N. Newcomer - Summon

Summon at ECU

- Implemented summer 2010
- I was involved throughout: selection, implementation, management; especially data optimization & needs of music & other special format
- ILS: SirsiDynix Symphony; e-library OPAC still available to patrons

N. Newcomer - Summon

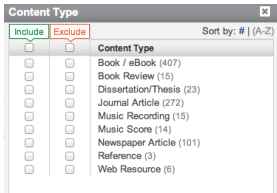

2-3. Promotion & Reception

- Main library changed default homepage search to Summon immediately upon implementation in FA 2010
 - Ad campaign via posters & facebook, which music library passively participated in
- Softer roll-out; made it available, but privileged the OPAC
- Initially, physical and virtual visitors who landed in music library pages/physical spaces were directed to OPAC:
 - Both linked from homepage, but OPAC first
 - Instruction focused on OPAC, mentioned Summon
 - OPAC on library search stations

N. Newcomer - Summon

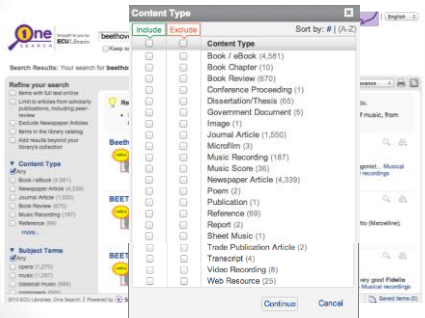

Main deal-breaker: content/carrier

- Scores, recordings, and books: need accurate facets & identification in results sets
 - Bad data (fixed by us)
 - Mapping problems (fixed by us, communicated to Serials Solutions)
 - Problems with Summon setup/design (have to lobby Serials Solutions to fix)

Balance tips – Content Type

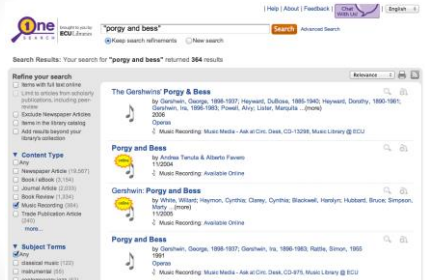

Balance tips – relevance ranking

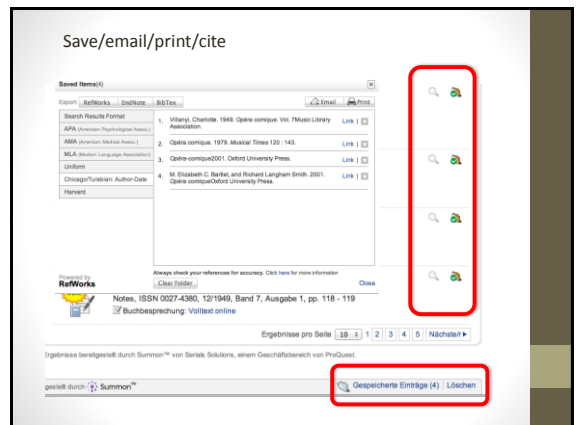

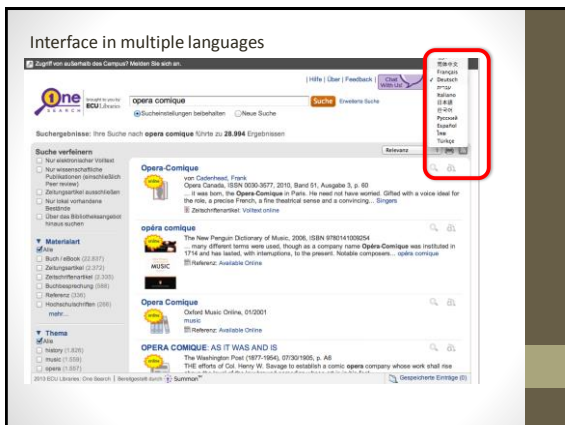

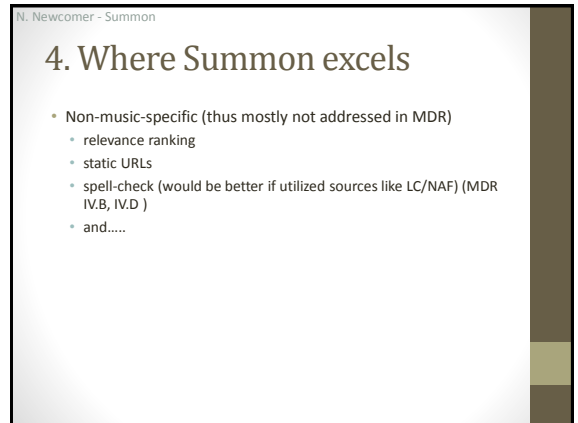

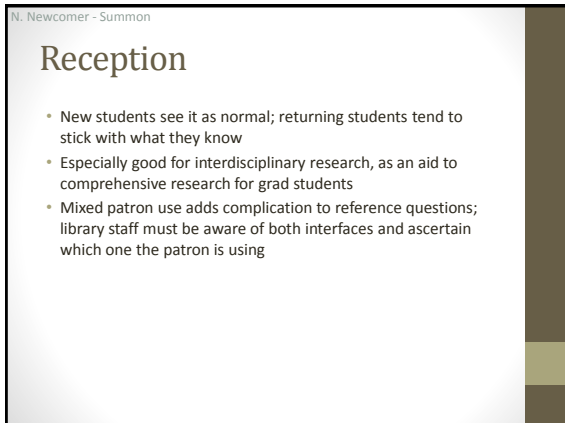

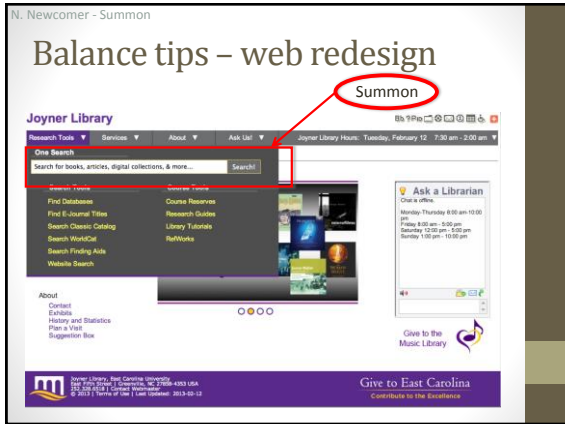

OPAC lacked relevance ranking. Above, sound recordings of the entire opera *Porgy and Bess* are hits 12 and 63 out of out of 97.

Balance tips – relevance ranking

Summon pulls complete operas to top, after "Content Type" facet applied

5. Where Summon struggles

- Content/carrier problems
 - MDR III.B: Expressions/Manifestations: Content/Carrier
 - Find content types (score vs. recording vs. book vs. article, etc.)
 - and find specific carriers (CD, LP, online, etc.)
