	3 s.h.
<b>026:152 Plato</b> Main ideas, major texts.	3 s.h.
<b>026:153 Aristotle</b> Main ideas, major texts.	3 s.h.
<b>026:158 Descartes</b> Major works, such as the <i>Discourse on Method</i> , as well as lesser known works, such as <i>The World</i> .	3 s.h.
<b>026:160 Spinoza and Leibniz</b> Main ideas, major texts.	3 s.h.
<b>026:163 Berkeley and Hume</b> Comparative and critical examination of metaphysical and epistemological views of 18th-century empiricists George Berkeley and David Hume; theory of ideas, perception, skepticism, limits of knowledge, scientific and philosophical method, role of God in Berkeley's and Hume's philosophical systems.	3 s.h.
<b>026:166 Kant</b> Main ideas, major texts of Kant's metaphysics and epistemology.	3 s.h.
<b>026:173 Heidegger</b>	3 s.h.

Main ideas and major texts of Heidegger; early and later periods, particular attention to Being and Time; focus on Heidegger's analyses of *being* and *being-in-the-world*.

- 026:174 Sartre** 3 s.h.  
Phenomenological and existentialist works.
- 026:176 Frege and Russell** 3 s.h.  
Main ideas, major texts.
- 026:177 Wittgenstein** 3 s.h.  
Main ideas, major texts.
- 026:179 Quine** 3 s.h.  
Major ideas, major texts.
- 026:180 Analytic Ethics** 3 s.h.  
Topics in contemporary ethics.
- 026:182 History of Ethics** 3 s.h.  
Selected topics in the history of philosophical ethics.
- 026:184 Russian Thinkers** 3 s.h.  
Same as 041:189, 048:189.
- 026:185 Political Philosophy** 3 s.h.  
Selected topics.
- 026:186 Metaphysics** 3 s.h.  
Fundamental topics; major works, both classical and contemporary.
- 026:187 Epistemology** 3 s.h.  
Contemporary topics.
- 026:188 Philosophy of Mind** 3 s.h.  
Contemporary topics.
- 026:189 Philosophy of Language** 3 s.h.  
Contemporary topics. Same as 103:163.
- 026:190 Philosophical Foundations of Cognitive Science** 3 s.h.  
Processes leading from stimulus to behavioral response in cognitive or mentalistic terms; motivations for cognitive explanations, nature of cognitive architecture, problem of mental representation; additional topics may include individuation of inputs and outputs, role of consciousness in cognition, relation between language and thought, nature of concepts.
- 026:191 Mathematical Logic** 3 s.h.  
Presentation of central metatheorems relating to decidability, completeness, model theory; second-order logic.
- 026:192 Modal Logic** 3 s.h.  
Formal techniques developed and applied to problems in analysis and modal semantics; related philosophical issues.
- 026:194 Philosophy of Science** 3 s.h.  
Central topics—for example, scientific explanation, confirmation, the meaning of scientific theories; survey of major 20th-century developments in these areas.
- 026:196 Philosophy of the Human Sciences** 3 s.h.  
Explanation and understanding, theories and reduction, values and ideology, freedom and causality.
- 026:198 Topics in Philosophy** 3 s.h.  
A single philosopher or philosophical problem.

**Primarily for Graduate Students**

All of the following courses are repeatable.

<b>026:220 Seminar: Philosophy of Language</b>	3 s.h.
<b>026:221 Seminar: Metaphysics</b>	3 s.h.
<b>026:222 Seminar: Epistemology</b>	3 s.h.
<b>026:223 Seminar: Philosophical Analysis</b>	3 s.h.
<b>026:224 Seminar: Philosophy of Science</b>	3 s.h.
<b>026:225 Seminar: Philosophy of Religion</b>	3 s.h.
<b>026:226 Seminar: Ethics</b>	3 s.h.
<b>026:229 Seminar: Modern Philosophy</b>	3 s.h.
<b>026:245 Research: Value Theory</b>	arr.
<b>026:247 Research: Metaphysics and Epistemology</b>	arr.
<b>026:249 Research: Logic and Philosophy of Science</b>	arr.
<b>026:251 Research: History of Philosophy</b>	arr.
<b>026:253 Thesis</b>	arr.

# Physics and Astronomy

**Chair:** Mary Hall Reno

**Professors:** David R. Andersen (Electrical and Computer Engineering/Physics and Astronomy), Thomas F. Boggess (Physics and Astronomy/Electrical and Computer Engineering), Michael E. Flatté, John A. Goree, Donald A. Gurnett (Carver/James A. Van Allen Professor of Physics), Richard Hichwa (Radiology/Physics and Astronomy), Philip Kaaret, Paul D. Kleiber (Harriet B. and Harold S. Brady Professor of Laser Physics), Craig A. Kietzing, Karl E. Lonngren (Electrical and Computer Engineering/Physics and Astronomy), Mark T. Madsen (Radiology/Physics and Astronomy), Usha Mallik, Robert L. Merlino, Yannick Meurice, Robert L. Mutel, Yasar Onel, Wayne N. Polyzoou, Mary Hall Reno, Vincent G.J. Rodgers, Jack D. Scudder, Frederick N. Skiff, Arthur L. Smirl (Physics and Astronomy/Electrical and Computer Engineering, Lowell Battershell Chair in Laser Engineering), Steven R. Spangler

**Professors emeriti:** Raymon T. Carpenter, Louis A. Frank, William H. Klink, George Knorr, Edward R. McCliment, John S. Neff, Edwin Norbeck, Gerald L. Payne, John W. Schweitzer

**Associate professors:** Kenneth G. Gayley, Jane M. Nachtman, Charles R. Newsom, John P. Prineas, Markus Wohlgenannt

**Assistant professors:** Gregory Howes, Maxim Khodas, Cornelia C. Lang, Randall McEntaffer, Craig Pryor

**Undergraduate degrees:** B.A., B.S. in Physics, Astronomy; B.S. in Applied Physics

**Undergraduate nondegree programs:** Minor in Physics, Astronomy

**Graduate degrees:** M.S. in Physics, Astronomy; Ph.D. in Physics (including specialization in Astronomy)

**Web site:** <http://www.physics.uiowa.edu>

The Department of Physics and Astronomy provides comprehensive and rigorous instruction in all basic aspects of its subjects. It also provides research facilities and guidance in selected specialties for advanced individual scholarly work.

Total departmental enrollment is approximately 1,700 each semester of the academic year and 150 during the summer session. All courses and advanced laboratories are taught by faculty members. Faculty members also supervise associated laboratories taught by graduate students.

Beyond the elementary level, typical course enrollment is 15-20; there is ample opportunity for individual work. Special introductory courses are offered for majors in physics and astronomy and for others with special interest in these subjects. There are about 80 undergraduate majors, half of whom are honors students, and 60 graduate students in physics or astronomy.

About 70 percent of graduates with bachelor's degrees pursue advanced study. Others find positions in government and industrial laboratories and in secondary school teaching. Some use their training as the basis for careers in other fields.

Graduates with an M.S. or Ph.D. in physics or astronomy have opportunities for employment in universities, colleges, and research laboratories in government and industry.

## Undergraduate Programs

The department offers a Bachelor of Science, a Bachelor of Arts, and an undergraduate minor in physics and in astronomy. It also offers a double major in physics and astronomy, available with a Bachelor of Science or a Bachelor of Arts; and a Bachelor of Science in applied physics.

### Bachelor of Science in Physics

The Bachelor of Science in physics requires a minimum of 120 s.h., including 60 s.h. of work for the major. It provides preparation for careers in industry, employment in research laboratories, and graduate study in physics and related sciences.

The B.S. major in physics requires the following courses or their equivalents. Students satisfy the following mathematics and laboratory requirements as well as the "Other Required Courses." The department encourages students to do additional work. Students also must complete the College of Liberal Arts and Sciences General Education Program.

Many 100-level physics courses have prerequisites; students should consult their advisors when choosing 100-level courses.

#### MATHEMATICS

22M:025-22M:026 Calculus I-II	8 s.h.
22M:027 Introduction to Linear Algebra	4 s.h.
22M:028 Calculus III	4 s.h.

#### LABORATORY

029:132 Intermediate Laboratory	3 s.h.
---------------------------------	--------

One of these:

029:128 Electronics	4 s.h.
029:133 Advanced Laboratory	3 s.h.

Students who choose 029:128 Electronics as one of their two required laboratory courses are advised to take it before they take 029:132 Intermediate Laboratory.

#### OTHER REQUIRED COURSES

All of these:

029:027-029:028 Physics I-II	8 s.h.
029:029-029:030 Physics III-IV	8 s.h.
029:115 Intermediate Mechanics	3 s.h.
029:118 Statistical Physics	3 s.h.
029:129-029:130 Electricity and Magnetism I-II	6 s.h.
029:140-029:141 Introduction to Quantum Mechanics I-II	6 s.h.

Two of these:

029:119 Introduction to Astrophysics I	3 s.h.
029:120 Introduction to Astrophysics II	3 s.h.
029:128 Electronics (may not be repeated)	4 s.h.
029:133 Advanced Laboratory	3 s.h.
029:171-029:172 Mathematical Methods of Physics I-II	6 s.h.
029:180 Introductory Optics	3 s.h.
029:182 Electro Optics	3 s.h.
029:184 Optical Signal Processing	3 s.h.
029:186 Radio Astronomy	3 s.h.
029:192 Elementary Particles and Nuclear Physics	3 s.h.
029:193 Introductory Solid State Physics	3 s.h.
029:194 Plasma Physics I	3 s.h.
029:195 Plasma Physics II	3 s.h.
029:196 Computational Physics	3 s.h.

Undergraduate majors who plan to pursue graduate study are advised to go as far as they can beyond the minimum requirements listed above, including further work in mathematics. In planning this work, they should be guided by the College of Liberal Arts and Sciences maximum hours rule: Students earning a B.A. or B.S. may apply a maximum of 50 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students earning a B.S. with a double major in physics and astronomy may count more than 50 s.h. earned in the Department of Physics and Astronomy to the 120 s.h. required for graduation, but they must earn at least 56 s.h. in course work outside the department in order to graduate.

### Bachelor of Arts in Physics

The Bachelor of Arts in physics requires a minimum of 120 s.h., including 48 s.h. of work for the major. It requires fewer physics courses than the B.S. and provides for a wider choice of electives.

The program is designed for students who wish to gain knowledge of physics but do not plan a research-oriented career in physics. It is appropriate for those planning careers in medicine, law, science-related administration, business, or technical writing. It also provides a foundation for students interested in secondary school science teaching; see "B.A. or B.S. in Physics with Teacher Licensure" below.

The B.A. major requires the following courses or their equivalents. The department encourages students to do additional work. Students also must complete the College of Liberal Arts and Sciences General Education Program.

Many 100-level physics courses have prerequisites; students should consult their advisors when choosing 100-level courses.

22M:025-22M:026 Calculus I-II	8 s.h.
029:027-029:028 Physics I-II	8 s.h.
029:029-029:030 Physics III-IV	8 s.h.
029:132 Intermediate Laboratory	3 s.h.
Three additional 100-level physics courses (excluding 029:103, 029:105, 029:171, and 029:172), approved by the advisor	9-10 s.h.
One of these:	
Additional science courses in a thematic area, approved by the advisor	12 s.h.
The course work required for teacher licensure	

### **B.A. or B.S. in Physics with Teacher Licensure**

The major in physics (Bachelor of Arts or Bachelor of Science) provides a foundation for students who are interested in teaching secondary school science. The University's Science Education Program offers a Bachelor of Science program that also provides a foundation for teaching, allowing students to choose an emphasis in biology, chemistry, earth science, or physics; see Science Education in the Catalog.

Students who wish to teach must complete a bachelor's degree and the Teacher Education Program (TEP). See Teaching and Learning (College of Education) in the Catalog for more information about the TEP. Interested students must apply to the College of Education for admission to the TEP.

### **Joint B.A. in Physics/M.A.T.**

Students interested in pursuing a graduate degree in teaching may apply to the joint Bachelor of Arts/Master of Arts in Teaching program offered by the College of Liberal Arts and Sciences and the College of Education. Designed for undergraduates in biology, chemistry, and physics, the joint program enables students to earn a B.A. and an M.A.T. in five years by beginning to earn graduate credit during their fourth year of undergraduate study and by counting up to 18 s.h. of qualifying credit toward both degrees. For more information, see "B.A.in Science/M.A.T. in Science Education" in the Teaching and Learning (College of Education) section of the Catalog. Interested students should consult an advisor.

### **Bachelor of Science in Applied Physics**

The Bachelor of Science in applied physics requires a minimum of 120 s.h., including 60-83 s.h. of work for the major. It is intended primarily for students interested in a broad program of study in physics combined with a significant concentration of courses in an applied field that has immediate application to industry. The degree provides a foundation for a wide range of employment opportunities in high-technology industries, including research and development, product design and testing, sales, and quality control. It also is designed to include exposure to physics sufficient to allow the student to continue with graduate studies in either physics or astronomy.

The program offers four areas of concentration: optics, solid-state electronics, computer science, and medical physics. A student also may design a customized concentration area in close consultation with his or her advisor, and with departmental approval.

An essential component of each concentration is successful completion of a one-semester industrial internship or practicum experience in a research laboratory (an applied physics thesis is required for the latter option). This requirement may result in the need for a ninth semester to fulfill all requirements. Because of this, the Four-Year Graduation Plan is not available for the major in applied physics. Well-prepared students will be able to complete the degree in four years. Students should work closely with their advisors on a graduation plan.

The B.S. in applied physics requires the following courses. Students are encouraged to take additional course work. Advisors can suggest electives that will enrich programs and help students prepare for graduate work. Students also must complete the College of Liberal Arts and Sciences General Education Program.

Many 100-level physics courses have prerequisites; students should consult their advisors when choosing 100-level courses.

#### **COMMON REQUIREMENTS**

Students in all concentrations must successfully complete the following courses or their equivalents.

Mathematics—all of these:

22M:025-22M:026 Calculus I-II	8 s.h.
22M:027 Introduction to Linear Algebra	4 s.h.

22M:028 Calculus III 4 s.h.

Physics—all of these:

029:027-029:028 Physics I-II 8 s.h.

029:029-029:030 Physics III-IV 8 s.h.

029:115 Intermediate Mechanics 3 s.h.

029:129 Electricity and Magnetism I 3 s.h.

029:140 Introduction to Quantum Mechanics I 3 s.h.

Experiential learning—one of these:

One-semester industrial internship

One-semester practicum in a research laboratory (requires an applied physics thesis)

### COMPUTER SCIENCE CONCENTRATION

All of these:

22C:016 Computer Science I: Fundamentals 4 s.h.

22C:021 Computer Science II: Data Structures 4 s.h.

Two additional 100-level computer science courses 6 s.h.

029:118 Statistical Physics 3 s.h.

029:128 Electronics 4 s.h.

029:130 Electricity and Magnetism II 3 s.h.

029:132 Intermediate Laboratory 3 s.h.

One of these:

22C:022 Object-Oriented Software Development 4 s.h.

22C:031 Algorithms 3 s.h.

22C:060 Computer Organization 3 s.h.

### OPTICS CONCENTRATION

All of these:

029:118 Statistical Physics 3 s.h.

029:128 Electronics 4 s.h.

029:130 Electricity and Magnetism II 3 s.h.

029:132 Intermediate Laboratory 3 s.h.

029:180 Introductory Optics 3 s.h.

Two of these:

029:182 Electro Optics 3 s.h.

029:184 Optical Signal Processing 3 s.h.

029:193 Introductory Solid State Physics 3 s.h.

### SOLID-STATE ELECTRONICS CONCENTRATION

All of these:

029:118 Statistical Physics 3 s.h.

029:193 Introductory Solid State Physics 3 s.h.

055:032 Introduction to Digital Design 3 s.h.

055:040 Linear Systems I 3 s.h.

055:041 Electronic Circuits 4 s.h.

057:017 Computers in Engineering 3 s.h.

057:018 Principles of Electronic Instrumentation 4 s.h.

059:006 Engineering Problem Solving II 3 s.h.

059:008 Engineering Fundamentals II: Electrical Circuits 3 s.h.

One of these:

029:130 Electricity and Magnetism II	3 s.h.
029:141 Introduction to Quantum Mechanics II	3 s.h.

#### **MEDICAL PHYSICS CONCENTRATION**

All of these:

002:010-002:011 Principles of Biology I-II	8 s.h.
004:011-004:012 Principles of Chemistry I-II	8 s.h.
004:121-004:122 Organic Chemistry I-II	6 s.h.
004:141 Organic Chemistry Laboratory	3 s.h.
Two additional advanced biology courses	
029:128 Electronics	4 s.h.
029:132 Intermediate Laboratory	3 s.h.

One of these:

22S:101 Biostatistics	3 s.h.
171:161 Introduction to Biostatistics	3 s.h.

One of these:

029:105 Special Topics in Physics (physics of the body)	3 s.h.
029:118 Statistical Physics	3 s.h.
029:130 Electricity and Magnetism II	3 s.h.
029:133 Advanced Laboratory	3 s.h.
029:141 Introduction to Quantum Mechanics II	3 s.h.

### **Bachelor of Science in Astronomy**

The Bachelor of Science in astronomy requires a minimum of 120 s.h., including 64 s.h. of work for the major. It provides a balanced and integrated program of astronomy, mathematics, and physics courses that prepare students for advanced study in astronomy or astrophysics. It also serves as an interesting choice of major for a liberal arts education.

The B.S. in astronomy requires the following courses or their equivalents. Students also must complete the College of Liberal Arts and Sciences General Education Program.

#### **MATHEMATICS**

22M:025-22M:026 Calculus I-II	8 s.h.
22M:027 Introduction to Linear Algebra	4 s.h.
22M:028 Calculus III	4 s.h.

#### **OTHER REQUIRED COURSES**

All of these:

029:027-029:028 Physics I-II	8 s.h.
029:029-029:030 Physics III-IV	8 s.h.
029:061-029:062 General Astronomy I-II	8 s.h.
029:115 Intermediate Mechanics	3 s.h.
029:119-029:120 Introduction to Astrophysics I-II (classes are offered alternate years, students are responsible for registering when the class is available)	6 s.h.
029:129-029:130 Electricity and Magnetism I-II	6 s.h.
029:137 Astronomical Laboratory (classes are offered alternate years, students are responsible for registering when the class is available)	3 s.h.
029:140 Introduction to Quantum Mechanics I	3 s.h.

One of these:

029:128 Electronics	4 s.h.
029:132 Intermediate Laboratory	3 s.h.

One of these:

029:141 Introduction to Quantum Mechanics II	3 s.h.
029:194 Plasma Physics I	3 s.h.

Undergraduate majors who plan to pursue graduate study are advised to go as far as they can beyond the minimum requirements listed above, by taking one or more of the courses listed below. In planning this work, they should be guided by the College of Liberal Arts and Sciences maximum hours rule: Students earning a B.A. or B.S. may apply a maximum of 50 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

Students earning a B.S. with a double major in physics and astronomy may count more than 50 s.h. earned in the Department of Physics and Astronomy to the 120 s.h. required for graduation, but they must earn at least 56 s.h. in course work outside the department in order to graduate.

029:118 Statistical Physics	3 s.h.
029:141 Introduction to Quantum Mechanics II	3 s.h.
029:171-029:172 Mathematical Methods of Physics I-II	6 s.h.
029:180 Introductory Optics	3 s.h.
029:186 Radio Astronomy	3 s.h.
029:192 Elementary Particles and Nuclear Physics	3 s.h.
029:194-029:195 Plasma Physics I-II	6 s.h.

### **Bachelor of Arts in Astronomy**

The Bachelor of Arts in astronomy requires a minimum of 120 s.h., including 52 s.h. of work for the major. It is designed for students who wish to gain considerable knowledge of astronomy but who do not plan a research-oriented career in the field. The B.A. is appropriate for those planning careers in secondary school science teaching or science-related administration; see Science Education (College of Liberal Arts and Sciences) in the Catalog. It also is appropriate for those preparing for professional school. The B.A. requires fewer physics and mathematics courses than the B.S., and thus provides for a wider choice of electives.

The B.A. in astronomy requires the following courses or their equivalents. Students also must complete the College of Liberal Arts and Sciences General Education Program.

All of these:

22M:025-22M:026 Calculus I-II	8 s.h.
029:027-029:028 Physics I-II	8 s.h.
029:029-029:030 Physics III-IV	8 s.h.
029:061-029:062 General Astronomy I-II	8 s.h.
029:115 Intermediate Mechanics	3 s.h.
029:119-029:120 Introduction to Astrophysics I-II	6 s.h.
029:132 Intermediate Laboratory	3 s.h.
029:137 Astronomical Laboratory	3 s.h.

One of these:

029:118 Statistical Physics	3 s.h.
029:180 Introductory Optics	3 s.h.

One of these:

029:128 Electronics	4 s.h.
---------------------	--------

029:129 Electricity and Magnetism I (requires vector calculus as prerequisite)

3 s.h.

## **B.A. or B.S. with Double Major in Physics and Astronomy**

Students working toward a Bachelor of Arts or Bachelor of Science with a double major in physics and astronomy must complete all requirements for both majors and must earn a minimum of 56 s.h. outside the Department of Physics and Astronomy in order to graduate. Students interested in earning a double major should consult with their advisors. See Earning a Degree in the [CLAS Academic Handbook](#).

### **Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

#### **B.A. in Astronomy**

**Before the third semester begins:** math through calculus I and II, physics I and II, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** physics III and IV, at least one more course in the major, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** three more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** nine courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

#### **B.S. in Astronomy**

**Before the third semester begins:** calculus I and II, physics II, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** remainder of the required math courses, physics III and IV, two other courses in the major, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** four more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

#### **B.A. in Physics**

**Before the third semester begins:** calculus II, physics II, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** physics III and IV, up to four more courses in the major, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** two to four more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two or three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

#### **B.S. in Physics**

**Before the third semester begins:** calculus II, physics II, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** physics III and IV, introduction to linear algebra, calculus III, up to two more courses in the major, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** two to four more courses in the major and at least three-quarters of the

semester hours required for graduation

**Before the eighth semester begins:** two or three more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

### **B.S. in Applied Physics**

The Four-Year Graduation Plan is not available for the major in applied physics. Students should work with their advisors to develop individual graduation plans.

### **Honors**

Junior and senior physics and astronomy majors who are members of the University of Iowa Honors Program may take 6-8 s.h. of 029:099 Undergraduate Research and conduct an investigation with the guidance of a faculty member as part of their programs for the B.A. or B.S. with honors in physics, applied physics, or astronomy. They must present a written research report (honors thesis) and describe the results of the research at a departmental seminar.

Membership in the University of Iowa Honors Program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

### **Minor in Physics**

The minor in physics requires a minimum of 15 s.h. in physics, including 12 s.h. taken at The University of Iowa, chosen from 029:029 Physics III, 029:030 Physics IV, and 100-level physics courses. Students must maintain a g.p.a. of at least 2.00 for all work in the minor. Course work in the minor may not be taken pass/nonpass. Before enrolling in 029:029 Physics III students must complete that course's prerequisites (029:027 Physics I and 029:028 Physics II, or 029:081 Introductory Physics I and 029:082 Introductory Physics II).

There is no minor offered in applied physics.

### **Minor in Astronomy**

The minor in astronomy requires a minimum of 15 s.h. in astronomy and physics courses, including 12 s.h. of upper-level course work and 12 s.h. taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 for all work in the minor. Course work in the minor may not be taken pass/nonpass.

The upper-level course work must include 6 s.h. chosen from 029:119 Introduction to Astrophysics I, 029:120 Introduction to Astrophysics II, and 029:137 Astronomical Laboratory. Remaining work may be chosen from any 100-level astronomy or physics courses.

## **Graduate Programs**

The department offers a Master of Science and a Doctor of Philosophy in physics, and a Master of Science in astronomy. Students who wish to pursue a program in astronomy beyond the M.S. may qualify for a Ph.D. in physics with a specialization and dissertation in astronomy or astrophysics. An M.S. is not prerequisite to a Ph.D.

All graduate students who intend to pursue a Ph.D. in physics must pass the qualifying exam (see "Doctor of Philosophy in Physics").

Each entering graduate student is assigned a faculty advisor, who assists in preparing a plan of study and in guiding the student's progress.

The Department of Physics and Astronomy participates in an interdisciplinary doctoral program, the Program in Applied Mathematical and Computational Sciences (see Graduate College in the Catalog).

### **Master of Science in Physics**

The Master of Science in physics requires a minimum of 30 s.h. of graduate credit. It is offered with thesis or critical essay. The M.S. with thesis requires a thesis based on an original experimental or theoretical investigation by the student. The M.S. with critical essay requires a critical essay on the literature of a particular area of physics.

The M.S. may be a terminal degree or a step toward a Ph.D. In either case, the final examination is oral, conducted by a committee of three faculty members.

Each student's plan of study should provide for as much advanced work as his or her aptitude and previous preparation permit.

Students in the physics M.S. with thesis program earn the required 30 s.h. of graduate credit in courses numbered 170 or above, with at least 15 s.h. at the 200 level. They must maintain a g.p.a. of at least 3.00. Each student also must write a thesis based on an original experimental or theoretical investigation that he or she has conducted. Students may earn a maximum of 6 s.h. in 029:220 Individual Critical Study or 029:281 Research: Physics. Up to one-third of the graduate program may be taken in related scientific fields other than physics and mathematics (e.g., chemistry, astronomy, geology, engineering).

Students in the physics M.S. with critical essay program earn the required 30 s.h. of graduate credit in courses numbered 170 or above, with at least 15 s.h. at the 200 level. They must maintain a g.p.a. of at least 3.00. Each student also must conduct an independent study of the literature on a chosen topic and write a critical essay on that topic. Students may earn a maximum of 4 s.h. in 029:220 Individual Critical Study or 029:281 Research: Physics. Up to one-third of the graduate program may be taken in related scientific fields other than physics and mathematics (e.g., chemistry, astronomy, geology, engineering).

## Master of Science in Astronomy

The Master of Science in astronomy requires a minimum of 30 s.h. of graduate credit. It is offered either with or without thesis. The M.S. may be a terminal degree or a step toward a Ph.D. in physics with specialization and a dissertation in astronomy or astrophysics. In either case the final examination is oral, conducted by a committee of three faculty members.

Students in the astronomy M.S. with thesis program earn the required 30 s.h. in courses numbered 170 or above, with at least 15 s.h. at the 200 level. They must maintain a g.p.a. of at least 3.00. The 30 s.h. must include at least 6 s.h. chosen from 029:232 Theoretical Astrophysics I, 029:233 Theoretical Astrophysics II, 029:234 Stellar Structure and Evolution, and 029:235 Special Topics in Astrophysics. Students may earn a maximum of 6 s.h. in 029:220 Individual Critical Study and 029:282 Research: Astronomy. Seminars do not count for credit toward the 30 s.h. requirement. Up to one-third of the course work may be in graduate courses in related fields, such as meteorology, geology, and electrical engineering; selection of such courses is encouraged.

Students in the astronomy M.S. nonthesis program earn 18 s.h. of the required 30 s.h. in the core graduate courses 029:029:205 Classical Mechanics, 029:213 Classical Electrodynamics I, 029:214 Classical Electrodynamics II, 029:232 Theoretical Astrophysics I, 029:233 Theoretical Astrophysics II, 029:234 Stellar Structure and Evolution, and 029:235 Special Topics in Astrophysics. Students must maintain a g.p.a. of at least 3.00 in the core graduate courses. They may earn a maximum of 4 s.h. in 029:220 Individual Critical Study and 029:282 Research: Astronomy. Seminars do not count toward the required 30 s.h. Up to one-third of the course work may be in graduate courses in related fields, such as meteorology, geology, and electrical engineering; selection of such courses is encouraged.

## Doctor of Philosophy in Physics

The Doctor of Philosophy in physics requires a minimum of 72 s.h. of graduate credit.

Graduate students who wish to pursue a Ph.D. in physics must pass a qualifying examination in all principal areas of physics at the level of advanced undergraduate work. The examination, which may be repeated only once, is given each year before the beginning of the spring semester. Students must pass the qualifying examination before the beginning of their fourth semester of graduate work at The University of Iowa.

All Ph.D. students must take comprehensive examinations; participate in advanced seminars; do original research in experimental physics, theoretical physics, or astrophysics; and prepare and defend a written dissertation based on this work.

The program of study for the Ph.D. with a major in physics includes thorough course work in both classical and quantum physics for all students, whether their specialized research is to be in an experimental or a theoretical area.

Students must take at least 24 s.h. of 200-level courses in the department, excluding 029:220 Individual Critical Study, 029:281 Research: Physics, 029:282 Research: Astronomy, and seminars. The following courses are required.

029:171-029:172 Mathematical Methods of Physics I-II (students who pass a written examination are exempt from the requirement to take this sequence)	6 s.h.
029:205 Classical Mechanics	3 s.h.
029:212 Statistical Mechanics I	3 s.h.
029:213-029:214 Classical Electrodynamics I-II	6 s.h.
029:245-029:246 Quantum Mechanics I-II	6 s.h.

Advanced mathematics, such as complex variables and tensor analysis, is used freely in these courses. An introduction is given in 029:171 Mathematical Methods of Physics I and 029:172 Mathematical Methods of Physics II. The selection of less advanced course work depends on the adequacy of a student's preparation for graduate work; students' choice of more advanced and specialized courses depends on the direction in which their interests develop.

After a student has chosen a research specialty, he or she must submit a formal thesis proposal and defend the proposal in an oral comprehensive exam. The appropriate thesis advisor then becomes the candidate's general advisor and the chair of the comprehensive and final examination committee. The comprehensive exam must be taken before the beginning of the fourth year of graduate study.

Ph.D. candidates are not recommended for the degree until they have written the dissertation in proper form for formal publication and have submitted it for publication, with the approval of the research advisor, to a widely distributed, refereed scientific journal.

## **Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## **Financial Support**

Students qualified for graduate study are encouraged to apply for fellowships and assistantships. Contact the Department of Physics and Astronomy chair.

## **Research, Facilities**

The department has an excellent library and a number of well-equipped laboratories and observatories, as well as a student computer cluster for which students can obtain accounts. Faculty, students, and staff access national supercomputers via the Internet. The central machine shop is fully equipped and staffed by skilled instrument makers and machinists, and there are electronics and machine shops for use by advanced students and research staff.

Experimental research is conducted in astronomy (optical, radio, and X-ray), atomic and molecular physics, condensed matter physics, elementary particle physics, laser physics, medical physics, plasma physics, and space physics. Extensive facilities are available for construction of specialized research equipment and for data processing and analysis.

State-of-the-art semiconductor materials and devices are grown in two molecular beam epitaxy machines. Ultrafast laser techniques are developed and used to probe electron transport, energy relaxation, recombination, and spin dynamics in the novel nanostructures grown in these machines. Experiments also are conducted on laser-induced coherent phenomena and coherent control of charge carriers in semiconductor nanostructures. The experimental condensed matter program is closely coordinated with the condensed matter theory group.

Plasma physics is an active area of experimental and theoretical research. Laboratory experiments studying plasma processes of importance in various space and astrophysical plasmas are performed in a Q machine, including experiments on waves and instabilities in dusty plasmas. Additional laboratory and microgravity experiments with dusty plasmas include studies of Coulomb crystals, shocks, and complex fluids. Glow discharges for plasma processing applications are studied using laser diagnostics and numerical simulations. Wave propagation and plasma particle dynamics also are studied in collisionless plasmas through laboratory experiments. Laser techniques are developed for measuring plasma flow and following particle orbits. Plasma theory efforts include analytical and numerical investigations of magnetic reconnection and turbulence in space and astrophysical plasmas; collaboration with laboratory and space plasma experimental groups in strongly coupled dusty plasmas, waves, and instabilities; and free electron lasers and hydrodynamic turbulence.

State-of-the-art laser systems are available for high-resolution spectroscopic measurement and ultrafast studies of molecular structure, for collisional relaxation and nonlinear optical effects in atomic and molecular systems, and for plasma diagnostics.

Experimental research in elementary particle physics is carried out at Fermi National Accelerator Laboratory, Stanford Linear Accelerator Center, CERN in Switzerland, and other international laboratories. The present generation of high-energy experiments has been designed to probe both the strong nuclear force and the weak interactions.

The department is well-equipped for research and instruction in observational astronomy. The primary optical instrument is a fully automated 15-inch telescope at a dark-sky site in Arizona. The telescope is equipped with CCD cameras and a variety of filters. There are 3-meter and 4.5-meter radio telescopes on the roof of Van Allen Hall, which are used for instruction and student research projects.

Research programs in galactic and extragalactic radio astronomy are carried out using the facilities of the National Radio Astronomy Observatory, including the Very Large Array and the Very Long Baseline Array, one element of which is 10 miles north of campus. Current long-term research activities include studies of the center of the Milky Way galaxy; investigations of extragalactic radio sources; the formation of powerful winds in young, luminous stars; radio-wave scattering in the interstellar and interplanetary media; and interacting binary stars. A research program in X-ray astronomy has been established, and there is a laboratory for instrument development. Research topics in X-ray astronomy concentrate on observations of X-ray emission from black holes and supernova remnants, using existing spacecraft.

Active theoretical research is carried on in astrophysics; atomic, molecular, and optical physics; condensed matter physics; elementary particle physics; laser physics; mathematical physics; nuclear physics; plasma physics; and space physics. An active mathematical physics seminar fosters the exchange of ideas between mathematics and physics.

The primary emphasis of Iowa's program in experimental and theoretical space physics is on studies of cosmic and heliospheric physics, magnetospheric physics, and magnetosphere-ionosphere interactions. Facilities are available for designing and constructing spaceflight instruments. Investigators in the department have flown instruments for studying plasmas, energetic charged particles, auroral images, plasma waves, and radio emissions on a wide variety of terrestrial and planetary spacecraft, including Pioneer 10 and 11, Dynamics Explorer, Voyager 1 and 2, Galileo, Polar, Cassini, and Mars Express.

## Physics and Astronomy Courses

Prerequisites and corequisites are specified as guides and may be waived by the instructor. Courses 029:002 Nanoscience, 029:003 From Quarks to Quasars, 029:006 Physics of Everyday Experience, 029:008 Basic Physics, 029:011 College Physics I, 029:012 College Physics II, 029:027 Physics I, 029:028 Physics II, 029:044 Physics of Sound, 029:050 Stars, Galaxies, and the Universe, 029:051 Introductory Astronomy Laboratory, 029:052 Exploration of the Solar System, 029:061 General Astronomy I, 029:062 General Astronomy II, 029:081 Introductory Physics I, 029:082 Introductory Physics II, and 029:084 Introductory Physics II Lab are approved for the natural sciences component of College of Liberal Arts and Sciences General Education Program.

### Physics, Primarily for Undergraduates

- 029:001 Selected Topics in Physics** arr.
- 029:002 Nanoscience** 3 s.h.  
Properties of very small materials and structures; unique properties emerging at a length scale of one billionth of a meter, or one nanometer. GE: Natural Sciences.
- 029:003 From Quarks to Quasars** 3-4 s.h.  
Conceptual explanation of the latest discoveries in physics--from the smallest objects, such as quarks and atoms, to the largest, such as galaxies, black holes, and quasars. Requirements: nonscience major. GE: Natural Sciences.
- 029:006 Physics of Everyday Experience** 3 s.h.  
Principles of physics for nonscience majors; basic motion, behavior of fluids, waves, temperature and heat, gravity and planetary motion, electricity and magnetism, optics, nuclear energy, radioactivity, and medical imaging technology; examples from everyday experience. GE: Natural Sciences.
- 029:008 Basic Physics** 3-4 s.h.  
Quantitative treatment of mechanics, electricity, heat, liquids, gases, and atomic, nuclear, and elementary particle physics. Prerequisites: 22M:005. Recommendations: closed to students who have taken 029:011 or 029:012. GE: Natural Sciences.
- 029:011 College Physics I** 4 s.h.  
Mechanics, waves, thermodynamics, special relativity. Prerequisites: 22M:005. GE: Natural Sciences.
- 029:012 College Physics II** 4 s.h.  
Continuation of 029:011; electricity, magnetism, light, modern physics. Prerequisites: 029:011. GE: Natural Sciences.
- 029:027 Physics I** 4 s.h.  
Newtonian mechanics for point particles and rigid bodies; conservation laws. Offered fall semesters. Corequisites: 22M:025. Requirements: physics or astronomy major. GE: Natural Sciences.

- 029:028 Physics II** 4 s.h.  
Continuation of 029:027; introduction to fluid mechanics, electricity, magnetism (Maxwell's equations). Offered spring semesters. Prerequisites: 029:027. Corequisites: 22M:026. Requirements: physics or astronomy major. GE: Natural Sciences.
- 029:029 Physics III** 4 s.h.  
Continuation of 029:028; electromagnetic waves, optics; mechanical and sound waves; thermal physics. Offered fall semesters. Prerequisites: 029:028.
- 029:030 Physics IV** 3-4 s.h.  
Introduction to quantum mechanics and other topics in modern physics, including special relativity, atomic and solid state physics. Offered spring semesters. Prerequisites: 22M:026 and 029:029. Requirements: 3 s.h. only for nonmajors.
- 029:039 First-Year Seminar** 1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first-or second-semester standing.
- 029:044 Physics of Sound** 3-4 s.h.  
Acoustical foundations of music; production of sound by vibrating objects, properties of sound waves, vocal acoustics, hearing, room acoustics, principles of electroacoustics. GE: Natural Sciences.
- 029:081 Introductory Physics I** 4 s.h.  
Mechanics, waves, thermodynamics. Corequisites: 22M:025 or 22M:031. GE: Natural Sciences.
- 029:082 Introductory Physics II** 3-4 s.h.  
Continuation of 029:081; electricity, magnetism, light. Prerequisites: 029:081. Corequisites: 22M:026 or 22M:032. GE: Natural Sciences.
- 029:084 Introductory Physics II Lab** 1 s.h.  
Laboratory for 029:082. Requirements: 3 s.h. in 029:082. GE: Natural Sciences.
- 029:093 Reading in Physics** arr.  
Selected topics in physics.
- 029:098 Undergraduate Seminar** arr.  
Selected topics in physics and astronomy; discussion, presentations.
- 029:099 Undergraduate Research** arr.  
Supervised research leading to written report or oral presentation.

## Physics for Undergraduate and Graduate Students

- 029:103 Reading in Physics** arr.  
Selected topics in physics.
- 029:105 Special Topics in Physics** arr.
- 029:115 Intermediate Mechanics** 3 s.h.  
Newtonian mechanics; noninertial reference systems; central forces, celestial mechanics; rigid body motion; Lagrangian, Hamiltonian equations of motion; small oscillations. Prerequisites: 22M:026, and 029:011 or 029:027 or 029:081.
- 029:118 Statistical Physics** 3 s.h.  
Integrated introduction to subjects of thermodynamics, statistical mechanics, kinetic theory; emphasis on applications. Prerequisites: 029:030 or 029:083, and 029:115.
- 029:128 Electronics** 4 s.h.

Design and construction of small circuits; use of measurement instruments--oscilloscope, multimeter, function generator; circuits, including transistors, operational amplifiers, digital, analog-to-digital conversion. Prerequisites: 029:012 or 029:028 or 029:082. Requirements: physics or astronomy major.

**029:129 Electricity and Magnetism I** 3 s.h.  
Electrostatics, magnetic fields, introduction to Maxwell's equations. Prerequisites: 22M:028, and 029:012 or 029:028 or 029:082.

**029:130 Electricity and Magnetism II** 3 s.h.  
Continuation of 029:129; magnetism, electromagnetic waves, A.C. circuits, applications of Maxwell's equations to wave guides, antennas, optics, plasma physics, other topics. Prerequisites: 029:129.

**029:132 Intermediate Laboratory** 3 s.h.  
Electricity; electronics; magnetism; optics; atomic, nuclear, solid state physics; techniques in data analysis, including error analysis. Prerequisites: 029:028 or 029:082, and 029:029 or 029:083. Corequisites: 029:129.

**029:133 Advanced Laboratory** 3 s.h.  
Topics in electricity; electronics; magnetism; atomic, nuclear, plasma, solid state physics; techniques in data analysis, including error analysis.

**029:140 Introduction to Quantum Mechanics I** 3 s.h.  
Superposition principle, Stern-Gerlach experiment, linear operators, measurement theory, time evolution, angular momentum, wave mechanics in one dimension, one-dimensional harmonic oscillator, two-body problems with central forces, the hydrogen atom. Prerequisites: 029:030 or 029:083, 029:115, 22M:027, and 22M:028.

**029:141 Introduction to Quantum Mechanics II** 3 s.h.  
Perturbation theory, variational methods, WKB approximation, scattering, Helium atom, periodic table, atomic spectroscopy, transition rates, other selected applications. Prerequisites: 029:140.

**029:171 Mathematical Methods of Physics I** 3 s.h.  
Functions of complex variables, integration methods, linear vector spaces, tensors, matrix algebra. Prerequisites: 22M:028.

**029:172 Mathematical Methods of Physics II** 3 s.h.  
Continuation of 029:171; Hilbert space, special functions, Fourier transform and expansions in orthogonal polynomials, differential equations, Green's functions. Prerequisites: 029:171.

**029:180 Introductory Optics** 3 s.h.  
Geometrical and physical optics; interference; diffraction; polarization; microscopic origins of macroscopic optical properties of matter; optical activity; electro-optical, magneto-optical, acousto-optical phenomena; spontaneous Brillouin, Raman, Rayleigh scattering. Prerequisites: 029:130. Same as 055:177.

**029:182 Electro Optics** 3 s.h.  
Wave equation solutions; optical birefringence; finite beam propagation in free space, dielectric waveguides and fibers; optical resonators; nonlinear phenomena; electro-optic, acousto-optic modulation; optical detection, noise; application to communication systems. Requirements: (for 055:179) 055:070; (for 029:182) 029:130. Same as 055:179.

**029:184 Optical Signal Processing** 3 s.h.  
Linear systems description of optical propagation; diffraction and angular plane wave spectrum; lenses as Fourier transformers, lens configurations as generalized optical processors; lasers, coherence, spatial frequency analysis; holography; convolvers, correlators, matched filters; synthetic aperture radar; optical computing. Requirements: (for 055:178) 055:070; (for 029:184) 029:130. Same as 055:178.

**029:192 Elementary Particles and Nuclear Physics** 3 s.h.  
Accelerators, particle detectors, passage of radiation through matter; nuclear structure, nuclear reactions; quark model of hadrons; strong, electromagnetic, weak interactions of elementary particles; gauge theories, intermediate vector bosons; unification of electromagnetic and weak interactions. Prerequisites: 029:140.

**029:193 Introductory Solid State Physics** 3 s.h.

Phenomena associated with solid state; classification of solids and crystal structures, electronic and vibrational properties in solids; thermal, optical, magnetic, dielectric properties of solids. Prerequisites: 029:140 and 22M:028. Same as 055:173.

### **029:194 Plasma Physics I**

3 s.h.

Physics of ionized gases, including orbit theory, guiding center motion, adiabatic invariants, ionization balance description of plasmas by fluid variables and distribution functions; linearized wave motions, instabilities; magnetohydrodynamics. Prerequisites: 029:130.

### **029:195 Plasma Physics II**

3 s.h.

Continuation of 029:194; linear, nonlinear solutions of the Vlasov equation, kinetic theory of plasmas, including Landau damping and velocity space instabilities. Prerequisites: 029:194.

### **029:196 Computational Physics**

3 s.h.

Introduction to contemporary use of computers by physicists; topics such as numerical solutions of ordinary differential equations in classical mechanics, boundary value problems in electricity and magnetism, eigenvalue problems in quantum mechanics, Monte Carlo simulations in statistical mechanics, methods of data analysis. Prerequisites: 029:115, 029:129, and 029:140.

## **Physics, Primarily for Graduate Students**

### **029:202 Workshops and Special Training in Physics**

arr.

Workshops and special training opportunities for postbaccalaureate students; may include collaborations with other departments, institutions, or externally funded research organizations. Repeatable.

### **029:205 Classical Mechanics**

3 s.h.

Dynamics of mass points; Lagrange multipliers, small oscillations, Hamilton's equations; canonical transformations, Hamilton-Jacobi theory; chaos. Prerequisites: 029:115.

### **029:206 Nonlinear Dynamics**

3 s.h.

Deterministic approach of turbulence and chaotic dynamical systems; qualitative theory of ordinary differential equations, perturbation in classical mechanics, ergodicity, bifurcation, universal properties of discrete maps, intermittency, fractals, quantitative characterizations of chaos.

### **029:212 Statistical Mechanics I**

3 s.h.

Probability concepts; kinetic equations; classical and quantum equilibrium statistical mechanics with applications, including ideal and imperfect gases and phase transitions, irreversible processes, fluctuation-dissipation theorems. Prerequisites: 029:118 and 029:140.

### **029:213 Classical Electrodynamics I**

3 s.h.

Advanced electromagnetostatics, boundary value problems, Green's functions, Maxwell's equations, radiation theory, physical optics, multipole expansion of radiation field. Prerequisites: 029:130.

### **029:214 Classical Electrodynamics II**

3 s.h.

Special relativity, motion of charges in fields, theories of radiation reaction, special topics. Prerequisites: 029:213.

### **029:220 Individual Critical Study**

arr.

Essay on topic chosen in consultation with faculty member. Requirements: candidacy for M.S. with critical essay.

### **029:222 Nonlinear Optics**

3 s.h.

Classical treatment of second- and third-order optical nonlinearities; phase matching, harmonic generation, three- and four-wave mixing, self-focusing, self-phase modulation, stimulated scattering of light, applications. Requirements: (for 029:222) 029:130; (for 055:276) 029:130 or 055:170. Same as 055:276.

### **029:224 Laser Principles**

3 s.h.

Laser theory, stimulated emission, dispersion theory, broadening mechanisms, rate equations, gain saturation, optical resonators, mode-locking, Q-switching techniques, survey of laser types, modes of operation. Requirements: (for 029:224) 029:130; (for 055:274) 055:170. Same as 055:274.

- 029:225 Special Topics in Physics** arr.  
Repeatable.
- 029:228 Topics in Quantum Electronics** 3 s.h.  
Quantum optics, optical properties of matter, laser science, photonics. Repeatable.
- 029:229 Semiconductor Physics** 3 s.h.  
Electronic, optical, and materials properties of semiconductors. Prerequisites: 029:193 and 029:246. Same as 055:273.
- 029:240 Medical Physics** 4 s.h.  
Characteristics of X-ray machines, nuclear accelerators, teletherapy devices; properties of X-rays and gamma rays, their interaction with matter; radiation exposure, depth dose measurements; radiation therapy. Offered spring semesters of even years. Requirements: 8 s.h. of physics. Same as 077:211.
- 029:245 Quantum Mechanics I** 3 s.h.  
Nonrelativistic quantum mechanics, Schrödinger wave mechanics, Hilbert space methods, perturbation theory, scattering, spin and angular momentum, identical particles, selected applications, introduction to relativistic theory. Prerequisites: 029:140 and 029:141.
- 029:246 Quantum Mechanics II** 3 s.h.  
Continuation of 029:245. Prerequisites: 029:245.
- 029:247 Introduction to Quantum Field Theory** 3 s.h.  
Quantization of relativistic and nonrelativistic field theories, covariant perturbation theory, theory of renormalization, dimensional regularization, renormalization group theory, introduction to gauge theories and anomalies. Prerequisites: 029:246.
- 029:248 Quantum Gauge Theories** 3 s.h.  
Gauge invariance, introductory group theory, Yang-Mills theories, electroweak theory, quantum chromodynamics, running coupling constants, operator product expansions, Ward identities, spontaneous symmetry breaking, chiral anomalies, instantons, monopoles, effective Lagrangians, supersymmetry, quantum gravity, introduction to string theory. Repeatable. Prerequisites: 029:247.
- 029:261 Seminar: Plasma Physics** arr.  
Current research. Same as 055:291.
- 029:262 Seminar: Solid State Physics** arr.  
Current research.
- 029:266 Seminar: Space Physics** arr.  
Current research.
- 029:267 Seminar: Nuclear Physics** arr.  
Current research.
- 029:268 Seminar: Elementary Particle Physics** arr.  
Current research.
- 029:271 Theoretical Solid State Physics I** 3 s.h.  
Central principles of the quantum theory of solids; lattice dynamics, electronic structure, optical properties, superconductivity, magnetism; emphasis on viewpoint of elementary excitations. Prerequisites: 029:193 and 029:246.
- 029:273 General Relativity and Cosmology** 2-3 s.h.  
Einstein's theory of gravitation; applications to astrophysics and cosmology. Repeatable.
- 029:275 Particle Physics** 3 s.h.  
Elementary particle properties and phenomenology, quark-parton models, quantum chromodynamics, unified theory of weak and electromagnetic interactions. Repeatable.

**029:276 Special Topics in Quantum Mechanics**

3 s.h.

Current topics in quantum mechanics, such as string theory, relativistic quantum mechanics, quantum gravity, axiomatic quantum field theory. Repeatable.

**029:277 Special Topics in Condensed Matter**

3 s.h.

Current topics, such as superconductivity and magnetism. Repeatable. Prerequisites: 029:271.

**029:281 Research: Physics**

arr.

**029:294 Advanced Plasma Physics I**

3 s.h.

Microscopic plasma behavior: statistical mechanics of plasmas; Liouville equation; BBGKY hierarchy; Fokker-Planck equation and relaxation processes; Balescu-Lenard equation; Vlasov equation and linearized wave motion; shocks, nonlinear plasma motions, and instabilities; fluctuations and radiation processes; topics from recent literature. Repeatable.

**Astronomy, Primarily for Undergraduates****029:050 Stars, Galaxies, and the Universe**

3-4 s.h.

Survey of stars, galaxies, and the universe; life cycles of stars, including black holes and pulsars; diversity of galaxies, including the Milky Way and distant quasars; cosmology--the history, structure, and fate of the universe; current results from recent astronomical observations; night sky observation. Recommendations: closed to physics and astronomy majors. GE: Natural Sciences.

**029:051 Introductory Astronomy Laboratory**

1 s.h.

Laboratory for 029:050. Requirements: 3 s.h. in 029:050. GE: Natural Sciences.

**029:052 Exploration of the Solar System**

3 s.h.

Survey of the solar system; physical properties of the planets, comets, and asteroids; origin of the solar system; search for extrasolar planetary systems; search for life in the universe; current results of recent planetary space missions; night sky observation. Recommendations: closed to physics and astronomy majors. GE: Natural Sciences.

**029:053 Life in the Universe**

3 s.h.

Are we alone? Scientific foundations of this question, technology behind searches for extraterrestrial life in the solar system and on extrasolar planets; evolution of life on Earth, likelihood that such conditions exist elsewhere in the universe; cultural consequences of discovering extraterrestrial life. GE: Natural Sciences.

**029:061 General Astronomy I**

4 s.h.

Qualitative and quantitative introduction to the development of astronomy, celestial mechanics, time, electromagnetic radiation, telescopes and astronomical instrumentation, planets, smaller solar system objects; laboratory emphasis on observation with telescopes. Requirements: four years of high school math. GE: Natural Sciences.

**029:062 General Astronomy II**

4 s.h.

Continuation of 029:061; qualitative and quantitative introduction to properties and evolution of sun, stars, interstellar matter, galaxies; cosmology; laboratory emphasis on observation with telescopes. Requirements: four years of high school math. GE: Natural Sciences.

**029:094 Reading in Astronomy**

arr.

Selected topics in astronomy.

**Astronomy for Undergraduate and Graduate Students****029:104 Reading in Astronomy**

arr.

**029:106 Special Topics in Astronomy**

arr.

**029:119 Introduction to Astrophysics I**

3 s.h.

Fundamentals of astrophysical processes in solar system objects, stars, nebulae, interstellar medium, galaxies, cosmology; topics include stellar spectra, binary stars, interstellar gas and dust, stellar and galactic kinematics, stellar evolution, HII regions, radiation processes in galaxies and quasars, mathematical descriptions of the universe. Prerequisites: 22M:027, 22M:028, 029:030, 029:061, and 029:062. Recommendations: computer programming experience.

**029:120 Introduction to Astrophysics II**

3 s.h.

Continuation of 029:119. Prerequisites: 029:119.

**029:137 Astronomical Laboratory**

3 s.h.

Techniques and instrumentation in optical and radio astronomy. Prerequisites: 029:030, 029:061, and 029:062.

**029:186 Radio Astronomy**

3 s.h.

Survey of radio astronomy, emphasizing technical aspects; radiation, antennas, receivers, radio spectroscopy, interferometer arrays and aperture synthesis; emission mechanisms, pulsars, supernova remnants, radio galaxies.

**Astronomy, Primarily for Graduate Students****029:232 Theoretical Astrophysics I**

3 s.h.

Momentum and energy transport in stellar interiors, stellar structure and evolution, radiative transfer, theory of stellar photospheres and continuous spectra of stars, formation of absorption and emission lines.

**029:233 Theoretical Astrophysics II**

3 s.h.

The interstellar medium: optical properties of small interstellar grains, radiative processes in interstellar gas, structure of HII regions, interstellar shock waves, supernova remnants, modification of interstellar medium by luminous stars, molecular clouds.

**029:234 Stellar Structure and Evolution**

3 s.h.

Stellar interiors, nuclear astrophysics; advanced topics.

**029:235 Special Topics in Astrophysics**

1-3 s.h.

Advanced lectures. Repeatable.

**029:263 Seminar: Astrophysics**

arr.

Current research.

**029:282 Research: Astronomy**

arr.

Original research in observational, theoretical astronomy.

## Political Science

**Chair:** Cameron Thies

**Professors:** G. Robert Boynton, John A.C. Conybeare, Vicki L. Hesli, Michael S. Lewis-Beck (F. Wendell Miller Distinguished Professor of Political Science), John S. Nelson, William M. Reisinger, Tom W. Rice, Wenfang Tang, Caroline Tolbert

**Professors emeriti:** Joel D. Barkan, Alfonso J. Damico, Chong Lim Kim, Gerhard Loewenberg, Douglas K. Madsen

**Associate professors:** Frederick J. Boehmke, Cary R. Covington, Douglas Dion, Timothy M. Hagle, Kelly M. Kadera, Brian H. Lai, Sara Mitchell, Cameron Thies

**Assistant professors:** Peter Hatemi, Christian Jensen, Kyle Mattes, Tracy Osborn, Rene Rocha, Thania Sanchez, Jae-Jae Spoon, Erica Townsend-Bell

**Undergraduate degrees:** B.A., B.S. in Political Science

**Undergraduate nondegree program:** Minor in Political Science

**Graduate degrees:** M.A., Ph.D. in Political Science

**Web site:** <http://www.polisci.uiowa.edu>

## Undergraduate Programs

The department offers a Bachelor of Arts, a Bachelor of Science, and a minor in political science.

### Bachelor of Arts

The Bachelor of Arts in political science requires a minimum of 120 s.h., including 33 s.h. of work for the major. Students must maintain a g.p.a. of at least 2.00 in all political science courses taken at The University of Iowa, and in all political science courses taken at other institutions and at the University combined. Students must complete the College of Liberal Arts and Sciences General Education Program.

Students must earn at least 12 s.h. of the 33 s.h. required for the major in political science courses at The University of Iowa. Credit earned in 030:029 First-Year Seminar and 030:191 Government Internship cannot be applied to the major, but grades in these courses become part of a student's grade-point average.

In planning course work, students should be guided by the College of Liberal Arts and Sciences maximum hours rule: Students earning a B.A. or B.S. may apply a maximum of 50 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

The B.A. major requires the following course work.

030:001 Introduction to American Politics 3 s.h.

Four of these:

030:020 Introduction to Politics 3 s.h.

030:030 Introduction to Political Thought and Political Action 3 s.h.

030:041 Introduction to the Politics of Russia and Eurasia 3 s.h.

030:043 Introduction to Politics in the Muslim World 3 s.h.

030:045 Introduction to Comparative Politics 3 s.h.

030:050 Introduction to Political Behavior 3 s.h.

030:060 Introduction to International Relations 3 s.h.

030:061 Introduction to American Foreign Policy 3 s.h.

030:070 Introduction to Political Communication 3 s.h.

Political science courses numbered 100 or above (at least 12 s.h. must be taken in regularly scheduled classroom work) 18 s.h.

Courses 030:185 Honors Research Project, 030:186 Honors Senior Thesis, 030:190 Independent Study, 030:191 Government Internship, 030:193 Undergraduate Research Tutorial, and 030:194 Senior Research Project/Paper do not count toward the 12 s.h. taken in regularly scheduled classroom work.

For more detailed descriptions of the undergraduate programs in political science, see Guide to Undergraduate Study in Political Science, available in the department's office and on its web site.

### Emphases in Political Science

Students may elect to complete one or more emphases while fulfilling the requirements for the B.A. or B.S. If a student completes an emphasis and requests recognition from the department, the emphasis is indicated on the transcript at graduation.

Each emphasis consists of four courses. Emphases are available in American institutions, American political practice, international relations, law and politics, identity politics, political communication, political economy, political processes, political theory, politics of democratization, politics of developing areas, and politics of industrial democracies. For lists of courses approved in each area, contact the Department of Political Science. For more information consult the Guide to Undergraduate Study in Political Science.

## Bachelor of Science

The Bachelor of Science in political science requires a minimum of 120 s.h., including 44 s.h. of work for the major (33 s.h. in political science courses and 11 s.h. of approved mathematics/statistics courses). Students must maintain a g.p.a. of at least 2.00 in all political science courses taken at The University of Iowa, and in all political science courses taken at other institutions and at the University combined. Students must complete the College of Liberal Arts and Sciences General Education Program.

Students must earn at least 12 s.h. of the 33 s.h. political science courses required for the major at The University of Iowa. Credit earned in 030:029 First-Year Seminar and 030:191 Government Internship cannot be applied to the major, but grades in these courses become part of a student's grade-point average.

In planning course work, students should be guided by the College of Liberal Arts and Sciences maximum hours rule: Students earning a B.A. or B.S. may apply a maximum of 50 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

The B.S. major requires the following course work.

030:001 Introduction to American Politics	3 s.h.
---	--------

Four of these:

030:020 Introduction to Politics	3 s.h.
030:030 Introduction to Political Thought and Political Action	3 s.h.
030:041 Introduction to the Politics of Russia and Eurasia	3 s.h.
030:043 Introduction to Politics in the Muslim World	3 s.h.
030:045 Introduction to Comparative Politics	3 s.h.
030:050 Introduction to Political Behavior	3 s.h.
030:060 Introduction to International Relations	3 s.h.
030:061 Introduction to American Foreign Policy	3 s.h.
030:070 Introduction to Political Communication	3 s.h.

One of these:

030:185 Honors Research Project (for honors students)	3 s.h.
030:193 Undergraduate Research Tutorial	3 s.h.

All of these:

030:100 Understanding Political Research	3 s.h.
Additional political science courses at the 100 level	12 s.h.

Students must complete at least 12 s.h. of 100-level courses, including 030:100 Understanding Political Research, in regularly scheduled classroom work. The 12 s.h. may not include 030:185 Honors Research Project, 030:186 Honors Senior Thesis, 030:190 Independent Study, 030:191 Government Internship, 030:193 Undergraduate Research Tutorial, and 030:194 Senior Research Project/Paper.

One of the sets of three mathematics courses listed under "Approved Math/Statistics Courses"	11 s.h.
--	---------

Recommended but not required:

030:194 Senior Research Project/Paper	3 s.h.
---------------------------------------	--------

**APPROVED MATH/STATISTICS COURSES**

The following sets of mathematics/statistics courses are approved for the B.S. Other sets of courses may be used with written approval of the B.S. advisor.

**Set 1:**

22M:017 Calculus and Matrix Algebra for Business (22M:025 or 22M:031 can be substituted)	4 s.h.
22S:102 Introduction to Statistical Methods	3 s.h.
22S:148 Intermediate Statistical Methods	4 s.h.

**Set 2:**

06E:071 Statistics for Strategy Problems	3 s.h.
22M:017 Calculus and Matrix Algebra for Business	4 s.h.
22S:008 Statistics for Business	4 s.h.

**Set 3:**

22M:025 Calculus I (22M:031 can be substituted)	4 s.h.
22M:026 Calculus II (22M:032 can be substituted)	4 s.h.
22S:102/07P:143 Introduction to Statistical Methods	3 s.h.

For more detailed descriptions of the undergraduate programs in political science, see Guide to Undergraduate Study in Political Science, available in the department's office and on its web site.

**Emphases in Political Science**

Students may elect to complete one or more emphases while fulfilling the requirements for the B.A. or B.S. If a student completes an emphasis and requests recognition from the department, the emphasis is indicated on the transcript at graduation.

Each emphasis consists of four courses. Emphases are available in American institutions, American political practice, international relations, law and politics, identity politics, political communication, political economy, political processes, political theory, politics of democratization, politics of developing areas, and politics of industrial democracies. For lists of courses approved in each area, contact the Department of Political Science. For more information consult the Guide to Undergraduate Study in Political Science.

**B.A. or B.S. with Teacher Licensure**

Undergraduates planning to emphasize political science in their teacher training should consult the College of Education for requirements.

The course 030:001 Introduction to American Politics fulfills the requirement for Iowa teacher licensure.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Arts**

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** two courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** six courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** eight courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

## Bachelor of Science

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** two courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester:** eight courses in the major, including two of the three required mathematics/statistics courses and 030:100 Understanding Political Research, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** 11 courses in the major, including 030:193 Undergraduate Research Tutorial

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

## B.A. and B.S. with Honors

In addition to the checkpoints for the B.A. and B.S. degrees, honors candidates must complete 030:180 Honors Seminar on the Study of Politics before the seventh semester begins.

## Honors

The program leading to a B.A. or B.S. with honors is open to students with a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in political science. To graduate with honors, students must maintain a g.p.a. of at least 3.50 in political science and a cumulative UI g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). The program requires only 9 s.h. of 100-level honors course work with a grade of B or higher in each course, but students are encouraged to take 100-level honors seminars as often as possible. Students also are encouraged to take honors sections of introductory courses whenever available.

Honors students must complete 030:180 Honors Seminar on the Study of Politics, preferably as sophomores. They also must take at least one additional honors seminar (030:181 Honors Seminar on American Politics, 030:182 Honors Seminar on Political Theory, 030:183 Honors Seminar on Comparative Politics, or 030:184 Honors Seminar on International Politics). This requirement also may be met by taking a 300-level course, with the instructor's consent. The last 3 s.h. required for graduation with honors in political science may be earned by completing 030:185 Honors Research Project or 030:186 Honors Senior Thesis. For more information, see the Guide to Undergraduate Study in Political Science or contact the Department of Political Science honors advisor.

## Minor

The minor in political science requires a minimum of 15 s.h. in political science courses, including 12 s.h. in 100-level courses and 12 s.h. taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. Credit by exam is not accepted. Credit from 030:029 First-Year Seminar and 030:191 Government Internship does not count toward the minor. Credit earned through a University of Iowa Regents program is considered credit in residence.

Students may complete an area emphasis (see "Emphases in Political Science"); however, emphasis areas in the minor are not recorded on the transcript. Students may request a letter from the Department of Political Science noting the completion of an emphasis area in the minor.

## National Honor Society

The department sponsors a chapter of Pi Sigma Alpha. Students who have a cumulative g.p.a. of at least 3.30, have attained junior standing, and have completed 15 s.h. of course work in political science are considered for membership. Contact the Department of Political Science honors advisor for more information.

## Graduate Programs

The department offers a Master of Arts and a Doctor of Philosophy in political science. The Ph.D. program is designed for students planning academic careers. The department usually offers the master's degree only as a preliminary step toward the Ph.D.

## Master of Arts

The Master of Arts in political science requires a minimum of 30 s.h. of graduate credit, with a g.p.a. of at least 3.25. No thesis is required. Each student's record is reviewed by a final examination committee, which may waive the final oral examination. If the evaluation committee convened at the end of the student's first year of courses finds that a

student's work provides sufficient evidence of the research and writing skills ordinarily demonstrated in a master's thesis, it may recommend that the student be allowed to proceed with a doctoral program.

When a first-year evaluation committee finds the quality of a student's work inadequate for recommending continuation toward the Ph.D., the committee may recommend that the student be permitted to seek the nonthesis M.A. as a terminal degree.

## Doctor of Philosophy

The Doctor of Philosophy in political science requires a minimum of 72 s.h. of graduate credit. The program is designed to prepare students for research, teaching, and scholarly endeavor in academic settings and private or governmental institutions. It produces graduates who are deeply committed to the study of politics, familiar with fundamental knowledge about political processes, well trained in methods and techniques for careful investigation of basic and applied research questions, and determined to make contributions to the discipline of political science and to society.

The department usually admits seven to ten Ph.D. students each year, so students work closely with faculty members, often collaborating on research and publication. Graduate students know one another and enjoy supportive, congenial working conditions.

Doctoral study usually lasts four to five years. The first-year curriculum for all students consists of core courses equally divided between substance and methodology. Emphasis is on basic research methods, including quantitative methods, that political scientists must understand thoroughly. Special attention is given to research design, collection of observations, and data analysis and interpretation.

The second and third years of study are spent in small seminars with focused, substantive topics. Papers written for these seminars might be submitted to journals or read at professional meetings. Students must take their qualifying examinations by the end of the third year. They take their comprehensive examination (oral defense of the dissertation proposal) by the middle of the first semester of their fourth year.

The fourth and fifth years are spent on dissertation research and writing. Students who do basic research and gather data abroad often require an additional year to complete the dissertation.

Six fields of study are available: American politics, comparative politics, international relations, political theory, formal theory, and for those who wish to go beyond the basic methodology training, research methods. Each student chooses three fields of study for qualifying examinations.

The Guide to Doctoral Study in Political Science, available from the Department of Political Science and on its web site, provides a comprehensive statement of departmental requirements.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Political Science Courses

### For Undergraduates

Courses numbered below 100 are introductory; those numbered 100 to 199 are advanced.

Courses 030:029 First-Year Seminar and 030:191 Government Internship cannot be applied toward the requirements for the major or minor in political science; 030:191 Government Internship is offered only satisfactory/fail.

**030:001 Introduction to American Politics** 3 s.h.  
Structure and processes; political institutions including Congress, presidency, Supreme Court, parties, interest groups, bureaucracy; discussion of framing and significance of the U.S. Constitution. GE: Social Sciences.

**030:020 Introduction to Politics** 3 s.h.  
Introduction to selected processes, institutions, or behaviors central to the study of politics.

**030:029 First-Year Seminar** 1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**030:030 Introduction to Political Thought and Political Action** 3 s.h.

Common problems, literature, analytic techniques. GE: Humanities, Social Sciences.

**030:041 Introduction to the Politics of Russia and Eurasia** 3 s.h.

Russian politics; focus on problems of building new government institutions against backdrop of the communist legacy and the Soviet empire's history; newly independent states, their struggles with political change. GE: Social Sciences.

**030:043 Introduction to Politics in the Muslim World** 3 s.h.

Regime types and the process of categorization in political science; political culture and historical legacies; link between political and economic development; ideologies; political participation (individuals, parties, interest groups); public policy and the policy process (domestic and foreign); selected countries including Iran, Iraq, Egypt, Indonesia, Afghanistan, and Uzbekistan. GE: Social Sciences.

**030:045 Introduction to Comparative Politics** 3 s.h.

Politics worldwide, including all regions and levels of development; wide-ranging themes, including democratization, sustainability, role of interest groups, authoritarian regimes, electoral systems, parties. Recommendations: closed to students who have taken 030:040 or 030:042. GE: Social Sciences.

**030:050 Introduction to Political Behavior** 3 s.h.

Patterns and basis of political behavior; emphasis on common elements across social, organizational, institutional settings. GE: Social Sciences.

**030:060 Introduction to International Relations** 3 s.h.

Theoretical introduction to contemporary international relations; emphasis on security and military affairs, international political economy, politics of global environmental problems. GE: Social Sciences.

**030:061 Introduction to American Foreign Policy** 3 s.h.

Foreign policies: goals, basic themes and general patterns, problems encountered by policy makers, means employed in dealing with other nations and international organizations, processes by which policies are formulated, factors that influence structure of policies. GE: Social Sciences.

**030:070 Introduction to Political Communication** 3 s.h.

Institutions, dynamics, issues of political communities considered as networks of communication; representative topics include political actors, ads, films, media, myths, news, publics, regulations, rhetorics, symbols. GE: Social Sciences.

**030:100 Understanding Political Research** 3 s.h.

Focus on creating knowledgeable evaluators of current research in political science; interpretation of different quantitative techniques, with examples from current political science research.

**030:106 Research in Judicial Politics** 3 s.h.

Applied research training in courts and judicial politics. Prerequisites: 030:116 or 030:153 or 030:158.

**030:107 Women and Politics in the United States** 3 s.h.

Involvement of women in the U.S. political system; topics include political theories about women's involvement in politics and government, women and constitutional law, public policies that affect women, women's participation in politics at the mass and elite levels.

**030:108 Latino Politics and Immigration Policy** 3 s.h.

United States immigration policy and the political consequences of Latino population growth; contrast of political experiences of Latinos with groups and the ideals of democratic political systems.

**030:109 Election Reform** 3 s.h.

Election reform (what's wrong and what can be done to fix it); overview of challenges facing American democracy in the 21st century (low voter turnout and civic engagement, polarized political parties to growing inequality); ways of addressing challenges, including movement towards participatory democracy (direct democracy), election reform and new government institutions for the 21st century, politics and society online, e-government; organization around promising reforms (some in place, some in experimental form, some far reaching) of legislatures, presidential elections, voting, and voter registration. Requirements: no prior enrollment in 030:119 with the subtitle of Election Reform.

**030:111 Local Politics** 3 s.h.

Models of city government, relation to state and federal governments; rights, liabilities of municipalities; city elections, campaigns, issues; role of pressure groups.

**030:112 Minority Representation in American Politics** 3 s.h.

Effects of voting rights legislation, election laws, interest groups, and institutional constraints on minority representation in American politics.

**030:113 American State Politics** 3 s.h.

Approaches to analysis of political behavior in American state governments; emphasis on cultures, parties, actors, processes, issues.

**030:114 Racism and Politics in the U.S.** 3 s.h.

Evolution of white racial attitudes over time; political experiences of African Americans contrasted with other groups and the ideals of democratic political systems; effect of race on political participation, partisan affiliation, vote choice, and policy preferences.

**030:115 The Presidency** 3 s.h.

Development, current status of the office, powers, functions of American presidency; recruitment, multiple roles of chief executive; party, congressional, administrative, judicial relationships.

**030:116 American Constitutional Law and Politics** 3 s.h.

Role of U.S. Supreme Court in American political system; emphasis on analysis of Supreme Court cases.

**030:117 Political Decision Making** 3 s.h.

Political decision making processes, including executive, legislative, judicial, mass publics; decision theories from economics, psychology, political science, organizational behavior; normative and descriptive approaches to decisions made by political actors.

**030:118 American Political Development** 3 s.h.

Transformations in American political behavior and institutions over time.

**030:119 Problems in American Politics** 3 s.h.

Problems in studying American system; structures, functions, behavior.

**030:120 Public Administration and Bureaucratic Politics** 3 s.h.

Administrative and organizational theory and behavior; techniques of management; relations between administration and other branches in federal and state governments; administrative politics.

**030:121 Public Choice** 3 s.h.

Introduction to some of the most important topics in public choice (i.e., How do we explain what the public "wants"? Can we determine group preferences and group choices even if individual incentives run contrary to society's needs?); study of public choice theory problems in political science--how we determine society's preference among candidates, public policies, or even types of government.

**030:122 Politics of Representation** 3 s.h.

Theory and practice of representative government; theories of representative relationship, types of representative governments in the United States and abroad, the politics of representing constituents, minority representation in U.S. government.

**030:124 Executive-Legislative Relations** 3 s.h.

Conflict, cooperation between executive and legislative branches of U.S. government; budget politics, legislative veto, foreign policy.

**030:125 Interest Groups** 3 s.h.

Theory, organization, structure of interest groups; how they influence Congress, executive branch, courts, elections.

**030:126 American Public Policy** 3 s.h.

Functions and policies of national government; emphasis on domestic policy making, impact of public policy. Prerequisites: 030:001.

- 030:127 Political Campaigning** 3 s.h.  
Current state of political campaigning at all levels of government; history of campaigning, role of money and campaign finance reform, television and negative advertising, Internet campaigning.
- 030:128 Direct Legislation** 3 s.h.  
Direct democracy--lawmaking by the citizenry without legislative action; origins, historical perspectives, usage across politics, regulations; consequences of direct democracy; concerns about equality of access, tyranny of majority; United States, other countries.
- 030:129 Policy Matters: Perspective on Contemporary Problems** 3 s.h.  
Public policy issues in scholarly perspective; UI experts provide background introduction to weekly issues; presentations of new policy initiatives, roundtable on policy options; panels representing local, state, and national options and experience involving policy practitioners, legislators, and advocates. Same as 016:115.
- 030:130 Consequences of War** 3 s.h.  
War's enduring effects: war's impact on individuals, including combatants and noncombatants; war's impact on states, including states' development, economic, political, and social effects; war's effects on the international system.
- 030:131 Global Justice** 3 s.h.  
Introduction to normative issues in international politics (i.e., Under what conditions are wars just? When is intervention justified? Do wealthier nations owe anything to those elsewhere who are in need?); theoretical works on global justice by Rawls, Kant, Pogge, Walzer, and others; normative theories analyzed against background of empirical examples, such as recent humanitarian interventions, contemporary wars, current trade regime, global environmental problems; seminar. Requirements: may not enroll if already taken the course as a subtitle under 030:169.
- 030:132 Modern Political Theory** 3 s.h.  
Major writers and intellectual trends in political thought from Renaissance and Reformation to 19th century.
- 030:133 Postmodern Political Theory** 3 s.h.  
Major writers and intellectual trends, from 19th century to World War II.
- 030:134 Problems of Democracy** 3 s.h.  
Theory and practice of democracy; democratic ideals and the institutions and practices necessary for those ideals to work in everyday politics--power, equality, majority rule, participation, trust, representation.
- 030:136 Strategy in Politics** 3 s.h.  
How to isolate the most important elements in strategic political behavior, build models to understand them, recognize common scenarios, devise institutional resolutions to the Prisoners' Dilemma and coordination problems.
- 030:137 Introduction to Political Economy** 3 s.h.  
Economic reasoning applied to political issues, including evolution of institutions, voting, leadership, interest groups, bargaining tactics, federalism, bureaucracy, fairness and compensation for wrongs, legitimacy of democracy, electoral cycles in economic policy.
- 030:138 Current Political Theory** 3 s.h.  
Thinkers or schools of thought, from World War II to present.
- 030:139 Political Issues** 3 s.h.  
Representative topics include democracy, revolution, justice, obligation, technology, authority.
- 030:140 Government and Politics of Europe** 3 s.h.  
Political institutions, processes of selected European countries. Prerequisites: 030:040. GE: Social Sciences.
- 030:141 Russian/Post-Soviet Politics** 3 s.h.  
How the Soviet political system developed and functioned 1917-1985; transformations leading to 1991 break-up; emerging forms of government, politics in former Soviet republics. Prerequisites: 030:041. GE: Foreign Civilization & Culture.
- 030:142 European Integration** 3 s.h.

Politics of the European Union; institutional characteristics and major political issues of the European Union, including popular and national responses to European integration.

**030:143 Government and Politics of the Far East** 3 s.h.

Functions, institutions of government in countries of Far East; focus on social, economic, historical environments. GE: Foreign Civilization & Culture. Same as 039:178.

**030:144 Latin American Politics** 3 s.h.

Governmental institutions, major interest groups; focus on area as a whole. GE: Foreign Civilization & Culture.

**030:145 Latin American Political Parties** 3 s.h.

Challenges posed by recent democratization in Latin America; issues of representation and governance across Latin America's party systems; broad theoretical concepts linked to processes under way in the region.

**030:146 Russian Foreign Policy** 3 s.h.

External postures, policies and behaviors, what lies behind them; Russian perceptions of the world and national interest; internal political dynamics; military, economic, diplomatic capability; rival views of Russian foreign policy.

**030:147 Parties and Elections Around the World** 3 s.h.

Comparative approach and exploration of political parties and elections around the world; party formation and development, identification and voter behavior, competition and strategies; election outcomes; electoral systems and their consequences. Recommendations: 030:045.

**030:148 Government and Politics of China** 3 s.h.

Political development of China; rise to power of Mao's communist party, attempts to transform Chinese society; the Cultural Revolution; tensions and achievements of the reform era; whether partnership or conflict will define the China-U.S. relationship in the coming decades.

**030:149 Problems in Comparative Politics** 3 s.h.

Structures, functions, behaviors of different political systems.

**030:150 Public Policy Around the World** 3 s.h.

Institutional practices and issues surrounding policy implementation in democracies; comparative examination of the administrative politics of advanced democracies.

**030:151 Political Leadership** 3 s.h.

Foundations, effects of leadership in different political systems.

**030:152 The Legislative Process** 3 s.h.

Comparative legislative processes, behavior; focus on legislative systems analysis, legislative institutionalization, legislature and its environment, organizational constraints on legislative behavior, recruitment of legislators, web of legislative interactions, legislative voting behavior.

**030:153 The Judicial Process** 3 s.h.

Role of courts, lawyers, judges, interest groups in the American political system.

**030:154 Political Psychology** 3 s.h.

Political phenomena from psychological perspective; political behaviors of individuals, including decision making by elites and masses, evaluations of political candidates, mass mobilization, response to mass media; psychological concepts including stereotyping, social cognition, attitude, group identification.

**030:155 International Courts: The Intersection of Law and Politics** 3 s.h.

Introduction to important international courts including (Permanent) International Court of Justice, European Court of Justice, International Criminal Tribunal for Yugoslavia, International Criminal Tribunal for Rwanda, and International Criminal Court; the formation, design, and expansion of international courts from political and legal perspectives; states' capabilities, regime type, and war; intersection of domestic and international law, emphasizing the major legal systems in the world (civil law, common law, Islamic law).

**030:156 Ethnic and Religious Conflict in the Muslim World** 3 s.h.

Ethnic and religious conflict in the Muslim world; language rights, cultural preservation, and religious nationalism examined through case studies of ethnic and religious groups in countries such as Afghanistan and Iraq; conditions under which conflict becomes violent, protracted, and regionalized; strategies available to states and minority groups for resolving or managing conflicts.

**030:157 Voting Behavior and Elections**

3 s.h.

Determinants of voting behavior; correlates of political participation, political apathy; political socialization processes; nature and functions of elections.

**030:158 The Criminal Justice System**

3 s.h.

Role of actors, institutions that constitute and participate in the American criminal justice system.

**030:159 Politics Under Authoritarian Rule**

3 s.h.

Political dynamics in countries with authoritarian governing regimes; how those dynamics differ from their counterparts in democracies; how decisions are reached and get enforced; forms political struggles take; how interest groups pursue influence; ways individuals deal with the government; tension between regime control and societal progress.

**030:160 Women and Politics in Global Perspective**

3 s.h.

Women and politics in Europe and the global South; women's participation in political parties and social movements, women in the bureaucracy, women and the politics of intersectionality, feminism and the state, emergence of female gender identities.

**030:161 International Organization and World Order**

3 s.h.

How and why states have developed regularized patterns of interaction in the spheres of economics and security through international organizations and international regimes; regional integration processes, multilateralism.

**030:162 American Foreign Policies**

3 s.h.

Ends pursued, problems encountered, means employed by the United States in relations with other states and international organizations. Prerequisites: 030:061.

**030:163 Chinese Foreign Policy**

3 s.h.

Foreign policy of the People's Republic of China from its founding in 1949 to present; important events (China's entry into the Korean War, Sino-Soviet split in the 1960s, rapprochement between China and the United States in the 1970s, tensions with Taiwan in the 1990s, China's entry into the World Trade Organization); competing explanations for these turning points, theoretical approaches to the study of international relations.

**030:164 Race in World Politics**

3 s.h.

Fundamental questions about racial and ethnic politics; racial and ethnic identities and their intersection with other major social cleavages such as class, nationality, sexuality, religion, gender; concepts and use of race and ethnicity viewed through varied theoretical perspectives; contemporary events around the globe.

**030:165 International Conflict**

3 s.h.

International conflict as the primary ingredient of international politics; sources, causes, and effects of conflict, alliance structures, power distribution, geography, arms races, deterrence.

**030:166 Global Communication and Politics**

3 s.h.

How distance and language barriers in communication have fallen since 2000; how politics and the world are affected when such barriers to communication disappear.

**030:167 Politics and the Multinational Enterprise**

3 s.h.

Political factors affecting a firm's decision to go multinational; effects on home and host countries; political risk management; bargaining between states and corporations; regulation of multinationals by nation-states and international organizations; political implications of global mergers.

**030:168 Politics of Terrorism**

3 s.h.

Political motivations of terrorists; responses to terrorism, politics of prevention and preparation for terrorism; contemporary terrorist organizations, international responses to them.

**030:169 Problems of International Politics**

3 s.h.

Problems in studying international system, structures, functions, behavior.

**030:170 The Politics of International Economics**

3 s.h.

Political, historical dimensions; political aspects of trade, monetary systems, foreign investment, aid, dependency, global interdependence.

**030:171 Public Opinion**

3 s.h.

Role in making public policy; formation, change of political attitudes and opinions; political ideology; measurement of public opinion; how opinion polls are conducted; experience with interviewing and conducting public opinion research. Same as 034:153.

**030:172 France in the 21st Century**

3 s.h.

French politics from the end of the 20th century to beginning of the 21st century; history of France's Fifth Republic; institutional development; key events that influenced politics in France over the last 50 years; major issues that shape France today--citizenship, immigration, identity, France's role in the European Union, electoral and institutional reform, rise of the extreme right, role of women in French society, how protest still affects French politics.

**030:173 State Failure in the Developing World**

3 s.h.

Examine state failure in the developing world, including notable cases like Somalia and Zimbabwe; causes of state failure; potential policy interventions designed to address the consequences of state failure.

**030:174 Multimedia Politics**

3 s.h.

How increasingly universal access to communication affects political campaigning and advocacy; the use of blogging, video, and developing communication media by citizens and candidates to talk politics.

**030:175 Politics of Film**

3 s.h.

Issues in the popular politics of aesthetics, communication, culture, and myth, explored through analysis of films.

**030:176 Governance in the Middle East**

3 s.h.

Institutions and social systems that are affected by political behavior; ways in which Islam, oil production, and international forces shape political evolution in the region; comparative political inquiry of the operation of government institutions in the context of specific historical legacies, economic structures, and population characteristics in Iran, Iraq, Egypt, Turkey, Saudi Arabia.

**030:177 Globalization**

3 s.h.

Introduction to multidisciplinary literature on political economy and culture of globalization; major topics of debate on globalization.

**030:178 Causes, Consequences, and Management of Civil War**

3 s.h.

Causes, duration, management, and consequences of civil war; factors that create more frequent, longer civil wars (e.g., greed, grievance, ethnic conflict, state capacity); conflict management strategies for ending civil wars and minimizing long-term negative consequences.

**030:179 Human Rights and Asian Values**

3 s.h.

Challenges to the Universal Declaration of Human Rights and human rights theory by thinkers and politicians outside Western liberalism; crucial aspects of politics in Asia and the meaning of human rights, explored through debates between Asian skeptics and defenders of human rights.

**030:180 Honors Seminar on the Study of Politics**

3 s.h.

History, scope, methods; diverse issues, theories, techniques in systematic study. Requirements: honors standing in political science.

**030:181 Honors Seminar on American Politics**

3 s.h.

Ideas, issues, methods in selected area. Requirements: junior or senior honors standing in political science.

**030:182 Honors Seminar on Political Theory**

3 s.h.

Intensive study of ideas, issues, methods in an area of political theory. Requirements: junior or senior honors standing in political science.

**030:183 Honors Seminar on Comparative Politics**

3 s.h.

Ideas, issues, methods in selected area. Requirements: junior or senior honors standing in political science.

- 030:184 Honors Seminar on International Politics** 3 s.h.  
Ideas, issues, methods in selected area. Requirements: junior or senior honors standing in political science.
- 030:185 Honors Research Project** 3 s.h.  
Special research assistance to political science faculty. Requirements: junior or senior honors standing in political science.
- 030:186 Honors Senior Thesis** 3 s.h.  
Supervised research and writing. Requirements: honors standing in political science and more than one semester before graduation.
- 030:190 Independent Study** arr.  
Supervised special projects.
- 030:191 Government Internship** 1-3 s.h.  
Undergraduate internships in state or national legislative office, executive agency, or with election campaign official.
- 030:192 Special Topics in Politics** 1-2 s.h.  
Presentations by distinguished lecturers on topics in the study of politics not covered in other courses. One or two weeks.
- 030:193 Undergraduate Research Tutorial** 3 s.h.  
Individual training in applied research.
- 030:194 Senior Research Project/Paper** 3 s.h.  
Supervised research and writing. Requirements: major in political science and more than one semester before graduation.
- 030:195 International Law** 3 s.h.  
Introduction to field of international law from a political and legal perspective; history and contemporary status of international law in several areas: human rights, humanitarian (law of war), environmental law, trade; structure and areas of international law; ask if international law is or can it be an effective tool of international cooperation from a political science perspective; structure of the basic documents of international law and organizations, key cases in the field from a legal perspective. Requirements: may not enroll if already taken the course as a subtitle under 030:169.
- 030:197 Politics of International Human Rights Law** 3 s.h.  
Interaction between politics and international human rights law; international law and organizations, human rights, ratification of human rights treaties; theories of international law and cooperation, exposure to tools of international relations (diplomacy, trade, aid, shaming, sanctions), the role that international and domestic civil society groups play in advocating for states to commit to human rights laws.
- 030:198 Regional Peace and Security** 3 s.h.  
Analysis of the causes of peace and conflict between countries in various regions of the world; theories of zones of peace, security communities, regional security complexes.
- 030:199 New Media and Politics** 3 s.h.  
Blogging, microblogging, and video production as tools of new media (anyone can twitter and reach a large audience); how these technologies work, how they are being used in current politics, what they portend for the future, and what tools are next. Requirements: no prior enrollment in 030:139 with the subtitle New Media and Politics.

## For Graduate Students

Courses numbered 200 to 299 are core courses; those numbered 300 and above are advanced.

- 030:200 Introduction to Political Analysis** 4 s.h.  
Conceptual problems of political analysis; empirical research strategies, philosophy of science. Requirements: doctoral standing in political science.

- 030:201 Introductory Methodology** 4 s.h.  
Introduction to quantitative techniques in political science; set theory, probability distributions, estimation, testing; emphasis on acquiring mathematical skills for more advanced quantitative work in political science. Requirements: doctoral standing in political science.
- 030:205 Introduction to Formal Models in Political Science** 4 s.h.  
Use of formal mathematical models; current modeling techniques, applications in American politics, comparative politics, international politics. Requirements: doctoral standing in political science.
- 030:210 American Politics** 4 s.h.  
Major literature of American politics, emphasis on comparative, systemic, behavioral studies. Requirements: doctoral standing in political science.
- 030:230 Political Theory** 4 s.h.  
Methods of political theory, epistemological and moral foundations of political inquiry; terms of political discourse (e.g., power, legitimacy, equality, ideological foundations of politics); schools of thought and current controversies in political theory. Requirements: doctoral standing in political science.
- 030:240 Comparative Politics** 4 s.h.  
Current approaches, analysis of systems; emphasis on conceptual, methodological issues. Requirements: doctoral standing in political science.
- 030:242 Crossing Borders Seminar** 2-3 s.h.  
Repeatable. Same as 008:231, 013:262, 016:247, 01H:247, 035:273, 044:286, 048:247, 113:247, 129:231, 160:247, 181:247.
- 030:243 Crossing Borders Proseminar** 1 s.h.  
Same as 013:260, 016:244, 01H:330, 035:271, 044:287, 048:244, 113:248.
- 030:260 International Politics** 4 s.h.  
Approaches to study of international politics. Requirements: doctoral standing in political science.
- 030:301 Intermediate Methodology** 4 s.h.  
Techniques of data analysis; statistical models and their relationship to hypotheses tested. Requirements: doctoral standing in political science and one semester of intermediate statistics.
- 030:302 Writing Political Science** 4 s.h.  
Practice in planning and completing political inquiries, with emphasis on writing for scholarly publication; experience refining one's prior research projects for submission to disciplinary journals, and drafting dissertation proposals. Requirements: doctoral standing in political science.
- 030:303 Advanced Methodology** 4 s.h.  
Introduction to regression techniques for limited dependent and qualitative variables in political science; logit, probit, multinomial logit and probit, ordered logit and probit, event history models, event count models; emphasis on understanding how and when to apply these models.
- 030:304 Experimental Methods** 4 s.h.  
Methods, techniques used in political science experiments.
- 030:306 Topics in Methodology** 4 s.h.  
Application of advanced statistical techniques in political science; limited dependent variable regression techniques, simulation methods, missing data techniques, history/rare event analysis and maximum likelihood, and topics tailored to students' research; focus on learning how and when to apply these techniques. Repeatable.
- 030:307 Qualitative Methods** 4 s.h.  
Introduction to qualitative methods in political science research; interviewing, ethnographic research, process tracing, comparative historical analysis, content and discourse analysis, fuzzy set theory.
- 030:310 Modeling American Politics** 4 s.h.

Exploration of how well formal models explain the real world and how the fit between models and world can be improved.

**030:315 The Presidency** 4 s.h.

American chief executive: history, recruitment, behavior, roles, responsibilities, powers, relationships with other institutions.

**030:319 Problems in American Politics** 4 s.h.

Problems in study of American political system; structures, functions, behavior. Repeatable.

**030:339 Problems in Political Theory** 4 s.h.

Prescriptive and explanatory political theory. Repeatable.

**030:341 Democracy and Democratization** 4 s.h.

Competing conceptions of democratic governance and competing theoretical frameworks for the study of successful or attempted regime change from authoritarian rule toward democracy; emphasis on reading and critically analyzing diverse approaches.

**030:342 Religion, Ethnicity, and Politics** 4 s.h.

Theories and empirical work on the relationships between religions and politics; issues of law and political behavior, development of theoretical models in study of ethnicity and nationalism; religious and national identities in modern society, opportunity structures and resource mobilization in context of religious and national movements.

**030:343 Asian Political Systems** 4 s.h.

Democratic, transitional, and totalitarian types of government; emphasis on leadership recruitment, social control, political participation.

**030:344 European Union** 4 s.h.

Politics of the European Union; institutional characteristics and major political issues of the European Union, including popular and national responses to European integration.

**030:345 The State** 4 s.h.

Apparatus of government; major theoretical and empirical work of the state, drawn from comparative politics; state building, bureaucracy, "developmental" and "predatory" states, state-society relationships, failed states.

**030:346 Comparative Parties and Elections** 4 s.h.

Introduction to important questions and puzzles in the study of political parties; party formation and development, the role of parties in society, how parties are organized, party systems, electoral systems, party strategy and behavior, development of new parties, whether parties are still relevant, regeneration of communist parties in post-communist regimes, ethnic parties, failure of party consolidation.

**030:349 Problems of Comparative Politics** 4 s.h.

Problems in study of comparative political systems; structures, functions, behavior. Repeatable.

**030:352 Legislative Behavior** 4 s.h.

Institutions, processes, behavior in the United States, Europe, or developing countries. Repeatable.

**030:353 Political Psychology** 4 s.h.

Political phenomena from a psychological perspective; decision making by elites and masses, evaluations of political candidates, mass mobilization, response to mass media; psychological theories used to explain these behaviors, including stereotyping, social cognition, attitude, group identification, attribution.

**030:357 Public Opinion and Electoral Behavior** 4 s.h.

Political attitudes and beliefs in mass publics; voting behavior; how electoral systems function.

**030:361 Foreign Policy** 4 s.h.

Foreign policy making and international behavior in relation to theories, findings from selected countries.

**030:362 International Conflict and Cooperation** 4 s.h.

Recent theoretical and empirical debates in international relations literature; emphasis on formal and quantitative research.

**030:363 Dynamic Models of International Politics**

4 s.h.

Overview of several dynamic modeling techniques used to study international relations; modeling assumptions, the kinds of information models can provide, evaluation of models.

**030:367 Theories of International Political Economy**

1-4 s.h.

Theories focusing on international system, the state, bureaucracies, interest groups, international organizations, bargaining processes, distributive norms.

**030:368 International Systems and Global Governance**

4 s.h.

Literature of international systems and international organization; major schools of thought in international relations theory, their utility in explaining evolution of the international system and recent developments in international organization and global governance.

**030:369 Problems in International Politics**

4 s.h.

Issues of international politics, emphasis on problems of theoretical analysis. Repeatable.

**030:390 Readings Tutorial**

arr.

Independent study. Repeatable.

**030:393 Research Tutorial**

arr.

Individual training in applied research. Repeatable.

**030:398 Ph.D. Dissertation**

arr.

Repeatable.

# Psychology

**Chair:** Alan J. Christensen

**Professors:** Mark S. Blumberg (F. Wendell Miller Professor), Alan J. Christensen (Psychology/Internal Medicine), Steven W. Duck (Communication Studies/Psychology), John H. Freeman, Gary J. Gaeth (Marketing/Psychology), A. Kim Johnson (F. Wendell Miller Professor), John F. Knutson, Grazyna Kochanska (Stuit Professor of Developmental Psychology), Irwin P. Levin (Psychology/Marketing), Susan K. Lutgendorf, Cathleen M. Moore, Gregg C. Oden (Psychology/Computer Science), Michael W. O'Hara, Jane S. Paulsen (Psychiatry/Psychology), Jodie M. Plumert, John P. Spencer, Scott P. Stuart (Psychiatry/Psychology), Jerry M. Suls, Daniel T. Tranel (Neurology/Psychology), Shaun P. Vecera, Edward A. Wasserman (Stuit Professor of Experimental Psychology), Paul D. Windschitl

**Professors emeriti:** Robert S. Baron, Joan H. Cantor, Don C. Fowles, Isidore Gormezano, John H. Harvey, Lola L. Lopes, Peter E. Nathan, Rudolph W. Schulz, J. Richard Simon, Arnold M. Small

**Professor (clinical):** James N. Marchman

**Associate professors:** Erling A. Anderson (Anesthesiology/Psychology), Prahlad Gupta, Richard Eliot Hazeltine, Andrew R. Hollingworth, Erika Lawrence, René E. Martin (Nursing/Psychology), J. Toby Mordkoff, Amy Poremba, Larissa K. Samuelson

**Associate professor emerita:** Sue R. Rosner

**Adjunct associate professor:** Robert F. Kirby

**Assistant professors:** Jason K. Clark, Susan Wagner Cook, Julie J. Gros-Louis, Ryan T. LaLumiere, Kristian E. Markon, Robert M. McMurray, Lisa S. Segre (Nursing/Psychology)

**Adjunct assistant professors:** Martin Acerbo, Alex Casillas, Leyre Castro, Benjamin J. Chihak, Brian K. Gehl, Gregory L. Gullickson, James P. Howell, M. Bryant Howren, Debra L. Johnson, Ralph F. Johnson, Alireza Kashef, Shannon Ross-Sheehy, Robert L. Thunhorst, Gregory Tinkler

**Lecturer:** Lori J. Nelson

**Undergraduate degrees:** B.A., B.S. in Psychology

**Undergraduate nondegree program:** Minor in Psychology

**Graduate degrees:** M.A., Ph.D. in Psychology

**Web site:** <http://www.psychology.uiowa.edu>

## Undergraduate Programs

The department offers a Bachelor of Arts, a Bachelor of Science, and a minor in psychology. Both bachelor's degree programs are designed to contribute to students' general liberal arts education and to provide a foundation for postbaccalaureate training in psychology and closely related disciplines, and in areas such as business, medicine, law, and communications. Students who intend to enter the job market immediately after completing an undergraduate degree are well-advised to complement their psychology major with substantial preparation in another program more closely tied to the world of work (e.g., education, social work, business, journalism, nursing). Almost all vocational opportunities in psychology require advanced degrees.

The B.S. program is intended for students who plan to pursue advanced work in psychology or in a related discipline. It includes an admission grade-point average requirement and specific courses in statistics, experimental psychology, mathematics, and natural science. The B.A. program has fewer specific requirements and puts less emphasis on methodology. Both programs leave ample time for students to combine psychology with another discipline or program.

Students who change to a psychology major after two years of undergraduate work may find they do not have sufficient background for the B.S. program. They may wish to enrich the B.A. program with courses in experimental psychology and other advanced electives if they intend to pursue graduate work in psychology or a related field.

Students in either program begin with a general introductory course, followed by biological psychology, statistics, and methodology courses and introductory courses in several broad areas: developmental science, clinical psychology, cognitive psychology, and social psychology. These courses are followed by upper-level psychology course work selected by the student.

The department maintains excellent facilities to support teaching and research on human and animal behavior. All faculty members are directly engaged in research, and they bring to their undergraduate teaching the excitement that such activity generates. Many opportunities exist for interested and capable students to participate in current research projects in the department.

The department has an active undergraduate organization, the Iowa Students Psychology Association, which is open to all interested students. The group sponsors speakers, films, career days, and student symposia.

### Selective Admission

Admission to the B.A. program in psychology is open; admission to the B.S. program is selective.

To be eligible for admission to the B.S. program, students must have completed 30 s.h. of college course work (excluding any credit by exam) and must have a cumulative g.p.a. of 2.67 or higher. There is no limit on the number of qualified students admitted to the B.S. program. Students who do not meet the minimum admission requirements may petition the department in writing, presenting additional evidence of their qualifications.

Any University student may enter the B.A. program. Entering first-year and transfer students with fewer than 30 s.h. of course work who are interested in the B.S. program are admitted to the B.A. program until they satisfy the admission requirements for the B.S. program. New transfer students who meet the admission requirements for the B.S. program may choose to enter the B.S. or the B.A. program. Any student in the B.A. program may switch to the B.S. program if he or she meets admission requirements at the time of the request. Students may switch from the B.S. to the B.A. program at any time.

### Bachelor of Arts

The Bachelor of Arts in psychology requires a minimum of 120 s.h., including 44-45 s.h. of work for the major, with a minimum of 29 s.h. in psychology courses. The B.A. is designed for students who wish to gain considerable knowledge in psychology but do not necessarily plan a professional career in the discipline. It is appropriate for students preparing for careers in law, business, counseling, social work, or secondary school teaching; see Teaching and Learning (College of Education) in the Catalog for social science teaching certification requirements. The B.A. program requires fewer psychology courses than the B.S. program and can more easily be combined with a second major.

The 44-45 s.h. required for the B.A. in psychology includes a minimum of 29 s.h. in psychology courses, an approved statistics course (3 s.h., part of the psychology core), a cognate requirement (3-4 s.h.), and at least 9 s.h. of University of Iowa course work in a second concentration area (see "Second Concentration Area" below). Transfer students must complete at least 15 s.h. of the major at The University of Iowa. Students must complete the College of Liberal Arts and Sciences General Education Program and must satisfy all other requirements for graduation with a bachelor's degree.

Students interested in pursuing graduate study in psychology or other social sciences may wish to enrich their B.A. program by taking courses in mathematics, statistics, research methods, and the natural sciences.

The B.A. program must include the following courses or their equivalents. (Before registering each semester or summer session, students should consult Undergraduate Psychology at Iowa for changes in department requirements.)

#### **PSYCHOLOGY CORE**

Psychology—all of these:

031:001 Elementary Psychology	3 s.h.
031:002 Biological Psychology	4 s.h.
031:010 Research Methods in Psychology	4 s.h.

Statistics—one of these (3-4 s.h.):

22S:008 Statistics for Business	4 s.h.
22S:025/07P:025 Elementary Statistics and Inference	3 s.h.
22S:101 Biostatistics (recommended for B.S. students)	3 s.h.
22S:102/07P:143 Introduction to Statistical Methods (recommended for B.S. students)	3 s.h.

#### **LOWER-LEVEL PSYCHOLOGY ELECTIVES**

Students take three of these (9 s.h.) after completing 031:001 Elementary Psychology.

031:013 Introduction to Clinical Psychology	3 s.h.
031:014 Introduction to Developmental Science	3 s.h.
031:015 Introduction to Social Psychology	3 s.h.
031:016 Introduction to Cognitive Psychology	3 s.h.

#### **UPPER-LEVEL PSYCHOLOGY ELECTIVES**

Students take three upper-level psychology courses (total of 9 s.h.) after satisfactorily completing the psychology core courses and other specified prerequisites. Prerequisites are stated in course descriptions; see "Courses" later in this section.

Electives are chosen from 100-level psychology courses. However, the following courses may not be used to fulfill the electives requirement for the B.A.

031:121 Laboratory in Psychology	4 s.h.
031:185 Research Practicum in Psychology	arr.
031:188 Advanced Research Practicum	1-3 s.h.
031:189 External Practicum in Psychology	1-3 s.h.
031:190 Psychology Seminar	3 s.h.
031:191 Individual Readings and Projects	1-3 s.h.
031:192 Teaching/Advising Practicum in Psychology	1-3 s.h.
031:195 Honors Proseminar in Psychology	1 s.h.
031:199 Honors Thesis Research	1-3 s.h.

For a list of approved upper-level courses and their prerequisites, see Undergraduate Psychology at Iowa, available from the department and on its web site. Check Iowa Student Information System (ISIS) to learn which courses are offered in a particular semester.

### COGNATE REQUIREMENT

Students complete an upper-level statistics course or a computer science course. Students who fulfill the statistics requirement (above) with 22S:101 Biostatistics or 22S:102 Introduction to Statistical Methods must use a different course to fulfill the cognate requirement.

#### Statistics

06E:071 Statistics for Strategy Problems	3 s.h.
22S:101 Biostatistics	3 s.h.
22S:102 Introduction to Statistical Methods	3 s.h.
22S:120 Probability and Statistics	4 s.h.
22S:148 Intermediate Statistical Methods	4 s.h.

#### Computer Science

22C:005 Introduction to Computer Science	3 s.h.
22C:016 Computer Science I: Fundamentals	4 s.h.
22C:080 Programming for Informatics	4 s.h.

### SECOND CONCENTRATION AREA

Students complete 9 s.h. of course work in a single department other than psychology. Courses used to fulfill this requirement must be taken at The University of Iowa and may not be used to fulfill General Education Program requirements. A second major or a minor in any discipline other than psychology can be used to fulfill the requirement.

### Bachelor of Science

The Bachelor of Science in psychology requires a minimum of 120 s.h., including 53-54 s.h. of work for the major, with a minimum of 36 s.h. in psychology courses. The B.S. emphasizes research methodology, so it may be the degree of choice for students who plan to do graduate work in psychology and related research fields. However, a B.S. is not required for graduate study in psychology. Choice of a degree program should be dictated by the student's personal career goals.

The 53-54 s.h. required for the B.S. in psychology includes a minimum of 36 s.h. in psychology courses, an approved statistics course (3 s.h., part of the psychology core), an approved pair of natural science courses, one semester of calculus, and an approved advanced course in mathematics, statistics, or computer science. Transfer students must complete at least 15 s.h. of the major at The University of Iowa. Students must complete the College of Liberal Arts and Sciences General Education Program and must satisfy all other requirements for graduation with a bachelor's degree.

The B.S. program must include the following courses or their equivalents. (Before registering each semester or summer session, students should consult Undergraduate Psychology at Iowa for changes in department requirements.)

#### PSYCHOLOGY CORE

Psychology—all of these:

031:001 Elementary Psychology	3 s.h.
031:002 Biological Psychology	4 s.h.
031:010 Research Methods in Psychology	4 s.h.

Statistics—one of these (3-4 s.h.):

22S:008 Statistics for Business	4 s.h.
22S:025/07P:025 Elementary Statistics and Inference	3 s.h.

22S:101 Biostatistics (recommended)	3 s.h.
22S:102/07P:143 Introduction to Statistical Methods (recommended)	3 s.h.

#### **LOWER-LEVEL PSYCHOLOGY ELECTIVES**

Students take three of these (9 s.h.) after completing 031:001 Elementary Psychology.

031:013 Introduction to Clinical Psychology	3 s.h.
031:014 Introduction to Developmental Science	3 s.h.
031:015 Introduction to Social Psychology	3 s.h.
031:016 Introduction to Cognitive Psychology	3 s.h.

#### **UPPER-LEVEL PSYCHOLOGY ELECTIVES**

Students take three upper-level psychology courses (total of 9 s.h.) after satisfactorily completing the psychology core courses and other specified prerequisites. Prerequisites are stated in course descriptions; see "Courses" later in this section of the Catalog.

Electives are chosen from 100-level psychology courses. However, the following courses may not be used to fulfill the electives requirement for the B.S.

031:121 Laboratory in Psychology	4 s.h.
031:185 Research Practicum in Psychology	arr.
031:188 Advanced Research Practicum	1-3 s.h.
031:189 External Practicum in Psychology	1-3 s.h.
031:190 Psychology Seminar	3 s.h.
031:191 Individual Readings and Projects	1-3 s.h.
031:192 Teaching/Advising Practicum in Psychology	1-3 s.h.
031:195 Honors Proseminar in Psychology	1 s.h.
031:199 Honors Thesis Research	1-3 s.h.

For a list of approved upper-level courses and their prerequisites, see Undergraduate Psychology at Iowa, available from the department and on its web site. Check Iowa Student Information System (ISIS) to learn which courses are offered in a particular semester.

#### **PSYCHOLOGY TOPICS COURSES**

Students take both of these.

031:121 Laboratory in Psychology	4 s.h.
031:190 Psychology Seminar	3 s.h.

#### **NATURAL SCIENCE COURSES**

Students in the B.S. program are required to complete one of the following pairs of specified natural science courses: one semester each of chemistry and biology; two semesters of chemistry; two semesters of physics; or one semester each of chemistry and physics. All of these combinations can be used to fulfill the General Education Program natural sciences requirement. Students should consult with their advisors concerning specific courses that satisfy these requirements.

#### **CALCULUS**

Students working toward a B.S. must complete at least one semester of calculus; in most cases, students also must have completed at least one precalculus mathematics course.

One of these:

22M:016 Calculus for the Biological Sciences	4 s.h.
22M:017 Calculus and Matrix Algebra for Business	4 s.h.
22M:025 Calculus I	4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus	4 s.h.

**ADDITIONAL MATHEMATICS COURSE**

Students working toward a B.S. must complete at least one additional course in advanced mathematics, statistics, or computer science chosen from the following lists.

**Mathematics**

22M:026 Calculus II	4 s.h.
22M:027 Introduction to Linear Algebra	4 s.h.
22M:032 Engineering Mathematics II: Multivariable Calculus	4 s.h.

**Statistics**

06E:071 Statistics for Strategy Problems	3 s.h.
22S:120 Probability and Statistics	4 s.h.
22S:148 Intermediate Statistical Methods	4 s.h.

**Computer Science**

22C:005 Introduction to Computer Science	3 s.h.
22C:016 Computer Science I: Fundamentals	4 s.h.
22C:080 Programming for Informatics	4 s.h.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Bachelor of Arts**

In addition to courses in the major, the B.A. requires three courses in a second area.

**Before the third semester begins:** 031:001 Elementary Psychology and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 031:002 Biological Psychology, statistics, one or more lower level electives, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** four courses in the major (including 031:010 Research Methods in Psychology), one second-area course, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two additional courses in the major and an additional second-area course

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Bachelor of Science**

Note: The B.S. is open only to students who have earned 30 s.h. in course work and have a g.p.a. of at least 2.67. Students must complete a natural science sequence, either as part of the General Education Program or in addition to it. Students also must complete a semester of calculus and an advanced math, statistics, or computer course, which may require some preliminary work.

**Before the third semester begins:** 031:001 Elementary Psychology, 031:002 Biological Psychology, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** calculus, statistics, three additional courses in the major (including 031:010 Research Methods in Psychology), and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** two more courses in the major, one course for the psychology natural science

requirement, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** the advanced math/statistics/computer course and two more courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

## Honors

In order to pursue honors studies in the Department of Psychology, a student must be a member of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

The department has an active honors program that includes research seminars and individual research collaboration with faculty members. Interested majors should contact the department honors advisor.

## Minor

The minor in psychology requires a minimum of 15 s.h., including 12 s.h. in psychology courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass or satisfactory/fail. Before registering for a psychology course, students must satisfy the course's prerequisites.

A minor in psychology complements majors in a variety of disciplines. Department advisors can help students identify courses for the minor that are especially appropriate for their major.

## National Honor Society

The department sponsors a chapter of Psi Chi, the national honor society in psychology and affiliate of the American Psychological Association. Students who have a g.p.a. of at least 3.00 overall and 3.10 in psychology course work and who have completed 9 s.h. of psychology may request a membership application form. Consult the department's academic coordinator for more information.

## Graduate Programs

The department offers a Master of Arts, with and without thesis, and a Doctor of Philosophy in psychology. Graduate study in psychology is designed for students seeking the Ph.D.; students enrolled in the doctoral program may elect to receive a Master of Arts when they have completed the M.A. requirements.

### Master of Arts

The Master of Arts in psychology requires 30 s.h. of graduate credit with thesis, and 37 s.h. of graduate credit without thesis. The department ordinarily offers the M.A. only to students enrolled in the Ph.D. program.

Thesis students must earn 24 of the required 30 s.h. at The University of Iowa. Course work for the thesis program must include a statistics course, courses outside the primary specialization area, and at least an additional 8 s.h. earned in Department of Psychology courses and seminars. Thesis students also must complete an acceptable scholarly thesis and conduct a successful oral defense of the thesis.

Nonthesis students must earn 30 of the required 37 s.h. at The University of Iowa. Course work for the nonthesis program must include a statistics course, courses outside the primary specialization area, and at least an additional 15 s.h. earned in Department of Psychology courses and seminars. Nonthesis students also must perform successfully on an examination covering their area of specialization.

### Doctor of Philosophy

The Doctor of Philosophy in psychology requires a minimum of 72 s.h. of graduate credit. Students entering without previous graduate work usually require at least four years to complete the program; those entering with previous graduate training usually require three to five additional years in the department, depending on the nature of the earlier preparation.

The Ph.D. program places strong emphasis on preparation for research, teaching, and scholarly endeavor, whether in academic settings or in industrial, governmental, or medical institutions. The intent is to produce graduates who are deeply committed to the study of psychology, familiar with fundamental knowledge about psychological processes, well-trained in the methods and techniques for careful investigation of basic and applied problems, and determined to

make contributions to the discipline of psychology and to society.

Graduate training is organized in six broad areas: behavioral and cognitive neuroscience, clinical psychology, cognition and perception, developmental science, health psychology, and social psychology (see "Graduate Training Areas" later in this section). Each entering student is expected to identify one of these as his or her primary area and to follow a program that develops thorough understanding of the substantive material and methods of investigation central to that subdiscipline. While pursuing specialty training, all students must meet course requirements in statistics and research methods and in content areas other than their primary one.

The training area programs are sufficiently flexible to permit students to develop substantial competence in a second training area. Individually tailored programs are possible.

### **Curriculum**

The required 72 s.h. for the Ph.D. includes at least 33 s.h. in Department of Psychology courses. All students must satisfy, through one of several options, requirements in statistics and research methods. They also must take course work outside the primary training area to develop a background in the discipline of psychology as a whole.

During each of the first two semesters, graduate students ordinarily take three courses—for example, a statistics course, a course or two in the primary training area, and/or an outside area elective. Students also begin their research under the supervision of their advisor and with the guidance of their research advisory committee.

Near the end of the fall semester of the second year, students submit a report describing their research to date. At the beginning of the following semester, they present their research at the annual graduate research symposium.

During subsequent years, students continue selected course work in their training and interest areas and continue to develop their research programs. In addition, they develop a prospectus for the dissertation research and take the comprehensive examination, which covers material in the specialty area. The final year is devoted primarily to conducting the Ph.D. study and preparing the dissertation. In the Ph.D. final examination, students present an oral defense of their dissertation and are expected to relate the dissertation work to broader issues in the discipline of psychology.

### **Graduate Training Areas**

#### **Behavioral and Cognitive Neuroscience**

The program in behavioral and cognitive neuroscience focuses on the analysis of attention, motivation, and learning, primarily in nonhuman subjects, through the application of behavioral and biological principles. Special faculty strengths are in classical and operant conditioning, motivation and emotion, developmental psychobiology, neurobiology of learning, comparative psychology, cognitive neuroscience, neuropharmacology, neuroendocrinology, and neuroanatomy. Students in this program have the opportunity to learn state-of-the-art techniques in computer-controlled experimentation and electronic instrumentation as well as advanced analytic and laboratory methods in neurosurgery, histology, and biochemical assay.

Faculty members in the behavioral and cognitive neuroscience area interact extensively with colleagues from a number of basic science and clinical departments in the Carver College of Medicine, including anatomy, anesthesiology, pharmacology, internal medicine, pediatrics, and neurology. These collaborative activities provide excellent research and training opportunities for students interested in emerging interdisciplinary fields such as behavioral medicine.

#### **Clinical Psychology**

The clinical training program, fully approved by the American Psychological Association, strongly emphasizes a scientific or clinical science approach to the study of mental and physical health. It is designed for students who intend to pursue careers in clinical research and are interested primarily in developing scholarly understanding of clinical phenomena and acquiring research skills necessary to the systematic investigation of such phenomena. Because students must become familiar with clinical material and competent in the application of clinical skills in order to pursue clinical research, the department closely integrates practicum experience in the Seashore Clinic with course work and supervised research experience. Students with a primary interest in clinical practice should apply to another program.

Students in the clinical program may develop special competence in areas such as aggression, marital and family dysfunction, eating disorders, personality and personality disorders, psychophysiology, anxiety disorders, affective disorders, behavioral and cognitive therapies, child psychopathology, and clinical health psychology. Faculty members collaborate actively with colleagues from departments such as internal medicine, microbiology, neurology, obstetrics and gynecology, otolaryngology--head and neck surgery, pediatrics, psychiatry, and surgery, and from other units, such as the Center for Health Services Research and the Iowa City Veterans Affairs Medical Center.

Advanced students have opportunities to gain additional practicum experience through placement in clinical facilities maintained by local, state, federal, and University agencies. Students in the clinical program who wish to have the designation "clinical psychology" on their official transcript must satisfactorily complete a one-year internship at an

approved agency before receiving a Ph.D. The internship ordinarily comes after completion of all course work and most, if not all, of the dissertation project.

For information about the clinical psychology program's accreditation, contact the Office of Program Consultation and Accreditation, American Psychological Association.

### **Cognition and Perception**

The cognition and perception training area is guided by the philosophy that understanding a specific cognitive process requires an understanding of how it interacts with other cognitive processes (e.g., interactions between attention and memory). The area pursues empirical rigor and theoretical development, so its research is theory driven and data tested.

Research programs of the area's laboratories overlap with each other, and most content areas are studied by multiple laboratories and with multiple methodologies. Areas of strength include categorization, computational modeling, judgment and decision making, language and language learning, learning and memory, visual cognition, attention, and working memory.

Students in perception and cognition take basic courses and seminars in specialty areas, but they devote most of their time to research activities. Students work closely with a faculty mentor at first and then become progressively independent as they gain knowledge and skills. The program encourages students to work with more than one faculty member, both in the program and across the department and the University. Students often combine basic work on cognition with work in areas such as neuroscience, psychiatry, marketing, law, social psychology, and human factors engineering.

### **Developmental Science**

Students in the developmental program are taught a broad range of developmental theory, and they acquire expertise in multiple research paradigms used in developmental psychology, such as observational research, experimentation, and field methods. Students also have the opportunity to study and collaborate with faculty members who are not primarily developmental psychologists but whose work has implications for developmental theory. This opportunity provides a unique breadth of training.

Students take courses in many areas of developmental science as well as in other areas of psychology. Currently available to students are research opportunities in cognitive development in infancy and childhood, social and emotional development, and developmental psychobiology. The developmental research group, composed of faculty members and students interested in issues related to developmental research, meets regularly to discuss ongoing research. These meetings provide both students and faculty members the opportunity to present and discuss their own research as well as to gain exposure to other developmental work being conducted in the department.

### **Health Psychology**

The health psychology program is concerned with application of psychological theory, methods, and treatment to understanding and promotion of physical health and illness. The program's perspective is based on the biopsychosocial model, which posits that biological, psychological, and social processes are integrally and interactively involved in physical health and illness.

Graduate training in health psychology emphasizes the integration of knowledge about biological, psychological, and social factors. Students are involved in research whose content and methods reflect the biopsychosocial perspective. Training in health psychology is facilitated by the faculty's longstanding collaborations with medical practitioners and researchers at the UI Carver College of Medicine and University of Iowa Hospitals and Clinics. Availability of medical populations and state-of-the-art medical technologies afford a unique opportunity for doctoral students in health psychology.

Research areas of the health psychology program include stress and illness, psychoneuroimmunology, patient adherence, animal models of hypertension and heart failure, postpartum depression, women's health issues, and psycho-oncology.

### **Social Psychology**

The social psychology program offers a variety of perspectives on interpersonal and intrapersonal processes. Examples of research foci of faculty and students are social cognition, social comparison, close relationships, social and emotional development, attitudes and persuasion, decision making, health psychology, and individual differences.

Graduate training in the social psychology program is designed primarily to prepare students for careers in psychology research and teaching. In addition to their experiences and course work in the program and in the Department of Psychology, students can benefit from opportunities in related academic units at the University, such as the Departments of Sociology, Communication Studies, and Statistics and Actuarial Sciences and the Tippie College of Business. Such experience can broaden a student's training, research opportunities, and employment prospects.

## Admission

Since the graduate program in psychology is designed primarily for students seeking the Ph.D., all applicants are considered on that basis. Occasionally, a qualified applicant who is in good standing in another UI graduate program and is interested in advanced work in psychology only through the M.A. level may be admitted to pursue a joint graduate program. Students interested in such a program should contact the department chair before filing an application.

The application deadline is December 15. For all materials to be on file by that date, applicants should take the Graduate Record Examination (GRE) General Test in October, and no later than December. The subject test in psychology is not required. Applications may be submitted any time but are considered only once each year--between December 15 and February 1--for admission the following fall. Admission decisions are based on a composite consideration of prior academic and research performance; letters of reference; scores on the verbal, quantitative, and analytic writing sections of the GRE General Test; and the applicant's statement about background and purpose. Admission materials are reviewed initially by faculty members in the applicant's primary training area.

An undergraduate major in psychology--including a laboratory course in experimental psychology, a course in statistics, and additional work in the natural sciences and in mathematics--is desirable but not required. Students who have not had such a background but are strongly qualified on other grounds may be admitted. They are expected to remedy deficiencies through special course work or independent study before embarking on the regular graduate program.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Financial Support

All students admitted to the Ph.D. program in psychology are guaranteed five years of financial support, as long as they make satisfactory progress and remain in good academic standing. Financial support is provided through fellowships, teaching assistantships, research assistantships, and traineeships, depending on merit and availability. No separate application for financial aid is required.

## Faculty

Faculty members of the Department of Psychology are nationally and internationally renowned leaders in a variety of subdisciplines. Their research is funded by numerous federal and private research grants, their findings are documented in many publications, and their accomplishments have won many awards.

## Facilities

The department's facilities for graduate training and research are among the finest in the country. The Kenneth W. Spence Laboratories of Psychology and adjoining space in Seashore Hall include a variety of laboratories for human and animal studies. Facilities include animal housing areas; a histology laboratory; observation suites with remote audiovisual control and recording equipment; soundproof chambers; electrophysiological recording rooms; conditioning laboratories; the Seashore Clinic; and well-equipped electronic, mechanical, and woodworking shops. Computers are widely available. Office space for graduate students and faculty members is provided in Seashore Hall.

The research and teaching activities of the department benefit greatly from the facilities and staff of other University and local agencies, including University of Iowa Hospitals and Clinics, the Iowa City Veterans Affairs Medical Center, the University Counseling Service, the Center for Disabilities and Development, the Wendell Johnson Speech and Hearing Clinic, the Center for Health Services Research, and the School of Social Work.

## Psychology Courses

### Primarily for Undergraduates

Courses 031:002 Biological Psychology, 031:013 Introduction to Clinical Psychology, 031:014 Introduction to Developmental Science, 031:015 Introduction to Social Psychology, 031:016 Introduction to Cognitive Psychology, and 031:019 Industrial/Organizational Psychology are open to first-year students who have satisfactorily completed an introductory psychology course (031:001 Elementary Psychology or equivalent).

### 031:001 Elementary Psychology

Psychology as a behavioral science. GE: Social Sciences.

3 s.h.

**031:002 Biological Psychology**

4 s.h.

Biological mechanisms of behavior; comparative study of behavior, behavioral organization, animal intelligence, social behavior, communication; behavioral neuroscience, how brain systems control sensation, movement, homeostasis, emotion, learning. Prerequisites: 031:001.

**031:010 Research Methods in Psychology**

4 s.h.

Logic of experimental and nonexperimental methods, application of methods to analysis of behavioral phenomena; skills for critical evaluation of professional and public literature dealing with scientific study of behavior: philosophy of scientific psychology, principles of research design and control, psychological testing, applications in several research areas. Prerequisites: 031:001, and 22S:008 or 22S:025 or 22S:101 or 22S:102 or 07P:025 or 07P:143 or 034:010.

**031:013 Introduction to Clinical Psychology**

3 s.h.

Introduction to abnormal psychology; scientist-practitioner model, training, ethics, research methods in clinical psychology; current approaches to intellectual, personality, behavioral assessment; theories, research on treatment of psychological disorders. Prerequisites: 031:001. GE: Social Sciences.

**031:014 Introduction to Developmental Science**

3 s.h.

Current research in developmental science; prenatal development, brain development, motor and physical development, perceptual development, language development, cognitive development, aspects of socio-emotional development; emphasis on modern theoretical approaches. Prerequisites: 031:001. GE: Social Sciences.

**031:015 Introduction to Social Psychology**

3 s.h.

Research and theories on people's thoughts, feelings, and behaviors in social situations; attitudes, attributions, person perception, aggression, stereotypes and prejudice, attraction, relationships, social influence, group processes, altruism. Prerequisites: 031:001.

**031:016 Introduction to Cognitive Psychology**

3 s.h.

Individual human cognition; perception, attention, memory, language, learning, problem solving, decision making, thought considered from viewpoint of information processing. Prerequisites: 031:001. GE: Social Sciences.

**031:019 Industrial/Organizational Psychology**

3 s.h.

Applications of psychology to problems in world of work; emphasis on personnel selection, training, attitudes, motivation, measurement of job performance. Prerequisites: 031:001.

**031:029 First-Year Seminar**

1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

**031:041 Loss and Trauma**

3 s.h.

How people deal with loss--personal (e.g., aging) and interpersonal (e.g., death and divorce). Prerequisites: 031:001.

**031:050 Psychology of Aging**

3 s.h.

The later years of human life viewed from perspectives of developmental psychology, biology, sociology. Prerequisites: 031:001. Same as 153:150.

**031:063 Abnormal Psychology: Health Professions**

3 s.h.

Introduction to psychological disorders; description of psychopathology; general issues in etiology and treatment; for non-psychology students in allied health professions. Prerequisites: 031:001. Requirements: non-psychology major.

**For Undergraduate and Graduate Students**

Before enrolling in any upper-level undergraduate courses, students must complete all specified lower-level prerequisites or obtain consent of instructor.

**031:103 Social and Personality Development**

3 s.h.

Emotional, social, and personality development from infancy to adolescence; major theories and empirical research; child temperament, parent-child relationship, and social context as contributors to individual differences. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:014 or 031:015.

**031:105 Personality** 3 s.h.

Classic theoretical models and contemporary empirical research in personality, including influence of heredity and environment, consistency and stability of behavior. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:013 or 031:015.

**031:106 Attitude Change** 3 s.h.

Current theoretical approaches; laboratory and field methods of research; basic processes of change considered within broader framework of psychology. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:015.

**031:111 Social Cognition** 3 s.h.

Research and theory on cognitive structures and processes that underlie judgment, decision, belief, and behavior in social situations; attribution, heuristics, schemas, person perception, stereotypes, attitudes. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:015.

**031:112 Development of Mathematical Cognition** 3 s.h.

Current research on mathematical cognition, with focus on change over time; quantity and number, the mental number line, symbols, fractions, algebra, individual differences in math cognition, relationships between math and language, theories of mathematical knowledge, theories of conceptual change. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:014 or 031:016.

**031:114 Cognitive Development of Children** 3 s.h.

Developmental research, theory concerning children's concepts, thinking, problem solving, memory, communication. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:014.

**031:115 Theories of Developmental Psychology** 3 s.h.

Major theoretical approaches to the study of developmental change (e.g., social learning, information-processing, ethological, contextual); related topics such as perceptual development and attachment. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:014.

**031:116 Psychology of Gender** 3 s.h.

Origins of gender roles, gender socialization in childhood, gender differences across lifespan; research on gender differences in cognition, emotions, behavior, physical and mental disorders, communication. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:015.

**031:118 Infant Development** 3 s.h.

Physical, motor, perceptual, cognitive, and social development during first two years of life, with focus on early mechanisms of change; locomotion, perceptual abilities, precursors of cognition, early language acquisition, social interaction. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:014.

**031:119 Human Memory** 3 s.h.

Contemporary psychological theory and research on short-term and long-term memory, acquisition processes, related topics in cognition. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:016.

**031:121 Laboratory in Psychology** 4 s.h.

Laboratory study of an aspect of behavior; topics in a particular area (e.g., learning and memory, perception, social behavior, operant behavior, physiological processes). Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010.

**031:122 Language Development** 3 s.h.

Introduction to first language acquisition, with focus on infancy through five years; sound discrimination abilities, word learning, babbling and speech production, acquisition of grammar; perspectives from psychology, audiology, linguistics, speech pathology. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:014 or 031:016. Same as 164:140.

- 031:123 Psychology of Learning** 3 s.h.  
Psychological science of acquired behavior; interests in experimental study of Pavlovian conditioning, operant conditioning, cognition in humans and nonhuman animals, relevance to behavioral adaptation. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:002 or 031:016.
- 031:125 Comparative Psychology** 3 s.h.  
Behavioral processes in humans, animals; intelligence, memory, attention, language, consciousness; behaviorism, mentalism, evolution, neuropsychology. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:002.
- 031:126 Behavioral Neuroscience** 3 s.h.  
Basic concepts and techniques in neurosciences, their application to analysis of sensory processes, arousal mechanisms, motivation, learning. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:002.
- 031:128 Psychopharmacology** 3 s.h.  
How drugs act to influence behavior; general principles of drug action on the nervous system; licit and illicit drugs, use/abuse, historical perspective on drug use. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:002.
- 031:129 Neurobiology of Learning and Memory** 3 s.h.  
Major topics in the neurobiology of learning and memory; focus on anatomical, cellular, molecular bases of various learning and memory processes. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:002.
- 031:130 Psychology of Thinking** 3 s.h.  
Problem solving, reasoning, judgment and decision making, language and thought, intelligence, creativity. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:016.
- 031:131 Cognitive Science** 3 s.h.  
Introduction to cognitive science, an interdisciplinary enterprise that investigates psychological processes using perspectives from psychology, computer science, linguistics, philosophy, neuroscience. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:016.
- 031:133 Sensation and Perception** 3 s.h.  
Psychological and neurophysiological examination of humans' major sensory systems, especially vision. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:002 or 031:016.
- 031:134 Cognition and the Brain** 3 s.h.  
Analysis of brain systems and neuroanatomy that underlie cognitive tasks such as vision, hearing, emotion, attention, language, decision making, learning, and memory. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:002 or 031:016.
- 031:137 Language Processes** 3 s.h.  
Psychological processes involved in using languages, including speech perception and production, the meaning of words, understanding and producing sentences, and basics of discourse and pragmatics; developmental and neural bases of language processes. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010, grade of C- or higher in 031:016, and psychology major; or nonmajor and 103:100 or 003:015. Same as 103:137.
- 031:138 Introduction to Clinical Behavioral Neuroscience** 3 s.h.  
Biological bases of behavior applied to understanding the nature of physical and mental pathological processes. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:002 or 031:152.
- 031:140 Psychology of Interpersonal Relations** 3 s.h.  
Theories, empirical findings, speculation from social psychology and related disciplines regarding how people form, maintain, and alter close, interpersonal relationships. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:013 or 031:015.
- 031:152 Health Psychology** 3 s.h.

Psychological contributions to understanding etiology, prevention, treatment of physical illness; basic and clinical research that addresses reciprocal effects of behavior and physical health. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:002 or 031:013 or 031:015.

**031:163 Abnormal Psychology** 3 s.h.

Etiology, phenomenology, and treatment of child and adult DSM-IV psychological disorders (e.g., mood disorders, psychotic disorders, anxiety disorders, personality disorders). Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:013.

**031:166 Childhood Psychopathology** 3 s.h.

Major forms of childhood psychopathology; current theoretical approaches and methodological issues in diagnosis, conceptualization, treatment of developmental psychopathology. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:013.

**031:170 Behavior Modification** 3 s.h.

Basic approaches to modification of clinically distressing behavior; learning theory principles underlying techniques, translation into procedures, experimental evaluation of effectiveness. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:013.

**031:173 Substance Use and Misuse in America** 3 s.h.

Current data on epidemiology, assessment and diagnosis, treatment, prevention of substance misuse. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:013. Recommendations: 031:163. Same as 172:160.

**031:174 Mind and Behavior** 3 s.h.

Theories of what it is to act and know, of what intelligence might be in animals, humans, machines; perspectives from philosophy, psychology. Prerequisites: (for 031:174) 031:002. Requirements: (for 031:174) grade of C- or higher in 031:010, grade of C- or higher in 031:002 or 031:016, and junior or senior standing; (for 033:144) junior or senior standing. Same as 033:144.

**031:177 Field Methods: Animal Behavior Research** 3 s.h.

Observation of animal behavior, collection of behavioral data in the field; field trip and visits to varied habitats to view animals under natural conditions. Requirements: grade of C- or higher in 031:010 and grade of C- or higher in 031:002.

**031:185 Research Practicum in Psychology** arr.

Small-group participation in faculty research projects; literature review, study planning, data collection, analysis, interpretation, write-up.

**031:188 Advanced Research Practicum** 1-3 s.h.

Individual participation in faculty research projects; significant reading and writing. Requirements: two semesters of 031:185 or 143:100.

**031:189 External Practicum in Psychology** 1-3 s.h.

Student participation in career-related professional activities in community and University of Iowa agencies.

**031:190 Psychology Seminar** 3 s.h.

Readings from original sources, presentations, papers, student participation. Prerequisites: 031:002. Requirements: grade of C- or higher in 031:010, psychology B.S. enrollment, and senior standing.

**031:191 Individual Readings and Projects** 1-3 s.h.

Requirements: psychology major and undergraduate standing.

**031:192 Teaching/Advising Practicum in Psychology** 1-3 s.h.

Participation in faculty teaching (undergraduate teaching assistant) or the Psychology Peer Advisor Program.

**031:195 Honors Proseminar in Psychology** 1 s.h.

Research topics, psychology colloquium attendance and discussion, student presentations on honors project progress. Requirements: honors standing and psychology honors project in progress.

**031:199 Honors Thesis Research** 1-3 s.h.

Supervised original project; leads to written thesis, oral defense. Requirements: honors standing.

### **Primarily for Graduate Students**

- 031:201 Advanced Social-Personality Psychology** 3 s.h.  
Classic and contemporary theory, research, methodological issues in social-personality psychology.
- 031:202 Attitudes and Persuasion** 3 s.h.  
Classic and current theories and findings on persuasion, the formation and measurement of attitudes.
- 031:206 Advanced Social Cognition** 3 s.h.  
Research and theory on cognitive processes that underlie judgment, decision, belief, and behavior in social situations; attribution, heuristics, counterfactual thinking, schemas, person perception, stereotypes, attitudes.
- 031:208 Psychology of Close Relationships** 3 s.h.  
Theory, general writing, empirical analysis of variables involved in initiation, maintenance, termination of close relationships; emphasis on social psychological processes, concepts.
- 031:210 Proseminar in Developmental Science** 3 s.h.  
Introduction to developmental process and developmental science; topics organized around mechanisms of development, with cross-disciplinary focus.
- 031:214 Processes of Language Acquisition** 3 s.h.  
Theoretical and computational approaches to the study of first language acquisition from infancy to five years, including prelinguistic sound discrimination, babbling, semantic development, categorization abilities, syntactic and grammatical development.
- 031:216 Dynamic Systems and Development** 3 s.h.  
Dynamical systems theory, its application to basic problems in developmental psychology; development of motor control, cognition, language; comparisons with other theoretical approaches in developmental psychology.
- 031:217 Psychobiology of Prenatal Development** 3 s.h.  
Current research on behavior before and immediately after birth; embryology and development of fetus, preterm infant, neonate; motor development, sensation, learning, adaptation to intrauterine conditions.
- 031:218 Cognitive Development** 3 s.h.  
Theoretical and empirical analyses of children's cognitive development; spatial and numerical concepts, causal reasoning, categorization, metacognition, memory. Same as 164:240.
- 031:220 Proseminar in Cognition and Perception** 3 s.h.  
Broad overview of study of cognition, including cognitive psychology, computer science and artificial intelligence, linguistics, neuroscience, philosophy of mind. Repeatable.
- 031:223 Neural Networks in Psychology** 3 s.h.  
Major techniques in neural network or connectionist modeling; specific application to issues in psychology.
- 031:226 Visual Perception** 3 s.h.  
Theoretical and empirical analyses of low- and high-level visual functions, including edge detection, surface representation, object identification.
- 031:227 Attention** 3 s.h.  
Theory and research on attention, from viewpoints of cognitive psychology and cognitive neuroscience, including historical perspectives, recent approaches.
- 031:230 Behavioral Pharmacology** 3 s.h.  
Behavioral analysis of drug action; emphasis on physiological and biological mechanisms underlying behavioral processes in experimental animals, humans.

- 031:236 Fundamentals of Clinical Behavioral Neuroscience** 3 s.h.  
Physiological basis of behavior and cognition in normal and pathological states; body and brain functions that affect psychological processes, their role in mental and somatic health and disease.
- 031:240 Judgment and Decision Making** 3 s.h.  
Models, methods used in study of human judgments and decisions; applications in areas such as clinical diagnosis, social and educational evaluations, economic judgments, consumer decisions.
- 031:241 Fundamentals of Behavioral Neuroscience** 3 s.h.  
Concepts, methods, and findings in behavioral and cognitive neurosciences; emphasis on principles of neuroscience, sensation, motivation, emotion. Same as 132:241.
- 031:242 Fundamentals of Learning and Behavior** 3 s.h.  
Concepts, methods, and findings in behavioral and cognitive neurosciences; emphasis on principles of comparative psychology, motor control, learning. Same as 132:242.
- 031:244 Behavioral Neuroscience** 3 s.h.  
Basic principles of neurochemistry, neuropharmacology, developmental neuroscience, behavioral neuroscience.
- 031:245 Quantitative Methods in Psychology** 3 s.h.  
Overview of statistical methods based on the general linear model, including ANOVA, ANCOVA, and multiple regression; how to conduct these analyses using SPSS. Requirements: first-year graduate standing in psychology.
- 031:250 Introduction to Health and Behavioral Science** 3 s.h.  
Evolution of health psychology; survey of major physiological systems in which pathology is affected by behavioral processes; review of theoretical approaches, experimental paradigms from behavioral science as they may apply to assessment of health problems; prevention, intervention, psychological adaptation to physical disease.
- 031:252 Clinical Behavioral Medicine** 3 s.h.  
Biopsychosocial framework applied to study, treatment of chronic and acute physical conditions; clinical concepts, procedures.
- 031:258 Personality and Individual Differences** 3 s.h.  
Major theoretical, empirical issues in contemporary personality research, including stability and consistency of behavior, influence of heredity and environment in personality development, nature and organization of traits, validity of trait inferences.
- 031:260 Descriptive Psychopathology** 3 s.h.  
Psychiatric syndromes, including description, etiology, experimental and clinical research; development, function of classification systems.
- 031:261 Experimental Psychopathology** 3 s.h.  
Theories of psychobiological processes underlying etiology of psychopathology; emphasis on schizophrenia, affective disorders, anxiety, psychopathy, alcoholism/drug abuse.
- 031:263 Psychological Appraisal I** 3 s.h.  
Assessment theory and basic psychometric principles in test construction, evaluation, application; ethical, social, psychological, psychometric issues and controversies in assessment.
- 031:264 Psychological Appraisal II** 3 s.h.  
Introduction to assessment with children and adults, including assessment of cognitive abilities and achievement testing, neuropsychological assessment, and psychodiagnostic/personality assessment. Prerequisites: 031:263.
- 031:265 Neuroscience Seminar** 0-1 s.h.  
Research presentations. Offered fall and spring semesters. Same as 002:265, 060:265, 072:265, 132:265.
- 031:266 Psychological Therapies** 3 s.h.  
Historical development and current status of empirically based therapies for psychological disorders, including anxiety, depression, schizophrenia, childhood disorders; emphasis on critical evaluation of therapy techniques.

**031:270 Clinical Research Methods**

3 s.h.

Scientific basis of rigorous psychological research; conceptual and methodological processes that underlie sound research; development of capacity for critical evaluation of the research process.

**031:276 Advanced Developmental Psychopathology**

3 s.h.

Psychiatric syndromes manifested in childhood and adolescence; theoretical approaches, methodology from developmental and clinical psychology as they apply to study of childhood psychopathology.

**031:278 Principles of Neuropsychology**

3 s.h.

Principles of human neuropsychology, including foundations (history, methods, approaches), major functional systems (vision, memory, language, spatial processing), executive functions (emotional processing and personality), and applications (experimental, clinical). Recommendations: prior course work in psychological assessment, psychopathology, and neuroanatomy.

**031:280 Current Topics in Psychology**

3 s.h.

Repeatable.

**031:291 Problems in Psychology**

arr.

Individual study.

**031:295 M.A. Thesis Research**

arr.

**031:296 Ph.D. Dissertation Research**

arr.

**031:297 Research Projects**

arr.

**031:302 Seminar: Personality and Social Psychology**

1 s.h.

Professional issues, current topics relevant to personality, social psychologists. Repeatable.

**031:303 Advanced Topics in Social Psychology**

arr.

Recent theory, research.

**031:315 Seminar: Social Development**

0-2 s.h.

Theoretical, methodological, and empirical issues in early social and personality development.

**031:318 Seminar: Cognitive Development**

0-3 s.h.

Theoretical, methodological issues focused on cognitive and perceptual development. Repeatable.

**031:330 Seminar: Cognitive Psychology**

2 s.h.

Repeatable.

**031:335 Seminar: Cognitive Neuroscience**

0-2 s.h.

Neurological and behavioral investigations of attention, perception, learning, memory, decision making, planning; contemporary models, theories.

**031:338 Seminar: Advanced Topics in Behavioral and Cognitive Neuroscience**

3 s.h.

Prerequisites: 031:241.

**031:360 Seminar: Orientation to Clinical Research**

0-1 s.h.

Issues in clinical research, including use of databases, advisor/advisee relationships, preparation of IRB proposals, paper presentation and publication, common early career problems, funding resources.

**031:365 Seminar: Neuropsychology and Neuroscience**

arr.

Clinical neuropsychology and cognitive neuroscience: cutting-edge research from scientific journals, case presentations in clinical neuropsychology, and current research. Same as 064:365, 132:365.

**031:380 Ethics and Professional Concerns**

arr.

Major ethical and legal issues relevant to clinical psychologists' varied roles; understanding of legal and ethical issues encountered by psychologists in varied settings, development of personal working model for resolving ethical and professional concerns.

**031:461 Introductory Practicum**

arr.

Orientation to Department of Psychology clinic, including instruction in interviewing, observation of clinic procedures, attendance at clinic rounds under supervision of clinical psychology faculty members.

**031:462 Assessment Practicum**

arr.

Supervised practice in psychological assessment techniques.

**031:463 Therapy Practicum**

arr.

Supervised practice and clinical experience in application and evaluation of psychological therapies.

**031:464 External Practicum**

arr.

Supervised practice and clinical experience in field setting; psychological assessment techniques and/or application, evaluation of psychological therapies.

# Religious Studies

**Chair:** Raymond A. Mentzer

**Professors:** Diana Fritz Cates, Jay A. Holstein, David E. Klemm, Raymond A. Mentzer, Frederick M. Smith (Religious Studies/Asian and Slavic Languages and Literatures), Richard B. Turner (Religious Studies/African American Studies)

**Professors emeriti:** Robert D. Baird, T. Dwight Bozeman, George W. Forell, Helen T. Goldstein, J. Kenneth Kuntz, James F. McCue, George W.E. Nickelsburg, W. Pachow, George W. Paterson, Robert F. Weir

**Associate professors:** Michelene Pesantubbee (Religious Studies/American Indian and Native Studies), Morten Schlütter, Ahmed Souaiaia

**Assistant professor:** Melissa Anne-Marie Curley

**Lecturer:** Jordan A. Smith

**Undergraduate degree:** B.A. in Religious Studies

**Undergraduate nondegree program:** Minor in Religious Studies

**Graduate degrees:** M.A., Ph.D. in Religious Studies

**Web site:** <http://www.uiowa.edu/~religion>

The Department of Religious Studies recognizes that individuals and groups are inspired and guided in almost every possible way by ideas and impulses that they call religious and that demand to be taken seriously as a distinct aspect of the human experience. It holds that the dimension of experience that people consider to be connected to something absolute can be studied from varied perspectives, including that of critical interpreter. Its faculty members, as critical interpreters, offer courses across the range of academic religious studies. They help students prepare to function as 21st-century global citizens by helping them gain an understanding of contemporary religious traditions and an appreciation of how they shape people's actions and values.

The department has been a pioneer in the discipline of religious studies since the early 20th century. It is dedicated to investigating the world's major religious traditions in both their historical development and their contemporary geopolitical significance. It offers courses in the fundamental texts and thought of Western and Asian religious cultures, in how the religious and the secular have intersected over time, and in modern and contemporary movements that shape today's world. Just as religious traditions are organized and function in different ways, the department's faculty use different approaches to interpret their areas of research. Students who join the department become participants in a quest to understand profound and penetrating answers to questions about the human condition.

Each year thousands of University students enroll in courses in religious studies. Many take courses to complete the College of Liberal Arts and Sciences General Education Program. Some students choose religious studies as their major. Others choose it as a second major or as a minor to complement studies in another field. Religious studies majors acquire core skills they will need to flourish in today's world: logical thinking, writing, communicating, and working with others, as well as open-mindedness to new ideas.

## Undergraduate Programs

The department offers a Bachelor of Arts and a minor in religious studies.

### Bachelor of Arts

The Bachelor of Arts in religious studies requires a minimum of 120 s.h., including 30 s.h. in work for the major (15 s.h. of foundation studies, 12 s.h. of continuing studies, and the senior seminar). Students must complete the College of Liberal Arts and Sciences General Education Program. They may count a maximum of three religious studies courses toward General Education Program requirements. Transfer students may count a maximum of 15 s.h. of transfer credit toward the major. Transfer credit is evaluated individually.

Requirements for the major in religious studies are as follows.

#### FOUNDATION STUDIES

##### Western Religious Traditions

Two of these:

032:001 Judaism, Christianity, and Islam	3 s.h.
032:011 Introduction to the Hebrew Bible/Old Testament	3 s.h.
032:012 Introduction to the New Testament	3 s.h.
032:025/016:035 Medieval Religion and Culture	3 s.h.
032:026/016:036 Modern Religion and Culture	3 s.h.
032:030 Introduction to Islam	3 s.h.
032:034/129:050 Introduction to African American Religions	3 s.h.

**Asian Religious Traditions**

Two of these:

032:004/039:064 Living Religions of the East	3 s.h.
032:006/039:006 Introduction to Buddhism	3 s.h.
032:010/039:007 Chinese Religions	3 s.h.
032:014 Introduction to Indian Religions	3 s.h.
032:017/39J:017 Japanese Religions	3 s.h.

**Theoretical and Comparative Studies in Religion**

One of these:

032:002 Religion and Society	3 s.h.
032:003 Quest for Human Destiny	3 s.h.
032:016 Religion and Liberation	3 s.h.
032:020 War and Peace in Western Religious Thought	3 s.h.
032:042 Religion, Ethics, and Politics	3 s.h.

**CONTINUING STUDIES**

Students must complete 12 s.h. of course work in continuing studies for the major. This work must be chosen from courses in one of three concentration areas: Western religious traditions; Asian religious traditions; or religion, culture, and society. Courses in each area are listed below.

**Western Religious Traditions**

032:051 Religious Thinkers of the West	3 s.h.
032:054 Introduction to Catholicism	3 s.h.
032:056 Christianity and the Enduring Human Experience	3 s.h.
032:058/16E:058 Liturgy and Devotion in Christian Tradition	3 s.h.
032:061/20E:071 Middle East and Mediterranean: Alexander to Suleiman	3 s.h.
032:067 Theological Questions	3 s.h.
032:069 Kabbalah in the Marketplace: Jewish Mysticism and the American Religious Environment	3 s.h.
032:070 Judaism in the Modern World	3 s.h.
032:085 Early Modern Catholicism	3 s.h.
032:090 Women and the Bible	3 s.h.
032:092 Messianic and Apocalyptic Prophecy in the Bible	3 s.h.
032:094 Jesus and His Interpreters	3 s.h.
032:095 The Apostle Paul	3 s.h.
032:105 Biblical Israel: Its History and Environment	3 s.h.
032:107 In Search of the Good Life	3 s.h.
032:109 Suffering, Death, and the Afterlife in Christianity and Judaism	3 s.h.
032:120 Jewish Religious Thought	3 s.h.
032:121 The Bible and the Sacrifice of Animals	3 s.h.
032:132 Medieval and Reformation Religious Thought	3 s.h.
032:136 Religious Thought in Enlightenment	3 s.h.
032:137 Modern Religious Thought: 19th Century	3 s.h.
032:138 Modern Religious Thought: 20th Century	3 s.h.
032:154 Religious Conflict/Early-Modern Period	3 s.h.
032:157 Religion and Politics: The Islamic World	3 s.h.
032:192 Traditions of Religious Reform	3 s.h.

**Asian Religious Traditions**

032:008/039:018 Asian Humanities: India	3 s.h.
032:009/039:019 Asian Humanities: China	3 s.h.
032:075/039:075 Asian Religious Classics	3 s.h.
032:081 Hindu Religion and Art	3 s.h.
032:116 Japanese Religion and Thought	3 s.h.
032:156 The Karma of Words	3 s.h.
032:163/039:162 Turning East	3 s.h.
032:170 Topics in Asian Religions	3 s.h.
032:171/039:163 Indian Religious Texts	3 s.h.
032:172/039:172 Comparative Ritual	3 s.h.
032:175/026:145 Buddhist Philosophy	3 s.h.
032:177/039:136 Indian Literature	3 s.h.
032:188/039:170 Zen Buddhism	3 s.h.

**Religion, Culture, and Society**

032:052 Women in Islam and the Middle East	3 s.h.
032:060/149:060 Introduction to Native American Religions	3 s.h.
032:063 African American Islam	3 s.h.
032:066 Introduction to Religion and the Arts	3 s.h.
032:071/154:071 Sexual Ethics	3 s.h.
032:073 Nature in Religious Thought and Ethics	3 s.h.
032:076 American Indian Environmentalism	3 s.h.
032:078/149:082 American Indian Women: Myth, Ritual, and Sacred Power	3 s.h.
032:103 Biblical Archaeology	1, 3 s.h.
032:104/01H:110 Egyptian Art	3 s.h.
032:111 Religion and Women	3 s.h.
032:112 The Bible in Film: Hollywood and Moses	3 s.h.
032:125 Conceptions of the Sacred	3 s.h.
032:126/129:123 Twentieth-Century African American Religion: Civil Rights to Hip-Hop	3 s.h.
032:127/06J:147 Nonprofit Organizational Effectiveness I	3 s.h.
032:128/06J:148 Nonprofit Organizational Effectiveness II	3 s.h.
032:130/033:139/113:139 Religion and Environmental Ethics	3 s.h.
032:139 Religion and Violence in America	3 s.h.
032:140 Religion and Literature	3 s.h.
032:141/16A:122 Varieties of American Religion	3 s.h.
032:146/026:134 Philosophy of Religion	3 s.h.
032:147 Quest II: Sex, Love, and Death	3 s.h.
032:149/033:152 Values in the Contemporary World	3 s.h.
032:150 The Bible and the Holocaust	3 s.h.
032:151 Religion and Law	3 s.h.
032:153 Religion and the Arts	3 s.h.
032:155 Human Rights and Islam	3 s.h.
032:158/131:159/149:158 Native American Women and Religious Change	3 s.h.
032:159/091:223 Comparative Islamic Law	3 s.h.
032:160 Religious Identity in the Modern Secular State	3 s.h.
032:162 Genes and the Human Condition	3 s.h.
032:164/20E:115 Greek Religion and Society	3 s.h.
032:165/113:142 Anthropology of Religion	2-3 s.h.
032:167 Islamic Ethics and Political Thought	3 s.h.
032:169 Quest III: Heroes, Lovers, and Knives	3 s.h.
032:178/039:188 East Meets West: The Western Reception of Eastern Religion	3 s.h.
032:179/035:179 Islamic Cultural Presence in Spain	3 s.h.

**SENIOR SEMINAR**

All students must complete the senior seminar.

032:196 Senior Majors Seminar

3 s.h.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** one or two courses in the major and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** three to six courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** five to seven courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**Honors**

Students who maintain a cumulative University of Iowa g.p.a. of at least 3.33 are eligible for membership in the University of Iowa Honors Program (contact the University of Iowa Honors Program for more information). Honors majors must complete a total of 33 s.h. to fulfill the requirements for the religious studies major. Students must take 032:198 Honors Essay under the supervision of a faculty advisor. Copies of the completed and approved essay are submitted to the Department of Religious Studies and to the University of Iowa Honors Program. Honors students may apply 3 s.h. of 032:195 Individual Study: Undergraduates or 032:197 Honors Tutorial toward their 12 s.h. requirement in the concentration area.

**Minor**

The minor in religious studies requires a minimum of 15 s.h. in religious studies courses, including 12 s.h. in courses taken at The University of Iowa that satisfy the continuing studies requirement for the major in religious studies (see "Continuing Studies" above). Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. With the recommendation of the department's undergraduate committee and approval of the faculty, students may count a maximum of 3 s.h. of transfer credit toward the minor.

**Graduate Programs**

The department offers a Master of Arts and a Doctor of Philosophy in religious studies. The graduate programs place religion in a broad intellectual and cultural context, provide a substantial methodological dimension, and help students develop necessary research skills.

The M.A. and the Ph.D. are offered in the following four basic areas of study.

Modern religious thought: theology, philosophy, ethics, and culture

Historical religious traditions

Religion and culture in Asia

Islamic and Judaic interdisciplinary studies

A graduate degree in religious studies ordinarily leads to an academic career teaching at the college or university level, or to a career in a religious, nonprofit, or governmental organization.

**Master of Arts**

The Master of Arts in religious studies requires a minimum of 30 s.h. of graduate credit and is offered with or without thesis. The program is designed for students who wish to advance their understanding of a particular area of religious studies.

Students must complete 24 of the required 30 s.h. at The University of Iowa and must maintain a cumulative g.p.a. of

at least 3.00. Requirements for languages and other research tools vary according to the focus of study. M.A. students are supervised by a three-person faculty committee.

All M.A. students complete the following four courses.

032:202 Asian Religious Traditions	3 s.h.
032:203 Western Religious Traditions	3 s.h.
032:205 Methods and Theories in the Study of Religion	3 s.h.
One graduate seminar	

The following course is optional for M.A. students.

032:201 Teaching Religious Studies	3 s.h.
------------------------------------	--------

Students select remaining course work depending on their interest area and in consultation with their faculty advisor.

In the M.A. thesis, students demonstrate and refine their research and writing skills. They may count a maximum of 6 s.h. of thesis credit toward the degree. Students who do not write a thesis must pass an M.A. examination that tests their competence in completed course work.

## Doctor of Philosophy

The Doctor of Philosophy in religious studies requires a minimum of 72 s.h. of graduate credit. Students may transfer up to 24 s.h. of credit from another accredited graduate school.

The Ph.D. program prepares students to become specialists in the study and teaching of religion. Students are trained in the research skills and methods they will need to become productive scholars in their chosen fields of study. They also are trained to teach religious studies across a broad range of traditions.

Course requirements for the Ph.D. vary according to concentration area. However, all students must complete the following four required courses.

032:201 Teaching Religious Studies	3 s.h.
032:202 Asian Religious Traditions	3 s.h.
032:203 Western Religious Traditions	3 s.h.
032:205 Methods and Theories in the Study of Religion	3 s.h.

All Ph.D. students also must complete four graduate seminars.

Formal admission to Ph.D. candidacy occurs during the student's fourth semester of residency, providing the following conditions are met:

completion of three of the four courses required for all Ph.D. students, with the fourth in progress (see the course list above);

evidence of the ability to write scholarly papers;

a cumulative University of Iowa g.p.a. of at least 3.40;

satisfactory progress toward fulfillment of the language requirements of the student's program; and

submission of a plan of study.

Students must pass a comprehensive examination based on a bibliography that covers their concentration area. They also must write a dissertation based on original research and defend it in an oral examination. They may count a maximum of 12 s.h. of dissertation credit toward the degree.

Students working toward a Ph.D. may receive an M.A. upon completing at least 30 s.h. of course work and successfully passing the comprehensive examination.

For more detailed information on graduate programs in religious studies, contact the Department of Religious Studies or the University's Office of Admissions.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants to the M.A. program ordinarily must have a combined verbal and quantitative score of at least 1050 on the

Graduate Record Examination (GRE) General Test and a g.p.a. of at least 3.00. Applicants to the Ph.D. program ordinarily must have a combined verbal and quantitative score of at least 1150 on the GRE General Test and a g.p.a. of at least 3.40.

Application materials must include an application form; a transcript of all undergraduate and graduate work (one copy must be sent to the University's Office of Admissions and a second copy must be sent to the Department of Religious Studies); an application or waiver of consideration form for graduate assistantships (see the web page for admission to graduate study in religious studies); three letters of recommendation; and a writing sample that demonstrates the applicant's ability to engage in critical thinking. Applicants also must submit a brief personal essay that explains their objectives for graduate study and states which area of graduate study in religion will suit their objectives best (see "Graduate Programs" above).

All application materials must be received by February 1 for fall admission.

## Financial Support

Financial aid awards are made annually on a competitive basis. Preference is given to Ph.D. applicants.

The Department of Religious Studies offers financial support for graduate students in the form of teaching assistantships. The department may nominate eligible applicants for the Presidential Graduate Fellowship or for the Dean's Graduate Fellowship, which promotes recruitment of students from underrepresented groups.

The Gilmore Scholarship, for doctoral students interested in the relationships among religion, the visual arts, and humanistic values, pays up to full tuition for one year. It is awarded every few years.

## Language Study at the University

The University offers a variety of modern European languages (see French and Italian, German, and Spanish and Portuguese in the Catalog) as well as Greek and Latin (see Classics in the Catalog); Arabic and Swahili (see French and Italian in the Catalog); and Chinese, Croatian, Czech, Hindi, Japanese, Korean, Russian, Sanskrit, and Uzbek (see Asian and Slavic Languages and Literatures in the Catalog).

## Religious Studies Courses

### 032:001 Judaism, Christianity, and Islam

3 s.h.

Introduction to Judaism, Christianity, and Islam; focus on the scriptural foundation and historical development of these related traditions; texts and other forms of religious expression, especially in art, music, literature, law, and philosophy; readings from the Hebrew Bible, New Testament, and the Qur'an; other materials from selected Jewish, Christian, and Muslim thinkers. GE: Historical Perspectives.

### 032:002 Religion and Society

3 s.h.

Meaning of religious questions and answers in traditional and modern social contexts in the West. GE: Humanities.

### 032:003 Quest for Human Destiny

3 s.h.

Quests for destiny in terms of perceived options/goals and ability to recognize, pursue, achieve them. GE: Humanities.

### 032:004 Living Religions of the East

3 s.h.

Religious beliefs, practices in India, China, Japan. GE: Foreign Civilization & Culture, Historical Perspectives. Same as 039:064.

### 032:006 Introduction to Buddhism

3 s.h.

Basic tenets, religious paradigms, historical phases important in the development of Buddhism; from the Buddha's life to evolution of Mahāyāna Buddhism; readings from India, Tibet, China, Japan, Korea, Southeast Asia. GE: Foreign Civilization & Culture, Humanities. Same as 039:006.

### 032:008 Asian Humanities: India

3 s.h.

Introduction to four thousand years of South Asian civilization, through popular stories. GE: Foreign Civilization & Culture, Humanities. Same as 039:018.

### 032:009 Asian Humanities: China

3 s.h.

Literary and philosophical texts of China in English translation. GE: Foreign Civilization & Culture, Humanities. Same as 039:019.

**032:010 Chinese Religions**

3 s.h.

Survey of Chinese religions; Chinese traditional religious beliefs and practices among the elite and the general population; recent developments in mainland China, Taiwan, and the West; religious ideas of Confucianism, Daoism, aspects of Buddhism, ancestor worship, cults of deities, practices such as spirit possession, faith healing, ghost marriages. Same as 039:007.

**032:011 Introduction to the Hebrew Bible/Old Testament**

3 s.h.

History, religion, and thought of ancient Jews as recorded in their scripture. GE: Humanities.

**032:012 Introduction to the New Testament**

3 s.h.

History, religion, and thought of early Christians as recorded in the New Testament. GE: Humanities.

**032:014 Introduction to Indian Religions**

3 s.h.

Religions with origins in the South Asian geographic region (e.g., Vedas in mid-second millennium BCE, Jainism and Buddhism from sixth to fourth centuries BCE, Sikhism in 15th century, Indian Christianity, Islam); focus on Hinduism and Buddhism; rise of varied literary forms, ritual, rise of devotional religion, Tantra, how religious practices affect indigenous medical traditions, how these traditions developed in different South Asian regions; broad changes in South Asian religion in 20th and early 21st centuries, current politicization of religion.

**032:016 Religion and Liberation**

3 s.h.

Reflections on the life stories of Black Elk, Maya Angelou, and the Dalai Lama. GE: Cultural Diversity, Humanities.

**032:017 Japanese Religions**

3 s.h.

Religions of Japan from ancient times to the present day; elite and popular Japanese interpretations of Chinese Buddhist and Daoist traditions; the parallel development of an indigenous kami tradition; contemporary new religious movements; focus on the codification of a variety of religious (and sometimes quasi-religious) paths, including the way of tea, the way of the brush, and the way of the samurai. Same as 39J:017.

**032:020 War and Peace in Western Religious Thought**

3 s.h.

History, major themes, and contemporary applications of western religious traditions regarding proper use of armed force; Christian just war and pacifist traditions, Islamic traditions of jihad, debates of issues such as humanitarian intervention, terrorism, nuclear weapons.

**032:025 Medieval Religion and Culture**

3 s.h.

Religion in Europe from classical antiquity to dawn of the Reformation; the religious element in traditions such as art, architecture, literature. GE: Historical Perspectives. Same as 016:035.

**032:026 Modern Religion and Culture**

3 s.h.

European and American religious life from Renaissance to 21st century; focus on specific themes, such as secularism, regionalism, pluralism. GE: Historical Perspectives. Same as 016:036.

**032:029 First-Year Seminar**

1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**032:030 Introduction to Islam**

3 s.h.

Major areas of Islamic religious tradition: Qur'an, traditions of the Prophet, development and character of Islamic law, theology. GE: Foreign Civilization & Culture, Historical Perspectives.

**032:034 Introduction to African American Religions**

3 s.h.

GE: Cultural Diversity, Humanities. Same as 129:050.

**032:042 Religion, Ethics, and Politics**

3 s.h.

**032:051 Religious Thinkers of the West**

3 s.h.

Augustine, Bonaventure, Fichte, Kierkegaard, Heidegger. GE: Humanities.

- 032:052 Women in Islam and the Middle East** 3 s.h.  
Women in the Islamic community and in non-Muslim Middle Eastern cultures; early rise of Islam to modern times; references to women in the Qur'an and Sunnah, stories from Islamic history; women and gender issues. GE: Foreign Civilization & Culture, Humanities. Same as 131:060.
- 032:054 Introduction to Catholicism** 3 s.h.  
Catholic doctrine, liturgy, moral teaching.
- 032:056 Christianity and the Enduring Human Experience** 3 s.h.  
Topics in Christian history and thought; emphasis on the relationship between communities of belief and Christian traditions.
- 032:058 Liturgy and Devotion in Christian Tradition** 3 s.h.  
Liturgical traditions and devotional practices in western Christianity; Medieval Christian tradition, changes in liturgy and devotion that occurred with reformations of the 16th and 17th centuries; overview of modern developments. Same as 16E:058.
- 032:060 Introduction to Native American Religions** 3 s.h.  
GE: Cultural Diversity. Same as 149:060.
- 032:061 Middle East and Mediterranean: Alexander to Suleiman** 3 s.h.  
GE: Foreign Civilization & Culture. Same as 016:045, 20E:071.
- 032:063 African American Islam** 3 s.h.  
Same as 129:063.
- 032:066 Introduction to Religion and the Arts** 3 s.h.  
Religion in different art genres, including visual, performing, and literary.
- 032:067 Theological Questions** 3 s.h.  
Treatment of basic religious questions, such as the meaning of "God," nature of religious symbols, phenomena of skepticism and atheism.
- 032:069 Kabbalah in the Marketplace: Jewish Mysticism and the American Religious Environment** 3 s.h.  
Main ideas of Kabbalah and Jewish mysticism from a scholarly perspective; how and in what form these ideas were incorporated into American pop culture and American religious culture.
- 032:070 Judaism in the Modern World** 3 s.h.  
Judaism in the modern period; Jewish religion, influence of major historical events (enlightenment, emancipation, Holocaust, the establishment of the State of Israel); questions of Jewish identity, theology, thought.
- 032:071 Sexual Ethics** 3 s.h.  
Introduction to religion and ethics; examination of a range of secular, Jewish, and Christian perspectives on sexuality and sexual activity; perspectives of homosexuality and abortion that remain controversial in many cultures. Same as 154:071.
- 032:073 Nature in Religious Thought and Ethics** 3 s.h.  
Diverse religious perspectives on the natural environment; corresponding ethical implications for individual and collective human behavior.
- 032:075 Asian Religious Classics** 3 s.h.  
Works of South and East Asia; may include *Bhagavad Gita*, *Life of Milarepa*, *Mencius*, *Great Learning*, *Chuang-tzu*, *Lotus Sutra*, *Platform Sutra*, selected Korean and Japanese works. Same as 039:075.
- 032:076 American Indian Environmentalism** 3 s.h.  
Same as 149:076.
- 032:078 American Indian Women: Myth, Ritual, and Sacred Power** 3 s.h.

Participation of women and girls in native religious traditions; obstacles to knowing and understanding native women's religious roles and experiences. Same as 149:082.

**032:081 Hindu Religion and Art** 3 s.h.

Hinduism's mystery dispelled through examination of its basic concepts, using art works, sacred texts, myths, devotional poetry; what divine power is, what sculpted and painted images of gods and goddesses mean, how Hindu devotees relate to these awesome personages today.

**032:085 Early Modern Catholicism** 3 s.h.

Same as 16E:085.

**032:090 Women and the Bible** 3 s.h.

Construction of women's characters and roles in the Jewish and Christian canonical texts; modern feminist biblical interpretations.

**032:092 Messianic and Apocalyptic Prophecy in the Bible** 3 s.h.

Literary, historical, and theological analysis of biblical prophecies and their impact.

**032:094 Jesus and His Interpreters** 3 s.h.

How Jesus was depicted in the writings of the early church; reasons for the different portrayals.

**032:095 The Apostle Paul** 3 s.h.

Paul, as seen through his letters; social, historical, and religious environments in which the apostle lived and wrote.

**032:100 Biblical Hebrew I** 4 s.h.

**032:101 Biblical Hebrew II** 4 s.h.

**032:102 Biblical Hebrew III** 3 s.h.

Continuation of 032:101. Prerequisites: 032:100 and 032:101.

**032:103 Biblical Archaeology** 1-3 s.h.

Contributions of Syro-Palestinian archaeological research to understanding historical, cultural backgrounds of biblical period.

**032:104 Egyptian Art** 3 s.h.

Sculpture, painting, architecture, and luxury arts from Pyramid Age to Death of Cleopatra. Prerequisites: 01H:005. Same as 01H:110.

**032:105 Biblical Israel: Its History and Environment** 3 s.h.

Historical, intellectual background; focus on patterns of thought, religion in Near East, relation to Israelite religion.

**032:107 In Search of the Good Life** 3 s.h.

Works from Greco-Roman, Jewish, and Christian cultures to analyze various beliefs on how humans can live the good life and examine how these solutions are intimately connected to the specific conceptions of the divine world. Same as 20E:107.

**032:108 Malcolm X, King, and Human Rights** 3 s.h.

Religion and politics of Malcolm X and Martin Luther King, Jr. in the context of U.S. civil rights and international human rights in West Africa and the Muslim world; emphasis on civil rights connections to Gandhi, the Nobel Peace prize, and other international experiences that have impacted Pan Africanists, such as Stokely Carmichael, who worked on human rights. Recommendations: international studies major or undergraduate standing. Same as 129:108.

**032:109 Suffering, Death, and the Afterlife in Christianity and Judaism** 3 s.h.

Development of afterlife ideology in Jewish and Christian traditions and ideas that influenced this development, particularly as it relates to the problem of suffering. Same as 20E:104.

**032:111 Religion and Women** 3 s.h.

Sexism and its disavowal in biblical narrative, law, wisdom texts, Gospels, epistles; contemporary impact. GE: Humanities.

**032:112 The Bible in Film: Hollywood and Moses** 3 s.h.

How Hollywood has interpreted the Biblical stories of Adam and Eve, Moses, and David the King.

**032:116 Japanese Religion and Thought** 3 s.h.

Same as 39J:109.

**032:120 Jewish Religious Thought** 3 s.h.

Medieval and modern theological tradition of Judaism: Maimonides, Spinoza, Buber, others; historical contexts, modern interpretations.

**032:121 The Bible and the Sacrifice of Animals** 3 s.h.

Why the biblical God permits humans to eat other animals' flesh; fundamental dietary differences between humans and the beasts.

**032:122 Classical and Hellenistic Periods I** 3 s.h.

Readings in Greek literature of the Classical and Hellenistic periods. Prerequisites: 20G:012. Same as 20G:122.

**032:125 Conceptions of the Sacred** 3 s.h.

How the holy has been experienced and described in Western religion; manifestations of the divine in the ordinary; Christian visionary spirituality, kabbalah, tension between deism and theism in the Enlightenment and beyond.

**032:126 Twentieth-Century African American Religion: Civil Rights to Hip-Hop** 3 s.h.

Twentieth-century African American religious history; major political and cultural movements, such as civil rights, black power, black feminism/womanism, hip-hop. Same as 129:123.

**032:127 Nonprofit Organizational Effectiveness I** 3 s.h.

Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 024:147, 042:157, 06J:147, 06T:144, 096:168.

**032:128 Nonprofit Organizational Effectiveness II** 3 s.h.

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 024:148, 042:158, 06J:148, 096:169.

**032:130 Religion and Environmental Ethics** 3 s.h.

How humans conceptualize the biophysical environment through religious beliefs and practices; how images of the environment influence people's activities, how they are used by grassroots environmental movements. Requirements: junior or senior standing. Same as 033:139, 113:139.

**032:131 Gender and Sexuality in East Asia** 3 s.h.

Conceptions of sex, gender, and sexuality in the religions of China, Korea, and Japan; asceticism and celibacy; sexual alchemy; the difference between male and female bodies and souls; intersexed persons; female saints and immortals; transgressive sexuality; gender and sexuality in colonial Asia; East Asian religions and postcolonial feminism. Same as 131:131, 154:131.

**032:132 Medieval and Reformation Religious Thought** 3 s.h.

Classics of patristic, scholastic, reformation theology; special attention to relationships among authors, periods, genres.

**032:135 Religious Readers and Their Books** 3 s.h.

Close study of content and form of religious books and their interplay with individual and communal reading habits; examination of the way written and printed matter circulate in religious contexts; analysis of the meaning of sacred texts in various settings. Same as 108:135.

**032:136 Religious Thought in Enlightenment** 3 s.h.

Religious thought (1680-1790) that challenged the legitimacy of tradition and attempted to base all of life, including religion, on nature and reason; readings from Spinoza to Lessing, Kant.

- 032:137 Modern Religious Thought: 19th Century** 3 s.h.
- 032:138 Modern Religious Thought: 20th Century** 3 s.h.
- 032:139 Religion and Violence in America** 3 s.h.  
Movements in North American history marked by violence (i.e., Peoples Temple, Lakota Ghost Dance, Branch Davidians, Shawnee Movement); the role of violence in expressing and shaping some religious movements.
- 032:140 Religion and Literature** 3 s.h.  
Religious themes in great works of literature.
- 032:141 Varieties of American Religion** 3 s.h.  
World views of religious groups (e.g., Mormon, Scientology, Jehovah's Witness, Black Muslim, Unification Church of Sun Myung Moon). Same as 16A:122.
- 032:146 Philosophy of Religion** 3 s.h.  
Medieval to contemporary treatments of central issues: the nature of faith; the existence and nature of God; religion and ethics; the interpretation of religious texts. Same as 026:134.
- 032:147 Quest II: Sex, Love, and Death** 3 s.h.  
Readings from the Hebrew Bible, Sophocles' *Antigone*, Melville's *Billy Budd*, Hemingway's *The Sun Also Rises*, Salinger's *A Perfect Day for Banana Fish*, the film *From Here to Eternity*.
- 032:149 Values in the Contemporary World** 3 s.h.  
Modern problems in definition and choice of values; writings of contemporary ethical theorists, novelists. Same as 033:152.
- 032:150 The Bible and the Holocaust** 3 s.h.  
Religious and philosophic implications of the Holocaust viewed through survivors' writings.
- 032:151 Religion and Law** 3 s.h.  
Why do we follow religious and secular laws—to avoid divine wrath or civil punishment? Does obedience to law express or degrade ethical meaning? How Jewish and Christian thinkers have answered these questions; how historical debates in the Jewish and Christian religious traditions have shaped contemporary Anglo-American legal history.
- 032:153 Religion and the Arts** 3 s.h.  
Analysis, interpretation of religious themes in literature, film, painting.
- 032:154 Religious Conflict/Early-Modern Period** 3 s.h.  
Reformation of 16th century—Lutheran, Calvinist, Radical, English; readings from major representatives of each. Same as 16E:123.
- 032:155 Human Rights and Islam** 3 s.h.  
Human rights in religious and secular discourse, seventh century to present; Islamic law, human rights law, religion, politics. GE: Humanities.
- 032:156 The Karma of Words** 3 s.h.  
Key issues in the relationship between Buddhism and the literary arts. Same as 039:156.
- 032:157 Religion and Politics: The Islamic World** 3 s.h.  
Major trends in Islamic religious thought since the colonial period, focusing on encounters between Islamic and the modern world; Ibn Khaldun; renewal movements; varieties of religious reform and accommodation; nationalism, socialism, and so forth. Recommendations: prior Islamic course work.
- 032:158 Native American Women and Religious Change** 3 s.h.

Native women's diverse experiences and their roles in native societies, examined through contact experiences between native and nonnative peoples; changes in women's roles in context of interactions between native people, missionaries, European colonists, and Americans; approaches to re-imaging women's early contact roles presented in cultural narratives, archaeology, history, ethnography, and missionary records. Same as 131:159, 149:158.

### **032:159 Comparative Islamic Law**

3 s.h.

Sources of Islamic law; origins and functions of varied schools of jurisprudence; Islamic legal philosophy and Islamic legal rulings in contexts of five major schools of law; major legal topics covered by the Ottoman Legal Code. Same as 091:223.

### **032:160 Religious Identity in the Modern Secular State**

3 s.h.

Shifting relations between organized religions and political institutions, between private piety and public life, in the West since the Enlightenment; rise of nationalism and the altered role of churches since the Revolutionary era; challenges of science and philology to traditional understandings of revelation, rise of fundamentalism in the wake of those challenges; Christian responses to the social effects of the Industrial Revolution; intertwining of ethnic, religious, and political identities in the late 20th and early 21st centuries.

### **032:162 Genes and the Human Condition**

3 s.h.

Ethical, legal, and social implications of the new genetics, with focus on the Human Genome Project.

### **032:163 Turning East**

3 s.h.

The global nature of pilgrimage, primarily religious travel in or to Asia; journeys to single sacred sites, travel circuits to multiple destinations, internal or metaphorical pilgrimages. Same as 039:162.

### **032:164 Greek Religion and Society**

3 s.h.

From Bronze Age to the Hellenistic period, in context of Mediterranean culture; evidence such as choral hymn, inscribed prayers, magical curses inscribed on lead, architecture, sculpted offerings to the gods. GE: Humanities. Same as 20E:115.

### **032:165 Anthropology of Religion**

2-3 s.h.

Approaches; religious roles; shamanism, witchcraft, curing; mythology; place of religion in social and cultural change. Same as 113:142.

### **032:167 Islamic Ethics and Political Thought**

3 s.h.

Islamic ethics and political movements from seventh century CE to modern times. Taught in English. Recommendations: Islamic course work.

### **032:169 Quest III: Heroes, Lovers, and Knives**

3 s.h.

Tension between Paganism and the Bible regarding heroism and eroticism; the Song of Songs, stories of Rachel, Samson, Saul, Bathsheba; Plato's *Symposium*, Hemingway's *The Snows of Kilimanjaro*, Salinger's *For Esmé with Love and Squalor*, *The Highlander*, *The Matrix*, *Bridget Jones' Diary*; unmasking knaves to truly appreciate heroes and lovers.

### **032:170 Topics in Asian Religions**

3 s.h.

Same as 039:168.

### **032:171 Indian Religious Texts**

3 s.h.

Same as 039:163.

### **032:172 Comparative Ritual**

3 s.h.

Practice and theory; rituals from religions, including Hinduism, Buddhism, Christianity, Indian religions; theories of interpretation. Same as 039:172.

### **032:175 Buddhist Philosophy**

3 s.h.

Introduction to main ideas. Same as 026:145.

### **032:177 Indian Literature**

3 s.h.

Readings from medieval and modern periods in English translation. Same as 039:136.

### **032:178 East Meets West: The Western Reception of Eastern Religion**

3 s.h.

Introduction of religious ideas and forms from India, China, and Japan into Europe and America to late 20th century, from Greeks to New Age. Same as 039:188.

**032:179 Islamic Cultural Presence in Spain** 3 s.h.  
Islamic history and culture in the Iberian Peninsula from Middle Ages to present. Taught in Spanish. Requirements: one Spanish literature or culture course numbered 035:130 or above. Same as 035:179.

**032:180 Religion and Healing** 3 s.h.  
Historical evidence of religious healing in Christian, Hindu, Buddhist, Native American, and Shaman traditions. Same as 113:145.

**032:186 The Literature of Daoism** 3 s.h.  
Texts of philosophical, religious Daoism; Daoism in traditional Chinese political theory, literature, the arts, alchemy and medicine, sexual custom, combat. Taught in English. Same as 039:140.

**032:188 Zen Buddhism** 3 s.h.  
Prerequisites: 032:004 or 032:006 or 032:010. Same as 039:170.

**032:192 Traditions of Religious Reform** 3 s.h.  
Same as 016:192.

**032:195 Individual Study: Undergraduates** arr.

**032:196 Senior Majors Seminar** 3 s.h.  
Issues central to academic study of religion.

**032:197 Honors Tutorial** 2-3 s.h.

**032:198 Honors Essay** 2-4 s.h.

**032:201 Teaching Religious Studies** 3 s.h.  
Teaching methods, course development, examination construction.

**032:202 Asian Religious Traditions** 3 s.h.

**032:203 Western Religious Traditions** 3 s.h.

**032:205 Methods and Theories in the Study of Religion** 3 s.h.  
Principal methods, theories in academic study of religion.

**032:208 Asian Religions Colloquium** 3 s.h.

**032:218 Seminar: Religion in America** 3 s.h.  
Religious experience in America; topics.

**032:220 Seminar: Topics in Western Religious Thought** 3 s.h.  
In-depth reading of original sources and modern scholarship on selected problems in the modern study of Western religious thought.

**032:222 Seminar in Historical Theology** 3 s.h.

**032:223 Seminar: Reformation Culture and Theology** arr.  
Culture and theology of 16th-century Europe. Same as 016:223.

**032:224 Seminar: Contemporary Theology** arr.  
Ricoeur's hermeneutics.

**032:225 Seminar on Islamic Law and Government** 3 s.h.

Islamic legal and political legacy from the formative period until modern time; critical analysis of the logic and context of development; development of jurisprudential, legal, and political literature; overview of theories and practices of governance in Islam beginning with the Caliphate system and ending with the modern nation-state models. Same as 091:636.

**032:226 Seminar: Religious Ethics** 3 s.h.

**032:227 Nonprofit Organizational Effectiveness I** 3 s.h.

Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 021:263, 024:247, 028:257, 042:247, 06J:247, 091:320, 102:278, 174:247.

**032:228 Nonprofit Organizational Effectiveness II** 3 s.h.

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: (for 091:322) 091:320; (for 174:248) 06J:247 or 024:247 or 174:247. Same as 021:265, 024:248, 028:258, 042:248, 06J:248, 091:322, 102:279, 174:248.

**032:229 High Empire** arr.

Authors and topics from the first and second centuries C.E. Repeatable. Same as 20L:229.

**032:231 Seminar: Religion and Society** 3 s.h.

**032:235 Seminar: South Asian Religion** 3 s.h.

Topics in South Asian religions. Same as 039:235.

**032:237 Seminar: East Asian Religion** 3 s.h.

Emphasis on China and/or Japan. Same as 039:237.

**032:240 Seminar: Religion and Law** 3-4 s.h.

The role of law in ongoing conflicts over the relationship between religion, morality, and society in the United States. Same as 091:685.

**032:243 Religion and the Arts** 3 s.h.

Repeatable.

**032:261 Readings in American Religions** arr.

**032:262 Readings in History of Christianity** arr.

Repeatable.

**032:263 Readings in Theology and Religious Thought** arr.

Repeatable.

**032:264 Readings in Religious Ethics** arr.

Repeatable.

**032:265 Readings in Asian Religions** arr.

Repeatable.

**032:266 Readings in Classical Arabic** 3 s.h.

Repeatable.

**032:267 Readings in Islamic Studies** arr.

Current scholarship in the field of Islamic studies; major works in areas such as modern Islamic thought, Islamic legal and philosophical traditions, religion and politics.

**032:290 Individual Study: Graduates** arr.

Repeatable.

**032:291 Thesis**  
Repeatable.

# Rhetoric

**Chair:** Steve Duck

**Professors emeriti:** Donovan J. Ochs, Douglas M. Trank

**Associate professors:** Aimee Carrillo Rowe, Takis Poulakos, Carol Severino, Mary Trachsel

**Associate professors emeriti:** Lou Kelly, Gene H. Krupa, Dennis M. Moore, Lois B. Muehl

**Assistant professors:** Naomi Greyser, Bridget Harris Tsemo

**Lecturers:** Cinda Coggins Mosher, Patrick Dolan, Will Jennings, Megan Knight

**Web site:** <http://www.uiowa.edu/~rhetoric>

The Department of Rhetoric offers courses that fulfill the College of Liberal Arts and Sciences General Education Program rhetoric requirement and provides individual instruction in its Writing Center and Speaking Center. It also offers other undergraduate courses and graduate seminars.

Students interested in continued study of rhetoric once they have fulfilled the rhetoric requirement of the General Education Program may enroll in upper-division rhetoric courses. Many of these are cross-referenced with other University departments and may count toward certain undergraduate majors.

Graduate students in many disciplines, including American studies, anthropology, communication studies, comparative literature, classics, English, history, journalism, political science, and others, may find rhetoric courses valuable to their programs of study.

## General Education Courses

General Education courses in rhetoric help students

- use writing and speaking to discover and explain and to question and justify positions in a controversy;
- use reading and listening to comprehend and consider arguments, both as separate constructs and in conversation with one another;
- understand basic rhetorical concepts such as purpose and audience and to use them in composing effective spoken and written communication;
- understand and use research as responsible inquiry.

Rhetoric courses approved for General Education are sometimes organized around a special topic, but the primary emphasis is always on rhetorical practice and analysis. Some sections also involve special activities, such as service-learning components, but the workload across all sections is comparable, with a fixed number of major assignments and a departmentally approved set of readings.

During their first year at the University, students enroll in the rhetoric course indicated on their degree audit (unless a delay is required). Students must enroll in a rhetoric course during their first year and each semester thereafter until the rhetoric requirement noted on the degree audit has been satisfied.

Students planning to transfer to The University of Iowa should discuss course equivalencies as soon as possible with an advisor or with the University of Iowa Office of Admissions. For additional information on the General Education Program rhetoric requirement and transfer equivalencies, see the CLAS Academic Handbook General Education page.

Students required to enroll in English as a Second Language (ESL) courses as a result of their English proficiency evaluation must complete all ESL courses before they may register for any rhetoric course or use the services of the Writing Center or the Speaking Center. Required ESL courses are prerequisites to rhetoric courses.

Students who have undergone formal evaluation by Student Disability Services and are found to be learning disabled in reading, writing, or speaking should request reasonable accommodations in order to complete rhetoric. Accommodations may be arranged by Student Disability Services in consultation with the Department of Rhetoric and individual instructors.

## Rhetoric Courses

### For Undergraduates

#### General Education

#### 010:002 Rhetoric II

4 s.h.

Second of a two-course sequence begun in 010:001. GE: Rhetoric - Speech, Rhetoric Level II.

#### 010:003 Rhetoric

4 s.h.

Use of writing and speaking to discover, question, explain, and justify positions in a controversy; reading and listening to comprehend and consider arguments; employment of basic rhetorical concepts (e.g., purpose, audience); understanding research as responsible inquiry; special topics, activities (e.g., a service-learning component). GE: Rhetoric - Speech, Rhetoric Level II.

#### **010:004 Writing and Reading**

3 s.h.

Writing portion of the accelerated course 010:003; introductory course in writing required of students who have completed a college-level public speaking course and writing course but have not satisfied the 8 s.h. rhetoric requirement. Requirements: completion of speaking requirement. GE: Rhetoric Level II.

#### **010:006 Speaking and Reading**

3 s.h.

Speaking portion of the accelerated course 010:003; introductory course in speaking required of students who have completed 6 s.h. of college writing instruction but have not completed a 3 s.h. college-level speaking course; intended to improve speaking, listening, critical, analytical, and advocacy skills. Requirements: completion of writing requirement. GE: Rhetoric - Speech.

### **Other Courses**

#### **010:010 Writing for Academic Success**

0 s.h.

Individualized instruction in the Writing Center; in conjunction with General Education rhetoric courses.

#### **010:020 Academic Seminar I**

3 s.h.

IowaLink seminar. Requirements: first-year standing.

#### **010:021 Academic Seminar II**

3 s.h.

IowaLink seminar. Requirements: first-year standing.

#### **010:029 First-Year Seminar**

1-2 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

#### **010:030 The Art of Persuading Others**

3 s.h.

Basic theoretical concepts of effective public communication; employ knowledge of concepts in analyzing texts; definition and influence of the rhetorical situation, different elements of persuasion (message logic, appeal to feelings, character of the speaker), ability of speakers to invent arguments; issues of judgment, public discourse, identity, and agency. Communication studies majors may apply this course to the following area requirement. AREA: Practice. Same as 036:030.

### **For Undergraduate and Graduate Students**

#### **010:128 Racial Narrative and American Performance**

3 s.h.

Same as 048:128, 129:128.

#### **010:130 Performing Culture, Language, and Literature**

3 s.h.

Performance of self in everyday life; performance in/of literature; performance as an aesthetic act; performance as a way to understand and represent identities, languages and cultures; students participate in performance as a mode of literary and rhetorical interpretation, cultural and political intervention, and artistic-embodied public presentation. Requirements: (for 036:130) g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 036:130, 049:160, 160:130.

#### **010:131 Classical Rhetoric and Greek Culture**

3 s.h.

Origins, development of the art of rhetoric from Sophists to Aristotle; significance to Greek culture from fifth to fourth century B.C. Communication studies majors may apply this course to the following area requirement. AREA: Context. Requirements: (for 036:143) g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 036:143.

**010:141 Rhetoric and Past Public Controversy**

3 s.h.

Role of rhetoric in public controversy in particular historical time periods; focus on various perspectives, diverse voices, and multiple arguments informing particular movements/issues. Communication studies majors may apply this course to the following area requirement. AREA: Context. Requirements: (for 036:158) g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 036:158.

**010:160 Issues in Rhetoric and Culture**

3 s.h.

Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Communication studies majors may apply this course to the following area requirement. AREA: Context. Requirements: (for 036:146) g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 036:146, 048:160, 160:160.

**010:161 Rhetorical Issues in Health Care**

3 s.h.

Role of rhetoric in health care practice, decisions, and ethics; rhetorical production of patient and professional selves in health care; varied practices, diverse perspectives, and situated production of medical and health care knowledge. Requirements: satisfactory completion of rhetoric General Education requirement. Same as 153:161, 160:161.

**010:170 Rhetoric of Sustainability**

3 s.h.

How sustainable development and related concepts have been used to shape public opinion on a range of topics, from environmental protection to economic globalization; role in discourse of public policy. Requirements: fulfillment of rhetoric requirement.

**010:198 Special Projects for Undergraduates**

arr.

**For Graduate Students****010:230 Rhetorical Criticism**

3 s.h.

Approaches to rhetorical analysis of communicative artifacts, acts, events; rhetorical-critical essay writing. Same as 036:220.

**010:243 Feminist Cultural Studies**

3 s.h.

Same as 008:243, 036:222, 131:243, 160:243.

**010:264 Postcolonial Feminist Theory**

3 s.h.

Role of colonial histories and postcolonial legacies on past and contemporary relations of power in varied geographical contexts, through interdisciplinary feminist perspective; processes of gender and racialization relative to uneven global flows of media, capital, people. Requirements: 131:151 or cultural studies course. Same as 131:264, 160:280.

**010:271 Studies in Sentimentalism**

3 s.h.

Readings in sentimentalism as literary genre, rhetorical practice, cultural mode, and psycho-social phenomenon; focus on attendant theories of affect; integration of literature and culture with work on the politics of affect in postcolonial and transnational studies, critical race and ethnic studies, American studies, and gender and sexuality studies. Same as 008:271.

**010:275 Topics in Second Language Acquisition: Writing**

3 s.h.

Theory, pedagogy, research, and assessment in second language writing. Taught in English. Same as 035:227, 164:227.

**010:301 Classical Rhetoric**

3 s.h.

Discourse in the ancient world. Same as 036:310, 20E:230.

**010:332 Critical Ethnography**

3 s.h.

How power relations constitute the work of ethnographic research; ethnography as a rhetorical form--how ethnographic inscription renders self, other, culture, and the world intelligible in ways that reinscribe and/or challenge dominant social relations; axes of power such as race, class, gender, sexuality, and nation within postcolonial, feminist, and antiracist approaches to ethnographic/autoethnographic theory and praxis; negotiating researcher privilege and epistemic violence; crisis of representation. Same as 036:378, 160:332.

**010:340 Current Issues in Rhetoric**

3 s.h.

Ethical, social, or cultural issues; rhetoric's role in their contemporary significance; traditional aspects of rhetoric, their pertinence to present concerns. Same as 036:317, 160:340.

**010:350 Colloquium: Teaching Rhetoric**

3 s.h.

**010:360 Issues in Rhetoric and Culture**

3 s.h.

Rhetorical theory and criticism as culturally embedded practices; rhetorical production of selves and social difference; relationships between rhetoric and literature, philosophy, popular texts. Repeatable. Same as 160:360.

**010:375 Teaching in a Writing Center**

3 s.h.

Seminar/practicum to prepare graduate students to teach in the University of Iowa Writing Center or similar settings; seminar component on writing and reading processes, tutoring strategies, English-as-a-second-language issues; practicum experience tutoring in the Writing Center. Same as 08N:375.

**010:550 Special Project for Graduate Students**

arr.

**010:600 Seminar in Rhetorical Theory**

1-4 s.h.

Topics in history and development of rhetorical theory; theory construction and application to critical practice. Same as 036:336.

## Science Education

**Coordinator:** Brian Hand

**Professor:** Brian Hand

**Professors emeriti:** Edward L. Pizzini, Robert E. Yager

**Associate professor:** Richard Cary

**Associate professors emeriti:** George W. Cossman, Darrell G. Phillips, Daniel S. Sheldon, John T. Wilson

**Clinical associate professor:** John Dunkhase

**Assistant professors:** Cory Forbes, Soonhye Park

**Undergraduate degree:** B.S. in Science Education

**Graduate degrees:** M.A.T.; M.S.; Ph.D. in Science Education

**Web site:** <http://www.education.uiowa.edu/scied/>

The Science Education Program provides preparation in more than one discipline of science; a consideration of science from a philosophical, historical, and sociological perspective; an introduction to applied science (technology); and an education sequence.

Program planning in science education requires the cooperation and involvement of a variety of University departments and colleges. Most of the program's requirements are drawn from courses offered by these varied academic units.

## Undergraduate Program

The program offers a Bachelor of Science in science education. The transdisciplinary major in science is intended for students interested in education.

The science education major is not intended to prepare students for advanced study in one area of science. When graduates of the Science Education Program elect to pursue graduate studies in a single area of science, they often must complete additional courses in that discipline after they are admitted to the Graduate College.

All of the emphasis areas in science education have the following characteristics in common.

- Depth in a general area of science equivalent to three years or six semesters of sequential study
- Preparation in a second area of science equivalent to two years or four semesters of sequential study
- Introduction to two other fields of science
- A specified proficiency in mathematics as a tool of science (with more mathematics study required for the physical science emphases than for the biological ones)
- A view of science from a historical/philosophical/cultural perspective
- Experience with the application of scientific knowledge

### Special Rules

Since the Science Education Program may involve many faculty advisors and several colleges and departments, some special rules and regulations apply to science education students. They include the following.

- At least 10 s.h. of graded credit in science must be earned at The University of Iowa.
- No credit from the CLEP Natural Science General Examination may be used toward the major in science education.
- Courses used for the major may not be taken pass/nonpass; grades from all courses used for the science education major are used in computing a student's grade-point average in the major, both at The University of Iowa and overall.
- Since mathematics forms an integral part of so many aspects of modern science, all science education students are urged to complete appropriate advanced courses in both pure and applied mathematics (including statistics and computer science) so that they may be qualified to do graduate work and quantitative research later.

### Bachelor of Science

The Bachelor of Science in science education requires a minimum of 120 s.h., including 57-61 s.h. of work for the major. Students choose one of four primary emphasis areas: biological sciences, earth science, chemistry, and physics. They take selected courses offered by science departments in the College of Liberal Arts and Sciences, science applications courses, and courses in the history, philosophy, and sociology of science. Students also must complete the College of Liberal Arts and Sciences General Education Program.

The major in science education requires 24-28 s.h. in a primary emphasis area (amount of credit depends on the area chosen), 15 s.h. in a secondary emphasis area (may include a science applications course), the broad field science block, and at least 6 s.h. of additional credit from one or more other emphasis areas (excluding applications courses).

Students who wish to be certified to teach science must complete the 44 s.h. professional education sequence; see "B.S. with Teacher Licensure" later in this section.

**BIOLOGY EMPHASIS AREA**

Primary emphasis area total of 28 s.h.

All of these:

002:010-002:011 Principles of Biology I-II	8 s.h.
002:022 Ecology and Evolution	3 s.h.
002:081 Human Genetics in the Twenty-First Century	3 s.h.
002:134 Ecology	3-4 s.h.
099:110 Biochemistry	3 s.h.
097:103 Societal and Educational Applications of Biological Sciences	3 s.h.

One of these:

002:124 Animal Physiology	3 s.h.
027:130 Human Physiology	3 s.h.

**CHEMISTRY EMPHASIS AREA**

Primary emphasis area total of 25 s.h.

All of these:

004:011-004:012 Principles of Chemistry I-II	8 s.h.
004:121 Organic Chemistry I	3 s.h.
004:122 Organic Chemistry II	3 s.h.
004:125 Inorganic Chemistry (spring)	2 s.h.
004:141 Organic Chemistry Laboratory	3 s.h.
097:106 Societal and Educational Applications of Chemical Concepts	3 s.h.

One of these:

004:111 Analytical Chemistry I (fall)	3 s.h.
004:131 Physical Chemistry I	3 s.h.
099:110 Biochemistry (spring)	3 s.h.

**EARTH SCIENCE EMPHASIS AREA**

Primary emphasis area total of 27 s.h.

All of these:

012:004 Evolution and the History of Life	4 s.h.
012:005 Introduction to Geology	4 s.h.
012:008 Introduction to Environmental Science	4 s.h.
012:041 Mineralogy	4 s.h.
012:108 Introduction to Oceanography	2 s.h.
012:114 Energy and the Environment	3 s.h.
097:102 Societal and Educational Applications of Earth Science and Environmental Science	3 s.h.

One of these:

012:102 Earth Surface Processes	3 s.h.
012:104 Climatology	3 s.h.
012:121 Principles of Paleontology	3 s.h.
012:136 Soil Genesis and Geomorphology	3 s.h.

**PHYSICS EMPHASIS AREA**

Primary emphasis area total of 23-27 s.h.

097:105 Societal and Educational Applications of Physical Sciences	3 s.h.
--	--------

One of these sequences:

029:011-029:012 College Physics I-II (if physics is a secondary emphasis area)	8 s.h.
029:027-029:028 Physics I-II	8 s.h.
029:081-029:082 Introductory Physics I-II	8 s.h.

One of these:

029:029 Physics III	4 s.h.
029:115 Intermediate Mechanics	3 s.h.

One of these:

029:050 Stars, Galaxies, and the Universe (if physics is a secondary emphasis area)	3-4 s.h.
029:052 Exploration of the Solar System (if physics is a secondary emphasis area)	3 s.h.
029:061 General Astronomy I	4 s.h.

One of these:

029:128 Electronics	4 s.h.
029:129 Electricity and Magnetism I	3 s.h.

One of these:

029:006 Physics of Everyday Experience (if physics is a secondary emphasis area)	3 s.h.
029:044 Physics of Sound	3-4 s.h.

#### **BROAD FIELD SCIENCE BLOCK**

097:102 Societal and Educational Applications of Earth Science and Environmental Science	3 s.h.
097:103 Societal and Educational Applications of Biological Sciences	3 s.h.
097:105 Societal and Educational Applications of Physical Sciences	3 s.h.
097:106 Societal and Educational Applications of Chemical Concepts	3 s.h.
097:128 Meaning of Science	2 s.h.
097:130 Science in Historical Perspective	2 s.h.

### **B.S. with Teacher Licensure**

Candidates for a bachelor's degree in science education may, but are not required to, be admitted to the Teacher Education Program (TEP) in the College of Education. In order to be considered for admission to the TEP, students must have completed a minimum of 33 s.h. of course work with a cumulative g.p.a. of at least 2.70. A limited number of applicants are accepted to the TEP, so having the required grade-point average does not ensure admission. Admission decisions are based on grade-point averages in science courses and other criteria relevant to teaching.

For procedures and deadlines for TEP applications, see Teaching and Learning (College of Education) in the Catalog. Interested students must apply to the College of Education for admission to the Teacher Education Program.

TEP students must complete the College of Liberal Arts and Sciences General Education Program, the requirements for a science education major, and the following professional education courses, which total 44 s.h.

07B:180 Human Relations for the Classroom Teacher	3 s.h.
07E:100 Foundations of Education	3 s.h.
07E:102 Technology in the Classroom	2-3 s.h.
07P:075 Educational Psychology and Measurement	3 s.h.
07S:151 Science Teaching and Practice with Early Learners	3 s.h.
07S:152 Methods of Teaching Science	3 s.h.
07S:153 Instructional Issues in Teaching Science (taken with 07S:179)	3 s.h.
07S:171 Secondary Classroom Management	2 s.h.
07S:179 Secondary School Science Practicum (taken with 07S:153)	2 s.h.

07S:190 Orientation to Secondary Education	1 s.h.
07S:195 Teaching Reading in Secondary Content Areas	1 s.h.
07U:100 Foundations of Special Education	3 s.h.

These three taken concurrently:

07S:187 Seminar: Curriculum and Student Teaching (section 91)	3 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School	6 s.h.
07S:192 Observation and Laboratory Practice in the Secondary School	6 s.h.

One college-level math course (excluding 22M:001 Basic Algebra I, 22M:008 Intermediate Algebra, and 22M:003 Basic Geometry) also is required.

## Four-Year Graduation Plan

The Four-Year Graduation Plan is not available to students majoring in science education.

## Honors

To graduate with honors, students must maintain a University of Iowa g.p.a. of at least 3.33, in addition to other science education requirements. Contact the University of Iowa Honors Program for more information.

## Graduate Programs

The Science Education Program offers graduate studies leading to the Master of Arts in Teaching, Master of Science, and Doctor of Philosophy. For information about science education graduate programs, see Teaching and Learning (College of Education) in the Catalog. The M.A.T., M.S., and Ph.D. are described under "Secondary Education."

## Research

Each faculty member in science education is responsible for one or more areas of research. Major interests include studies of effective teaching and learning, science through writing, philosophy and sociology of science, individualized learning, social issues in science and technology, curriculum planning and development, professional development, intellectual development related to teaching and learning science, studies of effective use of hands-on activities, and evaluation and assessment of science instruction and programs.

## Programs and Projects

A wide range of funded programs provides ample opportunity for students to be involved in innovative development and research in science education.

Science education faculty members collaborate on a number of international research projects in many countries. Activities include faculty exchanges and cross-national studies.

International students enrich the opportunities for graduate studies in Science Education. New international collaborative efforts are under way each year.

## Science Education Courses

<b>097:102 Societal and Educational Applications of Earth Science and Environmental Science</b>	arr.
Major ideas and principles of earth and environmental sciences; emphasis on common applications in today's world.	
<b>097:103 Societal and Educational Applications of Biological Sciences</b>	arr.
Basic conceptual themes of biology, how they have been derived; emphasis on a current social issue related to biology.	
<b>097:105 Societal and Educational Applications of Physical Sciences</b>	arr.
Major ideas of physics and how they have been derived; emphasis on how such ideas affect modern society.	
<b>097:106 Societal and Educational Applications of Chemical Concepts</b>	arr.

Principles of chemistry as applied in industry, communication, daily living.

**097:107 Textile Science**

3 s.h.

Fiber, yarn, and fabric science; fabric painting, dyeing, and other laboratories. Same as 049:142.

**097:115 Introduction to Museology**

3 s.h.

Overview of museum history, function, philosophy, collection and curatorial practices, governance and funding issues, exhibition evaluation, audience studies; American cultural institutions. GE: Humanities. Same as 024:102, 07S:112, 113:103.

**097:119 Directed Study**

arr.

**097:128 Meaning of Science**

2-3 s.h.

Scientific enterprise from social, ethical, cultural, epistemological viewpoints.

**097:130 Science in Historical Perspective**

2-3 s.h.

Science and its related contemporary social issues from historical development perspective. Prerequisites: 097:128.

**097:140 Problems in Integrating the Teaching of Environmental Science**

2-3 s.h.

Environmental education resources in the community--human, governmental, natural; environmental education in K-12 teaching.

# Sexuality Studies

**Chair:** Jennifer Glass

**Coordinator:** Lisa Heineman

**Undergraduate nondegree program:** Certificate in Sexuality Studies

**Web site:** <http://www.uiowa.edu/~women/index2.html>

The Certificate in Sexuality Studies is closing. Students who began working toward the certificate and were enrolled in certificate courses before the beginning of fall semester 2010 may complete the program. Some courses required by the program may be dropped, so students are urged to finish the certificate as quickly as possible. Certificate students should consult with their advisors.

To learn more about the study of sexuality, see Gender, Women's, and Sexuality Studies in the Catalog.

## Certificate

The Certificate in Sexuality Studies requires 21 s.h. of course work. Students who complete the program gain a better understanding of human sexuality. They also acquire valuable background knowledge applicable to a wide variety of humanities and social science fields and to careers in education, counseling, law, medicine, nursing, and other health professions.

Students may declare their intention to complete the certificate at the CLAS Academic Programs & Services office.

Students plan their programs in close cooperation with sexuality studies advisors, choosing course work from the list of required and elective courses approved for the certificate. Students must maintain a g.p.a. of at least 2.00 in course work for the certificate.

All students complete the following two courses.

154:010 Introduction to Gender, Women's, and Sexuality Studies

3 s.h.

Capstone seminar

3 s.h.

Students who began the certificate program before fall 2009 may substitute 154:110 Frameworks for the Study of Sexuality (formerly Introduction to Sexuality Studies) for 154:010 Introduction to Gender, Women's, and Sexuality Studies.

The capstone seminar changes from year to year and typically is offered only in spring semester. Each year's capstone seminar is announced on the Sexuality Studies Program web site before spring preregistration. Contact the sexuality studies advisor for information about the course.

The remaining 15 s.h. of credit is earned in courses chosen from those offered by the Sexuality Studies Program or from the list of approved associated courses, which varies from year to year. Students may petition to include a course that is not on the list of approved courses; they should discuss this option with their advisors. In keeping with the interdisciplinary nature of sexuality studies, students are encouraged to choose these electives from different disciplines.

Courses applied toward the sexuality studies certificate also may be used to complete the College of Liberal Arts and Sciences General Education Program or to satisfy requirements of a major or minor.

Of the 21 s.h. required for the certificate, at least 12 s.h. must be earned at The University of Iowa. Transfer work is evaluated by the program coordinator.

The certificate is awarded upon completion of a bachelor's degree. Holders of Iowa bachelor's degrees also may return to complete the requirements for a certificate. Holders of baccalaureate degrees from other institutions who are not enrolled in a graduate or professional program at The University of Iowa may apply for admission to the College of Liberal Arts and Sciences and are awarded the certificate upon completion of the requirements.

## Associated Courses

The following courses are approved for the Certificate in Sexuality Studies. Additional courses may be approved. Students should discuss course selection with their advisors.

### AMERICAN STUDIES

045:060/154:060 Sex and Popular Culture in the Postwar U.S.

3 s.h.

**ANTHROPOLOGY**

113:127 South Asian Sexual Cultures	3 s.h.
113:140 Politics of Reproduction	3 s.h.

**ART AND ART HISTORY**

01H:199 Topics in Art History	3 s.h.
-------------------------------	--------

**CLASSICS**

20E:150/131:152/154:121 Gender and Sexuality in the Ancient World	3 s.h.
---	--------

**COMMUNICATION STUDIES**

036:075 Gender, Sexuality, and Media	3 s.h.
036:095 Queer Rhetorics	3 s.h.

**EDUCATION**

07C:130 Human Sexuality	3 s.h.
-------------------------	--------

**ENGLISH**

08G:011 Literature and Sexualities	3 s.h.
008:179 Literature and Society (when content is appropriate)	3 s.h.

**FRENCH AND ITALIAN**

009:148 Gender and Sexuality in French Cinema	3 s.h.
---	--------

**HEALTH AND SPORT STUDIES**

028:078 Women, Sport, and Culture	3 s.h.
-----------------------------------	--------

**HISTORY**

16A:154 Sexuality in the United States	3 s.h.
16A:184 Black Global Metropolis: Sexual History	3 s.h.

**NURSING**

096:112/042:112 Human Sexuality, Diversity, and Society	3 s.h.
---	--------

**RELIGIOUS STUDIES**

032:052 Women in Islam and the Middle East	3 s.h.
032:071 Sexual Ethics	3 s.h.

**SOCIAL WORK**

042:112/096:112 Human Sexuality, Diversity, and Society	3 s.h.
042:199 Selected Aspects of Social Work and Social Welfare (when topic is social work practice with gays, lesbians, bisexuals)	arr.

**SOCIOLOGY**

034:061 The American Family	3 s.h.
034:135/154:145 Sociology of Sexuality	3 s.h.

**THEATRE ARTS**

049:118 American Women Playwrights: 1776-Present	3 s.h.
--	--------

**Sexuality Studies Courses**

<b>154:010 Introduction to Gender, Women's, and Sexuality Studies</b>	3 s.h.
Introduction to feminist interdisciplinary study of women's lives, with emphasis on race, class, sexual orientation; work, family, culture, political and social change. GE: Cultural Diversity. Same as 131:010.	

<b>154:060 Sex and Popular Culture in the Postwar U.S.</b>	3 s.h.
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. GE: Cultural Diversity. Same as 045:060, 131:061.	

<b>154:069 Topics in Sexuality Studies</b>	1-3 s.h.
Focus on a specific aspect of human sexuality; topics vary.	

<b>154:071 Sexual Ethics</b>	3 s.h.
Introduction to religion and ethics; examination of a range of secular, Jewish, and Christian perspectives on sexuality and sexual activity; perspectives of homosexuality and abortion that remain controversial in many cultures. Same as 032:071.	

<b>154:075 Fertility and Reproduction</b>	3 s.h.
Exploration of when, why, how, and with whom Americans bear children, comparison to other developed and developing countries in the world; infertility and its treatments; ethics of surrogacy; voluntary childlessness; rapid rise of nonmarital childbearing in the U.S. and other countries; politics of childbirth; declining populations; rapid aging of rich where women have basically stopped having children. Same as 034:075, 131:075.	

<b>154:095 Queer Rhetorics</b>	3 s.h.
--------------------------------	--------

Overview of queer theory and its application to different communicative situations including television, film, and everyday life; development of critical thinking skills in relation to cultural constructions of gender, sexuality, race, and other identity categories. Communication studies majors may apply this course to the following area requirement. AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 036:095, 131:095.

**154:110 Frameworks for the Study of Sexuality** 3 s.h.

Theoretical perspectives on human sexualities drawn from medicine, law, social sciences, the humanities; cultural meanings of heterosexual, lesbian, gay, bisexual, transgender identities.

**154:120 Lesbian, Gay, Bisexual, and Transgender Identities** 3 s.h.

Historical and contemporary experiences of sexual minorities; identity, community, culture, art, politics, representation, diversity, assimilation.

**154:121 Gender and Sexuality in the Ancient World** 3 s.h.

Survey of gender and sexuality issues in the social, political, and religious life of ancient Greece and Rome; evidence from literature, the visual arts, archaeology. Requirements: completion of rhetoric requirement and sophomore standing. GE: Foreign Civilization & Culture. Same as 131:152, 20E:150.

**154:131 Gender and Sexuality in East Asia** 3 s.h.

Conceptions of sex, gender, and sexuality in the religions of China, Korea, and Japan; asceticism and celibacy; sexual alchemy; the difference between male and female bodies and souls; intersexed persons; female saints and immortals; transgressive sexuality; gender and sexuality in colonial Asia; East Asian religions and postcolonial feminism. Same as 032:131, 131:131.

**154:145 Sociology of Sexuality** 3 s.h.

Sociological perspectives on sexuality, including theoretical and conceptual developments, empirical regularities, and social implications; sexual expression in the United States. Prerequisites: 034:001 or 034:002. Same as 034:135.

**154:157 Gender, Sexuality, and Human Rights** 3 s.h.

History of gender and sexuality as components in international human rights activism and law; current debates, representative topics. Same as 131:157, 16W:157.

**154:182 Anthropology of Sexual Minorities** 3 s.h.

Ethnographic studies of sexual minorities and anthropological approaches to lesbian, gay, bisexual, and transgendered persons and communities; behavior, identity, performativity, kinship, globalization, the HIV/AIDS pandemic. Requirements: junior, senior, or graduate standing. Same as 113:154, 131:154.

**154:184 Black Global Metropolis: Sexual History** 3 s.h.

Dispersion of people of African descent into the global metropolis, from expansion of port cities in the slave trade to industrialization of European and American cities, decolonization of the Third World, and proliferation of spatial cultures in contemporary geography; readings cover prostitution in colonial New York, sexual danger in Victorian London, jazz age Chicago, sexual psyches in Algiers, black gay expatriates in Paris, social science in Harlem and Puerto Rico ghettos, black/white sex in Johannesburg, transsexuals in Rio de Janeiro, Black Panther sexual politics in urban America, global hip-hop sexualities. Same as 129:184, 16A:184.

**154:192 Culturally Diverse Theatre** 3 s.h.

Same as 049:192, 131:192.

**154:199 Independent Study** 1-3 s.h.

Directed readings, artistic or creative endeavors, research projects. Prerequisites: 154:110.

## Social Work

**Director:** Edward J. Saunders

**Professor:** Lorraine Dorfman

**Professors emeriti:** Patricia L. Kelley, Thomas H. Walz

**Associate professors:** Amy C. Butler, Carol Coohey, Carolyn Hartley, Miriam Landsman, Susan Murty, Edward J. Saunders, Jeanne Saunders

**Associate professor emeritus:** William M. Theisen

**Adjunct associate professors:** Earl Kelley, Rita Melissano, Brad Richardson

**Clinical associate professors:** Robert Jackson, Julia Kleinschmit Rembert, Judith Rinehart

**Assistant professors:** Mercedes Bern-Klug, Lynette Renner, Sara Sanders

**Assistant professor emerita:** B. Eleanor Anstey

**Adjunct assistant professors:** Larry Allen, Mike Bandstra, Margaret Cretzmeyer, April Dirks, Patricia Gilbaugh, Greg Jensen, Stephen Trefz, Julie Williams

**Clinical assistant professors:** Yvonne Farley, Motier Haskins, M. Billie Marchik, Robert Vander Beek

**Adjunct instructors:** Ed Barnes, Margaret Bessman-Quintero, Susan Bixenman, Joan Black, Nancee Blum, Varetta Braden, Lois Buntz, Jim Clark, Lance Clemens, Amy Correia, Melissa Cross-Ohden, Stephen Cummings, Raygena Curry, Suzanne Dell, Monique DiCarlo, Schael Engel, Sr. Shirley Fineran, Diane Finnerty, Romaine Foege, Judy Foote, Joel Fry, Brenda Geisinger, Barbara Hirsch-Giller, William Hood, Kathleen Kemp, Brandy Koller, Chris Martin, Joanne McCracken-Young, Sandra McGee, Barbara Mechtenberg-Ruffinot, Lynn Meincke-Wohlers, Ron Mirr, Pam Moore, Karen Mullin, Mary Newcomb, Greg Nooney, Sarah Oliver, Jennifer Lock Omann, Joelle Osterhaus, Elizabeth Rembold, Kathleen Ruyle, Kathleen Shey, Elizabeth Smith, Tiffany Smith, Diane Sonnevile, Eileen Swoboda, Ellen Szabo, Michael Thompson, Diane Tonkyn, Molly Twohig, Kristine Warford, Ross Wilburn, Carol Winetroub, Sue Witte, Joel Wulf, Stu Zisman

**Undergraduate degree:** B.A. in Social Work

**Undergraduate nondegree program:** Minor in Social Work

**Graduate degrees:** M.S.W., Ph.D.

**Web site:** <http://www.uiowa.edu/~socialwk>

The mission of the University of Iowa School of Social Work is to develop, disseminate, and integrate excellent and compelling research-based knowledge, practice, and policy, particularly that related to children, families, and older adults. The school operates from strengths-based and systems perspectives to educate its graduates to be culturally competent scholars and practitioners who are committed to social justice and social work values and ethics, and who are prepared to serve in and have a positive impact on a broad range of family-centered and community-based practice settings throughout the State of Iowa and beyond.

The school provides a program of professional training accredited by the Council on Social Work Education at the baccalaureate and master's levels, aimed at developing effective intervention in multiple systems and using professional social work values and ethics. It also offers a Ph.D. program, which prepares students to conduct research that contributes to the knowledge base of social work, to be leaders in setting policy and practice, and to teach in colleges and universities.

## Undergraduate Programs

The school offers a Bachelor of Arts and a minor in social work. The undergraduate program in social work has been accredited continuously by the Council on Social Work Education (CSWE) since 1974.

The school also administers the undergraduate Certificate in Critical Cultural Competence; see Critical Cultural Competence in the Catalog.

The goals of the Bachelor of Arts major in social work are to prepare students for culturally competent generalist social work practice with individuals, families, small groups, organizations, and communities; to provide students with a base for continuing graduate education in social work and for lifelong learning; and to prepare students for active engagement with issues of social justice, oppression, and social welfare in local, state, regional, national, and global goals.

The Bachelor of Arts program is designed to be consistent with the 2008 CSWE Educational Policy Statement competencies and practice behaviors.

The program draws on a liberal arts perspective; social and behavioral science theory; social research; social policy development, analysis, and implementation; culturally competent intervention and prevention approaches in working with individuals, families, small groups, organizations, and communities; social integration; multiple systems assessment and evaluation; and knowledge pertaining to diversity. Consistent with CSWE standards, the program views dimensions of diversity as intersections of multiple factors, including age, class, color, culture, disability, ethnicity, gender, gender-identity and expression, immigration status, political ideology, race, religion, sex, and sexual orientation. Students learn that, as a consequence of difference, a person's life experiences may include oppression, poverty, marginalization, and alienation as well as privilege, power, and acclaim.

Knowledge and practice in social work values and ethics is also an integral part of students' education. Knowledge and skill related to the evaluation of practice are integrated throughout the curriculum, beginning in 042:022 Introduction to Social Work, continuing through practice and research courses, and culminating in self-evaluation of practice exercise in a field seminar.

### Selective Admission

The School of Social Work seeks to maintain a heterogeneous student body by enrolling students who represent diverse backgrounds and cultural perspectives.

A limited number of students are admitted to the major each year. The application deadline is March 1. Admission to the undergraduate program in social work requires:

- completion of 042:022 Introduction to Social Work with a grade of C or higher (should be taken the sophomore year);
- a cumulative g.p.a. of at least 2.50 (exceptions may be made for persons who do not meet the grade-point average requirement if they are strong candidates on the basis of other criteria); and
- completion of application forms and statement.

Meeting these requirements does not guarantee admission. Admission often is limited by available instructional resources and opportunities for field placement. The school does not grant academic credit for life experience or previous work experience.

For more information about admission policies, contact the School of Social Work undergraduate director or admissions director.

### **Social Work Courses in Des Moines**

In addition to its on-campus undergraduate program in Iowa City, the School of Social Work offers social work courses for the Bachelor of Arts through its program in Des Moines. Students in the Des Moines program take courses in sequence, completing the social work courses required for the degree in two years. Course are offered in a classroom setting. Students may complete other requirements for the Bachelor of Arts in online and/or classroom course work. The Des Moines program is approved by the Council on Social Work Education. For more information about the social work program in Des Moines, contact the University of Iowa School of Social Work admissions director.

### **Bachelor of Arts**

The Bachelor of Arts in social work requires a minimum of 120 s.h., including at least 64-66 s.h. of work for the major (a minimum of 36 s.h. in social work courses, 16-18 s.h. in cognate areas, and 12 s.h. in a concentration area). Students must complete 042:022 Introduction to Social Work (4 s.h.) before enrolling in the remaining social work courses required for the major.

Students must complete the College of Liberal Arts and Sciences General Education Program. Many students complete the required course 002:021 Human Biology as part of the General Education Program.

Requirements for the major in social work are as follows.

002:021 Human Biology	4 s.h.
Social work courses, beginning with 042:022 Introduction to Social Work and culminating in a field experience	36 s.h.
Concentration area courses; see "Concentration Area" below	12 s.h.

Social science courses (9-10 s.h.):

030:001 Introduction to American Politics	3 s.h.
031:001 Elementary Psychology	3 s.h.
034:001 Introduction to Sociology Principles	3-4 s.h.

One of these social science or quantitative studies elective courses (3-4 s.h.):

06E:001 Principles of Microeconomics	4 s.h.
06E:002 Principles of Macroeconomics	4 s.h.
22S:002 Statistics and Society	3 s.h.
22S:025 Elementary Statistics and Inference	3 s.h.
113:003 Introduction to the Study of Culture and Society	3 s.h.
113:010 Anthropology and Contemporary World Problems	3 s.h.

### **CONCENTRATION AREA**

The undergraduate program requires a minimum of 12 s.h. of course work in one of the concentration areas listed below. Most students choose either sociology or psychology as their concentration. Students who wish to meet this requirement in an area not listed must present a written request and rationale to the faculty advisor and undergraduate coordinator. Courses used to complete the General Education Program do not count toward the 12 s.h., nor do courses used to satisfy other requirements of the B.A. in social work.

African American studies

Aging studies  
 American studies  
 Anthropology  
 Business  
 Communication studies  
 Critical cultural competence  
 Economics  
 Education  
 English  
 Health and sport studies  
 History  
 Journalism and mass communication  
 Leisure studies  
 Political science  
 Psychology  
 Religious studies  
 Sociology  
 Spanish  
 Women's studies

### Recommended Course Sequence

The school recommends that required course work be taken in the following sequence. Most social work courses are offered only once each year.

#### FIRST AND SECOND YEARS

002:021 Human Biology	4 s.h.
030:001 Introduction to American Politics	3 s.h.
031:001 Elementary Psychology	3 s.h.
034:001 Introduction to Sociology Principles	3-4 s.h.
042:022 Introduction to Social Work	4 s.h.
One social science or quantitative elective course	3-4 s.h.

#### THIRD YEAR

042:140 Human Behavior in the Social Environment	4 s.h.
042:144 Introduction to Social Work Research	4 s.h.
042:147 Discrimination, Oppression, and Diversity	3 s.h.
042:171 Social Work Processes	4 s.h.

#### FOURTH YEAR

042:141 Fundamentals of Social Work Practice	3 s.h.
042:142 Interpersonal Skills Laboratory	2 s.h.
042:143 Social Welfare Policy and Practice	3 s.h.
042:189 Field Experience Seminar	1 s.h.
042:193 Field Experience	8-11 s.h.

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Admission to the major in social work is selective. The four-year graduation plan applies only to students who are admitted by the beginning of their fifth semester.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 042:022 Introduction to Social Work, four courses that can be applied to the major (may include concentration area courses), admission to the major, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** six more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** four or five more courses in the major and finalized field placement

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

## Honors

The School of Social Work has an honors program leading to a Bachelor of Arts with honors in social work. A cumulative University of Iowa g.p.a. of at least 3.33 is required for participation in the program, which enables students to do in-depth study in subjects that interest them.

Contact the University of Iowa Honors Program for more information on honors study at Iowa.

## Minor

The minor in social work requires a minimum of 15 s.h. in social work courses, including 12 s.h. in 100-level courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The minor must include 042:022 Introduction to Social Work (or for transfer students, an equivalent course from another institution). Contact the School of Social Work B.A. coordinator for more information.

## Graduate Programs

The school offers the Master of Social Work and a Doctor of Philosophy in social work. The M.S.W. program has been accredited continuously by the Council on Social Work Education since 1951.

### Licensure for Work in Iowa

Licensure is mandatory for master's-level social workers in Iowa. For more information, see the Iowa Department of Public Health web site.

### Master of Social Work

The Master of Social Work requires 60 s.h. of graduate credit; the requirement is 48 s.h. for students who hold an undergraduate degree in social work from a program accredited by the Council on Social Work Education. Students may elect a thesis or a nonthesis option. A specialization in end-of-life care is available.

The goals of the M.S.W. program are to:

- prepare students to shape the profession's future by providing education in family-based, community-based, and culturally competent practice approaches using the person-in-environment framework; and
- prepare competent professionals for autonomous practice and leadership within the professional community; autonomous practice and leadership include advanced interventions at multiple system levels, supervision, program development, program administration, training, evaluation of practice, dissemination of new models of practice, and policy development.

The school offers the M.S.W. program on the University's Iowa City campus and at three off-campus sites: Des Moines and Sioux City, Iowa, and the Quad Cities area of Iowa and Illinois (see "M.S.W. off Campus" later in this Catalog section). Each site provides the required structured sequence of courses and includes opportunities for students to individualize their plans of study. All sites give students access to the resources of a Research 1 University.

Requirements for the M.S.W. include 25 s.h. in foundation-level courses and 35 s.h. in advanced courses. All students must earn a minimum of 36 s.h. after admission to the M.S.W. program. Students may count a maximum of 9-12 s.h. of credit from previous graduate work toward the M.S.W.

All M.S.W. students follow a structured sequence of courses. They must obtain permission to revise their plan, and they must complete the degree within a maximum of four years. All students must maintain a cumulative g.p.a. of at least 3.00 and must be promoted each semester in compliance with the school's student advancement policy.

The full-time M.S.W. program must be completed in five semesters, beginning in fall and including summer session. Full-time students complete the degree in the spring semester of their second year. Students whose degree requirement is 48 s.h. may enroll full-time or part-time their first semester, following the sequenced plan.

Full-time study and a four-year part-time program are available in Iowa City and Des Moines. A three-year sequence of courses is available at all sites, although the Sioux City and Quad Cities sites admit new entering classes only on a three-year cycle.

Following is an outline of the full-time 60 s.h. program. For information about the three-year and four-year part-time sequences, contact the School of Social Work.

#### **FIRST-YEAR: FOUNDATION**

##### **Fall Semester**

042:140 Human Behavior in the Social Environment	3 s.h.
042:143 Social Welfare Policy and Practice	3 s.h.
042:146 Computer Laboratory	1 s.h.
042:147 Discrimination, Oppression, and Diversity	3 s.h.
042:148 Social Work Research Methods	3 s.h.

##### **Spring Semester**

042:150 Social Work Practice with Individuals, Families, and Groups	3 s.h.
042:151 Social Work Practice Skills Laboratory	1 s.h.
042:145 Organization and Community Practice	3 s.h.
042:270 Advanced Research	3 s.h.
042:290 Foundation Practicum in Social Work	3 s.h.
042:291 Foundation Practicum Seminar	1 s.h.

##### **Summer Session**

Electives (including preplacement field practice courses)	4-10 s.h.
---	-----------

#### **SECOND-YEAR: CONCENTRATION**

##### **Fall Semester**

Elective	3 s.h.
----------	--------

One of these:

042:250 Family-Centered Theory and Practice I	3 s.h.
042:260 Integrated Social Work Theory and Practice I	3 s.h.

One of these:

042:292 Advanced Practicum in Family-Centered Practice I and II	5-6 s.h.
042:295 Advanced Practicum in Integrated Practice	5-6 s.h.

One of these:

042:293 Advanced Practicum Seminar in Family-Centered Practice I	1 s.h.
042:297 Advanced Practicum Seminar in Integrated Practice I	1 s.h.

**Spring Semester**

One of these:

042:251 Family-Centered Theory and Practice II	3 s.h.
042:261 Integrated Social Work Theory and Practice II	3 s.h.

One of these:

042:252 Advanced Social Policy for Family Practice	3 s.h.
042:262 Advanced Social Policy for Integrated Practice	3 s.h.

One of these:

042:292 Advanced Practicum in Family-Centered Practice I and II	5-6 s.h.
042:295 Advanced Practicum in Integrated Practice	5-6 s.h.

One of these:

042:294 Advanced Practicum Seminar in Family-Centered Practice II	1 s.h.
042:298 Advanced Practicum Seminar in Integrated Practice II	1 s.h.

**Concentrations**

In the advanced year of the master's program, students choose one of two concentrations: family-centered practice or integrated practice. These advanced specialized curricula build on the school's liberal arts perspective and on the professional foundation. Both are based on a comprehensive eco-systemic theoretical perspective, and both apply the principles that are part of the school's mission statement, with a focus on culturally competent family-centered and community-based approaches.

**FAMILY-CENTERED PRACTICE**

The family-centered practice concentration teaches knowledge and skills necessary for advanced social work practice with individuals and families. These include clinical practice methods that mobilize and develop clients' coping skills, empowering them to manage difficult situations, and culturally sensitive methods for collaborating with clients, their families, and other professionals in planning interventions. Students also learn about advocating for clients, facilitating client self-advocacy, coordinating services to meet multiple needs, and influencing social policy on behalf of clients.

The concentration prepares students to work with individuals and families at appropriate levels of intensity, mobilize existing strengths, and enhance coping skills. Using principles of family-centered practice, students learn to take community and larger systems into account while working in partnership with individuals and families in all aspects of assessment and intervention planning. The concentration emphasizes sensitivity to a variety of family forms and to cultural diversity within family forms. "Family" is broadly defined to include step families, single-parent families, same-sex-couple families, grandparent-as-parent families, adult parent-adult child families, and traditional forms of families.

**INTEGRATED PRACTICE**

The integrated practice concentration teaches methods of advanced practice that empower organizational and community change at multiple system levels. Students learn skills for assessment, planning, and direct intervention in larger systems such as neighborhoods, social support networks, and service delivery systems, and for policy making. They develop skills for a broad range of interventions, including direct practice, case management, community education, community development and practice, management and administration, organizational and interorganizational planning and program development, team building, organization and program evaluation, and social policy advocacy. They also learn culturally sensitive methods to collaborate with families and communities; identify strengths, assets, and challenges; and develop services and programs that will meet clients' needs.

Building on strengths and assets of organizations and communities, students learn how to mobilize community members in advocacy and change efforts--skills useful for case managers, service coordinators, supervisors, program planners and developers, and administrators. Students also learn how to apply advanced skills to advocacy, community assessment, planning and mobilizing resources, and influencing social policy.

The concentration prepares students for practice in varied settings, including hospitals and community health programs, schools, mental health centers, neighborhood and family resource centers, community- and family-based community service agencies, correctional facilities, and programs that serve the elderly, both in the community and in care facilities. In many of these settings, social workers work as interdisciplinary team members and team leaders within organizations. They also collaborate with community organizations, community residents, and service providers. Many social workers are involved in staff supervision, program development, and agency administration. Content areas include grant writing; intervention in multiple systems, including team and network building; policy practice; and design of evaluation methods for client assessment and program evaluation.

### **Admission**

The school seeks to maintain a heterogeneous student body by enrolling students who represent diverse backgrounds and cultural perspectives. Previous experience in human services and cross-cultural experiences is desirable. The school does not grant academic credit for life experience or previous work experience.

Admission to the M.S.W. program requires a bachelor's degree from an accredited college or university, with a reasonable distribution of courses in the liberal arts and sciences (the humanities and the social, behavioral, and biological sciences). Applicants should have an undergraduate g.p.a. of 3.00 or higher, or a g.p.a. of 3.00 or higher on 12 s.h. of letter-graded graduate course work; consult the Office of Admissions for help in calculating grade-point average. Competence with word processing and spreadsheet application on personal computers is required.

Applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Applicants must submit three letters of recommendation, including one regarding academic abilities and one from the applicant's most recent employer (if the employment was social work-related); and a personal statement addressing criteria specified by the School of Social Work.

Applications are accepted beginning September 1 and must be completed by February 1 to be considered for the next academic year.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

For a complete statement of graduate admission policies, contact the School of Social Work.

### **Financial Support**

Students seeking financial assistance should apply for aid through The University of Iowa Office of Student Financial Aid. Students may apply for a limited number of research and teaching assistantships available from the School of Social Work. Application materials for research or teaching assistantships are available from the school each spring, or as positions become available. Aid received through the Office of Student Financial Aid does not preclude students from consideration for aid through the School of Social Work.

### **M.S.W. off Campus**

The School of Social Work delivers the M.S.W. curriculum to three off-campus sites: Des Moines and Sioux City, Iowa, and the Quad Cities area of Iowa and Illinois. Each site is administered by the School of Social Work in cooperation with the Division of Continuing Education. Social work faculty members teach required courses at each center and are available for student advising. The off-campus programs have been evaluated by the Council on Social Work Education and The University of Iowa Graduate Council as providing a program comparable to that available on the Iowa City campus.

Courses at each off-campus site are taught in classrooms by tenure-track, clinical, visiting, and adjunct faculty members. Instructional connections between sites are maintained through varied technologies, including computer-based instruction.

For program entry and application dates, contact the School of Social Work.

#### **Des Moines Center**

The Des Moines Education Center is located in the state's largest metropolitan area, in central Iowa. It offers courses sequenced to accommodate both part-time and full-time study. Students may complete the entire degree program at the Des Moines center, although they may travel to Iowa City for selected elective courses offered during the summer.

#### **Quad Cities Center**

The Quad Cities Graduate Study Center (QCGC) is located on the campus of Augustana College in Rock Island, Illinois, on the Iowa-Illinois border. The center offers a part-time program for a cohort admitted once every three years. Students in the Quad Cities part-time program can complete their degree entirely off-campus with the exception of

some electives, which they can take during summer sessions in Iowa City or at other area colleges and universities. In addition to the part-time cohort students, there are some full- or part-time students from Iowa City in practicum in the Quad Cities.

### **Sioux City Center**

The Tri-State Graduate Study Center is located in Sioux City, on Iowa's western border. The Sioux City part-time program is nearly identical to the Quad Cities part-time program.

### **Joint M.S.W./Ph.D.**

The school offers a joint Master of Social Work/Doctor of Philosophy in social work for students who have completed course work in research and statistics and have postbaccalaureate experience related to social work practice. The joint program permits students to apply a limited amount of credit toward both graduate degrees, reducing the time required to graduate. Individuals interested in the joint program must apply to the M.S.W. program and the Ph.D. program; applications are reviewed by the admissions panels of both programs. For more information, contact the School of Social Work.

### **Joint M.S.W./J.D., and M.S.W./M.A. or M.S. in Planning**

The School of Social Work collaborates with the College of Law to offer the joint Juris Doctor/Master of Social Work. It also collaborates with the Urban and Regional Planning Program to offer the joint Master of Social Work/Master of Arts or Master of Science in planning. Each program permits students to apply up to 12 s.h. of graduate credit toward both degrees, reducing the time required to graduate. Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program. For more information, see Juris Doctor (College of Law) or Urban and Regional Planning (Graduate College) in the Catalog.

Similar arrangements may be made with other departments. Academic units in which social work students have pursued joint degrees include the Tippie College of Business, the College of Education, the Department of American Studies, the Department of Religious Studies, and the School of Journalism and Mass Communication. Students are encouraged to take courses in other departments whether or not they are pursuing joint degrees.

### **Certificate in Aging Studies**

The School of Social Work participates in the Aging Studies Program (see Aging Studies in the Catalog). Students may earn the Certificate in Aging Studies concurrently with the M.S.W.; separate application to the Aging Studies Program is required.

### **School Social Work Endorsement**

The school cooperates with the College of Education and the State Department of Education to provide curricula that meet requirements for school social work endorsement in Iowa.

### **Professional Association**

Graduates of accredited M.S.W. programs may be eligible for associate membership in the American Association for Marriage and Family Therapy (AAMFT) upon fulfilling certain curriculum requirements at the graduate level. Courses are not automatically accepted; graduates need to demonstrate that specific courses meet the AAMFT's requirements, usually by sending course outlines.

### **Doctor of Philosophy**

The Doctor of Philosophy in social work requires a minimum of 86 s.h. of graduate credit. The program prepares students to conduct research that contributes to the knowledge base of social work, to become leaders in the profession, and to teach social work in postsecondary education institutions.

Doctoral students develop close working relationships with faculty members who have achieved national recognition in areas such as child welfare, diversity and cultural competence, gerontology, social policy, and substance abuse.

The Ph.D. offers students a coherent program of study with opportunities to pursue their own scholarly interests. Requirements include course work, research and teaching practicums, and dissertation work. Students take courses in one of three outside disciplines: sociology, psychology, or public health. This course work prepares them for the comprehensive examination and dissertation defense.

Students who enter the program with an M.S.W. are granted credit for 30 s.h. and must complete an additional 56 s.h. for the degree. Individuals with master's degrees in related disciplines (e.g., psychology, sociology) may choose to earn a Ph.D. in social work without first earning the M.S.W. Credit from a related master's degree may be applied to

the Ph.D., as determined case-by-case by the School of Social Work.

To become Ph.D. candidates, students must satisfy the program's course work requirements, pass a comprehensive examination, and write a dissertation and defend it in an oral examination.

Each student's program of study must be approved by his or her doctoral committee.

Course requirements for the Ph.D. in social work are as follows.

#### **FOUNDATION COURSES**

Doctoral students without the M.S.W. must take the following four foundation courses during their first year of study. Students may waive one or more of these courses if they can show that they have completed comparable courses and can pass an applicable exam.

042:140 Human Behavior in the Social Environment	3-4 s.h.
042:143 Social Welfare Policy and Practice	3 s.h.
042:147 Discrimination, Oppression, and Diversity	3 s.h.
042:148 Social Work Research Methods	3 s.h.

#### **CORE COURSES**

All Ph.D. students must complete the following core courses.

042:300 Social Work Proseminar	1 s.h.
042:301 Knowledge Building in Social Work Practice	3 s.h.
042:302 Social Policy and Poverty in the U.S.	3 s.h.
042:303 Social Work Research Practicum	4 s.h.
042:304 Thesis Seminar	3 s.h.
042:306 Social Work Teaching Practicum	3 s.h.

#### **RESEARCH METHODS, STATISTICS, DATA ANALYSIS**

Students earn 9 s.h. in research methods, statistics, and data analysis course work.

#### **OUTSIDE DISCIPLINE REQUIREMENT**

Students earn 12 s.h. in one outside discipline (psychology, sociology, or public health), as follows.

One methods course	3 s.h.
One theory course	3 s.h.
Two electives	6 s.h.

#### **ADDITIONAL ELECTIVES**

Students earn 6 s.h. in elective course work offered by a department or program other than social work (in addition to the electives in the outside discipline).

#### **Admission**

Students are admitted only for full-time study. Admission to the Ph.D. program requires a master's degree in social work from a program accredited by the Council on Social Work Education (CSWE) or a master's degree in a related field. Prospective students also may apply to the M.S.W./Ph.D. program.

The school makes special efforts to recruit students from underrepresented minorities, especially Iowa residents. The program accepts four or five students each year.

Applicants should have an undergraduate g.p.a. of at least 3.00 and a composite score (verbal and quantitative) of at least 1100 on the Graduate Record Examination (GRE) General Test and must have completed an introductory statistics course. All applicants must submit a completed Graduate College application form, undergraduate and graduate transcripts, Graduate Record Examination scores, a personal statement of professional goals, including area of interest and reason for pursuing the Ph.D. (two to three pages), a résumé, a sample of scholarly writing (scholarly publication or research or theoretical paper), and four letters of recommendation (two must be academic references). International applicants whose first language is not English must submit scores on the Test of English as a Foreign Language (TOEFL).

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants must submit the application form, fee, and other materials to the Office of Admissions. An application packet and list of guidelines are available from the office. The application is due February 1 for the following academic year.

### **Financial Support**

Doctoral students are guaranteed up to three years of financial support from the School of Social Work, including research or teaching assistantships and fellowships. Students whose first language is not English must take the SPEAK test in order to be considered for teaching assistantships. Assistants who hold appointments of one-quarter-time or more are assessed Iowa resident tuition, for which they receive a scholarship, and their computer fees and health insurance premiums are waived for each semester they hold an appointment during the academic year. For more information, see Cost of Attendance on the Office of Student Financial Aid web site.

## **Projects, Seminars**

Students may become involved in special projects such as the National Resource Center for Family-Centered Practice and the School of Social Work's programs in gerontology and in end-of-life care.

The school also offers students the opportunity to participate in travel/study seminars. Urban, rural, national, and international seminars are available.

## **Continuing Education**

Nondegree students may enroll for selected courses and workshops through Saturday & Evening Classes in Iowa City and the School of Social Work's off-campus programs. There are limits on the amount of graduate course work that may be applied to the master's requirements for students who later enroll in the program.

## **Social Work Courses**

### **Primarily for Undergraduates**

#### **042:022 Introduction to Social Work** 4 s.h.

Social welfare as a social institution; settings, methodologies of social work, practice; profession of social work; historical development of American social welfare, social work; a minimum of 45 hours volunteer work. Requirements: sophomore or higher standing. Same as 034:022.

#### **042:029 First-Year Seminar** 1-2 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

#### **042:042 Intercultural Communication** 3 s.h.

Culture defined as a system of taken-for-granted assumptions about the world that influence how people think and act; cultural differences that produce challenges and opportunities for understanding and communication; those differences from several theoretical perspectives; opportunities to examine culture and cultural differences in practical, experience-driven ways. Communication studies majors may apply this course to the following area requirement.

AREA: Context. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074.

Requirements: g.p.a. of at least 2.50 and completion of Foundations of Communication requirement. Same as 036:042, 187:042.

#### **042:141 Fundamentals of Social Work Practice** 3 s.h.

Professional practice: functions, roles, skills, conceptual frameworks, values, ethics; focus on integrated approach to practice, including assessment, intervention, evaluation of interventions, termination with individuals, families, groups; emphasis on empirically based practice. Corequisites: 042:140, if not taken as a prerequisite. Requirements: admission to social work B.A. program.

#### **042:142 Interpersonal Skills Laboratory** 2 s.h.

Practice of interpersonal skills required in the helping relationship. Corequisites: 042:141, if not taken as a prerequisite. Requirements: admission to social work B.A. program.

**042:144 Introduction to Social Work Research** 4 s.h.

Scientific approach to knowledge building, with emphasis on critical use of research; quantitative and qualitative methods, evaluation of practice, computerized data analysis, ethics and diversity in social work research. Requirements: admission to social work B.A. program.

**042:157 Nonprofit Organizational Effectiveness I** 3 s.h.

Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 024:147, 032:127, 06J:147, 06T:144, 096:168.

**042:158 Nonprofit Organizational Effectiveness II** 3 s.h.

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 024:148, 032:128, 06J:148, 096:169.

**042:171 Social Work Processes** 4 s.h.

Context of practice examined to understand structural factors that affect clients and communities; culturally competent practice using empowerment perspective. Corequisites: 042:140, if not taken as a prerequisite. Requirements: admission to social work B.A. program.

**042:189 Field Experience Seminar** 1 s.h.

Opportunity for students to recount their experiences from generalist practice in agencies; application of knowledge, skills, and values of culturally competent social work. Corequisites: 042:193. Requirements: completion of course work in the major.

**042:191 Individual Study** arr.

Project related to student interest carried out under direction of faculty member.

**042:192 Honors in Social Work** arr.

Supervised individual research. Requirements: honors standing.

**042:193 Field Experience** arr.

Supervised experience in selected social welfare organizations; application of knowledge and skill common to generalist practice in an agency setting. Corequisites: 042:189. Requirements: completion of course work in the major and social work senior standing.

## For Undergraduate and Graduate Students

**042:108 Basic Aspects of Aging** 3 s.h.

Social, psychological, and biological aspects; demographics of aging, health, economic issues, primary relationships, social services. GE: Social Sciences. Same as 096:108, 153:108, 169:108.

**042:112 Human Sexuality, Diversity, and Society** 1-3 s.h.

Physiological, psychological aspects; parameters defined by students, instructor. Same as 096:112.

**042:120 Service Learning and Social Welfare** 1-3 s.h.

Experiential learning in areas such as social justice, child welfare, community organizing, early intervention.

**042:129 Substance Use and Abuse** 3 s.h.

Chemical dependency for helping professions; etiological, physiological, psychological, legal, sociological aspects; treatment methods. Requirements: junior or higher standing.

**042:130 Family Development Specialist Model** 3 s.h.

Use of family development specialist model of family-centered practice to facilitate improved family functioning, economic independence; relationship building, systems theory, family-centered case management, conflict management, empowerment strategies. Requirements: completion of family development specialist certification course.

**042:135 Global Aging: Cultural Comparisons** 3 s.h.

Social construction of older adulthood across cultures; social privilege, with emphasis on age privilege and ageism. Same as 153:135.

**042:140 Human Behavior in the Social Environment** 3-4 s.h.

Behavior and development in context of social, ecological systems and human diversity; overview of biopsychosocial dimensions, individual behavior, and development throughout lifespan; contexts of diverse family, group, community, organization, and cultural systems.

**042:143 Social Welfare Policy and Practice** 3 s.h.

Basic social welfare policies and programs; economic, social, ideological, and political conditions that have influenced formation and implementation of social policy, current structure of major social welfare policies. Requirements: admission to social work B.A. or M.S.W. program.

**042:147 Discrimination, Oppression, and Diversity** 3 s.h.

Theoretical and historical perspectives on racism, sexism, other forms of discrimination; applications to social work, culturally competent practice, change strategies. Requirements: admission to social work B.A. or M.S.W. program.

**042:185 Social Policy and the Elderly** 3 s.h.

Public social policies, their affect on well-being of elderly, including women and minorities; U.S. and other nations' policies. Prerequisites: 042:143. Requirements: an introductory course on aging, and junior or higher standing. Same as 153:185.

**042:186 Death/Dying: Issues Across the Life Span** 3 s.h.

Introduction to death and dying; historical, cultural, societal, personal perspectives. Requirements: admission to School of Social Work or Aging Studies Program. Same as 153:186.

**042:190 Field Work in Gerontology** arr.

Opportunities for students in various disciplines to relate their areas of study to elderly and aging; interdisciplinary relationships, approaches to meeting needs of elderly. Same as 153:190.

**042:194 Social Work Practice in Health Care Settings** 2 s.h.

Introduction to organization, provision of social work services in health care settings; practice issues such as models of intervention, ethical questions, impact of cultural diversity on health care. Prerequisites: 042:141 or 042:150.

**042:195 Introduction to Nursing Homes** 3 s.h.

Overview of nursing home roles in context of long-term care system, characteristics of nursing home residents. Same as 153:195.

**042:196 Family Violence** 2-3 s.h.

Child abuse and neglect, domestic violence, elder abuse; causes, policy aspects, identification, reporting, treatment, prevention.

**042:197 Child Welfare Policy and Practice** 3 s.h.

Public and private child welfare practice and organizations in the United States; historical and legal aspects, co-occurring issues, foster care, adoption, family preservation.

**042:199 Selected Aspects of Social Work and Social Welfare** arr.

Human behavior, practice, social welfare policy.

**Primarily for Graduate Students**

**042:145 Organization and Community Practice** 3 s.h.

Models that underlie theories of organization, community practice; principles of macro social work and skill development in relationship building, needs assessment, decision making, planning, implementing, ethics, program and self-evaluation. Requirements: admission to M.S.W. program.

**042:146 Computer Laboratory**

1 s.h.

Use of microcomputers in social work practice; user skill, software for a variety of applications in social service settings. Requirements: admission to M.S.W. program.

**042:148 Social Work Research Methods**

3 s.h.

Knowledge and skills for evaluating practice and carrying out social work research; formulation of research questions; research design and methodology; sampling techniques; protection of human subjects; descriptive statistics; computerized data analysis. Requirements: admission to M.S.W. program.

**042:150 Social Work Practice with Individuals, Families, and Groups**

3 s.h.

Models and underlying theories of empirically based direct social work practice; emphasis on an ecosystem strengths perspective; phases of helping relationship, strengths-based assessment, change process in interpersonal helping relationships. Prerequisites: 042:140. Requirements: admission to M.S.W. program; concurrent enrollment in 042:151, 042:290, and 042:291 for students who have completed 60 s.h.

**042:151 Social Work Practice Skills Laboratory**

1 s.h.

Interpersonal skills practice in the helping relationship; small-group format. Corequisites: 042:150, 042:291, and 042:290, if not taken as prerequisites. Requirements: admission to M.S.W. program.

**042:153 Programs and Services for Aging Adults**

3 s.h.

Major gerontological programs and services, practitioners' need for basic aging-practice competence; aging network; income, employment, health maintenance programs; continuum of care (preventive and well-elderly services, in-home services, community-based services, institutional care); assessment; major elder health issues, informal care; end-of-life care. Same as 153:153.

**042:204 Human Services Administration**

2 s.h.

Effects of organizational structures/processes on individual performance; models of management, communication patterns, leadership styles; skill in technical writing, decision making, personnel and financial management, applied professional ethics. Requirements: completion of foundation courses.

**042:211 Individual and Family Development: Life Span**

3 s.h.

Infancy through senescence; families from their beginnings through their later years; theoretical, methodological issues. Same as 153:211.

**042:216 Group Facilitation in Human Sexuality**

0-3 s.h.

Principles of group dynamics, group process; leadership skills for small, task-oriented discussion groups on human sexuality. Prerequisites: 042:112. Same as 096:216.

**042:219 Aging and the Family**

2-3 s.h.

Research related to aging and the family; intergenerational relations, marital status in later life, diversity of older families, caregiving, elder abuse, policy issues. Same as 153:219.

**042:220 Family Law**

3 s.h.

Legal systems, rights, processes related to families; marriage, divorce, custody, protective services, reproductive rights, adoption, commitment, delinquency, education, poverty, discrimination; roles of lawyers, social workers in legal system. Prerequisites: 042:143.

**042:224 Spirituality and Ethics in Social Work**

2-3 s.h.

Knowledge, values, and skills that provide a framework for spiritually sensitive social work practice; preparation for responding competently and ethically to diverse spiritual perspectives, for recognizing and reflecting on one's own spiritual beliefs, and for identifying appropriate ways to apply personal beliefs to practice with varied populations while safeguarding client autonomy and self-determination.

**042:228 Theories of Personality and Psychopathology**

2 s.h.

Theories and their relevance to social work practice with diverse populations. Prerequisites: 042:140. Requirements: social work graduate standing.

- 042:229 Working with Groups** 2 s.h.  
Theory and practice of group work, group process, leadership styles and skills; fundamental theory, skills necessary to form and facilitate a small group. Requirements: completion of foundation courses.
- 042:232 Therapy with Couples** 2 s.h.  
Married and other couples as social systems; theories of functional, dysfunctional systems; techniques of intervention. Prerequisite: completion of foundation courses or consent of instructor.
- 042:233 School Social Work Practice** 2 s.h.  
School as a social institution; activities of school social worker; theoretical, practice issues; current issues in field.
- 042:234 Social Work Practice and Use of the Diagnostic and Statistical Manual of Mental Disorders** 3 s.h.  
Major categories of psychopathology, DSM-IV system of classification; individual behavior and presentation of symptoms considered through DSM-IV multi-axial approach to diagnosis; effects of culture, developmental stage, and gender on presentation of mental disorders.
- 042:236 Interventions with Individuals** 2 s.h.  
Comparison of two or more intervention theories and approaches used in social work practice with individuals; attention to diverse populations and across life span. Requirements: completion of foundation courses.
- 042:237 Social Work Practice with Children, Youth, and Families** 2 s.h.  
Preparation for practice in child welfare, family service agencies; family life cycle, child development, child maltreatment, problems of adolescence, social services for families and children, legal issues. Requirements: completion of foundation courses.
- 042:238 Introduction to Play Therapy** 2 s.h.  
Major theories and techniques of play therapy, relevance to social work practice. Prerequisites: 042:150.
- 042:247 Nonprofit Organizational Effectiveness I** 3 s.h.  
Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 021:263, 024:247, 028:257, 032:227, 06J:247, 091:320, 102:278, 174:247.
- 042:248 Nonprofit Organizational Effectiveness II** 3 s.h.  
Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: (for 091:322) 091:320; (for 174:248) 06J:247 or 024:247 or 174:247. Same as 021:265, 024:248, 028:258, 032:228, 06J:248, 091:322, 102:279, 174:248.
- 042:250 Family-Centered Theory and Practice I** 3 s.h.  
Theoretical bases for family-centered practice; comparison and analysis; skill development in analyzing problem situations, implementing change strategies. Requirements: completion of M.S.W. foundation courses.
- 042:251 Family-Centered Theory and Practice II** 3 s.h.  
Techniques for assessment, intervention in family-centered practice; evaluation of practice; theoretical and clinical bases for intervention. Prerequisites: 042:250.
- 042:252 Advanced Social Policy for Family Practice** 3 s.h.  
Systematic basis for examining social, economic, and political factors that influence formation of social policies; social policy implementation, impact of social policies on vulnerable individuals and families. Requirements: completion of M.S.W. foundation courses.
- 042:254 Introductory Seminar: End-Of-Life Services in Rural Communities** 2-3 s.h.  
Basic principles of hospice and palliative care, rural service delivery, community assessment.
- 042:255 Integrative Seminar in End-of-Life Care** 1 s.h.  
Integration of students' knowledge, skills, and values for practice in end-of-life care and bereavement; application to case studies and advanced practicum setting. Corequisites: 042:292 or 042:295. Requirements: admission to end-of-life care area.

- 042:260 Integrated Social Work Theory and Practice I** 3 s.h.  
Theories, skill development, evaluation, ethical issues in integrated social work practice; intermediate group work for culturally competent intervention; small task groups. Requirements: completion of foundation courses.
- 042:261 Integrated Social Work Theory and Practice II** 3 s.h.  
Continuation of 042:260; theories, skills evaluation, ethical issues; advanced group work for culturally competent intervention; case management, program development, funding evaluation, large task groups. Prerequisites: 042:260.
- 042:262 Advanced Social Policy for Integrated Practice** 3 s.h.  
Systematic basis for critical examination of social, economic, and political factors that influence formation of social policies; social policy implementation, impact of social policies on vulnerable populations, service providers, communities. Requirements: completion of M.S.W. foundation courses.
- 042:270 Advanced Research** 2-3 s.h.  
Research project relevant to social work practice that builds on knowledge and skills developed in 042:148; data analysis, report of results; ethical principles applied to research. Prerequisites: 042:148. Requirements: admission to M.S.W. program.
- 042:271 Individual Study** arr.  
Project related to student interest; directed by faculty member.
- 042:272 Thesis** arr.
- 042:281 Social Work Practice: Selected Aspects** arr.  
Topics not covered in another course; diversity, social justice and ethics issues related to a social work practice area. Repeatable.
- 042:285 Travel/Study Seminar** arr.  
Opportunity for cross-cultural learning through U.S. or international travel; focus on social welfare issues. Repeatable. Prerequisites: 042:143.
- 042:290 Foundation Practicum in Social Work** 3 s.h.  
Generalist practice experience with individuals, families, small groups, organizations, communities; communication skills, change process, professional values and ethics applied at multiple system levels; students evaluate their own practice using a learning contract in an agency setting. Corequisites: 042:140, 042:143, 042:145, 042:146, 042:147, 042:150, 042:151, and 042:291, if not taken as prerequisites. Requirements: admission to M.S.W. program.
- 042:291 Foundation Practicum Seminar** 1 s.h.  
Integration of academic, experiential learning; self-assessment, peer feedback to promote model of professional accountability. Corequisites: 042:140, 042:143, 042:145, 042:146, 042:147, 042:150, 042:151, and 042:290, if not taken as prerequisites. Requirements: admission to M.S.W. program.
- 042:292 Advanced Practicum in Family-Centered Practice I and II** arr.  
Two-semester field course; family-centered practice theory and skills implemented in interventions with individuals, families. Repeatable. Corequisites: 042:250, 042:251, 042:252, and 042:270, if not taken as prerequisites. Requirements: completion of M.S.W. foundation courses, and concurrent enrollment in 042:293 (fall) or 042:294 (spring).
- 042:293 Advanced Practicum Seminar in Family-Centered Practice I** 1 s.h.  
Two-semester field course; family-centered practice theory and skills implemented in interventions with individuals, families. Corequisites: 042:292. Requirements: completion of M.S.W. foundation courses.
- 042:294 Advanced Practicum Seminar in Family-Centered Practice II** 1 s.h.  
Continuation of 042:293. Prerequisites: 042:293. Corequisites: 042:292.
- 042:295 Advanced Practicum in Integrated Practice** arr.

Two-semester field course; integrated social work theories and interventions implemented in work with individuals, families, organizations, formal and informal networks. Repeatable. Corequisites: 042:260, 042:261, 042:262, and 042:270, if not taken as prerequisites. Requirements: completion of M.S.W. foundation courses, and concurrent enrollment in 042:297 (fall) or 042:298 (spring).

**042:296 Advanced Practicum in School Social Work**

arr.

Field course; social work theories and interventions implemented in schools. Repeatable. Corequisites: 042:250 or 042:260, 042:251 or 042:261, and 042:252 or 042:262, if not taken as prerequisites. Requirements: completion of M.S.W. foundation courses.

**042:297 Advanced Practicum Seminar in Integrated Practice I**

1 s.h.

Two-semester course; social work knowledge, skills, values, and professional identity integrated in context of advanced practice and direct multisystemic interventions. Corequisites: 042:295 or 042:296.

**042:298 Advanced Practicum Seminar in Integrated Practice II**

1 s.h.

Continuation of 042:297. Prerequisites: 042:297. Corequisites: 042:295 or 042:296.

**042:300 Social Work Proseminar**

1 s.h.

Faculty research related to families, children, and elderly theory, research designs, methodologies, findings, dissemination. Requirements: admission to Ph.D. program.

**042:301 Knowledge Building in Social Work Practice**

3 s.h.

Epistemology of social work practice theories, importance for knowledge building; practice theories of personal and interpersonal change, family life cycle development, empowerment. Requirements: admission to Ph.D. program.

**042:302 Social Policy and Poverty in the U.S.**

3 s.h.

Causes of poverty in the U.S., public policies for low-income families; arguments and evidence offered for and against a particular explanation for poverty in the U.S. or approach to anti-poverty policy; how authors construct their arguments, underlying theory, evidence the authors bring to bear, ways they explore consequences of policy proposals; role of social science theory in advancing knowledge in social policy and research interests. Requirements: admission to a doctoral program.

**042:303 Social Work Research Practicum**

1-6 s.h.

Joint research with faculty; development of research design, choice or construction of measurement tools, selection of sample, collection and analysis of data, writing of a research report. Requirements: admission to Ph.D. program.

**042:304 Thesis Seminar**

3 s.h.

Intensive faculty supervision and peer consultation for preparing thesis proposals; topics include literature synthesis, theory, critical and analytic thinking skills, logical argument, research design, and expectations and standards for scholarly discourse. Requirements: admission to Ph.D. program.

**042:306 Social Work Teaching Practicum**

3 s.h.

Development of knowledge, values; skills essential for effective, culturally competent social work educators; applied teaching experience and seminar. Requirements: admission to Ph.D. program.

**042:330 Ph.D. Dissertation**

arr.

# Sociology

**Chair:** Celesta Albonetti

**Professors:** Celesta Albonetti (Sociology/Law), Jennifer Glass (Sociology/Community and Behavioral Health), Karen V. Heimer, Jae-On Kim (Distinguished Service Professor), Kevin Leicht, Michael Lovaglia

**Professor emeritus:** Charles W. Mueller

**Associate professors:** Robert Baller, Jennifer Glanville, Mary Noonan

**Associate professors emeriti:** John R. Stratton, Stephen G. Wieting

**Assistant professors:** Alison Bianchi, Mary Campbell, Steve Hitlin, Freda Lynn, Anthony Paik, Michael Sauder

**Visiting assistant professor:** Paul Sturgis

**Undergraduate degrees:** B.A., B.S. in Sociology

**Undergraduate nondegree program:** Minor in Sociology

**Graduate degrees:** M.A., Ph.D. in Sociology

**Web site:** <http://www.uiowa.edu/~soc>

## Undergraduate Programs

The department offers a Bachelor of Arts, a Bachelor of Science, and a minor in sociology.

It also partners with the Departments of Economics and Philosophy to offer a Bachelor of Arts in ethics and public policy, an interdisciplinary major administered by the Department of Philosophy in the College of Liberal Arts and Sciences; see Ethics and Public Policy in the Catalog.

A bachelor's degree with a major in sociology provides a liberal arts and sciences education. Although it does not prepare students for a specific career, it provides background for employment in fields such as human services, criminal justice, corrections, sales, public relations, advertising, personnel, applied social research, community organization, and teaching social science in secondary schools. It also provides a foundation for graduate or professional study in social work, urban planning, law, criminal justice, social policy, and similar areas. Finally, the B.A. and B.S. prepare students to work toward advanced degrees in sociology, which qualify them for college or university teaching and work in academic, private, and governmental research.

### Bachelor of Arts

The Bachelor of Arts in sociology requires a minimum of 120 s.h., including at least 34-35 s.h. of work for the major. Several courses required for the major have specific prerequisites, and in some cases, students must earn a minimum grade in a prerequisite course. In planning to complete the major, students must be careful to take courses in the proper sequence.

The following sociology courses may not be used to complete requirements for the major: 034:029 First-Year Seminar, 034:197 Teaching Internship, and 034:198 Directed Individual Study.

In addition to specific courses required for the degree, students are advised to take 6 s.h. of course work in at least one of these departments: anthropology, economics, geography, political science, or psychology. Students also must complete the College of Liberal Arts and Sciences General Education Program.

Transfer students majoring in sociology must meet the same requirements as other sociology students. They must take at least 12 s.h. in sociology at The University of Iowa and must have transfer course work approved for credit toward the major by a sociology advisor.

### INTRODUCTORY COURSES

These courses should be taken early. They lay the foundation for all other work in the major and are prerequisites for the required theory and methods courses.

034:001 Introduction to Sociology Principles	3-4 s.h.
22M:009 Elementary Functions (or a more advanced mathematics course)	4 s.h.

### THEORY AND METHODS COURSES

The three theory and methods courses required for the B.A. should be completed as early as possible. Students must earn a grade of C or higher in 034:009 Sociological Theory, 034:010 Quantitative Data Analysis, and 034:011 Research Methods in order to complete the major. They may take 034:009, 034:010, and 034:011 in the same session, but they may not take 034:010 or 034:011 before 034:009, nor may they take 034:011 before 034:010.

034:009 Sociological Theory	3 s.h.
034:010 Quantitative Data Analysis	3 s.h.
034:011 Research Methods	3 s.h.

**ELECTIVES**

Students complete 15 s.h. of elective course work in sociology, chosen from all the courses offered by the department (except 034:029 First-Year Seminar, 034:197 Teaching Internship, and 034:198 Directed Individual Study). Two electives must be taken after completing 034:011 Research Methods (except 034:002 Social Problems, 034:029 First-Year Seminar, 034:197 Teaching Internship, and 034:198 Directed Individual Study).

**CAPSTONE COURSE**

The capstone course illustrates the student's accomplishments in the major. It is usually taken during the student's last semester of course work for the major. In order to enroll in the capstone course, students must complete 034:011 with a grade of C or higher.

034:195 Capstone Course in Sociology 3 s.h.

**SOCIOLOGY MAJOR PORTFOLIO**

When each student graduates, he or she is required to provide the department with documents that will constitute his or her Sociology Major Portfolio. The portfolio provides a record of the student's development in the department. It also is an attractive set of materials that can serve as evidence of interests and work for prospective employers and graduate schools.

The portfolio should include at least three documents: a paper from the first two years of sociology classes, such as a book review or statement comparing competing theories; a research paper that reports the findings of original research; and a statement summarizing an experience in which the student applied sociological knowledge, such as a report on an internship, a consideration of contributions that sociological information made to a summer job, or a reflection on a period of study abroad.

Together, the materials should display development toward technical correctness in citing others' work, accurate use of sociological concepts, technical proficiency in using research methods, and the ability to explain implications of research findings.

The portfolio may be submitted electronically. Contact the department for more information.

**Bachelor of Science**

The Bachelor of Science in sociology requires a minimum of 120 s.h., including at least 45 s.h. of work for the major, with a minimum of 30 s.h. in sociology. Several courses required for the major have specific prerequisites, and in some cases, students must earn a minimum grade in a prerequisite course. In planning to complete the major, students must be careful to take courses in the proper sequence.

The following sociology courses may not be used to complete requirements for the major: 034:029 First-Year Seminar, 034:197 Teaching Internship, and 034:198 Directed Individual Study.

In addition to the specific courses required for the degree, students are advised to take 6 s.h. of course work in at least one of these departments: anthropology, economics, geography, political science, or psychology. Students also must complete the College of Liberal Arts and Sciences General Education Program.

Transfer students majoring in sociology must meet the same requirements as other sociology students. They must take at least 12 s.h. in sociology at The University of Iowa and must have transfer course work approved for credit toward the major by a sociology advisor.

**INTRODUCTORY COURSES**

These courses should be taken early. They lay the foundation for all other work in the major and are prerequisites for the required theory and methods courses.

034:001 Introduction to Sociology Principles 3-4 s.h.

One of these sequences:

22M:025-22M:026 Calculus I-II 8 s.h.

22M:031-22M:032 Engineering Mathematics I: Single Variable Calculus - Engineering Mathematics II: Multivariable Calculus 8 s.h.

**THEORY AND METHODS COURSES**

The five theory and methods courses required for the B.S. should be completed as early as possible. Students must earn a grade of C or higher in 034:009 Sociological Theory, 034:010 Quantitative Data Analysis, and 034:011 Research Methods in order to complete the major. They may take 034:009, 034:010, and 034:011 in the same session, but they may not take 034:010 or 034:011 before 034:009, nor may they take 034:011 before 034:010.

034:009 Sociological Theory	3 s.h.
034:010 Quantitative Data Analysis	3 s.h.
034:011 Research Methods	3 s.h.
22S:120 Probability and Statistics	4 s.h.

One of these:

026:103 Introduction to Symbolic Logic	3 s.h.
026:104 Introduction to Philosophy of Science	3 s.h.

**ELECTIVES**

Students complete 15 s.h. of elective course work in sociology, chosen from all the courses offered by the department (except 034:029 First-Year Seminar, 034:197 Teaching Internship, and 034:198 Directed Individual Study). Two of the electives must be taken after completing 034:011 Research Methods (except 034:002 Social Problems, 034:029 First-Year Seminar, 034:197 Teaching Internship, and 034:198 Directed Individual Study).

**CAPSTONE COURSE**

The capstone course illustrates the student's accomplishments in the major. It is taken during the student's last semester of course work for the major. In order to enroll in the capstone course, students must complete 034:011 Research Methods with a grade of C or higher.

034:195 Capstone Course in Sociology	3 s.h.
--------------------------------------	--------

**SOCIOLOGY MAJOR PORTFOLIO**

When each student graduates, he or she is required to provide the department with documents that will constitute his or her Sociology Major Portfolio. The portfolio provides a record of the student's development in the department. It also is an attractive set of materials that can serve as evidence of interests and work for prospective employers and graduate schools.

The portfolio should include at least three documents: a paper from the first two years of sociology classes, such as a book review or statement comparing competing theories; a research paper that reports the findings of original research; and a statement summarizing an experience in which the student applied sociological knowledge, such as a report on an internship, a consideration of contributions that sociological information made to a summer job, or a reflection on a period of study abroad.

Together, the materials should display development toward technical correctness in citing others' work, accurate use of sociological concepts, technical proficiency in using research methods, and the ability to explain implications of research findings.

The portfolio may be submitted electronically. Contact the department for more information.

**B.A. or B.S. with Teacher Licensure**

Students who wish to obtain teacher licensure in the social sciences while majoring in sociology should contact the Department of Teaching and Learning in the College of Education.

**Four-Year Graduation Plan**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Note: Sequencing of course work is important in meeting the four-year plan.

### **Bachelor of Arts**

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 034:001 Introduction to Sociology Principles or equivalent, and at least half of the semester hours required for graduation

**Before the seventh semester begins:** a college-level math course numbered 22M:009 Elementary Functions or above, 034:009 Sociological Theory, 034:010 Quantitative Data Analysis, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** 034:011 Research Methods

**During the eighth semester:** enrollment in all remaining course work in the major, including the capstone course and two electives in the major (excluding 034:002 Social Problems, 034:029 First-Year Seminar, 034:197 Teaching Internship, and 034:198 Directed Individual Study), all remaining General Education courses, and a sufficient number of semester hours to graduate

### **Bachelor of Science**

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 034:001 Introduction to Sociology Principles or equivalent, 034:009 Sociological Theory, one sociology elective, and at least half of the semester hours required to graduate

**Before the seventh semester begins:** 034:010 Quantitative Data Analysis, 034:011 Research Methods, calculus I-II, one more sociology elective, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** 22S:120 Probability and Statistics and one more sociology elective

**During the eighth semester:** enrollment in all remaining course work in the major, including the capstone course and two electives in the major (excluding 034:002 Social Problems, 034:029 First-Year Seminar, 034:197 Teaching Internship, and 034:198 Directed Individual Study), all remaining General Education courses, and a sufficient number of semester hours to graduate

### **Honors**

The University of Iowa Honors Program provides a stimulating and integrative educational experience for undergraduate majors who perform at a high level. Membership in the honors program requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

To qualify for the honors program in sociology, students must have a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.33 in the major in sociology courses.

To earn a degree with honors in sociology, students complete the following:

034:100 Honors Proseminar, taken spring semester of the junior year

At least one advanced undergraduate course numbered above 034:100, or a graduate course (instructor's permission to enroll for honors designation is required)

034:199 Honors Research, the senior honors thesis

The honors thesis is conducted under faculty supervision; it gives students an opportunity to conduct sociological research in close consultation with a faculty member of the student's choice.

### **Minor**

The minor in sociology requires a minimum of 15 s.h. in sociology courses, including 12 s.h. in courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The minor must include 034:009 Sociological Theory.

A minor in sociology is a good complement to a number of majors, particularly other social sciences, business, elementary education, or nursing.

### **National Honor Society**

The department sponsors a chapter of Alpha Kappa Delta International Sociology Honor Society. Students who have a cumulative and sociology g.p.a. of 3.00 or higher and have attained junior or higher standing are considered for

membership. Consult the Alpha Kappa Delta faculty advisor for details.

## Graduate Programs

The department offers a Master of Arts and a Doctor of Philosophy in sociology. Graduate study in sociology focuses on the Ph.D. Students are awarded the M.A. as they fulfill requirements for the Ph.D.

The Doctor of Philosophy emphasizes research and aims primarily to prepare sociologists for academic positions in colleges and universities or for research positions in academic, private, and government institutions. Opportunities for research using survey, experimental, and observational methods are readily available in the department.

### Master of Arts

The Master of Arts in sociology requires 30 s.h. of graduate credit with thesis or research paper, and 38 s.h. of graduate credit without. The program without thesis is intended for students seeking a terminal degree and for whom a wider range of course content in sociology is appropriate.

All M.A. students must complete the following with grades of B-minus or higher.

034:201 History of Sociological Theory	3 s.h.
034:214 Introduction to Sociological Data Analysis	3 s.h.
034:215 Sampling, Measurement, and Observation Techniques	3 s.h.
034:216 Linear Models in Sociological Research	3 s.h.

### Doctor of Philosophy

The Doctor of Philosophy in sociology requires a minimum of 72 s.h. of graduate credit. In addition to 034:214 Introduction to Sociological Data Analysis and 034:216 Linear Models in Sociological Research, which are required for the M.A., students must complete two 200-level elective courses in methods/statistics, and an advanced theory course (such as 034:202 Theory Construction and Analysis). Most courses for the Ph.D. are taken in the student's two areas of interest. Candidates also must pass two area examinations, write and defend a dissertation prospectus, and write and successfully defend a dissertation.

Doctoral students take two area exams—one from list A, the other from list A or B. List A has five standing committees: crime, law, and deviance; family; political sociology; social psychology; and stratification. For the list B exam, a student may propose any area that is not covered under List A and for which there is adequate faculty support.

For a detailed statement of graduate study regulations, contact the Department of Sociology. Prospective doctoral students should examine this document carefully.

### Joint Ph.D./J.D.

The Department of Sociology and the College of Law offer the joint Juris Doctor/Doctor of Philosophy. The program is highly individualized, allowing students to explore varied aspects of the relationship between law and society. Joint Ph.D./J.D students may count up to 12 s.h. of graduate credit toward both degrees, with approval from the Department of Sociology and the College of Law.

Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program. For information about the J.D., see Juris Doctor (College of Law) in the Catalog.

### Teaching Assistantship Training

All new graduate students are expected to attend a three-day orientation for teaching assistants before classes begin. In addition, 034:382 Teaching Sociology is required for students who wish to teach their own courses.

### Admission

Admission to graduate study in sociology usually requires an undergraduate g.p.a. of at least 3.25 and a score of 1100 or higher (quantitative and verbal) on the Graduate Record Examination (GRE) General Test. Students whose first language is not English should submit scores on the Test of English as a Foreign Language (TOEFL).

Applicants must meet the admission requirements of the Graduate College; see Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Applicants also must complete the sociology department application and use the department's personal reference forms to obtain three letters of recommendation; forms can be printed from the Department of Sociology web page.

All application materials for fall admission must be received by January 1. The deadline for applying for departmental financial support is January 1. Evaluation of applications begins in early January.

Admission decisions are based on consideration of prior academic performance, personal reference letters, scores on the GRE General Test, and the applicant's statement of reasons for pursuing advanced work in sociology at The University of Iowa. The department has no specific undergraduate course requirements for admission, but a background in the social sciences with some mathematical training is useful. A foreign language is not required for admission, and there is no foreign language requirement for a graduate degree in sociology. To inquire about admission, consult the chair of the admissions committee, Department of Sociology.

## **Financial Support**

The Department of Sociology offers teaching assistantships and research assistantships for graduate students. Students who receive one-half-time teaching or research assistantships work 20 hours each week for faculty members on either teaching or research assignments. Out-of-state students who hold assistantships are assessed tuition at the resident rate. Graduate students also may be eligible for fellowships offered by the Graduate College.

## **Research Centers and Facilities**

### **Center for Asian and Pacific Studies**

The Center for Asian and Pacific Studies provides excellent opportunities for studying Asia from a social science perspective. It supports related Asia studies and offers a monthly seminar that features lively discussions by scholars from many different disciplines.

### **Center for Criminology and Sociolegal Studies**

The Center for Criminology and Sociolegal Studies is an interdisciplinary research and teaching program for the study of crime, law, deviance, social control, and mental health. It sponsors a colloquium series in crime, law, and social control, in which affiliates, graduate students, and outside speakers present their ongoing research, and a working-paper series in which members disseminate research papers to the academic community. The center also provides research support and a research infrastructure for faculty and graduate students and offers graduate research assistantships for interested students. Internship in Criminal Justice and Corrections (034:148) is administered through the center.

### **Center for the Study of Group Processes**

The Center for the Study of Group Processes has an 18-room small-group laboratory with eight computer-controlled subject rooms that provide audiovisual and psychophysiological recording capabilities, two large-group rooms with an adjoining observation room, an audiovisual control room, a sociophysiological instrumentation lab, a virtual social environment lab, and other flexible research office spaces.

### **Institute for Inequality Studies**

The Institute for Inequality Studies (IIS) promotes research on the causes and consequences of social inequality's many forms--class, gender, race, ethnicity, age, sexual orientation, religion, and disability. The institute's mission is to stimulate interdisciplinary exchange; encourage scholarly engagement in research through seminars highlighting current policy-relevant research and methodology; train the next generation of demography and inequality scholars; provide technical and administrative support to researchers working with survey and population data; and facilitate development of collaborative proposals for external funding. IIS also promotes the visibility of social inequality scholarship by sponsoring symposia on inequality research issues that attract community interest.

## **Sociology Courses**

### **For Undergraduates**

The following courses are open only to undergraduates. Courses without prerequisites open to first-year students are 034:001 Introduction to Sociology Principles, 034:002 Social Problems, 034:018 Gender and Society, 034:020 Principles of Social Psychology, 034:029 First-Year Seminar, 034:066 Social Inequality, and 034:158 Economy and Society. All other undergraduate courses are open to first-year students with stated prerequisites.

#### **034:001 Introduction to Sociology Principles**

3-4 s.h.

How individuals are organized into social groups, ranging from intimate groups to bureaucracies, and how these influence individual behavior; nature and interrelationships of basic social institutions, such as family, education, religion, economy. GE: Social Sciences.

**034:002 Social Problems**

3-4 s.h.

Emergence and distribution of selected social problems; alternative solutions; may include population, inequality, female-male relationships, racism, crime. GE: Social Sciences.

**034:009 Sociological Theory**

3 s.h.

Theoretical perspectives in sociology; construction, evaluation of sociological explanations. Prerequisites: 034:001.

**034:010 Quantitative Data Analysis**

3 s.h.

Applied statistics for sociology majors: frequency distributions, graphic presentation, measures of central tendency, measures of variability, elementary probability, populations and samples, sampling distributions, estimation and confidence intervals, hypothesis testing, chi-square test, regression and correlation, analysis of variance; computer software used in data analysis; emphasis on appropriate use and interpretation of statistics in the study of sociological topics. Prerequisites: 034:001. Requirements: sociology major, and 22M:009 or a higher-level math course.

**034:011 Research Methods**

3 s.h.

Basic scientific concepts; emphasis on theoretical thinking, statement of researchable propositions, logic and meaning of proof operant in the research process; general issues in designing social research, including problems of sampling and measurement, analysis, presenting research data, interpreting research findings. Prerequisites: 034:001. Requirements: sociology major, and 22M:009 or a higher-level math course.

**034:029 First-Year Seminar**

1-2 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**034:100 Honors Proseminar**

2 s.h.

Topic development for senior honors projects. Offered spring semesters. Requirements: sociology honors standing.

**034:190 Selected Topics in Sociology**

3 s.h.

Topics vary.

**034:195 Capstone Course in Sociology**

3 s.h.

Senior project illustrating student's accomplishments during his or her undergraduate career; prepared in collaboration with sociology faculty member or other experts in the student's area of sociological interest; record for student's own reflection, information for potential employers and graduate programs. Requirements: grade of C or higher in 034:011.

**034:196 Field Experience**

arr.

Supervised field experience in sociology; primarily for students participating in Washington Center internship. Requirements: sociology major and junior standing.

**034:197 Teaching Internship**

3 s.h.

Experience providing supervised support for instructors teaching basic courses in sociology. Requirements: appointment as sociology undergraduate teaching aide.

**034:198 Directed Individual Study**

arr.

**034:199 Honors Research**

arr.

Research projects under faculty supervision.

**Advanced Courses****Social Theory****034:200 Graduate Proseminar**

2 s.h.

General introduction to department and discipline for entering graduate students; departmental and graduate college requirements, program and career planning, interaction with faculty members, consideration of student interests and concerns. Two semesters beginning in fall. Requirements: sociology graduate standing.

- 034:201 History of Sociological Theory** 3 s.h.  
Ideas of major 19th- and 20th-century social thinkers (e.g., Marx, Weber, Durkheim, Simmel, Mead).
- 034:202 Theory Construction and Analysis** 3 s.h.  
Contemporary theoretical issues and nature of theory, theory's place in research, strategies of theory construction.  
Requirements: sociology graduate standing.
- 034:203 Seminar: Selected Topics in Sociological Theory** 3 s.h.  
Repeatable.
- 034:205 Seminar: Selected Topics in Sociology** 3 s.h.  
Current theoretical and methodological issues. Requirements: sociology graduate standing.
- 034:213 Qualitative Methods** 3 s.h.  
Logic of qualitative research; basic skills necessary for a qualitative research project. Requirements: sociology graduate standing.
- 034:214 Introduction to Sociological Data Analysis** 3 s.h.  
Statistical measures for descriptive methods and association; logic of statistical inference, hypothesis testing; background essential to understanding linear models, models for categorical data analysis. Requirements: introductory statistics or graduate standing.
- 034:215 Sampling, Measurement, and Observation Techniques** 3 s.h.  
Research designs; sampling designs and techniques; questionnaire construction, interviewing techniques; participant and nonparticipant observation; coding and preparation of data for analysis; measurement techniques, reliability, and validity. Requirements: 034:214 or graduate standing.
- 034:216 Linear Models in Sociological Research** 3 s.h.  
Statistical techniques associated with general linear model; emphasis on multiple regression, its generalizations; corresponding computer programs. Requirements: 034:214 or graduate standing.
- 034:218 Advanced Statistical Modeling of Data** 3 s.h.  
Models for analysis of categorical data, including loglinear, logit, related discrete data models. Requirements: advanced graduate standing.
- 034:219 Structural Equation Modeling** 3 s.h.  
Overview of structural equation models (SEMs), also known as LISREL models, covariance structure models; specific types of SEMs, such as simultaneous equations and confirmatory factor analysis; intermediate topics.

## **Social Psychology**

- 034:020 Principles of Social Psychology** 3-4 s.h.  
Introduction to theory and research in small groups; interpersonal and intergroup processes. GE: Social Sciences.
- 034:023 The Social Psychology of Leadership** 3 s.h.  
Techniques, proven by research, that enhance students' ability to know, work with, and lead people; recent research in social psychology, how it applies to practical leadership problems.
- 034:125 Small Group Analysis** 3 s.h.  
Internal processes governing small groups (e.g., friendship cliques, families, the president's cabinet, committees); how small groups relate to the larger social environment; groups' impact on their members. Prerequisites: 034:001 or 034:002.
- 034:128 Sociology of Mental Illness** 3 s.h.  
The socially constructed nature of mental illness; theoretical perspectives and research on social antecedents and social consequences of mental health. Prerequisites: 034:001 or 034:002 or 034:020.
- 034:220 Contemporary Approaches to Social Psychology** 3 s.h.

Review and critical analysis of current theoretical approaches to and systems of social psychological analysis.

**034:221 Seminar: Selected Topics in Social Psychology** 3 s.h.  
Selected theoretical and methodological issues. Repeatable.

## **Deviance, Delinquency, Crime, and Law**

**034:040 Criminology** 3 s.h.  
Nature and causes of crime; the criminal justice process, correctional treatment, crime prevention. Prerequisites: 034:001 or 034:002.

**034:045 Global Criminology** 3 s.h.  
Crime and the control of crime at the transnational and sub-national levels of analysis; focus on non-U.S. societies; consequences of economic, political, and cultural globalization.

**034:141 Juvenile Delinquency** 3 s.h.  
Delinquency as an individual and social problem; theories of the causes of juvenile delinquency; law enforcement and the juvenile court; methods of correction and prevention. Prerequisites: 034:001 or 034:002.

**034:143 Gender and Violence** 3 s.h.  
Extent and nature of gendered violence, interpretation of patterns using feminist theory and perspectives on masculinities and heterosexism; examination of interpersonal violence, including criminal violence committed by women and men, violence against women and men (victimization), spousal/intimate partner abuse, youth gangs, bullying in schools, sexual violence, femicide, and genocide. Same as 131:161.

**034:146 Deviance and Control** 3 s.h.  
Norm violation or deviant behavior; behaviors that, while deviant, do not violate legal norms, and ways of controlling these behaviors that do not involve the criminal justice system; ways of explaining deviance, consequences of deviant behavior for the deviant actor. Prerequisites: 034:001 or 034:002.

**034:148 Internship in Criminal Justice and Corrections** 1-5 s.h.  
Supervised field work in a criminal justice or correctional agency. Prerequisites: 034:040 or 034:141. Requirements: sociology major, junior standing, and consent of director of the Center for Criminology and Socio-Legal Studies.

**034:149 Sociology of Criminal Punishment** 3 s.h.  
Sociological theories and research on criminal punishment; classical and contemporary theories; research on imprisonment and capital punishment. Prerequisites: 034:009.

**034:182 Sociology of Law** 3 s.h.  
Conceptual, historical, and theoretical issues of law and operation of the criminal justice system; theory and research on law and the criminal justice system. Prerequisites: 034:001 or 034:002.

**034:186 Criminal Legal System** 3 s.h.  
Discretionary decision making in the U.S. criminal courts, from arrest through sentencing; legal and sociolegal issues relevant to each stage of felony adjudication; sociological and social-psychological theories of decision making in adjudication, empirical research testing these theories. Prerequisites: 034:001 or 034:002.

**034:240 Seminar: Criminological Theories** 3 s.h.  
Theories of crime causation and their relationships to the cultures in which they have functioned.

**034:242 Communities and Crime** 3 s.h.  
Distribution of crime as rooted in community-level conditions such as concentrated affluence or poverty, racial residential segregation, unemployment, family disruption, and immigration. Requirements: sociology graduate standing.

**034:246 Morals, Markets, and Crime** 3 s.h.  
Impact of markets on the moral and social order of advanced capitalist societies; market conditions that promote or suppress crime. Requirements: sociology graduate standing.

**034:282 Sociology of Law Seminar**

3 s.h.

Relationship between law and society explored through writings and research of classical and contemporary sociologists and legal scholars. Requirements: sociology graduate standing.

**Family, Life-Style, Children, Aging****034:018 Gender and Society**

3-4 s.h.

Role and status of women in society; sex differences, sex role socialization, theories about origin and maintenance of sexual inequalities, changes in social life cycle of women, implications for social institutions and processes; focus on contemporary United States. GE: Cultural Diversity. Same as 131:018.

**034:061 The American Family**

3 s.h.

Structure and process; change over the life cycle; interrelations with other institutions; historical changes; variations by social class and ethnic group. Prerequisites: 034:001. GE: Cultural Diversity.

**034:075 Fertility and Reproduction**

3 s.h.

Exploration of when, why, how, and with whom Americans bear children, comparison to other developed and developing countries in the world; infertility and its treatments; ethics of surrogacy; voluntary childlessness; rapid rise of nonmarital childbearing in the U.S. and other countries; politics of childbirth; declining populations; rapid aging of rich where women have basically stopped having children. Same as 131:075, 154:075.

**034:159 Families in Comparative Perspective**

3 s.h.

Prerequisites: 034:001 or 034:061.

**034:162 Work and Family Institutions**

3 s.h.

Contemporary problems in the integration of work and family life; origins of work-family conflict in process of industrialization; effects of job-family conflicts on mothers, fathers, children; cross-cultural differences in dealing with work-family conflict. Prerequisites: 034:001 or 034:002. Same as 131:160.

**034:266 Gender Inequalities**

3 s.h.

Current sociological research on public policies that affect family life and well-being; divorce and child custody policies, teen pregnancy and abortion, family poverty, child care and work-family policies. Same as 131:266.

**034:269 Seminar: Selected Topics in Family Sociology**

3 s.h.

Selected theoretical and methodological issues. Repeatable. Requirements: social science graduate standing.

**Social Institutions, Social Change****034:022 Introduction to Social Work**

4 s.h.

Social welfare as a social institution; settings, methodologies of social work, practice; profession of social work; historical development of American social welfare, social work; a minimum of 45 hours volunteer work. Requirements: sophomore or higher standing. Same as 042:022.

**034:126 Social Movements in the U.S.**

3 s.h.

Social unrest; crowd behavior; social movements treated as a form of social change. Prerequisites: 034:001 or 034:002.

**034:153 Public Opinion**

3 s.h.

Role in making public policy; formation, change of political attitudes and opinions; political ideology; measurement of public opinion; how opinion polls are conducted; experience with interviewing and conducting public opinion research. Same as 030:171.

**034:179 Sociology of Education**

3 s.h.

Overview of the sociology of education; historical and current sociological perspectives on education; race, class, gender inequality in schooling; higher education; contemporary debates in education, such as affirmative action, school choice; service-learning component. Prerequisites: 034:001 or 034:002.

**034:285 Complex Organizations**

3 s.h.

**034:310 Education and Social Change**

2-3 s.h.

Role of educational institutions, in connection with political and economic structures, in the process of social change; illumination of theories of social change through case studies of educational systems in both less-developed and industrialized nations. Same as 07B:210.

**Social Class, Inequality, Race, Organizations, Politics****034:066 Social Inequality**

3 s.h.

Major theoretical perspectives for understanding inequality in economics, power, prestige; the magnitude of social inequality in the United States; sex and race inequality; trends in and causes of social mobility; selected consequences of social inequality. GE: Cultural Diversity.

**034:135 Sociology of Sexuality**

3 s.h.

Sociological perspectives on sexuality, including theoretical and conceptual developments, empirical regularities, and social implications; sexual expression in the United States. Prerequisites: 034:001 or 034:002. Same as 154:145.

**034:150 Political Sociology**

3 s.h.

Sociological analysis of political behavior and belief, group conflict and political process, group consensus, political institutions, power and policy-making systems; relationship of the political system to the social system. Prerequisites: 034:001.

**034:155 Comparative Studies in Race and Ethnicity**

3 s.h.

Multidisciplinary study of intergroup relations, with emphasis on historical, sociological, and social psychological issues in the study of American minority groups. GE: Cultural Diversity.

**034:156 Gender Inequality**

3 s.h.

Gender issues in major social institutions such as family, education, workplace, culture; marriage, family care, childhood gender socialization, occupational segregation, wage gap, household division of labor, and so forth. Prerequisites: 034:001 or 034:002.

**034:158 Economy and Society**

3 s.h.

Economic debates that faced advanced market economies in the 20th century with extensions to the developing world; development and maintenance of investment elites and labor markets, development and extension of state activity.

**034:164 Organizations and Modern Society**

3 s.h.

Approaches to the sociological study of economic and noneconomic organizations; the role of power and authority within the organization, and between the organization and its environment. Prerequisites: 034:001 or 034:020.

**034:165 Sociology of Work and Occupations**

3 s.h.

Work commitment; prestige of occupations; occupational and professional careers; occupational groups and organizations; alienation; women, minorities, and occupational structures; capitalism and occupations. Prerequisites: 034:001 or 034:020.

**034:170 The Connected Age: A Sociological Introduction to Social Networks**

3 s.h.

Introduction to the basic properties of network structure (e.g., density, mutuality, cliques); substantive insights regarding the role and consequences of networks in social life; the role of networks in job searching/hiring processes; how innovations diffuse through networks; and relationships as social resources. Prerequisites: 034:001 or 034:002.

**034:175 Community and Urban Sociology**

3 s.h.

Impact of urbanization on social life, social networks; how social forces shape patterns of urban growth; racial segregation, gentrification; consequences of the growth of suburbs; urban crises, including concentrated poverty and crime. Prerequisites: 034:001 or 034:002.

**034:253 Social Stratification**

3 s.h.

Classical and contemporary theories; current research on the causes and magnitude of inequality in economics, power, and prestige; social mobility; critical issues in stratification.

**034:254 Seminar: Selected Topics in Social Stratification**

3 s.h.

Requirements: social science graduate standing.

**034:256 Gender Stratification Seminar**

3 s.h.

Occupational gender segregation; gender gap in pay; role of family caregiving in women's lower pay; devaluation of caregiving work; comparable worth. Same as 131:256.

**034:257 Seminar: Sociology of Labor Markets**

3 s.h.

Sociological and economic theories and research concerning area/regional/local labor markets, industrial sectors and the dual labor market, occupational/internal labor markets; other structural explanations of inequality.

**034:258 Seminar: Economy and Society**

3 s.h.

Relationships between social classes and nation-states in capitalist societies; historical experience of the United States; comparative perspective, especially regarding Western Europe.

**034:259 Social Network Analysis**

3 s.h.

Relational, data-oriented approach to representing linkages or relationships among social units, and to examine the relevance of these social structures in social processes. Requirements: basic multiple regression.

**Teaching****034:382 Teaching Sociology**

2-3 s.h.

Supervised preparation for teaching sociology courses; literature on teaching; course objectives, alternative teaching techniques; preparation of course syllabus, lectures, discussions, exams. Requirements: advanced sociology graduate standing.

**Independent Reading and Research****034:381 Summer Research Practicum**

2 s.h.

Students discuss their participation in ongoing research, review and critique each other's projects, write research reports describing their work. Requirements: sociology graduate standing.

**034:383 Readings and Research Tutorial**

arr.

Repeatable.

**034:385 Master's Thesis**

arr.

Repeatable.

**034:386 Ph.D. Dissertation**

arr.

Repeatable.

# Spanish and Portuguese

**Chair:** Mercedes Niño-Murcia

**Professors:** Thomas E. Lewis, Adriana Méndez Rodenas

**Associate professors:** María José Barbosa, María A. Duarte, Denise K. Filios, Brian Gollnick, Paula M. Kempchinsky, Philip W. Klein, Judith E. Liskin-Gasparro, Ana Merino, Kathleen Newman (Spanish and Portuguese/Cinema and Comparative Literature), Mercedes Niño-Murcia, Diana Vélez

**Adjunct associate professor:** Sue E. Otto

**Assistant professors:** Roberto Ampuero, Amber Brian, Luis Martín-Estudillo, Ana Rodríguez, Santiago Vaquera-Vásquez, Sarah Ann Wells

**Lecturers:** Gay Allan, Ozzie Díaz-Duque, Deanna Johnson, Pilar Marcé, Maria Nilsson

**Undergraduate degrees:** B.A. in Spanish, Portuguese

**Undergraduate nondegree programs:** Minor in Spanish, Portuguese

**Graduate degrees:** M.A., Ph.D. in Spanish

**Web site:** <http://www.uiowa.edu/~spanport>

The Department of Spanish and Portuguese provides course work for undergraduate and graduate majors in Spanish or Portuguese and for the satisfaction of foreign language requirements for undergraduate and graduate degrees in other fields. It also participates in several study abroad programs.

## Undergraduate Programs

The department offers a Bachelor of Arts in Spanish and in Portuguese, and a minor in Spanish and in Portuguese.

Elementary and intermediate courses in Spanish language interrelate five performance goals--listening, reading, speaking, writing, and cultural knowledge--in a staged progression whose overall goal is to develop proficiency. The curriculum emphasizes acquisition of Spanish language skills in communicative contexts, enrichment of vocabulary through an introduction to Hispanic culture, and development of grammatical accuracy in speaking and writing.

The beginning course in Portuguese is for students without previous study or experience with the language. There also is a special Portuguese course for students who already know Spanish. Portuguese classes provide a great deal of individual attention in an informal language-learning environment. Courses emphasize speaking, comprehending, reading, and writing Brazilian Portuguese. They incorporate cultural material in the form of videos and music.

### Bachelor of Arts in Spanish

The Bachelor of Arts in Spanish requires a minimum of 120 s.h., including 36 s.h. of work for the major. The program is built on course work in Spanish peninsular and Spanish American literature, Hispanic cultures, Hispanic linguistics, and advanced language skills. The goal of the major is twofold: to study content areas related to the Spanish language, such as literature, culture, and linguistics; and to develop proficiency in the Spanish language in all four skills: speaking, listening, reading, and writing.

Students who major in Spanish may go on to graduate study in areas such as Spanish and Spanish American literature, Hispanic linguistics, or comparative literature. They also may combine their Spanish studies with other areas to prepare for career opportunities in international business, government, travel, journalism, or communications, where knowledge of another language and other cultures is essential.

The required 36 s.h. (12 courses) of work for the major must be earned in courses more advanced than those required for the General Education Program. Students complete core requirements consisting of one course from each of the principal academic areas of the department (see "Required Core" below). The remaining eight courses are electives, which may focus on one or more of the principal areas or may include a broad range of courses in the department (see "Electives" below). Spanish majors are required to take at least three Spanish courses (prefix 035) numbered 170 or above; 035:195 Senior Seminar is recommended for all Spanish majors.

Students also must complete the College of Liberal Arts and Sciences General Education Program.

#### REQUIRED CORE

One course in Hispanic linguistics from these:

035:121 Introduction to Hispanic Linguistics	3 s.h.
035:122 Spanish Sound Structure	3 s.h.
035:123 Foundations in Sociolinguistics	3 s.h.
035:124 Introduction to Bilingualism	3 s.h.
035:126 Spanish Applied Linguistics	3 s.h.
035:128 Introduction to Spanish Language Acquisition	3 s.h.
035:129 Structure of the Spanish Language	3 s.h.
035:184 Linguistic Aspects of Second Language Acquisition	3 s.h.
035:185 Topics in Hispanic Linguistics	3 s.h.

035:186 Introduction to Spanish Syntax	3 s.h.
035:187 Spanish Word Formation	3 s.h.
035:188 History of the Spanish Language	3 s.h.
035:189 Introduction to Spanish Phonology	3 s.h.

One course in Spanish peninsular literature from these:

035:110 Readings in Spanish Literature	3 s.h.
035:151 Literature in the Time of Cervantes	3 s.h.
035:152 Romanticism and Revolution in Spain	3 s.h.
035:155 Hispanic Institute: Literature	3 s.h.
035:156 Spanish Literature of the Transition	3 s.h.
035:157 Contemporary Spanish Short Story	3 s.h.
035:160 The Cid in History and Legend	3 s.h.
035:161 Modern and Contemporary Spanish Literature	3 s.h.
035:180 Spanish Golden Age Fiction	3 s.h.
035:181 Topics in Spanish Literature	3 s.h.
035:182 Society and Poetry: Spanish Lyric	3 s.h.
035:183 Don Quijote	3 s.h.

One course in Spanish American literature from these:

035:111 Readings in Spanish American Literature	3 s.h.
035:131 Contemporary Spanish American Fiction	3 s.h.
035:132 Spanish American Poetry	3 s.h.
035:134 Spanish American Short Story	3 s.h.
035:140 Spanish American Literature of Fantasy	3 s.h.
035:144 Latin American Women Writers	3 s.h.
035:147 Topics in National Literatures and Cultures	3 s.h.
035:173 Colonial Spanish American Literature	3 s.h.
035:177 Literature and Mass Culture in Latin America	3 s.h.
035:178 Topics in Spanish American Literature	3 s.h.

One course in culture (peninsular or Spanish American) from these:

035:113 Screening Latin America	3 s.h.
035:130 Cultures of Spanish America	3 s.h.
035:135 Latinos in the United States	3 s.h.
035:137 Introduction to Chicano Literature and Culture	3 s.h.
035:145 Latin America Cinema	3 s.h.
035:148 Topics in Cinema, Literature, and Society	3 s.h.
035:149 Visual Culture: Colonial Spanish America	3 s.h.
035:150 Cultures of Spain	3 s.h.
035:153 Madrid	3 s.h.
035:154 Hispanic Institute: Culture	3 s.h.
035:172 Topics in Cultural Studies	3 s.h.
035:174 Latino/a Popular Culture	3 s.h.
035:179 Islamic Cultural Presence in Spain	3 s.h.
035:190 Chicano Cinema	3 s.h.
035:191 Topics in Latin American Cinema	3 s.h.
035:192 Topics in Film Studies	3 s.h.

## **ELECTIVES**

Eight elective courses in Spanish 24 s.h.

The eight electives may include course work in Spanish language skills as well as more advanced language courses that focus on specialized language functions and purposes. They also may include courses in Portuguese or in related areas from other departments, such as history, anthropology, comparative literature, international studies, or linguistics, subject to restrictions (see "Restrictions" below).

## **RESTRICTIONS**

All courses taken for the major must be numbered 100 or above. A maximum of five of the following courses or equivalent transfer or study abroad courses (as determined by the department's study abroad advisor) may be applied toward the major.

035:103 Spanish Language Skills: Writing	3 s.h.
035:104 Hispanic Institute: Language	3 s.h.
035:106 Spanish Language Skills: Speaking	3 s.h.
035:117 Introduction to Spanish-English Translation	3 s.h.
035:118 Business Spanish	3 s.h.
035:119 Journalistic Writing in Spanish	3 s.h.
035:120 Taller Basico de Escritura Creativa	3 s.h.
035:139 Advanced Spanish Language Skills: Writing	3 s.h.
035:141 Advanced Spanish Language Skills: Speaking	3 s.h.
035:168 Advanced Business Spanish	3 s.h.
038:103 Composition and Conversation	3 s.h.

Students may not count 035:116 Spanish Composition and Grammar (if taken after spring 2010) or 035:165 Advanced Spanish Grammar toward the Spanish major. Credit from 038:100 Accelerated Elementary Portuguese does not count toward the Spanish major. Of the 6 s.h. earned in 038:101 Accelerated Intermediate Portuguese, 3 s.h. may be applied toward the Spanish major. Students may count a maximum of 6 s.h. of course work in Portuguese toward the Spanish major.

A maximum of 6 s.h. of related course work from outside the department may be applied toward the Spanish major. Related courses must be approved by the director of undergraduate studies and must be numbered 100 or above. For a list of approved related courses, contact the Department of Spanish and Portuguese.

Students may count a maximum of 6 s.h. in courses taught in English, either in the Department of Spanish and Portuguese or in other departments, toward the Spanish major.

A maximum of 15 s.h. of credit in approved courses may be transferred from other institutions toward the requirements for the major in Spanish.

Advanced undergraduates preparing to earn a B.A. with honors may enroll in graduate courses with the permission of their advisor and the department chair. Ordinarily, permission is granted only to students who have completed a minimum of 30 s.h. of work for the major and whose g.p.a. in the major is 3.75 or higher.

### **B.A. with Teacher Licensure in Spanish**

Spanish majors interested in teaching Spanish at the elementary and/or secondary level must successfully complete the requirements for the Spanish major as well as the requirements for teacher licensure students administered by the College of Education's Teacher Education Program in foreign language. For more information, contact the Department of Teaching and Learning.

### **Bachelor of Arts in Portuguese**

The Bachelor of Arts in Portuguese requires a minimum of 120 s.h., including at least 30 s.h. of work for the major. Students must complete the courses listed under "Prerequisites" below (12 s.h.), or their equivalents, before they may begin fulfilling requirements for the major.

Portuguese is spoken in Portugal, Brazil, Angola, Mozambique, Cape Verde, and Guine-Bissau. There are more speakers of Portuguese in South America than there are of Spanish. Knowledge of Portuguese and of Luso-Brazilian culture is extremely helpful for students interested in career opportunities in international business, government, or related fields.

The major in Portuguese requires the following courses or their equivalents. All course work in the major must be more advanced than second-year level. Courses listed under "Prerequisites" do not count toward the 30 s.h. of work for the major.

Students also must complete the College of Liberal Arts and Sciences General Education Program.

#### **PREREQUISITES TO COURSE WORK FOR THE MAJOR**

038:100 Accelerated Elementary Portuguese	6 s.h.
038:101 Accelerated Intermediate Portuguese	6 s.h.

**REQUIRED COURSES**

038:103 Composition and Conversation	3 s.h.
038:105 Brazilian Literature Before 1900	3 s.h.
038:106 Brazilian Literature After 1900	3 s.h.
038:107 Introduction to Portuguese Literature	3 s.h.
038:120 Topics in Luso-Brazilian Culture	3 s.h.

**ELECTIVES**

Portuguese courses numbered above 038:102 15 s.h.

A maximum of 6 s.h. may be taken in approved courses in related areas (e.g., art, anthropology, comparative literature, geography, history, Latin American studies, linguistics, sociology, Spanish).

**Four-Year Graduation Plan****B.A. in Spanish**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

**Before the third semester begins:** Intermediate Spanish I (or equivalent second-year, first-semester competence in Spanish) and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** two courses in Spanish beyond Intermediate Spanish II (or equivalent second-year, second-semester competence) and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** four more courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** a total of nine courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

**B.A. in Portuguese**

**Before the third semester begins:** competence in first-year Portuguese and at least one-quarter of the semester hours needed for graduation

**Before the fifth semester begins:** competence in intermediate Portuguese and at least one-half of the semester hours needed for graduation

**Before the seventh semester begins:** three or four additional courses for the major and at least three-quarters of the semester hours needed for graduation

**Before the eighth semester begins:** a total of seven courses in the major

**During the eighth semester:** enrollment in remaining major course work, any remaining General Education courses, and sufficient semester hours to graduate

**Honors****Honors in Spanish**

Admission to the honors program in Spanish requires a cumulative University of Iowa g.p.a. of at least 3.33 and a g.p.a. of at least 3.50 in Spanish (contact the University of Iowa Honors Program for more information about honors study at Iowa). Graduation with honors in Spanish requires that one course (3 s.h.) taken to complete major requirements be chosen for honors designation, in consultation with the department honors advisor. It also requires registration for 3 s.h. in 035:198 Honors: Research and Thesis. To complete 035:198 Honors: Research and Thesis successfully, students must present an honors thesis written in Spanish and must present it orally to a faculty committee in a meeting conducted in Spanish.

## Honors in Portuguese

Admission to the honors program in Portuguese requires a cumulative g.p.a. of at least 3.33 and a g.p.a. of at least 3.50 in Portuguese (contact the University of Iowa Honors Program for more information about honors study at Iowa). Graduation with honors in Portuguese requires that students earn 3 s.h. in 038:198 Honors Research and Thesis, plus 3 s.h. in a course chosen in consultation with the department honors adviser. Both courses (6 s.h.) count toward the total 30 s.h. required for the major in Portuguese. Students must write an honors thesis and present it orally to a committee of three faculty members.

## Minor in Spanish

The minor in Spanish requires a minimum of 18 s.h. in Spanish courses, including 15 s.h. in 100-level courses taken at The University of Iowa or in a University of Iowa study abroad program. At least one of the 100-level courses must be in Spanish or Spanish American literature or culture, or in Hispanic linguistics. Students may not count 035:116 Spanish Composition and Grammar (if taken after spring 2010) or 035:165 Advanced Spanish Grammar toward the Spanish minor. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. All courses for the minor must be taught in Spanish.

## Minor in Portuguese

The minor in Portuguese requires a minimum of 15 s.h. in Portuguese courses, including 12 s.h. in advanced courses taken at The University of Iowa or in a University of Iowa study abroad program. For the minor, courses numbered 038:103:103 Composition and Conversation and above are considered advanced. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

## Courses for Nonmajors

The department offers several opportunities for students who wish to study Spanish or Portuguese--languages that are spoken in many cultures around the world and are important in the study of literature, art, film, and many other disciplines.

All new students--including transfer students--who have previous course work or other experience with Spanish should take the Spanish Foreign Language Placement Test, offered at no charge during summer orientation programs and monthly by Evaluation and Examination Service. The test helps determine the level at which a student should begin Spanish language study at The University of Iowa. Students should take the test before they register for their first University of Iowa Spanish course.

Students with experience in Portuguese may receive individual evaluations from the department.

The department's language courses are open to any student who has satisfied the specified prerequisites.

## General Education Foreign Language Requirement

The department offers course sequences in Spanish and in Portuguese that may be used to fulfill the foreign language requirement of the General Education Program.

### SPANISH

The following sequence fulfills the General Education foreign language requirement and is appropriate for students who have no background in Spanish.

035:001 Elementary Spanish I	5 s.h.
035:002 Elementary Spanish II	5 s.h.
035:011 Intermediate Spanish I	5 s.h.
035:012 Intermediate Spanish II	5 s.h.

Students with previous knowledge of Spanish may substitute 035:005 Elementary Spanish Review (a one-semester intensive course) for 035:001 and 035:002.

The accelerated course 035:013 Accelerated Intermediate Spanish combines 035:011 and 035:012 into one semester and may be appropriate for some students.

The Spanish Foreign Language Placement Test determine where students should begin study. Students should consult with their advisors.

### PORTUGUESE

Only one course sequence in Portuguese fulfills the General Education foreign language requirement. It consists of two intensive courses that combine two semesters into one, so that the sequence is completed in a total of two semesters rather than four. Both courses are open to any student with an interest in the language, including entering first-year students.

038:100 Accelerated Elementary Portuguese

6 s.h.

038:101 Accelerated Intermediate Portuguese

6 s.h.

### **Other Courses for Nonmajors**

The department offers several literature, film, and cultural survey courses of general interest that are taught in English.

In addition to using Spanish or Portuguese language courses to fulfill the General Education foreign language requirement, undergraduate students may fulfill other General Education Program requirements with 035:020 Contemporary Spanish American Narrative, 035:060 Latino/a Literature in the U.S., and 038:020 Contemporary Brazilian Narrative, which are taught in English.

### **Related Certificates**

#### **Certificate in International Business**

The College of Liberal Arts and Sciences and the Henry B. Tippie College of Business offer the Certificate in International Business. The program entails study of international business and economics; international relations and institutions; a foreign language, such as Spanish or Portuguese; and the art, literature, culture, and/or politics of a geographic area. The certificate is designed not only for students who intend to pursue careers in international business but also for those interested in gaining a better understanding of the global economy and a broader awareness of the political, historical, and social environment in which international business operates.

The certificate requires 29 s.h. It offers a wide range of electives, permitting students to tailor areas of specialization to their interests and to complement majors in both liberal arts and sciences and business administration.

For more information, see International Business in the Catalog and contact CLAS Academic Programs & Services in the College of Liberal Arts and Sciences or the Undergraduate Program Office in the Tippie College of Business.

#### **Certificate in Latin American Studies**

The department plays an important and active role in the Latin American Studies Program, an interdisciplinary undergraduate program focusing on the history, politics, social organization, economy, art, music, religion, and literature of Latin America. Work in the program may lead to a certificate or a minor in Latin American studies.

The Certificate in Latin American Studies requires a minimum of 24 s.h. Students must have sufficient competence in Spanish or Portuguese to do background readings in the language before enrolling in the required senior seminar.

See Latin American Studies in the Catalog for detailed information about the certificate or minor.

### **Study Abroad**

#### **Study Abroad Programs in Spanish**

The department participates in study abroad programs in Spain and Latin America; most of these programs offer both summer and semester or yearlong programs. The programs in Spain include the Board of Regents, State of Iowa, program in Valladolid (summer only); USAC (University Studies Abroad Consortium) programs in Alicante, Bilbao, Madrid, and San Sebastián; and CIEE programs in Alcalá de Henares, Alicante, Barcelona, Madrid, Palma de Mallorca, and Seville.

The programs in Latin America include USAC programs in Chile (Santiago), Costa Rica (Heredia, Puntarenas, and San Ramón), and Mexico (Puebla); CIEE programs in Argentina (Buenos Aires), Chile (Santiago and Valparaíso), Dominican Republic (Santiago), Mexico (Guanajuato), and Peru (Lima). They also include the CIC Latin America Health, Nutrition, and Environmental Issues Program in Santiago, Dominican Republic, and the CIC Summer Program in Guadalajara, Mexico. For information about other foreign study programs in Spanish, contact the Office for Study Abroad.

Participation in a number of different programs allows the department to offer study abroad opportunities that take into account a variety of student interests and needs. Credit earned in these or other study abroad programs may be applied toward the requirements for the Spanish major or minor. The amount of credit that may be accepted varies according to the program.

Interested students should contact the department's study abroad advisor. Credit earned in study abroad programs other than those listed above counts as transfer credit and is subject to the 15 s.h. maximum allowed for the major and the 3 s.h. maximum allowed for the minor.

## Study Abroad Programs in Portuguese

The department offers a seven-week program in Salvador, Bahia, Brazil that includes courses in Portuguese language, culture, and literature. Contact the Office for Study Abroad for details.

## Graduate Programs

The department offers two graduate degrees: a Master of Arts and a Doctor of Philosophy in Spanish.

### Master of Arts

The Master of Arts in Spanish requires 30 s.h. of graduate credit. It offers two emphases: literature, which provides training in literary analysis and broad knowledge of representative works in principal areas of Hispanic literature; and linguistics, which provides training in linguistic analysis and argumentation and broad knowledge of the principal subfields of Hispanic linguistics. Applicants to the M.A. program should have completed the equivalent of the undergraduate Spanish major with a g.p.a. of at least 3.00 in course work for the major.

A maximum of 9 s.h. of graduate credit in approved courses may be transferred from other institutions toward the 30 s.h. required for the M.A.

The M.A. requires the following 10 courses.

#### LITERATURE EMPHASIS COURSES

035:200 Foreign Language Teaching Methods	3 s.h.
Two courses in Spanish linguistics numbered 035:170 and above	6 s.h.
Two courses in Spanish (peninsular) literature numbered 035:170 and above	6 s.h.
Two courses in Spanish American literature numbered 035:170 and above	6 s.h.
One course in literary theory	3 s.h.
Two electives	6 s.h.

At least eight of the 10 literature emphasis courses must be taken in the Department of Spanish and Portuguese and must be numbered above 035:170. The remaining two may be taken either in the Department of Spanish and Portuguese (numbered above 035:170) or in related departments, subject to approval by the director of graduate studies.

#### LINGUISTICS EMPHASIS COURSES

035:200 Foreign Language Teaching Methods	3 s.h.
035:204 Introduction to Spanish Linguistic Analysis	3 s.h.
One course in Spanish or Spanish American literature numbered 035:170 and above	3 s.h.
Two courses in syntax	6 s.h.
Two courses in phonetics/phonology	6 s.h.
One course in history of the Spanish language, language variation, or applied linguistics/language acquisition	3 s.h.
One course in applied linguistics or language	3 s.h.
One elective	3 s.h.

At least six of the 10 linguistics emphasis courses must be taken in the Department of Spanish and Portuguese and numbered above 035:170. The remaining four may be taken in the Department of Spanish and Portuguese (numbered above 035:170) or the Department of Linguistics.

#### LANGUAGE TOOL REQUIREMENT

M.A. students must complete the equivalent of one year of college-level study of any approved second foreign language; Portuguese is highly recommended. They may satisfy this requirement either by examination or through courses taken at The University of Iowa or another accredited university; such course work does not count toward the 30 s.h. required for the M.A.

#### EXAMINATIONS

The M.A. comprehensive examination includes written and oral components. The written portion consists of a two-hour examination in each of three areas; an oral examination follows, usually lasting 90 minutes. The examining committee

is composed of four departmental faculty members.

Students in the literature emphasis may choose to be examined in three literature areas or in two literature areas and one linguistics area. At least one literature area must be in Spanish literature and at least one must be in Spanish American literature. If three literature areas are chosen, at least one must represent literature written before 1700 (peninsular or Spanish American).

Students in the linguistics emphasis may choose to be examined in three linguistics areas or in two linguistics areas and one literature area. At least one of the linguistics areas must be in syntax or phonology. For students in both emphases, the third examination area may be a film area.

For reading lists, contact the Department of Spanish and Portuguese.

#### **MAXIMUM STUDY LOADS**

Maximum course registration is 15 s.h. of graduate-level course work during fall or spring semesters and 8 s.h. of graduate-level work during summer sessions. Students with one-quarter-time and one-third-time teaching assistantships are permitted to register for the maximum study loads. The normal full-time registration for students who hold one-half-time assistantships is three graduate courses in fall and spring semesters; one-half-time assistants may register for a maximum of 12 s.h. in fall and spring semesters and 6 s.h. in summer sessions. Additional semester hours may be taken only with Graduate College approval.

Minimum course registration is 2 s.h. Students who fail to register for a period of 36 months must apply for readmission to the Graduate College.

## **Doctor of Philosophy**

The Doctor of Philosophy in Spanish requires a total of at least 72 s.h. of graduate credit. Ph.D. students choose from two programs; one is dedicated to Hispanic literatures, the other to Hispanic linguistics. The literature program trains students in textual analysis and literary history, criticism, and theory. The linguistics program provides training in linguistic analysis and theory.

The literature program requires a minimum of 66 s.h. of course work (22 courses), of which 30 s.h. may have been earned for an M.A. in Spanish at The University of Iowa or at another institution, as approved by the director of graduate studies.

The linguistics program requires a minimum of 57 s.h. of course work (19 courses), of which 30 s.h. may have been earned for an M.A. in Spanish at The University of Iowa or at another institution, as approved by the director of graduate studies.

Both programs also require 6 s.h. earned in 035:299 Thesis, to complete the 72 s.h. required for the Ph.D.

Course requirements for each program are as follows.

#### **LITERATURE TRACK: COURSES**

Students must complete at least 36 s.h. (12 courses) beyond the master's degree (or 22 courses beyond the bachelor's degree). The following courses are required; courses taken for the M.A. may be used to meet part of this requirement.

Two courses in literary theory	6 s.h.
Three courses in Spanish literature, at least one of which must be pre-1700 literature	9 s.h.
Three courses in Spanish American literature	9 s.h.
One course in cinema	3 s.h.
Two 300-level seminars in literary studies	6 s.h.
One literature course in another Romance language (see "Language and Literature Tool Requirements")	3 s.h.
035:299 Thesis	3-15 s.h.

Each student's plan of study is tailored to his or her area of emphasis and must be approved by the student's advisory committee. Ph.D. course work in Spanish (taken after the M.A.) must be at the 200 and 300 levels, except the Romance literature course taken for the language tool requirement.

#### **LITERATURE TRACK: LANGUAGE AND LITERATURE TOOL REQUIREMENTS**

Before the comprehensive examination, students must complete the equivalent of three years of college-level study in another Romance language and become well-acquainted with its literature in limited areas of specialization; the study of Luso-Brazilian literature is highly recommended. This requirement can be satisfied only through course work at The

University of Iowa or another accredited university.

The equivalent of one year of college-level study of another approved foreign language also is required. If Portuguese is not the language chosen to fulfill the Romance literature requirement, it must be used for this requirement. Students who choose to write dissertations on topics in Spanish or Portuguese literature before 1700 must have one year of college-level Latin or the equivalent.

Students may satisfy the language tool requirement by examination or by course work at The University of Iowa or at another accredited university; language tool course work does not count toward the 72 s.h. required for the degree.

#### **LINGUISTICS TRACK: COURSES**

Students must earn at least 27 s.h. (9 courses) beyond the master's degree (or 19 courses beyond the bachelor's degree). The following courses are required; courses taken for the M.A. may be used to meet part of this requirement.

035:206 Topics in Spanish Language Acquisition	3 s.h.
035:207 Topics in Comparative Romance Linguistics	3 s.h.
035:209 Spanish Phonology	3 s.h.
035:210 Spanish Syntax	3 s.h.
103:110 Articulatory and Acoustic Phonetics	3 s.h.
103:201 Introduction to Syntax	3 s.h.
103:202 Syntactic Theory	3 s.h.
103:203 Introduction to Phonology	3 s.h.
One additional course in the dissertation research area	
One course in historical linguistics, sociolinguistics/language variation, or language acquisition/psycholinguistics	3 s.h.
One 300-level Hispanic linguistics seminar	3 s.h.
035:299 Thesis	13-15 s.h.

The additional course in the dissertation research area (phonology, syntax, language acquisition, language variation) must be offered by the Department of Spanish and Portuguese or the Department of Linguistics.

Each student's plan of study is tailored to his or her area of emphasis and must be approved by the student's advisory committee. Ph.D. course work in Spanish (taken after the M.A.) must be at the 200 and 300 levels, except some courses offered by the Department of Linguistics and the required third-year-level course in Portuguese (see "Program II Language Tool Requirements" below).

#### **LINGUISTICS TRACK: LANGUAGE TOOL AND ADDITIONAL REQUIREMENTS**

Students in the linguistics track must complete the equivalent of three years of college-level study of Portuguese, and the equivalent of one year of college-level study of each of two other languages. For students specializing in historical linguistics, one of those two languages must be Latin.

Students may satisfy the language tool requirement by examination or by course work at The University of Iowa or at another accredited university. The language tool course work does not count toward the 57 s.h. of prethesis course work required for the degree, except the third-year-level course work in Portuguese, which may be counted with the faculty advisor's approval.

Students in the linguistics track also must write two extended research papers and give two colloquium presentations based on these papers. The first paper must be in an area distinct from the intended dissertation research area and must be approved by the end of fall semester of the second year of Ph.D. course work in order for the student to continue in the program. The second paper must be in the dissertation research area, must be of publishable quality, and must be approved no later than the beginning of the semester in which the student takes the comprehensive exam.

#### **COMPREHENSIVE EXAMINATION**

The purpose of the Ph.D. comprehensive examination is to determine whether the student has gained sufficient breadth and depth of research knowledge in Hispanic literatures or linguistics to enter the profession as a teacher-scholar. The examining committee is composed of five departmental faculty members or four departmental faculty members and a fifth faculty member from a related department.

#### **Literature Track**

The comprehensive exam for the literature track includes four elements: two broad areas, one specialized area, one article, and an oral exam. Each element is supervised by a different committee member.

The two broad areas comprise lists of approximately 40 readings, which each list covering an established historical period that is tied to the student's Ph.D. course work (one Peninsular, the other Spanish-American). The lists must be approved by the supervisor before distribution to the rest of the committee. Each area is evaluated with a three-hour written exam, which is discussed during the student's oral exam.

The specialized area includes 25-40 secondary works that define the area and are related to the dissertation. The area is examined via a 15-20 page position paper, which is a critical synthesis of the secondary readings and normally becomes part of the dissertation introduction. The list and the paper must be written in consultation with the supervisor and must be approved by the supervisor at least one month before the exam.

The article is a 20-25 page research essay, usually a revised version of a paper written for one of the two required 300-level seminars. The article should be written in consultation with the professor who taught the seminar and with at least two other professors. It must be approved by the supervisor at least one month before the exam.

The oral exam lasts two hours, with approximately half devoted to the two broad areas and half to the article and the position paper.

### **Linguistics Track**

The comprehensive exam for the linguistics track includes written and oral components. The written component comprises two weekend take-home exams consisting of linguistic analysis in two subdisciplines distinct from the subdiscipline of the intended dissertation research. The two-hour oral exam consists of one hour devoted to discussion of the second research paper and the other hour devoted to follow-up questions on the written exams.

### **DISSERTATION**

After the Ph.D. comprehensive examination is completed, the candidate submits a dissertation prospectus for the dissertation committee's approval. The dissertation committee is composed of five faculty members; at least four committee members must be from the Department of Spanish and Portuguese.

Beginning fall 2009, all doctoral dissertations must be submitted to the Graduate College in electronic format.

The dissertation, complete and in final form, must be submitted in the required electronic format at the Graduate College office by the first-deposit deadline date of the session in which the degree is to be conferred. The final deposit of the approved dissertation in electronic format must be deposited at the office by the appropriate deadline in the student's graduation semester.

Students must adhere to the Graduate College regulations regarding preparation of the dissertation copy; consult the Graduate College. For information on the dissertation and final examinations, see the Manual of Rules and Regulations of the Graduate College.

### **Financial Support**

Teaching and research assistantships are available to qualified graduate students. Usually, two years of support are available for completion of the M.A. and four years beyond the receipt of the M.A. for the Ph.D. Applications for financial support should be made directly to the Department of Spanish and Portuguese.

## **Facilities**

The Language Media Center (LMC) provides students and faculty with a broad range of services and facilities that include a state-of-the-art audio language laboratory, individual audio recording carrels, video viewing rooms for small groups, video viewing stations for individuals, and networked microcomputer and interactive multimedia workstations. The LMC maintains a number of instructional technology classrooms that have special video, audio, and computer equipment for in-class presentations. The center's extensive collection of international media resources on audio tape, videotape, computer diskette, videodisc, and CD-ROM serves learners at many levels and in many disciplines.

## **Spanish and Portuguese Courses**

### **Basic Spanish**

Students must have permission from the chair of the Department of Spanish and Portuguese to take an elementary course for credit after having completed a higher-level course for which the elementary course or its equivalent is a

prerequisite.

**035:001 Elementary Spanish I** 5 s.h.

Emphasis on oral and written skills. Taught in Spanish. Recommendations: no previous study of Spanish. GE: Foreign Language First Level Proficiency.

**035:002 Elementary Spanish II** 5 s.h.

Continuation of 035:001; emphasis on oral and written skills. Taught in Spanish. Prerequisites: 035:001. GE: Foreign Language Second Level Proficiency.

**035:005 Elementary Spanish Review** 5 s.h.

Intensive treatment of material presented in 035:001 and 035:002. Taught in Spanish. Requirements: two years of secondary school Spanish. GE: Foreign Language Second Level Proficiency.

**035:011 Intermediate Spanish I** 5 s.h.

Communication in speaking and writing; cultural topics. Taught in Spanish. Prerequisites: 035:002 or 035:005. GE: Foreign Language Second Level Proficiency.

**035:012 Intermediate Spanish II** 5 s.h.

Continuation of 035:011. Prerequisites: 035:011. GE: Foreign Language Fourth Level Proficiency.

**035:013 Accelerated Intermediate Spanish** 6 s.h.

The sequence 035:011 - 035:012 in one semester. Prerequisites: 035:002 or 035:005. GE: Foreign Language Fourth Level Proficiency.

**035:020 Contemporary Spanish American Narrative** 3 s.h.

Themes and narrative techniques in major texts, 1960-present; overview of cultural, sociopolitical aspects. Taught in English, readings in English. Prerequisites: 08G:001. GE: Foreign Civilization & Culture, Humanities.

**035:029 First-Year Seminar** 1-2 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

**035:030 Hispanic Culture and Language** 1 s.h.

Development of Spanish communication skills and cultural competence; course activities connect classroom to students' living environment. Requirements: Hispanic Culture and Language Living-Learning Community resident.

**035:053 Special Work** 1-3 s.h.

**035:060 Latino/a Literature in the U.S.** 3 s.h.

Introduction to growing cultural production of varied Latino communities (e.g., Chicano, Puerto Rican American/Nuyorican, Cuban American) that have a strong presence in the United States; recent cultural production from borderland transcultural spaces with physical, cultural, economic, political, and mythical elements; visions of the United States from contemporary Latin American writers who recently have become U.S. residents. Taught in English. GE: Cultural Diversity, Humanities.

**035:070 Introduction to Latin American Studies** 3 s.h.

Cultures of Latin American countries with emphasis on cultural history and cultural production; interdisciplinary survey. Same as 038:070, 130:070, 187:070.

## **Spanish Level 1, Primarily for Undergraduates**

Students should take these courses at the start of the Spanish major.

**035:103 Spanish Language Skills: Writing** 3 s.h.

Bridge from second-year Spanish to more advanced courses in Spanish language, linguistics, and literature; emphasis on skill development in writing, critical reading in Spanish, and oral communication. Taught in Spanish. Prerequisites: 035:012.

- 035:104 Hispanic Institute: Language** 3 s.h.  
Grammar essentials, written exercises, short compositions, conversational activities. Prerequisites: 035:012.
- 035:105 Hispanic Institute: Study/Life in Spain** 1 s.h.
- 035:106 Spanish Language Skills: Speaking** 3 s.h.  
Development of conversational proficiency and cultural competence through action learning; strategic role playing and creative language use based on everyday situations in Hispanic cultures; composition skills and grammar review. Prerequisites: 035:012.
- 035:108 Spanish in the U.S.** 3 s.h.  
Issues related to Spanish in the United States; aspects of linguistics and sociolinguistics inherent to the existence and proliferation of Spanish in the United States. Taught in English.
- 035:109 Study of Language: Myths and Concepts** 3 s.h.  
How linguists look at language; basic concepts of linguistics and grammar. Prerequisites: 035:012.
- 035:110 Readings in Spanish Literature** 3 s.h.  
Tools for improving reading skills; basic concepts for textual understanding; historical overview of literary works, with focus on literature of Spain. Prerequisites: 035:012. Requirements: no more than one Spanish course numbered above 035:100.
- 035:111 Readings in Spanish American Literature** 3 s.h.  
Tools for improving reading skills; basic concepts for textual understanding; historical overview of literary works, with focus on Spanish American literature. Prerequisites: 035:012.
- 035:112 Introduction to Literary Analysis** 3 s.h.  
Close readings of literary texts from Spain and Spanish America; basic concepts of genre (narrative, poetry, theater, essay); writing about literary texts. Prerequisites: 035:012.
- 035:113 Screening Latin America** 3 s.h.  
Latin American film; histories of the four major national film industries; aesthetic and political debates surrounding the New Latin American Cinema movement of the 1960s and 1970s. Prerequisites: 035:012.

## **Spanish Level 2, Primarily for Undergraduates**

Students should have at least one Level 1 course before starting these courses. Some courses have additional prerequisites.

### **Language Skills**

- 035:116 Spanish Composition and Grammar** 3 s.h.  
Grammar review, class presentations and discussions; evolution of student compositions through peer editing, instructor critique, author's analysis; summary portfolio. Requirements: two courses taught in Spanish at the 100 level or above.
- 035:117 Introduction to Spanish-English Translation** 3 s.h.  
Introduction to written and sight translation: translation theory, elements for good translations and effective translation process, cultural aspects; practice in written translation. Requirements: at least one course taught in Spanish at the 100 level or above.
- 035:118 Business Spanish** 3 s.h.  
Clear, concise business writing; emphasis on linguistic and cultural proficiency. Requirements: one Spanish course numbered above 035:100.
- 035:119 Journalistic Writing in Spanish** 3 s.h.  
Spanish writing skills; introduction to style and practice of journalistic reporting and writing. Requirements: at least one course taught in Spanish at the 100 level or above.

- 035:120 Taller Basico de Escritura Creativa** 3 s.h.  
Development of writing skills in Spanish through creative writing. Taught in Spanish. Prerequisites: 035:103.
- 035:139 Advanced Spanish Language Skills: Writing** 3 s.h.  
Development of writing skills in Spanish, focus on expository writing for academic purposes. Requirements: two courses in Spanish numbered above 035:100.
- 035:141 Advanced Spanish Language Skills: Speaking** 3 s.h.  
Development of conversational proficiency; improvement of listening, reading, and writing skills; cultural knowledge of several Spanish-speaking countries. Requirements: two courses taught in Spanish at the 100 level or above.

## Hispanic Linguistics

- 035:121 Introduction to Hispanic Linguistics** 3 s.h.  
Basic linguistic theory as applied to analysis of Spanish language; systematic study of sound patterns, sentence construction, word formation; meanings, historical linguistics, sociolinguistics, psycholinguistics. Requirements: one Spanish course numbered above 035:100.
- 035:122 Spanish Sound Structure** 3 s.h.  
Articulation of Spanish sounds--description and practice; how Spanish sounds are organized into classes, relations among the different classes, how they are implemented in context, patterns they exhibit. Requirements: one Spanish course numbered above 035:100.
- 035:123 Foundations in Sociolinguistics** 3 s.h.  
Dialects, speech communities, variation, choosing a code, solidarity and politeness, language and gender, language planning. Requirements: at least one course taught in Spanish at the 100 level or above.
- 035:124 Introduction to Bilingualism** 3 s.h.  
Psycholinguistic and sociolinguistic aspects of bilingualism; language usage, maintenance, attitudes, shift, transfer, loss; code-switching. Requirements: at least one course taught in Spanish at the 100 level or above.
- 035:126 Spanish Applied Linguistics** 3 s.h.  
Concepts of linguistic analysis applied to Spanish; focus on problematic areas of Spanish grammar, lexicon, semantics; introduction to cross-cultural pragmatics; connections between language learning and technology and assessment; ideal for future teachers of Spanish. Prerequisites: 035:121.
- 035:128 Introduction to Spanish Language Acquisition** 3 s.h.  
Basic principles of language acquisition theory applied to learning Spanish as a first or second language. Prerequisites: 035:121.
- 035:129 Structure of the Spanish Language** 3 s.h.  
Descriptive analysis of Spanish, contrasting Spanish sentence structure with English; pronouns, properties and interpretation of verbal forms, and pragmatic interpretations of different word orders. Prerequisites: 035:121.

## Spanish American Literature and Culture

- 035:130 Cultures of Spanish America** 3 s.h.  
Pre-Columbian, colonial, modern periods; socioeconomic structure, form of government, culture. Requirements: at least one course taught in Spanish at the 100 level or above.
- 035:131 Contemporary Spanish American Fiction** 3 s.h.  
Major 20th-century short-story writers and novelists (Borges, Cortázar, Fuentes, García-Márquez, Rulfo, etc.) through representative works. Requirements: at least one course taught in Spanish at the 100 level or above.
- 035:132 Spanish American Poetry** 3 s.h.

Poetry as a literary genre, short history of its development, early forms in Spanish America, poets from Modernism to present; readings from writers including Rubén Darío, Pablo Neruda, César Vallejo, Octavio Paz, J.L. Borges.

Requirements: one Spanish course numbered above 035:100.

**035:134 Spanish American Short Story** 3 s.h.

Works by 19th- and 20th-century Spanish American writers; emphasis on reading strategies and historical, cultural, literary backgrounds. Requirements: at least one course taught in Spanish at the 100 level or above.

**035:135 Latinos in the United States** 3 s.h.

Latina/o cultural practices and products as dynamic expressions that affirm, contest, resist and are shaped in and against the mappings of race, class, nation, gender, sexuality, colonialism. Requirements: one Spanish course numbered above 035:100.

**035:137 Introduction to Chicano Literature and Culture** 3 s.h.

Recent fiction and poetry by Chicano and Chicana writers; readings in Spanish and English. Taught in Spanish. Requirements: at least one Spanish literature or culture course at the 100 level or above.

**035:140 Spanish American Literature of Fantasy** 3 s.h.

Principal manifestations from 19th-century origins to culmination in 20th-century masterpieces; analysis. Requirements: at least one course taught in Spanish at the 100 level or above.

**035:143 Cuban American Literature and Culture** 3 s.h.

Experiences of Cuban exiles in the United States; emergence of a literature and culture based on sense of dispossession, marginality, and memory of island past. Taught in English. Prerequisites: 08G:001. GE: Cultural Diversity. Same as 048:196.

**035:144 Latin American Women Writers** 3 s.h.

Focus on 20th century; how Latin American women subjects view themselves through literature; textual practice specific to women; psychoanalytic approaches, contemporary feminist criticism. Requirements: at least one course taught in Spanish at the 100 level or above. Same as 131:162.

**035:145 Latin America Cinema** 3 s.h.

Political, historical, aesthetic, and cultural issues in key films from Latin American national cinemas. Taught in English. Requirements: one Spanish course numbered above 035:100 for Spanish majors; or one course numbered above 048:050. Recommendations: knowledge of Spanish. Same as 048:145.

**035:147 Topics in National Literatures and Cultures** 3 s.h.

Requirements: at least one course taught in Spanish at the 100 level or above.

**035:148 Topics in Cinema, Literature, and Society** 3 s.h.

Concept of national cultures examined through major texts in literary and film history in one Latin American nation. Requirements: at least one course taught in Spanish at the 100 level or above.

**035:149 Visual Culture: Colonial Spanish America** 3 s.h.

Facets of the Spanish American colonial world, including literature, arts, music, architecture, and other forms of cultural expression; major themes and concepts, including discovery, conquest, evangelization, intercultural contact, memory, identity. Taught in Spanish. Requirements: at least one course taught in Spanish at the 100 level or above.

## **Spanish Literature and Culture**

**035:150 Cultures of Spain** 3 s.h.

Political, religious, social, economic background; important cultural, literary movements. Requirements: at least one course taught in Spanish at the 100 level or above.

**035:151 Literature in the Time of Cervantes** 3 s.h.

Introduction to literary questions of 15th to 17th centuries in Spain; understanding of literary Spanish and cultural issues of the period--end of the feudal mind, beginning of individualism, poetry, emergence of theater, crisis of empire. Requirements: one Spanish course numbered above 035:100.

**035:152 Romanticism and Revolution in Spain**

3 s.h.

Spanish Romanticism as the cultural expression of social revolution in first half of 19th-century Spain. Taught in Spanish. Requirements: one Spanish course numbered above 035:100.

**035:153 Madrid**

3 s.h.

Contemporary Madrid as one of the premier capital cities of the European Union; history and present day reality of the city; examination of paintings, descriptions, movies, fashion, and customs from several historical periods. Requirements: at least one course taught in Spanish at the 100 level or above.

**035:154 Hispanic Institute: Culture**

3 s.h.

Overview of geography, history (political, economic, social), architecture, painting, music of Spain; readings, slides, video and audio cassettes, visits to local sites of cultural significance. Prerequisites: 035:012.

**035:155 Hispanic Institute: Literature**

3 s.h.

Introduction to poetry, narrative, and theater in Spanish literature; textual commentary and critical interpretations of major representative works of selected historical periods. Requirements: at least one course taught in Spanish at the 100 level or above.

**035:156 Spanish Literature of the Transition**

3 s.h.

Literary production of the transition in post-Franco Spain; works by Carmen Martin Gaité, Luis Garcia Montero, Pedro Almodovar, others. Requirements: at least one course taught in Spanish at the 100 level or above.

**035:157 Contemporary Spanish Short Story**

3 s.h.

Contemporary short stories from 20th- and 21st-century Spain; emphasis on reading strategies and interpretation skills; focus on historical and social contexts. Requirements: one Spanish course numbered above 035:100.

**035:160 The Cid in History and Legend**

3 s.h.

Rodrigo Diaz de Vivar, el Cid, in history and legend; changing perceptions of the Cid from the 13th century to the present. Requirements: one Spanish literature course numbered above 035:100.

**035:161 Modern and Contemporary Spanish Literature**

3 s.h.

Works of the last 30 years of the 19th century, up to the outbreak of the Spanish Civil War; Realism, Naturalism, generation of 1898, generation of 1913, generation of 1927. Requirements: at least one course taught in Spanish at the 100 level or above.

**035:165 Advanced Spanish Grammar**

3 s.h.

Problematic areas of vocabulary and grammar; systematic features of standard written international Spanish (norma culta); background and insight for teaching Spanish. Requirements: previous intermediate and advanced courses in Spanish, especially language and grammar.

**035:168 Advanced Business Spanish**

3 s.h.

Tools for effective business communication, building on concepts learned in 035:118; linguistic, sociolinguistic, practical skills for effective oral and written communication developed through discussion of business case studies, presentations, meetings; selected Spanish and Latin American companies examined through varied media, including news and Internet; role of transaction intermediaries in international trade. Prerequisites: 035:118.

**035:169 Writing Narrative Journalism in Spanish**

3 s.h.

In-depth interpretative journalistic writing on a range of topics and forms, including profiles, social and political issues and controversy, cultural affairs, education. Prerequisites: 035:119.

**Spanish Level 3 for Undergraduates**

Undergraduates should take the following courses during their last semesters of enrollment. These courses are also open to M.A. students. All of these courses require a research paper. Prerequisites vary.

**035:171 Pan-Caribbean Literary Currents**

3 s.h.

Twentieth-century fiction, film, and cultural practices in the Hispanic, Francophone, and Anglophone Caribbean; cultural essays to complement literary readings; pan-Caribbean cultural practices--music and carnival celebrations. Taught in English. Requirements: (for 048:162) junior or senior standing; (for 035:171) two literature courses. Same as 048:162.

**035:172 Topics in Cultural Studies**

3 s.h.

Requirements: one Spanish literature or culture course numbered 035:130 or above.

**035:173 Colonial Spanish American Literature**

3 s.h.

Readings from the formative period of Spanish American culture; may include discovery and conquest, ethnicity and gender, dissent and popular resistance. Requirements: two literature courses in Spanish, at least one of which must be numbered 035:131 or above.

**035:174 Latino/a Popular Culture**

3 s.h.

Role of Latino/a popular culture as a site of contemporary social practice and cultural politics in both local and global contexts; specific attention to notions of citizenship, identity, and culture. Requirements: two Spanish literature or culture courses; at least one must be numbered 035:131 or above.

**035:175 Cultural Identity in Caribbean Literature**

3 s.h.

Main currents in 20th-century Hispanic Caribbean literature: *americanismo literario*, *poesía negra*, testimonial narrative centered on slavery and women's fiction; Caribbean cultural context in music, humor, Afro-Caribbean rituals. Requirements: two literature courses in Spanish, at least one of which must be numbered 035:131 or above.

**035:176 Latin American Studies Seminar**

3 s.h.

Interdisciplinary approach. Taught in English. Recommendations: Spanish or Portuguese sufficient for background readings. Same as 038:176, 048:153, 113:132, 130:176, 16W:109.

**035:177 Literature and Mass Culture in Latin America**

3 s.h.

Examination of literature in relation to other media in Latin America in the 20th century; close readings of novels, short stories, and essays analyzed in combination with film clips, photographs, music, and blogs. Requirements: two Spanish literature courses; at least one must be numbered 035:131 or above.

**035:178 Topics in Spanish American Literature**

3 s.h.

Requirements: two literature courses in Spanish, at least one of which must be numbered 035:131 or above.

**035:179 Islamic Cultural Presence in Spain**

3 s.h.

Islamic history and culture in the Iberian Peninsula from Middle Ages to present. Taught in Spanish. Requirements: one Spanish literature or culture course numbered 035:130 or above. Same as 032:179.

**035:180 Spanish Golden Age Fiction**

3 s.h.

Literature and society in first centuries of Spanish Modernity, Renaissance and Baroque periods, love and the self, alienation, utopias, the body and morals, cultural dimensions of genres. Requirements: two literature courses in Spanish, at least one of which must be numbered 035:131 or above.

**035:181 Topics in Spanish Literature**

3 s.h.

Requirements: two literature courses in Spanish, at least one of which must be numbered 035:131 or above.

**035:182 Society and Poetry: Spanish Lyric**

3 s.h.

Twentieth-century Spanish lyric poetry in its sociocultural context. Requirements: two literature courses in Spanish, at least one of which must be numbered above 035:131.

**035:183 Don Quijote**

3 s.h.

Exploration of Cervantes' *Don Quijote*; sociohistorical context, questions of human existence, literary tradition, metafiction, influence of *Don Quijote* on novelists and filmmakers, critical reception of the text. Requirements: two literature courses in Spanish, at least one of which must be numbered 035:131 or above.

**035:184 Linguistic Aspects of Second Language Acquisition**

3 s.h.

Theoretical linguistic approaches to acquisition of Spanish as a second language. Prerequisites: 035:121.

**035:185 Topics in Hispanic Linguistics**

3 s.h.

Prerequisites: 035:121.

**035:186 Introduction to Spanish Syntax** 3 s.h.

Basic principles of generative syntax as applied to analysis of Spanish syntactic structure; extensive syntactic analysis.

Prerequisites: 035:121. Same as 164:186.

**035:187 Spanish Word Formation** 3 s.h.

Basic principles of morphology (derivational and inflectional) applied to analysis of Spanish complex word formation; extensive practice in morphological analysis. Prerequisites: 035:121.

**035:188 History of the Spanish Language** 3 s.h.

Development of phonetic, morphological, syntactical properties of the Spanish language from its Latin roots; emphasis on internal history and process of expansion from a minor dialect (Castilian) to a significant world language.

Prerequisites: 035:121.

**035:189 Introduction to Spanish Phonology** 3 s.h.

Sound patterns of Spanish; how various theoretical approaches solve basic problems in Spanish phonology; identification of linguistic universals, how they are manifested in the sound structure of Spanish. Prerequisites: 035:121 or 035:122. Same as 164:189.

**035:190 Chicano Cinema** 3 s.h.

History of Chicano independent and industry film and television production since the Chicano political and cultural movement began in the 1960s. Taught in English. Requirements: one Spanish literature or culture course numbered 035:130 or above, or one film studies course numbered above 048:050. Same as 048:190.

**035:191 Topics in Latin American Cinema** 3 s.h.

Taught in English. Requirements: one Spanish literature or culture course numbered above 035:130 or one film studies course. Same as 048:178.

**035:192 Topics in Film Studies** 3 s.h.

Requirements: one Spanish literature or culture course numbered 035:130 or above.

**035:194 Topics in Literary Studies** 3 s.h.

Requirements: two literature courses in Spanish, at least one of which must be numbered 035:131 or above.

**035:195 Senior Seminar** 3 s.h.

Analysis of works of a major author or theme from the Latin American or the Peninsular traditions or on a focused set of problems in Hispanic linguistics.

**035:196 Taller Avanzado de Escritura Creativa** 3 s.h.

In-depth consideration of characters, dialog, conflict, setting, point of view, other fundamentals of fiction; experience writing short stories and other pieces, with class discussion; fictional texts by renowned writers, authors' essays on their own creative process; narrative strategies of short stories, songs, painting, films. Requirements: two literature courses in Spanish numbered 035:131 or above.

**035:198 Honors: Research and Thesis** 2-3 s.h.

Requirements: honors standing.

**035:199 Special Work** 1-3 s.h.

## **Spanish, Primarily for Graduate Students**

**035:200 Foreign Language Teaching Methods** 3 s.h.

Readings in pedagogical theory and practice and second language acquisition; experience designing activities for teaching and assessment, with critiques based on current theories and approaches; development of reflective practices toward one's own language teaching. Same as 164:260.

**035:201 Second Language Acquisition Research and Theory I** 3 s.h.

Theories regarding success and failure in acquisition of second or subsequent languages; research, issues. Same as 009:237, 039:200, 164:201, 39J:201.

**035:202 Second Language Acquisition Research and Theory II** 3 s.h.

Continuation of 164:201. Prerequisites: 164:201. Same as 039:201, 164:202.

**035:204 Introduction to Spanish Linguistic Analysis** 3 s.h.

Introduction to goals and concepts of generative linguistics as applied to Spanish: main subfields of linguistics; skill development in linguistic analysis, argumentation.

**035:206 Topics in Spanish Language Acquisition** 3 s.h.

Theoretical linguistic approaches to monolingual, bilingual, and second language acquisition of Spanish and Portuguese; varied topics. Prerequisites: 035:204. Same as 164:261.

**035:207 Topics in Comparative Romance Linguistics** 3 s.h.

Comparative study of phonology, morphology, or syntax of the main Romance languages as informed by linguistic theory; diachronic or synchronic perspective. Repeatable. Prerequisites: 035:204. Recommendations: additional graduate course work in linguistics. Same as 103:262, 164:262, 20E:201.

**035:209 Spanish Phonology** 3 s.h.

Modern approaches to synchronic phonology as applied to Spanish; focus on traditional descriptive problems, recent generative analyses. Requirements: phonology or linguistics course. Same as 164:263.

**035:210 Spanish Syntax** 3 s.h.

Spanish syntactic constructions examined in framework of selected syntactic theory; emphasis on development of syntactic argumentation. Requirements: one course in syntax. Same as 164:264.

**035:211 Topics in Hispanic Linguistics** 3 s.h.

Taught in Spanish or English. Repeatable.

**035:212 Multimedia and Second Language Acquisition** 3 s.h.

Foreign language multimedia in the context of current second language acquisition theories and research; readings on interactivity, interface design, feedback, learner control, and acquisition of vocabulary, grammar, and culture; multimedia development project. Requirements: foreign language teaching methodology course. Same as 009:238, 013:253, 164:211.

**035:214 Advanced CALL Curriculum Development** 3 s.h.

Advanced instruction in a variety of software and hardware tools for development of multimedia computer-assisted language learning (CALL) courseware; students develop software for a General Education Program or third-year language course in collaboration with course supervisor. Prerequisites: 164:212. Same as 009:239, 013:254, 164:214.

**035:225 Topics in Literary Studies** 3 s.h.

Repeatable.

**035:226 Topics in Cultural Studies** 3 s.h.

Repeatable.

**035:227 Topics in Second Language Acquisition: Writing** 3 s.h.

Theory, pedagogy, research, and assessment in second language writing. Taught in English. Same as 010:275, 164:227.

**035:228 Topics in Second Language Acquisition: Speaking** 3 s.h.

Theory, pedagogy, research, and assessment in second language speaking. Same as 009:236, 164:221.

**035:230 Spanish American Narrative: Nineteenth Century** 3 s.h.

Review of narrative, with emphasis on Romanticism.

**035:231 Spanish American Narrative: Modern and Regional** 3 s.h.

- 035:236 Contemporary Spanish American Narrative** 3 s.h.  
Narrative from mid-20th century to present; emphasis on the Boom, post-Boom.
- 035:247 Readings: Latin American History** arr.  
Same as 016:288.
- 035:248 Topics in Film Studies** 3 s.h.  
Repeatable.
- 035:250 Medieval Spanish Literature** 3 s.h.  
Critical reading of canonical medieval texts in their cultural context; application of modern theory to medieval texts; works such as *El Poema del Cid*, *El Romancero Viejo*, *Milagros de Nuestra Señora*, *El Conde Lucanor*, *El Libro de Buen Amor*.
- 035:255 Spanish Renaissance and Baroque Literature** 3 s.h.  
Critical analysis of social, moral, political function of literature in early modern Spain; Renaissance and Baroque poetry; *La Celestina*; pastoral literature; *Don Quijote*; narratives of the court; modern subjectivity; the question of genre.
- 035:257 Spanish Romanticism** 3 s.h.  
Spanish literature and culture 1814-1850, in context of political and economic history.
- 035:258 Nineteenth-Century Spanish Novel** 3 s.h.  
Development of the novel in Spain, from Romanticism to the Generation of 1898; novel's role in helping to consolidate ideologies and structures of 19th-century bourgeois society.
- 035:259 Contemporary Spanish Fiction** 3 s.h.  
The post-Franco novel in Spain; literary "postmodernism" and relationships between Spanish literature, politics, and society since 1975; representative significant works.
- 035:260 Contemporary Non-Castilian Narrative Spain** 3 s.h.  
Readings in Spanish of novels and short stories written in another language of the Spanish state or by a member of one of Spain's non-Castilian historic nationalities.
- 035:264 Contemporary Spanish Poetry** 3 s.h.  
Poetry on the Spanish literary scene circa 1968; authors' reactions to predecessors, their connections with foreign traditions, metapoetry, the aesthetics of culturalism.
- 035:269 Topics in Spanish American Literature** 3 s.h.  
Repeatable.
- 035:270 Topics in Spanish Literature** 3 s.h.  
Repeatable.
- 035:271 Crossing Borders Proseminar** 1 s.h.  
Same as 013:260, 016:244, 01H:330, 030:243, 044:287, 048:244, 113:248.
- 035:273 Crossing Borders Seminar** 2-3 s.h.  
Repeatable. Same as 008:231, 013:262, 016:247, 01H:247, 030:242, 044:286, 048:247, 113:247, 129:231, 160:247, 181:247.
- 035:281 Introduction to Contemporary Literary Theory** 3 s.h.  
How major theories construct literary text; structuralist, semiotic, psychoanalytic, Marxist, reader response, Derridian criticism. Taught in English. Same as 048:217.
- 035:282 Marxist Literary Criticism** 3 s.h.  
Contemporary Western Marxist literary and cultural theory; major thinkers in the Marxist tradition--Georg Lukacs, Louis Althusser, Terry Eagleton, Fredric Jameson, Juan Carlos Rodriguez; readings on topics in Marxist literary and cultural criticism--Marxism and the media, dialectics, Lenin. Taught in Spanish and English.
- 035:286 Colonial Spanish American Literature** 3 s.h.

Chronicles of the conquest: close reading with focus on role of writing and operations of "othering"; balance between critical secondary sources and primary sources.

<b>035:298 Special Work</b>	arr.
<b>035:299 Thesis</b>	arr.
<b>035:300 Seminar: Spanish Linguistics</b> Repeatable with different topics. Same as 103:300.	3 s.h.
<b>035:302 Seminar: Spanish American Literature Before 1900</b> Repeatable with different topics.	3 s.h.
<b>035:303 Seminar: Spanish American Literature After 1900</b> Repeatable with different topics.	3 s.h.
<b>035:304 Medieval Spanish Literature</b> Repeatable with different topics.	3 s.h.
<b>035:305 Seminar: Spanish Golden Age Literature</b> Repeatable with different topics.	3 s.h.
<b>035:307 Seminar: Modern and Contemporary Spanish Literature</b> Repeatable with different topics.	3 s.h.

## Portuguese for Undergraduate and Graduate Students

<b>038:020 Contemporary Brazilian Narrative</b> Novels, short stories, other narrative forms, beginning with neorealists of 1930s; cultural background of different periods, innovative literary approaches of writers through films, other media. Prerequisites: 08G:001. GE: Foreign Civilization & Culture, Humanities.	3 s.h.
<b>038:053 Special Work</b>	arr.
<b>038:070 Introduction to Latin American Studies</b> Cultures of Latin American countries with emphasis on cultural history and cultural production; interdisciplinary survey. Same as 035:070, 130:070, 187:070.	3 s.h.
<b>038:077 Brazil: The Erotic/Exotic Lure</b> Popular culture (carnaval, soccer, lay and religious festivities), the land, and the people. Taught in English.	3 s.h.
<b>038:100 Accelerated Elementary Portuguese</b> First-year course in one semester; comprehending, speaking, reading, writing modern Portuguese; emphasis on speaking. GE: Foreign Language Second Level Proficiency.	6 s.h.
<b>038:101 Accelerated Intermediate Portuguese</b> Second-year course in one semester; reading comprehension, oral and writing skills; grammar review. Prerequisites: 038:100. GE: Foreign Language Fourth Level Proficiency.	6 s.h.
<b>038:102 Portuguese for Spanish Speakers</b> Systematic differences and similarities between Spanish and Portuguese; emphasis on reading, writing. Requirements: seven courses numbered above 035:100.	3 s.h.
<b>038:103 Composition and Conversation</b> Speaking, writing skills through discussion and oral presentations, grammar and vocabulary review, composition; materials from current Brazilian newspapers, magazines, short fiction, telenovelas and films. Prerequisites: 038:101.	3 s.h.
<b>038:104 Introduction to Literary Analysis</b>	3 s.h.

Basic concepts of genre, literary periods, narrative and literary analysis; close reading of literary texts in Portuguese; tools for improving reading and writing skills. Taught in Portuguese. Prerequisites: 038:101.

**038:105 Brazilian Literature Before 1900**

3 s.h.

Beginnings through end of 19th century; representative readings from all periods and genres; focus on works of major Brazilian authors such as Gonzaga, Alencar, Castro Alves, Machado de Assis, Cruz e Sousa. Taught in Portuguese. Prerequisites: 038:101.

**038:106 Brazilian Literature After 1900**

3 s.h.

Twentieth-century poetry, novels, short stories; modernism, regionalism, generation of '45, concretism; works of principal figures behind these movements; focus on major writers of modern period, such as Lima Barreto, Mário de Andrade, Drummond, Jorge Amado, Cabral de Melo Neto, Guimarães Rosa, Lispector, and contemporary writers. Taught in Portuguese. Prerequisites: 038:101.

**038:107 Introduction to Portuguese Literature**

3 s.h.

Representative readings including Portuguese lyric and epic poetry, Renaissance theater, romantic and realist novels, 20th-century symbolist verse, neorealist prose. Taught in Portuguese. Prerequisites: 038:101.

**038:112 Topics in Luso-Brazilian Literature**

3 s.h.

Genres, themes, movements. Taught in Portuguese. Requirements: one Portuguese or Brazilian literature course.

**038:115 Writing Brazil in the U.S.**

3 s.h.

Representation of the Amazon region and Rio de Janeiro in travel narratives, novels, diaries, journals, letters, poems, and essays by American authors published in the United States. Taught in English.

**038:120 Topics in Luso-Brazilian Culture**

3 s.h.

Comparative analysis of Brazil and Portuguese-speaking countries in Africa; colonization, independence, religion, music, language. Taught in Portuguese. Prerequisites: 038:101.

**038:176 Latin American Studies Seminar**

3 s.h.

Interdisciplinary approach. Taught in English. Recommendations: Spanish or Portuguese sufficient for background readings. Same as 035:176, 048:153, 113:132, 130:176, 16W:109.

**038:179 Special Work**

1-3 s.h.

**038:198 Honors Research and Thesis**

2-3 s.h.

Requirements: honors standing.

**038:279 Special Work**

arr.

## Statistics and Actuarial Science

**Chair:** Luke Tierney

**Professors:** Kathryn Chaloner (Biostatistics/Statistics and Actuarial Science), Kung-Sik Chan, Richard L. Dykstra, Jian Huang (Statistics and Actuarial Science/Biostatistics), Michael P. Jones (Biostatistics/Statistics and Actuarial Science), Joseph B. Lang (Statistics and Actuarial Science/Biostatistics), Johannes Ledolter (Management Sciences/Statistics and Actuarial Science), Russell V. Lenth, Paul S. Muhly (Mathematics/Statistics and Actuarial Science), Ralph P. Russo, Elias S.W. Shiu (Principal Financial Group Professor of Actuarial Science), Luke Tierney (Ralph E. Wareham Professor of Mathematical Sciences), Dale Zimmerman (Statistics and Actuarial Science/Biostatistics)

**Professors emeriti:** James D. Broffitt, Jonathan D. Cryer, Leonard S. Feldt (Psychological and Quantitative Foundations/Statistics and Actuarial Science), John Geweke (Statistics and Actuarial Science/Economics), Robert V. Hogg, George G. Woodworth (Statistics and Actuarial Science/Biostatistics), Robert F. Woolson (Biostatistics/Statistics and Actuarial Science)

**Associate professors:** Mary Kathryn Cowles (Statistics and Actuarial Science/Biostatistics), Osnat Stramer, Qihe Tang

**Assistant professors:** Rhonda DeCook, Joyee Ghosh, Jerome Pansera, N.D. Shyamalkumar, Aixin Tan

**Adjunct assistant professor:** James A. Sconing

**Lecturers:** Matthew A. Bognar, Mary D. Russo, Blake Whitten

**Undergraduate degrees:** B.S. in Statistics, Actuarial Science

**Undergraduate nondegree program:** Minor in Statistics

**Graduate degrees:** M.S., Ph.D. in Statistics

**Web site:** <http://www.stat.uiowa.edu>

During the 20th century, probability and statistics developed into an important scientific discipline essential to all fields of study that rely on information obtained from data. Author H.G. Wells acknowledged the importance of statistical reasoning when he stated, "Statistical thinking will one day be as necessary for efficient citizenship as the ability to read and write."

Today's world is bombarded with numerical information. Informed decisions rely on the ability to separate fact from fiction by applying valid statistical analyses. Statisticians can provide crucial guidance in determining what information is reliable and which predictions may be trusted. They often help search for clues to the solution of a scientific mystery and sometimes keep investigators from being misled by false impressions.

The work of a statistician may range from the theoretical (developing new methodologies and statistical theory) to the applied (working with scientists and decision makers to collect, analyze, and interpret data). Regardless of the areas in which they work, statisticians need a strong background in mathematics and computer use. Because uncertainty and data arise in many settings, statisticians have the opportunity to work on a variety of projects in industry, education, government, and research. Thousands of statisticians work in medicine, law, agriculture, public policy, marketing, manufacturing, engineering, and other fields in the social and natural sciences. The diversity of applications is an exciting aspect of the field and is one reason why the demand for well-trained statisticians continues to be strong.

An actuary is a business executive, professionally trained in the mathematical sciences. Actuaries specialize in the evaluation of financial risk—most often in the context of life, health, and casualty insurance, where they design, analyze, and refine various programs to meet the insurance needs of society. Most actuaries are employed by insurance companies, where they have responsibilities for all phases of the development and maintenance of their company's products. They have considerable influence on the financial soundness of their company through work in pricing insurance policies and in compiling data for financial statements.

Many actuaries are employed as consultants. Their actuarial services are used by smaller insurance companies and by individual employers who need actuarial guidance in establishing insurance and retirement programs for their employees. A growing number of actuaries work in the areas of asset/liability management and risk management. Some of these actuaries are employed by investment and consulting firms; others are employed by insurance companies.

Actuaries have been called financial architects and social mathematicians, because their combined analytical and business skills help solve a growing variety of financial and social problems. The actuarial profession is a demanding yet rewarding career choice.

Graduates of the Department of Statistics and Actuarial Science have enjoyed great success in finding employment at all levels of the profession's fields.

## Undergraduate Programs

The department offers a Bachelor of Science in statistics and in actuarial science, and a minor in statistics.

### Bachelor of Science in Statistics

The Bachelor of Science in statistics requires a minimum of 120 s.h., including 46 s.h. of work for the major. Students complete 10 core courses that provide essential instruction in statistical methods, applications, and theory. In addition, they concentrate on their particular interest areas by choosing one of the following three emphasis tracks, in which they complete at least four courses.

The statistics in business, industry, government, and research track emphasizes statistical applications and data analysis. It is appropriate for students interested in careers as applied statisticians.

The statistical computing track emphasizes statistical applications and requires additional course work in computing. It prepares students for statistical work that requires computing expertise for data management, analysis, and reporting.

The mathematical statistics track provides a solid foundation in statistical theory and applications. It requires additional course work in mathematics and is good preparation for graduate study in statistics.

Students must complete the College of Liberal Arts and Sciences General Education Program.

The major in statistics requires the following course work.

#### **CORE COURSES**

All students complete the following.

##### **Computer Science**

22C:016 Computer Science I: Fundamentals	4 s.h.
--	--------

##### **Mathematics**

22M:025-22M:026 Calculus I-II	8 s.h.
22M:027 Introduction to Linear Algebra	4 s.h.

##### **Statistics**

22S:030 Statistical Methods and Computing	3 s.h.
22S:130-22S:131 Introduction to Mathematical Statistics I-II	6 s.h.
22S:152 Applied Linear Regression	3 s.h.
22S:158 Experimental Design and Analysis	3 s.h.
171:173 Design of Sample Surveys	3 s.h.

The department recommends that well-prepared students who elect the mathematical statistics track take 22S:153 Mathematical Statistics I and 22S:154 Mathematical Statistics II in place of 22S:130 Introduction to Mathematical Statistics I and 22S:131 Introduction to Mathematical Statistics II to satisfy the core requirement in statistics.

#### **Emphasis Tracks**

Students take four courses from one of the following tracks.

##### **STATISTICS IN BUSINESS, INDUSTRY, GOVERNMENT, AND RESEARCH**

171:164 Research Data Management	3 s.h.
----------------------------------	--------

Three of these:

22S:133 Quality Control	3 s.h.
22S:138 Bayesian Statistics	3 s.h.
22S:156 Applied Time Series Analysis	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.
22S:162 Applied Generalized Regression	3 s.h.
22S:167 Environmental and Spatial Statistics	3 s.h.
22S:173 Statistical Consulting	3 s.h.
171:174/22S:160 Introductory Longitudinal Data Analysis	3 s.h.

##### **STATISTICAL COMPUTING**

22C:022 Object-Oriented Software Development	4 s.h.
171:164 Research Data Management	3 s.h.

Two of these:

22C:072 Elementary Numerical Analysis	3 s.h.
22S:138 Bayesian Statistics	3 s.h.
22S:156 Applied Time Series Analysis	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.
22S:162 Applied Generalized Regression	3 s.h.
22S:166 Computing in Statistics	3 s.h.
22S:167 Environmental and Spatial Statistics	3 s.h.
22S:173 Statistical Consulting	3 s.h.
171:174/22S:160 Introductory Longitudinal Data Analysis	3 s.h.

#### **MATHEMATICAL STATISTICS**

22M:055 Fundamental Properties of Spaces and Functions I	3 s.h.
--	--------

One of these:

22M:028 Calculus III	4 s.h.
22M:056 Fundamental Properties of Spaces and Functions II	4 s.h.

Two of these:

22S:138 Bayesian Statistics	3 s.h.
22S:153-22S:154 Mathematical Statistics I-II	6 s.h.
22S:156 Applied Time Series Analysis	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.
22S:162 Applied Generalized Regression	3 s.h.
22S:167 Environmental and Spatial Statistics	3 s.h.
22S:173 Statistical Consulting	3 s.h.
22S:195-22S:196 Probability and Stochastic Processes I-II	6 s.h.

If 22S:153 Mathematical Statistics I and 22S:154 Mathematical Statistics II are used to satisfy the core requirements, they may not be used to satisfy the track requirement.

### **Bachelor of Science in Actuarial Science**

The Bachelor of Science in actuarial science requires a minimum of 120 s.h., including 59 s.h. of work for the major. The program prepares students for careers as actuaries. It also helps them learn material that is included in professional examinations administered by the Casualty Actuarial Society and/or the Society of Actuaries, which actuaries must pass in order to achieve professional status.

Students take a variety of actuarial science courses. In addition, preparation for business aspects of the actuarial profession requires the study of accounting, law, finance, insurance, and economics. Courses relating to communication skills, such as writing and speaking, are also important.

Students also must complete the College of Liberal Arts and Sciences General Education Program.

Due to the demanding nature of the actuarial science major and the difficulty of the professional examinations, the department maintains a selective admission program for actuarial science. Students must apply and be admitted to the major.

Students interested in becoming actuaries should declare an interest in actuarial science as their major when they enter the University. Ordinarily, students apply for admission to the actuarial science major in the fall semester of their sophomore year, after they have taken 22S:130 Introduction to Mathematical Statistics I. Students should apply no later than the end of the spring semester of their junior year.

Students admitted to the actuarial science major usually have completed at least 40 s.h. at the University or at another postsecondary institution, including a three- or four-course calculus sequence, a course in linear algebra, and a calculus-based course in probability and statistics. The admission decision is based on the student's performance in these courses and other courses relevant to success in the major. The student's grades from semester to semester

also are considered. ACT or SAT scores are considered in evaluating transfer students. Factors such as work ethic, enthusiasm, and commitment may be considered.

Students who do well in prerequisite math courses tend to be most successful in actuarial science.

For application forms and more information about selective admission, contact the Department of Statistics and Actuarial Science.

Permission to substitute course work taken at another institution for required courses at Iowa is decided case-by-case.

The B.S. in actuarial science requires the following course work.

#### **Computer Science**

22C:016 Computer Science I: Fundamentals	4 s.h.
--	--------

#### **Economics**

06E:001 Principles of Microeconomics	4 s.h.
06E:002 Principles of Macroeconomics	4 s.h.

#### **Mathematics**

22M:025-22M:026 Calculus I-II	8 s.h.
22M:027 Introduction to Linear Algebra	4 s.h.
22M:055-22M:056 Fundamental Properties of Spaces and Functions I-II	7 s.h.

#### **Statistics and Actuarial Science**

22S:130-22S:131 Introduction to Mathematical Statistics I-II	6 s.h.
22S:153-22S:154 Mathematical Statistics I-II	6 s.h.
22S:174 Quantitative Methods for Actuaries	3 s.h.
22S:175 Actuarial Models	3 s.h.
22S:180 Mathematics of Finance I	4 s.h.
22S:181-22S:182 Life Contingencies I-II	6 s.h.

In exceptional cases, the advisor may grant permission to waive 22S:130 Introduction to Mathematical Statistics I and/or 22S:131 Introduction to Mathematical Statistics II.

#### **Sample Schedule**

The following is a sample schedule for completing actuarial science degree requirements.

#### **FIRST YEAR**

##### **Fall Semester**

06E:001 Principles of Microeconomics	4 s.h.
22C:016 Computer Science I: Fundamentals	4 s.h.
22M:025 Calculus I	4 s.h.

##### **Spring Semester**

06E:002 Principles of Macroeconomics	4 s.h.
22M:027 Introduction to Linear Algebra	4 s.h.

22M:026 Calculus II 4 s.h.

## SECOND YEAR

### Fall Semester

22M:055 Fundamental Properties of Spaces and Functions I 3 s.h.  
22S:130 Introduction to Mathematical Statistics I 3 s.h.

### Spring Semester

22M:056 Fundamental Properties of Spaces and Functions II 4 s.h.  
22S:131 Introduction to Mathematical Statistics II 3 s.h.  
22S:180 Mathematics of Finance I 4 s.h.

## THIRD YEAR

### Fall Semester

22S:153 Mathematical Statistics I 3 s.h.  
22S:174 Quantitative Methods for Actuaries 3 s.h.

### Spring Semester

22S:154 Mathematical Statistics II 3 s.h.  
22S:175 Actuarial Models 3 s.h.  
22S:181 Life Contingencies I 3 s.h.

## FOURTH YEAR

### Fall Semester

22S:182 Life Contingencies II 3 s.h.

## Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

Much of the work in the discipline is sequential, so students must begin requirements for the major as soon as possible. Individual study plans must be made carefully. Students who first enroll for a spring semester must consult the department to confirm a four-year plan.

### B.S. in Statistics

Courses must be taken in sequence, so students must begin work early.

**Before the third semester begins:** at least one-fourth of the semester hours required for graduation

**Before the fifth semester begins:** at least four courses in the major, including 22M:025 Calculus I, 22M:026 Calculus II and 22S:030 Statistical Methods and Computing, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** seven or eight courses in the major and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** nine or ten courses in the major

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

### **B.S. in Actuarial Science**

**Before the third semester begins:** 22M:025 Calculus I, 22M:026 Calculus II, 22M:027 Introduction to Linear Algebra, and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 22M:055 Fundamental Properties of Spaces and Functions I, 22M:056 Fundamental Properties of Spaces and Functions II, 22S:130 Introduction to Mathematical Statistics I, 22S:131 Introduction to Mathematical Statistics II, 22S:180 Mathematics of Finance I, and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** 22C:016 Computer Science I: Fundamentals, 22S:153 Mathematical Statistics I, 22S:154 Mathematical Statistics II, 22S:174 Quantitative Methods for Actuaries, 22S:175 Actuarial Models, 22S:181 Life Contingencies I, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** 22S:182 Life Contingencies II

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

### **Honors**

Qualified undergraduate students may earn a degree with honors.

To graduate with honors in statistics or in actuarial science, a student must be a member of the University of Iowa Honors Program, which requires that students maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

Honors students in statistics must have a g.p.a. of at least 3.40 in departmental courses required for the major. They also must complete an honors project or suitable alternative. A statistics student planning to graduate with honors should contact the statistics honors advisor.

Honors students in actuarial science must have a g.p.a. of at least 3.40 in departmental courses required for the major. They also must complete the following three courses in addition to the requirements for the B.S.

22S:171 Topics in Actuarial Science	3 s.h.
22S:176 Credibility and Survival Analysis	3 s.h.
22S:183 Mathematics of Finance II	3 s.h.

### **Minor**

The minor in statistics requires a minimum of 15 s.h. in statistics courses, including 12 s.h. in 100-level courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass. The minor requires the following courses:

Two of these:

22S:030 Statistical Methods and Computing	3 s.h.
or	
22S:105 Statistical Methods and Computing	3 s.h.

22S:152 Applied Linear Regression	3 s.h.
-----------------------------------	--------

Three of these:

22S:120 Probability and Statistics	4 s.h.
or	
22S:130 Introduction to Mathematical Statistics I	3 s.h.

22S:131 Introduction to Mathematical Statistics II	3 s.h.
--	--------

22S:133 Quality Control	3 s.h.
22S:138 Bayesian Statistics	3 s.h.
22S:153 Mathematical Statistics I	3 s.h.
22S:154 Mathematical Statistics II	3 s.h.
22S:156 Applied Time Series Analysis	3 s.h.
22S:158 Experimental Design and Analysis	3 s.h.
22S:162 Applied Generalized Regression	3 s.h.
22S:167 Environmental and Spatial Statistics	3 s.h.
22S:195 Probability and Stochastic Processes I	3 s.h.
171:164 Research Data Management	3 s.h.
171:174/22S:160 Introductory Longitudinal Data Analysis	3 s.h.

There is no minor in actuarial science.

## Graduate Programs

The department offers a Master of Science in statistics with thesis, without thesis, and with an actuarial science emphasis (without thesis). It also offers a Doctor of Philosophy in statistics.

### Master of Science

The Master of Science in statistics requires a minimum of 34 s.h. of graduate credit, with or without thesis. It prepares students for careers as professional statisticians or for entry into the Ph.D. program. The curriculum includes a solid foundation in statistical computing, regression analysis, experimental design, and mathematical statistics, plus electives in statistical methods and/or theory. Students have the opportunity to concentrate on theory, applications, or a combination of the two.

M.S. students may choose to write a thesis, which substitutes for two elective courses.

Each M.S. nonthesis student has a comprehensive exam committee of three or four faculty members, which is responsible for recommending action on the student's degree. The recommendation usually is based on two written examinations over topics covered in the required courses.

M.S. thesis students usually have two separate committees responsible for recommending action on their degrees. The recommendation of the thesis committee usually is based on an oral defense of the thesis, although it also may be based on a single written examination over topics covered in the student's program of study. The recommendation of the comprehensive exam committee usually is based on two written examinations over topics covered in the required courses.

### M.S. with Thesis

The M.S. in statistics with thesis requires the following course work. A computer programming proficiency test is administered early in the first semester. Students who display inadequate programming skills may be required to take an additional programming course.

Each semester in which a graduate student registers for at least 6 s.h., he or she must include at least one 2 s.h. course offered by the Department of Statistics and Actuarial Science, excluding 22S:197 Readings in Statistics and 22S:299 Reading Research.

22S:164-22S:165 Applied Statistics I-II	7 s.h.
22S:166 Computing in Statistics	3 s.h.
22S:173 Statistical Consulting	3 s.h.
22S:193-22S:194 Statistical Inference I-II	6 s.h.
22S:195 Probability and Stochastic Processes I	3 s.h.
22S:197 Readings in Statistics	6 s.h.

At least two of these:

22S:138 Bayesian Statistics	3 s.h.
22S:156 Applied Time Series Analysis	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.
22S:162 Applied Generalized Regression	3 s.h.
22S:163 Nonparametric Statistical Methods	3 s.h.
22S:167 Environmental and Spatial Statistics	3 s.h.
22S:190 Mathematical Methods for Statistics	3 s.h.

22S:196 Probability and Stochastic Processes II 3 s.h.  
 Any 200-level statistics course  
 An elective approved by the advisor

The typical thesis is a statistical presentation of the results of a meaningful research project in another field, or a study of the characteristics of a new statistical method. The thesis work is directed by a supervising professor.

### **M.S. Without Thesis**

The following course work is required for the M.S. in statistics without thesis. A computer programming proficiency test is administered early in the first semester. Students who display inadequate programming skills may be required to take an additional programming course.

Each semester in which a graduate student registers for at least 6 s.h., he or she must include at least one 2 s.h. course offered by the Department of Statistics and Actuarial Science, excluding 22S:197 Readings in Statistics and 22S:299 Reading Research.

22S:164-22S:165 Applied Statistics I-II	7 s.h.
22S:166 Computing in Statistics	3 s.h.
22S:173 Statistical Consulting	3 s.h.
22S:193-22S:194 Statistical Inference I-II	6 s.h.
22S:195 Probability and Stochastic Processes I	3 s.h.

At least four of these:

22S:138 Bayesian Statistics	3 s.h.
22S:156 Applied Time Series Analysis	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.
22S:162 Applied Generalized Regression	3 s.h.
22S:163 Nonparametric Statistical Methods	3 s.h.
22S:167 Environmental and Spatial Statistics	3 s.h.
22S:190 Mathematical Methods for Statistics	3 s.h.
22S:196 Probability and Stochastic Processes II	3 s.h.
Any 200-level statistics course	
An elective approved by the advisor	

### **M.S. with Actuarial Science Emphasis**

The Master of Science in statistics with actuarial science emphasis requires 36 s.h. of graduate credit. It is offered without thesis. The program prepares students for actuarial careers by emphasizing the theory that underlies risk processes and the application of this theory to practical problems of insurance pricing and management. The required course work helps students prepare for the professional examinations administered by the Casualty Actuarial Society and/or the Society of Actuaries.

Each M.S. student has a committee of three or four members, which is responsible for recommending action on the student's degree. The committee's recommendation usually is based on two written examinations over topics covered in the required program.

The M.S. in statistics with actuarial science emphasis requires the following course work.

Each semester in which a graduate student registers for at least 6 s.h., he or she must include at least one 2 s.h. course offered by the Department of Statistics and Actuarial Science, excluding 22S:197 Readings in Statistics and 22S:299 Reading Research.

One of these sequences:

22S:153-22S:154 Mathematical Statistics I-II	6 s.h.
22S:193-22S:194 Statistical Inference I-II (for well-prepared students)	6 s.h.

All of these:

22S:150 Regression, Time Series, and Forecasting	3 s.h.
22S:171 Topics in Actuarial Science	3 s.h.
22S:174 Quantitative Methods for Actuaries	3 s.h.
22S:175 Actuarial Models	3 s.h.

22S:176 Credibility and Survival Analysis	3 s.h.
22S:180 Mathematics of Finance I	4 s.h.
22S:181-22S:182 Life Contingencies I-II	6 s.h.
22S:183 Mathematics of Finance II	3 s.h.

## Doctor of Philosophy in Statistics

The Doctor of Philosophy in statistics requires a minimum of 72 s.h. of graduate credit, including work completed in the M.S. program. The program prepares students for careers in research, applications, and teaching.

All Ph.D. students must pass comprehensive exams and write a dissertation. The program takes about three years to complete after the M.S. has been granted, or five years after completion of a Bachelor of Science. Students choose one of four concentration areas for their Ph.D. course work: biostatistics; probability/mathematical statistics; statistical modeling; and actuarial science/financial mathematics.

Biostatistics emphasizes exposure to various biostatistical methods, such as survival analysis, categorical data analysis, and longitudinal data analysis. It prepares students for consulting and other positions in industry.

Probability/mathematical statistics emphasizes a broad, solid foundation in techniques and underpinnings of mathematical statistics. Its focus on breadth and depth is intended to produce well-rounded, knowledgeable scholars. It is excellent preparation for academic positions in mathematical statistics and industrial or government positions that require broadly trained statisticians with a strong understanding of statistical theory.

Statistical modeling emphasizes the theory and application of a broad array of statistical models, such as linear, generalized linear, nonlinear, categorical, spatial, correlated response, and nonparametric regression models. This concentration area prepares students to specify and choose appropriate models; fit the models using available statistical software; and make sound statistical conclusions and interpretive statements. It is excellent preparation for students interested in academic, industrial, or government positions that involve data modeling and analysis.

Actuarial science/financial mathematics emphasizes the theory of actuarial science, finance, and risk management. It is excellent preparation for academic positions in universities that offer actuarial science programs or for positions in the insurance, pension, and financial industries. Most students who choose this concentration area are admitted after earning an M.S. in statistics with actuarial science emphasis at The University of Iowa.

The Ph.D. in statistics requires the following course work.

Each semester in which a graduate student registers for at least 6 s.h., he or she must include at least one 2 s.h. course offered by the Department of Statistics and Actuarial Science, excluding 22S:197 Readings in Statistics and 22S:299 Reading Research.

### CORE COURSES

22S:164-22S:165 Applied Statistics I-II	7 s.h.
22S:166 Computing in Statistics	3 s.h.
22S:173 Statistical Consulting	3 s.h.
22S:190 Mathematical Methods for Statistics	3 s.h.
22S:193-22S:194 Statistical Inference I-II	6 s.h.
22S:195 Probability and Stochastic Processes I	3 s.h.
22S:203-22S:204 Foundations of Probability I-II	6 s.h.
22S:253-22S:254 Advanced Inference I-II	6 s.h.
22S:255 Linear Models	4 s.h.
22S:299 Reading Research (at least 18 s.h.)	arr.
At least 2 s.h. of 22S:291, 22S:293, or 22S:295 (seminars)	

### CONCENTRATION AREA

Students take at least four courses in one of the following concentration areas. At least two of these must be 200-level courses.

#### Biostatistics

22S:138 Bayesian Statistics	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.

22S:162 Applied Generalized Regression	3 s.h.
22S:167 Environmental and Spatial Statistics	3 s.h.
22S:220 Analysis of Categorical Data	3 s.h.
22S:225 Survival Data Analysis	3 s.h.
171:241 Applied Categorical Data Analysis	3 s.h.
171:264 Longitudinal Data Analysis	3 s.h.
185:274 Theory of Statistical Genetics	3 s.h.

#### **Probability/Mathematical Statistics**

22S:196 Probability and Stochastic Processes II	3 s.h.
22S:235 Time Series Analysis	3 s.h.
22S:238 Bayesian Analysis	3 s.h.

#### **Statistical Modeling**

22S:138 Bayesian Statistics	3 s.h.
22S:156 Applied Time Series Analysis	3 s.h.
22S:161 Applied Multivariate Analysis	3 s.h.
22S:162 Applied Generalized Regression	3 s.h.
22S:167 Environmental and Spatial Statistics	3 s.h.
22S:220 Analysis of Categorical Data	3 s.h.
22S:235 Time Series Analysis	3 s.h.
22S:238 Bayesian Analysis	3 s.h.
22S:248 Computer Intensive Statistics	3 s.h.

#### **Actuarial Science/Financial Mathematics**

06F:225 Finance Theory I	3 s.h.
06F:227 Finance Theory II	3 s.h.
22S:196 Probability and Stochastic Processes II	3 s.h.
22S:235 Time Series Analysis	3 s.h.
22S:273 Advanced Topics in Actuarial Science/Financial Mathematics	3 s.h.

#### **OTHER COURSE WORK**

During the graduate program, students may take course work or seminars in other departments to achieve the Ph.D. program's auxiliary goals: to relate an area of specialization to other fields of knowledge, to acquire the ability to use computers, or to learn the language skills needed to read international scientific journals and respond in personal contacts with foreign scholars.

#### **COMPREHENSIVE EXAM**

Ph.D. students take a comprehensive examination after completing most of the course work on their approved plan of study, typically during the third year of graduate study.

The comprehensive examination consists of a written core examination and an oral examination on statistical inference, linear models, and probability. These topics are generally covered in 22S:193 Statistical Inference I, 22S:194 Statistical Inference II, 22S:195 Probability and Stochastic Processes I, 22S:203 Foundations of Probability I, 22S:253 Advanced Inference I, and 22S:255 Linear Models. Study guides for the core examination are available from the department. Students in the actuarial science/financial mathematics concentration area may qualify to take an exam designed by their advisor and approved by the director of graduate studies.

A program that does not conform to the prescribed requirements but is of high quality may be approved by the department chair.

#### **Financial Support**

Funds are available to help support outstanding applicants. Fellowships, teaching assistantships, and research assistantships provide an attractive stipend plus resident tuition status and tuition scholarships for students who are appointed at least one-quarter time. In some cases, full tuition waivers are granted.

Students who wish to be considered for financial assistance for their third year in the program should request a Ph.D. candidacy review no later than the spring semester of their second year.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Facilities

The Department of Statistics and Actuarial Science is housed in Schaeffer Hall, adjacent to Old Capitol, a National Historic Landmark and the center of campus. The department operates two computer labs in Schaeffer Hall. One, which also is used as an electronic classroom, contains 28 Windows PCs. The second houses 18 high-end UNIX workstations. Students use these labs for both class work and research.

## Statistics and Actuarial Science Courses

### Primarily for Undergraduates

Once students have earned credit in a Department of Statistics and Actuarial Science course numbered above 105, they cannot earn credit in one numbered below 105. Students may earn credit for only two of these: 22S:002 Statistics and Society, 22S:008 Statistics for Business, 22S:025 Elementary Statistics and Inference (same as 07P:025), and 22S:030 Statistical Methods and Computing. Credit for 22S:002 Statistics and Society can be earned only if the course is taken before 22S:008 Statistics for Business, 22S:025 Elementary Statistics and Inference (same as 07P:025), or 22S:030 Statistical Methods and Computing. Students may receive credit for only one course from each of these pairs: 22S:030 and 22S:105 Statistical Methods and Computing, 22S:101 Biostatistics and 22S:102 Introduction to Statistical Methods, and 22S:120 Probability and Statistics and 22S:130 Introduction to Mathematical Statistics I.

#### **22S:002 Statistics and Society** 3 s.h.

Statistical ideas and their relevance to public policy, business, and the social, health, and physical sciences; focus on critical approach to statistical evidence. Prerequisites: 22M:001. GE: Quantitative or Formal Reasoning.

#### **22S:008 Statistics for Business** 4 s.h.

Descriptive statistics, elementary probability, estimation and testing, regression, correlation; statistical computer packages. Prerequisites: 22M:008. GE: Quantitative or Formal Reasoning.

#### **22S:025 Elementary Statistics and Inference** 3 s.h.

Graphing techniques for presenting data, descriptive statistics, correlation, regression, prediction; logic of statistical inference, elementary probability models, estimation and tests of significance. Prerequisites: 22M:001. GE: Quantitative or Formal Reasoning. Same as 07P:025.

#### **22S:029 First-Year Seminar** 1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

#### **22S:030 Statistical Methods and Computing** 3 s.h.

Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Prerequisites: 22M:008. GE: Quantitative or Formal Reasoning.

#### **22S:039 Probability and Statistics for the Engineering and Physical Sciences** 3 s.h.

Descriptive statistics, exploratory data analysis, random variables, important discrete and continuous distributions, point and interval estimation, tests of hypotheses, regression; design of experiments, including factorial and fractional factorial designs. Prerequisites: 22M:032.

**For Undergraduate and Graduate Students**

- 22S:101 Biostatistics** 3 s.h.  
Statistics in biohealth science; probability, evidence, Bayes Rule; relative risks, design of experiments; linear, logistic, Cox regression; survival analysis; statistical adjustment. Prerequisites: 22M:001.
- 22S:102 Introduction to Statistical Methods** 3 s.h.  
Analysis, interpretation of research data; descriptive statistics; introduction to probability, sampling theory, statistical inference (binomial, normal distribution, t-distribution models); linear correlation, regression. Same as 07P:143.
- 22S:105 Statistical Methods and Computing** 3 s.h.  
Methods of data description and analysis using SAS; descriptive statistics, graphical presentation, estimation, hypothesis testing, sample size, power; emphasis on learning statistical methods and concepts through hands-on experience with real data. Prerequisites: 22M:008.
- 22S:120 Probability and Statistics** 4 s.h.  
Models, discrete and continuous random variables and their distributions, estimation of parameters, testing statistical hypotheses. Prerequisites: 22M:026 or 22M:032.
- 22S:130 Introduction to Mathematical Statistics I** 3 s.h.  
Descriptive statistics, probability, discrete and continuous distributions, sampling, sampling distributions. Prerequisites: 22M:026 or 22M:032.
- 22S:131 Introduction to Mathematical Statistics II** 3 s.h.  
Estimation, testing statistical hypotheses, linear models, multivariate distributions, nonparametric methods. Prerequisites: 22S:130.
- 22S:133 Quality Control** 3 s.h.  
Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: 22S:030 and 22S:039. Same as 056:162.
- 22S:138 Bayesian Statistics** 3 s.h.  
Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: 22S:120 and 22S:152. Same as 07P:148.
- 22S:140 Design and Analysis of Biomedical Studies** 3 s.h.  
Simple and multiple linear regression and correlation; one- and two-way layout considerations in planning experiments; factorial experiments; multiple comparison techniques; orthogonal contrasts. Offered spring semesters. Prerequisites: 171:161. Same as 171:162.
- 22S:148 Intermediate Statistical Methods** 4 s.h.  
Foundation for more advanced applied courses; logic of statistical inference, chi-square, and other tests of statistical hypotheses; small sample error theory, interval estimates, introduction to analysis of variance, selected nonparametric methods. Prerequisites: 07P:143. Requirements: (for 22S:148) 22S:102. Same as 07P:243.
- 22S:150 Regression, Time Series, and Forecasting** 3 s.h.  
Regression analysis, forecasting, time series methods; use of statistical computing packages. Prerequisites: 22S:154.
- 22S:152 Applied Linear Regression** 3 s.h.  
Regression analysis with focus on applications; model formulation, checking, selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; hands-on data analysis with SAS software. Prerequisites: 22S:030 or 22S:039. Same as 056:176.
- 22S:153 Mathematical Statistics I** 3 s.h.

Probability, conditional probability, random variables, distribution and density functions, joint and conditional distributions, various families of discrete and continuous distributions, mgf technique for sums, convergence in distribution, convergence in probability, central limit theorem. Prerequisites: 22M:027 and 22M:028.

### **22S:154 Mathematical Statistics II**

3 s.h.

Transformations, order statistics, point estimation, sufficient statistics, Rao-Blackwell Theorem, delta method, confidence intervals, likelihood ratio tests, applications.

### **22S:156 Applied Time Series Analysis**

3 s.h.

General stationary, nonstationary models, autocovariance autocorrelation functions; stationary, nonstationary autoregressive integrated moving average models; identification, estimation, forecasting in linear models; use of statistical computer packages. Offered spring semesters. Prerequisites: 22S:131, and 22S:152 or 22S:164.

### **22S:157 Correlation and Regression**

4 s.h.

Correlation techniques; selected bivariate procedures, multiple, partial, curvilinear correlation; multiple linear regression; sampling theory applied to regression analysis and correlation coefficients; simple causal models. Prerequisites: 07P:243. Requirements: (for 22S:157) 22S:148. Same as 07P:244.

### **22S:158 Experimental Design and Analysis**

3 s.h.

Single- and multifactor experiments; analysis of variance; multiple comparisons; contrasts; diagnostics; fixed, random, and mixed effects models; designs with blocking and/or nesting; two-level factorials and fractions thereof; use of statistical computing packages. Prerequisites: 22S:030 and 22S:152.

### **22S:159 Design of Experiments**

4 s.h.

Theory and methods in the planning and statistical analysis of experimental studies; testing of hypotheses about linear contrasts among means in single-factor and multifactor, completely randomized, and repeated measurement designs. Prerequisites: 07P:243. Requirements: (for 22S:159) 22S:148. Same as 07P:246.

### **22S:160 Introductory Longitudinal Data Analysis**

3 s.h.

Statistical models and estimation methods used to analyze correlated data (e.g., same subject measured repeatedly); emphasis on use of statistical software. Offered fall semesters of even years. Prerequisites: 171:161, and 171:162 or 22S:152. Same as 171:174.

### **22S:161 Applied Multivariate Analysis**

3 s.h.

Multivariate descriptive statistics, multivariate normal distribution, Hotelling's T-squared, MANOVA, multivariate regression, principal components, discrimination and classification, cluster analysis. Prerequisites: 22S:152 and 22S:158. Requirements: facility with matrix algebra. Same as 07P:245.

### **22S:162 Applied Generalized Regression**

3 s.h.

Applications of semiparametric models, generalized linear models, nonlinear normal errors models, correlated response models; use of statistical packages, especially SAS. Requirements: introductory statistics and applied linear models.

### **22S:163 Nonparametric Statistical Methods**

3 s.h.

Selected nonparametric methods; one- and two-sample location tests and estimation methods, measures of association, analyses of variance; emphasis on relationships to classical parametric procedures. Prerequisites: 07P:243 or 22S:120. Same as 07P:247.

### **22S:164 Applied Statistics I**

4 s.h.

Introduction to computing environments and statistical packages, descriptive statistics, basic inferential methods (confidence intervals, chi-square tests); linear models (regression and ANOVA models--specification and assumptions, fitting, diagnostics, selection, testing, interpretation). Prerequisites: 22S:120. Requirements: facility with matrix algebra.

### **22S:165 Applied Statistics II**

3 s.h.

Design of experiments, analysis of designed experiments. Prerequisites: 22S:164.

### **22S:166 Computing in Statistics**

3 s.h.

R; database management; graphical techniques; importing graphics into word-processing documents (e.g., LaTeX); creating reports in LaTeX; SAS; simulation methods (Monte Carlo studies, bootstrap, etc.). Corequisites: 22S:164 and 22S:193.

- 22S:167 Environmental and Spatial Statistics** 3 s.h.  
Methods for sampling environmental populations, sampling design, trend detection and estimation, geostatistics, kriging, variogram estimation, lattice data analysis, analysis of spatial point patterns. Prerequisites: 22S:152 and 22S:154.
- 22S:170 ALPHA Seminar** 1 s.h.  
Resources available to students, program requirements, tips for academic success, professional statistical organizations, library and career center resources, statistical computing, scientific document preparation, history of statistics. Requirements: graduate standing in statistics.
- 22S:171 Topics in Actuarial Science** arr.
- 22S:172 Topics in Statistics** 3 s.h.  
Prerequisites: 22S:154.
- 22S:173 Statistical Consulting** 3 s.h.  
Realistic supervised data analysis experiences, including statistical packages, statistical graphics, writing statistical reports, dealing with complex or messy data. Offered spring semesters. Prerequisites: 22S:152 and 22S:158, or 22S:164 and 22S:165.
- 22S:174 Quantitative Methods for Actuaries** 3 s.h.  
Algorithms, finite differences, interpolation, linear and quadratic programming, individual risk models, life tables. Offered fall semesters. Corequisites: 22S:153 or 22S:193. Requirements: multivariate calculus and linear algebra.
- 22S:175 Actuarial Models** 3 s.h.  
Fundamental theorem of asset pricing; Poisson processes, Markov chains, Brownian motion, financial applications. Offered spring semesters. Requirements: grades of C+ or higher in 22S:174 and 22S:180.
- 22S:176 Credibility and Survival Analysis** 3 s.h.  
Construction and selection of parametric models; credibility; simulation. Offered spring semesters. Prerequisites: 22S:154 or 22S:194. Corequisites: 22S:177. Requirements: grade of C+ or higher in 22S:175.
- 22S:177 Loss Distributions** 3 s.h.  
Severity, frequency, and aggregate models and their modifications; risk measures; construction of empirical models. Offered spring semesters. Prerequisites: 22S:154 or 22S:194. Corequisites: 22S:176. Requirements: grade of C+ or higher in 22S:175.
- 22S:180 Mathematics of Finance I** 4 s.h.  
Mathematics of compound interest, including annuities certain, amortization schedules, yield rates, sinking funds, bonds. Offered fall and spring semesters. Prerequisites: 22M:026.
- 22S:181 Life Contingencies I** 3 s.h.  
Life insurance, life annuities, benefit premiums and reserves. Offered spring semesters. Prerequisites: 22S:153 or 22S:193. Requirements: grades of C+ or higher in 22S:174 and 22S:180.
- 22S:182 Life Contingencies II** 3 s.h.  
Continuation of 22S:181; benefit premiums and reserves, multiple-decrement and multilife models. Offered fall semesters. Requirements: grade of C or higher in 22S:181.
- 22S:183 Mathematics of Finance II** 3 s.h.  
Derivatives markets, interest rate models, financial applications. Offered fall semesters. Requirements: grade of C or higher in 22S:175.
- 22S:188 Actuarial Exam P/1 Preparation** 1 s.h.
- 22S:189 Actuarial Exam FM/2 Preparation** 1 s.h.  
Preparation for the Society of Actuaries and the Casualty Actuarial Society exams.

**22S:190 Mathematical Methods for Statistics**

3 s.h.

Real numbers, point set theory, limit points, limits, metric spaces, continuity, sequences and series, Taylor series (multivariate), uniform convergence, Riemann-Stieltjes integrals. Requirements: graduate standing in statistics.

**22S:193 Statistical Inference I**

3 s.h.

Review of probability, distribution theory (multiple random variables, moment-generating functions, transformations, conditional distributions), sampling distributions, order statistics, limit theory, principles of data reduction. Prerequisites: 22M:028 and 22S:131.

**22S:194 Statistical Inference II**

3 s.h.

Continuation of 22S:193; principles of data reduction, point estimation theory (MLE, Bayes, UMVU), hypothesis testing, interval estimation, decision theory, asymptotic evaluations. Prerequisites: 22S:193.

**22S:195 Probability and Stochastic Processes I**

3 s.h.

Conditional expectations; Markov chains, including random walks and gambler's ruin; classification of states; stationary distributions; branching processes. Prerequisites: 22S:130, or 22S:120.

**22S:196 Probability and Stochastic Processes II**

3 s.h.

Continuous-time Markov chains, including birth and death processes and time reversibility; renewal theory, including regenerative processes and semi-Markov processes; Brownian motion, stationary processes. Prerequisites: 22S:195.

**22S:197 Readings in Statistics**

arr.

**22S:199 Actuarial Exam MLC Preparation**

1 s.h.

Preparation for the Society of Actuaries exam.

**Primarily for Graduate Students****22S:203 Foundations of Probability I**

3 s.h.

Probability theory, with emphasis on constructing rigorous proofs; measure spaces, measurable functions, random variables and induced measures, distribution functions, Lebesgue integral, product measure and independence, Borel Cantelli lemma, modes of convergence. Prerequisites: 22S:190.

**22S:204 Foundations of Probability II**

3 s.h.

Laws of large numbers, characteristic functions and properties, central limit theorem, Radon-Nikodym derivatives, conditional expected value and martingales. Prerequisites: 22S:203.

**22S:220 Analysis of Categorical Data**

3 s.h.

Models for discrete data, distribution theory, maximum likelihood and weighted least squares estimation for categorical data, tests of fit, models selection. Offered spring semesters. Prerequisites: 22S:154 or 22S:194, and 22S:164 or 171:202. Same as 171:262.

**22S:225 Survival Data Analysis**

3 s.h.

Types of censoring and truncation; survival function estimation; life tables; parametric inference using exponential, Weibull, and accelerated failure time models; nonparametric tests; sample size calculation; Cox regression with stratification and time-dependent covariates; regression diagnostics; competing risks; analysis of correlated survival data. Offered fall semesters. Prerequisites: 22S:154 or 22S:194, and 171:202. Same as 171:261.

**22S:235 Time Series Analysis**

3 s.h.

Stationary time series, ARIMA models, spectral representation, linear prediction inference for the spectrum, multivariate time series, state space models and processes, nonlinear time series. Prerequisites: 22S:154 and 22S:156.

**22S:238 Bayesian Analysis**

3 s.h.

Decision theory, conjugate families, structure of Bayesian inference, hierarchical models, asymptotic approximations for posterior distributions, Markov chain Monte Carlo methods and convergence assessment, model adequacy and model choice. Prerequisites: 22S:164, 22S:166, 22S:190, and 22S:194.

**22S:248 Computer Intensive Statistics**

3 s.h.

Computer arithmetic; random variate generation; numerical optimization; numerical linear algebra; smoothing techniques; bootstrap methods; cross-validation; MCMC; EM and related algorithms; other topics per student/instructor interests. Prerequisites: 22S:131, and 22S:164 or 171:201. Requirements: proficiency in Fortran or C or C++ or Java.

**22S:253 Advanced Inference I**

3 s.h.

Concepts of convergence, asymptotic methods including the delta method, sufficiency, asymptotic efficiency, Fisher information and information bounds for estimation, maximum likelihood estimation, the EM-algorithm, Bayes estimation, decision theory. Prerequisites: 22S:190 and 22S:194.

**22S:254 Advanced Inference II**

3 s.h.

Hypothesis testing, asymptotics of the likelihood ratio test, asymptotic efficiency, statistical functionals, robustness, bootstrap and jackknife, estimation with dependent data. Prerequisites: 22S:253.

**22S:255 Linear Models**

4 s.h.

Linear spaces and matrix theory, multivariate normal distribution and distributions of quadratic forms, full-rank and non-full-rank linear models, estimability, interval estimation, hypothesis testing, random and mixed models, applications. Prerequisites: 22S:164, 22S:165, and 22S:194.

**22S:273 Advanced Topics in Actuarial Science/Financial Mathematics**

arr.

Repeatable.

**22S:291 Seminar: Mathematical Statistics**

arr.

Repeatable.

**22S:293 Seminar: Probability**

arr.

**22S:295 Seminar: Applied Statistics**

arr.

Repeatable.

**22S:299 Reading Research**

arr.

Repeatable.

## Theatre Arts

**Director, Division of Performing Arts:** Alan MacVey

**Chair:** Alan MacVey

**Professors:** Eric Forsythe, Alan MacVey, Kim Marra (Theatre Arts/American Studies)

**Professors emeriti:** Cosmo A. Catalano, David Schaal, David Thayer

**Associate professors:** Loyce Arthur, Art Borreca, John Cameron, Merrel Dare Clubb, Tisch Jones, Sydne Mahone, Bryon Winn

**Visiting associate professor:** Judy Leigh-Johnson

**Assistant professors:** Paul Kalina, R. Eric Stone

**Lecturers:** James Albert, Meredith Alexander, James P. Birder, Carol MacVey, David McGraw

**Undergraduate degree:** B.A. in Theatre Arts

**Undergraduate nondegree program:** Minor in Theatre Arts

**Graduate degree:** M.F.A. in Theatre Arts

**Web site:** <http://www.uiowa.edu/~theatre>

The Department of Theatre Arts offers academic programs for undergraduate and graduate students. It also stages live performances throughout the academic year and during the summer.

The department is one of three academic units that make up the Division of Performing Arts.

## Undergraduate Programs

The Department of Theatre Arts offers a Bachelor of Arts and a minor in theatre arts. It also participates in offering the Certificate in Performing Arts Entrepreneurship, offered through the Division of Performing Arts.

The major is based on the department's belief that the best way to develop future artists is to expose them to rigorous professional practice within the framework of a liberal arts and sciences education.

Department of Theatre Arts students take workshop courses in acting, directing, design, technical theatre, stage management, and playwriting and complement them with classes in dramatic literature, history, and criticism. Students also are encouraged to explore a range of courses throughout the University. Two dozen productions are staged each year, providing additional opportunities to learn the theatre craft and to develop a personal artistic vision.

The department also educates students who plan to enter other fields in which understanding of the arts and experience with theatre skills are useful. Some pursue a major in theatre arts or work toward a double major in theatre arts and another discipline. Others take theatre classes as nonmajors; see "Courses for Nonmajors" in this section of the Catalog.

### Bachelor of Arts

The Bachelor of Arts in theatre arts requires a minimum of 120 s.h., including 33 s.h. of work for the major. The following courses constitute the basic experience for all undergraduate theatre arts students. Registration in some courses for the major requires special permission. Contact the Department of Theatre Arts for details.

Students must maintain a g.p.a. of at least 2.00 for all courses in the major.

Students who transfer to The University of Iowa from other accredited two- or four-year institutions must demonstrate that they have successfully completed course work equivalent to the basic requirements of the theatre arts department and the University before they may take advanced-level electives. Consult the director of undergraduate studies for more information.

Students must complete the College of Liberal Arts and Sciences General Education Program.

In planning course work, especially electives, students should be guided by the College of Liberal Arts and Sciences maximum hours rule: Students earning a B.A. or B.S. may apply a maximum of 50 s.h. earned in one department to the minimum 120 s.h. required for graduation, whether or not the course work is accepted toward requirements for the major; students who earn more than 50 s.h. from one department may use the additional semester hours to satisfy requirements for the major (if the department accepts them), and the grades they earn become part of their grade-point average; but they cannot apply the additional semester hours to the minimum 120 s.h. required for graduation.

### COMMON REQUIREMENTS

Students must complete a course's prerequisites before registering for the course. Playscript Analysis (049:060) should be completed as soon as possible; it is prerequisite to several 100-level courses. Courses 049:025 Acting I, 049:060 Playscript Analysis, 049:112 History of Theatre and Drama I or 049:113 History of Theatre and Drama II, and the design requirement normally are completed within the first four semesters in the major. Theatre Crafts (049:044) is prerequisite to all production courses; 049:045 Production: Run Crew is prerequisite to 049:046 Production: Crew Chief and 049:047 Production: Construction.

Students who complete 049:002 Theatre and Society: Ancients and Moderns or 049:003 Theatre and Society: Romantics and Rebels before declaring a major in theatre arts must consult the undergraduate director before

registering for 049:112 History of Theatre and Drama I or 049:113 History of Theatre and Drama II.

All of these:

049:025 Acting I	3 s.h.
049:044 Theatre Crafts	3 s.h.
049:060 Playscript Analysis	3 s.h.
049:112 History of Theatre and Drama I	3 s.h.
049:113 History of Theatre and Drama II	3 s.h.
Dramatic literature requirement (049:072, 049:116-049:119, 049:181-049:188, 049:190-049:193)	3 s.h.
Design requirement (049:043, 049:133-049:136, or 049:146)	3 s.h.
Theatre courses numbered 100 or above	6 s.h.

Required production courses: Students must earn a total of 3 s.h. from the following production courses; 049:045 Production: Run Crew is prerequisite to 049:046 Production: Crew Chief and 049:047 Production: Construction.

049:045 Production: Run Crew	1-2 s.h.
049:046 Production: Crew Chief	2 s.h.
049:047 Production: Construction	1-2 s.h.

Optional courses: With the instructor's approval, students who enroll in one of the three optional courses (049:132 Stage Management, 049:147 Technical Production I, or 049:148 Technical Production: Special Topics) also may enroll in 049:045 Production: Run Crew (a required production course) during the same semester or session and may complete an additional project, earning 1 s.h. for 049:045 Production: Run Crew in addition to the credit they earn for the optional course. Students may earn a maximum of 1 s.h. of required production course credit this way.

049:132 Stage Management	3 s.h.
049:147 Technical Production I	3 s.h.
049:148 Technical Production: Special Topics	3 s.h.

One of these:

049:130 Directing I	3 s.h.
049:172 Senior Seminar	3 s.h.

## ELECTIVES

Students majoring in theatre arts may count a maximum of 17 s.h. earned in Department of Theatre Arts elective courses (prefix 049) toward degree requirements. Theatre arts elective credit in excess of 17 s.h. is included on the transcript, but it does not count toward the 120 s.h. required for graduation.

Transfer students should consult the director of undergraduate studies before registering for advanced-level electives.

### Student Auditions for Theatre Arts Productions

Theatre arts majors are encouraged to audition for the department's productions in general auditions at the beginning of the fall semester. Students normally present a three-minute audition consisting of two contrasting pieces. From this audition, callback lists are posted for major productions offered during the first semester. Additional general auditions normally are scheduled in early November and in February.

Students in other majors are welcome to audition for the department's productions, as are community members (see "Productions and Auditions" later in this section). For academic considerations, theatre arts majors are given first consideration for roles.

Materials and information about the general auditions are available from the Department of Theatre Arts office in August. Notices of auditions for all subsequent productions are posted on the department's call board.

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** three courses in the major (chosen from 049:025 Acting I, 049:043 Elements of Design, 049:060 Playscript Analysis, 049:112 History of Theatre and Drama I, and 049:113 History of Theatre and

Drama II) and at least one-half of the semester hours required for graduation

**Before the seventh semester begins:** three more courses in the major, two semesters of production credit, and at least three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** two more courses in the major and another semester of production credit

**During the eighth semester:** enrollment in remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

## Honors

Students who wish to pursue honors studies in the Department of Theatre Arts must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information). Senior theatre arts majors who are members of the honors program, have earned a 3.33 g.p.a. in the major, and have approval from the theatre arts faculty may undertake an honors project. Projects may be analytical or creative, or an appropriate combination of the two. Projects ordinarily require an oral presentation or performance for designated faculty members as well as a research and writing component, which is due upon the project's completion.

Students who wish to complete an honors project meet with the departmental honors advisor, who helps them find an appropriate faculty sponsor, prepare and gain acceptance for a written proposal, present the work, and evaluate the outcome. Students normally begin this work before their senior year.

Theatre arts majors who are members of the University of Iowa Honors Program may take honors courses in theatre arts. Courses in the major can be designated as honors courses with permission of the faculty member who teaches the course, the department, and the honors program.

## Minor

The minor in theatre arts requires a minimum of 15 s.h. in theatre arts courses, including 12 s.h. in advanced courses taken at The University of Iowa. Students must maintain a g.p.a. of at least 2.00 in the minor. Course work in the minor may not be taken pass/nonpass.

For the minor, advanced courses include 049:021 Basic Acting II, 049:043 Elements of Design, 049:044 Theatre Crafts, 049:060 Playscript Analysis, 049:063 Playwriting II, and any course numbered 049:100 and above. Students must complete all prerequisites for the courses they choose for the minor. They may not include 049:025 Acting I in the minor; it is reserved for students majoring in theatre arts. Students interested in acting should start the minor with 049:020 Basic Acting and then 049:021 Basic Acting II. In rare cases, a student who has completed those may be granted permission to take 049:120 Acting II, which generally is reserved for theatre arts majors.

## Courses for Nonmajors

Students in other majors who have an interest in the theatre arts may take courses in the department. The following courses are open to nonmajors.

049:001 Art of the Theatre	3 s.h.
049:002 Theatre and Society: Ancients and Moderns	3 s.h.
049:003 Theatre and Society: Romantics and Rebels	3 s.h.
049:020 Basic Acting	3 s.h.
049:021 Basic Acting II	3 s.h.
049:050 Musical Theatre	3 s.h.
049:051 Comedy and Society	3 s.h.
049:062 Playwriting I	3 s.h.
049:072 Shakespeare	3 s.h.
049:101 Drama in the Classroom	3 s.h.
049:102 Acting for Singers	2 s.h.
049:103 Voice/Speech/Text--Speaking in Public	3 s.h.
049:105 Introduction to Laban Movement Studies	2-3 s.h.
049:106 Singing for Actors	2 s.h.
049:109 Introduction to Arts Management	3 s.h.
049:110 Theatre for Social Outreach	arr.
049:111 New Ventures in the Arts	3 s.h.
049:161 The Arts in Performance	3 s.h.
049:182 Free Style Writing: Poetry, Plays, and Performances	3 s.h.

049:183 Black Feminist Tradition and Culture	3 s.h.
049:185 Cultural Diversity and Identity	3 s.h.
049:190 African American Theatre I	3 s.h.
049:191 African American Theatre II	3 s.h.
049:192 Culturally Diverse Theatre	3 s.h.
049:195 Arts Leadership Seminar	3 s.h.

Nonmajors with backgrounds in the fine arts may take the following courses with consent of instructor.

049:133 Theatre Design I	3 s.h.
049:134 Scene Design I	3 s.h.
049:135 Costume Design I	3 s.h.
049:136 Lighting Design I	3 s.h.

Other courses may be open to nonmajors with consent of the instructor.

## Graduate Program

The department offers a Master of Fine Arts in theatre arts.

### Master of Fine Arts

The Master of Fine Arts in theatre arts requires 61-72 s.h. of graduate credit, depending on specialty area. Students normally must complete six semesters in residence (internships may be substituted).

The graduate program is dedicated to creative development of theatre artists. Graduates have a solid background in major performance theories, dramatic literature, and practices of the past and present as well as in the craft of their chosen specialties.

Special attention is given to understanding the role and importance of live theatre in society. Interactions among the various theatre disciplines are emphasized, both in classes and through the department's extensive production program. Particular emphasis is placed on the development of new works for the theatre.

Students must make normal progress toward completion of the degree requirements to remain in the program: they must maintain a g.p.a. of at least 3.00 overall and in all course work within the primary area of concentration, and they must build a record of substantial creative work of high quality. Students who fail to make normal progress are placed on academic probation and given one additional semester to demonstrate their qualifications for earning the degree.

Contact the Department of Theatre Arts for specific information on any of the M.F.A. specialty areas.

### Admission

Students who demonstrate exceptional ability in acting, directing, dramaturgy, playwriting, design, or stage management may apply for admission to the program of study and production leading to the M.F.A. Admission is based on interview, audition, and/or a portfolio of relevant work, the undergraduate record or other proof of artistic accomplishment, and letters of recommendation.

Submission of playscripts is the most important element in gaining admission to the Playwrights Workshop.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Productions and Auditions

The Department of Theatre Arts presents around 25 public productions each year. These include a subscription series of five plays, a festival of five new works by students, three productions by Iowa Summer Repertory Theatre (a professional company that also employs students), and other productions, many of them new plays.

Special attention is given to the process of developing new works and to the collaborative process that involves writers, directors, designers, dramaturgs, stage managers, and actors. Graduates, undergraduates, faculty, and visiting guest artists work together on large and small projects throughout the year and in a special summer repertory season.

### Auditions for Theatre Arts Productions

Auditions for theatre arts productions are open to everyone, including all University of Iowa students and members of

the local community. Theatre arts students are given first priority for roles, but many roles are available throughout the year, and many non-theatre students and nonstudent actors are cast each season. Occasionally, professional actors are employed.

General auditions are held at the beginning of the fall semester, and callback lists are posted during the semester. Additional general auditions usually are scheduled in early November and in February. Information about auditions is available from the Department of Theatre Arts office in August. Notices of auditions are posted on the department's call board.

## Facilities

The University of Iowa has one of the finest educational theatre complexes in the country. The Theatre Building offers four theatres and up-to-date facilities for classroom, laboratory, shop, and performance work.

The E.C. Mabie Theatre, a continental-style, 457-seat proscenium playhouse, is one of the finest theatres of its type in the United States. The David Thayer Theatre is a "black box" production space; its flexible seating units accommodate from 140 to 225 people and allow modification of space and audience relationships. Theatre B, which seats 144, is an open-stage theatre dedicated primarily to the production of new and experimental works. The flexible studio theatre seats 50.

In addition to classrooms for acting and directing, several spaces are designed for teaching particular aspects of dramatic studies. The Cosmo Catalano Acting Studio is for study of movement and motion by acting students. The Arnie Gillette Design Studio serves as classroom and studio workshop for design students.

To support its production schedule and to provide students with an appropriate range of experience, the department maintains shops for building, painting, maintaining, and storing scenery, costumes, and properties. Using these shops, students learn to work in metal, plastics, canvas, and wood.

## Theatre Arts Courses

### Primarily for Undergraduates

- 049:001 Art of the Theatre** 3 s.h.  
Fundamentals of acting, playwriting, directing. GE: Fine Arts, Humanities.
- 049:002 Theatre and Society: Ancients and Moderns** 3 s.h.  
Representative plays as performed in social contexts of ancient Egypt; classical Greece, Rome, India, and Japan; and medieval and early modern Europe. GE: Fine Arts, Historical Perspectives.
- 049:003 Theatre and Society: Romantics and Rebels** 3 s.h.  
Representative plays as performed in social contexts of revolutionary and modern Europe and postwar United States. GE: Fine Arts, Historical Perspectives.
- 049:020 Basic Acting** 3 s.h.  
Concentration, relaxation, imagination, observation, communication, sensory awareness; development of theatrical creativity through objectives, obstacles, action, conflict, spontaneity; development of a scene from scripts. Requirements: non-theatre arts majors. GE: Fine Arts.
- 049:021 Basic Acting II** 3 s.h.  
Continuation of 049:020; emphasis on development of scenes.
- 049:029 First-Year Seminar** 1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.
- 049:030 New Student Collaboration Project** 1-2 s.h.  
Collaborative work on a script, from table work to staging; student participation as a creative team; production culminating in one performance; ensemble of actors, designers, dramaturges, directors, and stage managers who are new majors to the Department of Theatre Arts. Requirements: first-year standing or transfer student or new declared theatre major.

- 049:043 Elements of Design** 3 s.h.  
Development of visual literacy; manipulation of line, shape, color, value, texture, form; development of designs for theatre through techniques explored in class.
- 049:044 Theatre Crafts** 3 s.h.  
Backstage operations; wardrobe, scenery, properties, lighting, sound. Requirements: theatre arts major.
- 049:045 Production: Run Crew** 1-2 s.h.  
Experience as run crew member in scenery, props, or costumes; or light board, sound board, or follow-spot operator; for mainstage production.
- 049:046 Production: Crew Chief** 2 s.h.  
Experience as master electrician, stage manager, assistant stage manager, wardrobe master, production carpenter, or properties assistant for single production. Prerequisites: 049:044 and 049:045.
- 049:047 Production: Construction** 1-2 s.h.  
Production work in scenery, costume, or electrics shop. Prerequisites: 049:044 and 049:045.
- 049:050 Musical Theatre** 3 s.h.  
American musical theatre's form, function, evolution; major composers (Berlin, Gershwin, Rodgers and Hammerstein, Sondheim), lesser-known and contemporary writers; roots of the rock musical, future of musical theatre, how musicals reflect their own eras and cultural attitudes of their times; readings, recordings, videos. Ability to read music not required.
- 049:051 Comedy and Society** 3 s.h.  
How comedy reflects, comments upon, and intersects with western culture and society; roots of western comedy, satire, censorship; comic playwrights, stand-up comedians, improv and sketch troupes, satirists; gender and sexuality; how portrayals of African Americans in popular culture evolved from early 20th century to present; videos, readings, live performances.
- 049:060 Playscript Analysis** 3 s.h.  
Basic skills in critical reading and close analysis of dramatic texts, with focus on dramatic structure, challenges of putting texts into production.
- 049:062 Playwriting I** 3 s.h.  
Elements of playwriting; emphasis on analysis and discussion of original student writing. GE: Fine Arts.
- 049:063 Playwriting II** 3 s.h.  
Continuation of 049:062; original student writing, one-act play form. Prerequisites: 049:062.
- 049:072 Shakespeare** 3 s.h.  
English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as 008:147.

## For Undergraduate and Graduate Students

### Acting and Directing

- 049:025 Acting I** 3 s.h.  
Development of creativity, imagination, and openness through exercises to engage mind, body, and voice in theatrical play and scene work.
- 049:035 Movement: Special Topics** 2 s.h.  
Specialized study in movement techniques and movement styles for body conditioning; development of yoga techniques; varied topics.
- 049:101 Drama in the Classroom** 3 s.h.

Theories of community, culture, identity in relation to language arts teaching and learning; emphasis on incorporating multiple literacies, both oral and print, into language arts curricula; action research involving oral literacy. Same as 07E:180.

**049:102 Acting for Singers** 2 s.h.

Fundamentals of acting technique, with attention to demands on performers in opera and musical theater. Same as 025:175.

**049:103 Voice/Speech/Text--Speaking in Public** 3 s.h.

How to be an effective and confident communicator; exercises designed to develop and improve vocal sound, vocal strength, clarity of speech; appropriate interpretation of text.

**049:105 Introduction to Laban Movement Studies** 2-3 s.h.

Introduction to Bartenieff Fundamentals (BF) and Laban Movement Analysis (LMA) as methods of organizing and integrating movement to support artistic goals and expanding expressive range; BF teaches body awareness, breath support, developmental patterns, ergonomically-efficient alignment, balancing of muscular strength and stretch, and coordination; LMA teaches vocabulary of expressive movement and nonverbal communication, including effort (use of energy/dynamics for expression, stamina, stress relief) and shape (how posture and gesture communicate); quality of movement that supports individual goals in artistic expression, sound production, and wellness. Same as 025:167, 137:160, 188:167.

**049:106 Singing for Actors** 2 s.h.

Skill development for healthy, effective singing in the musical theatre style; techniques of vocal production through breath management, resonance, articulation, flexibility; song interpretation and repertoire. Recommendations: (for 025:169) concurrent registration in 025:059. Same as 025:169.

**049:108 Dance Kinesiology** 3 s.h.

Body science related to demands of dance; structural and muscular analysis for efficient, effective dance training and prevention of injuries; investigation of skeletal and ligamentous structure for working knowledge of how the body produces movement; joint actions and restrictions, common injuries to those sites; attachments of the voluntary muscles, pathways and potential actions; neuromuscular analysis of an action; functional skeletal alignment; how individual differences may affect movement performance. Prerequisites: 027:053. Same as 137:147.

**049:109 Introduction to Arts Management** 3 s.h.

Nonprofit performing arts management and administrative principles; practical applications, trends in the field; focus on arts organizations and their key administrative positions. Same as 145:109, 188:109.

**049:110 Theatre for Social Outreach** arr.

Use of improvisation, storytelling, readers' theatre to explore complex social issues; participation in Darwin Turner Action Theatre; experience creating works that examine social issues, especially those related to cultural diversity; performances in Iowa schools and communities.

**049:111 New Ventures in the Arts** 3 s.h.

Arts administration principles and trends as applied to creation of an arts-related enterprise; case studies; students create business plan for a new arts organization. Duplicates 06J:125 and 06T:120. Corequisites: 06T:050, or 06A:001 and 06M:100. Same as 06T:125, 145:111, 188:111.

**049:120 Acting II** 3 s.h.

Extension of work begun in 049:025; scene study, with focus on contemporary realism and development of collaborative dynamic. Prerequisites: 049:025. Requirements: audition.

**049:122 Acting With Verse** 3 s.h.

Approaches to poetic material; emphasis on Shakespeare; contemporary scenes written in poetic or abstract styles. Prerequisites: 049:120 and 049:125.

**049:124 Acting: Special Topics** 3 s.h.

Specialized study in a specific aspect or theory of acting.

**049:125 Voice for the Actor** 3 s.h.

Progressive development of voice and speech for theatre; physical awareness, relaxation, breathing, freeing the sound channel, resonance, articulation; application of voice work through prose, poetry, text. Prerequisites: 049:025.

**049:126 Voice, Text, and the Actor** 3 s.h.

Vocal study of prose, poetry, and dramatic text to achieve connection to language--emotion, images, and sensuality connected to a fully released voice; emphasis on Shakespearean verse. Prerequisites: 049:125.

**049:127 Theatre Movement** 3 s.h.

The body as a tool for dramatic expression; basic principles and practices of stage movement; approaches to physical technique, mime/movement studies, ensemble performance projects. Requirements: theatre arts major.

**049:128 Movement Styles** 3 s.h.

Intensive study of a selected movement style, such as mask, clowning, melodrama, mime, commedia dell'arte, stage combat; presentation of student projects. Prerequisites: 049:127.

**049:129 Stage Combat** 3 s.h.

Principles, safety, techniques of nonviolent stage combat for actor, director, choreographer.

**049:130 Directing I** 3 s.h.

Basic elements of stage direction; exercises in composition, emphasis, movement, rhythm, directorial analysis; director's role in production process; short scenes, projects, papers. Prerequisites: 049:025, 049:060, and 049:043 or 049:133 or 049:134 or 049:135 or 049:136 or 049:146. Requirements: completion of design requirement.

**049:131 Directing II** 3 s.h.

Continuation of 049:130; practical work in stage direction culminating in a larger directing project. Prerequisites: 049:130.

**049:132 Stage Management** 3 s.h.

Duties and procedures of stage management; focus on development of production from preparatory work through performance; examine role of stage manager in collaboration.

**049:170 Introduction to the Alexander Technique** 3 s.h.

The Alexander Technique and "self-use"--how our movement choices affect the results we achieve; improving physical skills and presence; principles from the Alexander Technique in support of performing arts (e.g., speaking, singing, playing an instrument, dancing, acting) and applied to skills in daily life, addressing the underpinnings of movement; physical participation, including laying, rolling, sitting, standing, and locomotion. Same as 025:176, 137:173, 188:168.

**049:195 Arts Leadership Seminar** 3 s.h.

Performing arts management and administrative principles, practical applications, trends in arts leadership and advocacy. Requirements: (for 049:195) 049:109 or 049:111 or graduate standing in an arts discipline. Same as 06T:155, 145:195, 188:195.

**049:200 Stage Management: Special Topics** 3 s.h.

Topics in stage management, arts production, and their professional practice. Repeatable. Prerequisites: 049:133.

**049:201 Voice for Performers** 2 s.h.

Comparison of Kinesthetic techniques for singing and acting voice; relaxation, posture, breathing, tone quality, diction, interpretation. Same as 003:204, 025:216.

**049:220 Advanced Acting** 3 s.h.

Preprofessional training; may include psychophysical training in impulse, openness and the "mask," individual and group dynamics, improvisation, repetition, characterization and scenework, Shakespeare and style, on-camera, development of professional work habits and skills, audition and interview. Repeatable.

**049:225 Vocal Technique** 3 s.h.

Skills training; voice and speech for the actor, phonetics, dialects, sound exploration, contemporary and classical text analysis. Repeatable.

**049:227 Movement Technique** 3 s.h.

Fundamental principles and practices required for physical acting technique; basic stage movement, stage combat, mime technique, Lecoq-based improvisation; a new works project. Repeatable. Requirements: graduate acting major.

**049:230 Director's Seminar** 1-3 s.h.  
Preprofessional training in stage direction; the art and craft of directing; research, practical experience; development of new pieces; approaches to a variety of theatrical materials through concept, type, style. Repeatable.

**049:233 Stage Management Seminar** 1 s.h.  
Practice and techniques of stage management. Repeatable. Requirements: graduate stage management major.

## Design

**049:133 Theatre Design I** 3 s.h.  
The process of theatre design; how to research, conceptualize, and visualize ideas; experience using a script and working in scenery, costumes. Prerequisites: 049:043.

**049:134 Scene Design I** 3 s.h.  
The development of theatre scenery; how to research, conceptualize, and express ideas in sketches, models, simple drafting. Same as 01P:134.

**049:135 Costume Design I** 3 s.h.  
Development of theatre costumes; how to research, conceptualize, and express ideas through rendering and swatching; historical orientation. Prerequisites: 049:133.

**049:136 Lighting Design I** 3 s.h.  
How to research, conceptualize, and express ideas through light plots, other design paperwork, and theatre lighting design projects.

**049:137 Scene Design II** 3 s.h.  
Design and execution of increasingly complex projects in a variety of formats, including refined perspective sketching, color models, property drawing, more detailed drafting. Prerequisites: 049:134.

**049:138 Costume Design II** 3 s.h.  
Research, conceptual and character analysis skills, color, material, and volume as expressions of different styles. Prerequisites: 049:135.

**049:139 Lighting Design II** 3 s.h.  
Production styles and venues; skills developed through increasingly complex light plots, more precise paperwork. Prerequisites: 049:060 and 049:136.

**049:140 Sound Design for the Theatre** 3 s.h.  
Methods of sound recording, editing, reinforcement; how to conceptualize and express ideas for theatre production.

**049:141 Period Styles for Theatre Designers** 3 s.h.  
Aesthetics of selected periods as they apply to theatrical presentation; principles of architecture, furniture, fashion.

**049:142 Textile Science** 3 s.h.  
Fiber, yarn, and fabric science; fabric painting, dyeing, and other laboratories. Same as 097:107.

**049:143 Sound Design II** 3 s.h.  
Sound designs for theatre using digital and analog equipment; concept development, design execution; focus on computer-aided design skills, design presentation, advanced editing techniques. Prerequisites: 049:140.

**049:144 Web Design** 3 s.h.  
Creation of graphic identities and web sites using Adobe Photoshop and Dreamweaver.

**049:145 Computer Visualization** 3 s.h.

Computer drafting with AutoCAD, principles of theatre drafting, basic functions and commands, one-word editing skills.  
Prerequisites: 049:144.

**049:146 Drawing and Rendering for the Theatre** 3 s.h.  
Development of artistic skills and documentation techniques through studio work in drawing, painting, model craft projects for theatre.

**049:147 Technical Production I** 3 s.h.  
Scene construction techniques, including stage carpentry, softgoods, theatrical rigging, drafting, management procedures. Prerequisites: 049:044.

**049:148 Technical Production: Special Topics** 3 s.h.  
Skill development and construction techniques, including work in plastics, metals, mechanics, electrics. Prerequisites: 049:044.

**049:151 Scenic Art for Designers** 3 s.h.  
Techniques in scenic art for the theatre; classical *trompe l'oeil* scene painting, sculpting with nontraditional materials, finishing.

**049:152 Costume Crafts: Special Topics** 3 s.h.  
Stage makeup design and application, paper mache and plaster gauze mask-making techniques.

**049:153 Costume Crafts II** 3 s.h.  
Pattern drafting, draping, basic costume construction techniques.

**049:156 Stage Makeup** 3 s.h.  
Same as 188:156.

**049:157 Concepts in Drawing** 3-4 s.h.  
Drawing from topics at the intermediate level; observation, theory, media, form, content; emphasizes personal direction. Prerequisites: 01F:007. Same as 01F:105.

**049:158 Environmental Design I** 4 s.h.  
Human interaction with the interior and exterior environment. Offered fall semesters of odd years. Prerequisites: 01D:021. Same as 01D:137.

**049:235 Graduate Design Seminar** arr.  
Graduate design in set, lighting, and costume design; teamwork; meetings with design faculty in specific disciplines; short-term projects in the theatre department; long-term projects, including summer design work, internships, and other professional opportunities during the three-year program and beyond. Prerequisites: 049:137 or 049:138 or 049:139. Requirements: graduate standing.

**049:237 Scene Design III** 3 s.h.  
Complex assignments in theatre, dance, opera; documentation skills, scenery design preparation. Prerequisites: 049:043 or 049:133, and 049:137.

**049:238 Costume Design III** 3 s.h.  
Advanced projects in costume design; psychological effect of design elements; preparation of costume designs for production. Prerequisites: 049:138.

**049:239 Lighting Design III** 3 s.h.  
Advanced projects in venues such as dance, opera, industrials; preparation of lighting designs for production. Prerequisites: 049:139.

**049:240 Scene Design IV** 3 s.h.  
Advanced projects; production problems and techniques; development of clarity and speed in conceptualizing and documenting designs.

**049:241 Costume Design IV** 3 s.h.  
Analytical and studio skills for advanced projects in widening venues, including music, dance, opera.

<b>049:242 Lighting Design IV</b>	3 s.h.
Advanced projects in a variety of venues; development of clarity in concepts and design documentation.	
<b>049:243 Scene Design V</b>	3 s.h.
Portfolio development; collaborative.	
<b>049:244 Costume Design V</b>	3 s.h.
Portfolio development; collaborative.	
<b>049:245 Lighting Design V</b>	3 s.h.
Portfolio development; collaborative.	
<b>049:249 Production Management</b>	3 s.h.
Organization and supervision of theatre productions; resources, procedures for successfully mounting a theatre production or season; personnel, equipment, facility and budget management, scheduling, communication. Requirements: stage management M.F.A. enrollment.	
<b>049:251 Internship in Design</b>	1-6 s.h.
Experience as designer or assistant designer with a professional theatre, dance, or opera company or with a professional design studio. Requirements: theatre design M.F.A. enrollment.	
<b>Playwriting</b>	
<b>049:165 Advanced Playwriting</b>	3 s.h.
Continuation of 049:063; original student writing, extensive rewriting; may focus on specific style, genre, or approach. Prerequisites: 049:063.	
<b>049:169 Undergraduate Playwriting Workshop</b>	1-3 s.h.
Workshop discussion of original full-length plays, collaborative creation of new plays, work with guest artists. Prerequisites: 049:062 and 049:063. Requirements: submission of writing sample.	
<b>049:173 Guest Seminar</b>	arr.
<b>049:182 Free Style Writing: Poetry, Plays, and Performances</b>	3 s.h.
Creative writing lab experience in reading, writing, and performing poetry and short plays; expansion of students' horizons of the self; arc of innovation in African American literature from Harlem Renaissance to present, with texts from Langston Hughes and Zora Neale Hurston to Saul Williams and Jill Scott; role of the artist in society and as outsider and insider; shifting perspectives on race, gender, class; musical influences and models, from blues to house music; sensuality, spirituality; artistic reflections on the cultural moment; effects of these on literary form and performance style; students create and perform a work for an audience. Same as 129:182.	
<b>049:269 Playwrights Workshop</b>	3 s.h.
Development of works by Iowa Playwrights Workshop members. Repeatable. Requirements: playwriting or dramaturgy M.F.A. enrollment.	
<b>049:270 Special Topics in Playwriting</b>	3 s.h.
Repeatable.	
<b>049:271 Orientation to Graduate Studies</b>	2 s.h.
Repeatable. Requirements: theatre arts M.F.A. enrollment.	
<b>049:272 The Collaborative Process</b>	3 s.h.
Development of new plays, collaboratively created works. Repeatable.	
<b>049:275 Collaborative Performance</b>	1-4 s.h.

Collaborative experience with advanced artists from varied disciplines that culminates in a final performance; emphasis on sharing and investigating ideas, artistic intent, personal vision, and creating collaborative projects. Same as 137:275, 188:275.

## **History, Literature, Dramaturgy**

### **049:112 History of Theatre and Drama I**

3 s.h.

Major developments in Anglo-European, Indian, Asian, African theatre and drama 3000 B.C.E. to C.E. 1700; sociopolitical, economic, cultural circumstances of original productions. Offered fall semesters. Prerequisites: 049:060. GE: Fine Arts, Historical Perspectives.

### **049:113 History of Theatre and Drama II**

3 s.h.

Continuation of 049:112, 1700 to 1960; revolutionary and modern European theatre, culturally diverse postwar U.S. theatre. Offered spring semesters. Prerequisites: 049:060. GE: Fine Arts, Historical Perspectives.

### **049:116 Dramatic Theory**

3 s.h.

Theoretical questions of interest to dramatists and philosophers in western and nonwestern traditions; metaphysics of play; theories of character, psyche, self; narrative and nonnarrative dramatic forms. Prerequisites: 049:060, 049:112, and 049:113.

### **049:117 American Drama Since 1900**

3 s.h.

American playwrights and plays after 1900. English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:197.

### **049:118 American Women Playwrights: 1776-Present**

3 s.h.

How women in the United States have expressed themselves in theatre since 1776; diversity of voices in works by African American, Asian American, Latina, Native American, European American, lesbian playwrights; female-authored drama and production in relation to concurrent male-authored traditions and socioeconomic, political, cultural phenomena. Same as 045:118.

### **049:119 Dramas of the Spirit**

3 s.h.

Western and nonwestern dramatic texts that enact or describe journeys of the human spirit; textual analysis, investigation of the notion of spirit and its relation to dramatic form. Prerequisites: 049:060, 049:112, and 049:113.

### **049:160 Performing Culture, Language, and Literature**

3 s.h.

Performance of self in everyday life; performance in/of literature; performance as an aesthetic act; performance as a way to understand and represent identities, languages and cultures; students participate in performance as a mode of literary and rhetorical interpretation, cultural and political intervention, and artistic-embodied public presentation. Requirements: (for 036:130) g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 010:130, 036:130, 160:130.

### **049:161 The Arts in Performance**

3 s.h.

GE: Fine Arts, Humanities. Same as 033:161, 137:161, 188:161.

### **049:174 Topics in Digital Media**

3 s.h.

English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:173.

### **049:181 Medieval Drama**

3 s.h.

English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as 008:144.

### **049:183 Black Feminist Tradition and Culture**

3 s.h.

Survey of selected theoretical texts chronicling shifting perspectives on feminism; comparative interdisciplinary survey of artistic works that reflect such perspectives. Same as 129:183.

### **049:184 English Renaissance Drama**

3 s.h.

English majors may apply this course to the following area and/or period requirement. AREA: Medieval and Early Modern Literature and Culture. PERIOD: Early Literatures Through 17th Century. Same as 008:145.

**049:185 Cultural Diversity and Identity** 3 s.h.

Nature of personal and cultural identity within a pluralistic society; race, ethnicity, national identity, class, sexuality, and gender as categories of cultural difference. Same as 033:185.

**049:186 African American Drama** 3 s.h.

English majors may apply this course to the following area and/or period requirement. AREA: American Literature and Culture. PERIOD: 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:186, 129:186.

**049:188 Sex and Gender in Performance** 3 s.h.

Relationship between sex and gender in the performing body across a range of public venues, including stage, film, athletic events, and social spaces; articles, texts, plays, films, television, and videos; attendance at live performances of theatre, sports, and other events scheduled in the University and local community; discussion format. Same as 131:187.

**049:190 African American Theatre I** 3 s.h.

Works by African American playwrights and relevant historical documents, Africa through Black Renaissance; themes, history, sociopolitical context; artists forging theatrical paths under oppressive conditions; exploration through discussion, performance; literature-based course, workshop approach. Same as 129:175.

**049:191 African American Theatre II** 3 s.h.

Works by African American playwrights and relevant historical documents, Black Renaissance to present; themes, history, sociopolitical context; artists forging theatrical paths under oppressive conditions; exploration through discussion, performance; literature-based course, workshop approach. Same as 129:191.

**049:192 Culturally Diverse Theatre** 3 s.h.

Same as 131:192, 154:192.

**049:193 Studies in Drama** 3 s.h.

Exploration of a specific period of dramatic literature, or the work of specific authors, or dramatic principles central to playwrighting.

**049:194 Dramaturgy** 3 s.h.

Theory, practice: history in Europe and the United States; relationship to dramatic criticism; practical experience in critical writing, play analysis, dramaturgical research, conceptualization of productions; evaluation, advocacy, and development of new plays; audience relations and education. Prerequisites: 049:060.

**049:210 Dramaturgy Practicum** arr.

Exploration of theoretical, creative, and practical issues that arise in working dramaturgically on both established and new plays, and in a variety of collaborative processes; practical dramaturgical exercises in script reporting, dramaturgical research, educational programming, season planning, production documentation, and writing of critical and dramaturgical essays for a general audience. Requirements: admission to M.F.A. dramaturgy program.

**049:213 Shakespeare** 3 s.h.

Same as 008:253.

**049:215 Theatrical Analysis: Classical to Restoration Drama** 3 s.h.

Representative plays from the Classical to the Romantic periods--in historical context of their original productions, contemporary production potential. Requirements: theatre arts M.F.A. enrollment.

**049:216 Theatrical Analysis: Modern** 3 s.h.

Questions of dramatic form and content examined in-depth through close readings of modern plays.

**049:217 Theatrical Analysis: Postmodern** 3 s.h.

Diverse postmodern traditions; emphasis on questions of relation of text.

**049:294 Dramaturgy Seminar** 3 s.h.

Dramatic history, literature, and dramaturgy topics of interest to M.F.A. candidates. Repeatable. Requirements: dramaturgy M.F.A. enrollment.

### **Workshops, Performances, Special Studies**

- 049:172 Senior Seminar** 3 s.h.  
Theatre arts capstone seminar; how personal aesthetic relates one's work to great theatrical visionaries of the past and present-day practitioners; research culminating in a collaborative theatre piece. Requirements: senior standing and theatre arts major.
- 049:177 London Performance Study** 3 s.h.  
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:128.
- 049:178 New York Performance Study** 3 s.h.  
Theatrical style, acting, direction, design, as well as business aspects; examination of nine performances.
- 049:196 Projects in Theatre** arr.
- 049:197 Honors Theatre Arts** arr.  
Development and production of a new work for film or television by writers, directors, actors.
- 049:198 Performance Practicum** 1-2 s.h.  
Act in a faculty-directed production produced by the Theatre Arts Department. Same as 188:198.
- 049:199 Independent Study** arr.
- 049:234 Internship in Stage Management** 1-6 s.h.  
Experience as stage manager or assistant stage manager with a professional theatre, dance, or opera company. Repeatable. Requirements: stage management M.F.A. enrollment.
- 049:296 Projects in Theatre Advanced** arr.  
Create a special project under the mentorship of a faculty member for credit; projects may include performing in a main stage production, writing, directing, or designing a play performed in the department, developing a research project that intersects production. Requirements: graduate standing.
- 049:298 M.F.A. Thesis** 0-3 s.h.  
Work related to M.F.A. thesis projects in theatre arts. Repeatable.

# Tippie College of Business

**Dean:** William C. (Curt) Hunter

**Senior associate dean:** Charles H. Whiteman

**Associate dean, School of Management:** Jarjis Sa-Aadu

**Associate dean, undergraduate program:** Lon D. Moeller

**Degrees:** B.B.A., M.Ac., M.B.A., Ph.D.

**Undergraduate nondegree programs:** Certificate in Entrepreneurial Management, International Business, Risk Management and Insurance; Minor in Business Administration

**Web site:** <http://www.tippie.uiowa.edu>

The Henry B. Tippie College of Business is composed of six academic departments: accounting, economics, finance, management and organizations, management sciences, and marketing.

The college's undergraduate and graduate programs are accredited by AACSB International--the Association to Advance Collegiate Schools of Business.

Research, executive development, and education activities are supported by the centers and institutes of the college: Hawkinson Institute of Business Finance, Institute for Economic Research, Institute for Electronic Markets, John Pappajohn Entrepreneurial Center, RSM McGladrey Institute of Accounting Education and Research, Institute for International Business, Judith R. Frank Business Communications Center, Small Business Development Center, Emmett J. Vaughan Institute for Risk Management and Insurance, and Tippie Business Solutions Center.

## Undergraduate Programs

The Tippie College of Business offers the Bachelor of Business Administration (B.B.A.) with majors in accounting, economics, finance, management, management information systems, and marketing, and it collaborates with the College of Liberal Arts and Sciences to offer an undergraduate major for Bachelor of Arts and Bachelor of Science students in economics; see the appropriate Tippie College of Business department sections in the Catalog for information about each major. The college also offers joint degrees with the College of Engineering and the College of Liberal Arts and Sciences; see "Joint Degrees" below.

The college offers the undergraduate Certificate in Entrepreneurial Management, Certificate in International Business, and Certificate in Risk Management and Insurance; see "Certificates" below. It collaborates with the College of Engineering to offer the Certificate in Technological Entrepreneurship, and the John Pappajohn Entrepreneurial Center collaborates with the College of Liberal Arts and Sciences to offer the Certificate in Performing Arts Entrepreneurship; see "Undergraduate Programs" in the College of Engineering section of the Catalog and Performing Arts Entrepreneurship in the College of Liberal Arts and Sciences section.

B.B.A. students may earn minors in disciplines outside the Tippie College of Business, and the college offers a minor in business administration for non-business students; see "Minors" below.

### Undergraduate Advising

All business students are advised at the Undergraduate Program Office in the Tippie College of Business. Pre-business students are advised at the University's Academic Advising Center or the college's Undergraduate Program Office. Assignment to the Undergraduate Program Office for advising depends on a student's grade-point average, completion of calculus and statistics, and/or the number of semester hours completed. Walk-in hours and scheduled appointments are available at both offices. For more information on advising, contact the college's Undergraduate Program Office or the UI Academic Advising Center.

### Honor Code

Integrity and honesty are essential to success in all facets of life. The purpose of the Tippie College of Business Honor Code is to promote honorable and ethical behavior. Students admitted to the college are required to uphold the honor code.

### Bachelor of Business Administration

The Bachelor of Business Administration requires a minimum of 120 s.h. of credit, including at least 48 s.h. earned in business courses and at least 60 s.h. earned in nonbusiness courses.

B.B.A. students must earn 30 s.h. in residence following admission to the Tippie College of Business. At least 24 s.h. in courses offered by the business college and at least two-thirds of the semester hours in the student's major must be earned at The University of Iowa. Nonresident instruction includes course work at colleges and universities other than The University of Iowa.

To graduate, B.B.A. students must have a cumulative g.p.a. of at least 2.00 in all college course work attempted, all college course work attempted in business, all college course work attempted in the major, all course work attempted

at The University of Iowa, all business course work attempted at The University of Iowa, and all course work in the major attempted at The University of Iowa.

### **Common B.B.A. Requirements**

B.B.A. candidates must satisfy the following minimum common requirements or approved equivalents. For approved equivalents, consult the college's Undergraduate Program Office.

#### **GENERAL EDUCATION REQUIREMENTS**

Students may not count courses taken to fulfill General Education Program requirements toward other requirements for the B.B.A.

08G:001 The Interpretation of Literature	3 s.h.
Rhetoric	4 s.h.
Natural sciences	3 s.h.
Historical perspectives	3 s.h.
Global and cultural studies	3 s.h.
Humanities	3 s.h.
Social sciences (excluding 06E:001 and 06E:002)	3 s.h.

#### **PREREQUISITES TO THE BUSINESS CORE**

06A:001 Introduction to Financial Accounting	3 s.h.
06A:002 Managerial Accounting	3 s.h.
06E:001 Principles of Microeconomics	4 s.h.
06E:002 Principles of Macroeconomics	4 s.h.
22M:017 Calculus and Matrix Algebra for Business	4 s.h.
22S:008 Statistics for Business	4 s.h.

#### **BUSINESS CORE**

06B:100 Business Communication and Protocol	3 s.h.
06E:071 Statistics for Strategy Problems	3 s.h.
06F:100 Introductory Financial Management	3 s.h.
06J:047 Introduction to Law	3 s.h.
06J:048 Introduction to Management	3 s.h.
06K:070 Computer Analysis	3 s.h.
06K:100 Operations Management	3 s.h.
06M:100 Introduction to Marketing Strategy	3 s.h.

#### **MAJOR STUDY AREA**

All B.B.A. students must complete a major area of study. The college offers majors in accounting, economics, finance, management, management information systems, and marketing. The requirements for each major are established by the college's individual departments; see the Catalog's Tippie College of Business department sections.

### **Students with Associate of Arts Degrees**

Students who receive an Associate of Arts (A.A.) from community colleges participating in the Iowa Community College/Regents Articulation Agreement are considered to have met all high school unit requirements, General Education Program requirements in rhetoric, interpretation of literature, natural sciences, social sciences, historical perspectives, and humanities, but not the global and cultural studies requirements. The program of study for which the student was awarded the A.A. must have included:

a minimum of 60 s.h. (or 90 quarter hours) of credit acceptable toward graduation from The University of Iowa (mathematics courses comparable to 22M:001 Basic Algebra I and 22M:003 Basic Geometry, and are not accepted toward graduation);

completion of the agreed-upon group of courses at the community college; and

a g.p.a. of at least 2.00.

However, completion of an Associate of Arts does not guarantee admission to the Tippie College of Business. See "Admission to the B.B.A." later in this section for a complete list of admission requirements.

Students who use the provisions of the articulation agreement are granted a maximum of 60 s.h. of transferable credit from two-year colleges toward the 120 s.h. required for a B.B.A. Credit earned for the A.A. beyond the 60 s.h. transferable maximum is used in computing the student's grade-point average, and it may be used to satisfy course requirements, but it does not count toward the B.B.A. Transfer credit for business courses taken during the first and second years is counted toward the B.B.A. only if such courses are usually offered as lower-division courses at The University of Iowa.

### Transfer Courses

Students who have taken courses at another institution that are similar to those approved for the common business requirements at Iowa may request that these courses be evaluated for transfer credit. Students who transfer fewer hours than needed to meet a common business requirement may use only approved courses to complete the remainder of the requirement. Only third- and fourth-year-level courses taken at accredited four-year institutions may be used to satisfy common business course requirements numbered 100 and above. Students must complete a minimum of 24 s.h. and at least two-thirds of the course work in the major at The University of Iowa and must meet the 30 s.h. residency requirement of the Tippie College of Business. Guided Independent Study may be counted toward all requirements for graduation, subject to approval by the student's major department.

### Four-Year Graduation Plan

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan.

Note: The following checkpoints are designed for students who enter the University as first-year pre-business or business students. In order to stay on the plan, students must maintain the grade-point averages required for guaranteed admission to the Tippie College of Business and must apply for admission to the college by the established deadline. The Four-Year Graduation Plan is not available to students who choose to pursue a double major in the college or students who are in a combined degree program.

Students must take 06B:100 Business Communication and Protocol during their first year after admission to the Tippie College of Business, except direct admission students, who take the course during their second year.

**Before the third semester begins:** 06E:001 Principles of Microeconomics or 06E:002 Principles of Macroeconomics, 22M:017 Calculus and Matrix Algebra for Business, and 22S:008 Statistics for Business, or equivalents; and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 06A:001 Introduction to Financial Accounting, 06A:002 Managerial Accounting, and 06E:001 Principles of Microeconomics or 06E:002 Principles of Macroeconomics (whichever has not already been taken), or equivalents; all General Education requirements; and at least half of the semester hours required for graduation

**Before the seventh semester begins:** business core requirements, approximately half of the course work in the major (varies by major), and three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** approximately three-quarters of course work in the major (varies by major)

**During the eighth semester:** all remaining course work in the major, and a sufficient number of semester hours to graduate

### Honors Program

The Tippie College of Business Honors Program offers outstanding students the opportunity to undertake independent study and to work closely with faculty members and other honors students. To graduate with honors, students must complete 06B:194 Honors Seminar and 06B:195 Honors Thesis in Business. They take the honors seminar in spring of their third year or fall of their fourth year. They complete the honors thesis the following semester.

Students must have a g.p.a. of at least 3.50 to enter the Tippie Honors Program. To earn the B.B.A. with honors, students must successfully complete all college and honors program requirements with a g.p.a. of at least 3.50 in all courses taken at Iowa, all business courses taken at Iowa, all courses taken (including transfer courses), and all business courses taken (including transfer courses).

Pre-business students interested in the honors program are encouraged to participate in the University of Iowa Honors Program until they are admitted to the business college.

## **Double Majors in Business**

Students may earn a double major by meeting the requirements of more than one major in the Tippie College of Business. They receive one B.B.A. with two majors. The Four-Year Graduation Plan is not available to students pursuing a double major.

Students may declare only one major when they apply to the college, but they may add a second major on the first day of classes during their first semester or session after admission to the college, or any time after that. Students may declare a maximum of two programs (programs include majors, certificates, and minors). Students who have officially declared double majors have access to degree evaluations for both majors. They also have access to both sets of major courses, with some limitations, during early registration. Students may not change majors in order to have priority registration for more than two majors at one time. A student must be in good academic standing in order to declare a second major. See Double Majors--Policies and Procedures.

## **Joint Degrees**

### **Joint B.B.A./Liberal Arts and Sciences Degree**

The Tippie College of Business and the College of Liberal Arts and Sciences offer a joint degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business; and a Bachelor of Arts (B.A.), Bachelor of Science (B.S.), Bachelor of Fine Arts (B.F.A.), or Bachelor of Music (B.M.) from the College of Liberal Arts and Sciences.

All students in a joint program must complete requirements for both degrees, including all General Education requirements.

The second-grade option is not available to all students in joint degree programs. Students should consult with their advisors before pursuing a second-grade option.

Joint degree students are assigned two advisors, one in the Tippie College of Business Undergraduate Program Office, the other in their major in the College of Liberal Arts and Sciences.

To enter a joint degree program, students must have approval from the Tippie College of Business and must be admitted to both colleges. Interested students should see an advisor in the college's Undergraduate Program Office.

To learn about liberal arts and sciences majors, visit College of Liberal Arts and Sciences in the Catalog and select majors from the college index.

### **Joint B.B.A./B.S.E.**

The Tippie College of Business and the College of Engineering offer a joint degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering.

Students in the joint program must complete all requirements for both degrees, including all General Education requirements. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may count a single course toward both degrees.

B.B.A./B.S.E. students usually meet the degree requirements of both colleges in about five years; time required depends on the student's choice of major study areas.

The second-grade option is not available for all students in joint degree programs. Students should consult with their advisors before pursuing a second-grade option.

Students are assigned two advisors, one in the Tippie College of Business Undergraduate Program Office, the other in their College of Engineering major department.

To enter the joint degree program, students must have approval from the Tippie College of Business and must be admitted to both colleges. Interested students should see an advisor in the college's Undergraduate Program Office.

For information about the B.S.E., including degree requirements, see Bachelor of Science in Engineering (College of Engineering) in the Catalog.

## **Minors**

### **Minors for Business Students**

Undergraduate students in the Tippie College of Business may earn a minor in another University of Iowa college. For example, students interested in international business might choose a foreign language as a minor. For the minor requirements, students should consult with an advisor in the appropriate department. Students may declare a minor on

ISIS. To have the minor recorded on their transcripts, students must complete the "minor" section on the B.B.A. Application for Degree before submitting the form to the Office of the Registrar early in their final semester, or when they apply for the degree using ISIS.

### **Minor in Business Administration (for Non-business Students)**

The minor in business administration requires 37 s.h., including at least 12 s.h. taken in the Tippie College of Business. The minor is open to UI undergraduates who are not majoring in business, except interdepartmental studies majors in the business studies track. Students must maintain a g.p.a. of at least 2.00 in the minor overall and in all courses in the minor taken at The University of Iowa. Course work in the minor may not be taken pass/nonpass.

The following courses, or their equivalents, satisfy all requirements for the minor. Please refer to ISIS for a current list of prerequisites.

22M:017 Calculus and Matrix Algebra for Business	4 s.h.
22S:008 Statistics for Business	4 s.h.
06A:001 Introduction to Financial Accounting	3 s.h.
06A:002 Managerial Accounting	3 s.h.
06E:001 Principles of Microeconomics	4 s.h.
06E:002 Principles of Macroeconomics	4 s.h.
06F:100 Introductory Financial Management	3 s.h.
06J:047 Introduction to Law	3 s.h.
06J:048 Introduction to Management	3 s.h.
06K:070 Computer Analysis	3 s.h.
06M:100 Introduction to Marketing Strategy	3 s.h.

For a list of approved substitutions and additional details about the minor, see Business Minor on the Tippie College of Business web site.

Students who will have completed all requirements for the minor when they graduate should indicate a business administration minor on the Application for Degree before they submit the form to the registrar's office early in their final semester, or when they apply for the degree using ISIS.

### **Certificates**

The Tippie College of Business is a partner in offering several certificate programs for University of Iowa undergraduate students. Together with the John Pappajohn Entrepreneurial Center, it offers the Certificate in Entrepreneurial Management, and it collaborates with the College of Engineering to offer the Certificate in Technological Entrepreneurship; see Entrepreneurship in the Catalog.

The Department of Finance and the Emmett J. Vaughan Institute of Risk Management and Insurance offer the Certificate in Risk Management and Insurance; see Risk Management and Insurance in the Catalog.

The Tippie College of Business and the College of Liberal Arts and Sciences (CLAS) offer the Certificate in International Business; see International Business in the Catalog. The John Pappajohn Entrepreneurial Center also collaborates with CLAS to offer a certificate; see Performing Arts Entrepreneurship (College of Liberal Arts and Sciences) in the Catalog.

### **Admission to the B.B.A.**

The Tippie College of Business offers three paths to admission: direct admission, accelerated admission, and standard admission. All students admitted to the College of Business must follow the Tippie College of Business Honor Code. Students who meet the grade-point average requirement may be denied admission upon evidence of postsecondary academic misconduct or other violations of the honor code. Students are required to meet with the associate dean, undergraduate program, to discuss incidents of academic misconduct.

Admission standards are set by the Undergraduate Program Committee. All admission appeals are reviewed by the Undergraduate Program Office. Prospective students must submit acceptance of admission offers and all transcripts showing course work that satisfies the Tippie College of Business admission requirements to the University's Office of Admissions by the 10th day of classes. Letters of recommendation are not accepted. For more information about application and admission, contact the Undergraduate Program Office.

#### **Direct Admission**

Direct admission is designed to enable highly qualified high school students to enter the college directly after high school. Applicants must have a composite ACT score of 27 or higher and a high school g.p.a. of 3.70 or higher to qualify; see Admission Policies on the Tippie College of Business web site for information about admission

requirements.

Entering first-year students may petition for direct admission to the Tippie College of Business if they meet either the direct admission criterion of an ACT composite score of 27 or higher (SAT critical reading and math score of 1210 or higher) or a high school grade-point average of at least 3.70 (on a 4.00 scale). Petitions are accepted through August 1. For more information, see the Petition for Direct Admission form.

In order to declare a major in accounting, students must have a University of Iowa g.p.a. and a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 2.75 and no grade below C on all prerequisites; and a 2.67 (B-minus average) in 06A:001 Introduction to Financial Accounting and 06A:002 Managerial Accounting.

Students who receive direct admission to the college are eligible to apply to the Tippie Scholars Program. Admission is highly competitive and is based on high school record and an application essay. Application deadline is February 1. The Tippie Scholars Program provides a scholarship, specialized programming, a dedicated advisor, a first-year seminar offered by the Tippie College of Business, and priority registration. Tippie scholars must maintain a University of Iowa g.p.a. of at least 3.33 each semester to remain in the program.

### **Accelerated Admission**

Accelerated Admission is available for students admitted to The University of Iowa for fall 2007 or later who have earned 59 s.h. of credit or less; have been enrolled at the University for at least one semester; have earned at least 12 s.h. of University of Iowa credit; and have completed the calculus and statistics prerequisites to the B.B.A. business core and one of the economics prerequisites (or their equivalents) with no grade below C in any completed prerequisite course. The six prerequisite courses are listed under "Common B.B.A. Requirements"; see Bachelor of Business Administration above.

Students must have a University of Iowa cumulative g.p.a. of at least 2.75. They also must have a g.p.a. of at least 2.75 in their completed prerequisites for admission to the college; all prerequisites for admission to the college that the student has taken are used in calculating the prerequisite grade-point average.

Students who do not meet the admission criteria for accelerated admission may apply for standard admission; there is no petition process for accelerated admission.

In order to declare a major in accounting, students must have a University of Iowa g.p.a. and a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 2.75 and no grade below C on all prerequisites; and a 2.67 (B-minus average) in 06A:001 Introduction to Financial Accounting and 06A:002 Managerial Accounting.

### **Standard Admission**

Standard Admission is guaranteed to students who have earned 60 s.h.; have a g.p.a. of at least 2.75 on all college course work and on all University of Iowa course work; and have completed the six prerequisites to the B.B.A. business core with a prerequisite g.p.a. of at least 2.75 and no grade below C on any of the prerequisites. The six prerequisite courses are listed under "Common B.B.A. Requirements"; see Bachelor of Business Administration above.

Admission to the accounting major is guaranteed only to applicants who have a University of Iowa g.p.a. and cumulative g.p.a. of at least 3.00; a g.p.a. of at least 2.75 and no grade below C on all prerequisites; and a 2.67 (B-minus average) in 06A:001 Introduction to Financial Accounting and 06A:002 Managerial Accounting.

Applications for standard admission must be submitted online at Admissions on the Tippie College of Business web site. Application deadlines are April 1 for summer and fall admission and November 1 for spring admission. Applicants may not be admitted for the three-week winter session. Applicants transferring from another university are not held to the application deadlines; they may apply at any time. Applicants who do not meet the criteria for guaranteed admission may still apply to the college. Students denied admission may file an [Appeal for Denial of Admission to Business](#). Grades from winter session courses may not be used for consideration for admission in the immediate spring session, and grades from three-week summer session courses may not be used for consideration for admission in the immediate summer session.

### **Nondegree Admission**

Students visiting from another institution who wish to enroll in undergraduate courses to earn credit that they can transfer to their home institution may be granted admission as undergraduate nondegree students. Nondegree students are not guaranteed access to specific courses; they must have the approval of the undergraduate program director in the Tippie College of Business and may earn no more than 9 s.h. on nondegree status.

### **Reentry**

Reentry to the Tippie College of Business after an absence from the University follows this policy.

**Students absent 12 months or more, in good standing:** These students must apply to the University's Office of Admissions for reentry and must contact the Tippie College of Business Undergraduate Program Office for advising before they register. Good standing is defined as not on probation or dismissed for any reason.

**Students absent 12 months or more, not in good standing:** These students must file a petition for reinstatement with the Tippie College of Business Undergraduate Program Office. If the petition is approved, the student must file an application with the University's Office of Admissions (the Undergraduate Program Office notifies the Office of Admissions about the approval). The student must schedule an appointment with an advisor in the Undergraduate Program Office for advising before he or she may register. Not in good standing is defined as being on probation or being dismissed from the Tippie College of Business due to unsatisfactory scholarship, academic misconduct at The University of Iowa or at another institution, or a violation of the Tippie College of Business Honor Code. Students who have been dismissed officially follow the procedures for reinstatement.

**Students absent less than 12 months, in good standing:** These students are not required to file an application for reentry; they should contact the Tippie College of Business Undergraduate Program Office for advising before they register. Their reentry is approved regardless of any changes in admission requirements during their absence.

**Students absent less than 12 months, not in good standing:** These students must consult an advisor in the Tippie College of Business Undergraduate Program Office; they may be readmitted on probation. They are not required to file an application for reentry; they must contact the Undergraduate Program Office for advising before they register. Their reentry is approved regardless of any changes in admission requirements during their absence. Not in good standing is defined as being on probation or being dismissed from the Tippie College of Business due to unsatisfactory scholarship, academic misconduct at The University of Iowa or at another institution, or a violation of the Tippie College of Business Honor Code. Students who have been dismissed officially follow the procedures for reinstatement.

**All returning students:** Students who have been enrolled in another college or university since leaving The University of Iowa are required to submit official transcripts along with their application for reentry. Completed application materials must be received at least two weeks before the opening of classes. Students may be approved to reenter with direct or accelerated admission status. Students are held to the General Catalog requirements that were in effect at the time of their reentry.

## **Academic Rules and Procedures**

### **Academic Recognition**

#### **DEAN'S LIST**

Students in the undergraduate Tippie College of Business, Colleges of Engineering, Liberal Arts and Sciences, and Nursing, and undergraduate programs in the Carver College of Medicine who achieve a g.p.a. of 3.50 or higher on 12 s.h. or more of University of Iowa graded course work (including Guided Independent Study courses) during a semester (or summer session) and who have no hours of I (incomplete) or O (no grade reported) for that enrollment are recognized by inclusion on the Dean's List for that semester (or session).

#### **PRESIDENT'S LIST**

University of Iowa undergraduate students who achieve a g.p.a. of 4.00 on 12 s.h. or more of University of Iowa graded course work (including Guided Independent Study courses) and who have no hours of I (incomplete) or O (no grade reported) for two consecutive semesters (including summer session) are recognized by inclusion on the President's List.

### **GRADUATION WITH HONORS**

Graduation with honors recognizes high scholastic achievement based on grades and on completion of academic work beyond the requirements of the student's major. To graduate with honors, students must maintain a cumulative, University of Iowa, business, and UI business g.p.a. of 3.50 and must successfully complete an honors project under the supervision of a faculty member. See "Honors Program" under Bachelor of Business Administration.

### **GRADUATION WITH DISTINCTION**

Graduation with distinction recognizes high scholastic achievement based on grades. The Office of the Registrar certifies to the Tippie College of Business associate dean the names of students eligible to graduate with distinction. The college awards degrees "with highest distinction" to students in the highest two percent of the graduating class, "with high distinction" to students in the next highest three percent, and "with distinction" to the next highest five percent. Ranking is based on students' grade-point averages for all college-level study undertaken before their final registration.

To be eligible to be considered for graduation with distinction, a student must complete 60 s.h. in residence as an undergraduate at The University of Iowa; 45 s.h. of that must be completed before the final registration.

## **Credit and Grading**

### **CREDIT BY EXAMINATION**

Students may earn up to 30 s.h. of credit by examination by taking selected tests from the College-Level Examination Program (CLEP) and the Advanced Placement (AP) program of the College Board. For information on the CLEP and AP examinations, contact the University's Evaluation and Examination Service. The Tippie College of Business Undergraduate Program Office has information on scores, credit, and course duplicates for all Advanced Placement and CLEP tests accepted by the college.

### **MAXIMUM SCHEDULE**

During early registration, students admitted to the Tippie College of Business may register for a maximum of 16 s.h. Course schedules that exceed 16 s.h. require approval from the Undergraduate Program Office. After early registration, students may register for a maximum of 18 s.h. Course schedules of more than 18 s.h. for a fall or spring semester, 9 s.h. for the six- or eight-week summer session, or 3 s.h. for the three-week session require approval from the Undergraduate Program Office.

### **ADDING AND DROPPING COURSES**

Students may drop courses, except College of Law courses, any time before the deadline published in the University's academic deadline calendar. Deadlines are different for regular and off-cycle courses. See Academic Deadlines for The University of Iowa on the Office of the Registrar web site (<http://www.registrar.uiowa.edu>).

Students must obtain approval from the college that offers the course in order to request permission to add or drop a course after these deadlines.

### **ADMINISTRATIVE DROPS FOR LACK OF PREREQUISITES**

Students are responsible for making sure that they have satisfied all prerequisites for any course for which they register. Instructors and departments also have the option to drop a student from a course if the student has not satisfied the required prerequisites. Administrative drops must be processed by the first eight calendar days of the semester; the first two calendar days of the winter session, the three-week summer session, or the start of an off-cycle course; or the first four days of the six- or eight-week summer session. Administrative drops are made without assignment of a W (withdrawn). Students who are dropped from courses are notified. Students should not assume that they have been dropped from a course because they do not have the prerequisites.

### **ADMINISTRATIVE DROPS FOR NONATTENDANCE**

Instructors have the option to drop a student who has missed the first two class periods of a course, unless the student has offered an acceptable reason for beginning the course late. Administrative drops must be processed by the first eight calendar days of the semester; the first two calendar days of the winter session, the three-week summer session, or the start of an off-cycle course. These administrative drops are made without assignment of a W (withdrawn). Students who are dropped from courses are notified. Students should not assume that they have been dropped from a course because they have not attended it.

### **PASS/NONPASS**

Up to 15 s.h. of course work required for the B.B.A. may be taken pass/nonpass with the consent of an advisor and the instructor. Students must be in good academic standing to be eligible for the pass/nonpass option. A maximum of two pass/nonpass courses may be taken in one semester. Courses taken pass/nonpass may not be used to satisfy general education, core, or major business requirements. (Major business requirements include any course that fulfills a major course requirement or is offered by the major department.) Pass/nonpass registration must be completed during the first 10 days of a fall or spring semester or the first one-and-one-half weeks of a summer session, and it requires the approval of the advisor and the instructor. For courses taken pass/nonpass, an earned grade of C-minus or higher is recorded as a P; an earned grade of D-plus or lower is recorded as an N. Pass/nonpass credit is not included in grade-point-average calculations.

### **SATISFACTORY/FAIL, SATISFACTORY/UNSATISFACTORY**

Certain courses are offered satisfactory/fail (S/F) or satisfactory/unsatisfactory (S/U). All students registered for these courses receive one of these marks.

Special forms are not necessary to register for S/F or S/U courses, since all students enrolled in such courses automatically receive an S, an F, or a U.

Semester hours of S or U graded course work are not used in computing grade-point averages, but hours of F graded course work are used.

Semester hours of S graded course work are counted as semester hours earned toward graduation; semester hours of F or U graded course work do not count as semester hours earned toward graduation.

A maximum of 15 s.h. of S credit from The University of Iowa is accepted toward a bachelor's degree.

## **SECOND-GRADE-ONLY OPTION**

The second-grade-only option is not available to third- and fourth-year students in the Tippie College of Business, including those in joint degree programs. Students in the direct and accelerated admission programs are eligible to apply for the second-grade-only option during their first two years of enrollment; they must follow the second-grade-only grading rules established by the College of Liberal Arts and Sciences. See the CLAS Academic Handbook or visit the College of Liberal Arts and Sciences web site.

Pre-business majors admitted to the College of Liberal Arts and Sciences must follow the rules established by that college.

Business majors (students admitted to the Tippie College of Business) may use the second-grade-only option for any course except Tippie College of Business courses numbered 101 or above; business courses include those with prefix 06A, 06B, 06E, 06F, 06J, 06K, 06M, or 06T. This policy was effective as of summer 2010 and is retroactive, so students who repeated a course before then may be eligible to file for a second-grade-only option. Contact the Undergraduate Program Office for more information.

Business students may apply the option to a maximum of three different courses while they are enrolled at The University of Iowa; any second-grade-only option used before the student entered the Tippie College of Business counts as one of the three second-grade-only options allowed. The option may be used only once per course; once the option is placed on the record, it may not be retracted.

Courses taken at other colleges or universities may not be repeated at The University of Iowa under the second-grade-only option. University of Iowa courses may not be repeated at other institutions under the second-grade-only option.

If the course was taken for a grade the first time, it must be taken for a grade the second time. If the course was taken pass/nonpass the first time, the student may take it either pass/nonpass or for a grade the second time.

Any University of Iowa course taken in any mode of delivery (e.g., during a regular semester, summer session, or intensive session, or through distance learning and the Division of Continuing Education) may be repeated in the same delivery mode or in any other delivery mode.

The second-grade-only option may not be used by a student who has been awarded a degree from The University of Iowa for a course the student took before the degree was awarded.

Graduate or professional colleges may recalculate grade-point averages using all grades visible on the permanent record.

Business students must register as usual for the course that is to be repeated. After the beginning of the session in which the course is being repeated, students must request the second-grade-only option by contacting their assigned Undergraduate Program Office advisor.

The Office of the Registrar marks the permanent record with a pound symbol (#) to show that the first grade has been replaced by the second grade in the grade-point-average calculations and to show that only the hours from the second registration have been counted as hours earned.

## **INCOMPLETE GRADES**

Instructors may report a mark of I (incomplete) only if the unfinished part of the student's work in a course other than research, thesis, or independent study is small; if the work is unfinished for reasons acceptable to the instructor; and if the student's standing in the course is satisfactory.

Students should not re-enroll in a course for which they have an incomplete. Incomplete grades must be removed by completing the unfinished part of the work. Faculty and students are encouraged to state clearly in a written agreement how the incomplete is to be completed. Both the faculty member and the student should keep a record of the written agreement.

Failure to remove the incomplete before the end of the next full semester, excluding summer and winter sessions, results in replacement of the I with a grade of F, regardless of whether the student is enrolled during that semester. A grade change may be submitted to convert a grade of F to another letter grade, with the instructor's approval.

**GUIDED INDEPENDENT STUDY**

University of Iowa Guided Independent Study is counted as resident credit and may be applied to all requirements for graduation, subject to approval by the student's major department. Guided Independent Study courses can be taken any semester, up to four courses at a time.

Students eligible for the second-grade-only option may retake the course through Guided Independent Study for the second-grade-only option. Likewise, students eligible for the second-grade-only option in a Guided Independent Study course may retake the course on campus for the second-grade-only option.

**PROBATION AND DISMISSAL**

Students are placed on academic probation when their grade-point average in any of the following categories falls below 2.00: all course work taken, all course work taken at The University of Iowa, all business course work taken, all business course work taken at The University of Iowa, all course work taken to satisfy requirements for the major(s), and all course work taken at The University of Iowa to satisfy requirements for the major(s). In probation decisions, a 3 s.h. minimum is used to calculate the grade-point average for all course work taken to satisfy requirements for the major(s), and all course work taken at The University of Iowa to satisfy requirements for the major(s).

When all of the above grade-point averages equal or surpass 2.00, students are removed from probation. Students usually are allowed only one session to return to good academic standing. They are required to meet with an academic advisor. Students on academic probation who withdraw registration after the deadline for dropping courses may be dismissed.

Students may be dismissed from the college at any time for unsatisfactory scholarship. While some probationary period usually precedes a dismissal, students in good academic standing who complete a term with extremely unsatisfactory grades may be placed on academic probation or dismissed immediately. Students dropped from the college for poor scholarship may petition for permission to reregister, but usually only after one year following the end of the term in which they were dismissed.

**REINSTATEMENT**

Students dismissed for unsatisfactory scholarship for the first time ordinarily are not permitted to register again for one year. Students dismissed for the second time may or may not be granted a second reinstatement. Requests for reinstatement must be made in writing and should be addressed to the associate dean in the Undergraduate Program Office. Students seeking reinstatement must make an appointment with an advisor in the Undergraduate Program Office. Reinstatements are limited to one major and may include a limit on the number of semester hours the student may take upon reinstatement. Late requests are deferred to the following semester.

Students who are permitted to register following dismissal are registered on academic probation and ordinarily are allowed two semesters to achieve good standing. Very poor academic work in the first semester of a reinstatement may result in dismissal at the close of that semester.

**Returning for Baccalaureate Degrees****RETURNING FOR A SECOND BUSINESS MAJOR**

Graduates who have a B.B.A. from The University of Iowa and who are not enrolled in a graduate or professional program may complete the requirements for another business major except accounting (see "Reentry" earlier in this section). Those interested in pursuing a degree in accounting must be admitted to the Graduate College to earn the Master of Accountancy degree; see Accounting.

Students who return to The University of Iowa to complete another business major must meet the requirements for that major. It is their responsibility to notify the Office of the Registrar upon completion of the requirements for the second major so that a notation can be placed on their permanent record.

Students who hold a degree from another college or university may not complete a second business major at The University of Iowa. (see "Returning for an Additional Bachelor's Degree").

**RETURNING FOR AN ADDITIONAL BACHELOR'S DEGREE**

Students who hold a bachelor's degree from another college at The University of Iowa and who are not enrolled in a graduate or professional program may return for an additional bachelor's degree from the Tippie College of Business. They must satisfy all requirements for undergraduate admission to the business college. Once admitted, they must satisfy all requirements for the B.B.A. in their chosen major.

For information about pursuing an additional bachelor's degree in accounting, see "Accounting as a Second Degree" below.

#### **STUDENTS WITH BACCALAUREATES FROM OTHER INSTITUTIONS**

Students with a bachelor's degree from another college or university may apply for admission to The University of Iowa to earn an additional undergraduate degree from the Tippie College of Business. The requirements are the same as those listed under "Returning for an Additional Bachelor's Degree" above.

For information about pursuing an additional bachelor's degree in accounting, see "Accounting as a Second Degree" below.

#### **ACCOUNTING AS A SECOND DEGREE**

Graduates who have a non-business bachelor's degree, either from The University of Iowa or from another college or university, may in some cases be considered for admission to the Tippie College of Business to pursue a second undergraduate major in accounting. Individuals interested in earning a second degree with a major in accounting should contact the Department of Accounting to discuss the B.B.A. or Master of Accountancy (M.Ac.); see Accounting in the Catalog.

Students may not earn a second major in accounting if they already have a B.B.A. from The University of Iowa or any undergraduate business degree from another college or university.

## **Graduate Programs**

The Tippie College of Business offers two interdepartmental graduate programs: Master of Business Administration (M.B.A.) and Doctor of Philosophy (Ph.D.) in business administration. M.B.A. candidates may pursue a second graduate degree in another college. See "Doctor of Philosophy" below and the Master of Business Administration Program section of the Catalog.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue an M.A.

### **Doctor of Philosophy**

The Doctor of Philosophy in business administration requires a minimum of 72 s.h., including accepted transfer credit. The program prepares students for research positions in business and government or for research and teaching positions at academic institutions. It is flexible, permitting students to choose a specialization area according to their interests. Course work and related experience enable students to achieve competence in economic theory, statistical methods, and behavioral science as well as expertise in a major and minor study area. Students also have opportunities to develop research and teaching skills.

Ph.D. course work consists of prerequisites (as necessary), the Ph.D. core, major and minor study areas, and dissertation research, described in brief below. For more detailed information about Ph.D. requirements, contact the individual Tippie College of Business departments, visit their web sites, or visit <http://www.biz.uiowa.edu/phd>.

#### **CORE COURSES**

Core courses develop research competence and provide background for specialized study. Doctoral students consult with their advisors to develop a study plan that reflects the individual students' background and interests and satisfies core requirements.

#### **MAJOR STUDY AREA**

At least 12 s.h. of approved doctoral-level courses must be completed in one of the following areas: accounting, finance, human resource management, management information systems, marketing, operations management, organizational behavior, or quantitative methods.

#### **MINOR STUDY AREA**

Students must complete a minimum of 9 s.h. of doctoral-level courses beyond the Ph.D. core course requirements in one of the major study areas listed above or in a concentration outside the Tippie College of Business.

#### **COMPREHENSIVE EXAMINATIONS**

Students must satisfactorily complete a comprehensive examination, consisting of written or oral parts or both, at the discretion of their major department.

## **DISSERTATION**

Students must present a dissertation proposal at a forum attended by dissertation committee members and open to interested faculty members and graduate students, as established by the student's major department. Researching and writing the dissertation typically require two years of full-time effort.

## **FINAL EXAMINATION**

Ph.D. candidates defend the dissertation in an oral examination attended by dissertation committee members and open to interested faculty members and graduate students.

## **Admission**

Applicants to the Ph.D. program must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants must take the Graduate Record Examination (GRE) General Test or the Graduate Management Admission Test (GMAT) and have their scores sent to the University in order to be considered for admission. The Departments of Finance, Management and Organizations, Management Sciences, and Marketing accept test scores for either the GRE or GMAT. The Department of Accounting accepts only GMAT scores and the Department of Economics accepts only GRE scores. Required scores on these tests and their weight in admission decisions vary by department.

Applicants whose first language is not English must take the Test of English as a Foreign Language (TOEFL) and have their scores sent to the University.

Applicants must submit a completed Application for Graduate Admissions, official transcripts from all institutions attended, official test scores, and three letters of recommendation. Applications must be complete before admission decisions can be made.

Admission is for fall entry. Applications should be submitted as early as possible and no later than the following deadlines.

Accounting: January 15  
Economics: January 15  
Finance: January 15  
Management and Organizations: February 1  
Management Sciences: February 15  
Marketing: January 15

## **Other Graduate Programs**

The college offers the Master of Accountancy (M.Ac.) degree and a Ph.D. in economics; see Accounting and Economics in the Catalog.

## **Study Abroad**

The Consortium of Universities for International Studies (CUIS) offers semester and summer programs at Paderno del Grappa, Italy, for undergraduate students and at Asolo, Italy, for graduate students. Both campuses are located just northwest of Venice. Students and faculty in the programs come from 30-plus public universities in the United States that are CUIS member schools. The program's rigorous, high-quality courses are taught in English and emphasize current international events. Students are encouraged to study the Italian language and to participate in executive lectures, plant tours, and unique personal development opportunities.

## **Centers and Institutes**

### **Emmett J. Vaughan Institute of Risk Management and Insurance**

The Tippie College of Business, in partnership with the Iowa insurance industry, has established the Emmett J. Vaughan Institute of Risk Management and Insurance to provide innovative education and research in modern risk management and insurance.

The institute collaborates with the Department of Finance to offer the Certificate in Risk Management and Insurance. The certificate program provides undergraduate students with a foundation for careers in corporate risk management, risk management consulting, employee benefits management, insurance brokerage, underwriting, personal banking

and asset management, financial analysis, claims adjustment, and auditing. See Risk Management and Insurance in the Catalog.

### **Hawkinson Institute of Business Finance**

The Hawkinson Institute of Business Finance facilitates career opportunities in investment banking, sales and trading, and related areas for students in the Tippie College of Business. The institute sponsors the Hawkinson Scholars Program, which trains high-achieving undergraduates for interviews, internships, and full-time jobs in the financial services industry. Criteria for admission to the institute include a strong academic record, involvement in campus and community activities, high motivation, good interpersonal skills, and demonstrated interest in business, markets, and corporate finance.

Hawkinson scholars participate in a class that is taught by former investment bankers and that features guest speakers from investment banking, private equity, hedge funds, start-ups, and other sectors. Hawkinson scholars also receive intensive education in equity valuation, financial market dynamics, and more. An extensive network of dedicated Hawkinson alumni serve as mentors.

The Institute has worked to broaden entry-level employment opportunities for Iowa graduates, who land jobs at prestigious firms such as Goldman Sachs, Credit Suisse, Barclays, Merrill Lynch, JP Morgan, and UBS. Graduating Hawkinson scholars typically enjoy a placement rate of 100 percent.

The Hawkinson institute also supports research in the Department of Finance and participates in outreach to the financial services industry.

### **Institute for Economic Research**

The Institute for Economic Research responds to requests for information and analysis from the Department of Management, State of Iowa, with focus on the analysis and forecasting of economic conditions and state tax revenues. It also responds to requests for information and analysis from the Board of Regents, State of Iowa, with focus on the costs of higher education.

### **Institute for International Business**

The Institute for International Business is dedicated to the development and advancement of knowledge related to international business. The institute coordinates and augments resources at the Henry B. Tippie College of Business to provide students at all levels with the education, experience, and skills they will need for success in the global marketplace. The institute facilitates international internships, collaborates with departments in developing courses with international content, and assists programs in implementing short courses overseas.

### **Iowa Electronic Markets Institute**

The Iowa Electronic Markets Institute supports scholarship in prediction markets and experimental economics. It operates the Iowa Electronic Markets (IEM), online futures markets where contract payoffs are based on real-world events such as political outcomes, companies' earnings per share, and stock price returns. The Iowa Electronic Markets are known internationally as the genesis of modern prediction markets and are used as research and teaching tools.

### **John Pappajohn Entrepreneurial Center**

The John Pappajohn Entrepreneurial Center (JPEC) has developed a comprehensive, interdisciplinary program that combines advanced course work with experiential learning for University of Iowa students. The program prepares students to launch new ventures, manage growing companies, and apply entrepreneurship concepts in their careers.

The entrepreneurship curriculum incorporates experiential learning opportunities in which students apply their knowledge and skills in their own ventures or in emerging or growing Iowa companies. JPEC's Bedell Entrepreneurship Learning Laboratory is dedicated to student entrepreneurs pursuing the creation of new ventures. Students can also participate in a wide variety of extra-curricular programs such as business plan competitions, lecture series, conferences, workshops, a living-learning community, and the I-Envision student organization.

Undergraduate students in several University of Iowa colleges may earn the Certificate in Entrepreneurial Management (or a program-specific entrepreneurship certificate) in addition to their bachelor's degrees; see Entrepreneurship in the Catalog. Several advanced entrepreneurship courses are available to all graduate and professional students across campus and in the MBA PM program. See Master of Business Administration Program in the Catalog.

JPEC also offers the Certificate in Entrepreneurial Management through distance education. Participants may choose from a variety of course delivery options, including introductory course work offered through a collaboration with Iowa community colleges, online course work that incorporates regular interactive sessions with Iowa faculty and students, and local experiential learning projects. Students may earn the certificate alone or in conjunction with the Bachelor of Applied Studies or the Bachelor of Liberal Studies.

The center offers several programs for entrepreneurial businesses and individuals, including student field study projects, training, consulting, seminars, and conferences. In partnership with the Jacobson Institute for Youth Entrepreneurship, it provides training and a specialized curriculum to Iowa high school teachers to foster the development of innovative, creative, and entrepreneurial young Iowans. JPEC also partners with Iowa community colleges to deliver entrepreneurship training statewide.

### **Judith R. Frank Business Communications Center**

The Judith R. Frank Business Communications Center provides one-on-one tutoring to Tippie College of Business undergraduates for writing assignments, projects, and case studies. The center's staff includes graduate students with expertise in writing and undergraduate peer tutors who have completed a semester-long peer tutor training course. Communication consultants are available on staff to help students with speech presentations or other oral communication assignments.

The center's course-dedicated consulting program helps faculty and students plan and prepare for required writing projects. Center staff work closely with faculty to study assignment requirements, develop handouts and assessment rubrics, and deliver class or workshop presentations to students on how to meet the expectations of the assignment. They also provide ongoing training and mentoring to the center's undergraduate peer tutors.

The Frank Business Communications Center oversees the B.B.A. core course 06B:100 Business Communication and Protocol; the peer tutor training courses 06B:130 Business Communication Internship I and 06B:131 Business Communication Internship II; and the electives 06B:140 Business Writing and 06B:110 Business Presentations Workshop. In addition, the center's staff adjudicates the annual Mary Thomas Prappas Business Ethics Essay Competition and helps prepare Tippie College of Business undergraduates for national case competitions.

### **Pomerantz Career Center**

Career development and on-campus recruiting services are provided by the Marvin A. and Rose Lee Pomerantz Career Center. The center's career advisors and online resources provide University undergraduate students and alumni with help on résumés, cover letters, career choice, internship and job searches, employer research, interviewing skills, negotiation of job offers, and more. The center also presents several fall and spring semester career fairs. Campus recruitment is facilitated through web-based software, and on-campus interviews occur throughout the year for full-time internship positions as well as mock interviews. The center also offers career-related courses and a career leadership academy. Contact the Pomerantz Career Center for more information.

### **RSM McGladrey Institute of Accounting Education and Research**

The RSM McGladrey Institute of Accounting Education and Research fosters educational excellence in accounting at The University of Iowa and encourages high-quality research by Iowa accounting faculty members. The institute sponsors varied educational initiatives and activities, including an annual national speaker series and the biennial Sidney Winter Lecture Series. It helps faculty members initiate and carry out research projects, as well as to disseminate the findings to the academic, business, government, and professional accounting communities.

### **Small Business Development Center**

Since 1981, The University of Iowa Small Business Development Center has played an important role in helping enterprising Iowans manage or start their own successful businesses. The center provides support for small business owners and entrepreneurs. Its personnel are trained to meet the varied needs of small business management, including market, business, financial, and human resource planning; cash flow analysis; product commercialization; market research and analysis; strategic planning; international trade; and advertising and public relations.

### **Tippie Business Solutions Center**

The Tippie Business Solutions Center provides the opportunity for MBA students to engage in strategic consulting projects with companies. The firms involved range from mid-sized Iowa based companies to fortune 500 companies. The center brings together diverse teams possessing a variety of skills, knowledge, and experience. They apply rigorous business tools and techniques in order to research circumstances surrounding a business problem for a real-world client. Students meet with representatives from the client company, analyze the situation, and present recommendations.

## **Facilities and Resources**

The Henry B. Tippie College of Business is located in the John Pappajohn Business Building, at the heart of the campus. The Pappajohn Business Building contains seminar and conference rooms, a computer laboratory, two auditoriums, three computer classrooms, a behavioral laboratory, a restaurant (Pat's Diner), the Marvin A. Pomerantz Business Library, and a variety of classroom facilities.

The computer laboratory in the John Pappajohn Business Building serves the instructional programs of the college,

and the staff maintains a current library of computational programs, CD-ROMs, and data tapes to accommodate users' needs. Business students also have access to the full range of services offered by the University's Information Technology Services and the extensive research materials and other resources of the University of Iowa Libraries.

## Alumni Relations

Relationships with alumni are maintained by staff in the Undergraduate Program Office and the Tippie School of Management Office and by the college's assistant director of alumni engagement. The college circulates its magazine, *B@I* (Business at Iowa), to individuals who support the college, and each semester it hosts alumni events ranging from individual visits to receptions on campus and in cities nationwide and worldwide. Members of the Business Student Ambassadors, an undergraduate student organization, serve as hosts and guides for alumni who visit the college. The Young Alumni Board works to strengthen ties between the college and younger alumni.

## Interdepartmental Undergraduate Courses

- 06B:010 Tippie Scholars Seminar** 1-3 s.h.  
Introduction to majors and academic departments, research opportunities, and professional enrichment activities in the Tippie College of Business. Requirements: enrollment in Tippie Scholars Program.
- 06B:020 Tippie College Direct Admit Seminar** 1 s.h.  
Facilitates a successful transition to college; Tippie college traditions and expectations, academic and personal success skills; majors and academic opportunities; advisor and advisee responsibilities; campus resources; career exploration skills; ethics; team and group work; multicultural and global society existence. Requirements: admitted to the direct admission program.
- 06B:030 Diversity Awareness for Business** 1-3 s.h.  
Opportunity to develop awareness and appreciation of multiculturalism and diversity; importance of diversity in the workplace; development of skills for working in a diverse environment; development of cultural competencies through classroom activities, discussions, group projects, readings, and personal reflections.
- 06B:040 Academic Leadership Seminar** 1 s.h.  
Orientation to service learning; service learning project, professional enrichment activities, academic skill enhancement; for students living on the Business and Entrepreneurship Living-Learning Community Floor.
- 06B:050 Competitive Intelligence Resources** 1 s.h.  
Search concepts and sources specific to business information; print, CD-ROM, online search services, the Internet.
- 06B:060 Tippie Senate** 1 s.h.  
For elected student representatives on the Tippie Senate.
- 06B:080 Business Student Ambassador Seminar** 1 s.h.  
Experiences as a Business Student Ambassador providing tours of the John Pappajohn Building, acting as hosts at college functions, providing information and assistance to visiting groups, assisting student recruitment activities. Requirements: admission to Tippie College of Business and acceptance as a Business Student Ambassador.
- 06B:090 International Perspectives Program Seminar** 1-3 s.h.  
Requirements of the International Perspectives Program; planning for business and foreign language majors, study abroad, academics, and career goals; exploration of international business, current world and business events. Requirements: admission to the International Perspectives Program.
- 06B:100 Business Communication and Protocol** 3 s.h.  
Foundation in business communication and protocol; composing business messages, organizing and reporting workplace data, developing business presentation and team-building skills, exploring issues pertaining to business ethics and professional behavior. Requirements: admission to Tippie College of Business and 30 s.h. earned.
- 06B:101 Topics in Business** arr.
- 06B:110 Business Presentations Workshop** arr.

Effective business presentation skills and practice for professional speaking engagements; mastering subject content, planning effective presentations for specific audiences, clarifying communication goals, and gaining speaker confidence; effective integration of presentation technologies; evaluation of other speakers; speaking clearly, using gestures appropriately; audience engagement during speech and question and answer sessions. Requirements: business major.

**06B:115 Technical and Professional Editing**

1-3 s.h.

Introduction to editorial skills required for production of high-quality professional and technical documents; hands-on workshop.

**06B:130 Business Communication Internship I**

arr.

Opportunity for students to earn academic credit for serving as a peer tutor, an orientation and training assistant, or an administrative intern in the Judith R. Frank Business Communications Center. Repeatable.

**06B:131 Business Communication Internship II**

3 s.h.

Continuation of 06B:130; opportunity for students to earn academic credit for serving as a peer tutor, an orientation and training assistant, or an administrative intern in the Judith R. Frank Business Communications Center. Prerequisites: 06B:130.

**06B:140 Business Writing**

3 s.h.

Development of communication and analytical skills; cover letter and résumé preparation, interviewing techniques, editing and proofreading, research, presentations, entrepreneurship, creative problem solving; group business plan presentation, individual written business plan.

**06B:187 Global Business Perspectives**

3 s.h.

Classroom component of summer internships in London, Madrid, Paris; preparation for internships; value of international work assignments, work as part of cross-cultural teams, skills and perspectives for living and working in a culturally diverse world; students set goals for professional development, analyze the cultural and political environment of their internship sites, develop a professional portfolio. Corequisites: 409:112 or 409:114 or 409:115.

**06B:194 Honors Seminar**

1-3 s.h.

Research topics and methods in business. Requirements: honors standing. Same as 06E:194.

**06B:195 Honors Thesis in Business**

3 s.h.

Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: 06B:194 or 06E:194. Requirements: admission to the Tippie College of Business honors program.

**06B:199 Academic Internship**

arr.

Professional internship experience with associated academic content (e.g., paper, course work). Repeatable.

# Accounting

**Chair:** Douglas V. DeJong

**Director, Professional Program in Accounting:** Sonja O. Rego

**Director, RSM McGladrey Institute of Accounting Education and Research:** Ramji Balakrishnan

**Professors:** Ramji Balakrishnan (Carlson-KPMG Research Professor of Accounting), Joyce E. Berg (Pioneer Hi-Bred Research Fellow), Daniel W. Collins (Henry B. Tippie Research Chair in Accounting), Douglas V. DeJong (Arthur Andersen Alumni/Faculty Professor of Accounting), W. Bruce Johnson (Sidney G. Winter Professor of Accounting), Mark C. Penno (Soumyo Sarkar Research Fellow in Accounting), Albert A. Schepanski

**Professor emeritus:** Valdean C. Lembke

**Associate professors:** Cristi A. Gleason (Larry and Lori Wright Research Fellow), Paul Hribar (Lloyd J. and Thelma W. Palmer Research Fellow), Sonja Olhoft Rego (Lloyd J. and Thelma W. Palmer Research Fellow)

**Associate professors emeriti:** Richard A. Grimlund, Richard M. Tubbs

**Assistant professors:** Richard Mergenthaler, Ryan J. Wilson

**Lecturers:** Amy An, Thomas J. Carroll, Kevin Den Adel, Robert J. Hartman, Mary Murphy

**Undergraduate degree:** B.B.A. in Accounting

**Graduate degrees:** M.Ac.; Ph.D. in Business Administration

**Web site:** <http://tippie.uiowa.edu/accounting>

The Department of Accounting offers a broad education that prepares undergraduate and graduate students for careers in public accounting, private industry, government, nonprofit organizations, and academia.

## Professional Program in Accounting

The Professional Program in Accounting draws on curricula that provide a strong base of traditional technical subject matter and the skills needed for solving complex business problems. This framework of study enables students to continue professional growth over the entire span of their careers. The program emphasizes communication skills and provides the academic background required for leadership positions in business, government, and public accounting. It also qualifies students to take the Certified Public Accountant (CPA) and Certified Management Accountant (CMA) examinations.

The Professional Program in Accounting leads to a Bachelor of Business Administration in accounting, which requires 120 s.h. of credit (see "Undergraduate Program" below), and the Master of Accounting, which requires 30 s.h. of graduate credit (see "Graduate Programs" later in this section). Students are granted the B.B.A. upon successful completion of the third and fourth years of the Professional Program in Accounting, and the M.Ac. after successful completion of 30 s.h. beyond the B.B.A.

## Undergraduate Program

The Department of Accounting offers the Bachelor of Business Administration in accounting for students admitted to the Professional Program in Accounting. Undergraduate accounting majors are subject to the probation and dismissal rules described in the Tippie College of Business section of the Catalog and are governed by the Tippie College of Business Honor Code.

The B.B.A. is not sufficient preparation for CPA licensure in states that have passed a 150 hour law, including Iowa.

## Bachelor of Business Administration

The Bachelor of Business Administration in accounting requires a minimum of 120 s.h., including at least 25 s.h. of work for the major. The major in accounting is for undergraduate students admitted to the Professional Program in Accounting. Course work in the program provides concentrated coverage of professional accounting subjects and closely related topics in commercial law, business, and information systems.

To enter the Professional Program in Accounting, undergraduates must complete 60 s.h. of course work at The University of Iowa (or equivalent course work at another institution) and must be admitted to the Tippie College of Business. Students already admitted to the business college who wish to declare accounting as a major may be admitted to the professional program if they have a University of Iowa g.p.a. of at least 3.00, a cumulative g.p.a. of at least 3.00, and a B-minus average in 06A:001 Introduction to Financial Accounting and 06A:002 Managerial Accounting. Students who wish to declare accounting as a major but do not satisfy the automatic admission requirements may still apply to the professional program; applications are reviewed case-by-case.

Students must complete the following prerequisite courses before admission to the Professional Program in Accounting.

06A:001 Introduction to Financial Accounting	3 s.h.
06A:002 Managerial Accounting	3 s.h.
06E:001 Principles of Microeconomics	4 s.h.
06E:002 Principles of Macroeconomics	4 s.h.
22M:017 Calculus and Matrix Algebra for Business	4 s.h.
22S:008 Statistics for Business	4 s.h.

Professional Program in Accounting requirements for the third and fourth years are as follows. For B.B.A. common requirements, see Bachelor of Business Administration in the Tippie College of Business section of the Catalog.

### THIRD YEAR

#### Fall Semester

06A:131 Income Measurement and Asset Valuation	3 s.h.
06A:133 Introduction to Taxation	3 s.h.
06A:150 Professional Orientation Seminar Series (must be taken during first or second semester in the professional program)	1 s.h.
06B:100 Business Communication and Protocol (taken first year after admission to the college)	3 s.h.
Two business core requirements	6 s.h.

The business core requirements (06F:100 Introductory Financial Management, 06J:047 Introduction to Law, 06J:048 Introduction to Management, 06K:100 Operations Management, 06M:100 Introduction to Marketing Strategy) may be taken in any sequence, preferably before the fourth year; 06J:047 Introduction to Law is a prerequisite to 06A:148 Business Law, so it should be taken before spring semester of the fourth year. Students must complete 06B:100 Business Communication and Protocol during their first year after admission to the Tippie College of Business.

#### Spring Semester

06A:132 Valuation of Financial Claims	3 s.h.
06K:180 Applied Information Systems	3 s.h.
Two business core requirements	6 s.h.
Elective	3 s.h.

Due to the overlap in course content, accounting majors may not receive degree credit for 06A:120 Financial Accounting and Reporting.

### SUMMER: GMAT AND ADMISSION TO THE M.AC.

Students who intend to continue in the Professional Program in Accounting after receiving the B.B.A. should take the Graduate Management Admission Test (GMAT) during the summer before their senior year, as preparation for applying to the Master of Accountancy program.

### FOURTH YEAR

Students must choose one of the following accounting electives during their fourth year.

06A:141 Advanced Tax Topics	3 s.h.
06A:145 Advanced Financial Accounting	3 s.h.

#### Fall Semester

06A:144 Auditing	3 s.h.
One accounting elective	3 s.h.
One business core requirement	3 s.h.
Two electives	6 s.h.

#### Spring Semester

06A:130 Accounting for Management Analysis and Control	3 s.h.
06A:148 Business Law	3 s.h.
One accounting elective (if not taken fall semester)	3 s.h.
Two or three electives	6-9 s.h.

**OPTIONAL ACCOUNTING ELECTIVE**

All undergraduates, whether admitted to the M.Ac. program or not, may take 06A:199 Academic Internship for 1 s.h. in fall, spring, or summer. Department consent is required.

**Graduate Programs**

The Department of Accounting offers the Master of Accountancy (M.Ac.) and a Doctor of Philosophy (Ph.D.) in business administration. Ph.D. requirements are described under "Graduate Programs" in the Tippie College of Business section of the Catalog and on the Department of Accounting web site.

The department also offers a joint M.Ac./J.D. with the College of Law; see "Joint M.Ac./J.D." later in this Catalog section.

Graduate students in accounting are subject to the probation and dismissal rules of the Graduate College and are governed by the Tippie College of Business Honor Code.

**Master of Accountancy**

The Master of Accountancy requires 30 s.h. beyond the B.B.A. The program permits students to specialize in accounting areas according to their interests and objectives. It builds on the technical skills acquired in the undergraduate program, broadens students' perspectives of the role of accounting in organizations and decision making, and further develops written and oral communication skills.

Students from a variety of academic backgrounds enter the M.Ac. program. Those who enter with an undergraduate degree in accounting can expect to complete the degree in 12 months. Those who enter with a non-accounting undergraduate degree typically require four semesters to complete the M.Ac. Study plans are adjusted to reflect each student's particular academic background; see "Course Work for Students Without Undergraduate Degrees in Accounting" later in this section.

The M.Ac. is a nonthesis program. Course work focuses on the conceptual and economic foundations of accounting with applications to current and emerging problems of professional practice. M.Ac. students also have the opportunity to acquire expertise in one of four specialization areas: financial accounting/auditing, management information systems, taxation, and managerial accounting.

The required 30 s.h. must include at least 12 s.h. earned in graduate-level accounting courses and at least 21 s.h. earned in 200-level courses.

Courses leading to specialization areas and those required for the core program are as follows. Because of the cross-disciplinary nature of the subject matter included in the specialization areas, courses in a number of other departments are included.

**SPECIALIZATION IN FINANCIAL ACCOUNTING/AUDITING****Accounting Courses**

Total of 12 s.h.

All of these:

06A:221 Financial Reporting: Theory and Practice	3 s.h.
06A:230 Advanced Auditing	3 s.h.
06A:245 Financial Information and Capital Markets	3 s.h.

One of these:

06A:220 Design and Use of Cost Management Systems	3 s.h.
06A:231 Taxes and Business Strategy	3 s.h.

**Finance Courses**

Total of 6 s.h.

06N:225 Managerial Finance (requires consent of M.B.A. office)	3 s.h.
--	--------

One additional 200-level finance course 3 s.h.

#### **Management Information Systems Courses**

Total of 3-6 s.h.

06K:226 Visual Basic Programming (if not already taken) 3 s.h.

06K:230 Database Systems 3 s.h.

#### **General Electives**

Total of 6-9 s.h.

#### **SPECIALIZATION IN MANAGEMENT INFORMATION SYSTEMS**

Due to the timing of course offerings, students who do not begin the M.Ac. program in the summer session should take a computer programming course while they are undergraduates. This decreases the number of required management information systems courses and increases electives by 3 s.h. in the M.Ac. program.

#### **Accounting Courses**

Total of 12 s.h.

06A:220 Design and Use of Cost Management Systems 3 s.h.

Two of these:

06A:221 Financial Reporting: Theory and Practice 3 s.h.

06A:230 Advanced Auditing 3 s.h.

06A:231 Taxes and Business Strategy 3 s.h.

One of these (not already taken):

06A:221 Financial Reporting: Theory and Practice 3 s.h.

06A:230 Advanced Auditing 3 s.h.

06A:231 Taxes and Business Strategy 3 s.h.

06A:241 Tax Research 3 s.h.

06A:245 Financial Information and Capital Markets 3 s.h.

#### **Management Information Systems Courses**

Total of 9-12 s.h.

06K:226 Visual Basic Programming (if not already taken) 3 s.h.

Three 200-level information systems courses (06K or 22C) 9 s.h.

#### **General Electives**

Total of 6-9 s.h.

#### **SPECIALIZATION IN TAXATION**

#### **Accounting Courses**

Total of 9 s.h.

Two of these:

06A:220 Design and Use of Cost Management Systems 3 s.h.

06A:221 Financial Reporting: Theory and Practice	3 s.h.
06A:230 Advanced Auditing	3 s.h.

One of these (not already taken):

06A:220 Design and Use of Cost Management Systems	3 s.h.
06A:221 Financial Reporting: Theory and Practice	3 s.h.
06A:230 Advanced Auditing	3 s.h.
06A:241 Tax Research	3 s.h.
06A:245 Financial Information and Capital Markets	3 s.h.

#### **Taxation Courses**

Total of 12 s.h.

06A:231 Taxes and Business Strategy	3 s.h.
06A:241 Tax Research	3 s.h.
College of Law tax courses	6 s.h.

#### **General Electives**

Total of 9 s.h.

College of Law courses (prefix 091) follow a different calendar than do business courses. Some courses may require consent of instructor.

#### **SPECIALIZATION IN MANAGERIAL ACCOUNTING**

##### **Accounting Courses**

Total of 12 s.h.

06A:220 Design and Use of Cost Management Systems	3 s.h.
---	--------

Two of these:

06A:221 Financial Reporting: Theory and Practice	3 s.h.
06A:230 Advanced Auditing	3 s.h.
06A:231 Taxes and Business Strategy	3 s.h.

One of these (not already taken):

06A:221 Financial Reporting: Theory and Practice	3 s.h.
06A:230 Advanced Auditing	3 s.h.
06A:231 Taxes and Business Strategy	3 s.h.
06A:241 Tax Research	3 s.h.
06A:245 Financial Information and Capital Markets	3 s.h.

##### **Management Information Systems Courses**

Total of 3-6 s.h.

06K:226 Visual Basic Programming (if not already taken)	3 s.h.
06K:230 Database Systems	3 s.h.

##### **Non-accounting Business Electives**

Two 200-level business electives	6 s.h.
----------------------------------	--------

**General Electives**

Total of 6-9 s.h.

**CORE PROGRAM COURSE REQUIREMENTS**

Students who do not wish to pursue a specialization area must complete 30 s.h. beyond the B.B.A. At least 15 s.h. must be earned in graduate-level accounting courses and at least 21 s.h. must be earned in 200-level courses. The following courses are required.

**Accounting Courses**

Total of 15 s.h.

06A:220 Design and Use of Cost Management Systems (taken spring semester)	3 s.h.
06A:221 Financial Reporting: Theory and Practice (taken fall semester)	3 s.h.
06A:230 Advanced Auditing (taken spring semester)	3 s.h.
06A:231 Taxes and Business Strategy (taken fall semester)	3 s.h.

One of these (not already taken):

06A:241 Tax Research	3 s.h.
06A:245 Financial Information and Capital Markets	3 s.h.

**Management Information Systems Courses**

Total of 3-6 s.h.

06K:226 Visual Basic Programming (if not already taken)	3 s.h.
06K:230 Database Systems	3 s.h.

**General Electives**

Total of 9-12 s.h.

**Course Work for Students Without Undergraduate Accounting Degrees**

Courses taken by students who enter the program with a non-accounting bachelor's degree are determined by each student's background and interest area. In addition to meeting the core program requirements for the M.Ac., students typically take a combination of undergraduate and M.B.A. courses to remove academic deficiencies in quantitative methods, business, and accounting. Students with a bachelor's degree in another area of business typically are required to take 45-51 s.h. in order to complete the M.Ac. program. Those with degrees outside of business and with no accounting courses typically are required to take 57-60 s.h.

**CPA Examination and the Iowa Accountancy Act**

The Iowa Accountancy Act that became effective in January 2001 requires individuals who wish to take the CPA examination to have a bachelor's degree, 24 s.h. of business course work, and 24 s.h. of accounting course work beyond 06A:001 Introduction to Financial Accounting.

**Admission**

Admission to the M.Ac. program is competitive. The admissions committee reviews applications individually, considering quantitative aspects (grade-point average and GMAT scores) and qualitative aspects of each applicant's background and professional experience (if applicable) to assess the applicant's potential for academic success and professional growth.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Application materials must include the following: the Application for Graduate Admission; official transcripts of all undergraduate and graduate course work submitted by each institution the applicant has attended; official scores on the Graduate Management Admission Test (GMAT); a supplemental application form with essay responses; a résumé

and cover letter; and at least three letters of reference from former instructors or employers. (B.B.A. accounting students at The University of Iowa are not required to provide letters of reference.)

Applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

University of Iowa undergraduate accounting students are encouraged to take the Graduate Management Admission Test (GMAT) the summer before their senior year. They may apply to the M.Ac. after December 1 of their fourth year. See "Application Deadlines" below.

For complete information about application procedures, contact the University's Office of Admissions or the Department of Accounting.

#### **APPLICATION DEADLINES**

The Department of Accounting admissions committee reviews completed M.Ac. application files (which must include official GMAT scores) on five dates: March 1, April 15, July 15, October 1, and December 1. Applications are reviewed on these dates regardless of whether the applicant plans to begin the M.Ac. program in the fall semester (August), spring semester (January), or summer session (June). Final Graduate College application deadlines are as follows.

Fall semester entry: July 15 (April 15 for international students)

Spring semester entry: December 1 (October 1 for international students)

Summer session entry: April 15 (March 1 for international students)

Students who wish to apply for a teaching assistantship must apply to the M.Ac. program no later than March 1.

#### **Joint M.Ac./J.D.**

The Department of Accounting and the College of Law offer the joint Master of Accountancy/Juris Doctor. The joint M.Ac./J.D. requires a minimum of 18 s.h. of graduate course work in accounting. Students in the program may count up to 12 s.h. of College of Law courses as electives for the M.Ac., and up to 12 s.h. of graduate accounting courses as electives for the J.D.; see Juris Doctor in the College of Law section of the Catalog.

Separate application to each degree program is required. Applicants must be admitted to each program before they may be admitted to the joint program.

#### **Doctor of Philosophy**

Students majoring in accounting may earn a Ph.D. in business administration. Ph.D. requirements are described under "Graduate Programs" in the Tippie College of Business section of the Catalog and on the Department of Accounting web site.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Application materials must include the applicant's score on the Graduate Management Admission Test (GMAT).

## **Faculty**

The department's faculty members stay current in their discipline by producing and disseminating accounting-related knowledge. They keep abreast of the latest developments in the field of education and the profession by participating in educational conferences and seminars and publishing in leading academic journals.

## **Accounting Courses**

### **Primarily for Undergraduates**

#### **06A:001 Introduction to Financial Accounting**

3 s.h.

Accounting and financial reporting procedures used by business and not-for-profit entities; emphasis on accounting concepts and use of accounting information in making economic decisions. Requirements: sophomore or higher standing.

#### **06A:002 Managerial Accounting**

3 s.h.

Basic topics in cost behavior, measurement, accumulation; use of cost data for relevant analysis, budgeting, performance evaluation. Prerequisites: 06A:001, 06E:001, and 22M:017.

## For Undergraduate and Graduate Students

- 06A:101 Directed Readings in Accounting** arr.  
Individual guided readings in accounting topics. Requirements: admission to Professional Program in Accounting.
- 06A:120 Financial Accounting and Reporting** 3 s.h.  
External financial reporting practices in context of decisions by management, current and potential stockholders, financial analysts; emphasis on interpretation, use of financial statements. Prerequisites: 06A:002. Requirements: non-accounting major.
- 06A:130 Accounting for Management Analysis and Control** 3 s.h.  
Advanced topics in cost estimation, measurement, accumulation; use of cost data for decision making, performance evaluation in multi-unit organizations. Prerequisites: 06E:071 and 06K:070. Requirements: admission to Professional Program in Accounting.
- 06A:131 Income Measurement and Asset Valuation** 3 s.h.  
Accounting rules that determine how economic events and transactions are described in published financial reports; emphasis on revenue and expense recognition, asset valuation, accrual accounting model. Requirements: admission to Professional Program in Accounting or pre-accounting major.
- 06A:132 Valuation of Financial Claims** 3 s.h.  
Current and long-term liabilities and stockholders' equity, off-balance sheet financing, cash flow statement, earnings-per-share, financial instruments. Prerequisites: 06A:131.
- 06A:133 Introduction to Taxation** 3 s.h.  
Federal income taxation; individual, corporate, partnership income tax laws, regulations; emphasis on developing a broad perspective on structure, administration, rationale of federal income tax system. Requirements: admission to Professional Program in Accounting or pre-accounting major.
- 06A:141 Advanced Tax Topics** 3 s.h.  
Taxation of corporations, partnerships from organization through liquidation; relative merits of conducting business through partnership, corporation, proprietorship, S corporation; introduction to tax research. Prerequisites: 06A:133. Requirements: senior standing.
- 06A:144 Auditing** 3 s.h.  
General framework underlying auditing, role of audit standards in planning and conduct of audits, effect of regulation, ethics, liability on audit practices. Prerequisites: 06A:132, 06A:150, 06E:071, and 06K:180. Requirements: senior standing.
- 06A:145 Advanced Financial Accounting** 3 s.h.  
Accounting and reporting standards for business combinations, including mergers, consolidations, and multinational enterprises; accounting for partnerships, business segments, transactions denominated in foreign currency, including hedges using foreign currency derivative instruments; reporting standards for interim financial statements and fund accounting applied to government and nonprofit entities. Prerequisites: 06A:132. Requirements: senior standing.
- 06A:148 Business Law** 3 s.h.  
Contracts, sales, debtor-creditor relations, business organizations, other aspects of law applied to business. Prerequisites: 06J:047. Requirements: senior standing.
- 06A:149 Financial Statement Analysis** 3 s.h.  
How to analyze published financial statements; practical experience using financial statement information to assess accounting quality, historical performance, forecasted performance, credit risk, firm value. Prerequisites: 06A:120.
- 06A:150 Professional Orientation Seminar Series** 1 s.h.  
Accounting careers, advising, curriculum, M.Ac. program, internships, CPA examination, Beta Alpha Psi, UI Employment Expo. Offered fall semesters. Corequisites: 06A:131 or 06A:132.

**06A:170 Special Topics in Accounting**

arr.

**06A:195 Honors Thesis in Accounting**

3 s.h.

Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: 06B:194 or 06E:194. Requirements: admission to the Tippie College of Business honors program.

**06A:199 Academic Internship**

arr.

Professional internship experience.

**Primarily for Graduate Students****06A:220 Design and Use of Cost Management Systems**

3 s.h.

Development of cost accumulation and reporting systems that complement a firm's strategy and structure; how activity-based cost management systems increase competitiveness by helping a firm manage its costs, processes, people. Prerequisites: 06A:130 or 06A:235.

**06A:221 Financial Reporting: Theory and Practice**

3 s.h.

Corporate accounting choices in framework of traditional accounting theory, economic consequences, firm valuation. Prerequisites: 06A:132. Requirements: graduate standing in business.

**06A:230 Advanced Auditing**

3 s.h.

Advanced issues such as ethics, independence, regulation and litigation, audit evidence, models of audit testing. Prerequisites: 06A:144. Requirements: graduate standing in business.

**06A:231 Taxes and Business Strategy**

3 s.h.

Effect of taxes on business decisions, including investment strategies, financial policies; emphasis on tax planning, evaluating tax consequences of business decisions. Prerequisites: 06N:215. Requirements: graduate standing in business.

**06A:235 Strategic Cost Analysis**

3 s.h.

Introduction to cost accumulation, reporting, cost management systems; managerial and divisional performance evaluation; appropriate use of cost data for short- and long-run decisions; product costing in manufacturing and service industries. Prerequisites: 06N:215.

**06A:240 Financial Accounting Standards and Analysis**

3 s.h.

Accounting model, underlying measurement concepts, valuation rules for assets, liabilities, related issues of income determination; emphasis on economic substance of transactions, evaluation and interpretation of financial data. Prerequisites: 06N:215.

**06A:241 Tax Research**

3 s.h.

Deciding what research is needed, evaluating tax materials, developing facility with electronic and printed tax materials. Requirements: 06A:141 for undergraduates.

**06A:245 Financial Information and Capital Markets**

3 s.h.

Use of corporate financial statements for investment and lending decisions; emphasis on financial analysis techniques, valuation, business analysis, cash flow projections, credit scoring, related research evidence. Prerequisites: 06A:240.

**06A:246 Corporate Governance**

3 s.h.

How to evaluate and implement mechanisms for good corporate governance; to ensure returns for investors and firms' access to capital markets on reasonable terms; perspectives of investor, firm, regulator.

**06A:286 Seminar in Accounting Research**

arr.

Forum on current research in accounting, related disciplines; faculty, student, guest papers, Ph.D. dissertation proposals. Requirements: Ph.D. enrollment.

**06A:287 Seminar in Selected Accounting Topics**

arr.

Individual study, research paper preparation. Requirements: Ph.D. enrollment.

**06A:290 Thesis: Accounting**  
Requirements: Ph.D. enrollment.

arr.

## Economics

**Chair:** John L. Solow

**Professors:** Gary C. Fethke (Leonard A. Hadley Professor of Leadership), John W. Fuller, Srihari Govindan (Lloyd J. and Thelma W. Palmer Research Fellow), Marlynn Beth Ingram (Henry B. Tippie Professor of Economics), Daniel J. Kovenock (J. Edward Lundy Professor), Forrest D. Nelson (Henry B. Tippie Research Fellow), George R. Neumann (George Daly Professor of Economics), B. Ravikumar (Henry B. Tippie Research Professor of Economics), Raymond G. Riezman (C. Woody Thompson Professor), Charles H. Whiteman (Leonard A. Hadley Chair in Leadership)

**Professors emeriti:** William P. Albrecht, Carol C. Fethke, John F. Geweke, Hyman Joseph, Gerald L. Nordquist, Thomas F. Pogue, N.E. Savin, Larry G. Sgontz, Calvin D. Siebert, S.Y. Wu

**Associate professors:** John L. Solow (Michael Sandler Research Fellow), Gustavo J. Ventura (Dore Research Fellow)

**Assistant professors:** Antonio Galvao Jr., Ayca Kaya, Kyungmin (Teddy) Kim, Elena Pastorino, Guillaume Vandenbroucke, Yuzhe Zhang

**Lecturers:** Stacey L. Brook, Jennifer L. Fuhrman, Blake Whitten

**Undergraduate degrees:** B.A., B.S., B.B.A. in Economics

**Undergraduate nondegree program:** Minor in Economics

**Graduate degrees:** M.A., Ph.D. in Economics

**Web site:** <http://www.tippie.uiowa.edu/economics>

Economics is the study of how societies allocate limited resources to achieve competing ends. Using both empirical and deductive methods, economics analyzes incentives, constraints, organizational forms, and market forces to understand patterns of production, exchange, and consumption of goods and services. It treats diverse issues such as wealth and poverty, government expenditures and taxation, prosperity and depression, inflation and unemployment, relations between management and labor, economic growth, environmental protection, health care delivery, the war on drug abuse, free trade versus protectionism, U.S. competitiveness in international markets, and the quality of American education.

The Department of Economics offers degree programs for undergraduates and for graduate students. It also partners with the Departments of Philosophy and Sociology to offer a Bachelor of Arts in ethics and public policy, an interdisciplinary major administered by the Department of Philosophy in the College of Liberal Arts and Sciences; see Ethics and Public Policy in the Catalog.

## Undergraduate Programs

The department offers three undergraduate degrees: a Bachelor of Arts (B.A.) and a Bachelor of Science (B.S.) in economics awarded by the College of Liberal Arts and Sciences, and a Bachelor of Business Administration (B.B.A.) in economics awarded by the Tippie College of Business.

The department also partners with the Departments of Philosophy and Sociology to offer a Bachelor of Arts in ethics and public policy, an interdisciplinary major administered by the Department of Philosophy in the College of Liberal Arts and Sciences; see Ethics and Public Policy in the Catalog.

The B.A. in economics is designed to achieve a balance of economic theory, mathematical tools, and field applications. The B.S. maintains a similar balance but emphasizes development of analytical tools; it prepares students for graduate work in economics or related business and technical fields. The B.B.A. emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management.

Each program provides an excellent educational background for a variety of positions in business and government. Graduates find employment in banking, financial institutions, industrial firms, and trade organizations and in federal, state, and local government agencies dealing with economic policy, regulation, and analysis. Economics also provides excellent preparation for the study of law and for graduate study in fields such as business management, public administration, hospital and health administration, urban and regional planning, transportation, journalism, political science, and statistics.

All students majoring in economics choose one of three tracks: business economics, policy economics, or analytical economics. The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.

Each degree program (B.A., B.S., and B.B.A.) has three sets of requirements: mathematics and statistics courses that provide the skills needed for understanding economic theory and data; economic theory courses that provide the tools needed for analyzing economic issues; and field courses that apply economic tools to business, social, or specialized analytical issues. The applied field course requirement varies, depending on the student's choice of track.

### Bachelor of Arts

The Bachelor of Arts in economics requires a minimum of 120 s.h., including 32 s.h. of work for the major. The program provides a balance of economic theory, mathematical tools, and field applications. It offers good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

The major requires a set of courses in mathematics and statistics (11 s.h.), a set in economic theory (6 s.h.), and a set

of applied field courses (15 s.h.). Students must choose one of three tracks: business economics, policy economics, or analytical economics. The applied field courses vary depending on the student's choice of track.

The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.

All B.A. students in economics must complete the College of Liberal Arts and Sciences General Education Program.

Students may count a maximum of 6 s.h. of transfer or correspondence credit toward the required 21 s.h. in 100-level economics courses; additional transfer or correspondence credit must be approved by the director of undergraduate studies. Students should take the economic theory courses (06E:104 Microeconomic Theory or 06E:106 Advanced Microeconomics, and 06E:105 Macroeconomics) at The University of Iowa.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see "Prerequisites" below. For help in developing a study plan, visit the Department of Economics web site.

The economics major (B.A.) requires the following courses.

#### **MATHEMATICS AND STATISTICS COURSES**

06E:071 Statistics for Strategy Problems	3 s.h.
22M:017 Calculus and Matrix Algebra for Business	4 s.h.
22S:008 Statistics for Business	4 s.h.

#### **ECONOMIC THEORY COURSES**

06E:104 Microeconomic Theory or 06E:106 Advanced Microeconomics	3 s.h.  3 s.h.
06E:105 Macroeconomics	3 s.h.

#### **APPLIED FIELD COURSES**

Five courses are required; course selection is determined by the student's choice of track.

##### **Business Economics Track**

Five of these:

06A:002 Managerial Accounting	3 s.h.
06E:111 Personnel Economics	3 s.h.
06E:117 Money, Banking, and Financial Markets	3 s.h.
06E:125 Global Economics and Business	3 s.h.
06E:141 Industry Analysis	3 s.h.
06E:160 Household Finance	3 s.h.
06J:048 Introduction to Management	3 s.h.

##### **Policy Economics Track**

Four of these:

06E:113 Health Economics	3 s.h.
06E:119 Policy Analysis	3 s.h.
06E:125 Global Economics and Business	3 s.h.
06E:129 Economic Growth and Development	3 s.h.
06E:133 Environmental and Natural Resource Economics	3 s.h.
06E:135 Regional and Urban Economics	3 s.h.
06E:145 Transportation Economics	3 s.h.

06E:165 Sports Economics	3 s.h.
06E:169 Topics in Policy Economics	arr.
06E:171 Antitrust Economics	3 s.h.
06E:172 Law and Economics	3 s.h.

One additional economics course numbered 06E:111 - 06E:189

### **Analytical Economics Track**

Four of these:

06E:173 International Economics	3 s.h.
06E:174 Monetary Economics	3 s.h.
06E:175 Labor Economics	3 s.h.
06E:176 Public Sector Economics	3 s.h.
06E:177 Industrial Organization	3 s.h.
06E:183 Natural Resource Economics	3 s.h.
06E:187 Mathematical Economics	3 s.h.
06E:189 Topics in Analytical Economics	arr.

One additional economics course numbered 06E:111 - 06E:189

### **Prerequisites**

Prerequisites for most 100-level courses in economics: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics

Prerequisites for 06E:104 Microeconomic Theory: 06E:001 Principles of Microeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisites for 06E:105 Macroeconomics: 06E:002 Principles of Macroeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisite for 06E:071 Statistics for Strategy Problems: 22S:008 Statistics for Business

Prerequisites for courses numbered 06E:171 and above: 06E:104 Microeconomic Theory or 06E:105 Macroeconomics, or both, depending on the course

### **Bachelor of Science**

The Bachelor of Science in economics requires a minimum of 120 s.h., including 33-35 s.h. of work for the major. The program addresses economic theory, mathematical tools, and field applications, with an emphasis on developing skill using analytic tools. It offers good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

The major requires a set of courses in mathematics and statistics (15-17 s.h.), a set in economic theory (6 s.h.), and a set of applied field courses (12 s.h.). Students must choose one of three tracks: business economics, policy economics, or analytical economics. The applied field courses vary depending on the student's choice of track.

The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.

All B.S. students in economics must complete the College of Liberal Arts and Sciences General Education Program.

Students may count a maximum of 6 s.h. of transfer or correspondence credit toward the required 18 s.h. in 100-level economics courses; additional transfer or correspondence credit must be approved by the director of undergraduate studies. Students should take the economic theory courses (06E:104 Microeconomic Theory or 06E:106 Advanced Microeconomics, and 06E:105 Macroeconomics) at The University of Iowa.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see "Prerequisites" below. For help in developing a study plan, visit the Department of Economics web site.

The economics major (B.S.) requires the following courses.

**MATHEMATICS AND STATISTICS COURSES**

06E:184 Introduction to Econometrics	3 s.h.
22M:025 Calculus I	4 s.h.
22M:026 Calculus II	4 s.h.
22S:120 Probability and Statistics	4 s.h.
or	
22S:130-22S:131 Introduction to Mathematical Statistics I-II	6 s.h.

The department recommends that students planning to pursue a graduate degree in economics take 22S:130 Introduction to Mathematical Statistics I and 22S:131 Introduction to Mathematical Statistics II in place of 22S:120 Probability and Statistics, and that they take additional courses in mathematics, including 22M:027 Introduction to Linear Algebra, 22M:028 Calculus III, and 22M:100 Introduction to Ordinary Differential Equations.

**ECONOMIC THEORY COURSES**

06E:104 Microeconomic Theory	3 s.h.
or	
06E:106 Advanced Microeconomics	3 s.h.
06E:105 Macroeconomics	3 s.h.

**APPLIED FIELD COURSES**

Four courses are required; course selection is determined by the student's choice of track.

**Business Economics Track**

Four of these:

06A:002 Managerial Accounting	3 s.h.
06E:111 Personnel Economics	3 s.h.
06E:117 Money, Banking, and Financial Markets	3 s.h.
06E:125 Global Economics and Business	3 s.h.
06E:141 Industry Analysis	3 s.h.
06E:160 Household Finance	3 s.h.
06J:048 Introduction to Management	3 s.h.

**Policy Economics Track**

Three of these:

06E:113 Health Economics	3 s.h.
06E:119 Policy Analysis	3 s.h.
06E:125 Global Economics and Business	3 s.h.
06E:129 Economic Growth and Development	3 s.h.
06E:133 Environmental and Natural Resource Economics	3 s.h.
06E:135 Regional and Urban Economics	3 s.h.
06E:145 Transportation Economics	3 s.h.
06E:165 Sports Economics	3 s.h.
06E:169 Topics in Policy Economics	arr.
06E:171 Antitrust Economics	3 s.h.
06E:172 Law and Economics	3 s.h.

One additional economics course numbered 06E:111 - 06E:189

**Analytical Economics Track**

Three of these:

06E:173 International Economics	3 s.h.
06E:174 Monetary Economics	3 s.h.
06E:175 Labor Economics	3 s.h.
06E:176 Public Sector Economics	3 s.h.
06E:177 Industrial Organization	3 s.h.
06E:183 Natural Resource Economics	3 s.h.
06E:187 Mathematical Economics	3 s.h.
06E:189 Topics in Analytical Economics	arr.

One additional economics course numbered 06E:111 - 06E:189

**Prerequisites**

Prerequisite for 22S:120 Probability and Statistics and 22S:130 Introduction to Mathematical Statistics I: 22M:026 Calculus II or 22M:032 Engineering Mathematics II: Multivariable Calculus

Prerequisites for most 100-level courses in economics: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics

Prerequisites for 06E:104 Microeconomic Theory: 06E:001 Principles of Microeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisites for 06E:105 Macroeconomics: 06E:002 Principles of Macroeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisites for courses numbered 06E:171 and above: 06E:104 Microeconomic Theory or 06E:105 Macroeconomics, or both, depending on the course

Prerequisite for 06E:184 Introduction to Econometrics: 22S:120 Probability and Statistics or 22S:131 Introduction to Mathematical Statistics II

**Bachelor of Business Administration**

The Bachelor of Business Administration in economics requires a minimum of 120 s.h., including 18 s.h. of work for the major. The program emphasizes economic foundations of business fields: accounting, finance, marketing, business law, and management. It provides good educational background for a variety of positions in business and government as well as for the study of law and for graduate study.

All students must complete the B.B.A. common requirements: the General Education courses, the prerequisites for admission to the Tippie College of Business, and the business core; see "Common Requirements" under Bachelor of Business Administration in the Tippie College of Business section of the Catalog.

The major requires a set of courses in mathematics and statistics, which students take as part of the B.B.A. common requirements; a set in economic theory (6 s.h.); and a set of applied field courses (12 s.h.). Students majoring in economics choose one of three tracks: business economics, policy economics, or analytical economics. The applied field courses vary depending on the student's choice of track.

The business economics track is designed for students who intend to work in the private sector. The policy economics track is for students interested in earning a degree in law or a graduate degree in a discipline that is not highly quantitative, or in seeking a decision-making position in the public or private sector. The analytical economics track is for students planning to earn a graduate degree in a discipline that is highly quantitative or who plan to pursue technical and/or analytical work in the public or private sector.

Students may request permission to apply a limited amount of transfer or correspondence credit toward requirements for the major, but they should take the economic theory courses (06E:104 Microeconomic Theory or 06E:106 Advanced Microeconomics, and 06E:105 Macroeconomics) at The University of Iowa.

Students should pay close attention to the order in which they take courses, since some courses are prerequisites for others; see "Prerequisites" below. For help in developing a study plan, visit the Department of Economics web site.

The economics major (B.B.A.) requires the following courses.

**MATHEMATICS AND STATISTICS COURSES**

Students take these courses as part of the B.B.A. common requirements.

06E:071 Statistics for Strategy Problems	3 s.h.
22M:017 Calculus and Matrix Algebra for Business	4 s.h.
22S:008 Statistics for Business	4 s.h.

#### **ECONOMIC THEORY COURSES**

06E:104 Microeconomic Theory	3 s.h.
or	
06E:106 Advanced Microeconomics	3 s.h.
06E:105 Macroeconomics	3 s.h.

#### **APPLIED FIELD COURSES**

Four courses are required; course selection is determined by the student's choice of track.

##### **Business Economics Track**

Four of these:

06E:111 Personnel Economics	3 s.h.
06E:117 Money, Banking, and Financial Markets	3 s.h.
06E:125 Global Economics and Business	3 s.h.
06E:141 Industry Analysis	3 s.h.
06E:160 Household Finance	3 s.h.

##### **Policy Economics Track**

Three of these:

06E:113 Health Economics	3 s.h.
06E:119 Policy Analysis	3 s.h.
06E:125 Global Economics and Business	3 s.h.
06E:129 Economic Growth and Development	3 s.h.
06E:133 Environmental and Natural Resource Economics	3 s.h.
06E:135 Regional and Urban Economics	3 s.h.
06E:145 Transportation Economics	3 s.h.
06E:165 Sports Economics	3 s.h.
06E:169 Topics in Policy Economics	arr.
06E:171 Antitrust Economics	3 s.h.
06E:172 Law and Economics	3 s.h.

One additional economics course numbered 06E:111 - 06E:189

##### **Analytical Economics Track**

Three of these:

06E:173 International Economics	3 s.h.
06E:174 Monetary Economics	3 s.h.
06E:175 Labor Economics	3 s.h.
06E:176 Public Sector Economics	3 s.h.
06E:177 Industrial Organization	3 s.h.
06E:183 Natural Resource Economics	3 s.h.
06E:187 Mathematical Economics	3 s.h.
06E:189 Topics in Analytical Economics	arr.

One additional economics course numbered 06E:111 - 06E:189

### **Prerequisites**

Prerequisites for most 100-level courses in economics: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics

Prerequisites for 06E:104 Microeconomic Theory: 06E:001 Principles of Microeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisites for 06E:105 Macroeconomics: 06E:002 Principles of Macroeconomics and 22M:017 Calculus and Matrix Algebra for Business

Prerequisite for 06E:071 Statistics for Strategy Problems: 22S:008 Statistics for Business

Prerequisites for courses numbered 06E:171 and above: 06E:104 Microeconomic Theory or 06E:105 Macroeconomics, or both, depending on the course

## **Four-Year Graduation Plan**

### **Bachelor of Arts, Bachelor of Science**

The following checkpoints list the minimum requirements students must complete by certain semesters in order to stay on the University's Four-Year Graduation Plan. (Courses in the major are those required to complete the major; they may be offered by departments other than the major department.)

These checkpoints apply to both the Bachelor of Arts and the Bachelor of Science.

**Before the third semester begins:** at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** at least one-half of the semester hours required for graduation, 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics, and the math component of quantitative courses required for major

**Before the seventh semester begins:** three-quarters of the semester hours required for graduation, 06E:104 Microeconomic Theory and 06E:105 Macroeconomics, and one 100-level economics course

**Before the eighth semester begins:** three 100-level economics courses and the statistics component of the quantitative course requirement

**During the eighth semester:** enrollment in all remaining course work in the major, all remaining General Education courses, and a sufficient number of semester hours to graduate

### **Bachelor of Business Administration**

The following checkpoints are designed for students who enter the University as first-year pre-business students. In order to stay on the plan, students must maintain the grade-point average required for guaranteed admission to the Tippie College of Business and must apply for admission to the college by the established deadline.

Students must take 06B:100 Business Communication and Protocol during their first year after admission to the Tippie College of Business.

**Before the third semester begins:** 06E:001 Principles of Microeconomics or 06E:002 Principles of Macroeconomics, 22M:017 Calculus and Matrix Algebra for Business, and 22S:008 Statistics for Business, or equivalents; and at least one-quarter of the semester hours required for graduation

**Before the fifth semester begins:** 06A:001 Introduction to Financial Accounting, 06A:002 Managerial Accounting, and 06E:001 Principles of Microeconomics or 06E:002 Principles of Macroeconomics (whichever has not already been taken), or equivalents; all General Education requirements; and at least half of the semester hours required for graduation

**Before the seventh semester begins:** business core requirements, approximately half of the course work in the major (varies by major), and three-quarters of the semester hours required for graduation

**Before the eighth semester begins:** approximately three-quarters of course work in the major

**During the eighth semester:** all remaining course work in the major, and a sufficient number of semester hours to graduate

## **Honors**

## **Bachelor of Arts, Bachelor of Science**

Students in the College of Liberal Arts and Sciences working toward a B.A. or B.S. in economics are encouraged to take part in the honors program in economics, which provides opportunities for high-achieving students to pursue special research interests. Honors students in economics must be members of the University of Iowa Honors Program, which requires students to maintain a cumulative University of Iowa g.p.a. of at least 3.33 (contact the University of Iowa Honors Program for more information).

To enter the honors program in economics, students must complete 06E:104 Microeconomic Theory and 06E:105 Macroeconomics before the senior year. Honors students typically register for 06E:194 Honors Seminar in the fall of the senior year. Then they define and complete a research project under the guidance of a supervising faculty member, earning up to 6 s.h. in 06E:195 Honors Thesis in Economics. The thesis is presented orally to a committee of three faculty members, typically the undergraduate honors advisor, the student's research supervisor, and a third faculty member agreed upon by the student and the honors advisor.

Interested students should consult the honors advisor by the second semester of their junior year.

## **Bachelor of Business Administration**

The Tippie College of Business offers qualified B.B.A. students the opportunity to pursue honors study. For more information, contact the Undergraduate Program Office or see "B.B.A. with Honors" in the Tippie College of Business section of the Catalog.

## **Minor**

The minor in economics requires a minimum of 15 s.h. in economics courses, including 12 s.h. taken at The University of Iowa in courses numbered above 06E:100. Students must maintain a g.p.a. of at least 2.00 in the minor.

## **Course Work for Nonmajors**

Students in the College of Liberal Arts and Sciences may wish to use economics courses as part of other majors or the General Education Program. The introductory courses 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics are approved for General Education in social sciences; they introduce the field of economics and the specialized topics of upper-division courses. The intermediate theory courses 06E:104 Microeconomic Theory and 06E:105 Macroeconomics provide a deeper foundation in the core theories and methods of the discipline. They serve as preparation for upper-division field courses or as terminal courses in an economics study plan.

Course work in economics can be related to majors in many other fields. For example, political science majors could elect 06E:119 Policy Analysis and 06E:125 Global Economics and Business; global studies majors, 06E:133 Environmental and Natural Resource Economics; pre-law students, 06E:171 Antitrust Economics and 06E:172 Law and Economics; mathematics and engineering majors, 06E:104 Microeconomic Theory and 06E:187 Mathematical Economics; and statistics majors, 06E:184 Introduction to Econometrics.

Some students combine related interests by pursuing double majors in economics and another field, such as computer science, geography, global studies, history, mathematics, political science, sociology, or statistics.

## **Undergraduate Economics Forum**

Students are invited to join the undergraduate Economics Forum. The group sponsors programs to help students plan for careers or graduate study and holds social events, special lectures, and round-table discussions. It provides opportunities for students to meet other economics majors and department faculty members.

## **Graduate Programs**

The department offers a Master of Arts and a Doctor of Philosophy in economics. It also offers a joint Doctor of Philosophy/Juris Doctor with the College of Law; see "Joint Ph.D./J.D." later in this section.

### **Master of Arts**

The Master of Arts is offered only to students working toward a Ph.D. in economics.

### **Doctor of Philosophy**

The Doctor of Philosophy in economics requires a minimum of 72 s.h. of graduate credit. The program provides rigorous training in economic theory, econometrics, and applied economics. It has six components: a coordinated

sequence of core courses, a qualifying examination, a research paper, a set of major field courses, a dissertation proposal and comprehensive examination, and a dissertation. Requirements are as follows.

## **CORE SEQUENCE**

### **First Semester**

06E:200 Economic Analysis I	3 s.h.
06E:203 Microeconomics I	3 s.h.
06E:204 Macroeconomics I	3 s.h.

### **Second Semester**

06E:201 Economic Analysis II	3 s.h.
06E:205 Microeconomics II	3 s.h.
06E:206 Macroeconomics II	3 s.h.

### **Third Semester**

06E:221 Econometrics	3 s.h.
----------------------	--------

### **Fourth Semester**

06E:222 Applied Econometrics	3 s.h.
------------------------------	--------

## **QUALIFYING EXAMINATION**

The qualifying examination is normally taken the summer after the first year.

## **RESEARCH PAPER**

The research paper is normally completed the summer after the second year.

## **MAJOR FIELD COURSES**

Each student chooses a major study area in addition to the core courses. The requirement for the major area is a minimum of 24 s.h. of intensive study in a field and in courses that enable students to understand the relationship between their specialty and related fields.

## **DISSERTATION PROPOSAL AND COMPREHENSIVE EXAMINATION**

Students must defend a dissertation proposal in a comprehensive examination within one year of completing the research paper requirement.

## **DISSERTATION**

Submission of the completed dissertation and an oral defense of the dissertation research completes the Ph.D. program.

## **Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Application deadline for admission and financial support is January 15 for fall semester entry.

Applicants must take the Graduate Record Examination (GRE) General Test and have their scores sent to the University. Those whose first language is not English and who do not hold a baccalaureate or advanced degree from

an accredited college or university in the United States must take the Test of English as a Foreign Language (TOEFL) and have their scores sent to the University.

Applicants must submit a completed Application for Graduate Admission, official transcripts from all institutions they have attended, and all official test scores to the University of Iowa Office of Admissions. They may upload unofficial transcripts, statements of purpose, résumés, and reference information to the Tippie College of Business Ph.D. Applicant Portal.

### **Joint Ph.D./J.D.**

The Department of Economics and the College of Law offer a joint Ph.D./J.D. program; see Juris Doctor in the College of Law section of the Catalog. Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program.

## **Special Seminar**

Each year the department offers a seminar program that brings eminent economists from other universities and from government agencies to The University of Iowa campus. Presentations by Department of Economics faculty members and students also are featured.

## **Economics Courses**

### **Primarily for Undergraduates**

Note: 06E:001 Principles of Microeconomics and 06E:002 Principles of Macroeconomics may be taken in either order or simultaneously. They are approved for General Education in social sciences for B.A. and B.S. students.

#### **06E:001 Principles of Microeconomics**

4 s.h.

Organization, workings of modern economic systems; role of markets, prices, competition in efficient allocation of resources and promotion of economic welfare; alternative systems; international trade. Requirements: B.B.A. students cannot use this course for General Education social sciences. GE: Social Sciences.

#### **06E:002 Principles of Macroeconomics**

4 s.h.

National income and output, employment and inflation; money, credit; government finance; monetary, fiscal policy; economic growth, development; international finance. Requirements: B.B.A. students cannot use this course for General Education social sciences. GE: Social Sciences.

#### **06E:029 First-Year Seminar**

1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

#### **06E:071 Statistics for Strategy Problems**

3 s.h.

Continuation of 22S:008; working knowledge of statistical techniques, scientific data-based approach to problem formulation and solution, statistical techniques in the context of real data analysis, assessment of defects in statistical analyses, using data for making business decisions, choosing appropriate statistical procedures, developing skill in communicating statistical results to audiences without knowledge of statistics. Prerequisites: 22M:017 and 22S:008.

#### **06E:104 Microeconomic Theory**

3 s.h.

Economic theory of the behavior of consumers, producers, and other economic agents; role of markets in coordinating economic activity, conditions that markets require for efficient allocation of resources; market imperfections; strategic behavior of economic actors. Prerequisites: 06E:001 and 22M:017.

#### **06E:105 Macroeconomics**

3 s.h.

Measurement of macroeconomic indicators; economic growth and business cycles; use of macroeconomic models to study the role of government fiscal and monetary policies. Prerequisites: 06E:002 and 22M:017.

#### **06E:106 Advanced Microeconomics**

3 s.h.

Mathematical treatment of the economic theory of the behavior of consumers, producers, and other economic agents; the role of markets in coordinating economic activity and the conditions required by those markets for an efficient allocation of resources; market imperfections; and the strategic behavior of economic actors. Prerequisites: 06E:001, and 22M:017 or 22M:025. Recommendations: 22M:025.

**06E:111 Personnel Economics**

3 s.h.

Microeconomic analysis of labor markets, related institutions; labor supply decisions made by workers, labor demand decisions made by firms, market equilibrium; economic analysis of unions; returns to education; family decisions.

Prerequisites: 06E:001 and 06E:002.

**06E:113 Health Economics**

3 s.h.

Structure of America's health care industry, economic analysis applied to its problems of production, pricing, distribution; cost-effectiveness, financing of medical costs, role of government. Prerequisites: 06E:001 and 06E:002.

**06E:117 Money, Banking, and Financial Markets**

3 s.h.

Role of money, institutions in determination of income, employment, prices in domestic and world economy.

Prerequisites: 06E:001 and 06E:002.

**06E:119 Policy Analysis**

3 s.h.

Economic functions of government in modern economies; economic decision making; budgetary processes; effects of government expenditures, taxation on allocation of resources, distribution of income, economic growth, stability.

Prerequisites: 06E:001 and 06E:002.

**06E:125 Global Economics and Business**

3 s.h.

Modern theories of international trade and investment; role of tariffs and other restrictions of international trade; foreign exchange markets, international monetary arrangements, international economic policy. Prerequisites: 06E:001 and 06E:002.

**06E:129 Economic Growth and Development**

3 s.h.

Determinants of rising living standards; accumulation of physical and human capital; predictions of economic growth models compared to observed changes in living standards. Prerequisites: 06E:001 and 06E:002.

**06E:133 Environmental and Natural Resource Economics**

3 s.h.

Environmental and resource use problems; efficient mechanisms and other policies for environmental protection, management of common property resources. Prerequisites: 06E:001 and 06E:002.

**06E:135 Regional and Urban Economics**

3 s.h.

Theory of location and regional development; central place theory; why cities exist and trade with one another; models of land use patterns, rents; empirical tests of models; policy applications. Prerequisites: 06E:001 and 06E:002.

**06E:141 Industry Analysis**

3 s.h.

Structural evolution; imperfect competition, resource allocation; development of public policy on monopoly; selected industries. Prerequisites: 06E:001 and 06E:002.

**06E:145 Transportation Economics**

3 s.h.

Overview of transportation markets--intercity, rural, urban; transportation modes--rail, highway, air, water, pipeline, transit; issues in finance, policy, planning, management, physical distribution, and environmental, economic, and safety regulation. Prerequisites: 06E:001 and 06E:002. Same as 044:133, 102:133.

**06E:158 American Economic History**

3 s.h.

Emphasis on role of population and technology. Requirements: 06E:001 and 06E:002 for economics majors; 06E:001 and 16A:061 for non-economics majors. Same as 16A:144.

**06E:160 Household Finance**

3 s.h.

Micro- and macroeconomic theory applied to economic decisions of families, households; practical and theoretical issues in income generation, spending and saving decisions, risk management and asset allocation, investments, and intergenerational wealth transfers. Prerequisites: 06E:001 and 06E:002.

**06E:165 Sports Economics**

3 s.h.

Theory and literature of economic issues in professional sports; issues such as relative advantages of large-and small-market teams, city subsidies for baseball and football stadiums, star players' true value to their teams; ideas from introductory economics (such as demand and cost curves) combined with additional economic theory, statistical evidence, and information about particular sports. Prerequisites: 06E:001 and 06E:002.

**06E:169 Topics in Policy Economics**

arr.

Topics vary. Prerequisites: 06E:001 and 06E:002.

**06E:171 Antitrust Economics**

3 s.h.

Topics in federal antitrust policy; merger policy, monopolization, predatory pricing, collusion, vertical restrictions, resale price maintenance, enforcement; case law, economics literature. Prerequisites: 06E:104 or 091:208.

**06E:172 Law and Economics**

3 s.h.

Law examined through analytic tools of microeconomics; impact of legal rules on resource allocation, risk bearing, distribution of economic well-being. Prerequisites: 06E:001.

**06E:173 International Economics**

3 s.h.

Neoclassical model of international trade, imperfect competition and international trade and investment, role of trade barriers; regional trade agreements and the World Trade Organization. Requirements: 06E:104 and 06E:105, or graduate standing.

**06E:174 Monetary Economics**

3 s.h.

Demand for and supply of money; money's role in economy; empirical studies of money's impact; problems with monetary control. Prerequisites: 06E:104 and 06E:105.

**06E:175 Labor Economics**

3 s.h.

Labor supply and demand; investments in human capital, compensating wage differentials, discrimination, long-term contracts, occupational choice, family decisions, unions, immigration. Prerequisites: 06E:104.

**06E:176 Public Sector Economics**

3 s.h.

Economic functions of government; budgetary processes; effects of government expenditures, taxation on resource allocation, income distribution, economic growth and stability. Prerequisites: 06E:104 and 06E:105.

**06E:177 Industrial Organization**

3 s.h.

Market structure; effects of business practices, informational problems on market structure; appraisal of antitrust policies, government regulation of business. Prerequisites: 06E:104.

**06E:179 History of Economic Thought**

3 s.h.

Evolution of economics as a social science; ideas of Smith, Ricardo, Malthus, Marx, Marshall, Keynes, and their major critics. Prerequisites: 06E:104 and 06E:105.

**06E:183 Natural Resource Economics**

3 s.h.

Economics of natural resources; interaction between economic theory, empirical evidence, and public policy; land, water, fish, trees, minerals; externalities. Prerequisites: 06E:104.

**06E:184 Introduction to Econometrics**

3 s.h.

Single equation linear statistical models, estimation and hypothesis testing; serial correlation, heteroscedasticity, generalized least squares estimation; specification analysis; errors in variables; emphasis on interpretation, application of econometric models, methods, use of computers. Prerequisites: 22S:120.

**06E:187 Mathematical Economics**

3 s.h.

Mathematical structure of economic principles, problems, systems; may include constrained optimization, choice under uncertainty, general equilibrium and welfare economics, dynamical systems and control theory, game theory. Prerequisites: 06E:104 and 06E:105.

**06E:189 Topics in Analytical Economics**

arr.

Topics vary. Prerequisites: 06E:104 and 06E:105.

**06E:190 Federal Reserve Challenge**

3 s.h.

Experience doing what Federal Reserve economists do every day: study the real U.S. economy, make forecasts and policy recommendations, defend their views to academic and professional economists; development of analytical skills, teamwork, how to build presentations. Prerequisites: 06E:104 and 06E:105.

## For Advanced Undergraduates

- 06E:194 Honors Seminar** 1-3 s.h.  
Research topics and methods in business. Requirements: honors standing. Same as 06B:194.
- 06E:195 Honors Thesis in Economics** 3 s.h.  
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: 06B:194 or 06E:194, and admission to the Tippie College of Business honors program.
- 06E:196 Readings and Independent Study in Economics** arr.
- 06E:199 Academic Internship** arr.  
Participation in approved internship program (e.g., Washington Center Internships).

## Primarily for Graduate Students

With consent of the department chair, qualified undergraduates may enroll in courses listed for graduate students.

- 06E:200 Economic Analysis I** 3 s.h.  
Basic metric topology, convex analysis, function spaces, measure theory and integration.
- 06E:201 Economic Analysis II** 3 s.h.  
Behavior under uncertainty, macroeconomic models; dynamic programming, asset pricing, saving, consumption.
- 06E:203 Microeconomics I** 3 s.h.  
Consumer choice theory, producer theory, choice under uncertainty, basic game theory. Offered fall semesters.
- 06E:204 Macroeconomics I** 3 s.h.  
Economic growth, business cycles, money and inflation. Offered fall semesters. Prerequisites: 06E:201.
- 06E:205 Microeconomics II** 3 s.h.  
General equilibrium and welfare analysis, adverse selection, the principal-agent problem, social choice, mechanism design. Offered spring semesters. Prerequisites: 06E:203.
- 06E:206 Macroeconomics II** 3 s.h.  
Dynamic macroeconomic models; stochastic macroeconomics; time consistency equilibrium business cycle theory. Offered spring semesters. Prerequisites: 06E:204.
- 06E:211 Mathematical Economics I** 3 s.h.  
Convex analysis in economic theory; ordinal and cardinal preference relations; quasiconcave, concave numerical representations; separation principle for convex sets--linear programming, concave programming; Brouwer fixed point theorem; existence of competitive equilibrium. Prerequisites: 06E:205.
- 06E:221 Econometrics** 3 s.h.  
Statistical inference in single and multiple equation stochastic models, models with nonindependent or nonidentically distributed error structure, dynamic models; OLS, GLS, IV, ML estimation; asymptotic distribution theory; exact, asymptotic hypothesis tests. Prerequisites: 22S:154.
- 06E:222 Applied Econometrics** 3 s.h.  
Empirical problems; multiple linear regression, nonlinear regression, maximum likelihood, hazard functions, univariate and multivariate time series, flexible functional forms. Prerequisites: 06E:221.
- 06E:223 Econometric Theory I** 3 s.h.  
Inference from data and theory in economic models; emphasis on decision making and simulation methods. Prerequisites: 06E:222.

<b>06E:234 International Business-M.B.A.</b>	3 s.h.
Problems in international business; how to export, how to deal with import competition, international joint ventures; country studies.	
<b>06E:235 International Trade Theory</b>	3 s.h.
The theory of international trade, including basic models of international trade; capital and labor mobility and trade; protection of international trade; the political economy of international trade; empirical applications of international trade.	
<b>06E:241 Macroeconomics III</b>	3 s.h.
Current research in macroeconomics; development of research topics with emphasis on theoretical and empirical analysis. Prerequisites: 06E:205 and 06E:221.	
<b>06E:245 Monetary Theory</b>	3 s.h.
Research at the frontier of monetary theory and policy; overlapping generations models, search models of money, representative agent monetary models, intermediation and banking theory, and financial contracts.	
<b>06E:250 Labor Economics</b>	3 s.h.
Problems and models, including intertemporal models of labor markets; uncertainty and labor market activity; retirement decisions, economic theories of fertility; economics of discrimination; job search models; economic models of unions; bargaining and strikes, public sector labor markets; determinants of income distribution; emphasis on empirical verification of theory. Prerequisites: 06E:205, and 06E:184 or 06E:221.	
<b>06E:271 Industrial Organization</b>	3 s.h.
The firm, monopolistic competition, oligopoly and workable competition; industrial organization, nature of equilibrium under uncertainty. Prerequisites: 06E:205 and 06E:211.	
<b>06E:299 Contemporary Topics in Economics</b>	3 s.h.
Topics not offered in other courses. Repeatable.	
<b>06E:300 Readings in Economics</b>	arr.
<b>06E:301 Thesis in Economics</b>	arr.
<b>Advanced Graduate Seminars</b>	
<b>06E:310 Seminar in Economic Theory</b>	arr.
<b>06E:311 Seminar in Economic Theory II</b>	arr.
<b>06E:321 Workshop in Microeconomics</b>	1 s.h.
<b>06E:322 Workshop in Macro and Monetary Economics</b>	1 s.h.

# Entrepreneurship

**Director:** David K. Hensley

**Undergraduate nondegree programs:** Certificate in Entrepreneurial Management, Certificate in Technological Entrepreneurship

**Web site:** <http://www.iowajpec.org/>

The Tippie College of Business and the John Pappajohn Entrepreneurial Center offer the undergraduate Certificate in Entrepreneurial Management. The Colleges of Engineering and Liberal Arts and Sciences and the University of Iowa health sciences colleges also collaborate in the program.

The certificate may be completed on campus, or it may be completed online or by distance education in conjunction with the Bachelor of Applied Studies (University College) or the Bachelor of Liberal Studies (College of Liberal Arts and Sciences). It is open to all University of Iowa undergraduates and to individuals who hold a bachelor's degree and are not currently enrolled in a graduate or professional program. See "Admission" below.

The Tippie College of Business and the College of Engineering offer an entrepreneurship certificate program; see "Certificate in Technological Entrepreneurship" below.

The John Pappajohn Entrepreneurial Center and the Division of Performing Arts also offer an entrepreneurship certificate program; see Performing Arts Entrepreneurship (College of Liberal Arts and Sciences) in the Catalog.

## Certificate in Entrepreneurial Management

The Certificate in Entrepreneurial Management requires a minimum of 18 s.h. in course work related to entrepreneurship. The program is designed to help students acquire the entrepreneurial mindset that will enable them to launch new ventures or manage growing companies. It focuses on qualities and skills essential for entrepreneurs and successful business leaders: innovation and creativity; recognizing, evaluating, and seizing opportunities; professional communication skills; strategic business planning; financial analysis; leadership; and team building.

Entrepreneurship students learn from a select team of faculty members and business leaders distinguished by their ability to teach, model, and inspire the entrepreneurial process. They gain understanding of the entrepreneurial approach to acquiring and managing resources; develop team-building skills critical to both small and large companies, network with successful entrepreneurs and business leaders, and participate in experiential learning opportunities.

Students may begin working toward the Certificate in Entrepreneurial Management in their sophomore year. They must declare their intention to pursue the certificate; see "Admission" later in this section. The certificate is noted on students' permanent records when their undergraduate degrees are added to their transcripts.

Students may count a maximum of 6 s.h. of transfer credit toward the certificate, with approval of the entrepreneurship program director. Credit from entrepreneurship courses (prefix 06T) is counted as semester hours earned in business on the degree evaluation. Students must satisfy all prerequisites before enrolling in a required course.

Certificate requirements are as follows.

06T:120 Entrepreneurship and Innovation	3 s.h.
or	
06T:125 New Ventures in the Arts	3 s.h.
06T:133 Entrepreneurial Finance	3 s.h.
06T:134 Entrepreneurial Marketing	3 s.h.
06T:150 Managing the Growth Business	3 s.h.

Students earn an additional 6 s.h. in elective courses chosen from the following list. Students who wish to use a course not on the list must consult with the Pappajohn Entrepreneurial Center director.

06J:125 Entrepreneurial Strategy (for B.B.A. in management)	3 s.h.
06J:156 Dynamics of Negotiations	3 s.h.
06T:101 Directed Readings in Entrepreneurship	arr.
06T:144 Nonprofit Organizational Effectiveness I	3 s.h.
06T:145 Legal Aspects of Entrepreneurship	3 s.h.
06T:146 Strategic Management of Technology and Innovation	3 s.h.
06T:147 Social Entrepreneurship	3 s.h.
06T:148 E-Commerce Strategies for Entrepreneurs	3 s.h.
06T:155 Arts Leadership Seminar	3 s.h.
06T:190 Seminar in Entrepreneurship	3 s.h.

06T:191 Practicum in Entrepreneurship	3 s.h.
06T:192 Entrepreneurship: Business Consulting	3 s.h.
06T:194 Entrepreneurship: Advanced Business Planning	3 s.h.
06T:199 Academic Internship	3 s.h.
06M:105 Web Business Strategy	3 s.h.

### Admission

University of Iowa undergraduate students and individuals who hold an undergraduate degree from an accredited institution and are not currently enrolled in a graduate or professional program are eligible to earn the certificate. Students pursuing the Bachelor of Applied Studies or the Bachelor of Liberal Studies are eligible to complete the certificate by distance education or online, in conjunction with those degrees.

Undergraduate students must declare their intention to pursue the certificate. Business students should contact the Tippie College of Business Undergraduate Program Office. Liberal arts and sciences students should contact CLAS Academic Programs & Services.

Individuals interested in earning the certificate by distance education in conjunction with a B.A.S. or B.L.S. degree must apply and be accepted to one of those programs; for admission requirements, see Bachelor of Applied Studies or Bachelor of Liberal Studies in the Catalog.

### Certificate in Technological Entrepreneurship

The Tippie College of Business and the College of Engineering offer a program leading to the Certificate in Technological Entrepreneurship. The program focuses on the entrepreneurial process as it relates to technology. It is designed for students who intend to run their own businesses as well as for others interested in gaining a better understanding of the entrepreneurial process. For more information, see College of Engineering in the Catalog. For application information, contact the College of Engineering Office of the Dean.

## Entrepreneurship Courses

<b>06T:029 First-Year Seminar</b>	1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).	
<b>06T:050 Foundations in Entrepreneurship</b>	2 s.h.
Basic core business concepts faced by entrepreneurial managers in small business accounting, marketing, and business planning. Recommendations: non-business major interested in studying entrepreneurship.	
<b>06T:101 Directed Readings in Entrepreneurship</b>	arr.
Independent study; topics and assignments approved by instructor.	
<b>06T:113 Basics of Small Business Accounting</b>	1 s.h.
Duplicates 06A:001; financial statements of small companies; basics of balance sheets, income statements, cash flow statements; development of assumptions for projections; simple comparative analysis. Requirements: closed to business and pre-business students.	
<b>06T:116 Basics of Small Business Marketing</b>	1 s.h.
Duplicates 06M:100; basic marketing concepts for nonbusiness majors; traditional and guerrilla marketing strategies; focus on marketing information required in a business plan. Requirements: closed to business and pre-business students.	
<b>06T:120 Entrepreneurship and Innovation</b>	3 s.h.
The entrepreneurial process from conception to birth of a new venture; attributes of successful entrepreneurs, innovation and creativity, recognition of opportunity, venture screening, identification of resources, feasibility analysis. Duplicates 06T:125. Corequisites: 06T:050, or 06A:001 and 06M:100.	
<b>06T:125 New Ventures in the Arts</b>	3 s.h.
Arts administration principles and trends as applied to creation of an arts-related enterprise; case studies; students create business plan for a new arts organization. Duplicates 06J:125 and 06T:120. Corequisites: 06T:050, or 06A:001 and 06M:100. Same as 049:111, 145:111, 188:111.	

**06T:133 Entrepreneurial Finance**

3 s.h.

Understanding financial aspects of new and growing ventures; focus on preparing financial projections, analyzing financial performance, managing cash flow, and determining financial feasibility; detailed overview of various sources of capital available for start-up and growing ventures. Prerequisites: 06J:125 or 06T:120 or 06T:125.

**06T:134 Entrepreneurial Marketing**

3 s.h.

Practical marketing concepts for evaluating the market potential for new products, services, or business opportunities; how to obtain and evaluate market data, determine customer demand, analyze the competition, design effective promotions, develop and implement effective sales strategies, and write a successful marketing plan. Prerequisites: 06J:125 or 06T:120 or 06T:125.

**06T:144 Nonprofit Organizational Effectiveness I**

3 s.h.

Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 024:147, 032:127, 042:157, 06J:147, 096:168.

**06T:145 Legal Aspects of Entrepreneurship**

3 s.h.

Areas of law significant to new and emerging businesses; legal system pitfalls, constraints, opportunities; overview. Prerequisites: 06T:120, and 06T:133 or 06T:134.

**06T:146 Strategic Management of Technology and Innovation**

3 s.h.

Role of technology in creation, growth, and survival of industries; process, risks, and rewards of technological innovation, commercialization; successful approaches to developing technological strategy and products. Prerequisites: 06T:120, and 06T:133 or 06T:134.

**06T:147 Social Entrepreneurship**

3 s.h.

Introduction to the growing field of social entrepreneurship, the creation of ventures with dual missions of social benefit and return on investment; issues related to evaluating market opportunities, acquiring and managing scarce resources, and maximizing social and economic value. Prerequisites: 06T:120 and 06T:133.

**06T:148 E-Commerce Strategies for Entrepreneurs**

3 s.h.

E-commerce opportunities and Internet business strategies for entrepreneurial ventures; business-to-consumer and business-to-business scenarios; hands-on experience building and managing a web site. Prerequisites: 06T:120 and 06T:133.

**06T:150 Managing the Growth Business**

3 s.h.

Issues faced by new, rapidly growing businesses; adapting organizational structure as business expands, building a management team, hiring new employees, managing strategic growth; case studies, particularly in technology sector. Prerequisites: 06T:120, 06T:133, and 06T:134.

**06T:155 Arts Leadership Seminar**

3 s.h.

Performing arts management and administrative principles, practical applications, trends in arts leadership and advocacy. Requirements: (for 049:195) 049:109 or 049:111 or graduate standing in an arts discipline. Same as 049:195, 145:195, 188:195.

**06T:190 Seminar in Entrepreneurship**

2-3 s.h.

Topics such as franchising, business acquisition, real estate development, technology transfer. Prerequisites: 06T:120, and 06T:133 or 06T:134.

**06T:191 Practicum in Entrepreneurship**

3 s.h.

Simulation of team-based entrepreneurial new venture; seminars with successful entrepreneurs, business, and community leaders; opportunities for networking and mentoring to foster development of entrepreneurial management skills. Prerequisites: 06T:120 and 06T:133.

**06T:192 Entrepreneurship: Business Consulting**

3 s.h.

Experience on teams providing consulting services to start-up and early-stage companies; the consulting process--proposal development, data collection and analysis, final report preparation and presentation; projects--marketing studies, financial projections, strategic planning. Prerequisites: 06T:120, 06T:133, and 06T:134.

**06T:194 Entrepreneurship: Advanced Business Planning**

arr.

Mentoring for individuals in final stages of preparing to launch their own business. Prerequisites: 06T:120, 06T:133, and 06T:134.

**06T:199 Academic Internship**

arr.

Professional internship experience with academic credit (e.g., paper, course work). Repeatable.

**06T:201 Introduction to Entrepreneurial Management**

1 s.h.

The entrepreneurial process as it applies to new ventures and existing organizations; entrepreneurship and corporate entrepreneurship, attributes of successful entrepreneurial leaders, innovation and creativity, feasibility analysis.

**06T:202 Evaluating Entrepreneurial Opportunities**

1 s.h.

Strategies to identify, assess, and capitalize on sustainable commercial opportunities; opportunity recognition, environmental analysis, intellectual property, strategic business planning.

**06T:203 Basics of Entrepreneurial Marketing**

1 s.h.

Core marketing concepts facing entrepreneurial organizations; types of markets, product management, distribution, pricing, market research and analysis, market planning.

**06T:204 Basics of Entrepreneurial Finance**

1 s.h.

Core financial concepts facing entrepreneurial organizations; accounting systems, financial statements, financial statement analysis, financial projections, sources of financing.

**06T:210 Developing Professional Service Business**

2-3 s.h.

Use of professional skills and functional knowledge in creating a specialized service business. Same as 053:210.

**06T:220 Entrepreneurship and Innovation**

3 s.h.

The entrepreneurial process from conception to birth of a new venture; attributes of successful entrepreneurs, innovation and creativity, opportunity recognition, venture screening, identification of resources, feasibility analysis.

**06T:233 Finance for Entrepreneurs**

3 s.h.

Understanding the process of capital acquisition and cash flow management; techniques, projections, and measurements used in valuing and funding new and growing ventures; sources and strategies for raising capital. Same as 06F:219.

**06T:246 Strategic Management of Technology and Innovation**

3 s.h.

Role of technology in creation, growth, and survival of industries; process, risks, and rewards of technological innovation, commercialization; successful approaches to developing technological strategy and products.

**06T:250 Managing the Growth Business**

3 s.h.

Issues faced by new, rapidly growing businesses; adapting organizational structure as business expands, building a management team, hiring new employees, managing strategic growth of a business; case studies, particularly in technology sector.

**06T:256 Commercializing New Technology**

3 s.h.

Hands-on experience with the process of technology commercialization; real-world opportunity in the form of a technology developed in an academic environment or in the private sector and creation of a plan to transfer that technology to the marketplace; identifying a specific application of that technology (the product); identifying and sizing relevant market segments; determining the appropriate business and financial model; designing a business plan; presentation of business plans/opportunities to simulated venture capitalists.

**06T:290 Seminar in Entrepreneurship**

1-3 s.h.

Topics such as franchising, business acquisition, real estate development, e-commerce, technology transfer. Repeatable.

**06T:292 Entrepreneurship: Business Consulting**

3 s.h.

Experience on teams providing consulting services to start-up and early-stage companies; the consulting process--proposal development, data collection and analysis, final report preparation and presentation; projects--marketing studies, financial projections, strategic planning.

**06T:294 Entrepreneurship: Advanced Business Planning**

3 s.h.

Mentoring for individuals in final stages of preparing to launch their own business.

## Finance

**Chair:** Paul A. Weller

**Professors:** David S. Bates (W. A. Krause Research Fellow), Matthew T. Billett (Henry B. Tippie Research Fellow), William C. (Curt) Hunter (Henry B. Tippie Dean), Erik Lie (Henry B. Tippie Research Professor of Finance), Jarjis Sa-Aadu (Chester A. Phillips Professor of Business Finance and Real Estate), Anand M. Vijn (Marvin and Rose Lee Pomerantz Chair in Finance), Paul A. Weller (John F. Murray Professor of Finance)

**Professors emeriti:** Charles E. Marberry, Richard A. Stevenson

**Clinical professor:** John H. Spitzer

**Associate professors:** Jon A. Garfinkel (Waugh Business Fellow), Yiming Qian, Thomas A. Rietz (Huneke Research Fellow), Gerry L. Suchanek, Ashish Tiwari (Michael Sandler Research Fellow)

**Associate professor emeritus:** G. Carl Schweser

**Assistant professors:** Redouane Elkamhi, James T. Leverty (TRISTAR Risk Management Fellow), Wei Li, Tong Yao, Yu Yuan

**Lecturers:** Heidi Dybevik, John G. Gallo, Larry Hershberger, Todd I. Houge (Curt and Carol Lane Faculty Fellow), Brian Richman

**Undergraduate degree:** B.B.A. in Finance

**Undergraduate nondegree program:** Certificate in Risk Management and Insurance

**Graduate degrees:** M.B.A.; Ph.D. in Business Administration

**Web site:** <http://tippie.uiowa.edu/finance>

The Department of Finance is committed to delivering undergraduate and graduate degree programs that integrate the technology and analytics of today's global financial community. The department's goal is to provide students with the technical skills they will need to enhance their managerial effectiveness, whether they work in large corporations, small organizations, or private consulting.

## Undergraduate Program

The department offers a Bachelor of Business Administration in finance and the undergraduate Certificate in Risk Management and Insurance.

### Bachelor of Business Administration

The Bachelor of Business Administration in finance requires a minimum of 120 s.h., including 20 s.h. of work for the major. The program provides a balance of theory, applications, and financial information technology that facilitates students' transition from classroom to workplace. Through fundamental finance principles and state-of-the-art financial market information technologies, students develop analytical abilities to interpret financial market data, implement the latest trading and investment strategies, and make effective managerial decisions in national as well as international settings.

The program stresses learning by doing, partnership with industry, and internships, with the goal of enhancing students' career development. Students receive a balanced education consistent with the globalization of business and the explosion in financial markets and information technology.

Careers for students majoring in finance include corporate treasury operations, cash management, mergers and acquisitions, investment banking, sales and security trading, security analysis, commercial banking and financial services, credit analysis, mortgage lending, financial planning, consulting, public administration, and venture capital.

Requirements for the finance major are as follows. For B.B.A. common requirements, see Bachelor of Business Administration (Undergraduate Program) in the Tippie College of Business section of the Catalog.

06A:120 Financial Accounting and Reporting	3 s.h.
06F:110 Financial Information Technology	2 s.h.
06F:111 Investment Management	3 s.h.
06F:117 Corporate Finance	3 s.h.

Note: students may count only two of these courses toward the finance major: 06F:102 Principles of Risk Management and Insurance, 06F:103 Property and Liability Insurance, 06F:104 Corporate and Financial Risk Management, 06F:105 Life and Health Insurance, 06F:106 Employee Benefit Plans.

Three of these:

06F:102 Principles of Risk Management and Insurance	3 s.h.
06F:103 Property and Liability Insurance	3 s.h.
06F:104 Corporate and Financial Risk Management	3 s.h.
06F:105 Life and Health Insurance	3 s.h.
06F:106 Employee Benefit Plans	3 s.h.
06F:108 Topics in Finance I (does not count toward major if taken S/F)	3 s.h.
06F:109 Topics in Finance II	3 s.h.
06F:112 Applied Equity Valuation	3 s.h.
06F:113 Fixed Income Securities	3 s.h.
06F:114 Commercial Banking	3 s.h.

06F:115 Investment Banking	3 s.h.
06F:116 Futures and Options	3 s.h.
06F:118 Advanced Corporate Finance	3 s.h.
06F:119 Wealth Management	3 s.h.
06F:126 Real Estate Process	3 s.h.
06F:130 International Finance	3 s.h.

## Certificate in Risk Management and Insurance

The Department of Finance and the Emmett J. Vaughan Institute of Risk Management and Insurance offer the Certificate in Risk Management and Insurance. The certificate program provides undergraduate students with a foundation for careers in corporate risk management, risk management consulting, employee benefits management, insurance brokerage, and underwriting. Noncertificate students University-wide also find risk management and insurance (RMI) courses valuable. See Risk Management and Insurance in the Catalog.

## Graduate Program

The Department of Finance offers the Doctor of Philosophy in business administration. Ph.D. requirements are described under "Graduate Programs" in the Tippie College of Business section of the Catalog and on the Department of Finance web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., see Master of Business Administration Program in the Catalog or contact the Tippie School of Management.

## Finance Courses

### Primarily for Upper-Division Undergraduates

**06F:029 First-Year Seminar** 1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

**06F:100 Introductory Financial Management** 3 s.h.  
Financial management goals and decision making; valuation of bonds and stocks, risk and return analysis, portfolio diversification, market efficiency, asset pricing, cost of capital, agency theory, capital budgeting, financial planning. Prerequisites: 06A:002, 06E:001, and 06E:002. Requirements: junior standing.

**06F:101 Directed Readings in Finance** arr.  
Individually guided readings in selected topics.

**06F:102 Principles of Risk Management and Insurance** 3 s.h.  
Introduction to risk and insurance; risk identification and evaluation, demand for insurance, effects of limited liability, theory of moral hazard and adverse selection; business and personal risk; insurance as a risk management tool. Corequisites: 06F:100.

**06F:103 Property and Liability Insurance** 3 s.h.  
Fundamentals of commercial property and liability insurance; commercial property and liability contracts, functions of property and liability insurers; regulation and financial analysis of property and liability insurers; marketing, underwriting, rate making, claim settlements. Prerequisites: 06F:102.

**06F:104 Corporate and Financial Risk Management** 3 s.h.  
Analysis and treatment of pure and financial risks faced by business organizations; development and implementation of the risk management process, application of varied risk management techniques to identified exposures; how businesses manage risk and how insurance is used to manage the cost of risk; case studies. Prerequisites: 06F:102. Corequisites: 06F:110.

**06F:105 Life and Health Insurance** 3 s.h.

Types of life insurance and annuity contracts and their uses; regulation of life and health insurers; development of financial plans using life insurance products; Social Security, group, and individual health insurance products, including major medical, disability income, long-term care policies; marketplace analysis; contractual provisions, determination of human life values, mathematics of life contingencies and pricing. Prerequisites: 06F:102.

**06F:106 Employee Benefit Plans**

3 s.h.

Management of employee benefit plans (e.g., group life and health insurance, retirement programs); design, administration, and financing of employee benefits; federal administration of employee benefit plans; funding requirements, financial alternatives; funding and vesting of retirement annuities; design and management of health care plans, including "cafeteria" approach and nonqualified deferred compensation arrangements; economic effects and financing employee benefits and retirement plans in private and public sectors. Prerequisites: 06F:102.

**06F:108 Topics in Finance I**

3 s.h.

Contemporary issues in finance. Prerequisites: 06F:100.

**06F:109 Topics in Finance II**

3 s.h.

Contemporary issues in finance. Prerequisites: 06F:100.

**06F:110 Financial Information Technology**

2 s.h.

Applications of commonly used financial software and data systems reviewed by student teams. Corequisites: 06F:100.

**06F:111 Investment Management**

3 s.h.

Investment in marketable securities in domestic and international markets; financial markets, securities trading, evaluation of risk/return trade-off, formulation and implementation of investment strategies, efficient portfolio formation. Prerequisites: 06F:100. Corequisites: 06F:110.

**06F:112 Applied Equity Valuation**

3 s.h.

Equity valuation and portfolio management techniques by investment professionals; economic forecasting, industry analysis, financial statement analysis, spreadsheet modeling, cost of capital estimation, equity valuation and portfolio construction; students manage The University of Iowa's Krause Fund (an endowed equity portfolio that blends academic rigor with real-world portfolio management experience). Prerequisites: 06F:100. Requirements: UI cumulative g.p.a. of at least 2.80.

**06F:113 Fixed Income Securities**

3 s.h.

Theories of fixed income securities, term structure of interest rates; asset pricing models, valuation of fixed income securities and contingent claims, fixed income portfolio management, immunization strategies, yield curve analysis. Prerequisites: 06F:100. Corequisites: 06F:110.

**06F:114 Commercial Banking**

3 s.h.

Management of commercial banks and financial service firms; asset and liability management, credit policy, capital risk, liquidity planning, use of swaps and derivatives to hedge interest rate risk, global banking, investment strategies. Prerequisites: 06F:100. Corequisites: 06F:110.

**06F:115 Investment Banking**

3 s.h.

How investment bankers interact with clients in access to growth capital, sales, trading, and investment banking; role of investment bankers through varied perspectives, including those of the client (e.g., corporate CFO, treasurer, corporate development officer) and service provider (e.g., investment banking professional). Prerequisites: 06F:100 and 06F:117.

**06F:116 Futures and Options**

3 s.h.

Use of options, futures, and other derivative securities in financial management; understanding types of derivative securities, markets, trading technology; applications of risk management and speculation; pricing relations with underlying securities. Prerequisites: 06F:111.

**06F:117 Corporate Finance**

3 s.h.

Advanced managerial decision making; corporate financial policy, dividend policy, agency theory, corporate restructuring, capital structure strategies, mergers and acquisitions, option pricing fundamentals, convertible debt, callable debt, warrants. Prerequisites: 06F:100. Corequisites: 06F:110.

**06F:118 Advanced Corporate Finance**

3 s.h.

Issues relevant to financial management, payout policy, financial distress and bankruptcy, restructuring, market for corporate control; recent research and cases from the corporate arena; other topics (e.g., bankruptcy) to broaden application and understanding of finance theory. Prerequisites: 06F:117.

**06F:119 Wealth Management** 3 s.h.

Financial services for client wealth management; how to make personal investment decisions and build diversified, comprehensive investment portfolios; investment theory; common behavioral biases that lead to investment pitfalls, mistakes; wealth management objectives, portfolio risk and reward, asset allocation, portfolio diversification, tax shield structures, retirement plans, wealth protection, risk management, behavioral finance, psychology of investing. Prerequisites: 06F:100.

**06F:126 Real Estate Process** 3 s.h.

Fundamentals of real estate finance and investments; economic base analysis, asset analysis, market analysis, mortgage markets, underwriting, alternative mortgages, mortgage-backed securities, real estate securitization, land development, valuation principles, investment analysis, tax consideration, portfolio management. Prerequisites: 06F:100. Corequisites: 06F:110.

**06F:130 International Finance** 3 s.h.

International monetary systems, exchange rate determination, use of currency derivative in hedging and risk management, currency swaps, foreign direct investment, international corporate finance, international capital budgeting, international portfolio investment, Third World debt, privatization, joint ventures. Prerequisites: 06F:100. Corequisites: 06F:110.

**06F:190 Hawkinson Scholar Seminar** 1 s.h.

Advanced skill and understanding required for pursuit of investment banking, management consulting careers; specialized résumé and interview training, industry presentations, relevant case assignments. Repeatable.

**06F:191 Hawkinson Scholar Seminar: Topics in Finance** 0 s.h.

Subsectors in the financial services industry, including hedge funds, investment banking, commercial banking; valuation techniques used in real-world mergers, acquisitions, equity offerings, debt financing, and so forth.

**06F:195 Honors Thesis in Finance** 3 s.h.

Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: 06B:194 or 06E:194. Requirements: admission to the Tippie College of Business honors program.

**06F:199 Academic Internship** 1-3 s.h.

Professional internship experience with associated academic content. Repeatable.

**Primarily for Graduate Students**

**06F:201 Directed Readings in Finance-M.B.A.** arr.

**06F:205 Contemporary Topics in Finance** arr.

**06F:206 Financial Modeling and Firm Valuation** 3 s.h.

How to model firm value from a discounted cash flow perspective; identify a company's key value drivers, create spreadsheet valuation models; projected financial valuation integrates projected pro forma accounting statements; forecasting, free cash flow estimation, industry competitive analysis. Prerequisites: 06N:225.

**06F:207 Wealth Management** 3 s.h.

Rapid growth of the field of wealth management over several decades, driven by general increase in personal wealth and increased responsibility for individuals to manage their own wealth; knowledge and tools to enter the financial services industry; financial planning industry, client characteristics, tax shield structures, insurance, asset allocation plans, estate planning, behavioral finance. Prerequisites: 06N:225.

**06F:208 Structured Finance-Securitization** 3 s.h.

Design of debt, equity, and hybrid financing techniques to resolve issuer and investor problems that conventional methods cannot address; why and when corporations and financial institutions issue structured securities; how securities are designed and priced; how securities meet investors' needs; securitized assets, mortgages, asset-backed securities, collateralized debt obligations, credit risk, valuation, cost of capital; legal, tax, and regulatory issues; design and implementation of structured-financed products. Prerequisites: 06N:225.

**06F:210 Financial Information Technology**

1 s.h.

Applications of commonly used financial software and data systems reviewed by student teams.

**06F:212 Portfolio Management**

3 s.h.

Introduction to fundamental elements of modern portfolio theory, application to investment analysis; investment environment, instruments, types of investors; concepts of risk and return, broad perspective on historical risk and return of various asset classes; asset allocation decision, risk and return dynamics of a multiple securities portfolio; varied asset pricing models, how capital markets work for investors and users of capital. Prerequisites: 06N:225. Corequisites: 06F:210.

**06F:213 Derivatives**

3 s.h.

Examination of the wide range of derivative securities that cover the financial landscape; the market place, trading, and investors; different derivative securities in existence, their relationship with the underlying securities, and pricing; applications of derivative securities to risk management and speculation; application of principles to fixed income, international finance, real estate, and securitization. Prerequisites: 06N:225.

**06F:214 Real Estate Finance and Investments**

3 s.h.

In-depth understanding of concepts and techniques of real estate financial analysis, equity investment decision making; real estate investing from analysis of developments through the securitization of mortgages; mortgage markets and pricing, real estate finance and investments, mortgage-backed securities, development process, real estate valuation, tax effects, securitized real estate, real estate cycles, application of derivative instruments, strategic asset allocation. Prerequisites: 06N:225. Corequisites: 06F:210.

**06F:215 Corporate Investment and Financing Decisions**

3 s.h.

Underpinnings and optimization of corporations' investment and financing decisions; firm-wide and project-specific cost of capital, optimal capital structure decisions; in-depth capital budgeting methods, including real options techniques; corporate investment module of the class includes simulation analysis using Crystal Ball; cost of capital, valuation techniques, advanced capital budgeting, capital structure and dividend policy, option pricing models applied to corporate finance. Prerequisites: 06N:225. Corequisites: 06F:210.

**06F:216 Fixed Income Securities**

3 s.h.

Conceptual framework and tools to undertake the valuation of fixed income securities and the management of fixed income portfolios; varied fixed income instruments and the markets in which they trade; introduction to basic building blocks of fixed income analysis, including concepts of duration, convexity, and term structure of interest rates; application of concepts in bond portfolio immunization strategies; use of interest rate derivatives in portfolio hedging applications. Prerequisites: 06N:225. Corequisites: 06F:210.

**06F:217 Alternative Investments and Portfolio Strategies**

3 s.h.

Continuation of 06F:212; alternative investments, including hedge funds, private equity funds, and venture capital vehicles; purpose of alternative investments, including the risk/return profile of alternatives and correlations with traditional asset classes; specific hedge fund styles, strategies, risk profiles; portfolio strategy topics, including diversification benefits, management of downside risk, international diversification, behavioral finance, performance measures, and performance attribution analysis. Prerequisites: 06F:212 and 06N:225.

**06F:218 Corporate Financial Strategy**

3 s.h.

Major strategic decisions within the corporate form; risk management, including why firms engage in it, their methods for doing so, and exercises in the simulation of uncertainty; dividends and repurchases under the payout policy decision; corporate governance topics, including executive compensation, board structure, and institutional monitoring; merger and acquisitions analysis, including regulation, valuation, anti-takeover devices, payment method, and LBOs; divestitures and other restructuring topics, including corporate diversification, spin-offs, carve-outs, private workouts, and Chapter 11. Prerequisites: 06N:225. Corequisites: 06F:210.

**06F:219 Finance for Entrepreneurs**

3 s.h.

Understanding the process of capital acquisition and cash flow management; techniques, projections, and measurements used in valuing and funding new and growing ventures; sources and strategies for raising capital. Same as 06T:233.

**06F:220 Commercial and Investment Banking** 3 s.h.  
Overview of commercial and investment banks; principles of underwriting securities, IPOs, mergers and acquisitions, commercial lending, funding sources, asset liability management, capital management. Prerequisites: 06N:225. Corequisites: 06F:210.

**06F:221 Applied Securities Analysis - Henry Fund I** 3 s.h.  
Manage Henry Fund portfolio, learn legal environment in which the fund operates, analyze potential investments, implement controls to monitor the fund's performance; decisions and investment recommendations made by students; each student analyzes an economic sector and geographic region (i.e., utilities analyst and specialist in South East Asia); while the fund cannot currently invest directly in foreign listed stocks, it holds US listed stocks with significant overseas interests and students are able to invest in a number of ADR's. Prerequisites: 06N:225.

**06F:222 Applied Securities Analysis - Henry Fund II** 3 s.h.  
Continuation of 06F:221. Prerequisites: 06F:221 and 06N:225.

**06F:223 International Finance** 3 s.h.  
Introduction to structure and functioning of global financial markets; currency market, international equity markets; use of derivatives in currency risk management for corporate and investment needs; corporate investment decisions in an international context. Prerequisites: 06N:225. Corequisites: 06F:210.

**06F:224 Security Analysis** 3 s.h.  
Valuation of financial securities (primarily equities) using discounted cash flow model; industry, regulatory analysis; financial statement analysis; active portfolio management; value-based management techniques; valuation of firms outside the United States. Prerequisites: 06N:225.

**06F:225 Finance Theory I** 3 s.h.  
Consumption-based models of asset pricing; arbitrage, contingent claims; market efficiency and information economics, behavioral models; emphasis on theory. Requirements: Ph.D. enrollment.

**06F:226 Seminar in Corporate Finance** 3 s.h.  
Valuation (DCF and CAPM); valuation under certainty, uncertainty; financial structure, cost of capital; dividend policy; firm investment in perfect, imperfect capital markets. Requirements: Ph.D. enrollment.

**06F:227 Finance Theory II** 3 s.h.  
Continuous time theories of financial markets, including connection between an arbitrage-free pricing system and martingales; pricing of contingent claims, general equilibrium and term structure theory. Requirements: Ph.D. enrollment.

**06F:228 Advanced Empirical Finance** 3 s.h.  
Market efficiency and term structure theory tests; tests of asset pricing models, dividend policy and financial structure issues. Requirements: Ph.D. enrollment.

**06F:229 Seminar in Finance** 0 s.h.  
Requirements: Ph.D. enrollment.

**06F:230 Putting Finance into Practice** 3 s.h.  
Hands-on practical experience in corporate finance or investments; work in teams on a corporate finance project or an investment project for a corporate or institutional client; partner companies identify financial issues, challenges, and opportunities for students to help solve; students work with the companies and a faculty member to provide an analysis of the situation and proposals of actions to be taken. Prerequisites: 06N:225.

**06F:288 Directed Reading in Finance-Ph.D.** arr.  
Requirements: Ph.D. enrollment.

**06F:290 Thesis in Business** arr.

# International Business

**Coordinators:** Patricia Mason-Browne (Liberal Arts and Sciences), Andy Tinkham (Tippie College of Business)

**Undergraduate nondegree program:** Certificate in International Business

**Web site:** <http://tippie.uiowa.edu/undergraduate/programs/IBC.cfm>

The Tippie College of Business and the College of Liberal Arts and Sciences offer the undergraduate Certificate in International Business. The program is open to all University of Iowa undergraduate students and individuals who hold a bachelor's degree from The University of Iowa or another institution and are not enrolled in a graduate or professional program. See "Admission" at the end of this Catalog section.

## Certificate in International Business

The Certificate in International Business requires 29 s.h. and satisfaction of the certificate's foreign language requirement (required credit varies according to the language studied). The program is designed for undergraduate students who intend to pursue careers in international business as well as those interested in gaining a better understanding of the global economy and a broader awareness of the political, historical, and social environment in which international business operates.

The certificate program includes study of international business and economics, international relations and institutions, a foreign language, and the contemporary art, literature, culture, and/or politics of the related geographical area. The range of courses permits students to tailor areas of specialization suited to their individual interests and to complement majors in business and in liberal arts and sciences.

Students must maintain a g.p.a. of at least 2.00 on all certificate course work. Certificate courses may not be taken pass/nonpass. A course may not be used to satisfy more than one certificate requirement.

A minimum of 20 s.h. of certificate course work (other than language courses) must be completed at The University of Iowa or in approved study abroad programs. Students who want to use credit earned while studying abroad should consult an international business certificate advisor before leaving campus. University of Iowa Guided Independent Study (correspondence study) is accepted toward the certificate.

When students complete the certificate requirements and graduate, the Certificate in International Business is noted on their transcript. Contact the Tippie College of Business Undergraduate Program Office or the CLAS Academic Programs & Services office for more information.

The certificate requires course work in international business, international relations and institutions, foreign language, and area studies, as follows.

### INTERNATIONAL BUSINESS

These courses provide students with an essential understanding of economics, which is central to all business operation. They also help students develop knowledge of the functional areas of international business.

Both of these:

06E:001 Principles of Microeconomics	4 s.h.
06E:002 Principles of Macroeconomics	4 s.h.

Three of these (total of 9 s.h.):

06E:125 Global Economics and Business	3 s.h.
06E:129 Economic Growth and Development	3 s.h.
06E:173 International Economics	3 s.h.
06F:130 International Finance	3 s.h.
06J:146 International Business Environment	3 s.h.
06M:151 International Marketing	3 s.h.
091:282 International Business Transactions	3 s.h.
091:287 International Trade Law: Basic Norms and Regulations	3 s.h.

### INTERNATIONAL RELATIONS AND INSTITUTIONS

These courses familiarize students with comparative politics, social geography, foreign policy, and issues related to world population and the environment--topics relevant to decision making in the international business world.

Two of these (total of 6 s.h.):

16A:148 Race, Gender, U.S. International History	3 s.h.
16A:152 United States in World Affairs	3 s.h.
16W:138/152:138 History of Global Health	3 s.h.
16W:155 Europe and the U.S. in the Twentieth Century	3 s.h.
019:156 Comparative Communication Systems	3 s.h.
030:041 Introduction to the Politics of Russia and Eurasia	3 s.h.
030:043 Introduction to Politics in the Muslim World	3 s.h.
030:060 Introduction to International Relations	3 s.h.
030:061 Introduction to American Foreign Policy	3 s.h.
030:130 Consequences of War	3 s.h.
030:137 Introduction to Political Economy	3 s.h.
030:142 European Integration	3 s.h.
030:149 Problems in Comparative Politics	3 s.h.
030:150 Public Policy Around the World	3 s.h.
030:151 Political Leadership	3 s.h.
030:155 International Courts: The Intersection of Law and Politics	3 s.h.
030:156 Ethnic and Religious Conflict in the Muslim World	3 s.h.
030:160 Women and Politics in Global Perspective	3 s.h.
030:161 International Organization and World Order	3 s.h.
030:162 American Foreign Policies	3 s.h.
030:163 Chinese Foreign Policy	3 s.h.
030:165 International Conflict	3 s.h.
030:166 Global Communication and Politics	3 s.h.
030:167 Politics and the Multinational Enterprise	3 s.h.
030:168 Politics of Terrorism	3 s.h.
030:169 Problems of International Politics	3 s.h.
030:170 The Politics of International Economics	3 s.h.
030:173 State Failure in the Developing World	3 s.h.
030:177 Globalization	3 s.h.
030:178 Causes, Consequences, and Management of Civil War	3 s.h.
030:179 Human Rights and Asian Values	3 s.h.
034:159 Families in Comparative Perspective	3 s.h.
036:042/042:042/187:042 Intercultural Communication	3 s.h.
044:010 The Contemporary Global System	4 s.h.
044:011 Population Geography	3 s.h.
044:015 Introduction to Political Geography	3 s.h.
044:030 The Global Economy	3 s.h.
044:035 World Cities	3 s.h.
044:194 Geographic Perspectives on Development	3 s.h.
091:193 Human Rights in the World Community	3 s.h.
091:195 Introduction to Public International Law	3 s.h.
113:010 Anthropology and Contemporary World Problems	3 s.h.
113:104 Cultural Politics	3 s.h.
113:106 The Anthropology of War and Peace	3 s.h.
113:114 Environmentalisms	3 s.h.
113:116 Urban Anthropology	3 s.h.
113:134 Gender and Indian Diaspora	3 s.h.
113:143 Environment and Culture	3 s.h.
113:144 Culture and Consumption	3 s.h.

#### FOREIGN LANGUAGE

This component enables students to develop an intermediate level of competence in a second language. Through language study, students not only gain insight into the culture of another region of the world, they also develop a deeper understanding of their own language and culture.

Students must complete an approved foreign language sequence. For questions about languages not listed below or about study abroad course work, see an international business certificate advisor.

**Arabic**

All of these:

195:101 Elementary Modern Standard Arabic I	5 s.h.
195:102 Elementary Modern Standard Arabic II	5 s.h.
195:111 Intermediate Modern Standard Arabic I	5 s.h.
195:112 Intermediate Modern Standard Arabic II	5 s.h.

**Chinese**

All of these:

039:008-039:009 First-Year Chinese: First Semester - First-Year Chinese: Second Semester	10 s.h.
039:105-039:106 Second-Year Chinese: First Semester - Second-Year Chinese: Second Semester	10 s.h.

**French**

One of these sequences:

009:001-009:002 Elementary French I-II	10 s.h.
009:010 First-Year French Review	5 s.h.

All of these:

009:011-009:012 Intermediate French I-II	8 s.h.
One course for which 009:012 is prerequisite (may include Iowa Regents Program credit)	

**German**

One of these:

013:011-013:012 Elementary German I-II (both courses)	8 s.h.
013:014 First-Year German Review	5 s.h.

All of these:

013:021 Intermediate German I	4 s.h.
013:022 Intermediate German II	4 s.h.
One course for which 013:022 is prerequisite	

**Hindi**

039:123 First-Year Hindi: First Semester	5 s.h.
039:124 First-Year Hindi: Second Semester	5 s.h.
039:126 Second-Year Hindi: First Semester	4 s.h.
039:127 Second-Year Hindi: Second Semester	4 s.h.

**Italian**

One of these:

018:001-018:002 Elementary Italian-II (both courses)	10 s.h.
018:103 Intensive Elementary Italian	6 s.h.

All of these:

018:011-018:012 Intermediate Italian-II 8 s.h.  
One course for which 018:012 is prerequisite

### Japanese

One of these sequences:

39J:010-39J:012 First-Year Japanese: First Semester - First-Year Japanese: Second Semester 10 s.h.  
39J:011-39J:012 Elementary Japanese: Review - First-Year Japanese: Second Semester 8 s.h.

Both of these:

39J:101-39J:102 Second-Year Japanese: First Semester - Second-Year Japanese: Second Semester 10 s.h.

### Portuguese

One of these:

038:100-038:101 Accelerated Elementary Portuguese - Accelerated Intermediate Portuguese (both courses) 12 s.h.  
038:102 Portuguese for Spanish Speakers 3 s.h.

One course for which 038:101 or 038:102 is prerequisite

### Russian

All of these:

041:001-041:002 First-Year Russian I-II 8 s.h.  
041:003-041:004 Second-Year Russian I-II 8 s.h.

One course for which 041:004 is prerequisite

### Spanish

035:001-035:002 Elementary Spanish I-II (both courses) 10 s.h.

One of these:

035:011-035:012 Intermediate Spanish I-II (both courses) 10 s.h.  
035:013 Accelerated Intermediate Spanish 6 s.h.

One course for which 035:012 is prerequisite

### Swahili

All of these:

211:125-211:126 Elementary Swahili I-II 6-8 s.h.  
211:127-211:128 Intermediate Swahili I-II 6-8 s.h.

**AREA STUDIES**

These courses help students learn about the culture, contemporary history, art, literature, and politics of the geographic region in which their second language is spoken. They cover topics critical to understanding sociocultural influences on individuals with whom students share the world, and with whom they may conduct business.

Students complete 6 s.h. from one geographic area. The area should be appropriate to the language the student chooses for the language requirement.

**Asia**

Appropriate for these languages: Chinese, Hindi, or Japanese

01H:016/039:016 Asian Art and Culture	3 s.h.
01H:031/039:028 Introduction to the Art of China	3 s.h.
01H:033/39J:033 Introduction to the Art of Japan	3 s.h.
01H:119/039:159 Chinese Art and Culture	3 s.h.
01H:120/039:120 Chinese Painting I	3 s.h.

041:168/048:154 Twentieth-Century Czech Authors	3 s.h.
187:050 Introduction: East European and Central Asian Cultures	3 s.h.

### **Admission**

Undergraduate students pursuing a degree from The University of Iowa are eligible to work toward the Certificate in International Business. Students who already have earned a baccalaureate degree from The University of Iowa may return to complete or earn a certificate in international business if they are not enrolled in a graduate or professional program. Holders of baccalaureate degrees from other institutions who are not enrolled in a graduate or professional program may enroll at The University of Iowa to complete a Certificate in International Business. Contact the Office of Admissions.

Interested students must declare their intention to pursue the certificate with an international business certificate advisor and must submit a plan of study. Students admitted to the Tippie College of Business or advised at the college's Undergraduate Program Office should consult the advising staff in that office. Students in the College of

Liberal Arts and Sciences should consult an international business certificate advisor in the Academic Advising Center.

# Management and Organizations

**Chair:** Jay J. Christensen-Szalanski

**Professors:** Jay J. Christensen-Szalanski, Nancy R. Hauserman (Williams Teaching Professor), Amy L. Kristof-Brown (Henry B. Tippie Research Professor of Human Resource Management), Michael K. Mount (Henry B. Tippie Research Professor of Human Resource Management), Sara L. Rynes (John F. Murray Professor), Frank L. Schmidt (Gary C. Fethke Chair in Leadership), Greg L. Stewart (Henry B. Tippie Research Fellow)

## Undergraduate Program

The department offers a Bachelor of Business Administration in management.

### Bachelor of Business Administration

The Bachelor of Business Administration in management requires a minimum of 120 s.h., including 21 s.h. of work for the major. The program is designed to give students a thorough background in the department's study areas as well as an understanding of their application to real-life situations. Specific courses, research projects, and other experiences, such as simulations, are blended to include both theoretical and pragmatic aspects of the field.

All B.B.A. students in management choose one of three tracks: human resource management, leadership and management, or entrepreneurial management. The human resource management track covers business and employment law and prepares students to pursue careers in human resources or to earn a degree in law. The leadership and management track focuses on practical skills; it is best suited for students considering consulting or management careers. The entrepreneurial management track is intended for students who plan to start their own business or work in a small business. Each track provides a solid background in general management principles in addition to a specialized focus.

The major in management requires the following course work. For B.B.A. common requirements, see Bachelor of Business Administration in the Tippie College of Business section of the Catalog.

#### COMMON REQUIRED COURSES

Students in all tracks must complete the following three courses.

06J:130 Individuals, Teams, and Organizations	3 s.h.
06J:131 Strategic Human Resource Management	3 s.h.
06J:156 Dynamics of Negotiations	3 s.h.

#### HUMAN RESOURCE MANAGEMENT TRACK

Students in the human resource management track complete all of these:

06J:132 Law and Ethics in Management	3 s.h.
06J:160 Staffing and Talent Management	3 s.h.
06J:171 Performance Management and Reward Systems	3 s.h.

And 3 s.h. from these:

06J:145 Training and Developing Human Resources	3 s.h.
06J:146 International Business Environment	3 s.h.
06J:162 Leadership and Personal Development	3 s.h.
06T:150 Managing the Growth Business	3 s.h.
06T:192 Entrepreneurship: Business Consulting	3 s.h.

**LEADERSHIP AND MANAGEMENT TRACK**

Students in the leadership and management track complete all of these:

06J:132 Law and Ethics in Management	3 s.h.
06J:162 Leadership and Personal Development	3 s.h.
06J:167 Team and Project Management	3 s.h.

And 3 s.h. from these:

06J:125 Entrepreneurial Strategy	3 s.h.
06J:145 Training and Developing Human Resources	3 s.h.
06J:146 International Business Environment	3 s.h.
06J:147 Nonprofit Organizational Effectiveness I	3 s.h.
06J:160 Staffing and Talent Management	3 s.h.
06T:192 Entrepreneurship: Business Consulting	3 s.h.

**ENTREPRENEURIAL MANAGEMENT TRACK**

Students in the entrepreneurial management track complete all of these:

06J:125 Entrepreneurial Strategy	3 s.h.
06T:134 Entrepreneurial Marketing	3 s.h.
06T:150 Managing the Growth Business	3 s.h.

And 3 s.h. from these:

06T:191 Practicum in Entrepreneurship	3 s.h.
06T:192 Entrepreneurship: Business Consulting	3 s.h.
06T:194 Entrepreneurship: Advanced Business Planning	3 s.h.
06T:199 Academic Internship	arr.

**Graduate Programs**

The Department of Management and Organizations offers the Doctor of Philosophy in business administration. Ph.D. requirements are described under "Graduate Programs" in the Tippie College of Business section of the Catalog and on the Department of Management and Organizations web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., see Master of Business Administration Program in the Catalog or contact the Tippie School of Management.

**Management and Organizations Courses****Primarily for Upper-Division Undergraduates**

<b>06J:020 Career Preparation</b>	arr.
<b>06J:029 First-Year Seminar</b>	1 s.h.
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).	
<b>06J:047 Introduction to Law</b>	3 s.h.
General history, structure of law; law's action in guiding changing economic, social patterns. Requirements: sophomore standing.	
<b>06J:048 Introduction to Management</b>	3 s.h.

Principles of management, organizational structure, decision making, leadership, line-staff relationships, administration of organizations. Requirements: sophomore standing.

**06J:101 Directed Readings in Management and Organizations** arr.

**06J:125 Entrepreneurial Strategy** 3 s.h.

The synergistic effect of entrepreneurial attributes (e.g., innovation, creativity, opportunity recognition) and managerial attributes (e.g., strategic management, planning, budgeting) on profit and nonprofit organizations.

**06J:130 Individuals, Teams, and Organizations** 3 s.h.

Theories of organizational behavior applied to current business trends for individuals, teams, organizations; personality, managing diversity, work-family conflict, self-managed teams, charismatic leadership, work motivation, managing conflict, organizational culture. Prerequisites: 06J:047 and 06J:048.

**06J:131 Strategic Human Resource Management** 3 s.h.

People management activities, policies, and practices that promote effective organizations; how changes in technology, business restructuring, legal and social concerns, other issues affect human resource management. Prerequisites: 06J:047 and 06J:048.

**06J:132 Law and Ethics in Management** 3 s.h.

Laws affecting employers and employees, such as regulatory health and safety policies, unemployment and retirement benefits, and employment discrimination including hiring, termination, testing issues. Prerequisites: 06J:047 and 06J:048.

**06J:145 Training and Developing Human Resources** 3 s.h.

Concepts, practices in training and development; strategic issues affecting the design, implementation, and evaluation of training programs and of career management and organizational development activities. Prerequisites: 06J:130, 06J:131, and 06J:132.

**06J:146 International Business Environment** 3 s.h.

Differences in international and domestic business; cultural, legal, political factors for managers. Requirements: junior or higher standing.

**06J:147 Nonprofit Organizational Effectiveness I** 3 s.h.

Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 024:147, 032:127, 042:157, 06T:144, 096:168.

**06J:148 Nonprofit Organizational Effectiveness II** 3 s.h.

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Same as 024:148, 032:128, 042:158, 096:169.

**06J:156 Dynamics of Negotiations** 3 s.h.

Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Requirements: senior standing.

**06J:159 Introduction to the U.S. Health Care System** 3 s.h.

The U.S. health care system; socioeconomic, political, and environmental forces that influence the organization, financing, and delivery of personal and public health services; health services, policy, concepts, terminology. Same as 174:102.

**06J:160 Staffing and Talent Management** 3 s.h.

Staffing processes; external influences such as labor markets, the legal environment; support activities such as job analysis, employment planning; staffing activities such as internal and external recruiting, selection. Prerequisites: 06J:130, 06J:131, and 06J:132.

**06J:162 Leadership and Personal Development** 3 s.h.

Practical development and application of leadership and managerial skills to enhance individual and organizational effectiveness. Prerequisites: 06J:130 and 06J:131. Requirements: senior standing.

**06J:167 Team and Project Management** 3 s.h.

Fundamentals of managing teams and group projects; emphasis on practical application, using case studies, and interactive and experiential exercises. Prerequisites: 06J:130, 06J:131, and 06J:132.

**06J:168 Topics in Management** 3 s.h.

Topics not regularly offered in other courses. Prerequisites: 06J:047 and 06J:048.

**06J:171 Performance Management and Reward Systems** 3 s.h.

Role of pay and other rewards on organizational objectives; compensation's impact on employee behavior and performance; mix of pay and benefits in compensation systems; legal environment regulating pay and benefits; nonmonetary forms of reward. Prerequisites: 06J:131.

**06J:195 Honors Thesis in Management and Organizations** 3 s.h.

Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: 06B:194 or 06E:194. Requirements: admission to the Tippie College of Business honors program.

**06J:199 Academic Internship** arr.

Professional internship experience with associated academic content. Repeatable.

## Primarily for Graduate Students

**06J:201 Directed Readings in Management and Organizations** arr.

**06J:202 M.A. Research Report** 1 s.h.

Requirements: nonthesis M.A. enrollment.

**06J:205 Contemporary Topics in Management and Organizations** arr.

Research topics in human resources and organizational behavior.

**06J:227 Human Resource Management** 3 s.h.

Systematic approach to managing human resources through practices consistent with validated theories and empirical research; human resources practices and business strategies; human resources strategy, recruitment and selection, training and development, employment law, international human resources, career management, compensation. Requirements: graduate standing.

**06J:232 Legal Environment of Business** 3 s.h.

Legal issues surrounding start-up and day-to-day management of a business; contract law, standard business formations, tort law, employment law, business ethics, alternative dispute resolution. Prerequisites: 06N:212.

**06J:235 Maximizing Team Performance** 3 s.h.

Current approaches to implementing effective teams within organizations; team selection and formation, group dynamics, facilitation skills, performance and obstacle management.

**06J:242 Managing and Preventing Conflict** 3 s.h.

Skills for management of high-conflict situations in the workplace and for long-term business success and job satisfaction; experience developing mediation-based skills and communication techniques to prevent and resolve workplace conflicts.

**06J:244 Managing Organizational Performance** 3 s.h.

Concepts and practices for effective management, measurement, and improvement of organizational performance; establishing and communicating organizational expectations, the manager as coach and motivator, measurement and methodologies, performance improvement methods. Requirements: 06N:212 or a management course.

**06J:245 Strategic Employee Development** 3 s.h.

Concepts, practices in training and development; strategic issues affecting the design, implementation, and evaluation of training programs and of career management and organizational development activities. Prerequisites: 06N:212.

**06J:246 International Management** 3 s.h.

Management issues encountered in international business settings; assessing international politico-economic and sociocultural environments; managing a multicultural workforce; forming international structures and alliances; developing international business strategy.

**06J:247 Nonprofit Organizational Effectiveness I** 3 s.h.

Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 021:263, 024:247, 028:257, 032:227, 042:247, 091:320, 102:278, 174:247.

**06J:248 Nonprofit Organizational Effectiveness II** 3 s.h.

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: (for 091:322) 091:320; (for 174:248) 06J:247 or 024:247 or 174:247. Same as 021:265, 024:248, 028:258, 032:228, 042:248, 091:322, 102:279, 174:248.

**06J:256 Dynamics of Negotiations** 3 s.h.

Predictable aspects and dynamics of bargaining experiences; simulations, experiential exercises to foster skills needed for effective negotiation in almost any situation. Requirements: M.B.A. enrollment.

**06J:257 Legal Issues in Human Resources Management** 3 s.h.

Laws, regulations governing human resource management policies, practices; employee discipline, termination, layoffs, privacy, involvement programs; occupational safety and health; workers' compensation; discrimination. Prerequisites: 06N:212.

**06J:261 Motivating Employees in Changing Environment** 3 s.h.

Contemporary motivation theories and their application; role of intrinsic motivation, justice, incentive pay, job design, goals, feedback, social influence, attitudes, creativity. Prerequisites: 06N:212 and 06N:227.

**06J:262 Leadership and Personal Development** 3 s.h.

Major theories; determinants of leader effectiveness, personal and career success; practical development of leadership, managerial skills to enhance individual, organizational effectiveness. Prerequisites: 06N:212.

**06J:263 Strategic Management of Change** 3 s.h.

How congruence in organizational strategy, structure and culture, job design, and employee characteristics produces effective organizations; emphasis on managing organizational change, implementing and working in teams, project management. Prerequisites: 06N:212.

**06J:265 Methods for Qualitative Research** 2 s.h.

Qualitative methods available to researchers; role and contributions of qualitative methods in research; reasons why qualitative research papers get rejected by journals and strategies to avoiding them; work with qualitative data; philosophy of science, formulating research questions, sampling and gaining access, alternative qualitative data collection methods, ways of coding and analyzing qualitative data, building theory from qualitative data.

**06J:266 Methods for Experimental Research** 2 s.h.

Research and principles of experimental design, including heterogeneity of variance, analysis of variance (ANOVA), multi-attribute analysis of variance (MANOVA); orthogonal, planned and unplanned comparisons, factorial experiments, including policy capturing designs, repeated measures and nested-factors design, Latin square designs; data sets with SPSS.

**06J:267 Organizational Theory Ph.D.** 2 s.h.

Organizational theory; effect of changing environment and technological factors on organizational structure and effectiveness; resource dependency and power, conflict, interorganizational network, population ecology, economic theories of organization, institutional theory.

**06J:268 Seminar in Management** 3 s.h.

Topics vary.

- 06J:269 Meta-Analysis in Behavioral Social Sciences (Ph.D.)** 3 s.h.  
Methods for quantitative integration of findings in behavioral and social sciences; overall effect size or correlation, whether conflicting findings documented in research literature are due to moderators (interactions) or statistical and measurement artifacts.
- 06J:270 Methods for Field Research (Ph.D.)** 2 s.h.  
Methods commonly used in behavioral research; critical evaluation of research; research process from idea generation to publication; practice in generating hypotheses, drafting surveys, analyzing data, reviewing manuscripts.
- 06J:271 Performance Management** 2 s.h.  
Theories and research pertaining to employee work performance and evaluation; conceptual definitions of work performance; theories concerning the determinants of work performance; theory and research explaining the effectiveness and biases of performance evaluation systems; theories and empirical research on performance feedback; areas for future theoretical and empirical investigation in performance management.
- 06J:272 Training and Careers (Ph.D.)** 2 s.h.  
Research-based examination of training and development programs; emphasis on societal, legal, organizational factors that affect training program design, implementation, evaluation; systemic relationships among training, careers, organizational development management.
- 06J:273 Measurement Theory and Methods in the Behavioral and Social Sciences (Ph.D.)** 3 s.h.  
Classical measurement theory, methods applied to psychological tests, questionnaires, ratings of work-related and other performances, behaviors; reliability theory and methods, instrument construction and item analysis, criterion construction, validity, combining and weighting instruments, cross-validation. Requirements: basic statistical methods course.
- 06J:274 Staffing Organizations (Ph.D.)** 3 s.h.  
Aspects of selection, including professional and legal standards, job analysis techniques, validation strategies, criterion development, selection techniques (e.g., psychological tests, interviews, biographical data, assessment centers), ethical issues.
- 06J:275 Group Processes and Conflict (Ph.D.)** 2 s.h.  
Understanding and implementing work groups in organizations; social influence and group processes, including communications, conflict, intergroup relations.
- 06J:276 Leadership (Ph.D.)** 3 s.h.  
Understanding and implementing leadership in organizations; focus on reading and analysis of basic research-related leadership theories; "great person" theories in contrast to traditional behavioral and situational theories.
- 06J:277 Motivation and Attitudes (Ph.D.)** 3 s.h.  
Motivational processes, attitudes, communication and interorganizational networks; emphasis on motivational antecedents and consequences, theoretical implications for models of work performance.
- 06J:278 Reward Systems (Ph.D.)** 2 s.h.  
Compensation systems, government influences, equity in compensation and individual wage determination; research-based examination of performance evaluation and appraisal, theories of work performance.
- 06J:279 Individual Differences in Traits/Abilities (Ph.D.)** 3 s.h.  
Research on individual and group differences in intelligence, personality, interests, values, other traits; findings related to performance in work world.
- 06J:290 Thesis in Management and Organizations** arr.
- 06J:295 Mentored Research** arr.  
Management research conducted by doctoral students under faculty supervision; culminates in second-year research paper.

## Management Sciences

**Chair:** Kurt M. Anstreicher

**Professors:** Kurt M. Anstreicher (Henry B. Tippie Research Professor of Management Sciences), Warren J. Boe (Charles A. Taff Research Fellow), Gary C. Fethke (Leonard A. Hadley Professor of Leadership), Philip C. Jones (Clement T. and Sylvia H. Hanson Chair in Manufacturing Productivity), Johannes Ledolter (C. Maxwell Stanley Professor of International Operations Management), Timothy J. Lowe (Chester A. Phillips Professor of Operations Management), Padmini Srinivasan (Henry B. Tippie Research Fellow), W. Nick Street (Henry B. Tippie Research Fellow),

**Professors emeriti:** Colin E. Bell, Raj Jagannathan, Kenneth Kortanek

**Associate professors:** Samuel Burer (Martha and Dennis Hesse Research Fellow), Ann M. Campbell (Martha and Dennis Hesse Research Fellow), Renato E. de Matta (Henry B. Tippie Research Fellow), Jeffrey W. Ohlmann, Barrett W. Thomas

**Associate professor emerita:** Eleanor M. Birch

**Assistant professor:** Faiz Currim

**Lecturers:** Michael Colbert, Kevin Felker, Yvonne Galusha

**Undergraduate degree:** B.B.A. in Management Information Systems

**Graduate degrees:** M.B.A.; Ph.D. in Business Administration

**Web site:** <http://www.tippie.uiowa.edu/management-sciences/>

The Department of Management Sciences specializes in using advanced computation and mathematical techniques to solve critical business problems. Its research and instruction strengths include operations management, information systems, and quantitative methods.

## Undergraduate Program

The department offers a Bachelor of Business Administration in management information systems.

### Bachelor of Business Administration

The Bachelor of Business Administration in management information systems requires a minimum of 120 s.h., including 22 s.h. of work for the major. The program provides a variety of educational experiences that develop students' knowledge of managerial decision-making systems. Students acquire skill in applying this knowledge by constructing quantitative models, using computer technology, and creating database systems.

Students majoring in management information systems prepare for career opportunities in both manufacturing and service organizations. Graduates find entry-level work as computer programmers, systems analysts, sales representatives with computer companies, and management trainees. Entry-level work in operations management is found in materials management, line supervision, purchasing, and manufacturing systems.

Requirements for the management information systems major are as follows. For B.B.A. common requirements, see Bachelor of Business Administration in the Tippie College of Business section of the Catalog.

06K:126 Visual Basic Programming	3 s.h.
06K:182 Applications Database Management Systems	3 s.h.
06K:183 Systems Analysis and Design	3 s.h.
06K:184 Introduction to Data Communications	3 s.h.
06K:185 MIS Capstone Project	3 s.h.
22C:016 Computer Science I: Fundamentals	4 s.h.
One additional course from approved list of management sciences courses	3 s.h.

## Graduate Programs

The Department of Management Sciences offers the Doctor of Philosophy in business administration. Ph.D. requirements are described under "Graduate Programs" in the Tippie College of Business section of the Catalog and on the Department of Management Sciences web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., see Master of Business Administration Program in the Catalog or contact the Tippie School of Management.

## Management Sciences Courses

### Primarily for Undergraduates

#### 06K:029 First-Year Seminar

1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

**06K:070 Computer Analysis**

3 s.h.

The computer and its uses in organization operation, management; computer systems terminology, programming, management information systems, use of applications software.

**For Undergraduate and Graduate Students****06K:100 Operations Management**

3 s.h.

Strategic, tactical, operational issues that arise in management of production and service operations; product and process design, facilities planning, quality management, materials management, operations planning and scheduling, emerging technologies in production and service management. Prerequisites: 22S:008. Corequisites: 06K:070, if not taken as a prerequisite. Requirements: junior standing.

**06K:101 Directed Readings**

arr.

**06K:126 Visual Basic Programming**

3 s.h.

Introduction to programming using Visual Basic. Prerequisites: 06K:070 or 06K:170.

**06K:128 Web and Multimedia**

3 s.h.

How multimedia tech is accomplished; tools used with each tech and modifications needed to function efficiently on the web; projects culminating in a web site.

**06K:170 Advanced Computer Analysis**

3 s.h.

Advanced spreadsheet and database application for decision analysis with macro coding and exploration of Web 2.0 technologies.

**06K:176 Managerial Decision Models**

3 s.h.

Mathematical programming, including linear, nonlinear, and dynamic programming, with applications in economics and management; classical optimization techniques, transportation, network flow problems.

**06K:177 Management Sciences Topics**

arr.

Special topics in management sciences and information systems.

**06K:180 Applied Information Systems**

3 s.h.

Application of computer technology to accounting and transaction processing systems; information systems infrastructure and trends; problem solving with microcomputer spreadsheets, databases; accounting cycle operations using accounting software. Prerequisites: 06A:001, 06A:002, and 06K:070 or 06K:170.

**06K:182 Applications Database Management Systems**

3 s.h.

Design and implementation of a database using relational DBMS; emphasis on issues of logical and physical design, database administration, concurrency control, maintenance. Prerequisites: 06K:070 or 06K:170.

**06K:183 Systems Analysis and Design**

3 s.h.

Design and implementation of an information system; student projects in determination of information needs, system design, information plan development; construction of prototype information system. Prerequisites: 06K:126. Corequisites: 06K:182, if not taken as a prerequisite.

**06K:184 Introduction to Data Communications**

3 s.h.

Computer communications: computer-communication system, hardware, data transmission principles; examples of existing communication networks; related managerial issues. Prerequisites: 06K:070 or 06K:170.

**06K:185 MIS Capstone Project**

3 s.h.

Individual or team senior project incorporating knowledge and skills from management information science curriculum; projects from real-world customer, such as a software system, security system, or network design; outcomes including written documentation, presentation, project report. Prerequisites: 06K:183. Corequisites: 06K:184, if not taken as a prerequisite. Requirements: completion of 90 s.h.

**06K:186 Database Management II**

3 s.h.

Advanced conceptual and logical design, in-depth SQL, DB administration, concurrency control, web database access; theory and practice. Prerequisites: 06K:182.

**06K:188 Computer and Network Security** 3 s.h.  
Network-based attacks and how to respond to them; access control, authentication methods, encryption, Public Key Infrastructure, operating system hardening, security policy practices. Prerequisites: 06K:184.

**06K:189 E-Commerce Technology** 3 s.h.  
Technical tools for building e-commerce web sites; Dot Net versions of active server pages, VB, C#; student project to build prototype of an e-commerce site. Prerequisites: 06K:070 or 06K:170.

**06K:190 Network Design and Performance** 3 s.h.  
Computer software as central to the study of network facilities selection, performance metrics; skill development through work with the telecommunications hierarchy's layered structure. Prerequisites: 06K:184.

**06K:192 Supply Chain Management** 3 s.h.  
Key issues in design and management of global supply chains; issues in integration of business processes across organizations that are concerned with movement of goods, delivery of services, and information flow along the supply chain in order to create value for the customer; issues in coordinating production and logistics within a firm and with outside suppliers and customers in the supply chain. Prerequisites: 06K:100.

**06K:195 Honors Thesis in Management Sciences** 3 s.h.  
Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: 06B:194 or 06E:194. Requirements: admission to the Tippie College of Business honors program.

**06K:199 Academic Internship** arr.  
Professional internship experience with associated academic content. Repeatable.

## Primarily for Graduate Students

**06K:201 Directed Readings** arr.

**06K:217 Data and Decisions II** 3 s.h.  
Advanced quantitative analysis techniques with management applications; multiple regression, time series, monte-carlo simulation, and linear, nonlinear, and discrete optimization; emphasis on spreadsheet-based modeling. Prerequisites: 06N:216.

**06K:218 Statistical Methods for Process Improvement** 3 s.h.  
Strategies to improve quality of products, effectiveness of processes; managerial issues, statistical methods, quality, customer needs, customer satisfaction, quality measures and standards; understanding and reducing variability; builds on 06N:216 (Data and Decisions); data-based management, statistical process control, control charts, capability indexes, design of experiments. Prerequisites: 06N:216.

**06K:220 Introduction to Information Systems** 3 s.h.  
Effective ways for business firms to harness the power of information technology for strategic purposes; conventional and emerging architectures of information systems; integrated perspective on structural relationships among IT components; emphasis on case studies.

**06K:223 Management of E-Commerce Systems** 3 s.h.  
Benefits, capabilities, and related information technologies that compose the current state of electronic commerce; how to design, develop, and operate electronic commerce transaction processing-based applications; focus on web-based e-commerce systems and associated business models.

**06K:226 Visual Basic Programming** 3 s.h.  
Introduction to programming using Visual Basic. Corequisites: 06K:070.

**06K:227 Introduction to Modeling with VBA** 3 s.h.

Introduction to programming Visual Basic for Applications in Excel; case studies in finance, marketing, operations, accounting. Prerequisites: 06N:216.

**06K:228 Web and Multimedia** 3 s.h.

How multimedia tech is accomplished; tools used with each tech and modifications for efficient function on the web; projects culminating in a web site. Prerequisites: 06K:070.

**06K:230 Database Systems** 3 s.h.

Theories and methodologies for semantic, logical, and physical database design; entity/relationship diagrams and their mapping to database schemas; normalization; languages for relational database systems, including relational algebra, Structured Query Language, query by example; query optimization and index selection; database and view creation, query and update processing; form and report design; practice with commercial DBMS products; integrity, security, concurrency control, transaction recovery.

**06K:234 Information and Knowledge Management** 3 s.h.

How organizations acquire, manage, and use information; knowledge management and competitive intelligence, information from inside and outside the organization; organization types, including library, corporate, and nonprofit. Corequisites: 06K:230. Same as 021:234.

**06K:235 Strategic Information Technology** arr.

Impact of emerging technology, especially information technology, on a modern business; solving business problems using the intersection of innovation and emerging technology; impact of near-term technology advances (such as e-commerce tools, personal digital devices and integrated business systems); potential impact of emerging technologies which will significantly impact the business world in the near future; highly interactive course includes lecture, readings, case studies, and guest speakers.

**06K:272 Database Analysis and Design** 3 s.h.

Advanced topics in database management systems.

**06K:275 Knowledge Discovery** 3 s.h.

Knowledge discovery process, including data reduction, cleansing, transformation; advanced modeling techniques from classification, prediction, clustering, association; evaluation and integration. Same as 22C:141.

**06K:277 Management Sciences Topics** 3 s.h.

**06K:278 Web Mining** 3 s.h.

Techniques for mining the web and other unstructured or semistructured, hypertextual, distributed information repositories; crawling, indexing, ranking, filtering algorithms.

**06K:285 Project Management** 3 s.h.

Preparation for managing projects and project portfolios; project selection, project planning and budgeting, scheduling, resource allocation, project control; integration of project planning tools, including project management software.

**06K:286 Linear Programming** 3 s.h.

Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as 056:270.

**06K:287 Discrete Optimization** 3 s.h.

Introduction to modeling and solving discrete optimization problems; integer programming, network flows, dynamic programming. Prerequisites: 06K:286.

**06K:288 Computer and Network Security** 3 s.h.

Network-based attacks and how to respond to them; access control, authentication methods, encryption, Public Key Infrastructure, operating system hardening, security policy practices.

**06K:289 E-Commerce Technology** 3 s.h.

Technical tools for building e-commerce web sites; Dot Net versions of active server pages, VB, C#; student project to build prototype of an e-commerce site.

**06K:290 Thesis in Management Sciences**

arr.

Requirements: Ph.D. enrollment.

**06K:291 Lean Enterprise**

3 s.h.

How organizations transform themselves into Lean enterprises that maximize customer value through the elimination of waste; focus on how manufacturing and service organizations successfully align their process improvement efforts to strategic goals of the organization (policy deployment); A3 thinking, strategic planning, balanced scorecard, Lean supply chain, employee engagement, and cultural transformation. Prerequisites: 06N:229.

**06K:292 Supply Chain Management**

3 s.h.

Design, operation, and management of a supply chain; supplier and customer contracting and partnering, inventory, transportation and logistics. Prerequisites: 06N:229.

**06K:293 Seminar in Lean Practices**

3 s.h.

Lean principles across the enterprise; real-world applications in manufacturing and service sectors; taught in conjunction with LAI Lean Academy.

**06K:294 Rapid Continuous Improvement**

3 s.h.

Hands-on experience working on rapid continuous improvement (RCI) teams sponsored by industrial affiliates of the business college involved in using RCI. Offered spring break.

**06K:295 Field Studies in Operations Management**

3 s.h.

Supervised study of operations systems in field settings; problem formulation, identification of process improvements, communication of results to client organizations. Prerequisites: 06N:229.

**06K:296 Six Sigma Project**

3 s.h.

Apply theory from the classroom into the real world; use classroom learning from 06K:218 to work on a company-sponsored Six Sigma style project, which helps complete the requirements for Six Sigma Green Belt certification. Prerequisites: 06K:218.

**06K:297 Research Seminar in Management Sciences**

0 s.h.

Current research topics. Requirements: Ph.D. enrollment.

**06K:299 Special Topics in Management Sciences**

arr.

## Marketing

**Chair:** Gary J. Russell

**Professors:** Catherine A. Cole (Henry B. Tippie Research Fellow), Gary J. Gaeth (Cedar Rapids Area Business Chair), Thomas S. Gruca (Henry B. Tippie Research Professor of Marketing), Irwin P. Levin (Ray Shearman Research Fellow), Gary J. Russell (Henry B. Tippie Research Professor of Marketing)

**Professors emeriti:** Carol C. Fethke, Peter C. Riesz, Randall L. Schultz, Doyle L. Weiss

**Associate professors:** John P. Murry, Dhananjay Nayakankuppam (Henry B. Tippie Research Fellow), Lopo L. Rego (Gary C. Fethke Research Fellow)

**Associate professor emeritus:** E. John Kottman

**Assistant professors:** Sheila Goins, William Hedgcock, Jing (Alice) Wang, Nara Youn, Qin Zhang

**Lecturers:** David E. Collins, Francis C. Rydzewski

**Undergraduate degree:** B.B.A. in Marketing

**Graduate degrees:** M.B.A.; Ph.D. in Business Administration

**Web site:** <http://tippie.uiowa.edu/marketing/>

The Department of Marketing offers programs that follow business trends and lead business practice.

## Undergraduate Program

The department offers a Bachelor of Business Administration in marketing.

### Bachelor of Business Administration

The Bachelor of Business Administration in marketing requires a minimum of 120 s.h., including 17 s.h. of work for the major. The program is designed to provide undergraduate students with an understanding of the business, social, and economic roles of marketing and to prepare them for marketing careers.

Several decades ago, the study of marketing dealt almost exclusively with business activities involved in the flow of goods from production to consumption. Today it includes principles that are more widely applicable; they are as relevant to the success of arts, sports, and social programs as they are to firms selling goods and services. A major in marketing includes study in the behavioral sciences, communications, statistical analysis, and computer methods as well as marketing decision making.

Graduates find employment opportunities as market analysts, merchandise managers, buyers, purchasing agents, advertising managers, brand managers, and sales representatives in a variety of profit and nonprofit organizations.

Requirements for the marketing major are as follows. For B.B.A. common requirements, see Bachelor of Business Administration in the Tippie College of Business section of the Catalog.

06M:102 Professional Preparation in Marketing	2 s.h.
06M:134 Marketing Research	3 s.h.
06M:135 Consumer Behavior	3 s.h.
06M:147 Marketing Management (must be taken in senior year)	3 s.h.

Two of these:

06M:105 Web Business Strategy	3 s.h.
06M:107 Retail Strategies	3 s.h.
06M:125 Direct Marketing Strategies	3 s.h.
06M:137 Advertising Theory	3 s.h.
06M:139 Sales Management	3 s.h.
06M:151 International Marketing	3 s.h.
06M:190 Contemporary Topics in Marketing (counts once toward the major)	3 s.h.
06M:192 Marketing Institute Field Studies	3 s.h.
06M:197 Field Studies in Marketing	3 s.h.

## Graduate Programs

The Department of Marketing offers a Doctor of Philosophy in business administration. Ph.D. requirements are described under "Graduate Programs" in the Tippie College of Business section of the Catalog and on the Department of Marketing web site.

The Master of Arts in business administration is a nonthesis degree awarded only to students who begin the Ph.D. program and decide not to continue. Incoming students may not elect to pursue the M.A.

For information about the M.B.A., see Master of Business Administration Program in the Catalog or contact the Tippie School of Management.

## Marketing Courses

### Primarily for Upper-Division Undergraduates

**06M:029 First-Year Seminar** 1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities).

**06M:100 Introduction to Marketing Strategy** 3 s.h.  
Philosophy and activities of marketing; marketing environment of an organization; strategies with respect to marketing decisions, buyer behavior; spreadsheet analysis of marketing problems. Prerequisites: 06E:001. Requirements: junior standing.

### For Undergraduate and Graduate Students

**06M:101 Directed Readings in Marketing** arr.

**06M:102 Professional Preparation in Marketing** 2 s.h.  
Overview of marketing careers; how marketing strategies are developed, evaluated, and implemented; how research on buyer behavior is used in marketing decisions; identification of research methodologies, analytical tools, and technologies for addressing marketing problems; marketing's relationship to other business and organizational functions and to the external environment. Prerequisites: 06M:100.

**06M:105 Web Business Strategy** 3 s.h.  
Introduction to World Wide Web business and marketing; concepts, methods, and applications associated with doing business on the web; web page construction and design; case studies and/or entrepreneurial projects. Prerequisites: 06M:100.

**06M:107 Retail Strategies** 3 s.h.  
Strategies for retail site selection, store design, supply chain management, customer relationship management/customer service; merchandising management strategies for planning merchandise assortments, buying systems, buying merchandise, pricing, promotion. Prerequisites: 06M:100.

**06M:125 Direct Marketing Strategies** 3 s.h.  
Principles and processes of direct and database marketing; insight into the requirements for building a customer-based marketing strategy. Prerequisites: 06M:100.

**06M:134 Marketing Research** 3 s.h.  
Marketing, research methods; role of marketing research information as a tool in management decision making. Prerequisites: 06E:071 and 06M:100.

**06M:135 Consumer Behavior** 3 s.h.  
Behavioral and social aspects of marketing; research methods and findings from behavioral sciences, their relation to production, consumption, and marketing of products, services. Prerequisites: 06M:100.

**06M:137 Advertising Theory** 3 s.h.  
Advertising as a promotional force; emphasis on theory, planning, resulting strategic and tactical decisions made by advertising executives. Prerequisites: 06M:100.

**06M:139 Sales Management** 3 s.h.  
Personal selling, management of sales force; emphasis on recruitment, selection, training of sales representatives; problems in allocation of sales effort, supervision, control. Prerequisites: 06M:100.

**06M:147 Marketing Management** 3 s.h.  
Marketing problems of organizations; emphasis on marketing manager's role in developing, presenting goal-oriented marketing strategies; application of marketing concepts to real business situations. Prerequisites: 06M:100, 06M:134, and 06M:135. Requirements: marketing elective numbered above 100 and senior standing.

**06M:151 International Marketing**

3 s.h.

Differences in global environment: how cultural considerations, political, legal, and economic conditions affect market entry strategies and marketing mix decisions; development of marketing plan for non-U.S. environments. Prerequisites: 06M:100.

**06M:190 Contemporary Topics in Marketing**

3 s.h.

Topics not regularly offered in other courses. Prerequisites: 06M:100.

**06M:191 Marketing Institute Seminar I**

1 s.h.

Soft skills and professional expertise to succeed in marketing and consulting careers; resume and interview training, industry presentations, business case assignments, lectures. Prerequisites: 06M:100. Requirements: admission to the Marketing Institute.

**06M:192 Marketing Institute Field Studies**

3 s.h.

Plan, design, carry out, and report on a marketing research project for a profit or nonprofit client organization; communicate with managers, apply knowledge of marketing research, meet deadlines, and convert research findings into actionable recommendations for management. Prerequisites: 06M:100 and 06M:191. Requirements: admission to the Marketing Institute.

**06M:193 Marketing Institute Seminar II**

0 s.h.

Develop soft skills and professional expertise to succeed in marketing and consulting careers; résumé and interview training, industry presentations, business case assignments, lectures; mentor students scheduled for 06M:191. Prerequisites: 06M:100, 06M:191, and 06M:192. Requirements: admission to the Marketing Institute.

**06M:195 Honors Thesis in Marketing**

3 s.h.

Independent student project directed by faculty or staff advisor; culminates in thesis that conforms to University Honors Program guidelines; may include empirical research, library research, applied projects. Prerequisites: 06B:194 or 06E:194. Requirements: admission to the Tippie College of Business honors program.

**06M:197 Field Studies in Marketing**

3 s.h.

Experience in planning, designing, carrying out, reporting on a marketing research project for a profit or nonprofit client organization; communication with managers, application of marketing research, meeting deadlines, converting research findings into action recommendations for management. Prerequisites: 06M:100 and 06M:134.

**06M:199 Academic Internship**

arr.

Professional internship experience with associated academic content. Repeatable.

**Primarily for Graduate Students****06M:201 Directed Readings in Marketing**

arr.

**06M:205 Web Business Strategy**

3 s.h.

Introduction to World Wide Web business and marketing; concepts, methods, and applications associated with doing business on the web; web page construction and design; case studies and/or entrepreneurial projects. Prerequisites: 06N:211.

**06M:223 Brand Management**

3 s.h.

Strategies for building, leveraging, and defending brands; principles of consumer behavior, how they relate to building brand identity and equity; branding of consumer goods and services. Prerequisites: 06N:211.

**06M:225 Direct Marketing Strategies**

3 s.h.

Principles and processes of direct and database marketing; insight into requirements for building a customer-based marketing strategy. Prerequisites: 06N:211.

**06M:227 Category Management**

3 s.h.

Marketing strategy related to manufacturing product line interactions, retailer product assortment, consumer response; category definition, product line pricing and branding, cross-category promotions, channel coordination, efficient consumer response, loyalty programs, database marketing. Prerequisites: 06N:211.

- 06M:228 Cases in Marketing Strategy** 3 s.h.  
Topics from marketing cases not covered in other marketing electives. Prerequisites: 06N:211.
- 06M:229 Customer Relationship Management** 3 s.h.  
Analytical approaches to customer relationship management; issues, techniques and terminology associated with database marketing and data mining; analysis of customer databases; assessing lifetime valuation (LTV) of customers, identifying "high potential" customers, estimating return on marketing investment, building predictive models to estimate the probability of response to a marketing campaign. Prerequisites: 06N:211.
- 06M:230 Marketing Research Methods** 3 s.h.  
Managerial applications of marketing research techniques, including methods of design, analysis, interpretation of marketing research studies; assessing value of information, sampling, sources of bias, instrument construction, interpretation of scanner data, geodemographic data, applications of integrated research systems. Prerequisites: 06N:211 and 06N:216.
- 06M:231 Business to Business Marketing** 3 s.h.  
Industrial buyer behavior, buyer-seller relationships, interactive product policy and market segmentation, distribution and selling systems; skill development in market strategy formulation for industrial products and services, and in solving problems and making decisions about industrial marketing. Prerequisites: 06N:211.
- 06M:232 Buyer Behavior** 3 s.h.  
Behavior of consumers and industrial buyers; research methods and findings from behavioral sciences applied to production, consumption, and marketing of products and services; application of consumer behavior concepts to managerial decision making. Prerequisites: 06N:211.
- 06M:233 Service Marketing** 3 s.h.  
Production, consumption, and marketing of services; solutions to problems faced by service managers; development of an organizational marketing system for delivery of quality service. Prerequisites: 06N:211.
- 06M:234 Product Management** 3 s.h.  
Techniques of new product development; idea generation, concept screening, product design, market testing, forecasting, brand management strategies within the firm. Prerequisites: 06N:211 and 06N:216.
- 06M:235 International Marketing** 3 s.h.  
Domestic versus international perspective; identification and evaluation of opportunities and risks in non-U.S. markets; research problems in global markets; effects of international organizations, foreign exchange, macroeconomic policies, local law, and cultural differences on consumer behavior and marketing decisions; multinational versus global marketing strategies (entry, product adaptation, channel logistics, pricing, promotion); emphasis on practical applications. Prerequisites: 06N:211.
- 06M:236 Advertising and Promotion Strategy** 3 s.h.  
Marketing communications as dialogue between producers and consumers, how promotional mix evolves; emphasis on advertising, sales promotion, branding. Prerequisites: 06N:211.
- 06M:237 Field Studies in Marketing** 3 s.h.  
Experience in planning, designing, carrying out, reporting on a marketing research project for a profit or nonprofit client organization; communication with managers, application of marketing research, meeting deadlines, converting research findings into action recommendations for management. Repeatable. Prerequisites: 06N:211 and 06N:216. Recommended: 06M:230.
- 06M:238 Contemporary Topics in Marketing** 1-3 s.h.  
Topics not regularly offered in other courses. Prerequisites: 06N:211.
- 06M:242 Seminar in Marketing Models-Ph.D.** 3 s.h.  
Theoretical, operational models in marketing, with emphasis on recent advances; in-depth criticism of models, participation in model development project.
- 06M:243 Seminar in Consumer Behavior-Ph.D.** 3 s.h.

Key facets of consumer behavior--information processing, perception, memory, learning, attitude formation, attitude change, decision making, emotion; behavioral research methods.

**06M:245 Seminar in Research Topics-Ph.D.** arr.  
Individual research topics.

**06M:247 Directed Readings in Marketing-Ph.D.** arr.

**06M:250 Applied Marketing Research** 3 s.h.  
Research design, survey design, sampling, data analysis, qualitative research methods, research project management.

**06M:251 Marketing Analytics** 3 s.h.  
Quantitative tools to support marketing planning decisions, including forecasting, elasticity analysis, conjoint analysis, and customer LTV; analysis of syndicated data.

**06M:252 Strategic Brand Positioning** 3 s.h.  
Define market boundaries; use customer and competitor analyses to create sustainable market positions; create and manage brand identities; brand architecture, brand equity measurement.

**06M:253 Product and Pricing Decisions** 3 s.h.  
Create and capture value through product and service design, including stage-gate evaluation models; implement pricing strategy for new products and existing product lines.

**06M:254 Customer Analysis** 3 s.h.  
Use customer insights to support successful marketing programs; organizational, individual, and joint decision making; post sale satisfaction behaviors.

**06M:255 Marketing Communication and Promotions** 3 s.h.  
Develop effective communication programs for business and consumer markets; manage agency relationships; integrate media/vehicle platforms; track and evaluate investments in communications and promotions.

**06M:256 Managing Distribution Networks** 3 s.h.  
Select distribution channels, manage distributor relationships; category level competition and coordination; monitor distributor performance.

**06M:290 Thesis in Marketing** arr.

# Master of Business Administration Program

**Associate dean:** Jarjis Sa-Aadu  
**Assistant dean:** Colleen Downie  
**Graduate degree:** M.B.A.  
**Web site:** <http://tippie.uiowa.edu/mba/>

The Henry B. Tippie School of Management offers a Master of Business Administration (M.B.A.) program that provides students with a foundation for future growth and flexibility in professional management. The program, which is fully accredited by AACSB International—the Association to Advance Collegiate Schools of Business, enables students to build broad-based professional portfolios of analytical skills, knowledge, leadership, and applied experiences. The curriculum is rigorous, yet learning takes place in a collaborative environment that builds teamwork skills and encourages independent problem solving.

Students in Tippie M.B.A. programs come from every region of the United States and from countries worldwide. They represent a variety of backgrounds, undergraduate majors, and professional experience. The curriculum is designed for college graduates in any field; previous business course work is not required. However, full-time work experience is typically required for admission. Contact the Tippie School of Management for a brochure listing complete program requirements.

Students in the full-time M.B.A. program may enroll in one of several joint degree programs, simultaneously earning an M.B.A. and a University of Iowa graduate or professional degree in another discipline. See "Joint Degree Programs" below.

## Full-time M.B.A.

The full-time M.B.A. program requires 67 s.h. of graduate credit, including 33 s.h. of required courses and 34 s.h. of career academy and elective course work. Students complete business foundation (core) courses during their first semester in the program (fall) and advanced core courses, career academy courses, and electives in the remaining three semesters. M.B.A. students must complete 06N:201 Leadership, Ethics, and Professionalism each semester; the course provides in-class and out-of-class training and experience in career advancement, ethics in business, leadership assessment and development, and academy-specific skill-building activities. A weeklong international immersion in January of the second year strengthens students' knowledge of global business.

The program's career academies are the framework through which students become experts in a specific business field. Each career academy provides a unique set of curricular offerings as well as academic and professional experiences that include industry projects, interactions with the business community and with alumni, and skill-building activities designed to increase each student's marketability. Prior to the second semester (spring), students choose one of the following career academies and concentration tracks based on their career goals.

Finance Career Academy (concentration tracks include corporate finance and investment management)

Marketing Career Academy (offers one concentration track, managing customers, products, and brands)

Strategic Innovation Career Academy (concentration tracks include process excellence and strategic management of innovation)

The full-time M.B.A. study plan is as follows.

### First Semester

06N:201 Leadership, Ethics, and Professionalism	2 s.h.
06N:204 Corporate Communications	2 s.h.
06N:211 Marketing Management	2 s.h.
06N:212 Management in Organizations	2 s.h.
06N:215 Corporate Financial Reporting	2 s.h.
06N:216 Data and Decisions	2 s.h.
06N:225 Managerial Finance	2 s.h.
06N:229 Operations Management	2 s.h.

### Second Semester

06N:201 Leadership, Ethics, and Professionalism	2 s.h.
06N:228 International Economic Environment of the Firm	2 s.h.
06N:244 Seminar in Project Management	1 s.h.

06N:245 Strategic Business Consulting	3 s.h.
Academy courses/electives	12 s.h.

**Third Semester**

06N:201 Leadership, Ethics, and Professionalism	2 s.h.
06N:240 Strategic Management and Policy	2 s.h.
06N:241 Business Integration	2 s.h.
06N:235 Seminar in International Business	0-3 s.h.
Academy courses/elective	9 s.h.

**Fourth Semester**

06N:201 Leadership, Ethics, and Professionalism	1 s.h.
Academy course/elective	15 s.h.

**Admission**

Applicants to the M.B.A. program must submit a complete application file, including the following:

- a completed Tippie School of Management application form and fee;
- official transcripts of all undergraduate and graduate course work, which must be submitted to the Office of Admissions by each institution attended;
- official Graduate Management Admission Test (GMAT) scores;
- the completed supplemental application form with essay responses, a résumé, and a cover letter;
- three completed recommendation forms.

Applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). In place of TOEFL, the program accepts International English Testing System (IELTS) scores.

For TOEFL registration information, contact the University of Iowa Office of Admissions.

The full-time M.B.A. program admits students only for fall entry. Application deadlines are as follows:

- International applicants: April 15
- U.S. citizens and permanent residents (priority deadline): April 15
- U.S. citizens and permanent residents: July 30

Applications received after April 15 are considered on a space-available basis.

**Accelerated Professional Track**

Highly qualified undergraduate students in the University of Iowa College of Liberal Arts and Sciences, the College of Engineering, or the Tippie College of Business may be admitted to the full-time M.B.A. program's Accelerated Professional Track (APT). These students begin taking M.B.A. core courses as electives during their undergraduate programs; this permits them to earn a bachelor's degree and an M.B.A. more quickly than they would if they pursued each degree separately. APT students must complete an internship in the program.

To enter the APT program, students must complete 90 s.h. of undergraduate work, have a g.p.a. of at least 3.50, have clearly defined career goals, and indicate their intent to pursue both degree programs on a full-time basis. Students also must have a professional background similar to that of students enrolled in the M.B.A. program.

**Joint Degree Programs**

Joint degree programs allow students to pursue two degrees simultaneously, earning both more quickly than they would if they pursued each degree separately. The Tippie School of Management collaborates with several other University of Iowa academic units to offer joint professional or graduate degrees: an M.B.A./J.D. with the College of Law; an M.B.A./M.D. with the Carver College of Medicine; and an M.B.A./M.H.A. with the College of Public Health.

Separate application to each degree program is required. Applicants must be admitted to both programs before they may be admitted to the joint degree program.

## M.B.A. for Professionals and Managers

The M.B.A. for Professionals and Managers (M.B.A.-PM) program requires 45 s.h. of graduate credit. The program is tailored for working professionals building on the synergies of working and concurrent learning. It prepares graduates to be effective leaders in the global marketplace. The curriculum is designed for students with varied backgrounds, undergraduate majors, and professional experience. Previous course work in business is not required.

Courses are offered each semester during evening hours or weekends in Cedar Rapids at the college's Cedar Rapids Center; in Des Moines at the John and Mary Pappajohn Education Center (JMPEC); and in the Quad Cities at the Palmer College of Chiropractic. M.B.A.-PM students also may enroll in full-time M.B.A. courses in Iowa City when space is available.

The M.B.A.-PM program requirements include a business core of nine courses, which develops competency in general management skills and key functional business areas, and six business electives. The elective courses contribute to the development of an area of expertise and foster a deeper understanding of management and business practices; they are offered in marketing, finance, and management, with a smaller number offered in management information systems/operations management, accounting, and entrepreneurship. Some students earn the degree in as few as two years, but they may have up to 10 years to complete it. Most earn the M.B.A. in three years, taking two courses each fall and each spring semester and one course during the summer. Course sequencing is flexible. A sample study plan follows.

### FIRST YEAR

06N:211 Marketing Management	3 s.h.
06N:212 Management in Organizations	3 s.h.
06N:215 Corporate Financial Reporting	3 s.h.
06N:216 Data and Decisions	3 s.h.
Business elective	3 s.h.

### SECOND YEAR

06N:213 Managerial Economics	3 s.h.
06N:225 Managerial Finance	3 s.h.
06N:229 Operations Management	3 s.h.
Two business electives	6 s.h.

### THIRD YEAR

06N:223 Global Business Strategy	3 s.h.
06N:240 Strategic Management and Policy	3 s.h.
Three business electives	12 s.h.

### Admission

The M.B.A.-PM program admits students for fall or spring entry; applications are accepted throughout the year. Admission decisions are based on the completed application materials, including quality of work experience, undergraduate grade-point average, GMAT score, and letters of reference. Applicants should have at least one and one-half years of postbaccalaureate professional work experience before admission.

Admission decisions are made before registration begins for completed applications received by the priority application deadline. Admitted applicants who have met the priority application deadline may request registration for classes on the first date of registration. The University must receive completed application materials by the following application deadlines.

Priority deadline for fall semester (August): May 1

General deadline for fall semester (August): July 15

Priority deadline for spring semester (January): October 1

General deadline for spring semester (January): December 15

### Enrollment in Courses Before Formal Admission

Individuals who have not yet been admitted to the program may request pre-M.B.A. status by submitting their résumé and transcript to the Tippie School of Management for approval; they should have at least one and one-half years of postbaccalaureate professional work experience. Those granted special pre-M.B.A. status may enroll in a maximum of three M.B.A.-PM courses over 12 months; two of the three must be selected from the following list.

06N:213 Managerial Economics	1-3 s.h.
06N:215 Corporate Financial Reporting	2-3 s.h.
06N:216 Data and Decisions	2-3 s.h.
06N:225 Managerial Finance	2-3 s.h.

Pre-M.B.A. students who begin with one course in their first semester must select that course from the list above. Those who take two courses their first semester must include one from the list above; for the second course, the program recommends a qualitative course such as 06N:211 Marketing Management or 06N:212 Management in Organizations.

Credit is applied to the degree once the applicant is admitted to the program.

### **Executive M.B.A.**

The Executive M.B.A. requires 50 s.h. of graduate credit. Admission is limited to experienced executives who want to broaden their management skills without interrupting their professional careers. Applicants should have at least 10 years of postgraduate managerial experience. Previous academic work in business is not required.

Course work is presented over 21 months. The program begins in mid-August with a five-day residency in Iowa City, followed by classes one day each week on alternating Fridays and Saturdays. A second five-day residency is held at the beginning of the second year. Students complete 16 core courses and an international business seminar (7-10 days during spring semester of the second year). Each entering class progresses through the program as a group.

Classes for the Executive Engineer Dual Master's Degree program are held at the Cedar Rapids Area Education and Conference Center. Classes for the Iowa City Executive M.B.A. program are held on the Iowa City campus in the Pomerantz Center.

The Executive M.B.A. study plan is as follows.

#### **FIRST YEAR**

06J:227 Human Resource Management	3 s.h.
06N:211 Marketing Management	3 s.h.
06N:212 Management in Organizations	3 s.h.
06N:213 Managerial Economics	3 s.h.
06N:215 Corporate Financial Reporting	3 s.h.
06N:216 Data and Decisions	3 s.h.
06N:225 Managerial Finance	3 s.h.
06N:228 International Economic Environment of the Firm	3 s.h.
06N:230 Seminar in Strategic Management I	1 s.h.

#### **SECOND YEAR**

06A:235 Strategic Cost Analysis	3 s.h.
06A:245 Financial Information and Capital Markets	3 s.h.
06F:215 Corporate Investment and Financing Decisions	3 s.h.
06J:256 Dynamics of Negotiations	3 s.h.
06M:205 Web Business Strategy	3 s.h.
06N:229 Operations Management	3 s.h.
06N:231 Seminar in Strategic Management II	3 s.h.
06N:235 Seminar in International Business	1 s.h.
06N:240 Strategic Management and Policy	3 s.h.

### **International M.B.A. (Hong Kong)**

The International M.B.A. program in Hong Kong requires 45 s.h. of graduate credit. The program is designed for working professionals with at least three years of full-time work experience. Students enroll in classes sequentially. Most complete the program in 18-21 months. Each class begins with two weeks of online course work followed by two consecutive weekends of classes in Hong Kong and an additional two weeks of online course work. Faculty from Iowa travel to Hong Kong to teach the weekend classes. The program admits students year-round.

The International M.B.A. (Hong Kong) study plan is as follows.

06N:211 Marketing Management	3 s.h.
------------------------------	--------

06N:212 Management in Organizations	3 s.h.
06N:213 Managerial Economics	3 s.h.
06N:215 Corporate Financial Reporting	3 s.h.
06N:216 Data and Decisions	3 s.h.
06N:225 Managerial Finance	3 s.h.
06N:228 International Economic Environment of the Firm	3 s.h.
06N:229 Operations Management	3 s.h.
06N:240 Strategic Management and Policy	3 s.h.
Business electives	18 s.h.

### International M.B.A. (Italy)

The International M.B.A. program in Italy requires 47-53 s.h. of graduate credit. The 11-month program is held primarily at the Consortium Institute of Management and Business Analysis (CIMBA) campus in Asolo, Italy, but the final course is completed on the University of Iowa campus in Iowa City. The program focuses on strategic management, consulting, and international business and includes two consulting projects with international companies. In addition to the M.B.A., students earn certificates in Kepner-Tregoe problem solving and project management and a Six-Sigma Green Belt certificate in addition to the M.B.A. degree. The program's faculty is drawn from The University of Iowa and from institutions across the United States and Europe.

The program admits students only for fall semester entry. Applicants must have at least two years of full-time work experience.

The International M.B.A. (Italy) study plan is as follows.

06N:211 Marketing Management	3 s.h.
06N:212 Management in Organizations	3 s.h.
06J:262 Leadership and Personal Development	3 s.h.
06N:213 Managerial Economics	3 s.h.
06N:215 Corporate Financial Reporting	3 s.h.
06A:235 Strategic Cost Analysis	3 s.h.
06N:216 Data and Decisions	3 s.h.
06K:217 Data and Decisions II	3 s.h.
06T:220 Entrepreneurship and Innovation	3 s.h.
06N:225 Managerial Finance	3 s.h.
06N:228 International Economic Environment of the Firm	2 s.h.
06N:229 Operations Management	3 s.h.
06K:292 Supply Chain Management	3 s.h.
06N:240 Strategic Management and Policy	3 s.h.
Electives	6 - 12 s.h.

## Master of Business Administration Program Courses

See the course lists for individual departments for descriptions of M.B.A. electives.

<b>06N:000 M.B.A. Internship</b>	0 s.h.
----------------------------------	--------

<b>06N:199 M.B.A. Competitive Prep</b>	1 s.h.
--	--------

Professional development, career strategies for successful competition in the M.B.A. marketplace.

<b>06N:200 Directed Readings-M.B.A.</b>	1-3 s.h.
---	----------

<b>06N:201 Leadership, Ethics, and Professionalism</b>	1-2 s.h.
--	----------

Optimize to thrive in a competitive business landscape as an ethical business leader; LEAP identifies opportunities and obstacles relevant to career goals and designs a detailed action plan to achieve it; rigorous academy-specific activities provide context necessary to transition into higher levels of business; corporate speakers, round table discussions, group projects, individualized development; leverage experience and effectively market to employers, enhance leadership skills, and broaden business knowledge.

<b>06N:202 M.B.A. Case Competition</b>	1-3 s.h.
--	----------

Students represent Tippie School of Management in a case competition; internal case work, presentation and case analysis training. Requirements: M.B.A. student standing.

**06N:203 Application in Organizational Leadership**

1 s.h.

Opportunity to develop leadership skills necessary for managing student organizations; class discussion, workshops, guest speakers; for M.B.A. organization treasurers and presidents.

**06N:204 Corporate Communications**

2 s.h.

Effective communication to become a successful business professional and leader; strengthen ability to speak and write confidently, competently, and effectively, regardless of venue; varied team and individual presentation coaching, applied exercises.

**06N:205 M.B.A. IMPACT**

0 s.h.

Introduction to the Tippie M.B.A. program and its culture; activities accentuate themes of involvement, motivation, professionalism, achievement, and challenge; week-long immersion in collaborative team-building experiences.

**06N:211 Marketing Management**

2-3 s.h.

Concepts, principles, models of marketing management; focus on strategic planning, management decision making, and implementation of marketing programs.

**06N:212 Management in Organizations**

2-3 s.h.

How to explain, predict, and influence behavior in organizations; decision making, leadership, communication, group skills in management positions; motivation, leadership, teams, organizational culture, organizational design, individual differences, organizational change.

**06N:213 Managerial Economics**

1-3 s.h.

Models of consumer and firm behavior with applications; market equilibrium and structure; pricing decisions.

**06N:215 Corporate Financial Reporting**

2-3 s.h.

Contemporary financial reporting practices in the United States; how alternative accounting treatments affect the usefulness of financial information in applied decision settings.

**06N:216 Data and Decisions**

2-3 s.h.

Quantitative modeling techniques and statistical analysis for management decision making; use of Excel for spreadsheet analysis; decision analysis, statistical inference, regression, linear programming, probability.

**06N:223 Global Business Strategy**

3 s.h.

Strategic frameworks and skills critical for success in the global marketplace; content of an economic environment; cultural, ethical, and legal issues in the conduct of international business; how companies enter foreign markets and grow international subsidiaries, succeed in mergers and acquisitions, cooperate in joint ventures and strategic alliances. Prerequisites: 06N:212.

**06N:225 Managerial Finance**

2-3 s.h.

Time value of money, applications of present value techniques; stock and bond valuation, capital budgeting, cost of capital calculation, portfolio formation and efficient market analysis, financial statement analysis, pro forma analysis, hedging financial risks. Corequisites: 06N:215, if not taken as a prerequisite.

**06N:228 International Economic Environment of the Firm**

2-3 s.h.

Basic determinants of aggregate output, employment, wages, unemployment, consumption, investment, international trade flows, interest rates, exchange rates, prices and inflation in open economies; sources and nature of economic growth; effects of domestic and foreign monetary, fiscal policies; effects of trade, exchange rate policies. Prerequisites: 06N:213.

**06N:229 Operations Management**

2-3 s.h.

Planning and decision-making activities for managing an organization's operations; trade-offs associated with operations management decisions, tools and techniques for helping operations managers implement decisions and reach goals; production and service delivery strategy, capacity planning, product and process design, total quality management, demand management, production and service planning, scheduling, materials control, emerging production and service technologies. Prerequisites: 06N:216.

**06N:230 Seminar in Strategic Management I**

1-3 s.h.

Introduction to strategic management; the role of marketing, operations, and finance in strategic planning; case studies.

**06N:231 Seminar in Strategic Management II**

1-3 s.h.

Strategic management integrating all aspects of business; computer simulation, lectures, case studies, readings.

**06N:235 Seminar in International Business**

0-6 s.h.

Issues and challenges facing organizations doing business in international markets; social, economic, political factors, business policies and customs in the global environment; may include travel, study abroad. Repeatable.

Requirements: M.B.A. enrollment.

**06N:240 Strategic Management and Policy**

2-3 s.h.

Firm's competitive strategy from a manager's perspective; key strategic frameworks; integration of concepts learned throughout M.B.A. program, previous work experience. Prerequisites: 06N:211, 06N:215, 06N:225, and 06N:229.

**06N:241 Business Integration**

1-3 s.h.

Student teams run an operational business simulation, conduct organizational/industry analysis, assess market opportunities, define strategic direction, compete for company profitability and market share. Prerequisites: 06N:211, 06N:215, 06N:225, 06N:229, and 06N:240.

**06N:244 Seminar in Project Management**

1 s.h.

Foundation and application of key processes in planning and managing projects in a business setting; create a letter of engagement, define project scope and work plans, apply concepts for early stages of producing a quality project plan; aligned with the corporate project requirements for 06N:245. Corequisite: 06N:245. Requirements: M.B.A. student.

**06N:245 Strategic Business Consulting**

1-6 s.h.

Plan, schedule, and deliver strategic consulting services to commercial enterprises; project definition, preparation and presentation of deliverables, client relationship management.

# Risk Management and Insurance

**Director:** Larry Hershberger

**Associate director:** Viana Rockel

**Affiliated faculty:** Philip D. Brooks (Finance), Scott R. Fisher (Finance), J. Tyler Leverty (TRISTAR Risk Management Fellow, Finance), Donna L. Pearcy

**Undergraduate nondegree program:** Certificate in Risk Management and Insurance

**Web site:** <http://tipie.uiowa.edu/vaughan>

The Department of Finance and the Emmett J. Vaughan Institute of Risk Management and Insurance offer the Certificate in Risk Management and Insurance. The certificate program is open to University of Iowa undergraduate students.

## Certificate in Risk Management and Insurance

The Certificate in Risk Management and Insurance requires 24 s.h. The program is designed to provide an understanding of the many aspects of risk management and insurance. It concentrates on value creation and asset protection, including pure insurance and risk management, as well as on corporate and financial risk management. It also addresses the financial and economic characteristics of potential exposures to loss that business organizations and individuals face, and the techniques available for hedging the risks and minimizing the costs associated with these exposures.

The certificate provides students in business and in other majors with a foundation for careers in corporate risk management, risk management consulting, employee benefits management and insurance consulting, insurance brokerage, and underwriting. It also may be of value to students seeking professional designations, such as Chartered Life Underwriters (CLU) and Chartered Property and Casualty Underwriter (CPCU). Students typically find employment as financial analysts, bank compliance officers, stock exchange traders, capital and asset managers, insurance and accounting auditors, and personal bankers, as well as underwriters, claims adjusters, and insurance producers.

The certificate requires the following courses. Students may take 06F:100 Introductory Financial Management and 06F:102 Principles of Risk Management and Insurance in the same semester; they are prerequisites for all RMI courses.

### CORE COURSES AND COREQUISITES

06F:100 Introductory Financial Management	3 s.h.
06F:102 Principles of Risk Management and Insurance (RMI core)	3 s.h.
06F:104 Corporate and Financial Risk Management (RMI core)	3 s.h.

### ELECTIVES

All students choose two of these (6 s.h.):

06F:103 Property and Liability Insurance (offered spring)	3 s.h.
06F:105 Life and Health Insurance (offered fall)	3 s.h.
06F:106 Employee Benefit Plans (offered spring)	3 s.h.

Finance majors choose three of these (9 s.h.):

06F:113 Fixed Income Securities	3 s.h.
06F:114 Commercial Banking	3 s.h.
06F:116 Futures and Options	3 s.h.
06F:119 Wealth Management	3 s.h.
06F:126 Real Estate Process	3 s.h.
06J:156 Dynamics of Negotiations (available after early registration)	3 s.h.
06J:162 Leadership and Personal Development	3 s.h.
06K:170 Advanced Computer Analysis	3 s.h.
06M:139 Sales Management	3 s.h.
22S:030 Statistical Methods and Computing	3 s.h.

Non-finance majors choose three of these (9 s.h.):

06A:120 Financial Accounting and Reporting	3 s.h.
06F:111 Investment Management	3 s.h.
06F:113 Fixed Income Securities	3 s.h.

06F:114 Commercial Banking	3 s.h.
06F:116 Futures and Options	3 s.h.
06F:117 Corporate Finance	3 s.h.
06F:126 Real Estate Process	3 s.h.
06F:119 Wealth Management	3 s.h.
06A:131 Income Measurement and Asset Valuation (accounting majors take this instead of 06A:120)	3 s.h.
06K:170 Advanced Computer Analysis	3 s.h.
056:054 Engineering Economy (engineering students)	3 s.h.

### Admission

Admission to the Certificate in Risk Management and Insurance program requires enrollment in an undergraduate degree program and third-year standing (completion of 60 s.h.). Applicants must have a cumulative and a University of Iowa g.p.a. of at least 2.75. They must have completed 06F:100 Introductory Financial Management and 06F:102 Principles of Risk Management and Insurance with a g.p.a. of at least 2.75 and no grade below B-minus. They also must have completed 06F:110 Financial Information Technology and must have earned a grade of C or higher in all other RMI courses they have taken.

### Courses for Noncertificate Students

B.B.A. students majoring in finance can concentrate in risk management and insurance (RMI), or they can supplement their corporate finance and investment courses with one or more RMI courses. Students enrolled in other Tippie College of Business majors and College of Liberal Arts and Sciences students earning majors in statistics, actuarial science, or mathematics program C may take RMI courses to enhance their understanding of financial services and learn about employment opportunities in the industry. Other University of Iowa students may enroll in RMI courses after early registration if space is available and if they have completed 06E:001 Principles of Microeconomics, 06E:002 Principles of Macroeconomics, 06F:100 Introductory Financial Management, and 06F:102 Principles of Risk Management and Insurance.

### Affiliated Courses

The Department of Finance offers five courses affiliated with the Emmett J. Vaughan Institute of Risk Management and Insurance that are included in the Certificate in Risk Management and Insurance curriculum. See Finance in the Catalog for course descriptions and prerequisites.

06F:102 Principles of Risk Management and Insurance	3 s.h.
06F:103 Property and Liability Insurance	3 s.h.
06F:104 Corporate and Financial Risk Management	3 s.h.
06F:105 Life and Health Insurance	3 s.h.
06F:106 Employee Benefit Plans	3 s.h.

# College of Dentistry

**Dean:** David C. Johnsen  
**Executive associate dean:** Jed S. Hand  
**Associate dean, finance and facilities:** Scott Arneson  
**Associate dean, patient care:** Michael Kanellis  
**Associate dean, research:** Clark Stanford  
**Associate dean, student affairs:** Catherine Solow  
**Degrees:** D.D.S., M.S., Ph.D.  
**Web site:** <http://www.dentistry.uiowa.edu>

The College of Dentistry is an integral part of The University of Iowa and its health sciences campus. Its mission, which embraces the University's academic values as well as the ethical responsibilities implicit in educating future members of a profession, rests on a foundation representing every aspect of collegiate activity: education of students as general practitioners and specialists; research into all aspects of oral and dental disease and the delivery of health care; and service to the community, the state, and the profession.

Faculty members, D.D.S. students, and specialty residents provide oral health care to patients at clinics in the Dental Science Building, the Center for Disabilities and Development, and dentistry clinics at University of Iowa Hospitals and Clinics and Iowa City Veterans Affairs Medical Center. Faculty, staff, and students participate in interdisciplinary research and training activities involving the University's five health science colleges as well as other University colleges and departments.

Dentistry at The University of Iowa began in 1882 as a single department. In 1900 the University underwent general reorganization and the Dental Department became the College of Dentistry. Today the college is Iowa's only provider of dental education and ranks as a leader in dental education nationwide.

The college and its educational programs are accredited by the Commission on Dental Accreditation of the American Dental Association, an independent tripartite commission authorized and recognized by the Commission on Post-Secondary Education.

Programs offered by the college cover the full spectrum of dentistry and closely integrated fields. They include the Doctor of Dental Surgery program (D.D.S.), which prepares general dentists; advanced education programs in all dental specialties, each of which may lead to certification in a dental specialty; several advanced education programs in other areas of dentistry, including the oral science program, which offers M.S. and Ph.D. degrees; post-D.D.S. residency programs in general dentistry and hospital-based dentistry; and a wide variety of continuing education programs for dental and allied professions.

## Professional Program (D.D.S.)

### Doctor of Dental Surgery

The Doctor of Dental Surgery (D.D.S.) requires a minimum of three years of preprofessional study and four years of study in the College of Dentistry.

Course work during the first and second years in the College of Dentistry integrates the biomedical sciences with preclinical and clinical disciplines. The biomedical sciences include gross anatomy, biochemistry, general histology, microbiology, pathology, pharmacology, and physiology. Students also study topics specific to dentistry, such as principles of occlusion, anesthesia and pain control, operative dentistry, periodontics, prosthodontics, cariology, and preventive dentistry. During the latter part of the first year, students are introduced to their first clinical patient-treatment situation.

Second-year dental students continue their study of biomedical sciences, take preclinical courses, have additional patient treatment experiences in restorative and preventive dentistry, and are introduced to esthetic and implant dentistry.

Third-year dental students rotate through a series of clerkships that expose them to seven clinical disciplines.

Fourth-year dental students deliver comprehensive dental care in conditions that closely approximate those in private dental practice. They also are exposed to varied community dentistry health programs throughout Iowa and other states that include hospitals, nursing homes, and the Special Care Clinic. They may choose to participate in the Colorado Migrant Worker Program, the Indian Health Service Program, or the Foreign Dental School Exchange Program. The community dentistry programs provide exposure to facets of dentistry usually not observable in an academic setting.

### Biomedical Sciences in the Dental Curriculum

The following science courses are offered by University of Iowa departments outside the College of Dentistry and are a required part of the D.D.S. curriculum.

060:101 Human Gross Anatomy for Dental Students	6 s.h.
060:112 General Histology for Dental Students	4 s.h.
061:113 Dental Microbiology	3 s.h.
069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
071:111 Pharmacology for Dental Students	5 s.h.
072:152 Human Physiology for Dental Students	4 s.h.
099:161 Biochemistry for Dental Students	4 s.h.

College of Dentistry nondepartmental courses are listed under "Nondepartmental Courses" at the end of this section. Courses offered by the college's departments are listed in each department's General Catalog section.

### **Combined Bachelor's Degree/D.D.S.**

Students who are enrolled in a baccalaureate program at The University of Iowa may be allowed to use course work from their first year of dentistry to complete their elective semester-hour requirement toward the bachelor's degree.

The provision for acceptance by the College of Liberal Arts and Sciences of 30 s.h. of elective credit earned in any other college of the University allows College of Dentistry students to obtain a bachelor's degree from the College of Liberal Arts and Sciences after successfully completing the first year of dentistry. To take advantage of this plan, students must fulfill all specific requirements for the bachelor's degree, including the General Education Program requirements and the requirements for a major. Students also must satisfy the College of Liberal Arts and Sciences residence requirement before enrolling in the College of Dentistry. Contact the College of Liberal Arts and Sciences for more information.

### **Academic Rules and Procedures**

#### **Promotions, Graduation**

Student promotions and graduation are determined by the Collegiate Academic and Professional Performance Committee, which is made up of individuals appointed by the dean from the biomedical, preclinical, and clinical sciences and from other academic areas of the college. The performance committee may recommend to the dean that a student withdraw from the college or repeat specific courses when the student is deemed generally unprepared to be promoted or to enter the dental profession.

#### **Committee for Appeals**

When a student has been asked to withdraw from the college or wants special consideration of problems concerning promotion or graduation, he or she may appeal to the dean. All appeals are heard by an ad hoc committee appointed by the dean. The ad hoc committee investigates new information that has not been available previously or that has not been discussed as fully as the student feels it should have been. The committee determines whether this new information, or important new insights that may have been gained, could have influenced the collegiate academic and professional performance committee's decision. The recommendation of the appeals committee is submitted to the dean for final action.

### **Dentistry Licensure Examination**

The State of Iowa accepts clinical examination results from the Central Regional Dental Testing Service and from the Western Regional Examination Board. Examinations are administered at several testing sites located at dentistry schools in the United States. A separate license application is then filed with the individual state board of dentistry.

For licensure, all states also require the National Boards, conducted by the American Dental Association. Many states, including Iowa, also require a jurisprudence examination.

### **Student Organizations**

All dental students are members of the American Student Dental Association through its local chapter. The American Dental Education Association, the American Association of Dental Research (Student Research Group), the American Association of Women Dentists, the American Academy of Pediatric Dentistry Student Chapter, the American Society for Geriatric Dentistry, the Student National Dental Association, and the Hispanic Dental Association also have local chapters.

Students who rank in the upper 12 percent of their senior class are eligible for election to Omicron Kappa Upsilon, a national scholastic honorary dental society.

The national dental professional fraternities Delta Sigma Delta and Psi Omega have chapters at Iowa. Both fraternities provide academic and social activities for students and their spouses.

## Expenses

The College of Dentistry maintains the Supply-Instrument Management System (SIMS), which provides students with instruments and supplies necessary throughout their dental training. The SIMS usage fee for the D.D.S. is payable in installments over the four-year program.

A fee for expendable laboratory supplies is charged each of the first two years. A \$100 breakage fee also must be deposited; the deposit is refundable upon graduation or termination of enrollment.

## Admission

Applicants must submit a completed AADSAS (Associated American Dental Schools Application Service) application form to the American Dental Education Association (ADEA). The AADSAS application must be completed online at the American Dental Education Association web site (<http://www.adea.org>).

Applications are accepted beginning June 1 of the year before the year of entry. Completed applications must be on file at ADEA by November 1. Applicants should apply as early as possible. Notifications of acceptance are sent beginning December 1.

Prospective dental students are encouraged to embark on an educational program that leads to a standard bachelor's degree. This ensures that students receive a well-rounded education.

## Predental Studies

The basic academic requirement for admission to the College of Dentistry is completion of at least 90 s.h. of academic study at an accredited college. No more than 60 s.h. of credit is accepted from a junior college or two-year institution. The predental program of study should include the following.

**English:** satisfactory accomplishment in English composition, rhetoric, and speech commensurate with the academic requirements for a bachelor's degree at the college attended.

**Physics:** one year (equivalent to 8 s.h.), of which one-fourth must be laboratory work.

**Chemistry:** two years (equivalent to 16 s.h.), of which one year (equivalent to 8 s.h.) must be in organic chemistry; one-fourth of each year's study must be laboratory work.

**Biochemistry:** highly recommended.

**Biological science:** one year (equivalent to 8 s.h.), which must include appropriate laboratory work; the requirement may be satisfied by a one-year course in principles of biology, with instruction in cell biology, metabolism, organismic biology, animal biology, genetics, development, ecology, and evolution. Preference is given to applicants who have completed more than 8 s.h. Courses in human anatomy and cell physiology are strongly recommended.

**Gross anatomy:** highly recommended.

**Electives:** sufficient course work in the social sciences, philosophy, psychology, history, foreign languages, business, and mathematics to provide a well-rounded educational background.

## Grade-Point-Average Requirement

Applicants should have a cumulative g.p.a. of at least 3.25 on a 4.00 scale; a g.p.a. above 3.50 is preferred. The admissions committee gives special consideration to the quality of applicants' course work in the predental sciences, in addition to the cumulative grade-point average.

## Interviews

Personal interviews are required of applicants for admission to the College of Dentistry. Applicants are contacted to arrange an interview, usually after the AADSAS application is received by the admissions office.

## Required Dental Admission Test

All applicants must complete the Dental Admission Test (DAT) sponsored by the Council on Dental Education of the American Dental Association. A computerized DAT is available throughout the year at designated Prometric Centers.

Applicants should take the test by August 1, one year before entering dental school. Test application forms are available online (<http://www.ada.org>) and from the American Dental Association, 211 East Chicago Avenue, Chicago, IL 60611.

## Deposit by Accepted Applicants

Applicants accepted before February 1 are required to submit a \$500 deposit within 30 days after notification of

admittance. Applicants admitted after February 1 must submit the deposit within two weeks after notification of admittance. This deposit is not refundable but is credited toward the first fee payment. Applicants who fail to make the deposit within the time specified forfeit their place in the entering class.

### **Additional Admission Considerations**

Fulfillment of the specific requirements listed for admission does not ensure admission to the College of Dentistry. From applicants meeting minimum requirements, the admissions committee selects those who appear best qualified for the study and practice of dentistry. The committee considers applicants' academic averages, science averages, DAT scores, letters of recommendation, the interview, and other factors.

### **Early Admission**

The College of Dentistry's Deferred Admit Program (DAP) allows academically motivated students who are residents of Iowa and are interested in a dental career to be admitted to the College of Dentistry as early as the end of their first year of undergraduate study. Students postpone matriculation to the College of Dentistry until they have earned the amount of credit required for their undergraduate degree. As undergraduates, they are engaged in a liberal arts and sciences curriculum that incorporates the dental prerequisite courses. Once selected for the program, students must maintain a specified level of academic achievement to assure matriculation to the College of Dentistry.

### **Financial Support**

Financial assistance for dental students is based on need. Dental students who demonstrate need are eligible for Health Professions Loans, Perkins Loans, and Stafford/Ford Loans. Students applying for loans must submit the Free Application for Federal Student Aid (FAFSA). Interest on many of these loans may be deferred while the student is in school, and the loans are repayable over an extended period of time after the course of study is completed.

Short-term and long-term loans are available through the financial aid coordinator at the College of Dentistry.

Academic awards are given each year to qualified entering dental students. The Academic, Research and Resource Support Awards provide financial support up to \$15,000 per year for as many as four years, if the student maintains an appropriate level of performance.

Financial assistance (grants and loans) is available to disadvantaged students who qualify under The University of Iowa's Educational Opportunity Program and the Opportunity at Iowa Program.

Information on financial assistance for dental students is available from the University's Office of Student Financial Aid.

## **Graduate and Clinical Specialty Programs**

Programs of study leading to the Master of Science are offered by the Departments of Operative Dentistry; Oral Pathology, Radiology, and Medicine (stomatology); Orthodontics; and Preventive and Community Dentistry (dental public health). In addition, the Departments of Endodontics, Periodontics, and Prosthodontics offer programs leading to graduate degrees in oral science. Admission to these graduate programs requires satisfaction of all requirements for admission to the Graduate College; the Doctor of Dental Surgery degree or its equivalent, or a bachelor's degree for dental hygienists applying to the Department of Preventive and Community Dentistry; and departmental approval. For graduate program descriptions, see the appropriate College of Dentistry department sections of the Catalog.

Several departments also offer postgraduate programs designed as preparation for clinical specialty practice (Endodontics; Operative Dentistry; Oral Pathology, Radiology, and Medicine; Orthodontics; Pediatric Dentistry; Periodontics; and Prosthodontics). Students who complete these programs satisfactorily are awarded a certificate. The Department of Oral and Maxillofacial Surgery offers a four-year residency program.

For information about each graduate degree or certificate, see the College of Dentistry department sections of the Catalog.

## **Faculty**

Iowa's dental faculty is predominantly full-time. In addition, more than 100 part-time adjunct faculty members assist with clinical teaching in the D.D.S. and advanced residency programs. Approximately 88 percent of the college's faculty members hold D.D.S. or D.M.D. degrees and 12 percent represent other disciplines. The vast majority of faculty dentists have advanced education past the D.D.S., generally with master's degrees in specialty areas; about one-fifth hold a Ph.D.

The College of Dentistry is committed to the principle that diversity is essential to a strong educational environment—one that prepares new generations of dentists to provide high-quality care to patients from many backgrounds. The college's full-time faculty reflects that commitment.

## Facilities

The College of Dentistry is located in the Dental Science Building on the University of Iowa health sciences campus, in proximity to the Roy J. and Lucille A. Carver College of Medicine, College of Nursing, College of Pharmacy, College of Public Health, and University of Iowa Hospitals and Clinics. The Bowen Science Building and the Hardin Library for the Health Sciences also are nearby.

The south wing of the Dental Science Building is devoted to clinical teaching. There are 268 operatories in departmental clinics, student laboratories, clinical research space, and a cafeteria. The north wing houses the simulation clinic and technique bench teaching laboratory, the electronic classroom, college administrative offices, educational media service, computer support services, the academic Department of Preventive and Community Dentistry, and the research laboratories and faculty offices of the Dows Institute for Dental Research.

## Dental Education and Patient Care

Patient care is integral to dental education. Students and faculty members deliver oral health care in clinics on the health sciences campus and at several off-campus sites, including nursing homes. More than 25,000 people receive oral health care yearly in the college's clinics. Patients from throughout Iowa as well as from western Illinois and northern Missouri account for most of the 125,000 patient visits each year.

## Interdisciplinary Centers

### Dows Institute for Dental Research

Established in 1976, the Dows Institute for Dental Research occupies the fourth floor of the Dental Science Building's north wing. Laboratories are equipped to support a wide variety of research projects reflecting the complex nature of modern health care needs. Research at the institute is coordinated by the College of Dentistry. Focus areas include oral soft tissue and oral cancer; cariology and microbiology; epidemiology, behavior, health policy, and outcomes; and biomaterials, bone, and tissue engineering. Research also is carried out at the Dental Clinical Research Center.

Although research is concentrated in these program areas, one of the unit's strengths has been the consistent level of interaction and collaboration among individuals and programs across the college and the University.

### Dental Clinical Research Center

For nearly two decades, the Dental Clinical Research Center has offered the oral health care industry a multidisciplinary setting for product testing and development directed by experienced faculty scientists in laboratory or clinical settings. Center researchers have broad experience in designing tests of therapeutic claims and product safety that meet the criteria of the ADA's Council on Scientific Affairs and the Food and Drug Administration Clinical Trials.

### Center for Oral and Maxillofacial Implants

Through integrated research, education, and clinical programs, the Center for Oral and Maxillofacial Implants facilitates the development of implants and their use as a therapeutic modality in dentistry. The center integrates basic and clinical research with technology transfer to the clinical setting, enhancing predoctoral, postgraduate, and continuing education and expanding treatment options available to patients served by the college. The center also provides vital coordination of dental specialties that participate in this treatment modality.

## Nondepartmental Courses

<b>112:100 Transfer Credits Accepted</b>	arr.
<b>112:118 Experiential Learning I</b>	arr.
Problem-based learning, case studies, simulations, communication projects, small group seminars, ethics, research and treatment planning activities integrating information addressed concurrently in the dental curriculum.	
<b>112:119 Experiential Learning II</b>	arr.
Continuation of 112:118.	
<b>112:120 First-Year Continuing Session</b>	arr.
<b>112:145 Introduction to Geriatric Dentistry</b>	2 s.h.

Biological, psychological, social aspects of aging; normal aging, disease processes, pathological changes that affect oral health treatment of dental diseases and patient management. Requirements: D.D.S. enrollment or completion of dental hygiene program. Same as 153:145.

- 112:150 Second-Year Continuing Session** arr.
- 112:155 Introduction to Comprehensive Care/Experiential Learning III** 1 s.h.  
Comprehensive dental diagnosis and treatment planning; small group discussion of students' own patient cases; communication exercises with standardized patients.
- 112:167 Introduction to Quality Assurance** 2 s.h.  
Patient management, record writing skills, quality assurance concepts; students coordinate treatment, patient relations, issues of quality assurance for a group of patients; ethical, moral dilemmas in relation to dental practice.
- 112:168 Dental Therapeutics** 1 s.h.  
Patients' medications and their implications for dental treatment; clinical use of medications that dentists may prescribe; guidelines for dental prescribing.
- 112:170 Third-Year Continuing Session** arr.
- 112:180 Fourth-Year Lectures and Clinics** arr.
- 112:185 Clinical Admissions Emergency** 1 s.h.  
Clinical evaluation, diagnosis, and treatment of patients with dental emergencies; patient assessment and referral to appropriate department for treatment.
- 112:189 Advanced Topics in Quality Assurance** 2 s.h.  
Quality assurance from viewpoint of practicing dentist, dental educator, dental epidemiologist, court system; analysis of senior dental practice in relation to quality assurance criteria.
- 112:190 Dental Student Research Honors Program** arr.  
Experience in conducting research. Requirements: D.D.S. enrollment and approval of mentor and program director.
- 112:199 Advanced Clinical Comprehensive Dentistry** 0 s.h.  
Clinical experience for professional improvement. Requirements: dental degree.

## Endodontics

**Head:** William T. Johnson

**Professors:** David R. Drake, William T. Johnson, Richard E. Walton

**Professor emeritus:** Arne M. Bjorndal

**Associate professors:** Bruce C. Justman, Anne E. Williamson

**Clinical assistant professor:** Manuel R. Gomez

**Graduate degrees:** M.S., Ph.D. in Oral Science

**Graduate nondegree program:** Certificate in Endodontics

**Web site:** <http://www.dentistry.uiowa.edu>

## D.D.S. Student Training

Course work and clinical experiences in endodontics are of vital importance in the overall education of D.D.S. students.

Preclinical endodontics, taught during the sophomore year, includes a didactic and a laboratory component. In clinical endodontics, taught during the junior year, students study both normal and pathological conditions of the dental pulp and periapex. Diagnosis of pulpal and periradicular disease and various specialized aspects of endodontic treatment are emphasized. Students treat endodontic patients under direct supervision of faculty and staff.

## Graduate and Clinical Specialty Programs

The Department of Endodontics offers programs leading to a Master of Science and a Doctor of Philosophy in oral science. It also offers the Certificate in Endodontics.

To learn about the Doctor of Philosophy, see Oral Science in the Catalog or contact the department.

The department's programs are designed to provide qualified dentists with the scientific knowledge and clinical skills they will need to practice endodontics and/or pursue a career in dental education and research.

The department offers several types of programs, which have similar clinical experiences but different didactic experiences. Each program satisfies training requirements for eligibility for certification by the American Board of Endodontics. Students who complete the programs are encouraged to seek board certification. Various activities throughout the courses of study prepare the candidates for the board examination process.

The goal of each program is to develop competent diagnosticians and clinicians. Students learn the scientific and clinical basis of endodontics; develop clinical skills; gain knowledge of and experience in the educational process in order to function confidently as dental educators; and develop skills in designing, conducting, reporting, and publishing the results of original research. Students in the M.S. and Ph.D. programs also gain in-depth knowledge in a scientific training discipline as preparation for an academic/research career.

Other graduate programs are available to endodontics students, such as master's degrees in other disciplines, or a certificate in combination with a Ph.D. in a basic science area. Such programs are available by special arrangement, depending on the candidate's experience and goals. Consult the Department of Endodontics for more information.

### Master of Science and Certificate

The Master of Science in oral science requires a minimum of 30 s.h. of graduate credit, earned over 36 months. An original research project and thesis are required. Students follow a plan of study outlined by the Department of Endodontics in compliance with basic Graduate College regulations for graduate programs in dentistry. Following successful completion of the program requirements, students are granted an M.S. and the Certificate in Endodontics.

The Certificate in Endodontics requires a minimum of 24 months of full-time formal training. The program has the same clinical but fewer didactic course requirements than the combined M.S./certificate program, and it requires no formal thesis. Students are expected to complete an original research project in the area of endodontics and to write a scientific paper for submission to a refereed journal.

Students in the graduate and certificate programs must maintain a g.p.a. of at least 3.00 to receive the certificate and/or degree. Students who fall below this average are allowed one semester to raise their g.p.a. to at least 3.00. The circumstances of the grade-point average deficiency receive careful consideration.

Students accepted and enrolled in any graduate program or the certificate program are not permitted to involve themselves in private dental practice enterprises outside the college. Failure to adhere to this policy may result in dismissal from the program.

Whenever possible, students should complete the graduate and certificate programs without interruption. Students who demonstrate need to discontinue the program temporarily should limit their time away to a maximum of one calendar year. Students must have permission from the endodontic graduate program director in order to interrupt their study.

## Admission

Applicants to the M.S. and certificate programs must be graduates of (or be graduating from) an accredited college of dentistry or a foreign equivalent. M.S. and Ph.D. applicants must meet the admission requirements of the Graduate College. A cumulative g.p.a. of at least 2.50 or equivalent is necessary for consideration for admission to any of the graduate programs.

All advanced programs begin on or before July 1. Applications should be submitted no later than August 15 of the year preceding the anticipated date of enrollment. Finalists for each program are asked for a personal interview in September or early October. Final decisions are made in November.

Application forms for the M.S. and certificate programs are available at Graduate and Professional Admissions on the Office of Admissions web site.

Application forms for the Ph.D. program are available from and should be returned to the office of the associate dean for research and graduate studies in the College of Dentistry. Applications are forwarded to the Department of Endodontics.

Applications for all programs must include the completed application form, official transcripts from all undergraduate and graduate institutions attended, three letters of recommendation, National Board Examination Scores (at least Part I, and Part II if available), an updated curriculum vitae, a personal statement, and a recent photograph.

Applicants to the M.S. program are not required to take the Graduate Record Examination. International applicants whose first language is not English must present a satisfactory score on the Test of English as a Foreign Language (TOEFL).

## Financial Support

Applicants to the M.S. and certificate programs must be able to support themselves financially until they complete the program. Prospective students should plan to pay living expenses, tuition, and costs for books, specialized equipment (e.g., surgical operating microscope, notebook computer, and ultrasonic system), instrument usage, and thesis expenses. Stipends are determined on a yearly basis and depend on availability of funding.

## Endodontics Courses

### For D.D.S. Students

<b>083:140 Endodontics Preclinical Didactic</b>	1 s.h.
Basic principles, concepts, technical procedures for treatment of pulpal problems.	
<b>083:141 Endodontics Preclinical Laboratory</b>	1 s.h.
Basic technical procedures for treatment of pulpal problems.	
<b>083:160 Clinical Endodontic Practice</b>	arr.
Clinical experience in diagnosis and treatment of routine pulpal and periradicular pathology; emergency diagnosis; treatment of patients.	
<b>083:165 Clinical Endodontic Seminar</b>	1 s.h.
Tooth pain, anesthesia, pulpal and periradicular reactions, endodontic radiologic interpretation, trauma diagnosis and treatment, surgical endodontics, endodontic implants, bleaching, retreatment, apexification/apexigenesis.	

### For Graduate Students

Also see courses listed under the Oral Sciences Program.

<b>083:225 Endodontic Literature Review I</b>	2 s.h.
Current and historical research.	
<b>083:226 Endodontic Literature Review II</b>	2 s.h.
Continuation of 083:225.	
<b>083:227 Endodontic Literature Review III</b>	2 s.h.

Continuation of 083:226.

**083:228 Endodontic Literature Review IV**

2 s.h.

Continuation of 083:227.

**083:260 Current Literature in Endodontics**

1 s.h.

Current literature relevant to endodontics, including diagnosis or treatment of endodontic cases; dental journals with endodonticrelated content; landmark research.

**083:300 Endodontic Certificate Program**

0 s.h.

Advanced endodontic clinical and didactic education; nondegree program toward eligibility for board certification in endodontics.

## Family Dentistry

**Head:** David C. Holmes

**Professors:** Ana M. Diaz-Arnold, John V. Doering, Marcos A. Vargas

**Professors emeriti:** Charles B. Sabiston Jr., Vincent D. Williams

**Associate professors:** Larry J. Squire, Richard A. Williamson

**Assistant professors:** Cheryl L. Straub-Morarend, Michael L. Spector

**Web site:** <http://www.dentistry.uiowa.edu>

The Department of Family Dentistry reinforces and refines the comprehensive approach to managing patients' oral health care needs.

## D.D.S. Student Training

The senior year of the D.D.S. program integrates basic science knowledge, clinical skills, and dental laboratory experiences acquired during the first three years of dental school into a systematic approach to providing patient care.

Students who complete their education in Family Dentistry should:

- conduct themselves in a professional and ethical manner;
- understand the principles of comprehensive dental treatment planning;
- know the medical, ethical, and legal issues involved in patient care;
- be able to recognize the need for specialty consultation;
- be competent in coordinating and sequencing patient treatments;
- be effective members of the dental team;
- be prepared to enter general practice;
- be educated and trained for licensure examination; and
- appreciate the importance and value of lifelong learning.

Students spend five days a week in a clinical setting, where they gain experience in total patient management and care. Their didactic course work builds on their previous education. All areas of clinical and didactic instruction, patient awareness, and sensitivity to patients' needs are stressed.

The department's practice management curriculum prepares students to evaluate practice locations and manage the business aspects of a dental practice.

## Family Dentistry Courses

### **114:184 Dental Practice Management** 2 s.h.

Principles of dental practice management; delivery of comprehensive dental treatment in a simulated group-practice clinical setting, with chairside dental assistants.

### **114:187 Clinical Experiences-Comprehensive Care** arr.

Clinical experiences in diagnosis, treatment planning, and delivery of integrated, comprehensive dental care.

### **114:188 Clinical Competencies-Comprehensive Care** arr.

Refinement of clinical skills, judgment, and critical self-evaluation in the delivery of integrated, comprehensive dental care.

### **114:194 Topics in Family Dentistry** 3 s.h.

Current techniques, findings; applications for general practitioner and graduate specialty programs.

### **114:195 Treatment Planning and Sequencing** 2 s.h.

Documentation of diagnostic procedures used in developing a treatment plan and sequence for selected clinical patients; student presentations.

## Hospital General Dentistry

**Head:** Kirk L. Fridrich

**Division directors:** Kirk L. Fridrich (Oral and, Maxillofacial Surgery), Robert L. Schneider (Prosthodontics)

**Assistant professors:** Lance P. Forbes, Robert L. Schneider

**Web site:** <http://www.uihealthcare.com/depts/hospitaldentistry/index.html>

The College of Dentistry operates a hospital dentistry clinical service at University of Iowa Hospitals and Clinics. The service includes divisions of general dentistry, maxillofacial prosthodontics, and oral and maxillofacial surgery, and it interacts with the college's specialties of orthodontics, periodontics, pediatric dentistry, endodontics, diagnosis, oral pathology, and prosthodontics.

The Hospital Family Dentistry Program offers a one-year general practice residency.

## Residency Program

The general practice residency program prepares dentists for a broader scope of private practice in general dentistry. The program combines clinical and didactic training on an individual basis and meets fundamental requirements of the Commission on Dental Accreditation of the American Dental Association (ADA).

The residency covers one year of hospital-based training. Through postdoctoral clinical, didactic, and hospital experience, residents prepare to meet the oral health needs of a wide range of ambulatory and nonambulatory patients. Rotations and patient experiences are divided between University of Iowa Hospitals and Clinics and the Iowa City Veterans Affairs Medical Center.

Residency training includes use of hospital resources, management of ambulatory patients, inpatients, same-day surgery patients, and emergency medical and dental patients. Residents participate in consultations with other hospital services and are assigned to appropriate hospital services to fulfill the objectives of the training program. They are appointed to the hospital's house staff and have the same privileges and responsibilities as residents in other professional education programs.

Applicants must be graduates of an accredited college of dentistry and must be eligible for licensure to practice dentistry in the United States. Graduates of foreign dental schools may be accepted if they have completed a semester-long externship at an ADA-accredited dental school or have graduated from a master's degree program or a dental specialty program at an ADA-accredited dental school. Application deadline is October 1 for the following July 1. See General Practice Residency Program for admission and application requirements.

# Operative Dentistry

**Head:** Gerald Denehy

**Professors:** Gerald Denehy, Satish Khera

**Professors emeriti:** Murray Bouschlicher, James Fuller, Devore Killip

**Adjunct professor:** Robert Margeas

**Associate professors:** Steve Armstrong, Deborah Cobb, Justine Kolker

**Associate professors emeriti:** Yvonne Chalkley, Thomas Schulein

**Clinical associate professors:** Cathia Bergeron, Sandra Guzmán-Armstrong

**Adjunct assistant professors:** Stephanie Barquist, Terry Donnelly, Richard Grunder, Jon Ryder, Jeremy Tu

**Clinical assistant professor:** Marcela Hernández

**Adjunct instructors:** Ed Fung, Lynn Griebahn, Alan Swett, Chadwin Wagener

**Graduate degree:** M.S. in Operative Dentistry

**Graduate nondegree program:** Certificate in Operative Dentistry

**Web site:** <http://www.dentistry.uiowa.edu/>

## D.D.S. Student Training

Course work and clinical experiences in operative dentistry are fundamental to the overall education of D.D.S. students. The operative dentistry curriculum is designed so that didactic material relates closely to laboratory and clinical experiences. The program prepares students to proceed independently in operative dentistry during their fourth year of training.

## Graduate and Clinical Specialty Programs

The Department of Operative Dentistry offers a Master of Science in operative dentistry and the Certificate in Operative Dentistry. The programs provide advanced training designed to prepare dentists for teaching, research, and practice. Since the American Dental Association does not recognize operative dentistry as a specialty area, graduate students have the opportunity to take courses that particularly interest them. Students earn a Master of Science and a Certificate in Operative Dentistry.

Requirements for the M.S. include satisfactory completion of 52 s.h. of graduate-level courses, preparation of an acceptable thesis based on original research, and a formal thesis defense.

Students must provide their own financial support for the graduate program, including research and thesis expenses.

Applicants to the program must be graduates of recognized schools of dentistry and must meet the admission requirements of the Graduate College. The department may request an interview with an applicant.

## Operative Dentistry Courses

### For D.D.S. Students

- |  |          |
|--|----------|
| <b>082:120 Dental Anatomy</b>  | 3 s.h.   |
| Basic dental terminology and nomenclature, human tooth morphology, creation of tooth crowns with wax.  |          |
| <b>082:122 Operative Dentistry I</b>   | 6 s.h.   |
| Principles, design of cavity preparations; placement of restorative materials; clinical simulation on dental mannequins.   |          |
| <b>082:140 Operative Dentistry II</b>  | 1 s.h.   |
| Principles, design of cavity preparations, restoration of teeth, patient management, pain control.   |          |
| <b>082:141 Operative Dentistry II Clinic</b>   | 0-3 s.h. |
| Procedures performed on operative clinic patients; based on biological principles for preparation of cavities, restoration with appropriate materials.           |          |
| <b>082:142 Esthetic Dentistry</b>  | 1 s.h.   |
| Principles of esthetic dentistry; tooth bleaching, tooth recontouring, esthetic buildups with composite resin; exercises on mannequins in the simulation clinic. |          |
| <b>082:160 Operative Dentistry III Clinic</b>  | arr.     |
| Patient treatment; amalgam, composite resin, gold; emphasis on physiological, esthetic importance of restorative treatment.                                      |          |
| <b>082:165 Operative Dentistry III Seminar</b>   | 1 s.h.   |

Clinical problems, restorative dental materials, treatment methods.

## For Graduate Students

### Discipline Studies

<b>082:224 Graduate Restorative Materials</b>	2 s.h.
Dental materials science: mechanical, physical, and chemical properties of restorative materials; selection and manipulation. Same as 084:224.	
<b>082:225 Operative Dentistry Seminar I</b>	1 s.h.
Basic concepts of cavity preparation, material placement.	
<b>082:226 Operative Dentistry Seminar II</b>	1 s.h.
Direct resin systems, bonding technology; their use in dental esthetic treatment.	
<b>082:227 Operative Dentistry Seminar III</b>	1 s.h.
Use of indirect techniques in bonded esthetic restorations.	
<b>082:228 Operative Dentistry Seminar IV</b>	1 s.h.
Principles for health professions educators.	

### Research Program

<b>082:230 Operative Dentistry Research I</b>	3 s.h.
Thesis topic selection, committee selection, literature review.	
<b>082:231 Operative Dentistry Research II</b>	2 s.h.
Thesis protocol, research.	
<b>082:232 Operative Dentistry Research III</b>	3 s.h.
Thesis research, data gathering, writing.	
<b>082:233 Operative Dentistry Research IV</b>	3 s.h.
Thesis completion, defense.	
<b>082:234 Selected Applications of Operative Dentistry</b>	arr.
Advanced techniques.	

### Clinical Studies

<b>082:240 Operative Dentistry Advanced Clinic I</b>	arr.
Materials, techniques; restoration procedures on a mannequin.	
<b>082:241 Operative Dentistry Advanced Clinic II</b>	arr.
Patient treatment in operative clinic; basic operative procedures.	
<b>082:242 Operative Dentistry Advanced Clinic III</b>	arr.
Patient treatment in operative clinic; direct-bonded esthetic restorative procedures.	
<b>082:243 Operative Dentistry Advanced Clinic IV</b>	arr.
Patient treatment in operative clinic; advanced esthetic restorative procedures.	
<b>082:244 Operative Dentistry Advanced Clinic V</b>	arr.
Patient treatment in operative clinic; advanced esthetic restorative procedures.	

**082:245 Clinical Demonstrating**

arr.

Teaching undergraduate dental students in laboratory, clinic.

**082:300 Operative Dentistry Certificate Program**

0 s.h.

Advanced dental clinical, didactic education; nondegree program toward eligibility for board certification in operative dentistry.

## Oral and Maxillofacial Surgery

**Head:** Kirk L. Fridrich

**Assistant head:** Richard G. Burton

**Director, graduate studies:** Teresa A. Morgan

**Professors:** Richard G. Burton, Kirk L. Fridrich, Daniel Lew, Charles L. Ringgold, William J. Synan

**Professor emeritus:** John Montgomery

**Associate professor:** Teresa A. Morgan

**Associate professor emeritus:** Sherwood Wolfson

**Assistant professor:** Steven Fletcher

**Graduate degree:** M.S. in Oral and Maxillofacial Surgery

**Web site:** <http://www.uihealthcare.com/depts/hospitaldentistry/index.html>

The Department of Oral and Maxillofacial Surgery combines clinical and didactic training to fit the individual interests, abilities, and development of students. Its predoctoral program is based in the College of Dentistry, with some clinical assignments in the oral and maxillofacial surgery division at University of Iowa Hospitals and Clinics. Graduate study is based primarily in the residency training program at University of Iowa Hospitals and Clinics.

### D.D.S. Student Training

The professional curriculum is designed to develop a foundation of professional knowledge, coupled with surgical skills, that will enable D.D.S. students to diagnose and manage surgical problems related to general dentistry practice. The program emphasizes high ethical standards and development of good surgical concepts and judgment.

The clinical portion of the curriculum allows students to develop surgical skills and apply the theoretical knowledge acquired in didactic courses. Theory and application of anesthesia-analgesia, intravenous sedation, and nitrous oxide analgesia techniques are presented through didactic and clinical experiences.

### Graduate and Clinical Specialty Programs

The department offers a Master of Science in oral and maxillofacial surgery and a residency program.

#### Master of Science

The Master of Science in oral and maxillofacial surgery requires five years of integrated didactic and clinical study, including a four-year residency, a research project, and preparation of a thesis. Applicants must meet the admission requirements of the Graduate College.

#### Residency Program

The four-year residency program in oral and maxillofacial surgery combines clinical and didactic training to prepare dentists for specialty practice. Every effort is made to adapt the program to the individual interests, abilities, and development of students, but it is essential that all students meet certain fundamental requirements.

The recommendations of the American Dental Association, the Committee on Graduate Training of the American Association of Oral and Maxillofacial Surgeons, and the American Board of Oral and Maxillofacial Surgery have been considered carefully in planning the structure and scope of training.

The residency period covers four years of hospital training, providing an orientation to hospital procedures, integration of basic and clinical sciences, acquisition of surgery principles, and familiarization with varied aspects of health services.

Competence in clinical oral and maxillofacial surgery requires knowledge of the basic medical sciences related to the specialty. So in addition to hospital and clinical training, residents take advanced course work in subjects such as applied pharmacology, surgical anatomy, pathology, physiology, and microbiology. They also review closely related disciplines such as roentgenology, anesthesiology, physical diagnosis, and laboratory procedures.

The assumption of increased responsibility and the opportunity for clinical and operating room experience are important aspects of residency training.

Residents gain clinical training in anesthesiology through an assigned rotation in the Department of Anesthesiology. Previous advanced training in physical diagnosis, physiology, pharmacology, and pathology take on greater clinical significance, and increased responsibility in the operating room as first assistant and surgeon further develops surgical judgment and skills.

Development and implementation of a research project under staff supervision enhance the value of the residency training.

Senior residents may be given responsibility for major oral and maxillofacial surgical cases during rotations at

University of Iowa Hospitals and Clinics and at the Iowa City Veterans Affairs Medical Center. Each fourth-year resident is assigned to a rotation as a clinical and didactic coordinator and assumes responsibility to qualify for examination by the American Board of Oral and Maxillofacial Surgery.

### Admission

Students begin the four-year program only on July 1. Applicants are selected through a post-D.D.S. dental matching program sponsored by the American Association of Oral and Maxillofacial Surgeons. The application deadline for the match in oral and maxillofacial surgery is September 1 for admission the following July. Appointments are made after the match results are revealed and the staff elects to take official action. Appointments are offered on or before February 1 for the following July.

Applicants must have graduated from an accredited college of dentistry, should be in the upper one-fourth of their graduating class, and must be eligible to be licensed to practice dentistry in the United States.

## Facilities

The University of Iowa Health Sciences Campus has outstanding basic and clinical science departments that stimulate and support scholarly research and superior clinical practice. Appropriate environments for residency training in oral and maxillofacial surgery are provided by University of Iowa Hospitals and Clinics, the College of Dentistry, the Roy J. and Lucille A. Carver College of Medicine, and the Iowa City Veterans Affairs Medical Center.

## Oral and Maxillofacial Surgery Courses

### For D.D.S. Students

**087:115 Anesthesia and Pain Control I** 1 s.h.  
Principles, techniques of complete medical history, head and neck examination, cardiovascular and respiratory examination; neuroanatomical, psychophysiological aspects of pain; pharmacologic action and techniques for using local anesthetics.

**087:130 Basic Oral and Maxillofacial Surgery** 2 s.h.  
Principles; indications, contraindications for extractions; evaluation of patient's related medical history; techniques of extraction, minor oral surgery procedures.

**087:145 Anesthesia and Pain Control II** 1 s.h.  
Theory, application, instrumentation of nitrous oxide sedation; emphasis on cardiovascular, respiratory physiology; evaluation of patients, practical techniques for nitrous oxide sedation.

**087:155 Advanced Oral and Maxillofacial Surgery** 1 s.h.  
History, examination, diagnosis, treatment of diseases and traumatic injuries of oral cavity.

**087:160 Clinical Oral and Maxillofacial Surgery** arr.  
Clinical experience at the College of Dentistry, University of Iowa Hospitals and Clinics, Veterans Affairs Iowa City Health Care System.

### For Graduate Students

**087:201 Hospital Procedures** 1 s.h.  
Hospital rules, regulations; patient, department records; information concerning hospitalized patients.

**087:202 Basic Science Review** 4 s.h.  
Head, neck anatomy; dissection; microbiology, pathology, physiology.

**087:207 Surgical Anatomy** 1 s.h.  
Head, neck structures in major oral surgery procedures; emphasis on maxillofacial problems, surgical emergencies; may include animal surgery.

**087:208 Pain and Anxiety Control** 1-3 s.h.  
Nitrous oxide; intravenous, oral, intramuscular anxiety and pain control; pharmacology of agents; complications, their management.

<b>087:209 Principles of Anesthesia</b> General anesthesia; agents and their effects on respiratory, cardiovascular systems; literature.	2 s.h.
<b>087:211 Literature Seminars and Journal Club</b>	1 s.h.
<b>087:212 Surgical Case Reports</b>	1 s.h.
<b>087:214 Roentgen Interpretation</b> Theory, technique.	2 s.h.
<b>087:215 Physical Diagnosis</b>	2 s.h.
<b>087:218 Oral Pathology Conference</b> Current clinical specimens.	1 s.h.
<b>087:225 Oral and Maxillofacial Surgery Seminar I</b>	1 s.h.
<b>087:226 Oral and Maxillofacial Surgery Seminar II</b>	1 s.h.
<b>087:227 Oral and Maxillofacial Surgery Seminar III</b>	1 s.h.
<b>087:230 Oral and Maxillofacial Surgery Research I</b> Thesis topic and review committee selection, literature review.	2 s.h.
<b>087:231 Oral and Maxillofacial Surgery Research II</b> Thesis protocol, research.	3 s.h.
<b>087:232 Oral and Maxillofacial Surgery Research III</b> Thesis research complete; data gathering.	3 s.h.
<b>087:233 Oral and Maxillofacial Surgery Thesis</b> Thesis and defense; comprehensive examination.	3 s.h.
<b>087:240 Clinical Oral and Maxillofacial Surgery I</b> Specialty and technical seminars, patient treatment; clinical practice on assigned patient problems.	arr.
<b>087:241 Clinical Oral and Maxillofacial Surgery II</b> Specialty and technical seminars, patient treatment; clinical practice on assigned patient problems.	arr.

## Oral Pathology, Radiology, and Medicine

**Head:** Steven D. Vincent

**Professors:** Michael W. Finkelstein, Axel Ruprecht, Christopher A. Squier, Steven D. Vincent, Philip W. Wertz

**Professors emeriti:** Daniel L. Hall, Harold L. Hammond, William J. Hausler

**Adjunct professors:** Eva Dahl, Thomas P. Williams

**Clinical professor:** John W. Hellstein

**Associate professor:** Karen A. Baker

**Associate professors (clinical):** Ronald D. Elvers, Cindy L. Marek, Carrie McKnight, Patricia K. Meredith

**Assistant professor emeritus:** George C. Kienzle

**Assistant professors (clinical):** Ruth D. Spieker, Sherry R. Timmons

**Adjunct assistant professors:** Joanna L. Clancy, Carolyn P. Larsen, John A. Maxwell, Daniel S. Sarasin

**Graduate degree:** M.S. in Stomatology

**Graduate nondegree programs:** Certificate in Oral and Maxillofacial Pathology, Certificate in Oral and Maxillofacial Radiology

**Web site:** <http://www.dentistry.uiowa.edu>

### D.D.S. Student Training

The department teaches D.D.S. and other health care students about diseases that manifest in and about the oral cavity. Students learn about the clinical, radiographic, laboratory, histopathologic, and therapeutic features of these diseases as well as their etiology and natural history. They also study identification of systemic diseases through physical evaluation of patients.

### Graduate and Clinical Specialty Programs

The department offers a Master of Science in stomatology with two tracks: oral and maxillofacial pathology, and oral and maxillofacial radiology. It also offers the Certificate in Oral and Maxillofacial Pathology and the Certificate in Oral and Maxillofacial Radiology.

Stomatology is the science of structure, function, and disease of the oral cavity. Study methods include examination of related histories, evaluation of clinical signs and symptoms, and use of biochemical, microscopic, and radiologic procedures to establish a diagnosis and plan for therapeutic management.

The department's programs are diverse and flexible, allowing students to obtain advanced clinical, didactic, and research-related education while pursuing a Master of Science.

Students also may choose to apply for acceptance to the College of Dentistry graduate programs in oral science (see Oral Science in the Catalog).

#### Master of Science and Certificates

The Master of Science in stomatology requires a minimum of 30 s.h. of graduate credit. Students choose one of two tracks--oral and maxillofacial pathology, or oral and maxillofacial radiology.

Students also may pursue a joint program, earning a Master of Science in stomatology and a certificate in their M.S. track area (Certificate in Oral and Maxillofacial Pathology, or Certificate in Oral and Maxillofacial Radiology). Each joint program combines the minimum requirements of the M.S. and the certificate; completion time usually is 36 to 48 months. The educational requirements of each certificate program meet the requirements for preparation of dental specialists set by the Commission on Dental Education of the American Dental Association and the American Board of Oral and Maxillofacial Pathology.

All graduate students in stomatology pursue comprehensive study of basic biologic and health sciences in preparation for teaching and research. They must complete the courses listed below, including the core courses and the basic science and departmental courses listed for their M.S. track. They also must prepare and submit a thesis based on the results of research conducted during their course of study.

#### CORE COURSES

068:199 Basic Otolaryngologic Science	2 s.h.
086:200 Stomatology Literature Review	arr.
086:226 Physical, Laboratory, and Historical Features of Disease	arr.
086:242 Clinical Oral and Maxillofacial Radiology	arr.
111:212 Statistical Methods for Dental Research	3 s.h.
151:200 Seminars in Dental Research	1 s.h.
151:210 Dental Sciences Research Methodology	2 s.h.
151:215 Research Design in Dentistry	2 s.h.

**ORAL AND MAXILLOFACIAL PATHOLOGY TRACK**

069:205-069:206 Medical Pathology I-II	10 s.h.
086:225 Manifestations of Oral and Paraoral Disease	arr.
086:227 Surgical Oral Pathology	1 s.h.
086:240 Histopathology	1 s.h.
151:275 Oral Microbiology and Immunology	2 s.h.
151:280 Advanced Dental Therapeutics	1 s.h.

**ORAL AND MAXILLOFACIAL RADIOLOGY TRACK**

069:133 Introduction to Human Pathology for Graduate Students	4 s.h.
074:220 Radiation Safety and Radiobiology	4 s.h.
077:211 Medical Physics	4 s.h.
086:243 Practical Oral and Maxillofacial Radiology	arr.
086:244 Technical Oral and Maxillofacial Radiology	arr.
086:245 Head and Neck Radiology	arr.

**Admission**

Applicants must have successfully completed an accredited program leading to the D.D.S. or D.M.D., or a foreign equivalent, and must meet the admission requirements of the Graduate College. They must have a cumulative g.p.a. of at least 3.00 (or foreign equivalent) to be considered for admission.

All applicants must take the Graduate Record Examination (GRE) General Test. International applicants whose first language is not English must present a satisfactory score on the Test of English as a Foreign Language (TOEFL).

The department's faculty makes final decisions on acceptance of applicants who meet the requirements for admission. A personal interview is required.

**Facilities**

Facilities reserved for the Department of Oral Pathology, Radiology, and Medicine include a radiology special procedures area; a surgical oral pathology laboratory; a clinical pathology laboratory with areas for histopathology, hematology, clinical chemistry, and immunology; a computer simulation area; an interpretation room; a library and a seminar room; and a tutorial laboratory for training small groups of graduate and undergraduate students.

In addition, the College of Dentistry has joint-use research laboratories that are well equipped and staffed for conducting research involving histology, histochemistry, materials technology, radiobiology, ultrastructure, and electron probe analysis and quantification.

**Oral Pathology, Radiology, and Medicine Courses****For D.D.S. Students**

<b>086:120 Fundamentals of Oral Radiology</b>	1 s.h.
Methods of clinical, radiographic examination, record keeping; correlation of basic, clinical sciences.	
<b>086:135 Oral Pathology</b>	4 s.h.
Diseases involving orofacial organs.	
<b>086:145 Introduction to Clinical Oral Radiology</b>	1 s.h.
Principles, techniques of diagnosis, radiology, clinical pathology in clinical practice.	
<b>086:155 Systemic Disease Manifestations</b>	1 s.h.
Clinical medicine for dental students; basic information for patient evaluation.	
<b>086:160 Clinical Oral Diagnosis</b>	1 s.h.
Diagnosis of orofacial diseases by clinical, laboratory, radiographic and treatment planning methods; clinical case analysis.	

- 086:161 Clinical Oral Radiology** arr.  
Making and processing intraoral, extraoral radiographs; principles of radiographic interpretation.
- 086:165 Clinical Oral Pathology** 1 s.h.  
Oral and maxillofacial diseases: integration of the clinical, historical, radiographic features; therapeutic management.

## For Graduate Students

- 086:200 Stomatology Literature Review** arr.  
Current literature in oral and maxillofacial pathology and radiology; presentation of graduate student research; development of lectures or seminars for D.D.S. or graduate students, or continuing education for peers and practicing dentists.
- 086:225 Manifestations of Oral and Paraoral Disease** arr.  
Clinical experience in diagnosing, managing patients.
- 086:226 Physical, Laboratory, and Historical Features of Disease** arr.  
Head and neck diseases, abnormalities.
- 086:227 Surgical Oral Pathology** 1 s.h.  
Experience in day-to-day operations of surgical oral pathology laboratory; advanced training in histopathologic diagnosis of oral and maxillofacial diseases. Repeatable. Corequisites: 086:240, if not taken as a prerequisite.
- 086:228 Introduction to Surgical Oral Pathology** 1 s.h.  
Day-to-day operations of surgical oral pathology laboratory; histopathologic diagnosis of oral and maxillofacial diseases. Repeatable.
- 086:230 Research in Oral Pathology, Radiology, and Medicine** arr.  
Includes thesis preparation.
- 086:238 Introduction to Histopathology** 1 s.h.  
Case studies; histopathologic diagnosis of diseases that affect oral and maxillofacial region. Repeatable.
- 086:240 Histopathology** 1 s.h.  
Case studies; advanced training in histopathologic diagnosis of diseases that affect oral and maxillofacial region. Repeatable. Corequisites: 089:202, if not taken as a prerequisite.
- 086:241 Hospital Oral Pathology, Radiology, and Medicine** arr.  
Management of patient consultations, diagnosis, therapy at a hospital-based dental service.
- 086:242 Clinical Oral and Maxillofacial Radiology** arr.  
Radiologic manifestations of diseases; emphasis on craniofacial complex.
- 086:243 Practical Oral and Maxillofacial Radiology** arr.  
Clinic participation; supervision of dental and dental hygiene students, review of their cases; participation in clinical radiology conferences, laboratory exercises.
- 086:244 Technical Oral and Maxillofacial Radiology** arr.  
Experience with technical maintenance of darkroom, clinical equipment; troubleshooting under supervision of radiology staff.
- 086:245 Head and Neck Radiology** arr.  
Hospital-based rotation in diagnostic radiology with participation in interpretation sessions; CT, MRI, nuclear medicine, ultrasound.
- 086:246 Craniofacial Radiology** arr.

Hospital-based rotation in diagnostic radiology; exposure to interpretive sessions on ultrasound, CT, MRI, nuclear medicine.

**086:256 Advanced Oral Pathology**

arr.

Diseases involving orofacial organs; emphasis on bibliographic research, biodynamic analysis of pathologic processes, diagnostic interpretation; content adapted to student interests.

**086:300 Oral Pathology Certificate Program**

0 s.h.

Advanced dental clinical and didactic education; nondegree program toward eligibility for board certification in oral and maxillofacial pathology.

**086:301 Oral Radiology Certificate Program**

0 s.h.

Advanced dental clinical, didactic education; nondegree program toward eligibility for board certification in oral and maxillofacial radiology.

## Oral Science

**Director:** Christopher Squier  
**Graduate degrees:** M.S., Ph.D. in Oral Science  
**Web site:** <http://www.dentistry.uiowa.edu>

## Graduate Programs

The College of Dentistry offers programs of study leading to the Master of Science and the Doctor of Philosophy in oral science. The Departments of Endodontics, Periodontics, Prosthodontics, and Oral Pathology, Radiology, and Medicine offer programs leading to graduate degrees in oral science; see their department sections in the Catalog for more information.

The M.S. and Ph.D. programs require that students complete courses from a core curriculum and conduct independent research leading to a thesis. They are intended to prepare graduates for careers in teaching and research.

### Master of Science

The M.S. in oral science requires a minimum of 30 s.h. of graduate credit, including 21 s.h. of course work, 9 s.h. of independent research leading to a thesis, and a final examination. M.S. students must spend at least two years in full-time residence. Students also involved in a two-year advanced clinical program should complete the M.S. and certificate programs by the end of a third year of study.

Students pursuing the M.S. normally must be enrolled in a clinical training program offered by a College of Dentistry department.

### Doctor of Philosophy

The Ph.D. in oral science requires a minimum of 72 s.h. of graduate credit including advanced course work and original research that culminates in successful defense of a dissertation. Students must pass a comprehensive examination, prepare and gain approval of a research prospectus, and complete and successfully defend a dissertation that describes the results of the research. Completion of the program usually requires at least four years of full-time study.

### Admission

Applicants to the M.S. and Ph.D. programs must hold a dental degree and must meet the admission requirements of the Graduate College. Applicants whose first language is not English must score at least 550 (paper-based) or 213 (computer-based) on the Test of English as a Foreign Language (TOEFL); they also may be asked to take the Test of Spoken English.

Programs normally begin July 1 each year.

Applicants to the Ph.D. program are asked to submit a statement describing past research experience and current research interests, and stating how completion of the Ph.D. program fits their career goals.

A personal interview may be requested for either program.

## Oral Science Courses

- |   |        |
|---|--------|
| <b>151:200 Seminars in Dental Research</b>  | 1 s.h. |
| <b>151:210 Dental Sciences Research Methodology</b><br>Practical, experimental procedures in dental research; literature and design; writing of research protocols. Offered summer session.   | 2 s.h. |
| <b>151:212 Statistical Methods for Dental Research</b><br>Descriptive methods, elementary probability, distributions, populations and samples, methods for analyzing percentage data and paired and unpaired measurement data, regression, correlation, and analysis of variance. | 3 s.h. |
| <b>151:215 Research Design in Dentistry</b><br>Types of studies used in dentistry; design validity; sampling methodologies; major descriptive and experimental designs used in dental research; application of statistical tests to these designs. Offered spring semester.       | 2 s.h. |
| <b>151:220 Pathophysiology of Skin and Oral Mucosa</b>  | 2 s.h. |

Biology of skin, oral mucosa; changes in behavior of the tissues in varied physiological, pathological conditions. Offered spring semesters of even years. Prerequisites: 151:210.

**151:230 Pathophysiology of Salivary Glands and Saliva** 2 s.h.  
Innervation, structure, function of glands; their secretions in health and disease, their role in oral environment. Offered spring semesters of odd years. Prerequisites: 151:210.

**151:240 Pathophysiology of the Pulp-Dentin Complex** arr.  
Biology of tissue; emphasis on pathological changes. Offered spring semesters of even years. Prerequisites: 151:210.

**151:250 Current Concepts of Cariology** 2 s.h.  
Etiology of dental caries; pathogenesis, development of preventive measures. Offered spring semesters of odd years. Prerequisites: 151:210.

**151:260 Bone and Tooth Support Structure and Implants** 2 s.h.  
Biology of bone and periodontal structures; biologic basis for therapeutic use of dental implants. Offered fall semesters of odd years.

**151:275 Oral Microbiology and Immunology** 2 s.h.  
Principles of microbiology and immunology, aspects of microbial community development in the oral cavity, basic concepts of host/parasite interactions related to development of oral diseases; biological, immunological, and clinical manifestations induced by major oral pathogens. Offered spring semesters of odd years. Requirements: microbiology, biochemistry, and biology. Recommendations: immunology.

**151:280 Advanced Dental Therapeutics** 1 s.h.  
Antimicrobial, analgesic, related therapies; emphasis on drug/drug interactions, dental implications of chronic cardiovascular and central nervous system medications. Offered fall semesters.

**151:600 Research in Oral Science** arr.  
Thesis research. Requirements: oral science M.S. or Ph.D. candidacy.

**151:610 Independent Study** arr.  
Independent study supervised by a faculty mentor.

## Orthodontics

**Head:** Thomas E. Southard

**Professors:** Samir E. Bishara, John S. Casco, Andrew C. Lidral, Thomas E. Southard, Robert N. Staley

**Professor emeritus:** William Olin

**Associate professor:** Steven D. Marshall

**Assistant professors:** Michael A. Callan, Lina Maria Moreno Uribe, Clayton T. Parks

**Graduate degree:** M.S. in Orthodontics

**Graduate nondegree program:** Certificate in Orthodontics

**Web site:** <http://www.dentistry.uiowa.edu>

## D.D.S. Student Training

The professional program in orthodontics prepares general practitioners of dentistry to competently recognize, diagnose, and treat limited malocclusions of the teeth.

Lecture courses guide D.D.S. students in learning basic concepts of dental and facial growth, as well as treatment-oriented subject matter. In a laboratory course, students take and evaluate diagnostic records and fabricate treatment appliances. The department supervises a program for clinical treatment of selected patients.

## Graduate and Clinical Specialty Programs

The department offers a Master of Science in orthodontics and the Certificate in Orthodontics.

The graduate program in orthodontics educates competent individuals to practice orthodontics and dentofacial orthopedics. The program's objectives are to provide students with an in-depth education in biological and biomechanical principles related to orthodontics; to teach students to diagnose, plan, and deliver comprehensive orthodontic health care service; and to develop students' research and service skills.

Opportunities are available for research and independent study in the department, and there are special facilities for research in biomechanics and craniofacial growth. Interaction with other departments provides learning and research opportunities in surgical orthodontics, cleft lip and palate treatment, speech pathology, animal experimentation, and human growth.

### Master of Science and Certificate

The Master of Science requires a minimum of 30 s.h. of graduate credit. Students must satisfactorily complete a thesis based on an original research project to qualify for an M.S. in addition to the Certificate in Orthodontics.

Satisfactory completion of 24 months of intensive study, including lecture courses, seminars, clinical practicum, and a research paper, qualifies students to receive the Certificate in Orthodontics.

### Admission

Applicants must have a D.D.S. or equivalent and must meet the admission requirements of the Graduate College. Application deadline is September 1 for entry the following July 1. Applicants are required to come to the University for interviews with department faculty.

## Orthodontics Courses

### For D.D.S. Students

- |   |        |
|---|--------|
| <b>089:115 Growth and Development</b>   | 1 s.h. |
| Normal human growth and development; emphasis on craniofacial region.   |        |
| <b>089:135 Orthodontic Laboratory</b>   | 1 s.h. |
| Limited care case diagnosis and treatment.  |        |
| <b>089:136 Orthodontic Treatment</b>  | 1 s.h. |
| From patient management to use of appliances for correcting some malocclusions in the general practitioner's office.  |        |
| <b>089:170 Orthodontic Clinic</b>   | arr.   |
| Experience in diagnosis, treatment planning implementation; work with patients who have malocclusions appropriate for treatment by undergraduate students; record taking; diagnosis and treatment; may include appointments during summer months. |        |

**For Graduate Students**

<b>089:200 Control Theory and Craniofacial Morphogenetic Systems</b>	1 s.h.
<b>089:201 Orthodontic Theory: Diagnosis and Treatment Plan</b> Diagnosis, treatment planning implementation.	2 s.h.
<b>089:202 Diagnosis and Treatment Planning</b> Literature concerning orthodontic diagnosis; treatment of particular problems; case histories of patients treated in graduate clinic.	2 s.h.
<b>089:203 Advanced Orthodontic Technique</b> Skills for treatment of disfiguring malocclusions; use of edgewise biomechanical therapy; laboratory focus on typodont exercises.	arr.
<b>089:204 Biomechanics</b>	arr.
<b>089:205 Facial Growth</b> Theories, processes; use of accepted facial growth concepts in treatment of individuals with malocclusions during active growth period.	1-2 s.h.
<b>089:207 Case Analysis</b> Literature on diagnosis, treatment of mixed dentition patients; case histories of patients treated by serial extraction procedure.	arr.
<b>089:209 Orthodontic Practicum</b> Clinical practice.	arr.
<b>089:210 Orthodontic Seminar</b> Evaluation, discussion, criticism, defense of diagnostic and treatment approaches to orthodontic cases that need, are undergoing, or have completed orthodontic treatment.	arr.
<b>089:211 Problems: Orthodontics</b>	arr.
<b>089:212 Research: Orthodontics</b>	arr.
<b>089:215 Orthodontic Journal Club</b> Current biological, technical publications.	arr.
<b>089:216 Practice Management</b> Business management of orthodontic practice; solo practice, associateship, partnership, practice corporation.	arr.
<b>089:217 Cephalometrics</b> Use of skull X-ray (lateral and/or postero-anterior) in formulating orthodontic diagnosis, treatment plans for malocclusions; cephalometrics as a tool for craniofacial structure research.	arr.
<b>089:220 Craniofacial Anatomy</b> Literature on anatomy, phylogeny, ontogenesis, physiology of craniofacial structures.	arr.
<b>089:221 Surgical Orthodontic Seminar</b> Evaluation, discussion, criticism, defense of diagnostic and treatment approaches to orthodontic cases that need, are undergoing, or have completed surgical-orthodontic treatment.	1 s.h.
<b>089:300 Orthodontic Certificate Program</b> Clinical and didactic education toward eligibility for board certification in orthodontics.	0 s.h.
<b>089:400 Dental Treatment of Maxillofacial Deformities</b>	2 s.h.

**089:401 Seminar: Maxillofacial Rehabilitation**

1 s.h.

## Pediatric Dentistry

**Chair:** Rebecca L. Slayton

**Professors:** David C. Johnsen, Michael J. Kanellis, James S. Wefel

**Professors emeriti:** Clemens A. Full, Stephen J. Goepferd, Arthur J. Nowak, Jimmy R. Pinkham, Jerry D. Walker

**Associate professor emerita:** Cynthia K. Christensen

**Clinical associate professors:** Richard M. Burke Jr., Tad R. Mabry

**Assistant professor:** Karin Weber-Gasparoni

**Adjunct clinical assistant professors:** Erik Balster, Matthew Geneser, Natalie Ghosheh, Pollyanne Iben, Steve Kelly, Michael Mathews, Thomas Maurice, Edward Rick, Michael Stufflebeam

**Assistant-in-instruction:** M. Catherine Skotowski

**Graduate nondegree program:** Certificate in Pediatric Dentistry

**Web site:** <http://www.dentistry.uiowa.edu/public/clinics/pedo/pedsgp.html>

The Department of Pediatric Dentistry instructs D.D.S. and graduate students in the prevention and treatment of dental diseases in children. Instruction combines didactic, laboratory, and clinical experiences and gives special consideration to reviewing current literature and managing dental problems of children with special health care needs. It also emphasizes efficient treatment through proper use of dental auxiliary personnel and record management.

## D.D.S. Student Training

All second-year D.D.S. students participate in a one-semester lecture course that includes preclinical exercises in the Simulation Clinic. Third-year D.D.S. students participate in a clerkship, which includes a lecture course and a clinical course. During their fourth year, D.D.S. students treat patients in the department's outreach clinics.

## Clinical Specialty Program

The Department of Pediatric Dentistry offers the Certificate in Pediatric Dentistry. The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

### Certificate

The Certificate in Pediatric Dentistry is a two-year residency program that prepares students for certification by the American Board of Pediatric Dentistry. Certificate students are trained in all phases of pediatric dentistry and have career choices in practice, education, or research. Special emphasis is placed on development of leadership skills and strategies for serving vulnerable populations.

Approximately 50 percent of the graduate program is devoted to advanced clinical activity, 30 percent to didactic courses and practice teaching, and 20 percent to original research. The program includes a core of didactic, clinical, and research-oriented courses supplemented by electives determined by students' individual interests. Development of a minor subject area is recommended.

Close associations with the Department of Pediatrics in the Roy J. and Lucille A. Carver College of Medicine, the Center for Disabilities and Development, and University of Iowa Hospitals and Clinics permit emphasis on oral rehabilitation under general anesthesia, instruction in physical diagnosis, and management of children with developmental disabilities.

### Admission

Prospective students apply through the American Dental Education Association PASS program. Applicants must meet the admission requirements of the Graduate College.

### Financial Support

Stipends for the two-year program are provided by federal sources.

## Research Opportunities

Clinical and laboratory research projects have financial support from federal agencies and other sources. Major research areas include cariology, dental materials, dentistry for persons with special health care needs, growth and development, fluoride therapy, child behavior management, prevention, and access to care.

## Faculty

Faculty members hold numerous national and state offices, committee memberships, consultantships, and honors in professional organizations. They serve as reviewers for professional journals and federal granting agencies. They also

participate regularly in continuing education programs for dentists and other health science personnel. Ten of the department's faculty members are diplomates of the American Board of Pediatric Dentistry.

## Pediatric Dentistry Courses

### For D.D.S. Students

**090:140 Pediatric Dentistry Diagnosis and Treatment** 3 s.h.  
Growth and development, behavior management, diagnostic-preventive-restorative techniques for pediatric patients.

**090:160 Clinical Pediatric Dentistry** arr.  
Comprehensive clinical management of pediatric patients.

**090:165 Clinical Seminar in Pediatric Dentistry** 1 s.h.  
Patient management, case histories, treatment philosophies, issues in contemporary dentistry for children.

### For Graduate Students

**090:220 Social, Cultural, and Public Health Issues in Pediatric Dentistry** 1 s.h.

**090:300 Pediatric Dentistry Certificate Program** 0 s.h.  
Advanced dental clinical and didactic education; nondegree program toward eligibility for board certification in pediatric dentistry.

## Periodontics

**Head:** Georgia K. Johnson

**Professors:** Kim Brogden, Georgia K. Johnson

**Professors emeriti:** William R. Grigsby, Frank J. Kohout, Phillip A. Lainson, William C. Rubright

**Adjunct professor:** Jason Mailhot

**Clinical professor:** Lewis Humbert

**Associate professors emeriti:** Paul J. Collins, Benny F. Hawkins

**Clinical associate professor:** Steven H. Clark

**Adjunct assistant professors:** Brandon Baillie, Guy Bilek, Stephen Cooper, James Fili, Michael Franzman, Adrienne Gunstream, Allen Kvidera, Quinn Morarend,

Brian Recker, Ann Romanowski, Jo Rummelhart, Duane Weenig

**Clinical assistant professors:** Kumar Neppalli, Paula Weistroffer

**Assistant-in-instruction:** Nancy A. Slach

**Graduate degree:** M.S. in Oral Science

**Graduate nondegree program:** Certificate in Periodontics

**Web site:** <http://www.dentistry.uiowa.edu>

### D.D.S. Student Training

The professional periodontal program for D.D.S. students combines didactic, laboratory, and clinical experience and applies the biological concepts of periodontology to the comprehensive clinical management of patients who have periodontal diseases.

## Graduate and Clinical Specialty Programs

The Department of Periodontics offers a program leading to a Master of Science in oral science. It also offers the Certificate in Periodontics. Students may pursue the M.S. in conjunction with the certificate.

### Master of Science

The Master of Science in oral science requires a minimum of 30 s.h. of graduate credit and 36 months of full-time study, including satisfactory completion of required and elective courses, preparation and defense of an acceptable thesis based on original research, and satisfactory completion of comprehensive written and oral examinations.

### Certificate

The Certificate in Periodontics requires 36 months of full-time study, including satisfactory completion of required and elective courses, satisfactory completion of comprehensive written and oral examinations, and an acceptable literature review or research paper. Opportunities are provided for experience in clinical and basic research.

The certificate program provides a sound foundation for the clinical practice of periodontics. It meets all requirements of the Commission on Dental Accreditation of the American Dental Association for advanced dental education programs in periodontics. It also meets eligibility requirements for certification by the American Board of Periodontology.

### Admission

Applicants to graduate study in periodontics must have a D.D.S. or equivalent and must meet the admission requirements of the Graduate College. Applicants must take the National Dental Board Examination and must interview with the department.

### Financial Support

Applicants must be financially prepared for uninterrupted studies.

## Facilities

The department has 20 modern, well-equipped operatories devoted exclusively to periodontics. Hospital experience is available to students in the nearby University of Iowa Hospitals and Clinics and the Iowa City Veterans Affairs Medical Center.

Research facilities include collegiate laboratories in histology, microscopy, biomaterials, quantitation, tissue culture, molecular biology and biochemistry, and microbiology, as well as animal facilities. Other facilities are available by arrangement with University of Iowa Hospitals and Clinics, Eckstein Medical Research Building, Medical Laboratories, and the Iowa City Veterans Affairs Medical Center.

## Periodontics Courses

**For D.D.S. Students**

<b>092:140 Periodontic Methods I</b> Normal periodontium, gingivitis, periodontitis, diagnosis, prognosis, treatment planning.	2 s.h.
<b>092:141 Periodontic Methods II</b> Initial phase of periodontal therapy, treatment of acute periodontal problems, overview of surgical procedures.	1 s.h.
<b>092:160 Periodontics</b> Comprehensive clinical management of periodontal patients.	arr.
<b>092:165 Periodontology</b> Comprehensive concepts of periodontology, clinical management of patients.	1-2 s.h.

**For Graduate Students**

<b>092:207 Practice Teaching in Periodontics</b> Experience in lecturing, directing seminars, clinical teaching.	arr.
<b>092:208 Recent Advances in Periodontics</b>	arr.
<b>092:212 Applied Oral Microbiology</b> Microbiology applied to oral health problems.	arr.
<b>092:225 Periodontology Literature Review I</b>	arr.
<b>092:226 Periodontology Literature Review II</b>	arr.
<b>092:227 Periodontology Literature Review III</b>	arr.
<b>092:228 Periodontology Literature Review IV</b>	arr.
<b>092:300 Periodontic Certificate Program</b> Advanced dental clinical and didactic education; nondegree program toward eligibility for board certification in periodontics.	0 s.h.

## Preventive and Community Dentistry

**Head:** Daniel Caplan

**Professors:** Daniel Caplan, Peter Damiano, Deborah Dawson, Jed Hand, Raymond Kuthy, Steven Levy, Elaine Smith, John Warren

**Professors emeriti:** Henrietta Logan, Nelson Logan

**Adjunct professor:** Rhys Jones

**Clinical professor:** Howard Cowen

**Associate professors:** Marsha Cunningham, Teresa Marshall, Derek Willard

**Associate professors emeriti:** Howard Field, Hermine McLeran, Lawrence Peterson, Jamie Sharp

**Assistant professor:** Michelle McQuistan

**Adjunct assistant professors:** Julie Eichenberger-Gilmore, Betsy Momany, Fang Qian

**Clinical assistant professors:** Erin Lacey, Marco Rouman

**Graduate degree:** M.S. in Dental Public Health

**Web site:** <http://www.dentistry.uiowa.edu>

## D.D.S. Student Training

Programs in preventive, community, and geriatric dentistry are designed to increase D.D.S. students' awareness of preventive dental practices, aspects of dental practices affected by community factors, and care of compromised adult patients.

Community dentistry programs give students opportunities to interact with health care teams and the public in Iowa and worldwide. The department conducts off-site community programs statewide, nationwide, and worldwide. It also operates the Special Care Clinic, which is housed in the Dental Science Building.

Using the community dentistry programs as the classroom, D.D.S. students observe and participate in a variety of activities that nurture their awareness of the societal obligations they must assume in order to become effective practitioners.

## Graduate Program

The Department of Preventive and Community Dentistry offers a Master of Science in dental public health.

### Master of Science

The Master of Science in dental public health requires 40 s.h. of course work and is designed to be completed in two academic years of full-time study. It prepares dentists and dental hygienists to be specialists in dental public health. The program emphasizes research and requires a research project culminating in the completion and defense of a thesis. Successful dentist graduates meet the educational requirements for eligibility for the certifying examination of the American Board of Dental Public Health.

Applicants must meet the admission requirements of the Graduate College.

## Preventive and Community Dentistry Courses

### For D.D.S. Students

#### **111:116 Fundamentals of Clinical Dentistry** 1 s.h.

Identification of health and disease in the mouth; practical methods of disease control, philosophy of preventive dentistry; patient assessment, clinical diagnosis.

#### **111:117 Cariology and Preventive Therapies** 2 s.h.

Multifactorial etiology of dental caries; support data for use of fluorides, sealants, antimicrobials, and plaque control mechanisms in prevention of caries. Prerequisites: 111:116.

#### **111:118 Preventive Dentistry, Communication, and Patient Care** 3 s.h.

Patient oral assessment, communication, patient management skills; preventive dentistry risk assessment, oral hygiene instruction for collegiate recall patients; skills in instrumentation for detection, removal of calculus deposits. Prerequisites: 111:116 and 111:117.

#### **111:145 Clinical Preventive Dentistry** 0-2 s.h.

Experience providing complete prophylaxis and preventive services for college patients; application of nutrition principles and communication skills in a clinic setting. Prerequisites: 111:118.

#### **111:160 The Practice of Dentistry in the Community I** 1-2 s.h.

Issues related to the role of the dental professional at a local and state level, including dental public health, health literacy, cultural competency, and forensic dentistry; the role of the state dental director.

**111:161 The Practice of Dentistry in the Community II** 1-2 s.h.

Factors that affect the profession and practice of dentistry, including basics of health care systems in the U.S. and in other countries; health care reform; Medicaid; dental insurance; health care delivery systems; legal and malpractice issues; dental utilization and dental workforce; quality of care.

**111:185 Broadlawns Medical Center** arr.

Dental care to low-income patients in a metropolitan hospital-based clinic; community-related assignments; student team experience in Des Moines.

**111:186 Colorado Migrant Program** arr.

Experience providing primary dental care and outreach services to a migrant population; broad understanding of needs, resources for migrant, low-socioeconomic populations.

**111:187 Community Health Care: Davenport** arr.

Experience providing dental care at medical-dental ambulatory health care facility serving Scott County; community-related assignments.

**111:188 St. Lukes-Dental Health Center** arr.

Experience providing clinical and outreach services for low-income children and adults with developmental disabilities at St. Luke's Hospital, Cedar Rapids; operative and behavioral dental problems, hospital protocol, special needs of low-socioeconomic clients.

**111:189 Geriatrics and Special Needs Program** arr.

Experience in Special Care Clinic and Geriatric Mobile Dental Unit; comprehensive care for medically, physically, cognitively compromised adults, including frail elderly nursing home residents with portable equipment, other underserved populations.

**111:191 Private Practice Preceptorship** arr.

Development of skills and knowledge necessary for day-to-day practice of dentistry; experience at selected preceptor sites in Iowa.

**111:194 Special Field Clinic** arr.

Extramural experiences developed according to student needs, extramural opportunities.

**111:196 Siouxland Community Health Center** arr.

Experience providing dental care at medical/dental ambulatory health care facility; community-related assignments.

## **For Graduate Students**

**111:200 Introduction to Dental Public Health** 2 s.h.

Science, philosophy, practice of dental public health.

**111:201 Literature Review Methods: Dental Public Health** 2 s.h.

Concepts and process of literature review, particularly in area of student's interest.

**111:202 Research Protocol Seminar** 2 s.h.

Development of a master's thesis protocol; identification of thesis topic, review of relevant literature, development of research methods, writing.

**111:203 Independent Study: Dental Public Health** 1-3 s.h.

**111:204 Principles of Oral Epidemiology** arr.

Retrospective, prospective, cohort study designs; validity and reliability; distribution and determinants of oral diseases--caries, periodontal diseases, oral cancer, malocclusion, fluorosis, HIV infection, tooth loss, edentulism.

- 111:205 Administration of Public Dental Programs** 2 s.h.  
Application of general management concepts; practical aspects of planning, financing, staffing, implementing, operating, evaluating dental public health programs at federal, state, local levels.
- 111:206 Preventive Programs in Dental Public Health** 2 s.h.  
Prevention, control methods for major dental conditions, primarily dental caries, periodontal diseases; clinical efficacy, cost-effectiveness; development of comprehensive preventive oral health plan for a community.
- 111:208 Field Experience in Dental Public Health** arr.  
Arranged with public and voluntary health agencies according to students' and agencies' needs.
- 111:209 Advanced Field Experience in Dental Public Health** 1-3 s.h.  
Opportunity to research, develop, and implement programmatic objectives with local, state, national, and/or federal agencies and organizations on an issue that is both relevant to the student and the agency; may require off-site visits to agencies or organizations. Prerequisites: 111:208.
- 111:211 Thesis: Dental Public Health** arr.  
Protocol preparation; data collection, analysis, organization; writing, defense of research.
- 111:212 Statistical Methods for Dental Research** 3 s.h.  
Descriptive methods, elementary probability, distributions, populations and samples, methods for analyzing percentage data and paired and unpaired measurement data, regression, correlation and analysis of variance.
- 111:214 Dental Care Policy and Financing** 2 s.h.  
Dental financing and policy issues: payment mechanisms for health care service providers, third-party prepayment plans, salaried and public-financed programs, Medicaid and Medicare programs, dental insurance systems, and care of the underserved.
- 111:215 Introduction to Statistical Computing** 1 s.h.  
Use of statistical packages on a personal computer for data management and analysis. Offered fall semesters of even years.
- 111:217 Teaching Methods and Evaluation** 2 s.h.  
Philosophies of dental education, teaching methodologies, evaluation; focus on learning to write educational objectives, writing and analyzing exam items.
- 111:218 Clinical Teaching Practicum: Preventive Dentistry** arr.  
Teaching experience in preventive dentistry clinic setting with first-year dental students; outcomes focused on methods in clinical teaching, evaluation, and remediation.
- 111:230 Geriatric Care I** 2 s.h.  
Aging in humans, with emphasis on oral cavity; issues and problems of oral health care in older adults.
- 111:231 Geriatric Care II** 2 s.h.  
Issues and problems related to oral health care in older adults, especially the frail or functionally dependent.
- 111:300 Dental Public Health Certificate** arr.  
Dental public health certificate. Requirements: D.P.H. M.S. Program participation.

# Prosthodontics

**Head:** Galen B. Schneider

**Professors:** Steven A. Aquilino, Ronald L. Ettinger, Galen B. Schneider, Clark M. Stanford

**Professors emeriti:** William E. LaVelle, Forrest R. Scandrett, Max L. Smith, Keith E. Thayer

**Clinical professor:** Robert L. Schneider

**Associate professors:** James M.S. Clancy, Terry L. Lindquist

**Adjunct associate professor:** Michael J. Lattner

**Clinical associate professors:** Robert J. Luebke, Peter S. Lund

**Assistant professors:** Emad Estafanous, David G. Gratton, Yong-Joon Ko

**Adjunct assistant professors:** David R. Fritz, John W. Helscher

**Clinical assistant professors:** Paul Aubrey, Yung-Shen Huang, Lawrence R. Huber

**Adjunct instructors:** Frederick R. Drexler, Maria T. Locher-Claus

**Graduate degree:** M.S. in Oral Science

**Graduate nondegree program:** Certificate in Prosthodontics

**Web site:** <http://www.dentistry.uiowa.edu>

Prosthodontics is the dentistry specialty involving crowns, fixed partial dentures (bridges), removable partial dentures, complete dentures, maxillofacial prostheses, and implant prostheses.

## D.D.S. Student Training

Instruction in the Department of Prosthodontics provides D.D.S. students with the basic principles, practices, and concepts of prosthodontics required for the practice of general dentistry, through laboratory projects and treatment of patients with differing prosthodontic needs.

## Graduate and Clinical Specialty Programs

The Department of Prosthodontics offers programs leading to a Master of Science and a Doctor of Philosophy in oral science. It also offers the Certificate in Prosthodontics. All students enroll in the certificate program and may choose to pursue a graduate degree as well.

### Master of Science, Doctor of Philosophy

The Master of Science in oral science requires a minimum of 30 s.h. of graduate credit; the Doctor of Philosophy requires a minimum of 72 s.h. of graduate credit. The programs prepare individuals for careers in dental education and research and for independent study and professional growth.

The graduate curriculum includes more courses in the biomedical sciences and research methodology than are required for the Certificate in Prosthodontics. Students must prepare and defend a thesis (M.S.) or dissertation (Ph.D.) based on original research. Facilities and support personnel for research are available through the college's Dows Institute for Dental Research. For more information, see Oral Science in the Catalog.

### Certificate

The Certificate in Prosthodontics requires a minimum of 34 months of study. It prepares individuals for specialty clinical practice in the discipline. The curriculum includes didactic courses and clinical training in all of the disciplines that make up the broad specialty of prosthodontics, including implant prosthodontics, maxillofacial prosthetics, and treatment of temporomandibular disorders. Patient care is completed in close collaboration with the other dental specialties. Clinically related basic science instruction complements the clinical curriculum.

The certificate program is accredited by the Commission on Dental Accreditation of the American Dental Association. Successful completion of the program satisfies the formal training requirement for eligibility for the American Board of Prosthodontics certification examination.

### Admission

Applicants to the M.S., Ph.D., and certificate programs must meet the admission requirements of the Graduate College. They must hold a D.D.S. or a D.M.D. from a dental school accredited by the American Dental Association or an equivalent degree.

The certificate program begins around July 1 each year. Applications are accepted year-round; those received by September 1 are considered for admission the following July. A personal interview is required for qualified applicants.

## Facilities

Most didactic, clinical, and laboratory instruction and patient treatment takes place in the Department of Prosthodontics, which is located in the Dental Science Building. The building also houses the Doctor of Dental Surgery

(D.D.S.) program, training programs in specialties recognized by the American Dental Association, and the Dows Institute for Dental Research.

The college and the department provide supporting technologies that include cone beam CT radiography, implant imaging software, laboratory CAD/CAM systems, laser surgery, clinical operating microscopes, and digital shade matching.

Advanced prosthodontic students spend time at University of Iowa Hospitals and Clinics and the Iowa City Veterans Affairs Medical Center, where they work closely with medical professionals in other disciplines to treat medically compromised prosthodontic patients and those who require maxillofacial rehabilitation.

## Prosthodontics Courses

### For D.D.S. Students

**084:122 Occlusion and Complete Dentures Lecture** 2 s.h.

Basic principles and clinical application of occlusion; basic principles, clinical steps, and laboratory procedures necessary for fabrication of complete dentures.

**084:123 Occlusion and Complete Dentures Lab** 2 s.h.

Laboratory exercises illustrating the principles of occlusion; projects simulating the clinical and laboratory steps in complete denture fabrication.

**084:140 Fixed Prosthodontic Lecture I** 2 s.h.

Basic biomechanical principles of fixed prosthodontics; metal, single-unit, multiple-unit fixed prostheses; diagnosis and treatment planning for the partially edentulous patient, including occlusion and esthetic concerns.

**084:141 Fixed Prosthodontic Patient Simulation I** 2 s.h.

Laboratory exercises in fabrication of single-unit metal, provisional restorations; preparations for fabrication of a three-unit fixed partial denture.

**084:142 Fixed Prosthodontics Lecture II and Removable Partial Denture Lecture** 2 s.h.

Principles, clinical steps, materials, and laboratory procedures necessary for fixed and removable partial dentures; lecture format.

**084:143 Fixed Prosthodontics Lab II and Removable Partial Denture Lab** 2 s.h.

Participation in projects and seminars simulating the clinical and laboratory steps in fixed and removable partial denture fabrication.

**084:146 Introduction to Implant Dentistry** 2 s.h.

Fundamental principles of osseointegration, diagnosis and treatment planning, surgical and prosthodontic protocols, laboratory communications introduced through patient simulation.

**084:160 Prosthodontic Clinic** arr.

Experience supplemented by individual supervision, demonstration.

**084:165 Prosthodontic Seminar** 2 s.h.

Knowledge in biological, basic sciences and technique applied to clinical fixed and removable prosthodontics procedures.

### For Graduate Students

**084:220 Fixed Prosthodontics Literature Review I** arr.

Fixed prosthodontic procedures; assigned readings, discussion of related research.

**084:221 Fixed Prosthodontics Literature Review II** arr.

Porcelain-fused-to-metal and ceramic restorations, color science and esthetics; assigned readings, discussion of related research.

**084:222 Implant Literature Review** arr.

Implant prosthodontics; assigned readings, discussion of related research.

**084:223 Occlusion Seminar**

arr.

Occlusion and the temporomandibular system; assigned readings and discussion of related research.

**084:224 Graduate Restorative Materials**

2 s.h.

Dental materials science: mechanical, physical, and chemical properties of restorative materials; selection and manipulation. Same as 082:224.

**084:225 Complete Denture Literature Review**

arr.

Complete denture prosthodontics; assigned readings, discussion of related research.

**084:226 RPD Literature Review**

arr.

Removable partial denture prosthodontics; assigned readings, discussion of related research.

**084:231 Thesis Preparation: Prosthodontics**

3 s.h.

Thesis preparation, defense.

**084:300 Prosthodontic Certificate Program**

0 s.h.

Advanced dental clinical, didactic education; nondegree program toward eligibility for board certification in prosthodontics.

# College of Education

**Dean:** Sandra Bowman Damico  
**Associate dean, academic affairs and graduate programs:** David Bills  
**Associate dean, teacher education and student services:** Susan Lagos Lavenz  
**Director, Belin-Blank Center for Gifted Education:** Nicholas Colangelo  
**Director, Center for Advanced Studies in Measurement and Assessment:** Robert Brennan  
**Director, Center for Evaluation and Assessment:** Donald Yarbrough  
**Codirectors, Center for Research on Undergraduate Education:** Ernest Pascarella, Elizabeth Whitt  
**Director, Educational Placement Office:** Rebecca Anthony  
**Associate director, Iowa Center for Assistive Technology Education and Research:** James Stachowiak  
**Director, Iowa Testing Programs:** Stephen Dunbar  
**Director, Office of Graduate Teaching Excellence:** Dennis Maki  
**Degrees:** B.A., B.S. (undergraduate degrees granted through the College of Liberal Arts and Sciences); M.A.T., M.A., M.S., Ed.S., Ph.D.  
**Undergraduate nondegree programs:** Minor in Educational Psychology, Minor in Human Relations  
**Web site:** <http://www.education.uiowa.edu>

The nation's first university-level professorial chair in education was established at The University of Iowa in 1872. The department became the School of Education in 1907; and the College of Education, structured largely as it is today, was founded in 1913. Since then, the college's growth has mirrored the growth of the University.

Over the years, College of Education faculty members have been leaders in a variety of educational fields. Particularly noteworthy have been their contributions in the fields of educational testing and measurement. These contributions helped lay the foundation for today's testing and measurement industry, making Iowa City one of the best-known centers for this educational specialty.

The college has four departments: Educational Policy and Leadership Studies; Psychological and Quantitative Foundations; Rehabilitation and Counselor Education; and Teaching and Learning.

## Teacher Education Programs and Student Teaching

The College of Education at The University of Iowa offers two major teacher preparation programs based on baccalaureate degrees. Elementary education is a College of Liberal Arts and Sciences major leading to either a Bachelor of Arts or a Bachelor of Science degree. The secondary education programs combine a specific liberal arts and sciences academic major with teacher preparation course work leading to a Bachelor of Arts or a Bachelor of Science degree.

The college also provides numerous specialized elementary and secondary teaching endorsement programs.

Preparation for special education teaching is offered primarily at the graduate level. In addition, an undergraduate instructional strategist program is available as a specialization for students admitted to an elementary education program.

Undergraduate students admitted to a Teacher Education Program (TEP) must complete all College of Liberal Arts and Sciences General Education Program requirements for the Bachelor of Arts or Bachelor of Science. The quantitative or formal reasoning component must be satisfied with a college-level mathematics course.

The Office of Teacher Education and Student Services provides information on Teacher Education Programs; offers assistance with admission, student field experiences, and teacher licensure/certification; and serves as a liaison with other University units and external agencies. For more information, visit the office's web site.

### Undergraduate Admission to TEPs

Undergraduate applicants to The University of Iowa who wish to become teachers indicate their interest in the elementary major or a specific secondary-level teaching endorsement program on their application for admission. This results in an "Elementary Interest" (7EP) or a "Secondary Interest" (7SP) notation on the student's official records. Application materials for Teacher Education Programs are available from the Office of Teacher Education and Student Services or on the office's web site.

Acceptance to a Teacher Education Program is prerequisite to registration for most College of Education undergraduate courses.

### APPLICATION DEADLINES

Application deadlines for all Teacher Education Programs are as follows.

Summer session and fall semester: March 15

Spring semester: October 15

Late applications are not accepted.

**GENERAL REQUIREMENTS**

Admission to Teacher Education Programs is competitive. Admission requirements may vary by program area. Faculty members in each program area review and select students to be admitted to their program. In order to be considered for admission to a Teacher Education Program, an undergraduate student must satisfy the following requirements: admission to The University of Iowa; a minimum amount of credit for college-level work; a minimum grade-point average; minimum scores on a preadmissions test; and a preadmission volunteer field experience in a regular K-12 classroom setting. There may be additional requirements. Teacher Education Program applications materials and current minimum application requirements are available on the Office of Teacher Education and Student Services web site.

**Graduate and Postbaccalaureate Admission to TEPs**

Students who have completed a baccalaureate degree may be admitted to a teacher preparation program as graduate students or as postbaccalaureate students with senior standing. They may apply to the Graduate College and state their objective as "certification only." In some programs they may apply for a master's degree objective, either a Master of Arts in Teaching (M.A.T), or in selected majors, a Master of Arts (M.A.).

Students who choose to pursue a graduate-level teacher preparation program must be eligible for admission to the Graduate College, which requires a g.p.a. of at least 3.00 on all previous college course work. They must submit an official Graduate Record Examination (GRE) General Test score report, with scores that meet the minimum score requirement. They also must submit a complete application to the Teacher Education Program through the University's Office of Admissions.

Students also may apply to the College of Liberal Arts and Sciences as postbaccalaureate students with senior standing. Students who choose this option must apply to the appropriate Teacher Education Program, following the undergraduate admissions procedure, and must meet the general requirements for undergraduate admission; see Undergraduate Admissions on the Office of Admissions web site.

Application deadlines for graduate students and postbaccalaureate students with senior standing are March 15 and October 15.

**TEP Standards and Policies**

Students in the Teacher Education Program must meet grade-point average requirements each semester. Students who do not meet the requirements are placed on probation; those who fail to meet the requirements in a successive semester may be removed from the Teacher Education Program or denied admission to student teaching. For more information on standards and policies, consult the Office of Teacher Education and Student Services.

**Electronic Portfolio**

Students in the Teacher Education Program document their achievement of professional standards on ePortfolio, a web-based program in which they collect instructional artifacts and performances assigned in all their courses. Students receive instruction on the ePortfolio requirement beginning with the required course 07E:102 Technology in the Classroom.

**Student Teaching**

The final phase of the Teacher Education Program is the professional semester, devoted to supervised student teaching and directed observation in a variety of situations. Faculty members, professional staff, and advanced graduate students who are experienced teachers serve as supervisors.

Periodic seminars provide for discussion and evaluation of student teachers' experiences. Transfer credit may not be used to satisfy the student teaching requirement.

To be admitted to the student teaching semester, students must submit a separate application to the Office of Teacher Education and Student Services in the College of Education. All course work in education, for the major, and for the degree must be completed before the student teaching semester. Applications are submitted during the calendar year before the student teaching semester. The deadline is November 15 for students planning to student teach the following fall semester and April 15 for students planning to student teach the following spring semester.

Admission to student teaching requires program area faculty approval as well as verification of satisfactory progress in meeting both College of Education professionalism standards and program area standards, which are set at the time of admission to the TEP. In some programs, standards are higher than the college's required g.p.a. of at least 2.70. Students should consult with their advisors regarding specific requirements for the program areas.

For more information, contact the Office of Student Field Experiences.

**WAIVERS**

Students who have completed courses that they wish to substitute for program requirements should consult with their advisors.

#### **URBAN STUDENT TEACHING**

Students who want to advance their educational interests through student teaching in an urban setting may apply through the Office of Student Field Experiences. The urban districts include Clark County, Nevada (Las Vegas area); Chicago Public Schools; Adams County School Districts (Denver area); Aldine, Texas (Houston area); Rialto, California (Los Angeles area); and St. Louis Park, Minnesota (Minneapolis area). These options are open to all education majors who meet the requirements established for these student teaching sites. For more information about this and other programs, contact the Office of Student Field Experiences.

#### **INTERNATIONAL STUDENT TEACHING**

International student teaching experiences are available primarily through the Foundation for International Education. Sites include Australia, China, Costa Rica, Ecuador, England and Wales, India, Ireland, Kenya, New Zealand, Russian Federation, Scotland, Spain and Turkey.

Interested students must meet the regular requirements for student teaching and must have the approval of their advisor and the appropriate program coordinator. In most locations, students are assisted with housing by the on-site coordinator.

International assignments are for eight weeks. Students complete an eight-week assignment in a stateside placement followed by an eight-week assignment in an international placement. Secondary education students in some program areas (for instance, English education) are required to complete a full semester of student teaching in the United States before student teaching at an international site.

For more information about international student teaching opportunities, contact the Office of Teacher Education and Student Services.

## **Teacher Licensure/Certification**

The Iowa Board of Educational Examiners issues teacher, support service, and administrator licenses on the recommendation of Iowa colleges and universities whose programs have been approved by the Iowa Department of Education. All University of Iowa preparation programs have Iowa Department of Education approval.

Licensure/certification requirements across the nation are subject to change. Students who plan to seek employment in a state other than Iowa should make every effort to be informed about current requirements in that state. Many states require some type of competency testing. Generally, students who apply out-of-state should first secure Iowa licensure.

To be recommended by The University of Iowa, applicants must complete all requirements of the appropriate approved program. A minimum of 20 s.h. of course work applied to meet program requirements must be earned at The University of Iowa. Fingerprinting is required for all new applicants for Iowa licensure; the State of Iowa has outlined specific procedures for the fingerprinting process.

A passing PRAXIS II score for the elementary content test is required for all students seeking elementary licensure in Iowa and for satisfaction of an approved Teacher Education Program. No test is currently required for secondary or K-12 Iowa licensure applicants.

The College of Education Office of Teacher Education and Student Services provides Iowa application forms, fingerprinting procedures, and licensure/certification assistance to all students completing approved programs offered by the college. It also provides assistance to individuals interested in adding endorsements to their Iowa license based on completion of State of Iowa minimum licensure requirements.

#### **State of Iowa Requirements**

All University of Iowa students seeking an Iowa teaching license must complete 07B:180 Human Relations for the Classroom Teacher (or an approved substitute) and 07U:100 Foundations of Special Education. All University of Iowa Teacher Education Programs require 07B:180 Human Relations for the Classroom Teacher and 07U:100 Foundations of Special Education. Human relations courses offered through community colleges are not accepted. In the State of Iowa, applicants must be at least 21 years old to be granted a teaching license. Applicants who have been found guilty of a felony are barred from receiving an Iowa teaching license. Appeals may be filed directly with the Iowa Board of Educational Examiners.

## **Undergraduate Programs**

## Honors in Education

The College of Education Honors Opportunity Program is open to sophomores, juniors, and seniors who have maintained a g.p.a. of at least 3.50. Students with lower grade-point averages who have demonstrated research potential also may be accepted based on the recommendations of faculty/staff members and the education honors advisor. Honors Opportunity Program students must take 07X:100 Honors Seminar in Education, 07X:101 Senior Honors Project, and complete five additional honors experiences. Successful completion of the program results in an honors designation on the diploma. The Honors Opportunities Program is housed in and is administered by the Connie Belin and Jacqueline N. Blank International Center for Gifted Education and Talent Development.

## Minors

The College of Education offers two minors for students who wish to be better informed about education: one in educational psychology and one in human relations. The minors may help support students' future career objectives and help students prepare to be better informed as parents, as taxpayers, or as future members of local boards of education. Contact the Office of Teacher Education and Student Services for more information about the minors.

## Graduate Programs

Graduate study in the College of Education is guided by the policies of the Graduate College, with additional requirements set by College of Education faculty members. Graduate students in education register in the Graduate College and receive their degrees from that college. See the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

All College of Education Ph.D. programs require students to complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also require an additional minimum of 15 s.h. in qualitative and quantitative research course work, with at least 9 s.h. from one area (qualitative or quantitative) and 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

## Degree Programs Offered

The College of Education offers the following graduate degrees and programs.

### DEPARTMENT OF EDUCATIONAL POLICY AND LEADERSHIP STUDIES

M.A., Ed.S., and Ph.D. in educational policy and leadership studies; the following programs are available:

Educational leadership (offered in the M.A., Ed.S., and Ph.D.)

Higher education and student affairs (offered in the M.A., Ed.S., and Ph.D.)

School curriculum and assessment policy (offered in the Ed.S.)

Schools, culture, and society (offered in the M.A. and Ph.D.)

### DEPARTMENT OF PSYCHOLOGICAL AND QUANTITATIVE FOUNDATIONS

M.A., Ed.S., and Ph.D. in psychological and quantitative foundations; the following programs are available:

Counseling psychology (offered in the Ph.D.)

Educational measurement and statistics (offered in the M.A. and Ph.D.)

Educational psychology (offered in the M.A. and Ph.D.)

School psychology (offered in the Ed.S. and Ph.D.)

### DEPARTMENT OF REHABILITATION AND COUNSELOR EDUCATION

M.A. and Ph.D. in counseling, rehabilitation, and student development; the following programs are available:

Counselor education and supervision (offered in the Ph.D.)

Rehabilitation and mental health counseling (offered in the M.A.)

Rehabilitation counselor education (offered in the Ph.D.)

School counseling (offered in the M.A.)

The department's Ph.D. program in student affairs administration and research and its M.A. program in student development in postsecondary education are merging with the higher education and student affairs programs offered by the Department of Educational Policy and Leadership Studies.

### DEPARTMENT OF TEACHING AND LEARNING

M.A., M.A.T., M.S., and Ph.D. in teaching and learning; the following programs are available:

Art education (offered in the M.A. and Ph.D.)

Curriculum and supervision (offered in the M.A. and Ph.D.)

Developmental reading (offered in the M.A.)

English education (offered in the M.A. and M.A.T.)

Foreign language education (offered in the M.A. and M.A.T.)

Foreign language and English as a Second Language (offered in the Ph.D.)

Language, literacy, and culture (offered in the Ph.D.)

Mathematics education (offered in the M.A. and Ph.D.)

Science education (offered in the M.S., M.A.T., and Ph.D.)

Social studies education (offered in the M.A. and Ph.D.)

Special education (offered in the M.A. and Ph.D.)

### **Master of Arts in Teaching**

The M.A.T. program is designed for academically superior liberal arts and sciences graduates who completed few or no professional education courses in their undergraduate program. It is a nonthesis program with requirements that range from 45 to 67 s.h. See Teaching and Learning in the Catalog.

The program leads to a master's degree and licensure as a secondary teacher in the fields of English, foreign languages, and science education. Admission to the program requires a g.p.a. of at least 3.00 in undergraduate course work. The program includes 18 s.h. of graduate course work in the student's teaching field. Students must complete a minimum of 20 s.h. of graduate work in education to satisfy licensure requirements.

A Master of Arts program with a secondary education major in social studies leads to initial teacher licensure. See "M.A. in Social Studies Education"/"Program B Requirements" in the Teaching and Learning section of the Catalog.

### **Master of Arts**

The College of Education offers a Master of Arts. Some of the college's M.A. programs are offered with thesis as well as without thesis. Nonthesis programs usually provide more specialized course work than do thesis programs. Although a nonthesis program is not necessarily terminal, students who expect to continue their studies in a doctoral program are urged to select a thesis program in order to gain more experience in research procedures. Students who complete a nonthesis M.A. and are admitted to a Ph.D. program may be asked to submit evidence of writing and research skills to their advisor or department during the early part of their doctoral program. For information about programs that offer a thesis option, see the program descriptions under "Graduate Programs" in College of Education department sections of the Catalog.

Course work completed more than 10 years before the session in which the degree is to be conferred must be evaluated to determine how much credit may be accepted toward the degree requirements. Students must earn at least 24 s.h. in University of Iowa courses after formal admission to a master's degree.

### **Master of Science**

Thesis programs are available for M.S. students in science education. The degree requirements are similar to those for a Master of Arts.

### **Specialist in Education**

The Ed.S. is granted upon completion of a prescribed two-year postbaccalaureate program designed for students preparing for professional work in fields such as administration and supervision, and special services. Of the minimum 60 s.h. required for the degree, 28 s.h. must be in the specialization area; the rest may be earned in cognate fields, supervised experience, research, and elective courses. The research must culminate in a written report.

Other requirements for the Ed.S. are the same as for the master's degree, except that an Ed.S. requires students to complete 15 s.h. of resident work on campus in one 12-month period or in two summer sessions. Course work completed 10 years before the final examination must be evaluated to determine the amount of credit that may be accepted toward program requirements.

Not all programs offer an Ed.S. degree. For a list of programs and degrees offered, see "Graduate Programs" above.

### **Doctor of Philosophy**

The Ph.D. is the most advanced academic degree. It is conferred upon students who have demonstrated superior scholarship and mastery of research skills in course work as well as in the preparation and defense of a dissertation.

### **Professional Improvement**

Some students are admitted to professional improvement status in a College of Education department rather than to degree candidacy. This option is appropriate only for persons who wish to update their knowledge or who are

temporarily undecided about career plans. Students should file a change of status stating a specific program objective at the earliest opportunity.

## **Extramural Education**

Through the Division of Continuing Education, selected College of Education courses are offered at off-campus sites and hours outside the traditional schedule. If taken after formal admission to a specific program, some of these courses may be applied to meet residency requirements for degrees.

Special regulations govern such course work. Students should obtain prior approval from their program advisor before registering in extramural courses. Students not regularly admitted to The University of Iowa also may register in extramural courses, but credit earned before admission does not count toward residency requirements.

## **Support Units and Resources**

### **Belin-Blank Center for Gifted Education**

The Connie Belin and Jacqueline N. Blank International Center for Gifted Education and Talent Development conducts research, training, and service in gifted education. It also gathers and disseminates information on the education of gifted students.

The center is located in the Blank Honors Center. Its programs and services include the Belin-Blank Fellowship Program in Gifted Education; the Honors Opportunity Program; Invent Iowa; Scholastic Art & Writing Awards; the Henry B. and Jocelyn Wallace National Research Symposium on Talent Development; the Wallace Assessment and Counseling Clinic; practicum and internship experiences; course work in gifted education (including state endorsement); academic talent searches for students in grades 2-9; a number of precollege programs for gifted students in grades 2-12; and programs for international students. The center also administers the Iowa Online Advanced Placement Academy.

The Belin-Blank center administers three University-level student programs: the Iowa Talent Project, developed for minority students from gifted programs in Des Moines and Cedar Rapids, Iowa; the National Academy of Arts, Sciences, and Engineering, a highly selective early-entrance program for students who have completed their junior year in high school; and the China Scholars Program, an early decision program that admits to the University of Iowa selected high school seniors from the Peoples Republic of China.

The center also provides practicum and internship experiences for undergraduate and graduate students and coordinates course work for the Iowa Talented and Gifted Endorsement.

The Belin-Blank center houses the Institute of Research and Policy on Acceleration (IRPA), which is dedicated to the study of curricular acceleration for academically talented children.

For more information, contact the Belin-Blank Center for Gifted Education and Talent Development.

### **Center for Advanced Studies in Measurement and Assessment**

The Center for Advanced Studies in Measurement and Assessment (CASMA) pursues interdisciplinary research initiatives that advance the methods and practice of educational measurement and assessment.

CASMA's aim is to be a premier interdisciplinary center that performs, promotes, fosters, and disseminates high-quality research in measurement and assessment. CASMA devotes considerable resources to development of open-source computer programs for equating scores on tests.

Every other year, CASMA co-sponsors a national conference on current challenges in educational testing. Periodically, the center's staff produces research reports that are available on CASMA's web site (<http://www.education.uiowa.edu/casma>). Recent reports have discussed topics in generalizability theory, institutional selectivity in undergraduate education, revolutions and evolutions in educational testing, decision consistency with complex assessments, and equating models.

### **Center for Evaluation and Assessment**

The Center for Evaluation and Assessment conducts evaluations, research studies, and professional development initiatives. The center's mission is to promote the sound use of assessment results, provide high-quality evaluation services to clients, create effective training activities for graduate students, improve the quality of evaluation theory and practice, and contribute to research on program evaluation and assessment.

The center conducts evaluations in a broad range of areas: clinical and translational science, minority recruitment and retention, delivery of social and human services, curriculum and instruction, professional training, and the impact of public policy on PK-12 education. The center's staff members consult with universities, school systems, and other policy-making organizations in Iowa and nationwide that use evaluation studies and assessments to make important

decisions regarding individuals or organizations. The center also provides training and professional development in program evaluation and assessment.

### **Center for Research on Undergraduate Education**

The Center for Research on Undergraduate Education (CRUE) is dedicated to the study of undergraduate education in America, from how academic and social experiences affect students to the methods schools use to improve students' chances for success in the classroom and beyond graduation. CRUE brings a methodologically balanced approach to the study of undergraduate education.

### **Cooperating Schools Program**

The Cooperating Schools Program (CSP) is a University-wide service that facilitates placement of research projects and service-learning projects conducted by faculty, staff, and students in public schools throughout Iowa. The program provides information to help researchers obtain permission to conduct research in Iowa schools. The Cooperating Schools Program was instituted at the request of school administrators charged with the responsibility of approving research projects in their schools.

### **Education Technology Center**

The Education Technology Center (ETC) provides computer services to College of Education faculty, staff, and students. The ETC offers technical assistance to faculty and staff and maintains all computers in the college. In addition to Internet access, services include collegiate file and application servers; standard office tools; specialized applications such as media production tools and qualitative and quantitative analysis programs; secure folders and directories; and electronic mailing lists for faculty, staff, and student groups.

The Education Technology Center provides faculty with technical and design support for online course management, research technologies, distance education, multimedia, and ePortfolio production. The center also partners with the University's University of Iowa Television to maintain a laboratory for professional video production.

Polycom videoconferencing, Smart Boards and Smart Podiums, and wireless access are available throughout the college. Every classroom and conference room has a digital presentation system, and three classrooms are outfitted for videoconferencing and distance education instruction.

Faculty members and students can check out wireless laptops, computer projectors, audience response systems (clickers), digital audio recorders, digital video cameras, and other devices from the center. In all, the College of Education supports more than 700 computers, laptops, PDAs, and smartphones as well as seven servers.

### **Educational Placement Office**

The Educational Placement Office helps students and alumni pursuing careers in teaching, research, and education leadership. It regularly offers workshops, seminars, and special programs related to educational employment and the job search. The office's web site provides links to information about employment opportunities in schools, colleges, and related organizations. It also provides job search tools, including curriculum vitae, résumé, letter writing, and interview question samples; information about preparing for the job search; teaching, leadership, and collegiate e-Portfolio examples; and employer advice for educators seeking jobs in K-12 environments, college and university settings, and in international locations.

### **Iowa Center for Assistive Technology Education and Research**

The Iowa Center for Assistive Technology Education and Research (ICATER) helps to ensure equal access and opportunities for persons with disabilities by advancing assistive technology through research, education, and service. The center collaborates with University and community programs to provide technical assistance that enhances the services and resources available to educators, service providers, and persons with disabilities. It also sponsors workshops and education programs. The center's assistive technology laboratory is available for student use, demonstrations, consultations, and research.

### **Iowa Testing Programs**

Iowa Testing Programs provides assessment expertise to schools in the State of Iowa and consultation to the Iowa Department of Education and to area education agencies. Its faculty and staff develop standardized educational tests, such as the widely used Iowa Tests of Basic Skills and Iowa Tests of Educational Development, for use in elementary and secondary schools, as well as other assessment tools to support instruction and learning. Iowa Testing Programs also conducts research studies in educational measurement and evaluation, publishes the results of these studies, sponsors lectures and symposia, provides consulting and in-service training to educators and school systems, and provides training experience for graduate students in educational measurement and evaluation.

### **Libraries**

The University of Iowa Libraries provides books, periodicals, reference works, videos, ERIC microfiche, tests, and reserved materials for students and faculty at the Main Library, just across the street from the College of Education; at

the Hardin Library for the Health Sciences, on the health sciences campus; and at the Science Library, near the center of campus. At the college, a psychology/education liaison librarian is available to help students with course assignments and theses, and to assist faculty members and teaching assistants with research and instructional needs.

### **Office of Graduate Teaching Excellence**

The Office of Graduate Teaching Excellence (OGTE) is dedicated to excellence in college teaching and the preparation of future faculty. The office facilitates opportunities for research, teaching, and service. Through the Iowa Education Fellows Program (i-fellows), OGTE develops and conducts workshops and seminars that address the developmental needs of College of Education doctoral students, from their first semester on campus through completion of their degrees.

In conjunction with the Graduate College and the School of Social Work, OGTE presents the graduate Certificate in Multicultural Education and Culturally Competent Practice. The certificate program provides students with in-depth study aimed at helping them develop knowledge, awareness, and skills related to cultural competence.

The office also partners with the Graduate College to offer the Graduate Certificate in College Teaching. The certificate program's goal is to enable all University of Iowa doctoral students to complement their home discipline's curriculum and research training with the development of effective postsecondary teaching skills.

### **Office of Teacher Education and Student Services**

The Office of Teacher Education and Student Services assists students, faculty, staff, and the general public in graduate and undergraduate admission, Graduate College examinations, student field experiences, and teacher licensure/certification. It also serves as a liaison with other University units, including the Graduate College, the College of Liberal Arts and Sciences, the Office of Admissions, and the Office of the Registrar, and with external agencies, including the Iowa Department of Education, out-of-state teacher licensure/certification departments, and school district personnel in Iowa and outside of the state. A variety of application and information materials are available at the office and on its web site.

### **REACH Program**

The University of Iowa's REACH (Realizing Educational and Career Hopes) is a two-year postsecondary education certificate program that focuses on meeting transitional needs of students with multiple learning difficulties (MLD) in an inclusive university setting. The program emphasizes life skills for independent living and features learning in small groups coupled with career coaching in real work settings.

REACH offers courses on academic skill building, career preparation, student and community life skills, and socialization taught by instructors from the College of Education. Courses are open only to REACH students.

Support services are available to promote student success in all educational and career settings. The program also offers career field placements.

REACH students live in a University of Iowa residence hall, where they receive support from specially trained resident assistants. A fully inclusive college environment provides students with age-appropriate community opportunities and interactions with other University of Iowa students.

For more information, consult the REACH web site.

### **Research Support**

The College of Education dean's office, through the Grant and Research Services Center (GRSC), provides grant and research-related support services for the college's faculty, staff, and students. GRSC staff members help identify internal and external funding sources, prepare and submit grant proposals and application materials, provide grant accounting services, and help in the preparation of applications for Human Subjects/Institutional Research Board review. The college also provides limited funds for faculty research, professional development, and travel.

## **Financial Support**

College of Education students may be eligible for scholarships, awards, or graduate assistantships. Information about financial support for students is available at Information for Students on the college's web site. The Graduate College posts a list of open assistantships on its Graduate College Bulletin Board.

Students interested in employment opportunities in the college's support units and special resources should contact the director of each facility and indicate their interests, their academic and experience records, and their career or degree goals at The University of Iowa.

### **Graduate Assistantships**

Individual academic programs provide opportunities for teaching, research, or service assistantships as well as for fellowships and related employment opportunities. Inquiries should be addressed to the chair of the department or the

director of the program in which the student believes he or she can provide service or achieve an outstanding academic record. Assistantship appointments are usually, but not always, made by the program area.

### **Graduate Research Assistantships in Education**

The Iowa Testing Programs provides funds to support a limited number of special graduate assistantships in education, in which students do research work under the direction of a faculty member of their choice. Students must be enrolled for at least 6 s.h. but not more than 12 s.h. per semester; assistantships are for the academic year and are renewable for a limited number of years. Students admitted to or pursuing any advanced degree program offered by the College of Education are eligible to apply, provided they are committed to a professional career in the United States.

Applicants must submit transcripts of all completed college work (undergraduate and graduate), recommendation forms specific to the assistantship, and scores on the Graduate Record Examination (GRE) General Test. For assistantship application forms, contact the Iowa Testing Programs director. Application deadline is late February.

### **Scholarships and Awards**

The College of Education presents a number of awards funded by donors; recipients must meet the criteria established by the donors for their awards. Recipients are presented with their award at a spring semester ceremony. Detailed information is available on the college's Information for Students web page, under Scholarships and Awards.

**The Duane D. Anderson Scholarship** is awarded to a transfer student from an Iowa community college who is enrolled in a College of Education program.

**The Jack Bagford Elementary Education Award** is presented to an outstanding elementary education student who is an Iowa resident. The student should be scheduled to do student teaching the academic year following the award.

**The David and Connie Belin Honors Award** is for graduating seniors in the Teacher Education Program who have completed all requirements for the Honors Opportunity Program.

**The Blommers-Hieronymus-Feldt Fellowship** is awarded to a doctoral student in the field of educational measurement and statistics; nominees must have completed at least one full year in the graduate program at The University of Iowa.

**The Lowell Brandt Rehabilitation Counseling Award** is presented to a deserving student pursuing a master's degree in the Rehabilitation Counseling Program.

**Barry Bratton Award for Achievement in Design of Instructional Processes** is given to an outstanding student who has completed course work that reflects a commitment to the systematic design and improvement of instructional processes and materials.

**The Dr. Bettye M. Caldwell and Dr. Fred T. Caldwell Scholarship** is presented to an outstanding undergraduate student in elementary education.

**The Debra Clausen Memorial Award** is given to a qualified undergraduate or graduate student who will work at the Center for Disabilities and Development to evaluate and develop learning programs for students with mental disabilities, including Down Syndrome.

**The T. Anne Cleary Psychological Research Scholarship** is awarded to an outstanding doctoral student engaged in research on the psychological or quantitative foundations of education. The award may be presented to one international student and one permanent resident of the United States each year.

**The John Leonard Davies Scholarship** is presented to a first or second semester senior who is viewed as being creative and who has outstanding potential for success in the field of K-12 education.

**The Harvey H. Davis Award** is given to an outstanding candidate for an advanced degree in higher education or educational administration, particularly a student interested in the financing of education.

**The Terry Ganshaw Memorial Award** is given to an outstanding Ph.D. student in college student personnel.

**The Dr. Mary Agnella Gunn Memorial Scholarship** is presented to an undergraduate student who will student teach for a full semester in the area of English education.

**The Gladys and Margaret Harvey Education Scholarship** is presented to a student enrolled in the M.A.T. or M.A. program in elementary or secondary education who will student teach for a full semester.

**The Emma Bauman Holmes Education Scholarship** is awarded to an outstanding student in any undergraduate or graduate College of Education program who is in the top 20 percent of his or her class.

**The Albert Hood Promising Scholar Award** is given to an outstanding doctoral student in the Department of Rehabilitation and Counselor Education with an approved prospectus for doctoral research.

**The Howard R. Jones Achievement Award** is given to an outstanding graduate student who has made a noteworthy scholarly presentation at a national professional conference or has published a significant scholarly article in a reputable professional journal or other substantial printed work.

**The Kyle C. and Eula B. Jones Educational Administration Scholarship** is presented to a current or incoming graduate student who has four years of classroom teaching experience and is working toward licensure as an elementary or secondary school administrator.

**The Kyle C. and Eula B. Jones Student Teaching Scholarship** is presented to an undergraduate student who will student teach for a full semester in the area of social studies or elementary education.

**Charlotte and Ruby Junge Scholarship** is presented to an undergraduate student who will be student teaching for a full semester in the area of social studies or elementary education.

**Loetscher Science Education Scholarship** is awarded to a student in secondary science education, with preference given to those pursuing a chemistry emphasis.

**The Perry Eugene McClenahan Award** is given to the outstanding candidate for an advanced degree in educational administration.

**The Sheila E. McFarland Memorial Scholarship** is presented to an undergraduate student who will student teach for a full semester in the area of elementary education; preference is given to Iowa residents.

**The Leonard A. Miller Memorial Award** is given to an outstanding first-year M.A. student majoring in rehabilitation counseling.

**Minority Student Award** is given to an outstanding College of Education undergraduate or graduate minority student who works with equity issues in the college and has made positive contributions to the life of the college.

**The Helen Mackin Nichol Scholarship** is awarded to Iowa residents who are studying to be secondary teachers and who plan to teach and work with mentally and emotionally disturbed children.

**The Melvin R. Novick Award** is presented to a third- or fourth-year student enrolled in the doctoral program in educational measurement and statistics who has shown outstanding academic performance and promise of the highest level of achievement in research in this field.

**Paul Opstad Scholarship** is awarded to a graduate student in the College of Education whose career or scholarly interests focus on the concerns and needs of international students.

**The Margaret P. Park Scholarship** is presented to deserving undergraduate students; preference is given to students from St. Louis County (Minnesota) or Rock Island County (Illinois).

**Guy and Gladys Peterson Award** is given to an outstanding student who has been admitted to and has completed at least 12 s.h. of course work in the Teacher Education Program.

**The Ann Ramsey and Richard E. Posey Scholarship** is presented to an undergraduate student in their junior year of study who has been admitted into the Teacher Education Program in the College of Education.

**The John E. Quinn Memorial Scholarship** is presented to a full-time undergraduate student from eastern Iowa in Liberal Arts who has been admitted to the Teacher Education Program and is pursuing secondary school teaching licensure in the area of history.

**The Lorraine Gutz Ragan Scholarship** is awarded to a student who is an Iowa resident and is enrolled in the Teacher Education Program.

**The Rolland Ray Award** is presented to an outstanding doctoral student in the Department of Teaching and Learning who is completing a dissertation on measurement in any one of four areas of education: mathematics, science, social studies, or English.

**The Margaret A. Sloan Scholarship** is presented to an undergraduate or graduate student who will student teach for a full semester in the area of elementary education; preference is given to Iowa residents.

**The Lloyd Smith Scholarship** is awarded to an outstanding student in elementary social studies.

**The Franklin Stone International Student Award** is given to an outstanding international student pursuing a Ph.D. in education.

**The James and Coretta Stroud Fellowship for Doctoral Study in Educational Psychology, Measurement, or Statistics** is awarded to an outstanding graduate student in the Department of Psychological and Quantitative Foundations who is entering the dissertation phase of study.

**The Edgar M. and Evelyn Benzler Tanruther Scholarship** is awarded to an outstanding graduate student in elementary education.

**The U-High Innovative Developments in Education Award** is given to students who have completed or will complete student teaching during the school year. The award is based on outstanding performance as a student teacher, particularly for innovation and creativity shown during the experience.

**The Erwin and Louise Wasta International Scholarship** is awarded to an international student enrolled in a College of Education program.

## Faculty

All tenure-track faculty members hold earned doctorates in their teaching fields, and many have had teaching or administrative experience in the public schools. Several hold joint appointments in the College of Liberal Arts and Sciences.

## Courses

The College of Education offers several interdepartmental courses and a number of courses for students in the REACH program; see "Interdepartmental Courses" and "REACH Courses" below. For lists of courses offered by each of the college's academic departments, see the appropriate department sections in the Catalog: Educational Policy and Leadership Studies; Psychological and Quantitative Foundations; Rehabilitation and Counselor Education; and Teaching and Learning.

### Interdepartmental Courses

**07X:029 First-Year Seminar** 1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**07X:100 Honors Seminar in Education** 1 s.h.  
Research in education and related professions in collaboration with a College of Education faculty member of student's choice; preparation for senior honors project.

**07X:101 Senior Honors Project** 1-2 s.h.  
Collaboration with a faculty member on research project; written report. Prerequisites: 07X:100.

**07X:125 Universal Design for Learning and the Postsecondary Classroom** 1 s.h.  
Principles of universal design for learning and how they can be applied in a postsecondary classroom; strategies in a classroom environment, class presentation, and class products (tools needed to access the class) that reach all students, including those with disabilities; hands-on activities; readings include universal design research studies and specific procedures for application.

**07X:140 Introduction to Multicultural Education and Culturally Competent Practice** 3 s.h.  
Introduction to foundations of multicultural education and cultural competence; numerous equal access movements that impact professional practice in education, social work, counseling, and the allied helping professions mobilized in the U.S. during the 20th century; issues of diversity and equity that continue to fuel current policy debates and impact professional practice; roots of equal access movements from *Brown v. Board of Education* to the present; social, political, and/or economic contexts for equal access policies concerning race/ethnicity, class, language, gender, ability, and sexual orientation.

**07X:150 Introduction to Educational Research** 3 s.h.  
Principles of empirical educational research; logic of inquiry for both quantitative and qualitative research methodologies.

**07X:181 ePortfolio Production** 1-2 s.h.  
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as 07C:181, 07E:181, 07P:181.

**07X:387 Introduction to Online Post-Secondary Course Design and Facilitation** 3 s.h.

Knowledge of distance learning and teaching at the post-secondary level; instructional design principles relevant to development of online courses.

**07X:475 Ph.D. ePortfolio in College Teaching**

3 s.h.

Framework for connecting authentic evidence of scholarly work and teaching competencies; use of advanced web and multimedia technologies to link artifacts to ePortfolio templates.

**REACH Courses**

The following courses are open only to students enrolled in the REACH program.

**205:001 Academic Success**

2 s.h.

Tools that help students succeed in academic courses; basic organization, efficient note taking, study and test-taking skills; participation in activities that increase awareness of classroom dynamics; solutions for test anxiety; ways to approach diverse learning experiences; how class content relates to study hall and residential facilities; seminar.

**205:002 Social Skills I**

2 s.h.

Basic interpersonal skills needed to succeed in academic, social, and employment environments; structured learning process for gaining discrete social skills necessary to initiate and maintain conversations in a variety of settings; awareness of feelings and cues in conversation to respond appropriately and have successful reciprocal interactions; lectures, modeling, role play, and practice in the community.

**205:003 Communication II--Public Speaking**

1 s.h.

Builds on 205:002; the nature of public speaking; speech research, organization, and presentation; analysis of varied forms of public speaking; participation in activities that increase awareness of changing environments, audience, and types of speeches; students identify their own communication styles; seminar.

**205:004 Computers and Technology I**

2 s.h.

Training in computer literacy and practical skills for computer use in everyday life; computer parts and functions, the Windows operating system, computer applications; use of the personal computer to improve personal, academic and workplace productivity; group discussion, demonstrations, and multimedia experience support diverse learning styles.

**205:005 Computers and Technology II**

2 s.h.

Builds on 205:004; fundamental computer competencies and strategies to simplify everyday life and enhance workplace performance; opportunity to improve practical skills for the workplace, communication with others, and daily life; tools for improving personal organization and communication and for meeting academic, entertainment, and workplace needs; group discussion, demonstration, independent exploration, and a multimedia experience support diverse learning styles.

**205:006 Current Events**

1 s.h.

Forum to increase knowledge and ability to comment on current events; voting and political process, civic responsibilities in the local and federal elections process, how students can participate; use of various forms of media (i.e., print, broadcast, Internet) to develop critical thinking skills related to awareness of current events and their impact; personal safety issues; effective communication skills for interacting with peers and college personnel.

**205:007 Health and Wellness I--Exploration**

1 s.h.

Introduction to health and personal wellness; the seven dimensions of wellness and health awareness; overview of topics such as nutrition, responsible sexual behavior, consequences of substance use, disease prevention; opportunity for students to build knowledge about their own emotional, mental, and physical health; framework for further exploration of everyday health and wellness; first in a series.

**205:008 Health and Wellness II--Healthy Lifestyles**

2 s.h.

Health and wellness personalized for students; help in assessing individual health and wellness decisions and behaviors to improve current and long-term health and wellness; small group discussion, individual assessments, real-life exploration, interactions with health educators, one-on-one student support; second in a series.

**205:009 Fitness and Wellness Lab I**

1 s.h.

Opportunity to improve understanding of and commitment to establishing and maintaining an active lifestyle; benefits of physical activity, fitness experiences, wellness, development of individual fitness goals; instruction, small group activities, and one-on-one support; integration of concepts and skills in health, social relationships, leisure activities, and daily living.

**205:010 Personal Relationships and Sexuality**

1 s.h.

Help in maintaining current relationships and establishing new ones with family, friends, coworkers, teachers, significant others, and strangers; emotions, interpersonal communication skills, social cues, appropriate workplace relationships, risk prevention, responsible sexual behavior; influence of family values, culture, peer pressure, other factors in one's decisions about sexual behavior; disability awareness related to relationships, pregnancy prevention, the process of pregnancy; group discussion, one-on-one counseling support, role-playing, guided real-world experiences.

**205:011 Personal Finance and Math I**

2 s.h.

Understanding of numbers, operations, and managing personal finances; computation strategies, problem-solving strategies, skills for good consumers; opportunity to practice math skills in the community and the workplace; first in a series.

**205:012 Personal Finance and Math II**

2 s.h.

Skills and knowledge needed for managing personal finances; banking, budgeting, insurance, how to be a good consumer; students plan for their financial future by studying paycheck information, actual income, and tax responsibility; research on independent living costs; second in a series.

**205:013 Lifetime Reading**

1 s.h.

Enhancement of leisure reading toward enjoyment of reading as a lifetime activity; trip to the library to discover interesting genres and subjects; individual and group activities to review and talk about books; how to discuss components of books such as plot, characters.

**205:014 Practical Writing**

1 s.h.

Writing tools for success in daily living; experience with a range of writing forms, beginning with short organizational forms such as to-do and grocery lists and progressing to family correspondence and business letters; observation and demonstration of writing techniques in group activities; help with self-expression in written formats, with focus on organization and communication with others; students practice writing techniques in class, in their residence halls, and in the community; seminar.

**205:015 Literature and the Arts**

1 s.h.

Exposure to literature and the arts and the experience of connection and life enhancement that arts activities provide; reading and discussing literature, field trips to museums, musical performances, plays; opportunity to review and identify leisure activities to enjoy throughout life.

**205:016 Exploring Issues in Society**

1 s.h.

Diversity and social justice issues; some social implications of being a person with a disability (e.g., negative treatment from others due to stigma, ignorance, stereotypes); guidance toward empowerment in self-advocacy at work, at school, and in community life; overview of cognitive and learning disabilities, Americans with Disabilities Act and other legislation that promotes equality, history of the disability rights movement, current social trends affecting people with disabilities; perspectives from America's history of social, cultural, and religious unity, celebration, and conflict.

**205:017 Tools for Life I: Critical Thinking**

1 s.h.

Introduction to strategies, key elements, and resources for critical thinking; problem-solving and critical-thinking strategies and skills for responsible, independent decision making in personal, university, career, and community contexts; small-group discussion, case studies, role-playing, and applied practice in real-world situations related to daily, personal, academic, and career decisions.

**205:018 Tools for Life II: Problem Solving**

1 s.h.

Introduction to strategies and methods of problem solving; evaluation of scenarios from academic, social, and work environments; discussion of students' personal and current experiences; focus on development of interpersonal communication skills, relationship building, independence, career selection.

**205:019 Personal Leadership**

1 s.h.

Builds on concepts learned in 205:016; self-advocacy and awareness of individual strengths as empowerment for leadership roles in the community; qualities of a leader, value of mentors, importance of community service; elements of work-life balance; opportunities to participate in life-long service learning and leadership.

**205:020 Psychology** 2 s.h.

Basic concepts of psychology, with focus on application in daily life; students conduct an experiment and may write a brief paper; vocabulary as a basis for learning and application.

**205:021 Sciences of Life** 1 s.h.

Scientific skills as they relate to everyday life and the world; skills involving independent operation of tools and equipment, working in a group, appropriate strategies for decision making and problem solving based on the scientific method; exploration of life sciences through classroom learning and exploratory activities.

**205:022 Social Skills II and Conflict Management** 2 s.h.

Continuation of 205:002; more advanced relationship skills that require self-regulation; self-awareness; applying skills for communicating when under stress; structured learning process including repetitive practice and modeling as key components; lectures, modeling, role play, and practice in the community.

**205:023 Fitness and Wellness Lab II** 1 s.h.

Builds on skills learned in 205:009; recreation and fitness opportunities across the lifespan; benefits of physical activity, year-round fitness activities, one-on-one support, help with developing and achieving personal wellness goals; integration of concepts and skills in health, social relationships, leisure activities, daily living.

**205:024 Great Conversations** 1 s.h.

Opportunity to learn across the academic disciplines and interact with University of Iowa professors and other guest lecturers; topics vary.

**205:025 Social Skills II** 2 s.h.

Continuation of 205:002; more advanced relationship skills that require self-regulation; self-awareness; applying skills for communicating under stress; structured learning process including repetitive practice and modeling as key components.

**205:030 Career Exploration** 4 s.h.

Opportunity to explore, enhance, or broaden work interests, skills, and potential career opportunities; interest inventories, review of vocational experiences, interactive employer presentations, informational interviews, job site experiences; focus on self-assessment of one's individual vocational strengths.

**205:031 Job Search Strategies** 2 s.h.

Fundamental tools and techniques for getting a job; students create a résumé, including references and updated work history; interview techniques, information gathering, thank-you letters, work-related vocabulary, appropriate behaviors and attitudes for a successful job search; role playing, demonstrations, real-world practice.

**205:032 Entrepreneurism** 2 s.h.

Characteristics, advantages, and disadvantages of self-employment; legal aspects of forming a business, marketing, acquiring start-up funding and other resources; financial obligations and monitoring of funds required for a successful business; students write a business plan.

**205:033 Business Support Seminar** 1 s.h.

Aspects of careers in business support; office procedures, word processing skills, oral and written communication, records management, business terminology.

**205:034 Creative Arts Seminar** 1 s.h.

Aspects of careers in creative arts; availability of employment, professional association memberships, vocabulary used in the creative arts work environment.

**205:035 Education Career Seminar** 1 s.h.

Aspects of careers in education; additional training typically required for careers in education, child/student needs, lesson planning.

**205:036 Health Services Seminar** 1 s.h.

Aspects of careers in health services; office procedures and equipment, customer service skills, terminology used in health care environments.

**205:037 Hospitality Seminar** 1 s.h.

Aspects of careers in hospitality; customer service skills, phone and counter etiquette, vocabulary used in the hospitality industry.

**205:038 Human Services Seminar** 1 s.h.

Aspects of careers in human services; types of human services environments, interpersonal relationships and boundaries, paperwork requirements, terminology commonly used in human services environments.

**205:039 Industrial Seminar** 1 s.h.

Aspects of careers in industrial and production environments; occupational skill requirements and standards, knowledge of typical equipment that employees must operate, safety in the workplace, vocabulary for industrial and production work environments.

**205:040 Marketing/Sales Seminar** 1 s.h.

Aspects of careers in marketing and sales; customer service skills, use of retail equipment, marketing techniques and the importance of product appearance, pricing and advertising, vocabulary used in a retail sales environment.

**205:041 Parks and Natural Resources Seminar** 1 s.h.

Aspects of careers in parks and natural resources management; operation and maintenance of equipment, safety procedures, customer service skills, typical vocabulary for positions involving care and management of shrubs, trees, flowers, and turf.

**205:042 Skilled Trades Seminar** 1 s.h.

Aspects of careers in the skilled trades; occupational skill standards in specific skilled trades, apprenticeships or advanced training required, safety in the workplace, vocabulary typical for specific skilled-trade work environments.

**205:043 Information/Technology Seminar** 1 s.h.

Aspects of careers in information technology; occupational skill requirements and standards, knowledge of typical equipment employees must operate, safety in the workplace, typical vocabulary for information technology work environments.

**205:050 Life Skills I--Transitions** 2 s.h.

Components of successful independent and community living; personal safety issues, effective communication skills for interacting with peers and college personnel, how to access broad community resources for living, work, and leisure; students develop a plan for personal daily routines; classroom activities, practical experiences on campus and in the community.

**205:051 Life Skills II--Community Life** 2 s.h.

Review of previously learned skills for making the transition to independent living in the college environment; use of a personal planner for managing daily routines and schedules, planning for independent living after graduation; classroom activities, practical experiences on campus and in the community.

**205:052 Life Skills III--On Your Own** 2 s.h.

Goal setting and planning for independent living after college; how to use daily living skills from college in students' planned home communities; skills required for finding and managing a home or apartment, using community resources and agencies, and meeting basic needs; how to be interdependent and independent in the community.

**205:060 Internship I--Prep** arr.

Introduction to functional skills, job expectations, environments of the workplace; students venture out into the community and see first-hand what a specific career or job entails; role of the influencer; small groups, job shadowing, tryouts--depending on individual needs and abilities; create a résumé; summer job searching skills; preparation for Internship II--applications, interviews, contacting employers. Requirements: enrollment in REACH program.

**205:061 Internship II** arr.

Internship experience leading to increased independence in the workplace (e.g., more independent operation of equipment, socialization, workplace safety, problem solving, conflict management); opportunity to acquire additional workplace skills in the student's career emphasis area; employers and mentors guide students in fulfilling their job responsibilities; students maintain a journal and discuss their experience with their advisor or instructor; second of three consecutive internships.

**205:062 Internship III**

arr.

Internship experience with opportunities to develop more advanced skills for independent communication, problem solving, and workplace performance in the student's career emphasis area; employers and mentors observe the student in the workplace; students maintain a journal and discuss their experience with their advisor or instructor; third of three consecutive internships.

**205:098 Special Topics**

arr.

Topics include leisure resources, current events, science, family life, consumerism, community involvement, self-determination, self-advocacy, leadership, assistive technology, mentoring; course assignments, instruction, and student assessment in classroom and/or community settings; may be required or elective course.

**205:099 Independent Study**

arr.

Independent study coordinated with the student's REACH advisor.

# Educational Policy and Leadership Studies

**Chair:** Christopher C. Morphew

**Program coordinator, educational leadership:** Marcus J. Haack

**Program coordinator, higher education and student affairs:** Debora L. Liddell

**Program coordinator, schools, culture, and society:** Christine L. McCarthy

**Professors:** David B. Bills, Sandra B. Damico, Lelia B. Helms, Alan B. Henkin, Christopher C. Morphew, Ernest T. Pascarella, Michael B. Paulsen, Elizabeth J. Whitt, Donald B. Yarbrough

**Professors emeriti:** Larry D. Bartlett, George A. Chambers, Walter J. Foley, Jerry N. Kuhn, Bradley M. Loomer, H. Bradley Sagen

**Associate professors:** Debora L. Liddell, Christine L. McCarthy, Scott F. McNabb, Christine A. Ogren, Chet S. Rzonca, Katrina Sanders, Carolyn L. Wanat, Sherry K. Watt

**Associate professors emeriti:** Robert E. Engel, Ray A. Muston, Sara C. Wolfson

**Clinical associate professors:** Marcus J. Haack, Susan M. Lagos Lavenz

**Assistant professors:** Brian P. An, Elizabeth Hollingworth

**Assistant professor emeritus:** Charles M. Mason

**Adjunct assistant professors:** Dorothy M. Persson, Von Stange

**Adjunct assistant professor emeritus:** Wendell C. Boersma

**Visiting assistant professor:** Becki Elkins Nesheim

**Graduate degrees:** M.A., Ed.S., Ph.D. in Educational Policy and Leadership Studies

**Web site:** <http://www.education.uiowa.edu/epls/>

The Department of Educational Policy and Leadership Studies offers programs that prepare administrators, professional personnel, teachers, and researchers in the fields of educational leadership, higher education and student affairs, and schools, culture, and society. The academic programs in the department reflect this diversity of purpose.

## Graduate Programs

The Department of Educational Policy and Leadership Studies offers Master of Arts, Specialist in Education, and Doctor of Philosophy degrees in educational policy and leadership studies, with the following programs: educational leadership (offered in the M.A., Ed.S., and Ph.D.); higher education and student affairs (offered in the M.A., Ed.S., and Ph.D.); school curriculum and assessment policy (offered in the Ed.S.); and schools, culture, and society (offered in the M.A. and Ph.D.). Each program is described below, with information about program and admission requirements.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

### PH.D. REQUIRED RESEARCH COURSES

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

## Educational Leadership

Study in educational leadership prepares individuals for leadership positions. The department offers the M.A., Ed.S., and Ph.D. programs in educational leadership as well as administrative licensure and superintendent endorsement. It also offers joint programs with other College of Education departments and with other colleges at the University.

### Licensure

To be eligible for recommendation by The University of Iowa for licensure in Iowa as a principal or superintendent/area education agency administrator, students must complete the appropriate program. The specific requirements for each program are available from the Department of Educational Policy and Leadership Studies and the Office of Teacher Education and Student Services.

Students who hold an M.A. must satisfy all core requirements and must complete at The University of Iowa the minimum semester-hour program for each licensure level they seek. Because each administrative license has specific requirements, candidates are required to plan their programs with their advisors' approval.

### Superintendent Endorsement

The superintendent endorsement curriculum is designed to prepare individuals for licensure as a school superintendent (pre-K-12) as well as for other school district leadership positions; for the chief administrator position in Iowa's area education agencies (AEA) as well as other AEA leadership positions; and for leadership positions in state or federal departments of education and related agencies.

The superintendent endorsement requires a total of 37 s.h., including 32 s.h. earned in required course work beyond the master's degree plus 5 s.h. earned in elective courses. Electives may be taken in or outside the College of

Education, depending on the student's career goals and interests.

### **M.A. in Educational Leadership**

The Master of Arts program in educational leadership prepares individuals for appointments as school principals and central office administrators, and for positions in area education agencies and state departments of education. The M.A. is a nonthesis program that requires a minimum of 36 s.h. of graduate credit.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. Factors considered include recommendations, grade-point average, Graduate Record Examination (GRE) General Test scores, an aptitude survey, an essay demonstrating writing ability, and other evidence of academic ability and professional promise.

#### **CORE REQUIREMENTS**

With the aid of an advisor, each M.A. student prepares a plan of study that includes the following core requirements.

07B:200 Leadership ePortfolio Production	1 s.h.
07B:201 Foundations of School Administration	3 s.h.
07B:236 Administration of Students with Special Needs	3 s.h.
07B:242 Research for Effective School Leaders	3 s.h.
07B:260 Contemporary Management Strategies for the K-12 Principal	3 s.h.
07B:285 School and Community Relationships	3 s.h.
07B:298 Legal Aspects of School Personnel	3 s.h.
07B:381 Analysis and Appraisal of Curriculum	3 s.h.
07B:383 Supervision and Evaluation	3 s.h.

For Iowa licensure as a principal, students must meet the human relations requirement of the State of Iowa. Students must complete the core requirements listed above and required clinical courses (07B:400 Early Childhood Leadership Clinical, 07B:401 Elementary Leadership Clinical, 07B:402 Secondary Leadership Clinical, and 07B:403 Special Education Leadership Clinical). Candidates may choose electives approved by the advisor.

#### **COMPREHENSIVE EXAMINATION**

The M.A. comprehensive examination consists of a three-hour examination and a presentation of the student's ePortfolio. Students must be registered in the Graduate College during their comprehensive examination semester if they plan to graduate at the end of that semester.

### **Ed.S. in Educational Leadership**

The Specialist in Education program in educational leadership prepares candidates for administrative appointments in school districts, area education agencies, state departments of education, and the U.S. Department of Education. The Ed.S. also helps school administrators upgrade their administrative skills to the level of superintendent of schools. Students seeking licensure plan a program approved by an advisor to meet State of Iowa licensure requirements.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. Factors considered include recommendations, grade-point average, Graduate Record Examination (GRE) General Test scores, and other evidence of academic ability and professional promise.

#### **CORE REQUIREMENTS**

07B:224 Organizational Theory and Administrative Behavior	3 s.h.
07B:291 Administration of Educational Programs and Personnel	3 s.h.
07B:299 Legal Aspects of School Administration	2-3 s.h.
07B:395 Educational Specialist Research	arr.

**PROGRAM EMPHASIS**

Students must complete their remaining minimum required semester hours (minus electives) in one of the following emphasis areas. Courses listed for each emphasis area are required.

**Elementary School Administration**

07P:150 Introduction to Educational Measurement 3 s.h.

**Secondary School Administration**

07P:150 Introduction to Educational Measurement 3 s.h.

**General School Administration**

07B:205 Collective Bargaining in Education 3 s.h.

07B:295 Financial Management of Local School Systems 3 s.h.

07B:404 Central Administration Clinical 1-3 s.h.

07P:143 Introduction to Statistical Methods 3 s.h.

**ELECTIVES**

Students choose electives to complete the 62 s.h. required for the Ed.S. They may choose electives for specialization in fields such as staff personnel, business affairs, instruction, theory, legal aspects, curriculum, and information systems.

**RESEARCH**

All Ed.S. students must complete a formal research paper (4 s.h.) that deals with a specific problem in school administration or instruction.

**COMPREHENSIVE EXAMINATION**

The Ed.S. comprehensive examination consists of two 3-hour examinations: one in educational leadership and the other in a specialized area of educational leadership or a related field. Students must be registered in the Graduate College during their comprehensive examination semester if they plan to graduate at the end of that semester.

**Ed.S. in School Curriculum and Assessment Policy**

The Specialist in Education program in school curriculum and assessment policy is an interdisciplinary. It trains graduate students to become school leaders who know how to use assessment information for accountability purposes and curriculum evaluation. The program offers concentrations in policy, measurement and statistics, and curriculum and draws on course work from across the College of Education. Graduates are qualified to serve as educational leaders in the areas of school policy, assessment, and curriculum at federal, state, and district levels.

The Ed.S. program in school curriculum and assessment policy requires 36 s.h. of graduate credit beyond the master's degree, although a student's academic background experience, needs, and interests may affect the amount of credit required.

For more information, see School Curriculum and Assessment Policy on the Department of Educational Policy and Leadership Studies web site.

**Ph.D. in Educational Leadership**

The Doctor of Philosophy program in educational leadership prepares students for leadership positions at all levels of education and administrative practice (school administration, college and university teaching and research). The program is flexible, with individually designed study plans that include course work in related disciplines and research pursuits. Integration of theory and practice is emphasized.

Ph.D. students are expected to achieve competence in educational program planning, finance and governance, leadership theory, evaluation, and research methodologies that include statistical methods. They also must gain expertise in areas of specialized program and personnel policy analysis.

The Ph.D. program in educational leadership requires a minimum of 90 s.h. of graduate credit. Course content includes prerequisites, a core of common competencies, at least one specialization in the administrative field, cognate study outside the college, research skill development, and a research dissertation.

Common specialization areas are general administration, elementary school administration, secondary school administration, systems analysis and research, school finance, curriculum, legal aspects, theory, and school personnel.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Admission decisions are made through a faculty review process. The program admits a maximum of 10 students each fall semester or preceding summer session. Admission is based on several factors, including recommendations from college or university faculty that speak to the candidate's scholarship and potential for academic success; cumulative grade-point average; Graduate Record Examination (GRE) General Test scores; and a written statement addressing one of several topics (personal philosophy of education, steps in the professionalization of teaching, current educational issues and their administrative impact, or the role of administration in educational organizations).

Applications must be submitted well in advance of the intended semester of admission.

#### **CORE COURSES**

Core courses provide the background necessary for further study, including research in specialized areas. They also develop competencies common to the functional areas of school administration. The core courses integrate planning of educational personnel programs, analysis of the politics and economics of governance and the financing of public education, evaluation of administrative leadership theories, and options in research methodology and quantitative analysis.

Each core course carries 3 s.h. of credit, is open only to Ed.S. and Ph.D. students, and requires the development and practice of interaction, reading, and writing skills.

Seminars designed primarily for doctoral candidates are offered to supplement each functional core area. Student scholarship is reflected in writing, reading, and research in doctoral seminars.

#### **COGNATES**

Students who specialize in administration must complete a 9 s.h. cognate outside the College of Education with the advisor's approval.

#### **REQUIRED RESEARCH COURSES**

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

#### **COMPREHENSIVE EXAMINATION**

Ph.D. students must satisfactorily complete a six-hour comprehensive examination in the six common areas of educational leadership and a three-hour examination based on the student's specialization areas and approved by the student's advisor and the department chair. To be eligible to take the Ph.D. comprehensive examination, students must be completing or must have completed the doctoral core courses and the research tool requirements. Students must be registered in the Graduate College during their comprehensive examination semester. They may not register for more than 3 s.h. of Ph.D. thesis credit that semester, and they may not earn dissertation credit before that semester. No Ph.D. comprehensive examinations are held during summer sessions.

Students pursuing doctoral programs in areas other than educational leadership who want to use some aspect of the educational leadership program as a concentration area for a comprehensive examination should consult with an advisor in the Department of Educational Policy and Leadership Studies early in their program of study.

Any specialization area open to doctoral students in educational leadership is open to other doctoral students who meet the necessary prerequisites for specific courses. Students should complete approximately 12 s.h. in one specialization area before requesting a comprehensive examination. If the student decides to use a field within educational leadership as a related comprehensive area, he or she should plan to complete approximately 18 s.h. of diversified course work in educational leadership.

#### **DISSERTATION**

All students must write a formal dissertation prospectus and submit it for approval first by their dissertation advisor and then by their doctoral committee. The student and advisor determine when the prospectus is complete. The prospectus committee meets to make a final evaluation of the prospectus and to decide whether to grant the student approval to proceed. Dissertation prospectus meetings are not held during summer sessions.

Students must accumulate 10 s.h. of dissertation research credit. The doctoral program culminates with final oral defense of the dissertation. Students must be registered at The University of Iowa during the session in which they graduate.

### **RESIDENCY**

Each doctoral student must successfully complete two semesters (minimum of 9 s.h. on campus) to fulfill the residency requirement.

The following sample Ph.D. program is based on the required minimum of 90 s.h. and assumes that students enter with an M.A. and 36 s.h. of graduate credit.

### **Core Requirements**

07B:206 Research Process and Design	3 s.h.
or	
07B:370 Quantitative Methods for Policy Analysis	3 s.h.
07B:224 Organizational Theory and Administrative Behavior	3 s.h.
07B:291 Administration of Educational Programs and Personnel	3 s.h.

### **Other Required Courses**

07X:150 Introduction to Educational Research (taken during first year in program)	3 s.h.
Cognate courses selected with approval of advisor	9 s.h.
Research design and/or statistics and/or qualitative research courses	15 s.h.
Thesis	10 s.h.

## **Higher Education and Student Affairs**

Advanced study in higher education and student affairs draws upon diverse perspectives from varied disciplines and professional fields to analyze critical issues and policies and their effects on students, faculty, administrators, staff, and other members of the higher education community. It also explores the complex interactive relationships among institutions of higher education, the external environment, and society at large.

The department's graduate programs in higher education and student affairs prepare professionals and scholar-practitioners to serve as administrators, researchers, teachers, specialists, and analysts in institutions of higher and postsecondary education and in related public and private agencies. The programs provide opportunities for concentrated study in organization and administration; policy in higher education; student affairs administration; teaching, learning, and curriculum in higher education; and foundations of higher education.

### **M.A. in Higher Education and Student Affairs**

The Master of Arts program in higher education and student affairs prepares graduates for entry-level and midlevel administrative, programming, and policy positions in two- and four-year institutions. Students choose one of three concentrations when they apply to the program: student affairs, higher education policy, or higher education administration. Through these three concentrations, the program prepares individuals for positions in advising, programming, administration, management, and policy.

### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Admission is based on grade-point average, Graduate Record Examination (GRE) General Test scores, and promise for professional growth. Transcripts, GRE scores, three letters of recommendation, and a statement of educational goals are required. Application deadline is February 15 for admission the following fall.

## **REQUIREMENTS**

The M.A. program in higher education and student affairs requires a minimum of 40 s.h. of graduate credit. Students take six hours of written examinations based on the core, concentration, and specialization, according to the plan of study developed individually for each student.

Concentration areas in which exams may be written include administrative practices, policy studies, and student affairs. Students majoring in another field who want to complete a related field in higher education and to be eligible to write a related-field examination should consult with a higher education and student affairs faculty member early in their study. Plans of study are developed individually and approved by the faculty.

### **Ed.S. in Higher Education and Student Affairs**

The Specialist in Education program in higher education and student affairs provides advanced graduate study in administration, policy studies, and specializations developed in consultation with the advisor. The Ed.S. also may be awarded upon completion of a joint program of graduate work in higher education and an academic field, or upon completion of a higher education sequence following a master's degree program.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Admission is based on grade-point average, GRE General Test scores, and promise for professional growth. Transcripts, GRE scores, three letters of recommendation, and a statement of educational goals are required.

Applications must be submitted well in advance of the intended semester of admission.

#### **REQUIREMENTS**

The Ed.S. program in higher education and student affairs requires 60 s.h. of graduate credit. The program of study must include at least 18 s.h. in professional education and related fields, including an appropriate structured internship determined in consultation with the advisor; at least 28 s.h. in the student's specialization area and 10 s.h. of electives, all approved by the advisor; and 4 s.h. of research credit in 07B:395 Educational Specialist Research.

#### **COMPREHENSIVE EXAMINATION**

The comprehensive examination consists of a take-home written exam covering the field of higher education and student affairs and the student's concentration area. The written exams may be followed by an oral exam.

#### **RELATED FIELD**

Students majoring in another field who want to complete a related field in higher education and student affairs should consult with a higher education and student affairs faculty member early in their study. Plans of study are developed individually.

#### **TEACHING INTERNSHIP**

Program participants teach half-time for a full semester at a cooperating community college under the supervision of an experienced faculty member in that college and with field supervision from The University of Iowa. Interns participate in the academic life of the host community college, and they often gather data for their Ed.S. research project during the internship. Participants must be willing to travel to a community college and reside there for the one-semester program.

### **Ph.D. in Higher Education and Student Affairs**

The Doctor of Philosophy program in higher education and student affairs prepares faculty and scholar-practitioners for leadership in varied higher education settings. Graduates typically serve in leadership positions in student affairs and academic administration, as graduate faculty at research universities, as leaders in conducting research about college students and higher education, and as policy analysts in postsecondary institutions and public or private agencies.

The program offers concentrations in five areas: student affairs administration; policy in higher education; teaching, learning, and curriculum in higher education; organization and administration of higher education; and foundations of higher education.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Each applicant must submit a personal statement explaining his or her professional goals, experiences, and research plans; undergraduate and graduate grade-point averages; undergraduate and graduate transcripts; three letters of recommendation; and scores on the Graduate Record Exam (GRE) General Test. Admission is for fall semester entry. Application deadline is January 15

for admission the following fall.

## **REQUIREMENTS**

The Ph.D. program in higher education and student affairs requires 90 s.h. of graduate credit, including a substantive common core (24 s.h.), a research core (18 s.h.), a concentration area (12 s.h.), graduate electives (24 s.h.), and dissertation research (12 s.h.).

### **Substantive Common Core**

The substantive common core reflects an important foundational understanding of higher education. It is a base of general knowledge that all students must master, regardless of their career goals and interests. All courses in the core (24 s.h.) must be taken at The University of Iowa.

07B:216 Finance in Higher Education	3 s.h.
07B:218 The Law and Higher Education	3 s.h.
07B:220 History of Higher Education	3 s.h.
07B:221 The College Curriculum	3 s.h.
07B:224 Organizational Theory and Administrative Behavior	3 s.h.
07B:225 Introduction to Public Policymaking	2-3 s.h.
07B:240 Topics in Education (when topic is Diversity and Equity in Higher Education)	3 s.h.
07B:251 College Students and Their Environments	3 s.h.

### **Research Core**

The research core assures that the student achieves scholarly autonomy and initiative.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site). Course selections must be consistent with the following research core requirements.

All students take the following three courses, or their equivalent, as approved by the advisor and the course instructor.

07B:206 Research Process and Design	3 s.h.
07C:338 Essentials of Qualitative Inquiry	3 s.h.
07X:150 Introduction to Educational Research (taken during first year in program)	3 s.h.

In addition, students and their advisors choose at least three more research courses appropriate to the student's research interests.

### **Concentration Area**

The concentration area gives students the opportunity to develop a particular expertise. Students may complete up to 24 s.h. in the program before they must declare a concentration, which they must choose from one of the following five areas: student affairs administration; policy in higher education; teaching, learning, and curriculum in higher education; organization and administration of higher education; and foundations of higher education. Each concentration has its own course requirements and options.

### **Graduate Electives**

Students choose 24 s.h. of elective graduate course work in consultation with their advisors. The student and his or her advisor may determine that some of the graduate elective work may be drawn from appropriate previous graduate course work that complements other aspects of the student's doctoral program.

### **Dissertation Research**

Students conduct their dissertation research (12 s.h.) under the supervision of their faculty advisor. The program culminates with a final oral defense of the dissertation; see "Dissertation" below.

## COMPREHENSIVE EXAMINATION

The Ph.D. comprehensive examination consists of a set of take-home questions with a limited time to respond. Questions are based on the substantive core, the student's concentration, and research core content. The written examination is followed by an oral examination.

## DISSERTATION

The dissertation is a major research study planned in collaboration with the student's advisor. Students must write a formal dissertation proposal and submit it for approval, first to their advisor and then to the members of their doctoral committee. Students and their advisors determine when the proposal is complete. Students must earn 12 s.h. of dissertation research credit. The doctoral program culminates with a final oral defense of the dissertation.

Students must be registered at The University of Iowa each fall and spring semester from the semester in which they complete their comprehensive examination through the semester in which they defend their dissertation and graduate.

## RESIDENCY

Each doctoral student must successfully complete two semesters (minimum of 9 s.h. each semester) on campus to fulfill the residency requirement.

## Schools, Culture, and Society

Schools, culture, and society is an interdisciplinary program designed to enhance students' ability to analyze the influence of social, historical, and philosophical factors that frame contemporary issues in the formal social enterprise of education.

Applicants must meet the admission requirements of the Graduate College. A personal interview with one or more members of the program's faculty is recommended. An undergraduate and/or graduate emphasis in education, philosophy, history, sociology, international studies, or the humanities is recommended. Other areas of study also may be useful.

### M.A. in Schools, Culture, and Society

The Master of Arts program in schools, culture, and society is a nonthesis program that requires a minimum of 32 s.h. of graduate credit. Students complete at least 24 s.h. in schools, culture, and society courses in three disciplinary areas: philosophy, history, and sociology. They earn 9 s.h. in each of two of the areas and 6 s.h. in the third area. The remaining 8 s.h. of course work must be in a concentration area appropriate to the student's career and academic goals.

M.A. students must satisfactorily complete a six-hour comprehensive examination covering the program's three disciplinary areas and the student's concentration area. The examining committee may elect to hold an oral examination after the exam.

### Ph.D. in Schools, Culture, and Society

The Doctor of Philosophy program in schools, culture, and society requires a minimum of 90 s.h. of graduate credit. Requirements include a common core (15 s.h.), a disciplinary foundation (9 s.h.), an interdisciplinary focus (9 s.h.), cognate courses (27 s.h.), research tools (18 s.h.), and a dissertation (12 s.h.).

## COMMON CORE

All Ph.D. students in schools, culture, and society must complete all five courses in the common core.

07B:102 History of American Education	2-3 s.h.
07B:130 Sociology of Education	2-3 s.h.
07B:156 Philosophies of Education	2-3, 5 s.h.
07X:140 Introduction to Multicultural Education and Culturally Competent Practice	3 s.h.
A course in contemporary education conflicts (prefix 07B)	

## DISCIPLINARY FOUNDATION

Students choose one of three disciplinary foundation areas: sociology, history, or philosophy. They take two courses offered by the Department of Educational Policy and Leadership Studies (prefix 07B) in that area and one course offered by the corresponding department in the College of Liberal Arts and Sciences: sociology (prefix 034), history (prefix 016), or philosophy (prefix 026). The following lists provide examples of courses appropriate for the three

disciplinary foundation areas.

Sociology:

07B:134 Education and the World of Work	2-3 s.h.
07B:142 Sociology of Higher Education	3 s.h.
07B:210 Education and Social Change	2-3 s.h.
07B:232 Advanced Theory Sociology of Education	3 s.h.
07B:238 Gender and Education in Historical Perspective	3 s.h.
07B:240 Topics in Education (topic: sociology of education)	arr.

History:

07B:122 History of School Leadership in the United States	3 s.h.
07B:123 History of Ethnic/Minority Education	2-3 s.h.
07B:126 Twentieth-Century Educational Movements	2-3 s.h.
07B:220 History of Higher Education	3 s.h.
07B:237 History of the Teaching Profession	3 s.h.
07B:238 Gender and Education in Historical Perspective	3 s.h.
07B:240 Topics in Education (topic: history of education)	arr.

Philosophy:

07B:155 Critical Thinking	3 s.h.
07B:157 Ethics in Education	3 s.h.
07B:158 John Dewey and Education	2-3 s.h.
07B:240 Topics in Education (topic: philosophy of education)	arr.
07B:358 Seminar in the Philosophy of John Dewey	3 s.h.

**INTERDISCIPLINARY FOCUS**

Students choose one of two interdisciplinary focus areas: diversity and equity, or policy contexts. They take three courses in that area, chosen from the corresponding list below, and must choose courses that are outside their disciplinary foundation area (see "Disciplinary Foundation" above).

Diversity and equity:

07B:120 Teaching in a Culturally Diverse Society	2-3 s.h.
07B:123 History of Ethnic/Minority Education	2-3 s.h.
07B:154 Education, Race, and Ethnicity	2-3 s.h.
07B:157 Ethics in Education	3 s.h.
07B:237 History of the Teaching Profession	3 s.h.
07B:238 Gender and Education in Historical Perspective	3 s.h.
07B:275 Diversity and Equity in Higher Education	3 s.h.
A relevant course from another department, with advisor's approval	

Policy contexts:

07B:126 Twentieth-Century Educational Movements	2-3 s.h.
07B:134 Education and the World of Work	2-3 s.h.
07B:157 Ethics in Education	3 s.h.
07B:210 Education and Social Change	2-3 s.h.
07B:225 Introduction to Public Policymaking	2-3 s.h.
07B:228 Policy Design and Implementation	2-3 s.h.
07B:237 History of the Teaching Profession	3 s.h.
One relevant course from another department, with advisor's approval	

**COGNATE COURSES**

Students earn a maximum of 27 s.h. in College of Liberal Arts and Sciences (CLAS) courses that are relevant to their program of study. CLAS courses taken to fulfill the disciplinary foundation requirement or the interdisciplinary focus requirement do not count toward the cognate course requirement, but relevant courses completed in earlier graduate study may be accepted for this requirement.

**RESEARCH Tools**

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site). Students must complete one research course (3 s.h.) on the use of quantitative research in policy evaluation (e.g., 07B:250 Introduction to Student Affairs). Students should choose research courses in consultation with their advisors.

## COMPREHENSIVE EXAMINATION

The comprehensive examination consists of three take-home exams, each with a maximum of 12 pages. The first exam covers the common core, the second covers the student's interdisciplinary focus area, and the third covers the student's disciplinary foundation area.

## DISSERTATION

After completing the comprehensive examination, Ph.D. students write a formal dissertation prospectus and submit it for approval first to their dissertation advisor and then to the members of their dissertation committee. The dissertation prospectus must be formally approved by the dissertation advisor and the dissertation committee before the student may begin his or her dissertation research.

Students must earn 12 s.h. of dissertation research credit. The dissertation process culminates with a final oral defense of the dissertation. Students must register at The University of Iowa each fall and spring semester until the dissertation is successfully defended and the Ph.D. is awarded.

## RESIDENCY

Each doctoral student must successfully complete two semesters (a minimum of 9 s.h. per semester) on campus to fulfill the residency requirement.

# Educational Policy and Leadership Studies Courses

<b>07B:100 Issues and Policies in Higher Education</b>	3 s.h.
Development of the idea of a university; selected functions, issues, policies of American higher education.	
<b>07B:101 Professional Seminar: Social Foundations</b>	1 s.h.
Introduction to the five disciplinary components of social foundations; professional development of social foundations scholars; workshop on dissertation, other student-authored scholarly papers.	
<b>07B:102 History of American Education</b>	2-3 s.h.
American educational history, with emphasis on conflicting historical interpretations of pivotal events and educational movements; contemporary reform efforts examined in historical perspective.	
<b>07B:104 Education in the Third World</b>	2-3 s.h.
Educational implications of various development issues, including role of media, and multinational corporations and foreign aid; educational dilemmas currently facing Third World governments.	
<b>07B:110 Administration and Policy in Gifted Education</b>	2 s.h.
Policy, administrative, evaluation issues in developing and maintaining gifted programs in a school setting; participants develop gifted program and policies for a school; for school executives and coordinators of gifted programs.	
<b>07B:111 Evaluation of Gifted Programs</b>	1 s.h.
Fundamentals of program evaluation essential for exemplary gifted programs.	
<b>07B:113 Staff Development for Gifted Programs</b>	1 s.h.
Planning, content, and delivery of staff development regarding gifted students and their needs.	
<b>07B:116 Effective Instructn: Assessmnt Learning</b>	3 s.h.

Professional development sequence designed for practicing teachers to develop conceptual knowledge and understanding of Assessment for Learning implementation and practice, a key component of effective instruction; training modules are aligned with the Iowa Department of Education's "Characteristics of Effective Instruction," with videos of best practice across the state.

**07B:120 Teaching in a Culturally Diverse Society** 2-3 s.h.

Issues in education and individual educators' own practice related to increasing cultural, racial, and linguistic diversity; challenges, concerns.

**07B:122 History of School Leadership in the United States** 3 s.h.

History of public school administration; 19th-century crusade of Horace Mann and other common-school reformers, social-efficiency movement of early 20th century; gender issues, parental involvement in history of school leadership.

**07B:123 History of Ethnic/Minority Education** 2-3 s.h.

Educational histories of American ethnic and minority groups; comprehensive understanding of American educational history, context for contemporary educational policy discussions.

**07B:126 Twentieth-Century Educational Movements** 2-3 s.h.

Current educational policy debates concerning diversity and equity, historical roots of these policies; historical context for 20th-century equal education opportunity movements.

**07B:130 Sociology of Education** 2-3 s.h.

Macrosociological perspective of role of education in social systems; impact of formal education on social stratification, social mobility, economic achievement in the United States and selected countries.

**07B:134 Education and the World of Work** 2-3 s.h.

Relationship between education and work in individual and organizational behavior, and between educational and economic systems; economics, psychology, sociology, education.

**07B:142 Sociology of Higher Education** 3 s.h.

Sociology of education and higher education research combined; inequality and stratification relative to higher education.

**07B:150 Leadership and Public Service I** 3 s.h.

Preparation for providing public service to a local community; leadership skills for effective mentoring of children in grades 6-10.

**07B:151 Leadership and Public Service II** 2 s.h.

Preparation to provide leadership and public service to a local community agency; being a leader and a public servant in the context of societal oppressions such as racism, sexism, able-bodyism; part of the human relations minor.  
Prerequisites: 07B:150.

**07B:154 Education, Race, and Ethnicity** 2-3 s.h.

Role of education in ethnic and racial stratification in the United States and other nations; influence of variations in family structure, stratification patterns, institutional constraints in formation of educational aspirations and achievement levels. GE: Cultural Diversity.

**07B:155 Critical Thinking** 3 s.h.

Formal and informal logic and probabilistic reasoning; focus on construction and critical analysis of arguments; introduction for students planning research in social foundations.

**07B:156 Philosophies of Education** 2-5 s.h.

Principal educational philosophers and philosophies that have influenced Western education; emphasis on how philosophical ideas and conflicts have shaped the educational scene.

**07B:157 Ethics in Education** 3 s.h.

Major theories of the nature of ethical action and of value judgment; theoretical accounts related to the practical decision making contexts of teaching.

**07B:158 John Dewey and Education** 2-3 s.h.

Dewey's philosophy of instrumentalism, with emphasis on his theories of knowledge, valuation, aesthetics, especially as applied to educational theory and practice.

**07B:165 Introduction to Program and Project Evaluation** 3 s.h.

Skills and knowledge required for conducting evaluations of products, projects, and programs; recent scholarship on evaluation and project management. Same as 07P:165.

**07B:176 Demographic Techniques for Educational Research** 3 s.h.

Basic demographic concepts, techniques, resources; life table analysis, enrollment projections, demographic measurement, shift-share analysis.

**07B:180 Human Relations for the Classroom Teacher** 3 s.h.

Influence of social factors such as discrimination, diversity, equity, racism, sexism, and ethnic and socioeconomic pluralism on American schools and classrooms; for teacher education candidates. GE: Cultural Diversity.

**07B:195 Research in Cross-Cultural Settings** 3 s.h.

Cultural, psychological, logistical issues in conducting research in foreign settings; development of a research plan, recent debates in ethnographic research literature.

**07B:200 Leadership ePortfolio Production** 1 s.h.

Foundation and skill practice in technology tasks relevant to educational leadership; experience formulating an education leader's ePortfolio.

**07B:201 Foundations of School Administration** 3 s.h.

Organization and administration of American public education; principles and concepts of leadership and organizations; socioeconomic, political, and professional factors relating to education and school administration.

**07B:202 Information Resources** 3 s.h.

Research strategies, information literacy skills, University of Iowa Libraries and other sources for research.

**07B:205 Collective Bargaining in Education** 3 s.h.

Current status of public sector bargaining in the U.S. collective bargaining system viewed through analysis of historical, legal, institutional perspectives; emphasis on union and management structures.

**07B:206 Research Process and Design** 3 s.h.

Research process, with emphasis on fundamentals of experimental design, internal and external validity, correlational designs, and statistical inference.

**07B:209 Survey Research and Design** 3 s.h.

Survey design and implementation; writing and evaluation of survey questions; error in survey research; techniques to reduce error; sampling; postcollection processing of survey data. Prerequisites: 07B:206 or 07P:143. Same as 07P:209.

**07B:210 Education and Social Change** 2-3 s.h.

Role of educational institutions, in connection with political and economic structures, in the process of social change; illumination of theories of social change through case studies of educational systems in both less-developed and industrialized nations. Same as 034:310.

**07B:214 Individualized Instruction, Law** arr.

Readings, special projects, and/or studies that reflect joint instructor/student interest in area of law.

**07B:216 Finance in Higher Education** 3 s.h.

Theory, research, policy, and practice related to public and private funding of higher and postsecondary education.

**07B:217 Theory and Practice of Leadership** 2-3 s.h.

Theory-based literature and critiques of leadership as applied to educational institutions.

**07B:218 The Law and Higher Education** 3 s.h.

The role of law as it affects postsecondary institutions; analysis of case law in specific areas of concern to administrators, faculty, staff, students.

- 07B:220 History of Higher Education** 3 s.h.  
Major themes and developments in American higher education; ideologies, people, movements that have influenced those developments.
- 07B:221 The College Curriculum** 3 s.h.  
Issues, principles, policies, and practices in college curriculum development; diverse philosophical, historical, cultural, social, psychological, political foundations of contemporary college curricula; perspectives on and models of college curriculum, related processes of teaching and learning; principles and practices that guide design and change of higher education curriculum.
- 07B:222 Introduction to Policy Analysis and Evaluation** 3 s.h.  
Theoretical and technical approaches to analysis and evaluation of contemporary public policies.
- 07B:224 Organizational Theory and Administrative Behavior** 3 s.h.  
Theories and concepts of organizational behavior applied in structural, organizational, administrative contexts of American education.
- 07B:225 Introduction to Public Policymaking** 2-3 s.h.  
Overview of public policy making and the tools used to create and deliver policy benefits to constituents.
- 07B:226 Educational Management** 2-3 s.h.  
Literature and research on management; emphasis on American education.
- 07B:228 Policy Design and Implementation** 2-3 s.h.  
Review of literature, emphasis on policy drafting skills for administration and management in education and other settings.
- 07B:230 Alternative Models of Schooling** 2-3 s.h.  
Popular alternatives to K-12 and postsecondary education; homeschooling, boarding schools, charter schools, magnet schools; construction of a conceptual framework for understanding alternatives.
- 07B:232 Advanced Theory Sociology of Education** 3 s.h.  
Sociology of education; concepts and nature of the field; strengths and weaknesses of theories and paradigms; research. Prerequisites: 07B:130.
- 07B:236 Administration of Students with Special Needs** 3 s.h.  
Foundation for and skill practice in tasks performed by directors of special education and others administering to needs of special education students, and economically and socially deprived students; for prospective school administrative personnel. Same as 07U:236.
- 07B:237 History of the Teaching Profession** 3 s.h.  
History of public school teaching, and teachers' problematic professional status; teacher education in the 19th and 20th centuries; formation and activities of teacher unions in the 20th century.
- 07B:238 Gender and Education in Historical Perspective** 3 s.h.  
Female students K-12 and in higher education; women teachers, professors, administrators; reading-intensive seminar.
- 07B:240 Topics in Education** arr.  
Seminar for intensive study of one problem, issue, or work field. Repeatable.
- 07B:242 Research for Effective School Leaders** 3 s.h.  
Fundamental language of contemporary research; identification and application of basic research components to contemporary educational leadership problems; applicability of research toward effective decision making.
- 07B:245 The American Professoriate** 3 s.h.  
Research on college and university faculty members; perspectives on faculty careers, values, beliefs, role in shared governance; tenure process and policies; issues unique to faculty members of color and women faculty members.
- 07B:247 Multiculturalism in Higher Education** 3 s.h.

Theory and application of multicultural competency in higher education.

- 07B:250 Introduction to Student Affairs** 3 s.h.  
Foundations of student affairs work; overview of institutional cultures, legal issues, ethical principles, standards of practice in student affairs.
- 07B:251 College Students and Their Environments** 3 s.h.  
Characteristics of college students and issues they face; students' institutional, social, cultural environments; impact of environments on student learning, development.
- 07B:260 Contemporary Management Strategies for the K-12 Principal** 3 s.h.  
Leadership skills and management techniques for daily organization and operation of schools; emphasis on climate, communication, group processes, conflict resolution, curriculum management.
- 07B:265 Standards-Based Education and Accountability** 3 s.h.  
Standards-based education; academic content standards, K-12 articulation, alignment studies, use of standardized test results to evaluate academic programs.
- 07B:270 Policy and Politics of Leadership** 3 s.h.  
Current issues from academic journals, states, think tanks, consortia.
- 07B:275 Diversity and Equity in Higher Education** 3 s.h.  
Historical, contemporary, theoretical, and empirical aspects of diversity and equity in higher education; unique experiences of members of historically under-represented groups; challenges of transforming institutions to make them more responsive to the experiences of diverse groups.
- 07B:278 Helping Skills in Student Affairs Work** 3 s.h.  
Development of ability to identify, understand, and intentionally apply the active attending and influencing skills; readings and class presentations.
- 07B:285 School and Community Relationships** 3 s.h.  
Community analysis, politics and education, power groups and influences, school issues and public responses, public relations strategies.
- 07B:290 Master's Project** arr.  
Research for the nonthesis program; topic approved by advisor.
- 07B:291 Administration of Educational Programs and Personnel** 3 s.h.  
Personnel and program planning examined against statements of educational purpose; interrelationships and internal consistencies of program and staff administration from perspectives of philosophy, psychology, learning theory, sociology, curriculum theory.
- 07B:293 Individualized Instruction** arr.  
Readings, special projects, and/or studies that reflect joint instructor/student interest.
- 07B:295 Financial Management of Local School Systems** 3 s.h.  
School business administration; emphasis on fiscal management, including budgetary procedures, short- and long-range fiscal and facilities planning, management techniques.
- 07B:297 Administrative Leadership Theory** 3 s.h.  
Administrative leadership theory drawn from social psychology, sociology, political science, communications, business, and their applications; analysis and formulation of strategies for performing leadership functions in educational administration.
- 07B:298 Legal Aspects of School Personnel** 3 s.h.  
Teacher and student: liability, negotiations, rights, privileges, responsibilities of school personnel; principles of law derived from court decisions; constitutional and statutory provisions; for teachers and administrators.
- 07B:299 Legal Aspects of School Administration** 2-3 s.h.

Nonpersonnel concepts in education: organization, property, finance, religion, discrimination, intergovernmental relations; use of constitutional and statutory provisions plus court decisions; primarily for administrators but applicable to teachers.

- 07B:301 Professional Seminar in Student Affairs I** 1 s.h.  
Orientation to field; writing and research support.
- 07B:302 Professional Seminar in Student Affairs II** 1 s.h.  
Working with groups, budgets in higher education.
- 07B:303 Professional Seminar in Student Affairs III** 1 s.h.  
Consulting, training, and curriculum development in student affairs.
- 07B:304 Professional Seminar in Student Affairs IV** 1 s.h.  
Professional identity, job search support.
- 07B:311 Seminar: Research Topic in Education** 2-3 s.h.  
Topic submitted by students, faculty.
- 07B:315 Orientation to the Superintendency** 3 s.h.  
Leadership theory and research of the superintendent's role of increasing student achievement; personal goals for communication; ethics, integrity, flexibility, reflective, and collaborative leadership; expectations of the superintendent by the board of directors; defining one's role; developing an entry plan; dealing with social/emotional isolation of superintendency; and influences in the larger political, social, economic, legal, and cultural context.
- 07B:317 Operational Leadership and Management** 1 s.h.  
Managing fiscal and physical resources responsibly, efficiently, and effectively; effective communication of school operations; leadership and management of nutrition program, transportation program, facilities, construction; board policy, legal issues; state reporting, ethical decision-making; relationship building, problem solving amidst barriers and various stakeholder groups.
- 07B:319 Human Resources Leadership** 4 s.h.  
Leadership theory and research of the superintendent's role of aligning human resources practice and increasing student achievement; employment law; contract negotiations process/collective bargaining; contract maintenance; recruiting, selecting, developing, and retaining employees; working with labor unions and Public Employee Relations Board; special education law; Evaluator 2 Training.
- 07B:321 Social Advocacy Summit** 1 s.h.  
Summit format; challenges and opportunities in Iowa's K-12 schools with changing demographics; opportunity for K-12 school districts and higher education institutions to engage in conversation on how to meet the needs of students and local school districts.
- 07B:323 School Finance** 2 s.h.  
Manage fiscal and physical resources; communicate effectively with internal and external audiences regarding school operations; comply with state and federal mandates and local board policies; align educational programs, plans, actions, and resources with the district vision and goals.
- 07B:325 Organizational and Educational Leadership** 2 s.h.  
Facilitate connections of students and families to health and social services that support a focus on learning as a district level leader in a school district; collaboratively establish a culture that welcomes and honors families and community and seeks ways to engage them in students learning; AEA structure, compliance and regulatory functions including special education.
- 07B:329 Legislative Summit** 1 s.h.  
Collaborate with families and community members, respond to diverse community interests and needs, and mobilize community resources as a district level leader in a school district; work with legislators, build advocacy groups in a community, engage stakeholders, how to lobby legislators and meet with local senate and house representatives to participate in lobbying.
- 07B:332 College Student Psychosocial and Identity Development** 3 s.h.

Theoretical models of psychosocial and identity development in college students; applications to student affairs work.

**07B:333 Practicum**

arr.

Small-scale research projects; supervised experience in planning, design, management, analysis, reporting of research activities; assignments to current and personal faculty research projects; student assumes major responsibility.

**07B:334 College Student Learning, Cognitive, and Moral Development**

3 s.h.

Learning and development of college students; theoretical models of learning, cognitive development, moral development; applications to student affairs work.

**07B:336 Impact of College on Students**

3 s.h.

Introduction to literature; career and economic returns, values and attitudes, learning and cognitive development, assessment and methodological issues of studying college outcomes. Prerequisites: 07B:206.

**07B:337 Theoretical Perspectives on Student Affairs Administration**

3 s.h.

Issues and problems in student affairs administration; theories of organization, administration, leadership. Requirements: enrollment in educational policy and leadership studies Ph.D. program.

**07B:358 Seminar in the Philosophy of John Dewey**

3 s.h.

John Dewey and education; extensive reading of the works of Dewey and of contemporary authors who comment on, interpret, or employ Deweyan philosophy. Prerequisites: 07B:158.

**07B:367 Seminar: Current Issues in Special Education Administration**

arr.

New developments in administration; new content each year. Repeatable. Prerequisites: 07B:236.

**07B:370 Quantitative Methods for Policy Analysis**

3 s.h.

Methodological strategies of quantitative researchers; secondary data analysis for investigation of educational problems and policies; interpretation of results, communication of policy considerations. Prerequisites: 07P:143 and 07P:243.

**07B:373 Qualitative Research Design and Methods**

3 s.h.

Theory and practice of qualitative research design and methodology; exploratory field experience in collection and analysis of data; individual and focus group interviews, participant observation. Requirements: Ph.D. standing.

**07B:381 Analysis and Appraisal of Curriculum**

3 s.h.

Comprehensive investigation of systematic procedures and resources for identifying and evaluating essential features and constituent elements of a given school district's curricular offering; state and federal requirements of the curricular program; for persons in administration, curriculum, and supervision programs or positions.

**07B:383 Supervision and Evaluation**

3 s.h.

Data collection and management skills; data-driven leadership; coaching and feedback techniques; teacher quality legislation; research and best practice regarding teacher evaluation, supervision; teaching standards.

**07B:385 Teaching and Learning in Higher Education**

3 s.h.

Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as 07C:385, 07P:385, 07S:384, 650:385.

**07B:395 Educational Specialist Research**

arr.

Individual instruction in the design, research, and writing of a research project of significant quality for upper-level graduate work.

**07B:400 Early Childhood Leadership Clinical**

2-3 s.h.

Classroom instruction and supervised experience with problems in early childhood educational administration; organization, planning, evaluation, decision making.

**07B:401 Elementary Leadership Clinical**

1-3 s.h.

Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.

- 07B:402 Secondary Leadership Clinical** 1-3 s.h.  
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.
- 07B:403 Special Education Leadership Clinical** 1-3 s.h.  
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.
- 07B:404 Central Administration Clinical** 1-3 s.h.  
Supervised experience working with problems in educational administration, including organization, planning, evaluation, decision making; individual project in a school setting.
- 07B:415 Orientation to the Superintendency Clinical** 2 s.h.  
Clinical experience aligned with course topics and assignments in a K-12 school or other educational organization; development of a clinical plan with the guidance of a university professor and local school district mentor based on course requirements, career goals, and interests.
- 07B:417 Operational Leadership Clinical** 1 s.h.  
Clinical experience aligned with course topics and assignments in the operational leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.
- 07B:419 Human Resources Leadership Clinical** 2 s.h.  
Clinical experience aligned with course topics and assignments in the human resources leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.
- 07B:425 Organizational and Educational Leadership Clinical** 1 s.h.  
Clinical experience aligned with course topics and assignments in the organizational and educational leadership course; completion of clinical in a K-12 school or other appropriate educational organization; development of a clinical plan based on course requirements, career goals, and student interests with guidance from a university professor and local school district mentor.
- 07B:431 Seminar: Research on College Students** 3 s.h.  
College student learning and development, outcomes, persistence. Requirements: enrollment in educational policy and leadership studies Ph.D. program.
- 07B:432 Seminar: Multicultural Initiatives in Higher Education** 3 s.h.  
Impact of culture, race, ethnicity and the intersection of identity examined in higher education, student affairs, and community agency settings; builds on a foundation of a personal understanding of one's own individual values and attitudes as well as the most recent literature that explores theory and application of how multicultural initiatives are designed and facilitated in various work settings. Requirements: enrollment in educational policy and leadership studies Ph.D. program.
- 07B:433 Seminar: Current Issues in Student Affairs Administration** 3 s.h.  
Critical and current issues in student affairs professional practice. Requirements: enrollment in educational policy and leadership studies Ph.D. program.
- 07B:444 Advanced Practicum in Student Affairs** arr.  
Supervised work experience in student affairs settings.
- 07B:493 Ph.D. Thesis** arr.  
Supervision of research, design, and writing of Ph.D. thesis; individual instruction.

## Psychological and Quantitative Foundations

**Chair:** Timothy N. Ansley

**Professors:** Elizabeth M. Altmaier, Susan Assouline, Robert Brennan, Stephen B. Dunbar, Stewart W. Ehly, Michael J. Kolen, William M. Liu, David F. Lohman, Thomas R. Rocklin, Walter P. Vispoel, Catherine J. Welch, John S. Westefeld, Donald B. Yarbrough

**Professors emeriti:** Leonard S. Feldt, Robert A. Forsyth, David A. Frisbie, Hiram D. Hoover, Nancy Ewald Jackson, Lowell A. Schoer

**Clinical professor:** Sam V. Cochran

**Associate professors:** Stephen M. Alessi, Saba Ali, Robert D. Ankenmann, Timothy N. Ansley, Kathryn C. Gerken, Won-Chan Lee, Kristen Missall, Joyce L. Moore, John Northup, Kathy L. Schuh

**Associate professor emeritus:** Carl S. Davis

**Adjunct associate professor:** E. James Maxey

**Clinical associate professor:** Mitchell Kelly

**Assistant professors:** Kathy Banks, Megan Foley Nicpon

**Adjunct assistant professors:** Audrey S. Bahrnick, Sheila Barron, Brenda Bassingthwaite, Melissa Chapman, Heather M. Cochran, Julie Corkery, Richard L. Ferguson, Michael J. Hall, Deborah J. Harris, Dau-Shen Ju, Valerie J. Keffala, Todd Kopelman, Michelle Mengeling, Mary G. Mitchell, Robert F. Musson, Daniel R. Orme, Amy Stockman, Doris J. Stormoen, Wendy A. VanVoorst

**Clinical assistant professor:** Ann Garcia-Santos

**Undergraduate nondegree program:** Minor in Educational Psychology

**Graduate degrees:** M.A., Ed.S., Ph.D. in Psychological and Quantitative Foundations

**Web site:** <http://www.education.uiowa.edu/pandq>

The Department of Psychological and Quantitative Foundations offers programs in four areas: educational measurement and statistics, counseling psychology, educational psychology, and school psychology. These programs have two general goals: to help students acquire the knowledge and skills necessary to function effectively in settings that require the application of psychological and quantitative principles, and to extend knowledge and understanding of the teaching/learning process as it occurs in a variety of settings. The major emphasis in the M.A. and Ed.S. programs is on the first of these goals; that in the Ph.D. programs is on the second. However, there is some emphasis on both goals in all programs.

### Undergraduate Program

The department offers a minor in educational psychology. It also offers a course approved for the quantitative or formal reasoning area of the College of Liberal Arts and Sciences General Education Program.

#### Minor

The minor in educational psychology provides an enriched background in educational psychology, education testing, and research methods in education. It does not lead to certification for public school teaching.

The minor requires 15 s.h., including 12 s.h. earned in 100-level courses. Students select a department advisor, who helps them choose appropriate course work.

Contact the Office of Teacher Education and Student Services for more information about the minor.

#### General Education Program

One of the General Education Program requirements for graduation from the College of Liberal Arts and Sciences is successful completion of a course designed to develop skills in quantitative or formal reasoning; 07P:025 Elementary Statistics and Inference may be used to satisfy this requirement.

### Graduate Programs

The Department of Psychological and Quantitative Foundations offers Master of Arts, Specialist in Education, and Doctor of Philosophy degrees in psychological and quantitative foundations, with the following programs: counseling psychology (offered in the Ph.D.); educational measurement and statistics (offered in the M.A. and Ph.D.); educational psychology (offered in the M.A. and Ph.D.); and school psychology (offered in the Ed.S. and Ph.D.). Each program is described below, with information about program requirements and application for admission.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

#### PH.D. REQUIRED RESEARCH COURSES

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

## **Counseling Psychology**

### **Ph.D. in Counseling Psychology**

The Doctor of Philosophy program in counseling psychology was granted full accreditation by the American Psychological Association in 1983. Full accreditation was renewed in 2005.

The program's goal is to prepare counseling psychologists who will promote psychology as a science and contribute to the advancement of the profession. No master's degree is offered in counseling psychology. The faculty endorses a scientist/practitioner model of training and expects students to become competent researchers and proficient practitioners. Graduates find positions in a variety of settings, including higher education, counseling centers, clinics, private practice settings, and hospitals.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Preference is given to applicants who have an undergraduate g.p.a. above 3.00 and a graduate g.p.a. above 3.50; an undergraduate major, minor, or substantial course work in psychology; a combined verbal and quantitative score above 1200 on the Graduate Record Examination (GRE) General Test; and previous research and counseling experience.

Application materials must include a Graduate College application form; official transcripts of all previous college work; an official report of GRE General Test scores (the GRE advanced test in psychology is recommended but not required); a personal statement outlining career goals and reasons for seeking advanced training in counseling psychology; and three letters of recommendation from individuals qualified to assess the applicant's potential for completing the doctoral program. The faculty encourages applications from minorities, women, and persons from a wide range of backgrounds and academic preparation. The program typically accepts between five and eight students each year.

Admission is for fall entry. Application deadline is December 1. Admissions decisions usually are made by March 1. Applicants are invited to campus for interviews before final selection. All students must study full-time.

#### **REQUIREMENTS**

The Ph.D. program in counseling psychology requires a minimum of 96 s.h. of graduate credit.

#### **Basic Psychology**

All students are required to have a thorough grounding in the basic discipline of psychology. This may be achieved through a minimum of 3 s.h. of credit in each of the following four areas: biological bases of behavior, cognitive-affective bases of behavior, social bases of behavior, and history and systems. Students complete an additional 6 s.h. in the area of individual differences.

#### **Required Research Courses**

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site). Course selections must be consistent with the requirements listed under "Statistics and Research Design" below.

#### **Statistics and Research Design**

Two courses are required.

07P:243 Intermediate Statistical Methods 4 s.h.

One of these:

07P:244 Correlation and Regression 4 s.h.

07P:246 Design of Experiments 4 s.h.

**Counseling Psychology Core**

07P:223 & 07P:225 Introduction to Counseling Psychology Practice/Research I-II	6 s.h.
07P:235 Multicultural Counseling	3 s.h.
07P:305 Psychotherapy I: Dynamic and Phenomenological Approaches	3 s.h.
07P:306 Psychotherapy III: Career Interventions	3 s.h.
07P:309 Personality Assessment	3 s.h.
07P:310 Intelligence Assessment	3 s.h.
07P:356 Process and Outcomes in Counseling Psychotherapy	3 s.h.
07P:365 Psychotherapy II: Cognitive and Behavioral Approaches	3 s.h.
07P:434 Practicum in Counseling Psychology	3 s.h.
07P:453 Advanced Practicum in Counseling Psychology (repeatable)	1-3 s.h.
07P:465 Issues and Ethics in Professional Psychology	3 s.h.

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. The first practicum's site typically is University Counseling Service. Subsequent placements at other sites must have prior approval of the counseling psychology faculty. Students must successfully complete one semester of 07P:299 M.A. Project: The Portfolio before enrolling in 07P:453 Advanced Practicum in Counseling Psychology.

**Other Requirements**

Elective courses are determined in collaboration with the major advisor.

The dissertation research study is planned in collaboration with the doctoral student's major advisor. Dissertation credit can range from 12 to 15 s.h.

Students spend a calendar year in an internship setting approved by the counseling psychology faculty. The faculty determines student readiness to apply for the internship based on completion of all or almost all required course work, satisfactory progress toward completion of the portfolio requirement, and successful completion of practicum requirements. Internships usually require geographic relocation.

Comprehensive examinations are written in counseling psychology ethics and issues. The comprehensive examination is structured as a component of the portfolio review. For more information, contact the program coordinator.

Students must show appropriate levels of emotional balance and interpersonal skills and act within the American Psychological Association Ethical Principles of Psychologists. For more information, contact the program director.

**Educational Measurement and Statistics****M.A. in Educational Measurement and Statistics**

The Master of Arts program in educational measurement and statistics provides students with basic knowledge of educational measurement and research methodology. Graduates find employment in large school systems, state departments of education, test publishing organizations, and research centers. The program also is appropriate for students who wish to broaden their knowledge of measurement and research methodology for personal development or professional improvement.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They should have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test. Completion of at least one college mathematics course and experience as a teacher or researcher are desirable. Applicants who do not meet these requirements but who show offsetting evidence of superior ability may be granted conditional admission.

Applicants must submit a statement of purpose that explains how the educational measurement and statistics program will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

**REQUIREMENTS**

The M.A. program in educational measurement and statistics with thesis requires a minimum of 30 s.h. of graduate

credit (at least 28 s.h. of course work plus 2-4 s.h. of thesis credit); the nonthesis option requires a minimum of 32 s.h. All students must complete a core of courses (approximately 26 s.h.) that includes a graduate-level survey course in educational psychology, elementary and intermediate courses in statistical methods, a course in educational research methodology, and courses in the development and use of evaluation instruments. Students who already have completed equivalent courses at another institution may add more advanced courses to the core.

The six-hour comprehensive examination typically includes three-hour examinations in educational measurement and in applied statistics. With the approval of the M.A. committee, a student may take two-hour examinations in these fields plus a two-hour examination in educational psychology or a substitute area. Three-hour examinations assume a minimum of three courses in the area; two-hour examinations assume a minimum of two courses in the area.

### **Ph.D. in Educational Measurement and Statistics**

The Doctor of Philosophy program in educational measurement and statistics prepares students for senior professional positions in educational measurement, evaluation, and statistical methods. Graduates find employment in colleges and universities, state and federal agencies, large public and private school systems, test publishing firms, and research centers.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test. They also must hold an M.A. from an accredited institution. At least one year of professional experience in teaching, research, or a related field is desirable. Applicants who expect to concentrate in statistics should have training in college mathematics through differential and integral calculus. Applicants who do not meet these requirements but who show offsetting evidence of superior ability may be granted conditional admission.

Applicants must submit a statement of purpose that explains how the educational measurement and statistics program will help them accomplish their educational and vocational goals.

For information about admission dates, contact the educational measurement and statistics program coordinator.

#### **REQUIREMENTS**

The Ph.D. program in educational measurement and statistics requires a minimum of 90 s.h. of graduate credit, including at least 12 s.h. of thesis credit.

During the first year of graduate study, the student and his or her advisor plan a program of study appropriate for the student's interests and vocational objectives. The typical program involves advanced work in educational measurement, data analysis methods, research methodology, and educational psychology. Work in other departments of the University is encouraged.

Students who concentrate in statistics and intend to teach at the college level take courses in the mathematical theory of statistics. Those who concentrate in educational measurement and evaluation take appropriate courses in curriculum, counseling, or higher education.

All students are required to develop familiarity with computer programming techniques and equipment.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

Students who enter the program without completing an M.A. thesis must complete a substitute project before taking the Ph.D. comprehensive examinations.

After completing most of their course work, students take the comprehensive examination, which typically consists of three 3-hour written examinations on educational measurement, applied statistics, and program evaluation, or approved substitute areas, such as educational psychology or mathematical statistics, in which the student has completed at least 9 s.h. of course work. In place of one written examination, the student's committee may assign a project involving analytical and evaluative skills, or research creativity. The written examinations are followed by an oral examination in which the committee seeks further evidence of the student's command of the three fields. A single decision is made on all aspects of the comprehensive examination.

### **Educational Psychology**

#### **M.A. in Educational Psychology**

The Master of Arts program in educational psychology is designed to help students become more effective practitioners by enhancing their ability to make responsible and creative decisions about how to help all of their students learn. By providing an evidence-based perspective on instructional approaches that work, it also addresses the emphasis on teachers' accountability for choosing empirically supported approaches.

The M.A. in educational psychology is designed for working educators. Many of the program's courses are offered in late afternoons, evenings, and summers.

Full-time M.A. students are expected to complete the degree in two years. Each student's progress is evaluated by the faculty after one academic year (two semesters) of study and during subsequent years.

### ADMISSION

Applicants must meet the admission requirements of the Graduate College, including minimum grade-point average. They must have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher. International applicants whose first language is not English must submit acceptable scores on the Test of English as a Foreign Language (TOEFL). Teaching experience is desirable but not required.

Application deadline for fall semester entry is February 1. Review of applications for fall semester begins January 1, when applicants who wish to be considered for fellowships and other awards are screened. Application deadline for spring semester entry is October 1. Admission decisions are announced approximately one month after the application deadlines.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 are committed not to solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication *Graduate Study in Psychology and Associated Fields*. This policy is consistent with standards set by the association's Board of Educational Affairs.

### REQUIREMENTS

The M.A. program in educational psychology requires a minimum of 30 s.h. of graduate credit. A thesis is not required. Students develop a program of study in consultation with their advisors.

Students complete a required common core of courses, select additional educational psychology courses and electives appropriate to their professional goals, and complete a portfolio project. The two core courses, which are taken during the first year, prepare students for the M.A. program. Educational Psychology for Effective Teaching (07P:221) introduces them to a broad sampling of topics in educational psychology (e.g., development, cognition, motivation). Also during the first year, students begin their portfolios, which they continue to build throughout the program and complete during their final M.A. semester.

Full-time M.A. students typically take at least 9 s.h. each semester, with the option of additional summer session work; they usually complete the program in four semesters. Part-time M.A. students take 3-6 s.h. each semester; they usually complete the degree in two or three years.

Students may apply to substitute equivalent course work from another institution or department for required or recommended courses.

#### Required Core

07P:202 Understanding Educational Research	3 s.h.
07P:221 Educational Psychology for Effective Teaching	3 s.h.

#### Educational Psychology Courses

Five of these:

07P:106 Child Development	3 s.h.
07P:111 Motivation	3 s.h.
07P:203 Learning, Technology, and Effective Teaching	3 s.h.
07P:205 Design of Instruction	3 s.h.
07P:208 Designing Educational Multimedia	3 s.h.
07P:281 Cognitive Theories of Learning	3 s.h.
07P:301 Human Abilities	3 s.h.

## Electives

Students select two electives (6 s.h.) based on their interests and in consultation with their advisors. Electives typically are chosen from areas outside educational psychology.

## Portfolio Project

The program's capstone project is a portfolio. Students enroll in 07P:299 M.A. Project: The Portfolio (3 s.h.) during their final M.A. semester. The goal of the portfolio is to show how understanding and practical application of educational psychology can help the student become a more effective educator.

The portfolio is a creative and highly individual project. Each student's portfolio reflects his or her own unique learning and synthesis of knowledge. Students begin building the portfolio during their first year, making an entry as they complete each course throughout the M.A. program. Portfolio entries vary widely. For example, the entry for a technology course might include a web site the student developed for the course, while the entry for a development course might detail an intervention program the student constructed to address problems of student aggression.

During enrollment in 07P:299 M.A. Project: The Portfolio, the student revises and adds to his or her portfolio, then presents the portfolio to a group of faculty and students.

## Ph.D. in Educational Psychology

The Doctor of Philosophy program in educational psychology is designed to help students master the core content and methods of educational psychology and acquire the depth of knowledge and methodological sophistication necessary for original research that contributes to the discipline.

Ph.D. students are reviewed annually by the faculty. Students must complete a second-year project by the end of their second academic year in the program. Those who do not fulfill this requirement or who otherwise fail to make satisfactory progress may be required to withdraw.

Students who enter the Ph.D. program without having completed an M.A. thesis are required to complete an independent research course sequence and its assigned research project in either their first or second year. Students who have completed an empirical M.A. thesis that is acceptable to the faculty may omit the independent research sequence and second-year project.

## ADMISSION

Applicants must meet the admission requirements of the Graduate College, including minimum grade-point average. They must have a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test; successful applicants usually score higher. International applicants whose first language is not English must submit acceptable scores on the Test of English as a Foreign Language (TOEFL). Applicants who do not meet all admission requirements may be granted conditional admission on the basis of other evidence, such as high grade-point average, strong academic preparation, and highly supportive recommendations. Conditional admission is rare.

Admission is for fall entry. Application deadline is January 1; late applications might not be considered. Review of applications begins January 1, when applicants who wish to be considered for fellowships and other awards are screened. Admission decisions are announced approximately six weeks after the application deadline.

Applicants who accept admission or financial aid and do not relinquish either one on or before April 15 may not solicit or accept another offer. Offers made by the program after April 15 include the provision that the offer is void if the applicant has accepted and continues to hold a previous offer from another program listed in the American Psychological Association publication *Graduate Study in Psychology and Associated Fields*. This policy is consistent with standards set by the association's Board of Educational Affairs.

## REQUIREMENTS

The Ph.D. program in educational psychology requires a minimum of 72 s.h. of graduate credit. Students develop a plan of study in consultation with their advisors. Some of the required courses listed below encompass substantive areas within educational psychology. Other required courses include a research practicum, in which students assist with and eventually design and carry out original research, and several courses in measurement and statistics.

Some requirements may be waived for students who begin the Ph.D. program with a master's degree or with course work from another program.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site). Course selections must be consistent with the following course requirements for the Ph.D.

#### Required Courses

All of these (or equivalents):

07P:200 Educational Psychology	3 s.h.
07P:205 Design of Instruction	3 s.h.
07P:220 Quantitative Educational Research Methodologies	3 s.h.
07P:230 Research in Educational Psychology (taken second year of program)	1-3 s.h.
07P:257 Educational Measurement and Evaluation	3 s.h.
07P:281 Cognitive Theories of Learning	3 s.h.
07P:283 Cognitive Development	3 s.h.
07P:301 Human Abilities	3 s.h.
07P:493 Ph.D. Thesis in Psychological and Quantitative Foundations (minimum requirement)	10 s.h.
07X:150 Introduction to Educational Research (taken during first year in program)	3 s.h.

#### Recommended Courses

At least four of these:

07P:208 Designing Educational Multimedia	3 s.h.
07P:212 Advanced Life-Span Development	3 s.h.
07P:215 Web-Based Learning	3 s.h.
07P:265 Program Evaluation	3 s.h.
07P:269 Advanced Personality	3 s.h.
07P:275 Constructivism and Design of Instruction	3 s.h.
07P:335 Advanced Motivation: Laboratory and Classroom Investigation	3 s.h.

#### Electives

At least two of these (or equivalents):

07P:243 Intermediate Statistical Methods	4 s.h.
07P:244 Correlation and Regression	4 s.h.
07P:245 Applied Multivariate Analysis	3 s.h.
07P:246 Design of Experiments	4 s.h.
07P:247 Nonparametric Statistical Methods	3 s.h.
07P:252 Introduction to Multivariate Statistical Methods	3 s.h.

#### Minor Area

Students must complete a minimum of 12 s.h. that constitute a coherent program of course work outside educational psychology and beyond the courses listed above. The minor area may be from a foundation discipline, such as psychology, or in another area of education, such as mathematics education, educational philosophy, or program evaluation. Course work must be at or above the 200-level, may span departments and colleges, and must reflect a plan approved by the student's advisor.

#### Second-Year Research Project

As part of their participation in 07P:230 Research in Educational Psychology, Ph.D. students are required to complete a research project of modest scope under the direction of a faculty member. They must present the work in both oral and written form to the program's faculty and students. The written report must be completed by the end of the student's second academic year in the program.

Students who enter the Ph.D. program holding an M.A. or M.S. with an acceptable empirical thesis are exempt from 07P:299 M.A. Project: The Portfolio and the project.

### **COMPREHENSIVE EXAMINATION**

The Ph.D. comprehensive examination emphasizes competence and depth in one or more narrowly defined areas of research and theory. Students choose from three options in consultation with their advisor and with the approval of the examining committee, which is made up of five faculty members. The options are a review article, an extended research activity, or a traditional comprehensive examination. For details of each option's requirements, see <http://www.education.uiowa.edu/edpsych/doctoral.htm> or contact the Department of Psychological and Quantitative Foundations.

### **School Psychology**

The graduate program in school psychology is designed for students seeking a Doctor of Philosophy. All prospective students must apply to the Ph.D. program. Doctoral students may receive an Education Specialist degree when they complete the Ed.S. requirements.

#### **Ed.S. in School Psychology**

The Educational Specialist program in school psychology provides course work and supervised field experience in education and psychology, enabling graduates to qualify for Iowa licensure as school psychologists (State of Iowa Endorsement 40). The Ed.S. is granted only to students working toward a Ph.D. in school psychology.

#### **REQUIREMENTS**

The Ed.S. program in school psychology requires a minimum of 60 s.h. of graduate credit (the total depends on students' previous course work). It includes courses in psychological foundations, psychoeducational foundations, school psychology, and research methods. Other requirements include a written comprehensive examination and a research paper prepared in conjunction with 07P:342 Research Project in School Psychology (1-6 s.h.).

#### **Ph.D. in School Psychology**

The Doctor of Philosophy program in school psychology was granted full accreditation by the American Psychological Association in 1992; full accreditation was renewed in 2005. The program's goal is to prepare doctoral-level school psychologists who will promote psychology as a science and contribute to the advancement of the profession. The faculty members endorse a scientist/practitioner model of training and expect students to become competent researchers and proficient practitioners.

Specializations are available in gifted and talented and in pediatric psychology.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Preference is given to applicants with an undergraduate major in psychology or education, a g.p.a. above 3.00, and combined verbal and quantitative scores above 1000 on the Graduate Record Examination (GRE) General Test. The faculty also encourages applications from individuals with an M.A. or Ed.S. and experience as psychologists or other human service providers.

Applications must include three letters of recommendation, a personal statement of interest and goals, and a writing sample. Complete application materials, including transcripts and test scores, must be received by January 1 to be considered for fall semester admission. Admission decisions usually are made by March 15. The program admits from six to eight students each year.

#### **REQUIREMENTS**

The Ph.D. program in school psychology requires a minimum of 108 s.h. of graduate credit. All students are required to have a thorough grounding in the basic discipline of psychology, which may be achieved through earning a minimum of 3 s.h. of credit in each of the following areas: biological bases of behavior, cognitive/affective bases of behavior, social bases of behavior, individual differences, and history and systems.

The plan of study is developed by students and their academic advisors. Students are required to complete yearly portfolio reviews, which include oral examinations; carry out a preliminary dissertation research project equivalent in scope to an M.A. thesis; participate in an internship; and complete a doctoral dissertation, earning a minimum of 10 s.h. in 07P:493 Ph.D. Thesis in Psychological and Quantitative Foundations.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative

course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site). Course selections must be consistent with other course requirements for the Ph.D.

The following courses constitute the school psychology core.

07P:224 Prepracticum in School Psychology	3 s.h.
07P:237 Practicum in School Psychological Service (minimum 150 hours)	3 s.h.
07P:238 Assessment of Learning Differences (taken with 07P:237)	3-4 s.h.
07P:251 Individual Intelligence Testing (taken with 07P:237)	3 s.h.
07P:263 Consultation Theory and Practice (taken with 07P:337)	3 s.h.
07P:313 Psychopathology in Childhood	3 s.h.
07P:315 Psychodiagnostics: Children and Adolescents	3 s.h.
07P:337 Advanced Practicum in School Psychology (minimum 750 hours)	12 s.h.
07P:340 School Psychology Professional Seminar	1-6 s.h.
07P:352 Seminar: Behavioral Assessment and Evaluation	3 s.h.
07P:367 Social Psychology and Social Systems	3 s.h.
07P:380 Practicum in College Teaching (optional)	1-3 s.h.
07P:390 Supervision of School Psychology Practicum/Internship	1 s.h.
07P:437 Internship in School Psychology (one year full-time or two years half-time, total of 1800 hours)	3 s.h.
07X:150 Introduction to Educational Research (taken during first year in program)	3 s.h.

Program course work in evaluation is required.

Students must enroll in practicums to reach a specified level of client contact, supervision, and additional experience hours. Placements must have prior approval of the school psychology faculty. Students must successfully complete one semester of 07P:237 Practicum in School Psychological Service before enrolling in 07P:337 Advanced Practicum in School Psychology. Students must adhere to the most recent ethical principles and standards of the American Psychological Association.

## Psychological and Quantitative Foundations Courses

Students may receive credit for only two of these three courses: 22S:002 Statistics and Society, 22S:008 Statistics for Business, and 22S:025 Elementary Statistics and Inference (same as 07P:025). Credit for 22S:002 Statistics and Society is given only if the course is taken before 22S:008 Statistics for Business or 22S:025 Elementary Statistics and Inference (same as 07P:025 Elementary Statistics and Inference).

### **07P:025 Elementary Statistics and Inference** 3 s.h.

Graphing techniques for presenting data, descriptive statistics, correlation, regression, prediction; logic of statistical inference, elementary probability models, estimation and tests of significance. Prerequisites: 22M:001. GE: Quantitative or Formal Reasoning. Same as 22S:025.

### **07P:026 Mindfulness: Being Here With It All** 2 s.h.

Training in Mindfulness-Based Stress Reduction; application to dealing with life changes (i.e., transition to University life); navigating daily life (academics, roommates, schedules); improving academic skills; self-regulation of emotions; questions of meaning and purpose. Same as 407:025.

### **07P:029 First-Year Seminar** 1 s.h.

Investigate factors keeping students from being successful, such as lack of study skills and academic preparation, alcohol and drug abuse, gambling, credit card debt; other issues leading to dropping out of school include depression, dating violence, not fitting in; course is driven by student interest; participants pick topics, find readings, research topics, and lead a class discussion on their topic.

### **07P:075 Educational Psychology and Measurement** 3 s.h.

Principles and classroom applications of cognitive and social development, learning and cognition, motivation, and assessment.

### **07P:106 Child Development** 3 s.h.

Theories and research findings about typical course of child development, differences in development. Requirements: junior standing.

### **07P:111 Motivation** 3 s.h.

Principles of motivation and their application to applied settings, especially to the classroom as teachers try to motivate students. Requirements: junior standing.

**07P:115 Introduction to Counseling Psychology** 3 s.h.  
Historical and philosophical foundations of counseling psychology; theories, application, and work of counseling psychologists.

**07P:120 Psychology of Giftedness** 3 s.h.  
Theories of learning, child development, motivation; issues unique to gifted education. Same as 07C:120.

**07P:121 Identification of Students for Gifted Programs** 3 s.h.  
Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as 07C:121.

**07P:122 Math Programming for High Ability Students** 1 s.h.  
Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as 07S:122.

**07P:123 Academic Acceleration: Providing Excellence and Equity in Education for High Ability Students** arr.  
Acceleration as an effective curricular intervention for high-ability students; forms of acceleration, research evidence for acceleration, and process of implementing acceleration; reasons for persistent negative attitudes about acceleration; advocacy for acceleration; skills for effective practice and implementation. Requirements: computer with internet access, sound card, Adobe Reader, and Adobe Flash Player.

**07P:125 Counseling and Psychological Needs of the Gifted** 1 s.h.  
Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as 07C:125.

**07P:126 Cognitive and Affective Needs of Underachieving Gifted** 1 s.h.  
Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as 07C:126.

**07P:128 Neuroscientific Implications for Gifted** 1 s.h.  
Neurology of behavior and neurodegenerative disease; the psychology of learning and memory, its application to gifted education.

**07P:129 Creativity: Issues and Applications in Gifted Education** 1 s.h.  
Theories that underpin contemporary definitions of creativity; instruments developed to measure creativity; activities in the school environment that enhance or inhibit student creativity. Same as 07C:129.

**07P:130 Early Adolescent Development** 3 s.h.  
Psychological growth and development of the early adolescent (ages 10-14), including the physical, cognitive, social, emotional, and sexual development of the middle-school aged child.

**07P:133 The Adolescent and Young Adult** 3 s.h.  
Psychological and social aspects of adolescence and young adulthood; emphasis on theory, research, and practical applications.

**07P:134 Parent-Teacher Communication** 1-3 s.h.  
Realities of working with parents; interpersonal skills; options for parent support services. Same as 07U:134.

**07P:136 Home/School/Community Partnerships** 3 s.h.  
Issues related to collaboration among families, educators, community members in implementing school programs. Same as 07U:136.

**07P:143 Introduction to Statistical Methods** 3 s.h.  
Analysis, interpretation of research data; descriptive statistics; introduction to probability, sampling theory, statistical inference (binomial, normal distribution, t-distribution models); linear correlation, regression. Same as 22S:102.

- 07P:148 Bayesian Statistics** 3 s.h.  
Bayesian statistical analysis, with focus on applications; Bayesian and frequentist methods compared; Bayesian model specification, choice of priors, computational methods; hands-on Bayesian data analysis using appropriate software; interpretation and presentation of analysis results. Prerequisites: 22S:120 and 22S:152. Same as 22S:138.
- 07P:150 Introduction to Educational Measurement** 3-4 s.h.  
Test development procedures, reliability, validity, item writing, evaluation of item and test characteristics; classroom assessment methods; interpretation of scores from standardized achievement and aptitude tests; no background in statistics assumed.
- 07P:165 Introduction to Program and Project Evaluation** 3 s.h.  
Skills and knowledge required for conducting evaluations of products, projects, and programs; recent scholarship on evaluation and project management. Same as 07B:165.
- 07P:181 ePortfolio Production** 1-2 s.h.  
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as 07C:181, 07E:181, 07X:181.
- 07P:193 Special Readings and Projects** arr.  
Supervised individual study. Requirements: senior standing.
- 07P:199 Topical Workshop in Psychological and Quantitative Foundations** arr.  
School, educational, and counseling psychology and allied disciplines; for professionals and graduate students in education, mental health, social services, related fields. Repeatable.
- 07P:200 Educational Psychology** 3 s.h.  
Psychology of the learning/instruction process: theoretical perspectives on learning, instruction, motivation, and assessment; developmental concepts, social processes, individual variation, learning and technology, biological basis of learning.
- 07P:202 Understanding Educational Research** 3 s.h.  
Quantitative and qualitative research methods; emphasis on critical analysis of educational research rather than performance of research.
- 07P:203 Learning, Technology, and Effective Teaching** 3 s.h.  
Theories and issues in the use of technology in learning and teaching; project to design a technology-supported learning solution for an educational problem.
- 07P:205 Design of Instruction** 3 s.h.  
Introduction to processes used to design, develop, implement, and evaluate effective instruction; projects.
- 07P:206 Advanced Child Development** 3 s.h.  
Theories of social and cognitive development; in-depth study of several current controversies in the field. Prerequisites: 07P:106.
- 07P:207 Evaluation of Children with ADHD and LD** arr.  
Clinical experience in conducting pediatric neuropsychology examinations in the Pediatric Attention/Learning Disorders Clinic. Requirements: course on psychological testing (including IQ) and graduate psychology standing (school, counseling, rehabilitation, clinical). Same as 070:245.
- 07P:208 Designing Educational Multimedia** 3 s.h.  
Theory, design, and evaluation of instructional software.
- 07P:209 Survey Research and Design** 3 s.h.  
Survey design and implementation; writing and evaluation of survey questions; error in survey research; techniques to reduce error; sampling; postcollection processing of survey data. Prerequisites: 07B:206 or 07P:143. Same as 07B:209.

<b>07P:212 Advanced Life-Span Development</b>	3 s.h.
Selected theories and research in development across the life span, especially from adolescence through late adulthood; focus on relevance for instruction and counseling.	
<b>07P:215 Web-Based Learning</b>	3 s.h.
Theory and practice of designing web sites to support or deliver instruction; student team project to create an instructional web site that integrates the theory and principles from class readings.	
<b>07P:217 Seminar in College Teaching</b>	1-3 s.h.
Preparation for college teaching; for graduate students planning to teach.	
<b>07P:220 Quantitative Educational Research Methodologies</b>	3 s.h.
Procedures for planning, conducting, and reporting research; evaluation of current methods in educational research; quantitative designs and methods. Prerequisites: 07P:143 or 22S:102.	
<b>07P:221 Educational Psychology for Effective Teaching</b>	3 s.h.
How educators use educational psychology theories and research to develop expertise in teaching and learning; cognition, motivation, technology, individual differences.	
<b>07P:223 Introduction to Counseling Psychology Practice/Research I</b>	3 s.h.
Historical, theoretical, professional, scientific traditions associated with counseling psychology; professional ethical principles.	
<b>07P:224 Prepracticum in School Psychology</b>	1-3 s.h.
Introduction to the practice of school psychology; framework for understanding role and function, legal and ethical boundaries, professional requirements; preparation for practicum.	
<b>07P:225 Introduction to Counseling Psychology Practice/Research II</b>	3 s.h.
Learning and performance of basic helping skills; integration of these skills with counseling theories, broader counseling strategies; laboratory-based.	
<b>07P:226 Assessment of Giftedness</b>	3 s.h.
Training and practice in assessment of gifted children. Same as 07C:226.	
<b>07P:230 Research in Educational Psychology</b>	1-3 s.h.
Design, implementation, and presentation of an educational psychology empirical research project. Requirements: graduate standing in educational psychology.	
<b>07P:234 Advanced Multimedia Design</b>	3 s.h.
Theory and development of multimedia programs that use video, CD-ROM, computer animation, digital audio; emphasis on team-development of software.	
<b>07P:235 Multicultural Counseling</b>	3 s.h.
Theoretical and practical aspects of the cultural adaptation process; implications for interventions in diverse populations; issues. Requirements: counseling skills introductory course.	
<b>07P:236 Therapy for Persons with Disabilities</b>	3 s.h.
Preparation for future psychologists and counselors to work with persons with disabilities throughout the lifespan; examination of disability issues within the context of present and past theoretical constructs. Requirements: enrollment in psychological and quantitative foundations or rehabilitation and counselor education. Same as 07C:236.	
<b>07P:237 Practicum in School Psychological Service</b>	arr.
Supervised practicum in psychological and educational evaluation in school settings. Repeatable. Prerequisites: 07P:238 and 07P:251.	
<b>07P:238 Assessment of Learning Differences</b>	3-4 s.h.
<b>07P:242 Selected Applications of Statistics</b>	3 s.h.

Application and interpretation of correlation techniques, chi-square, t- and f-tests, interval estimation, simple cases of analysis of variance. Prerequisites: 07P:143.

**07P:243 Intermediate Statistical Methods** 4 s.h.

Foundation for more advanced applied courses; logic of statistical inference, chi-square, and other tests of statistical hypotheses; small sample error theory, interval estimates, introduction to analysis of variance, selected nonparametric methods. Prerequisites: 07P:143. Requirements: (for 22S:148) 22S:102. Same as 22S:148.

**07P:244 Correlation and Regression** 4 s.h.

Correlation techniques; selected bivariate procedures, multiple, partial, curvilinear correlation; multiple linear regression; sampling theory applied to regression analysis and correlation coefficients; simple causal models. Prerequisites: 07P:243. Requirements: (for 22S:157) 22S:148. Same as 22S:157.

**07P:245 Applied Multivariate Analysis** 3 s.h.

Multivariate descriptive statistics, multivariate normal distribution, Hotelling's T-squared, MANOVA, multivariate regression, principal components, discrimination and classification, cluster analysis. Prerequisites: 22S:152 and 22S:158. Requirements: facility with matrix algebra. Same as 22S:161.

**07P:246 Design of Experiments** 4 s.h.

Theory and methods in the planning and statistical analysis of experimental studies; testing of hypotheses about linear contrasts among means in single-factor and multifactor, completely randomized, and repeated measurement designs. Prerequisites: 07P:243. Requirements: (for 22S:159) 22S:148. Same as 22S:159.

**07P:247 Nonparametric Statistical Methods** 3 s.h.

Selected nonparametric methods; one- and two-sample location tests and estimation methods, measures of association, analyses of variance; emphasis on relationships to classical parametric procedures. Prerequisites: 07P:243 or 22S:120. Same as 22S:163.

**07P:249 Factor Analysis and Structural Equation Models** 3 s.h.

Foundations of exploratory and confirmatory factor analysis methods; least squares and maximum likelihood approaches; problems in factor extraction, rotation, interpretation; structural equation models via LISREL; assumptions and limitations of alternative approaches. Prerequisites: 07P:244 and 07P:246.

**07P:250 Computer Packages for Statistical Analysis** 1-3 s.h.

Computer programs and systems designed to execute statistical analysis (SAS, SPSS, BMDP, and others); lectures on regression techniques, analysis of variance, multivariate techniques; practice in entering data, calling up desired programs, interpreting computer output. Prerequisites: 07P:243. Requirements: elementary knowledge of computer programming.

**07P:251 Individual Intelligence Testing** 3 s.h.

Administration of individual intelligence tests; interpretation of test results; issues in psychological testing; factors that influence performance. Prerequisites: 07P:143 or 07P:150.

**07P:252 Introduction to Multivariate Statistical Methods** 3 s.h.

Selected topics in multivariate analysis, including multivariate significance tests, principal components and factor analysis, discriminant analysis, canonical correlation, multivariate analysis of variance (MANOVA). Prerequisites: 07P:244 and 07P:246.

**07P:255 Construction and Use of Evaluation Instruments** 3 s.h.

Design and construction of measures used in educational evaluation: achievement tests, attitude scales, performance measures, questionnaires; emphasis on methods of instrument development and evaluation of instrument characteristics. Prerequisites: 07P:143 and 07P:257.

**07P:257 Educational Measurement and Evaluation** 3 s.h.

Evaluation and use of standardized tests and inventories in individual and group assessment; analyzing reliability, validity, normative data; interpreting measures of achievement, intelligence, aptitude, interests, attitudes, personality; current issues; for counselors, administrators, teachers, measurement specialists. Corequisites: 07P:143.

**07P:258 Theory and Technique in Educational Measurement** 3 s.h.

Mathematical foundations, principal results, and applications of classical test theory; perspectives on conditional error variance; binomial error model and applications; introduction to generalizability theory; advanced measurement topics. Prerequisites: 07P:243 and 07P:257.

**07P:259 Scaling Methods** 3 s.h.

Unidimensional and multidimensional scaling techniques; item response theory with a focus on polytomous models; introduction to available computer programs for scaling; applications in educational and psychological research. Prerequisites: 07P:262. Corequisites: 07P:249 and 07P:252.

**07P:262 Item Response Theory** 3 s.h.

Theoretical foundations and practical applications; mathematical models and estimation techniques; emphasis on current applications and issues in testing; computer estimation programs. Prerequisites: 07P:243 and 07P:257.

**07P:263 Consultation Theory and Practice** 2-3 s.h.

Same as 07C:263.

**07P:265 Program Evaluation** 3 s.h.

Theoretical issues and considerations in evaluation of educational and social programs; evaluation design, methodology; metaevaluation; evaluation utilization.

**07P:269 Advanced Personality** 3 s.h.

Current research and research methods in the psychology of personality; emphasis on individual differences in personality that have implications for teaching, learning, well-being.

**07P:275 Constructivism and Design of Instruction** 3 s.h.

Theoretical foundations of constructivism; application of constructivist principles to the design of instruction.

**07P:281 Cognitive Theories of Learning** 3 s.h.

Theories of learning and cognition as they relate to education; development of expertise, transfer of learning, design of learning environments, use of learning technologies. Prerequisites: 07P:200.

**07P:283 Cognitive Development** 3 s.h.

Information-processing, dynamic systems, social-contextual, and neo-Piagetian theories of cognitive development and their educational implications; individual differences in cognitive development.

**07P:285 Instructional Computer Simulations** 3 s.h.

Theory and development of computer-based simulations, games; research on design characteristics and effectiveness; design, development, evaluation of simulation software by student teams. Prerequisites: 07P:208.

**07P:292 Supervised Research in Educational Psychology** 1-3 s.h.

Identification of research problems, development of research designs and materials, conducting of research studies; faculty-guided activity or seminars.

**07P:293 Individual Instruction in Psychological and Quantitative Foundations** arr.

**07P:299 M.A. Project: The Portfolio** 3 s.h.

Individual portfolio project; reflection, revision, and presentation of educational psychology portfolio.

**07P:301 Human Abilities** 3 s.h.

Psychology of abilities required by or developed through schooling; theories of cognitive abilities, age, sex, ethnic differences; cultivation of intelligence through schooling. Prerequisites: 07P:143.

**07P:305 Psychotherapy I: Dynamic and Phenomenological Approaches** 3 s.h.

Major psychodynamic and existential-phenomenological theories of personality; emphasis on implications for psychotherapy.

**07P:306 Psychotherapy III: Career Interventions** 3 s.h.

Foundations of career interventions; emphasis on major assessment instruments (vocational interests, values, abilities/skills, personality) and career counseling processes, skills, techniques.

- 07P:309 Personality Assessment** 3 s.h.  
Standardized and projective techniques for personality assessment; preparation for competent administration and interpretation of varied tests and measures.
- 07P:310 Intelligence Assessment** 3 s.h.  
Standardized intelligence testing; preparation to administer and interpret intelligence tests for children and adults.
- 07P:311 Practicum in Counseling and Psychological Services for Gifted Students** 1-6 s.h.  
Prerequisites: 07C:178. Requirements: course work in counseling education, counseling psychology, school psychology, educational psychology, or related fields. Same as 07C:311.
- 07P:312 Psychopathology Across the Lifespan** 3 s.h.  
DSM IV categories, related diagnostic issues.
- 07P:313 Psychopathology in Childhood** 3 s.h.  
Current theories regarding the development of psychopathology in children and adolescents; current approaches to treatment for disorders in children and adolescents.
- 07P:315 Psychodiagnostics: Children and Adolescents** 3 s.h.  
Link between personality theory, child and adolescent assessment; interpretation, integration of assessment information; record reviews, interviews, objective tests, projective techniques. Prerequisites: 07P:238 and 07P:251.
- 07P:320 History and Systems of Psychology** 3 s.h.  
Philosophical underpinnings of psychology, early systems in psychology, developments in the 20th century.
- 07P:331 Seminar: Educational Psychology I--Current Topics** arr.  
Intensive investigation of a specific research topic.
- 07P:335 Advanced Motivation: Laboratory and Classroom Investigation** 3 s.h.  
Contemporary theories of motivation, with focus on theory and application; in-depth study concentrating on one approach to motivation; student project.
- 07P:337 Advanced Practicum in School Psychology** arr.  
Supervised experience in psychological interventions, consultation, counseling in school and clinic settings. Prerequisites: 07P:237, 07P:238, and 07P:251.
- 07P:340 School Psychology Professional Seminar** 1-6 s.h.  
Current issues influencing the practice of school psychology in relation to its historical roots.
- 07P:342 Research Project in School Psychology** arr.  
Experience in research facilities on campus; writing research questions, planning a research study, writing a research article.
- 07P:345 Seminar in Psychoeducational Interventions I** 3 s.h.  
Interventions used by school and support system personnel to address academic skill deficits among children, adolescents; instructional design and delivery problems associated with deficits.
- 07P:346 Seminar in Psychoeducational Interventions II** 3 s.h.  
Interventions used by school and support system personnel to address behavioral and social/emotional status of children, adolescents.
- 07P:347 Home/School/Community: System Interventions** 3 s.h.  
Interventions used by school and support system personnel; focus on work with parents, siblings. Same as 07C:347.
- 07P:348 Family Interventions** 3 s.h.  
Theoretical and research literature on interventions with families of school-age children; opportunities to engage in intervention activities.
- 07P:350 Seminar in Evaluation** 2-3 s.h.

In-depth examination of selected topics. Prerequisites: 07P:265. Requirements: two courses in program evaluation.

- 07P:352 Seminar: Behavioral Assessment and Evaluation** 3 s.h.  
Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as 07U:252.
- 07P:354 Seminar: Experimental Approaches in Counseling Research** arr.  
Application of experimental methodology to study of counseling and vocational phenomena. Repeatable.
- 07P:355 Seminar: Educational Measurement and Evaluation** arr.  
Critical examination of current issues and problems of the professional worker in the field of educational measurement and evaluation as reflected in research literature, other professional communication media.
- 07P:356 Process and Outcomes in Counseling Psychotherapy** 3 s.h.  
Advanced knowledge of the state of process and outcome research on psychotherapeutic procedures. Requirements: Ph.D. candidacy in appropriate field.
- 07P:357 Counseling Psychology Research Writing** 3 s.h.  
How to write scientifically in counseling psychology; qualitative and quantitative research writing, literature reviews, methodologies, discussions; APA style.
- 07P:358 Equating and Scaling of Educational Tests** 3 s.h.  
Designs and methods, including linear, equipercentile, and item response theory methods; emphasis on concepts, applications to testing programs, research. Prerequisites: 07P:243 and 07P:257.
- 07P:359 Group Psychotherapy** 3 s.h.  
Theoretical foundation for working with clients in group settings; major theories on group psychotherapy processes; integration of empirical research on effectiveness of group work; varied theoretical approaches to group psychotherapy.
- 07P:365 Psychotherapy II: Cognitive and Behavioral Approaches** 3 s.h.  
Major cognitive and behavioral theories of personality and psychotherapy; emphasis on implications for clinical practice.
- 07P:367 Social Psychology and Social Systems** 3 s.h.  
Social aspects of behavior in organizations; behavioral science theory and research on organizations, system change, transformation, leadership.
- 07P:375 Topics in Educational Measurement and Statistics** 1-3 s.h.  
Repeatable.
- 07P:380 Practicum in College Teaching** arr.  
Supervised college teaching experience in courses related to major academic areas, in collaboration with faculty course instructors.
- 07P:385 Teaching and Learning in Higher Education** 3 s.h.  
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as 07B:385, 07C:385, 07S:384, 650:385.
- 07P:390 Supervision of School Psychology Practicum/Internship** arr.  
Experience supervising school psychology practicum or internship students. Requirements: Ph.D. standing.
- 07P:393 M.A. Thesis in Psychological and Quantitative Foundations** arr.
- 07P:394 Supervised Research in Counseling Psychology** 1-3 s.h.
- 07P:434 Practicum in Counseling Psychology** 3 s.h.

Supervised practice in counseling services. Prerequisites: 07P:223 and 07P:225.

**07P:437 Internship in School Psychology**

arr.

Supervised internship for Ph.D. students in school psychology. Requirements: completion of required courses.

**07P:450 Practicum in Program Evaluation**

arr.

Supervised experience in designing and implementing components of program evaluations. Prerequisites: 07P:265. Requirements: two courses in program evaluation.

**07P:453 Advanced Practicum in Counseling Psychology**

1-3 s.h.

Supervised work in counseling services. Repeatable. Prerequisites: 07P:434.

**07P:455 Generalizability Theory**

3 s.h.

Analysis of variance methods applied to estimation of components of various types of measurement error variance; basic concepts, mathematical foundations, models, assumptions, designs, applications; relationships with other measurement theories. Prerequisites: 07P:246 and 07P:258.

**07P:458 Internship in Counseling Psychology**

arr.

Supervised work in internship setting. Repeatable. Prerequisites: 07P:434 and 07P:453. Requirements: Ph.D. standing in counseling psychology, and completion of all requirements except the dissertation.

**07P:465 Issues and Ethics in Professional Psychology**

3 s.h.

Professional ethics; issues in professional practice of psychology.

**07P:466 Psychological Services to Children, Adolescents, and Families: Legal and Ethical Standards**

3 s.h.

Review of laws at state and federal level which are related to child, adolescent, and family functioning; emphasis on APA and NASP ethical standards, application of these standards, and ethical decision making models; open to graduate students who will provide services to children, adolescents, and families.

**07P:493 Ph.D. Thesis in Psychological and Quantitative Foundations**

arr.

# Rehabilitation and Counselor Education

**Chair:** Dennis R. Maki

**Professors:** Nicholas Colangelo, Dennis Harper, Dennis R. Maki, Leslie Margolin, Vilia Tarvydas, Elizabeth J. Whitt

**Professors emeriti:** Richard Dustin, Albert B. Hood, David A. Jepsen

**Adjunct professor:** Harvey Joanning

**Associate professors:** Debora Liddell, Tarrell Portman, Jodi Saunders, John Wadsworth, Sherry Watt

**Associate professors emeriti:** William A. Matthes, Ralph R. Roberts Jr.

**Assistant professors:** David Duys, Noel Estrada-Hernandez, Malik Henfield, Susannah Wood

**Adjunct assistant professors:** Barbara O'Rourke, Anne Zalenski

**Clinical assistant professor:** Carol M. Smith

**Adjunct lecturers:** Leanne Eichinger, Valerie Garr, James Stachowiak, Peter Teahen, Orville Townsend

**Undergraduate nondegree program:** Minor in Human Relations

**Graduate degrees:** M.A., Ph.D. in Counseling, Rehabilitation, and Student Development

**Web site:** <http://www.education.uiowa.edu/rce>

The Department of Rehabilitation and Counselor Education prepares students to facilitate human development across the life span, to advocate for clients and students, and to serve local, national, and international communities. It achieves these goals by advancing knowledge, skills, and attitudes appropriate for effective and ethical professional counseling practice and by conducting and disseminating research.

The department prepares practitioners and scholars primarily at the graduate level, through degree programs in counselor education and supervision, rehabilitation and mental health counseling, rehabilitation counselor education, school counseling, and student affairs. It also offers basic courses in interviewing and interpersonal skills for students in other professional and graduate programs.

## Undergraduate Program

The department offers a minor in human relations. Contact the Department of Rehabilitation and Counselor Education for information.

## Graduate Programs

The Department of Rehabilitation and Counselor Education offers Master of Arts and Doctor of Philosophy degrees in counseling, rehabilitation, and student development, with the following programs: counselor education and supervision (offered in the Ph.D.); rehabilitation counselor education (offered in the Ph.D.); rehabilitation and mental health counseling (offered in the M.A.); and school counseling (offered in the M.A.).

The M.A. program in student development in postsecondary education and the Ph.D. program in student affairs administration and research are merging with the Department of Educational Policy and Leadership Studies program in higher education and student affairs.

Each of the department's programs is described below, with information about program and admission requirements.

Upon completing a degree in the department, students are evaluated and are expected to have awareness, knowledge, and skills in the following areas:

- current definitions, professional standards, and appropriate professional practices regarding multiculturalism;
- what it means to be a multiculturally competent helping professional;
- integration of feedback into practice and professionalism in interpersonal interactions;
- personal limitations and strengths that could ultimately support or harm a client or student;
- a personal plan for future practice in the field regarding multicultural relationships.

Prospective students must meet admission requirements for the individual programs as well as the department's general admission requirements (see "Admission" later in this section). Criminal background checks may be required.

### PH.D. REQUIRED RESEARCH COURSES

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

## Counselor Education and Supervision

### Ph.D. in Counselor Education and Supervision

The Doctor of Philosophy program in counselor education and supervision prepares students with knowledge and skills related to general counseling (including mental health and school counseling), teaching, consulting, supervising

counselors, and conducting research. Graduates enter professional work as counselors, counselor supervisors, counselor educators, researchers and/or consultants, or work in other positions requiring expertise in human relations. Students may choose an emphasis in gifted and talented education, school counseling, professional leadership, or other area agreed upon by faculty advisors.

Counselor education and supervision graduates are prepared to teach the knowledge and skills required of professional counselors and to supervise beginning and advanced counselors; perform counseling interventions with individuals and groups; and teach human relations skills in colleges or universities. They provide professional consultation with counseling practitioners and policy makers about counseling program development and evaluation. They also may perform research that contributes to knowledge about counseling, supervision, and counselor education.

The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The American Counseling Association (ACA) and the Association for Counselor Education and Supervision (ACES) are the professional organizations most related to program activities.

### **ADMISSION**

In addition to the department's admission requirements (see "Admission" later in this section), Ph.D. applicants must provide evidence of successful experience in counseling or a closely related profession. Applicants without experience may be admitted if their credentials indicate exceptional strengths.

Students may be admitted for fall, spring, or summer entry, but the department strongly advises application for fall entry. Consideration of applications begins January 15 for fall entry; all application materials should be received at the University by this date.

### **REQUIREMENTS**

The Ph.D. program in counselor education and supervision requires 90 s.h. of graduate credit. Students complete required courses in counseling and in research tools and applications, an optional emphasis area, and a minor outside the department. They also take comprehensive examinations and complete a dissertation.

Most students complete their course work in three years and take a fourth year to complete the dissertation. Students who have not completed a master's degree program approved by the Council for Accreditation of Counseling and Related Educational Programs (CACREP) may need to remedy deficiencies by taking appropriate master's-level course work.

#### **Required Courses**

07C:255 Advanced Career Development and Counseling (or equivalent)	3 s.h.
07C:347 Home/School/Community: System Interventions	3 s.h.
07C:353 Advanced Counseling and Psychotherapy	3 s.h.
07C:357 Advanced Group Counseling and Psychotherapy	3 s.h.
07C:360 Advanced Practicum in Counseling (section 002)	3 s.h.
07C:380 Practicum in College Teaching	3 s.h.
07C:385 Teaching and Learning in Higher Education	3 s.h.
07C:400 Seminar: Ethics and Issues in Counseling	3 s.h.
07C:451 Advanced Multiculturalism	3 s.h.
07C:454 Supervision Theory and Practice	3 s.h.
07C:455 Practicum in Clinical Supervision	3 s.h.
07C:457 Seminar: Professional Orientation to Counselor Education and Supervision	3 s.h.
07C:458 Seminar: Current Issues and Trends in Counselor Education and Supervision	3 s.h.
07C:459 Seminar: Leadership and Advocacy in Counselor Education and Supervision	3 s.h.
07C:465 Internship in Counselor Education (at least 240 hours)	3 s.h.
At least one course in human development	3 s.h.
At least one advanced course in psychological or educational measurement	3 s.h.

#### **Research Tools and Applications**

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z

directory on the college's web site). Course selections must be consistent with the following research tools and applications requirements.

The following are minimum requirements. Students are expected to master research tools and applications beyond the minimum requirements in order to develop research skills consistent with their professional goals.

07C:338 Essentials of Qualitative Inquiry	3 s.h.
07C:394 M.A. Equivalency Research (for students without an approved M.A./M.S. thesis)	1-3 s.h.
07C:460 Seminar: Research in Counseling	3 s.h.
07C:493 Ph.D. Thesis	10-15 s.h.
07P:243 Intermediate Statistical Methods	4 s.h.
07X:150 Introduction to Educational Research (taken during first year in program)	3 s.h.

At least one course in quantitative research methods chosen from these (at least 3 s.h.) or one additional course in qualitative research:

07C:438 Advanced Qualitative Research Seminar in Rehabilitation and Counselor Education	3 s.h.
07P:244 Correlation and Regression	4 s.h.
07P:245 Applied Multivariate Analysis	3 s.h.
07P:246 Design of Experiments	4 s.h.
07P:252 Introduction to Multivariate Statistical Methods	3 s.h.

#### **Minor Area**

Students take a series of courses (typically a minimum of three) in an area of study outside the Department of Rehabilitation and Counselor Education. They select course work in collaboration with their minor area advisor, a faculty member from the area, and with approval of the curriculum plan committee.

#### **Master's Thesis Project or Equivalency**

Students are required to submit a previously conducted master's thesis for faculty review and approval or to complete a new supervised experiential research project before taking comprehensive exams.

#### **COMPREHENSIVE EXAMINATION**

The comprehensive examination consists of three 3-hour exams and an oral defense, including a department comprehensive exam, a counselor education and supervision program comprehensive exam, and an exam on the minor area. The comprehensive exam may be taken during the student's final semester of course work, which typically includes internship.

#### **DISSERTATION**

The major research project culminating in the doctoral thesis may be on any topic related to counseling and counselor education. The thesis advisor and the examining committee approve the topic and procedures at a formal prospectus meeting. The final oral examination on the thesis is conducted by the examining committee. Students usually earn 10 s.h. for dissertation work, but in some instances they may earn up to 15 s.h.

### **Rehabilitation and Mental Health Counseling**

#### **M.A. in Rehabilitation and Mental Health Counseling**

The Master of Arts program in rehabilitation and mental health counseling prepares professional counselors to provide assistance in employment, independent living, and personal or economic development to persons with disabilities and other individuals who encounter barriers in meeting their functional needs. It also prepares counselors in mental health counseling/psychiatric rehabilitation to obtain licensure as professionals who provide services in community mental health settings.

Rehabilitation and mental health counselors work in a variety of settings, including public agencies such as state vocational rehabilitation programs and Veterans Affairs vocational rehabilitation programs; independent living centers; community-based rehabilitation centers and supported employment programs; private for-profit worker's compensation and insurance rehabilitation agencies; and mental health agencies. They provide interventions designed to help persons with disabilities adapt to the demands of their environments. They also prepare the environments to accommodate the individual's needs. Assessment, personal and vocational counseling, development of rehabilitation

and treatment plans, case management, service coordination, psychosocial adjustment, job development, placement, and follow-up are typical services that rehabilitation and mental health counselors provide.

The M.A. program in rehabilitation and mental health counseling is accredited by the Council on Rehabilitation Education (CORE). The program also is accredited in community counseling by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

Graduates of the M.A. program are eligible for certification by the Commission on Rehabilitation Counselor Certification (CRC) and the National Board for Certified Counselors. By completing the program's course work, students also complete the courses they must take in order to apply for licensure as mental health counselors in Iowa.

### **ADMISSION**

No specific undergraduate major area of study is required, but a major in one of the social sciences is considered good preparation for the M.A. program in rehabilitation and mental health counseling. Applicants should have a good academic record and relevant experience, such as assisting individuals with disabilities. Postbaccalaureate work experience relevant to the field of rehabilitation and mental health counseling is preferred. The program encourages applications from persons traditionally underrepresented in the field, particularly those with a disability and/or members of minority or ethnic groups. Applicants also must meet the department's admission requirements (see "Admission" later in this section). A personal interview is required, either in person or by telephone.

Applications for full-time study are accepted for summer session (June) entry. Application deadline for full-time study is April 1 for U.S. applicants, March 1 for international applicants. Applications for part-time study are accepted for fall and spring semesters.

Students pursue a sequenced plan of study that begins in summer session. Although students may be admitted for any semester, the program highly recommends that full-time students begin in summer.

### **REQUIREMENTS**

The M.A. program in rehabilitation and mental health counseling requires a minimum of 60 s.h. of graduate credit. Full-time students can complete the program in two academic years (four semesters plus two summer sessions, approximately 21 months).

The curriculum blends academic work with supervised clinical experiences. Students take three semesters of practicum concurrently with academic courses. The program concludes with a full-time internship (40 hours per week) during a spring semester. Students are assigned to rehabilitation and community mental health agencies or facilities that meet CORE and CACREP accreditation standards and that have programs or clientele who match the student's interests and educational objectives. Clinical placements require criminal background checks.

Supervised practicums, internships, and comprehensive examinations are not offered during summer sessions.

Requirements are as follows.

#### **Department Requirements**

07C:202 Introduction to Group Counseling	3 s.h.
07C:221 Theories of Counseling and Human Development Across the Life Span	3 s.h.
07C:250 Multiculturalism in Helping Professions (or equivalent)	3 s.h.
07C:270 Issues and Ethics in Counseling	3 s.h.
07C:276 Research in Rehabilitation and Mental Health Counseling	3 s.h.
07C:278 Applied Microcounseling	3 s.h.
Clinical practice (see "Clinical Practice" below)	16 s.h.

#### **Program Requirements**

07C:210 Rehabilitation Client Assessment	3 s.h.
07C:241 Introduction to Rehabilitation and Mental Health Counseling	3 s.h.
07C:247 Medical Aspects of Disability	3 s.h.
07C:249 Psychiatric Disorders and Interventions	3 s.h.
07C:341 Job Development Placement and Follow-up	3 s.h.
07C:342 Psychosocial and Developmental Aspects	3 s.h.

**Clinical Practice**

All of these:

07C:348 Prepracticum in Rehabilitation and Mental Health Counseling	3 s.h.
07C:349 Practicum in Rehabilitation and Mental Health Counseling	3 s.h.
07C:352 Internship in Rehabilitation and Mental Health Counseling	9-12 s.h.

One of these:

07C:350 Advanced Practicum in Rehabilitation and Mental Health Counseling	3 s.h.
07C:351 Advanced Practicum in Mental Health and Substance Abuse	3 s.h.

**COMPREHENSIVE EXAMINATION**

In addition to the departmental comprehensive examination, a three-hour written examination on the process and practice of rehabilitation and mental health counseling is required. Exams are offered only during fall and spring semesters.

**Ph.D. in Rehabilitation Counselor Education**

The Doctor of Philosophy program in rehabilitation counselor education prepares professionals for leadership roles in rehabilitation counselor education, research, administration, and service delivery systems. It provides rehabilitation counselors the opportunity to master knowledge; clinical, teaching, and supervisory skills; and research competencies at the most advanced levels.

Ph.D. students focus on three areas of advanced development: rehabilitation counselor education and supervision, research, and professional practice. The program is flexible, permitting students to pursue individualized plans of study within the required curriculum. Ph.D. graduates are expected to have sufficient knowledge and skill to teach at colleges and universities, supervise other professionals, and provide clinical services to clients. They also should have competencies to engage in and evaluate theoretical, qualitative, and quantitative research.

**ADMISSION**

Applicants should have a master's degree in rehabilitation counseling or a related area and a graduate g.p.a. of 3.00 or higher. One year of full-time work experience in rehabilitation or a related field is strongly encouraged. Applicants should include a written statement of purpose for pursuing the Ph.D. in rehabilitation counselor education and personal career objectives, official score on the Graduate Record Exam (GRE) General Test, and three letters of recommendation. A personal interview is required.

Applications are accepted for fall, spring, or summer entry; fall entry is strongly advised. Faculty consideration of applications begins January 15 for fall entry, November 15 for spring entry, and April 1 for summer entry.

**REQUIREMENTS**

The Ph.D. program in rehabilitation counselor education requires a minimum of 90 s.h. of graduate credit, including relevant course work taken for the master's degree. Students take comprehensive examinations and complete a dissertation. Most students complete their course work in three years and take a fourth year to complete the dissertation. Students who have not completed a master's degree in rehabilitation counseling must take appropriate masters-level courses or their equivalents. This combination of master's and doctoral course work ensures exposure to vocational rehabilitation as well as to independent living rehabilitation and community-based counseling processes, concepts, programs, and services.

Each student is required to submit a curriculum plan. The rehabilitation counseling faculty reviews each student annually. To continue in the program, students must meet the department's requirements for maintaining candidacy.

Requirements are as follows.

**Department Core**

07C:255 Advanced Career Development and Counseling (or equivalent)	3 s.h.
07C:353 Advanced Counseling and Psychotherapy	3 s.h.
07C:357 Advanced Group Counseling and Psychotherapy	3 s.h.
07C:400 Seminar: Ethics and Issues in Counseling	3 s.h.

### Program Requirements

Students are expected to have completed core rehabilitation counseling requirements during master's degree work (see "M.A. in Rehabilitation and Mental Health Counseling" above). The advisor and program faculty determine which master's-level courses must be taken to correct deficiencies. Students also must complete the following.

07C:360 Advanced Practicum in Counseling	3 s.h.
07C:369 Advanced Seminar in Rehabilitation Counseling	3 s.h.
07C:380 Practicum in College Teaching	1-3 s.h.
07C:385 Teaching and Learning in Higher Education	3 s.h.
07C:450 Advanced Social Psychology of Disability	3 s.h.
07C:454 Supervision Theory and Practice	3 s.h.
07C:455 Practicum in Clinical Supervision	3 s.h.
07P:217 Seminar in College Teaching	1-3 s.h.

### Statistics and Research Design

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site). Course selections must be consistent with the following statistics and research design requirements and with the student's dissertation research.

All of these:

07C:338 Essentials of Qualitative Inquiry	3 s.h.
07C:438 Advanced Qualitative Research Seminar in Rehabilitation and Counselor Education	3 s.h.
07C:460 Seminar: Research in Counseling	3 s.h.
07C:461 Practicum in Research	3 s.h.
07P:243 Intermediate Statistical Methods	4 s.h.
07P:246 Design of Experiments	4 s.h.
07X:150 Introduction to Educational Research (taken during first year in program)	3 s.h.
One additional advanced quantitative or qualitative course approved by the advisor	

### MINOR AREA

Students plan a minor area in collaboration with their major advisor and curriculum plan committee. The minor area must be outside the department. Students select a minimum of 9 s.h. of course work in the minor area, in collaboration with their minor advisor and with the approval of their curriculum plan committee.

### COMPREHENSIVE EXAMINATION

The comprehensive examination consists of three exams that total nine hours. They cover the department core (three hours), rehabilitation counseling--theory, practice, and research (three hours), and the minor area (three hours).

### DISSERTATION

The dissertation is a major research study planned in collaboration with the student's major advisor. At least two rehabilitation counseling faculty members serve on the dissertation committee; one of them chairs or co-chairs the committee.

07C:493 Ph.D. Thesis	10-15 s.h.
----------------------	------------

### School Counseling

#### M.A. in School Counseling

The Master of Arts program in school counseling prepares individuals to work effectively as counselors in K-12 school settings. The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). Successful graduates are eligible for K-12 school counselor licensure in Iowa. Students may apply to the National Board for Certified Counselors at the completion of their programs.

School counseling students are strongly encouraged to earn an endorsement in talented and gifted education or a certificate from the Belin-Blank Center for Gifted Education. Most required course work for the endorsement is required by the program.

### ADMISSION

Applicants should have an undergraduate g.p.a. of 3.00 or higher. The department prefers that applicants have one year of teaching experience or successful experiences with children and/or adolescents, which they must document in a written statement. Graduate Record Examination (GRE) General Test scores must be on file at the University.

Applications are accepted for summer entry. Applications should be submitted by March 1 for U.S. applicants, February 1 for international applicants.

### REQUIREMENTS

The M.A. program in school counseling requires a minimum of 54 s.h. of graduate credit. The program emphasizes gifted education. During the first few semesters, students take core cognate courses, including course work on gifted education, and the microcounseling clinical skills laboratory. Then they enter a counseling practicum followed by an internship. Students who enter without teaching licensure are required to take additional course work in education, 07E:100 Foundations of Education, 07U:100 Foundations of Special Education, and 07P:200 Educational Psychology or equivalent) to meet school counselor licensure standards. Students are expected to complete at least 100 clock hours in practicum and 600 clock hours in internship activities in an approved school setting, under the supervision of an experienced licensed school counselor and a University faculty supervisor.

Students must complete program and department core courses as outlined on the Department of Rehabilitation and Counselor Education web site before enrolling in 07C:300 Practicum in School Counseling for the summer session of their last year in the program. All students are required to complete a background check the spring before they enroll in the practicum. Students who are not licensed teachers must complete course work in education before enrolling in the practicum.

Each student's progress is reviewed periodically by the program faculty. Students who have successfully completed all prerequisites for 07C:300 Practicum in School Counseling are reviewed in the semester before they take the practicum course, to assure that they are prepared for it. During the summer, students are evaluated to assure their readiness for the internship 07C:321 Internship in Elementary School Counseling or 07C:322 Internship in Secondary School Counseling, which requires assignment in approved schools for the fall and/or spring semesters.

The following schedule of required courses reflects a three-year program of study. Students who do not have teacher licensure are required to complete at least three additional courses in education before the third year of classes.

07C:137 Introduction to Educating Gifted Students	3 s.h.
07U:140 Characteristics of Disabilities	3 s.h.
07C:200 Professional School Counselor	3 s.h.
07C:202 Introduction to Group Counseling	3 s.h.
07C:203 Career Development	3 s.h.
07C:204 School Culture and Classroom Management for School Counselors	3 s.h.
07B:206 Research Process and Design	3 s.h.
07C:221 Theories of Counseling and Human Development Across the Life Span	3 s.h.
07C:222 Counseling Children and Adolescents in Schools	3 s.h.
07C:223 Counseling Gifted and Talented Students	3 s.h.
07C:230 School Counseling Program Leadership and Management	3 s.h.
07C:250 Multiculturalism in Helping Professions	3 s.h.
07C:254 Assessment and Appraisal	3 s.h.
07C:256 Action Research: School-Based Field Research	3 s.h.
07C:278 Applied Microcounseling	3 s.h.
07C:300 Practicum in School Counseling	3 s.h.
07C:321 Internship in Elementary School Counseling	3 s.h.
07C:322 Internship in Secondary School Counseling	3 s.h.

### COMPREHENSIVE EXAMINATION

All students are required to take comprehensive exams for the departmental core and for school counseling during their final semester of internship. Comprehensive exams include a written six-hour exam in the departmental core and school counseling. An oral exam also is required unless waived by the comprehensive exam committee.

## **Student Affairs**

### **M.A. in Student Development in Postsecondary Education**

The Master of Arts program in student development and postsecondary education is merging with the Department of Educational Policy and Leadership Studies program in higher education and student affairs. Students must fulfill the requirements that were in force when they enrolled in the program, as published in the General Catalog. See archived editions at Catalog Snapshots on the Office of the Registrar web site.

The Master of Arts program in student development and postsecondary education emphasizes theory and practice. It prepares students for a wide variety of entry- and mid-level positions in colleges and universities, including work in admissions and orientation, student activities, career planning, academic planning and support, residence life, and international student programs and advising. M.A. students are required to pass written comprehensive examinations. A thesis is optional.

The program is accredited by the Council for Accreditation of Counseling and Related Educational Programs (CACREP).

#### **ADMISSION**

Applicants who meet the following criteria are given preference for admission: an undergraduate g.p.a. of at least 3.00, significant undergraduate leadership experience, writing ability, and fit with the program.

The admissions committee considers each applicant's entire application portfolio. Personal interviews are encouraged and may be required. All applications must include complete application forms; three letters of reference and/or completed recommendation forms; a written statement of goals, interests, and experiences relevant to graduate study in student development at The University of Iowa; official Graduate Record Exam (GRE) General Test scores; and official transcripts for previous postsecondary course work.

Applications are considered for fall semester and are due by February 1.

Campus visit days, held each March, give admitted M.A. applicants the opportunity to interview for assistantships and meet current students. Prospective students also may arrange campus visits at other times.

#### **REQUIREMENTS**

The M.A. program in student development and postsecondary education requires 48 s.h. of graduate credit. It is designed for two years of full-time study (9-12 s.h. per semester), although some students study part-time toward the degree.

The curriculum is based on theories of student learning and development; good administrative practices; knowledge of higher education contexts; research on college students, student affairs, and higher education; helping skills in multicultural environments; and connections among research, theories, and practice.

#### **Experiential Components**

The program requires a practicum and an internship. This experiential course work provides professional development experiences for the program's students. Practical experiences include developmental work with individual students; program planning, implementation, and evaluation; understanding and advising groups; administration and supervision; exposure to diverse students; use of assessment and evaluation tools; and application of ethical guidelines.

M.A. students must complete at least one eight-hour-per-week practicum in a student services office, usually during the second semester of the first year. An M.A. site supervisor and program faculty members supervise the practicum, which includes a weekly seminar (07C:333 Practicum in Student Services).

After successfully completing the practicum, students are eligible to begin a required internship in an approved student services site. The internship helps students integrate theory and standards into practice and develop a professional identity in the field. Interns must complete 600 clock hours under the supervision of an M.A. supervisor. Most students complete this requirement in half-time graduate assistantships over two semesters during the second year. Regular evaluations are required. Students meet weekly with their classmates and faculty supervisor in 07C:363 Capstone Seminar in Student Services.

In addition to practicums and internships on campus, there are field site opportunities at several nearby colleges. Cornell College, Mount Mercy University, Coe College, and Kirkwood Community College are within a 20-mile drive from Iowa City. Grinnell College, Saint Ambrose University, Muscatine Community College, and Augustana College are within a 60-minute drive.

**Sample Course Schedule**

First year, fall semester:

07B:334 College Student Learning, Cognitive, and Moral Development	3 s.h.
07C:278 Applied Microcounseling	3 s.h.

First year, spring semester:

07C:203 Career Development	3 s.h.
07C:250 Multiculturalism in Helping Professions	3 s.h.
07C:333 Practicum in Student Services	3 s.h.
One elective	3 s.h.

Second year, fall semester:

07B:206 Research Process and Design	3 s.h.
07C:335 Administration of Student Services	3 s.h.
07C:363 Capstone Seminar in Student Services	3 s.h.
Elective or advanced practicum	3 s.h.

Second year, spring semester:

07B:100 Issues and Policies in Higher Education	3 s.h.
07C:363 Capstone Seminar in Student Services	3 s.h.
Elective or advanced practicum	3 s.h.

**Ph.D. in Student Affairs Administration and Research**

In fall 2009, the Ph.D. program student affairs administration and research began to merge with the Department of Educational Policy and Leadership Studies program in higher education and student affairs. Students in the program must fulfill the requirements that were in force when they enrolled in the program, as published in the General Catalog. See archived editions at Catalog Snapshots on the Office of the Registrar web site.

**Admission**

All M.A. and Ph.D. applicants must submit the following:

- a completed graduate application form;
- copies of official transcripts of all previous undergraduate and graduate college work;
- official report of Graduate Record Examination (GRE) General Test verbal and quantitative scores;
- a statement of the applicant's reasons for seeking an advanced degree in the department, including a statement of personal career objectives;
- three current letters of recommendation from persons in a position to assess both the applicant's prospects for completing either the M.A. or Ph.D., and his or her commitment to the profession.

The department may request a personal or telephone interview.

The following admission standards are considered for individual program admission decisions.

M.A. applicants should have an undergraduate g.p.a. of at least 3.00.

Ph.D. applicants should have an undergraduate g.p.a. of at least 3.00, or if they hold a graduate degree, a graduate g.p.a. of at least 3.00.

International applicants must score at least 550 (paper-based), 213 (computer-based), or 80 (Internet-based) on the Test of English as a foreign language (TOEFL). The department may require applicants with lower TOEFL scores to complete University of Iowa course work in English language fluency. TOEFL scores must be submitted with the application for admission.

Typically, doctoral students are not admitted unless they have completed a master's degree in counseling or a related field. Relevant work experiences are important. Students who are accepted without a related master's degree must complete core master's-level course work before taking advanced Ph.D. courses. Required remedial courses and experiences are determined in consultation with the advisor and are included in a student's curriculum plan.

Visit the Department of Rehabilitation and Counselor Education web site for details about admission and program requirements.

**FINAL DECISION, SPECIAL REQUIREMENTS**

The criteria listed above are minimum standards for admission. Final admission decisions are made by faculty committees. Some programs may have special admission requirements due to licensure/certification standards. Special admission requirements are listed with individual program information.

**CONDITIONAL ADMISSION**

Applicants who do not meet the requirements for regular admission may be admitted on conditional status if the faculty determines that they show strengths and promise warranting conditional admission. Applicants admitted on conditional status must satisfy the following requirements in order to achieve regular status.

M.A. students admitted on conditional status must complete at least 12 s.h. of core courses (approved by an advisor) over two consecutive sessions and earn a cumulative g.p.a. of at least 3.00.

Ph.D. students admitted on conditional status must complete at least 12 s.h. of core courses (approved by an advisor) over two consecutive sessions and earn a cumulative g.p.a. of at least 3.00.

**MAINTAINING CANDIDACY**

All graduate students must meet the following standards in order to maintain their candidacy for a degree:

- maintain a g.p.a. of at least 3.00;

- successfully complete a practicum, internship, or equivalent professional experience;

- maintain professional behavior consistent with the American Counseling Association code of ethics and any additional code of professional ethics adhered to in any agency in which the student completes a practicum or internship;

- demonstrate progress toward the degree through successful completion of semester hours specified in the curriculum plan and active registration each session (exceptions may be approved by the advisor).

Each student's academic and professional progress is reviewed annually. A written report is provided to the student and a copy is placed in his or her department file.

**PROBATIONAL STATUS**

M.A. and Ph.D. students who earn a cumulative g.p.a. lower than 3.00 are placed on probational status and are notified in writing. Students on probational status have two consecutive sessions to raise their grade-point average to the established standard. If that requirement is not met, the student may be removed from the program. Each student is allowed one probational status during his or her program of study.

**APPLICATION**

For application materials, visit the Department of Rehabilitation and Counselor Education web site.

Applications must be complete before they can be reviewed. Applicants are responsible for providing a complete application dossier; to check on whether an application dossier is complete, contact the College of Education Office of Teacher Education and Student Services. Application forms are available on the web.

Applicants are notified in writing after their applications have been reviewed. Applicants who are accepted must reply in writing in order to maintain their admission status.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## **Financial Support**

There is a wide variety of graduate assistantships for students in the department. For example, many of the University's student service units award graduate assistantships. Applicants for assistantships should contact the department or the coordinator of the particular graduate program they plan to enter.

Applicants seeking fellowships or assistantships should complete their applications as early as possible.

## **Facilities**

An on-campus counseling suite serves as a laboratory for training. In addition, a wide variety of supervised clinical experiences are available in community agencies, schools, and colleges, as well as throughout the University. Internships may be completed at approved sites nationwide.

## Rehabilitation and Counselor Education Courses

- 07C:030 Belin-Blank Center First-Year Seminar** 1 s.h.  
Presentations and discussions by University resource experts and Belin-Blank Center for Gifted Education staff.  
Requirements: Belin-Blank Center student.
- 07C:081 Making a Vocational-Educational Choice** 2 s.h.  
Vocational decision-making process, self-evaluation, exploration of the world of work; for students who are uncertain about their educational and vocational goals.
- 07C:119 Family Issues in Giftedness** 1 s.h.  
Family dynamics and issues that arise when one or more children are identified as gifted; parent/child, sibling, school/family relationships.
- 07C:120 Psychology of Giftedness** 3 s.h.  
Theories of learning, child development, motivation; issues unique to gifted education. Same as 07P:120.
- 07C:121 Identification of Students for Gifted Programs** 3 s.h.  
Interpretation of standardized tests and other measurement instruments used to identify academic talent and program effectively for grades K-12; ability, aptitude, achievement tests; current issues in the uses of various instruments. Same as 07P:121.
- 07C:123 Gender Issues and Giftedness** 1 s.h.  
Effect of gender on development of giftedness; differential needs of girls, boys; strategies for effective teaching, gender equity.
- 07C:124 Ethnic and Cultural Issues and Giftedness** 1 s.h.  
Effect of ethnicity and culture on development of giftedness; special needs of Black, Hispanic, Native American, and Asian gifted students; strategies for identification, programming.
- 07C:125 Counseling and Psychological Needs of the Gifted** 1 s.h.  
Psychological aspects of giftedness, counseling techniques appropriate for gifted children, adolescents; socio-emotional concerns, career development, underachievement. Same as 07P:125.
- 07C:126 Cognitive and Affective Needs of Underachieving Gifted** 1 s.h.  
Diagnostic strategy for identifying types of underachievement, teaching and counseling interventions appropriate for each. Same as 07P:126.
- 07C:127 Research and Theory in Talent/Giftedness** 1 s.h.  
Biennial research symposium.
- 07C:128 Advanced Leadership Seminar in Gifted Education** 1 s.h.  
Development of administrative policies and programming based on empirical research; for experienced leaders in gifted education.
- 07C:129 Creativity: Issues and Applications in Gifted Education** 1 s.h.  
Theories that underpin contemporary definitions of creativity; instruments developed to measure creativity; activities in the school environment that enhance or inhibit student creativity. Same as 07P:129.
- 07C:130 Human Sexuality** 3 s.h.  
How young adults experience, discuss, and engage in sex; short essays.
- 07C:137 Introduction to Educating Gifted Students** 3 s.h.  
Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as 07U:137.

- 07C:145 Marriage and Family Interaction** 3 s.h.  
Contemporary American marriage, family relationships; mate selection.
- 07C:162 Introduction to Marriage and Family Counseling and Psychotherapy** 3 s.h.  
Evolution of the family therapy movement and issues related to functional and dysfunctional family systems; significant models of family therapy and specific techniques.
- 07C:163 Marriage and Family Counseling and Psychotherapy** 3 s.h.  
Experience working with families as human systems; skills that family therapists use in their work with couples and families.
- 07C:174 Positive Psychology** 3 s.h.  
Promotion of human potential as a focus for counseling professionals that provides a supplement to diagnosis and treatment of pathology; how to achieve happiness, resilience, wellness, and life satisfaction through enhancement of human strengths and virtues.
- 07C:175 Motivational Interviewing** 3 s.h.  
Motivational Interviewing (Miller & Rollnick) and the stages of change model.
- 07C:176 Child Abuse: Assessment, Intervention, and Advocacy** 3 s.h.  
Preparation for work involving abused children or child abuse issues; appropriate for careers in counseling, education, health sciences, law, psychology, social work, and so forth; interactive approach.
- 07C:178 Microcounseling** 1-3 s.h.  
Basic skills of listening, responding, empathy, focus; advanced skills of meaning, confrontation, reframing, directives, action skills.
- 07C:179 Sexuality Within the Helping Profession** 3 s.h.  
Relationship between sexuality and mental health; varied ethical and professional issues in sex therapy.
- 07C:180 Topical Seminar for Helping Professionals** arr.  
Topics for the continuing education of counselors and related professionals.
- 07C:181 ePortfolio Production** 1-2 s.h.  
Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as 07E:181, 07P:181, 07X:181.
- 07C:182 Workshop for Helping Professionals** 1-2 s.h.  
One-week workshop; students choose a topic for community practitioners working with or interested in counseling individuals, groups, families, organizations.
- 07C:185 Introduction to Substance Abuse** 3 s.h.  
Theories of addiction and pharmacology of psychoactive drugs; legal, familial, biological, multicultural, historical issues related to substance use and misuse.
- 07C:187 Introduction to Assistive Technology** 3 s.h.  
How assistive technology can be used for attainment of goals in education or work. Same as 07U:187.
- 07C:188 Practicum in Teaching and Curriculum Development in Gifted Education** 1-6 s.h.  
Experience in developing course materials for classes offered through the Belin-Blank Center for Gifted Education. Same as 07U:188.
- 07C:190 Group Processes for Related Professions** 3 s.h.  
Small-group procedures for personal and organizational development in educational settings; discussions of theoretical and ethical issues, multicultural considerations, and research findings supplemented with demonstrations; participation in a personal growth group.

- 07C:192 Group Leadership in Human Sexuality** 0-3 s.h.  
How to teach human sexuality; how to help students achieve an open-minded yet responsible attitude toward their own and others' sexuality. Prerequisites: 07C:130.
- 07C:193 Individual Instruction--Undergraduate** arr.
- 07C:194 Interpersonal Effectiveness** 3 s.h.  
Paradigms and techniques that enhance interpersonal relationship skills.
- 07C:195 Ethics in Human Relations and Counseling** 3 s.h.  
Morality and ethics; ethical issues; models and techniques for effective ethical decision making in personal and professional interactions.
- 07C:197 Citizenship in a Multicultural Society** 3 s.h.  
Human relationships in the context of societal oppressions such as racism, sexism, able-bodyism, and heterosexism.
- 07C:199 Counseling for Related Professions** 3 s.h.  
Counseling theories and techniques; ethical and multicultural considerations; small-group discussions, demonstrations, lectures.
- 07C:200 Professional School Counselor** 3 s.h.  
Professional identity of school counselors, K-12 school counseling program delivery systems, legal and ethical issues. Requirements: admission to school counseling program.
- 07C:202 Introduction to Group Counseling** 3 s.h.  
Research, theory, ethics, planning, and practice in group counseling; leadership styles and multicultural considerations; group participation. Prerequisites: 07C:221. Corequisites: 07C:278. Requirements: rehabilitation and counselor education enrollment.
- 07C:203 Career Development** 3 s.h.  
Preparation for counselors and student affairs professionals; career development concepts and theories, family and work, career counseling goals and objectives, exemplary techniques and materials, career program planning, evaluation procedures. Requirements: rehabilitation and counselor education enrollment.
- 07C:204 School Culture and Classroom Management for School Counselors** 3 s.h.  
American public elementary and secondary schools and the school counselor's role; classroom management for school counselors.
- 07C:210 Rehabilitation Client Assessment** 3 s.h.  
Process and practice of assessing persons with disabilities for rehabilitation plan development and decision making; multicultural and ethical considerations.
- 07C:221 Theories of Counseling and Human Development Across the Life Span** 3 s.h.  
Philosophical bases, ethical considerations, processes, issues, multicultural and life-span developmental considerations in counseling theories and techniques. Requirements: rehabilitation and counselor education M.A. enrollment.
- 07C:222 Counseling Children and Adolescents in Schools** 3 s.h.  
Theory and practice of school-based counseling interventions; child and adolescent development; prevention; special topics. Prerequisites: 07C:221 or 07C:278.
- 07C:223 Counseling Gifted and Talented Students** 3 s.h.  
Learning theories and best practices related to school counseling of gifted and talented students; academic, career, and personal/social development. Prerequisites: 07C:137.
- 07C:226 Assessment of Giftedness** 3 s.h.  
Training and practice in assessment of gifted children. Same as 07P:226.
- 07C:230 School Counseling Program Leadership and Management** 3 s.h.

Comprehensive K-12 school counseling program components and structures; program leadership, planning, accountability; behavioral consultation and collaboration; ethical, multicultural, family considerations. Corequisites: 07C:321 or 07C:322.

**07C:236 Therapy for Persons with Disabilities** 3 s.h.

Preparation for future psychologists and counselors to work with persons with disabilities throughout the lifespan; examination of disability issues within the context of present and past theoretical constructs. Requirements: enrollment in psychological and quantitative foundations or rehabilitation and counselor education. Same as 07P:236.

**07C:237 Seminar in Gifted Education** 2-3 s.h.

Teaching and counseling needs of gifted students K-12; intensive 10-day residential program. Requirements: work as teacher with Belin Fellowship.

**07C:238 Advanced Seminar in Gifted Education** 1 s.h.

Supervisory, administrative, and research issues; fellowships for seminar participants. Prerequisites: 07C:237.

**07C:241 Introduction to Rehabilitation and Mental Health Counseling** 3 s.h.

Historical, philosophical, legislative, societal, and multicultural overview of rehabilitation and mental health process and practice in community-based settings; roles of rehabilitation and mental health professionals, nature of agencies, resources, contemporary issues and ethics.

**07C:247 Medical Aspects of Disability** 3 s.h.

Medical evaluation as part of the rehabilitation process; body systems, medical terminology, medical description of disabilities; functional limitations; projection of potential for rehabilitation and mental health applied to planning and placement.

**07C:248 Diagnosis and Treatment Planning for Psychiatric Rehabilitation** 3 s.h.

Psychiatric conditions, their diagnostic criteria using the DSM-IV-TR, treatment planning considerations; medical and psychiatric rehabilitation models, interrelationship in providing services to persons with psychiatric disabilities; functional assessment and client-driven rehabilitation planning for community reintegration. Requirements: rehabilitation and counselor education enrollment.

**07C:249 Psychiatric Disorders and Interventions** 3 s.h.

Description, classification, and theoretical perspectives related to psychiatric disorders; models of intervention in community-based settings.

**07C:250 Multiculturalism in Helping Professions** 3 s.h.

Theory and application of multicultural competency in the helping professions; ethical treatment of clients in the context of a multiculturally diverse society; knowledge, skill, self-awareness components relevant for helping practitioners. Requirements: rehabilitation and counselor education enrollment.

**07C:254 Assessment and Appraisal** 3 s.h.

Didactic experiences related to individual and group assessment and appraisal; for school professionals.

**07C:255 Advanced Career Development and Counseling** 3 s.h.

Major concepts and research evidence about life-span vocational behavior; theories of vocational choice, adjustment, development in a multicultural world.

**07C:256 Action Research: School-Based Field Research** 3 s.h.

Field-based research experiences in school settings; students conceptualize, design, conduct, and articulate school-based research findings. Prerequisites: 07C:254.

**07C:262 Marriage and Family Counseling and Psychotherapy** 3 s.h.

Introduction to counseling theory, ethics, and techniques as applied to problems of marriage and the family over the life span; multicultural considerations. Requirements: advanced graduate standing. Recommendations: 07C:162.

**07C:263 Consultation Theory and Practice** 2-3 s.h.

Same as 07P:263.

**07C:270 Issues and Ethics in Counseling** 3 s.h.

Ethical standards and decision making; current issues; ethical, legal, and multicultural considerations for counseling in agencies and schools; emphasis on professional practice.

**07C:276 Research in Rehabilitation and Mental Health Counseling** 3 s.h.

Current state of counseling practice and emphasis on accountability as a professional quality; need for counselors to be knowledgeable and skillful in identifying and using "what works" in counseling endeavors; introduction to major principles, concepts, and practices in social science research, including program evaluation; preparing counselors-in-training as future research consumers. Requirements: rehabilitation and mental health counseling major.

**07C:278 Applied Microcounseling** 3 s.h.

Development of basic and advanced counseling skills; preparation for work in education and community settings.

**07C:280 Topical Seminar in RCE** arr.

Special topics dealing with contemporary problems of concern to counselors in specific settings.

**07C:293 Individual Instruction--Graduate** arr.

**07C:300 Practicum in School Counseling** 3 s.h.

Supervised experience counseling and consulting in elementary and secondary school settings. Requirements: completion of school counseling core courses.

**07C:311 Practicum in Counseling and Psychological Services for Gifted Students** 1-6 s.h.

Prerequisites: 07C:178. Requirements: course work in counseling education, counseling psychology, school psychology, educational psychology, or related fields. Same as 07P:311.

**07C:321 Internship in Elementary School Counseling** 3 s.h.

Supervised placement in an elementary school setting; performance of tasks, responsibilities of an elementary school counselor. Prerequisites: 07C:300. Requirements: completion of all required school counseling courses.

**07C:322 Internship in Secondary School Counseling** 3 s.h.

Supervised placement in a secondary school setting; performance of tasks, responsibilities of a secondary school counselor. Prerequisites: 07C:300. Requirements: completion of all required school counseling courses.

**07C:333 Practicum in Student Services** arr.

Supervised experience in college student service agencies. Repeatable.

**07C:335 Administration of Student Services** 3 s.h.

Administrative structures and processes, contexts and principles of effective student services practice, research and assessment in student services. Prerequisites: 07C:330.

**07C:338 Essentials of Qualitative Inquiry** 3 s.h.

Principles, processes of qualitative research in education; methods of design, data collection and analysis, interpretation, trustworthiness. Requirements: Ph.D. enrollment and introductory research course.

**07C:341 Job Development Placement and Follow-up** 3 s.h.

Obtaining appropriate jobs for individuals with disabilities who have received rehabilitation services; client, counselor, employer, job specifications.

**07C:342 Psychosocial and Developmental Aspects** 3 s.h.

Dynamics of adjustment and coping for persons with chronic illness or those with disabilities through the life span; somatopsychological, psychosocial, and developmental perspectives on disability.

**07C:347 Home/School/Community: System Interventions** 3 s.h.

Interventions used by school and support system personnel; focus on work with parents, siblings. Same as 07P:347.

**07C:348 Prepracticum in Rehabilitation and Mental Health Counseling** 3 s.h.

Counseling laboratory to promote knowledge, skills, and awareness of effective and ethical counseling methods, and fundamentals of helping relationships and case management. Prerequisites: 07C:221. Corequisites: 07C:278.

- 07C:349 Practicum in Rehabilitation and Mental Health Counseling** arr.  
Experience in a community agency serving individuals with disabilities and mental health disorders, supervised by a certified rehabilitation counselor in an approved site. Prerequisites: 07C:348.
- 07C:350 Advanced Practicum in Rehabilitation and Mental Health Counseling** 3 s.h.  
Experience to enhance competency in agencies and with persons represented in the student's specialty area. Prerequisites: 07C:349.
- 07C:351 Advanced Practicum in Mental Health and Substance Abuse** 3 s.h.  
Supervised experience counseling clients with substance-related and/or mental health problems; practical application of theory and ethics through individual, group, family, community counseling. Prerequisites: 07C:349.
- 07C:352 Internship in Rehabilitation and Mental Health Counseling** arr.  
Full-time clinical experience in rehabilitation and mental health settings; training in wide range of counseling and mental health activities, under supervision of a qualified M.A. counselor with appropriate credentials. Prerequisites: 07C:350 or 07C:351.
- 07C:353 Advanced Counseling and Psychotherapy** 3 s.h.  
Theories, techniques, and ethics of counseling clients with personal and interpersonal problems; ethical and multicultural considerations.
- 07C:357 Advanced Group Counseling and Psychotherapy** 3 s.h.  
Theories and techniques of group counseling and psychotherapy; integration of theory, experience, and research in group counseling; ethical and multicultural considerations.
- 07C:360 Advanced Practicum in Counseling** arr.  
Supervised practice in counseling; intensive analysis of counselor ethics, styles, methods. Prerequisites: 07C:221. Requirements: Ph.D. enrollment, advanced graduate standing in counselor education, and counseling introductory practicum; and concurrent enrollment in 07C:249 for rehabilitation counselor education student.
- 07C:363 Capstone Seminar in Student Services** 3 s.h.  
Synthesis, integration, and application of prior course work on college students and their environments, student learning and development, student affairs administration, counseling and helping skills; focus on program development and implementation, environmental and needs assessment, program evaluation, student group advising, transition to professional student affairs roles; internship supervision. Repeatable. Prerequisites: 07C:250 and 07C:333. Requirements: advanced M.A. standing in student development in postsecondary education.
- 07C:369 Advanced Seminar in Rehabilitation Counseling** 3 s.h.  
Philosophy, theory, research base, practice of rehabilitation counseling, psychology; ethical and multicultural considerations; relationship to disability studies; psychological aspects of disability, client assessment, history, systems, contemporary issues.
- 07C:380 Practicum in College Teaching** arr.  
Supervised college teaching experience in counselor education courses; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations.
- 07C:385 Teaching and Learning in Higher Education** 3 s.h.  
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as 07B:385, 07P:385, 07S:384, 650:385.
- 07C:393 M.A. Thesis** arr.
- 07C:394 M.A. Equivalency Research** 1-3 s.h.  
Preparation for comprehensive examination.
- 07C:400 Seminar: Ethics and Issues in Counseling** 3 s.h.  
Ethical, professional, and contemporary issues in counseling practice, education, and research. Requirements: rehabilitation and counselor education Ph.D. enrollment.

- 07C:438 Advanced Qualitative Research Seminar in Rehabilitation and Counselor Education** 3 s.h.  
Exploration of qualitative research at advanced theoretical, practical, and technical level, in- and outside a typical classroom environment; scholarly discussions. Prerequisites: 07C:338.
- 07C:450 Advanced Social Psychology of Disability** 3 s.h.  
Disability issues from individual and societal perspectives; psychosocial aspects of disability and disability studies; seminar. Requirements: Ph.D. enrollment.
- 07C:451 Advanced Multiculturalism** 3 s.h.  
Impact of culture, race, ethnicity, and intersections of identity on counseling in higher education and student affairs settings. Prerequisites: 07C:250.
- 07C:454 Supervision Theory and Practice** 3 s.h.  
Conceptual models, ethics, multicultural considerations, research, and program design for counselor supervision and consultation.
- 07C:455 Practicum in Clinical Supervision** arr.  
Supervision of students enrolled in counseling practicum. Prerequisites: 07C:454.
- 07C:456 Seminar: Research in Rehabilitation Counselor Education** 3 s.h.  
Opportunity to acquire skills in varied aspects of research and scholarly work.
- 07C:457 Seminar: Professional Orientation to Counselor Education and Supervision** 3 s.h.  
Professional orientation issues in counselor education and supervision; related documents, bylaws, professional expectations.
- 07C:458 Seminar: Current Issues and Trends in Counselor Education and Supervision** 3 s.h.  
Recent trends, including debates and findings in literature related to best practices for the profession.
- 07C:459 Seminar: Leadership and Advocacy in Counselor Education and Supervision** 3 s.h.  
Leadership principles and theories, including applications to counselor education; student leadership potential and skills explored through self-reflective model.
- 07C:460 Seminar: Research in Counseling** 3 s.h.  
Methods, examples, ethics, multicultural issues, problems of counseling research. Requirements: Ph.D. enrollment.
- 07C:461 Practicum in Research** arr.  
Experience designing and implementing research relevant to student's plan of study, under supervision of rehabilitation and counselor education faculty member. Repeatable.
- 07C:462 Advanced Practicum in Clinical Teaching** 1-3 s.h.  
Preparation for doctoral students to conduct didactic and experiential learning opportunities with counselors in training. Prerequisites: 07C:454.
- 07C:465 Internship in Counselor Education** 1-3 s.h.  
Supervised experience in professional counseling, counselor supervision, consultation, teaching counseling; field placement and seminar.
- 07C:493 Ph.D. Thesis** arr.

## Teaching and Learning

**Chair:** Peter Hlebowitsh

**Professors:** Don D. Coffman, Greg Hamot, Brian Hand, Dennis C. Harper, Jo M. Hendrickson, Peter Hlebowitsh, Steve McGuire, Paul M. Retish, Bonnie Sunstein, Kathryn F. Whitmore

**Professors emeriti:** Jack Bagford, Louise Beltramo, Alan R. Frank, Beatrice A. Furner, Susan Hamre-Nietupski, Alfred Healy, Jerry N. Kuhn, William H. Nibbelink, Kenneth H. Phillips, Edward L. Pizzini, Harold L. Schoen, Richard Shepardson, Douglas M. Trank, Rahima Wade, Robert E. Yager, Marilyn J. Zweng

**Clinical professors:** Vicki Burketta, Ellen Herman

**Associate professors:** Richard T. Cary, Carolyn Colvin, Michael E. Everson, Bruce Fehn, Linda G. Fielding, Geoffrey Hope, John Hosp, Leslie L. Schrier, Walter I. Seaman, Bill Therrien, Rachel Williams

**Associate professors emeriti:** Alice M. Atkinson, George W. Cossman, Richard Elardo, Gary F. Hansen, John Kiraly Jr., Darrell G. Phillips, Jeannette Scahill, Daniel S. Sheldon, John T. Wilson

**Adjunct associate professor:** John Achrazoglou

**Clinical associate professors:** John D. Dunkhase, Nancy Langguth, Pamela Ries, Amy Shultz

**Assistant professors:** Kyong Mi Choi, Mary Cohen, Cos Fi, Cory Forbes, Youjia Hua, Melissa McNaught, Soonhye Park, Lia Plakans, Pamela Wesely, Suzanne Woods-Groves

**Undergraduate degrees:** B.A., B.S. (granted through College of Liberal Arts and Sciences)

**Graduate degrees:** M.A.T., M.A., M.S., Ph.D. in Teaching and Learning

**Web site:** <http://www.education.uiowa.edu/teach>

Department of Teaching and Learning programs prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All licensure programs are approved by the Iowa Department of Education. Undergraduate students pursuing a major in elementary education must meet the College of Liberal Arts and Sciences requirements for the Bachelor of Arts or Bachelor of Science; see the CLAS Academic Handbook.

## Teacher Education Program and Licensure/Certification

Before taking required professional education courses, undergraduate students must be admitted to the Teacher Education Program (TEP). The application for admission should be submitted to the College of Education Office of Teacher Education and Student Services. Deadlines for application are March 15 and October 15 for admission to restricted course work in the following semester. Each program reviews applications and chooses a limited number of students for admission.

In order to be considered for admission, students must have a University of Iowa and cumulative g.p.a. of at least 2.70 at the time of application and must have completed a minimum of 33 s.h. of course work. For some subject areas, applicants must meet additional criteria. A limited number of applicants are accepted into each Teacher Education Program, so a 2.70 g.p.a. does not ensure admission. Admission decisions are based on grade-point average in the major and other criteria relevant to teaching success.

The application process includes submission of an application form, a writing sample, two letters of recommendation, and an Iowa criminal history check request form. Applicants are required to submit PRAXIS I test scores in mathematics, reading, and writing. Scores from either the PRAXIS computer-based tests (CBT) or the PRAXIS Pre-Professional Skills Tests (PPST) are accepted. Applicants must have a composite score of at least 522, with a minimum score of 170 on any single portion of the test. Applicants must also submit verification of completion of a 10-hour volunteer experience in a K-12 classroom setting.

If at any time after admission a student's University of Iowa and/or cumulative g.p.a. falls below 2.70, he or she is placed on probation for one semester. Students who do not attain a 2.70 g.p.a. during the probationary semester are dropped from the TEP. Students should consult a College of Education advisor in their program area, or the Office of Teacher Education and Student Services for more information on admission criteria.

Graduate students who apply to the Graduate College for a teacher licensure program must apply separately for admission to the Teacher Education Program. Deadlines for application to either program are October 15 or March 15 for admission to restricted course work in the following semester. Graduate and postbaccalaureate students may submit Graduate Record Exam (GRE) General Test scores instead of PRAXIS I scores. Applicants must have a verbal and quantitative score of at least 900 and an analytical writing score of at least 3.5.

A limited number of applicants are accepted into each Teacher Education Program, so meeting the Graduate College admission requirements does not ensure admission. Admission decisions are based on grade-point average in the undergraduate major and other criteria relevant to teaching. Upon admission to the TEP, students are assigned an education advisor.

### Admission to Student Teaching

Admission to the student teaching semester requires a separate application. Applications must be submitted one year before the student teaching semester. Applicants' credentials and academic and professional progress are reviewed to ensure that the student is qualified for placement in the profession. Verification that the student meets all specific program area requirements is made when the student applies for student teaching.

Consult a College of Education advisor or the Office of Teacher Education and Student Services for information about admission and requirements for student teaching in specific licensure programs.

## Undergraduate TEP: Elementary Education

The undergraduate elementary education program is designed to prepare students to teach kindergarten through grade 6. In Iowa, the elementary specialization areas are designated as kindergarten through grade 8.

The College of Liberal Arts and Sciences and elementary education requirements total 113-139 s.h. Students who meet or test out of the General Education Program requirements in rhetoric, foreign language, mathematics, and other areas may be able to complete their program requirements with as few as 113 s.h.

A passing Praxis II score on the elementary content test is required for all students seeking elementary licensure in Iowa and for satisfaction of requirements for an approved Teacher Education Program.

### FOUNDATION COURSES

These four courses must be completed before methods courses (Block A/B below) are begun.

07E:090 Orientation to Elementary Education	1-2 s.h.
07E:100 Foundations of Education	3 s.h.
07E:102 Technology in the Classroom	2 s.h.
07P:075 Educational Psychology and Measurement	3 s.h.

### METHODS COURSES

#### Block A

Three courses taken concurrently:

07E:123 Reading and Responding to Children's Literature	2 s.h.
07E:160 Methods: Elementary School Language Arts	3 s.h.
07E:164 Methods: Elementary School Reading	3 s.h.

#### Block B

Three courses taken concurrently:

07E:161 Methods: Elementary School Social Studies	3 s.h.
07E:162 Methods: Elementary School Science	3 s.h.
07E:163 Methods: Elementary School Mathematics	3 s.h.

### Methods Practicum

Students complete a semester-length practicum and classroom management.

07E:170 Elementary Classroom Management	2 s.h.
07E:172 Reading Instruction: Teaching Practicum	4 s.h.
or	
07E:174 Elementary Education: Practicum	4 s.h.

### OTHER REQUIREMENTS

07B:180 Human Relations for the Classroom Teacher	3 s.h.
07E:127 Physical Education and Health for Elementary Teachers	2 s.h.
07U:100 Foundations of Special Education	3 s.h.
07E:120 Methods and Materials: Music for the Classroom Teacher	2-3 s.h.
or	
07E:122 Methods and Materials: Art for the Classroom Teacher	2 s.h.
22M:006 Logic of Arithmetic	3 s.h.

or

22M:012 Theory of Arithmetic

3 s.h.

**AREA OF SPECIALIZATION**

Students must complete a minimum of 24 s.h. in one of the following areas of specialization: art, English language arts, ESL, hearing impaired, mathematics, middle school, music, physical education, reading, science, social sciences (history, social studies), special education (Instructional Strategist I: Mild/Moderate), and speech communication/theatre. Courses in the area of specialization may be taken pass/nonpass if they are offered with the pass/nonpass option.

Requirement lists for each K-8 area of specialization are available from the Department of Teaching and Learning office.

**STUDENT TEACHING**

Students seeking initial licensure must complete a minimum of 14 s.h. of student teaching.

07E:190 Supervised Teaching in the Elementary School: Interactive Phase 7 s.h.

07E:191 Supervised Teaching in the Elementary School: Pre- and Post-Active Phase 7 s.h.

**TRANSFER STUDENTS**

Before they student teach, transfer students must complete the following courses at The University of Iowa.

All of these:

07E:090 Orientation to Elementary Education 1-2 s.h.

07E:102 Technology in the Classroom 2 s.h.

A practicum

Two of these:

07E:123 Reading and Responding to Children's Literature 2-3 s.h.

07E:160 Methods: Elementary School Language Arts 3 s.h.

07E:161 Methods: Elementary School Social Studies 2-3 s.h.

07E:162 Methods: Elementary School Science 2-3 s.h.

07E:163 Methods: Elementary School Mathematics 2-3 s.h.

07E:164 Methods: Elementary School Reading 3 s.h.

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Teacher Education and Student Services to contact all institutions where they have done professional preparatory work.

**ADDING ENDORSEMENTS TO LICENSES**

As an addition to the K-6 Iowa endorsement, students may complete requirements for an Iowa subject area endorsement (see "Area of Specialization," above). This option is not open to students who choose the Strategist I area of specialization.

The University of Iowa also offers an added endorsement in talented and gifted education.

**Undergraduate and Graduate TEP: Secondary Education**

Undergraduate students seeking secondary school licensure/certification are degree candidates in the College of Liberal Arts and Sciences. They must complete the requirements for the Bachelor of Arts, Bachelor of Science, Bachelor of Music, or Bachelor of Fine Arts degrees; see the CLAS Academic Handbook.

Graduate students may be admitted to a program leading to teacher licensure/certification as "certification only" candidates in the Graduate College. They are subject to all Graduate College policies; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. Eligible graduate students also may complete initial teacher licensure/certification requirements by pursuing an M.A.T. in English education, foreign language education, or science education, or an M.A. in social studies (program B).

Licensure/certification requires a major of at least 30 s.h. of course work in a subject area taught in the secondary

school. Course requirements for each major are available from the Department of Teaching and Learning office. Candidates for secondary school teaching licensure/certification also may receive approval to teach in additional subject areas by completing an approved program of 12-24 s.h. or more of course work in those areas.

Secondary school teacher preparation programs are provided in the following areas.

Art  
 \*Coaching  
 English  
 \*English as a second language  
 Foreign languages--Chinese, French, German, Italian, Japanese, Latin, Russian, Spanish  
 \*Hearing impaired  
 \*Journalism  
 Mathematics  
 \*Middle School  
 Music  
 \*Reading  
 Science, including \*physical science, biology, chemistry, \*general science, physics, earth science, and 9-12 all science  
 Social science, including anthropology, economics, geography, history, political science, psychology, and sociology  
 \*All social sciences  
 \*Talented and gifted

\*Available as an additional approval area only; a major in one of the other areas is required for licensure.

An Iowa secondary teaching license qualifies holders to teach in grades 5-12. Students planning to teach art or music typically complete a program that prepares them for both elementary- and secondary-level licensure.

Secondary teacher preparation programs in mathematics and foreign language also offer a program that leads to licensure/certification as a subject matter specialist in grades K-8. This K-8 licensure/certification is available only in the same subject area as the secondary certification.

For more information and the name of an advisor, contact the Department of Teaching and Learning.

#### REQUIREMENTS

Undergraduates working toward licensure/certification to teach in secondary schools must complete the following requirements, in addition to the requirements of their major. All course work must be completed before student teaching.

One introduction and practicum course in the major field	2-3 s.h.
07B:180 Human Relations for the Classroom Teacher	3 s.h.
07E:100 Foundations of Education	3 s.h.
07E:102 Technology in the Classroom (must be taken during student's first semester in the college)	2 s.h.
07P:075 Educational Psychology and Measurement	3 s.h.
07S:171 Secondary Classroom Management (required for art, mathematics, science, social studies education)	2 s.h.
07S:190 Orientation to Secondary Education (must be taken during student's first semester in the college)	1 s.h.
07S:195 Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1 s.h.
07U:100 Foundations of Special Education	3 s.h.
One or more methods of teaching courses in the major field	3-9 s.h.
One college-level mathematics course (except 22M:001, 22M:003, and 22M:008)	
Student teaching	12 s.h.

For initial licensure in all subject areas, student teaching must be an all-day, full-semester experience. Most students are placed in a district within a 60-mile radius of Iowa City. Placements outside this area require special approval and are considered on an individual basis. Special programs provide experience in districts with diverse populations, including Aldine, Texas (Houston area); Adams County, Colorado (Denver area); Rialto, California; and Clark County, Nevada (Las Vegas area). In most program areas, students also may apply to student teach at international sites for the second half of the semester.

Additional information about options for student teaching and application procedures is available from the Office of Teacher Education and Student Services. Applications for student teaching must be submitted during the calendar year before the student teaching semester. The deadline is November 15 for students planning to student teach the following fall semester and February 15 for students planning to student teach the following spring semester.

#### TRANSFER STUDENTS

Transfer students must complete the following work before they student teach.

07E:102 Technology in the Classroom	2-3 s.h.
07S:190 Orientation to Secondary Education	0-1 s.h.
07S:195 Teaching Reading in Secondary Content Areas	1 s.h.
Appropriate methods courses	
A practicum at The University of Iowa	
All course work in the major	

Transfer students must follow the normal application procedures. In addition, they are asked to complete a disclosure statement describing all practicum experiences they have taken at other institutions and a release statement allowing the College of Education Office of Teacher Education and Student Services to contact all institutions where they have done professional preparatory work.

## Graduate Programs

The Department of Teaching and Learning offers Master of Arts, Master of Arts in Teaching, Master of Science, Specialist in Education, and Doctor of Philosophy degrees in teaching and learning. Programs are offered in three areas—elementary education, secondary education, and special education.

Elementary education programs include developmental reading (offered in the M.A.) and language, literacy, and culture (offered in the Ph.D.). The elementary education M.A. and Ph.D. programs are closing; enrollment is suspended.

Secondary education programs include art education (offered in the M.A. and Ph.D.); curriculum and supervision (offered in the M.A. and Ph.D.); English education (offered in the M.A. and M.A.T.); foreign and second languages education (offered in the M.A. and M.A.T.); foreign language and English as a Second Language (ESL) education (offered in the Ph.D.); language, literacy, and culture (offered in the Ph.D.); mathematics education (offered in the M.A. and Ph.D.); science education (offered in the M.A., M.A.T., and Ph.D.); and social studies education (offered in the M.A. and Ph.D.).

The secondary education area also collaborates with the College of Liberal Arts and Sciences to offer an education option for graduate students earning an M.S. in mathematics; an M.A. and Ph.D. in music with a concentration in music education; and a joint B.A./M.A.T. in science education for undergraduates majoring in biology, chemistry, or physics. In addition, the area offers an ESL endorsement for individuals who are enrolled in a Department of Teaching and Learning graduate degree program or who are licensed in-service teachers.

The special education area offers a program in special education (offered in the M.A. and Ph.D.) and a program leading to special education consultant authorization.

Each program is described below, with information about program and admission requirements.

Applicants for admission to University of Iowa graduate degree programs must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

### PH.D. REQUIRED RESEARCH COURSES

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

### PH.D. REQUIRED CORE COURSES

All Ph.D. students in the Department of Teaching and Learning must complete one or both of the following Ph.D. core courses, depending upon program requirements.

07E:304 Schooling in the United States	3 s.h.
07S:333 Seminar on Teacher Education	3 s.h.

**PH.D. REQUIRED COGNATES**

All Ph.D. students in the Department of Teaching and Learning must complete one approved cognate area as part of their doctoral study plan. Most comprehensive exams in the department are designed to cover the student's core area plus two cognate areas, so selection of cognate areas is important. Cognates also may enhance students' employment possibilities, since they represent a minor area of study.

The following list of cognates offered by program areas in the department is not exhaustive; students may select cognates from this list, or they may customize their own cognate areas in consultation with their advisors.

**Curriculum Theory and Development**

Both of these:

07E:300 Design and Organization of Curriculum	3 s.h.
07S:186 Curriculum Foundations	2-3 s.h.

One of these:

07B:265 Standards-Based Education and Accountability	3 s.h.
07B:381 Analysis and Appraisal of Curriculum	3 s.h.
07P:255 Construction and Use of Evaluation Instruments	3 s.h.

**Foreign Language and ESL Education**

Both of these:

07S:183 Second Language Classroom Learning	3 s.h.
07S:200 Fundamentals of Second Language Assessment	3 s.h.

One of these, in consultation with faculty:

07S:180 Issues in Foreign Language Education	3 s.h.
07S:184 Reading in a Second Language	3 s.h.
07S:197 Principles of Course Design for Second Language Instruction	3 s.h.
07S:203 Second Language Planning in Education	3 s.h.

**Gifted Education**

Administrative strand—two of these, in consultation with faculty:

07B:110 Administration and Policy in Gifted Education	2 s.h.
07B:111 Evaluation of Gifted Programs	1 s.h.
07B:113 Staff Development for Gifted Programs	1 s.h.

Programming strand:

07E:166 Curriculum Concepts in Gifted Education	3 s.h.
07E:196 Topics in Teaching and Learning (when topic is program models in gifted education)	arr.

Psychology strand—two of these, in consultation with faculty:

07C:120 Psychology of Giftedness	3 s.h.
07C:121 Identification of Students for Gifted Programs	3 s.h.
07C:137 Introduction to Educating Gifted Students	3 s.h.
07C:226 Assessment of Giftedness	3 s.h.
07C:237 Seminar in Gifted Education	2-3 s.h.

**Global Education**

07B:104 Education in the Third World	2-3 s.h.
--------------------------------------	----------

07B:195 Research in Cross-Cultural Settings	3 s.h.
07S:341 Infusing a Global Perspective into the Curriculum	3 s.h.

### Language, Literacy, and Culture

07S:415 Ph.D. Seminar in Language, Literacy, and Culture (when topic is historical and theoretical perspectives) An additional 07S:415 seminar with a topic chosen in consultation with advisor	arr.
--	------

General emphasis—one of these:

07E:308 Seminar: Research and Current Issues An additional 07E:308 seminar with a topic chosen in consultation with advisor	arr.
--	------

Elementary emphasis—one of these:

07E:204 Literature for Children II	3 s.h.
07E:264 Early Literacy Development and Instruction	2-3 s.h.
07E:265 Reading and Writing Across Intermediate Grades	3 s.h.

Secondary emphasis—one of these:

07S:193 Reading and Teaching Adolescent Literature	3 s.h.
07S:315 M.A. Seminar: English Education	arr.

### Mathematics Education

07S:235 Current Issues in Mathematics Education	1-3 s.h.
07S:335 Seminar: Research in Mathematics Education	arr.

Two of these:

07S:230 Workshop in School Mathematics	1-3 s.h.
07S:231 Technology in School Mathematics	2-3 s.h.
07E:234 Foundations of Mathematics Education	2-3 s.h.
07S:236 Teaching of Geometry	2-3 s.h.
07S:239 Teaching of Algebra	2-3 s.h.

### Science Education

07S:255 Practices of Inquiry in Science Learning Environments	3 s.h.
07S:257 Learning in the Science Classroom	2-3 s.h.
07S:259 Advanced Pedagogy	3 s.h.

### Special Education

Special education—generalist:

07U:140 Characteristics of Disabilities	3 s.h.
07U:345 Current Issues and Trends in Learning Disabilities	3 s.h.
07U:348 Contemporary Research in Behavioral Disorders	3 s.h.

Special education—research:

07U:345 Current Issues and Trends in Learning Disabilities	3 s.h.
07U:348 Contemporary Research in Behavioral Disorders	3 s.h.
07U:353 Seminar: Single Subject Design Research	3 s.h.

Special education—behavioral disorders:

07U:140 Characteristics of Disabilities	3 s.h.
07U:150 Behavioral and Social Interventions	3 s.h.
07U:348 Contemporary Research in Behavioral Disorders	3 s.h.

## Special education—learning disabilities:

07U:140 Characteristics of Disabilities	3 s.h.
07U:275 Explicit Instruction	3 s.h.
07U:345 Current Issues and Trends in Learning Disabilities	3 s.h.

**Elementary Education**

Elementary education programs are offered in developmental reading and in language, literacy, and culture.

**M.A. in Developmental Reading**

The Master of Arts program in developmental reading prepares graduate students for positions as reading specialists in kindergarten and grades 1-12. The required course work develops the skills, knowledge, and competence needed for supervisory, curricular, and remedial teaching positions in reading. The program also builds a background in reading for students who want to specialize further in the area and eventually to teach and/or conduct research at a college or university.

Successful completion of this program, combined with one year of successful teaching experience that includes teaching reading as a significant part of the responsibility, qualifies the student for certification as a reading specialist.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00; hold an early childhood, elementary, or secondary school teaching certificate; and show evidence of completing two years of successful teaching experience.

**REQUIREMENTS**

The M.A. program in developmental reading with thesis requires a minimum of 33 s.h. of graduate credit; the M.A. without thesis requires a minimum of 35 s.h. Students must complete the following courses.

07E:171 Reading and Writing: Processes and Instruction	3 s.h.
07E:264 Early Literacy Development and Instruction	2-3 s.h.
07E:265 Reading and Writing Across Intermediate Grades	3 s.h.
07E:271 Advanced Reading Clinic Techniques	2-3 s.h.
07E:272 Advanced Reading Clinic Practicum	2-3 s.h.
07E:308 Seminar: Research and Current Issues (Reading)	3 s.h.
07S:194 Methods: Secondary Reading	2-3 s.h.

One of these:

07P:106 Child Development	3 s.h.
07P:133 The Adolescent and Young Adult	3 s.h.
07P:200 Educational Psychology	3 s.h.

One of these:

07P:150 Introduction to Educational Measurement	3 s.h.
07U:138 Assessment of Learning Problems	3 s.h.

An approved literacy assessment course

One of these:

07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms	3 s.h.
07E:300 Design and Organization of Curriculum	3 s.h.
07S:186 Curriculum Foundations	2-3 s.h.

One of these:

07B:383 Supervision and Evaluation	3 s.h.
07E:365 Reading Clinic: Supervision	arr.

Thesis (required for thesis option):

07S:393 Master's Thesis	arr.
-------------------------	------

**Electives**

Students, in consultation with their advisor, may select the remaining required semester hours as electives from areas such as curriculum, supervision, language arts, testing and evaluation, linguistics, or speech pathology.

**COMPREHENSIVE EXAMINATION**

The comprehensive examination consists of two 3-hour exams. Each three-hour exam is based on an aspect of reading or literacy. With agreement of the student's advisor and committee, a comprehensive project may be substituted for the written examination in one or both areas.

**Ph.D. in Language, Literacy, and Culture**

The Doctor of Philosophy program in language, literacy, and culture brings together scholarly traditions and contemporary theory in literacy and cultural studies. Course work provides both a broad background in relevant theoretic and research literature and opportunities to conduct original studies that explore the nature of literacy practices both in and out of school. Graduates find employment in university and college teaching, research, curriculum development, and administration of literacy programs.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They should have at least three years of experience teaching or tutoring language or literacy (reading, writing, English, language arts) and should have earned a master's degree in a literacy-related field. Application materials should include a statement of purpose explaining the applicant's reasons for pursuing graduate study and describing his or her future goals; transcripts of all undergraduate and graduate course work; Graduate Record Exam (GRE) General Test scores; a sample of academic writing; and three letters of recommendation.

Applications for admission and for financial aid are reviewed by December 1 each year.

**REQUIREMENTS**

The Ph.D. program in language, literacy, and culture requires a minimum of 88-90 s.h. of graduate credit. Course work includes an introductory seminar in language, literacy, and culture; at least 9 s.h. of additional doctoral seminars in the program; an approved cognate area (see "Required Ph.D. Cognates" above); and 9-12 s.h. of graduate course work outside the Department of Teaching and Learning (6 s.h. of that outside the College of Education). Students also earn 10-12 s.h. of dissertation credit.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

In addition, all language, literature, and culture students must complete one of the following Department of Teaching and Learning core courses.

07E:304 Schooling in the United States	3 s.h.
07S:333 Seminar on Teacher Education	3 s.h.

**COMPREHENSIVE EXAMINATION AND DISSERTATION**

As students near the completion of their course work, they identify several key strands for review and synthesis. With guidance from their advisors, students prepare three forms of written and oral exams: they answer take home questions in two areas of literacy; they submit a substantive issues paper, typically a report of an exploratory study or a review of research literature on a topic of special interest; and they design a syllabus for a literacy course and write a reflective commentary that demonstrates understanding of the relationship between theory and practice.

Following successful completion of all components of the comprehensive exam, students work with a faculty member to develop a proposal for a study that will make an original contribution to the understanding of some aspect of literacy. After the proposal has been approved, students conduct research and report their findings under the primary guidance of a dissertation chair.

For detailed information on the Ph.D. in language, literacy, and culture, see Our Programs on the Department of Teaching and Learning web site.

**M.A. in Elementary Education**

The Master of Arts program in elementary education is closing. Enrollment in the program is suspended.

**Ph.D. in Elementary Education**

The Doctor of Philosophy program in elementary education is closing. Enrollment in the program is suspended.

**Secondary Education**

The Department of Teaching and Learning offers, or jointly administers with departments in the College of Liberal Arts and Sciences, advanced degree programs in the following fields of professional interest: art education; curriculum and supervision; English education; foreign language, second language, and English as a Second Language education; mathematics education; music education; science education; and social studies education.

**M.A. in Art Education**

The Master of Arts program in art education is administered by the School of Art and Art History (College of Liberal Arts and Sciences) in cooperation with the College of Education. Application should be made to the School of Art and Art History.

The program prepares highly qualified teachers of art for elementary and secondary schools and community colleges. The program's strong academic emphasis helps teachers who are creative artists to become highly literate in the history and language of art.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have completed the equivalent of the minimum course work in art required for a University of Iowa B.A. or B.F.A. in art and must have a license/certificate to teach art. Applications must include a representative portfolio of the applicant's work, consisting of eight slide reproductions of artwork and one example of written work, which may be a paper previously written for a course or an original paper. Deficiencies in undergraduate art or courses recommended for teacher licensure/certification are evaluated following admission so that students can make up required course work concurrent with work for the degree.

**REQUIREMENTS**

The M.A. program in art education requires a minimum of 38 s.h. of graduate credit. The plan of study includes a total of 18 s.h. in studio art and art history (either 12 s.h. of studio art and 6 s.h. of art history, or 12 s.h. of art history and 6 s.h. of studio art); a total of 8 s.h. in 07S:367 Seminar: Current Issues in Art Education; and a total of 12 s.h. in additional course work, specified after the student begins the program.

M.A. students also must complete a studio thesis or a written thesis.

**Ph.D. in Art Education**

The Doctor of Philosophy program in art education is administered by the College of Education with the cooperation of the School of Art and Art History (College of Liberal Arts and Sciences). Application should be made to the College of Education.

The program prepares college teachers and researchers in art education and supervisors of community-based art learning programs in state departments of education and school systems. It also provides students with an opportunity to continue inquiry and creative work in art history and in studio.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have an M.A. in art education or an M.F.A. from The University of Iowa, or an equivalent degree from an accredited degree-granting college or university. Applications must include a representative portfolio of the applicant's work, consisting of 12 slide reproductions of artwork and two examples of written work, which may consist of papers previously written for a course or original papers. The portfolio should be submitted to the art education office in the School of Art and Art History.

In the case of course work deficiencies, students must register for appropriate remedial courses. Two years of successful teaching experience in an elementary or secondary school is required before admission to or completion of the doctoral program.

**REQUIREMENTS**

The Ph.D. program in art education requires at least 60 s.h. of graduate credit beyond the M.A., including at least 15

s.h. in the School of Art and Art History, 15 s.h. in art education seminars, 15 s.h. in a related area (e.g., aesthetics, anthropology, higher education, early childhood education, psychology, sociology), an approved cognate area (see "Ph.D. Required Cognates" above), and 15 s.h. in thesis and tool courses. Students plan the course of study with their advisors.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

In addition, all Ph.D. students in the Department of Teaching and Learning must complete one or both of the following Ph.D. core courses.

07E:304 Schooling in the United States	3 s.h.
07S:333 Seminar on Teacher Education	3 s.h.

### **COMPREHENSIVE EXAMINATION**

The comprehensive examination includes both oral and written exams. The written exam consists of an in-depth research problem assigned by the examining committee, to be completed within 14 days. An oral exam on the project is then held. The written portion of the exam is not intended to relate directly to the dissertation proposal.

### **DISSERTATION**

Students must satisfactorily complete a written dissertation that constitutes a contribution to scholarship, for at least 12 s.h. The student is expected to prepare a dissertation proposal and defend it before the dissertation committee. An oral examination on the dissertation is the Ph.D. final examination.

### **M.A. in Curriculum and Supervision**

The Master of Arts program in curriculum and supervision prepares teachers and administrators for positions as consultants, directors, and coordinators in curriculum development. It is offered with thesis and nonthesis options.

### **ADMISSION**

Students must meet the admission requirements of the Graduate College. Teaching experience is desirable.

### **REQUIREMENTS**

The M.A. program in curriculum and supervision with thesis requires a minimum of 30 s.h. of graduate credit; the nonthesis option requires a minimum of 32 s.h.

#### **Common Curriculum Core**

Total of 15 s.h., as follows:

07S:186 Curriculum Foundations	3 s.h.
07E:300 Design and Organization of Curriculum	3 s.h.

Three of these:

07B:222 Introduction to Policy Analysis and Evaluation	3 s.h.
07B:381 Analysis and Appraisal of Curriculum	3 s.h.
07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms	3 s.h.
07P:203 Learning, Technology, and Effective Teaching	3 s.h.
07P:205 Design of Instruction	3 s.h.
07P:255 Construction and Use of Evaluation Instruments	3 s.h.
07S:132 Middle School Curriculum and Methods	3 s.h.

#### **Research Core**

Students select two courses (total of 6 s.h.) in consultation with the advisor.

**Supervision Core**

Students select two courses (total of 6 s.h.) in consultation with the educational policy and leadership studies advisor.

**Cognates**

Students complete a total of 6 s.h. in a subject field such as social studies education or educational measurement.

**Thesis**

Students who elect a thesis program earn 2-4 s.h. in 07S:393 Master's Thesis.

**COMPREHENSIVE EXAMINATION**

Two 3-hour comprehensive exams are required: one in curriculum and one in a related field in education or in a cognate field; or three 2-hour examinations.

**Ph.D. in Curriculum and Supervision**

The Doctor of Philosophy program in curriculum and supervision is administered by the College of Education. It prepares students for leadership positions in curriculum for elementary, middle, and secondary schools, state departments, intermediate systems, and college teaching.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must hold a valid teaching license/certificate, and have at least two years of teaching experience. A faculty review committee makes admission decisions.

**REQUIREMENTS**

The Ph.D. program in curriculum and supervision requires a total of at least 90 s.h. of graduate credit, including other approved graduate course work.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

ED students in curriculum and supervision must complete one or both of the Department of Teaching and Learning Ph.D. core courses.

07E:304 Schooling in the United States	3 s.h.
07S:333 Seminar on Teacher Education	3 s.h.

All curriculum and supervision doctoral students are required to complete at least 9-12 s.h. of cognate work selected in consultation with their advisors. Suggested cognates include foreign language and ESL education, gifted education, global education, language literacy and culture, mathematics education, science education, and special education (see "Ph.D. Required Cognates" above).

Additional requirements for the Ph.D. in curriculum and supervision are as follows.

**Common Curriculum Core**

Seven of these (21 s.h.):

07B:222 Introduction to Policy Analysis and Evaluation	3 s.h.
07B:381 Analysis and Appraisal of Curriculum	3 s.h.
07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms	3 s.h.
07E:300 Design and Organization of Curriculum	3 s.h.
07P:205 Design of Instruction	3 s.h.
07P:255 Construction and Use of Evaluation Instruments	3 s.h.

07P:257 Educational Measurement and Evaluation	3 s.h.
07S:132 Middle School Curriculum and Methods	3 s.h.
07S:186 Curriculum Foundations	2-3 s.h.

**Supervision Core**

A minimum of four courses in educational policy and leadership studies, selected in consultation with advisor 12 s.h.

**Electives**

Elective courses chosen in consultation with the advisor 9-12 s.h.

**COMPREHENSIVE EXAMINATION**

Candidates take three 3-hour comprehensive exams, one in secondary school curriculum and two in related fields in education or in a cognate field.

**DISSERTATION**

Ph.D. students earn 10-18 s.h. of dissertation credit in 07S:493 Ph.D. Thesis.

**M.A. in English Education**

The Master of Arts program in English education is intended for experienced teachers of English. It provides opportunities for professional development and preparation for department chairs, supervisors of English, and curriculum specialists for secondary schools. Application should be made to the College of Education.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They should have taken extensive course work in English and should have taught English for at least two years.

**REQUIREMENTS**

The M.A. program in English education requires a minimum of 30 s.h. of graduate credit. Students specialize in English education and in one or two other areas. The other area(s) may include reading, writing, curriculum, adolescent literature, or a literary area. Students and their advisors plan the program of study together. The only required course is 07S:315 M.A. Seminar: English Education. At the end of the program, students take a comprehensive examination in English education and in their chosen area(s).

Students must maintain a g.p.a. of at least 3.00 while enrolled in the program.

**M.A.T. in English Education**

The Master of Arts in Teaching program in English education is designed for students who have an undergraduate degree in English and few or no professional education courses. Successful completion of the program enables students to receive a credential to teach English in secondary schools.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have a B.A. in English or the equivalent, with an undergraduate g.p.a. of at least 3.00. They also must take the Graduate Record Exam and meet all TEP application requirements. Since the M.A.T. is a credentialing program, candidates must not have qualified previously for a credential. Applicants are expected to have no more than 6 s.h. of course work in professional education courses prior to admission.

**REQUIREMENTS**

The M.A.T. program in English education requires a minimum of 45 s.h. of graduate credit, including the following courses.

**English**

07S:315/08P:405 M.A. Seminar: English Education	arr.
08N:141 Approaches to Teaching Writing	3 s.h.
08P:182 Language and Learning	2-3 s.h.
08P:198 Reading and Teaching Adolescent Literature	3 s.h.

Students may take the following English courses as part of the M.A.T. program or as part of their undergraduate program.

A course in Shakespeare  
 Three courses in American literature  
 A course in British literature  
 A course in nonfiction or creative writing (in addition to 08N:141)

#### **Education**

07B:180 Human Relations for the Classroom Teacher	3 s.h.
07E:100 Foundations of Education	3 s.h.
07E:102 Technology in the Classroom (must be taken during student's first semester in the college)	2 s.h.
07P:200 Educational Psychology	3 s.h.
07S:114 Introduction and Practicum: Secondary English (must be completed before enrollment in 07S:115 and 07S:194)	3 s.h.
07S:115 Methods: Secondary English	3 s.h.
07S:187 Seminar: Curriculum and Student Teaching	1-3 s.h.
07S:190 Orientation to Secondary Education	1 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School	arr.
07S:192 Observation and Laboratory Practice in the Secondary School	arr.
07S:194 Methods: Secondary Reading	2-3 s.h.
07U:100 Foundations of Special Education	3 s.h.

#### **COMPREHENSIVE EXAMINATION**

The comprehensive examination involves a series of reflective projects supervised by English education faculty. The projects encompass issues explored throughout the course of study and involve integration of theory and practice.

#### **M.A.T. in Foreign Language Education**

The Master of Arts in Teaching program in foreign language education is designed for superior liberal arts and sciences graduates who have had few or no professional education courses. Successful completion of the program leads to elementary and/or secondary teacher licensure. The M.A.T. is available in Chinese, French, German, Japanese, Latin, Spanish, and Russian.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree with a major or a strong concentration in a second language and an undergraduate g.p.a. of at least 3.00. They also must meet all TEP application requirements.

#### **REQUIREMENTS**

The M.A.T. program in foreign language education requires a minimum of 67 s.h. of graduate credit. Students must complete at least 18 s.h. in graduate course work in the collaborating foreign language department and the following professional education courses.

#### **Professional Education**

07B:180 Human Relations for the Classroom Teacher	3 s.h.
07E:100 Foundations of Education	3 s.h.
07E:102 Technology in the Classroom (must be taken during student's first semester in the college)	2 s.h.
07P:200 Educational Psychology	3 s.h.
07S:190 Orientation to Secondary Education (must be taken during student's first semester in the college)	1 s.h.
07S:195 Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1 s.h.

07U:100 Foundations of Special Education

3 s.h.

**Foreign Language Teaching**

All of these:

07S:183 Second Language Classroom Learning

3 s.h.

07S:197 Principles of Course Design for Second Language Instruction

3 s.h.

07S:200 Fundamentals of Second Language Assessment

3 s.h.

Total of 21-27 s.h. from these:

07S:106 Foreign Language Education Practicum I

3 s.h.

07S:107 Foreign Language Education Practicum II

3 s.h.

07S:116 Learning to Teach Second Languages I

3 s.h.

07S:117 Learning to Teach Second Languages II

3 s.h.

07S:187 Seminar: Curriculum and Student Teaching

1 s.h.

07S:191 Observation and Laboratory Practice in the Secondary School

arr.

07S:192 Observation and Laboratory Practice in the Secondary School

arr.

**Optional for K-12 Licensure**

07S:189 Elementary School Special Subject Area Student Teaching

1-4 s.h.

**COMPREHENSIVE EXAMINATION**

A comprehensive examination is required. The examination reflects candidate's depth and breadth of knowledge in foreign language education, including but not limited to theory and practice as well as knowledge of and proficiency in the target language and/or literature of the candidate's choice. The candidate and his or her advisor discuss the exam's content and format eight months before the exam.

**ESL ENDORSEMENT**

An ESL endorsement enables an individual to teach English as a Second Language in K-12 in the state of Iowa. Because teaching endorsements are additional areas of expertise added to a teaching license, applicants must be current students in a TEP program or licensed in-service teachers.

**ADMISSION**

Applicants are admitted to the ESL endorsement program twice a year; application deadlines are October 15 and March 15. Each applicant must submit a one-page essay explaining why he or she wishes to teach ESL; a transcript of all university-level course work; and evidence of having completed two semesters of foreign language beyond the language component of the College of Liberal Arts and Sciences General Education Program or a documented score of "advanced plus" on the oral proficiency interview (OPI) given in the language department. Applicants whose first language is not English must provide evidence of scoring 55 or higher on the Test of Spoken English (TSL) or 26 (Internet-based) on the speaking section of the Test of English as a Foreign Language (TOEFL).

**M.A. in Foreign Language Education**

The Master of Arts program in foreign language education is designed for students who would like to pursue a foreign language education specialization in teaching (kindergarten through college) or in related fields (e.g., language laboratory directors, instructional materials designers, or evaluation specialists). It also offers enrichment in foreign language pedagogical knowledge for practicing teachers. Students may design programs with a special focus.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must be proficient in English and in another language and have earned at least 20 s.h. in undergraduate, upper-division foreign language course work. Applicants should submit a statement of purpose explaining their graduate study goals. A g.p.a. of at least 3.00 in undergraduate course work and some experience living, working, and/or studying in the applicant's chosen target language culture are preferred. International applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL) with a speaking score of 26 and a writing score of 25.

**REQUIREMENTS**

The M.A. program in foreign language education requires a minimum of 33-36 s.h. of graduate credit. It offers three specializations: second languages education, a target language area (may subsume language, linguistics, literature, history, geography, or civilization), and a cognate area. The cognate area may be teacher education, reading, instructional design, measurement and statistics, or another area selected in consultation with the advisor.

Students take at least 15 s.h. in second language education course work, 9 s.h. in graduate language or linguistics, and 9 s.h. in the cognate area. Students must earn 9 s.h. in courses numbered 200 or above. They also must complete a capstone project in consultation with the advisor.

Students must maintain a g.p.a. of at least 3.00 while enrolled in the program. Candidacy for the master's degree is reevaluated annually.

Suggested courses are as follows.

**Foreign and Second Languages Education**

Total of 15 s.h.

07S:183 Second Language Classroom Learning	3 s.h.
07S:197 Principles of Course Design for Second Language Instruction	3 s.h.
07S:200 Fundamentals of Second Language Assessment	3 s.h.

At least 6 s.h. from these:

07S:180 Issues in Foreign Language Education	3 s.h.
07S:184 Reading in a Second Language	3 s.h.
07S:202 Second Language Program Management	3 s.h.
07S:203 Second Language Planning in Education	3 s.h.
07S:207 Reading in Non-Roman Scripts	3 s.h.
07S:208 Designing Materials for Second Language Instruction	3 s.h.
07S:209 Cultural Curriculum	3 s.h.

**Target Language**

In consultation with the advisor, students select at least 9 s.h. of graduate language courses in their area of interest.

**Cognate Area**

Students complete at least 9 s.h. of course work chosen in consultation with the advisor.

**MASTER'S EXAMINATION**

Students take a written exam during the semester in which they plan to graduate. The exam covers second language education and the two study areas selected by the student. It is written by the graduate committee, which consists of at least three faculty members, two of whom must be from foreign language education. The candidate and his or her advisor discuss and formalize the exam's content and process eight months before the exam.

**Ph.D. in Foreign Language and ESL Education**

The Doctor of Philosophy program in foreign language and ESL education provides students with the necessary content-area knowledge and research skills for independent research, program administration, and varied leadership positions in foreign language and ESL education. It is designed for individuals who have demonstrated success in foreign language and ESL teaching and who wish to prepare for positions in academia, government, or the private sector where in-depth knowledge of foreign language educational issues is required.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They should have at least two years of experience teaching foreign language or ESL and should hold a master's degree or have completed a significant amount of graduate course work in a foreign language or foreign language education. Applicants must have a g.p.a. of at least 3.00 in graduate course work. International applicants whose first language is not English must score at least

600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL) with a speaking score of 26 and a writing score of 25.

Application materials should include a statement of purpose explaining the applicant's professional goals, transcripts of all undergraduate and graduate work, Graduate Record Exam (GRE) General Test scores, a sample of academic writing, and three letters of recommendation.

## REQUIREMENTS

The Ph.D. program in foreign language and ESL education requires a minimum of 80 s.h. of graduate credit, which may include courses taken for the master's degree. Most course work should be taken at the 200 level or above. At least 30 s.h. must be taken in the core area of foreign language education. The student and his or her advisor discuss core area course work and cognate area specializations. The student's progress toward the degree and his or her scholarship development is reviewed by the program's faculty and discussed by the student and his or her advisor each year.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

All Ph.D. students in the foreign language and ESL education must complete both of the following Ph.D. core courses.

07E:304 Schooling in the United States	3 s.h.
07S:333 Seminar on Teacher Education	3 s.h.

In addition, all doctoral students in the Department of Teaching and Learning must complete an approved cognate area; see "Ph.D. Required Cognates" above.

Additional requirements for the Ph.D. in foreign language and ESL education are as follows.

## Foreign Language Education Core

All students must complete these (21 s.h.):

07S:183 Second Language Classroom Learning	3 s.h.
07S:184 Reading in a Second Language	3 s.h.
07S:197 Principles of Course Design for Second Language Instruction	3 s.h.
07S:200 Fundamentals of Second Language Assessment	3 s.h.
07S:203 Second Language Planning in Education	3 s.h.
07S:209 Cultural Curriculum	3 s.h.
07S:306 Proposal Writing for Second Language Research	3 s.h.

## Core Electives

Students may take the following courses in addition to, but not instead of, the courses listed under "Foreign Language Education Core" above. Students must have their advisor's consent to substitute other courses as electives.

07S:180 Issues in Foreign Language Education	3 s.h.
07S:202 Second Language Program Management	3 s.h.
07S:207 Reading in Non-Roman Scripts	3 s.h.
07S:208 Designing Materials for Second Language Instruction	3 s.h.
164:211 Multimedia and Second Language Acquisition	3 s.h.

## COMPREHENSIVE EXAMINATION

In order to qualify to take the comprehensive examination, students must successfully complete the required course work and an extended research activity. After successful completion of the required course work and the research activity, and upon recommendation of the program's faculty, the student is eligible to sit for the comprehensive examination. Completion of the required course work and research activities does not guarantee advancement to the examination.

After passing the comprehensive examination, students consult with their advisor to choose a Ph.D. dissertation committee of at least five faculty members, who approve the dissertation proposal. The student then conducts

research under the primary guidance of the advisor.

### **Ph.D. in Language, Literacy, and Culture**

The Doctor of Philosophy program in language, literacy, and culture brings together scholarly traditions and contemporary theory in literacy and cultural studies. Course work provides a broad background in relevant theoretic and research literature and opportunities to conduct original studies that explore the nature of literacy practices both in and out of school. Graduates find employment in university and college teaching, research, curriculum development, and administration of literacy programs.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They should have at least three years of experience teaching or tutoring language or literacy (reading, writing, English, language arts) and should have earned a master's degree in a literacy-related field. Application materials should include a statement of purpose explaining the applicant's reasons for pursuing graduate study and describing his or her future goals; transcripts of all undergraduate and graduate course work; Graduate Record Exam (GRE) General Test scores; a sample of academic writing; and three letters of recommendation.

Applications for admission and for financial aid are reviewed by December 1 each year.

#### **REQUIREMENTS**

The Ph.D. program in language, literacy, and culture requires a minimum of 88-90 s.h. of graduate credit. Course work includes an introductory seminar in language, literacy, and culture; at least 9 s.h. of additional doctoral seminars in the program; approved cognate areas (see "Ph.D. Required Cognates" above); and 9-12 s.h. of graduate course work outside the Department of Teaching and Learning (6 s.h. of that outside the College of Education). Students also earn 10-12 s.h. of dissertation credit.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

In addition, all language, literacy, and culture students must complete one of the following Department of Teaching and Learning core courses.

07E:304 Schooling in the United States	3 s.h.
07S:333 Seminar on Teacher Education	3 s.h.

#### **COMPREHENSIVE EXAMINATION AND DISSERTATION**

As students near the completion of their course work, they identify several key strands for review and synthesis. With guidance from their advisors, students prepare for three forms of written and oral exams: they answer take-home questions in two areas of literacy; they submit a substantive issues paper, typically a report of an exploratory study or a review of research literature on a topic of special interest; and they design a syllabus for a literacy course and write a reflective commentary that demonstrates understanding of the relationship between theory and practice.

Following successful completion of all components of the comprehensive exam, students work with a faculty member to develop a proposal for a study that will make an original contribution to the understanding of some aspect of literacy. After the proposal has been approved, students conduct research and report their findings under the primary guidance of a dissertation chair.

For detailed information on the Ph.D. program in language, literacy, and culture, see Program Information on the Department of Teaching and Learning web site.

### **M.A. in Mathematics Education**

The Master of Arts program in mathematics education provides students with advanced specialization in mathematics and education as a better foundation for K-12 teaching.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. Except in unusual cases, they should hold a professional license/certificate to teach school mathematics. A combined score of 1000 on the verbal and quantitative sections of the Graduate Record Examination (GRE) General Test is preferred.

**REQUIREMENTS**

The M.A. program in mathematics education requires a minimum of 32 s.h. of graduate credit. Students take a minimum of 9 s.h. of course work in mathematics approved by the advisor. They also take a minimum of four courses in mathematics education, which must include 07S:235 Current Issues in Mathematics Education and three courses chosen in consultation with the advisor.

Students choose a cognate area, usually enrolling in three or more courses in the area. Suggested areas include educational psychology, educational statistics and measurement, history or philosophy of education, pure or applied mathematics, instructional design and technology, counselor education, curriculum, administration, and special education. Courses are chosen in consultation with a faculty member from the cognate area.

Students also complete a sufficient number of electives in mathematics and education, chosen with the approval of the advisor, to complete 32 s.h. of credit.

**COMPREHENSIVE EXAMINATION**

Students take three 2-hour comprehensive exams: one in mathematics education, the second in mathematics, and the third in the cognate area.

**M.S. in Mathematics with Education Option**

The Master of Science in mathematics with education option prepares licensed/certified teachers with advanced specialization in mathematics and mathematics education. It is administered by the Department of Mathematics (College of Liberal Arts and Sciences). Application should be made to the Department of Mathematics.

**REQUIREMENTS**

The M.S. in mathematics with education option requires a minimum of 32 s.h. of graduate credit. Students must earn a minimum of 24 s.h. in the Department of Mathematics, including the core master's program for either pure mathematics or applied mathematics as described below. They also must complete two courses in mathematics education.

**Pure Mathematics**

One of these sequences:

22M:115-22M:116 Introduction to Analysis I-II	6 s.h.
22M:210-22M:211 Analysis I-II	6 s.h.

One of these sequences:

22M:120-22M:121 Abstract Algebra I-II	6 s.h.
22M:205-22M:206 Introduction to Algebra I-II	6 s.h.

22M:132 General Topology	3 s.h.
--------------------------	--------

**Applied Mathematics**

22M:140 Continuous Mathematical Models	3 s.h.
22M:142 Nonlinear Dynamics with Numerical Methods	3 s.h.
22M:144 Partial Differential Equations with Numerical Methods	3 s.h.
22M:151 Discrete Mathematical Models	3 s.h.
22M:170 Numerical Analysis: Nonlinear Equations and Approximation Theory	3 s.h.
22M:171 Numerical Analysis: Differential Equations and Linear Algebra	3 s.h.
22M:174 Optimization Techniques	3 s.h.

**COMPREHENSIVE EXAMINATION**

Students take a comprehensive examination of six hours over the required courses in either pure mathematics or applied mathematics, and education. The examination assesses the candidate's knowledge of mathematics and of the relevance of specific concepts in teaching secondary school mathematics.

**Ph.D. in Mathematics Education**

The Doctor of Philosophy program in mathematics education prepares supervisors, teacher education personnel,

community college personnel, and researchers in mathematics education. It is administered by the College of Education.

### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate major in mathematics or the equivalent; a current teaching license/certificate and at least two years of teaching experience are strongly preferred. A faculty review committee makes admission decisions.

### **REQUIREMENTS**

The Ph.D. program in mathematics education requires a minimum of 80-90 s.h. of graduate credit. Credit earned more than 10 years before admission to the program must be updated.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

All doctoral students in mathematics education must complete one of the following Ph.D. core courses.

07E:304 Schooling in the United States	3 s.h.
07S:333 Seminar on Teacher Education	3 s.h.

In addition, all doctoral students in the Department of Teaching and Learning must complete an approved cognate area; see "Additional Requirements" below.

Ph.D. students in mathematics education must complete a minimum of 24 s.h. of graduate work in the Departments of Computer Science, Mathematics, and Statistics and Actuarial Science, as approved by the advisor. Electives are encouraged in the pure mathematics and applied mathematics sequences.

Students who completed their mathematics requirement at another institution must complete at least 6 s.h. of additional course work in mathematics at The University of Iowa, chosen with the advisor's approval.

Students also must complete at least six courses in mathematics education, including 07S:235 Current Issues in Mathematics Education and 07S:335 Seminar: Research in Mathematics Education.

### **ADDITIONAL REQUIREMENTS**

Students concentrate in two additional comprehensive examination areas in either the mathematical sciences or education. A minimum of three courses usually are required for a comprehensive examination area, but candidates should consult with faculty members in the areas selected to determine which courses they should take in order to adequately prepare for the examinations.

Students must complete a total of at least 36 s.h. in College of Education courses; this include the course work listed above. All Ph.D. students must complete an approved cognate area; a partial list of potential cognate areas is available from the M.A. program in mathematics education.

Upon completing the program, the student must have a cumulative g.p.a. of 3.00 or higher on all graduate work in mathematics, all University of Iowa graduate work in mathematics, all graduate work, and all University of Iowa graduate work.

### **COMPREHENSIVE EXAMINATION**

Students take three written comprehensive examinations, one in mathematics education and two in other fields of education or mathematics; an oral examination follows the written examinations.

### **DISSERTATION**

Students must earn 10 s.h. of dissertation credit in 07S:493 Ph.D. Thesis. Each candidate completes a dissertation on a research problem in mathematics education. A prospectus of the proposed research must be presented to the dissertation committee before the candidate undertakes the study. Upon completion of the dissertation, the candidate defends the dissertation in an oral examination.

### **M.A. in Music**

The Master of Arts in music with concentration in music education provides students with deeper insights into music,

the theory and practice of music education, and the role of music in the school curriculum. The degree requires 33 s.h. of graduate credit and is offered with or without thesis.

The program is administered by the School of Music (College of Liberal Arts and Sciences) in cooperation with the College of Education. Application is made to the School of Music.

### **Ph.D. in Music**

The Doctor of Philosophy in music with concentration in music education prepares students for teaching, research, and administrative posts. Graduates find employment as college teachers of music education classes and activities; as band, chorus, and orchestra directors; and as administrators of music departments and schools of music. Some apply their skills in public schools as music supervisors, research and curriculum consultants, and directors of city or district school music programs.

The program is administered by the School of Music (College of Liberal Arts and Sciences) in cooperation with the College of Education. Application is made to the School of Music.

### **M.A.T. in Science Education**

The Master of Arts in Teaching program in science education is designed primarily for graduates of a bachelor's degree program in science who decide that they would like to become teachers. It features advanced work in science along with the courses required for certification, enabling students to earn a master's degree and teaching certification at the same time.

The program assumes students have completed considerable course work in science (at least 56 s.h.) as undergraduates, but no previous course work in education. Students' science course work should be equivalent to that required by the University of Iowa Science Education Program (College of Liberal Arts and Sciences).

### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree with a major or equivalent in one of the sciences. A g.p.a. of at least 3.00 is required for admission and must be maintained throughout the program. Applicants must meet all TEP application requirements.

### **REQUIREMENTS**

The M.A.T. program in science education requires a minimum of 48 s.h. of graduate credit.

#### **Professional Education Sequence Foundation**

07B:180 Human Relations for the Classroom Teacher	3 s.h.
07E:100 Foundations of Education	3 s.h.
07E:102 Technology in the Classroom (must be taken during student's first semester in the college)	2 s.h.
07P:200 Educational Psychology	3 s.h.
07S:171 Secondary Classroom Management	2 s.h.
07S:190 Orientation to Secondary Education (must be taken during student's first semester in the college)	1 s.h.
07S:195 Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1 s.h.
07U:100 Foundations of Special Education	3 s.h.

Science education courses are taken in the following sequence.

07S:151 Science Teaching and Practice with Early Learners	3 s.h.
07S:152 Methods of Teaching Science	3 s.h.

These two taken concurrently:

07S:153 Instructional Issues in Teaching Science	3 s.h.
07S:179 Secondary School Science Practicum	2 s.h.

These three taken concurrently:

07S:187 Seminar: Curriculum and Student Teaching	3 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School	6 s.h.
07S:192 Observation and Laboratory Practice in the Secondary School	6 s.h.

**ELECTIVES**

A minimum of one graduate course in biology, chemistry, earth science, or physics is required. Students who have satisfied portions of the required science course work listed above must take additional science course work to meet the minimum requirement of 48 s.h.

**COMPREHENSIVE EXAMINATION**

Students complete comprehensive examinations before their student teaching semester. Two comprehensive exams, one in science education and one in a science specialization area, are required. They may not duplicate course examinations in these areas. The science education exam, under the guidance and supervision of the examining committee, consists of two parts, written and oral. Detailed requirements for the science education comprehensive examination are available from the Department of Teaching and Learning office.

**Joint B.A. in Science/M.A.T. in Science Education**

College of Liberal Arts and Sciences students who want to teach science and are working toward a Bachelor of Arts in biology, chemistry, or physics may earn their bachelor's degree and a Master of Arts in Teaching in five years through the joint B.A./M.A.T. program. Students in the joint program complete all of the course work required for both degrees, but 18 s.h. of work required for the M.A.T. also is counted toward the B.A. degree.

Students are admitted to the joint program before their fourth year. They may begin taking education courses during their third year, but they may not earn graduate credit for them until their fourth and fifth years, after they have been admitted to the joint program. Students take 30 s.h. of course work during the fifth year and must complete all remaining requirements for both degrees that year.

**Science Specialization (Broad Field Science Block)**

The following courses are required for the undergraduate degree in science education at The University of Iowa. They need not be repeated by M.A.T. candidates who need one or more advanced courses in their major science area, or by students from other interdisciplinary science discipline programs that prepare teachers for grades 6-9.

Both of these:

097:128 Meaning of Science	3 s.h.
097:130 Science in Historical Perspective	3 s.h.

Two of these (unless completed during undergraduate study):

097:102 Societal and Educational Applications of Earth Science and Environmental Science	3 s.h.
097:103 Societal and Educational Applications of Biological Sciences	3 s.h.
097:105 Societal and Educational Applications of Physical Sciences	3 s.h.
097:106 Societal and Educational Applications of Chemical Concepts	3 s.h.

Education courses required for the joint program are listed under "M.A.T. in Science Education" above. Requirements for the B.A. degree are listed under Biology, Chemistry, and Physics and Astronomy (College of Liberal Arts and Sciences) in the Catalog.

**M.S. in Science Education**

The Master of Science program in science education is designed for teachers and supervisors (K-college) and professionals in related fields, such as medical education, college teaching, museum program management, and outreach programs. The program is intended to provide experience in understanding teaching and learning, and the research processes required to advance the field.

**ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They should hold an undergraduate major in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis. The department recommends that applicants have teaching licensure/certification unless they are preparing for careers in allied health, museums, or community colleges.

**REQUIREMENTS**

The M.S. program in science education requires a minimum of 38 s.h. of graduate credit in four areas: science education, education, research, and science. Students' individual programs of study are approved by the science

education faculty.

The following courses are required.

07S:255 Practices of Inquiry in Science Learning Environments (no substitute for this course)	3 s.h.
07S:257 Learning in the Science Classroom (no substitute for this course)	3 s.h.
07S:259 Advanced Pedagogy (no substitute for this course)	3 s.h.
07S:355 Research in Science Education (taken twice)	6 s.h.
Two science content courses chosen with the advisor	6 s.h.

A minimum of 13 s.h. chosen from these:

07E:304 Schooling in the United States	3 s.h.
or	
07S:333 Seminar on Teacher Education	3 s.h.
07C:338 Essentials of Qualitative Inquiry	3 s.h.
07E:300 Design and Organization of Curriculum	3 s.h.
07P:143 Introduction to Statistical Methods	3 s.h.
07P:200 Educational Psychology	3 s.h.
07P:202 Understanding Educational Research	3 s.h.
07P:220 Quantitative Educational Research Methodologies	3 s.h.
07P:275 Constructivism and Design of Instruction	3 s.h.
07S:256 Science Education: The Nature of Science	3 s.h.
07S:258 Writing in the Science Classroom	3 s.h.
160:250 Introduction to Rhetoric of Science	3 s.h.

One additional qualitative or quantitative research methods course chosen in consultation with the advisor

## MASTER OF SCIENCE EXAMINATION

Students must complete a thesis (07S:393 Master's Thesis), for which they earn 2-4 s.h. of credit. A final oral examination is administered on campus in which the candidate defends his or her thesis. This examination includes a critical inquiry into the purposes, methods, and results of the thesis research investigation.

The final examination is conducted by a committee of no fewer than three members of the graduate faculty. In some cases, the committee must include a member from outside science education; consult the department.

## Ph.D. in Science Education

The Doctor of Philosophy program in science education is designed for individuals who aspire to positions as college and university science educators; major supervisors in national, state, and local systems; teachers in small liberal arts colleges; instructors of general education science courses at major universities; research directors in science education; and professionals in medical and/or allied health education.

## ADMISSION

Applicants must meet the admission requirements of the Graduate College. They should have completed a bachelor's degree in a science area (or combination of science areas), in science education, or in elementary education with a science emphasis; have a cumulative g.p.a. of at least 3.00 on undergraduate and graduate work; and have a combined score of at least 1000 on the verbal and quantitative portions of the Graduate Record Exam (GRE) General Test. Applicants must submit three letters of recommendation; a statement of purpose describing their reasons for pursuing graduate work and their goals for graduate study; and an example of their academic writing.

## REQUIREMENTS

The Ph.D. program in science education requires a minimum of 85 s.h. of graduate study, as follows.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site). Course selections must be consistent with the following research methods requirements.

All doctoral students in science education must complete one or both of the following Ph.D. core courses. Students may not substitute other courses for these.

07E:304 Schooling in the United States	3 s.h.
07S:333 Seminar on Teacher Education	3 s.h.

In addition, all doctoral students in the Department of Teaching and Learning must complete an approved cognate area; see "Ph.D. Required Cognates" above.

Additional requirements for the Ph.D. in science education are as follows.

#### **Science Education**

All of these (15 s.h.):

07S:250 Assessment in Teaching and Research (no substitute for this course)	3 s.h.
07S:257 Learning in the Science Classroom	2-3 s.h.
07S:259 Advanced Pedagogy	3 s.h.
Graduate-level science education courses chosen in consultation with advisor	6 s.h.

#### **Education**

All of these (12 s.h.):

07E:300 Design and Organization of Curriculum	3 s.h.
07P:200 Educational Psychology	3 s.h.
07P:275 Constructivism and Design of Instruction	3 s.h.
07X:150 Introduction to Educational Research	3 s.h.

#### **Research in Science Education**

Both of these (21 s.h.):

07S:350 Seminar: Science Education (taken three times for 1 s.h. each)	3 s.h.
07S:355 Research in Science Education (taken six times for 3 s.h. each)	18 s.h.

#### **Science Area**

A family of courses in a major science area	12 s.h.
---	---------

#### **DISSERTATION**

Ph.D. students earn 10 s.h. of thesis credit in 07S:493 Ph.D. Thesis.

#### **M.A. in Social Studies Education**

The Master of Arts program in social studies education provides an opportunity for interdisciplinary work in education, history, social science, or related areas for classroom teachers, high school department chairs, supervisors, and others interested in advancing their competence in history and the social sciences and greater proficiency in teaching and supervision.

Students choose one of two programs. Program A provides interdisciplinary study in education, history, social science, or related areas for classroom teachers or others interested in advancing their competence in instruction and their subject area. Program B is for individuals who have a bachelor's degree in history or social sciences and who wish to obtain a teaching license/certificate while earning the M.A. degree. Program B students must apply to both the Graduate College and the College of Education.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They should have a bachelor's degree in education, history, or one of the social sciences from an accredited institution; a cumulative g.p.a. of at least 3.00; a g.p.a. of at least 3.00 in history and/or social science courses; a combined verbal and quantitative score of at least 1000 on the Graduate Record Examination (GRE) General Test; and two letters of recommendation. Evidence of writing ability in a completed major paper or essay also is required. Typically, applicants to Program A are expected to hold a secondary teaching license/certificate.

After declaring a social studies education major, M.A. students must maintain a g.p.a. of at least 3.00.

#### **PROGRAM A REQUIREMENTS**

Program A of the M.A. program in social studies education requires a minimum of 38 s.h. of graduate credit distributed among three concentration fields in history and social sciences (or related areas) and education, with at least 10 s.h. in each of three fields.

At least 9 of the total 38 s.h. must be earned in graduate courses numbered 200 or above distributed among the three concentration fields.

Students who choose the thesis option complete a research or investigative problem. If the thesis is research or investigation in history, social science, or a related area, the thesis director is a member of the appropriate department. If the thesis is an investigative problem in social studies education, the thesis director is a College of Education faculty member.

#### **PROGRAM A COMPREHENSIVE EXAMINATION**

The comprehensive examination consists of three 2-hour written exams, one on each of the three concentration fields.

#### **PROGRAM B REQUIREMENTS**

Program B of the M.A. program in social studies education requires a minimum of 38 s.h. of graduate credit. Program B students should have completed considerable work in the social sciences and/or history as undergraduates. Students who have been accepted to the University of Iowa undergraduate or postbaccalaureate Teacher Education Program in secondary social studies education cannot apply credit they earned in required licensure courses as undergraduate or postbaccalaureate students to the required 38 s.h. for the M.A. in social studies education. However, such credit does count toward state teaching licensure.

Program B students who completed 07S:111 Introduction and Practicum: Secondary Social Studies and/or 07S:170 Methods: Secondary Social Studies as undergraduate or postbaccalaureate students at The University of Iowa are required to retake these courses during the M.A. program and immediately before student teaching. Required teaching licensure course work completed at other colleges or universities is reviewed on a case-by-case basis.

Program B students who were accepted to the undergraduate Teacher Education Program before they received a baccalaureate must complete a college-level math course.

For licensure, students admitted to the M.A. in social studies education must complete 30 s.h. in a history or social science area; the 30 s.h. may include previous undergraduate and/or graduate-level course work. Required professional education course work not completed as part of the baccalaureate degree must be completed for licensure.

Students also must complete 15 s.h. in an additional history or social science licensure area; previous undergraduate course work may apply.

Students must complete all of the following courses, unless they completed some of them as part of their bachelor's degree. In such cases, the semester-hour requirement for Program B is reduced accordingly, but it never falls below 38 s.h. All students must take the course work required for meeting all Iowa Department of Education requirements for teacher licensure/certification.

Professional education courses:

07B:180 Human Relations for the Classroom Teacher	3 s.h.
07E:100 Foundations of Education	3 s.h.
07E:102 Technology in the Classroom (must be taken during student's first semester in the college)	2 s.h.
07P:200 Educational Psychology	3 s.h.
07S:111 Introduction and Practicum: Secondary Social Studies	3 s.h.
07S:170 Methods: Secondary Social Studies	3 s.h.
07S:171 Secondary Classroom Management (for students admitted March 2008 and after)	2 s.h.
07S:187 Seminar: Curriculum and Student Teaching	3 s.h.
07S:190 Orientation to Secondary Education (must be taken during student's first semester in the college)	1 s.h.
07S:191 Observation and Laboratory Practice in the Secondary School	6 s.h.
07S:192 Observation and Laboratory Practice in the Secondary School	6 s.h.
07S:195 Teaching Reading in Secondary Content Areas (must be taken during student's first semester in the college)	1 s.h.
07S:233 History and Foundations of Social Studies Education	3 s.h.

07S:277 Seminar: Social Studies Education	3 s.h.
07S:341 Infusing a Global Perspective into the Curriculum	3 s.h.
07U:100 Foundations of Special Education	3 s.h.

Subject area specialization courses: a minimum of 9 s.h. of course work in history or a social science is required; students should take at least one course taught by the instructor who will serve on the examining committee.

#### **PROGRAM B COMPREHENSIVE EXAMINATION**

The comprehensive examination consists of three 2-hour exams: one on the subject area specialization, one on general professional education, and one on social studies education.

#### **Ph.D. in Social Studies Education**

The Doctor of Philosophy program in social studies education prepares secondary department chairs, supervisors, curriculum directors, teacher education personnel, and college instructors in the social sciences and in social studies education.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have a bachelor's degree in history, the social sciences, or education; a master's degree in history, the social sciences, or education; a cumulative g.p.a. of at least 3.00; and a combined verbal and quantitative score of at least 1200 on the Graduate Record Examination (GRE) General Test. At least two years of teaching experience is strongly preferred. Applicants who did not write a thesis as part of their M.A. must submit seminar papers or field research as equivalents.

#### **REQUIREMENTS**

The Ph.D. program in social studies education requires a minimum of 90 s.h. of graduate credit, including course work and 10 s.h. of dissertation credit.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

In addition, all Ph.D. students in the Department of Teaching and Learning must complete one or both of the following Ph.D. core courses.

07E:304 Schooling in the United States	3 s.h.
07S:333 Seminar on Teacher Education	3 s.h.

The remaining course work must be distributed among approved cognate areas (see "Ph.D. Required Cognates" above), history, social sciences or related areas, and professional education, depending on the student's background and goals.

Seminars and courses numbered 200 or above are required in each of the study areas that constitute the major. Students must take 9 s.h. of required courses in social studies education, including 07S:233 History and Foundations of Social Studies Education, 07S:277 Seminar: Social Studies Education, and 07S:341 Infusing a Global Perspective into the Curriculum.

#### **COMPREHENSIVE EXAMINATION**

Students take three 3-hour examinations, one in each of the study areas. Depending on the distribution of course work, the nine hours of written examinations may be rearranged. The Ph.D. examining committee consists of five members, who are selected according to the nature of the student's Ph.D. program and distribution of course work. An oral examination is conducted by the committee following the written exam.

#### **DISSERTATION**

Ph.D. candidates must complete a dissertation on a research problem in social studies education. The candidate must present a prospectus of the proposed research to the dissertation committee before undertaking the study. Upon completion, the candidate defends the dissertation in an oral exam.

#### **Special Education**

Special education programs are offered in K-6 and 7-12 Instructional Strategist I: Mild/Moderate, and K-12 Instructional Strategist II: BD/LD. These programs are designed to prepare graduates for positions in public schools, local and state education agencies, clinical settings, and institutions of higher education. All teacher licensure/certification programs are approved by the Iowa Department of Education.

A program leading to special education licensure/certification in Instructional Strategist I: Mild/Moderate (K-6) is available to undergraduates (see "Teacher Education Program and Licensure/Certification" at the beginning of this section). Undergraduates who wish to pursue careers in special education should contact the Department of Teaching and Learning.

### **M.A. in Special Education**

The Master of Arts program in special education prepares individuals to deliver appropriate levels of service to students with disabilities at the elementary and secondary levels, in either public or private settings. Applicants with a master's degree and special education certification may request admission for the purpose of obtaining an additional area of special education licensure/certification (i.e., professional improvement). Students admitted to the M.A. program typically receive licensure/certification in at least one area upon completing the program.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have an undergraduate g.p.a. of at least 3.00 (and/or at least 3.00 on a minimum of 12 s.h. of graduate course work). A combined verbal and quantitative score of at least 1000 on the Graduate Record Exam (GRE) General Test is preferred. Applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Application materials must include a completed Graduate College application form; copies of official transcripts for all college course work; an official report of Graduate Record Examination test scores; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

#### **REQUIREMENTS**

The M.A. program in special education requires a minimum of 32 s.h. of graduate credit. Contact the Department of Teaching and Learning for specific program requirements.

### **Special Education Consultant Authorization**

The Special Education Consultant authorization program prepares consultants to serve in special education programs.

#### **ADMISSION**

Admission to the M.A. program or to a certification program in special education is required. Applicants must hold or meet the requirements for the special education teaching endorsement congruent with their desired consultant authorization. Teaching endorsements must be documented by copies of teaching credentials.

Applicants also must have completed four years of successful teaching experience, two of which must be congruent with their desired consultant authorization. They must provide evidence of successful teaching (e.g., written statements from school personnel documenting years of teaching, type of students served, and success as a classroom teacher).

Documentation of certifications and teaching experience should be submitted with the application for admission to the Graduate College.

#### **REQUIREMENTS**

The Special Education Consultant authorization program requires at least 38 s.h., including credit required for the M.A. and the teaching endorsement program.

Students who already hold an M.A. in special education and an endorsement congruent with their desired consultant authorization must complete the following three courses.

07E:300 Design and Organization of Curriculum	3 s.h.
07P:263 Consultation Theory and Practice	3 s.h.
07P:347 Home/School/Community: System Interventions	3 s.h.

Students without an M.A. in special education must complete an M.A. and teaching endorsement program in special education congruent with their desired consultant authorization, plus the three courses listed above (07E:300 Design and Organization of Curriculum, 07P:263 Consultation Theory and Practice, 07P:347 Home/School/Community: System Interventions), for a total of at least 38 s.h.

### **Ph.D. in Special Education**

The Doctor of Philosophy program in special education prepares students for teaching and research positions in higher education, and for curriculum, supervisory, and research positions in state and local education agencies. The program permits students to study and practice extensively in their special education interest area and in an interest area outside of special education.

#### **ADMISSION**

Applicants must meet the admission requirements of the Graduate College. They must have master's degree or equivalent in special education; those without an M.A. thesis must have completed an equivalent project. Applicants should have a graduate g.p.a. of at least 3.50 and a combined verbal and quantitative score of at least 1000 on the Graduate Record Exam (GRE) General Test. Applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). Applicants should have at least one year of full-time teaching experience with exceptional children; several years are preferred.

Application materials must include a completed Graduate College application form; copies of official transcripts for all college course work; an official report of Graduate Record Examination test scores; three current letters of recommendation; and evidence of experience and/or teacher licensure/certification. An interview may be requested.

Final admission decisions are made by the special education graduate admissions committee.

#### **REQUIREMENTS**

The Ph.D. program in special education requires a minimum of 90 s.h. of graduate credit. The study plan includes an emphasis on research skills, all facets of special education, an approved cognate area (see "Ph.D. Required Cognates" above), and at least one specialization area.

All College of Education Ph.D. students must complete 07X:150 Introduction to Educational Research during the first year of their Ph.D. program. They also must complete an additional minimum of 15 s.h. in qualitative and quantitative course work, with at least 9 s.h. from one area (qualitative or quantitative) and at least 6 s.h. from the other. Courses to meet this requirement must be chosen from Required Ph.D. Research Courses (see Course Information in the A-Z directory on the college's web site).

In addition, all doctoral students in special education must complete one of the following Ph.D. core courses.

07E:304 Schooling in the United States	3 s.h.
07S:333 Seminar on Teacher Education	3 s.h.

All Ph.D. students in special education must complete the following courses.

07B:236 Administration of Students with Special Needs	3 s.h.
07U:343 Proseminar: Issues, Trends, and Research in Special Education	2-3 s.h.
07U:344 Proseminar: Issues, Trends, and Research in Special Education II	2-3 s.h.

Students must complete an interdisciplinary minor in a discipline outside of special education (minimum of 12 s.h.).

Students also are required to write the comprehensive examination and complete a doctoral dissertation, earning a minimum of 10 s.h. in 07S:493 Ph.D. Thesis.

## **Financial Support**

### **Elementary Education**

A number of teaching assistantships are available for graduate students in early childhood and elementary education. Assignments vary. Some involve supervising undergraduate majors enrolled in practicums; others involve teaching sections of undergraduate methods courses and supervising student teachers. Most assistantships are classified as one-half-time, which permits students to register for a maximum of 12 s.h. of credit per semester. Graduate assistants must register for at least 6 s.h. per semester.

All assistantships are awarded on a competitive basis. Applicants must have been admitted to regular status in the Graduate College and to an advanced program in the College of Education. For information about assistantships,

contact the chair of the Department of Teaching and Learning.

### **Secondary and Special Education**

A limited number of assistantships are available for graduate students in secondary and special education. Assignments vary. Some involve teaching undergraduate courses or supervising practicum experiences; others consist primarily of research activities. Graduate assistants may register for a maximum of 12 s.h. and a minimum of 6 s.h. per semester.

Graduate students in secondary education also may be eligible for assistantships in some College of Liberal Arts and Sciences departments. Students with appropriate credentials should apply directly to the specific department or consult the College of Education advisor in the appropriate field.

Traineeships in selected licensure/certification and master's degree programs are available to full-time special education students.

## **Teaching and Learning Courses**

### **Elementary Education**

#### **07E:021 Oral Interpretation**

3 s.h.

Communication studies majors may apply this course to the following area requirement. AREA: Practice. Requirements: (for 036:021) g.p.a. of at least 2.60 and 30 s.h. of credit. Same as 036:021.

#### **07E:050 Opportunities in Education**

2 s.h.

Introduction for underrepresented students to the teaching profession and its widely varied opportunities; faculty, students, recipients of awards in education; tours of Iowa City schools; reflection on and personal integration of class learning experiences, consideration of future plans.

#### **07E:090 Orientation to Elementary Education**

1-2 s.h.

Overview of elementary education expectations, including options for student teaching; classroom observation, lesson planning, performance indicators, INTASC standards, classroom management, information about mandatory child abuse reporting, blood-borne pathogens, professional ethics. Eight-week course.

#### **07E:100 Foundations of Education**

3 s.h.

Overview of American education, preschool through secondary; aims, history, philosophy of education; professional ethics, legal responsibilities; school curriculum, organization, finance, school law, political and social issues.

Requirements: admission to TEP.

#### **07E:102 Technology in the Classroom**

2-3 s.h.

#### **07E:104 Remedial Methods in Speech and Hearing**

2 s.h.

Emphasis on elementary grades; usually taken in conjunction with 07E:192, which provides approximately 70 hours of supervised clinical practice in elementary schools. Recommendations: primarily for communication sciences and disorders majors.

#### **07E:114 Parent-Child Relationships**

3 s.h.

Roles and relationships within and between families, culture, society; identify (family) resources and concerns based on children's development, abilities.

#### **07E:120 Methods and Materials: Music for the Classroom Teacher**

2 s.h.

Development of music skills, techniques, knowledge of methods and materials for teaching music to young children; for elementary education majors. Requirements: admission to TEP.

#### **07E:122 Methods and Materials: Art for the Classroom Teacher**

2 s.h.

Projects, techniques, processes in art for elementary majors; combination lecture and studio; painting, drawing, printmaking, sculpture, and crafts with materials and tools commonly available in the elementary schools.

Requirements: admission to TEP. Same as 01E:195.

#### **07E:123 Reading and Responding to Children's Literature**

2-3 s.h.

Reading and teaching children's literature in elementary classrooms for aesthetic, personal, social, and critical purposes; readings from a wide range of genres; approaches to teaching children's literature; recent trends and issues. Requirements: admission to elementary TEP.

**07E:124 Differentiating Projects with Technology** 1 s.h.

Use of digital tools to enrich student presentations; PowerPoint slide shows, presentations uploaded to World Wide Web, interactive multimedia presentations via HyperStudio.

**07E:126 Reading for High-Ability Students** 1 s.h.

Purposes and methods of reading instruction, with focus on developmentally appropriate needs of high-ability readers; genres of literature, enriched and accelerated reading curricula, role of reading in social and emotional development of gifted students.

**07E:127 Physical Education and Health for Elementary Teachers** 2-3 s.h.

Methods, curriculum. Requirements: admission to TEP.

**07E:128 Differentiating through Advanced Technology** 1 s.h.

Multimedia and web-based tools and utilities that enrich classroom learning and facilitate presentations made by technologically advanced students; production and editing of digital video, computer graphics, advanced web-publishing and communication techniques; skill development.

**07E:129 Developing Leadership Skills for Gifted and Talented Students, K-12** 1 s.h.

**07E:130 Adaptive Physical Education for the Elementary Classroom Teacher** 2 s.h.

Create and deliver quality, inclusive physical education for students with mental, physical, or emotional disabilities; identify and evaluate the needs of disabled students, plan units and lessons with appropriate modifications for all learners, write an IEP, comply with IDEA in a physical education setting.

**07E:143 Composing Art Workshops** 3-4 s.h.

Application of studio methods to teaching children in Saturday Children's Art Class Program. Prerequisites: 01E:196. Same as 01E:143.

**07E:145 Methods and Materials: General Music** 3 s.h.

Methods for teaching general music in elementary and secondary schools. Prerequisites: 07E:102 or 07S:102, 07S:190, and 07S:096.

**07E:160 Methods: Elementary School Language Arts** 3 s.h.

Theoretical foundations and practical skills for designing and implementing effective language arts instruction and assessment, grades K-6. Corequisites: 07E:164. Requirements: admission to elementary TEP.

**07E:161 Methods: Elementary School Social Studies** 2-3 s.h.

Objectives and content for grades K-6; integrated approaches, community-based learning. Requirements: admission to elementary TEP.

**07E:162 Methods: Elementary School Science** 2-3 s.h.

Principles and concepts of science instruction in elementary school for preservice instruction of elementary education majors; emphasis on techniques that characterize new approaches to science. Requirements: admission to elementary TEP.

**07E:163 Methods: Elementary School Mathematics** 2-3 s.h.

Content; techniques of teaching and means of assessment for K-6 mathematics. Requirements: admission to TEP.

**07E:164 Methods: Elementary School Reading** 3 s.h.

Theoretical foundations and practical skills for designing and implementing effective reading instruction and assessment, grades K-6. Requirements: admission to elementary TEP. Corequisites: 07E:160.

**07E:165 Social Studies for High-Ability Learners** 1-2 s.h.

Intersection of unique challenges presented by talented students and the challenges of designing, implementing, and assessing quality inquiry-based social studies instruction; background in social studies or social studies education not required.

**07E:166 Curriculum Concepts in Gifted Education** 3 s.h.

Analyzing and refining understanding of curriculum in context of: the needs of gifted and talented students, rationale for and implementation of curriculum differentiation, and curriculum principles for and applications to the gifted and talented; designed for pre-service and in-service educators, as well as those interested in curriculum development, design, and delivery.

**07E:170 Elementary Classroom Management** 1-3 s.h.

Activities, techniques, strategies, theories related to effective classroom management. Repeatable. Corequisites: 07E:172 or 07E:174.

**07E:171 Reading and Writing: Processes and Instruction** 3 s.h.

Factors that contribute to individuals' ease or difficulty in learning to read and write; issues, techniques in classroom literacy instruction and assessment. Requirements: 07E:160 and 07E:164 for elementary education majors.

**07E:172 Reading Instruction: Teaching Practicum** 3-4 s.h.

Experience in conducting reading instruction for children; four schoolroom sessions and one on-campus meeting weekly. Prerequisites: 07E:123, 07E:160, and 07E:164. Corequisites: 07E:170 and 07E:171.

**07E:174 Elementary Education: Practicum** arr.

Experience conducting instruction for children; four schoolroom sessions and one on-campus meeting weekly. Corequisites: 07E:170. Requirements: completion of appropriate area of specialization methods block.

**07E:176 Teaching Elementary School Science** 3 s.h.

Advanced science methods for elementary education majors seeking a science specialization. Prerequisites: 07E:162.

**07E:180 Drama in the Classroom** 3 s.h.

Theories of community, culture, identity in relation to language arts teaching and learning; emphasis on incorporating multiple literacies, both oral and print, into language arts curricula; action research involving oral literacy. Same as 049:101.

**07E:181 ePortfolio Production** 1-2 s.h.

Experience producing an ePortfolio and uploading it to the Internet; practical experience using digital tools, content and design related to ePortfolio production; experience using a web browser and access to the Internet and to a digital camera or scanner. Requirements: able to perform basic computer functions and use a World Wide Web browser. Same as 07C:181, 07P:181, 07X:181.

**07E:190 Supervised Teaching in the Elementary School: Interactive Phase** arr.

Student teaching at the elementary level (K-9). Corequisites: 07E:191. Requirements: application to the Office of Teacher Education and Student Services.

**07E:191 Supervised Teaching in the Elementary School: Pre- and Post-Active Phase** arr.

Corequisites: 07E:190. Requirements: application to the Office of Teacher Education and Student Services.

**07E:192 Special Area Student Teaching** arr.

Supervised teaching and observation in specific areas of elementary curriculum (see ISIS for areas offered).

**07E:193 Independent Study** arr.

Requirements: senior standing.

**07E:196 Topics in Teaching and Learning** arr.

Repeatable.

**07E:197 Supervised Teaching Early Childhood Center: Interactive Phase** arr.

Student teaching in prekindergarten early childhood centers. Corequisites: 07E:198. Requirements: application to the Office of Teacher Education and Student Services.

**07E:198 Supervised Teaching Pre- and Post-Active Phase**

arr.

Corequisites: 07E:197. Requirements: application to the Office of Teacher Education and Student Services.

**07E:204 Literature for Children II**

3 s.h.

Current theory, research, and practice in reading and responding to children's literature; genre and topic vary. Same as 08P:204.

**07E:234 Foundations of Mathematics Education**

2-3 s.h.

History of U.S. mathematics education; learning theory applied to teaching, learning mathematics; curriculum design; curriculum/standards and achievement patterns in the United States and other countries; equity; research literature.

**07E:264 Early Literacy Development and Instruction**

2-3 s.h.

Understanding of early reading and writing experiences; relationship of reading to other communication areas; knowledge of instructional approaches, techniques, materials, assessment procedures; interrelationship of home and school experiences; identification of current issues and relevant research.

**07E:265 Reading and Writing Across Intermediate Grades**

3 s.h.

Issues in teaching, learning, and assessment of students grades 4-9; fostering positive literate identities, literacy engagement, strategies for reading, writing, and critically responding to texts in a range of genres and formats and across content areas.

**07E:267 Inquiry-Based Curriculum Development in Early Childhood and Elementary Classrooms**

3 s.h.

Theoretical and practical organization of developmentally appropriate curricula and teaching methods to promote learning.

**07E:271 Advanced Reading Clinic Techniques**

2-3 s.h.

Instructional procedures for children and early adolescents with severe learning problems in reading; causes of reading disorders; educational prognosis for severely disabled readers. Corequisites: 07E:272.

**07E:272 Advanced Reading Clinic Practicum**

2-3 s.h.

Practice in selecting and using instructional procedures that address the needs and interests of struggling literacy learners, with emphasis on teaching to students' strengths; how to fit clinical teaching techniques into an overall literacy instructional program. Corequisite: 07E:271.

**07E:273 Reading Recovery I**

2-3 s.h.

**07E:274 Reading Recovery II**

2-3 s.h.

Training for teachers; tutoring of first-grade children; effective moment-by-moment instructional decision making.

**07E:275 Reading Recovery Assessment Training**

2-3 s.h.

How to administer and analyze Marie Clay's Observation Survey; includes administration of the assessment to at least two first-grade children.

**07E:293 Individual Instruction**

arr.

**07E:300 Design and Organization of Curriculum**

3 s.h.

Major issues, modern selection, sequential arrangement, organization of content; relationship of time allotments to implementation; utilization of instructional equipment; appraisal procedures; staff participation in curriculum development.

**07E:304 Schooling in the United States**

3 s.h.

Governance, finance, and policy structures that have influenced teaching and learning in public schools.

**07E:308 Seminar: Research and Current Issues**

arr.

For a specific curricular area: review of the literature, critical analysis of reported research, study of current issues and problems (see ISIS for specific areas offered); topics vary. Repeatable.

**07E:340 Advanced Topics in Teaching and Learning**

arr.

Topics vary.

**07E:365 Reading Clinic: Supervision**

arr.

Supervised experience in guiding and improving teacher performance in clinical practicums.

**07E:391 Research Project**

arr.

Individual research projects in a specific curricular area; for advanced students. Repeatable.

**07E:392 Field Service Project**

arr.

Individual field service project in a specific curricular area; for advanced students. Repeatable.

**Secondary Education****07S:090 Introduction and Practicum: Art**

2-3 s.h.

Practice of learning from an experienced art teacher in an art classroom and setting; observations in an art classroom side-by-side with experience and insight gained through participating and teaching in the Saturday Art Workshop Program. Corequisites: 01E:196. Requirements: admission to TEP.

**07S:095 Introduction and Practicum: Mathematics**

3 s.h.

Experience designing and teaching lessons that have varying instructional intent and that use multiple instructional strategies; study and practice methods of managing the classroom learning environment; approximately 70 hours in cooperating schools, on-campus meetings. Requirements: admission to TEP.

**07S:096 Introduction and Practicum: Music**

2 s.h.

Experience observing and assisting music teachers and students in elementary or secondary schools; six hours per week in the school plus on-campus class meetings. Requirements: admission to TEP.

**07S:105 Methods of Art Education in Secondary Schools**

4 s.h.

Art education theory and methods at secondary levels; art curriculum, unit, and lesson planning; evaluation, motivation, instructional materials; observational techniques.

**07S:106 Foreign Language Education Practicum I**

3 s.h.

Skill development for teaching languages in the early grades; curriculum design, test creation, microteaching with inservice teachers. Prerequisites: 07S:110. Corequisites: 07S:116.

**07S:107 Foreign Language Education Practicum II**

3 s.h.

Practice in lesson design, classroom management techniques, evaluation skills during work with inservice foreign language teachers. Prerequisites: 07S:110. Corequisites: 07S:117.

**07S:110 Teaching K-12 Second Language Learners**

3 s.h.

Second language learning and teaching in the multicultural classroom; influence of school setting, societal context. Requirements: admission to TEP.

**07S:111 Introduction and Practicum: Secondary Social Studies**

2-3 s.h.

Experience observing and assisting social studies teachers and students in secondary schools; nine hours per week in the school plus on-campus class meetings. Requirements: admission to TEP.

**07S:112 Introduction to Museology**

3 s.h.

Overview of museum history, function, philosophy, collection and curatorial practices, governance and funding issues, exhibition evaluation, audience studies; American cultural institutions. GE: Humanities. Same as 024:102, 097:115, 113:103.

**07S:113 Methods: Secondary School Journalism**

3 s.h.

Methods and materials for teaching high school journalism; publication policies, staff organization, production schedules, technology, the Internet, and techniques for advising student publications; experience in simulated teaching situations. Offered fall semesters. Same as 019:101.

**07S:114 Introduction and Practicum: Secondary English**

3 s.h.

Experience observing and assisting English or speech teachers and students in secondary schools; 12 hours per week in the school plus on-campus class meetings.

**07S:115 Methods: Secondary English** 3 s.h.  
Organizational techniques, methods, materials for teaching high school English; experience in simulated teaching situations during laboratory sessions, integrated with lectures and discussions. Prerequisites: 07S:114. Same as 08P:190.

**07S:116 Learning to Teach Second Languages I** 3 s.h.  
Approaches, methods, and techniques of teaching the modalities of listening, speaking, reading, and writing in a second language. Corequisites: 07S:106 or 07S:118.

**07S:117 Learning to Teach Second Languages II** 3 s.h.  
Curriculum design, classroom management, student evaluation, technology, using context to teach culture in second languages. Prerequisites: 07S:110. Corequisites: 07S:107 or 07S:119.

**07S:118 ESL Practicum I** 3 s.h.  
Skill development for teaching English as a second language; curriculum design, test creation, microteaching with inservice teachers. Prerequisites: 07S:110. Corequisites: 07S:116.

**07S:119 ESL Practicum II** 3 s.h.  
Practice in lesson design, classroom management techniques, evaluation skills during work with inservice English as a second language teachers. Prerequisites: 07S:110. Corequisites: 07S:117.

**07S:121 Environmental Science for High Ability Students** 1 s.h.  
Environmental health research; principles of toxicology, process of environmental health risk assessment; experience collecting, organizing, and analyzing information.

**07S:122 Math Programming for High Ability Students** 1 s.h.  
Unique challenges and opportunities confronted by teachers of high-ability students; theory and practice, development of program outlines for implementation. Same as 07P:122.

**07S:125 Differentiated Instruction for the Gifted** 1 s.h.  
Program options for K-12 gifted students; student abilities and needs linked with various curriculums; case studies, school materials.

**07S:130 Workshop for Secondary School Journalism/Communication Teachers** 1-3 s.h.  
Workshops on journalism/mass media curriculum, audio/video production, photojournalism, publication design, journalistic writing techniques, advising student publications. Same as 019:102.

**07S:132 Middle School Curriculum and Methods** 3 s.h.  
Junior high and middle school development compared; characteristics of exemplary programs, disciplinary and interdisciplinary trends; variety of teaching methods (group and individual); hands-on activities. Requirements: admission to TEP.

**07S:134 Methods: Middle School Mathematics** 3 s.h.  
Subject matter content, teaching and assessment techniques for grades 5-9 math; how students learn mathematics; mathematics curricular planning for all students.

**07S:135 Methods: High School Mathematics** 3 s.h.  
Subject matter content, teaching and assessment techniques for grades 9-12 math; how students learn mathematics; mathematics curricular planning for all students. Prerequisites: 07S:095.

**07S:140 Band Methods and Materials** 3 s.h.  
High school and elementary school music methods required for teaching certificate; for instrumental music education majors. Same as 025:164.

**07S:143 Instrumental Techniques** 2 s.h.  
Repeatable. Same as 025:105.

- 07S:144 Psychology of Music** 2 s.h.  
Cognition of music, affective response, aesthetic response, musical ability.
- 07S:145 Instrumental Conducting** 3 s.h.  
Advanced skills for instrumental conducting, score analysis, rehearsal techniques, literature selection. Prerequisites: 025:107. Same as 025:108.
- 07S:147 Choral Methods** 3 s.h.  
Organization, implementation of effective choral music programs for all ages. Same as 025:109.
- 07S:148 Choral Conducting and Literature** 3 s.h.  
Advanced skills appropriate to choral conducting, analysis, literature selection studied and implemented to develop a secure approach to choral art; students preparing to teach in the elementary or secondary schools must register under 07S:148. Prerequisites: 07S:147 and 025:107. Same as 025:110.
- 07S:149 Introduction to Music Research** 2-3 s.h.  
Preparation for conducting research on music behavior.
- 07S:150 String Methods and Materials** 3 s.h.  
Methods for teaching bands in schools. Offered fall semesters. Same as 025:112.
- 07S:151 Science Teaching and Practice with Early Learners** 3 s.h.  
Introduction to students, schools, the purpose of schooling children in science, learning theories, science curricula, contemporary science education issues, effective science teaching.
- 07S:152 Methods of Teaching Science** 3 s.h.  
Developing, writing, and orally defending a robust research-based framework for teaching science that includes student goals, student actions, content, materials, activities, teaching behaviors and strategies, contemporary learning theories, self-evaluation. Prerequisites: 07S:151.
- 07S:153 Instructional Issues in Teaching Science** 3 s.h.  
Articulating, experiencing, practicing a research-based framework for teaching science in the real world of students, schools, teaching. Prerequisites: 07S:152. Corequisites: 07S:179.
- 07S:155 Approaches to Teaching Writing** 3 s.h.  
Theories, practices, strategies, and history of writing and teaching writing. English majors may apply this course to the following area and/or period requirement. PERIOD: 20th- and/or 21st-Century Literature. Same as 08N:141.
- 07S:160 Pre-Intern Fall** 4 s.h.  
First course in the Regents collaborative Iowa Teacher Intern License Pathway program. Requirements: admission to the ITILP program.
- 07S:161 Pre-Intern Spring** 4 s.h.  
Second course in the Regents collaborative Iowa Teacher Intern License Pathway program. Prerequisites: 07S:160.
- 07S:162 Pre-Intern Summer I** 4 s.h.  
Third course in the Regents collaborative Iowa Teacher Intern License Pathway program. Prerequisites: 07S:160 and 07S:161.
- 07S:163 Pre-Intern Summer II** 6 s.h.  
Fourth course in the Regents collaborative Iowa Teacher Intern License Pathway program. Prerequisites: 07S:160, 07S:161, and 07S:162.
- 07S:164 Intern Year** 3 s.h.  
Fifth course in the Regents collaborative Iowa Teacher Intern License Pathway program. Prerequisites: 07S:160, 07S:161, 07S:162, and 07S:163.
- 07S:170 Methods: Secondary Social Studies** 3 s.h.

Analysis of the teaching-learning process; organization of social studies content for teaching purposes; evaluation of learning procedures and new strategies; practicum work includes microteaching, computer-assisted modules, lesson plan development, writing test items.

**07S:171 Secondary Classroom Management** 2-3 s.h.

Characteristics of the classroom environment and their implications for organization and management; concepts and principles teachers can use when thinking about managerial tasks in the classroom; for prospective middle and secondary school teachers. Prerequisites: 07S:190. Requirements: admission to TEP.

**07S:172 Thinking Skills** 1 s.h.

Factors involved in teaching thinking skills as a total concept; the relationship of critical and creative thinking; review of published programs.

**07S:173 Programming/Curriculum for High Ability Students** 1 s.h.

Programming and curriculum for K-12 students identified as gifted or highly able; in-class differentiations, special projects for pull-out programs, facilitating research projects, mentoring in advanced programming.

**07S:174 Differentiation at the Secondary Level** 1 s.h.

Importance of differentiation for gifted learners in middle school and high school; differentiation through advanced placement programs as well as broader perspectives on differentiation; essentials for differentiation understood and applied to a lesson that will be implemented with students.

**07S:177 Summer Institute for Teachers and Lifelong Learners** 3 s.h.

Interdisciplinary global issues; intensive course for teachers and students. Same as 187:177.

**07S:178 Workshop in Teaching Communication and Forensics** arr.

Methods, materials, progression, evaluation in teaching and supervising students in courses and class activities; opportunities for observation, demonstration, practice in teaching theater, discussion and debate, individual speech, dramatic and forensic events. Prerequisites: 036:001, 036:005, 036:012 or 036:070, 036:017 or 036:030, and 036:074. Requirements: g.p.a. of at least 2.50, completion of Foundations of Communication requirement, and 6 s.h. of intermediate-level course work. Same as 036:105.

**07S:179 Secondary School Science Practicum** arr.

Supervised teaching experience in a single subject; secondary school setting.

**07S:180 Issues in Foreign Language Education** 3 s.h.

Theoretical perspectives of pivotal research issues at the forefront of foreign language education; systems available to foreign language professionals for disseminating research. Same as 164:170.

**07S:182 Language and Learning** 2-3 s.h.

How language reflects and constructs learners' identities and cultures; readings related to oral and written language, native and second language development, linguistic diversity; discussion of the relationship of language theory to schools of language instruction. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as 08P:182.

**07S:183 Second Language Classroom Learning** 3 s.h.

Synthesis of empirical findings on children's and adults' learning of a second or foreign language; emphasis on theoretical underpinnings of approaches, methods, techniques in language teaching. Same as 039:177, 164:171.

**07S:184 Reading in a Second Language** 3 s.h.

Current theory, research, practice in second language reading field; role of textual features and the reader in reading comprehension. Same as 164:172.

**07S:186 Curriculum Foundations** 2-3 s.h.

Elementary and secondary background developments in curriculum; definitions, historical perspective, philosophies, theories of knowledge, models, learning theories, directions of development and shaping forces; emphasis on development of a curriculum project. Same as 164:173.

**07S:187 Seminar: Curriculum and Student Teaching** 1-3 s.h.

Discussions, role-playing, group and individual reports, analysis of critical incidents, classroom management, videotapes of student classroom performance pertinent to participants' student teaching experiences. Requirements: student teaching.

**07S:189 Elementary School Special Subject Area Student Teaching** arr.  
Supervised teaching experience in a single subject in grades 1-6.

**07S:190 Orientation to Secondary Education** 0-1 s.h.  
Overview, including options for student teaching, classroom observation, lesson planning, classroom management, performance indicators, INTASC standards, blood borne pathogens, professional ethics.

**07S:191 Observation and Laboratory Practice in the Secondary School** arr.  
Student teaching experience in performing the duties of regular classroom teachers under supervision of experienced personnel in secondary schools.

**07S:192 Observation and Laboratory Practice in the Secondary School** arr.  
Continuation of 07S:191.

**07S:193 Reading and Teaching Adolescent Literature** 3 s.h.  
Reading and evaluation of literature suitable for junior and senior high school students. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. Same as 08P:198.

**07S:194 Methods: Secondary Reading** 2-3 s.h.  
Methods and materials used in teaching developmental reading in all junior and senior high school content areas. Prerequisites: 07S:114.

**07S:195 Teaching Reading in Secondary Content Areas** 1 s.h.  
Integration of reading strategies into secondary content areas for teacher candidates in secondary education.

**07S:197 Principles of Course Design for Second Language Instruction** 3 s.h.  
Contemporary views of second language curriculum design; guidelines necessary for the creation of prototypical curriculum units to be transposed into classroom-ready forms; for individuals interested in foreign language materials development. Same as 164:174.

**07S:198 Language Structure for Teaching English Language Learners** 3 s.h.  
Exploration of theory, rules, and examples to gain practical understanding of the system of language structure; focus on working with English language learners from a variety of first language backgrounds in educational settings; principles of discourse, phonology, morphology, syntax, pragmatics, and semantics that build a framework for discussion of applications and analysis of student and teacher language; address English language learners' development in P-12 settings; strategies to evaluate learner language; increase awareness of language challenges for English language learners that can occur in spoken and written educational instruction and materials. Requirements: admission to TEP.

**07S:200 Fundamentals of Second Language Assessment** 3 s.h.  
How to write language tests; discussion of fundamental issues in development of new tests or selection of existing tests. Same as 164:270.

**07S:201 Seminar: Current Topics in Music Education** 2-3 s.h.  
Major areas of professional and research interest. Repeatable.

**07S:202 Second Language Program Management** 3 s.h.  
Preparation for supervising, administering foreign language programs at all levels; for precollegiate language teachers and graduate students. Same as 164:271.

**07S:203 Second Language Planning in Education** 3 s.h.  
Sociology and politics of national policies involving language, internationally; development of a research-based policy perspective on language issues in the country in which the student intends to teach.

**07S:206 Foundations of Music Education Curricula** 3 s.h.

Curriculum development, instructional materials, analysis of current teaching methods and techniques in school music programs; historical foundations of music education.

**07S:207 Reading in Non-Roman Scripts** 3 s.h.

Theory and practice of reading in languages that use non-Roman alphabets, syllabary, logographic systems; reading in first and second language contexts; instructional and literacy development issues. Prerequisites: 07E:171 or 07P:270 or 07S:184. Same as 164:226.

**07S:208 Designing Materials for Second Language Instruction** 3 s.h.

Critical perspective on creating and using media for second language learning and teaching; research on materials design, development of media. Prerequisites: 07S:183. Same as 164:272.

**07S:209 Cultural Curriculum** 3 s.h.

Culture's role in foreign/second language teaching; definition, pedagogy, assessment, and materials that allow culture to be taught and learned. Same as 164:229.

**07S:210 International Programs Summer Institute for Teachers** 3 s.h.

What Iowans need to know about the rest of the world; professional development workshop for teachers. One week. Same as 187:210.

**07S:230 Workshop in School Mathematics** 1-3 s.h.

Recent developments in school mathematics teaching methods and curriculum relevant to a selected issue; one to three weeks of intensive examination, experience.

**07S:231 Technology in School Mathematics** 2-3 s.h.

Methods, materials, issues, pedagogy, assessment; use, evaluation of technology for mathematics teaching and learning; implications for organization, development of course content.

**07S:233 History and Foundations of Social Studies Education** 3 s.h.

Historical, philosophical, social foundations of social studies education; recent debates over content and instructional processes; student research proposals.

**07S:235 Current Issues in Mathematics Education** 1-3 s.h.

Recent curriculum developments, experimental programs, research relevant to classroom instruction, trends in education that may have a significant impact on mathematics programs. Same as 22M:195.

**07S:236 Teaching of Geometry** 2-3 s.h.

Current developments in teaching middle school/junior high and high school geometry; selection, organization of content; research on teaching and learning.

**07S:239 Teaching of Algebra** 2-3 s.h.

Current developments in curriculum and instructional methods in secondary school algebra; classroom use of the history of algebra, use of technologies, implications of current research for the algebra classroom.

**07S:241 Music Education Workshop** 1 s.h.

For inservice music teachers; topics vary. Same as 025:220.

**07S:244 Individual Projects in Music Education** 1-2 s.h.

Projects of special concern to individual music teachers in the public schools.

**07S:250 Assessment in Teaching and Research** 3 s.h.

Formative assessment as a tool for teaching and learning; principles and practices; evaluation of tools for assessing learning/achievement.

**07S:252 Designing Strategies for Science Instruction** 1-4 s.h.

Strategies and instructional models characterizing science instruction at the elementary, secondary, college levels. Offered spring semesters and summer sessions.

**07S:255 Practices of Inquiry in Science Learning Environments** 3 s.h.

Contemporary perspectives on inquiry-based science teaching and learning, implications for theory and research; readings, discussions, presentations, and writing to examine and build upon policy-level science education reform discourse, sociological and organizational theory, empirical research in science education.

- 07S:256 Science Education: The Nature of Science** 3 s.h.  
Relationship between scientists' work and current theoretical and practical portrayals of the nature of science in K-16 education.
- 07S:257 Learning in the Science Classroom** 2-3 s.h.  
Assumptions about learning and about learning theories and their impact on pedagogical actions; how some concepts are planned and implemented.
- 07S:258 Writing in the Science Classroom** 3 s.h.  
Literacy in the science classroom; theoretical and pedagogical perspectives; practical classroom activities that lead to effective writing and increased learning.
- 07S:259 Advanced Pedagogy** 3 s.h.  
Theoretical and practical perspectives on pedagogy; how to assess practice, provide feedback, and build learning pathways for teachers.
- 07S:260 Restructuring Science Courses** 2-3 s.h.  
Constructivist learning model applied to existing science courses; emphasis on student-centeredness. Repeatable.
- 07S:277 Seminar: Social Studies Education** arr.  
Periodical literature, trends, curricular developments, research in various aspects of social studies education; for master's and doctoral candidates in social studies education.
- 07S:279 Advanced Research in Music Education** 3 s.h.  
Design, performance, analysis, and reporting of music research.
- 07S:280 Workshop: Teacher Training for Advanced Placement Courses** 1-2 s.h.  
Focus on a particular academic content area.
- 07S:306 Proposal Writing for Second Language Research** 3 s.h.  
Procedures and techniques for writing research proposals at the doctoral level; written research proposal dealing with a question in second language teaching and learning.
- 07S:310 Mixed Methods Research** 3 s.h.  
Introduction to mixed methods research in education; knowledge and skills necessary to conduct mixed methods study; history and language of mixed methods research; identify and process arguments for and against mixed methods research; extend understanding of research in education; develop an understanding of how to assess the strengths and weaknesses of published mixed methods studies; investigate one or more mixed methods research designs in depth; application of mixed methods research design to a research proposal. Prerequisites: 07X:150. Requirements: formal introduction to both quantitative and qualitative research methods, and familiarity with basic steps of the research process. Recommendations: direct experience conducting research studies is not required.
- 07S:315 M.A. Seminar: English Education** arr.  
Significant developments in English education; primary and collateral readings. Same as 08P:405.
- 07S:333 Seminar on Teacher Education** 3 s.h.  
History, structure, and politics of teacher education; current practice and agendas for reform; new developments in teacher assessment.
- 07S:335 Seminar: Research in Mathematics Education** arr.  
Analysis of current research, research methodology, curriculum developments in mathematics education; topics vary. Repeatable. Requirements: Ph.D. standing.
- 07S:341 Infusing a Global Perspective into the Curriculum** 3 s.h.

Rationales, conceptualizations, and themes in global perspectives in education, implications for curriculum change; elements of perspective consciousness, cultural universals, cultural diversity, cross-cultural awareness, global systems, global history, global issues; application and evaluation of ideas within fields of study and varied teaching situations.

- 07S:350 Seminar: Science Education** 0-2 s.h.  
Discussion of completed faculty and doctoral candidates' research, national issues, program features.
- 07S:355 Research in Science Education** 2-3 s.h.
- 07S:367 Seminar: Current Issues in Art Education** 3-4 s.h.  
Analysis of literature in art education and related disciplines. Repeatable. Same as 01E:367.
- 07S:370 Introduction to Qualitative Methods in Literacy Research** 3 s.h.  
Conceptual and practical exploration of qualitative research design methods, including data collection, analysis, and reporting; understanding proposal writing. Same as 08P:300.
- 07S:371 Critical Discourse Analysis in Educational Research** 3 s.h.  
Critical discourse analysis (CDA) as theory and method; social and power relations, identities, and knowledge through written, visual, and spoken texts in social settings, such as schools, families, communities; theoretical and methodological traditions of CDA in educational research; critical approaches to analyzing spoken, written, and visual texts. Prerequisites: 07B:373 or 07C:338 or 07P:331 or 07S:370.
- 07S:372 Advanced Methods of Literacy Research: Qualitative Data Analysis and Reporting** 3 s.h.  
Advanced course in traditional and contemporary qualitative data analysis methods and varied forms of reporting to understand, critique, and conduct research about literacy learning and teaching. Prerequisites: 07B:373 or 07C:338 or 07P:331 or 07S:370.
- 07S:373 Ethnographic Methods, Theories, and Texts** 3 s.h.  
Practical and theoretical background for conducting ethnographic field studies in literacy, schooling, language, or a field of student's choice; methods, methodologies, and perspectives from anthropology, sociology, folklore, journalism, literary criticism, cultural, critical, and composition theory; read historical and contemporary ethnography, consider ethnographic forms of expression (films, graphics, fiction, poems); roles, responsibilities, and ethics of writer, reader, viewer, and informant; tools, methods, and writer's techniques to develop an ethnographic portfolio. Prerequisites: 07B:373 or 07C:338 or 07P:331 or 07S:370.
- 07S:384 Teaching and Learning in Higher Education** 3 s.h.  
Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as 07B:385, 07C:385, 07P:385, 650:385.
- 07S:385 Practicum in College Teaching** arr.
- 07S:393 Master's Thesis** arr.
- 07S:406 Research in the Arts and Humanities** arr.  
Individual research under supervision; applicable to thesis preparation, doctoral prospectus development. Repeatable. Same as 01E:406.
- 07S:407 Research: Science Education** arr.  
Planning of individual research projects by M.S. and Ph.D. students.
- 07S:415 Ph.D. Seminar in Language, Literacy, and Culture** arr.  
Historical, recent research and theory in literacy education; topics vary. Same as 08P:425.
- 07S:451 Advanced Qualitative Data Analysis** 3 s.h.  
Varied approaches to qualitative data analysis and philosophical foundations; analysis and interpretation of qualitative data; writing qualitative research findings. Prerequisites: 07B:373 or 07C:338 or 07P:331 or 07S:370.
- 07S:493 Ph.D. Thesis** arr.

## Special Education

Courses at the 100 level are open to students in education and related disciplines.

### **07U:100 Foundations of Special Education** 3 s.h.

Students with disabilities, gifted and talented; strategies for effective treatment, collaboration between regular and special education teachers; remediation of academic, behavioral, social problems. Requirements: admission to TEP.

### **07U:101 Methods: Child/Adolescents with LD and BD** 3 s.h.

Strategies for effectively teaching elementary and secondary students with learning disabilities and behavioral disorders; emphasis is on practical, empirically verified techniques. Requirements: admission to TEP.

### **07U:110 Teaching Deaf and Hard of Hearing Students** 3-4 s.h.

Issues in deaf education--management techniques, communication strategies, teaching strategies, instructional materials, hands-on activities, assessments, parent involvement; use of technology, ethnic and cultural diversity, classroom management, pre-reading techniques, literacy development, educational program options. Taught in American Sign Language. Corequisites: 158:014, if not taken as a prerequisite. Same as 158:110.

### **07U:115 Introduction: Strategist I (Elementary)** 1-2 s.h.

Teaching students with mild disabilities in elementary resource placements; current trends and issues, basic and theoretical approaches, implications of federal and state statutes, multidisciplinary team approaches to providing appropriate educational programming; students complete a practicum with an elementary special education teacher. Corequisites: 07U:116. Requirements: admission to TEP.

### **07U:116 Methods: Strategist I (Elementary)** 3 s.h.

Methods and materials for students with mild to moderate disabilities in elementary resource placements; effective school collaboration; empirically validated strategies. Corequisites: 07U:115. Requirements: admission to TEP.

### **07U:121 Transition and Related Issues** 3 s.h.

Curriculums, programs, and delivery systems that help persons with disabilities move from preschool to elementary, elementary to middle school, middle school to high school, and to postsecondary life; emphasis on ecological and task analysis, transition planning strategies, interagency collaboration, self-determination, access to resources and support services.

### **07U:122 Supervised Teaching: Elementary Strategist I** 7 s.h.

Student teaching at the elementary level in a program for students with mild to moderate disabilities. Requirements: elementary education major.

### **07U:133 The Culturally Different in Diverse Settings** 3 s.h.

Diversity in society; laws--past and present, experiences, incidents, how they affect society.

### **07U:134 Parent-Teacher Communication** 1-3 s.h.

Realities of working with parents; interpersonal skills; options for parent support services. Same as 07P:134.

### **07U:136 Home/School/Community Partnerships** 3 s.h.

Issues related to collaboration among families, educators, community members in implementing school programs. Same as 07P:136.

### **07U:137 Introduction to Educating Gifted Students** 3 s.h.

Fundamental issues such as curriculum, counseling, family issues, gender and minority issues. Same as 07C:137.

### **07U:138 Assessment of Learning Problems** 3 s.h.

Effective use of varied formal and informal assessment techniques for students with learning and behavior problems; techniques that inform teaching decisions. Requirements: admission to TEP and Elementary Strategist I program.

### **07U:140 Characteristics of Disabilities** 3 s.h.

Etiologies of mild/moderate disabilities; current educational trends; educational alternatives; importance of multidisciplinary team; psychological and social-emotional characteristics of individuals.

- 07U:150 Behavioral and Social Interventions** 3 s.h.  
Individual behavioral management, behavioral change strategies, and social interaction strategies, methods, and techniques for individuals with exceptional learning needs.
- 07U:182 Instructional Decision Making in Education** 3 s.h.  
Overview of and practical application with curriculum-based procedures for assessment and evaluation; classroom-based measures to make educational decisions for instruction of students, particularly those experiencing academic difficulty.
- 07U:183 Academic and Behavioral Strategies for Students with Learning Disabilities and Behavioral Disorders** 3 s.h.  
Merge theory and practices for assessing, planning interventions, delivering instruction, and monitoring progress for individuals who have learning disabilities and emotional/behavioral disorders.
- 07U:184 Academic Skills for Students with Special Needs** 3 s.h.  
Introduction to appropriate methodology for teaching academic skills to students with significant learning difficulties; how to teach students effectively regardless of the label that might be applied to them or the setting to which they might be assigned; effective application of classroom-based measurement, curriculum development, and instructional strategies for teaching academic skills to education students with special needs.
- 07U:187 Introduction to Assistive Technology** 3 s.h.  
How assistive technology can be used for attainment of goals in education or work. Same as 07C:187.
- 07U:188 Practicum in Teaching and Curriculum Development in Gifted Education** 1-6 s.h.  
Experience in developing course materials for classes offered through the Belin-Blank Center for Gifted Education. Same as 07C:188.
- 07U:190 Interdisciplinary Issues in Disabilities** 1-3 s.h.  
Critical issues related to interdisciplinary delivery of services to persons with developmental disabilities; observation and participation in staffing and consultation; opportunity for related community experiences.
- 07U:201 Strategist II Methods--Elementary** 3-4 s.h.  
Methods and materials; strategies for assessing behavior, academic achievement, social skills; instructional resources; consultation with parents and peers; collaboration strategies; empirically validated strategies. Prerequisites: 07U:138 or 07U:238.
- 07U:203 Strategist II Methods--Secondary** 3-4 s.h.  
Methods, materials, accommodations; practical skills for working in school/community settings; academic, affective, behavioral assessment; communication skills, management strategies, innovative program models, transition and career education planning; empirically validated strategies. Prerequisites: 07U:138 or 07U:238.
- 07U:206 Practicum with Exceptional Persons** arr.  
Practicum experience with students with disabilities; experiences differ depending upon student's program of study.
- 07U:209 Seminar: Graduate Supervised Teaching** 1 s.h.  
For students enrolled in graduate student teaching practicum. Requirements: special education major.
- 07U:231 Strategist I Methods** 4 s.h.  
Methods and strategies K-12 that include models for providing curricular and instructional methodologies used in educating mildly and moderately disabled, collaboration and consultation models; empirically validated strategies.
- 07U:236 Administration of Students with Special Needs** 3 s.h.  
Foundation for and skill practice in tasks performed by directors of special education and others administering to needs of special education students, and economically and socially deprived students; for prospective school administrative personnel. Same as 07B:236.
- 07U:250 Strategist I Student Teaching: Elementary** arr.  
Student teaching in an elementary mild and moderate special education program.

**07U:251 Strategist I Student Teaching: Secondary**

arr.

Student teaching in a secondary mild and moderate special education program.

**07U:252 Seminar: Behavioral Assessment and Evaluation**

3 s.h.

Broadens skills of graduate students who engage in research with exceptional persons; research designs are usually taught in the Department of Psychological and Quantitative Foundations, but because of the nature of handicapping conditions and the low incidence of some handicaps, the single-subject design yields better research information. Same as 07P:352.

**07U:253 Strategist II Student Teaching: Elementary**

arr.

Student teaching in K-8 learning disabilities or behavior disorders.

**07U:254 Strategist II Student Teaching: Secondary**

arr.

Student teaching in secondary learning disabilities or behavior disorders.

**07U:275 Explicit Instruction**

3 s.h.

Empirically supported methods for teaching reading and mathematics K-12 to students with mild-moderate disabilities; assessment and curricular adaptations to individual needs.

**07U:343 Proseminar: Issues, Trends, and Research in Special Education**

2-3 s.h.

Conceptual and practical development of research across special education and related disciplines; empirical review of the literature; focus on professional writing skills.

**07U:344 Proseminar: Issues, Trends, and Research in Special Education II**

2-3 s.h.

Recent research from a variety of special education areas reviewed by students; simulated comprehensive examinations. Prerequisites: 07U:343.

**07U:345 Current Issues and Trends in Learning Disabilities**

3 s.h.

Readings and discussions of current issues and trends in learning disabilities (e.g., definition, prevalence, interventions, subtyping, assessment).

**07U:348 Contemporary Research in Behavioral Disorders**

3 s.h.

In-depth analysis of current research in behavioral disorders; emphasis on evaluating its methodology and contribution to the field.

**07U:353 Seminar: Single Subject Design Research**

3 s.h.

Reviews of single subject research, development of student proposals; focus on special education, applied research.

**07U:355 Seminar: Transition**

3 s.h.

History, legal mandates, and practice of assisting persons with disabilities through the varied transitions of life.

**07U:392 Field Service Project in Special Education Internship**

arr.

Part-time or full-time experience as an intern in school districts or area education agencies; develops skills in supervision and administration of special education.

# College of Engineering

**Dean:** P. Barry Butler

**Associate dean, research and graduate studies:** Gregory R. Carmichael

**Associate dean, academic programs:** Alec B. Scranton

**Director, Center for Bioinformatics and Computational Biology:** Tom Casavant

**Director, Center for Computer-Aided Design:** Karim Abdel-Malek

**Co-director, Iowa Institute for Biomedical Imaging:** Milan Sonka

**Director, IIHR—Hydrosciences & Engineering:** Larry Weber

**Degrees:** B.S.E., M.S., Ph.D.

**Web site:** <http://www.engineering.uiowa.edu>

Engineering is defined by the Accreditation Board for Engineering and Technology as that profession in which knowledge of the mathematical and natural sciences gained by study, experience, and practice is applied with judgment to develop ways to use, economically, the materials and forces of nature for the benefit of mankind.

In short, engineering is the application of science and mathematics to solve problems for society.

The major aim of engineering is the creation of a new process, product, material, or system. This activity demands a high degree of creativity and problem solving ability coupled with a full understanding of engineering fundamentals, good judgment, and a practical sense of economics.

The College of Engineering prepares men and women for one or more of the many career opportunities in the engineering profession. Such opportunities include positions in design, production, development, research, management, and consulting. Engineers are employed in industrial organizations, governmental agencies, and private practice.

The College of Engineering's mission is to develop, disseminate, transfer, and preserve technical knowledge that improves people's lives. The college endeavors to:

- provide a well-rounded and superior engineering education that draws upon resources of a comprehensive research university to attract outstanding undergraduate and graduate students in selected engineering fields;
- conduct high-quality research in selected areas, enabling faculty members and students to keep pace with new developments and ensuring that the newest concepts are taught in its courses; and
- serve the needs of the University, industry, government, and the general populace by making its facilities and faculty expertise accessible.

## College Organization

The College of Engineering has five departments and four research units. The Department of Biomedical Engineering, Department of Chemical and Biochemical Engineering, Department of Civil and Environmental Engineering, Department of Electrical and Computer Engineering, and Department of Mechanical and Industrial Engineering offer a total of six undergraduate programs and many graduate programs.

The research units are the Center for Bioinformatics and Computational Biology, the Center for Computer-Aided Design, the Iowa Institute for Biomedical Imaging, and IIHR—Hydroscience & Engineering.

## Inclusion at the College of Engineering

The College of Engineering works to be a national leader in including women and men from all races and ethnic groups in its student body and in providing a model for other institutions that are interested in strengthening inclusion of all peoples in engineering. To these ends, it has developed a program that supports inclusion efforts such as outreach to K–12 students in the Midwest, mentoring of undergraduate and graduate students, and recruitment of faculty members. The program enjoys the support of several international engineering and manufacturing firms. Learn more at the Ethnic Inclusion Effort for Iowa Engineering web site.

## Undergraduate Programs

The College of Engineering offers the Bachelor of Science in Engineering (B.S.E.) in six major fields: biomedical engineering, chemical engineering, civil engineering, electrical engineering, industrial engineering, and mechanical engineering. The undergraduate programs are designed to attract the best and brightest students and prepare them to be engineers who will succeed in a workplace filled with diverse people, attitudes, and ideas; to compete in the global marketplace; to work effectively in multidisciplinary teams; and to confidently understand, use, and develop modern technology.

All six B.S.E. programs are accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology. Each has its own set of articulated educational objectives, and all are designed to ensure that graduates possess the following general attributes:

- ability to apply knowledge of mathematics, science, and engineering;

- ability to design and conduct experiments as well as to analyze and interpret data;
- ability to design a system, component, or process to meet desired needs;
- ability to function on multidisciplinary teams;
- ability to identify, formulate, and solve engineering problems;
- understanding of professional and ethical responsibility;
- ability to communicate effectively in oral, written, and graphical forms;
- broad education necessary to understand the impact of engineering solutions in a global and societal context;
- recognition of the need to engage in lifelong learning and the ability to do so;
- knowledge of contemporary issues; and
- ability to use the techniques, skills, and modern engineering tools necessary for successful engineering practice.

The University of Iowa B.S.E. programs distinguish the College of Engineering from other engineering colleges in the region. They draw on the University's recognized strengths to offer unique opportunities for students who wish to pursue a wide range of career options and an education that goes beyond technology.

Each program emphasizes a broad understanding of fundamental principles common to all engineering disciplines and provides students with the opportunity to specialize in a selected engineering discipline. All build on the University's research strengths. Program flexibility is provided by a curriculum in which each student develops engineering competency within a particular academic program and complements it with a tailored thematic option in support of chosen career objectives (e.g., engineering practice, project management, research and development).

### **Joint Degrees, Minors, Certificates**

All of the college's B.S.E. programs may be combined with a second B.S.E., a Bachelor of Business Administration (B.B.A.) in the Tippie College of Business, or a bachelor's degree in the College of Liberal Arts and Sciences; see "Joint and Dual Degrees" later in this section, and contact the Student Development Center for details.

The College of Engineering and the University of Northern Iowa offer a dual degree program in which students earn a B.S. in applied physics from UNI and a B.S.E. from The University of Iowa. The college also offers a joint bachelor's/master's degree with the University's Urban and Regional Planning Program. See "Joint and Dual Degrees" later in this section.

B.S.E. students in each College of Engineering program may be eligible to enroll in a joint Bachelor of Science in Engineering/Master of Science program, which allows them to begin working on the master's degree while they are completing the B.S.E.; see "Joint B.S.E./M.S." in each College of Engineering department section of the Catalog.

Engineering students may earn a minor in the Tippie College of Business or in the College of Liberal Arts and Sciences; see "Minors" later in this section. Students also may pursue certificates in international business, sustainability, and technological entrepreneurship; see "Certificates" later in this section.

### **Bachelor of Science in Engineering**

The Bachelor of Science in Engineering (B.S.E.) requires a minimum of 128 s.h. Students must be enrolled in the College of Engineering for at least the last 30 s.h. of work toward the degree, or 45 of the last 60 s.h., or a total of 90 s.h. They must have a g.p.a. of at least 2.00 on all college work used to satisfy degree requirements as well as on all work undertaken at The University of Iowa. All students must complete 22M:031 Engineering Mathematics I: Single Variable Calculus and 22M:032 Engineering Mathematics II: Multivariable Calculus, or their equivalents, with a grade of C-minus or higher in each course.

The faculty of each engineering program has established a curriculum--a set of required and elective courses that must be completed satisfactorily as part of the requirements for a B.S.E. in that program. The purpose of each program's curriculum is to prepare students for the practice of engineering in that program. General guidelines for establishing course requirements in each program are provided by the national accrediting body, the Accreditation Board for Engineering and Technology (ABET).

Each B.S.E. student also must satisfy the requirements of his or her specific program, as described in the Catalog's College of Engineering department sections: Biomedical Engineering, Chemical and Biochemical Engineering, Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Industrial Engineering.

### **Curriculum Stems**

The curriculum for each program is divided into four major curriculum stems: mathematics and basic sciences; engineering topics; elective focus area; and general education (humanities and social sciences). In addition to the four major stems, there are a few general background courses that fall outside of the stems. Students take these courses during the first year. They include 059:005 Engineering Problem Solving I and 059:006 Engineering Problem Solving II and 010:003 Rhetoric, which is a first-year course in writing, speaking, and critical reading. Engineering Problem Solving I-II covers a breadth of topics from engineering as a profession to team design projects to engineering computations and computer programming.

All of the courses in the curriculum stems are integrated and sequenced to help students understand the interrelationships and importance of each stem.

### **MATHEMATICS AND BASIC SCIENCES**

The mathematics and basic sciences stem provides the foundation upon which the engineering courses in each engineering program are based. This stem includes a minimum of five courses in mathematics and statistics and one each in chemistry and physics. The faculty of each engineering program has specified at least one additional chemistry or physics course and other additional mathematics or science courses beyond these minimum requirements to provide a base appropriate for the program's major.

### **ENGINEERING TOPICS**

The second curriculum stem, engineering topics (science and design), builds upon the math and science stem, providing a bridge from fundamental principles to applications and creative practice.

The engineering science courses use the underlying principles learned in the mathematics and basic science courses to understand and predict the behavior of idealized models of real components or systems encountered in engineering. These courses include fundamentals of statics, thermodynamics, and electrical circuits, as well as other engineering courses relevant to each major.

Engineering design is the process of devising a system, component, or process to meet desired needs. It is a decision-making process, often iterative, in which the basic sciences, mathematics, and engineering sciences are applied optimally to convert resources to meet a stated objective. The design process includes the establishment of objectives and criteria, synthesis, analysis, construction, testing, and evaluation. Essential to the design process is the inclusion of realistic constraints such as economic factors, safety, reliability, aesthetics, ethics, and social and environmental impact.

### **ELECTIVE FOCUS AREA**

In each undergraduate program, a pool of semester hours is set aside to enable students to build strength in a technical focus area, pursue a formal minor, earn a multidisciplinary certificate, or pursue a tailored program of study. Each program has its own set of guidelines and constraints for the elective focus area. See "Elective Focus Area" below.

### **GENERAL EDUCATION COMPONENT**

The fourth stem involves general education course work in the humanities and social sciences. This stem promotes understanding of and appreciation for society and culture. See "General Education Component" below.

### **First and Second Years**

Approximately one-third of the course requirements in each engineering program are common to all engineering majors. These common course requirements constitute a core program. Students take most of the courses in the core program during the first and second years, along with a few program-specific courses. Hence, most students may postpone making a decision about which engineering major to pursue or may change their engineering major during their first three semesters with little or no loss of time or credit. The remaining curriculum for each engineering program is listed in the Catalog's College of Engineering department sections.

The first- and second-year courses common to all majors are listed below. Not all students complete all of these courses in the first three semesters. Students who do not follow this three-semester plan may encounter a delay in graduation because of scheduling problems for courses that require sequencing or that are offered only once a year.

#### **First Semester**

004:011 Principles of Chemistry I (all majors)	4 s.h.
010:003 Rhetoric (all majors)	4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus (all majors)	4 s.h.
059:005 Engineering Problem Solving I (all majors)	3 s.h.
059:090 Engineering Success Seminar for First-Year Students (all majors)	1 s.h.

#### **Second Semester**

004:012 Principles of Chemistry II (biomedical, chemical, and environmental majors)	4 s.h.
or	
General education component I (civil, electrical, industrial, and mechanical majors)	3 s.h.
22M:032 Engineering Mathematics II: Multivariable Calculus (all majors)	4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra (all majors)	2 s.h.
029:081 Introductory Physics I (all majors)	4 s.h.
059:006 Engineering Problem Solving II (all majors)	3 s.h.

### Third Semester

22M:034 Engineering Mathematics IV: Differential Equations (all majors)	3 s.h.
029:082 Introductory Physics II (biomedical, civil, electrical, industrial, and mechanical majors)	3-4 s.h.
or	
General education component I (optional, chemical and environmental majors)	3 s.h.
059:007 Engineering Fundamentals I: Statics	2 s.h.
059:008 Engineering Fundamentals II: Electrical Circuits	3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics	3 s.h.

Students are required to complete 010:003 Rhetoric to satisfy the rhetoric requirement.

Credit earned for courses below the level of the beginning courses specified in each engineering curriculum appears on a student's grade report and permanent record but is not used to satisfy any course requirements (including electives) for an engineering degree. Examples of courses in this category include 22M:009 Elementary Functions and 004:009 Supplemental Chemistry Lab.

### General Education Component

Students choose 15 s.h. of general education (humanities and social science) courses from approved department and college areas; at least 3 s.h. must be from the pool of courses that the College of Engineering has designated as humanities courses, and at least 3 s.h. must be from the pool of courses that the college has designated as social science courses. To ensure depth, at least 6 s.h. of general education credit should be earned in intermediate (100-level) courses. At least one of the 100-level courses should be taken in the same department as a lower-level course already completed. Humanities and social science subject areas are defined by the College of Engineering; they may not correspond to the same general education area definitions used by the College of Liberal Arts and Sciences. Individual engineering programs may require further depth in one area and may include one or more of the general education requirements as part of a student's elective focus area.

Courses that are primarily mathematical or scientific in nature and those designed specifically to develop art, music, or physical education skills are not accepted as social science or humanities electives.

Credit may be earned by examination; see "Undergraduate Academic Rules and Procedures"/"Academic Standards"/"Credit by Examination" later in this section.

Humanities and social science course work transferred to The University of Iowa by students with A.A. degrees who enter the College of Engineering directly from two-year schools is evaluated on the same basis as similar course work transferred by other students entering the college without a B.A. or B.S.

Students who enter the College of Engineering with a B.A. or B.S. are considered to have satisfied the general education (humanities and social science) requirement.

Students who enroll in a combined degree program in the College of Engineering and the College of Liberal Arts and Sciences or the Tippie College of Business are considered to have satisfied the College of Engineering's general education requirement once they have completed all requirements for the liberal arts and sciences or business degree.

For details, see General Education Component (GEC) on the college's web site.

### Elective Focus Area

Students choose elective focus area courses in two broad categories: traditional career goals and nontraditional career goals. Students choice of degree plan and courses may affect the number and type of employment opportunities available to them after graduation. Program advisors help students develop coherent, well-focused plans that fit their goals.

Students who pursue a well-defined plan may replace up to 21 s.h. of traditional technical electives with course work toward a minor or certificate. Or with an advisor's guidance, they may pursue a rigorous, well-focused, nontraditional program outside existing minor or certificate programs. Each College of Engineering undergraduate program is responsible for approving proposed plans of study, ensuring that the program's ABET accreditation criteria are met and that students' choices are consistent with their career aspirations and with the college's educational mission.

To pursue one of these alternatives, a student must define and justify his or her career goal, obtain the program's approval for the detailed plan of study before taking the courses, and then complete the plan as it has been defined.

Guidelines for elective focus areas vary by program. For details, see Engineering Curriculum Guides and EFAs on the college's web site.

## **Four-Year Graduation Plan**

College of Engineering students who choose to participate in the University's Four-Year Graduation Plan must be admitted on schedule and must complete specified courses during the first year in order to stay on the plan. They must work closely with their advisors to make sure they know what requirements must be met and the appropriate sequences in which to take courses.

The agreement holds both the student and the University responsible for clearly defined actions to ensure graduation within four years. Since changes in a student's interests may lead to changes in goals or majors, there is no penalty for withdrawing from the Four-Year Graduation Plan. For more information, contact the College of Engineering's Student Development Center.

## **Honors Program**

The College of Engineering Honors Program provides special recognition for outstanding undergraduate students who demonstrate exceptional accomplishment through research, directed independent study, teaching internships, or other approved nondegree enrichment activities. Engineering students who wish to graduate with honors must maintain a University of Iowa g.p.a. of at least 3.33, complete an honors project with a faculty member, and participate in a college-wide honors seminar with faculty members and other honors students. Successful completion of the honors program requirements leads to a B.S.E. with honors, which is recorded on the student's University academic record.

First-year and sophomore students with a University of Iowa g.p.a. of at least 3.33 are automatically admitted to the University of Iowa Honors Program, which provides access to all of the services offered through the University's Honors Center. Engineering students are encouraged to participate in honors activities. Engineering students are the second largest collegiate group in the University Honors Program.

For more information, contact the College of Engineering associate dean for academic programs.

## **Minors**

Students graduating from the College of Engineering may earn a minor in the Tippie College of Business or a minor or minors in any degree-granting department or approved program in the College of Liberal Arts and Sciences. A minor in another college may be earned by satisfying requirements established by the college offering the minor. A notation of the minor is entered on the student's permanent record.

College of Engineering programs generally allow use of a non-engineering minor to satisfy their elective focus area requirements. Students who pursue this option must work closely with program advisors to ensure compatibility with their engineering career aspirations.

Students must inform the Office of the Registrar of their fulfillment of minor requirements when they apply for a degree. This assures that the minor designation is included on their transcript. See "Undergraduate Academic Rules and Procedures"/"Application for Degree" later in this section.

### **Minor in Business Administration**

The Tippie College of Business offers a minor that is open to undergraduate students in other colleges, including the College of Engineering. The minor in business administration requires 37 s.h., including at least 12 s.h. taken in the Tippie College of Business. Students must maintain a g.p.a. of at least 2.00 in the minor overall and in all courses in the minor taken at The University of Iowa. Course work in the minor may not be taken pass/nonpass.

Engineering students who wish to earn the minor in business administration must complete the following courses.

06A:001 Introduction to Financial Accounting	3 s.h.
06A:002 Managerial Accounting	3 s.h.
06E:001 Principles of Microeconomics	4 s.h.
06E:002 Principles of Macroeconomics	4 s.h.

06F:100 Introductory Financial Management (engineering students may substitute 056:054)	3 s.h.
06J:047 Introduction to Law	3 s.h.
06J:048 Introduction to Management	3 s.h.
06K:070 Computer Analysis (engineering students may substitute 059:006)	3 s.h.
06M:100 Introduction to Marketing Strategy	3 s.h.
22M:017 Calculus and Matrix Algebra for Business (engineering students may substitute 22M:031)	4 s.h.
22S:008 Statistics for Business (engineering students may substitute 22S:039)	4 s.h.

For a list of approved substitutions and additional details about the minor, see Business Minor on the Tippie College of Business web site.

In order to have the minor listed on their transcripts, students must add the minor to their Application for Degree.

### **Minors in Liberal Arts and Sciences Disciplines**

Engineering students who wish to earn a minor offered by the College of Liberal Arts and Sciences must complete a minimum of 15 s.h. in the minor, including at least 12 s.h. in advanced courses taken at The University of Iowa and approved by the school, department, or program offering the minor. Students should confer with the academic unit offering the minor to identify acceptable courses. Students must have a g.p.a. of at least 2.00 in courses taken for the minor. Courses in the minor may not be taken pass/nonpass. See Majors and Minors on the CLAS web site.

### **Certificates**

University of Iowa undergraduate students may earn certificates in a variety of disciplines, offered by several colleges. The Certificate in International Business and the Certificate in Technological Entrepreneurship are of special interest for engineering students.

#### **Certificate in International Business**

The Tippie College of Business and the College of Liberal Arts and Sciences offer the Certificate in International Business. The program is designed for University of Iowa undergraduates interested in broadening their understanding of the global economy and their awareness of the political, historical, and social environment in which international business operates.

Certificate students study international business and economics, international relations and institutions, a foreign language, and the contemporary art, literature, culture, and/or politics of the related geographical area. The certificate's range of courses permits students to tailor areas of specialization that suit their individual interests and complement their majors.

The certificate requires 29 s.h.; a minimum of 20 s.h. must be completed at The University of Iowa or in approved study abroad programs. Guided Independent Study is accepted toward the certificate. Students must maintain a g.p.a. of at least 2.00 on all certificate course work. Certificate courses may not be taken pass/nonpass, nor may a single course be counted toward more than one certificate requirement.

Interested students must declare their intention to pursue the certificate with the international business certificate advisor in the Tippie College of business; contact the Tippie Undergraduate Program Office for details.

For a detailed description of certificate requirements, see International Business in the Catalog.

#### **Certificate in Sustainability**

The Certificate in Sustainability provides students with the knowledge and skills they will need in order to contribute to sustainable systems and their interactions, especially those related to energy, society, culture, economics, the built environment, health, and public policy.

Certificate students acquire knowledge of the multidisciplinary breadth of the field through the program's four areas of breadth electives: changing environments and human health; energy, climate, and built environments; the power of culture and society; and ethics, economics, and public policy. They also gain experience analyzing real-life problems in and outside of the classroom and working collaboratively to solve such problems.

The certificate requires 24 s.h. of course work with a g.p.a. of at least 2.00. To learn more about the certificate, see Sustainability (University College) in the Catalog.

#### **Certificate in Technological Entrepreneurship**

The College of Engineering and the Tippie College of Business offer a joint program leading to the Certificate in Technological Entrepreneurship. The program entails study of the entrepreneurial process as it relates to technology.

The certificate program is designed not only for students who intend to start and/or operate their own business but for

any student interested in gaining a better understanding of the entrepreneurial process. The program's range of electives permits students to tailor areas of specialization to their individual interests.

Interested students must declare their intention to pursue the certificate with the College of Engineering technological entrepreneurship program faculty representative. To receive the certificate, students must be granted a degree in engineering; maintain a g.p.a. of at least 2.00 on all certificate course work; and take at least 12 s.h. of certificate course work at The University of Iowa or in approved study-abroad courses. Completion of the program results in the notation "Certificate in Technological Entrepreneurship" on the student's transcript.

Learn more on the Certificate in Technological Entrepreneurship web site. For application information, contact the College of Engineering Office of the Dean.

## **Cooperative Education and Internship Program**

The Cooperative Education and Internship Program offers students the opportunity to explore engineering careers and develop engineering skills through periods of professional practice while they are still students. Supervised professional engineering-related experiences in business, industry, education, or government expose students to the challenges and opportunities of the day-to-day life of an engineer. Students with co-op and/or internship experience are sought by employers and usually receive higher starting salaries upon graduation. A portion of registered co-op and/or internship experience before graduation can be credited toward the experience requirements for professional licensure in Iowa and some other states.

Qualified students may choose to alternate periods of on-campus study with full-time work experience, or they may elect to work half-time while taking at least 6 s.h. of classes. The co-op experience can cover one to three semesters, a series of summer placements, or a single summer. Students may apply to the program following their first year. Academic record and class status are considered in acceptance decisions. Interested students and employers or organizations must register with the College of Engineering director of professional development. For details, see Engineering Professional Development.

## **Second B.S.E. Degree**

Current College of Engineering students and recent graduates may earn a second Bachelor of Science in Engineering. The second degree must include all courses required by the second engineering degree program, including the senior-level design course sequence and any specific social science elective requirements. Elective focus area courses selected for the second B.S.E. must be of a variety and level that permit students to meet at least the minimal level of competence usually expected of graduates of that program.

Students must file an academic study plan, which must be approved by the faculty of the second degree program, submitted to the Student Development Center, and placed in the student's permanent file before the student may begin course work in the second B.S.E. The study plan should include a list of the courses to be taken in the second program along with a list of the courses already completed and yet to be completed for the first engineering degree program. Any changes in the plan must be approved by the student's faculty advisor in the second program and by the department chair of that program (the college petition form may be used for this purpose), submitted to the Student Development Center, and placed in the student's permanent file.

## **Joint and Dual Degrees**

### **Joint B.B.A./B.S.E.**

The College of Engineering and the Tippie College of Business offer a joint degree program in which students earn two University of Iowa bachelor's degrees: a Bachelor of Business Administration (B.B.A.) from the Tippie College of Business and a Bachelor of Science in Engineering (B.S.E.) from the College of Engineering.

Students in the joint program must complete all requirements for both degrees, including all General Education requirements. They must enroll in appropriate mathematics and engineering courses early in their course of study in order to complete the program in a timely way. Because courses in natural sciences, mathematics, humanities, and social sciences count toward the B.B.A. and the B.S.E., students may count a single course toward both degrees.

B.B.A./B.S.E. students usually meet the degree requirements of both colleges in about five years; time required depends on the student's choice of major study areas.

The second-grade option is not available to all students in joint degree programs. Students should consult with their advisors before pursuing a second-grade option.

Students are assigned two advisors, one in the Tippie College of Business Undergraduate Program Office and the other in their College of Engineering major department.

To enter the joint degree program, students must have approval from both colleges and must be admitted to both

colleges. Interested students should contact the College of Engineering Student Development Center.

For information about the B.B.A., including requirements for the degree, see Bachelor of Business Administration (Tippie College of Business) in the Catalog.

### **Joint B.S.E./Liberal Arts and Sciences Degree**

Students may earn two University of Iowa baccalaureate degrees in a joint program in the College of Engineering and the College of Liberal Arts and Sciences. Successful candidates are awarded a B.S.E. (Bachelor of Science in Engineering) by the College of Engineering and a B.A. (Bachelor of Arts), B.S. (Bachelor of Science), B.F.A. (Bachelor of Fine Arts), or B.M. (Bachelor of Music) by the College of Liberal Arts and Sciences.

Students in joint degree programs must complete all requirements for both degrees, including the College of Liberal Arts and Sciences General Education Program and the College of Engineering general education curriculum stem.

Students in the joint program usually are able to meet the degree requirements of both colleges in about five academic years. The exact length of time necessary to complete the program is determined by the major areas of study selected in each college. Students who enter the joint degree program are assigned two faculty advisors, one in their major department in the College of Engineering and the other in their major department in the College of Liberal Arts and Sciences.

To enter the joint degree program, students must be admitted to both the College of Engineering and the College of Liberal Arts and Sciences and must have College of Engineering approval to enter the joint degree program. Joint degree program applicants must meet the high school course or unit requirements for admission to each of the two colleges.

It is crucial that students enroll in the proper mathematics and engineering courses early in their course of study to expedite the completion of the program. The specific engineering courses taken by each student vary according to engineering major. Since courses in natural sciences, mathematics, humanities, and social sciences are accepted for credit by both colleges, students may be able to count a particular course toward both degrees.

Contact the Student Development Center for information about specific requirements. To learn about liberal arts and sciences majors, visit College of Liberal Arts and Sciences in the Catalog and select majors from the college index.

### **B.S./B.S.E. Dual Degree with Northern Iowa**

The 3+2 dual degree program leads to a B.S. in applied physics from the University of Northern Iowa (UNI) and a B.S.E. from The University of Iowa. It requires approximately three years of study at UNI followed by approximately two years of study at Iowa. There is no guarantee that students can complete the 3+2 degree in five years.

Students interested in the program are guaranteed admission to the University of Iowa portion of the program if they have a g.p.a. of at least 3.00 (B average) in all course work and in the chemistry, mathematics, and physics courses required by the University of Northern Iowa physics department.

During the first three years of the program, students complete at least 90 s.h. of course work at the University of Northern Iowa. They must successfully complete courses in each of the following areas: chemistry, mathematics through differential equations, physics to satisfy the applied physics major requirements, and courses to satisfy the General Education requirements. Credit for courses passed with a grade of C or higher is transferred to The University of Iowa as credit for equivalent courses there.

At The University of Iowa, students complete the B.S.E. requirements that were current at the time of their admission to the UI College of Engineering. Course work completed at The University of Iowa is transferred to the University of Northern Iowa and applied toward the requirements for that institution's B.S. in applied physics.

When transferring to Iowa from UNI, students must submit applications for admission, housing, and financial aid to The University of Iowa by the University's established deadlines.

### **Joint B.S.E./M.S. or M.A. in Urban and Regional Planning**

The College of Engineering and the Urban and Regional Planning Program offer the joint Bachelor of Science in Engineering/Master of Arts or Master of Science in urban and regional planning. The joint degree requires a minimum of 152 s.h. The program is designed for students who wish to pursue a public or private sector career in planning, a field that encompasses the development of alternatives to improve the quality of life in cities and regions.

Graduates of the combined program are technically oriented professionals who have a clear understanding of policy development and implementation. They fill positions such as public works director, transportation engineer, and public utilities staff member. Their work involves a blend of civil and industrial engineering problems and policy analysis.

The joint program satisfies all requirements of both degrees. Its required 152 s.h. includes at least 45 s.h. of urban and regional planning graduate courses. Completion of the program takes five years--one fewer than would be required for consecutive completion of both programs.

Each student in the joint program has two advisors, one in engineering and one in urban and regional planning. Students enroll in the College of Engineering for their first four years in the program and in the Graduate College for their fifth year. Successful students receive a B.S.E. at the end of the fourth year and an M.A. or M.S. in planning at the end of the fifth year.

To join the combined degree program, students must first be admitted to the College of Engineering. During spring semester of their second year in engineering, they apply for admission to the joint program. Students admitted to the program apply for admission to the Graduate College at the end of their fourth year. Applicants must have completed all requirements for a B.S.E., have an undergraduate g.p.a. of at least 3.00, and earn a score on the Graduate Record Exam (GRE) General Test judged satisfactory by the urban and regional planning admissions committee.

While enrolled in the College of Engineering, students must maintain the overall grade-point average required by their engineering program.

Students also must maintain a g.p.a. of at least 3.00 in planning courses in the joint program. If they do not, they may be placed on academic probation, and if they fail to satisfy the conditions of probation, they are dismissed from the joint program. Dismissal from the joint program does not affect a student's standing in the College of Engineering.

Students in the joint program must maintain a cumulative g.p.a. of at least 3.00 in order to graduate with an M.A. or M.S. in planning.

### **CURRICULUM**

Students in the joint program follow the standard B.S.E. curriculum for their College of Engineering program during the first and second year. Urban and regional planning courses (prefix 102) are added in the third and fourth years. Students earn 15 s.h. of their required B.S.E. elective focus area credit in courses that also meet the requirements of the M.A. or M.S. in planning.

During the summer after the fourth year, most students in the joint program complete an approved internship.

The fifth year usually includes the remaining urban and regional planning core courses and electives. Students take the M.S. or M.A. comprehensive examination during spring of the fifth year.

A typical study plan calls for completion of the following planning courses during the third and fourth years (15 s.h. of credit is applied to requirements of both the B.S.E. elective focus area and the planning courses).

Third year, fall semester:

102:202 Land Use Planning: Law and Practice	4 s.h.
102:205 Economics for Policy Analysis	3 s.h.

Third year, spring semester:

102:201 Analytic Methods in Planning II	2 s.h.
---	--------

Fourth year, fall semester:

102:203 History and Theories of Planning	3 s.h.
--	--------

Fourth year, spring semester:

Electives	3 s.h.
-----------	--------

During the fifth year and the preceding summer session, students take the remaining 30 s.h. of planning courses, as follows. This completes the 45 s.h. of planning course work required for the M.S. or M.A.

Summer before fifth year:

102:335 Internship	2 s.h.
--------------------	--------

Fifth year, fall semester:

102:208 Program Seminar in Planning Practice	1 s.h.
102:209 Field Problems in Planning I	3 s.h.
Electives	12 s.h.

Fifth year, spring semester:

102:210 Field Problems in Planning II  
Electives

3 s.h.  
11 s.h.

See Urban and Regional Planning (Graduate College) in the Catalog for course descriptions and information about the University's Urban and Regional Planning Program.

### **Admission to the B.S.E.**

Applicants for admission to the College of Engineering as first-year students for academic year 2011-12 must have successfully completed at least four years of English/language arts; four years of mathematics, which must include at least two years of algebra, one year of geometry, and one year of higher mathematics (trigonometry, analysis, calculus); two years of a single foreign language; three years of natural science, which must include at least one year of chemistry and at least one year of physics; and at least two years of social studies. A high school computer programming course is recommended but not required.

Applicants are guaranteed admission to the College of Engineering if they have no high school unit deficiencies, a ACT composite score of 25 or higher, an ACT math score of 25 or higher, and a Regent Admission Index score of at least 265. Students who do not meet these requirements, or who attend a high school that does not rank its students, are encouraged to send recommendations from math and science teachers and a personal statement, which will be considered in an individual review by the College of Engineering.

Students who are admitted through the individual review process may be required to make up deficiencies by taking a lower-level course in their area of deficiency before enrolling in the first required course in that area. For example, students who have high math grades and standardized test scores, but who are deficient by one unit in mathematics, may be required to complete a course such as 22M:009 Elementary Functions before enrolling in the first engineering calculus course.

Incoming first-year and transfer students who do not meet the foreign language requirement may be admitted on conditional status for a maximum of four semesters in order to complete two semesters of an introductory college-level foreign language.

Students who are unsure whether to pursue a degree in engineering or a degree in liberal arts and sciences are strongly encouraged to begin in engineering if they meet the admission requirements.

Information about undergraduate engineering admission requirements is available on the Office of Admissions web site.

### **Transfer Applicants**

Transfer applicants must have completed the same high school unit requirements as entering first-year students and must submit an official high school transcript as well as a transcript of college work undertaken at other institutions. To transfer to the College of Engineering, students must have demonstrated success in math, science, and engineering courses, ideally earning all As and Bs with no grade lower than a C in these foundation subjects. Transfer students must have completed calculus I and the equivalent of either 004:011 Principles of Chemistry I or 029:081 Introductory Physics I (the first semester of chemistry designed for majors, or the first semester of calculus-based physics). Overall grade-point average also is considered in transfer applications.

Information about engineering admission requirements for transfer students is available on the Office of Admissions web site.

## **Academic Rules and Procedures**

### **Academic Advising**

Undeclared engineering students are advised by the staff members in the Student Development Center. Engineering students who have declared an academic program are advised by faculty advisors assigned to that program. Students may request a change of advisor when it is deemed appropriate. All students are required to have a conference with their advisors before registering for classes each semester.

### **Application for Degree**

Students who wish to be considered for graduation must file an Application for Degree with the Office of the Registrar before the deadline date during the session in which the degree is to be conferred.

Students who do not graduate on the date indicated in the Application for Degree must file another application for the

next applicable session. Students do not need to be registered to apply for a degree.

See Apply for Degree on the Office of the Registrar web site.

## **Academic Recognition**

### **GRADUATION WITH HONORS**

Graduation with honors recognizes high academic achievement based on both grades and exceptional accomplishment. To be eligible for graduation with honors, students must be recommended by their major department and approved by a selected honors committee and the director of the honors program, and they must complete honors requirements. See "Honors Program" under Bachelor of Science in Engineering.

### **GRADUATION WITH DISTINCTION**

Graduation with distinction recognizes high academic achievement based on grades. The college awards degrees "with highest distinction" to students in the highest 2 percent of their graduating class, "with high distinction" to students in the next-highest 3 percent, and "with distinction" to students in the next-highest 5 percent. Ranking is based on students' grade-point average for all college-level study taken up to their final registration.

To be eligible to be considered for graduation with distinction, students must complete their final 60 s.h. of study in residence at the college and must have completed at least 45 s.h. in the college before their final registration. Students in the combined engineering/liberal arts and sciences program are eligible to graduate with distinction regardless of the college in which they complete their residency requirement.

### **DEAN'S LIST**

Students in the undergraduate Tippie College of Business, Colleges of Engineering, Liberal Arts and Sciences, and Nursing, and undergraduate programs in the Carver College of Medicine who achieve a grade-point average of 3.50 or higher on 12 s.h. or more of University of Iowa graded course work (including Guided Independent Study courses) during a semester (or summer session) and who have no hours of I (incomplete) or O (no grade reported) for that enrollment are recognized by inclusion on the Dean's List for that semester (or session).

### **PRESIDENT'S LIST**

University of Iowa undergraduate students who achieve a grade-point average of 4.00 on 12 s.h. or more of University of Iowa graded course work (including Guided Independent Study Courses) and who have no hours of I (incomplete) or O (no grade reported) for two consecutive semesters (including summer session) are recognized by inclusion on the President's List.

## **Academic Standards**

### **MAXIMUM SCHEDULE**

Course schedules of more than 18 s.h. for a semester, 9 s.h. for a summer session, or 3 s.h. for a winter session require approval of the advising staff in the college's Student Development Center. Permission to Register for Additional Hours forms are available on the center's web site.

### **CLASSIFICATION OF STUDENTS**

Students in the College of Engineering are classified by the number of semester hours of credit they have earned toward the Bachelor of Science in Engineering.

First-year: 0-29 s.h. earned toward the B.S.E.

Sophomore: 30-59 s.h. earned toward the B.S.E.

Junior: 60-89 s.h. earned toward the B.S.E.

Senior: 90 s.h. or more earned toward the B.S.E.

### **GRADING SYSTEM**

The college uses a letter grading system. A denotes superior performance, B denotes above average, C denotes average, D denotes below average, and F denotes failure of the course. Plus and minus designate gradations of performance between letter grades. Letter grades and their numerical equivalents are as follows.

A-plus: 4.33

A (superior): 4.00

A-minus: 3.67

B-plus: 3.33

B (above average): 3.00

B-minus: 2.67

C-plus: 2.33

C (average): 2.00

C-minus: 1.67

D-plus: 1.33

D (below average): 1.00

D-minus: 0.67

F (failing): 0

This grading system is used for all students in both undergraduate and graduate engineering courses. Grades of D-minus are passing grades; that is, courses completed with grades of D-minus or higher count toward collegiate requirements, with the exception of 22M:031 Engineering Mathematics I: Single Variable Calculus and 22M:032 Engineering Mathematics II: Multivariable Calculus, which have a minimum grade requirement of C-minus or higher. Grades of A-plus have a value of 4.33 in calculating grade-point averages, but averages displayed in University records are truncated so that they do not exceed 4.00.

#### **ACADEMIC PROBATION AND DISMISSAL**

Students who do not achieve or surpass University of Iowa cumulative and semester minimum grade-point averages of 2.00 are placed on academic probation.

Students on academic probation are restored to good standing when they successfully complete an additional 9 s.h. toward an engineering degree, either in one semester or cumulatively, and their University of Iowa cumulative and semester grade-point averages equal or exceed 2.00.

The college reviews academic records for all students at the end of the fall and spring semesters. There is no review at the end of the summer session. Students are placed on probation, dismissed for unsatisfactory progress (with or without previous probationary status), or restored to good standing only at the end of the fall and spring semesters. Students on academic probation are not permitted to continue their enrollment without written expectations for their future performance.

Students who do not make satisfactory progress may be dismissed from the college without an intervening probationary period. Students who are dismissed from the college for unsatisfactory academic progress due to circumstances beyond their control, such as a death in their immediate family or extended personal illness, may appeal for a revocation of the dismissal. A student dismissed in January must submit a written appeal by the second day of spring semester classes. A student dismissed in May must submit the written appeal by June 15.

Students dismissed from the college for poor scholarship may appeal to re-enroll after an interval of at least one calendar year. A written appeal for reinstatement must be submitted to the Appeals Committee at the Student Development Center. Appeals must be submitted before June 15 for reinstatement in a fall semester or before December 1 for reinstatement in a spring semester.

For details, see Academic Standards and Appeal Procedures under Current Students on the college's web site.

#### **DROPPING AND ADDING COURSES**

Courses may be added with permission of the advisor and the instructor during the first two weeks of the semester or first one-and-one-half weeks of the summer session.

Courses may be dropped with permission of the advisor and the instructor at any time during the first 10 weeks of the semester. Only under compelling circumstances may courses be dropped after the 10th week, in which case special approval must be granted by the advisor, the course instructor, and the dean's office. Under no circumstance are students permitted to drop after the beginning of the scheduled final examination period.

#### **LIMITS ON WITHDRAWING FROM COURSES**

Undergraduates receive the mark of W for any course dropped after the second week of the semester or the first one-and-one-half weeks of the summer session. Students may not drop the same course with a mark of W more than twice. Special courses that may be repeated are exempt from this rule.

Students admitted to degree programs in the College of Engineering are limited to a total of five Ws while enrolled in the College of Engineering. First-year students entering the University directly from high school with no prior full-time college experience are permitted to exclude Ws received during their first two sessions of enrollment.

Students who have a legitimate reason for dropping a course (e.g., disabling illness, death of an immediate family member) and can document that reason are permitted to exclude that drop from the maximum, but the W is not removed from the record. Requests for such exclusions are made in the Student Development Center.

#### **WITHDRAWAL OF REGISTRATION**

Students who withdraw their entire registration must consult the staff at the Student Development Center. A student on scholastic probation who withdraws registration at any time without good cause may not be permitted to enroll for the following semester without specific approval from the Student Development Center staff. Withdrawal cards for students enrolled in the college are signed by the associate dean for academic programs.

#### **PASS/NONPASS OPTION**

A maximum of two courses taken pass/nonpass (P/N) may be applied toward satisfaction of the general education (humanities and social sciences) requirement. P/N registration must be approved by the student's advisor and the instructor of the course and must be completed during the first 10 days of a semester or the first two weeks of a summer session. P/N registration may not be changed after the deadline for adding courses. The pass/nonpass option may not be used for courses taken to satisfy the rhetoric requirement. Guided Independent Study courses taken for humanities or social science credit may not be taken P/N.

Students enrolled in courses taught in the College of Engineering may choose to be graded pass/nonpass under the following conditions:

- the signatures of the advisor and instructor must be obtained on the proper form, and the completed form must be submitted to the registration center by the student within the time period established by University policy;

- the mark of P (pass) is awarded where the final course grade earned was C-minus or higher; the mark of N (nonpass) is given for grades of D-plus or below; marks of P and N are not used in computing the grade-point average, and the mark of N does not count as earned credit.

No course work taken in the College of Engineering on the pass/nonpass option may be used to satisfy requirements for an engineering degree.

#### **SECOND-GRADE-ONLY OPTION**

A student may elect to repeat a course with only the new grade being counted in his or her grade-point average. The option may be applied to no more than three courses, and it may be applied only once to a particular course. Transfer students may apply the option on a prorated basis.

A course may not be repeated under the second-grade-only option once it has been used as a prerequisite for a more advanced course that the student has completed successfully.

To exercise the second-grade-only option, students register as usual for the course that is to be repeated, then complete a Second Grade Option form at the Student Development Center; Second Grade Option forms are available on the college's web site. The form must be completed during the session in which the course is repeated, within the first 12 weeks of the fall or spring semester or the first six weeks of the summer session. Students must follow this procedure or both grades will be counted in the University of Iowa grade-point average.

Under the second-grade-only option, the registrar marks the permanent record to show that a particular course has been repeated. Both grades remain on the permanent record, but only the second is used in calculating the grade-point average and semester hours earned. The course must be taken the second time under the same circumstances and with the same grade option as it was taken the first time.

The second-grade-only option cannot be used to remove a grade of incomplete, which must be removed in the usual manner. A student who holds a degree from The University of Iowa may not apply the second-grade-only option to a course taken before the degree was conferred.

#### **SATISFACTORY/FAIL COURSES**

The noncredit professional seminar courses required in each of the professional programs are offered only

satisfactory/fail (S/F). No other engineering courses are offered on this basis. An F (fail) grade earned for such a class does not satisfy any portion of the professional seminar requirement.

#### **INCOMPLETE AND NO REPORT GRADES**

A mark of I (incomplete) that is not replaced by a final grade will automatically be converted to an F at the end of the next fall or spring semester (summer and winter sessions excluded), even if the student does not enroll after the session the incomplete was posted.

A mark of O (no grade reported) will remain on a student's permanent record until a valid grade is submitted.

#### **CREDIT BY EXAMINATION**

Students who have acquired knowledge in subject areas from sources other than formal course registrations may be granted credit toward graduation by examination, under the following conditions and limitations.

No more than 32 s.h. of credit by examination may be applied toward B.S.E. degree requirements.

College-Level Examination Program (CLEP) credit may be counted toward the lower-level general education (humanities and social science) requirements. CLEP credit earned in natural science areas does not count toward the engineering degree. Credit also may be earned through Advanced Placement Exams. For details about CLEP and Advanced Placement Exam credit, visit the Office of Admissions web site (<http://www.uiowa.edu/admissions/undergrad/majors/credit-by-exam.htm>).

Engineering students may earn credit for equivalent experience or former course work in any of the required common core courses through successful completion of examinations prepared and graded by the core course committees. Students who fail a core course are not permitted to earn credit by examination for the failed course. Students who wish to earn credit for core courses by examination must obtain approval from the associate dean for academic programs.

With approval of the departmental faculty, credit in three or fewer courses (totaling no more than 6 s.h.) may be awarded upon successful completion of final examinations in program elective courses.

#### **FOREIGN LANGUAGE INCENTIVE PROGRAM**

The University's Foreign Language Incentive Program (FLIP) gives entering engineering students two options for earning college credit.

Option 1: Entering students who place into a fifth-semester language course and complete the course with a grade of B-minus or higher receive 4 s.h. of exam credit for the fourth-semester course. The credit is ungraded but may be counted toward the hours required for graduation. Incentive credit is not granted for college course work for which credit has been received.

Students are eligible for incentive credit only during their first and second registrations at The University of Iowa.

Option 2: Students may receive 2 s.h. of exam credit for earning a grade of B-minus or higher in a first-semester-level course in a foreign language different from the language used to satisfy the foreign language requirement. They may earn another 2 s.h. for completing the second-semester-level course in that language for a grade of B-minus or higher.

Visit the college's web site for more information about FLIP for engineering students. For more information on eligibility and restrictions, consult the Student Development Center.

#### **CREDIT FROM OTHER COLLEGES**

Course requirements in engineering may be satisfied with credit earned in courses taken in other University of Iowa colleges or at other accredited colleges or universities. When students apply for admission to the College of Engineering, they must submit official transcripts from each college attended along with their application for admission. After the credit has been certified by the Office of Admissions as college-level work from an accredited institution and after admission has been granted, the credit is evaluated by the Student Development Center either before or during the student's first semester of enrollment in the college.

Satisfaction of engineering course requirements by transfer course work may be approved by the Student Development Center if, course-by-course, there is a match in the content and level of the transfer courses, and if the grades earned for such courses are C-minus or higher. Students who want to satisfy the engineering General Education Component (GEC) (social sciences and humanities) requirements or The University of Iowa rhetoric requirements by transfer work must follow the College of Engineering General Transfer Credit Guidelines.

Students planning to attend a two- or four-year institution before transferring to the College of Engineering should discuss the planned transfer with officials at both schools before embarking on a transfer program. The College of

Engineering has recommended transfer course lists for most Iowa community colleges and some four-year colleges. Once students are enrolled in the College of Engineering, they must have prior approval for course work taken at other institutions.

See transfer credit for engineering students for additional details, including recommended transfer course lists and course work at other institutions.

By policy of the Board of Regents, State of Iowa, a student may apply a maximum of 64 s.h. of transfer credit earned at a two-year college toward the 128 s.h. required for the B.S.E. However, transfer credit from a two-year school in excess of 64 s.h. is used in computing grade-point average and may be used to satisfy course requirements, even though the semester hours cannot be counted toward the total required for graduation. A grade of C-minus or higher is required in order for transfer credit to be applied toward a degree requirement.

#### **COURSE SUBSTITUTIONS**

For students in the College of Engineering, the substitution of an alternate course for a required course requires the approval of a petition. Petition for Course Substitution forms are available on the college's web site or at the Student Development Center. The form must be completed by the student and must be approved by the student's advisor and by the chair of the engineering program in which the student is majoring.

If the petition involves a required engineering core course or a General Education Component (social sciences or humanities) course, then it also must be approved by the Student Development Center. Substitutions for required engineering core courses should be made infrequently and only under compelling circumstances. Substitutions of courses that are required by the student's program are governed by the faculty of that program; approval of these course substitutions is needed only from the faculty advisor and the department chair. All petitions must be forwarded to the Student Development Center for inclusion in the student's permanent file.

#### **AUDITING COURSES**

Students in the College of Engineering may register for a course for zero credit (audit) with the permission of the course instructor and the advisor. The mark of R is assigned to students registered for zero credit if attendance and performance in the course are satisfactory; if unsatisfactory, the mark of W is assigned. Courses completed with a mark of R do not meet any requirements nor do they carry any credit toward graduation. Auditing may not be used as a second-grade-only option.

To register for a course on an audit basis, students must obtain the instructor's authorizing signature and their advisor's signature and must register for 0 s.h. To change registration from audit to credit or from credit to audit, a drop-add form is used. These changes must be made during the first three weeks of a semester or the first one-and-one-half weeks of a summer session.

#### **Misconduct, Complaints**

##### **STUDENT ACADEMIC MISCONDUCT**

Policies regarding cases of cheating or plagiarism are outlined on the College of Engineering web site (see Regulations Dealing with Academic Misconduct) and are included in Policies and Regulations Affecting Students, on the University's Division of Student Services web site). In cases of cheating on an exam or quiz, the policy recommends that the instructor reduce the student's grade, including the assignment of F for the course. When a course grade has been reduced to an F, the student may not drop the course or use the second-grade-only option to eliminate the failing grade.

At the beginning of each semester, course instructors individually announce and explain their policies on acceptable levels of collaboration between students on graded work, which includes homework assignments, and lab or design projects. When a policy is violated, a zero is assigned for the total portion of the course grade allocated to the requirement in which the violation occurs. The instructor sends a written report of any disciplinary action to the office of the dean and the report is placed in the student's file. Students are notified by the office of the dean of any disciplinary action reported and are informed of appeal procedures.

##### **STUDENT COMPLAINTS CONCERNING FACULTY ACTIONS**

In cases where complaints do not involve alleged student academic misconduct, students with complaints against engineering faculty members first should attempt to resolve the issue with the faculty member; see Informal Procedure for Student Complaints Concerning Faculty Actions on the college's web site. Lacking a satisfactory outcome, the student should discuss the matter with the chair of the faculty member's department.

Students who are uncomfortable dealing directly with a faculty member or a department chair may seek assistance from the engineering faculty ombudsperson when attempting to resolve a complaint related to an engineering course.

Students taking non-engineering courses should seek assistance from the University ombudsperson. However, grievances generally can be satisfactorily resolved most expeditiously at the faculty or chair level. If students are not satisfied with the outcome of this procedure, they should discuss their complaints with the dean of engineering.

## Graduate Programs

The College of Engineering offers the Master of Science and Doctor of Philosophy in biomedical engineering, chemical and biochemical engineering, civil and environmental engineering, electrical and computer engineering, industrial engineering, and mechanical engineering. For information about principal research and study areas, degree requirements, admission, and financial support for individual graduate programs, see the Catalog's College of Engineering department sections: Biomedical Engineering, Chemical and Biochemical Engineering, Civil and Environmental Engineering, Electrical and Computer Engineering, and Mechanical and Industrial Engineering.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Professional Licensure

Licensure as a professional engineer is governed by the laws of each state. Most states' minimum requirements include graduation from an accredited engineering curriculum of at least four years, followed by at least four years of practical experience and successful completion of two major examinations.

The agency that controls and monitors the licensing procedure in Iowa is the Iowa Engineering and Land Surveying Examining Board. The first step in the procedure for students enrolled in an accredited program is to pass an examination on engineering fundamentals given near the time of graduation. Following graduation and the successful completion of the engineering fundamentals exam, graduates receive an Engineer-in-Training (EIT) certificate. The final step in the procedure is to pass the principles and practice exam in a specialty area following a minimum of four years of approved professional experience. At this point, the graduate engineer becomes a licensed Professional Engineer.

## Student Organizations

The College of Engineering student body is represented by the Engineering Student Council. The council plans and carries out activities involving the entire college, such as the student and faculty picnic and E-Week. The organization also acts on collegewide matters of general student interest.

Engineering students publish their own student journal, Hawkeye Engineer. The journal is staffed by students, with faculty members serving only in an advisory capacity.

The following engineering professional societies are represented by University of Iowa student chapters: American Institute of Chemical Engineers, American Society of Civil Engineers, American Society of Mechanical Engineers, Biomedical Engineering Student Society, Institute of Electrical and Electronics Engineers, Institute of Industrial Engineers, and National Society of Professional Engineers.

The following student organizations are multidisciplinary and may have members from any department: American Institute of Aeronautics and Astronautics is a professional organization affiliated with the field of Aerospace Engineering; Engineers for a Sustainable World and Engineers Without Borders are organizations working to reduce poverty and improve global sustainability; The Human Factors and Ergonomics Society is a student organization which strives to raise awareness of human factors issues throughout the academic and outside communities; The Society of Automotive Engineers is a professional and technical organization open to all engineering majors; A local chapter of Theta Tau, a national professional engineering fraternity, is active in service to the college and draws its membership from students throughout the college.

The University chapter of Tau Beta Pi, a national honorary society for students in all engineering fields, gives special recognition to superior students in their junior and senior years. The work of students who are outstanding in specific engineering disciplines is recognized by Alpha Eta Mu Beta (biomedical engineering), Omega Chi Epsilon (chemical engineering), Chi Epsilon (civil engineering), Eta Kappa Nu (electrical engineering), Alpha Pi Mu (industrial engineering), and Pi Tau Sigma (mechanical engineering).

Student organizations that support the enrollment of women and members of minority populations in the college include the Multi-Ethnic Engineering Student Association, the National Organization for the Professional Advancement of Black Chemists and Chemical Engineers, the National Society of Black Engineers, the Society of Hispanic Professional Engineers, and the Society of Women Engineers.

The University of Iowa Engineering Sales Club helps engineering students develop the professional skills required for careers in sales.

For more information about engineering student organizations, see the college's web site.

## Research Centers

The College of Engineering has four major research centers. College of Engineering researchers also collaborate with researchers from outside the college in several interdisciplinary research units.

### College of Engineering Research Centers

#### CENTER FOR BIOINFORMATICS AND COMPUTATIONAL BIOLOGY

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research center dedicated to applying high-performance networking and computing to basic life science and applied biomedical research. The center is sponsored jointly by the College of Engineering and the University's Carver College of Medicine.

#### CENTER FOR COMPUTER-AIDED DESIGN

The Center for Computer-Aided Design (CCAD) conducts basic and applied research in six units: the Operator Performance Laboratory (research in human performance); the Virtual Soldier Research program (research in human modeling and simulation); the Cognitive Systems Laboratory (research in human factors in transportation and human computer interaction); the Reliability and Sensory Prognostic Systems program; the National Advanced Driving Simulator (research in clinical, human factors, and simulation for ground transportation); and the Musculoskeletal Imaging, Modeling, and Experimentation Program (computational modeling of anatomic structures).

#### IOWA INSTITUTE FOR BIOMEDICAL IMAGING

The Iowa Institute for Biomedical Imaging (IIBI) conducts research in the following areas: medical image analysis and computer-aided diagnosis; cardiovascular image analysis (angiography-intravascular ultrasound data fusion, MR image analysis of congenital heart disease, coronary CT image analysis, early detection of cardiovascular disease); pulmonary image analysis (CT and MR image analysis of the lung); Cell image analysis (cell tracking, shape analysis); and virtual surgery planning (augmented reality for liver resection surgery). The institute is sponsored jointly by the College of Engineering and the University's Carver College of Medicine.

#### IIHR—HYDROSCIENCE & ENGINEERING

IIHR—Hydroscience & Engineering, formerly the Iowa Institute of Hydraulic Research, is one of the nation's premier and oldest fluids research and engineering laboratories. Its activities include fluid dynamics (turbulent flows, vortex dynamics, ship hydrodynamics, biological fluid flow, atmospheric boundary layer, experimental and computational fluid dynamics); environmental hydraulics (hydraulics structures, river mechanics, hydraulic structures, ice mechanics, cold regions engineering, fishiers engineering, sediment management, heat disposal in water bodies and power productions, bioremediation of groundwater, computational hydraulics, water quality monitoring); and water and air resources (air pollution, hydroclimatology, hydrogeology, hydrology, hydrometeorology, remote sensing, water resources and basin-scale processes).

### Interdisciplinary Research Units

#### CENTER FOR BIOCATALYSIS AND BIOPROCESSING

The Center for Biocatalysis and Bioprocessing (CBB) concentrates on biocatalysis and bioprocessing education, research, and technology transfer. Its research includes fermentation; bioprocessing of small molecules, peptides, proteins and biocatalysis; pilot-scale technology transfer; structural biology of biocatalysts; biocatalyst screening and discovery; bioremediation; cloning of genes and optimization of protein expression in microorganisms; and GMP operations for producing clinical-grade biotherapeutics.

#### CENTER FOR GLOBAL AND REGIONAL ENVIRONMENTAL RESEARCH

The Center for Global and Regional Environmental Research (CGRER) is devoted to studying and bettering the environment. Its focus includes multiple aspects of global environmental change, including regional effects on nature ecosystems, environments, and resources and on human health, culture, and social systems. The center helps Iowa's agencies, industries, and people prepare for accelerated environmental change.

#### CENTER FOR HEALTH EFFECTS OF ENVIRONMENTAL CONTAMINATION

The Center for Health Effects of Environmental Contamination (CHEEC) is a multidisciplinary environmental health

research center dedicated to supporting and conducting research to identify, measure, and prevent adverse health outcomes related to exposure to environmental toxins, particularly water contaminants. The center also conducts educational programs on environmental health and works with environmental database design, development, and systems support for environmental health research.

#### **CENTER FOR INTERNATIONAL RURAL AND ENVIRONMENTAL HEALTH**

The Center for International Rural and Environmental Health (CIREH) promotes understanding and awareness of the causes, consequences, and prevention of communicable, chronic, environmental, and occupational diseases in all regions of the world. The center focuses its education, training, and research on nations with substantial agrarian economies.

#### **ENVIRONMENTAL HEALTH SCIENCES RESEARCH CENTER**

The Environmental Health Sciences Research Center (EHSRC) researches the adverse health effects of environmental contaminants among rural and agricultural populations. The center is at the forefront of research on rural environmental health problems such as pesticide-induced cancers and birth defects, community and occupational exposures to airborne hazards from concentrated livestock operations, asthma among rural children, and remediation of rural hazardous waste sites. It also trains scientists to characterize mechanisms that underlie environmental disease and approaches to their prevention.

#### **INJURY PREVENTION RESEARCH CENTER**

The Injury Prevention Research Center (IPRC) is a multidisciplinary unit whose focus includes injury prevention, acute care, biomechanics, and surveillance activities. The center's current work involves examining different types of residential smoke detectors, using simulation technology to study driving safety among persons with sleep apnea and persons on antiseizure medication, using bicycling simulation to study risk taking in children, and studying the effect of interpersonal violence on women's health.

#### **OPTICAL SCIENCE AND TECHNOLOGY CENTER**

The Optical Science and Technology Center (OSTC) involves researchers from the College of Engineering and the College of Liberal Arts and Sciences. The center's objective is to catalyze research in the optical sciences by establishing an environment that promotes collaborative science and the development of innovative technology. Broad areas of interest include development of novel semiconductor materials with unique electronic and optical properties; design, fabrication, and characterization of nanostructures and nanomaterials; photopolymerization processes; exploration of environmental science; and application of novel optical devices in the biosciences.

#### **ORTHOPAEDIC BIOMECHANICS LABORATORY**

The Orthopaedic Biomechanics Laboratory researches the application of advanced innovative computational formulations and novel experimental approaches to clinically-oriented problems across the spectrum of musculoskeletal biomechanical research, including total joint replacement (hip, spine, knee, ankle) posttraumatic arthritis, osteonecrosis of the hip, high-energy limb trauma, carpal tunnel syndrome, and articular contact stresses as they relate to joint degeneration.

#### **PHOTOPOLYMERIZATIONS CENTER**

The Photopolymerizations Center (IUCRC) center works to advance the fundamental understanding of the kinetics and mechanisms of photopolymerizations; to establish a venue for active discussions and collaborations among industrial and academic researchers; to explore high-risk, cutting-edge research on photopolymerization processes that could lead to technological innovations; and to promote and/or develop novel applications that exploit the unique set of advantages offered by photopolymerizations.

#### **PUBLIC POLICY CENTER**

The Public Policy Center (PPC) facilitates interdisciplinary academic research on policy related to health, human factors and vehicle safety, crime and justice, housing, the environment, and transportation. It works to provide policy makers with information they can use to help communities and individuals thrive in sustainable ways.

## **Facilities and Resources**

### **Seamans Center for the Engineering Arts and Sciences**

The Seamans Center for the Engineering Arts and Sciences is home to the College of Engineering. Dedicated in 2001, the Seamans Center combines new construction with extensive renovation of the former Engineering Building to provide space for learning, teaching, research and collaboration that anticipates the needs of 21st-century engineering.

The center's Student Commons and John Deere Plaza Lobby provide welcoming space for students to work individually or together on homework and projects, with wireless computer connections. Additional work rooms and conference areas join the center's expanded classrooms and flexible research space in an environment designed to serve the needs of the college's students, faculty, and staff.

All five of the college's departments have headquarters in the building, and most faculty offices are located there.

### **Student Development Center**

The professional staff of the Student Development Center administers student services for the College of Engineering, including admission, advising, tutoring, and student records and scholarship. It also provides professional development services such as co-ops/internships, study abroad, and résumé and interviewing skills.

### **Engineering Professional Development**

Engineering Professional Development (EPD) develops and promotes experiential education and professional opportunities for students in the College of Engineering. EPD programs and services include the Co-op and Internship Program, Study Abroad Programs, job shadowing, spring break programs, the fall Engineering Career Fair, and the spring Engineering Job and Internship Fair. EPD offers individual advising and class presentations on résumé preparation and interviewing skills as well as instruction on finding professional engineering positions and using electronic, print, and other resources in job searches. EPD also recruits employers and organizations interested in hiring engineering students and, in partnership with the Pomerantz Center, facilitates on-campus interviewing.

### **Lichtenberger Engineering Library**

The Lichtenberger Engineering Library is a center of college activity. It maintains a collection of more than 100,000 volumes and provides access to more than 1,000 current journal titles. The library offers internet access to a wide array of indexes and abstracts and houses a significant collection of standards. Study space is provided for library users.

### **Hanson Center for Technical Communication**

The Hanson Center for Technical Communication (CTC) helps undergraduate engineering students develop and polish their written communication skills. The center's coordinator and assistant coordinator supervise a staff of professional writing consultants and peer consultants.

CTC writing consultants are professional instructors who work in teams to help engineering faculty members present and evaluate writing-intensive assignments. They also provide individual feedback and assessment of students' work throughout the writing process.

CTC peer consultants are engineering students who have strong writing skills. Peer consultants conduct one-on-one tutoring sessions at the center, helping their fellow students develop skills relating to organization, audience analysis, precise technical descriptions, and persuasive and logical narratives.

### **Computer Systems Support**

Engineering Computer Systems Support (CSS) provides for curricular computing at the College of Engineering. A large network of high performance Hewlett Packard color graphics Linux workstations and Windows workstations, along with extensive commercial and public domain software, support the full range of engineering college classes. The college provides the same type of computer hardware and software that students will use when they graduate and begin working as engineers. CSS updates hardware and software regularly to maintain the best educational environment.

Engineering students and other students who take engineering courses are provided with an engineering computing account, which they keep during their tenure at the college. This account provides students with access to their e-mail and the rest of the Internet. The college's computer labs provide students with more than 300 networked computers. Students have round-the-clock access to the Seamans Center and to the engineering computer labs.

### **Engineering Electronics Shop**

The Engineering Electronics Shop is a full-service electronics support facility for the College of Engineering. The shop provides design, construction, repair, calibration, and preventive maintenance services for both teaching and research laboratories. There also is an extensive electronics parts supply store and PC board facility for engineering students and researchers.

## **Course Numbering System**

## Current Numbering System

University of Iowa course numbers consist of a three-digit prefix and a three-digit suffix separated by a colon. For the College of Engineering, the second digit of the prefix is 5; the third digit of the prefix corresponds with the academic program in the college that offers the course, as follows.

051: biomedical engineering

052: chemical and biochemical engineering

053: civil and environmental engineering

055: electrical and computer engineering

056: industrial engineering

057: engineering core (old curriculum)

058: mechanical engineering

059: core engineering (new curriculum)

Each course's three-digit suffix identifies the level and type of the course. Generally, suffix numbers below 100 designate courses primarily for undergraduates, numbers 100 to 199 designate courses for undergraduate and graduate students, and numbers 200 and above designate courses primarily for graduate students.

Each College of Engineering course is listed in the department that offers it. Engineering core and core engineering courses are listed in the College of Engineering section; see "Core Program Courses."

A brief description is included for each course. Prerequisite and corequisite courses listed in course descriptions are University of Iowa courses. Students who have not taken the University of Iowa prerequisite but who have earned credit in equivalent course work from another institution should consult the course instructor if they have questions concerning their preparation for the course. They must obtain the instructor's consent before registering for the course.

Engineering students may enroll in any course in the College of Engineering if they meet the course prerequisite and corequisite requirements. Undergraduates from other colleges may enroll in engineering courses only with consent of the College of Engineering director of admissions and outreach; contact the Student Development Center. Consent for enrollment in an engineering course is based on space available as well as on whether the students have the mathematics, science, and engineering background considered necessary to undertake the course work.

## New Numbering System

The University is in the process of revising its course numbering system. Under the new system, course numbers will consist of an alphabetical prefix (up to four letters) and a four-digit numerical suffix separated by a colon. For the College of Engineering, each course's prefix will correspond to the academic program in the college that offers the course, as follows.

BME: biomedical engineering (051 under the old system)

CBE: chemical and biochemical engineering (052 under the old system)

CEE: civil and environmental engineering (053 under the old system)

ECE: electrical and computer engineering (055 under the old system)

IE: industrial engineering (056 under the old system)

ME: mechanical engineering (058 under the old system)

ENGR: core (057 and 059 under the old system)

The four-digit numerical suffix will identify the course's level and type, according to the following guidelines.

0000–0999: noncredit courses and courses offered to nonmatriculated students.

1000–1999: introductory, elementary, and general education courses appropriate for first-year students and for other students with no special background; they require few or no prerequisites.

2000–2999: lower-level undergraduate courses usually taken by second-year and sometimes by third-year students; they may build on materials from 1000–1999 prefix courses and may require prerequisites.

3000–3999: upper-level undergraduate courses such as courses for majors and courses that require prerequisites; although these courses are for undergraduates, graduate students earn graduate credit for courses at this level.

4000–4999: advanced upper-level undergraduate courses such as senior seminars, advanced independent study

courses, or honors thesis work; although these courses are for undergraduates, graduate students earn graduate credit for courses at this level.

5000–5999: introductory or first-year graduate courses; although these are graduate courses, undergraduates may register for these courses without special permission, on the advice of their advisors.

6000–6999: lower-level and intermediate graduate courses; undergraduates must have special permission to register for these courses.

7000–7999: advanced graduate courses; undergraduates must have special permission to register for these courses.

8000–9999: courses for professional degree programs offered by the professional colleges.

## Core Program Courses

The college's individual undergraduate programs and course requirements for each engineering major are described in the Catalog's College of Engineering department sections.

Each undergraduate program builds upon a core program (see "Undergraduate Curriculum" earlier in this section). The following core program courses are offered by the college. Not all core courses are required for each engineering major.

Undergraduates from other colleges cannot register for core program courses without special permission from the college's director of admissions and outreach; contact the Student Development Center.

### Engineering Core (Old Curriculum)

**057:000 Cooperative Education Training Assignment: Engineering** 0 s.h.  
For engineering majors participating in the Cooperative Education and Internship Program.

**057:001 Engineering Honors Seminar** 1 s.h.  
Repeatable. Requirements: engineering honors and junior or higher standing.

**057:002 Half-time Cooperative Education Training Assignment: Engineering** 0 s.h.  
Registration for work assignment periods; for students participating in the Cooperative Education Program.

**057:010 Dynamics** 3 s.h.  
Vector calculus, Newton's laws, 3-D motion of particles and multiparticle systems, 2-D motion of rigid bodies applications. Prerequisites: 22M:031 and 059:007.

**057:013 Introduction to Sustainability** arr.  
Issue of sustainability; interdisciplinary teaching techniques utilizing collaboratively designed curriculum; four major components--integration of experiences, social integration, integration of knowledge, and integration as a curriculum design.

**057:015 Materials Science** 3 s.h.  
Concepts and examples of selection and applications of materials used by engineers; mechanical, electrical, and thermal properties that govern a material's suitability for particular applications; lectures supplemented by laboratory experiments. Prerequisites: 004:011. Corequisites: 22M:031.

**057:017 Computers in Engineering** 3 s.h.  
Introduction to digital systems and engineering applications of microprocessor-based computers; C programming language; serial and parallel I/O; analog-to-digital and digital-to-analog conversion; system control using polling and interrupts; lab arranged. Prerequisites: 059:006. Requirements: sophomore standing.

**057:018 Principles of Electronic Instrumentation** 4 s.h.  
Principles of analog signal amplification, signal conditioning, filtering; operational amplifier circuit analysis and design; principles of operation of diodes, bipolar transistors, field effect transistors; discrete transistor amplifier analysis and design; laboratory included. Prerequisites: 029:082 and 059:008.

**057:019 Mechanics of Deformable Bodies** 3 s.h.  
Elementary theory of deformable bodies, stress, strain; axial, transverse, bending, torsion, combined and buckling loads; deflection of beam. Prerequisites: 059:007. Corequisites: 22M:034.

**057:020 Fluid Mechanics**

4 s.h.

Fluid properties; hydrostatics; transfer of mass, momentum, and energy in control-volume and differential forms; dimensional analysis and similitude; laminar and turbulent flow in conduits; flow past bluff bodies and airfoils; engineering applications; experimental laboratories, computer simulation projects. Prerequisites: 22M:034 and 057:010. Corequisites: 059:009.

**057:029 First-Year Seminar**

arr.

Introduction to engineering fields of study; work closely with a faculty member or senior administrator; participation that eases the transition to college-level learning; cutting-edge research taking place in the College of Engineering.

**057:030 Introduction to Engineering Design**

3 s.h.

Problem-solving skills taught through a design-development process; use of solid-modeling computer design software to create, analyze, and communicate models of product solutions.

**057:031 Principles of Engineering**

3 s.h.

Introduction to engineering and engineering technology; exploration of varied technology systems and manufacturing processes to show how engineers and technicians use math, science, and technology to solve engineering problems and help people; concerns about social and political consequences of technological change.

**057:032 Digital Electronics**

3 s.h.

Applied logic, with focus on application of electronic circuits and devices; use of computer simulation software to design and test digital circuitry before circuits and devices are built.

**057:033 Computer Integrated Manufacturing**

3 s.h.

Builds on computer solid modeling skills developed in 057:030; application of robotics and automation principles; robotics in automated manufacturing, design analysis; students use CNC equipment to produce models of their 3-D designs.

**057:034 Civil Engineering and Architecture**

3 s.h.

Overview of civil engineering and architecture; interrelationship and dependence of each field on the other; roles of civil engineers and architects, project planning, site planning, building design, project documentation and presentation; students use state-of-the-art software to solve real-world problems and provide solutions for projects and activities.

**057:035 Aerospace Engineering**

3 s.h.

Experience applying scientific and engineering concepts to design materials and processes for aeronautics and flight; aerospace information systems, star sailing or astronautics rocketry, propulsion, physics of space science, space life sciences; habitat and crew systems with life support, biology of space science, principles of aeronautics, structures and materials, systems engineering.

**057:036 Biotechnical Engineering**

3 s.h.

Experiences from the fields of biotechnology, bioengineering, biomedical engineering, and biomolecular engineering; biomechanics, cardiovascular engineering, genetic engineering, agricultural biotechnology, tissue engineering, biomedical devices, human interface, bioprocess engineering, forensics, bioethics.

**057:039 Engineering Design and Development**

3 s.h.

Experience working in student teams to research, design, and construct a solution to an open-ended engineering problem, under a community mentor's guidance; application of design and engineering concepts.

**057:131 Concepts of Physical Science and Principles of Engineering**

5 s.h.

Understanding the field of engineering and engineering technology; technology systems and manufacturing processes explored to learn how engineers and technicians use math, science, and technology to solve engineering problems and benefit people; concerns about social and political consequences of technological change.

**057:134 Concepts of Physical Science with Civil Engineering Applications**

5 s.h.

Civil engineering and architecture field experience; proper paradigm for relating concepts to secondary-level students, history of civil engineering, architectural design, surveying, cost and efficiency analysis, sustainable design, soil testing, site evaluation and layout.

**057:136 Concepts of Physical Science with Biotechnical Engineering Applications**

5 s.h.

Experiences from biotechnology, bioengineering, biomedical engineering, and biomolecular engineering, and how to relate them to secondary students; biomechanics, cardiovascular engineering, genetic engineering, agricultural biotechnology, tissue engineering, biomedical devices, human interface, bioprocess engineering, forensics, bioethics.

**057:186 Experiential Design I** arr.

**057:187 Experiential Design II** 3 s.h.  
Prerequisites: 057:186.

### **Core Engineering (New Curriculum)**

**059:005 Engineering Problem Solving I** 3 s.h.  
Development and demonstration of specific problem solving skills; directed project or case study involving actual engineering problems and their solutions.

**059:006 Engineering Problem Solving II** 3 s.h.  
Engineering problem solving using computers; introduction to digital computations, problem formulation using a procedural high-level language; structured, top-down program design methodology; debugging and testing; introduction to use of software libraries; examples from numerical analysis and contemporary applications in engineering. Corequisites: 22M:031.

**059:007 Engineering Fundamentals I: Statics** 2 s.h.  
Vector algebra, forces, couples, moments, resultants of force couple systems; friction, equilibrium analysis of particles and finite bodies, centroids; applications. Prerequisites: 22M:031. Corequisites: 22M:032 and 029:081.

**059:008 Engineering Fundamentals II: Electrical Circuits** 3 s.h.  
Kirchhoff's laws and network theorems; analysis of DC circuits; first order transient response; sinusoidal steady-state analysis; elementary principles of circuit design; laboratory experience with DC, AC, and transient circuits. Corequisites: 22M:034.

**059:009 Engineering Fundamentals III: Thermodynamics** 3 s.h.  
Basic elements of classical thermodynamics, including first and second laws, properties of pure materials, ideal gas law, reversibility and irreversibility, and Carnot cycle; control volume analysis of closed simple systems and open systems at steady state; engineering applications, including cycles; psychrometrics. Prerequisites: 004:011 and 029:081. Corequisites: 22M:032.

**059:090 Engineering Success Seminar for First-Year Students** 1 s.h.  
Introduction to engineering student life; electronic resources; keys to and skills for success; coping with adversity; selecting a major; advising; curriculum choices and career objectives; ethics; communication; internships and co-ops; job search skills. Requirements: first-semester standing.

## Biomedical Engineering

**Chair:** Joseph M. Reinhardt

**Professors:** Karim Abdel-Malek, Brian D. Adams, Thomas D. Brown, John J. Callaghan, Thomas L. Casavant, Krishnan B. Chandran, Charles R. Clark, Patrick Hitchon, Eric Hoffman, Stephen K. Hunter, John C. Keller, Satish C. Khera, Tae-Hong Lim, Geoffrey McLennan, Joon B. Park, Joseph M. Reinhardt, Kwan Rim, Clark Stanford, Ingo R. Titze, Edwin Van Beek

**Adjunct professor:** Richard McLay

**Associate professors:** Michael Abramoff, Terry A. Braun, Edwin L. Dove, Nicole Grosland, Michael A. Mackey, Vincent Magnotta, James Martin, Jun Ni, Madhavan L. Raghavan, Todd Scheetz, Robert Tucker, David Wilder, Jinhu Xiong

**Adjunct associate professors:** Donald Anderson, Douglas R. Pedersen, Joel Pickar, Merryn Tawhai, R.T. Marler

**Adjunct visiting associate professor:** Jose G. Assouline

**Assistant professors:** Fiorenza Ianzini, Hans Johnson, William R. Lynch, Salem Rahamatalla, Aliasger Salem, Steven Stasheff, Kai Tan, Sarah Vigmostad, Yi Xing, Denice Zingman

**Adjunct assistant professors:** James W. Devocht, Jessica Goetz, Ram R. Gudavalli, Anneliese D. Heiner, Prem Ramakrishnan, Jessica Sieren

**Adjunct instructors:** Thakir Almomani, Tom Bair, Hyunggun Kim

**Adjunct lecturer:** Lisa Scranton

**Undergraduate degree:** B.S.E. in Biomedical Engineering

**Graduate degrees:** M.S., Ph.D. in Biomedical Engineering

**Web site:** <http://bme.engineering.uiowa.edu/>

The past four decades have seen a tremendous growth of technological activity in biology and medicine. As engineers increasingly have become involved with projects in the life and health sciences, there has been greater need for them to become more familiar with the fields of biology and medicine. Recognition of this need has led to the emergence of a new interdisciplinary engineering activity designed to bridge the gap between the life sciences and engineering--the biomedical engineering profession.

The Department of Biomedical Engineering fosters interdisciplinary activities across departments and colleges and maintains strong ties with the Carver College of Medicine. The department strives to provide a well-rounded and superior engineering education that attracts outstanding students at both the undergraduate and graduate levels; conduct high-quality research that enables faculty members and students to keep pace with and initiate new developments; and serve government, industry, and institutions worldwide by making the department's facilities and faculty expertise accessible.

Several engineering faculty members have joint appointments in the Carver College of Medicine. Both biomedical engineering undergraduates and graduate students participate actively with college faculty members and their colleagues in the life and health sciences on projects of mutual interest.

## Undergraduate Program

The department offers the Bachelor of Science in Engineering in biomedical engineering. The program provides a contemporary education in a multidisciplinary area. Its objective is to produce graduates who:

- have the ability to identify, formulate, and solve open-ended problems with medical relevance, including the design of devices, systems, and processes to improve human health;
- are able to pursue a wide range of career options, including those in industry, academia, and medicine; and
- are able to advance to leadership positions in their chosen field.

Students who complete the program may pursue career opportunities in biomedical industries, such as design and development of biomedical instrumentation, diagnostic aids, life-support systems, prosthetic and orthotic devices, and man-machine systems; or they may pursue traditional career opportunities in industry, such as those rooted in mechanical or electrical engineering disciplines. Other career options are available in government (Food and Drug Administration, Environmental Protection Agency, National Institutes of Health, Veterans Affairs). Some biomedical engineering graduates elect to continue formal education in engineering, medicine, or law.

## Bachelor of Science in Engineering

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The biomedical engineering major builds on the foundation provided by the College of Engineering core curriculum, preparing students for the challenges and opportunities associated with careers in the profession.

The program has been designed carefully to enable students to satisfy the entrance requirements of the Graduate College. Students whose choice of electives includes a three-course sequence in organic chemistry, an additional biology course, and a biochemistry course may satisfy entrance requirements of the Carver College of Medicine, the College of Dentistry, or the allied health sciences.

The B.S.E. curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005 Engineering Problem Solving I, 059:006 Engineering Problem Solving II, and 010:003 Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. For information on B.S.E. curriculum stems and common course requirements, see Bachelor of Science in Engineering in the College of Engineering section of the Catalog.

Students must select elective focus area courses according to guidelines established by the Department of Biomedical Engineering. See "Elective Focus Area" after the following curriculum list.

Biomedical engineering students also must choose a track and complete its requirements. They may choose from seven preapproved tracks: bioinformatics, bioimaging, biomaterials, cardiovascular biomechanics, cellular engineering, musculoskeletal biomechanics, or pre-medicine. Or they may propose a track that they have tailored to their own individual biomedical engineering interests. Each approved track has a group of four required courses and a list of suggested electives. For details about tracks and their requirements, visit BME Tracks on the department's web site.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

## FIRST YEAR

### First Semester

004:011 Principles of Chemistry I	4 s.h.
010:003 Rhetoric (or 010:001-010:002)	4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus	4 s.h.
059:005 Engineering Problem Solving I	3 s.h.
059:090 Engineering Success Seminar for First-Year Students	1 s.h.

### Second Semester

004:012 Principles of Chemistry II	4 s.h.
22M:032 Engineering Mathematics II: Multivariable Calculus	4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra	2 s.h.
029:081 Introductory Physics I	4 s.h.
051:090 First-Year Forum	1 s.h.
059:006 Engineering Problem Solving II	3 s.h.

## SECOND YEAR

### First Semester

002:010 Principles of Biology I	4 s.h.
22M:034 Engineering Mathematics IV: Differential Equations	3 s.h.
051:091 Professional Seminar: Biomedical Engineering	1 s.h.
059:007 Engineering Fundamentals I: Statics	2 s.h.
059:008 Engineering Fundamentals II: Electrical Circuits	3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics	3 s.h.

### Second Semester

027:130 Human Physiology	3 s.h.
051:091 Professional Seminar: Biomedical Engineering	1 s.h.
Courses required for the biomedical engineering major and the student's track	15 s.h.

## THIRD YEAR

### First Semester

051:030 Cell Biology for Engineers	3 s.h.
051:091 Professional Seminar: Biomedical Engineering	1 s.h.
Courses required for the biomedical engineering major and the student's track	13 s.h.

**Second Semester**

051:091 Professional Seminar: Biomedical Engineering	1 s.h.
Courses required for the biomedical engineering major and the student's track	15 s.h.

**FOURTH YEAR****First Semester**

051:085 Biomedical Engineering Senior Design I	4 s.h.
051:092 Leadership and Resourcefulness	1 s.h.
Courses required for the biomedical engineering major and the student's track	12 s.h.

**Second Semester**

051:086 Biomedical Engineering Senior Design II	4 s.h.
Courses required for the biomedical engineering major and the student's track	12 s.h.

**ADDITIONAL COURSES REQUIRED FOR ALL TRACKS**

In addition to the specific courses listed above, all students must complete the following required courses for the biomedical engineering major, regardless of which track they choose.

029:082 Introductory Physics II	3-4 s.h.
051:050 Biomaterials and Biomechanics	4 s.h.
051:060 Systems, Instrumentation, and Data Acquisition	4 s.h.
051:080 Bioimaging and Bioinformatics	4 s.h.
171:161 Introduction to Biostatistics	3 s.h.

**Elective Focus Area**

The biomedical engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see "Bachelor of Science in Engineering"/"Elective Focus Area" in the College of Engineering section of the Catalog. For a list of standard biomedical engineering elective focus area options and guidelines for tailored elective focus areas, contact the Department of Biomedical Engineering or visit its web site.

**Joint B.S.E./M.S.**

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for biomedical engineering undergraduates who intend to earn an M.S. in biomedical engineering. B.S.E./M.S. students may take some graduate-level course work, attend the departmental graduate seminar, and work on a master's thesis or research project while still undergraduates. They may count a limited amount of course work toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.50, and must submit a letter of application to the chair of the Department of Biomedical Engineering stating the intended area of specialization and the name of the M.S. advisor.

**Graduate Programs**

The department offers a Master of Science, with and without thesis, and a Doctor of Philosophy in biomedical engineering. The aim of graduate study at both levels is to educate students more deeply and broadly than is possible at the undergraduate level. The goal is to enable students to use contemporary methods at an advanced level during a professional career in engineering design, development, and research.

Each student's course of study is based on individual background and career objectives, and sound academic practice. Department faculty members have teaching and research expertise in areas related to cardiovascular and fluid biomechanics, musculoskeletal biomechanics, biomaterials and tissue engineering, bioinstrumentation, biosystems, biomedical imaging, biological signal analysis, bioinformatics and computational biology, and other allied fields.

An individual program for each student may be developed from courses offered by the biomedical engineering department and other departments, especially mechanical engineering, electrical engineering, physiology, mathematics, and biological sciences. M.S. students who want a more general program may combine emphases, while those who want some specialization in a particular field can achieve their goals through the combination of departmental courses and appropriate electives from other departments of the College of Engineering and the University.

Ph.D. programs may center on any one of the previously described areas through the choice of appropriate course work and research topic.

## **Master of Science**

The Master of Science in biomedical engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. Students who choose the nonthesis program must earn at least 6 s.h. of 200-level courses. Those who choose the thesis program may count no more than 6 s.h. of thesis research and writing credit toward the degree. The M.S. is designed to be a terminal degree or a step toward the Ph.D.

A tentative plan of study for each student is determined through consultation with an advisor. An M.S. committee of at least three graduate faculty members, including at least two on the biomedical engineering faculty, is appointed by the dean of the Graduate College. The student's plan of study is reviewed by the committee before the student has completed 18 s.h. of course work. The plan of study then is submitted for review to the department chair.

M.S. students must maintain a g.p.a. of at least 3.00 on a minimum of 30 s.h. of graduate work and must successfully complete the final examination administered by their committee.

Candidates for the M.S. (thesis or nonthesis) must complete the following courses or their equivalents with a grade of B or higher.

Advanced mathematics  
Human Physiology (027:130)  
Introduction to Biostatistics (171:161)

Individual study plans should include as much advanced work as individual aptitude and previous preparation permit.

## **Doctor of Philosophy**

The Doctor of Philosophy in biomedical engineering requires a minimum of 72 s.h. of graduate work, including acceptable transfer credit. At least 42 s.h. must be earned in formal course work taken after the B.S. is awarded, and at least 12 s.h. must be earned for research and thesis. For students entering with an M.S., at least 18 s.h. of formal course work must be completed beyond the M.S., and at least 12 s.h. must be earned for research and thesis. Based on research progress, examination results, or other measures, the student's graduate committee may require additional formal course work to strengthen perceived areas of weakness.

Admission to the Ph.D. program is conditional until students successfully complete a qualifying examination. The biomedical engineering faculty administers the exam and decides whether the student's performance on it is adequate for admission to the Ph.D. program.

Admission to Ph.D. candidacy requires a g.p.a. of at least 3.25 on all graduate work done at The University of Iowa. Upon completion of the course work specified in the plan of study and with the required grade-point average and the advisor's recommendation, students are admitted to the comprehensive examination by their committee.

Having satisfactorily completed these examinations, students usually have only to complete and defend their dissertation at the final examination. Requirements for the Ph.D. generally can be completed in about three years beyond the master's degree.

## **Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants who have earned a baccalaureate or postbaccalaureate degree in engineering or in the mathematical or physical sciences, with a g.p.a. of at least 3.00, and who have a combined verbal and quantitative score of 1250 on the Graduate Record Examination (GRE) General Test are eligible to be considered for admission to the Master of Science program in biomedical engineering. Students with a lower grade-point average or GRE General Test scores may be considered for conditional admission. They must achieve regular standing within 8 s.h. of initial registration by attaining a g.p.a. of at least 3.00 at The University of Iowa and regular acceptance by the department faculty. Students who do not meet these requirements are subject to dismissal.

Reference letters, research interests, previous graduate grade-point average, and other factors may be considered in making admission decisions.

Admission to the Doctor of Philosophy in biomedical engineering is conditional until students successfully complete a qualifying examination.

## **Financial Support**

Students are encouraged to apply for fellowships and assistantships. Contact the chair of the Department of Biomedical Engineering.

## **Facilities and Laboratories**

### **Required Undergraduate Laboratories**

Four dedicated undergraduate teaching laboratories are associated with the required and elective courses in biomedical engineering: Biomaterials Laboratory, Biomeasurements and Systems Laboratory, Biomechanics Laboratory, and Cell Biology for Engineers Laboratory.

#### **BIOMATERIALS**

The Biomaterials Laboratory is equipped to test varied properties of biomaterials, including hard and soft tissues and prostheses. The laboratory is used for biomaterials and senior design projects.

#### **BIOMEASUREMENTS AND BIOSYSTEMS**

The Biomeasurements and Biosystems Laboratory is equipped to measure biomedical variables of clinical and physiological interest, design and build electronic instrumentation, and conduct modeling experiments in physiology. It is used for 051:080 Bioimaging and Bioinformatics, elective courses in biomeasurements and biological systems analysis, senior design projects, and demonstrations in 051:030 Cell Biology for Engineers.

#### **BIOMECHANICS**

The Biomechanics Laboratory is equipped to perform experiments in biological flow analysis and in human musculoskeletal systems. The laboratory houses a pulse duplicator for simulating physiological pulsatile flow, a flow visualization set-up to analyze flow past stenosis and aneurysms, blood pressure and flow measurement devices, digital still and video cameras for kinematic analysis, a ski binding tester, a drop tower for impact testing, a two-channel EMG amplifier system, and a table-top material testing machine. The laboratory is used for 051:050 Biomaterials and Biomechanics, elective courses in cardiovascular and skeletal biomechanics, other elective courses, and senior design projects.

#### **CELL BIOLOGY FOR ENGINEERS**

The Cell Biology for Engineers Laboratory trains students in cell culture and biochemical analysis techniques as a foundation for future studies in quantitative cell-based studies. Students learn basic cell culture techniques, protein and nucleic acid analysis, adenovirus-mediated gene transfer techniques, microarray and analysis, and polymerase chain reaction (PCR) analysis of nucleic acids. They also are introduced to bioinformatics techniques used in cell biology. Major equipment in the lab includes laminar flow hoods, cell culture incubators, centrifuges, an ultracold freezer, protein and nucleic acid electrophoresis equipment, thermal cyclers, microscopes, an automated microplate reader, and varied support apparatuses used in cell-based studies. The lab is used for 051:177 Cell Material Interactions.

## **Research Facilities and Laboratories**

### **BIOINFORMATICS AND COMPUTATIONAL BIOLOGY LABORATORY**

The Bioinformatics and Computational Biology Laboratory is wired for high-speed networking (10- and 100-megabit and gigabit ethernet, hardwired and wireless, and ATM). It includes five dedicated Linux clusters, 126 computing systems, 178 CPUs, more than 100 gigabytes of RAM, and 2.5 terabytes of disk space. Computer resources include a dedicated compute server cluster of 18 Linux systems (36 CPUs) connected with a dedicated, switched, copper Gigabit Ethernet intranet--18 Dual AMD MP-2400 (2.2 GHz, 2 GB memory, 40 GB disk each); second dedicated compute server cluster of 16 Linux systems (32 CPUs) connected with a dedicated, switched, fiber-optic Gigabit Ethernet intranet--12 Dual Pentium III (500 MHz, 1 GB memory, 9 GB disk each), and four Dual Pentium III (500 MHz, 2 GB memory, 9 GB disk each); and third dedicated compute cluster of nine Linux systems (18 CPUs) connected with a dedicated 2.4 GB multistage intranet--eight Dual Pentium III (866 MHz, .5 GB memory, 45 GB disk each), and one Dual Pentium III (866 MHz, 1 GB memory, 45 GB disk each). There are two additional clusters: an 8-node cluster of

Pentium II class machines, and a 12-system heterogeneous cluster of various SUNs, HPs, and SGIs; four dedicated, dual fiber channel, redundant disk storage systems (RAID) 412 GB usable each. An additional 78 computers are used as compute servers, web servers, database servers, file servers, workstations, laptops, and for other developmental and experimental needs.

#### **BIOMATERIALS LABORATORY**

The Biomaterials Laboratory is equipped to characterize implant materials and biological tissues for their mechanical and thermal properties. Hard tissue histological slide preparations, for both microradiograph and optical, can be made for the study of interactions between bone and implant interactions. Metallographic sample preparations can be made and analyzed under optical microscopes.

The laboratory contains MTS (model 812) materials testing machine with recorder and controller; automatic data acquisition and process computer dedicated to the MTS machine; differential scanning calorimeter (Perkin-Elmer DSC-4 model); Omega x-ray generator with microradiographic attachment; Bronwill thin sectioning saw; Buehler Isomet thin sectioning saw; Buehler metallographic and petrographic grinding and polishing wheels; IR, polarizing, reflection research type microscopes; temperature-controlled bath; Lindberg tube furnace; strain gage attachment and measurement devices; videotape and play equipment; and conventional and vacuum oven with a diffusion pump.

#### **CARDIOVASCULAR BIOMECHANICS LABORATORY**

The Cardiovascular Biomechanics Laboratory houses an EMS Whitest uniaxial tension/compression testing system, a pulse-duplicating apparatus with flow loop, a spectrophotometer, silicone prototype fabrication utilities, high-speed/high-resolution cameras, a Sun Solaris workstation, and personal computers. The lab is equipped for soft tissue tensile/compression testing and viscoelastic creep/relaxation testing; simulation of flow through fabricated, anatomically realistic, patient-specific models of vasculature and heart valves; quantification of protein content in soft tissues; fabrication of realistic, compliant prototypes of human organs; and computational modeling of hemodynamics and tissue mechanics of normal and pathological cardiovascular organs.

#### **IOWA SPINE RESEARCH CENTER BIOMECHANICS LABORATORY**

The Iowa Spine Research Center Biomechanics Laboratory is fully equipped to perform studies of tissue and/or specimen response to mechanical loads. An MTS Bionix machine (with extended columns) servohydraulic testing machine permits application of uniaxial tension or compression in concert with axial torsion under displacement (rotation) or load control. In addition, the laboratory has a large base plate with T-slots, grips, an environmental chamber, and an independent controller with specialized test control and data acquisition and analysis routines.

An MTS Model 810 servohydraulic testing machine permits uniaxial tension or compression under displacement, load, or strain control. A bank of fatigue testing machines is planned.

An apparatus for testing spinal motion segments for their balance point and buckling behaviors also is available.

#### **JOLT/VIBRATION/SEATING LABORATORY**

The Jolt/Vibration/Seating Laboratory is equipped for investigation of the biomechanics of the spine, particularly problems related to low back pain due to the interaction between people and equipment in jolt (impact) and vibration environments. Three shakers are available to simulate impact and vibration environments.

Human responses are measured using equipment including load cells, electromyography, accelerometry, position sensors, and pressure pads. Portable sensors and data recorders are used to evaluate impact and vibration environments in the field and compare them to domestic and international guidelines and standards.

#### **LARGE-SCALE DIGITAL CELL ANALYSIS LABORATORY**

The Large-Scale Digital Cell Analysis Laboratory is involved in development of the large-scale digital cell analysis system (LSDCAS) and model-based approaches to problems of general biological interest. The facilities include the Real-Time Cell Analysis Laboratory, in the Seamans Center, with 10 Linux workstations, a Power Mac, printers, and scanners; and Real-Time Cell Analysis Data Center, also in the Seamans Center, with two Itanium servers (36 GB RAM/144 GB RAID storage), a fiber channel RAID storage system (2 terabytes), two dual-Pentium servers (2 MB RAM/36 GB disk storage), dual 30 amp/240 volt uninterruptible power supplies, 30-slot DLT tape library, fiber channel switch, fiber channel/SCSI bridge, rack-mount monitor/keyboard, and KVM switch.

The Quantitative Real-Time Cell Analysis Research Facility, located in the Medical Education and Research Facility, has a LSDCAS system consisting of three automated microscope systems capable of performing real-time single-cell analysis experiments, located in a dedicated darkroom to regulate illumination conditions. Each microscope system is controlled by a microcomputer interfaced to a digital camera and a microscope controller. This facility also includes a

small tissue culture support laboratory containing a cell incubator, and access to tissue culture hoods, freezers, refrigerators, and other equipment. The Biomedical Research Laboratory, in the Medical Education Building, has a tissue culture hood, dual-chamber incubator, Coulter cell counter, protein and nucleic acid gel electrophoresis and blotting apparatus, refrigerators, freezers, and a variety of tools used for biochemistry, cell biology, and molecular biology.

#### **ORTHOPAEDIC BIOMECHANICS LABORATORY**

The Orthopaedic Biomechanics Laboratory occupies 20 rooms on the ground floor of Westlawn. It is configured primarily for macroscopic-level physical testing of musculoskeletal constructs (e.g., bones, articular joints, orthopaedic implants) and for corresponding computational modeling. The physical testing area includes a multipurpose wet lab, a multipurpose dry lab, a surgical preparation room, a mechanical testing room, a machine shop, and a specimen storage area. The computational modeling area is arranged around eight separate workstation seats in two adjoining partially partitioned areas. Adjacent to these core operational areas are offices for faculty, research staff, students, and fellows; a secretarial/reception area; a conference room; and a library.

#### **SPINE BIOMECHANICS AND ERGONOMICS LABORATORY**

Located at University of Iowa Hospitals and Clinics, the Spine Biomechanics and Ergonomics Laboratory is equipped for investigation of the biomechanics of the spine, particularly problems related to production and treatment of low back pain. For example, electromyography equipment, accelerometry, a motion capture system, and a force plate are used to study response to sudden loads. A stadiometer is used to evaluate how varied activities affect shrinkage (creep) in the spine. A pressure pad is used to study interface pressures between people and chairs or beds.

#### **SPINE RESEARCH LABORATORY**

The Spine Research Laboratory is equipped for interdisciplinary research. The laboratory's MTS Bionix (with extended columns) servohydraulic testing equipment permits application of uniaxial tension or compression together with axial torsion under displacement or load control. The laboratory also has a fully automated 3-D motion measuring system. These devices are used to test mechanical properties of biomechanical joints and tissues, and for biomechanical evaluation of the performance of surgical treatment modalities. Other equipment includes digital cameras, surgical tools, and sensors (i.e., LVDTs, six-degrees-of-freedom load cell, pressure transducers, digital inclinometers).

A biaxial biomechanical culture system is available for application of controlled compression and/or shear forces onto the intervertebral disc during culture, in order to investigate the disc's biological responses to mechanical loads. This culture system is used in conjunction with an incubator in which cells and tissues can be cultured. Basic equipment for histology and immunohistochemical analyses includes a microtome, ovens, a microscope, and glassware for chemical processes.

#### **TISSUE ENGINEERING LABORATORY**

The Tissue Engineering Laboratory is outfitted with a fume hood, sink, laboratory counters, tables, and major tissue culture equipment, including a Baker SG3 laminar flow hood, a NuAir water jacked incubator, an autoclave, a vacuum pump, a Zeiss Axiovert S-100 phase contrast and bright field microscope with a computer interface, computer-controlled peristaltic pumps, a computer-controlled water bath, and a refrigerator and freezer.

The inverted microscope has an image capture system interfaced to a computer workstation with image processing software. A variety of sensors for performing temperature, pressure, and flow measurements also are available. The laboratory's computers are equipped with software for graphical, numerical, image analysis, word processing, and symbolic computation. Liquid nitrogen dewars, and CO<sub>2</sub> and N<sub>2</sub> tanks have been installed. An Ussing chamber with electrodes and a high impedance Keithley electrometer also are available.

#### **UPPER EXTREMITY BIOMECHANICS LABORATORY**

The Upper Extremity Biomechanics Laboratory is configured for image analysis, upper extremity physical testing, and radiographic archives. A two-sensor Optotrak system, coupled with The MotionMonitor software package, is used to collect upper-extremity kinematic data.

## **Biomedical Engineering Courses**

### **Special Topics**

Biomedical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

**051:002 Half-time Cooperative Education Training Assignment: Biomedical Engineering** 0 s.h.  
Registration for work assignment periods; for students participating in the Cooperative Education Program.

**051:029 First-Year Seminar** 1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities). Requirements: first- or second-semester standing.

**051:030 Cell Biology for Engineers** 3 s.h.  
Introduction to fundamental concepts in quantitative cell biology from an engineering perspective. Repeatable. Prerequisites: 002:010. Corequisites: 027:130, if not taken as a prerequisite.

**051:050 Biomaterials and Biomechanics** 4 s.h.  
Introduction to mechanics and materials in biological systems; principles of mechanics (stress, strain, motion, fluid flow) presented and used to characterize behavior of biological entities (tendon/ligament, bone and cartilage, blood, blood vessels, heart); principles of material science; role of biomaterials (metals, polymers, ceramics) in medical devices. Prerequisites: 059:007. Corequisites: 027:130.

**051:060 Systems, Instrumentation, and Data Acquisition** 4 s.h.  
Introduction to linear system theory and application, including convolution, Laplace Transform, transient analysis, sinusoidal steady-state analysis, and Fourier analysis; patient safety; acquisition and analysis of data collected from living systems, including concepts of analog circuit design with emphasis on operational amplifiers, active filters, clinical circuits, Nyquist concepts and digital conversion, and interface to computers; physics, acquisition, and analysis of medical images, especially those collected from X-ray, CT, MR, and ultrasound systems. Prerequisites: 059:006 and 059:008. Corequisites: 027:130 and 051:080.

**051:062 Design for Manufacturing** 3 s.h.  
Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes, including casting, welding, machining, forming; laboratory exercises and projects. Corequisites: 057:015. Same as 056:032, 058:032.

**051:080 Bioimaging and Bioinformatics** 4 s.h.  
Introduction to bioinformatics and biomedical imaging, including computer algorithms, machine learning, databases and SQL, the web and web servers, ethics, computer security, genome technology, public warehouses of biological data; medical imaging hardware and software for the acquisition and analysis of medical images, especially those collected from X-ray, CT, MR, and ultrasound systems; medical imaging system physics, including the interaction of energy with tissue, concepts of image spatial and temporal resolution; applications of filtering, enhancement, and image processing for the analysis of medical images. Prerequisites: 059:006. Corequisites: 027:130 and 051:060.

**051:085 Biomedical Engineering Senior Design I** 4 s.h.  
Individual or group work on a creative design project involving current problems in biomedical engineering; interdisciplinary projects involving biomedical engineering and health sciences faculty members; first semester of a year-long senior capstone design project. Prerequisites: 051:030, 051:050, 051:060, and 051:080. Requirements: senior standing.

**051:086 Biomedical Engineering Senior Design II** 4 s.h.  
Second semester of a year-long senior capstone design project begun in 051:085. Prerequisites: 051:085. Requirements: senior standing.

**051:090 First-Year Forum** 1 s.h.  
Presentations by faculty, graduate students, collaborators from the Carver College of Medicine, and Colleges of Dentistry and Law; may include visits to laboratories and industries.

**051:091 Professional Seminar: Biomedical Engineering** 1 s.h.  
Professional aspects of biomedical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Repeatable. Requirements: sophomore or higher standing.

**051:092 Leadership and Resourcefulness**

1 s.h.

Development of leadership skills and resourcefulness for real-world professional work and life. Repeatable.

Requirements: completion of six semesters of 051:090 and 051:091 combined.

**051:098 Individual Investigations: Biomedical Engineering**

arr.

Individual projects for biomedical engineering undergraduate students, such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development, research.

**051:121 Introduction to Bioinformatics**

4 s.h.

Basics of genetics and molecular biology; overview of bioinformatics and genome science, including genome projects, functional genomics, phylogenetics, proteomics, microarrays, DNA polymorphisms, data-mining algorithms; experimental methods, analytical approaches. Requirements: 002:128 or 099:120 or graduate standing. Same as 002:169, 055:121.

**051:122 Computational Genomics**

3 s.h.

Same as 002:174, 055:122, 127:173.

**051:123 Bioinformatics Techniques**

3 s.h.

Informatics tools and techniques applied to modern problems in biomedicine and basic life sciences; common tools, experience applying tools in contemporary problem settings; genomics and genetics, how to sequence a genome, transcription and expression, SNPs, Perl, BioPerl, Perl modules, Ensembl API, BLAST/BLAT, NCBI, UCSC, Ensembl Genome browsers, linkage, association, disease gene identification. Requirements: 002:081 and 059:009, or graduate standing.

**051:125 Contemporary Topics in Network Biology**

3 s.h.

Fundamentals of biological network analysis; focus on protein-protein interaction, regulatory, genetic interaction networks; principles of systems biology and biological networks, experimental methods and analytical approaches for specific networks side-by-side in detail; current emerging research areas in the field of systems biology; suitable for upper-level undergraduates and graduate students with background in biology, computer science, applied mathematics, statistics, physics, or engineering. Prerequisites: 051:121 or 127:170 or 002:170, and 051:122. Recommendations: knowledge in molecular cell biology and a programming language (i.e., Perl, Matlab, R, C).

**051:126 Introduction to Systems Biology**

3 s.h.

How higher-level properties of complex biological systems arise from the interactions among their parts; fundamentals of biological network analysis with focus on protein-protein interaction, regulatory, and genetic interaction networks; principles of systems biology and biological networks; experimental methods and analytical approaches for specific networks; current emerging research areas in the field of systems biology; didactic lectures and case-study projects. Prerequisites: 051:121 or 127:170 or 002:170, and 051:122. Recommendations: senior standing; or upper-level undergraduate or graduate standing with background in biology, computer science, applied mathematics, statistics, physics, or engineering.

**051:132 Regenerative Bioengineering**

arr.

Embryonic, fetal, and adult sources, human and non-human "stemness" of cells; references to biomaterials (i.e., those designed to direct organization, growth, and differentiation of cells in the process of forming functional tissue by providing physical and chemical cues); biomarkers and nano-medicine; promises of bioinformatics in support tissue engineering, gene and protein sequencing, gene expression analysis, protein expression, and interaction analysis. Prerequisites: 002:010. Corequisites: 027:130. Recommendations: 051:030.

**051:133 Advanced Cell Biology for Engineers**

3 s.h.

Introduction to techniques and quantitative analysis used in cell biology, taught from cell engineering perspective; focus on isolation, intracellular localization, and determination of mRNA levels of specific cellular proteins; analyze resulting data and interpret reliability of results; primarily a laboratory course. Prerequisites: 002:010, 027:130, and 051:030. Corequisites: 171:161.

**051:162 Digital Human Modeling and Simulation**

3 s.h.

Fundamentals of using computational methods in modeling, simulating, and animating articulated kinematic chains such as robots and humans; underlying mathematics, introductory concepts in kinematics and dynamics, serial chain kinematics and multibody dynamics; methods from kinematics and dynamics, coupled with biomechanical concepts, provide an integrated approach to predicting and analyzing serial link motion (e.g., human and robotic manipulator motion). Prerequisites: 057:010. Same as 058:136.

**051:178 Fast-Track Biomedical Engineering Design 1-A** 3 s.h.

Part A of first semester of year-long senior capstone design project; individual or group design project involving biomedical engineering problems. Prerequisites: 051:050, 051:075, and 051:080. Corequisites: 051:180. Requirements: senior standing.

**051:179 Fast-Track Biomedical Engineering Design 2-A** 3 s.h.

Part A of second semester of year-long senior capstone design project started in 051:178 and 051:180. Prerequisites: 051:178 and 051:180. Corequisites: 051:183. Requirements: senior standing.

**051:180 Fast-Track Biomedical Engineering Design 1-B** 1 s.h.

Part B of first semester of year-long senior capstone design project; individual or group project involving biomedical engineering problems. Corequisites: 051:178.

**051:183 Fast-Track Biomedical Engineering Design 2-B** 1 s.h.

Part B of second semester of year-long senior capstone design project started in 051:178 and 051:180. Prerequisites: 051:178 and 051:180. Corequisites: 051:179. Requirements: senior standing.

**051:225 Contemporary Topics in Bioinformatics** 3 s.h.

Next-generation sequencing technology and design, next-generation sequencing analysis and algorithms, contemporary topics in bioinformatics, genetics of disease (visual system as a model) and genetic engineering; grant writing. Recommendations: 051:123 or advanced programming skills and understanding of DNA.

**Biomaterials****051:168 Polymer Fundamentals** 1 s.h.

Basic knowledge of polymers required as a foundation for other UI courses on polymers: basic polymer terminology, polymer groups, polymerization mechanisms, molecular weight determination. Five weeks. Same as 052:140.

**051:169 Polymers as Biomaterials** 2 s.h.

Structure-property relationships and in vivo and in vitro performances of polymers used to manufacture implants and other devices. Prerequisites: 051:070.

**051:170 Biomaterials and Implant Design** 3 s.h.

Introduction to material and mechanical considerations underlying a broad range of medical implants with emphasis on understanding the factors involved in orthopaedic device design; major classes of biomaterials; considerations that underly implant design, use, and failure; and contemporary areas of biomaterials and implant development. Prerequisites: 057:019 and 051:150.

**051:173 Metals as Biomaterials** 3 s.h.

Property-structure relationship of metals used to fabricate implant materials; their interactions in vivo. Prerequisites: 051:070.

**051:175 Tissue Engineering** 3 s.h.

Introduction to tissue engineering; scaffolds, fundamentals, principles. Same as 046:290, 052:227.

**051:176 Biomaterials Laboratory** 3 s.h.

Practical experience in design, fabrication, and testing of biomaterials and devices; mechanical testing, tissue response, design to optimize response. Prerequisites: 051:070. Requirements: basic understanding of materials.

**051:177 Cell Material Interactions** 3 s.h.

Current thought and techniques in the engineering and assessment of biomaterials. Prerequisites: 027:130, 051:030, and 051:050.

**051:215 Interfacial Engineering for Biological Systems** 3 s.h.

Survey of current literature on interfacial engineering for biomedical engineering; student presentation and discussion of articles. Requirements: organic or polymer chemistry.

**Biomechanics/Biofluids****051:150 Musculoskeletal Biomechanics**

3 s.h.

Principles of solid mechanics applied to analytical, experimental investigation of biological systems; emphasis on applications in kinesiology of human musculoskeletal system. Prerequisites: 057:019. Requirements: graduate standing.

**051:151 Intermediate Mechanics of Deformable Bodies**

3 s.h.

Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: 057:019. Same as 053:140, 058:150.

**051:152 Ergonomics of Occupational Injuries**

3 s.h.

Epidemiology, surveillance systems, ergonomics, biomechanics, physiology, psychology, legal aspects, and cost control. Prerequisites: 051:050 or 051:150.

**051:154 Cardiac and Vascular Mechanics**

3 s.h.

Bio-solid mechanics of the cardiovascular system; mechanical properties of ventricles, valves, and blood vessels, their normal function, how they are affected by disease states; design of artificial organs, prostheses. Prerequisites: 057:019.

**051:155 Cardiovascular Fluid Mechanics**

3 s.h.

Anatomy and physiology of the human circulatory system, pressure-flow relationship in arteries, elastic properties of the arterial wall, steady and pulsatile flow dynamics, flow dynamics of human heart valves, flow dynamics past valve prostheses, fluid mechanical measurements in circulation, relationship between fluid mechanics and diseases in human circulation. Prerequisites: 057:019.

**051:157 Introduction to Applied Biomedical Finite Element Modeling**

3 s.h.

Introduction to finite element modeling as applied to biomechanics-related applications. Prerequisites: 051:050 and 057:019. Corequisites: 058:115.

**051:159 Design of Circulatory Implants and Artificial Organs**

3 s.h.

Exploration of current innovations and new technologies; examination of various devices currently on the market from a standpoint of design variables and objectives (i.e., stents, heart valves, dialyzers, VADs, artificial organs); biomedical engineers' vital role in design and improvement of these implants. Prerequisites: 051:155. Corequisites: 051:154.

**051:220 Human Response to Vibration**

3 s.h.

Exploration of the human body, a complex mechanism exposed to mechanical shock and vibration from many sources, under many conditions; interactions and applicable exposure standards, effects of whole-body and hand-arm vibration. Requirements: graduate standing in College of Engineering or College of Public Health.

**051:253 Spine Mechanics**

3 s.h.

Biomechanics applied to mechanics of the human spine; clinical aspects; state-of-the-art in spine research; basic engineering principles for biomechanical analysis. Prerequisites: 051:150.

**051:255 Advanced Biofluid Mechanics**

3 s.h.

Hemodynamic theories of atherogenesis, Womersley models, steady and unsteady flows in curvature, bifurcation and branching arterial segments, flow dynamics past prosthetic implants, experimental and computational models, particulate and mass transport simulations in human circulation. Prerequisites: 051:155.

**051:256 Advanced Biological Soft Tissue Mechanics**

3 s.h.

Topics in vascular solid mechanics; study of vascular tissue from theoretical (constitutive modeling), experimental, and computational perspectives.

**051:257 FE Analysis in Orthopaedic Biomechanics**

3 s.h.

Finite element modeling techniques applied to musculoskeletal (orthopaedic) biomechanics; use of ABAQUS finite element software. Prerequisites: 051:150. Corequisites: 051:158 and 058:115.

## Bioelectrical Engineering

### 051:141 Advanced Biological Systems

3 s.h.

Application of principles of linear system (control) theory to analysis of biological systems; development of computer-simulation techniques to study dynamic response of physiological systems.

### 051:148 Digital Image Processing

3 s.h.

Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: 051:040 or 055:040, and 051:060 or 055:043. Same as 055:148.

### 051:182 Biomedical Signal Processing

3 s.h.

Application of signal processing methods (e.g., Fourier, Laplace, z-transforms) to biomedical problems, such as analysis of cardiac signals, circadian rhythm, the breathing cycle; computer simulation lab.

### 051:185 Medical Imaging Physics

3 s.h.

Physics and data acquisition techniques of major medical imaging modalities (X-ray, CT, MR, ultrasound, PET, SPECT); physical interactions of energy with living tissue; principles and methods for acquiring imaging data and subsequent image construction; how individual modalities influence image quality; MATLAB programming required. Second in a medical imaging sequence. Requirements: background in physics and computers, and anatomy or biology or physiology.

### 051:186 Multidimensional Medical Imaging Process

3 s.h.

Algorithms developed to process and analyze large volumetric data sets; physics of CT, MRI, ultrasound, 3-D convolution and filtering, geometric transformations, shape features, surface segmentation, regional segmentation, surface tiling, surface reconstruction, volumetric registration. Third in a medical imaging sequence. Prerequisites: 051:185.

### 051:187 Health Informatics I

3 s.h.

Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as 021:275, 050:283, 056:186, 074:191, 096:283, 174:226, 200:110.

### 051:189 Health Informatics II

3 s.h.

Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as 021:280, 056:287, 074:192, 096:289, 200:120.

### 051:280 Functional Magnetic Resonance Imaging

2-3 s.h.

Basic physics principles of functional magnetic resonance imaging and approaches to data acquisition, including BOLD imaging, arterial spin labeling, and magnetic source imaging; data analysis strategies; paradigm design and development. Same as 132:250.

### 051:287 Insight into Images

3 s.h.

## Graduate Seminars, Advanced Topics, Research

### 051:191 Seminar in Biomedical Engineering

0 s.h.

Presentation of recent advances in biomedical engineering. Requirements: graduate standing.

### 051:198 Individual Investigations: Biomedical Engineering

arr.

Individual projects for biomedical engineering graduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

### 051:199 Research: Biomedical Engineering M.S. Thesis

arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of the requirements for the M.S. with thesis in biomedical engineering. Requirements: graduate standing.

**051:298 Advanced Individual Investigations in Biomedical Engineering**

arr.

Advanced individual projects such as laboratory study, engineering design projects, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

**051:299 Research: Biomedical Engineering Ph.D. Dissertation**

arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. with thesis in biomedical engineering.

# Chemical and Biochemical Engineering

**Chair:** David W. Murhammer

**Professors:** Gregory R. Carmichael, Douglas Flanagan, Vicki Grassian, C. Allan Guymon, David W. Murhammer, Tonya L. Peebles, David G. Rethwisch, Alec B. Scranton, Venkiteswaran Subramanian, Dale Wurster

**Professor emeritus:** J. Keith Beddow

**Associate professors:** Gary Aurand, Chris Coretsopoulos, Umran Dogan, Stephen K. Hunter, Julie L.P. Jessop, Lee Kirsch, Aliasger Salem

**Assistant professors:** Jennifer Fiegel, Eric Nuxoll, Charles Stanier

**Lecturer:** Audrey Butler

**Undergraduate degree:** B.S.E. in Chemical Engineering

**Graduate degrees:** M.S., Ph.D. in Chemical and Biochemical Engineering

**Web site:** <http://www.cbe.engineering.uiowa.edu/>

Chemical and biochemical engineers combine engineering principles with knowledge of mathematics and specific sciences—chemistry, the biological sciences, and physics—to develop and operate processes that convert raw materials into products that benefit society. For example, biochemical engineers might develop and operate processes to convert switchgrass into biofuels or to mass produce an antibiotic.

Chemical and biochemical engineers engage in a wide variety of activities that benefit the global community. Fuel cells, solar energy, and biorenewable fuels (e.g., biodiesel or ethanol) fall within the realm of chemical engineering. Chemical engineering distinguishes itself from other engineering professions with its reliance on chemical reactions and physicochemical transformations to produce a wide variety of important materials and products.

Biochemical engineers are involved in a wide variety of industrial biocatalytic, fermentation, and cell culture processes that generate products ranging from the high fructose corn syrup in soft drinks to recombinant human insulin.

As part of their training, chemical and biochemical engineers learn ethical design and a respect for the larger issues in any design, such as community health, employee safety, and the global implications of the design. The University of Iowa's curriculum emphasizes chemical process safety and environmentally conscious chemical engineering design.

Chemical and biochemical engineers work in a wide range of industries, including petroleum and specialty chemical production, polymer and plastic production, food processing, microelectronics production, pharmaceutical production, biochemical processing, and environmental compliance. Potential jobs include production, process development, plant design and construction, and fundamental research. Many experienced chemical and biochemical engineers move through management ranks to high-level administrative positions.

## Undergraduate Program

The department offers the Bachelor of Science in Engineering in chemical engineering.

The program produces graduates who have a strong foundation of scientific and technical knowledge and are equipped with problem solving, teamwork, and communication skills that will serve them throughout their careers. The program's educational objectives are to produce graduates who:

- pursue careers as practicing chemical engineers in fields such as pharmaceuticals, microelectronics, chemicals, polymers/advanced materials, food processing, energy, or environmental engineering;
- pursue advanced studies in disciplines such as chemical engineering, environmental engineering, medicine, law, or business; and
- assume professional leadership roles.

The program uses the following methods and strategies to achieve its educational objectives:

- foster a personalized, supportive environment for all students by taking advantage of the unique combination of a small college atmosphere in a major research university;
- enrich the undergraduate experience through cultural diversity, international opportunities, and experiential learning;
- provide a solid foundation and understanding of the fundamental principles of mathematics, science, and engineering;
- provide students with experience in learning and applying tools (e.g., computer skills) to the solution of theoretical and open-ended chemical engineering problems;
- provide students with opportunities to participate in multidisciplinary teams, and to develop and practice written and oral communication skills, both within the team and to a broader audience;
- provide students with opportunities to design and conduct chemical engineering experiments, and to design systems, components, and chemical processes to meet specific needs and constraints; and
- provide a contemporary grounding in professional responsibility, including ethics, the global and societal impact of engineering decisions, and the need for lifelong learning.

## Bachelor of Science in Engineering

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The chemical engineering major provides a

broad education at the leading edge of technology. It emphasizes fundamental concepts, problem solving, laboratory techniques, and communication skills. The biological sciences join physics, chemistry, and mathematics as foundation disciplines for chemical engineering.

The B.S.E. curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005 Engineering Problem Solving I, 059:006 Engineering Problem Solving II, and 010:003 Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. For information on B.S.E. curriculum stems and common course requirements, see Bachelor of Science in Engineering in the College of Engineering section of the Catalog.

For chemical engineering students, the sophomore, junior, and senior years emphasize chemical engineering courses such as process calculations, engineering flow and heat exchange, chemical engineering thermodynamics, mass transfer and separations, chemical reaction engineering, chemical process safety, chemical engineering laboratories, biochemical engineering, process dynamics and control, and process design. Experience in instrumentation, analysis, and design is obtained through an integrated laboratory program. Routine use is made of computer-based data analysis, simulation, and design.

Students are required to participate in at least one enriching activity, which may include a research experience, a cooperative education or internship experience, study abroad, completion of the Certificate in Technological Entrepreneurship, or other approved experiences.

Chemical engineering students may gain depth of knowledge related to a career path through their selection of science, engineering, humanities, and social science electives. Several preapproved elective focus areas may help students define potential careers.

Students must select elective focus area courses according to guidelines established by the Department of Chemical and Biochemical Engineering. See "Elective Focus Area" after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

Seminars do not count toward the 128 s.h. required for the degree.

## **FIRST YEAR**

### **First Semester**

004:011 Principles of Chemistry I	4 s.h.
010:003 Rhetoric (or 010:001-010:002)	4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus	4 s.h.
059:005 Engineering Problem Solving I	3 s.h.
059:090 Engineering Success Seminar for First-Year Students	1 s.h.

### **Second Semester**

004:012 Principles of Chemistry II	4 s.h.
22M:032 Engineering Mathematics II: Multivariable Calculus	4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra	2 s.h.
029:081 Introductory Physics I	4 s.h.
052:090 CBE Departmental Seminar	0 s.h.
059:006 Engineering Problem Solving II	3 s.h.

## **SECOND YEAR**

### **First Semester**

22M:034 Engineering Mathematics IV: Differential Equations	3 s.h.
052:041 Process Calculations	3 s.h.
059:007 Engineering Fundamentals I: Statics	2 s.h.

059:008 Engineering Fundamentals II: Electrical Circuits	3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics	3 s.h.
General education component course	3 s.h.

**Second Semester**

004:121 Organic Chemistry I	3 s.h.
052:091 Professional Seminar: Chemical Engineering	0 s.h.
052:103 Chemical Engineering Thermodynamics	3 s.h.
052:151 Engineering Flow and Heat Exchange	3 s.h.
General education component course	3 s.h.
Statistics elective	3 s.h.

**THIRD YEAR****First Semester**

004:122 Organic Chemistry II	3 s.h.
004:141 Organic Chemistry Laboratory	3 s.h.
052:091 Professional Seminar: Chemical Engineering	0 s.h.
052:161 Mass Transfer and Separations	3 s.h.
052:171 Thermodynamics/Transport Laboratory	3 s.h.
057:015 Materials Science	3 s.h.

**Second Semester**

052:091 Professional Seminar: Chemical Engineering	0 s.h.
052:105 Chemical Reaction Engineering	3 s.h.
052:172 Chemical Reaction Engineering/Separations Laboratory	2 s.h.
052:187 Chemical Process Safety	3 s.h.
Elective focus area courses	6 s.h.
General education component course	3 s.h.

**FOURTH YEAR****First Semester**

052:091 Professional Seminar: Chemical Engineering	0 s.h.
052:108 Introduction to Biochemical Engineering	3 s.h.
052:184 Chemical Engineering Process Design I	2 s.h.
052:185 Process Dynamics and Control in Design	3 s.h.
Advanced chemical science elective	3 s.h.
Elective focus area courses	6 s.h.

**Second Semester**

052:092 Senior Enriching Activities Seminar	0 s.h.
052:186 Chemical Engineering Process Design II	3 s.h.
Advanced chemical science electives	6 s.h.
Elective focus area course	3 s.h.
General education component course	3 s.h.

### **Elective Focus Area**

The elective focus area enables students to gain depth of knowledge in a career path. Students meet with their chemical engineering academic advisor to discuss career options and develop a plan for choosing electives based on their career interests. The department offers preapproved elective focus areas in biochemical engineering, pharmaceuticals, chemical process engineering, polymers, energy and environment, pre-medicine, business, and entrepreneurship.

Students may prefer to develop an individualized elective focus area, which is subject to approval by the department's curriculum committee. See the Department of Chemical and Biochemical Engineering web site for detailed descriptions of preapproved elective focus areas, guidelines for tailored elective focus areas, and typical four-year study plans based on elective focus areas.

### **Joint B.S.E./M.S.**

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for chemical engineering undergraduates who intend to earn an M.S. in chemical and biochemical engineering. B.S.E./M.S. students may count 12 s.h. of course work (typically advanced chemistry sequences and electives) toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application and statement of purpose to the chair of the Department of Chemical and Biochemical Engineering.

## **Graduate Programs**

The Department of Chemical and Biochemical Engineering offers a Master of Science, with and without thesis, and a Doctor of Philosophy. Through course work and research, graduate students gain an understanding of the principles of engineering science and use those principles in contemporary applications related to energy, the environment, biotechnology, and materials. The department emphasizes research, since most opportunities for graduates are in research and development.

### **Research and Study Areas**

Current research strengths of the Department of Chemical and Biochemical Engineering are in the areas of global and regional atmospheric modeling, biomaterials medical engineering, cellular engineering, photopolymerization, biocatalysis, and biofuels.

### **BIOCHEMICAL ENGINEERING**

Biochemical engineering involves the industrial application of enzymes, microorganisms, cells, and tissues for production of chemicals, pharmaceuticals, and other materials of commercial value.

The department is working to solve problems with the use of insect cell culture for recombinant protein and viral insecticide production. Research is being conducted to improve the quality and quantity of recombinant proteins produced in large-scale bioreactors. In addition, a continuous viral insecticide production system is being developed for the large-scale production of these environmentally safe alternatives to chemical insecticides. The insect cell/baculovirus system is being used as a model system to investigate the role of oxidative stress in viral cytotoxicity.

Carbon dioxide accumulation, which commonly occurs in large-scale bioreactor systems, affects insect cell growth; the department's researchers are investigating the corresponding effect on insect cell growth and the baculovirus infection process.

The department works to design technologies for the characterization and use of extremophiles, organisms that possess unusual abilities to survive in harsh chemical environments. In these studies, novel bioreactor systems that can withstand extremes of temperature, pressure, pH, and salinity are being developed. Extremophile strategies for survival also are being studied, with the aim of discovering unique enzymes for industrial application as well as evaluating molecular interactions that govern protein stability under extreme conditions.

In addition to the study of natural extremophiles, efforts to engineer stability in biocatalysts for industrial processing are under way. Novel solvent-tolerant enzymes and organisms for environmentally beneficial chemical reactions are being generated using molecular biology tools. Combinations of chemical and biological processing are being used to produce valued chemicals from renewable feedstocks. This work contributes to the interdisciplinary training of engineers and scientists to address the challenges of minimizing and cleaning up environmental pollution, while maximizing the economic benefits of chemical processing.

The department also conducts research in structural enzymology, molecular mechanisms of host-pathogen interactions, and biocatalysis. The laboratory uses biophysical, structural, and molecular biology techniques to understand the details of enzyme action. This information is used to design and engineer biocatalysts for the production of chiral compounds. Work also is under way on cellular recognition and signaling processing during infection and inflammation. Knowledge gained from these studies aids the design of drugs and biological sensors for bacterial presence.

The integration of biotechnology with traditional chemical engineering has led to an interdisciplinary area involving other engineering departments and the Departments of Chemistry, Biology, Biochemistry, Free Radical and Radiation Biology, and Microbiology and the College of Pharmacy. This focus includes involvement in the University's Center for Biocatalysis and Bioprocessing, whose fermentation capabilities are highlighted by its 1,500-liter fermentor.

#### **BIOMEDICAL RESEARCH**

The department's research involves a multidisciplinary approach to solving problems in the medical field, particularly in drug delivery and biomaterials.

Researchers are working to develop safe delivery systems that target drugs precisely in the human body and avoid premature metabolism or elimination. To treat respiratory infections, micron-sized particles are being engineered with properties that enhance aerodynamic performance, particle stability, and targeting within the respiratory tract. Polymeric vehicles are being designed to provide sustained protection and prevention against cancers by kick-starting the immune system. Finally, work is under way to overcome barriers to efficient delivery of DNA, with the potential to provide cures for genetic disorders such as cystic fibrosis and X-Linked Severe Combined Immunodeficiency (X-SCID). This work brings together collaborators from the Carver College of Medicine, the Colleges of Dentistry and Pharmacy, and the Departments of Chemistry and Biomedical Engineering.

In the biomaterials realm, new materials are being developed that can interact with the human body to perform certain functions while maintaining compatibility. A project with the Department of Ophthalmology and Visual Sciences involves development of biodegradable stent materials to alleviate a serious eye disease induced by a blood clot in the central retinal vein. Research with the Department of Otolaryngology--Head and Neck Surgery is exploring the development of photo-patterned surfaces for directed growth of cells to improve cochlear implants. Current research in the tissue engineering field applies microfabrication techniques to develop scaffolds that are biodegradable and biocompatible with cell-interactive properties, and that directly incorporate controlled-release functionality within the scaffold.

The Department also conducts research that is focused on self-assembling systems, rational design of novel drug and gene delivery systems, and development of sophisticated scaffolds for tissue-specific regeneration. In tissue engineering, microfabrication techniques are applied to novel biomaterials to provide spatial control over tissue formation and to integrate minimally invasive scaffold delivery strategies. In drug and gene delivery, researchers are exploring the synergistic application of degradable particle technology, CpG oligonucleotides, and heat-shock protein therapy for generating sustained, stronger immune responses against carcinomas.

Students involved in animal research have access to the University's Office of Animal Resources, which is adjacent to the University of Iowa Hospitals and Clinics.

#### **ENERGY AND ENVIRONMENT**

Chemical engineers are well-suited to make major contributions toward meeting challenges for the environment, energy, and sustainable development. The Department of Chemical and Biochemical Engineering has an active research program in the environmental areas of air pollution, biofuels, atmospheric chemistry, atmospheric CO<sub>2</sub> fluxes, environmental change, bioremediation, and the design of new environmentally compatible technologies. Particular emphasis is placed on the chemistry and physics of local, regional, and global air-pollution problems. Research in support of this activity includes high-speed computing and detailed sensitivity analysis.

This work involves three centers and institutes on campus. The Center for Global and Regional Environmental Research brings together University scientists and scholars from more than 20 disciplines, including chemistry, civil and environmental engineering, geography, geology, law, and medicine. The center's chief area of concern is environmental change. Chemical and biochemical engineering researchers interact with scientists at IIHR--Hydroscience & Engineering, a research institute focusing on applied fluid mechanics; their collaborations involve environmental fluid mechanics and air pollution field studies. The Nanoscience & Nanotechnology Institute at UI provides an interdisciplinary home for chemical and biochemical researchers working on the development, application, and environmental and health effects of nanomaterials.

#### **PHOTOPOLYMERIZATION**

Photopolymerizations are chain reactions in which a liquid monomer is converted to a solid, durable polymer in a

process triggered by light of the appropriate wavelength. The use of light, rather than heat, to drive a polymerization reaction offers advantages in developing new processes or products.

Photopolymerizations provide both spatial control and temporal control of reactions, since light can be directed to locations of interest in the system and is easily shuttered on or off. Photopolymerizations also provide solvent-free formulations, which reduce the emissions of volatile organic pollutants, and they exhibit extremely rapid reaction rates. These advantages have led to tremendous growth in the application of photopolymerizations in the private sector, but much of this growth has occurred without a fundamental understanding of the underlying chemical processes.

The department's research in this area focuses on comprehensive characterization of the kinetics, mechanisms, structure, and properties of photopolymerizations. Work includes the following types of studies: characterization of the photochemical processes by which polymerizations may be initiated; kinetic characterization of cationic photopolymerization; development of methods for photopolymerization of thick polymers and composites; development of photopolymerization systems based upon agricultural feedstocks; new methods for monitoring high-speed photopolymerization reactions; nanostructured materials through photopolymerization; biomedical devices formed by photopolymerization; and influence of order on photopolymerization reactions.

## **Master of Science**

The Master of Science in chemical and biochemical engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. All M.S. students must earn at least 24 s.h. in approved graduate-level course work; courses numbered below 100 may not be used to satisfy this requirement. Thesis students earn 6 s.h. in 052:199 M.S. Thesis Research: Chemical and Biochemical Engineering. Nonthesis students earn 6 s.h. in additional approved course work and must complete and pass a final written exam on the basic core material.

M.S. students must maintain a graduate g.p.a. of at least 3.00. Each student must pass a final M.S. examination.

There is no foreign language requirement.

Graduate students who receive assistantships, fellowships, or other financial support awarded with the understanding that they will pursue an advanced degree with thesis may not elect the nonthesis option.

Graduate students in the nonthesis program may petition for entry into the thesis program or the Ph.D. program by requesting a change of status through the Graduate College. The request is reviewed by the graduate admissions committee. If approved by the committee, it is forwarded to the chemical and biochemical engineering faculty for final approval. Students then are assigned to research advisors as though they were newly admitted graduate students. For a detailed description of program requirements, see the Department of Chemical and Biochemical Engineering web site.

## **Doctor of Philosophy**

The Doctor of Philosophy in chemical and biochemical engineering requires a minimum of 72 s.h. of graduate credit. However, the degree is granted primarily on the basis of achievement rather than on the accumulation of semester hours. Candidates usually are expected to have completed three academic years in residence, or two years if they already hold a recognized master's degree.

All candidates must complete a core course requirement, which consists of a course in transport phenomena, a course in reaction engineering, a course on proposal writing, and a thermodynamics course, as well as six additional courses (total of 30 s.h.).

Ph.D. candidates must maintain a graduate g.p.a. of at least 3.25.

All doctoral students are required to satisfy a qualifying requirement and pass a comprehensive examination before they can become candidates for the degree. The Ph.D. comprehensive examination is the presentation and defense of the candidate's Ph.D. research proposal. These examinations are arranged by members of the examining committee and may be repeated at the committee's discretion. Comprehensive examination policies are published in the Manual of Rules and Regulations of the Graduate College; see Graduate College in the Catalog. There is no foreign language requirement. A final examination, which is a defense of the thesis, completes the doctoral program. For a detailed description of program requirements, visit the Department of Chemical and Biochemical Engineering web site.

## **Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Applicants should have a B.S. in chemical engineering or related discipline, with satisfactory grades, from a recognized college or university in the United States, and a g.p.a. of at least 2.80. Students who do not meet these requirements may be granted conditional admission, with the department chair's approval. Graduates of non-U.S. universities may

be accepted, depending on evaluation of their records.

Applicants must submit their verbal and quantitative scores on the Graduate Record Examination (GRE) General Test with their applications.

Graduate courses in chemical and biochemical engineering are designed for students who have an undergraduate background in chemical engineering. Exceptional students from other areas also may apply for admission to the M.S. or the Ph.D. program in chemical and biochemical engineering. If admitted, they may be required to take specific undergraduate courses to prepare them for graduate course work.

## **Financial Support**

A number of fellowships, assistantships, and scholarships are awarded on a competitive basis to graduate students who qualify.

Graduate students have the opportunity to receive interdisciplinary research training in several fellowship programs administered through the Center for Biocatalysis and Bioprocessing (CBB). The program provides research training in areas that combine basic and applied research. Each year the center offers fellowships to doctoral students in biotechnology. These are funded by grants from the National Institute of General Medical Sciences, National Institutes of Health (NIH), National Science Foundation (NSF), and the CBB with funding from the State of Iowa. Through these programs, chemical and biochemical engineering students interact with students and faculty members from biochemistry, biology, chemistry, civil and environmental engineering, medicinal and natural products chemistry, and microbiology.

## **Facilities and Laboratories**

### **Undergraduate Core**

#### **MATERIALS SCIENCE LABORATORY**

The Materials Science Laboratory is equipped with optical microscopes and facilities for metallographic preparation. Mechanical tensile testing instruments, heat treatment and sintering furnaces, and hardness testing machines also are available. Teaching aids include metallography specimen kits and crystallography packages.

### **Required Undergraduate Laboratories**

#### **CHEMICAL ENGINEERING LABORATORY**

The Chemical Engineering Laboratory provides instruction for undergraduate students. It is equipped for experimentation in transport phenomena, heat transfer, fluid flow, chemical engineering unit operations, and reaction kinetics and catalysis. The laboratory includes pilot plant equipment, such as a distillation column, wiped film evaporator, shell-and-tube heat exchanger, jacketed kettle, and agitated extractor. Other equipment includes an advanced reactive system screening tool, concentric tube heat exchanger, reciprocating plate extractor, membrane gas separator, and a tangential flow filtration system. Analytical equipment includes gas chromatographs, UV/visible spectrophotometers, and high-performance liquid chromatography.

The laboratory is continuously updated to reflect advances at the forefront of chemical engineering technology. Additionally, a wide array of small equipment is available to support laboratory projects and demonstrations in chemical engineering courses and for use by students performing independent investigations.

#### **CHEMICAL PROCESS SAFETY LABORATORY**

The Chemical Process Safety Laboratory is an integral part of 052:187 Chemical Process Safety. It is equipped with two flash-point testers, an advanced reactive system screening tool (ARSST), a flammability limits tester, a Hartmann tube, a Van de Graaff generator, two high impedance electrometers, a field meter, a Faraday cage, and relief sizing software. This equipment is used in a series of experiments to demonstrate the principles of flammability, reactivity, explosions, relief valve sizing, and electrostatics relevant to industry.

#### **PROCESS CONTROL LABORATORY**

The Process Control Laboratory is a modern, computer-based instructional laboratory that is integral to 052:185 Process Dynamics and Control in Design. The laboratory consists of computer control of a shell-and-tube heat exchanger, and a level-and-flow control process rig with state-of-the art industrial control interfaces.

The Computer Control Laboratory offers an ensemble of learning experiences with the same equipment.

Additional laboratories provide instruction in the use of process simulators that provide analogies and better insight into the control process. Topics include determination of the gain and time constants for single-capacitance systems; determination of gain, time constant, and damping factor of second-order processes; determination of open-loop and closed-loop response to step-and-ramp changes in input for single-capacitance and multicapacitance processes; approximations of multicapacitance systems as first-order and second-order processes with dead time; analysis of instrumentation characteristics and transfer functions; tuning and optimization of feedback control parameters (P, PI, PID); system identification through frequency response methods; and determination of system stability.

Experimental arrangements in the laboratory are simple enough in design to be easily understood, yet complicated enough to help students appreciate system characteristics inherent in industrial processes (e.g., large time lags, error in parameter estimation).

### **Graduate Facilities and Laboratories**

The department offers a wide variety of facilities to support and develop research activities.

#### **AIR POLLUTION COMPUTATIONAL, FIELD, AND LABORATORY STUDIES**

The department maintains extensive facilities for computational, field, and laboratory studies of air pollution, carbon cycle gases, aerosols, and nanoparticles at the Center for Global and Regional Environmental Research (CGRER). The center occupies 5,000 square feet of laboratory and office space on the fourth floor of the Iowa Advanced Technology Laboratories.

CGRER houses one R2 ImmersaDesk Portable Large Scale Visualization System and is linked on campus to two more R2 ImmersaDesk units.

The center's computer laboratory for environmental and spatial data analysis provides numerous Windows and UNIX workstations, sophisticated software packages, and workstations and a file server necessary to run intensive visualization programs. The network backbone is University supported with high-speed wireless throughout. A variety of digital environmental databases and an extensive library of documentation and related references are available. There are 4 Beowulf Linux clusters on site and Linux clusters of 4, 16, 18, and 20 nodes for large computations and data assimilation. CGRER retains 15 TB of redundant storage and 50 TB of total storage; local storage space is scalable and expandable. A variety of software packages and programming languages are available for data analysis and display, including Arc/Info, Arcview, NCAR Graphics, Matlab, S-Plus, and Vis5d, as well as geographical information software. The ESRI software suite is part of a University-wide site license.

Laboratory and field equipment includes aerosol samplers, including scanning mobility particles sizers for aerosols from 3 nm to 1 micron with time resolution to 30 seconds; aerosol particle sizers for aerodynamic measurements of in situ particles with time resolution to 1 second; and varied condensation particle counters for measuring total particle counts. Several hygroscopic tandem differential mobility analyzers are used, as well as varied aerosol generation devices and unique aerosol inlets for RH and temperature modification and control. Cloud droplet number can be measured in the lab or in the field using a Droplet Measurement Technologies cloud condensation nuclei detector. Advanced computer control of instruments is available through Labview.

Selected instruments are field deployable in a custom air conditioned trailer. Through collaboration with the IIHR--Hydroscience & Engineering, access to micrometeorology sensors, 1-D and 2-D elastic and Raman LIDAR, and gas sensors is available, including multichannel ammonia monitors.

#### **BIOCHEMICAL ENGINEERING**

Biochemical engineering laboratories provide facilities for preparation of biological media and cultivation of organisms as well as for separation and analysis of biomolecules. This equipment includes biological incubators and floor incubator shakers, agitated and airlift bioreactors, light microscopes, autoclaves, Vi-Cell cell counter, thermocycler for PCR amplification of DNA, high- and low-speed centrifuges, UV-Vis spectrophotometers, a lyophilizer, biological safety cabinets, and an anaerobic glove box. Phase-contrast and epifluorescence microscopes, gel electrophoresis systems, gas chromatography units with flame ionization and electron capture detectors, and several high-performance liquid chromatography systems with refractive index and photodiode array detectors are available for characterization of microorganisms and constituent biomolecules. In addition, the lab has multiple extremophile cultivation systems including a high-pressure (0.1-100 MPa) cell cultivation system, several continuous cultivation systems, and high-temperature oil bath shakers for physiological studies of extremophilic microbes.

Through collaborative research agreements, graduate students also have access to specialized facilities for electron microscopy, large-scale fermentation, protein structure, recombinant DNA research, and tissue culture/hybridoma; the Flow Cytometry Facility; and the High Resolution Mass Spectrometry Facility.

#### **BIOMEDICAL ENGINEERING**

The biomedical engineering laboratories house particle technology equipment including microemulsion equipment for

drug encapsulation, sonicators, benchtop scale spray dryers, laser diffraction particle sizer, zetapotentiometer; DNA preparation equipment, gel electrophoresis apparatus; interfacial stress rheometer, surface tensiometer, UV-Vis/fluorescent plate reader, high-performance liquid chromatograph, luminometer, lyophilizer, custom-built simulated cough machine, microscopes, incubators, wet chemistry equipment, rotary shakers, incubated plate shakers, autoclave, centrifuges, and laboratory computers. Cell culture and bacterial culture facilities are housed adjacent to the laboratories.

Graduate students also have access to core research facilities including the Central Microscopy Research Facility, Flow Cytometry Facility, DNA Facility, Electron Spin Resonance Facility, Nuclear Magnetic Resonance Facility, High Resolution Mass Spectrometry Facility, Center for Gene Therapy, Nuclear Magnetic Resonance Facility, and Statistical Consulting Center.

#### COMPUTER FACILITIES

The departmental computer facilities contain a variety of graphics workstations, printers, and microcomputers. The department is supported by the college's Computer Systems Support (CSS). CSS maintains a large network of high performance UNIX and Windows XP workstations along with extensive commercial and public domain software. The department also has access to the University's central research facility in high-speed vector computation. This facility has SGI Power Challenger minisupercomputers and provides nodes for external links for access to supercomputers.

#### FUNDAMENTALS AND APPLICATIONS OF PHOTOPOLYMERIZATION

The Photopolymerization Center was established to advance fundamental understanding of the kinetics and mechanisms of photopolymerizations. To this end, the center provides unique opportunities for collaborations by industrial and academic investigators to explore photopolymerization processes and develop novel applications based on photopolymerizations.

The center provides equipment and instrumentation for the characterization of photopolymerization systems on the molecular, microscopic, and macroscopic levels. Center researchers pursue understanding of fundamental photophysical and photochemical processes involved in the photoinitiation reaction; characterization of high-speed propagation and termination kinetics that lead to the polymer structure; and evaluation of material properties through the course of the photopolymerization reaction. Both radical and cationic photopolymerizations are studied with state-of-the-art experimental techniques to elucidate the complex chemical and physical mechanisms that control the initiation, propagation, and termination of the active centers.

## Chemical and Biochemical Engineering Courses

### General Topics

**052:000 Cooperative Education Training Assignment: Chemical Engineering** 0 s.h.  
Chemical engineering students participating in the Cooperative Education Program register for this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

**052:002 Half-time Cooperative Education Training Assignment: Chemical Engineering** 0 s.h.  
Registration for work assignment periods; for students participating in the Cooperative Education Program.

**052:029 First-Year Seminar** 1 s.h.  
Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, field trips). Requirements: first- or second-semester standing.

**052:030 Energy and Society** 3 s.h.  
History of energy development and use throughout the world; how energy has affected the development of human societies; societal impact of engineering advances; current state of energy consumption worldwide, including distribution of energy sources, global variations in consumption, advantages and disadvantages of current energy sources; role of fossil fuel consumption in global climate change, potential scenarios for the future of energy.

**052:041 Process Calculations** 3 s.h.  
Fundamental principles of chemical process analysis, including material and energy balances for single-unit and multiple-unit processes, analysis of reactive and nonreactive systems, introduction to equations of state, thermodynamics of multiphase systems. Prerequisites: 22M:031.

- 052:090 CBE Departmental Seminar** 0 s.h.  
Introduction to the profession and the department; presentations by guest speakers, visits to laboratories and industries.
- 052:091 Professional Seminar: Chemical Engineering** 0 s.h.  
Professional aspects of chemical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Prerequisites: 052:041. Requirements: sophomore standing.
- 052:092 Senior Enriching Activities Seminar** 0 s.h.  
Aspects of chemical engineering education, including multidisciplinary team skills, understanding the impact of engineering practice locally and globally. Corequisites: 052:186.
- 052:098 Individual Investigations: Chemical Engineering** arr.  
Individual projects for chemical engineering undergraduate students, such as laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.
- 052:103 Chemical Engineering Thermodynamics** 3 s.h.  
Applications of thermodynamic principles to chemical and physical processes; prediction of material properties; phase and chemical equilibria applied to mixtures and reacting systems. Prerequisites: 059:009. Corequisites: 052:041.
- 052:105 Chemical Reaction Engineering** 3 s.h.  
Application of chemical reaction kinetics to design of chemical reactors: batch reactors, mixed flow reactors, plug flow reactors; reversible and irreversible single reactions; parallel, series, and mixed reactions; temperature and pressure effects on reactor design; heterogeneous catalysis; transport in porous catalysts. Prerequisites: 052:161.
- 052:107 Sustainable Systems** 3 s.h.  
New and emerging concepts in sustainable systems design and assessment. Same as 053:107.
- 052:109 CEBC Colloquium** 1 s.h.  
Sustainable development issues addressed by guest speakers from chemical industries; process economics, environmental impact assessment.
- 052:115 Introduction to Literature Review and Technical Writing** 3 s.h.  
Review of technical literature, how to contribute to it; produce and present orally a peer-reviewed-journal-quality review article; brainstorming, group writing, research ethics, plagiarism. Recommendations: nonthesis track graduate standing.
- 052:117 Intermediate Thermodynamics** 3 s.h.  
Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: 052:103 or 058:040 or graduate standing. Same as 058:140.
- 052:118 Mathematical Methods in Engineering** 3 s.h.  
Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: 22M:033 and 22M:034. Same as 053:113, 058:113.
- 052:171 Thermodynamics/Transport Laboratory** 3 s.h.  
Error analysis, propagation of errors, experimental design, data collection techniques, report writing, oral presentations, laboratory safety; laboratory investigations of thermodynamics, fluid flow, heat transfer, fluid rheology. Prerequisites: 052:103 and 052:151. Corequisites: 052:161. Recommendations: statistics course.
- 052:172 Chemical Reaction Engineering/Separations Laboratory** 2 s.h.  
Experimental design, data collection techniques, report writing, oral presentations; laboratory investigations of chemical reaction engineering and separations; experiments with plug flow and batch reactors, distillation, evaporation, membrane separation. Prerequisites: 052:161 and 052:171. Corequisites: 052:105.
- 052:192 Special Topics** 1 s.h.  
Research techniques for graduate students in chemical and biochemical engineering. Requirements: graduate standing.

**052:195 Contemporary Topics: Chemical and Biochemical Engineering**

arr.

Research techniques for graduate students in chemical and biochemical engineering. Requirements: graduate standing.

**052:196 Photopolymerization Topics**

1 s.h.

Seminars presented by faculty members, research assistants, students.

**052:215 Introduction to Literature Review and Proposal Writing**

3 s.h.

Tools for reviewing literature, skills for critical reading of publications, training in successful proposal writing; experience drafting a proposal that can be used as a starting point for the Ph.D. comprehensive.

**Biochemical Engineering****052:108 Introduction to Biochemical Engineering**

3 s.h.

Biochemistry, cellular biology, recombinant DNA and hybridoma technologies; emphasis on engineering aspects of biotechnology, including enzyme kinetics, cell growth kinetics, transport phenomena in bioreactors, bioreactor design, bioseparations, formulation and sterilization of growth media, commercial applications of biotechnology. Prerequisites: 052:105.

**052:181 Bioseparations**

3 s.h.

Unit operations used to isolate and purify biologically-derived chemicals, including flocculation, filtration, centrifugation, extraction, adsorption, chromatography, precipitation, crystallization, electrophoresis and cell disruption for intracellular product recovery.

**052:223 Introduction to Biocatalysis**

3 s.h.

Applications of biological catalysis in varied industries; potential of biological catalysis to address future challenges in science and engineering.

**052:225 Biotechnology of Extremophiles**

3 s.h.

Evolution and engineering of biocatalysis under extreme conditions; physiological, kinetic, and molecular behavior of systems that perform under extremes of temperature, pH, salinity, pressure, solvent concentrations.

**052:226 Engineering Aspects of Animal Cell Culture**

3 s.h.

Applications of animal cell culture (insect and mammalian) in biochemical engineering, with emphasis on recombinant protein synthesis; special considerations of animal cell cultures (e.g., sensitivity to hydrodynamic stress), scale-up of attachment-dependent and attachment-independent cell cultures, medium development, hybridoma cultures, protein processing in animal cells. Prerequisites: 052:108.

**052:227 Tissue Engineering**

3 s.h.

Introduction to tissue engineering; scaffolds, fundamentals, principles. Same as 046:290, 051:175.

**052:275 Perspectives in Biocatalysis**

1-3 s.h.

Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Repeatable. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as 004:275, 046:275, 053:275, 061:275, 099:275.

**Environmental Engineering****052:133 Engineering Analysis of Alternative Energy Systems**

3 s.h.

Engineering and sustainability analyses of conventional and emerging energy technologies; alternative energy sources, including biomass, wind, solar, geothermal; alternative energy carriers (transportation fuels), including varied biofuels, hydrogen, natural gas, ammonia. Prerequisites: 059:009.

**052:231 Environmental Chemistry I**

3 s.h.

Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: 004:012. Same as 053:152.

**052:235 Air Pollution Control Technology** 3 s.h.

Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Prerequisites: 053:050. Same as 053:159.

**052:236 Atmospheric Chemistry and Physics** 3 s.h.

Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, removal processes. Corequisites: 052:105. Same as 053:161.

**052:237 Green Chemical and Energy Technologies** 3 s.h.

Strategies for pollution prevention for chemical processes studied at the macroscale (industrial sector), the mesoscale (unit operations), and the microscale (molecular level); case studies. Corequisites: 052:105 and 052:187.

## Transport Phenomena

**052:151 Engineering Flow and Heat Exchange** 3 s.h.

Fundamentals of fluid flow and heat transfer; fluid rheology, boundary layer theory, potential flow, dimensional analysis, laminar and turbulent flow in pipes, flow through packed beds, fluidized beds, pumps, flow measurement, filtration, heat exchanger design, and conductive, convective, and radiative heat transfer. Corequisites: 052:041.

**052:161 Mass Transfer and Separations** 3 s.h.

Mechanisms of diffusional mass transfer; solution of industrial problems, including the design of distillation, extraction, absorption, adsorption, drying, membrane processes; mechanical separations. Prerequisites: 052:103 and 052:151.

**052:217 Transport Phenomena I** 3 s.h.

Unified treatment of momentum, mass, energy transport in chemical engineering problems; use of vector and tensor notations in expressing equations of continuity, motion, energy.

**052:272 Diffusive Transport** 3 s.h.

Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: 058:145. Same as 058:245.

## Materials Science

**052:140 Polymer Fundamentals** 1 s.h.

Basic knowledge of polymers required as a foundation for other UI courses on polymers: basic polymer terminology, polymer groups, polymerization mechanisms, molecular weight determination. Five weeks. Same as 051:168.

**052:141 Polymer Science and Technology** 3 s.h.

Uses, properties of industrially important polymeric materials; polymer chemistry, polymer structure, characterization, polymer processing. Prerequisites: 004:122. Corequisites: 052:105.

**052:156 Scanning Electron Microscopy and X-Ray Microanalysis** arr.

Microscopy methods for research; all aspects of research, from sample preparation to imaging to data analysis; when to use a particular microscopy procedure; theory, operation, and application of scanning electron microscopy, scanning probe microscopy, laser scanning microscopy, X-ray microanalysis. Requirements: a physical science course. Same as 012:156, 060:156.

**052:242 Polymer Chemistry** 3 s.h.

Monomer reactivity and polymerization reactions; step, radical, ionic, and ring-opening polymerizations. Prerequisites: 004:122.

## Process Dynamics, Design, Analysis

### 052:184 Chemical Engineering Process Design I

2 s.h.

Engineering economics of process evaluation, including time value of money and bases for cost estimation; preliminary design of chemical process plants using computer-aided engineering. Prerequisites: 052:105 and 052:161.

### 052:185 Process Dynamics and Control in Design

3 s.h.

Theory and application of process dynamics to the design of chemical process control systems; mathematical models of unit operations, transfer functions, feedback and feed-forward control, stability, instrumentation, digital control systems; computer methods, including simulation and commercial software use; laboratory focus on process analysis and design. Prerequisites: 052:105.

### 052:186 Chemical Engineering Process Design II

3 s.h.

Capstone chemical engineering course; design and optimization of chemical process plants; application of process calculations, thermodynamics, kinetics, process synthesis, energy efficiency in separations, heat-exchanger network synthesis, physical property estimation, safety, computer-aided design, unit operations theory, process control, and economics. Prerequisites: 052:184.

### 052:187 Chemical Process Safety

3 s.h.

Application of transport phenomena, thermodynamics, chemical kinetics to study of safety, health, loss prevention; government regulations, toxicology/industrial hygiene, relief sizing, runaway reactions, toxic release and dispersion models, source models, fires and explosions, risk assessment, hazard identification, case studies and accident investigation, incorporation of safety into design; laboratory experiments. Prerequisites: 052:161. Corequisites: 052:105.

## Graduate Seminars, Advanced Topics, Research

### 052:191 Seminar in Chemical and Biochemical Engineering

1 s.h.

Presentation and discussion of recent advances and research in chemical and biochemical engineering by guest lecturers, faculty, students. Requirements: graduate standing.

### 052:198 Individual Investigations: Chemical and Biochemical Engineering

arr.

Individual projects for chemical and biochemical engineering graduate students; may include laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

### 052:199 M.S. Thesis Research: Chemical and Biochemical Engineering

arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in chemical and biochemical engineering. Requirements: graduate standing.

### 052:299 Research: Chemical and Biochemical Engineering Ph.D. Dissertation

arr.

Experimental and/or analytical investigation of an approved topic for Ph.D. in chemical and biochemical engineering.

## Civil and Environmental Engineering

**Chair:** Keri Hornbuckle

**Professors:** Jasbir S. Arora, M. Asghar Bhatti, A. Allen Bradley, Greg Carmichael, William E. Eichinger, Keri Hornbuckle, Witold F. Krajewski, Wilfrid A. Nixon, A. Jacob Odgaard, Thanos Papanicolaou, Gene F. Parkin, Jerald L. Schnoor, Colby C. Swan, Peter Thorne, Richard L. Valentine, Larry J. Weber

**Professors emeriti:** Dan E. Branson, Forrest M. Holly Jr., Subhash C. Jain, Wayne L. Paulson, Han-Chin Wu

**Adjunct professors:** Konstantine P. Georgakakos, Tatsuaki Nakato

**Associate professors:** Paul Hanley, Anton Kruger, Hosin David Lee, Patrick O'Shaughnessy, Michelle Scherer, James W. Stoner, Frank Weirich, Y.K. Zhang

**Adjunct associate professors:** Shauna Hallmark, Louis A. Licht, John Nestler

**Assistant professors:** Nandita Basu, Tim Mattes, Salam Rahmatalla

**Adjunct assistant professors:** Craig Just, Ken Lloyd, Marcela Politano, Doug Schnoebelen, Nathan Young

**Adjunct lecturers:** Don Guckert, Michael Valde

**Undergraduate degree:** B.S.E. in Civil Engineering

**Graduate degrees:** M.S., Ph.D. in Civil and Environmental Engineering

**Web site:** <http://www.cee.engineering.uiowa.edu>

Civil engineering is one of the three largest fields of engineering. It traditionally has been concerned with infrastructure facilities that are both large in scale and essential to modern life. Civil and environmental engineering projects include transportation systems and their components, such as bridges, highways, public transit systems, railways, harbors, airports, seaports, and even spaceports; large-scale structures and office buildings that provide enclosed working and living space; environmental and hydraulic systems that provide clean water and air, including filtration plants and distribution systems for municipal and industrial water supplies, wastewater treatment plants, dams, levees, and irrigation systems.

Growth areas of civil and environmental engineering include infrastructure development, construction management, computer-aided design, hazardous waste management, and engineered environmental systems. In the future, civil and environmental engineers will be called upon to design structures for earth and outer space, prevent erosion and sedimentation of our rivers, predict effects of global climate change on the environment, provide modern and efficient transportation systems, and ensure the quality of our air and our surface waters and groundwaters.

In planning and design, civil and environmental engineers work with other engineers, architects, landscape architects, planners, economists, financiers, sociologists, lawyers, and other specialists as members of the design team. Some civil engineers work in engineering offices; others may be called upon to construct or supervise outdoor projects they have designed. These field assignments, many of which are in remote and fascinating parts of the world, are particularly appealing to many civil and environmental engineers. There also is significant potential for entrepreneurial work by civil and environmental engineers as they start their own companies.

## Undergraduate Program

The department offers the Bachelor of Science in Engineering in civil engineering. The program's objective is to provide a well-rounded, superior engineering education that:

- provides students with appropriate proficiency in the civil engineering subdisciplines of structures and materials, water-resources engineering, transportation systems, and environmental engineering;
- ensures that students are knowledgeable about the importance, procedures, and benefits of professional licensure and continuing education;
- offers design experiences that include projects in the curriculum that are offered by and guided in part by the professional community; and
- provides research opportunities to undergraduate students through the department's connections with on-campus research entities including IIHR--Hydroscience and Engineering, the Center for Global and Regional Environmental Research, the Public Policy Center, the Center for Computer Aided Design, the Center for Biocatalysis and Bioprocessing, and the Center for Health Effects of Environmental Contamination.

## Bachelor of Science in Engineering

The Bachelor of Science in Engineering requires a minimum of 128 s.h. Students majoring in civil engineering choose one of two subtracks: civil, which provides breadth in the discipline; or environmental, which provides for a concentration.

The B.S.E. curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005 Engineering Problem Solving I, 059:006 Engineering Problem Solving II, and 010:003 Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. For information on B.S.E. curriculum stems and common course requirements, see Bachelor of Science in Engineering in the College of Engineering section of the Catalog.

Subtrack requirements are the same for the first semester of the first year but are different beginning with the second semester.

Students must select elective focus area courses according to guidelines established by the Department of Civil and

Environmental Engineering. See "Elective Focus Area" after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

## FIRST YEAR

### First Semester

004:011 Principles of Chemistry I	4 s.h.
010:003 Rhetoric	4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus	4 s.h.
059:005 Engineering Problem Solving I	3 s.h.
059:090 Engineering Success Seminar for First-Year Students	1 s.h.

### Civil Subtrack

## FIRST YEAR

### Second Semester

22M:032 Engineering Mathematics II: Multivariable Calculus	4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra	2 s.h.
029:081 Introductory Physics I	4 s.h.
059:006 Engineering Problem Solving II	3 s.h.
General education component course	3 s.h.

## SECOND YEAR

### First Semester

22M:034 Engineering Mathematics IV: Differential Equations	3 s.h.
029:082 Introductory Physics II	3-4 s.h.
053:015 Civil and Environmental Engineering Practice	2 s.h.
059:007 Engineering Fundamentals I: Statics	2 s.h.
059:008 Engineering Fundamentals II: Electrical Circuits	3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics	3 s.h.

### Second Semester

22S:039 Probability and Statistics for the Engineering and Physical Sciences	3 s.h.
053:018 Geology for Engineers (053:105 for fall 2010)	3 s.h.
053:020 CEE Sophomore Seminar	0 s.h.
053:050 Natural Environmental Systems	3 s.h.
057:010 Dynamics	3 s.h.
057:019 Mechanics of Deformable Bodies	3 s.h.

## THIRD YEAR

### First Semester

053:030 Soil Mechanics	3 s.h.
053:033 Principles of Structural Engineering	3 s.h.
053:063 Principles of Transportation Engineering	3 s.h.

053:091 Professional Seminar: Civil Engineering	0 s.h.
057:020 Fluid Mechanics	4 s.h.
Elective focus area course	3 s.h.

**Second Semester**

053:055 Principles of Environmental Engineering	4 s.h.
053:071 Principles of Hydraulics and Hydrology	3 s.h.
053:086 Civil Engineering Materials	3 s.h.
053:091 Professional Seminar: Civil Engineering	0 s.h.
Elective focus area course	3 s.h.
General education component course	3 s.h.

**FOURTH YEAR****First Semester**

053:091 Professional Seminar: Civil Engineering	0 s.h.
General education component course	3 s.h.
Two elective focus area courses	6 s.h.

Two of these:

053:136 Design of Concrete Structures	3 s.h.
053:157 Environmental Engineering Design	3 s.h.
053:174 Water Resource Design	3 s.h.

**Second Semester**

053:084 Project Design and Management in Civil Engineering	3 s.h.
053:091 Professional Seminar: Civil Engineering	0 s.h.
General education component course	3 s.h.
Three elective focus area courses	9 s.h.

**Environmental Subtrack****FIRST YEAR****Second Semester**

004:012 Principles of Chemistry II	4 s.h.
22M:032 Engineering Mathematics II: Multivariable Calculus	4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra	2 s.h.
029:081 Introductory Physics I	4 s.h.
059:006 Engineering Problem Solving II	3 s.h.

**SECOND YEAR****First Semester**

22M:034 Engineering Mathematics IV: Differential Equations	3 s.h.
053:015 Civil and Environmental Engineering Practice	2 s.h.
059:007 Engineering Fundamentals I: Statics	2 s.h.

059:008 Engineering Fundamentals II: Electrical Circuits	3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics	3 s.h.
General education component course	3 s.h.

**Second Semester**

22S:039 Probability and Statistics for the Engineering and Physical Sciences	3 s.h.
053:018 Geology for Engineers (053:105 for fall 2010)	3 s.h.
053:020 CEE Sophomore Seminar	0 s.h.
053:050 Natural Environmental Systems	3 s.h.
057:010 Dynamics	3 s.h.
057:019 Mechanics of Deformable Bodies	3 s.h.
General education component course	3 s.h.

**THIRD YEAR****First Semester**

053:030 Soil Mechanics	3 s.h.
053:033 Principles of Structural Engineering	3 s.h.
053:063 Principles of Transportation Engineering	3 s.h.
053:091 Professional Seminar: Civil Engineering	0 s.h.
053:152 Environmental Chemistry I	3 s.h.
057:020 Fluid Mechanics	4 s.h.

**Second Semester**

053:055 Principles of Environmental Engineering	4 s.h.
053:071 Principles of Hydraulics and Hydrology	3 s.h.
053:086 Civil Engineering Materials	3 s.h.
053:091 Professional Seminar: Civil Engineering	0 s.h.
Elective focus area course	3 s.h.
General education component course	3 s.h.

**FOURTH YEAR****First Semester**

053:091 Professional Seminar: Civil Engineering	0 s.h.
General education component course	3 s.h.
Two elective focus area courses	6 s.h.

Two of these:

053:134 Design of Steel Structures	3 s.h.
053:136 Design of Concrete Structures	3 s.h.
053:157 Environmental Engineering Design	3 s.h.
053:162 Design of Transportation Systems	3 s.h.
053:174 Water Resource Design	3 s.h.

**Second Semester**

053:084 Project Design and Management in Civil Engineering	3 s.h.
053:091 Professional Seminar: Civil Engineering	0 s.h.
General education component course	3 s.h.
Three elective focus area courses	9 s.h.

### Elective Focus Area

Civil engineering students may choose from several standard elective focus areas developed by the department, a focus area offered jointly with another engineering department, or an individual focus area tailored to the student's interests.

Standard elective focus areas are offered in environmental engineering; hydraulics and water resources; structures, mechanics, and materials; transportation; urban and regional planning; and in the broad field of civil engineering. Elective focus areas offered jointly with other engineering departments cut across programs (e.g., computer-aided engineering, design and optimization, environmental processes).

Civil engineering students must take one general education component course related to their elective focus area.

For more detailed information about elective focus areas, see "Bachelor of Science in Engineering"/"Elective Focus Area" in the College of Engineering section of the Catalog. For a list of standard elective focus area options and guidelines for tailored elective focus areas in civil engineering, see the Department of Civil and Environmental Engineering web site.

### Joint B.S.E./M.S.

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for civil engineering undergraduates who intend to earn an M.S. in civil and environmental engineering. B.S.E./M.S. students may attend the departmental graduate seminar and work on a master's thesis or research project while still undergraduates. They may count a limited amount of course work toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h. and must have a cumulative g.p.a. of at least 3.25. They must submit an application form to the Department of Civil and Environmental Engineering, along with a letter stating their proposed area of specialization and the name of a department faculty member willing to be their primary M.S. advisor. They also must identify a faculty sponsor who can guide them from at least the second semester of their senior year until they complete the M.S.

Applications are due by March 1.

## Graduate Programs

The Department of Civil and Environmental Engineering offers a Master of Science and a Doctor of Philosophy. Both programs prepare students for professional careers and further study. The principal concentration areas are environmental engineering and science; global and regional environmental research; hydraulics, hydrology, and water resources; structures, mechanics, and materials; and transportation and infrastructure systems.

The department also participates in an interdisciplinary doctoral program offered by the Graduate College; see Applied Mathematical and Computational Sciences in the Catalog.

### Research and Study Areas

#### ENVIRONMENTAL ENGINEERING AND SCIENCE

The environmental engineering and science curriculum provides a comprehensive base of course work and research in the areas of air- and water-quality management, environmental chemistry and microbiology, natural systems modeling, and processes for water supply, pollution control, and solid and hazardous waste management. Interdisciplinary specialization and study are conducted with programs including IIHR--Hydrosience & Engineering, the Center for Global and Regional Environmental Research, the Center for Health Effects of Environmental Contamination, the Hazardous Substances Research Center, the Center for Biocatalysis and Bioprocessing; the Departments of Chemical and Biochemical Engineering, Geography, Geoscience, Microbiology, Occupational and Environmental Health; and the Urban and Regional Planning Program. New areas of interdisciplinary focus include groundwater contamination, biotechnology, global climate change, and hazardous substances.

#### GLOBAL AND REGIONAL ENVIRONMENTAL RESEARCH

The department has an active interdisciplinary research program in the environmental areas of air pollution, water pollution, groundwater remediation, global atmospheric change, and hazardous waste management. Particular emphasis is placed on the microbiology, chemistry, and physics of local, regional, and global air, soil, and water quality problems. Research includes sophisticated environmental quality analysis, high-speed computing, and detailed sensitivity analysis. The Department of Chemical and Biochemical Engineering and the Center for Global and Regional Environmental Research also collaborate in these endeavors.

#### **HYDRAULICS, HYDROLOGY, AND WATER RESOURCES**

The hydraulics, hydrology, and water resources curriculum is associated with IIHR--Hydrosience & Engineering, a world-renowned research institute. Senior staff members of the institute are professors in the program; they devote about half of their time to teaching.

IIHR offers unique opportunities for students to participate actively in the research, analysis, and design aspects of real-world problems. Considerable attention is given to the use of computers in mathematical modeling and in data acquisition and processing. IIHR high-speed computer facilities and advanced graphics and communication software complement the hydrology, hydraulics, and water resources curriculum.

#### **STRUCTURES, MECHANICS, AND MATERIALS**

The structures, mechanics, and materials curriculum is designed for students who wish to gain knowledge and skill in the mechanics of solids and structures that they can apply to civil infrastructure systems and other fields. The program concentrates on developing appropriate methodologies for tackling broad, complex issues related to civil infrastructure systems, and on educating engineers in the implementation and application of methodologies to actual engineering projects. Faculty members have expertise in structural engineering, design optimization, solid mechanics, and computational methods.

#### **TRANSPORTATION AND INFRASTRUCTURE SYSTEMS**

The transportation and infrastructure systems curriculum aims at graduating students interested in developing specialized knowledge and skills applicable to diverse set of issues associated with transportation. Faculty members have expertise in traffic engineering, infrastructure management systems, pavement engineering, advanced construction materials, dynamic load and pavement simulation, optimal design, winter highway maintenance, real-time simulation, human factors, intelligent sensors, nondestructive testing, transportation planning, and travel demand modeling.

### **Master of Science**

The Master of Science in civil and environmental engineering requires a minimum of 30 s.h. of graduate credit, with or without thesis. The program enables students to concentrate in one or more areas of their choice. Graduates are placed in advanced technical positions in industry, consulting firms, or government, or they may continue their graduate study. Current and projected demand for M.S. graduates is excellent.

Students who choose the thesis program earn up to 6 s.h. for the thesis. Nonthesis students in the environmental engineering and science curriculum earn an additional 3 s.h.

With the approval of their advisor, students develop a study plan that satisfies the requirements of their chosen curriculum.

All M.S. students must have a g.p.a. of at least 3.00, pass an oral examination, and in some program options, a written examination.

### **Doctor of Philosophy**

The Doctor of Philosophy in civil and environmental engineering requires a minimum of 72 s.h. of graduate credit; the semester-hour requirements for some curriculum areas are higher. The doctoral degree is granted primarily on the basis of achievement rather than on a prescribed course of study. Students usually need at least three years of full-time graduate study to complete the degree. One year is devoted to the preparation of a dissertation that contributes to knowledge in the field. In some specialty areas, a qualifying examination may be required.

All doctoral students are required to pass a written and oral comprehensive examination before being formally admitted to candidacy for the degree. This examination usually is taken after all required course work has been completed.

The program culminates in a final examination, in which candidates must successfully defend their dissertation.

Ph.D. students must maintain a g.p.a. of at least 3.00 throughout the program.

## Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Each of the program's curricula is flexible; students may be admitted from all disciplines of engineering as well as from the mathematical and basic sciences.

Applicants to the M.S. program should have a cumulative undergraduate g.p.a. of at least 3.00. Ph.D. applicants should have a graduate g.p.a. of at least 3.00. Applicants whose grade-point average is slightly lower should contact the department.

Applicants should have a combined verbal and quantitative score of at least 1100 on the Graduate Record Examination (GRE) General Test. Lower scores are considered with other evidence of academic promise (recommendation letters, grade-point average). GRE General Test scores also are used in financial aid decisions.

## Financial Support

A significant number of research assistantships are available on a variety of research projects, as are a limited number of teaching assistantships. Selection of recipients usually is based on scholastic achievement and research interest.

## Facilities and Laboratories

### Undergraduate Core

The first-year engineering course 059:005 Engineering Problem Solving I includes an introduction to the college's Computer Systems Support (CSS). Students in the course use computer-aided design tools on engineering work stations. All civil engineering courses require knowledge of personal computers and contain significant computer content.

For information about laboratories affiliated with core courses coordinated by other engineering departments, see the Catalog section for each of the departments.

### Required and Elective Undergraduate Laboratories

**053:015 Civil and Environmental Engineering Practice (2 s.h.)**, **053:063 Principles of Transportation Engineering (3 s.h.)**, and **053:084 Project Design and Management in Civil Engineering (3 s.h.)**: use of a state-of-the-art laboratory for computer-aided design and drawing.

**053:030 Soil Mechanics (3 s.h.)**: equipped for determining the classification, seepage characteristics, stress-strain properties, and strength of soils.

**053:050 Natural Environmental Systems (3 s.h.)**: environmental chemistry and biology of air, water, and soil quality, air and water pollution, limnology, global atmospheric change, fate and transport of pollutants; hazardous substances, risk analysis, standard setting.

**053:055 Principles of Environmental Engineering (4 s.h.)**: conducted at the University Water Treatment Plant and Iowa City Wastewater Plant for demonstrations of unit operations and processes of water and wastewater treatment, and applications in environmental chemistry and microbiology.

**053:071 Principles of Hydraulics and Hydrology (3 s.h.)**: hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, with laboratory.

**053:153 Environmental Chemistry Laboratory (3 s.h.)**: experiments to demonstrate fundamental principles of aquatic chemistry and chemical analyses for characterization of water and wastewater quality, conducted in the Environmental Engineering Laboratories.

**053:154 Environmental Microbiology (3 s.h.)**: typical microorganisms isolated and their physiology and metabolic characteristics studied in the Environmental Engineering Laboratories.

**053:156 Physical-Chemical Process Fundamentals (3 s.h.)** and **053:151 Biological Treatment Processes (3 s.h.)**: unit operations, processes studied in bench scale experiments; use of typical process analytical parameters; experiments conducted in the Environmental Engineering Laboratories, University Water Plant, and Iowa City Wastewater Treatment Plant.

### Graduate Laboratories

#### ENVIRONMENTAL ENGINEERING AND SCIENCE LABORATORIES

The Environmental Engineering and Science Laboratories provide state-of-the-art facilities, equipment, and expertise to

support both undergraduate and graduate-level instruction and research. The laboratories support research in contaminant fate and transport in various media (air, water, soil, plants, and microbes), drinking water disinfection and distribution, wastewater treatment, geochemical-contaminant interactions, bioremediation, and phytoremediation. They also provide resources for analytical chemistry, electrochemistry, molecular biology, microscopy, computer modeling, and simulated environments on the bench- and pilot-scale levels.

The Environmental Engineering and Science Laboratories are affiliated with the University's Center for Health Effects of Environmental Contamination and its Center for Global and Regional Environmental Research, and with the UI Environmental Health Sciences Research Center, an affiliate of the National Institute of Environmental Health Sciences (NIEHS).

#### **HYDRAULICS, HYDROLOGY, AND WATER RESOURCES LABORATORIES**

The teaching and research functions of the department are closely connected to the research activities of IIHR--Hydrosience & Engineering. The institute houses some of the most modern research facilities in the world, including a 330-foot towing tank, several hydraulic flumes and wind tunnels, an array of field instrumentation for hydrologic experiments, extensive laboratory space for hydraulic modeling, a special low-temperature flow facility for investigation of ice phenomena, state-of-the-art instrumentation for flow measurement and visualization, and comprehensive computational facilities.

Research related to ecohydraulics and the environment takes place at the Lucille A. Carver Mississippi Riverside Environmental Research Station. Located on the Mississippi River near Muscatine, Iowa, the station provides engineers and biological scientists with an ideal facility in which to examine the multifaceted ecohydraulic processes of the upper Mississippi. The 500-square-foot facility is equipped with water-quality laboratories and a seminar room and is operated by IIHR--Hydrosience & Engineering.

#### **STRUCTURES, MECHANICS, AND MATERIALS LABORATORIES**

Facilities for computations, materials testing, geotechnical experiments, and small-scale structural testing are available for research and teaching. Faculty, staff, and students in structures, mechanics, and materials (SMM) have access to the computing resources of both Engineering Computer Systems Support and the Center for Computer-Aided Design (CCAD). Both centers continuously update their computing facilities to maintain pace with the rapidly changing field.

A wide range of experimental facilities is available for testing structural materials such as Portland cement concrete, asphalt, metals, timber, and composites. These facilities include several loading frames (purely uniaxial, purely torsional, and axial-torsional) that are available with computer-based control and data collection systems. Facilities for creep testing, triaxial soil testing, and high-cycle fatigue testing are also available. The laboratories have a variety of ovens and other facilities for preparation and treatment of test specimens.

Four well-equipped physical testing laboratories are dedicated to SMM teaching and research: the Civil Materials Laboratory, Soil Mechanics Laboratory, Plasticity Laboratory, and the Asphalt Laboratory. The Civil Materials Laboratory currently has a small-scale single-degree-of-freedom shaker table. Faculty, staff, and students have access to a small-scale six-degree-of-freedom shaker table through CCAD and a 12-camera Vicon motion-capture system.

#### **TRANSPORTATION INFRASTRUCTURE SYSTEMS LABORATORY**

The department's Asphalt Laboratory is equipped with a set of SuperPave testing equipment and new Interlaken Simple Performance Testing Equipment, which measures dynamic modulus and dynamic creep of asphalt mixtures. The laboratory's Wirtgen asphalt foaming equipment can be used for mix design of cold in-place recycled asphalt using foamed asphalt; equipment for Marshall mix design, indirect tensile strength test, and volumetric analysis of asphalt mixtures is also available. The laboratory is one of the department's group of laboratories for materials testing the strength behavior of other materials.

## **Civil and Environmental Engineering Courses**

### **Special Topics**

#### **053:000 Cooperative Education Training Assignment: Civil Engineering**

0 s.h.

Civil engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record card. Requirements: admission to the Cooperative Education Program.

#### **053:002 Half-time Cooperative Education Training Assignment: Civil and Environmental Engineering**

0 s.h.

Registration for work assignment periods; for students participating in the Cooperative Education Program.

- 053:015 Civil and Environmental Engineering Practice** 2 s.h.  
Concepts of the built environment and the natural environment; infrastructure life cycle; engineering communication (plans, engineering drawings and information systems, computer-aided drafting); field trip to major city.
- 053:020 CEE Sophomore Seminar** 0 s.h.  
Introduction to civil and environmental engineering curriculum and profession; presentations by senior undergraduate students, graduate students, faculty; laboratory visits. Requirements: sophomore standing.
- 053:083 Surveying and Remote Sensing** 3 s.h.  
Engineering surveying measurements, methods, computations. Prerequisites: 059:005.
- 053:084 Project Design and Management in Civil Engineering** 3 s.h.  
Design of civil engineering systems, individual and team design projects oriented toward the solution of local problems, project management, construction management, contracts, budgeting, bidding. Prerequisites: 053:033, 053:050, 053:063, and 053:071. Requirements: senior standing.
- 053:091 Professional Seminar: Civil Engineering** 0 s.h.  
Professional aspects of civil engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Requirements: junior standing.
- 053:098 Individual Investigations: Civil Engineering** arr.  
Individual projects for civil engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.
- 053:101 International Business and Infrastructure** 3 s.h.  
Differences between international and domestic businesses; how differences in infrastructure in the international environment influence business operations; effects of infrastructure on international commerce and business practices; case studies, site visits.
- 053:107 Sustainable Systems** 3 s.h.  
New and emerging concepts in sustainable systems design and assessment. Same as 052:107.
- 053:111 Numerical Calculations** 3 s.h.  
Development of algorithms for functional approximations, numerical differentiation and integration; solution of algebraic and differential equations, with emphasis on digital computations; initial and boundary value problems. Prerequisites: 22M:034. Same as 058:111.
- 053:112 Engineering Design Optimization** 3 s.h.  
Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: 22M:033 and 059:007. Requirements: junior standing. Same as 058:112.
- 053:113 Mathematical Methods in Engineering** 3 s.h.  
Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: 22M:033 and 22M:034. Same as 052:118, 058:113.
- 053:115 Computer-Aided Engineering** 3 s.h.  
Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: 057:019 and 058:052. Same as 058:110.
- 053:116 Computer-Aided Design for Civil and Environmental Engineering** 3 s.h.  
Common probabilistic models used in hydrology, hydraulics, and water resources; derived distributions; multivariate models and estimation of model parameters; analysis of data and model building; uncertainty analysis. Prerequisites: 22M:034 and 22S:039.
- 053:126 International Perspectives: Xicotepec** 2 s.h.

Introduction to providing service to a community in a less developed country; student projects intended to improve community life in Xicotepec. Corequisites: 165:126. Requirements: P3 standing. Same as 046:126.

**053:168 Civil Infrastructure** 3 s.h.

Analytical methods for developing Infrastructure Management Systems (IMS); evaluation of infrastructure condition, performance modeling, rehabilitation optimization, development of the IMS; basic concepts of information technology applied in solving civil infrastructure management problems. Prerequisites: 053:015.

**053:210 Developing Professional Service Business** 2-3 s.h.

Use of professional skills and functional knowledge in creating a specialized service business. Same as 06T:210.

**053:214 Analytical Methods in Mechanical Systems** 3 s.h.

Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: 058:113. Same as 058:214.

**053:297 Teaching Undergraduate Science and Engineering** arr.

Basic skills to be a successful undergraduate instructor; teaching of technical subjects and solving problems; emphasis on practical applications of lesson material and class demonstrations; techniques for teaching effective classes; opportunity for students to teach; intended for graduating Ph.D. students with a career interest in a university environment.

**Structures, Mechanics, and Transportation**

**053:030 Soil Mechanics** 3 s.h.

Identification and classification of earth materials; hydraulic and mechanical properties of soils; soil improvement; laboratory testing. Prerequisites: 057:019.

**053:033 Principles of Structural Engineering** 3 s.h.

Fundamental principles of structural analysis applied to statically determinate and indeterminate structures, continuous beams, trusses, and frames; external and internal equilibrium, compatibility of deformation, influence lines, virtual work; parallel use of classical and matrix formulation; slope deflection, flexibility and stiffness methods; use of computers. Prerequisites: 057:019.

**053:063 Principles of Transportation Engineering** 3 s.h.

History of transportation modes, new transport technologies, traffic operations and control, economic evaluation of transport alternatives, transportation planning, roadway design and construction, route location, preventive maintenance strategies. Corequisites: 053:015.

**053:086 Civil Engineering Materials** 3 s.h.

Structure, strength and failure, durability, deformation, practice, and processing for primary construction materials systems, including steel, aluminum, concrete, asphalt, fiber-reinforced composites, masonry, timber. Corequisites: 053:030 and 057:019.

**053:131 Impacts of Technological Singularity** 3 s.h.

Technological singularity--what it is, its current standing, impacts, implications; bio-, nano-, and information technologies; how new technologies affect sustainability; ethical issues raised by technologies.

**053:132 Fundamentals of Vibrations** 3 s.h.

Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: 057:019. Same as 058:153.

**053:133 Finite Element I** 3 s.h.

One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: 057:019. Same as 058:115.

**053:134 Design of Steel Structures** 3 s.h.

Concepts and procedures in steel design; LRFD (load and resistance factor design) methodology for beams/columns; analysis and design of indeterminate structures. Prerequisites: 053:033.

**053:135 Structural Modeling and Health Monitoring** 3 s.h.

Measurements, structural modeling, structural analysis, stiffness method, trusses and frames, structural testing, modal analysis. Prerequisites: 053:033 and 057:019.

**053:136 Design of Concrete Structures** 3 s.h.

Fundamental analysis and design of reinforced concrete members and structures, flexure, shear, bond, continuity, beams, one-way slab system; columns. Prerequisites: 053:033.

**053:139 Foundations of Structures** 3 s.h.

Application of soil mechanics to analysis of structural foundations; slope stability analysis; bearing capacity and settlement of shallow and deep foundations; retaining structures, braced cuts, reinforced earth structures; usage of computational models; subsurface exploration methods. Prerequisites: 053:030.

**053:140 Intermediate Mechanics of Deformable Bodies** 3 s.h.

Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: 057:019. Same as 051:151, 058:150.

**053:148 Fatigue/Durability in Design** 3 s.h.

Macro- and micromechanisms of fatigue behavior, design of engineering materials/components/structures subjected to cyclic loading, emphasis on metals; stress-life, strain-life, linear elastic fracture mechanics approach to fatigue crack growth; safe-life, fail-safe, damage tolerant design; constant and variable amplitude life predictions; notches, residual stress, corrosion, temperature, multiaxial, weldments. Prerequisites: 051:085 or 058:055 or 058:150. Same as 058:158.

**053:149 Fracture Mechanics** 3 s.h.

3-D stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: 051:085 or 058:055 or 058:150. Same as 058:159.

**053:160 Introduction to Bridge Engineering** 3 s.h.

Bridge engineering and design; history of the bridge; factors that affect bridge design; bridges according to use (e.g., road, rail, pedestrian and bicycle) and type (e.g., suspension, cable stay, truss); how sustainability concepts may impact bridge design; substantial design exercise. Prerequisites: 053:033.

**053:162 Design of Transportation Systems** 3 s.h.

Application of CAD/CAE tools to transportation systems design; review of CAD tools, derivation of standards for geometric design, roadway design software, cross-sectional and longitudinal geometric design of highways, applications to visualization and animation. Requirements: 053:063 or graduate standing.

**053:163 Traffic Engineering** 3 s.h.

Design of traffic control devices; evaluation and analysis of intersections and transportation networks using appropriate computer software. Prerequisites: 22S:039 and 053:063.

**053:164 Winter Highway Maintenance** 3 s.h.

Aspects of winter highway maintenance; current and innovative practices and the theory that underpins them.

**053:165 Pavement Analysis and Design** 3 s.h.

Fundamental design principles, including pavement analysis and characterization and testing of asphalt and concrete pavement materials. Prerequisites: 053:063.

**053:167 Public Transit Operations and Planning** 3 s.h.

Bus, light and heavy rail, and paratransit modes; transit operations, planning, modeling and optimization, transit agency economics, transit finance, and evolving transportation policy; skills essential to planners and engineers who intend to work for a either planning agency, transportation provider, or a transportation or planning consulting firm; individual and group projects involving transit operations. Requirements: undergraduate or graduate standing in engineering, or graduate standing in urban and regional planning. Same as 102:195.

- 053:194 Graduate Seminar: Transportation** 0 s.h.  
Recent advances and research in transportation engineering. Requirements: senior or graduate standing.
- 053:233 Finite Element II** 3 s.h.  
Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: 053:133. Same as 058:215.
- 053:235 Applied Optimal Design** 3 s.h.  
Optimal design problem formulation; optimality conditions; linear, quadratic, convex, and nonlinear programming; Lagrangian duality; numerical algorithms for unconstrained and constrained design problems, design sensitivity analysis, engineering applications. Prerequisites: 053:113.
- 053:241 Continuum Mechanics and Elasticity** 3 s.h.  
Cartesian tensors and geometrical foundations; concept of stress, strain, motion; fundamental physical laws; constitutive equations and finite elasticity; equations of linear elasticity, elastic extension, torsion and bending of bars. Prerequisites: 057:019. Requirements: concurrent enrollment in 053:113 or graduate standing. Same as 058:279.
- 053:243 Computational Inelasticity** 3 s.h.  
Computational techniques and implementations for elastic, hyperelastic, elasto-plastic, visco-elastic, and viscoplastic material models; development of sound numerical integration algorithms from rate constitutive equations. Prerequisites: 053:241. Same as 058:251.
- 053:244 Energy Principles in Structural Mechanics** 3 s.h.  
Principles of virtual work; stationary and minimum potential energy; calculus of variations; Ritz method, Galerkin's method; beams, plates; Hamilton's principle; elastic stability; extremum principle of plasticity. Requirements: (for 058:254) 058:113 and 058:150; (for 053:244) 053:113 and 053:140. Same as 058:254.
- 053:247 Advanced Continuum Mechanics** 3 s.h.  
Continuum mechanics of fluids and solids, balance laws, invariance restrictions, continuum thermodynamics, constraint theory, mixtures, materials with microstructure. Prerequisites: 058:262 or 058:279. Same as 058:252.
- 053:249 Multiscale Modeling** 3 s.h.  
Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisites: 058:115 or 058:143. Same as 058:255.
- 053:250 Advanced Fracture Mechanics** 3 s.h.  
Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: 058:113, 058:115, and 058:159. Same as 058:250.
- 053:262 Transportation Demand Analysis** 3 s.h.  
City planning procedures and traffic engineering techniques applied to transportation problems; trip generation, distribution, assignment, mode choice models; travel surveys, data collection techniques; arterial flow, intersection performance, parking; transit system analysis. Requirements: (for 053:262) 22S:039. Same as 102:262.
- 053:263 Application Simulation to Transportation** 3 s.h.  
Transportation system management and traffic engineering; application of real-time simulation and visualization. Prerequisites: 053:063 or 053:163. Same as 102:263.

## Environmental Engineering and Science

- 053:018 Geology for Engineers** 3 s.h.
- 053:050 Natural Environmental Systems** 3-4 s.h.  
Environmental chemistry and biology of air, water, and soil quality, air and water pollution, limnology, global atmospheric change, fate and transport of pollutants; hazardous substances, risk analysis, standard setting. Prerequisites: 004:011.

**053:055 Principles of Environmental Engineering**

4 s.h.

Water supply and treatment processes; wastewater treatment processes; processes for air pollution control, groundwater remediation; solid and hazardous waste management. Prerequisites: 053:050. Same as 152:162.

**053:102 Groundwater**

3 s.h.

Groundwater quality and quantity; Darcy's Law, 2-D flow equation, unsaturated zone, contaminant transport, redox reactions, drinking water quality, bioremediation; laboratories in permeameter testing, porous media grain size analysis, pump testing, monitoring well installation.

**053:104 Groundwater Modeling**

3 s.h.

Groundwater flow and contaminant transport modeling; numerical methods, applications of groundwater modeling to water supply, groundwater resources evaluation, remediation design using software; GMS (MODFLOW, MODPATH, and MT3D). Prerequisites: 012:166 or 053:103, and 22M:026. Same as 012:184.

**053:141 Design for the Developing World**

3 s.h.

Experience working on interdisciplinary teams to solve problems of the developing world; technologies for improving water and sanitation, energy, housing, and health; community building strategies, participatory methods, other techniques essential to good design; service-learning component.

**053:151 Biological Treatment Processes**

3 s.h.

Applied microbiology and fundamental principles of aerobic and anaerobic biological wastewater treatment processes; sludge processing and advanced wastewater treatment and bioremediation; lectures and laboratory. Prerequisites: 053:050, 053:152, and 053:154. Corequisites: 053:055 and 053:156.

**053:152 Environmental Chemistry I**

3 s.h.

Principles of general, physical, organic chemistry applied in water and air systems; emphasis on qualitative and quantitative understanding of chemical kinetics and equilibrium; acid-base reactions, complex formation, precipitation, dissolution, and oxidation-reduction reactions; organic nomenclature. Prerequisites: 004:012. Same as 052:231.

**053:153 Environmental Chemistry Laboratory**

3 s.h.

Laboratory experiments to demonstrate important concepts in environmental chemistry and to familiarize students with procedures used to characterize water and wastewater and evaluate certain treatment processes. Prerequisites: 004:012. Corequisites: 053:152.

**053:154 Environmental Microbiology**

3 s.h.

Fundamentals of microbiology and microbial ecology with application in water quality and biodegradation of priority pollutants; lectures and laboratory. Corequisites: 053:152.

**053:156 Physical-Chemical Process Fundamentals**

3 s.h.

Theory of physical and chemical operations and processes in water and wastewater treatment, including fundamental aspects of process dynamics; lectures, laboratory. Prerequisites: 053:050 and 053:152. Corequisites: 053:055.

**053:157 Environmental Engineering Design**

3 s.h.

Application of physical, chemical, and biological operations and processes to the design of water and wastewater treatment systems; applications in solid and hazardous waste treatment. Prerequisites: 053:050, 053:071, and 053:055.

**053:158 Solid and Hazardous Wastes**

3 s.h.

Sources, characteristics, collection, disposal of solid and hazardous wastes; environmental impacts of hazardous waste management; resource recovery systems. Requirements: (for 053:158) 053:050; (for 175:198) 175:197. Same as 175:198.

**053:159 Air Pollution Control Technology**

3 s.h.

Sources, environmental and health impacts, regulations, modeling of air pollution; processes and alternative strategies for control; global climate considerations. Prerequisites: 053:050. Same as 052:235.

**053:161 Atmospheric Chemistry and Physics**

3 s.h.

Principal chemical and physical processes affecting atmospheric trace gas and pollutant cycles; emphasis on atmospheric photochemistry, aerosol science, major sources, removal processes. Corequisites: 052:105. Same as 052:236.

**053:204 Environmental Health Policy**

3 s.h.

Major concerns in environment and human health, legislation enacted to deal with these concerns; emphasis on contemporary issues. Offered fall semesters of odd years. Requirements: (for 175:252) 175:197; (for 053:204) 053:050. Same as 152:252, 175:252.

**053:251 Environmental Systems Modeling**

3 s.h.

Mathematical modeling of environmental systems, including rivers, lakes, estuaries, treatment systems for conventional and toxic pollutants. Prerequisites: 053:050, 053:055, and 053:152.

**053:275 Perspectives in Biocatalysis**

1-3 s.h.

Applied enzymology, protein design, structure-activity relationships, biosensor technology, microbial transformations, biodegradation of environmental pollutants. Repeatable. Requirements: graduate standing in a participating department supported by the Predoctoral Training Program in Biotechnology. Same as 004:275, 046:275, 052:275, 061:275, 099:275.

**Hydraulics, Hydrology, and Water Resources****053:071 Principles of Hydraulics and Hydrology**

3 s.h.

Hydraulics of pressure conduits and open channels, dimensional analysis, flow measurements, hydraulic machinery, laboratory. Prerequisites: 057:020.

**053:103 Water Quality**

3 s.h.

Sources, availability, uses, characteristics, criteria, best management practices for surface waters; protection of waters impaired by eutrophication, soil erosion and sedimentation; pathogenic organisms, habitat destruction, wastewater discharges, contaminated sediments, atmospheric deposition, watershed development, invasive species, irrigation return flows, stormwater discharges, nonpoint sources, agricultural runoff; laboratory component, measurement of water quality characteristics in the field.

**053:117 Remote Sensing**

3 s.h.

Fundamentals of electromagnetic waves, atmospheric radiative transfer, passive remote sensing, weather radar, hydrologic application of remote sensing. Prerequisites: 053:116.

**053:120 Water Resources Sustainability**

3 s.h.

**053:128 Fluvial Geomorphology**

3 s.h.

Hydrologic principles, stream channel processes, and fluvial geomorphology within drainage basin systems; spatial and temporal variations in water distribution, analysis of hydrological data, flow mechanisms, sediment transport, forecasting procedures, hydrograph construction, modeling. Requirements: 012:102 or another 100-level geology or hydraulics course. Same as 012:138.

**053:169 Intermediate Mechanics of Fluids**

3 s.h.

Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: 057:020 and 058:040. Same as 058:160.

**053:170 Flow in Open Channels**

3 s.h.

In-depth analysis of governing flow equations; steady uniform flow in channels of different resistance and cross section; flow control sections; specific energy considerations; analysis and computation of gradually varied profiles and spatially varied flow effected by lateral outflow and inflow; unsteady flow; flood routing. Prerequisites: 053:071.

**053:171 Water Resources Engineering**

3 s.h.

Planning and economics of varied water resources projects; stochastic basis for design; flood damage mitigation, reservoirs, river morphology, economic analysis of water projects, urban water requirements, water supply, hydroelectric power systems, river navigation; contemporary civil-engineering problems and issues associated with water infrastructure development. Prerequisites: 053:174.

**053:172 Experimental Methods in Fluid Mechanics and Heat Transfer** 3 s.h.

Review of theory; importance of experiments; modeling and scaling laws; experimental environment and facilities; measurements at full scale and on scaled models; use of wind and water tunnels, towing tanks, and hydraulic flumes; instruments for measuring pressure, temperature, velocity, turbulence; error analysis; data acquisition and processing; laboratory demonstrations, hands-on experiments; project. Prerequisites: 058:080. Same as 058:162.

**053:173 Alluvial Channel Hydraulics** 3 s.h.

Laws governing fall velocity, applications to particle-size analysis; incipient motion, bed forms, bed load, suspended load, natural river processes; theory and practice of movable-bed model experiments. Prerequisites: 053:170.

**053:174 Water Resource Design** 3 s.h.

Prerequisites to storm water management systems design, including design flows and rates; analysis and design of storm sewers, detention basins, street and highway drainage facilities, culverts, dams, spillways, measures for energy dissipation; review of wastewater transfer systems and design. Prerequisites: 22S:039 and 053:071.

**053:175 Environmental Fluid Dynamics** 3 s.h.

Same as 058:163.

**053:178 Hydrometeorology** 3 s.h.

Atmospheric thermodynamics; precipitation processes; evaporation; infiltration; surface runoff; hydrographs, runoff relations; runoff hydrography; storage problems; frequency, intensity, duration studies of storms, floods, droughts; hydrometeorological observations and network design; watershed modeling; urban hydrology climate.

**053:183 Introduction to Comp Flow in Pipes and Channels** 3 s.h.

General review of numerical methods in hydraulics (finite-difference, finite-element, and method of characteristics); stability and accuracy of numerical schemes; steady free surface flows; flow transients in pipelines and channels. Prerequisites: 053:169.

**053:185 International Perspectives in Water Sciences and Management** 3 s.h.

Internationalization and water, with focus on a country or a world region; intensive, in-depth exposure to complex issues that affect planning and execution of water projects in large-scale watersheds.

**053:272 Environmental Dispersion Processes** 3 s.h.

Review of classical diffusion theories; longitudinal dispersion, transverse and vertical mixing in free-surface turbulent shear flow; application to natural channels; selected topics including stream-tube models, mixing and dispersion of heated effluents. Corequisites: 053:169.

**053:276 Viscous Flow** 3 s.h.

Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers--equations, solution methods, applications; stability theory and transition; incompressible turbulent flow--mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Requirements: (for 058:260) 058:160; (for 053:276) 053:169. Same as 058:260.

**053:277 Inviscid Flow** 3 s.h.

Derivation of governing equations for fluid flow; general theorems for motion of inviscid, incompressible flows; solution techniques for two- and three-dimensional irrotational flows; forces and moments acting on immersed bodies; inviscid flow with vorticity; inviscid compressible flow; numerical methods for solution of inviscid flows. Requirements: (for 058:262) 058:160; (for 053:277) 053:169. Same as 058:262.

**Graduate Seminars, Advanced Topics, Research**

**053:190 Readings in Civil and Environmental Engineering**

arr.

For graduate nonmajors who want to earn credit in undergraduate civil and environmental engineering courses.  
Requirements: non-engineering graduate standing.

**053:191 Graduate Seminar: Structure, Mechanics, Materials** 0 s.h.  
Presentation and discussions of recent advances and research in structures, mechanics, and materials engineering by guest lecturers, faculty, students. Requirements: senior or graduate standing.

**053:192 Environmental Engineering Seminar** 0 s.h.  
Presentation and discussion of current topics, case studies, and research in environmental science and engineering by students, guest lecturers, faculty. Requirements: senior or graduate standing.

**053:193 Graduate Seminar: Hydraulics, Hydrology, and Water Resources** 0 s.h.  
Presentation and discussions of recent advances and research in hydraulics, hydrology, and water resources by guest lecturers, faculty, students. Requirements: senior or graduate standing.

**053:195 Contemporary Topics in Civil and Environmental Engineering** arr.  
New topics or areas of study not formally offered in other civil and environmental courses; ice engineering, chaos and strange attractors, remote sensing, nonlinear dynamics of hydrologic processes, advanced water and wastewater treatment processes, hazardous waste control, global climate change, damage mechanics; based on faculty/student interest. Requirements: senior standing.

**053:198 Individual Investigations: Civil and Environmental Engineering** arr.  
Individual projects for civil and environmental engineering graduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

**053:199 Research: Civil and Environmental Engineering M.S. Thesis** arr.  
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the M.S. with thesis in civil and environmental engineering. Requirements: graduate standing.

**053:215 Hydrogeology Seminar** 3 s.h.  
Innovative experimental and modeling studies in hydrogeology; experimental need, design, mathematical formulation, assumptions, data collection techniques; data analysis and its importance to groundwater modeling. Prerequisites: 012:166. Same as 012:210.

**053:299 Research: Civil and Environmental Engineering Ph.D. Dissertation** arr.  
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for the Ph.D. in civil and environmental engineering.

# Electrical and Computer Engineering

**Chair:** Milan Sonka

**Professors:** David R. Andersen, Er-Wei Bai, Thomas F. Boggess, Thomas L. Casavant, Gary E. Christensen, Steve M. Collins, Soura Dasgupta, Michael Flatté, Jon G. Kuhl, Sudhakar M. Reddy, Arthur L. Smirl, Milan Sonka

**Professors emeriti:** Earl D. Eyman, Adrianus Korpel, Karl E. Lonngren, Norbert R. Malik, John P. Robinson

**Associate professors:** Michael Abramoff, Mark S. Andersland, Anton Kruger, John Prineas, Punam Saha, Tom Schnell, Xiaodong Wu

**Assistant professors:** Reinhard Beichel, Mona Garvin, Zhiqiang Liu, Hans Johnson, Raghuraman Mudumbai, Hassan Raza, Alf Sjöchi, Daniel Thedens

**Adjunct assistant professors:** Dave Matthews, Jim Maxted, Andreas Wahle

**Visiting assistant professor:** Guadalupe Canahuat

**Lecturer:** Cliff Curry

**Undergraduate degree:** B.S.E. in Electrical Engineering

**Graduate degrees:** M.S., Ph.D. in Electrical and Computer Engineering

**Web site:** <http://www.engineering.uiowa.edu/ece>

Electrical engineers and computer engineers make vital contributions to nearly all facets of modern society through their work in areas such as computer systems, medical imaging, robotics, wireless communications, and fiber optics. From the World Wide Web to high-definition television, cellular telephones, and computer networks, the contributions of electrical and computer engineers are changing everyday life.

Many benefits that have sprung from electrical engineering technology now are taken for granted--noninvasive imaging of the brain and other internal organs, astonishing views of the solar system's outer planets, and wireless telecommunications. Electrical engineers also play crucial roles in major emerging technologies, such as wireless Internet, optical communications, and mapping of the human genome.

As the United States strives to retain or enlarge its share of national and international markets, electrical engineers are certain to play an important role in improving productivity through automation, increased efficiency, and new technologies.

Electrical and computer engineers work in research, design, development, manufacturing, sales, market analysis, consulting, field service, and management. They are employed in computer, semiconductor, software, aerospace, telecommunication, medical, radio, television, and power industries.

## Undergraduate Program

The department offers the Bachelor of Science in Engineering in electrical engineering. The program's objective is to produce graduates who:

- contribute to society in a broad range of careers;
- function professionally in an increasingly international and rapidly changing world;
- effectively understand, use, and develop modern electrical and computer engineering technologies and concepts; and
- achieve success throughout their careers.

## Bachelor of Science in Engineering

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The electrical engineering major provides technical depth and breadth as well as flexibility and the opportunity for students to customize their programs according to their own goals. Students choose one of two tracks: computer engineering or electrical engineering. The computer engineering track provides focus and depth for students preparing for careers or graduate study in computer systems hardware or software engineering. The electrical engineering track provides a broad background in electrical engineering concepts and practice, preparing students for careers in a wide range of industries and organizations.

The B.S.E. curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005 Engineering Problem Solving I, 059:006 Engineering Problem Solving II, and 010:003 Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. For information on B.S.E. curriculum stems and common course requirements, see Bachelor of Science in Engineering in the College of Engineering section of the Catalog.

Electrical engineering students complete a core of electrical and computer engineering foundation courses and then take five required track courses and two track electives. See "Track Breadth and Depth Electives" after the following curriculum list. Students must select elective focus area courses according to guidelines established by the Department of Electrical and Computer Engineering. See "Elective Focus Area" after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

### FIRST YEAR

**First Semester**

004:011 Principles of Chemistry I	4 s.h.
010:003 Rhetoric (or 010:001-010:002)	4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus	4 s.h.
059:005 Engineering Problem Solving I	3 s.h.
059:090 Engineering Success Seminar for First-Year Students	1 s.h.

**Second Semester**

22M:032 Engineering Mathematics II: Multivariable Calculus	4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra	2 s.h.
029:081 Introductory Physics I	4 s.h.
059:006 Engineering Problem Solving II	3 s.h.
General education component course	3 s.h.

**SECOND YEAR****First Semester**

22M:034 Engineering Mathematics IV: Differential Equations	3 s.h.
029:082 Introductory Physics II	3-4 s.h.
059:007 Engineering Fundamentals I: Statics	2 s.h.
059:008 Engineering Fundamentals II: Electrical Circuits	3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics	3 s.h.

**Second Semester**

22M:037 Engineering Mathematics V: Vector Calculus	3 s.h.
055:040 Linear Systems I	3 s.h.
057:017 Computers in Engineering	3 s.h.
057:018 Principles of Electronic Instrumentation	4 s.h.
General education component course	3 s.h.

**THIRD YEAR****First Semester**

22S:039 Probability and Statistics for the Engineering and Physical Sciences	3 s.h.
055:032 Introduction to Digital Design	3 s.h.
055:070 Electromagnetic Theory	3 s.h.
055:091 Professional Seminar: Electrical Engineering	1 s.h.
Two required track courses	6 s.h.

**Second Semester**

Three required track courses	9 s.h.
Two elective focus area courses	6 s.h.
General education component course	3 s.h.

**FOURTH YEAR****First Semester**

055:088 Principles of Electrical Engineering Design	3 s.h.
Track breadth elective	3 s.h.
Three elective focus area courses	9 s.h.
General education component course	3 s.h.

**Second Semester**

055:089 Senior Electrical Engineering Design	3 s.h.
Track depth elective	3 s.h.
Two elective focus area courses	6 s.h.
General education component course	3 s.h.

**Required Track Courses**

Both curriculum tracks require five track courses, as follows.

**COMPUTER ENGINEERING TRACK**

22C:019 Discrete Structures	3 s.h.
22C:031 Algorithms	3 s.h.
055:033 Introduction to Software Design	3 s.h.
055:035 Computer Architecture and Organization	3 s.h.
055:036 Embedded Systems and Systems Software	3 s.h.

**ELECTRICAL ENGINEERING TRACK**

055:041 Electronic Circuits	4 s.h.
055:043 Linear Systems II	3 s.h.
055:050 Communication Systems	3 s.h.
055:060 Control Systems	3 s.h.
055:072 Electrical Engineering Materials and Devices	3 s.h.

**TRACK BREADTH AND DEPTH ELECTIVES**

Students in the computer engineering track must choose their track breadth elective from the list of courses required for the electrical engineering track. Students in the electrical engineering track must choose their track breadth elective from the list of courses required for the computer engineering track.

Students also choose one track depth elective, which must be an advanced course in a subject area within the student's track--normally a 100-level course for which one of the required track courses is a prerequisite. For a complete list of depth electives for each track, see the Department of Electrical and Computer Engineering web site.

**Elective Focus Area**

The elective focus area provides access to the broad range of course work in the department, the college, and the University. Students work with their academic advisors to develop an elective focus area tailored to their own goals--for example, additional technical depth in one or more areas of electrical engineering, completion of a minor in a relevant area, completion of the Certificate in Technological Entrepreneurship, or pursuit of interdisciplinary experience.

The elective focus area must include at least 15 s.h. of technical course work, at least 6 s.h. of which must be earned in 100-level electrical and computer engineering courses. Students earning a minor in business administration (Tippie College of Business) or a Certificate in Technical Entrepreneurship may apply up to 6 s.h. of the required technical course work to the minor or certificate. All students must demonstrate an ability to work on multidisciplinary teams.

All elective focus area plans must be approved in advance by the department.

For more detailed information about elective focus areas, see "Bachelor of Science in Engineering"/"Elective Focus Area" in the College of Engineering section of the Catalog. For more information about the department's elective focus area guidelines, see the Department of Electrical and Computer Engineering web site.

### **Joint B.S.E./M.S.**

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for electrical engineering undergraduates who intend to earn an M.S. in electrical and computer engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level course work and do thesis-level research while still undergraduates. They may count 9 s.h. of graduate course work toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Electrical and Computer Engineering.

## **Graduate Programs**

The department offers a Master of Science, with and without thesis, and a Doctor of Philosophy in electrical and computer engineering. It also offers an optional M.S. subtrack in software engineering, which is available to thesis and nonthesis students. Excellence in scholarship and research is stimulated by close contact with the faculty throughout graduate study and through programs tailored to fit individual needs.

Students select an advisor and, with the advisor, plan an individual program bounded only by the broad guidelines of the Graduate College and the program. The department maintains close interdisciplinary ties with other University of Iowa departments, especially with the Departments of Physics and Astronomy, Computer Science, Mechanical and Industrial Engineering, and Biomedical Engineering, and the Carver College of Medicine. Principal areas of graduate study include waves and materials, computer systems, wireless communications, signal and image processing, computational genomics, and control systems and robotics.

### **Research and Study Areas**

#### **BIOINFORMATICS AND COMPUTATIONAL BIOLOGY**

The Center for Bioinformatics and Computational Biology (CBCB) is a multidisciplinary research enterprise that encompasses numerous laboratories and collaborates with many graduate programs on campus. Students may earn the Certificate in Informatics, offered by the Graduate College, to augment their Ph.D. training in disciplines ranging from molecular biology to biochemistry to computer science to engineering.

Since 1994, the Coordinated Laboratory for Computational Genomics, a CBCB affiliate, has engaged in a broad range of research activities that complement the Human Genome Project. Members of the laboratory develop new hardware and software techniques for analysis and annotation of genomic sequence, its transcription and translation, and the proteome. Other efforts are aimed at systematic capture and curation of phenotypic information acquired from massive databases of clinical information derived from collaborations with the College of Medicine. The goal of these projects is to elucidate the mechanisms of human disease and develop promising new methods for cures and treatments. The laboratory's facilities include more than 200 workstations, 3 Linux clusters, and access to the NSF TeraGrid and other high-performance computing facilities. Projects in the laboratory frequently involve cutting-edge genomic and proteomic instruments such as the Roche 454 next-generation sequencing platform and several high-throughput gene expression (microarray) measurement platforms.

#### **COMPUTER SYSTEMS AND VLSI CIRCUITS**

Research emphasis is directed toward design and test of very-large-scale integrated (VLSI) circuits, high-performance computing and networking, and intelligent agent systems. Research in the VLSI area involves development of techniques and algorithms that assist in synthesis and testing of large-scale logic circuits, and incorporation of these techniques into computer-aided design tools. Current projects include new pattern sources for built-in-test, efficient test pattern generation, generation of compact test sets, and methods for reducing test data volumes.

High-performance computing research involves development of collaborative and parallel computing environments and associated software tools, and use of these facilities and tools in varied application domains, including image processing and computational biology. Current work in networking focuses on protocols and layer-integration schemes that support high-performance wireless networking, and on control and coordination of mobile ad hoc networks. Current research facilities in these areas include several large cluster computers and an experimental asynchronous

transfer mode (ATM) network.

Departmental facilities that support this work include a network of SUN, HP, SGI, and Linux workstations, and high-speed network connections to collegiate, University, and national facilities, including an NSF-funded, dedicated ATM network of high-performance workstations, the college's Computer Systems Support (CSS), the University's Information Technology Services, national supercomputer centers, federal laboratories, and facilities at other universities.

## **CONTROL SYSTEMS AND ROBOTICS**

Current research emphasizes optimal, adaptive, digital, robust and stochastic control and the control of discrete event dynamical systems. Recent work has concerned the estimation, identification, and robust control of linear and nonlinear dynamical systems; set membership identification, control over wireless communication channels; coordinated fault tolerant control of unmanned vehicles; use of control theory to analyze distributed computing, communications, and manufacturing systems; interplay between communications and control; design of fast digital controllers using subband coding; and multirate control systems.

## **NANOSCALE ELECTRONICS AND SPINTRONICS**

Nanoscale devices and systems provide solutions for low-power logic devices, high-density 3-D stackable electronic and/or spintronic memory elements, and solar/waste energy harvesting applications. Current nanoscale and spintronics work involves post-CMOS transistor research to extend Moore's law in this century; use of novel magnetic and nonmagnetic nanomaterials for enhanced-CMOS and nonvolatile memory; and intelligent solar cells, thermoelectric devices, fuel cells and batteries for efficient solid-state energy conversion. Departmental researchers are pursuing experimental, theoretical, and large-scale computational approaches.

## **SIGNAL AND IMAGE PROCESSING**

Research in image processing and basic and applied signal processing is supported by a digital signal processing laboratory and an image analysis laboratory. Collaborative research with faculty in the Departments of Radiology, Neurology, Psychiatry, Internal Medicine, Ophthalmology and Visual Sciences, Radiation Oncology, and Biomedical Engineering is directed at quantitative analysis of medical images.

In the area of signal processing, current projects include analysis and design of efficient adaptive algorithms for signal processing, efficient coding and transmission of speech, speech processing aids for the hearing-impaired, robust equalization of uncertain channels, application of neural networks to communications systems, multirate signal processing, and subband coding and channel equalization.

Image processing and analysis projects include development of novel methods for image segmentation, image registration, computer-aided detection and diagnosis, early identification of disease patterns from medical image data, computer-aided surgical planning, virtual and augmented reality medical image visualization, building anatomic atlases, and a broad range of translational medicine projects focusing on research and clinical applications of the novel methods. The areas of interest span all scales, from molecules to cells to small animals to humans, and cover a broad range of organ systems and targeted diseases. The spectrum of medical imaging modalities used for research and applications in image processing and analysis is equally broad, encompassing all existing modalities, including X-ray, CT, MR, PET, SPECT, and OCT.

The Medical Image Analysis Labs consist of several specialized facilities for digital image processing. They are equipped with state-of-the-art devices for data storage, transfer, visualization, and analysis. High-capacity data storage devoted to image processing research offers more than 17 TB of online hard disk space. An augmented reality medical image visualization lab serves as a high-performance collaborative resource for the Iowa Institute for Biomedical Imaging. The institute makes additional resources available to image processing research, including small and large animal as well as human research scanning facilities, and provides a backbone for interdisciplinary medical image analysis research to electrical and computer engineering graduate students and faculty.

## **WAVES AND MATERIALS**

Research in this area is carried out primarily in the Iowa Advanced Technology Laboratories, a well-equipped, modern facility two blocks from the Engineering Building, and in Van Allen Hall. Current research topics are optical and electronic properties of semiconductors, semiconductor devices, electro-optics, nonlinear optics, nonlinear wave propagation in plasmas, nanotechnology, and medical devices.

Much work is done in collaboration with other University of Iowa departments, including the Departments of Physics and Astronomy, Chemistry, Internal Medicine, and Neurosurgery. Facilities include two molecular beam epitaxy reactors (in physics and astronomy), a microfabrication laboratory with micrometer resolution capabilities, electrical characterization capability to 22 GHz, several Ti-sapphire lasers, a mid-infrared optical parametric oscillator, and

plasma equipment for nonlinear wave plasma interaction studies.

Examples of current projects are the design and fabrication of diode lasers based on the bandgap engineering of antimony and arsenic-based III-V compound semiconductors, phase control of laser arrays, development of an all-optical power equalizer, characterization of quantum well devices, nonlinear waveguide devices, development of a noncontact method to measure transport properties, plasma and optical soliton excitation and propagation, development of cellular probes, and a noninvasive glucose sensor for medical research.

## WIRELESS COMMUNICATION SYSTEMS

The department is engaged in research using wireless sensor networks (WSNs), which consist of spatially distributed autonomous devices that use sensors to cooperatively monitor physical or environmental conditions such as temperature, sound, vibration, pressure, motion, and pollutants at different locations. WSNs are used for environment and habitat monitoring, healthcare applications, home automation, and traffic control. Current research includes the application of WSN, traditional telemetry, and commercial cellular communication infrastructure for geosciences data collection (e.g., rainfall, water quality, soil moisture).

Another important research interest involving distributed sensor networks is the distributed control of power systems, especially requirements of the next-generation electric grid with smart metering and distributed generation using small-scale wind and solar generators. Research on WSNs also includes the design of cooperative communication techniques for energy efficient WSNs and issues of localization, network organization, and control.

Research activities in communication systems focus on design and analysis of receivers for digital wireless communications, especially the development of effective and practical receivers for multiple-user wireless cellular systems in multipath channels. Projects include the removal of intersymbol interference by blind identification/equalization, multiple-user detection in CDMA without power control, receiver structures for 3G wireless cellular systems, cooperative beam forming for ad hoc wireless networks, resource allocation in OFDM systems, and scheduling in wireless networks. Fundamental theoretical issues and practical implementation are emphasized.

## Master of Science

The Master of Science in electrical and computer engineering requires 30 s.h. of graduate credit with thesis, and 36 s.h. of graduate credit without thesis. Either option may precede Ph.D. study.

M.S. students must maintain a cumulative g.p.a. of at least 3.00.

Thesis students must complete at least 12 s.h. from an approved list of electrical and computer engineering courses and 6 s.h. in 055:199 Research: Electrical and Computer Engineering M.S. Thesis. Nonthesis students must complete at least 18 s.h. from an approved list of electrical and computer engineering courses; nonthesis students may count no more than 3 s.h. of independent study toward the degree. Courses required for the B.S.E. in electrical engineering do not count toward the M.S. requirements.

All M.S. students must successfully complete a final examination, which is conducted by a committee of at least three faculty members. One part of the final examination for thesis students consists of an oral defense of the thesis.

## M.S. Subtrack in Software Engineering

A Master of Science subtrack in software engineering is available to both thesis and nonthesis students. The M.S. with software engineering subtrack requires the same amount of graduate credit as the M.S. without the subtrack: a minimum of 30 s.h. for the thesis option, and 36 s.h. for the nonthesis option. All rules for additional credit and the M.S. final examination are the same as for the M.S. without the subtrack. Successful completion of the subtrack results in the designation "with specialization in software engineering" on the student's transcript.

The software engineering subtrack requires the following course work.

055:131 Introduction to VLSI Design	3 s.h.
055:132 High Performance Computer Architecture	3 s.h.
055:133 Graph Algorithms and Combinatorial Optimization	3 s.h.
055:180 Fundamentals of Software Engineering	3 s.h.
055:181 Formal Methods in Software Engineering	3 s.h.
055:182 Software Engineering Languages and Tools	3 s.h.
055:183 Software Engineering Project	3 s.h.

In addition to the courses listed above, thesis students complete another 3 s.h. of course work from the approved list of electrical and computer engineering courses; nonthesis students complete another 6 s.h.

### **Doctor of Philosophy**

The Doctor of Philosophy in electrical and computer engineering requires a minimum of 72 s.h. of graduate credit. At least 45 s.h. must be earned in formal course work (not in thesis work or other independent study), including 30 s.h. from an approved list of electrical and computer engineering courses. Each Ph.D. student's study plan must be approved by the student's advisor and by the graduate committee.

Ph.D. students take a Ph.D. qualifying examination and a Ph.D. comprehensive examination. Then they must successfully complete a research program that includes a minimum of 18 s.h. of Ph.D. research and culminates in the preparation of a thesis. Finally, the candidate must present a successful oral defense of the thesis.

Ph.D. students must maintain a cumulative g.p.a. of 3.25 or higher in all graduate course work.

Acceptance to the Ph.D. program requires successful completion of the Ph.D. qualifying examination. This all-day written exam is given once a year, late in the spring semester. It covers four areas chosen by the student from a list of six. Students normally are expected to take the qualifying examination within the first 30 s.h. of graduate studies. A cumulative g.p.a. of at least 3.25 is required for admittance to the exam. Students who fail the examination may retake it only once, the next time it is offered.

Following successful completion of the Ph.D. qualifying examination and invitation to the Ph.D. program, a student must complete the two-part Ph.D. comprehensive examination. The first part is a written research proposal that includes a thorough literature survey providing the motivation and background for the proposal. The second part is an oral examination.

Students must pass the Ph.D. qualifying examination before they may take the Ph.D. comprehensive exam, and they must complete the comprehensive exam no later than three calendar years after passing the qualifying exam. Students who fail to meet this deadline must retake the qualifying exam. The qualifying exam and the comprehensive exam may not be taken in the same semester.

The final requirement for completion of the Ph.D. program is the preparation and successful defense of the Ph.D. thesis. This must be completed no sooner than six months but no longer than three years after completion of the comprehensive examination.

### **Admission**

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

M.S. applicants must have a g.p.a. of at least 3.00, and Ph.D. applicants must have a g.p.a. of at least 3.25, on all electrical and computer engineering, mathematics, and physics course work. M.S. applicants with a g.p.a. between 2.75 and 3.00 in electrical and computer engineering, mathematics, and physics course work may be admitted on probation, if warranted by other aspects of their academic records.

Students with baccalaureate degrees in related areas (e.g., physics, mathematics, and computer science) may be admitted on conditional status. They may be required to complete additional course work, without earning graduate credit, before being granted regular status.

Each application is reviewed individually. Extenuating circumstances may permit deviations from the usual standards.

### **Financial Support**

A number of fellowships, traineeships, assistantships, scholarships, and industrial grants are available to graduate students who qualify. These are awarded on a competitive basis.

### **Facilities and Laboratories**

#### **Undergraduate Core**

Electrical and computer engineering provides core instruction for the college in electrical circuits, electronics, instrumentation, and computers. A key part of this core teaching responsibility lies in providing students with an early opportunity to use engineering laboratory instrumentation.

#### **Undergraduate Laboratories**

The undergraduate laboratories include facilities for the study of electrical and electronic circuits, signals and systems,

microprocessor-based computers and systems, measurement automation, communication systems, control systems, computer-aided design of VLSI circuits, image processing, robotics, and optics. The laboratories are equipped with modern equipment, including digital oscilloscopes, computer-controlled virtual instrumentation, and software and hardware for embedded-systems development.

### Graduate Facilities and Laboratories

The department has laboratories intended primarily for graduate research in the areas of parallel processing, image processing, CAD for VLSI circuits, software engineering, electro-optics, plasma physics, control systems, cardiovascular image processing, and wireless communication. A network of SUN, IBM, and HP workstations and server nodes provides departmental computing support. This network is tied to the College of Engineering facilities, which consist of more than 100 Hewlett-Packard workstations. Connections are provided to central University facilities and national networks. Through cooperative arrangements, advanced computing facilities at national supercomputing centers, federal laboratories, and other universities are available for graduate research.

## Electrical and Computer Engineering Courses

### Special Topics

**055:000 Cooperative Education Training Assignment: Electrical Engineering** 0 s.h.  
Electrical engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

**055:002 Half-time Cooperative Education Training Assignment: Electrical Engineering** 0 s.h.  
Registration for work assignment periods; for students participating in the Cooperative Education Program.

**055:088 Principles of Electrical Engineering Design** 3 s.h.  
Design problems requiring integration of subject matter from other required electrical and computer engineering courses. Requirements: senior standing.

**055:089 Senior Electrical Engineering Design** 3 s.h.  
Individual or team project; demonstration of completed project and formal engineering report. Prerequisites: 055:088. Requirements: senior standing.

**055:091 Professional Seminar: Electrical Engineering** 1 s.h.  
Professional aspects of electrical engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Repeatable. Requirements: junior standing.

**055:098 Individual Investigations: Electrical Engineering** arr.  
Individual projects for electrical engineering undergraduate students: laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research.

### Digital Systems, Computers, Software Engineering

**055:032 Introduction to Digital Design** 3 s.h.  
Modern design and analysis of digital switching circuits; combinational logic; sequential circuits and system controllers; interfacing and busing techniques; design methodologies using medium- and large-scale integrated circuits; lab arranged. Requirements: sophomore standing.

**055:033 Introduction to Software Design** 3 s.h.  
Design of software for engineering systems; algorithm design and structured programming; data structures; introduction to object-oriented programming in JAVA; applications to engineering problems; lab arranged. Prerequisites: 057:017.

**055:035 Computer Architecture and Organization** 3 s.h.

Basic concepts; computer evolution, register transfer level design, simulation techniques, instruction sets (CISC and RISC), assembly language programming, ALU design, arithmetic algorithms and realization of arithmetic functions, hardwired and microprogrammed control, memory hierarchies, virtual memory, cache memory, interrupts and DMA, input/output; introduction to high-performance techniques, pipelining, multiprocessing; introduction to hardware description languages (Verilog, VHDL); students design and simulate a simple processor. Offered fall semesters. Prerequisites: 055:032 and 057:017.

**055:036 Embedded Systems and Systems Software**

3 s.h.

Microprocessors and microcontrollers as components in engineering systems; embedded system design processes; microcontroller/microprocessor architecture; interrupts and traps; memory and device interfacing; low-level and high-level software design for embedded systems; examples of embedded system architecture and design; fundamentals of operating systems; tasks and processes; context switching and scheduling; memory and file management, interprocess communication; device drivers. Prerequisites: 057:017. Corequisites: 055:035.

**055:121 Introduction to Bioinformatics**

4 s.h.

Basics of genetics and molecular biology; overview of bioinformatics and genome science, including genome projects, functional genomics, phylogenetics, proteomics, microarrays, DNA polymorphisms, data-mining algorithms; experimental methods, analytical approaches. Requirements: 002:128 or 099:120 or graduate standing. Same as 002:169, 051:121.

**055:122 Computational Genomics**

3 s.h.

Same as 002:174, 051:122, 127:173.

**055:130 Switching Theory**

3 s.h.

Switching algebras; combinational circuits--hazards, minimization, multiple-output networks; sequential circuits--critical races, essential hazards, fundamental-mode, pulse-mode, synchronous circuits-state assignment, state reduction; input-output experiments. Prerequisites: 055:032.

**055:131 Introduction to VLSI Design**

3 s.h.

MOS devices and circuits; MOS transistor theory, MOS processing technologies, MOS device models; timing and power considerations; performance issues; scaling; various logic schemes; circuit techniques; clocking strategies; I/O structures; design styles; ASIC design; MOS subsystem design; system case studies, use of electronic design automation tools, introduction to hardware description languages, design synthesis, design projects; lab. Prerequisites: 055:032 and 055:041.

**055:132 High Performance Computer Architecture**

3 s.h.

Problems involved in designing and analyzing current machine architectures using hardware description language (HDL) simulation and analysis, hierarchical memory design, pipeline processing, vector machines, numerical applications, multiprocessor architectures and parallel algorithm design techniques; evaluation methods to determine relationship between computer design and design goals. Prerequisites: 22C:112 or 22C:113 or 055:035. Same as 22C:160.

**055:133 Graph Algorithms and Combinatorial Optimization**

3 s.h.

Combinatorial optimization problems; time complexity; graph theory and algorithms; combinatorial optimization algorithms; complexity theory and NP-completeness; approximation algorithms; greedy algorithms and matroids. Prerequisites: 055:033.

**055:138 Testing Digital Logic Circuits**

3 s.h.

Logic models for faults; fault detection in combinational and sequential circuits; fault-diagnosis; design for testability; random testing, compressed data testing, built-in testing. Prerequisites: 055:032.

**055:180 Fundamentals of Software Engineering**

3 s.h.

Problem analysis, requirements definition, specification, design, implementation, testing/maintenance, integration, project management; human factors; management, technical communication; design methodologies; software validation, verification; group project experience. Prerequisites: 22C:022 or 055:033. Same as 22C:180.

**055:181 Formal Methods in Software Engineering**

3 s.h.

Models, methods, and their application in all phases of software engineering process; specification methods; verification of consistency, completeness of specifications; verification using tools. Prerequisites: 22C:180. Same as 22C:181.

**055:182 Software Engineering Languages and Tools**

3 s.h.

Object-oriented programming concepts (objects, classes, single and multiple inheritance, polymorphism and dynamic binding); object-oriented languages and environments such as JAVA and Eiffel; introduction to design patterns and software architectures such as Model-View-Controller and application frameworks; component-based software development; use of standard component frameworks such as CORBA and COM/DCOM. Prerequisites: 22C:180 or 055:180. Requirements: experience with an object-oriented programming language. Same as 22C:182.

**055:183 Software Engineering Project**

3 s.h.

Team software development project using concepts and methodologies learned in earlier software engineering classes; practical aspects of large-scale software development. Prerequisites: 22C:180 and 22C:182. Same as 22C:183.

**Signal and Image Processing****055:040 Linear Systems I**

3 s.h.

Introduction to continuous and discrete time signals and systems with emphasis on Fourier analysis; examples of signals and systems; notion of state and finite state machines; causality; linearity and time invariance; periodicity; Fourier transforms; frequency response; convolution; IIR and FIR filters, continuous and discrete Fourier transforms; sampling and reconstruction; stability. Prerequisites: 22M:034 and 059:008.

**055:041 Electronic Circuits**

4 s.h.

Design and analysis of FET and BJT amplifiers; low, midrange, high-frequency analysis; difference amplifiers; feedback amplifiers; SPICE simulation; power amplifiers; digital logic families. Prerequisites: 055:040 and 057:018.

**055:043 Linear Systems II**

3 s.h.

Continuation of 055:040, emphasis on Laplace and Z-transform analysis; unilateral and bilateral Laplace transform; region of convergence; stability; block diagram algebra; first- and second-order continuous and discrete time systems; Bode plots. Prerequisites: 055:040.

**055:141 Advanced Circuit Techniques**

3 s.h.

Advanced circuit principles; component, signal, and noise models; subcircuit design including oscillators, amplifiers, multipliers, noise generators, frequency converters, phase-locked loops, filters, transmission gates, and level-shifters; measurement techniques including bridge, signal-averaging and lock-in techniques; case studies of A/D and D/A converters; single-supply op amps, low-noise, large-signal, and high-frequency circuits; lab. Prerequisites: 055:041.

**055:145 Pattern Recognition**

3 s.h.

Mathematical foundations and practical techniques of pattern recognition; adaptation, learning, description; statistical pattern recognition; syntactic pattern recognition, neural networks for recognition; fuzzy logic for recognition; nonstandard and combined pattern recognition approaches. Prerequisites: 055:040.

**055:146 Digital Signal Processing**

3 s.h.

Theory, techniques used in representing discrete-time signals; system concepts in frequency and sampling domains; FIR and IIR digital filter theory, design and realization techniques; theory, application of discrete Fourier transforms/FFT. Prerequisites: 055:043 and 055:046.

**055:148 Digital Image Processing**

3 s.h.

Mathematical foundations and practical techniques for digital manipulation of images; image sampling, compression, enhancement, linear and nonlinear filtering and restoration; Fourier domain analysis; image pre-processing, edge detection, filtering; image segmentation. Prerequisites: 051:040 or 055:040, and 051:060 or 055:043. Same as 051:148.

**055:245 Magnetic Resonance Imaging Systems**

3 s.h.

Mathematical foundations and practical implementation for magnetic resonance imaging (MRI); principles of image formation using Fourier and projection techniques, non-Cartesian sampling, tomographic image reconstruction, sources of artifacts and their correction. Prerequisites: 055:146 and 055:148.

**055:247 Image Analysis and Understanding**

3 s.h.

Mathematical foundations and practical techniques of digital image analysis and understanding; image segmentation (from edges and regions), object description (from boundaries, regions, scale, scale insensitive descriptions, 3-D shape, texture) pattern recognition (statistical and syntactic methods, cluster analysis), image understanding (knowledge representation, control strategies, matching, context, semantics), image analysis and understanding systems; lab arranged. Prerequisites: 055:148.

**055:248 Advanced Digital Image Processing**

3 s.h.

Advanced local operators (scale-space imaging, advanced edge detection, line and corner detection), image morphology (binary/gray scale operators, morphological segmentation and watershed), digital topology and geometry (binary/fuzzy digital topology, distance functions, skeletonization), color spaces, wavelets and multi-resolution processing (Haar transform, multi-resolution expansions, wavelet transforms in one or two dimensions, fast wavelet transform, wavelet packets), image registration (intensity correlation, mutual information, and landmark-based deformable registration methods). Prerequisites: 055:146 and 055:148.

**055:292 ECE Graduate Seminar on Image Processing, Computer Vision, and Medical Imaging**

0 s.h.

Recent advances and research in image processing, computer vision, and medical imaging; presentation by guest lecturers, faculty, students. Requirements: graduate standing.

**Communication and Information****055:050 Communication Systems**

3 s.h.

Introduction to analog and digital communications; emphasis on modulation and noise analysis; Fourier analysis, probability theory, random variable and processes, AM, FM, pulse-coded modulation, binary digital modulation, SNR analysis of AM and FM, BER analysis of digital modulation schemes. Prerequisites: 22S:039 and 055:043.

**055:054 Communication Networks**

3 s.h.

Communication networks, layered network architectures, applications, network programming interfaces (e.g., sockets), transport, congestion, routing, data link protocols, local area networks, emerging high-speed networks, multimedia networks, network security, Internet protocol; technology examples. Prerequisites: 057:017. Corequisites: 22S:039.

**055:150 Communication Theory**

3 s.h.

Random processes, source coding, digital transmission at baseband, optimum receiver design for Gaussian noise, error probability and power spectrum analysis, signal design for bandlimited channels, digital carrier modulation, bandwidth/energy/error probability tradeoffs, coding for error detection and correction. Prerequisites: 055:050 and 055:051.

**055:152 Introduction to Information and Coding Theories**

3 s.h.

Quantitative measure of information; source encoding; error detecting codes; block and convolutional codes, design of hardware and software implementations; Viterbi decoding. Prerequisites: 055:050.

**055:153 Wireless Sensor Networks**

3 s.h.

Wireless sensor networks overview; antennas, radio propagation models; WSN power and energy considerations, engineering issues, batteries, networks layers, stacks; medium access control (MAC); spread spectrum, FHSS, CDMA; infrastructure establishment; WSN routing; localization; synchronization; sensors; RFID; WSN case studies; lab. Prerequisites: 055:050. Requirements: senior standing.

**Controls****055:060 Control Systems**

3 s.h.

Fundamental concepts of linear feedback control, mathematical modeling, transfer functions, system response, feedback effects, stability, root-locus and frequency response analysis and design, compensation, lab arranged. Prerequisites: 055:040.

**055:160 Control Theory**

3 s.h.

State space approach; controllability, observability, canonical forms; design of Luenberger observers; feedback control via pole placement; stability, minimal realization; advanced topics. Prerequisites: 055:060. Same as 058:133.

**055:164 Computer-Based Control Systems**

3 s.h.

Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: 055:060. Same as 058:134.

**Waves and Materials****055:070 Electromagnetic Theory**

3 s.h.

Electric and magnetic forces, Maxwell's equations, wave propagation; applications, including radiation, transmission lines, circuit theory. Prerequisites: 22M:037 and 029:082.

**055:072 Electrical Engineering Materials and Devices**

3 s.h.

Fundamentals of semiconductor physics and devices; principles of the p-n junction diode, bipolar transistor, field effect transistor. Prerequisites: 029:082 and 055:041.

**055:170 Advanced Electromagnetic Theory**

3 s.h.

Time varying fields; plane wave propagation, reflection, refraction; waves in anisotropic media transmission lines, impedance matching, Smith chart; metallic and dielectric wave guides; resonators; antennas, antenna arrays. Prerequisites: 055:070.

**055:172 Solid State Physical Electronics**

3 s.h.

Advanced topics in semiconductor physics and devices; elementary concepts in quantum and statistical mechanics, diodes, bipolar transistor, field-effect transistor. Prerequisites: 055:072.

**055:173 Introductory Solid State Physics**

3 s.h.

Phenomena associated with solid state; classification of solids and crystal structures, electronic and vibrational properties in solids; thermal, optical, magnetic, dielectric properties of solids. Prerequisites: 029:140 and 22M:028. Same as 029:193.

**055:177 Introductory Optics**

3 s.h.

Geometrical and physical optics; interference; diffraction; polarization; microscopic origins of macroscopic optical properties of matter; optical activity; electro-optical, magneto-optical, acousto-optical phenomena; spontaneous Brillouin, Raman, Rayleigh scattering. Prerequisites: 029:130. Same as 029:180.

**055:178 Optical Signal Processing**

3 s.h.

Linear systems description of optical propagation; diffraction and angular plane wave spectrum; lenses as Fourier transformers, lens configurations as generalized optical processors; lasers, coherence, spatial frequency analysis; holography; convolvers, correlators, matched filters; synthetic aperture radar; optical computing. Requirements: (for 055:178) 055:070; (for 029:184) 029:130. Same as 029:184.

**055:179 Electro Optics**

3 s.h.

Wave equation solutions; optical birefringence; finite beam propagation in free space, dielectric waveguides and fibers; optical resonators; nonlinear phenomena; electro-optic, acousto-optic modulation; optical detection, noise; application to communication systems. Requirements: (for 055:179) 055:070; (for 029:182) 029:130. Same as 029:182.

**055:273 Semiconductor Physics**

3 s.h.

Electronic, optical, and materials properties of semiconductors. Prerequisites: 029:193 and 029:246. Same as 029:229.

**055:274 Laser Principles**

3 s.h.

Laser theory, stimulated emission, dispersion theory, broadening mechanisms, rate equations, gain saturation, optical resonators, mode-locking, Q-switching techniques, survey of laser types, modes of operation. Requirements: (for 029:224) 029:130; (for 055:274) 055:170. Same as 029:224.

**055:276 Nonlinear Optics**

3 s.h.

Classical treatment of second- and third-order optical nonlinearities; phase matching, harmonic generation, three- and four-wave mixing, self-focusing, self-phase modulation, stimulated scattering of light, applications. Requirements: (for 029:222) 029:130; (for 055:276) 029:130 or 055:170. Same as 029:222.

**Graduate Seminars, Advanced Topics, Research****055:191 Graduate Seminar: Electrical and Computer Engineering**

0 s.h.

Presentation and discussion of recent advances and research in electrical and computer engineering by guest lecturers, faculty, students. Requirements: graduate standing.

**055:195 Contemporary Topics in Electrical and Computer Engineering**

arr.

New topics or areas of study not offered in other electrical and computer engineering courses; based on faculty/student interest; not available for individual study. Requirements: senior standing.

**055:198 Individual Investigations: Electrical and Computer Engineering**

arr.

Individual projects for electrical and computer engineering graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

**055:199 Research: Electrical and Computer Engineering M.S. Thesis**

arr.

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for M.S. degree with thesis in electrical and computer engineering. Requirements: graduate standing.

**055:291 Seminar: Plasma Physics**

arr.

Current research. Same as 029:261.

**055:295 Advanced Topics in Electrical and Computer Engineering**

arr.

Discussion of current literature in electrical and computer engineering.

**055:299 Research: Electrical and Computer Engineering Ph.D. Thesis**

arr.

Experimental and/or analytical investigation of approved topic for partial fulfillment of requirements for Ph.D. in electrical and computer engineering.

# Mechanical and Industrial Engineering

**Chair:** Andrew Kusiak

**Professors:** Karim Abdel-Malek, Kurt M. Anstreicher, Jasbir S. Arora, Christoph Beckermann, T.D. Brown, P. Barry Butler, Greg Carmichael, Krishnan B. Chandran, Kyung K. Choi, Andrew Kusiak, Ching-Long Lin, Peter O'Grady, Jun Ni, Joon B. Park, Sharif Rahman, K. Rim, Matthew Rizzo, Ralph I. Stephens, Frederick Stern, H.S. Udaykumar

**Professors emeriti:** James G. Andrews, Dennis L. Bricker, Lea-Der Chen, Gary W. Fischer, Edward J. Haug, Robert G. Hering, George M. Lance, John M. Liittschwager, Enzo O. Macagno, Donald H. Madsen, Virendra C. Patel, J. Richard Simon, Theodore F. Smith

**Associate professors:** Pablo Carrica, Yong Chen, Jia Lu, Thomas Schnell, Geb W. Thomas, Shaoping Xiao

**Assistant professors:** James Buchholz, Pavlo Krokhmal, Albert Ratner, Olesya Zhupanska

**Undergraduate degrees:** B.S.E. in Industrial Engineering, Mechanical Engineering

**Graduate degrees:** M.S., Ph.D. in Industrial Engineering, Mechanical Engineering

**Web site:** <http://www.mie.engineering.uiowa.edu/>

The Department of Mechanical and Industrial Engineering offers distinct undergraduate and graduate degrees and research programs in industrial engineering and in mechanical engineering.

## Industrial Engineering

Industrial engineering is concerned with analysis, design, and implementation of systems through optimal use of resources--human, material, energy, information, and financial. Systems may range from small units to extremely large operations. In order to accomplish these activities, the industrial engineer must be skilled in mathematics, physical sciences, management, and human relations as well as manufacturing, computer systems, economics, optimization, human behavior, and systems analysis and design.

Industrial engineers have many opportunities for employment and service in industrial, government, research, and public service organizations. Employment opportunities are among the most varied in the engineering field. Industrial engineers hold positions as advisors to management or may participate directly in management decisions.

Representative job titles include industrial engineer, manufacturing engineer, systems analyst, quality specialist, operations research analyst, internal consultant, human factors specialist, supervisor, and manager. Industrial engineers are employed by manufacturing and energy firms, wind turbine manufacturers, government agencies, and service organizations such as airlines, banks, hospitals, health care groups, and consulting companies.

## Mechanical Engineering

Mechanical engineering is broadly concerned with energy, manufacturing, and design of machines. Mechanical engineers conceive, plan, design, and direct the manufacture, distribution, and operation of a wide variety of devices, machines, and systems--including complex human-machine systems--for energy conversion, biofuel production, environmental control, materials processing, transportation, materials handling, and other purposes. Major subspecialties of mechanical engineering include thermal-fluids engineering and mechanical systems engineering.

Thermal-fluid phenomena occur in many engineering systems and devices, such as aircraft; automobiles; off-road vehicles; ships; gas turbines; heat exchangers; material processes; heating, ventilating, air-conditioning, and refrigerating systems; hydraulic and wind turbines; airbag inflators; fuel cells; biofuel processes; environmental control devices; and biomedical systems. Mechanical systems and machines are the foundations of human technology. Examples are found in manufacturing equipment, medical equipment, automobiles, tractors, aircraft, ships, home appliances, packaging machinery, wind turbine gearbox, and robots.

Mechanical engineers find a wide variety of career opportunities in industry, government, and education. Mechanical engineers form an integral part of most industries, including aerospace firms, energy companies, automobile manufacturers, health care providers, food- and metal-processing industries, petroleum refineries, electronic and computer manufacturers, heavy construction and agricultural vehicle manufacturers, wind turbine manufacturers, thermal comfort equipment firms, farm equipment firms, and consulting companies.

## Undergraduate Programs

The department offers a Bachelor of Science in Engineering in industrial engineering, and a Bachelor of Science in Engineering in mechanical engineering.

### Industrial Engineering

The objective of the B.S.E. program in industrial engineering is to produce graduates who:

- have a strong foundation of mathematical, scientific, and technical knowledge and are equipped with skills in problem solving, teamwork, and communication that will serve them throughout their careers;
- are able to pursue successful careers as practicing industrial engineers in manufacturing industries, medical institutions, and engineering consulting firms;
- are able to successfully pursue advanced studies in industrial engineering; in other engineering disciplines; or in diverse nontechnical fields such as medicine, law, or business; and
- are able to assume professional leadership roles.

## Mechanical Engineering

The objective of the B.S.E. program in mechanical engineering is to produce graduates who:

- have a strong foundation of knowledge in mathematics, science, and mechanical engineering and are equipped with skills in problem solving, design, teamwork, and communication that will serve them throughout their careers;
- are able to pursue successful careers as practicing mechanical engineers in manufacturing industries, energy and utility companies, and engineering consulting firms;
- are able to successfully pursue advanced studies in mechanical engineering; in related technical areas such as physics, applied mathematics, and other engineering disciplines; and in other professional fields; and
- are able to assume professional leadership roles.

## B.S.E. in Industrial Engineering

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The industrial engineering major requires a strong foundation of courses in engineering science, mathematics, design, manufacturing, social science, and humanities.

Advanced work includes specialty courses in human factors and ergonomics, management, information systems, concurrent engineering, production, manufacturing, quality control, reliability, and operations research. Design is an integral part of the undergraduate program; all students complete a comprehensive design experience.

The B.S.E. curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005 Engineering Problem Solving I, 059:006 Engineering Problem Solving II, and 010:003 Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. For information on B.S.E. curriculum stems and common course requirements, see Bachelor of Science in Engineering in the College of Engineering section of the Catalog.

Students must select elective focus area courses according to guidelines established by the Department of Mechanical and Industrial Engineering. See "Elective Focus Area" after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

### FIRST YEAR

#### First Semester

004:011 Principles of Chemistry I	4 s.h.
010:003 Rhetoric	4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus	4 s.h.
059:005 Engineering Problem Solving I	3 s.h.
059:090 Engineering Success Seminar for First-Year Students	1 s.h.

#### Second Semester

22M:032 Engineering Mathematics II: Multivariable Calculus	4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra	2 s.h.
029:081 Introductory Physics I	4 s.h.
056:010 Industrial Engineering First-Year Seminar	0 s.h.
059:006 Engineering Problem Solving II	3 s.h.
General education component course	3 s.h.

### SECOND YEAR

#### First Semester

22M:034 Engineering Mathematics IV: Differential Equations	3 s.h.
--	--------

029:082 Introductory Physics II	3 s.h.
031:001 Elementary Psychology	3 s.h.
056:020 Industrial Engineering Sophomore Seminar	0 s.h.
059:007 Engineering Fundamentals I: Statics	2 s.h.
059:008 Engineering Fundamentals II: Electrical Circuits	3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics	3 s.h.

**Second Semester**

22S:039 Probability and Statistics for the Engineering and Physical Sciences	3 s.h.
056:020 Industrial Engineering Sophomore Seminar	0 s.h.
056:054 Engineering Economy	3 s.h.
057:015 Materials Science	3 s.h.
Systems design elective	3 s.h.
Elective focus area course	3 s.h.

**THIRD YEAR****First Semester**

056:032 Design for Manufacturing	3 s.h.
056:091 Professional Seminar: Industrial Engineering	0 s.h.
056:144 Human Factors	3 s.h.
056:166 Stochastic Modeling	3 s.h.
056:171 Operations Research	3 s.h.
General education component course	3 s.h.

**Second Semester**

22S:030 Statistical Methods and Computing	3 s.h.
056:091 Professional Seminar: Industrial Engineering	0 s.h.
056:131 Manufacturing Systems	3 s.h.
056:147 Ergonomics	3 s.h.
056:150 Information Systems Design	3 s.h.
056:178 Digital Systems Simulation	3 s.h.
General education component course	3 s.h.

**FOURTH YEAR****First Semester**

056:091 Professional Seminar: Industrial Engineering	0 s.h.
056:134 Process Engineering	4 s.h.
056:162 Quality Control	3 s.h.
Elective focus area courses	6 s.h.
General education component course	3 s.h.

**Second Semester**

056:160 Operational Systems Design	4 s.h.
Elective focus area courses (including math/science elective)	12 s.h.

## Elective Focus Area

The industrial engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see "Bachelor of Science in Engineering"/"Elective Focus Area" in the College of Engineering section of the Catalog. For a list of standard industrial engineering elective focus area options and guidelines for tailored elective focus areas, see the Department of Mechanical and Industrial Engineering web site.

## Joint B.S.E./M.S. in Industrial Engineering

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for industrial engineering undergraduates who intend to earn an M.S. in industrial engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level course work, attend the program's graduate seminar, and work with a faculty member on a master's thesis project while still undergraduates. They may count 6 s.h. of graduate course work toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Mechanical and Industrial Engineering.

Some students in undergraduate majors other than industrial engineering may be admitted to the combined program; they must meet the same admission requirements as industrial engineering majors. In some cases, they may be required to take additional course work to meet the prerequisite requirements for upper-level courses.

## B.S.E. in Mechanical Engineering

The Bachelor of Science in Engineering requires a minimum of 128 s.h. The mechanical engineering major lays a foundation in the basic disciplines of mathematics, physics, and chemistry and in the engineering sciences of statics, dynamics, thermodynamics, mechanics of deformable bodies, mechanics of fluids and transfer processes, materials science, and electrical sciences. An understanding of these sciences enables mechanical engineers to design parts of systems and understand whole systems, plan the production and use of energy, plan and operate industrial manufacturing facilities, and design automatic control systems for machines and other mechanical systems.

Students develop an awareness of social and humanistic issues relating to business, environment, government, history, language, religion, and international relations. They also acquire an appreciation of professional and ethical responsibilities.

The B.S.E. curriculum covers four major stems: mathematics and basic sciences, engineering topics, elective focus area, and general education (15 s.h. of humanities and social science courses). All students take 059:005 Engineering Problem Solving I, 059:006 Engineering Problem Solving II, and 010:003 Rhetoric. General education component courses must be selected to satisfy the requirements of the College of Engineering. For information on B.S.E. curriculum stems and common course requirements, see Bachelor of Science in Engineering in the College of Engineering section of the Catalog.

Upper-level students work on team projects in a senior capstone design course, 058:086 Mechanical Engineering Design Project. Some students may arrange to participate in established research projects.

Students must select elective focus area courses according to guidelines established by the Department of Mechanical and Industrial Engineering. See "Elective Focus Area" after the following curriculum list.

Some courses in the curriculum are prerequisites to others. Students who take courses in the order below satisfy the prerequisite requirements automatically. Students who do not follow this sequence still must satisfy all course prerequisites.

### FIRST YEAR

#### First Semester

004:011 Principles of Chemistry I	4 s.h.
010:003 Rhetoric	4 s.h.
22M:031 Engineering Mathematics I: Single Variable Calculus	4 s.h.
059:005 Engineering Problem Solving I	3 s.h.
059:090 Engineering Success Seminar for First-Year Students	1 s.h.

**Second Semester**

22M:032 Engineering Mathematics II: Multivariable Calculus	4 s.h.
22M:033 Engineering Mathematics III: Matrix Algebra	2 s.h.
029:081 Introductory Physics I	4 s.h.
059:006 Engineering Problem Solving II	3 s.h.
General education component course	3 s.h.

**SECOND YEAR****First Semester**

22M:034 Engineering Mathematics IV: Differential Equations	3 s.h.
029:082 Introductory Physics II	3 s.h.
058:020 Mechanical Engineering Sophomore Seminar	0 s.h.
059:007 Engineering Fundamentals I: Statics	2 s.h.
059:008 Engineering Fundamentals II: Electrical Circuits	3 s.h.
059:009 Engineering Fundamentals III: Thermodynamics	3 s.h.
General education component course	3 s.h.

**Second Semester**

057:010 Dynamics	3 s.h.
057:015 Materials Science	3 s.h.
057:019 Mechanics of Deformable Bodies	3 s.h.
058:032 Design for Manufacturing	3 s.h.
Elective focus area course	3 s.h.

**THIRD YEAR****First Semester**

22M:037 Engineering Mathematics V: Vector Calculus	3 s.h.
22S:039 Probability and Statistics for the Engineering and Physical Sciences	3 s.h.
057:018 Principles of Electronic Instrumentation	4 s.h.
057:020 Fluid Mechanics	4 s.h.
058:091 Professional Seminar: Mechanical Engineering	0 s.h.
Elective focus area course	3 s.h.

**Second Semester**

058:040 Thermodynamics II	3 s.h.
058:045 Heat Transfer	3 s.h.
058:052 Mechanical Systems	3 s.h.
Elective focus area course	3 s.h.
General education component course	3 s.h.

**FOURTH YEAR****First Semester**

058:048 Energy Systems Design	4 s.h.
058:055 Mechanical Systems Design	4 s.h.
058:091 Professional Seminar: Mechanical Engineering	0 s.h.
Elective focus area courses	6 s.h.
General education component course	3 s.h.

**Second Semester**

058:080 Experimental Engineering	4 s.h.
058:086 Mechanical Engineering Design Project	3 s.h.
Elective focus area courses	6 s.h.
General education component course	3 s.h.

**Elective Focus Area**

The mechanical engineering program offers a variety of elective focus area options, including standard focus areas developed and maintained by the program and flexible focus areas tailored to individual student interests. For more detailed information about elective focus areas, see "Bachelor of Science in Engineering"/"Elective Focus Area" in the College of Engineering section of the Catalog. For a list of standard mechanical engineering elective focus area options and guidelines for tailored elective focus areas, see the Department of Mechanical and Industrial Engineering web site.

**Joint B.S.E./M.S. in Mechanical Engineering**

The College of Engineering offers a joint (fast-track) Bachelor of Science in Engineering/Master of Science for mechanical engineering undergraduates who intend to earn an M.S. in mechanical engineering. B.S.E./M.S. students may take up to 12 s.h. of graduate-level course work, attend the program's graduate seminar, and participate in master's research while still undergraduates. They may count 6 s.h. of graduate course work toward both degrees. Once students complete the requirements for the bachelor's degree, they are granted the B.S.E., and they normally complete the M.S. one year later.

To be admitted to the joint degree program, students must have completed at least 80 s.h., must have a cumulative g.p.a. of at least 3.25, and must submit a letter of application to the chair of the Department of Mechanical and Industrial Engineering.

**Graduate Programs**

The Department of Mechanical and Industrial Engineering offers a Master of Science, with and without thesis, and a Doctor of Philosophy in industrial engineering; and a Master of Science, with and without thesis, and a Doctor of Philosophy in mechanical engineering.

The industrial engineering program also offers a wind power management concentration for M.S. and Ph.D. students.

**Research and Study in Industrial Engineering**

Graduate study in industrial engineering is tailored individually. Each student's study program is based on his or her background and career objectives and is designed according to sound academic practice. The curriculum is highly flexible; the goal is academic excellence.

The program offers six principal academic focus areas: design and manufacturing, human factors engineering and ergonomics, engineering management, reliability and production systems, operations research and applied statistics, and information systems. Graduate students participate in research in their academic concentration areas.

**ENGINEERING MANAGEMENT**

Current research in engineering management consists of entrepreneurship, parametric cash flow analysis, strategic

management, and economic risk analysis. Engineering management studies concentrate on engineering administration, engineering economics, and information systems. This area is covered by courses in the 50 series.

#### **HUMAN FACTORS AND ERGONOMICS**

Current research in human factors and ergonomics includes investigation of the effects of visual and auditory displays on human information processing and development of computer systems that ease the challenges of controlling complex medical and robotic systems. This work examines how engineers should shape information technology to enhance productivity, safety, and customer satisfaction. Industrial engineering faculty members and students work to improve the effectiveness of robot systems for exploration of Mars and the Moon, to improve driving safety, and to design new cockpit interfaces. The department has several medical, flight, and driving simulators. It also conducts research in other facilities, including National Advanced Driving Simulator, the most advanced simulation facility in the world.

Human factors and ergonomics studies concentrate on designing systems compatible with human capabilities and limitations. Human factors engineering integrates components from the fields of psychology, cognitive sciences, physiology, statistics, and technical sciences to address issues of human-interface design and human-systems design. Specific considerations include human cognitive abilities and limitations, visual performance, error reduction, workload assessment and mitigation, design of jobs in the industrial environment, information acquisition and processing, choice of action, operator performance measurement, and economic concerns. This area is covered by courses in the 40 series.

#### **INFORMATION SYSTEMS**

Studies in information systems concentrate on system design. Design problems involve devising information systems that meet a diverse set of requirements. Contemporary topics include network-based systems, client/server systems, internet systems, and medical informatics.

#### **MANUFACTURING**

Ongoing manufacturing research consists of flexible manufacturing systems, optimum control of processes, and reliability assessment. Manufacturing courses, denoted by the 30 series, delve into selecting appropriate manufacturing methods, planning processing operations, devising control strategies, and designing products and manufacturing systems. Contemporary topics include computer-aided process planning, computer-aided design, computer-controlled manufacturing, concurrent engineering, and applications of artificial intelligence in manufacturing.

#### **OPERATIONS RESEARCH AND APPLIED STATISTICS**

Ongoing research in operations research and applied statistics deals with the application of optimization techniques for informed decision making in the public and private sectors. The primary focus of this work is modeling, simulating, and optimizing the design and operation of systems such as logistics, communications, health care, and manufacturing. Studies in operations research and applied statistics concentrate on mathematical programming, statistical, and computer sciences for modeling, analyzing, and optimizing systems. Various methodologies in this area include mathematical programming, heuristic optimization, statistical analysis, and digital systems simulation. This area is covered by courses in the 70 series.

#### **QUALITY CONTROL AND PRODUCTION SYSTEMS**

Current research in quality control and production systems focuses on measures for corporate quality and reliability, computer-aided layout and scheduling, just-in-time production, inspection, and online expert systems in process control. Studies of quality control and production systems focus on reliability engineering, quality control, and production systems. This area is covered by courses in the 60 series.

#### **Research and Study in Mechanical Engineering**

The graduate programs in mechanical engineering educate students in more depth and breadth than is possible at the baccalaureate level. This prepares the graduate to use contemporary methods at advanced levels in professional careers in engineering design, development, teaching, and research. Each student's plan of study is based on his or her background and career objectives, and is designed according to sound academic practice. Faculty members in the program have teaching and research expertise in energy and power conversion, fluid and thermal sciences, solid mechanics, mechanical systems, and related areas.

Students may develop programs emphasizing fluid mechanics, thermodynamics, heat transfer, fatigue and fracture mechanics, and mechanical systems. Some may pursue more general programs that combine emphases. Others may specialize in interdisciplinary areas (e.g., energy engineering, materials engineering, automatic control, chemical processes), which involve a combination of mechanical and industrial engineering departmental courses and

appropriate electives from other departments in the College of Engineering and across the University. Ph.D. programs may center on any one of these areas through choice of appropriate course work and research topic.

For more information, see the Mechanical Engineering Graduate Student Handbook, available from the department.

The mechanical engineering program offers the following research and study areas.

#### **FLUID MECHANICS**

The graduate program in fluid mechanics provides a rigorous and broad foundation in theoretical, numerical, and experimental aspects of the subject. It is especially suitable for those seeking careers in teaching and/or research in academic and industrial organizations. The program focuses on fundamental principles and techniques of solving problems in the varied fields of fluids engineering. It emphasizes computer use, both in mathematical modeling of flow phenomena and in acquisition and processing of experimental data.

Although most of the relevant courses are offered by the Department of Mechanical and Industrial Engineering, students are strongly encouraged to take applied mathematics and classical mechanics courses offered by the Departments of Mathematics and Physics and Astronomy in the College of Liberal Arts and Sciences and by other College of Engineering departments.

Current research projects include computational modeling of viscous and turbulent flows; vortex dynamics; unsteady flows; pulmonary flow; flow separation and control; atmospheric flows; environmental flows; ship hydrodynamics; viscous flow around ships; propulsor flow and propulsor-body interactions; free-surface effects; nonlinear wave theory; biomimetic fluid mechanics; hydraulic turbines; quantitative flow visualization and image processing; computational fluid dynamics; LDV and thermal anemometry for flow analysis; and uncertainty analysis.

#### **MECHANICAL SYSTEMS**

The graduate program in mechanical systems is designed to provide students with a broad, strong background in theoretical, computational, experimental, and applied aspects of the subject. It prepares future graduates for careers in industry, teaching, and government. The program emphasizes fundamental principles, computational techniques, multiscale modeling and simulation, and experimentation used to analyze and design mechanical systems. Areas of concentration include reliability-based design and optimization, nanotechnology, tissue mechanics, machine and vehicle dynamics, optimal design, structural optimization, computational solid mechanics, probabilistic mechanics, mechanics of composite material, reliability, and fatigue and fracture mechanics.

Although most courses relevant to the specialization areas are offered by the Department of Mechanical and Industrial Engineering, students are encouraged to consider appropriate courses from other areas, such as mathematics, statistics, physics, and other College of Engineering departments.

Current research projects include design sensitivity analysis of rigid and flexible mechanical systems; computer-aided design; mechanism and manipulator workspace analysis; real-time dynamic simulation; vehicle system dynamics; computational mechanics, tissue mechanics, multiphysics, and multiple-scale problems; composite material; stochastic meshfree and finite element methods; design sensitivity analysis of nonlinear structural systems; reliability-based design optimization; surrogate modeling for reliability-based design optimization; shape optimal design of elastoplastic materials; optimal design of metal stamping process; multibody dynamics; probabilistic and elastic-plastic fracture mechanics; damage-tolerant design; and fatigue behavior and life prediction under constant and variable amplitude loading.

#### **THERMAL SCIENCES**

The graduate program in thermal sciences and systems is designed to provide students with a rigorous and broad foundation in theoretical and experimental aspects of the subject. It prepares future graduates for careers in industry, teaching, and government. The program emphasizes fundamentals of thermodynamics and heat transfer, and associated analytical, numerical, and experimental methods used in energy systems. Areas of concentration include fluid mechanics, thermodynamics, heat transfer, phase-change, combustion, and fuel cells.

Most courses relevant to the specialization areas are offered by the Department of Mechanical and Industrial Engineering. Students are encouraged to supplement these with courses from other areas, such as mathematics and physics, and courses offered by other College of Engineering departments in order to balance their programs.

Current research projects include biomass gasification; turbulent flames; combustion of biomass; alternative and renewable fuels; combustion instability; spray atomization and combustion; transport modeling of fuel cells; transport phenomena in materials processing, melting, and solidification; and optical-based diagnostics of complex thermal processes.

### **M.S. in Industrial Engineering**

The Master of Science in industrial engineering requires a minimum of 30 s.h. of graduate credit with thesis, and a minimum of 36 s.h. of graduate credit without thesis. Students who intend to pursue a Ph.D. should select the thesis option; those who hold research or teaching assistantships may be required to select the thesis option. The M.S. concentration in wind power management is open to students in either option.

All M.S. students must earn 21 s.h. in graduate-level industrial engineering courses. They earn a minimum of 9 s.h. in 200-level industrial engineering courses and complete at least one 100- or 200-level course from each of three focus areas: human factors, operations research, and reliability and systems design. Thesis students who plan to pursue a Ph.D. may choose to take two 200-level courses in each of the three focus areas in order to complete their Ph.D. breadth requirement before entering the doctoral program. Students select other courses in consultation with their advisors; choices are documented in the student's plan of study.

Thesis students may count a maximum of 6 s.h. of research credit toward the degree and may include that credit in the required 21 s.h. of graduate-level industrial engineering courses. The thesis option does not include research credit.

All graduate students must register for 056:191 Graduate Seminar: Industrial Engineering (1 s.h.) each semester of enrollment. They may not substitute seminar credit for regular course work or research credit.

M.S. students must maintain a g.p.a. of at least 3.00 on all graduate work at The University of Iowa and must pass a final comprehensive examination as specified by their examining committees.

Entering students must have strong verbal and written skills in English and a background in computer programming (e.g., C++, C, VB), probability, statistics, and mathematics equivalent to that required by accredited undergraduate engineering programs. Students with insufficient academic background must remedy deficiencies by taking appropriate courses beyond those normally required for the study plan.

Entering students are advised by the department chair or by a designated faculty advisor. The department chair or the graduate program coordinator assigns an advisor to each student during his or her first regular semester in residence.

During that semester, the student and the advisor prepare a study plan, which they submit to the department chair for approval. Once the plan is approved, it is filed with the student's record. It is the student's responsibility to assure that the study plan is submitted to the department chair.

M.S. students must pass a final comprehensive examination, as specified by their examination committees. Examination committees consist of at least three Graduate College faculty members and must be approved by the department chair.

The comprehensive examination may consist of both oral and written parts. Its purpose is to assess the adequacy of the student's defense of thesis and/or course preparation. The final study plan, approved by the Graduate College dean, is prerequisite to the exam. The student should consult with his or her advisor on the composition of the advisory/examination committee and the time and place for the exam.

It is the student's responsibility to submit a degree application to the Graduate College by the college's deadline.

For more detailed information about M.S. program requirements, including a list of focus area courses, see the Industrial Engineering Graduate Handbook or link to industrial engineering graduate programs on the Department of Mechanical and Industrial Engineering web site.

### **M.S. Concentration in Wind Power Management**

M.S. students in industrial engineering may concentrate in wind power management. They must meet all regular requirements for the M.S. in industrial engineering. In addition, thesis option students must take three courses (9 s.h.) from the list of recommended courses. Nonthesis option students must take four courses (12 s.h.) from the list of recommended courses and one course (3 s.h.) from the list of electives. Students' course selections must be approved by their advisors.

#### **WIND POWER MANAGEMENT: RECOMMENDED COURSES**

053:107 Sustainable Systems	3 s.h.
053:117 Remote Sensing	3 s.h.
053:251 Environmental Systems Modeling	3 s.h.
056:134 Process Engineering	4 s.h.
056:162 Quality Control	3 s.h.
056:166 Stochastic Modeling	3 s.h.
056:171 Operations Research	3 s.h.
056:178 Digital Systems Simulation	3 s.h.
058:143 Computational Fluid and Thermal Engineering	3 s.h.
058:147 Fuel Cells	3 s.h.
058:195 Contemporary Topics in Mechanical Engineering	3 s.h.

058:255 Multiscale Modeling	3 s.h.
058:268 Turbulent Flows	3 s.h.

#### **WIND POWER MANAGEMENT: ELECTIVES**

06K:176 Managerial Decision Models	3 s.h.
06K:226 Visual Basic Programming	3 s.h.
06K:228 Web and Multimedia	3 s.h.
06K:234 Information and Knowledge Management	3 s.h.
012:114 Energy and the Environment	3 s.h.
22C:144 Database Systems	3 s.h.
044:127 Environmental Quality: Science, Technology, and Policy	3 s.h.
044:135 Urban Geography	3 s.h.
056:176 Applied Linear Regression	3 s.h.
175:192 Occupational Safety	3 s.h.

### **Ph.D. in Industrial Engineering**

The Ph.D. in industrial engineering requires a minimum of 72 s.h. It is granted upon demonstration of comprehensive knowledge and scholarly work at the highest level.

A maximum of 36 s.h. earned toward the M.S. may be counted toward the 72 s.h. required for the Ph.D. Students must spend at least two semesters in residence at The University of Iowa. They also must maintain a g.p.a. of at least 3.25 on all graduate work done at the University.

The degree requires broad academic background with considerable depth in at least one area of specialization that clearly demonstrates the student's capability to do high-level research. Ph.D. students must complete a series of written and oral examinations and a written dissertation based upon the results of an original investigation.

Students without a Master of Science in industrial engineering or a closely allied area must satisfy all requirements for the M.S. in industrial engineering before they may be admitted to the Ph.D. program.

Entering students are advised by the department chair or by a designated faculty advisor. During the student's first regular semester in residence, an advisor is assigned by the department chair or the graduate program coordinator. Students are expected to identify an industrial engineering faculty member willing to serve as their advisor by the end of their first regular semester in the program.

Once the student is assigned an advisor, he or she works with the advisor to prepare a study plan, which is submitted to the department chair for approval. Once the plan is approved by the department chair, it is filed with the student's record. At the beginning of each academic year, the industrial engineering faculty reviews the study plan and gives the student feedback regarding progress toward his or her degree objective. It is the student's responsibility to assure that the study plan is submitted to the program chair.

Admission to degree candidacy requires a g.p.a. of at least 3.25 on all graduate work taken at The University of Iowa, demonstration of capacity for individual research achievement (typically a dissertation research proposal), and successful completion of the comprehensive examination given by the examining committee.

The comprehensive examination is scheduled with approval of the student's advisor and the industrial engineering program coordinator or the graduate coordinator once the student's study plan is essentially completed. The examining committee determines the composition of the exam, including written and oral parts, and determines whether the student is ready to begin dissertation research.

For more detailed information about Ph.D. program requirements, see the Industrial Engineering Graduate Handbook or link to industrial engineering graduate programs on the Department of Mechanical and Industrial Engineering web site.

All Ph.D. students must satisfy the following requirements.

Graduate students must register for 056:191 Graduate Seminar: Industrial Engineering (1 s.h.) each semester of enrollment. They may not substitute seminar credit for regular course work or research credit.

#### **INDUSTRIAL ENGINEERING BREADTH REQUIREMENT**

Each Ph.D. student must pass at least two 200-level industrial engineering courses in each of three focus areas: human factors, operations research, and reliability and systems design. Students who have earned an M.S. in the

program may already have satisfied this requirement.

#### **QUALIFYING EXAM**

Each student must satisfy the qualifying exam requirement in two of the three focus areas. The requirement for a focus area can be satisfied by passing a written qualifying exam in the focus area or by earning a grade of A-minus or higher in each of two 200-level industrial engineering courses in the focus area.

#### **FOCUS AREA**

Students select one of the three focus areas and take additional course work in that area. They fulfill the minimum requirement of the focus area, completing at least two additional 200-level industrial engineering courses in the area.

#### **COMPREHENSIVE EXAMINATION**

Each student must demonstrate his or her ability to carry out creative individual research by completing and defending his or her dissertation research proposal in a comprehensive examination. The exam includes written and oral parts and is conducted by an examining committee of at least five industrial engineering and Graduate College faculty members. It is scheduled after the qualifying examination requirement has been satisfied. The examining committee determines whether the student is ready to begin dissertation research. Once the student has completed the comprehensive examination satisfactorily, he or she is accepted as a candidate for the Ph.D.

#### **FINAL EXAMINATION (THESIS DEFENSE)**

Each student must defend his or her completed dissertation in the final examination, which is conducted by the examining committee.

#### **Ph.D. Concentration in Wind Power Management**

Ph.D. students who concentrate in wind power management must meet all regular requirements for the doctoral degree. In addition, they must gain sufficient breadth and depth of domain knowledge in their study area by taking energy-related courses.

#### **Certificate in Health Informatics**

Graduate students in industrial engineering may elect to earn the Certificate in Health Informatics. The certificate program is an interdisciplinary collaboration among the health sciences, engineering, computer science, information science, management science, and statistics. Students in the program are trained to analyze health care data, evaluate information and knowledge, and study health care research, education, and practice. Certificate students complete a minimum of 20 s.h., including 056:186 Health Informatics I, 056:287 Health Informatics II, and approved electives.

The certificate may be earned in conjunction with the M.S. or Ph.D., or as postgraduate study. Completion of the Certificate in Health Informatics is noted on the student's transcript.

#### **M.S. in Mechanical Engineering**

The M.S. in mechanical engineering requires a minimum of 30 s.h., with or without thesis. Thesis students may count 6-9 s.h. earned for thesis research and writing toward the degree. Each student determines a study plan in consultation with an advisor and submits the plan to the department chair for approval.

All M.S. students must register for 058:191 Graduate Seminar: Mechanical Engineering each semester.

To earn the M.S., the student must maintain a g.p.a. of at least 3.00 on graduate work used to satisfy the degree requirements and must be successful in the final examination. This examination is administered by the student's committee, which consists of at least three faculty members, including at least one with primary appointment in the Department of Mechanical and Industrial Engineering.

The requirements for the M.S. may be completed within one calendar year. However, students with assistantship duties or other constraints may take up to two calendar years to complete the degree.

#### **Ph.D. in Mechanical Engineering**

The Ph.D. in mechanical engineering requires 72 s.h. of graduate credit, including at least 54 s.h. in course work (excluding thesis research) and at least 12 s.h. earned for Ph.D. thesis research. Students must pass the qualifying examination administered by the program to be formally admitted to the doctoral program.

Each student takes the comprehensive examination after passing the qualifying examination and when the course

work specified in the study plan is nearly completed; in any case, the comprehensive examination should be taken no later than 28 months after the first registration in the Ph.D. program. To be admitted to the comprehensive examination, a student must be in good academic standing and must be recommended by his or her advisor. The exam is administered by the student's committee. Admission to Ph.D. candidacy is recognized upon successful completion of the comprehensive examination.

Having satisfactorily completed the exam, the student usually has only to complete and defend the dissertation at the final examination.

Requirements for the Ph.D. usually can be completed in three to four years beyond the M.S.

## **Admission**

Applicants must meet the admission requirements of the Graduate College; for detailed information about Graduate College policies, see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

### **Industrial Engineering**

Reference letters, student research interests, grade-point average for previous graduate study, and factors such as faculty availability are considered in admission decisions.

M.S. applicants may be admitted from an ABET Inc.-accredited baccalaureate curriculum in any engineering discipline, or in the mathematical sciences, the physical sciences, or the computer sciences with a g.p.a. of at least 3.00 and an acceptable score on the Graduate Record Examination (GRE) General Test. Applicants from institutions outside the United States must meet equivalent conditions for regular admission. Students with lesser qualifications may be considered for conditional admission.

Students from business or social science programs who have mathematical preparation similar to that of engineering students are considered for regular or conditional admission. Students on conditional status must achieve regular status within two sessions of their first registration by attaining an acceptable grade-point average and gaining regular acceptance by the industrial engineering program faculty; otherwise, they are dismissed. Admissions may be limited by available resources.

Ph.D. applicants may be admitted from an ABET Inc.-accredited baccalaureate curriculum or a postbaccalaureate curriculum in any engineering discipline or in the mathematical sciences, computer science, or physical sciences with a g.p.a. of at least 3.25 and an acceptable GRE General Test score. Applicants from outside the United States must meet equivalent standards for regular admission as determined by The University of Iowa. Students also may be admitted from business or social science programs as determined individually.

Applicants who intend to pursue a Ph.D. and who have a B.S. or an M.S. without thesis usually are admitted first to the M.S. program. All admissions to the Ph.D. program are reviewed by the graduate studies committee.

### **Mechanical Engineering**

Applicants who have earned a baccalaureate or master's degree in engineering curriculum or in the mathematical or physical sciences are eligible to be considered for admission to graduate study in mechanical engineering. In order to be considered for regular admission, applicants must have a g.p.a. of at least 3.00 on a 4.00 scale on all previous college-level work and Graduate Record Examination (GRE) General Test scores of at least 500 verbal, 750 quantitative, and 4.5 analytical writing. Students whose first language is not English must score at least 550 (paper-based), 213 (computer-based), or 81 (Internet-based) on the Test of English as a Foreign language (TOEFL).

Applicants with a lower grade-point average and/or GRE or TOEFL test scores may be considered for conditional admission, under exceptional circumstances. Applicants admitted conditionally must achieve regular standing within one semester (excluding summer sessions) after admission by attaining a g.p.a. of at least 3.00 on their first 9 s.h. at The University of Iowa. The Graduate College cancels registration for the subsequent semester for students who have not submitted their GRE and/or TOEFL scores by the end of the first semester after admission.

## **Financial Support**

### **Industrial Engineering**

A number of one-quarter-time and one-half-time teaching and research assistantships are available for graduate students. Awards are based on students' academic records and assessment of their potential contribution to the research and teaching goals of the program. Advanced graduate students also may qualify for appointments as graduate teaching fellows. Contact the chair of the Department of Mechanical and Industrial Engineering for details.

### **Mechanical Engineering**

Financial support is available to M.S. and Ph.D. students, primarily through graduate assistantships in teaching or

research from the Department of Mechanical and Industrial Engineering, the Center for Computer-Aided Design, IIHR--Hydroscience and Engineering, and the National Advanced Driving Simulator. These awards may be made on a semester, academic year, or calendar year basis. Awards and reappointments are competitive and are based on the student's potential contribution to the teaching and research goals of the department. Students who fulfill their assistantship responsibilities and continue to make satisfactory progress toward their degree objective receive preference in new assistantship awards. All applications for financial support should be submitted directly to the department chair.

M.S. students with assistantship appointments of one-quarter-time or more are required to register for a minimum of 9 s.h. during fall and spring semesters until they have completed 30 s.h. of course and research work beyond the baccalaureate degree. Ph.D. students with assistantship appointments of one-quarter-time or more must register for a minimum of 9 s.h. during fall and spring semesters until they have completed 72 s.h. of course and research work beyond the baccalaureate degree. Once they meet these minimums, graduate students must register for a graduate seminar each semester until they have successfully completed their final examination or thesis defense. All registrations should accurately reflect the amount and type of work undertaken, the use of University facilities, and the amount of consultation with the faculty.

## **Facilities and Laboratories**

### **FacilitiesIndustrial Engineering: Undergraduate and Graduate**

For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see the departments' Catalog sections.

#### **ACTIVE LEARNING FACILITY**

The Active Learning Facility (ALF) uses a project-oriented, team-based, hands-on approach to education. The facility provides NT servers, personal computers, and remote plug-ins for students' laptops. It also offers a variety of software for project management, presentations, and data analysis and reporting.

#### **ADVANCED SYSTEMS LABORATORY**

The Advanced Systems Laboratory houses research on development and implementation of computational algorithms for the optimization of complex systems.

#### **COGNITIVE SYSTEMS LABORATORY**

The Cognitive Systems Laboratory is devoted to examining the safety, performance, and user acceptance implications of technology insertion into complex systems. The laboratory has networked computers, a video editing workstation, a process control simulation, and a low-cost driving simulator. The simulator is equipped with five cameras, instrumentation to record all driver activity, and an eye tracking system. The Cognitive Systems Laboratory shares the driving simulator and an instrumented vehicle with the Operator Performance Laboratory. The equipment supports class projects, system development, and undergraduate and graduate research.

#### **COMPUTER NUMERICAL CONTROL MACHINING LABORATORY**

The Computer Numerical Control (CNC) Machining Laboratory gives undergraduate and graduate students hands-on experience in programming and operating a CNC lathe, a CNC milling machine, and a coordinate measuring machine. CNC programs can be developed through the machine control keyboard or downloaded via RS232C data link from the college's network. Research on the machinability of metals for cutting tool and machining parameters are conducted in the lab. A machine vision system is used to evaluate tool wear patterns.

#### **E-COMMERCE LABORATORY**

The E-Commerce Laboratory provides a facility for advanced research on Internet technologies and educational programs in key Internet subjects. The laboratory contains the full facilities necessary for a strong Internet capability, including Windows NT workstations, PCs and Macs, UNIX workstations, Internet server software for each platform, Java, VRML, JavaScript, ActiveX and VBScript programming facilities, videoconferencing cameras and group collaboration software, CAD systems software, and database systems.

Activities at the E-Commerce Laboratory include working with companies to improve their use of the Internet; providing assistance in advanced uses of the World Wide Web; providing seminars and workshops to improve Internet education; and carrying out research in key Internet technologies.

Research is under way in a number of key areas, including videoconferencing using the Internet; rapid product

development through Internet links with suppliers and customers; virtual reality over the Internet; use of remote databases to access corporate data; use of the Internet to support team-based activities; security of Internet-based activities; and CAD file viewing and manipulation through the World Wide Web.

#### **GROK LABORATORY**

The GROK Laboratory develops computer software and mechanical devices to improve human performance with complex tasks. The laboratory has developed technologies used by NASA to control robots exploring South America and Mars. It also designs and develops microsurgery and dental simulators to train new surgeons and dentists.

#### **INTELLIGENT SYSTEMS LABORATORY**

The Intelligent Systems Laboratory provides facilities for research in computational intelligence leading to applications in industry, service organizations, and health care. Research in the laboratory is funded by government agencies and industrial corporations. Solutions to practical problems and enhancement of engineering education are emphasized. Most of the laboratory's recent projects concentrate on development of software tools for product development, manufacturing, and health care applications.

The Intelligent Systems Laboratory is furnished with the latest computer technology to support research on numerous computing platforms. Diverse software is available for modeling, design, and construction of intelligent systems--for example, data mining software, neural networks, expert systems, and simulation software.

#### **OPERATOR PERFORMANCE LABORATORY**

Research in the Operator Performance Laboratory (OPL) focuses on determining human performance in a variety of situations, with particular emphasis on driving and flight deck environments. Much of the research is performed in the field using a state-of-the-art instrumented vehicle that is equipped with five cameras, eye movement equipment, two computers, video equipment, and a suite of sensors. The OPL also features a scale Boeing 737-400 fixed-base flight simulator with six channels of visuals. The flight simulator is equipped with a remote eye-tracking device that allows the activation of selected virtual controls in the flight deck. A specially designed stimulus presentation booth is used for color research and for photometry applications. Computer models of operator performance are designed based on the data obtained in the laboratory and field research.

### **Mechanical Engineering: Undergraduate Instruction**

#### **ENGINEERING CORE**

The laboratories for fluid flows and transport processes contain a wind tunnel; a water flume; a water table; four water channels with porous media; three air-jet tables; various air, water, and oil flow devices; and facilities for numerous small-scale experiments to demonstrate the principles of mass, momentum, and energy transfer.

For information about laboratories affiliated with core courses coordinated by other College of Engineering departments, see the departments' Catalog sections.

#### **REQUIRED AND ELECTIVE COURSE LABORATORIES**

The mechanical engineering laboratory for experimental engineering provides undergraduate students with exposure to contemporary measurement theory, sensors, signal conditioners, instrumentation, and computer-aided data acquisition systems.

The laboratory for mechanical engineering design projects provides for either team or individual project activities in mechanical engineering design, construction of mechanisms, and testing.

The thermal and heat transfer laboratory is equipped with data acquisition systems to process data online on computers. Experiments in heat transfer measurements are made in this laboratory.

### **Mechanical Engineering: Graduate Facilities**

#### **FLUID MECHANICS**

The program in fluid mechanics is conducted in close collaboration with IIHR--Hydroscience & Engineering. The equipment available to graduate students includes several wind tunnels and hydraulic flumes, an environmental flow facility, a towing tank, two special low-temperature flow facilities for investigation of ice phenomena, hot-wire and laser anemometer systems, particle-image velocimetry systems, and computer-based data acquisition systems.

Facilities available in the department include a flow visualization and imaging system with CCD (charge-coupled devices) camera, and a low-speed wind tunnel. IIHR and College of Engineering shops provide the necessary support.

In addition to using in-house workstations and computers, the department's faculty members and students make extensive use of supercomputers at national centers.

## **MECHANICAL SYSTEMS**

Experimental facilities for the department's fatigue and fracture mechanics study include access to a scanning electron microscope, a field computer data acquisition system, state-of-the-art computer controlled servo-hydraulic closed-loop fatigue test equipment, and equipment for characterization of material properties. Conventional strength of materials test equipment also is available.

Computer-based simulation research activities in the mechanical systems area are carried out mainly in the Center for Computer-Aided Design (CCAD). CCAD maintains a variety of high-performance computer systems in support of its technology research and development efforts. General computing services are supported by a number of LINUX and Windows applications servers connected to centralized file servers. CAD/CAE, software development, virtual prototyping, and virtual environment development applications are hosted on numerous high-performance workstations. Standard desktop, multimedia, and office productivity applications are hosted on a network of more than 40 workstations.

## **THERMAL SCIENCES**

Facilities for research in the thermal sciences and systems consist of a low-pressure combustion chamber, a high-pressure continuous flow combustion chamber, a high-pressure chamber for atomization study, a test rig for heat transfer to near supercritical fluids, a diffusion flame test rig, an enclosed laminar flame test rig, an air atomization spray apparatus, test stands for melting and solidification studies, various optical measurement systems, and two fuel cell test rigs. Laser-based diagnostics (e.g., laser-induced fluorescence, imaging, and laser Doppler anemometry) are available for solidification, turbulent flow, heat transfer, and combustion studies. Flow visualization and imaging by CCD camera are available for the study of complex fluid motion and heat convection, and combustion flows.

# **Mechanical and Industrial Engineering Courses**

## **Industrial Engineering**

### **Special Topics**

#### **056:000 Cooperative Education Training Assignment: Industrial Engineering** 0 s.h.

Industrial engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to Cooperative Education Program.

#### **056:002 Half-time Cooperative Education Training Assignment: Industrial Engineering** 0 s.h.

Registration for work assignment periods; for students participating in the Cooperative Education Program.

#### **056:010 Industrial Engineering First-Year Seminar** 0 s.h.

Introduction to curriculum and profession; ethics and professionalism in classroom and workplace. Requirements: first-year or transfer standing in engineering.

#### **056:020 Industrial Engineering Sophomore Seminar** 0 s.h.

Curriculum and profession; ethics and professionalism in classroom and workplace. Requirements: sophomore or transfer standing in engineering.

#### **056:091 Professional Seminar: Industrial Engineering** 0 s.h.

Professional aspects of industrial engineering presented through lectures and discussions by guest speakers, field trips, films, panel discussions. Repeatable. Requirements: junior standing.

#### **056:098 Individual Investigations: Industrial Engineering** arr.

Independent projects in industrial engineering for undergraduate students, including laboratory study, an engineering design project, analysis and simulation of an engineering system, computer software development, CAD/CAM applications, or research.

## Manufacturing

### 056:032 Design for Manufacturing

3 s.h.

Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes, including casting, welding, machining, forming; laboratory exercises and projects. Corequisites: 057:015. Same as 051:062, 058:032.

### 056:131 Manufacturing Systems

3 s.h.

Manufacturing and logistics systems, supply chain management, MRP/ERP systems, lean manufacturing, concurrent engineering, value stream mapping and six sigma. Offered spring semesters. Prerequisites: 056:032 and 056:171. Same as 058:131.

### 056:134 Process Engineering

4 s.h.

Methodologies, algorithms, and tools for processing modeling, analysis, and reengineering; modeling issues in product and component design, product and process modularity, quality, reliability, agility. Offered spring semesters. Prerequisites: 056:171.

### 056:155 Wind Power Management

3 s.h.

Principles of wind power production, wind turbine design, wind park location and design, turbine and wind park control, predictive modeling, integration of wind power with a grid.

### 056:235 Computational Intelligence

3 s.h.

Concepts, models, algorithms, and tools for development of intelligent systems; data mining, expert systems, neural networks for engineering, medical and systems applications. Prerequisites: 056:171. Same as 096:313.

### 056:237 Operational Issues in Supply Chain Management Engineering

3 s.h.

Probabilistic approaches, supply chain disruption analysis, human decision making in supply chains, auctions and electronic commerce in supply chains. Requirements: graduate standing.

## Human Factors and Ergonomics

### 056:144 Human Factors

3 s.h.

Design of human-machine systems; development of optimum work environments by applying principles of behavioral science and basic knowledge of human capacities and limits. Offered fall semesters. Prerequisites: 031:001.

### 056:147 Ergonomics

3 s.h.

Ergonomic design of jobs and products in an industrial and consumer market setting; principles of good design, examples of poor design; consequences of poor job and product design; principles of work sampling, usability studies, performance rating, sizing and planning of workstations, hand tool design, ergonomic design in transportation; related group project.

### 056:240 Human Performance in Engineering Systems

3 s.h.

Human performance limits and capabilities relevant to design of engineering systems; focus on cognitive limits associated with information processing. Requirements: graduate standing.

### 056:241 Research Methods in Human Factors Engineering

3 s.h.

Logic and methods for research and for analysis and evaluation of complex human-machine systems; advanced techniques for enhancement of human interaction with advanced information technology; emphasis on cognitive task analysis techniques for innovative design, understanding of how technology affects safety, performance, user acceptance. Requirements: graduate standing.

### 056:242 Human/Computer Interaction

3 s.h.

Development of projects using human factors principles in the design of computer interfaces.

### 056:243 Modeling Operator Performance

3 s.h.

Modeling techniques that support design and analysis of the human role in complex systems; process and concepts associated with model development and application. Requirements: graduate standing.

**056:244 Airborne Design of Experiments** 3 s.h.

Issues in design of airborne human factors research, and techniques applicable to ground transportation research; statistical, human factors, flight mechanics, and organizational principles in flight test engineering; basic understanding of systematic approach to human factors flight testing, development of test points and test apparatus, flight envelope, proper briefing techniques, mission execution, and after-action review; securing, synchronizing, and analyzing data.

**056:245 Human Factors in Aviation** 3 s.h.

Measuring, modeling, and optimizing human visual performance; display design for optimal legibility, research in visibility, legibility, conspicuity, and camouflage; visibility model development. Requirements: graduate standing.

**056:246 The Design of Virtual Environments** 3 s.h.

Development of techniques for designing and creating three-dimensional representations of information for simulation, scientific visualization, and engineering; emphasis on human factors issues, software. Requirements: graduate standing.

**056:248 Analytical Methods in Human Factors Engineering** 3 s.h.

How analytical techniques can be used to analyze human factors data, how techniques complement each other; techniques used across disciplines (e.g., behavioral science, civil and industrial engineering, economics, epidemiology, marketing); case studies; experience designing a survey and using statistical analysis software to analyze survey data. Prerequisites: 22S:039 and 056:144. Requirements: graduate standing.

## **Engineering Management**

**056:054 Engineering Economy** 3 s.h.

Basic concepts of engineering economy: time value of money, cash flow equivalence, depreciation, tax considerations, continuous cash flows, cost accounting overview; main analysis techniques--present worth, uniform annual cost, rate of return, benefit/cost ratio, replacement and break-even analysis. Corequisites: 22S:039.

**056:056 Leadership in Engineering** 1 s.h.

How to balance aspects of college life, explore a personal mission, and set priorities.

**056:150 Information Systems Design** 3 s.h.

Structure and design of computer-based information systems; concepts of information systems, decision making; computer hardware, software, data structures; methods for determining system requirements; designing, implementing, evaluating, managing information systems; applied projects. Prerequisites: 059:006.

**056:153 Engineering Administration I** 3 s.h.

Current readings, cases in engineering management; methods for organizing, planning, funding, controlling engineering efforts; nature of the engineering and management function. Offered fall semesters. Prerequisites: 056:054.

## **Quality Control and Production Systems**

**056:160 Operational Systems Design** 3-4 s.h.

Projects involving product and related operational system design in an industrial or service organization; associated entrepreneurial or intrapreneurial planning. Offered spring semesters. Prerequisites: 056:054 and 056:134.

**056:161 Enhanced Design Experience** 3 s.h.

Real-world, in-depth design experience in student teams, working with engineers at major companies in the region; application of industrial engineering knowledge and skills to design products and related operational systems.

**056:162 Quality Control** 3 s.h.

Basic techniques of statistical quality control; application of control charts for process control variables; design of inspection plans and industrial experimentation; modern management aspects of quality assurance systems. Offered fall semesters. Prerequisites: 22S:030 and 22S:039. Same as 22S:133.

**056:164 Six Sigma Operations and Quality Control** 3 s.h.

Six Sigma techniques for the DMAIC cycle (Define, Measure, Analyze, Improve, Control); what is needed for data collection (process inputs and outputs, measurement tools), conduct analysis (hypothesis testing, process capability studies), and conduct process improvement studies (design of experiments, response surface methodology); overview of Six Sigma, process and project management skills.

**056:165 Advanced Six Sigma and Quality Improvement** 3 s.h.

Analytical techniques used for Six Sigma techniques DMAIC cycle; design and application of experiment techniques, including factorial designs, fractional factorial, Taguchi methods; semester-long project; understanding of statistical techniques required. Prerequisites: 22S:030 and 22S:039. Corequisites: 056:162.

**056:166 Stochastic Modeling** 3 s.h.

Models for design and operation of manufacturing systems; equipment selection, machine layout, group technology, process planning, production planning and scheduling, just-in-time concepts, concurrent engineering, intelligent systems. Offered fall semesters. Prerequisites: 22S:039. Corequisites: 056:171.

**056:268 Reliability Theory and Applications** 3 s.h.

Fundamental topics in reliability engineering, including system reliability modeling, statistical inference of lifetime data, basic preventive maintenance models; statistics and random process models, including Poisson processes, renewal processes, Markov processes. Prerequisites: 22M:033 and 22S:039.

**Operations Research and Applied Statistics**

**056:171 Operations Research** 3 s.h.

Operations research models and applications emphasizing both deterministic and probabilistic models: linear programming, duality, parametric analysis, dynamic programming, Markov chains, queueing theory. Offered fall semesters. Prerequisites: 22M:033. Corequisites: 22S:039.

**056:176 Applied Linear Regression** 3 s.h.

Regression analysis with focus on applications; model formulation, checking, selection; interpretation and presentation of analysis results; simple and multiple linear regression; logistic regression; ANOVA; hands-on data analysis with SAS software. Prerequisites: 22S:030 or 22S:039. Same as 22S:152.

**056:178 Digital Systems Simulation** 3 s.h.

Simulation modeling and analysis; emphasis on construction of models, interpretation of modeling results; input and output analysis; modeling discrete, continuous and hybrid systems; construction of model-related databases--hands-on usage of ARENA simulation software, manufacturing, health care, and service applications. Offered spring semesters. Prerequisites: 056:171.

**056:186 Health Informatics I** 3 s.h.

Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as 021:275, 050:283, 051:187, 074:191, 096:283, 174:226, 200:110.

**056:230 Innovation Science and Studies** 3 s.h.

Innovative typology and sources, classical innovation models, measuring innovation, innovation discovery from data, evolutionary computation in innovation, innovation life cycle.

**056:236 Decision Making in Supply Chain Management Engineering** 3 s.h.

Control theory and Kalman filter approaches, supply chains and behavioral supply chains, organizational approaches, network approaches. Requirements: graduate standing.

**056:270 Linear Programming** 3 s.h.

Mathematical programming models; linear and integer programming, transportation models, large-scale linear programming, network flow models, convex separable programming. Requirements: calculus and linear algebra. Same as 06K:286.

**056:271 Nonlinear Optimization**

3 s.h.

Mathematical models, theory, algorithms for constrained and unconstrained optimization; nonlinear, geometric, quadratic, dynamic programming; optimality conditions; aspects of duality theory. Prerequisites: 056:240.

**056:272 Integer Programming and Network Flows**

3 s.h.

Theory, applications, algorithms for combinatorial optimization problems, including integer and mixed-integer mathematical programming problems as well as problems formulated in a network or graph setting, including routing of vehicles, location of facilities in networks and scheduling. Offered fall semesters. Prerequisites: 056:171.

**056:273 Stochastic Systems**

3 s.h.

Probabilistic operations research models and algorithms, with emphasis on applications in manufacturing and production planning; random processes; Markov chains and applications; probabilistic dynamic programming; Markov decision problems; queueing models. Requirements: graduate standing.

**056:274 Stochastic Optimization**

3 s.h.

General tools and approaches used in decision making under uncertainties; modeling of uncertainties and risk, changes that uncertainties bring to the decision process, difficulties of incorporating uncertainties into optimization models, common techniques for solving stochastic problems.

**056:275 Statistical Pattern Recognition**

3 s.h.

Fundamental mathematical tools for multivariate statistical analysis and decision-making processes in pattern recognition. Requirements: graduate standing.

**056:276 Game Theory**

3 s.h.

Problems, challenges, solution strategies, and other elements that arise among decisions makers who have aligned or opposing objectives; changes that collaboration and competition bring to decision making and problem solving; how ideas and concepts of game theory can be used to understand economic, industrial, social, and biological phenomena. Requirements: basic linear programming and probability.

**056:277 Financial Engineering and Optimization**

3 s.h.

Quantitative methods of modeling various financial instruments (i.e., stocks, options, futures) and tools for measurement and control of risks inherent to financial markets; fundamentals of interest rates, options and futures contract valuation, including weather and energy derivatives, risk management, and portfolio optimization; emphasis on modeling and solution techniques based on optimization and simulation approaches traditional to industrial engineering and operations research. Recommendations: basic knowledge of probability and statistics, numerical methods, and optimization.

**056:287 Health Informatics II**

3 s.h.

Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as 021:280, 051:189, 074:192, 096:289, 200:120.

**Graduate Seminars, Advanced Topics, Research****056:191 Graduate Seminar: Industrial Engineering**

1 s.h.

Recent advances and research in industrial engineering presented by guest lecturers, faculty, students. Requirements: graduate standing.

**056:195 Contemporary Topics in Industrial Engineering**

arr.

New topics or areas of study not offered in other industrial engineering courses; topics based on faculty/student interest.

**056:198 Individual Investigations: Industrial Engineering**

arr.

Individual projects for industrial engineering graduate students: laboratory study, engineering design, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

**056:199 Research: Industrial Engineering M.S. Thesis** arr.  
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in industrial engineering. Requirements: graduate standing.

**056:295 Advanced Topics: Industrial Engineering** arr.  
Discussion of current literature in industrial engineering.

**056:298 Special Topics in Industrial Engineering** arr.

**056:299 Research: Industrial Engineering Ph.D. Dissertation** arr.  
Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in industrial engineering.

## **Mechanical Engineering**

### **Special Topics**

**058:000 Cooperative Education Training Assignment: Mechanical Engineering** 0 s.h.  
Mechanical engineering students participating in the Cooperative Education Program register in this course during work assignment periods; registration provides a record of participation in the program on the student's permanent record. Requirements: admission to the Cooperative Education Program.

**058:002 Half-time Cooperative Education Training Assignment: Mechanical Engineering** 0 s.h.  
Registration for work assignment periods; for students participating in the Cooperative Education Program.

**058:020 Mechanical Engineering Sophomore Seminar** 0 s.h.  
Introduction to the mechanical engineering profession and curriculum; ethics and professionalism in classroom and workplace; mentorship program and professional societies; visits to laboratories and local companies. Requirements: sophomore or transfer standing.

**058:080 Experimental Engineering** 4 s.h.  
Principles of physical measurements; standards calibration, estimation of error; static and dynamic performance of measuring systems; laboratory experience, experiment planning, report writing. Prerequisites: 057:018. Corequisites: 058:045 and 058:052.

**058:086 Mechanical Engineering Design Project** 3 s.h.  
Application of mechanical, thermal, fluid systems design; student or team design projects initiated at various levels in the design process and carried through to higher levels; emphasis on synthesis, written and oral communication. Corequisites: 058:048 or 058:055.

**058:091 Professional Seminar: Mechanical Engineering** 0 s.h.  
Professional aspects of mechanical engineering: presentations, student/faculty interaction, professional society involvement, panel discussions, plant trip. Requirements: junior standing.

**058:098 Individual Investigations: Mechanical Engineering** arr.  
Individual projects for mechanical engineering undergraduate students; laboratory study; engineering design project; analysis, synthesis, simulation of an engineering system; computer software development, research.

### **General Topics**

**058:110 Computer-Aided Engineering** 3 s.h.

Computational engineering modeling and simulation, geometric modeling, grid generation, finite-element and finite-volume methods, uncertainty analysis, optimization, engineering applications. Prerequisites: 057:019 and 058:052. Same as 053:115.

**058:111 Numerical Calculations**

3 s.h.

Development of algorithms for functional approximations, numerical differentiation and integration; solution of algebraic and differential equations, with emphasis on digital computations; initial and boundary value problems. Prerequisites: 22M:034. Same as 053:111.

**058:112 Engineering Design Optimization**

3 s.h.

Engineering design projects involving modeling, formulation, and analysis using optimization concepts and principles; linear and nonlinear models, optimality conditions, numerical methods. Prerequisites: 22M:033 and 059:007. Requirements: junior standing. Same as 053:112.

**058:113 Mathematical Methods in Engineering**

3 s.h.

Linear ordinary differential equations, series solutions of differential equations, special functions, Laplace transforms, Fourier series, matrices, linear systems, eigenvalue problems, second-order partial differential equations. Prerequisites: 22M:033 and 22M:034. Same as 052:118, 053:113.

**058:115 Finite Element I**

3 s.h.

One- and two-dimensional boundary value problems; heat flow, fluid flow, torsion of bars; trusses and frames; isoparametric mapping; higher order elements; elasticity problems; use of commercial software. Prerequisites: 057:019. Same as 053:133.

**058:131 Manufacturing Systems**

3 s.h.

Manufacturing and logistics systems, supply chain management, MRP/ERP systems, lean manufacturing, concurrent engineering, value stream mapping and six sigma. Offered spring semesters. Prerequisites: 056:032 and 056:171. Same as 056:131.

**058:186 Enhanced Design Experience**

3 s.h.

Experience working in teams on industry-sponsored design and product development projects scheduled for production; emphasis on practical experience with the complete design process, from conceptualization through prototyping, evaluation, testing, and production; written and oral communication. Prerequisites: 058:086.

**058:214 Analytical Methods in Mechanical Systems**

3 s.h.

Vector and function spaces; functionals and operators in Hilbert spaces; calculus of variations and functional analysis with application to mechanics; Ritz and Galerkin methods. Prerequisites: 058:113. Same as 053:214.

**Thermal Engineering and Fluids****058:040 Thermodynamics II**

3 s.h.

Power and refrigeration cycles; mixtures of gases, psychometric mixtures; availability; thermodynamics of combustion and chemical equilibrium. Prerequisites: 059:009.

**058:045 Heat Transfer**

3 s.h.

Principles of heat transfer by conduction, convection, radiation; analytical and numerical methods of solution; applications to engineering problems. Prerequisites: 22M:037 and 057:020.

**058:048 Energy Systems Design**

4 s.h.

Principles and design of energy conversion systems, including solar, wind, and geothermal power systems; design of thermal-fluid system components, modeling and simulation of systems, optimization techniques; design projects. Prerequisites: 058:040 and 058:045.

**058:140 Intermediate Thermodynamics**

3 s.h.

Fundamental principles of thermodynamics as applied to phase equilibrium; properties of fluids, first and second law, variable composition systems, behavior of real fluids, mathematical techniques for solution thermodynamics. Requirements: 052:103 or 058:040 or graduate standing. Same as 052:117.

- 058:143 Computational Fluid and Thermal Engineering** 3 s.h.  
Governing equations of fluid flow and heat transfer; basic numerical techniques for solution of the governing equations; estimation of accuracy and stability of the approximations; boundary conditions; grid generation; applications to flows and heat transfer in engineering systems; familiarity with software for analysis and design of thermo-fluids systems. Prerequisites: 058:045.
- 058:145 Intermediate Heat Transfer** 3 s.h.  
Steady and unsteady conduction; forced and natural convection; surface and gaseous radiation; condensation and evaporation; analytical and numerical methods and applications. Prerequisites: 058:045.
- 058:146 Modeling of Materials Processing** 3 s.h.  
Manufacturing processes for metals, polymers, semiconductors; processing by casting, solidification, crystal growth, polymer molding and extrusion, welding, heat treating, application of optical (laser) and electromagnetic energy; processes that use momentum, heat, mass transfer principles; measurement and instrumentation for materials processing; current topics in materials processing. Prerequisites: 058:045.
- 058:147 Fuel Cells** 3 s.h.  
Introduction to fuel cell designs and performance evaluation; thermodynamics, transport phenomena, and reaction fundamentals essential to understanding of the processes and phenomena that pose limits on fuel cell performance. Prerequisites: 058:040 and 058:045.
- 058:148 Combustion Engineering** 3 s.h.  
Chemical kinetics, thermodynamic equilibrium, transport equations; thermodynamics of fluid flows; laminar flames; basic gas turbine cycles; propulsion systems--open gas turbine cycles, turboprop, turbofan, turbojet, ramjet; supersonic inlets; nozzle flows; contemporary propulsion concepts. Requirements: 058:040 or graduate standing.
- 058:149 Propulsion Engineering** 3 s.h.  
Opportunity to develop basic understanding and knowledge of rocket and airbreathing propulsion systems, relevant terminology and analysis techniques, parametric cycle analysis for ideal engines, off-design analysis methods, problem-solving methodology. Requirements: 058:040 or graduate standing.
- 058:160 Intermediate Mechanics of Fluids** 3 s.h.  
Basic concepts and definitions; pressure distribution in a fluid; governing equations and boundary conditions; integral and differential analysis; dimensional analysis and similarity; experimental analysis; laminar and turbulent internal and external flows; potential flows; engineering applications. Prerequisites: 057:020 and 058:040. Same as 053:169.
- 058:162 Experimental Methods in Fluid Mechanics and Heat Transfer** 3 s.h.  
Review of theory; importance of experiments; modeling and scaling laws; experimental environment and facilities; measurements at full scale and on scaled models; use of wind and water tunnels, towing tanks, and hydraulic flumes; instruments for measuring pressure, temperature, velocity, turbulence; error analysis; data acquisition and processing; laboratory demonstrations, hands-on experiments; project. Prerequisites: 058:080. Same as 053:172.
- 058:163 Environmental Fluid Dynamics** 3 s.h.  
Same as 053:175.
- 058:165 Elements of Gas Flows** 3 s.h.  
Thermodynamics of compressible fluid flow, with applications of continuity, momentum, energy equations; normal and oblique shock waves; Prandtl-Meyer expansion waves; flow with variable and constant area; Fanno flow; compressible flow with and without heat transfer. Prerequisites: 057:020 and 058:040.
- 058:245 Diffusive Transport** 3 s.h.  
Diffusive transport of heat, mass, and momentum; phenomenological laws and analogies; analytical and numerical solution techniques; inverse heat conduction; multiphase and multicomponent systems. Prerequisites: 058:145. Same as 052:272.
- 058:248 Combustion Theory** 3 s.h.  
Laminar flame theory; turbulent combustion; spray combustion; thermal ignition; pollutant formation, oxidation; combustion diagnostics. Prerequisites: 058:145 and 058:160. Requirements: graduate standing.
- 058:260 Viscous Flow** 3 s.h.

Equations of viscous flow; classical analytical and numerical solutions; flow regimes and approximations; laminar boundary layers--equations, solution methods, applications; stability theory and transition; incompressible turbulent flow--mean-flow and Reynolds-stress equations, modeling, turbulent boundary layers and free shear flows. Requirements: (for 058:260) 058:160; (for 053:276) 053:169. Same as 053:276.

**058:262 Inviscid Flow**

3 s.h.

Derivation of governing equations for fluid flow; general theorems for motion of inviscid, incompressible flows; solution techniques for two- and three-dimensional irrotational flows; forces and moments acting on immersed bodies; inviscid flow with vorticity; inviscid compressible flow; numerical methods for solution of inviscid flows. Requirements: (for 058:262) 058:160; (for 053:277) 053:169. Same as 053:277.

**058:266 Interfacial Flows and Transport Processes**

3 s.h.

Physics of fluid interfaces and numerical techniques to simulate interface dynamics; interfacial flow coupled with thermal-fluid transport, from molecular interactions to continuum approximations; development of computer code segments to track and represent interface-flow interactions. Prerequisites: 058:145 and 058:160.

**058:267 Multiphase Flow and Transport**

3 s.h.

Thermodynamic and mechanical aspects of interfacial phenomena and phase transitions; nucleation, phase-change, species transport, particulate flows, liquid-vapor systems, solidification, porous media. Prerequisites: 058:145 and 058:160.

**058:268 Turbulent Flows**

3 s.h.

Origin; need for modeling, averages, Reynolds equations, statistical description; experimental methods and analysis; turbulence modeling; free shear layers and boundary layers; complex shearflows; development of computational strategies; recent literature on theory and applications, chaos phenomena. Prerequisites: 058:160.

**058:269 Computational Fluid Dynamics and Heat Transfer**

3 s.h.

Development of numerical and algebraic approximations for elliptic, parabolic, hyperbolic partial differential equations; finite-volume, spectral, pseudo-spectral, Galerkin techniques; stability of numerical methods; CFL condition; stiff problems; adaptive grid generation and boundary-fitted coordinates; numerical solutions for one- and two-dimensional compressible and incompressible fluid flow and heat transfer problems. Prerequisites: 058:111 and 058:160. Requirements: graduate standing.

**058:296 Advanced Topics in Thermal and Fluid Engineering**

arr.

Thermodynamics, fluid mechanics, heat and mass transfer, related experimental and analytical techniques; selection of subject and content determined by instructor/student interest. Requirements: graduate standing.

**Mechanical Systems****058:032 Design for Manufacturing**

3 s.h.

Fundamentals of design, engineering graphics, and manufacturing processing; computer graphics using Pro/ENGINEER for CAD and CAM; typical industrial processes, including casting, welding, machining, forming; laboratory exercises and projects. Corequisites: 057:015. Same as 051:062, 056:032.

**058:052 Mechanical Systems**

3 s.h.

Topics in stress, deflection, stiffness, statistics, reliability, material behavior, manufacturing processes, static loads; introduction to finite element analysis using established software. Prerequisites: 057:019. Corequisites: 22S:039, 057:015, and 058:032.

**058:055 Mechanical Systems Design**

4 s.h.

Design considerations for mechanical engineering systems; strength, deformation, durability of mechanical elements; safe-life, fail-safe, damage-tolerant design; standards, products liability, ethics in design; data-acquisition/life-prediction experiment. Prerequisites: 058:052.

**058:133 Control Theory**

3 s.h.

State space approach; controllability, observability, canonical forms; design of Luenberger observers; feedback control via pole placement; stability, minimal realization; advanced topics. Prerequisites: 055:060. Same as 055:160.

**058:134 Computer-Based Control Systems**

3 s.h.

Discrete and digital control systems; application of computers in control; sampling theorem; discrete time system models; analysis and design of discrete time systems; control design by state variable and input/output methods; advanced topics in digital controls; lab. Prerequisites: 055:060. Same as 055:164.

**058:136 Digital Human Modeling and Simulation**

3 s.h.

Fundamentals of using computational methods in modeling, simulating, and animating articulated kinematic chains such as robots and humans; underlying mathematics, introductory concepts in kinematics and dynamics, serial chain kinematics and multibody dynamics; methods from kinematics and dynamics, coupled with biomechanical concepts, provide an integrated approach to predicting and analyzing serial link motion (e.g., human and robotic manipulator motion). Prerequisites: 057:010. Same as 051:162.

**058:150 Intermediate Mechanics of Deformable Bodies**

3 s.h.

Application of equilibrium analyses, strain-displacement relations, and constitutive relationships to practical structural systems and elementary plane elasticity problems. Prerequisites: 057:019. Same as 051:151, 053:140.

**058:153 Fundamentals of Vibrations**

3 s.h.

Vibration of linear discrete and continuous mechanical and structural systems; harmonic, periodic, and arbitrary excitation; modal analysis; applications. Prerequisites: 057:019. Same as 053:132.

**058:154 Intermediate Kinematics and Dynamics**

3 s.h.

Kinematic and dynamic analysis of unconstrained and constrained planar mechanical systems; computational kinematics, variational and Lagrangian dynamics, constrained dynamics. Prerequisites: 057:010. Corequisites: 058:052.

**058:158 Fatigue/Durability in Design**

3 s.h.

Macro- and micromechanisms of fatigue behavior, design of engineering materials/components/structures subjected to cyclic loading, emphasis on metals; stress-life, strain-life, linear elastic fracture mechanics approach to fatigue crack growth; safe-life, fail-safe, damage tolerant design; constant and variable amplitude life predictions; notches, residual stress, corrosion, temperature, multiaxial, weldments. Prerequisites: 051:085 or 058:055 or 058:150. Same as 053:148.

**058:159 Fracture Mechanics**

3 s.h.

3-D stress states, definition and criteria for failure, nominal and local yield phenomena, linear elastic and elastic plastic fracture mechanics, plane stress and plane strain fracture toughness, J-Integral, crack opening displacement, environmental assisted cracking, fatigue crack growth, fail safe, and damage tolerant design. Prerequisites: 051:085 or 058:055 or 058:150. Same as 053:149.

**058:215 Finite Element II**

3 s.h.

Computer implementation; plate and shell elements; mixed and hybrid formulations; nonlinear analysis; recent development; introduction to boundary element method. Prerequisites: 053:133. Same as 053:233.

**058:250 Advanced Fracture Mechanics**

3 s.h.

Fracture of modern engineering materials; linear-elastic fracture; computational methods; functionally graded materials; elastic-plastic fracture; multiscale fracture and fatigue crack initiation. Prerequisites: 058:113, 058:115, and 058:159. Same as 053:250.

**058:251 Computational Inelasticity**

3 s.h.

Computational techniques and implementations for elastic, hyperelastic, elasto-plastic, visco-elastic, and viscoplastic material models; development of sound numerical integration algorithms from rate constitutive equations. Prerequisites: 053:241. Same as 053:243.

**058:252 Advanced Continuum Mechanics**

3 s.h.

Continuum mechanics of fluids and solids, balance laws, invariance restrictions, continuum thermodynamics, constraint theory, mixtures, materials with microstructure. Prerequisites: 058:262 or 058:279. Same as 053:247.

**058:253 Computational Methods in Dynamics**

3 s.h.

Computational methods for three-dimensional multirigid body systems; spatial kinematics and dynamics; constrained and recursive dynamics for closed-loop multi-chain systems. Prerequisites: 058:154.

**058:254 Energy Principles in Structural Mechanics**

3 s.h.

Principles of virtual work; stationary and minimum potential energy; calculus of variations; Ritz method, Galerkin's method; beams, plates; Hamilton's principle; elastic stability; extremum principle of plasticity. Requirements: (for 058:254) 058:113 and 058:150; (for 053:244) 053:113 and 053:140. Same as 053:244.

**058:255 Multiscale Modeling**

3 s.h.

Computational modeling of engineering materials ranging from molecular to continuum scales, molecular dynamics and Monte Carlo methods, nanoscale continuum modeling, scale-coupling methods. Prerequisites: 058:115 or 058:143. Same as 053:249.

**058:256 Computational Solid Mechanics**

3 s.h.

Advanced computational methods for nonlinear and dynamic analysis of solids, structures; new space- and time-discretization methods for problems, including highly nonlinearities, large deformation, contact/impact conditions. Prerequisites: 058:113 and 058:115. Requirements: graduate standing.

**058:257 Probabilistic Mechanics and Reliability**

3 s.h.

Stochastic and reliability analysis of mechanical systems; computational methods for structural reliability; random eigenvalue problem; random field and stochastic finite element methods. Prerequisites: 058:113 and 058:115.

**058:259 Mechanical Design in Structures**

3 s.h.

Discrete and continuum variational equilibrium equations, discrete design sensitivity analysis for static responses and eigenvalues, interactive design workstation, continuum sizing design sensitivity analysis for static responses and eigenvalues, design sensitivity analysis of structural dynamics, differentiability theory, shape optimal design, shape design sensitivity analysis, design sensitivity of nonlinear structural systems. Prerequisites: 058:113, 058:115, and 058:150.

**058:279 Continuum Mechanics and Elasticity**

3 s.h.

Cartesian tensors and geometrical foundations; concept of stress, strain, motion; fundamental physical laws; constitutive equations and finite elasticity; equations of linear elasticity, elastic extension, torsion and bending of bars. Prerequisites: 057:019. Requirements: concurrent enrollment in 053:113 or graduate standing. Same as 053:241.

**058:295 Advanced Topics in Mechanical Systems**

3 s.h.

Advanced contemporary topics in mechanical systems engineering not covered in other courses and determined by student/faculty interest.

**Graduate Seminars, Advanced Topics, Research****058:191 Graduate Seminar: Mechanical Engineering**

0 s.h.

Presentation and discussion of recent advances and research in mechanical engineering by guest lecturers, faculty, students. Requirements: graduate standing.

**058:195 Contemporary Topics in Mechanical Engineering**

arr.

New topics in fluid and thermal sciences and mechanical systems not covered in other courses; topic and coverage determined by student/faculty interest. Requirements: junior standing.

**058:198 Individual Investigations: Mechanical Engineering**

arr.

Individual project in mechanical engineering, for department graduate students; laboratory study, engineering design project, analysis and simulation of an engineering system, computer software development, research. Requirements: graduate standing.

**058:199 Research: Mechanical Engineering M.S. Thesis**

arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for M.S. with thesis in mechanical engineering. Requirements: graduate standing.

**058:299 Research: Mechanical Engineering Ph.D. Dissertation**

arr.

Experimental and/or analytical investigation of an approved topic for partial fulfillment of requirements for Ph.D. in mechanical engineering.

# Graduate College

**Dean:** John C. Keller  
**Senior associate dean:** Dale Eric Wurster  
**Associate deans:** Daniel Berkowitz, Minnetta Gardinier  
**Web site:** <http://www.grad.uiowa.edu>

The University of Iowa has been a leading center of advanced study for more than a century. Presently, the Graduate College accounts for nearly one-fifth of the University's total enrollment. This high ratio reflects the breadth of the University's graduate programs and resources, the strength of a graduate faculty with a long tradition of personal and professional concern for students, and the opportunities afforded graduate students for involvement, recognition, and support.

The Graduate College is responsible for the review and approval of proposals for new graduate programs and for the periodic survey and evaluation of existing programs. Through its administration of scholarship, fellowship, and research assistantship funds, the college encourages research and strengthening of departments. In cooperation with the Office of the Vice President for Research, it offers assistance to individual faculty members in finding the resources necessary for research projects, and it works with the other colleges and departments of the University to formulate policies concerning selection, supervision, and support of graduate students.

The faculty of the Graduate College is made up of all University tenure-track faculty members at the ranks of assistant professor, associate professor, and professor. A 17-member Graduate Council, elected from and by the graduate faculty and the Graduate Student Senate, is the executive committee of the graduate faculty and is advisory to the dean of the Graduate College.

## Degrees Offered

The Graduate College confers the Master of Arts (M.A.), Master of Science (M.S.), Master of Accountancy (M.Ac.), Master of Arts in Teaching (M.A.T.), Master of Computer Science (M.C.S.), Master of Fine Arts (M.F.A.), Master of Health Administration (M.H.A.), Master of Physical Therapy (M.P.T.), Master of Public Health (M.P.H.), Educational Specialist (Ed.S.), Master of Science in Nursing (M.S.N.), Master of Social Work (M.S.W.), Doctor of Philosophy (Ph.D.), Doctor of Musical Arts (D.M.A.), Doctor of Nursing Practice (D.N.P.), Doctor of Physical Therapy (D.P.T.), and Doctor of Audiology (Au.D.) degrees.

The college currently confers degrees in the following major fields.

Accounting: M.Ac.\*\*  
 African American World Studies: M.A.\*  
 American Studies: M.A.\*, Ph.D.  
 Anatomy and Cell Biology: M.S., Ph.D.  
 Anthropology: M.A.\*, Ph.D.  
 Applied Mathematical and Computational Sciences: Ph.D.  
 Art: M.A.\*, M.F.A.  
 Art History: M.A.\*, Ph.D.  
 Asian Civilizations: M.A.\*  
 Astronomy: M.S.\*  
 Biochemistry: M.S., Ph.D.  
 Biology: M.S.\*, Ph.D.  
 Biomedical Engineering: M.S.\*, Ph.D.  
 Biostatistics: M.S.\*, Ph.D.  
 Business Administration: M.A.\*, Ph.D.  
 Chemical and Biochemical Engineering: M.S.\*, Ph.D.  
 Chemistry: M.S.\*, Ph.D.  
 Civil and Environmental Engineering: M.S.\*, Ph.D.  
 Classics: M.A.\*\*\*, Ph.D.  
 Clinical Investigation: M.S.\*  
 Communication Studies: M.A.\*, Ph.D.  
 Community and Behavioral Health: M.S., Ph.D.  
 Comparative Literature: M.A.\*, Ph.D.  
 Comparative Literature--Translation: M.F.A.  
 Computer Science: M.S.\*, M.C.S.\*\*\*, Ph.D.  
 Counseling, Rehabilitation, and Student Development: M.A.\*, Ph.D.  
 Dance: M.F.A.  
 Dental Public Health: M.S.  
 Economics: M.A.\*, Ph.D.  
 Education: M.A.\*, M.A.T.\*\*\*, Ed.S.\*\*\*, Ph.D.

Educational Policy and Leadership Studies: M.A.\*, Ed.S.\*\* , Ph.D.  
Electrical and Computer Engineering: M.S.\* , Ph.D.  
English: M.A.\* , M.F.A., Ph.D.  
Epidemiology: M.S.\* , Ph.D.  
Exercise Science: M.S.\* , Ph.D.  
Film and Video Production: M.A.\* , M.F.A.  
Film Studies: M.A.\* , Ph.D.  
Free Radical and Radiation Biology: M.S.\* , Ph.D.  
French: M.A.\* , Ph.D.  
French and Francophone World Studies: M.A.\* , Ph.D.  
Genetics: Ph.D.  
Geography: M.A.\* , Ph.D.  
Geoscience: M.S.\* , Ph.D.  
German: M.A.\*\*\* , Ph.D.\*\*\*  
Greek: M.A.\*\*  
Health and Sport Studies: M.A.\* , Ph.D.  
Health Management and Policy: M.H.A.\*\* , Ph.D.  
Health Services and Policy: Ph.D.  
History: M.A.\* , Ph.D.  
Human Toxicology: M.S., Ph.D.  
Immunology: Ph.D.  
Industrial Engineering: M.S.\* , Ph.D.  
Informatics: M.S.\* , Ph.D.  
Integrative Physiology: Ph.D.  
International Studies, M.A.  
Journalism: M.A.\*  
Latin: M.A.\*\*  
Leisure Studies: M.A.\*  
Library and Information Science: M.A.\*  
Linguistics: M.A.\* , Ph.D.  
Mass Communications: Ph.D.  
Mathematics: M.S.\* , Ph.D.  
Mechanical Engineering: M.S.\* , Ph.D.  
Microbiology: M.S., Ph.D.  
Molecular and Cellular Biology: Ph.D.  
Molecular Biology: Ph.D.  
Molecular Physiology and Biophysics: M.S.\* , Ph.D.  
Music: M.A.\* , M.F.A., D.M.A., Ph.D.  
Neuroscience: Ph.D.  
Nursing: M.S.N.\* , D.N.P., Ph.D.  
Occupational and Environmental Health: M.S.\* , Ph.D.  
Operative Dentistry: M.S.  
Oral and Maxillofacial Surgery: M.S.  
Oral Science: M.S., Ph.D.  
Orthodontics: M.S.  
Pathology: M.S.  
Pharmacology: M.S., Ph.D.  
Pharmacy: M.S.\* , Ph.D.  
Philosophy: M.A.\* , Ph.D.  
Physical Rehabilitation Science: Ph.D.  
Physical Therapy: M.A.\* , D.P.T.  
Physics: M.S.\* , Ph.D.  
Physiology and Biophysics: M.S.\* , Ph.D.  
Political Science: M.A.\* , Ph.D.  
Preventive Medicine and Environmental Health: M.S.\* , Ph.D.  
Psychological and Quantitative Foundations: M.A.\* , Ed.S.\*\* , Ph.D.  
Psychology: M.A.\* , Ph.D.  
Public Health: M.P.H.\*\*  
Religious Studies: M.A.\* , Ph.D.  
Russian: M.A.\*\*\*  
Science Education: M.S.\* , M.A.T.\*\* , Ph.D.  
Second Language Acquisition: Ph.D.  
Social Work: M.S.W.\* , Ph.D.  
Sociology: M.A.\* , Ph.D.  
Spanish: M.A.\* , Ph.D.

Speech and Hearing Science: Ph.D.  
 Speech Pathology and Audiology: M.A.\*, Au.D.  
 Statistical Genetics: Ph.D.  
 Statistics: M.S.\*, Ph.D.  
 Stomatology: M.S.  
 Teaching and Learning: M.A.\*, M.A.T.\*\*\*, Ph.D.  
 Theatre Arts: M.F.A.  
 Translational Biomedicine: M.S.\*\*, Ph.D.  
 Urban and Regional Planning: M.A.\*, M.S.\*  
 Women's Studies: Ph.D.\*\*\*

\*Degree offered with or without thesis

\*\*Nonthesis degree

\*\*\*Student entry suspended

## Interdisciplinary Degree Programs

The Graduate College participates in a number of University of Iowa interdisciplinary degree programs. Detailed information about the following master's and doctoral degree programs is provided later in this section of the Catalog: Applied Mathematical and Computational Sciences, Genetics, Human Toxicology, Immunology, Informatics, Library and Information Science, Molecular and Cellular Biology, Neuroscience, Second Language Acquisition, Translational Biomedicine, and Urban and Regional Planning.

In addition to the degree programs listed above, the graduate faculty has authorized the awarding of interdisciplinary master's and doctoral degrees. Students seeking approval for interdisciplinary master's and doctoral programs must previously have been admitted to and enrolled in a departmental program in the Graduate College. See sections X.A. and XII.D. in the Manual of Rules and Regulations of the Graduate College on the college's web site or in this section of the Catalog.

## Joint Degree Programs

### Joint Law and Graduate Degrees

Joint programs under which students can pursue degrees simultaneously in the College of Law and the Graduate College have been developed with the law college and a number of departments in the Graduate College. See College of Law in the Catalog.

### Joint Programs Offered Through the Graduate College

Various joint programs have been developed whereby students work simultaneously toward two advanced degrees. Consult the appropriate Catalog sections for more information. Established joint programs include business administration/library and information science; business administration/nursing; health management and policy/business administration; health management and policy/urban and regional planning; occupational and environmental health/urban and regional planning; public health/law; public health/medicine; public health/nursing; public health/pharmacy; public health/veterinary medicine; and social work/urban and regional planning.

### Joint Au.D./Ph.D. in Speech and Hearing Science

The Graduate College, through the Department of Communication Sciences and Disorders, offers the joint Au.D./Ph.D. program. The program requires 137 s.h., allowing students to count 30 s.h. toward both degrees (the Au.D. requires 95 s.h., and the Ph.D. requires 72 s.h.). The program is a natural choice for students who are interested in practicing audiology but who also wish to pursue academic, tenure-track faculty positions in university settings. See Communication Sciences and Disorders (College of Liberal Arts and Sciences) in the Catalog.

### Joint B.S.E./M.S. in Biomedical Engineering

The Graduate College and the College of Engineering offer a joint B.S.E./M.S. program in biomedical engineering. The program allows students to take a limited number of courses that count toward both the B.S.E. and M.S. degree requirements, to attend and participate in the departmental graduate seminar, and to work on a master's thesis or research project before they have been awarded a baccalaureate degree. See Biomedical Engineering in the Catalog.

### Joint B.S.E./M.S. in Chemical and Biochemical Engineering

The Graduate College and the College of Engineering offer a joint B.S.E./M.S. program in chemical and biochemical engineering. The program allows students to count 12 s.h. of course work, typically advanced chemistry sequences and electives, toward both the B.S.E. and M.S. requirements. See Chemical and Biochemical Engineering in the Catalog.

**Joint B.S.E./M.S. in Civil and Environmental Engineering**

The Graduate College and the College of Engineering offer a joint B.S.E./M.S. program in civil and environmental engineering. The program allows students to take a limited number of courses that count toward both the B.S.E. and M.S. degree requirements, to attend and participate in the departmental graduate seminar, and to work on a master's thesis or research project before they have been awarded a baccalaureate degree. See Civil and Environmental Engineering in the Catalog.

**Joint B.A./M.C.S. or B.S./M.C.S. in Computer Science**

The Graduate College and the College of Liberal Arts and Sciences offer a joint B.A./M.C.S. or B.S./M.C.S. program in computer science. The program allows students to count 12 s.h. of course work, typically advanced technical courses and electives, toward both the bachelor's and the M.C.S. degree requirements. See Computer Science (College of Liberal Arts and Sciences) in the Catalog.

**Joint B.S.E./M.S. in Electrical and Computer Engineering**

The Graduate College and the College of Engineering offer a joint B.S.E./M.S. program in electrical and computer engineering. The program allows students to begin earning graduate credit while working toward the bachelor's degree (9 s.h. may be counted toward both the B.S.E. and M.S. requirements, and an additional 3 s.h. may be counted only toward the M.S. degree). They also may engage in thesis-level research. See Electrical and Computer Engineering in the Catalog.

**Joint B.A./M.A. in German**

Admission to the joint B.A./M.A. program in German has been suspended. The program, offered by the Graduate College and the College of Liberal Arts and Sciences, permits students to take 12 s.h. of course work that fulfills both B.A. and M.A. degree requirements and provides an opportunity for early entrance to advanced courses in German.

**Joint B.A. in Biology, Chemistry, or Physics/M.A.T. in Science Education**

The Graduate College, the College of Education and the College of Liberal Arts and Sciences offer a joint B.A./M.A.T. program for students pursuing a B.A. with a major in biology, chemistry, or physics who wish to earn an M.A.T. in Science Education. The five-year program allows students to apply 18 s.h. of credit toward both the B.A. and the M.A.T. See Biology, Chemistry, or Physics and Astronomy (College of Liberal Arts and Sciences) or Teaching and Learning (College of Education) in the Catalog.

**Joint B.S.E./M.S. in Industrial Engineering**

The Graduate College and the College of Engineering offer a joint B.S.E./M.S. program in industrial engineering. The program allows students to begin earning graduate credit (6 s.h. may be applied toward both the B.S.E. and M.S. degree requirements), to attend one of the department's graduate seminars, and to work on master's thesis research before they have been awarded a baccalaureate degree. See Mechanical and Industrial Engineering in the Catalog.

**Joint B.A./M.A. in Linguistics**

A joint B.A./M.A. program in linguistics with a specialization in Teaching English as a Second Language (TESL) is offered by the Graduate College and the College of Liberal Arts and Sciences. The program permits students to take a limited number of courses that fulfill both B.A. and M.A. degree requirements and provides for early entrance to advanced courses in linguistics. Joint B.A./M.A. students also may gain experience teaching ESL at the college level early in their graduate careers. See Linguistics (College of Liberal Arts and Sciences) in the Catalog.

**Joint B.S.E./M.S. Mechanical Engineering**

The Graduate College and the College of Engineering offer a joint B.S.E./M.S. program in mechanical engineering. The program allows students to begin earning graduate credit (6 s.h. may be applied toward both the B.S.E. and M.S. degree requirements), to attend a graduate seminar, and to participate in master's research before they have been awarded a baccalaureate degree. See Mechanical and Industrial Engineering in the Catalog.

**Joint B.S.N./M.S.N. or RN-B.S.N./M.S.N.**

The Graduate College and the College of Nursing offer a joint B.S.N./M.S.N. or RN-B.S.N./M.S.N. program that provides an avenue for exceptional B.S.N. students to progress rapidly toward completion of the M.S.N. degree. The joint program permits students to count 12 s.h. of course work, typically the four M.S.N. core courses, toward both the B.S.N. and the M.S.N. degree requirements. See College of Nursing in the Catalog.

**Joint M.A./Certificate in Library and Information Science and Book Studies**

The joint M.A. in library and information science and Certificate in Book Studies/Book Arts and Technologies prepares students for careers in special collections librarianship. The 51 s.h. program trains individuals to manage varied types of special collections, such as rare books, manuscripts, archives, graphics, music, and ephemera. Successful completion of the program is noted on the student's transcript. See Center for the Book and Library and Information

Science (both Graduate College) in the Catalog.

### **Joint M.D./Ph.D. in the Medical Scientist Training Program**

The Medical Scientist Training Program (MSTP) is an interdisciplinary M.D./Ph.D. program offered jointly by the Carver College of Medicine and the Graduate College. See Medical Scientist Training Program (Carver College of Medicine) in the Catalog.

## **Certificate Programs**

The Graduate College participates in a number of University of Iowa certificate programs. See Rhetorics of Inquiry and Transportation Studies (both Graduate College) in the Catalog for detailed information about certificates in those programs.

### **Advanced Practice Nursing**

The Certificate in Advanced Practice Nursing is a post-master's degree program that allows for advanced clinical training in four specialty tracks: pediatric nurse practitioner, adult/gerontology nurse practitioner, family nurse practitioner, and psychiatric/mental health nursing. Certificate requirements include advanced clinical core courses and a sequence of specialty courses. Successful completion of the specialty sequence qualifies a student to sit for certification as a nurse practitioner and/or a clinical nurse specialist. Completion of the certificate program is noted on the student's transcript. See College of Nursing in the Catalog.

### **Aging Studies**

The Aging Studies Program is a multidisciplinary certificate program administered by the College of Liberal Arts and Sciences in cooperation with other University of Iowa colleges. The 21 s.h. program is designed to complement graduate degree programs or to serve as a stand-alone nondegree program for students with academic, professional, research, or service career interests in aging. Completion of the Certificate in Aging Studies is noted on the student's transcript. See Aging Studies (College of Liberal Arts and Sciences) in the Catalog.

### **Agricultural Safety and Health**

The Certificate in Agricultural Safety and Health is a postbaccalaureate program for practicing health care professionals serving rural areas, and health professions students who intend to practice in rural areas. The 12 s.h. program is designed to help rural health professionals address safety and health issues in farm settings. Successful completion of the program is noted on the student's transcript. See Occupational and Environmental Health (College of Public Health) in the Catalog.

### **American Indian and Native Studies**

The American Indian and Native Studies Program (AINSP) offers an interdisciplinary certificate program focusing on the histories, cultures, languages, arts, religious traditions, political and social organizations, economies, geographies, literatures, and contemporary legal and political concerns of Native Americans of the United States as well as other indigenous peoples of the Western Hemisphere. Successful completion of the Certificate in American Indian and Native Studies is noted on the student's transcript. See American Indian and Native Studies (College of Liberal Arts and Sciences) in the Catalog.

### **Book Studies/Book Arts and Technologies**

The Certificate in Book Studies/Book Arts and Technologies offers an interdisciplinary approach to studying the relationship between the book in culture and the arts and technologies of book production. It also provides opportunities for artistic and craft-based studio, laboratory, and research investigations. The certificate may be earned as a stand-alone program or in conjunction with graduate degrees in art, English, history, library and information science, and other disciplines. Successful completion of the program is noted on the student's transcript. See Center for the Book (Graduate College) in the Catalog.

### **Clinical Investigation**

The Certificate in Clinical Investigation is designed for clinicians who seek advanced training in clinical methodology and applied patient-oriented research skills. Certificate requirements include didactic course work, clinical research preceptorships, and clinical research seminar participation. Students in the certificate program must be practicing academic clinicians who have completed doctoral training. Successful completion of the program is noted on the student's transcript. See Carver College of Medicine and College of Public Health in the Catalog.

### **College Teaching**

The Certificate in College Teaching provides overarching administration and structure that complements discipline-oriented graduate teaching preparation programs. The 12 s.h. program has three parts: course work, teaching experience, and preparation of a teaching portfolio. The program is open only to graduate students enrolled in

degree programs. Successful completion of the program is noted on the student's transcript. Formal application is made through the College of Education.

### **Emerging Infectious Disease Epidemiology**

The Certificate in Emerging Infectious Disease Epidemiology is a post-baccalaureate program designed to meet the training needs in emerging infectious disease of international public health professionals as well as graduate students at The University of Iowa. The 12 s.h. program requires one short term, intensive on-campus session, coupled with year-round, web-based, distance-learning course work. Successful completion of the program is noted on the student's transcript. See College of Public Health in the Catalog.

### **Global Health Studies**

The interdisciplinary Global Health Studies Program emphasizes international health problems and solutions in the developing and developed worlds, including the United States. Requirements for the Certificate in Global Health Studies include core courses, electives, foreign study and/or internship, a research project, and foreign language skills. Students do not need special health science courses to participate. Completion of the certificate program is noted on the student's transcript. Both the College of Liberal Arts and Sciences and the Graduate College award a Certificate in Global Health Studies. See Global Health Studies (College of Liberal Arts and Sciences) in the Catalog.

### **Informatics**

The Certificate in Informatics is an interdisciplinary program that offers four subtracks: bioinformatics and computational biology, geoinformatics, health informatics, and information science. Graduate students working toward a degree may earn the certificate, which requires a minimum of 18-21 s.h., depending on choice of subtrack. Course work includes foundations of informatics (9 s.h.) and disciplinary applications of informatics (9-12 s.h.). Completion of the certificate program is noted on the student's transcript. For more information, see Informatics (Graduate College) in the Catalog.

### **Multicultural Education and Culturally Competent Practice**

The Certificate in Multicultural Education and Culturally Competent Practice is open to graduate students enrolled in degree programs and to postbaccalaureate nondegree graduate students. The curriculum consists of five courses (15 s.h.), begins with an introductory course, and ends with a capstone course. The College of Education and the School of Social Work collaborate to offer the certificate.

### **Nursing Informatics**

The Certificate in Nursing Informatics focuses on data, information, and knowledge of management in nursing. It familiarizes students with the development, support, and evaluation of applications, tools, processes, and structures that help nurses manage data in direct patient care and administrative and management support systems. The program is available for master's, post-master's, doctoral, and postdoctoral students. Completion of the certificate program is noted on the student's transcript. See College of Nursing in the Catalog.

### **Nursing Service Administration**

The Certificate in Nursing Service Administration is designed to upgrade the skills and expertise of nurses practicing in management and nursing administration. Certificate requirements include advanced nurse manager core courses and related support courses. The program is open to postbaccalaureate, master's, post-master's, and doctoral students. Completion of the certificate program is noted on the student's transcript. See College of Nursing in the Catalog.

### **Sacred Music**

The Certificate in Sacred Music is an interdisciplinary program with course offerings in sacred music, choral conducting/literature, keyboard, voice, religion, and art and art history. Students may earn the 25 s.h. certificate while working toward a graduate degree; or with prior admission to the Graduate College and consent of the faculty advisor for the certificate, they may complete the certificate apart from pursuit of a graduate degree. Successful completion of the certificate program is noted on the student's transcript. See Music (College of Liberal Arts and Sciences) in the Catalog.

## **Affiliated Programs**

### **Office of Graduate Ethnic Inclusion**

The Office of Graduate Ethnic Inclusion (OGEI) is dedicated to providing academic assistance to graduate students from underrepresented populations across graduate programs; to helping build a sustainable practice of inclusion that nourishes and attracts underrepresented graduate students campus wide; and to helping build community through individual and group activities focused on successful academic progress.

OGEI's specific goals are to increase numbers of underrepresented ethnic minorities in graduate programs; increase

the number of doctoral students among U.S. ethnic minorities in graduate programs at Iowa; create a department-centered effort of graduate ethnic inclusion; offer support to University of Iowa departments and programs that are interested in building, extending, or sustaining their practices of ethnic inclusion; support faculty-based efforts for recruiting top graduate scholars who are underrepresented ethnic minorities; provide mentoring and support for students throughout their degree programs; and provide information on grant opportunities for departments and programs that are pursuing graduate ethnic inclusion.

## **Women in Science and Engineering**

Women in Science and Engineering (WISE) is dedicated to expanding and improving educational and professional opportunities for women in STEM disciplines (science, technology, engineering, and mathematics). The program aims to provide academic support, promote professional development, facilitate research opportunities, engage in community outreach, and encourage global cooperation.

WISE provides academic support by promoting activities that motivate and encourage undergraduate and graduate students to complete degrees and pursue careers in scientific and technical fields. It supports the recruitment and retention of women students, staff, and faculty and the full participation of women and precollege girls in gender-equitable educational programs that focus on science and engineering. The program facilitates professional development by promoting activities that empower women scientists, engineers, mathematicians, and health professionals to achieve success and assume leadership positions in their careers.

WISE encourages global cooperation by supporting activities that prepare women to enter the international STEM workforce, that support academic partnerships with foreign institutions, and that encourage scholarship and professional development of foreign women in STEM disciplines on the University of Iowa campus.

For more information on WISE goals and activities including the WISE learning community, WISE ambassadors, the Eunice Beam WISE travel grants, professional development workshops, and the WISE library and newsletter, visit the Women in Science and Engineering web site (<http://www.uiowa.edu/~wise>).

## **Research Resources**

Many of the University's diverse research activities are centrally administered by the Office of the Vice President for Research, which has a cooperative relationship with the Graduate College.

## **Financial Support**

Approximately half of the University's graduate students receive some form of University-administered financial assistance. For eligibility requirements and application procedures, see "Section VII. Graduate Appointments" in the Manual of Rules and Regulations of the Graduate College. The following are the primary sources of assistance.

### **Teaching and Research Assistantships**

Teaching and research assistantships are available in most departments. Assistantship stipends typically range between \$16,575 for a half-time academic-year appointment and \$20,258 for a half-time fiscal-year appointment; assistants also are eligible for tuition scholarships. Assistants (one-quarter-time or more) are classified as residents for fee purposes.

### **Iowa Arts Fellowships**

Iowa Arts Fellowships are for first-year University of Iowa graduate students entering M.F.A. programs. Typical stipends are \$18,500 for the academic year, with all tuition paid, for as many as two years (the second year being contingent on demonstrated exceptional progress toward completion of the M.F.A.). There are no departmental service obligations.

### **Iowa Performance Fellowships**

Iowa Performance Fellowships are for first-year D.M.A. candidates in a performance area of music. Recipients are nominated by the School of Music. Awards include academic-year fellowships (\$17,000 year one, \$8,287.50 years two and three), summer fellowships (\$2,000 years one and two), and all tuition. The School of Music provides a one-quarter-time research assistantship in years two and three.

### **Dean's Graduate Fellowships**

Dean's Graduate Fellowships are awarded to first-year graduate students from underrepresented ethnic minority groups. Doctoral students receive an annual stipend of \$22,000 (\$18,000 for the academic year and a \$4,000 summer stipend) plus tuition for the first and last years; and a half-time research assistant or teaching assistant stipend, a \$4,000 summer stipend, plus tuition for years two and three. Master's degree students receive an academic stipend of \$20,000 (\$17,000 for the academic year and a \$3,000 summer stipend), plus tuition for up to two years.

## **Presidential Graduate Fellowships**

Presidential Graduate Fellowships provide five-year awards for doctoral students on a year-round basis. Fellows receive an annual stipend of \$24,000 (\$18,500 per academic year in addition to a \$5,500 summer stipend), plus full tuition for years one and four; a research assistant or teaching assistant stipend during the academic year, plus \$5,500 summer stipend and full tuition for years two and three. In their final year, awardees receive an academic year stipend of \$20,000, a summer stipend of \$5,500, plus all tuition paid. Recipients have no assignments and are free to pursue their own studies, research, and writing full-time for three of the five years and all five summers.

## **Graduate College Summer Fellowships**

Graduate College Summer Fellowships are for advanced doctoral students who have academic-year appointments and have completed at least two years in a graduate program at The University of Iowa at the time of application for the award. Priority is given to postcomprehensive students. Awards provide a summer stipend of \$3,000 plus tuition for up to 2 s.h. Awardees must enroll for the six-week or eight-week summer session; enrollment in the three-week summer session does not qualify.

## **T. Anne Cleary International Research Fellowships**

The T. Anne Cleary International Research Fellowships are for doctoral students who have completed their comprehensive examinations. They are to be used for dissertation research outside the United States. The awards vary from \$1,500 to \$5,000 and are meant to supplement other research funds. Doctoral students in any discipline may apply.

## **Seashore and Ballard Dissertation Fellowships**

Seashore and Ballard Dissertation Fellowships are for doctoral students in the humanities and social sciences who have completed all doctoral degree requirements except their dissertation. Recipients are nominated by their departments. Fellowships provide \$18,000 for the academic year and a \$4,000 summer stipend, plus tuition for up to 2 s.h., and a health insurance allowance.

## **Scholarships**

Scholarships provide up to full tuition.

## **GRADUATE STUDENT TRAVEL AWARDS**

Graduate student travel awards provide reimbursement for travel by students who present research and scholarship results to professional conferences. Awards are competitive across disciplines and vary from \$200 to \$400. Funds are administered by the Graduate Student Senate and the Graduate College.

## **Other Sources**

For other sources of financial support, contact the Office of Student Financial Aid.

Many departments offer additional support through traineeships, part-time employment in research, or part-time teaching appointments. The Office of the Vice President for Research maintains a library of information on public and private agencies that provide funds for research and graduate study. Much material has been collected concerning awards for overseas study.

## **Graduate Student Senate**

The Graduate Student Senate is the University graduate student body representative organization. Representatives are elected annually from each University department that has a graduate degree program. The senate's primary purpose is to serve the interests of the graduate student body in matters affecting its welfare. The senate advises the dean of the Graduate College on matters pertaining to the college.

## **Manual of Rules and Regulations of the Graduate College**

The following text is from the *Manual of Rules and Regulations of the Graduate College*. The most up-to-date version of this manual is available online; see "For Students" on the Graduate College web site.

## **The Academic Program**

### **Section I. Admission to the Graduate College**

#### **A. APPLICATION PROCEDURE**

All students seeking to register for the first time in the Graduate College of The University of Iowa must secure formal admission from the director of Admissions. Applicants may obtain the proper forms from the Office of Admissions. Prospective students may also download the application or apply online from the admissions web site.

In addition to these forms, official transcripts, test scores, and other supporting material must be submitted by the designated deadline prior to the session in which admission is expected. Specific deadline dates will be established by the dean of the Graduate College and the director of Admissions and printed in the Catalog and elsewhere.

#### **B. ADVANCED MEASUREMENT TESTS**

Each graduate program will determine which, if any, advanced measurement test(s) will be required of the applicants to the program. Examples of such examinations include the General (Aptitude) Test of the Graduate Record Examination (GRE), the GRE Subject (Advanced) Tests, and the Graduate Management Admission Test (GMAT). For those departments or programs that choose to require an examination, the examination must be required for all students; there cannot be exempt categories. Additionally, a final admission decision will not be made by the Office of Graduate Admissions until the student's scores have been received. The judgment of acceptable levels of performance on these tests, and the weight of such scores in the overall decision-making process, is left to the department or program.

#### **C. ENGLISH FOR INTERNATIONAL STUDENTS**

Prior to consideration for admission, international student applicants whose native language is other than English must take and pass either the TOEFL (Test of English as a Foreign Language) or the IELTS (International English Language Testing System), unless they have received a degree from an accredited college or university in the United States, the United Kingdom, Canada (except Quebec), Australia, or New Zealand. These examinations are given at various times of the year and in many centers throughout the world.

International students transferring from unfinished degree programs of other universities in the United States who have not taken either of these examinations, or who have received a score lower than the minimum established by the Graduate College dean, must take the TOEFL or IELTS examination and receive a passing score prior to consideration for admission.

Students who barely pass the established minimum on the TOEFL, as well as all IELTS submitters, will be required to sit for an English evaluation upon arrival in Iowa City. The Graduate College will require these students to take and pass recommended course work in English usage at The University of Iowa designed especially for international students.

#### **D. EARLY ADMISSION**

A student who is within 6 s.h. of having satisfied all the requirements for the bachelor's degree at The University of Iowa or any other accredited college may be given provisional admission.

#### **E. CANDIDACY**

Admission to the Graduate College is not the equivalent of acceptance as a candidate for an advanced degree, which must be earned through work successfully completed at The University of Iowa. (See "Section X. Master's Degrees" and "Section XII. Doctor's Degrees.")

#### **F. DECLARATION OF MAJOR AND DEGREE**

Every applicant for admission must indicate on the application form the department or program of major interest and the degree, certificate, or professional objective he or she intends to pursue. The only exceptions to this regulation are the limited number of applicants registered as nondegree ("special") students. (See definition of nondegree status in next section.) Changes in the major or degree status may be made in the course of a student's graduate study with the approval of the department to which the transfer is proposed. To initiate such action, the student must file a change of major or degree status in the Office of Admissions.

#### **G. ADMISSION REQUIREMENTS AND STATUS**

Graduates of any college or university accredited by regional accrediting associations may be admitted to the Graduate College if their academic records meet the required standards. Upon admission, all students fall into one of the following three categories:

1. *Regular*--For students who have met the minimum requirements for admission and who have been accepted by a department, or interdepartmental degree program, for work leading to a graduate degree or certificate or for

professional improvement. The minimum g.p.a. for admission as a regular student to all graduate programs is 3.00.

Departments or programs may petition the Graduate College dean for admission of a student whose g.p.a. is lower than 3.00, if there is sufficient evidence of the student's academic and/or professional achievement indicating his/her potential for success in a graduate program.

Departments, or committees in charge of interdepartmental degree programs, may, and often do, set higher minimum admission requirements than those set forth above for the Graduate College as a whole. Information concerning departmental or program requirements may be obtained directly from the executive of the department concerned.

2. *Conditional*--Students who are interested in working toward a graduate degree or certificate but who are required by a department to demonstrate their ability to do satisfactory graduate work before being admitted to regular status. To be admitted on a conditional basis, the student must be recommended by a department, which will assume responsibility for advising him or her. The student on conditional status must achieve regular status within two sessions of registration in the Graduate College by attaining a g.p.a. of at least 3.00 and acceptance by the major department, or be dismissed.

3. *Nondegree (Special)*--Students with a valid bachelor's degree and at least a 2.50 g.p.a. are eligible to register for a total of no more than two courses per semester. In addition, a nondegree student may not accumulate more than two courses within a given department/program under this classification. These students must be approved for admission by the Graduate College and the Office of Admissions. Nondegree graduate students are not eligible for a graduate degree.

#### **H. ADMISSION OF FACULTY MEMBERS TO GRADUATE STUDY**

Persons who hold faculty rank of assistant professor (including clinical assistant professor) or above at The University of Iowa may be admitted as nondegree students. (See "Section G" above.) A person holding faculty rank as specified above may petition the Graduate College dean for permission to enter a departmental program for work leading to an advanced degree, certificate, or professional improvement except in the department of his or her appointment or a closely related department. Such petitions must have prior approval of the department of appointment, dean of the college of appointment, the department in which study is to be pursued, and the Graduate College.

#### **I. READMISSION**

If a student's enrollment is interrupted for any reason so that she or he is not enrolled for three consecutive academic sessions (including the spring, summer, and fall sessions but excluding the winter session), the student must apply for readmission. The readmission application form must be used. The Graduate College will not require new letters of recommendation, a new Personal Statement section, a written explanation of the reasons for the absence, or a plan for degree completion. However, departments and programs may choose to require any or all of the foregoing.

### **Section II. Registration**

#### **A. STANDARD SCHEDULE**

Students registered in the Graduate College may register for no more than 15 s.h. in all courses eligible for graduate credit (100-level or above). A maximum, graduate semester-hour registration will include all courses numbered 100 or above, whether they are offered as on-campus, extension, or workshop classes. In a schedule of mixed graduate and undergraduate courses, two hours of undergraduate credit may be substituted for 1 s.h. of graduate credit, with registration limited to a total of 18 s.h. This equivalency applies to the calculation of academic load only. Graduate credit is not given for courses numbered under 100. The maximum for the eight-week summer session is 8 s.h. Corresponding maximums for the three-week summer and winter sessions and the six-week summer session are 3 or 6 s.h., respectively.

The maximum semester-hour registration for work scheduled outside of the regular eight-week summer session will be arranged on a basis proportionate to that stated above with the approval of the Graduate College dean. In the regular semester, 9 s.h. constitutes full-time registration. (Fellows are required to carry at least 9 s.h. during a semester as a condition of their appointments.) One-quarter-time and one-third-time appointees are permitted to register for the maximum 15 s.h. per semester and 8 s.h. during the eight-week summer session.

#### **B. COURSES NOT INCLUDED IN FULL REGISTRATION**

In addition to a full schedule, a graduate student may register for offered courses carrying 0 s.h. of credit.

#### **C. CHANGES IN ANNOUNCED CREDIT**

Graduate students may not register for more credit than that offered for any course, but may register for less credit, or no credit, by permission of the instructor. The number of courses a graduate student may take for limited or no credit is

subject to the consent of the advisor and the approval of the dean of the Graduate College.

#### **D. REDUCED SCHEDULES FOR TEACHING AND RESEARCH ASSISTANTS AND OTHER APPOINTEES\***

1. One-half-time appointees may register for not more than 12 s.h. during a semester or 6 s.h. during the eight-week summer session.
2. Five-eighths-time appointees may register for not more than 10 s.h. during a semester or 5 s.h. during the eight-week summer session.
3. Two-thirds- and three-quarter-time appointees may register for not more than 9 s.h. during a semester or 5 s.h. during the eight-week summer session.

\*See Section VII.F. for information regarding graduate assistant overload appointments (those more than one-half-time/20 hours per week).

#### **E. RETROACTIVE REGISTRATION**

No form of retroactive registration is permitted.

#### **F. REGISTRATION FOR PART OF A SESSION**

A graduate student may register at any time during the semester or the eight-week summer session for not more than 1 s.h. of credit for each of the remaining weeks of classes (not including the examination period) in the term. The total registration may not exceed the 15 s.h. permitted for a semester and the 8 s.h. permitted for the eight-week summer session. Registration after the last day of the second week of a semester or the third day of the second week of a summer session is permitted only in courses involving special projects, readings, individual study, thesis, or research, with the signed approval of the instructor concerned and the Graduate College dean. Proportional credit limitations and deadlines for the three-week and six-week summer sessions will be established on a prorated basis.

#### **G. EXTRAMURAL REGISTRATION**

After admission to a departmental program in the Graduate College, registration for work done off campus may be accepted for residence credit under the following circumstances:

1. Traveling Scholar Program of the Committee on Institutional Cooperation (see "Section III").
2. Research at approved locations under the direction of members of the graduate faculty of The University of Iowa.
3. Fieldwork as part of a regularly scheduled course or research program.
4. Courses taught off campus by members of the graduate faculty (see "Section X.D" and "Section XII.C" for minimum semester hours required on campus for the master's and doctor's degrees).
5. Residence graduate credit from another Iowa Regents' university (see "Section V.B").
6. As many as 9 s.h. of graduate work taken at the Quad Cities Graduate Center from faculty other than faculty of the Iowa Regents' universities, provided the work is acceptable to the student's major department for the specified degree.

Extramural registration does not count toward residence credit in the following circumstance:

Course work transferred from another institution.

#### **H. SYSTEM OF COURSE NUMBERS**

Courses primarily for graduate students are numbered 200 or above in each department. Courses open to and carrying credit for both graduate and undergraduate students are numbered from 100 to 199. A student must be enrolled in the Graduate College in order to earn graduate credit for course work numbered 100 or above. Courses below 100 are not accepted for graduate credit irrespective of a student's classification. Graduate credit may not be earned for taking courses numbered below 100 by registering in such courses as readings, special projects, or independent study having course numbers of 100 or above.

#### **I. AUDITING OF COURSES**

Upon approval of the instructor and the advisor, graduate students may audit courses for zero credit. Fee assessment for auditing courses is based on the number of hours for which the course is offered, with a minimum of 1 s.h. Auditing is permitted only for a student who is currently registered. See "Section VI.C" for the marking system.

#### **J. DROPPING OF COURSES**

All graduate students who drop courses after the deadline date established by the dean of the Graduate College for each session and published by the registrar shall receive the grade of F unless the entire registration is withdrawn. This regulation may be waived by the Graduate College dean only on the recommendation of the Student Health director or the Counseling Service. If a student withdraws registration after the deadline date, the student must obtain permission from the dean of the Graduate College before being permitted to reregister.

### **Section III. Traveling Scholar Program**

#### **A. PURPOSE**

The program, under the auspices of the Committee on Institutional Cooperation representing 12 universities in the Midwest, enables a doctoral student to take advantage of special resources available on another campus but not available on his or her own campus: special course offerings, research opportunities, unique laboratories, and library collections.

#### **B. PROCEDURE**

1. A CIC Traveling Scholar first must be recommended by his or her own graduate advisor, who will approach an appropriate faculty member at the possible host institution in regard to a visiting arrangement.
2. After agreement by the student's advisor and the faculty member at the host institution, graduate deans at both institutions will be fully informed by the advisor and have the power to approve or disapprove.
3. A CIC Traveling Scholar will be registered at the home university, and fees will be collected and kept by that institution.
4. Credit for the work taken will be recorded at the home university.
5. Those desiring additional information should inquire at the office of the Graduate College.

#### **C. CONDITIONS**

CIC Traveling Scholars will normally be limited to two semesters or three quarters on another campus. Each university retains its full right to accept or reject any student who wishes to study under its auspices.

### **Section IV. Academic Standing, Probation, and Dismissal**

#### **A. NONDOCTORAL STUDENTS**

A nondoctoral *departmental* (master's, professional improvement, certificate) student, except one on conditional status, shall be placed on probation if, after completing 8 s.h. of graduate work, the student's cumulative grade-point average on graduate work done at The University of Iowa falls below 2.75. If, after completing 8 more s.h. of graduate work at this University, the student's cumulative grade-point average remains below 2.75, the student shall be denied permission to reregister within any departmental program; otherwise the student shall be restored to good standing.\*

Nondoctoral, *nondepartmental* (nondegree, extension, workshop) students shall be evaluated for probation and dismissal purposes based on the same semester-hour sequence as stated above, at a minimum cumulative grade-point average of 2.50.

\*This requirement shall apply to students entering nondoctoral departmental programs beginning with the fall 2001 semester. A minimum cumulative grade-point average of 2.50 is required of nondoctoral departmental students admitted prior to that session.

#### **B. DOCTORAL STUDENTS**

A doctoral student on regular status shall be placed on probation if, after completing 8 s.h. of graduate work, the student's cumulative grade-point average on graduate work done at The University of Iowa falls below 3.00. If, after completing 8 more s.h. of graduate work at this University, the student's cumulative grade-point average remains below the required level, the student shall be dropped from the program and denied permission to reregister unless the student applies and is accepted for a nondoctoral degree or certificate program. If, after completing the second 8 s.h., the cumulative grade-point average is at least 3.00, the student is returned to good standing.\*

\*This requirement shall apply to students entering doctoral programs beginning with the fall 1979 semester. A minimum cumulative grade-point average of 2.70 is required of students admitted to doctoral programs prior to that session.

#### **C. RESTRICTION ON STUDENTS ON PROBATION**

A student on probation shall not be permitted to take comprehensive or final examinations leading to any degree or certificate, nor may the student receive any graduate degree or certificate.

#### **D. DEPARTMENTAL REGULATIONS AND DISSEMINATION OF INFORMATION**

In addition to the above University-wide requirements, departments may establish further requirements which then determine the individual student's standing with regard to probation and dismissal. To this end, each department or program shall compile a written list of standards and procedures for work in that area. These documents shall be on file in each departmental office and the office of the Graduate College dean. Copies are to be available for students in the departmental office, and departments shall make all reasonable efforts to inform students. Subsequent changes in standards or procedures shall be communicated by the department to each student and the Graduate College dean. Whenever departments revise standards for a given program, the new regulations will not apply retroactively to the disadvantage of those already in the program. In addition to notifying students that they are subject to the rules of the Graduate College as set forth in the *Manual of Rules and Regulations*, any standards established by the department more stringent than the general Graduate College requirements shall be stated. Information shall be provided outlining required courses applicable to the various departmental programs of study, examination procedures and other formal evaluations, departmental policies with regard to awarding and renewing assistantships, time limits on programs of study, departmental registration policies, departmental grade-point requirements, requirements for changing from one degree program to another within the department--especially from the master's to the doctor's--departmental probation and dismissal policies and procedures (see "E" following), and other matters as are appropriate. The nature of the departmental advisory system shall be explained to incoming students.

#### **E. ACADEMIC PROGRESS, DEPARTMENTAL PROBATION, AND DISMISSAL PROCEDURES**

If a student is failing to meet departmental standards, the department shall warn the student of this fact in writing. The notification shall specify in what way(s) the student is failing to meet the standards. The student shall be provided a reasonable amount of time to meet the standards prior to departmental dismissal. If conditions such as conditional admission or probation are imposed, the department shall give, at the time of its imposition, written explanation of this status and its time limits.

A student who will not be permitted to reregister for failure to meet standards shall be notified of this fact in writing with reasons for the action provided. Such dismissal may follow failure to meet conditions of admission, conditions of probation, pre-announced departmental grade-point requirements or other standards, or failure of a regularly scheduled examination or formal evaluation. If a student judges the dismissal decision improper, the student has a right to review. Each department shall establish procedures for handling such reviews. The procedures are to be approved by the Graduate College dean and shall afford a fair and expeditious review. A description of these procedures shall be included in the departmental regulations described above. (See "Section IV.D.")

#### **F. PLAGIARISM BY GRADUATE STUDENTS**

The Online Oxford English Dictionary (<http://dictionary.oed.com/cgi/entry/50180578>) defines "plagiarize" as follows, "to take and use as one's own (the thoughts, writings, or inventions of another person); to copy (literary work or ideas) improperly or without acknowledgement; (occas.) to pass off as one's own the thoughts or work of (another)." In practice, the exact definition of "plagiarize" or "plagiarism" is dependent upon the unique attributes of the creative work of a particular discipline. Thus, it is understood that different academic disciplines and cultures may have different interpretations as to the actual actions which constitute plagiarism. With this in mind, the Graduate College will operate in the following manner when a program or department discovers an act or acts of plagiarism on the part of a graduate student.

- 1) If the faculty members of a program or department determine that the transgression is not major, or else feel that there is a misunderstanding of the acts which constitute plagiarism, the program or department may wish to work with the student so as to prevent future occurrences of plagiarism on the part of that student. Written notification of the offense and the remediation for the offense must be sent to the Graduate College for inclusion in the student's file.
- 2) If the faculty members of a program or department discover an act (or acts) of plagiarism that is (are) sufficiently egregious that expulsion from the program is warranted, the student will be terminated from his or her graduate program for reasons of plagiarism. In this case, the student will be simultaneously terminated from the Graduate College of The University of Iowa. The program or department must notify the student of his or her termination in writing. All relevant facts, as well as the process for appealing the decision, must be contained in the termination letter. The Graduate College must receive a copy of the termination letter. If the graduate student resigns from the program to avoid being terminated for reasons of plagiarism, the student will be considered to have simultaneously resigned from the Graduate College.

The appeal process for students accused of academic misconduct is specified in The University of Iowa document, "Policies and Regulations Affecting Students, C. Academic Misconduct," which states: "Questions of academic

dishonesty arising within the colleges of Medicine, Law, Pharmacy, and Dentistry, and the Graduate College are treated on an individual basis." "In the Graduate College, the questions [of academic dishonesty] are handled at the departmental level. If the departmental decision is appealed, the dean may appoint an appeals committee of faculty and students from a slate of nominees prepared by the Graduate Council and the Graduate Student Senate to recommend an appropriate course of action."

The appeal process must be initiated by the student. If the student wishes to appeal the department's or program's action, that appeal must be lodged with the Senior Associate Dean for Academic Affairs of the Graduate College within 30 days of program or departmental dismissal.

#### **G. GRADUATE COLLEGE REVIEW OF DEPARTMENTAL DISMISSAL**

Questions involving judgment of performance will not be reviewed beyond the department level. If, however, the student feels there has been unfairness or some procedural irregularity concerning dismissal, the student may pursue a grievance according to the Academic Grievance Procedure (AGP) established by the Graduate College. The AGP is available in the Graduate College. The student should consult with the Graduate College prior to initiating an academic grievance.

### **Section V. Credits**

#### **A. TRANSFER OF GRADUATE CREDIT**

Graduate work at other institutions will be entered on the student's permanent record by the Office of Admissions and a report of this action will be sent to the student and to his or her major department. Credit for these courses toward an advanced degree at Iowa must have the approval of the major department and the dean of the Graduate College. (See "Section X.E." and "Section XII.E.", Reduction of Old Credits.)

#### **B. RESIDENCE TRANSFER CREDIT**

After admission to a departmental program in the Graduate College, residence graduate credit from another Iowa Regents' university may be counted as residence credit at this institution, provided such work is acceptable to the student's major department on the basis of the department's determination of its applicability toward the degree. (See "Sections X.D." and "XII.C" for minimum semester hours required on campus for the master's and doctor's degrees, and "Sections X.E. and XII.E.", Reduction of Old Credits.)

#### **C. GRADUATE CREDIT FOR VETERANS**

Credit may be granted for studies pursued in war and military situations under such regulations as may be formulated by the national educational agencies and under such adaptation of standing rules as the Graduate Council may authorize from time to time to meet group or individual situations. The value of such credit in satisfying requirements for a degree will be determined by the major department with the approval of the dean.

#### **D. WITHDRAWAL OF REGISTRATION AND PROPORTIONAL CREDIT FOR STUDENTS ENTERING MILITARY SERVICE**

1. Students who leave within the first six weeks of the semester receive no credit.
2. Students who leave within the period of seven to nine weeks receive one-half credit.
3. Students who leave within the period of 10 to 12 weeks receive two-thirds credit.
4. Grade reports for the one-half and two-thirds credit periods: (a) Instructors report grades only as satisfactory or unsatisfactory. (b) Credit is to be assigned on the basis of total registration minus thesis and seminar. (c) Courses are to be counted toward specific degree requirements only after the student returns and then only with the department's approval.
5. Students who complete the twelfth week receive full credit.
6. Grade reports for the full-credit period: (a) Grades are to be reported only at the end of the semester. (b) Credit is to be reported in specific courses.
7. In each instance, the instructor reports the student's credit, grade, and date of withdrawal. No credit is granted unless the student's work is satisfactory at the time of leaving.
8. The amount of credit in thesis and research registration is to be reported to the registrar by individual instructors on the above basis except that less or zero credit may be assigned.

### **Section VI. Marking System**

**A. MARKS CARRYING GRADUATE CREDIT**

These are A+, A, A-, B+, B, B-, C+, C, C-, and S--satisfactory.

**B. MARKS CARRYING NO GRADUATE CREDIT**

These are D+, D, D-, F, I--incomplete, W--withdrawn without discredit, R--registered, and U--unsatisfactory.

**C. AUDIT**

R is assigned when a student registered for zero credit attends as an auditor throughout the course; if the student fails to meet the instructor's requirements for class attendance, W is assigned.

**D. INCOMPLETE**

The grade of I is to be used only when a student's work during a session cannot be completed because of illness, accident, or other circumstances beyond the student's control. In registrations for thesis, research, or independent study, the satisfactory/unsatisfactory grades may be applied. (See next paragraph, "E".) An incomplete will automatically be converted to an F at the end of the next full semester (summer and winter sessions excluded), even if the student does not enroll after the session the I was posted.

Courses may not be repeated to remove incompletes; removal of an I is accomplished only through completion of the specific work for which the mark is given.

**E. THESIS, RESEARCH, READINGS, INDEPENDENT STUDY, AND SPECIAL PROJECTS**

Grades of S and U may be used for registrations in thesis, research, readings, independent study, and special projects. S--satisfactory means that the student receives credit for the work; U--unsatisfactory means that he or she receives no credit. Neither S nor U is used in computing grade-point averages. At a later date, the instructor may change the S to a letter grade. In addition, departments may ask the Graduate College dean for permission to use grades of S and U as described above for courses which, because of their special or experimental nature, are judged to be more appropriate for such grading. The type of grading system to be used in the above cases should always be mutually understood by the instructor and student.

**F. GRADES OF S AND U**

S and U may be used for courses taken by a graduate student outside the major department or interdepartmental degree program provided that the instructor of the course and the student's departmental advisor approve the registration. Arrangements for satisfactory/unsatisfactory grading in these courses are accomplished by filing a card with appropriate signatures in the Registrar's Office at the time of registration, or no later than the last day of the second week of a semester or the third day of the second week of a summer session. No changes from letter grades to satisfactory/unsatisfactory grades or vice versa will be allowed after these dates.

It is not the policy of the Graduate College to abandon the traditional letter grades described in this section; however, in certain exceptional instances, departments having several areas of concentration involving widely differing types of effort may request the permission of the Graduate Council to allow students majoring in one area to register in courses in another area within the same department or program on a satisfactory/unsatisfactory basis. In these instances, satisfactory/unsatisfactory cards will be used as described in the preceding paragraph.

**G. COMPUTED GRADE-POINT AVERAGE**

This is based only upon graduate work graded A+=4.33, A=4.00, A-=3.67, B+=3.33, B=3.00, B-=2.67, C+=2.33, C=2.00, C-=1.67, D+=1.33, D=1.00, D-=0.67, and F=0. Although a grade of A+ has a value of 4.33 in computing a student's g.p.a., the cumulative average is truncated so as not to exceed 4.00.

**Section VII. Graduate Appointments****A. SCHOLARSHIPS**

Scholarships are competitive and are awarded on merit.

1. Eligibility for graduate scholarships and fellowships will include but will not be exclusive to: (a) registration in the Graduate College; (b) cumulative g.p.a. of at least 3.00; (c) a satisfactory rate of progress in completing the program for the degree.
2. Preference will be given to candidates for the doctoral degree.

3. Recommendations for graduate scholarships may be made to the Graduate College by the appropriate department executive, director, or dean. A graduate scholarship may be awarded whether or not a student holds an assistantship. The amount of scholarship for the academic year may vary, but in no case exceed the comprehensive fee assessed. Scholarships will be credited to the student's University account.

#### **B. GRADUATE COLLEGE FELLOWSHIPS**

Fellowships are awarded by the Graduate College upon recommendation by departments to students with outstanding academic records. Fellows must be registered as full-time students. The primary purpose of the awards is to permit an advanced student to complete his or her dissertation or creative project and take the degree. Other terms of the award will be established by the Graduate College dean in consultation with the Graduate Council.

#### **C. FACULTY RESEARCH ASSISTANTSHIPS**

Faculty research assistantships are awarded to qualified graduate students and serve two purposes: to provide research service to professorial members of the academic staff and to provide apprenticeship experience for graduate students who are in training in research. Not more than 20 hours of service per week are required of a half-time assistant. Other part-time service is scaled in proportion, and a limited academic schedule is permitted (see "Section II.D"). Appointments ordinarily are made for the nine-month academic year, but appointments may be made for other periods of time by special arrangement. Stipends vary with the qualifications of the appointee and the amount of service rendered.

#### **D. GRADUATE TEACHING ASSISTANTSHIPS**

These assistantships serve two purposes: assistance in the instructional program of the University and the preparation of future college teachers. In order to achieve both aims, scholastically superior graduate students who show exceptional promise as teachers are selected for graduate teaching assistantships. All appointments are made by the dean of the appropriate college on recommendation of the department.

#### **E. ELIGIBILITY FOR SCHOLARSHIPS, FELLOWSHIPS, AND RESEARCH ASSISTANTSHIPS**

Scholars, fellows, and faculty research assistants on the Graduate College budget must be registered as regular students in good standing in order to hold such appointments. Appointments will be terminated when registration and/or student status is terminated. In no instance may a student be promised or tendered an appointment until after approval for admission to the Graduate College by the director of Admissions.

#### **F. Graduate Assistant Overload Appointments.**

Overload graduate assistantship appointments (those more than 20 hours/week) will be granted only when there is a clear case to be made beyond the student's monetary gain or the benefit to the department.

Before making a graduate assistantship appointment that brings a student's total appointment beyond 50%, the DEO or DGS of the program in which the student is enrolled (in consultation with the student's advisor) must receive permission from the Associate Dean for Student and Administrative Affairs. All overload requests must address: (1) the potential *academic benefit* to the student from the additional appointment; (2) the student's *current progress* towards degree completion; and (3) the effect of the additional appointment on the student's *future progress*.

A total appointment of more than 62.5% should be seen as an exceptional situation and will be granted to a maximum of 75% only for one semester during the entire time of a student's graduate studies.

Before submitting an overload appointment request, the DEO or DGS must confirm that course registration for the semester does not exceed limits specified in "Section II.D." of this manual for the specific level of appointment.

*Upon approval, international students must contact OISS and gain permission for Curricular Practical Training (CPT).*

This policy applies only to teaching assistantships and research assistantships during the regular academic year. The DEO or DGS should make their graduate students aware of this policy during the department/program's fall orientation.

#### **G. LOANS**

Graduate students requiring financial assistance may apply for loans at the Office of Student Financial Aid.

#### **H. OTHER FORMS OF SUPPORT**

Many departments offer financial assistance in the form of traineeships, part-time employment on research programs, or part-time teaching. Inquiries should be addressed directly to the major department.

## **Section VIII. Advanced Programs Offered in the Graduate College**

The major areas in which the Graduate College offers degree programs are listed under "Degree Programs" at the beginning of this section of the Catalog.

## **Section IX. General Requirements for Advanced Degrees**

### **A. APPLICATION FOR DEGREE**

The student must file an application for an anticipated degree with the registrar by the deadline date printed in the Graduate College academic calendar for the session in which the degree will be conferred. The student must have the application signed by his or her advisor. Failure to file the application by the deadline date established by the Graduate College dean will result in postponement of graduation to a subsequent session.

### **B. ENROLLMENT IN FINAL SESSION**

The student must be enrolled during the session in which the degree is to be conferred. Students who are away from the University campus during that session may meet this requirement by registering for independent study, research, or thesis hours according to the practice in the various departments. Doctoral candidates who have completed all work except the final examination may register for Doctoral Final Registration described in "Section XII.L" if such registration is appropriate. Master's candidates who have completed all work except the final examination may register for Master's Final Registration if such registration is appropriate. Both the Doctoral Final Registration and Master's Final Registration require a 2 s.h. tuition/fee payment, and may be repeated if the degree requirements are not completed in this session. Registration in a course for which tuition/fees are not assessed (Cooperative Education Internship, for example) will not satisfy this requirement.

## **Section X. Master's Degrees**

### **A. KINDS OF DEGREES**

The University of Iowa offers programs leading to the Master of Arts (M.A.) degree, Master of Science (M.S.) degree, and several professional master's degrees.

M.A. and M.S. degrees require mastery of methodologies and practices of research and scholarship of the discipline. A thesis describing original scholarship or research may be required. M.A./M.S. degrees may be designed either as preparation for entry into doctoral degree programs or to provide advanced study and accomplishment that serves a variety of career and other purposes. Degrees are awarded in many fields of study, or majors, consistent with conventions of the discipline (e.g., M.A. in Art, English, Psychology; M.S. in Chemistry, Mathematics, Physiology). (For complete list, see Section VIII.) M.A. and M.S. degrees require a minimum of 30 s.h., a final examination and, in some fields, a thesis.

Professional master's degrees provide knowledge, perspectives, and skills required for professional practice. Some programs may include introduction to research or scholarship sufficient to allow application of current literature to practice. Professional master's degrees generally are indicated by a three- or four-letter designation; examples include the Master of Fine Arts (M.F.A.), Master of Social Work (M.S.W.), Master of Public Health (M.P.H.), Master of Science in Nursing (M.S.N.), Master of Accountancy (M.Ac.). (For complete list, see Section VIII.) Professional master's degrees require a minimum of 30 s.h. Some may require a final examination as well as a thesis, papers, projects, colloquia, internships, or other experiential-based activity typical of preparation for practice in the field.

A student may prepare a proposal for an interdisciplinary course of study, including the plan of study defining course work, examination requirements, a research plan, and a committee of at least three faculty members, with either the department most directly concerned or the Graduate College designated as the sponsor. Final approval of such individual programs is granted by the Graduate College dean, who may add members to the student's supervising committee from other closely related departmental faculties or from the Graduate Council. The degree will be awarded in interdisciplinary studies (master's) stipulated in the approved graduate program and, parenthetically, the name of the sponsoring department.

### **B. PLAN OF STUDY**

The applicant for a master's degree must file a plan of study approved by the advisor and the departmental executive with the Graduate College within the session in which the degree is to be granted and by the deadline date printed in the Graduate College academic calendar. If the session in which a student takes his or her final exam is earlier than the session in which the degree is to be granted, the Plan of Study must be filed prior to the administration of the student's final examination. The plan shall meet the requirements for the degree approved by the graduate faculty. (See also "Section IV.D. Departmental Regulations and Dissemination of Information.")

### **C. MAJOR AND RELATED FIELDS**

The plan of study should provide for reasonable concentration in the major field of interest and, subject to the approval of the major department, may include related subjects from other departments.

#### **D. ACADEMIC RESIDENCE REQUIREMENT**

Of the minimum of 30 s.h. required for the degree, at least 24 s.h. must be completed under the auspices of The University of Iowa after admission to a graduate department/program. Various forms of extramural registration may qualify toward fulfillment of the aforementioned 24-hour residence requirement (see "Section II.G. Extramural Registration") in addition to regular on-campus registration. Students who have elected or who are required to write a thesis for conferral of their master's degrees, must complete at least 8 semester hours of the 24-hour, academic residence requirement on campus. At the discretion of the department, the 8-semester hour, on-campus requirement may be waived for nonthesis master's programs. Election of the waiver option is to be applied programmatically, and not on a student-by-student basis, and must be formally conveyed to the Graduate College.

#### **E. REDUCTION OF OLD CREDITS**

Courses taken ten or more years prior to the session in which the master's degree is to be conferred must be evaluated by the major department in order to determine the possible use of these credit hours within a student's plan of study. The department, in turn, must send a letter of petition to the Graduate College, requesting the use of any or all of these credits toward the fulfillment of degree requirements.

#### **F. LIMIT ON PROFESSIONAL COURSES**

Work taken by a student in the Colleges of Dentistry, Law, or Medicine while enrolled for a professional degree may be credited to a graduate program leading to a master's degree if it is taken after the student has earned a bachelor's degree or has completed work equivalent to that required for a bachelor's degree at The University of Iowa. The work accepted from the professional college must be directly related to the student's major field of study in the Graduate College and be approved as a part of the plan of study by the student's advisor and the major department. Work completed while registered for a professional degree in law, medicine, or dentistry will be counted as part of the residence requirement for nondoctoral degrees in the Graduate College only when the student is registered in an appropriate joint degree program.

#### **G. TWO MASTER'S DEGREES**

The granting by this university of two master's degrees simultaneously or in succession requires the satisfaction of all requirements for each degree separately, including two theses where a thesis is required for each, and two examinations, with a minimum combined total of 60 s.h. of graduate credit.

#### **H. MASTER'S DEGREE WITH THESIS**

Not more than 9 s.h. of credit for thesis research and writing shall be counted in satisfying the 30 s.h. minimum requirement. The thesis may be a scholarly study or an artistic production.

Beginning with the Fall 2009 Semester all master's theses, excluding MFA theses, must be submitted to the Graduate College in electronic format. MFA students will have the option of submitting hard-copy or electronic theses.

The first deposit of a thesis (an ETD or one hard copy of the MFA thesis), complete and in final typed form, must be presented to the Graduate College for a check of formal characteristics by the first-deposit deadline date in the session in which the degree is to be conferred. After approval by the Graduate College and by the thesis committee, the final deposit of the thesis (an ETD or two, identical hard copies of the MFA thesis) must be deposited with the Graduate College by the final deposit deadline date in the student's graduation session. Failure to submit the first and final deposits of the thesis by the deadline dates established by the Graduate College will result in the postponement of graduation to a future session. [For detailed submission and formatting requirements, see Theses & Dissertations under Policies & Deadlines on the Graduate College web site.]

Nonrefundable fees are charged each thesis candidate to cover processing and publication costs of the thesis.

The thesis committee shall consist of at least three members of the graduate faculty and may or may not be identical to the final examination committee. (The final examination committee for the master's degree shall consist of at least three members of the graduate faculty, at least two of whom are from the major department. See "X.K. Examining Committee.")

#### **I. MASTER'S DEGREE WITHOUT THESIS**

A master's degree without thesis, consisting of at least 30 s.h. of graduate work, may be awarded upon the completion

of a curriculum prescribed by a department and approved by the Graduate Council.

#### **J. FINAL EXAMINATION**

The requirements for master's degrees may include a final examination which, at the discretion of the major department, may be written or oral or both. Such an examination will not duplicate course examinations. It will be evaluated by the examining committee as satisfactory or unsatisfactory, with two unsatisfactory votes making the committee report unsatisfactory. The report of the final examination is due in the Graduate College not later than 48 hours after the examination, and by the deadline date established by the Graduate College.

If the department so recommends, a candidate who fails the examination may present himself or herself for reexamination, but not sooner than the next regularly scheduled examination period in the following session.

The examination may be repeated only once.

A student must graduate within one calendar year after passing the final examination for a master's degree; failure to meet this deadline will require reexamination of the student.

Upon recommendation of a department, the comprehensive examination for a doctoral degree may be substituted for the master's examination.

Some master's programs do not require a final exam. Students are responsible for checking the specific requirements of their individual degree programs.

#### **K. EXAMINING COMMITTEE**

The examining committee for the master's degree consists of at least three members of the Graduate Faculty appointed by the dean upon recommendation of the major department or program. These committees are composed as follows:

At least two of the faculty members must be members of The University of Iowa tenure-track faculty.

At least two of the faculty members are from the major department or program (defined as faculty members who hold any appointment in the major department or program), and are members of The University of Iowa tenure-track faculty.

A department or program may impose additional structure on the composition of its examining committees.

Departments and programs may request the dean's permission to replace one of the three members of the Graduate Faculty by a recognized scholar of professorial rank from another academic institution. Also, a voting member may be added at the discretion of the Graduate College Dean.

### **Section XI. Graduate Certificate Programs**

Graduate certificate programs reflect specialization, either within a field or in an area of study, research, or training. Some graduate certificate programs may be open only to students seeking degrees in related fields; others may be offered as independent programs. Graduate certificate programs are designed to enhance skills, to provide professional development and career advancement opportunities, to broaden career options, and for other purposes, both for traditional, full-time students and for those with full-time employment.

Graduate certificate programs usually require a minimum of 15 s.h. of specified course work and may, in addition, require papers, projects, or experiential learning components designed for specific cohorts. Certificate programs generally require two to three semesters to complete.

Examples include the graduate certificates in aging studies, American Indian and native studies, informatics, and advanced nurse practitioner. Requirements for each graduate certificate are included in The University of Iowa General Catalog.

### **Section XII. Doctor's Degrees**

#### **A. CHARACTER OF DEGREE**

The Graduate College offers doctoral programs leading to the Doctor of Philosophy (Ph.D.), the highest degree awarded by the university; the Doctor of Musical Arts (D.M.A.); the professional Doctor of Physical Therapy (D.P.T.); the professional Doctor of Audiology (Au.D.); and the professional Doctor of Nursing Practice (D.N.P.). The Doctor of Philosophy degree indicates marked excellence in original research or other creative work, and superior comprehension in the discipline. The Doctor of Musical Arts degree indicates marked excellence in performance and pedagogy. The Doctor of Physical Therapy degree indicates marked excellence in physical therapy differential diagnosis and clinical integration. The Doctor of Audiology degree indicates marked excellence in theoretical and advanced clinical skills. The Doctor of Nursing Practice degree indicates marked excellence in clinical practice and the

application of clinical theory in the classroom and administrative venues.

#### **B. PREREQUISITES**

The candidate must present evidence of having completed a satisfactory amount of undergraduate work in the subject proposed for investigation or, in the case of deficiency, must register for prerequisite courses.

#### **C. RESIDENCE REQUIREMENT**

The Ph.D. is granted primarily on the basis of achievement rather than on the accumulation of semester hours of credit; however, the candidate is expected to have completed at least three years of residence in a graduate college. At least part of this residence must be spent in full-time involvement in one's discipline, at this university, beyond the first 24 s.h. of graduate work; this requirement can be met either by: (1) enrollment as a full-time student (9 s.h. minimum) in each of two semesters; or (2) enrollment for a minimum of 6 s.h. in each of three semesters during which the student holds at least a one-quarter-time assistantship certified by the department as contributing to the student's doctoral program. (For purposes of record and assessment of fees, student registration should reflect accurately the amount and kind of work undertaken in the Graduate College. All doctoral programs, including acceptable transfer credit, will contain a minimum of 72 s.h. of graduate work.)

#### **D. INTERDISCIPLINARY STUDIES PROGRAMS**

A student may prepare a proposal for an interdisciplinary course of study, including the plan of study defining course work, examination requirements, research plan, and a committee of at least five faculty members with either the department most directly concerned or the Graduate College, designated as the sponsor. Final approval of such individual programs is granted by the Graduate College dean, who may add members to the student's supervising committee from other closely related departmental faculties or from the Graduate Council. The degree will be awarded in interdisciplinary studies (doctorate) stipulated in the approved graduate program and, parenthetically, the name of the sponsoring department.

#### **E. REDUCTION OF OLD CREDITS**

Courses taken 10 or more years prior to the doctoral comprehensive examination must be evaluated by the major department in order to determine the possible use of these credit hours within a student's plan of study. The department, in turn, must send a letter of petition to the Graduate College, requesting the use of any or all of these credits toward the fulfillment of degree requirements.

#### **F. LIMIT ON PROFESSIONAL COURSES**

Work taken by a student in the Colleges of Dentistry, Law, or Medicine while enrolled for a professional degree may be credited to a graduate program leading to a doctoral degree if it is taken after the student has earned a bachelor's degree or has completed work equivalent to that required for a bachelor's degree at The University of Iowa. The work accepted from the professional colleges must be directly related to the student's major field of study in the Graduate College, and the plan of study must be approved by the student's advisor and the major department. Work completed while registered for a professional degree in law, medicine, or dentistry will be counted as part of the one academic year which must be spent in residence as a doctoral student only when the student is registered in a formally established joint degree program.

#### **G. JOINT PROGRAM FOR MASTER'S AND DOCTORAL DEGREES**

Those students who expect to continue their training through the doctoral degree may pursue a joint program for the master's and doctor's degrees. The master's examination may be combined with the comprehensive examination for the doctorate for these candidates. The examining committee will file separate reports of its actions on the final examination for the master's degree and for the comprehensive examination. Upon recommendation of the department and approval of the Graduate College dean, students who are well qualified by previous training may submit a plan of study that leads directly to the doctoral degree without earning the master's degree as an intervening part.

#### **H. REQUIREMENT IN FOREIGN LANGUAGES**

There is no general Graduate College requirement in foreign languages. Those departments that do require competence in one or more foreign languages establish standards as to the extent and level of competence, as well as methods of testing. Specific requirements will be found in the departmental statements of standards and procedures (see "Section IV.D.").

Specifications of departmental requirements in foreign languages are filed in the Graduate College office and may be changed upon the initiative of the departments.

**I. REQUIREMENTS FOR THE DOCTOR OF PHYSICAL THERAPY (D.P.T.), THE DOCTOR OF AUDIOLOGY (AU.D.), AND THE DOCTOR OF NURSING PRACTICE (D.N.P.)**

Students enrolled in professional D.P.T., D.N.P., and Au.D. programs do not take comprehensive and final examinations and do not deposit a thesis with the Graduate College. The departments will be required to submit a doctoral plan of study to the Graduate College during the session of degree conferral. The plan will provide a listing of all graduate courses taken that apply toward the degree and a listing of courses in progress. The plan is to be filed no later than the deadline date printed in the Graduate College academic calendar.

**J. PLAN OF STUDY**

The development of a plan of study at the doctoral level is the responsibility of the student working together with his or her advisor. A formal plan of study must accompany the departmental request to the Graduate College for permission to conduct the comprehensive examination. The plan will provide a listing of all graduate courses taken that apply toward the degree and a listing of courses in progress or to be completed after the comprehensive examination.

**K. COMPREHENSIVE EXAMINATION**

The candidate must satisfactorily complete a comprehensive examination, consisting of written or oral parts or both at the discretion of the major department. Admission to the comprehensive examination is granted upon the recommendation of the major department, the filing of the plan of study, and the approval of the dean of the Graduate College. A student must be registered in the Graduate College at the time of the comprehensive examination, which must be satisfactorily completed not later than the session prior to the session of graduation. This examination, administered only on campus, is intended to be an inclusive evaluation of the candidate's mastery of the major and related fields of study, including the tools of research in which competence has been certified.

The comprehensive examination is not a deferred qualifying examination. It is intended to evaluate the candidate's mastery of the subject at or near the end of his or her formal preparation and prior to the completion of the dissertation. The comprehensive examination and the final examination, which is concerned chiefly with defense of the thesis and related subjects, are the two principal examinations for the Ph.D. and D.M.A. doctoral degrees.

The comprehensive examination will be evaluated by a convened meeting of the committee. Each committee member will sign the examination report as satisfactory, reservations, or unsatisfactory. The completed exam warrant will be submitted to the Graduate College office within 14 days after the completion of the examination. Two "unsatisfactory" votes will make the committee report unsatisfactory.

A vote of "reservations" should only be used when a faculty member feels that the deficiencies displayed by the student were modest, and can be readily rectified. In the event of a report with two or more votes of "reservations," the actions required of the student, by the committee, that are necessary to correct the deficiencies must be recorded and submitted to the Graduate College with the examination report form. Copies of the written statement of necessary actions should be kept by: the appropriate departmental executive, the chair of the examination committee, and the student. The statement must specify the time allowed for completion of the aforementioned actions. The language describing the actions must be specific. For instance, if additional course work is required, a list of suitable courses must be presented. If the candidate needs to rewrite his or her research prospectus, the deficient areas must be identified, etc. If the candidate satisfies the required actions in the specified period of time, the appropriate departmental executive will send a written report to the Graduate College indicating the date for which the examining committee considers the actions to have been satisfied. Upon approval of the dean of the Graduate College, the comprehensive exam will be recorded as "satisfactory" as of that date. If the actions are not satisfied on time, or if the actions are not of sufficient quality, the appropriate departmental executive will send a written report to the Graduate College indicating that fact. Upon approval of the dean of the Graduate College, the comprehensive exam will be recorded as "unsatisfactory" as of that date. The candidate will not be admitted to the final oral examination of the dissertation until a grade of "satisfactory" has been recorded for the comprehensive exam.

In case of a report of unsatisfactory on a comprehensive examination, the committee may grant the candidate permission to present himself or herself for reexamination not sooner than four months after the first examination. The examination may be repeated only once, at the option of the department.

**L. CONTINUOUS REGISTRATION AFTER COMPLETION OF THE COMPREHENSIVE EXAMINATION**

The student is required to register each fall and spring semester after satisfactorily completing the comprehensive examination until the degree is awarded. If a student fails to register, the student may not be readmitted to candidacy until the student has submitted an application that has been approved by the student's advisor, the departmental executive, and the Graduate College dean.

In order to maintain continuous registration, doctoral students may register (1) for required and/or elective courses, research, and thesis hours to complete the plan of study, or (2) for Doctoral Continuous Registration (DCR). DCR

requires a 2 s.h. tuition/fee payment. If a temporary lapse in a student's academic program is required due to military service, medical leave, maternity leave, or personal/family leave, a student may petition the Graduate College to be allowed to register for Ph.D. Postcomprehensive Registration (PCR), which allows for the assessment of a special minimum fee. If a petition is granted, it is to be understood that a student will not make significant use of university resources, or engage in significant consultation with the faculty. In the final semester, doctoral students may register for Doctoral Final Registration (DFR), which requires a 2 s.h. tuition/fee payment, or appropriate course work. The DFR may be repeated if the degree requirements are not completed in this session.

Under no circumstances may courses for which tuition/fees are not assessed (Cooperative Education Internship, for example), be used to satisfy the continuous registration or final registration requirement of the Graduate College.

No registration for the summer or winter sessions is required. The exceptions are when the student is taking a degree at the end of the summer session, or when enrollment is required by the student's department.

#### **M. DISSERTATION FOR THE DOCTORAL DEGREE**

Beginning with the Fall 2009 Semester all doctoral theses must be submitted to the Graduate College in electronic format.

The student's dissertation, complete and in final form, must be presented in ETD (electronic thesis/dissertation) format at the office of the Graduate College by the first-deposit deadline date in the session in which the degree is to be conferred. The final deposit of the approved ETD must be deposited at the office by the appropriate deadline date in the student's graduation semester. The final deposit can be no later than the end of the semester (summers excluded) following the session in which the final examination is passed; failure to meet this deadline will require reexamination of the student. Failure to submit the first and final deposits of the dissertation by the deadline dates established by the Graduate College will result in the postponement of graduation to a future session. [For detailed submission and formatting requirements, see Theses & Dissertations under Policies & Deadlines on the Graduate College web site.]

Regulations regarding preparation of the dissertation shall be promulgated by the dean of the Graduate College. An external abstract of the dissertation, not to exceed two, double-spaced pages (text and approval lines), is to be deposited with the dissertation. The abstract must be approved and signed by the dissertation advisor. Approved ETDs will be forwarded to ProQuest for microfilming and digital archiving; the doctoral abstracts will be published in *Dissertation Abstracts International*. The PDF format of all electronic submissions will be forwarded by ProQuest to The University of Iowa Libraries, where they will be catalogued and made available for public use.

Dissertations shall be made available to all members of the examining committee not later than two weeks before the date of the examination.

#### **N. DISSERTATION FEES**

Nonrefundable fees are charged each doctoral candidate to cover processing and publication costs of the dissertation and abstract.

#### **O. FINAL EXAMINATION**

The work for the degree culminates in a final oral examination administered on campus. This examination should include: a critical inquiry into the purposes, methods, and results of the investigation--not a mere recapitulation of the procedures followed--and intensive questioning on areas of knowledge constituting the immediate context of the investigation.

The final examination may not be held until the next session after the student satisfactorily completes the comprehensive examination; however, a student must pass the final examination no later than five years after satisfactorily completing the comprehensive examination. Failure to meet this deadline will result in a reexamination of the student to determine his or her qualifications for taking the final examination. The procedures to be followed are the same as those for the comprehensive examination. (See "XII.K. Comprehensive Examination.")

Final examinations for the doctorate are open to the public. Members of the faculty of the Graduate College are especially invited to attend and, subject to the approval of the chair, to participate in the examination.

The report of the final examination is due in the Graduate College office not later than 48 hours after the examination. The final examination will be evaluated as satisfactory or unsatisfactory. Two unsatisfactory votes will make the committee report unsatisfactory. In case of a report of unsatisfactory in the final examination, the candidate may not present himself or herself for reexamination until the next session. The examination may be repeated only once, at the option of the major department.

#### **P. EXAMINING COMMITTEES**

The Graduate College encourages departments and programs to construct Ph.D. examining committees which are

comprised of faculty members with varying, but related, areas of expertise.

The comprehensive and final examinations are conducted by committees of no fewer than five members of the Graduate Faculty appointed by the dean upon recommendation of the major department or program. These committees are composed as follows:

At least four of the faculty members must be members of The University of Iowa tenure-track faculty.

At least two of the faculty members are from the major department or program (defined as faculty members who hold any appointment in the major department or program), and are members of The University of Iowa tenure-track faculty.

A department or program may impose additional structure on the composition of its examining committees.

Departments and programs may request the dean's permission to replace one of the five members of the Graduate Faculty by a recognized scholar of professorial rank from another academic institution. Also, a voting member may be added at the discretion of the Graduate College Dean.

### **Section XIII. Exceptions**

Petitions to waive these regulations may be made for appropriate and justifiable reasons on behalf of any graduate student through the departmental executive to the dean and the Graduate Council.

## **Nondepartmental Courses**

<b>000:000 Ph.D. Postcomprehensive Registration</b>	0 s.h.
<b>000:001 Master's Final Registration</b> Requirements: master's degree candidate.	0 s.h.
<b>000:002 Doctoral Continuous Registration</b> Requirements: doctoral degree candidate who has passed comprehensive examinations.	0 s.h.
<b>000:003 Doctoral Final Registration</b> Requirements: doctoral degree candidate in final session of enrollment.	0 s.h.
<b>000:008 CIC Scholar Nongraduate Level</b>	arr.
<b>000:800 CIC Scholar</b>	arr.
<b>000:801 Regents Exchange Program</b>	arr.
<b>000:997 Graduate/Professional Transfer</b>	arr.
<b>000:998 Undergraduate Transfer</b>	arr.
<b>000:999 Resident/Fellow/Post-Doctoral</b>	0 s.h.
<b>650:006 SROP/McNair Scholars Program</b>	0 s.h.
<b>650:270 Principles of Scholarly Integrity</b> Training in the responsible conduct of research and scholarly activities; discussion of case studies--student/mentor responsibilities in the pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to the institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, human/animal subjects). Requirements: enrollment in Graduate College degree-seeking program. Recommendations: first-year graduate standing (Ph.D., M.S./M.A.) and conducting NSF/NIH-funded research.	0-1 s.h.
<b>650:275 OGEI Topical Seminar: Professional Sustainability in Graduate School</b> Skill development and sustainability plan; professional literature, guest speakers.	1 s.h.
<b>650:300 Writing for Learned Journals</b>	1-4 s.h.

Help for graduate students in bringing written work to publishable form; analysis of target journals' audiences and interests; submission, response to criticism. Same as 08N:340, 160:300.

**650:313 Digital Rhetoric**

3 s.h.

Current discourse (utopic, dystopic, other strands) about the Internet as it shapes and is shaped by competing forces. Repeatable. Same as 008:313, 160:313.

**650:380 Practicum in College Teaching**

arr.

Supervised college teaching experience; teaching in collaboration with faculty, observation and critiques of teaching, participation in course planning and evaluation procedures; ethical and multicultural considerations. Requirements: admission to the graduate certificate in college teaching program.

**650:385 Teaching and Learning in Higher Education**

3 s.h.

Current theoretical and empirical literature on teaching and learning in higher education; focus on development of effective teaching practice. Same as 07B:385, 07C:385, 07P:385, 07S:384.

**650:601 Postdoctoral Research Scholar**

0 s.h.

Repeatable. Requirements: postdoctoral standing.

**650:602 Postdoctoral Research Fellow**

0 s.h.

Repeatable. Requirements: postdoctoral standing.

**650:604 Principles of Scholarly Integrity**

0 s.h.

Training in the responsible conduct of research and scholarly activities; discussion of case studies--student/mentor responsibilities for the pursuit of scholarly work (ownership, authorship, plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to the institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, human/animal subjects). Requirements: postdoctoral standing. Recommendations: first-year postdoctoral scholar/fellow (FP01/FP02) conducting NSF/NIH-funded research.

**650:605 Writing for Learned Journals**

0 s.h.

Help for graduate students in bringing written work to publishable form; analysis of target journals' rhetoric; submission, response to criticism. Requirements: postdoctoral standing.

**650:606 Survival Skills for a Research Career**

0 s.h.

Nonlaboratory skills necessary for pursuing a scientific research career, including scientific writing, presentation, manuscript review, curriculum vitae preparation, and so forth. Repeatable. Requirements: postdoctoral standing.

**650:614 Principles of Scholarly Integrity**

0 s.h.

Training in the responsible conduct of research (RCR) and scholarly activities; discussion of case studies--student/mentor responsibilities in the pursuit of scholarly work (ownership; authorship; plagiarism/falsification/fabrication of data); student/mentor relationships and intellectual dialogues (communication, collaboration, grievance management); student responsibilities to the institution/scholarly community/society (intellectual property, conflict of interest, fiscal responsibilities, human/animal subjects); may meet the RCR training obligation of the K award. Requirements: junior faculty member holding a federally-funded K award.

## Alliances for Graduate Education and the Professoriate Summer Program

**Director:** John C. Keller

**Associate director:** Minnetta V. Gardinier

**Assistant director:** Tarrell Portman

**Advisory committee:** John Logsdon (Biology), Len MacGillivrey (Chemistry), Paul Muhly (Mathematics), Tonya Peebles (Chemical and Biochemical Engineering), Aliasger Salem (Pharmacy), Hallie Sims (Geoscience), and Gideon Zamba (Biostatistics)

**Web site:** <http://oge.grad.uiowa.edu/agep>

The Alliances for Graduate Education and the Professoriate Summer Program (AGEP) prepares students to pursue graduate education in engineering and in the mathematical, physical, and life sciences. The eight-week program offers early research experience by matching students with University of Iowa faculty mentors in the students' interest areas. It also gives participants the opportunity to experience life as a graduate student at a large university.

Students are required to participate in weekly seminars and in social, cultural, and educational activities. They also tour facilities both on and off campus. A final report/project is required. The program ends with a research symposium at which students make oral and poster presentations of their research.

Applicants must be U.S. citizens or permanent residents, and members of an underrepresented minority (African American, Hispanic, or American Indian). They must be undergraduate students pursuing a degree in science, technology, engineering, or mathematics. To enter the program, applicants must have completed their sophomore year in college and have a cumulative g.p.a. of at least 3.00. Graduating seniors are not eligible.

For more information about AGEP summer programs, see the Alliances for Graduate Education and the Professoriate web site.

# Applied Mathematical and Computational Sciences

**Chair:** Weimin Han (Mathematics)

**Affiliated faculty:** Karim A. Abdel-Malek (Biomedical Engineering), Kurt Anstreicher (Management Sciences), Marc P. Armstrong (Geography), Bruce Ayati (Mathematics), Debashish Bhattacharya (Biology), Samuel Burer (Management Sciences), Ann M. Campbell (Management Sciences), Gregory R. Carmichael (Chemical and Biochemical Engineering), Thomas L. Casavant (Electrical and Computer Engineering), Kyung K. Choi (Mechanical and Industrial Engineering), James F. Cremer (Computer Science), Rodica Curtu (Mathematics), Isabel Darcy (Mathematics), Soura Dasgupta (Electrical and Computer Engineering), John Geweke (Economics/Statistics and Actuarial Science), Lilach Hadany (Biology), Weimin Han (Mathematics), Stephen D. Hendrix (Biology), Jian Huang (Statistics and Actuarial Science), Raj Jagannathan (Management Sciences), Laurent Jay (Mathematics), Douglas W. Jones (Computer Science), Palle Jorgensen (Mathematics), Alan R. Kay (Biology), Joseph K. Kearney (Computer Science), Pavlo Krokhmal (Mechanical and Industrial Engineering), Russell V. Lenth (Statistics and Actuarial Science), Tong Li (Mathematics), Yi Li (Mathematics), Ching-Long Lin (Industrial and Mechanical Engineering), John Logsdon (Biology), Jia Lu (Mechanical and Industrial Engineering), Michael Mackey (Biomedical Engineering/Pathology), John R. Manak (Biology), Colleen Mitchell (Mathematics), George Neumann (Economics), Gregg C. Oden (Psychology), Jeffrey W. Ohlmann (Management Sciences), Suely Oliveira (Computer Science), Wayne Polyzou (Physics and Astronomy), Sharif Rahman (Mechanical and Industrial Engineering), R. Rajagopal (Geography/Civil and Environmental Engineering), Teodor Rus (Computer Science), Gerard Rushton (Geography), Alberto M. Segre (Computer Science), Elias Shiu (Statistics and Actuarial Science), Jonathan Simon (Mathematics), Milan Sonka (Electrical and Computer Engineering), John P. Spencer (Psychology), David Stewart (Mathematics), Osnat Stramer (Statistics and Actuarial Science), Gerhard O. Strohmer (Mathematics), Kai Tan (Internal Medicine/Biomedical Engineering), Qihe Tang (Statistics and Actuarial Science), Tuong Ton-That (Mathematics), Lihe Wang (Mathematics), George G. Woodworth (Statistics and Actuarial Science), Chun-Fang Wu (Biology), Yangbo Ye (Mathematics), Hantao Zhang (Computer Science), Ying Zhang (Biostatistics)

**Graduate degree:** Ph.D. in Applied Mathematical and Computational Sciences

**Web site:** <http://www.amcs.uiowa.edu/>

Applied mathematical scientists formulate scientific concepts and problems in mathematical terms; solve the resulting mathematical problems using analytical and computational methods; and discuss, interpret, and evaluate the solutions. They explore areas of mathematical application and develop mathematical theories in new areas.

Career opportunities for applied mathematicians include positions in colleges, universities, governmental laboratories, business, industry, and consulting firms.

## Graduate Program

The program offers a Ph.D. in applied mathematical and computational sciences.

### Doctor of Philosophy

The Doctor of Philosophy in applied mathematical and computational sciences requires a minimum of 72 s.h. of graduate credit. The Ph.D. program is autonomous, broadly based, and interdisciplinary. It is designed to help students achieve a command of theoretical and applied mathematics and obtain basic knowledge in another area (engineering, medicine, or one of the behavioral, biological, physical, or social sciences).

The program is flexible; students can concentrate on applied mathematics, such as differential equations and numerical analysis, or on other applicable techniques in mathematics. Scientific computing is an important part of applied mathematics, so it is often a part of student training and dissertation research.

Prospective students should have a desire to apply a mathematical science (mathematics or statistics) to relevant problems in another area.

#### PLAN OF STUDY

Faculty members help each student plan a course of study that is consistent with the student's background, interests, and goals.

These individual programs are designed to help students develop expertise in methods of applied mathematics and build a good foundation in related topics of theoretical mathematics. The individual programs also provide sufficient knowledge in an outside area to enable students to use mathematical techniques in that area.

Students can arrange their study plans to earn a master's degree from another department after they complete part of their plan. Students find suitable thesis problems and supervisors with the help of the faculty.

#### QUALIFYING AND COMPREHENSIVE EXAMINATIONS

Students take a qualifying examination over three of the four core course sequences required for the Ph.D. (analysis, differential equations, numerical analysis, and topology). They also take a comprehensive examination over the chosen outside area.

One program objective is to have each student's dissertation research include many of the activities of an applied mathematical scientist. For example, a student might formulate a model, do a quantitative analysis of the model, and interpret the results.

### Admission

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. To be prepared for graduate-level course

work in mathematics and an additional area, applicants should have a bachelor's or master's degree with a strong mathematics component and some background in the additional area.

Applications for fall admission are due on January 15. For application forms and more information about the academic program, contact the chair of the Applied Mathematical and Computational Sciences Program.

### **Financial Support**

Fellowships and research and teaching assistantships are available to qualified applicants. Fellowship support is available during summers. Applications for financial support should be submitted at the same time as applications for admission.

## **Applied Mathematical and Computational Sciences Courses**

### **22A:397 Seminar: Applied Mathematical and Computational Sciences**

arr.

Current research by faculty, students, guests.

### **22A:399 Reading and Research**

arr.

Repeatable.

## Biosciences

**Director:** Andrew F. Russo

**Affiliated faculty:** Paul Abbas (Communication Sciences and Disorders/Otolaryngology--Head and Neck Surgery), Francois Abboud (Internal Medicine), Christopher Adams (Internal Medicine), Lee-Ann Allen (Internal Medicine), Mark Anderson (Internal Medicine), Michael G. Anderson (Molecular Physiology and Biophysics), Steven Anderson (Neurology), Michael Apicella (Microbiology), Mark Arnold (Chemistry), Nikolai Artemyev (Molecular Physiology and Biophysics), Mario Ascoli (Pharmacology), Vladimir Badovinac (Pathology), Zuhair Ballas (Internal Medicine), Botond Banfi (Anatomy and Cell Biology), Alex Bassuk (Pediatrics), Christopher Benson (Internal Medicine), Ramesh Bhalla (Anatomy and Cell Biology), Jackie Bickenbach (Anatomy and Cell Biology), Gail Bishop (Microbiology), Daniel Bonthius (Pediatrics), Terry Braun (Biomedical Engineering), Timothy Brennan (Anesthesiology), Charles Brenner (Biochemistry), Garry Buettner (Radiation Oncology), John Butler (Microbiology), Kevin Campbell (Molecular Physiology and Biophysics), Brent Carter (Internal Medicine), Thomas Casavant (Electrical and Computer Engineering), Martin Cassell (Anatomy and Cell Biology), Mark Chapeau (Internal Medicine), Songhai Chen (Pharmacology), Chi-Lien Cheng (Biology), Amit Choudhury (Anatomy and Cell Biology), Steven Clegg (Microbiology), Michael Cohen (Pathology), Kelly James Cole (Health and Human Physiology), John Colgan (Internal Medicine), Josep Comeron (Biology), Robert Cornell (Anatomy and Cell Biology), Charles Cox (Microbiology), Joseph Cullen (Surgery), John Dagle (Pediatrics), Michael Dailey (Biology), Warren Darling (Health and Human Physiology), Beverly Davidson (Internal Medicine), Deborah Dawson (Preventive and Community Dentistry), Kris DeMali (Biochemistry), Jeffrey Denburg (Biology), Natalie Denburg (Neurology), Frederick Domann (Radiation Oncology), John Donelson (Biochemistry), Jonathan Doorn (Pharmacy), Michael Duffel (Pharmacy), Adam Dupuy (Anatomy and Cell Biology), Daniel Eberl (Biology), Adrian Elcock (Biochemistry), Craig Ellermeier (Microbiology), John Engelhardt (Anatomy and Cell Biology), Sarah England (Molecular Physiology and Biophysics), Frank Faraci (Internal Medicine), Jan Fassler (Biology), Michael Feiss (Microbiology), Elizabeth Field (Internal Medicine), R. William Field (Occupational and Environmental Health), John Fingert (Ophthalmology and Visual Sciences), Rory Fisher (Pharmacology), Robert Franciscus (Anthropology), C. Andrew Frank (Anatomy and Cell Biology), Joseph Frankel (Biology), John Freeman (Psychology), Gregory Friestad (Chemistry), Bernd Fritsch (Biology), Ernesto Fuentes (Biochemistry), Laurence Fuortes (Occupational and Environmental Health), Minnetta Gardinier (Pharmacology), Lei Geng (Chemistry), Frederic Gerr (Occupational and Environmental Health), Pamela Geyer (Biochemistry), Paloma Giangrande (Internal Medicine), George Giudice (Dermatology), James Gloer (Chemistry), Apollina Goel (Radiation Oncology), Pedro Gonzalez-Alegre (Neurology), Jean Gordon (Communication Sciences and Disorders), Prabhath Goswami (Radiation Oncology), Vicki Grassian (Chemistry), Steven Green (Biology), Jeremy Greenlee (Neurosurgery), Thomas Griffith (Urology), Hasem Habelhah (Pathology), Amanda Haes (Chemistry), Donna Hammond (Anesthesiology), N. Charles Harata (Molecular Physiology and Biophysics), John Hartly (Microbiology), Richard Eliot Hazeltine (Psychology), Paul Heidger (Anatomy and Cell Biology), Donald Heistad (Internal Medicine), Stephen Hendrix (Biology), Michael Henry (Molecular Physiology and Biophysics), Jonathan Heusel (Pathology), Raymond Hohl (Internal Medicine), Keri Hornbuckle (Civil and Environmental Engineering), Alexander Horswill (Microbiology), Diana Horton (Biology), Douglas Houston (Biology), Jon Houtman (Microbiology), Matthew Howard (Neurosurgery), Richard Hurlig (Communication Sciences and Disorders), Fiorenza Ianzini (Pathology), Erin Irish (Biology), Siegfried Janz (Pathology), Jean Jew (Anatomy and Cell Biology), Alan Kim Johnson (Psychology), Wayne Johnson (Molecular Physiology and Biophysics), Bradley Jones (Microbiology), Masataka Kawai (Anatomy and Cell Biology), Alan Kay (Biology), Shahram Khademi (Biochemistry), John Kirby (Microbiology), Toshihiro Kitamoto (Anesthesiology), Joel Kline (Internal Medicine), Al Klingelutz (Microbiology), Stacey Klutts (Pathology), C. Michael Knudson (Pathology), Amnon Kohen (Chemistry), John Koland (Pharmacology), Markus Kuehn (Ophthalmology and Visual Sciences), Tomomi Kuwana (Pathology), Anne Kwikte (Internal Medicine), Kathryn Lamping (Internal Medicine), Amy Lee (Molecular Physiology and Biophysics), Gloria Lee (Internal Medicine), Kevin Legge (Pathology), Steven Lentz (Internal Medicine), Kimberly Leslie (Obstetrics and Gynecology), Dana Levasseur (Internal Medicine), Irwin Levin (Psychology), Andrew Lidral (Orthodontics), Fang Lin (Anatomy and Cell Biology), Jim (Chung-Jung) Lin (Biology), Ana Llopert (Biology), John Logsdon (Biology), Gabriele Ludewig (Occupational and Environmental Health), Vince Magnotta (Radiology), Robert Malone (Biology), John Manak (Biology), Claudio Margulis (Chemistry), Wendy Maury (Microbiology), Bryant McAllister (Biology), Linda McCarter (Microbiology), Laurie McCormick (Psychiatry), Paul McCray (Pediatrics), Stephen McGowan (Internal Medicine), Jeffrey Meier (Internal Medicine), John Menninger (Biology), Lou Messerle (Chemistry), Durga P. Mohapatra (Pharmacology), Peter Mohler (Internal Medicine), Steven Moore (Pathology), Jessica Moreland (Pediatrics), Craig T. Morita (Internal Medicine), David Moser (Psychiatry), David Motto (Internal Medicine), Scott Moye-Rowley (Molecular Physiology and Biophysics), Robert Mullins (Ophthalmology and Visual Sciences), David Murhammer (Chemical and Biochemical Engineering), Jeffrey Murray (Pediatrics), William Nauseef (Internal Medicine), Maurine Neiman (Biology), Hien Nguyen (Chemistry), Peggy Nopoulos (Psychiatry), Sue O'Dorisio (Pediatrics), Daniel O'Leary (Psychiatry), Nicholas Pantazis (Anatomy and Cell Biology), Sergio Paradiso (Psychiatry), Shivanand Patil (Pediatrics), Jane Paulsen (Psychiatry), Stanley Perlman (Microbiology), Robert Philibert (Psychiatry), Bryan Phillips (Biology), Robert Piper (Molecular Physiology and Biophysics), Bryce Plapp (Biochemistry), Amy Poremba (Psychology), Jonathan Poulton (Biology), David Price (Biochemistry), Dawn Quelle (Pharmacology), Frederick Quelle (Pharmacology), Daniel Quinn (Chemistry), Kamal Rahmouni (Internal Medicine), Matthew Rizzo (Neurology), Larry Robertson (Occupational and Environmental Health), Robert Robinson (Psychiatry), Jan-Uwe Rohde (Chemistry), Richard Roller (Microbiology), Paul Rothman (Internal Medicine), Peter Rubenstein (Biochemistry), Andrew Russo (Molecular Physiology and Biophysics), Tom Rutkowski (Anatomy and Cell Biology), Aliasger Salem (Pharmacy), Todd Scheetz (Ophthalmology and Visual Sciences), Annette Schlueter (Pathology), Thomas Schmidt (Molecular Physiology and Biophysics), Jerald Schnoor (Civil and Environmental Engineering), Deborah Segaloff (Molecular Physiology and Biophysics), Alberto Segre (Computer Science), Madeline Shea (Biochemistry), David Sheff (Pharmacology), Val Sheffield (Pediatrics), Erwin Shibata (Molecular Physiology and Biophysics), Ming-Che Shih (Biology), Curt Sigmund (Internal Medicine), Kathleen Sluka (Physical Therapy and Rehabilitation Science), Diane Slusarski (Biology), Richard Smith (Otolaryngology), Sarit Smolikove (Biology), David Soll (Biology), Long-Shen Song (Internal Medicine), Douglas Spitz (Radiation Oncology), Mark Starnes (Molecular Physiology and Biophysics), Jack Stapleton (Internal Medicine), George Stauffer (Microbiology), Christopher Stipp (Biology), C. Martin Stoltzfus (Microbiology), Edwin Stone (Ophthalmology and Visual Sciences), Stefan Strack (Pharmacology), Fayyaz Sutterwala (Internal Medicine), William Talman (Neurology), Kai Tan (Internal Medicine), Christie Thomas (Internal Medicine), Peter Thorne (Occupational and Environmental Health), Nelson Ting (Anthropology), Ingo Titze (Communication Sciences and Disorders), J. Bruce Tomblin (Communication Sciences and Disorders), Yurii Usachev (Biology), Daniel Tranel (Neurology), Lubomir Turek (Pathology), Christopher Turner (Communication Sciences and Disorders), Ergun Uc (Neurology), Yuri Usachev (Pharmacology), Steve Varga (Microbiology), Shaun Vecera (Psychology), Thomas Waldschmidt (Pathology), Michael Wall (Neurology), Lori Wallrath (Biochemistry), M. Todd Washington (Biochemistry), Edward Wasserman (Psychology), Thomas Wassink (Psychiatry), Daniel Weeks (Biochemistry), Ronald Weigel (Surgery), George Weiner (Internal Medicine), Joshua Weiner (Biology), David Weiss (Microbiology), Jerrold Weiss (Internal Medicine), Michael Welsh (Internal Medicine), John Wemmie (Psychiatry), David Wiemer (Chemistry), Terence Williams (Anatomy and Cell Biology), Mary Wilson (Internal Medicine), Marc Wold (Biochemistry), Michael Wright (Molecular Physiology and Biophysics), Chun-Fang Wu (Biology), Dale Wurster (Pharmaceutics), Yi Xing (Internal Medicine), Hai-Hui Howard Xue (Microbiology), Timothy Yahr (Microbiology), Charles Yeaman (Anatomy and Cell Biology), Joseph Zabner (Internal Medicine), Nicholas Zavazava (Internal Medicine)

**Web site:** <http://www.healthcare.uiowa.edu/biosciences>

## Graduate Program

Participation in the Biosciences Program leads to a Ph.D. degree in a biosciences discipline. The program provides graduate students the freedom to explore research in any of 16 University of Iowa biosciences research departments and programs: the Departments of Anatomy and Cell Biology, Biochemistry, Biology, Biomedical Engineering, Chemistry, Communication Sciences and Disorders, Microbiology, Molecular Physiology and Biophysics, Pharmacology, and Physical Therapy and Rehabilitation Science; and the Free Radical and Radiation Biology, Genetics, Human Toxicology, Immunology, Molecular and Cellular Biology, and Neuroscience Programs.

Biosciences students enjoy the flexibility of investigating several disciplines through research rotations in the laboratories of Biosciences Program faculty members. Following completion of their first year in the program, students select a research laboratory and program affiliation and decide on a thesis project that will lead to a Ph.D.

Semester hour requirements for the doctorate vary by program, but all Ph.D. degrees at Iowa require at least 72 s.h. of graduate credit. For detailed information on Graduate College policies, see the Manual of Rules and Regulations of the Graduate College.

### Curriculum

Students spend their first two semesters in the Biosciences Program. The curriculum provides them with an integrated core foundation on modern molecular and cellular biology while giving them flexibility to accommodate their individual interests.

Instead of offering one semester-long core course, the program offers at least six content modules. In consultation with

their advisors, students choose modules at five-week intervals, tailoring their individual study plans to meet their interests. Some modules are intended to be taken as a series; they cover fundamentals of cell structure, intracellular trafficking, signal transduction, and protein structure. Other modules are stand-alone units on more specialized topics, such as biostatistics.

Early in the second semester, Biosciences Program students talk with prospective mentors about thesis projects and laboratory openings for the following summer. In March they submit their choice of the graduate program they wish to join and the faculty member they wish to have as a mentor.

The Biosciences web site contains typical study plans for students interested in specific graduate programs. The student's choice of program determines his or her curriculum for subsequent years.

Students in the Biosciences Program are not required to teach, but most of the graduate programs they enter will require that they take on teaching responsibilities.

During their Biosciences Program year, students are advised on course selection, research rotations, and registration by a faculty member closely related to the student's research and academic interests. As research rotations are assigned, the faculty advisor works in consultation with the student's rotation advisors until the end of the first year.

Students provide a short oral presentation following each research rotation to an audience of their primary advisor, research advisor(s), and other biosciences students. Rotation advisors provide rotation reports, and rotations are evaluated by the student's primary advisor. The student's primary advisor also confers with the student on course grades, subsequent rotations, and the student's selection of a department or program and lab for thesis research.

All biosciences students take 156:265 Biosciences Critical Thinking and Communication, which dovetails with research rotations and seminar series offered by the University's biosciences research departments and programs. The course involves weekly discussions of selected papers and oral and written presentations tied to the student's research rotations.

Each student's overall progress is monitored by his or her primary advisor, rotation advisor(s), and program director, who meet at the end of each semester to review the student's work. At the end of the second semester, the primary advisor, in cooperation with the rotation advisor(s), makes a recommendation to the Biosciences Program director as to whether or not the student should continue in the Ph.D. program. University guidelines, such as maintaining a cumulative g.p.a. of 3.00 or higher, are considered, along with performance in rotations.

The Biosciences Program's office coordinates students' transfer to their chosen graduate programs. Matriculation is conditional upon satisfactory progress and successful completion of the second semester.

Once students enter their chosen graduate program, it is that program's responsibility to advise them, evaluate their academic performance, and assign them a thesis mentor and laboratory.

Most participating departments and programs require that students take a comprehensive exam at the end of the second year and no later than the third year. Following successful completion of the exam, students advance to Ph.D. candidacy.

## **REQUIRED COURSES**

All Biosciences Program students must complete the following course work. Students earn at least 12 s.h. each semester.

### **Fall Semester**

156:265 Biosciences Critical Thinking and Communication	2 s.h.
156:302 Biosciences Research (10-week research rotations)	arr.
Electives	

### **Spring Semester**

156:265 Biosciences Critical Thinking and Communication	2 s.h.
156:302 Biosciences Research (10-week research rotations)	arr.
650:270 Principles of Scholarly Integrity	1 s.h.
Electives	

## Admission

The program accepts students with a variety of backgrounds in the biological and physical sciences. Entering students must hold a baccalaureate degree from an accredited college or university and should have completed courses in biology, chemistry, physics, and calculus consistent with requirements for a baccalaureate degree in the sciences. An undergraduate g.p.a. of at least 3.00 is required.

Applicants must submit their scores on the Graduate Record Examination; a combined verbal and quantitative score of 1200 and an analytical writing score of 4.5 or higher are preferred. Applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL).

Other indicators of academic accomplishments, such as research experience and letters of recommendation, are considered.

Information about graduate training and application materials are available from the Biosciences Program office.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Financial Support

Graduate students receive stipend and tuition support from The University of Iowa and other sources. Students promoted to the second year in the program receive support from their graduate departments and programs. The Biosciences Program also helps some students apply for competitive national awards for outstanding academic and research achievement.

## Facilities

The Carver College of Medicine provides state-of-the-art facilities for students, researchers, and instructors. The Medical Education and Research Facility, completed in 2002, provides 220,000 square feet of modern laboratories, lecture halls, clinical examination rooms, and study and meeting space for students. The Carver Biomedical Research building opened in 2005. The 135,000 square-foot building is devoted to research, with five floors of specialized laboratories and new technology. In addition to its new buildings, the college offers recently renovated laboratories and classrooms.

The health sciences campus provides parking, food service, and enjoyable outdoor common areas and pedestrian routes. Most of the University's health sciences colleges and clinical facilities are located there.

The basic science and clinical departments of the Carver College of Medicine are housed primarily in the Bowen Science Building, Carver Biomedical Research Building, Eckstein Medical Research Building, Medical Education and Research Facility, Medical Laboratories, and University of Iowa Hospitals and Clinics. Nearby are the Hardin Library for the Health Sciences and the Iowa City Veterans Affairs Medical Center.

The Departments of Anatomy and Cell Biology, Biochemistry, Microbiology, Molecular Physiology and Biophysics, and Pharmacology are housed in the Bowen Science Building. Laboratories of clinical departments are located primarily in the Medical Laboratories and the Medical Research Center.

The Eckstein Medical Research Building houses major core facilities for microscopy, image analysis, flow cytometry, protein structure, and monoclonal antibody production, as well as research laboratories for basic investigators with interdisciplinary approaches to cancer, molecular biology, genetics, and immunology. The geographic proximity of these facilities promotes interchange among clinical and basic science faculty members and students and maximizes use of the University's extensive core facilities for biomedical research.

Integral to the University's research environment are the Carver Family Center for Macular Degeneration, Center for Auditory Regeneration and Deafness, Center for Bioinformatics and Computational Biology, Center for Emerging Infectious Diseases, Center for Functional Genomics of Hypertension, Center for Gene Therapy, Center for Research in the Implementation of Innovative Strategies in Practice, Center on Aging, Craniofacial Center Collaboratory, Cystic Fibrosis Research Center, Clinical Research Unit, Holden Comprehensive Cancer Center, Huntington's Disease Center for Excellence, Iowa Cardiovascular Center, Iowa Comprehensive Lung Imaging Center, Helen C. Levitt Center for Viral Pathogenesis, George M. O'Brien Kidney Research Center, Specialized Center for Research in Osteoarthritis, and the Senator Paul D. Wellstone Muscular Dystrophy Cooperative Research Center.

In addition to the University's extensive facilities for research support, the Carver College of Medicine and the College of Liberal Arts and Sciences operate a variety of research support facilities. Tissue culture, autoclaving, purified water, darkrooms, counters, and a variety of general-use equipment and services are available on a shared basis.

## Biosciences Courses

- 156:201 Fundamentals of Gene Expression** 1 s.h.  
DNA and RNA structure, nuclear organization, DNA replication, RNA production and processing, small RNAs, RNAi, and genetic and epigenetic regulation; didactic and small group sessions, discussion of primary research publications.
- 156:202 Fundamentals of Protein Regulation** 1 s.h.  
Protein structure, purification, analysis, production, post-translation modification and cellular trafficking; didactic and small group sessions, discussion of primary research publications.
- 156:203 Fundamentals of Dynamic Cell Processes** 1 s.h.  
Overview of actin, microtubules, motors, intermediate filaments, cell-cell junctions, G-coupled signaling, wnt-jak/stat signaling, ion channels, cell cycle, stem cells.
- 156:204 Biostatistics for Biomedical Research** 1 s.h.  
Application of statistical techniques to biological data analysis; normal distribution, sampling distribution of the mean, variance, nonparametric methods, linear regression, power, and sample size. Same as 171:151.
- 156:205 Practical Bioinformatics** 1 s.h.  
Formal instruction on the use and application of bioinformatics for bench scientists; bioinformatics, resources, genome annotations, sequence analysis, comparative genomics, expression analysis, and systems biology. Requirements: biostatistics.
- 156:265 Biosciences Critical Thinking and Communication** 2 s.h.  
Selected papers and oral and written presentations tied to students' research rotations; introductory seminar. Repeatable. Same as 002:270, 072:342.
- 156:302 Biosciences Research** arr.  
Research experience in the lab of a biosciences program faculty member. Repeatable.

## Center for the Book

**Director:** Matthew P. Brown (English/Center for the Book)

**Professors:** Timothy Barrett, Ed Folsom (English/Center for the Book), Robert Glasgow (Art and Art History/Center for the Book), Judith Pascoe (English/Center for the Book), James Snitzer (Art and Art History/Center for the Book), Katherine Tachau (History/Center for the Book), Jonathan Wilcox (English/Center for the Book)

**Associate professor:** Matthew P. Brown (English/Center for the Book)

**Adjunct assistant professors:** Gary Frost, Cheryl Jacobsen, Penny McKean, Emily Martin, Sara Sauers

**Adjunct instructors:** Craig Kelchen (Division of Performing Arts), Julie Smith

**Lecturers:** Kathleen Kamerick (History/Center for the Book), Sara Langworthy, Julia Leonard (Center for the Book/Art and Art History)

**Graduate nondegree program:** Certificate in Book Studies/Book Arts and Technologies

**Web site:** <http://www.uiowa.edu/~ctrbook>

The University of Iowa Center for the Book represents a community of faculty, staff, students, and local book specialists with interests in all facets of book production, distribution, and use. Some members of the center actively research the history and circulation of the book, examining books' role in cultural and historical processes. They also look at how changes in book production affect the way books are viewed as artifacts. Specialists in book arts and technologies study the history and technique of book crafts, including letterpress and offset printing, typography, calligraphy, papermaking, and bookbinding. Others engage in the conservation or production of books, including artists' books and literary fine press publications.

The center offers classes; sponsors lectures, seminars, and workshops; and encourages the exchange of ideas among individuals with interests in the book. A wide range of perspectives on the book as an aesthetic, cultural, and historical artifact is provided by associated faculty, staff, and graduate students in the Schools of Art and Art History and Library and Information Science; the Departments of History, English, and Computer Science; University of Iowa Libraries; the Iowa Writers' Workshop; and other areas. This interdisciplinary membership and the center's facilities combine to provide an exceptional environment for studying the history of the book, its evolution, and its future.

The center collaborates with the Graduate College to offer a graduate-level certificate program. Undergraduate students can add dimension to their majors in English, art, journalism, history, and other disciplines by taking Center for the Book courses in book crafts and book studies. They also may include an emphasis on book arts or on cultural and historical aspects of the book in the interdepartmental studies major.

### Certificate

The Certificate in Book Studies/Book Arts and Technologies requires 24 s.h. of course work. It is offered by the Center for the Book through the Graduate College.

The program's principal objectives are to:

- place the interdisciplinary study of book history, arts, and technologies in academic and aesthetic contexts;
- provide a structured program in art, English, history, library and information science, and other departments for graduate students who are seriously interested in book studies; and
- give nondegree, graduate-level students who wish to study the book a framework for their study.

Students have two options in pursuing the certificate. Graduate students enrolled in a degree program at Iowa may work concurrently toward the certificate and an M.A., M.F.A., or Ph.D. Students who wish to pursue the certificate but not a graduate degree may do so with nondegree status in the Graduate College.

Of the required 24 s.h. of course work, at least 6 s.h. must be taken from the academic course list and 6 s.h. from the arts and technologies course list. Required course work also includes a final project—a substantial work supervised by a committee chosen by the student (see the center's publication Final Project Guidelines). For more information, contact the Center for the Book or visit its web site.

### Admission

Admission requires active standing in the Graduate College. Applicants submit a statement of purpose and evidence of scholarly or creative work to the center. For more information about admission, contact the Center for the Book.

### Financial Support

Students may secure support from University of Iowa sources (contact the Office of Student Financial Aid) or from outside funding agencies. Working assistantships are available at the center's professional production workshops. Internships and part-time work are available to qualified student and nonstudent professionals, especially in the areas of bookbinding, papermaking, and letterpress printing.

## Center for the Book Courses

### 108:029 First-Year Seminar

1 s.h.

Small discussion class taught by a faculty member; topics chosen by instructor; may include outside activities (e.g., films, lectures, performances, readings, visits to research facilities, fieldtrips). Requirements: first- or second-semester standing.

**108:100 Special Project for Undergraduates** arr.  
Independent study.

**108:110 Papermaking** 3 s.h.  
History, fundamental techniques of Western and Eastern hand papermaking; projects in traditional sheet forming, basic paper chemistry, paper coloring. Offered spring semesters. Same as 01X:110.

**108:112 Studies in Papermaking** arr.  
Topics in the history and technique of papermaking.

**108:130 Paperworks** 3 s.h.  
Conceptual and methodological approaches to 2-D and 3-D paper works; students create a body of works that couple the unique properties of paper-pulp medium with personal visual ideas and clarity of intent; contemporary issues in paper pulp and the medium's relationship to larger art and craft contexts. Same as 01X:130.

**108:132 Papermaking History and Technique** 3 s.h.  
Traditional Eastern and Western sheet forming techniques, history, aesthetics; emphasis on fiber selection and preparation. Offered fall semesters. Same as 01X:120.

**108:135 Religious Readers and Their Books** 3 s.h.  
Close study of content and form of religious books and their interplay with individual and communal reading habits; examination of the way written and printed matter circulate in religious contexts; analysis of the meaning of sacred texts in various settings. Same as 032:135.

**108:142 History of Western Letterforms** 3 s.h.  
History of Western letterforms, with focus on tools, materials, techniques; the major hands, their place in history, their influence on modern times; creation of letterforms using appropriate tools; hands-on approach with emphasis on understanding rather than mastery. Same as 01Z:142.

**108:143 Calligraphy: Foundational Hands** 3 s.h.  
Fundamental calligraphic skills using Roman majuscule, Humanistic minuscule, Italic; basic layout and color theory incorporated into letter practice. Same as 01Z:143.

**108:144 Calligraphy: Italic and Script Hands** 3 s.h.  
Hands-on instruction in italic and pressure pen scripts; historical relationships, effects on modern letterforms. Same as 01Z:144.

**108:145 Calligraphy: Blackletter Hands** 3 s.h.  
Development of proficiency in various hands, from vertical Textura to floridly gothic cursive; blackletter's historical connections with other disciplines.

**108:146 Studies in Letter Arts** 3 s.h.  
Special topics and advanced projects in calligraphy and letter arts. Prerequisites: 108:140 or 108:141 or 108:142 or 108:143. Same as 01Z:146.

**108:150 Bookbinding I: Materials and Techniques** 3 s.h.  
Hands-on introduction to materials and techniques commonly used in bookbinding. Same as 01Y:150.

**108:151 Bookbinding II** 3 s.h.  
Build on skills acquired in 108:150; projects to complete six bindings based on historical and contemporary models; sewing styles, board attachments, endband types; nonadhesive and case-bound structures, varied materials and binding styles, their effects on structure, aesthetic considerations, further development of solid binding skills; historical development of particular binding practices. Prerequisites: 108:150. Same as 01Y:151.

**108:152 Bookbinding III** 3 s.h.

Bookbinding structures based on historical and contemporary models; differences in various binding practices, how these differences affect function, why the styles developed; experience choosing appropriate structures for particular uses; emphasis on fine tuning skills and techniques required for advanced binding practices; sewn endbands, rounding and backing, sewing on varied supports, board attachments, and covering methods. Requirements: (for 108:152) 108:150 and 108:151; (for 01Y:152) 01Y:150 or 01Y:151 or 108:150 or 108:151. Same as 01Y:152.

**108:153 Studies in Bookbinding**

3 s.h.

Topics related to hand bookbinding. Same as 01Y:153.

**108:154 Artists' Books**

3 s.h.

Exploration of the book as a form for artistic expression; emphasis on conceptual development; relationship between content, form, and structure; how a book's structure and design can enhance and integrate part of the work's meaning. Prerequisites: 01Y:150 or 108:150. Same as 01Y:154.

**108:155 Historical Book Structures**

3 s.h.

Historical development of book structures examined through surviving examples, construction of historical models. Prerequisites: 01Y:150 or 108:150.

**108:156 Boxes and Enclosures**

3 s.h.

Hands-on techniques for a variety of book enclosures; appropriateness, aesthetic issues concerning box design; Japanese wraparound case, drop-spine box, hinged and lidded boxes, slipcase; technical skill development. Prerequisites: 108:150. Same as 01Y:156.

**108:157 Moveable/Sculptural Books**

3 s.h.

Varied formats for moveable and/or sculptural books; history; readings, hands-on model making. Same as 01Y:157.

**108:158 Pop-Up Book Structures**

3 s.h.

Hands-on exploration of varied aspects of paper engineering for bookmaking; historical and modern models studied and executed. Prerequisites: 108:150. Same as 01Y:158.

**108:160 Introduction to Letterpress Printing**

3 s.h.

Mechanics of letterpress printing, basic elements of typographic design as applied to letterpress edition printing; hand setting and printing from metal type on Vandercook proof presses; printing text and illustration from photopolymer plates; historical aspects of printing, early development of printing technologies, evolution of letterpress printing through 20th century. Same as 01P:160.

**108:161 Handprinted Book: Design and Production**

3 s.h.

Exploration of problems in hand-printing books--choice of manuscript, editing, design, typesetting, proofreading, printing and binding; histories of printing and of the book, emphasis on 20th- and 21st-century book design and literature. Same as 01P:161.

**108:162 Digital Book Design**

3 s.h.

Students plan, design, and produce a book using Adobe Creative Suite; page layout software, typography, page layout and design, book formatting, handling of image files, preparation of materials for print and other contemporary book media; history of book design, book design in contemporary publishing; visit to University of Iowa Libraries Special Collections. Prerequisites: 01D:125 or 108:160. Same as 01P:162.

**108:163 Digital to Letterpress Book Design**

3 s.h.

Digital typesetting and book design; chapbook production using photopolymer plates and Vandercook presses; text and content, book typography, practical and aesthetic considerations. Same as 01P:163.

**108:164 Digital Design for Artists' Books**

3 s.h.

Introduction to concepts, techniques, and technologies used to design and produce artists' books with personal computers and graphic design software. Same as 01P:164.

**108:165 Innovative Letterpress**

3 s.h.

Creation of the visual book using letterpress printing; narrative, serialization, type as graphic, physical structure of the book; traditional letterpress printing, monoprinting, nontraditional letterpress techniques using technology ranging from metal to digital. Same as 01P:165.

- 108:166 Studies in Printing** 3 s.h.  
Special topics and advanced projects in printing.
- 108:170 Studies in Book Technologies** arr.  
Topics such as book design, printing, paper arts, letterforms, typography.
- 108:181 Literature and the Book** 3 s.h.  
English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Early Literatures through 17th-Century, 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:130.
- 108:182 The Book in the Middle Ages** 3 s.h.  
Relation of text, decoration, function, creators, and audience in different genres of medieval manuscript books 400-1500 A.D. Prerequisites: 01H:005 or 16E:110. Same as 16E:120.
- 108:183 The Transition from Manuscript to Print** 3 s.h.  
Western manuscripts and books 1200-1600; changes in production and distribution methods and in how texts were used, in cultural context. Same as 021:258, 16E:118.
- 108:185 Introduction to Book Studies** 3 s.h.  
Theory and practice of book studies; meanings of word and image in the book format; comparative study of other media, applied study of the codex as physical artifact. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:134.
- 108:186 Topics in Book History** 3 s.h.  
Authorship, publishing, and so forth within specific historical and cultural contexts. English majors may apply this course to the following area and/or period requirement. AREA: Literary Theory and Interdisciplinary Studies. PERIOD: Early Literatures Through 17th Century, 18th- and/or 19th-Century Literature, or 20th- and/or 21st-Century Literature. Same as 008:190.
- 108:200 Special Project for Graduate Students** arr.  
Independent study.
- 108:201 Book Studies Workshop** 1 s.h.  
Discussion of issues central to book studies; workshop approach to current projects.
- 108:205 Final Project** arr.  
Project for graduate certificate.
- 108:210 Individual Instruction in Papermaking/Paperworks** arr.  
Traditional papermaking or creation of works of art using paper pulp as the medium; independent projects.
- 108:214 Individual Instruction in Calligraphy** arr.
- 108:215 Individual Instruction in Bookbinding/Structure** arr.  
Bookbinding and artists' book works; independent projects.
- 108:216 Individual Instruction in Printing** arr.
- 108:220 History of Readers and Reading** 3 s.h.  
Cultural nature of reading practices in historic and contemporary contexts of reading; reading communities; dimensions of gender, age, class, religion, race, ethnicity; examples of recent scholarship; use of primary resources; seminar. Prerequisites: 021:101. Same as 021:256.
- 108:224 Electronic Publishing** 3 s.h.  
Modes and methods for building electronic journals, books, thematic collections; new genres for publishing, including blogs, wikis, comics, short stories on the web; social, political, and economic forces that shape electronic publishing; XML-based project. Prerequisites: 021:120. Same as 021:224.

**108:230 Topics in Book Studies**

1-3 s.h.

Topics relevant to book studies and special collections. Prerequisites: 021:101. Requirements: admission to library and information science. Same as 021:249.

**108:299 Book Studies Proseminar**

1 s.h.

## Genetics

**Chair:** Daniel Eberl (Biology)

**Affiliated faculty:** Christopher Adams (Internal Medicine), Michael Anderson (Molecular Physiology and Biophysics), Alexander Bassuk (Pediatrics), Jackie Bickenbach (Anatomy and Cell Biology), Terry Braun (Electrical and Computer Engineering), Charles M Brenner (Biochemistry), Thomas Casavant (Electrical and Computer Engineering), Chi-Lien Cheng (Biology), Josep Comeron (Biology), Robert Cornell (Anatomy and Cell Biology), Beverly Davidson (Internal Medicine), Deborah Dawson (Preventive and Community Dentistry), Adam Dupuy (Anatomy and Cell Biology), Daniel Eberl (Biology), Craig D. Ellermeier (Microbiology), Jan Fassler (Biology), John Fingert (Ophthalmology and Visual Sciences), C. Andrew Frank (Anatomy and Cell Biology), Joseph Frankel (Biology), Pamela Geyer (Biochemistry), Pedro Gonzalez-Alegre (Neurology), Doug Houston (Biology), Erin Irish (Biology), Wayne Johnson (Molecular Physiology and Biophysics), Bradley Jones (Microbiology), John Kirby (Microbiology), Toshihiro Kitamoto (Anesthesiology), Al Klingelutz (Microbiology), Markus H. Kuehn (Ophthalmology and Visual Sciences), Anne Kwitek (Internal Medicine), Dana Levasseur (Internal Medicine), Andrew Lidral (Orthodontics), Fang Lin (Anatomy and Cell Biology), Jim J Lin (Biology), Ana Llopert (Biology), John Logsdon (Biology), Robert Malone (Biology), John Manak (Biology), Bryant McAllister (Biology), Anton McCaffery (Internal Medicine), Paul McCray (Pediatrics), John Menninger (Biology), W. Scott Moye-Rowley (Molecular Physiology and Biophysics), Jeff Murray (Pediatrics), Shivanand Patil (Pediatrics), Robert Philibert (Psychiatry), Bryan T. Phillips (Biology), Robert Piper (Molecular Physiology and Biophysics), Andrew Russo (Molecular Physiology and Biophysics), Todd Scheetz (Ophthalmology and Visual Sciences), Alberto Segre (Computer Science), Val Sheffield (Pediatrics), Curt Sigmund (Internal Medicine), Diane Slusarski (Biology), Richard Smith (Otolaryngology--Head and Neck Surgery), Sarit Smolikove (Biology), Edwin Stone (Ophthalmology and Visual Sciences), Kai Tan (Internal Medicine), Nelson Ting (Anthropology), Tina L Tootle (Anatomy and Cell Biology), Lori Wallrath (Biochemistry), Thomas Wassink (Psychiatry), David Weiss (Microbiology), Michael Welsh (Internal Medicine/Molecular Physiology and Biophysics), Mary Wilson (Internal Medicine), Chun-Fang Wu (Biology), Xing Yi (Internal Medicine)

**Graduate degree:** Ph.D. in Genetics

**Web site:** <http://genetics.grad.uiowa.edu>

## Graduate Program

The program offers a Doctor of Philosophy in genetics.

### Doctor of Philosophy

The Doctor of Philosophy in genetics requires a minimum of 72 s.h. of graduate credit. The Ph.D. program is designed to promote collaborative investigation and intellectual interaction among students and faculty participants affiliated with several different departments.

Students who enroll in the program are encouraged to obtain a broad background in genetics, including molecular, population, and human genetics. Within this context, course requirements are flexible enough to permit students to tailor their formal course work to their individual needs.

Students have the option to declare a Ph.D. emphasis in computational genetics.

All students enrolled in the program are required to take the following courses.

All of these:

127:150 Genetic Analysis of Biological Systems	3 s.h.
127:200 Special Topics in Genetics (seminar)	1 s.h.
156:201 Fundamentals of Gene Expression	1 s.h.
156:202 Fundamentals of Protein Regulation	1 s.h.
156:203 Fundamentals of Dynamic Cell Processes	1 s.h.

One of these:

002:131 Evolution	4 s.h.
002:168 Genes and Development	3 s.h.
127:191 Human Molecular Genetics	3 s.h.

All of these:

650:270 Principles of Scholarly Integrity	1 s.h.
Elective course work in molecular and microbial genetics, cell and development genetics, human genetics, or computational genetics	8 s.h.
Seminar courses approved by the program	5 s.h.

Even more important than formal course work is the opportunity to do significant research in genetics. Research interests of the participating faculty include virtually all areas of genetics, ranging from bacteriophage genetics to human medical genetics. In each area of genetics, there is a group of faculty members who have closely related interests.

The University is also strong in several related disciplines, including microbial physiology, enzymology, virology, protein biochemistry, computational genetics, and developmental and cell biology, all of which contribute significantly to the overall training program.

In addition to completing research and course work, students must pass a comprehensive examination, usually at the

end of their second year in the program.

### **Ph.D. and Medical Scientist Training Program**

Students may combine study toward an M.D. and a Ph.D. in genetics. See Medical Scientist Training Program (Carver College of Medicine) in the Catalog.

### **Ph.D. and Dental Scientist Training Program**

Students with a D.D.S. degree may be candidates for advanced training programs in dentistry. For information, contact the College of Dentistry.

### **Admission**

Prospective doctoral students in genetics should have a strong undergraduate background in science, including courses in general genetics, organic chemistry, biochemistry, introductory physics, and mathematics, as well as a strong commitment to genetic research and teaching. Students can make up deficiencies in a particular area during their first year of graduate study.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

Admission to the program is based on assessment of applicants' undergraduate academic records, performance on the Graduate Record Examination (GRE) General Test, and letters of recommendation. Admission requirements are not rigid. Most students working toward a Ph.D. in genetics at the University have an undergraduate g.p.a. above 3.50, and a combined verbal and quantitative score above 1250 on the GRE General Test. Students with lower grade-point averages or GRE scores may be admitted, depending on prior research experience and other indications of academic potential.

Students generally begin graduate work in the fall semester.

### **Financial Support**

All genetics graduate students receive a financial stipend of \$25,000 (academic year 20109-11) plus tuition.

Financial support comes from training grants, research assistantships, teaching assistantships, scholarships, individual research grants, or other departmental or college funds. All students are required to do some teaching as part of their development as future scientists and faculty members.

### **Associated Courses**

The following courses provide credit toward the Ph.D. in genetics. Not all courses are offered every year.

002:131 Evolution	4 s.h.
002:168 Genes and Development	3 s.h.
002:171 Molecular Genetics	4 s.h.
033:153 Hard Cases: Science Policy and Values (Implications of the Human Genome Project)	3 s.h.
051:123 Bioinformatics Techniques	3 s.h.
060:230 Molecular Basis Vertebrate Development	2 s.h.
061:268 Biology and Pathogenesis of Viruses	2 s.h.
070:110 Medical Genetics	2 s.h.
099:237 Topics in Biochemistry and Molecular Biology	1 s.h.
127:170 Bioinformatics	3 s.h.
127:173 Computational Genomics	3 s.h.
132:184 Developmental Neurobiology	3 s.h.
142:210 Advance Prokaryotic Molecular Biology	3 s.h.
142:215 Transcription and Multifunctional Regulation by RNA	1 s.h.
142:220 Protein Biogenesis, Transport, and Degradation in the Secretory/Endocytic System	1 s.h.
142:225 Growth Factor Receptor Signaling	1 s.h.
185:274 Theory of Statistical Genetics	3 s.h.
185:276 Statistical Genetics Laboratory	3 s.h.
650:270 Principles of Scholarly Integrity	1 s.h.

## Genetics Courses

**127:150 Genetic Analysis of Biological Systems**

3 s.h.

Genetic techniques and approaches for analysis of biological processes; comparison of strengths, weaknesses of a variety of experimental systems.

**127:170 Bioinformatics**

3 s.h.

Overview of bioinformatics and genomics; requires working knowledge of basic concepts in genetics and molecular biology. Requirements: (for 002:170) grade of B+ or higher in 002:128; (for 127:170) grade of B+ or higher in 002:128 and working knowledge of basic genetics and molecular biology concepts. Same as 002:170.

**127:173 Computational Genomics**

3 s.h.

Same as 002:174, 051:122, 055:122.

**127:176 Microarray Data Analysis**

3 s.h.

Basic statistical principles and techniques used in bioinformatics, including analyzing microarray gene expression data. Offered spring semesters. Prerequisites: 22S:030 or 22S:101 or 171:161. Same as 002:176, 171:185.

**127:191 Human Molecular Genetics**

3 s.h.

Molecular genetic approaches to human disease; the human genome project, linkage analysis, candidate gene screening, special features of inbred populations, triplet repeat expansions, mitochondrial genetics, genetics of complex traits. Requirements: fundamental genetics and molecular biology.

**127:200 Special Topics in Genetics**

1 s.h.

Current research in a selected field of genetics; different topic each year. Companion to a genetics seminar series. Same as 060:200.

**127:280 Directed Study in Genetics**

arr.

**127:301 Graduate Research in Genetics**

arr.

# Human Toxicology

**Director:** Larry W. Robertson (Occupational and Environmental Health)

**Associate director:** Peter Thorne (Occupational and Environmental Health/Civil and Environmental Engineering)

**Director of Graduate Studies:** Gabriele Ludewig (Occupational and Environmental Health)

**Affiliated faculty:** Garry Buetner (Free Radical and Radiation Biology/Radiation Oncology), A. Brent Carter (Internal Medicine), Frederick Domann (Free Radical and Radiation Biology/Radiation Oncology), Jonathan Doorn (Pharmacy), Michael Duffel (Pharmacy), R. William Field (Occupational and Environmental Health/Epidemiology), Laurence Fuortes (Occupational and Environmental Health), Frederic Gerr (Occupational and Environmental Health), Prabhat Goswami (Free Radical and Radiation Biology/Radiation Oncology), Vicki Grassian (Chemistry/ Chemical and Biochemical Engineering/Occupational and Environmental Health), Keri Hornbuckle (Civil and Environmental Engineering), Joel Kline (Immunology/Internal Medicine), Hans-Joachim Lehmler (Occupational and Environmental Health), Gabriele Ludewig (Occupational and Environmental Health), Paul McCray (Pediatrics/Genetics), David Murhammer (Chemical and Biochemical Engineering), Daryl Murry (Clinical and Administrative Pharmacy), Aliasger Salem (Pharmacy), Jerald Schnoor (Civil and Environmental Engineering), Douglas Spitz (Free Radical and Radiation Biology/Radiation Oncology), Jerrold Weiss (Immunology/Internal Medicine/Microbiology), Dale Wurster (Pharmacy)

**Graduate degrees:** M.S., Ph.D. in Human Toxicology

**Web site:** <http://toxicology.grad.uiowa.edu/>

Toxicology is the study of how biological, chemical, physical, and radiological agents affect living organisms and the ecosystem, and how to prevent or lessen the adverse effects of those agents. The Human Toxicology Program prepares toxicologists to identify and assess environmental exposures, identify mechanisms by which toxicants affect homeostasis or induce disease, identify interventions to prevent adverse effects, and estimate acceptable levels of exposure to protect public health.

The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, and the Colleges of Engineering, Liberal Arts and Sciences, Pharmacy, and Public Health.

The Human Toxicology Program is supported by an Iowa Superfund basic research program grant that supports six research projects and seven support cores, including a training core. Human toxicology faculty members are supported by the Environmental Health Sciences Research Center, a National Institute of Environmental Health Center of Excellence.

## Graduate Programs

The Human Toxicology Program offers a Master of Science and a Doctor of Philosophy in human toxicology.

### Master of Science

The Master of Science in human toxicology requires a minimum of 39 s.h. of graduate credit; a thesis is required. The program is designed for students who wish to pursue a master's degree as a second degree or through part-time study, particularly those who perform toxicologists' functions in their jobs and who need additional training.

Entering students should have backgrounds in the biological, engineering, and physical sciences and should have completed courses in introductory chemistry and biology, and organic chemistry.

After entering the program, students work with their assigned mentors to choose an advisory committee, which meets at least once a semester to help the student explore his or her research interests. The committee also provides consultation on course work and research activities and serves as the committee for the final examination (thesis defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

All M.S. students must successfully complete a first course in toxicology, 175:260 Environmental Toxicology (3 s.h.) or 046:214 Pharmaceutical and Chemical Toxicology (3 s.h.); and an advanced course, 175:265 Advanced Toxicology (4 s.h.).

All toxicology graduate students are required to register for 198:180 Toxicology Research Seminar each semester of their enrollment in the program.

Upon successful completion of all requirements, including the thesis and its oral defense, students are awarded a Master of Science.

### Doctor of Philosophy

The Doctor of Philosophy in human toxicology requires a minimum of 72 s.h. of graduate credit. The program is designed for students with backgrounds in the biological, engineering, and physical sciences. Entering students should have solid training in science, including courses in introductory chemistry and biology, and organic chemistry; knowledge of biochemistry and molecular biology is also useful. Students may remedy deficiencies by taking appropriate courses during their first year of graduate study.

Students begin the program with three 2-month rotations in the laboratories of participating faculty members, in order to identify a mentor. After the first year, the mentor assumes financial responsibility for the student. With advice from

their mentors, students choose an advisory committee, which meets at least once a semester to help the student explore his or her research interests. The committee also provides consultation on course work and research activities and serves as the committee for the comprehensive examination and the final examination (dissertation defense).

The Human Toxicology Program is flexible. Students work with their advisory committees to plan a course of study tailored to their individual interests and goals within the field of toxicology.

All Ph.D. students must successfully complete a first course in toxicology, 175:260 Environmental Toxicology (3 s.h.) or 046:214 Pharmaceutical and Chemical Toxicology (3 s.h.); and an advanced course, 175:265 Advanced Toxicology (4 s.h.).

All toxicology graduate students are required to register for 198:180 Toxicology Research Seminar each semester of their enrollment in the program and to successfully complete 650:270 Principles of Scholarly Integrity within the first two years of graduate study.

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, students advance to Ph.D. candidacy. They devote all of their time to dissertation research and writing. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded a Doctor of Philosophy.

## Admission

Prospective students may apply to the program via a centralized application system; see Admissions Information on the Human Toxicology Program web site.

Completed applications should be submitted by January 15; applications submitted after that date are reviewed as they are received and are considered for any remaining openings.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Financial Support

Doctoral students in human toxicology receive stipends and tuition support from University of Iowa sources, including the Presidential Graduate Fellowship and graduate research assistantships, and from non-University sources, such as training grants from the National Institutes of Health.

## Facilities

Training is conducted primarily in laboratories and teaching facilities of the departments and colleges of Human Toxicology Program faculty members. These are among the best-equipped laboratories on campus. Together with the University's central research facilities, they provide access to the most up-to-date research equipment and expertise.

## Associated Courses

For course descriptions and prerequisite information, see the course listings in the College of Pharmacy (prefix 046) and Department of Occupational and Environmental Health (prefix 175) sections of the Catalog.

046:214 Pharmaceutical and Chemical Toxicology	3 s.h.
175:260 Environmental Toxicology	3 s.h.
175:265 Advanced Toxicology	4 s.h.

## Human Toxicology Courses

**198:171 Special Problems in Toxicology** arr.  
Didactic material that may include tutorial, seminar, or faculty-directed research work; or a special topic.

**198:173 Toxicology Journal Club** arr.  
Current topics in toxicology literature.

**198:180 Toxicology Research Seminar** 0-1 s.h.

Contemporary research topics.

**198:201 Toxicology Research**

Research that constitutes part of the thesis.

arr.

**198:300 Thesis/Dissertation**

Thesis or dissertation research; seminar preparation.

arr.

# Immunology

**Director:** Gail Bishop (Microbiology)

**Affiliated faculty:** Michael Apicella (Microbiology), Vladimir Badovinac (Pathology), Zuhair Ballas (Internal Medicine), Gail Bishop (Microbiology), John Butler (Microbiology), John Colgan (Internal Medicine), Morris Dailey (Pathology), Elizabeth Field (Internal Medicine), George Giudice (Dermatology), Thomas Griffith (Urology), John Harty (Microbiology), Jonathan Heusel (Pathology), Jon Houtman (Microbiology), Siegfried Janz (Pathology), Joel Kline (Internal Medicine), Kevin Legge (Pathology), David Lubaroff (Urology), Craig Morita (Internal Medicine), William Nauseef (Internal Medicine), Stanley Perlman (Microbiology), Frederick Quelle (Pharmacology), Paul Rothman (Internal Medicine), Annette Schlueter (Pathology), Fayyaz Sutterwala (Internal Medicine), Steven Varga (Microbiology), Thomas Waldschmidt (Pathology), George Weiner (Internal Medicine), Jerrold Weiss (Internal Medicine), Mary Wilson (Internal Medicine), Hui-Hui Xue (Microbiology), Nicholas Zavazava (Internal Medicine)

**Graduate degree:** Ph.D. in Immunology

**Web site:** <http://immuno.grad.uiowa.edu>

The Immunology Program provides interdisciplinary training in the concepts and methodologies of basic and applied immunology. Faculty members are involved in a variety of research projects dealing with the immune system at all levels--structural, functional, cellular, biochemical, and molecular. Students take course work in immunology and related disciplines and are involved directly in laboratory research throughout their study.

## Graduate Program

The Immunology Program offers a Ph.D. in immunology.

### Doctor of Philosophy

The Doctor of Philosophy in immunology requires a minimum of 72 s.h. of graduate credit. The program is quite flexible, accommodating students with a wide range of backgrounds in course work as well as practical experience in the biological and physical sciences. Entering students generally are expected to have strong records in biology, chemistry, biochemistry, microbiology, genetics, and mathematics. An introductory course in immunology is desirable. Deficiencies in specific areas often can be remedied through appropriate course work taken during the first year of graduate studies.

The curriculum consists of a sequence of required and elective courses that provide training in the conceptual and methodological aspects of immunology. There is ample opportunity for study in a variety of fields that interface with immunology.

The Ph.D. in immunology requires the following course work.

148:201 Graduate Immunology	3 s.h.
148:211 Immunology Seminar (taken fall and spring of first year, spring of second year)	1 s.h.
148:221 Advanced Topics in Immunology	3 s.h.
156:204 Biostatistics for Biomedical Research	1 s.h.
650:270 Principles of Scholarly Integrity	1 s.h.
Elective courses (optional)	

Students also complete six of the following (1 s.h. modules).

156:201 Fundamentals of Gene Expression (recommended)	1 s.h.
156:202 Fundamentals of Protein Regulation (recommended)	1 s.h.
156:203 Fundamentals of Dynamic Cell Processes (recommended)	1 s.h.

Molecular biology:

142:215 Transcription and Multifunctional Regulation by RNA	1 s.h.
142:216 Chromatin Structure and Disease	1 s.h.
142:217 Cancer, Epigenetics, and Genetic Manipulations in Mice	1 s.h.

Cell biology:

142:220 Protein Biogenesis, Transport, and Degradation in the Secretory/Endocytic System	1 s.h.
142:221 Control of Subcellular Motility	1 s.h.
142:222 Organelle Biogenesis	1 s.h.
142:225 Growth Factor Receptor Signaling	1 s.h.
142:226 Cell Cycle Control	1 s.h.
142:227 Cell Fate Decisions	1 s.h.

After successfully completing the comprehensive examination, usually by the end of the second year of graduate study, students advance to candidacy for the Ph.D. They devote their time to research and writing their dissertation. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded a Ph.D. in immunology.

## Admission

For information regarding admission and application procedures, contact the Immunology Program or visit its web site.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Financial Support

All students in the Immunology Program receive stipends and tuition support, which comes from a variety of sources, including training grants from the National Institutes of Health, University of Iowa fellowships and graduate research assistantships, and individual faculty research grants.

## Facilities

Training is conducted in laboratories and teaching facilities of the Carver College of Medicine Departments of Dermatology, Internal Medicine, Pathology, Microbiology, Pediatrics, Pharmacology, and Urology. Faculty laboratories and central research core facilities provide students with access to state-of-the-art research equipment.

## Immunology Courses

**148:040 Summer Undergraduate IDGP Research** 0 s.h.

**148:201 Graduate Immunology** 3 s.h.

Ontogeny, activation, and function of T lymphocytes and B lymphocytes; innate immune effector mechanisms; major histocompatibility complex; antigen presentation; thymocyte positive and negative selection; signaling of T lymphocytes, B lymphocytes; emphasis on experimental methods for analysis of these processes. Requirements: (for 148:201) college biology, general chemistry, and introductory immunology courses; (for 061:201) courses in college biology, genetics, general chemistry, and introductory immunology. Recommendations: (for 148:201) courses in biochemistry and genetics; (for 061:201) biochemistry course. Same as 061:201.

**148:211 Immunology Seminar** 1 s.h.

Requirements: immunology graduate standing.

**148:217 Integrated Topics in Infectious Diseases** 1 s.h.

Clinical cases used to raise questions in host-parasite interactions; case/scientific exposés followed by related journal club discussions at next class session. Same as 061:217.

**148:221 Advanced Topics in Immunology** 3 s.h.

In-depth analysis of selected areas. Requirements: (for 148:221) 148:201 or 148:202; (for 061:207) 061:201 and 061:202, or 148:201 and 148:202. Same as 061:207.

**148:231 Research in Immunology** arr.

Laboratory research. Requirements: immunology graduate standing.

**148:247 Graduate Survey of Immunology** 4 s.h.

Major features of evolutionary, ontogenic, and comparative development of innate and adaptive immune systems; their functions at cellular and molecular levels. Offered fall semesters. Same as 061:247.

**148:251 Principles of Medical Immunology** 2 s.h.

Basic molecules, cells; organs of immune system; mechanics and regulations of immune response; clinical principles of normal and abnormal immunity. Requirements: M.D. enrollment.

**148:301 Directed Study in Immunology** arr.

## Informatics

**Director:** John C. Keller (Graduate College)

**Affiliated faculty:** Michael Apicella (Microbiology), Marc Armstrong (Geography), Jose Assouline (Biomedical Engineering), David Bennett (Geography), Warren Boe (Management Sciences), Terry Braun (Biomedical Engineering/Ophthalmology and Visual Sciences), Jane Brokel (Nursing), John Brooks (Epidemiology), Pat Brophy (Pediatrics), Thomas Casavant (Electrical and Computer Engineering/Genetics/Biomedical Engineering), Josep Comerón (Biology), Thomas Cook (Occupational and Environmental Health), Mary Cowles (Statistics and Actuarial Science), James Cremer (Computer Science), Faiz Currim (Management Sciences), Donna D'Alessandro (Pediatrics), Michael D'Alessandro (Radiology), Peter Damiano (Dentistry), Beverly Davidson (Genetics/Molecular and Cellular Biology), Deborah Dawson (Preventive and Community Dentistry), Franklin Dexter (Anesthesiology), John Donelson (Biochemistry), David Eichmann (Computer Science/Library and Information Science), John Engelhardt (Anatomy and Cell Biology), Jan Fassler (Biology/Genetics), Michael Finkelstein (Oral Pathology, Radiology, and Medicine), Charles Foster (Geoscience), Richard Funderburg (Urban and Regional Planning), Laurence Fuortes (Occupational and Environmental Health), Paul Hanley (Urban and Regional Planning), Juan Pablo Hourcade (Computer Science), Haowei Hsieh (Library and Information Science), David Katz (Internal Medicine), Joseph Kearney (Computer Science), Al Klingelutz (Microbiology), Naresh Kumar (Geography), Andrew Kusiak (Mechanical and Industrial Engineering), Yi Li (Mathematics), Jim Lin (Biology/Genetics), Marc Linderman (Geography), John Logsdon (Biology/Genetics), Der-Fa Lu (Nursing), Michael Mackey (Radiology), George Malanson (Geography), Bryant McAllister (Biology), Paul McCray (Pediatrics/Genetics), Peter Nagy (Pathology), Andrew Norris (Pediatrics), Thomas Peters (Occupational and Environmental Health), Joseph Reinhardt (Biomedical Engineering), Jennifer Robinson (Epidemiology), John Robinson (Electrical and Computer Engineering), Gerard Rushton (Geography), Yutaka Sato (Radiology), Todd Scheetz (Ophthalmology and Visual Sciences/Biomedical Engineering), Jerald L. Schnoor (Civil and Environmental Engineering/Occupational and Environmental Health), Alberto Segre (Computer Science/Public Health Genetics), Val Sheffield (Pediatrics/Genetics), Curt Sigmund (Internal Medicine), Lisa Skemp (Nursing), Richard Smith (Otolaryngology--Head and Neck Surgery/Genetics), Bernard Sroffman (Pharmacy), Padmini Srinivasan (Computer Science/Library and Information Science/Management Sciences/Nursing), Kathleen Stewart (Geography), John Stokes (Internal Medicine), Edwin Stone (Ophthalmology and Visual Sciences/Genetics), Nick Street (Management Sciences/Computer Science), Kai Tan (Biomedical Engineering), Daniel Tranel (Neurology), Kai Wang (Biostatistics), Marcia Ward (Health Management and Policy), George Weiner (Internal Medicine), Michael Welsh (Internal Medicine), Ann Williamson (University of Iowa Hospitals and Clinics), Yi Xing (Biomedical Engineering), Ying Zhang (Biostatistics), You-Kuan Zhang (Geoscience), Dale Zimmerman (Statistics)

**Graduate degrees:** M.S., Ph.D. in Informatics

**Graduate nondegree program:** Certificate in Informatics

**Web site:** <http://informatics.grad.uiowa.edu>

The field of informatics springs from the intersection of computational disciplines related to the humanities, the arts, and the biological, health, natural, and social sciences. As the rapid development of information technology transforms the world of human pursuits, informatics offers ways to solve new problems and to examine existing problems from new perspectives.

The Informatics Program provides graduate students the opportunity to study informatics in the broadest sense. The program is interdisciplinary, involving the Graduate College, the Carver College of Medicine, and the Colleges of Engineering, Liberal Arts and Sciences, Nursing, and Public Health.

## Graduate Programs

The Informatics Program offers a Master of Science and a Doctor of Philosophy in informatics, both with a health informatics subtrack and an information science subtrack. It also offers the Certificate in Informatics with four subtracks: bioinformatics and computational biology, geoinformatics, health informatics, and information science.

### Master of Science

The Master of Science in informatics requires a minimum of 32 s.h. of graduate credit. It is offered with subtracks in health informatics and in information science. Students working toward a Doctor of Philosophy in informatics may be granted a Master of Science upon completion of the M.S. requirements.

The required 32 s.h. includes 9 s.h. in foundations of informatics and at least 9 s.h. in disciplinary applications of informatics.

Students select an advisor from their subtrack's affiliated faculty members. In consultation with their advisors, students prepare a study plan, which is reviewed at least once a year. A final master's degree examination, either oral or written, may be required.

For more information about the Master of Science requirements, visit the Informatics Program web site.

### Doctor of Philosophy

The Doctor of Philosophy in informatics requires a minimum of 72 s.h. of graduate credit. It is offered with subtracks in health informatics and in information science.

The required 72 s.h. includes 9 s.h. in foundations of informatics and at least 9 s.h. in disciplinary applications of informatics.

Students select an advisor from their subtrack's affiliated faculty members. In consultation with their advisors, students prepare a study plan, which is reviewed by their mentors and curricular advisory committees at least once a year. Ph.D. students must pass a comprehensive examination at or near completion of their course work requirements. The exam may be written, oral, or both, depending on the structure of the student's subtrack or the decision of the student's committee.

Students who do not already hold an M.S. from The University of Iowa may request that one be granted to them at the doctoral comprehensive exam. A final master's examination, not related to the Ph.D. comprehensive exam, may be required.

Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded a Doctor of Philosophy.

For more information about the Doctor of Philosophy requirements, visit the Informatics Program web site.

## Certificate

The Certificate in Informatics requires a minimum of 18-21 s.h. of graduate credit, depending on choice of subtrack (the subtracks in bioinformatics and computational biology, health informatics, and information science require a minimum of 18 s.h.; the geoinformatics subtrack requires minimum of 21 s.h.). The program is designed for students who wish to complement their graduate degree programs with knowledge of informatics.

All subtracks require 9 s.h. in the foundations of informatics. In addition, the subtracks in bioinformatics and computational biology, health informatics, and information science require at least 9 s.h. in disciplinary applications of informatics; and the geoinformatics subtrack requires at least 12 s.h. in disciplinary applications of informatics. Work toward the certificate may not be substituted completely for courses or examinations required by the student's graduate degree program.

For more information about certificate requirements, visit the Informatics Program web site.

## Admission

Applicants to the M.S., Ph.D., or certificate program should apply to the degree subtrack of their choice. The subtrack programs make independent admission decisions. Certificate program applicants must be in good academic standing in their graduate degree programs.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog. They also must meet the admission requirements of the informatics subtrack they want to enter; see Informatics Admission Requirements on the program's web site.

## Informatics Courses

- 200:110 Health Informatics I** 3 s.h.  
Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as 021:275, 050:283, 051:187, 056:186, 074:191, 096:283, 174:226.
- 200:120 Health Informatics II** 3 s.h.  
Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as 021:280, 051:189, 056:287, 074:192, 096:289.
- 200:199 Research for Master's Thesis** arr.  
Requirements: admission to M.S. program.
- 200:201 Leadership and Management in Complex Health Care Systems** 3 s.h.  
Introduction to complex systems theory in the biological, physical, and social sciences; applications in decision-making processes, change management, organizational effectiveness, and implementation of technology; interdisciplinary approach.
- 200:220 Social Informatics** 3 s.h.  
Study of information and communication tools (ICTs) in cultural or institutional contexts; how ICTs are conceptualized, disseminated, and used in everyday and specialized environments such as libraries, education settings, corporations, local communities, cultural groups, political campaigns, and Web 2.0. Prerequisites: 021:101. Same as 021:210.
- 200:296 Topics in Informatics** arr.  
Current topics in informatics.
- 200:297 Readings in Informatics** arr.  
Topics not covered in other courses; individual study.
- 200:298 Independent Study** arr.

**200:299 Research for Dissertation**

Requirements: Ph.D. candidacy.

arr.

## International Writing Program

**Director:** Christopher Merrill  
**Instructors:** Natasa Durovicova, Hugh Ferrer  
**Web site:** <http://iwp.uiowa.edu/>

The International Writing Program is a unique residency program for established writers from outside the United States. IWP participants range from emerging talents to writers who are among their countries' leading literary figures and writers of world stature.

Each fall the International Writing Program assembles a community of poets, fiction writers, essayists, playwrights, and journalists. For most of them, the IWP is their first, or their first extended, stay in the United States. At the University they live and interact with each other while working on writing and translation projects. Throughout their residency, they participate in 181:191 International Literature Today and in 181:205 International Translation Workshop. They also interact with the public through readings, panel discussions, and other presentations.

Since 1967, more than 1,000 writers from 115 countries have participated in the program.

International Writing Program participants are supported by the U.S. Department of State, through bilateral agreements with many countries, by grants from cultural institutions and governments abroad, and by private funds. The program does not provide grants for writers.

For more information, contact the International Writing Program or visit the program's web site.

## International Writing Program Courses

- 181:001 Readings for Writers** 1 s.h.  
 Introduction to the Iowa City writing community; attendance at readings by professional, faculty, and student writers; students keep journals about readings.
- 181:101 Independent Studies** arr.  
 Directed readings in contemporary world literature.
- 181:110 Comparative Arts** 3 s.h.  
 Cultural and aesthetic issues arising from side-by-side investigation of several art forms, including literature, cinema, painting, music, opera, architecture; periods, schools, styles, and their theories. Same as 033:110, 048:110.
- 181:152 America in Other Words** 1-3 s.h.  
 Current idea of America in its imaginary form: post-1989 world fiction, poetry, and film in original language, in translation, and via online translation resources. Same as 048:152.
- 181:191 International Literature Today** 1-3 s.h.  
 English majors may apply this course to the following area and/or period requirement. AREA: Transnational Literature and Culture. PERIOD: 20th- and/or 21st-Century Literature. Same as 008:191.
- 181:205 International Translation Workshop** 1-3 s.h.  
 International writers pair with University of Iowa translators to write new works of poetry and fiction in English; second-language fluency not required for international writers. Same as 048:205.
- 181:247 Crossing Borders Seminar** 2-3 s.h.  
 Repeatable. Same as 008:231, 013:262, 016:247, 01H:247, 030:242, 035:273, 044:286, 048:247, 113:247, 129:231, 160:247.
- 181:260 Translation Workshop** 3 s.h.  
 Requirements: at least one foreign language. Same as 048:260, 08W:260.

# Library and Information Science

**Director:** James Elmborg  
**Professor emerita:** Velva Jeanne Osborn  
**Adjunct professor:** Nancy L. Baker  
**Associate professors:** David Eichmann, James Elmborg  
**Associate professor emeritus:** Carl Orgren  
**Assistant professors:** André Brock, Haowei Hsieh, Patricia Katopol, Jennifer Burek Pierce, Joan Bessman Taylor  
**Graduate degree:** M.A. in Library and Information Science  
**Web site:** <http://slis.grad.uiowa.edu/>

Today's age is defined by the intersection of information, technology, and human creativity. In this context, library and information science is dedicated to understanding the nature of information, the interaction between information and communication technologies, the relationship between information and knowledge, the cognitive and affective aspects of knowledge acquisition, and the interface between people and information. It offers new knowledge, technological benefits, and professional expertise for every dimension of human affairs.

Library and information professionals take on many challenges in serving the needs of their constituencies--children and teachers, members of academic communities, employees of profit and nonprofit organizations, and the public at large--constituencies that range from information poor to information rich. They work in the contexts of issues such as information and communication technology, public and private information policy, managerial policy, and regional, national, and international economics.

The School of Library and Information Science prepares professionals to meet these diverse challenges. It offers a graduate-level program of preparation for careers in all types of libraries and information centers, providing students with a strong, well-rounded education in an environment that supports individuals from all segments of a multicultural, multiethnic, and multilingual society. Its curriculum reflects the profession's immediate and long-range needs and prepares students to be leaders in a changing field.

By promoting excellence in research, the school contributes to the base of theoretical and practical knowledge in library and information science and helps develop an understanding of how to meet the varied and changing information needs of individuals and society. It also provides public service through continuing education programs, selective consulting services for library and information centers, and participation in professional organizations.

The school strongly encourages its students, faculty members, and alumni to shape the future of the profession by filling key roles in organizations involved in all aspects of the information cycle.

## Graduate Programs

The school offers a Master of Arts in library and information science. It offers the joint J.D./M.A. with the College of Law, the joint M.B.A./M.A. with the Tippie College of Business, and the joint M.A./Certificate in Book Studies/Book Arts and Technologies with the Center for the Book. Library and information science students also may earn the Certificate in Informatics.

The Master of Arts in library and information science has held continuous accreditation from the American Library Association since 1971.

Library science graduates have many options for employment. Alumni hold positions in public, school, special, and academic libraries as well as other information settings. They serve in varied roles, such as information consultant, database manager, library administrator, webmaster, network coordinator, cataloger, children's librarian, school library media specialist, and archivist.

### Master of Arts

The Master of Arts in library and information science requires 36 s.h. of graduate credit. A thesis option is available for students who seek additional research experience.

Students pursuing the master's degree gain an understanding of the foundations of the library and information profession, including the history of the field, ethical and philosophical concerns, the information cycle, principles and procedures for dealing with a variety of information carriers, and the theory and practice of strategic management. They examine future trends, with emphasis on cutting-edge technological concerns. They study the discipline's research base, gaining heightened awareness of the synergism between library and information science and other disciplines, as well as the close relationship between research and practice. Finally, students become knowledgeable about the factors that underlie users' information needs and appropriate strategies to satisfy those needs.

Students typically complete the program in a year and one-half to two years. The maximum allowable load for graduate students is 15 s.h. during regular semesters and 8 s.h. during summer sessions, but most full-time students carry fewer semester hours than the maximum. It also is possible to complete the program on a part-time basis.

Work for the degree includes 9 s.h. in three required, introductory-level courses; 12 s.h. in secondary-level courses; 15 s.h. in electives; and the successful completion of a poster presentation. Students must maintain a g.p.a. of at least 3.00.

Students may apply a maximum of 9 s.h. of graduate transfer credit in library and information science or related areas toward the degree, subject to the approval of the transfer credit committee. Approval is given course-by-course and is determined by the course's content, currency, and applicability to the student's program.

The curriculum has three tiers. The first tier consists of three required courses that provide a solid grounding for all successive course work: 021:101 Cultural Foundations, 021:120 Computing Foundations, and 021:122 Conceptual Foundations. The second tier includes 10 courses; students must take at least four of them and may include 021:260 Organizational Management or 021:262 School Library Media Administration, but not both. Courses in the third tier are electives. This three-tier arrangement allows each student to concentrate in an area that most closely matches his or her professional goals.

#### **TIER I**

All of these:

021:101 Cultural Foundations	3 s.h.
021:120 Computing Foundations	3 s.h.
021:122 Conceptual Foundations	3 s.h.

#### **TIER II**

Both of these:

021:242 Search and Discovery	3 s.h.
021:260 Organizational Management	3 s.h.

Two of these:

021:124 Database Systems	3 s.h.
021:202 Research Methods	3 s.h.
021:205 Literacy and Learning	3 s.h.
021:210 Social Informatics	3 s.h.
021:226 Digital Environments	3 s.h.
021:236 Use and Users	3 s.h.
021:262 School Library Media Administration	3 s.h.
021:278 Information Policy	3 s.h.
021:260 Organizational Management	3 s.h.
or	
021:262 School Library Media Administration	3 s.h.

#### **TIER III**

Students choose electives from the following courses.

021:123 User Education: Multimedia	3 s.h.
021:141 Reference and Information Services	3 s.h.
021:143 Resources for Children	3 s.h.
021:144 Resources for Young Adults	3 s.h.
021:145 Resources for Adults	3 s.h.
021:222 Beginning Cataloging and Classification	3 s.h.
021:223 Advanced Cataloging and Classification	3 s.h.
021:224 Electronic Publishing	3 s.h.
021:228 Hypertext Systems	3 s.h.
021:234 Information and Knowledge Management	3 s.h.
021:239 Topics: Conceptual Structures/Systems	1-3 s.h.
021:240 Collection Management	3 s.h.
021:244 Government Information Resources	3 s.h.
021:248 Information Literacy	3 s.h.

021:249 Topics in Book Studies	1-3 s.h.
021:252 Human Computer Interaction	3 s.h.
021:254 Analysis of Scholarly Domains	3 s.h.
021:256 History of Readers and Reading	3 s.h.
021:258 The Transition from Manuscript to Print	3 s.h.
021:259 Topics: Resources/Services	1-3 s.h.
021:261 Strategic Management	3 s.h.
021:263 Nonprofit Organizational Effectiveness I	3 s.h.
021:265 Nonprofit Organizational Effectiveness II	3 s.h.
021:270 Public Libraries	3 s.h.
021:271 College and University Libraries	3 s.h.
021:272 Special Libraries	3 s.h.
021:275 Health Informatics I	3 s.h.
021:279 Topics: Policy/Planning	1-3 s.h.
021:280 Health Informatics II	3 s.h.
021:282 Practicum in Libraries and Information Centers	2-3 s.h.
021:284 School Library Media Practicum	3 s.h.
021:289 Seminar in Library and Information Science	3 s.h.
021:290 Capstone	1 s.h.
021:292 Independent Study	1-3 s.h.
021:299 Thesis	0-3 s.h.

## **Specializations**

Students earn 15 s.h. in elective courses selected with the guidance of their advisors. Students' programs often are designed around particular career goals. Following are examples of possible specializations.

### **PUBLIC LIBRARIES**

Public libraries provide informational, educational, and recreational materials and a wide range of services for a diverse clientele. Although public libraries receive the bulk of their funding from local taxes, they also may be organized on a regional or statewide cooperative basis. The variety of uses, services, materials, and organizational structures of public libraries makes this a challenging area of librarianship. Public librarians need to develop skills in analyzing the communities they serve, designing comprehensive marketing plans to meet their needs, implementing the plans in a cost-effective way, and evaluating the success of their efforts.

### **ACADEMIC LIBRARIES**

The academic library, whether in a community college, a four-year college, or a university, provides information services in support of the parent institution's teaching, research, and public service missions. These services include instruction in the use of the library and its resources. Management skills and subject or language competence often are required. Since librarians in this setting usually are considered academic faculty members, a second master's or other advanced degree is desirable.

### **SPECIAL LIBRARIES AND INFORMATION CENTERS**

Special libraries serve corporations, private companies, government agencies, technical and academic institutions, museums, medical facilities, and information management consulting firms. They are organized to anticipate and quickly respond to the specific information needs of their users. Special librarians are information resource experts who collect, analyze, evaluate, package, and disseminate information to facilitate accurate decision making. Knowledge of information technology and the ability to design services suitable to the parent organization are professional necessities. In addition, substantial subject expertise may be required.

### **SCHOOL LIBRARY MEDIA CENTERS**

The school library media center makes available to students and teachers a wide range of library and instructional materials in a variety of formats. The work of the library media specialist includes providing instruction to students in accessing, evaluating, and using information; collaborating with teachers on the use of resources in instruction; providing leadership in the use of instructional and information technologies; offering reading guidance; providing reference service; and managing the library media center. The University of Iowa offers a state-approved program leading to endorsement as school media specialist K-12. In order to fulfill state requirements for this endorsement, students must hold or be eligible for a teaching license and must complete a designated sequence of courses that

leads both to certification and to the M.A. degree.

## **INFORMATION SCIENCE**

The multidisciplinary field of information science is influenced by the rapid growth in digital information collections and technologies. This specialization offers expertise in retrieval, dissemination, and use of information. In addition to libraries and information centers, many for-profit organizations are finding that information is a valuable commodity in today's competitive world and are employing information management personnel. The curriculum offers opportunities to study information science aspects, such as digital libraries, electronic publishing, and automated systems design.

### **Joint Master's Degrees**

The School of Library and Information Science offers a joint Master of Arts/Master of Business Administration with the Tippie College of Business and a joint Juris Doctor/Master of Arts with the College of Law. The primary goal of the joint programs is integration of the two areas of study.

Students in the joint programs may apply a limited amount of credit toward both degrees. Up to 9 s.h. in business or law may be applied toward the M.A. in library and information science; up to 9 s.h. in library and information science may be applied toward the M.B.A., and 12 s.h. may be applied to the J.D.

Separate application to each degree program is required. Applicants must be admitted to both programs before they can be admitted to the joint degree program. For more information, see College of Law or Master of Business Administration Program in the Catalog.

In addition to the joint M.A./M.B.A. and J.D./M.A., joint programs may be arranged between departments on an ad hoc basis. A minimum of 60 s.h. of graduate work is required for a joint master's degree program.

### **Joint M.A./Book Studies Certificate**

Students interested in special collections, book arts, or museum librarianship may pursue an M.A. in library and information science in conjunction with a graduate Certificate in Book Studies/Book Arts and Technologies. The joint program also may be appropriate for students interested in book studies scholarship and those seeking careers in publishing, graphic arts, or book-related industries that require a similar blend of subject and technical knowledge.

The joint program requires a total of 51 s.h. At least 27 s.h. must be earned in the M.A. program, at least 15 s.h. must be earned in the certificate program, and the remaining 9 s.h. may be earned in either program.

To enroll in the joint program, students must be admitted both to the School of Library and Information Science and to the Center for the Book, and must fulfill the basic requirements of each program.

### **Informatics Certificate**

Students interested in careers involving health science libraries or hospital information centers may earn a Certificate in Informatics with the optional health informatics subtrack. The certificate is offered by the Graduate College together with several other University colleges and departments. Its health informatics subtrack emphasizes the organization, management, and use of health care information; health care research, education, and practice; and information technology developments in the socioeconomic context of health care.

The certificate requires at least 18 s.h. of course work, including 021:275 Health Informatics I, 021:280 Health Informatics II, and approved electives. Students may earn the Certificate in Informatics with the health informatics subtrack in conjunction with their M.A. in library and information science. To learn more, visit the Health Informatics web site.

### **Honor Society**

The Beta Beta Theta Chapter of Beta Phi Mu, the international honor society for library and information science, is located at The University of Iowa. Each year new members are chosen from the top 25 percent of the preceding year's graduating classes. To be eligible for membership, graduates must achieve a g.p.a. of at least 3.75, demonstrate professional promise, and be recommended by the faculty.

### **Student Organizations and Activities**

All students in the program are automatically members of LISSO, the Library and Information Science Student Organization, which also serves as the student chapter of the American Library Association. In addition, there are student chapters of the American Society for Information Science and Technology and Special Libraries Association. These student-run organizations sponsor various activities such as speaker series, a journal club, workshops, brown bag lunches, and picnics. The associations provide students with significant opportunities for professional and

extracurricular growth. Students also are encouraged to join other state and national professional organizations.

## **Admission**

Applicants for admission to the M.A. program are required to have a g.p.a. of at least 3.00 on a 4.00 scale and are required to have a verbal and quantitative score of at least 1000 and an analytical writing score of at least 4 on the Graduate Record Examination. The admissions committee also considers each applicant's letters of recommendation, statement of purpose, and other appropriate criteria. Each entering class is selected on a competitive basis.

Applicants whose first language is not English must score at least 600 (paper-based), 250 (computer-based), or 100 (Internet-based) on the Test of English as a Foreign Language (TOEFL). In place of TOEFL, the school accepts International English Testing System (IELTS) scores of 7.0 or higher, with no subscore below 6.0. Applicants who submit IELTS scores are required to take an on-campus English proficiency evaluation.

Applicants begin the admission process by contacting the School of Library and Information Science. The process requires a completed application form, transcripts of all academic work, a written statement of purpose and goals, and three letters of recommendation.

Completed applications should be received by the school by February 1 for consideration for fall admission. Decisions of the admissions committee are announced four to six weeks after the deadline. Late applications are considered if places are still available. Financial aid often is not available for late applicants. Admitted students are assigned a faculty advisor for program planning during their first semester.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## **Financial Support**

The School of Library and Information Science awards partial-tuition scholarships and one-quarter-time graduate assistantships. To be considered for scholarships, applicants should have an undergraduate g.p.a. of at least 3.00 and a combined score (verbal, quantitative, and analytical) of 1700 on the old Graduate Record Examination (GRE) General Test, or 1100 (verbal and quantitative) and 4.5 (analytical writing) on the new GRE. Prospective students are urged to apply for scholarships before February 1. Graduate assistantships are advertised as they become available; students should apply for specific assistantships.

For information on student loans, work-study eligibility, or other financial assistance, contact the Office of Student Financial Aid. For information on national scholarships, contact the School of Library and Information Science or visit its web site. Part-time employment usually is available in the University Libraries and other campus units.

## **Job Placement**

The school provides active placement assistance to its graduates through printed and electronic announcements, seminars on Internet job searching, résumé writing and interviewing, and personal counseling. The University's Educational Placement Office issues a regular listing of job openings and provides a credential file service.

## **Facilities, Resources**

The School of Library and Information Science is housed in the south wing of the University's Main Library, in a setting that promotes community among students, faculty, and staff. Facilities are provided for the varied instructional and research activities of the school.

### **Technology Laboratory**

The school houses a state-of-the-art technology laboratory with current Windows and Macintosh computers. The computers are networked to the campus backbone and provide access to a rich variety of relevant software. The laboratory is used primarily by students for course assignments and to gain experience with specialized software. In addition, the classrooms are equipped with networked machines that benefit students through use of the latest teaching technologies. Wireless service is provided in the building by the University of Iowa Libraries.

### **University of Iowa Libraries**

All of the resources of the University of Iowa Libraries are available to the school's students and faculty. The system contains more than 4 million volumes in the Main Library and 11 departmental libraries.

The web-based catalog provides access to books and periodicals, electronic indexes, and full-text databases held by University Libraries. In addition, the InfoHawk Catalog to online resources provides access to selected Internet and CD-ROM resources arranged by subject and academic discipline. Wireless Internet access is available in many areas of the Main Library.

The third floor of the Main Library houses the map collection and Special Collections & University Archives, including the Iowa Women's Archives.

### Other Libraries

Students have access to a variety of libraries through field trips, practicum experience, and personal use: the State Historical Society of Iowa library in Iowa City; the Iowa City, Coralville, and Cedar Rapids public and school libraries; the Augustana, Coe, Cornell, Mount Mercy, and Grinnell College libraries; and the Herbert Hoover Presidential Library and Museum in West Branch.

### Other Resources

Lindquist Center houses the instructional services and campus services departments of the University's Information Technology Services. It provides instructional and research computing facilities and services for the University community. All University students, staff, and faculty may use the center's computers for University-related research, thesis preparation, and class work. Instructional Technology Centers provide campuswide access to the University's academic computing resources and the Internet.

## Library and Information Science Courses

### 021:090 Information Handling 3 s.h.

Gathering, evaluating, and employing information from library and nonlibrary sources, including multimedia and electronic systems. Requirements: undergraduate standing.

### 021:101 Cultural Foundations 1-3 s.h.

The role of libraries and information agencies in society; major issues, including information policy, professional ethics, literacy, diversity, technology, pedagogy. Requirements: admission to library and information science.

### 021:120 Computing Foundations 3 s.h.

Introduction to analysis, specification, and design of automated systems; review of the software life cycle; testing, deployment, and evaluation of large, computer-based software. Requirements: admission to library and information science.

### 021:122 Conceptual Foundations 3 s.h.

Theory, principles, and standards in organization of information; function of catalogs, indexes, bibliographic networks; introduction to metadata descriptions, name and title access, subject analysis, controlled vocabularies, classification systems. Requirements: admission to library and information science.

### 021:123 User Education: Multimedia 3 s.h.

Learning theory as it relates to design of multimedia products for user education; presentation of information using multimedia technology in a Macintosh environment; development of user education products in linear and nonlinear forms.

### 021:124 Database Systems 3 s.h.

Design and development of a database-driven information system, including interfaces, database schema, and essential database operations; focus on widely used relational database model. Prerequisites: 021:120.

### 021:139 Topics: Conceptual Structures and Systems 1-3 s.h.

Service-learning course for graduate students and undergraduate students at the junior and senior level; hands-on library work under supervision of professional librarian with a final project presentation.

### 021:141 Reference and Information Services 3 s.h.

Resources and services; essential reference services and experience using a variety of print and electronic resources to answer specific reference questions. Prerequisites: 021:101.

### 021:143 Resources for Children 3 s.h.

Evaluation and use of books, magazines, electronic media, and other sources of information and recreation in relation to youth development. Prerequisites: 021:101.

### 021:144 Resources for Young Adults 3 s.h.

Topics related to populations served by youth services departments (e.g., societal issues, informational needs); seminar. Prerequisites: 021:101.

**021:145 Resources for Adults** 3 s.h.

Role of libraries in meeting adults' informational and recreational needs; popular culture materials, Reader's Advisory services, lifelong learning. Prerequisites: 021:101.

**021:150 Preservation and Conservation** 3 s.h.

Overview of responsible stewardship of library and archival collections; principles and practice of book conservation with focus on prototypes for conservation rebinding; appropriate care of books, papers, photographs (traditional and digital), film, and other non-print items; fundamental instruction in methods of page repair, investigation of eight historical prototypes, construction of related conservation binding models; lecture, discussion, student presentation, and hands-on activities. Prerequisite: 021:101.

**021:202 Research Methods** 3 s.h.

Concepts and methods for research in library and information science; emphasis on design of qualitative and quantitative research; data collection techniques appropriate to information professions; examination and evaluation of research in the professional literature.

**021:205 Literacy and Learning** 3 s.h.

Learning and literacy theory relevant to work in information services; how librarians can help people process information and use it to form understanding and create new knowledge. Prerequisites: 021:101.

**021:210 Social Informatics** 3 s.h.

Study of information and communication tools (ICTs) in cultural or institutional contexts; how ICTs are conceptualized, disseminated, and used in everyday and specialized environments such as libraries, education settings, corporations, local communities, cultural groups, political campaigns, and Web 2.0. Prerequisites: 021:101. Same as 200:220.

**021:222 Beginning Cataloging and Classification** 3 s.h.

Systems for describing materials and information in catalogs and organizing them for effective retrieval in libraries, museums, and other information centers; AACR2 descriptive principles, Dewey and Library of Congress classifications, Sears and LC subject headings, cataloging networks and services. Prerequisites: 021:122.

**021:223 Advanced Cataloging and Classification** 3 s.h.

Special problems in description of materials; authority work; file structures; serials, other nonmonographic materials; Library of Congress, other classifications; subject retrieval; reclassification, other administrative issues; international bibliographic criteria; online cataloging experience. Prerequisites: 021:222.

**021:224 Electronic Publishing** 3 s.h.

Modes and methods for building electronic journals, books, thematic collections; new genres for publishing, including blogs, wikis, comics, short stories on the web; social, political, and economic forces that shape electronic publishing; XML-based project. Prerequisites: 021:120. Same as 108:224.

**021:226 Digital Environments** 3 s.h.

Methods and models for building digital libraries; organization with metadata; standards such as those for object identifiers, open access, building cross-linkages between collections; automatic harvesting of content. Prerequisites: 021:120.

**021:228 Hypertext Systems** 3 s.h.

Theory, design, and implementation of hypertext-based information systems; access mechanisms, including navigation, browsing, search; issues in representation of information, user interfaces; case studies of representative systems, including the World Wide Web. Prerequisites: 021:120.

**021:232 Race, Gender, and Technology** 3 s.h.

Brief, critical look at the ways race and gender shape the uses and design of information and communication technologies (ICTs); ICTs as a part of our social infrastructure; how the integration of ICTs into Western culture has affected, transformed, or been transformed by interactions with racial groups, men, and women; interrogate assumptions behind technology's promises of efficiency and progress--what are the norms and values embodied within the artifacts we use every day? Same as 160:232.

- 021:234 Information and Knowledge Management** 3 s.h.  
How organizations acquire, manage, and use information; knowledge management and competitive intelligence, information from inside and outside the organization; organization types, including library, corporate, and nonprofit. Corequisites: 06K:230. Same as 06K:234.
- 021:236 Use and Users** 3 s.h.  
Information needs and uses; theories and models of information seeking and use, formal and informal information channels, barriers to information. Prerequisites: 021:101.
- 021:239 Topics: Conceptual Structures/Systems** 1-3 s.h.  
Special topics relevant to conceptual structures (e.g., knowledge, representation, manipulation schemes) and systems (e.g., intelligent OPACS, user interface technologies). Repeatable. Prerequisites: 021:122.
- 021:240 Collection Management** 3 s.h.  
Collection management of print and electronic resources; selection and management principles, policies, procedures in various settings; production and distribution of resources; intellectual freedom. Prerequisites: 021:101 and 021:122.
- 021:242 Search and Discovery** 3 s.h.  
Search system architecture; information needs and queries; search models; concepts in relevance and repositories, archives, web-based systems; information quality measures.
- 021:244 Government Information Resources** 3 s.h.  
Emphasis on federal documents as an information resource; state, local, foreign, international materials; special concerns of organizing and administering document collections. Prerequisites: 021:141.
- 021:248 Information Literacy** 3 s.h.  
Design of information literacy curriculum and teaching strategies relevant to libraries; theory and research in learning and cognitive development; practice teaching strategies in library settings. Prerequisites: 021:101.
- 021:249 Topics in Book Studies** 1-3 s.h.  
Topics relevant to book studies and special collections. Prerequisites: 021:101. Requirements: admission to library and information science. Same as 108:230.
- 021:252 Human Computer Interaction** 3 s.h.  
Design user interfaces for interacting with information, emphasis on system design and evaluation (as opposed to system implementation); construct interface prototypes, conduct evaluations of design. Prerequisites: 021:120.
- 021:254 Analysis of Scholarly Domains** 3 s.h.  
Information transfer in academic disciplines; scientific method, other means of knowledge construction, resulting literatures; reference tools used to control literature for a variety of audiences; emphasis on humanities, social sciences, or sciences. Requirements: (for 021:254) 021:141. Same as 160:230.
- 021:256 History of Readers and Reading** 3 s.h.  
Cultural nature of reading practices in historic and contemporary contexts of reading; reading communities; dimensions of gender, age, class, religion, race, ethnicity; examples of recent scholarship; use of primary resources; seminar. Prerequisites: 021:101. Same as 108:220.
- 021:258 The Transition from Manuscript to Print** 3 s.h.  
Western manuscripts and books 1200-1600; changes in production and distribution methods and in how texts were used, in cultural context. Same as 108:183, 16E:118.
- 021:259 Topics: Resources/Services** 1-3 s.h.  
Current topics in types of information resources and services.
- 021:260 Organizational Management** 3 s.h.  
Survey of management issues common to all information environments--understanding organizations, decision making, hiring and personnel, grant writing, and marketing. Prerequisites: 021:101.
- 021:261 Strategic Management** 3 s.h.

Management and administration of all types of libraries; basics of leadership and teamwork, management issues, and skills in context of the organization.

**021:262 School Library Media Administration** 3 s.h.

Design of library media programs for the major functions of teaching and learning, information access, and program administration; focus on curricular and teaching responsibilities of school librarians and media specialists, development of philosophy, examination of roles and responsibilities, and program evaluation. Prerequisites: 021:101.

**021:263 Nonprofit Organizational Effectiveness I** 3 s.h.

Operational and financing aspects of nonprofit management; mission and governance of organization; strategic planning for effective management, including finance, budget, income generation, fund-raising. Same as 024:247, 028:257, 032:227, 042:247, 06J:247, 091:320, 102:278, 174:247.

**021:265 Nonprofit Organizational Effectiveness II** 3 s.h.

Qualities for leadership of nonprofit organizations, including relationships with staff and volunteers; relationship of nonprofit and outside world; marketing, public relations, advocacy strategies for nonprofits. Requirements: (for 091:322) 091:320; (for 174:248) 06J:247 or 024:247 or 174:247. Same as 024:248, 028:258, 032:228, 042:248, 06J:248, 091:322, 102:279, 174:248.

**021:270 Public Libraries** 3 s.h.

Historical development of public libraries; current issues in public library management and policy making, including intellectual freedom; readers advisory service and genres of popular materials for adults. Prerequisites: 021:101.

**021:271 College and University Libraries** 3 s.h.

Objectives, organization, unique functions and services of academic libraries; educational environment in which academic libraries function; examination of issues and problems affecting academic libraries. Prerequisites: 021:101.

**021:272 Special Libraries** 3 s.h.

Management, organizational structures, collections, client services in special libraries; site visits to a variety of special libraries, information centers; projects that apply theoretical principles.

**021:275 Health Informatics I** 3 s.h.

Technological tools that support health care administration, management, and decision making. Requirements: graduate standing. Same as 050:283, 051:187, 056:186, 074:191, 096:283, 174:226, 200:110.

**021:278 Information Policy** 3 s.h.

Development of policy based on ethical and legal issues in library and information professions; intellectual freedom, intellectual property, privacy, equity.

**021:279 Topics: Policy/Planning** 1-3 s.h.

Current topics in national and international policies, their impact on planning. Repeatable.

**021:280 Health Informatics II** 3 s.h.

Selected health informatics initiatives, including computer-based patient records, physiologic monitoring, networking, imaging, virtual reality; participation in an interdisciplinary project team focused on an informatics innovation; application and research seminars. Same as 051:189, 056:287, 074:192, 096:289, 200:120.

**021:282 Practicum in Libraries and Information Centers** 2-3 s.h.

Supervised field experience in selected libraries and information centers; emphasis on application of theory to practice; at least 80 hours of fieldwork.

**021:284 School Library Media Practicum** 3 s.h.

Supervised field experience in library media centers at elementary and secondary school levels; emphasis on application of theory to practice; at least 80 hours of fieldwork. Prerequisites: 021:262.

**021:289 Seminar in Library and Information Science** 3 s.h.

Contemporary issues in library and information science; student presentations, guest speakers.

**021:290 Capstone** 1 s.h.

Opportunity for students to synthesize their learning in the program, to reflect on their professional education as they prepare for graduation, and to form goals. Requirements: 27 s.h. earned in library and information science.

**021:292 Independent Study**

1-3 s.h.

Formal contract between student and faculty member. Requirements: formal proposal.

**021:299 Thesis**

0-6 s.h.

Prerequisites: 021:101, 021:120, 021:122, 021:202, and 021:260.

# Molecular and Cellular Biology

**Director:** Jackie Bickenbach (Anatomy and Cell Biology)

**Affiliated faculty:** Christopher Adams (Internal Medicine), Lee-Ann Allen (Internal Medicine), Michael Apicella (Microbiology), Nikolai Artemyev (Molecular Physiology and Biophysics), Alexander Bassuk (Pediatrics), Jackie Bickenbach (Anatomy and Cell Biology), Gail Bishop (Microbiology), Daniel Bonthius (Pediatrics), Charles Brenner (Biochemistry), Amit Choudhury (Anatomy and Cell Biology), Michael Cohen (Pathology), John Colgan (Internal Medicine), Beverly Davidson (Internal Medicine), Kris DeMali (Biochemistry), Frederick Domann (Radiation Oncology), Adam Dupuy (Anatomy and Cell Biology), John Engelhardt (Anatomy and Cell Biology), Sarah England (Molecular Physiology and Biophysics), Rory Fisher (Pharmacology), Ernesto Fuentes (Biochemistry), Minnetta Gardinier (Pharmacology), Pamela Geyer (Biochemistry), Paloma Giangrande (Internal Medicine), Pedro Gonzalez-Alegre (Neurology), Prabhat Goswami (Radiation Oncology), Steven Green (Biology), Hasem Habelhah (Pathology), Raymond Hohl (Internal Medicine), Jon Houtman (Microbiology), Aloysius Klingelutz (Microbiology), J. Stacey Klutts (Pathology), C. Michael Knudson (Pathology), Amnon Kohen (Chemistry), John Koland (Pharmacology), Tomomi Kuwana (Pathology), Gloria Lee (Internal Medicine), Steven Lentz (Internal Medicine), Kimberly Leslie (Obstetrics and Gynecology), Dana Levasseur (Internal Medicine), Andrew Lidral (Orthodontics), Fang Lin (Anatomy and Cell Biology), Jim Jung-Ching Lin (Biology), John Logsdon (Biology), Wendy Maury (Microbiology), Stephen McGowan (Internal Medicine), Jeffery Meier (Internal Medicine), Jessica Moreland (Pediatrics), Craig Morita (Internal Medicine), David Motto (Internal Medicine), Scott Moye-Rowley (Molecular Physiology and Biophysics), Jeffrey Murray (Pediatrics), William Nauseef (Internal Medicine), David Price (Biochemistry), Dawn Quelle (Pharmacology), Kamal Rahmouni (Internal Medicine), Richard Roller (Microbiology), Peter Rubenstein (Biochemistry), Andrew Russo (Molecular Physiology and Biophysics), Thomas Rutkowski (Anatomy and Cell Biology), David Sheff (Pharmacology), Curt Sigmund (Internal Medicine), Mark Stamnes (Molecular Physiology and Biophysics), Jack Stapleton (Internal Medicine), C. Martin Stoltzfus (Microbiology), Stefen Strack (Pharmacology), Fayyaz Sutterwala (Internal Medicine), Christie Thomas (Internal Medicine), Tina Tootle (Anatomy and Cell Biology), Lubomir Turek (Pathology), Lori Wallrath (Biochemistry), Todd Washington (Biochemistry), Daniel Weeks (Biochemistry), Michael Welsh (Internal Medicine), Mary Wilson (Internal Medicine), Marc Wold (Biochemistry), Charles Yeaman (Anatomy and Cell Biology), Joseph Zabner (Internal Medicine)

**Graduate degree:** Ph.D. in Molecular and Cellular Biology

**Web site:** <http://molcellbio.grad.uiowa.edu>

The Molecular and Cellular Biology Program provides interdisciplinary training in the concepts and methodologies fundamental to the investigation of biological mechanisms at the molecular level. Faculty members are involved in a variety of research projects related to gene expression and regulation.

## Graduate Program

The Molecular and Cellular Biology Program offers a Doctor of Philosophy in molecular and cellular biology.

### Doctor of Philosophy

The Doctor of Philosophy in molecular and cellular biology requires a minimum of 72 s.h. of graduate credit. The program is sufficiently flexible to accommodate students with a wide range of backgrounds in the biological and physical sciences. Entering students are expected to have a solid background in science, including introductory biology and chemistry, organic chemistry, physical chemistry, calculus, genetics, and biochemistry. Students can remedy deficiencies in particular areas by taking appropriate courses during the first year of graduate study.

The curriculum consists of a sequence of required, core, and elective courses that provide didactic training in molecular and cellular biology and that ensure comprehensive exposure to concepts and experimental methodologies in the field. Students engage in laboratory research immediately upon enrollment and progress rapidly to original thesis projects that lead to a Ph.D.

Because of the diversity of biological research problems that can be pursued by employing molecular and cellular approaches, the program provides options for specialization in particular areas of interest.

The Ph.D. in molecular and cellular biology requires the following course work.

All of these, if recommended by advisor; if not, students substitute elective courses;

156:201 Fundamentals of Gene Expression	1 s.h.
156:202 Fundamentals of Protein Regulation	1 s.h.
156:203 Fundamentals of Dynamic Cell Processes	1 s.h.

All of these:

156:204 Biostatistics for Biomedical Research	1 s.h.
Approved cross-training course(s)	3-4 s.h.
142:290 Seminars in Molecular and Cellular Biology (taken each semester)	1 s.h.
650:270 Principles of Scholarly Integrity	1 s.h.
Approved electives	6 s.h.

One or three of these (total of 3 s.h.):

142:210 Advance Prokaryotic Molecular Biology	3 s.h.
Or all of these:	
142:215 Transcription and Multifunctional Regulation by RNA	1 s.h.
142:216 Chromatin Structure and Disease	1 s.h.
142:217 Cancer, Epigenetics, and Genetic Manipulations in Mice	1 s.h.

Three of these (3 s.h.):

142:220 Protein Biogenesis, Transport, and Degradation in the Secretory/Endocytic System	1 s.h.
142:221 Control of Subcellular Motility	1 s.h.
142:222 Organelle Biogenesis	1 s.h.
142:225 Growth Factor Receptor Signaling	1 s.h.
142:226 Cell Cycle Control	1 s.h.
142:227 Cell Fate Decisions	1 s.h.
142:230 Cell Migration from Development to Metastasis	1 s.h.

One of these:

142:280 Topics in Molecular and Cellular Biology (precomprehensive students; taken each semester)	1 s.h.
Journal club of student's choice (postcomprehensive students; taken each semester)	

After successfully completing the comprehensive examination, usually at the end of the second year of graduate study, students advance to candidacy for the Ph.D. degree. They devote their time to completing thesis research and writing their Ph.D. dissertation. Upon successful completion of all requirements, including the dissertation and its oral defense, students are awarded a Ph.D. in molecular and cellular biology.

## Admission

For application materials and information about graduate training in molecular and cellular biology, contact the Molecular and Cellular Biology Program or visit its web site.

Applicants must meet the admission requirements of the Graduate College; see the Manual of Rules and Regulations of the Graduate College or the Graduate College section of the Catalog.

## Financial Support

Graduate students in the Molecular and Cellular Biology Program receive stipends and tuition support from institutional and extramural sources, including University of Iowa fellowships and graduate research assistantships, and training grants from the National Institutes of Health.

## Facilities

Training is conducted primarily in laboratories and teaching facilities of the Carver College of Medicine Departments of Anatomy and Cell Biology, Biochemistry, Internal Medicine, Microbiology, Molecular Physiology and Biophysics, Neurology, Obstetrics and Gynecology, Pathology, Pediatrics, Pharmacology, and Radiation Oncology; the College of Dentistry Department of Orthodontics; and in the College of Liberal Arts and Sciences Departments of Biology and Chemistry. Faculty laboratories and central research facilities available to students provide access to the most up-to-date research equipment.

## Molecular and Cellular Biology Courses

<b>142:210 Advance Prokaryotic Molecular Biology</b>	3 s.h.
Mechanism and regulation of DNA, RNA, and protein synthesis in bacteria. Requirements: (for 142:210) 156:201, or 002:128 and 099:130; (for 061:210) 002:128 and 099:130. Same as 061:210.	
<b>142:215 Transcription and Multifunctional Regulation by RNA</b>	1 s.h.
Principles and techniques for investigating mechanisms of controlling eukaryotic gene expression; basic genome organization, chromatin structure, transcription, RNA processing, translation; cloning methods, use of electronic sequence databases, footprinting, chromatin immunoprecipitation, in vivo and in vitro transcription assays, DNA microarray analysis, information retrieval. Prerequisites: 156:201.	
<b>142:216 Chromatin Structure and Disease</b>	1 s.h.
Transcriptional control by chromatin, emphasis on human disease; based on research publications. Prerequisites: 156:201.	
<b>142:217 Cancer, Epigenetics, and Genetic Manipulations in Mice</b>	1 s.h.
Epigenetic mechanisms of transcriptional control, mouse models for understanding the molecular basis for human disease; based on research publications. Prerequisites: 156:201.	

- 142:220 Protein Biogenesis, Transport, and Degradation in the Secretory/Endocytic System** 1 s.h.  
Models for translocation across the ER membrane, quality control/protein folding in the ER lumen, ER associated degradation; mechanisms of vesicle biogenesis, cargo selection, vesicle fusion, regulation of Golgi and trans-Golgi Network biogenesis; protein internalization from the cell surface. Prerequisites: 099:130. Same as 060:216, 072:220.
- 142:221 Control of Subcellular Motility** 1 s.h.  
Actin filaments and microtubules in terms of their assembly dynamics and regulation; how motor proteins are controlled and adapted for movement of specific proteins and vesicles within cells; signaling through GTPases; cell motility; biogenesis, regulation of cilia and flagella. Prerequisites: 099:130. Same as 060:221, 072:221.
