

EDITORIAL NOTE

LAW & CONTEMPORARY PROBLEMS is proud to publish this double issue “The Constitution of Japan—The Fifth Decade,” which brings together the reflections and analyses of several of the most preeminent scholars of the Japanese Constitution. We believe that this symposium presents the most comprehensive and insightful examination of Japanese constitutional law that is currently available in the English language.

In presenting this unique body of scholarship, the editors of LAW & CONTEMPORARY PROBLEMS felt constrained to take into account and respect Japanese academic practices and customs. Accordingly, citations to authority and other matters of documentary and language usage may vary somewhat from that with which American readers may be most familiar.
