# What we were practising

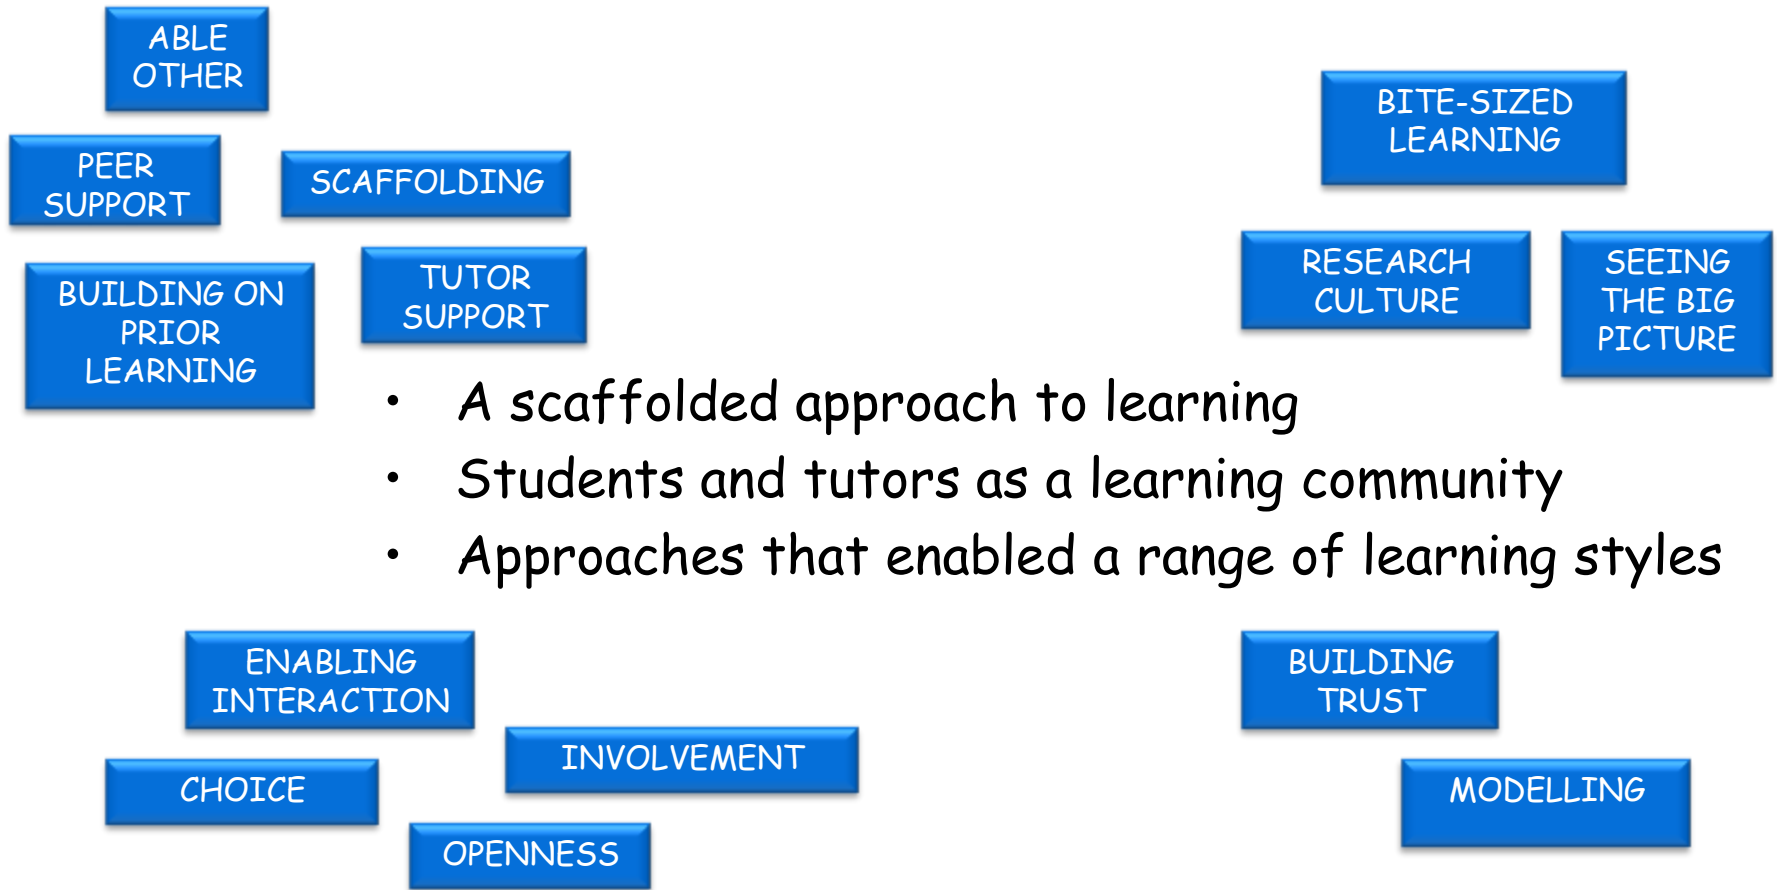

*\* Students were not required to print lecture slides but most chose to do so and commented unfavourably if this facility was late or not provided.*

# What the students thought

I surprisingly enjoyed contributing to the discussions and reading fellow-students responses

The reading groups whilst an excellent idea just haven't been practical to carry out to any useful degree due to pressure of work and different levels of commitment etc!

I felt like I had support with EPS 24/7

...it is helpful to share a range of perspectives on experiences....

Joint Report - concerned that our grade relied so heavily on the other person making an effort

With regards to the reading groups: Sometimes it's easier to get on and do it yourself... But the presentation groups really boost your confidence...

Was very disappointed and concerned with the continuous lateness of feedback, after all students would not be allowed to hand in work late at all. Most importantly, if feedback were given on time, it could have further improved my learning throughout the course

lectures, seminars and online, it kept the work varied and interesting

It's much easier to give encouraging, positive feedback to your peers about their presentations...I think confidence building is important in the 1st year

It was good to have someone to work with

# Where we are going next

- Review aspects of the VLE
  - Improve layout and design
  - Discussion areas
- Review our use of aspects of the VLE
  - Formative feedback
  - Coffee bar
- Explore development of new features
  - Mini wikis
  - Blog comments
