

**THE 3RD INTERNATIONAL ENERGY, EXERGY AND ENVIRONMENT SYMPOSIUM**

# **Proceedings**

**Editors**

**A. F. MIGUEL, A. H. REIS AND R. N. ROSA**

© Proceedings of the 3rd International Energy, Exergy and Environment Symposium  
IEEES3, 1-5 July 2007, Évora, Portugal

Edited by: A. F. Miguel, A. H. Reis & R. N. Rosa

ISBN: 978-989-95091-1-5

This book represents information obtained from authentic and highly regarded source. Reprinted material is quoted with permission. # Table of Contents

## ***Preface***

## ***Acknowledgements***

## **Keynote Papers**

New exergy parameters and concepts - Ibrahim Dincer  
Optimal use of energy systems and processes - Michel Feidt  
PEM fuel cells: progress and perspectives - Xianguo Li  
Nuclear energy and hydrogen: when worlds collide - Romney Duffey  
Vascularized materials and designed porous media - Sylvie Lorente  
Science and evolving flow architecture: from entropy generation minimization to constructal theory- Adrian Bejan  
Recent Developments in exergy analysis and exergoeconomics - George Tsatsaronis  
Thermal modeling of fluidized bed systems - Feridun Hamdullahpur

## **Exergy Analysis**

An Extended Thermodynamic Approach of Suspensions in Fluids - Lebon  
Second Law Analysis of Duplex Stirling Refrigerator - M. Ozturk  
Exergy analysis of an experimental power plant - M. Ahmadzadeh  
Energy and Exergy Analysis of an Automobile Heat Pump - M. Direk  
Exergy Analysis of Energypark - A. Beyene  
Energy and exergy analysis of lignite power plants in Turkey - O. Atalay  
Energy and exergy analysis of the Edremit Geothermal district heating system in Turkey - C. Coskun  
Exergy Cost of the Extraction of Mineral Resources - R. Rosa  
Exergetic Optimization of Shell and Tube Heat Exchangers Using a Genetic Based Algorithm - Y. Özçelik  
Modelling and Exergy Analysis of Steam Turbine Cycles - A. Ouadha  
Energy and Exergy Analysis of Paper Drying Process in Convective Type Dryer - H. Tabrizi  
Comparison of buildings' energy consumption by means of exergy method - L. Tronchin  
Modeling and Technical Feasibility Analysis of a Low-Emission Residential Energy System - V. Ugursal  
Theoretical Investigation of heat balance in Diesel engines - Z. Sahin  
Exergetic Analyses of the west point Power Plant - S. Norberg  
Exergy Analysis of a Refrigeration System Utilizing the Peltier Thermoelectric Effect - C. Koroneos  
Thermodynamic study of the ejector-absorption refrigeration cycle - M. Yari  
An Analysis of Yatagan Power Plant by the CUECost Code - A. Kone  
Exergy Analysis of Brayton Combined Cycles - C. Koroneos  
Effect of Rate of Expansion on the Exergy Destruction of Nucleating Steam in a Laval Nozzle - A. Moosavi  
Exergetic and Exergoeconomic Analysis of an Aircraft Jet Engine (AJE) - H. Aras  
Exergy Analysis of a 1.2 kWp PEM Fuel Cell System - A. Yilanci  
Exergy analysis of a diffusion absorption refrigeration system - B.Radhouane  
Exergy method to evaluation building wrapper performance - L. Tronchin  
Comparisons of some current refrigerants by exergy analysis in a vapor compression refrigeration cycle - A. Kilicarslan  
Exergy Analysis of BIGGT and EFGT Cycles - P. Pinto  
Enzymatic hydrolysis of kitchen refuse and ethanol fermentation by *Saccharomyces cerevisiae* KCTC7107 - H. Moon

Functional exergy efficiency definition for heat exchangers used for indoor climate control - P. Sakulpipatsin

Exergy analysis and optimisation of a ground or water source heat pump system for maximum environmental exergy potential utilisation - P. Canhoto

Environmental and Exergetic Assessment of Wastewater Treatment Plant - M. Belhani

Theoretical study on the exergetic performance of absorption refrigeration cycle - M. Yari

## **Energy Analysis**

Assessment of Power Augmentation from Gas Turbine Power Plants Using Different Inlet Air Cooling Systems - J. Jaber

The study of crack reasons in GEF9 gas turbine exhaust in KHOY ccpp - K. Setodemaram

Energy Cost Optimization through The Implementation of Co-generation and grid interconnection - E. Ragaban

The Basic Study on New Energy System Plan At The University Campus of China - X. Wei

Dynamic methodology for energy scenarios - P. Silva

Variability of clearness and diffuse index over Évora, Portugal - S. Pereira

Distributed generation - E. Ragaban

Green Science Training within the Web Space - L. Horta

Thermo-economic Analysis of Energy Utilization in the Industrial Sector: An Application - Z. Utlu

How does the uptake of lead along acid mine drainage processes affect the chemical exergy of jarosite in Exergetic Life Cycle Assessment (ELCA)? - M. Figueiredo

Energy efficiency of drying of prickly pear cladodes in a forced convection tunnel - R. Callejas

Energy and environmental benefits of rapeseed oil replacing diesel - J. Malca

Multi-Objective Exergetic, Economic & Environmental Optimization of CGAM Problem Using Genetic Algorithm - H. Sayyaadi

Barriers to industrial energy efficiency investments: evidence from Greece - E. Sardianou

Statistically Adjusted End-use Model for Residential Electricity Consumption - M. Aydinalp-Koksal

Cost-benefit analysis of optimum thickness of selected insulation materials for commercial building wall - T. Mahlia

The Cost Effectiveness and Thermodynamic Analysis on the Application of Solar Collectors and Heat Pumps to Control the Visible Plume from Wet Cooling Towers of Commercial Buildings in Hong Kong - S. Tyagi

Economic Investigations of Utilizing Free Cooling in Air Conditioning Systems - A. Al-Salaymeh

Survey on Energy Consumption of General Hospitals in Kitakyushu, Japan - J. Xuan

Sensitivity Analysis of Optimal CHP Adoption in Residential Buildings - H. Ren

Modeling and Testing of an Intermittent Adsorption Heat Pump - M. Mobedi

Heat transportation from the Bugey power plant - L. Luo

Evaluation of Steam Injection Effect on Performance Augmentation of a Hybrid SOFC and Gas Turbine System Using Exergy Analysis - S. Motahar

Modeling and Simulation Application of a Triple-Pressure Heat Recovery Steam Generator - Z. Ozcelik

Design and Performance of Dual-Purpose Solar Collector - M. Assari

Design and Simulation of A Solar Water Heater - H. Maleki

Performance Analysis of the Bigadic Geothermal District Heating System - Z. Oktay

Thermodynamic Analysis of the Rotary Burner Process in the Cement Production - Z. Oktay

Performance Assessment of Drying of Blanched Carrot - N. Colak

A new optical concept prevails over the design of the solar plants with central receiver - A. Segal

## **Heat & Mass Transfer**

Heat transfer and friction factor correlations for decaying turbulent swirl flow in a horizontal pipe - T. Bali

Effect of surface accommodation coefficients on slip-flow convection heat transfer in rectangular microchannels - S. Jomeh

Numerical Simulation and Optimization of Heat Transfer in Reciprocating Flows - A. Mosahebi  
 Influence of particles suspended in flow on temperature fields and convective heat transfer - M. Aydin  
 Compressible Flow and Heat Transfer in a pipe with porous insert - Z. Nessrine  
 Free convection in a triangular porous media filled enclosure heated or cooled horizontal and vertical walls- Y. Varol  
 Flow and Heat Transfer over an Exponentially-Stretched Sheet Immersed in an Upper Convected Maxwell Fluid: a Boundary Layer Analysis - K. Sadeghy  
 Heat transfer enhancement in a heated horizontal pipe using flow pulsation - M. Hessami  
 Heat transfer coefficient measurements for corrugated plate and smooth plate heat exchangers - J. Abedin  
 Experimental Investigation of the permeability and Inertial Effect on Fluid Flow Through Porous Media - Faezeh  
 Analysis of natural convection in a porous enclosure with different Prandtl number: Effects of non-isothermal boundary conditions - H. Oztop  
 Study of a solid desiccant air-dehumidification unit - C. Ruivo  
 Thermal performance measurements of building panels by a new transient technique - B. Yesilata  
 Numerical Analysis of Steady State Fluid Flow in a Two-Dimensional wavy Channel - M. Gorji-Bandpy  
 Heat Transfer Intensification in a Mini Crossflow Heat Exchanger by Integration of Constructal Distributor/Collector - L. Luo  
 Heat and Mass Transfer of a Chemically Reactive Maxwell Fluid in Flow over a Porous, Non-Isothermal Stretching Sheet - K. Sadeghy  
 Genetic algorithm optimization of stand alone PV - B. Ali  
 Entropy production due to natural convection and fluid flow in triangular cavities - Y. Varol  
 Heat removal from a Flat Surface by a Laminar Impinging Jet - K. Sadeghy  
 Study of heat and mass transfer during desorption - A. Zegnani  
 Forced Convection Flow of Viscous Dissipative Power-Law Fluids in a Pipe - O. Aydin  
 Particle Deposition at Presence of Thermophoresis in Laminar Boundary Layer Using Two-Fluid Model - H. Tabrizi  
 Efficiency of a solar water heater system widely used for domestic applications in Turkey - T. Koyuncu

## **Fuels & Processes Optimization**

Comparison of the Pyrolysis Properties of Different Rank Coals with Respect to Energy Recovery - S. Yaman  
 Energetic Potential of Olive Mill Wastewater - I. Marques  
 The Necessity of Using CNG Fuel and Gasification of Vehicles in Iran - K. Rezapour  
 Biogas feasibility in energy requirements of a rural house in Izmir/Turkey - G. Kocar  
 Performance analysis of CO<sub>2</sub> coolant usage in vapor compressed - A. Özgür  
 Hierarchical decomposition and optimization in absorption refrigerator analysis - A. Fellah  
 Thermodynamic study of a diffusion absorption refrigeration system - B. Radhouane  
 A model for study and optimization of real-operating refrigeration machines - M. Feidt  
 Peak of oil production - A markets perspective - P. Almeida  
 Necessities and Ways of Liberalization and Regulation in Natural Gas Distribution System of Iran - S. Emami  
 Linear modelling of gum creation in combustor cooling path of liquid propellant rocket engine and comparison with experiment - E. Valizadeh  
 Influence of combustion time lag and injector pressure drop on high frequency instability in liquid propellant rocket engine - M. Montazeri  
 Combustion Performance of Elbistan Lignite in the Presence of Some Biomass Species - H. Haykiri-Acma  
 Preliminary Design of a new-concept Chemical Looping Combustion Reactor based on Ljungstrom Principle - C. Zamfirescu  
 Effect of steam injection on work output and CO<sub>2</sub> emission - B. Reddy  
 Hydrogen Management in Oil Refineries - R. Salary  
 Process Optimization for Jeddah Refinery FCC Unit - F. Al-Khaldi

Selection of a reference environment for the calculation of the exergy value of indoor air in buildings - P. Sakulpipatsin  
Low-temperature Catalytic Pyrolysis of Peat Using Silica-alumina Catalytic Systems - Y. Kosivtsov  
Combined CFD and infrared thermal analysis of a wood refuse and di-methyl-ether co-fired - T. Prisecaru  
Pre-feasibility study of waste-to-energy project in the Czech Republic: fuel production from plastic packaging waste - R. Kikuchi

## **Environment, Clean Energy Technologies & Sustainable Development**

Characterization of sustainable development indicators - G. Stéphane & L. Jean-Baptiste  
Exergy, Environment and Renewable Energy - Bramme  
Carbon Credits and Energy Efficiency - M. Seidel  
Effect of Non-Condensable Gases on Geothermal Power Plants. Case Study: Kizildere Geothermal Power Plant-Turkey - G. Gokcen  
An Investigation of Radiological Externalities - T. Büke  
Fe nanoparticles in environment remediation: mathematical model and numerical simulation - P. Tomek  
A numerical study of the effect of wind turbine blade design on turbine's energy conversion efficiency - M. Hessami  
The Effects of -Insulation in Dwellings (IID) - on CO<sub>2</sub> and SO<sub>2</sub> Emissions in Populated Centers - E. Kacan  
Design of a trigeneration system using high temperature fuel cells - I. Malico  
Simulation of a solid oxide fuel cell-gas turbine system using Aspen Plus - M. Koksai  
Study on PEMFC-Stirling engine combined cycle - S. Obara  
A new approach to flat plate solar collectors - E. Kacan  
Environmental and Exergetic Assessment of Wastewater Treatment Plant - M. Belhani  
Coupling of low cost concentrator and fibre optic bundle - C. Kandili  
Dye-sensitized solar cells: novel concepts, materials and state-of-the-art - H. Ribeiro  
Adsorption Characteristics of MCPA from Aqueous Solution on Activated Carbon - O. Nalcaci  
Optimizing Wind Power for the Urban Environment - A. Mrowka  
Radiative analysis in a rectangular enclosure by the zone method and the weighted sum of grey gases model - M. Rachid  
A case study on electricity production in a landfill area - N. Balkaya  
The Effects of -Insulation in Dwellings (IID) - on CO<sub>2</sub> and SO<sub>2</sub> Emissions in Populated Centers - E. Kacan  
PM<sub>10</sub> mass concentration measured at Évora with a TEOM monitor - S. Pereira  
Empirical evaluation of error sources in heat transfer models - E. Santoyo  
Numerical Study of a Shell and Tube Heat Storage Using two Phase Change Materials - H. Qarnia  
The distribution of a polyelectrolyte conditioner into the soil - D. Raducu  
Energy lifecycle and environmental impacts of ethanol fuel produced from biomass: sustainable approach using wood (forest) residues - R. Kikuchi  
Valorizing the production of functionalized chemicals from biomass - B. Brehmer  
Thermodynamics Of An Ecosystem: Photosynthesis - I. Benko  
Effect of solar radiation reduction due to aerosol particles on stand-alone PV system sizing - I. Malico  
Physical and Chemical parameters of Büyük Menderes River - E. Kaçan  
Transmission performance of fibre optic bundle for solar lighting - C. Kandili  
Application of pollutant emissions in test furnace - H. Jannesari  
Microscopic modeling of transport phenomena in a planar Solid Oxide Fuel Cell - E. Vakoufts  
A Preliminary Assessment of a 5 kWp Solar Hydrogen System in Denizli, Turkey - H. Ozturk  
Performance Investigation of a Ballard PEM Fuel Cell System for Transportation Vehicles - S. Mert  
Effect of recirculation on carbon deposition for direct internal reforming solid oxide fuel cells - C. Colpan  
Use of phase-change materials as passive elements for climatization purposes in summer: the Portuguese case - V. Costa  
Exergy analysis of air bottoming and simple gas turbine cycle for different intake air temperatures - M. Ghazikhani  
Application of the neuro-fuzzy modeling for simulation of pollutant emissions - H. Jannesari  
A dismantling and recycling model - J. Filipe
