The authors regret that there was an error on page 12, Fig. 4, Panel B of our manuscript. Panel B should have had the outlier study, Hreha et al. (2018), excluded. The data point for this study has been excluded, but this exclusion was not reflected in the study labels. Instead, the label for the study by Nys et al. (2008) was mistakenly omitted and the data points were improperly aligned with their labels.

We would like to provide Fig. 4. Panel B with the corrected labels below.

The authors would like to apologise for any inconvenience caused. The error has no bearing on the results or conclusions of the study.
