

Urban Releaf

Exploring ways to enhance diversity and inclusivity in citizen science

Joint workshop of CitiObs, Urban Releaf and GREENGAGE

Carina Veeckman (VUB), Mel Woods (UD)
Inian Moorthy, Vanessa Boas, Gerid Hager (IIASA)

ECSA conference 2024, Vienna, Austria

Innovating together for just and green urban transitions

Increasing environmental stresses in urban areas.

Accentuated inequalities in access to greenspace, ecosystem services
and health-related benefits.

Important data gaps to support policy for just and sustainable cities.

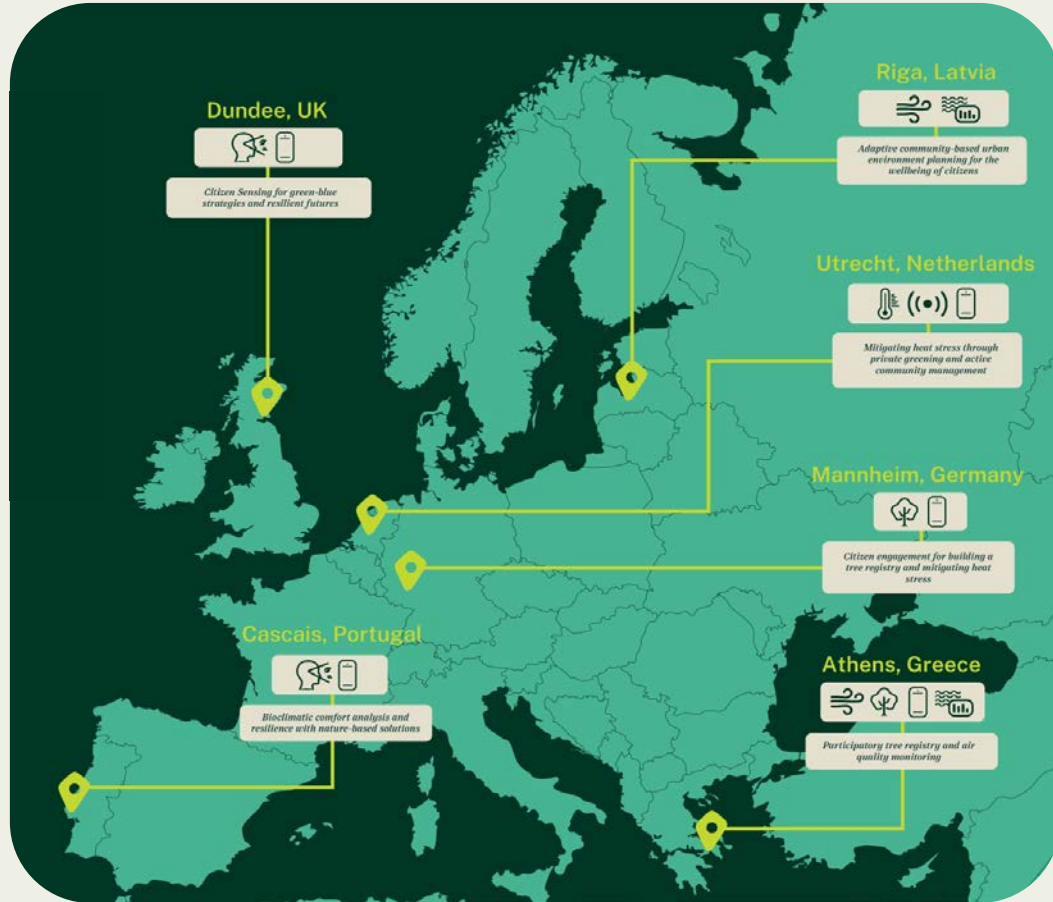

Public participation developing slowly and variably.

MISSION

Urban ReLeaf promotes **collaboration** between local communities and public authorities to address urgent climate issues related to urban greenspace planning, heat stress, and air pollution.

Together with **six European cities**, we nurture citizen-powered environmental monitoring projects that bring the benefits of nature to everyone.

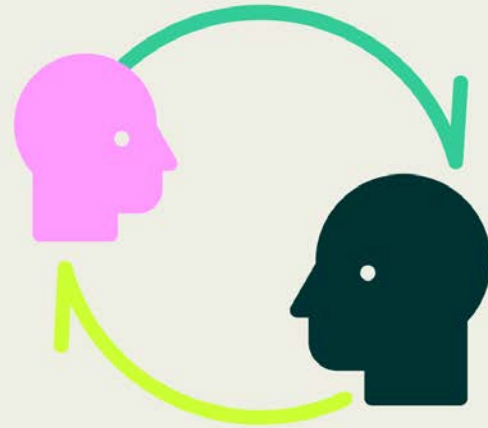

Our mission focuses on **community placemaking, public sector innovation**, and tailored strategies to reach our common goal of creating **greener, more just and resilient cities for all**.
