Administrative History:

Temple Grandin was born in Boston, Massachusetts on August 29, 1947 to Richard Grandin and Eustacia Cutler. She was diagnosed with autism at age 2. She suffered from delayed speech development and did not begin to speak until the age of 4. Temple's mother defied the doctors and kept her out of institutions. Temple was given speech therapy as well as an intensive education. Her high school science teacher and her

aunt on a ranch in Arizona inspired Temple to continue her studies and pursue a career as a scientist and livestock equipment designer.

She graduated from Hampshire Country School (a boarding school for gifted children) in Ridge, New Hampshire in 1966, and earned a bachelor's degree in psychology from Franklin Pierce College in 1970. In 1975, she received a master's degree in animal science from Arizona State University and then a doctoral degree in animal science from the University of Illinois in 1989. She is currently a professor at Colorado State University. Dr. Grandin is one of the world's leaders in the design of livestock handling facilities. She has done extensive work in design of handling facilities for animals and has developed animal welfare guidelines for the meat industries.

Dr. Grandin is a past member of the board of directors of the Autism Society of America. She lectures to parents and teachers throughout the U.S. on her experiences with autism. She makes the case that the world needs people on the autism spectrum: visual thinkers, pattern thinkers and verbal thinkers.

Some of Temple Grandin's books include: [Animals Make Us Human](#), [Animals in Translation](#), [The Way I See It](#), [The Autistic Brain](#), and [Different...Not Less](#). In 2010, a movie entitled "Temple Grandin" starring Clare Danes was released. The movie was based on Grandin's own writings.

Temple Grandin is an expert on animal behavior, a bestselling author, and an autism activist. In 2010, she was listed in the "Heroes" category in the "Time" list of the world's 100 most influential people. She has received numerous awards including an honorary doctorate from McGill, the University of Illinois and Duke University. Temple Grandin is a philosophical leader of both the animal welfare and autism advocacy movements.
