

# **Consensus Analysis of the Final Rule for Reform of the Federal Milk Marketing Order System**

**June 9, 1999**

# Assumptions

- Higher of Concept for Class I Price Mover - \$0.10
- Butter/NFD Survey Prices - \$-0.01 per Pound
- Cheese Survey Price - \$-0.03 per Pound
- Revenue to Cheese Processors - 75% Returned to Farmers
- Over-Order Premiums
  - ▶ NOPREM
  - ▶ 50PREM
  - ▶ MOD1A
- California

# BFP vs Minimum Class III Price Given Dairy Product Prices

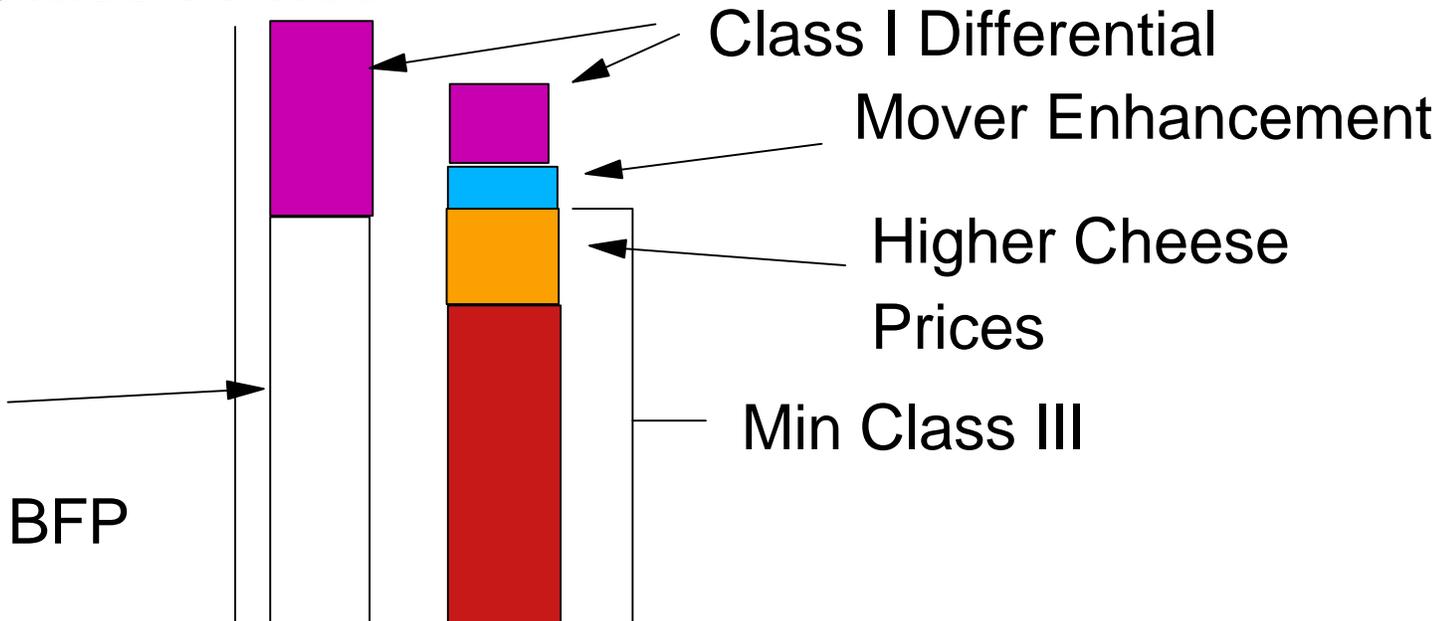

# Reduced Class I Differentials Results in Less Milk Production and More Fluid Use, Thus Less Milk is Available for Manufactured Uses

" Effective" Class III Price

Class I Price

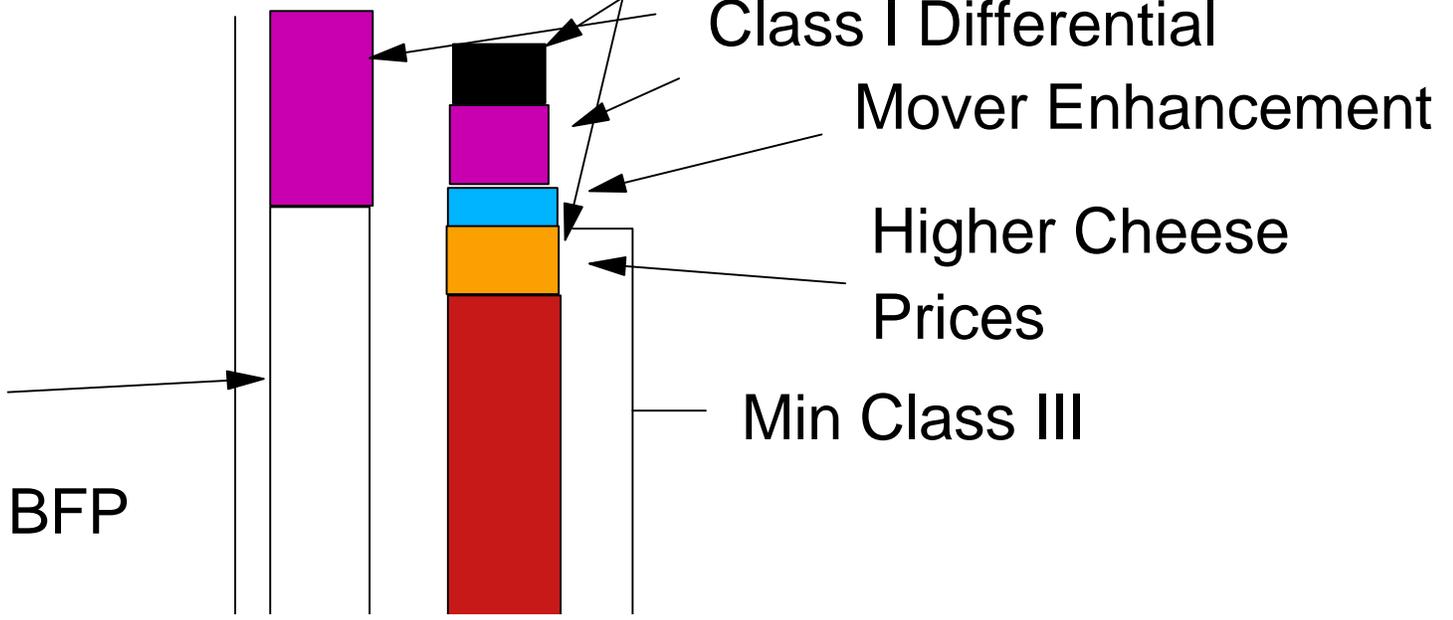

# What Happens When Premiums or Differentials Increase for Class I Milk ?

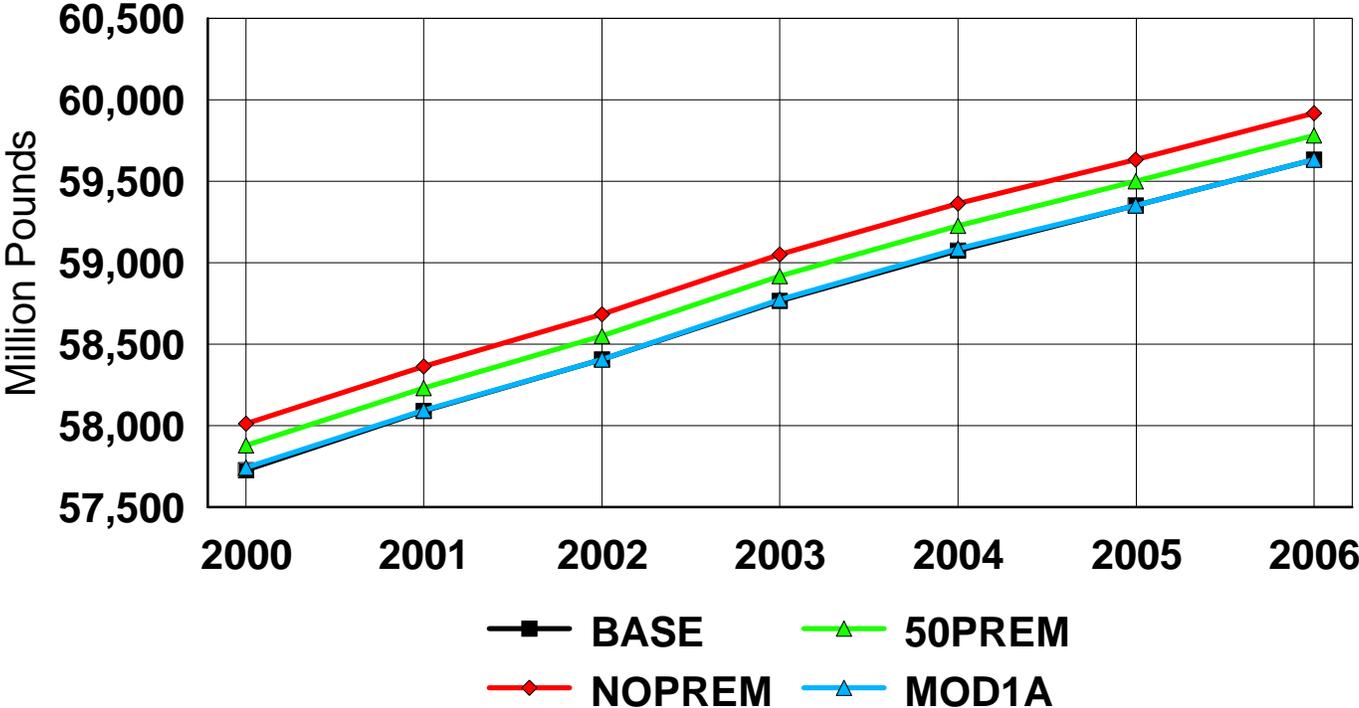

" Effective" Class III Price

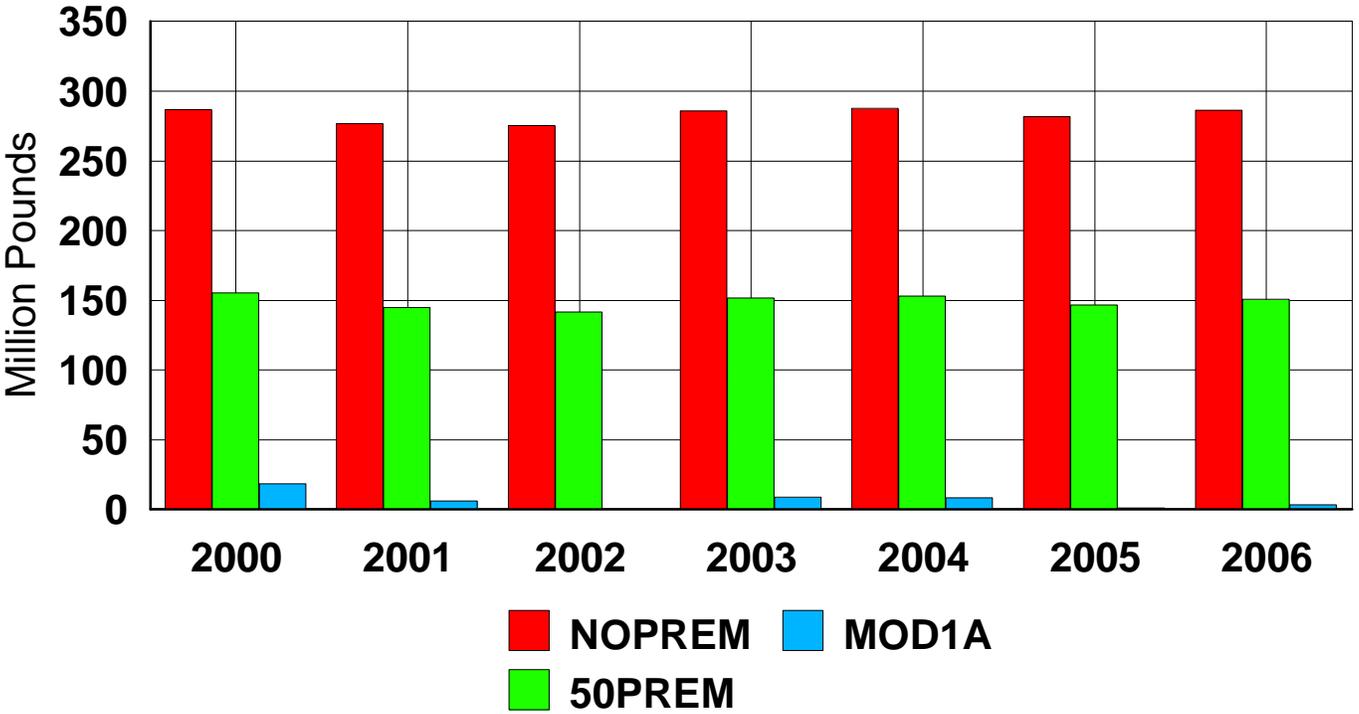

Class I Price

# Change in State-Level All Milk Prices

# Summary

- Small Changes to the U.S. Dairy Sector Under Any of the Scenarios
- Testing the Ability of Any Model to Quantify Such Small Changes
- In Many Cases, 50PREM and MOD1A Give Similar Results at the Regional Level
  - ▶ MOD1A - Legislated Class I Differentials
  - ▶ 50PREM - Premiums Must be Extracted From the Market
