FOREWORD

Advanced degrees were conferred by the University of Missouri at Columbia as early as 1846. Records are incomplete, however, before 1892 on account of destruction by fire. The total number of degrees conferred is 6,550 of which 4,627 have been conferred since August, 1929.

This bulletin furnishes data regarding all earned degrees since 1892 arranged with reference to both students and departments. Information will be most readily obtained by the use of the abbreviations listed on the following page.

Most of these abbreviations refer to the departments in which the candidate did his major work toward the A. M. degree, i.e., Mathematics, German, etc. The designation of a department alone indicates that the degree conferred is that of Master of Arts. All other degrees are characterized by letters which indicate the degree rather than the department, i.e., Master of Science, Doctor of Philosophy, etc.

Information regarding a particular student is best obtained by referring to the list which starts on Page 7. This gives the full name of the student, the date of the degree and some information regarding the degree in the abbreviation. Further information regarding the degree or the title of the thesis is obtained by referring to the sections which immediately follow the alphabetical list of recipients of degrees. These sections are arranged in the same order as that given on the following page. Within each section the degrees are arranged chronologically and within each year the degrees are arranged alphabetically in the names of the recipients of the degrees.

As an illustration: - "Allen, Elbert Frank . . . 21Math" gives the full name and indicates that the degree of A.M. with a major in Mathematics was conferred in 1921. Turning to the section entitled Mathematics (Math), we find under the year 1921 the thesis title, "A Reconsideration of the Lie Theory of One Parameter Group". In some departments the thesis is optional.

As a further illustration, "Alexander, Henry MacMillan . . . 34PhD" indicates the degree and year but not the department. It is assumed that in most cases the major subject will be known by the individual using the alphabetical list. The thesis title may then be found by referring to the section labeled "PhD", then to the subsection of Political Science and Public Law, and finally to the year 1934 where the title, "Council-Manager Government in Kansas City", will be found. If the Department is not known it is necessary to search under the year in each department for the name.

Information regarding a department is obtained by referring directly to the abbreviations.

A separate index precedes the enumeration of degrees conferred by the Missouri School of Mines and Metallurgy at Rolla. This will be found on page 138.
