VA charges SJSU liable for \$54,000

SJSU students on the GI bill ere recently overpaid \$54,000 by the Veterans Administration and SJSU is "potentially liable" for this overpayment.

Veterans responsible

Veterans who received and cashed the checks should be responsible for reimbursement, not SJSU, said Bob Sampson, director of veterans affairs.

"If we receive a bill we will not pay it," Sampson said. "We do not accept the concept of being held liable.

This position, which Sampson said had been recommended to President John Bunzel, was adopted after a discussion among the attorneys for the Chancellor's Office and himself, he disclosed.
The VA is holding SJSU

responsible because it failed to notify the VA within 30 days after the students became ineligible for the funds, Sampson said.

According to a letter sent to

SJSU from the VA, they state that the college is "potentially liable"

Sampson said he cannot notify the VA of a student's dropping cut if drop forms are not turned in, thus the overpayment.

We do everything humanly possible to certify veterans and to do it correctly, but VA is trying to force us to do things we can't do,' Sampson said.

"We can notify the VA within 28 hours after the student has dropped classes if the student goes through established procedures," Sampson said.

Information delayed

Instructors do not always take roll after the fourth week of class and sometimes the Veterans Affairs Office does not get drop information until the end of the semester, Sampson said.

Bunzel was advised to refuse responsibility for the Veterans Administration's overpayment to students on the GI bill, in a letter dated July 28 from 28 California veteran's coordinators.

Representatives from 28 schools met this summer to reach a decision in response to VA's liability charges, the letter read.

Overpayment widespread

Nationwide, millions of dollars have been overpaid to veterans who dropped college classes but continued to receive and cash VA checks.

The 30 days the campus has to notify the VA was called arbitrary, unrealistic, and "simply by the assembly in their letter.

Attorney General accuses Ferguson of trying to force him out of office

Attorney General Perry Litchfield has accused President James Ferguson of trying to force him out of office by not giving him an enclosed office area and denying him privileges that he had last semester

Ferguson denied all charges. Ferguson also has refused to give him a private telephone and access keys to the A.S. offices, according to Litchfield.

Litchfield said the attempt is directly related to the suit he brought against Ferguson last semester for alleged misuse of A.S. funds when Ferguson ran for president. The A.S. Judiciary found

Ferguson innocent of those charges. "When the case was over last semester, he (Ferguson) made the comment to me 'I'll burn you for 'Litchfield said.

this,'" Litchfield said,
"It seemed like he wanted to
start some kind of clash," he added. Ferguson said he is "happy to have the attorney general work out of this office.'

No grudge Ferguson also said that he holds

Perry Litchfield

no grudge against Litchfield for prosecuting the case against him

'I would imagine that is a part of his job," he said. Litchfield has "basically the

James Ferguson

same arrangements" this semester as he did last semester, Ferguson

Ferguson called Litchfield's accusation a "personnel matter" and withheld further comment until

Litchfield cited Ferguson's lack of control over him as another reason for allegedly being forced out of office. "I'm the only one in his office that he doesn't have direct control over," he said.

"He can't fire me or tell me what to do," he added.

Privacy lacking
Litchfield said that he requested an enclosed office for reasons of privacy. "I wanted the enclosed area so I could handle the personnel occurrences without having everyone in the office knowing what's going on,'' he said. His present office hindered a lot

of his investigations last semester, he said.

Ferguson's denying him a phone is ridiculous, Litchfield said. "How am I supposed to do any business

without a phone?" he said. Keys needed

The access keys to the office, Litchfield said, were requested so that he could start an academic service for night students. "So far, I've been kicked out of the office twice at 4:30," he said.

to him (Ferguson) has been denied, and things have been taken away,"

Litchfield sees this clash as an indication that A.S. government is turning into a political organization rather than a student service

organization.

Political game "I never liked the politics," Litchfield said. "It turns into a power game, and I didn't want to get into that because I wanted to do the job this year.

"If I have to keep putting up with Ferguson and his games then I'm not going to be able to do my job, and I see that as his game plan," he continued

Litchfield said that he has no intention of quitting the office of

Attorney General.
Won't leave

"I won't leave that office open,"

he said. Litchfield said that he is un-

certain of what action he will take.
"I've been trying to work things out with Ferguson, but he's been very uncooperative," he added.

CMC Executive Director Pat Wil- equipment lost to Gill TV takeover.

Legal action considered Local media center closed

The Community Media Center (CMC), was scheduled to consult with lawyers yesterday on possible legal action over the closing of the center and the takeover by Gill Industries of public access television channel 2B, which is seen on San Jose's cable television system.

The CMC, a non-profit corporation, has sent a letter to the Federal Communications Commission outlining what it considers to be questionable operation of the center and divisive activities by Gill

Gill charged

"It is our opinion that Gill Industries ... participated in the intentional and ruthless dismanteling of the most successful, selfsufficient, and we believe, potentially viable public access television station in the United States," the

Doors locked The CMC was formed in June of 1975 to administer the public access channel. Since March of this year the center has steadily been losing programming and on Aug. 15 the doors were locked and the center

declared bankrupt

One week later the CMC elected a new board of directors and has been soliciting new memberships. CMC moved

Gill Industries has removed its

video equipment from the CMC studio and has resumed public access programming in a new studio on Fourth Street.

Maria Banuelos, an SJSU student, has used the CMC in the past and contends the new Fourth Street facilities are not as good.

No training

In the new studio they are not allowed to train students. Before, producers were allowed to bring their own production crews. Now only are allowed director, a producer and a director, she said.

CMC charged

Gill considered the move necessary because of the "instability" of the CMC. The CMC has alleged the instability was caused by a member of the CMC who was at one time employed by Gill.

The CMC also has suggested the move was an attempt by Gill to cut

Study shows

down competition with KNTV

television, which is owned by Gill

preference for no change

An intensive survey undertaken the San Jos: transportation division last May showed that 63 per cent of the campus area residents concerned about on-street parking but 71 per cent of them preferred that no changes be made.

The survey also showed: The average parking duration of the student was between three and four hours.

· Streets closest to the campus were 80 per cent to 100 per cent occupied most of the day.

• The 4,000 spaces available in the Seventh and Ninth Street Garages had a peak occupancy of 90 per cent at 11 a.m. and dropped to 60

per cent and below after 2 p.m. The report, compiled by the transportation division, had several recommendations for SJSU. These included using the 200 employe spaces in the Seventh Street Garage for students and distributing those

employe spaces to other lots. Another recommendation, which would generate 700 more spaces, is to have students park under Route 280 and walk to campus or use the Municipal Stadium lot with a shuttle service to SJSU.

This parking study will be reviewed by the San Jose City Council at the same time they look at the Naglee Park Homeowners Association proposal to prohibit parking on portions of 12th and 13th

streets. Bill Plate, president of the association, said the study has not been forwarded to SJSU yet because in the past they have been un-

cooperative. "When they've been asked to cooperate," Plate said, "the Administration has taken the position that 'we're not in the parking business, we're in the education business'''

business William Schooler, manager of auxiliary enterprises for the campus, denied they have been uncooperative.

"My honest response is that we're concerned for the residents, the neighborhood and the student, Schooler said.

He added that students have rights, as do the homeowners, "They pay taxes too," he added, "and that's a public street."

SJSU has looked into a shuttle

service to outlying lots but students have indicated they would not use them, Schooler said. Larry Moore, an engineering technician in the transportation

division and former resident of 12th Street, said when he surveyed students they told him they parked off-campus to save money. If a prohibition were in effect on

12th and 13th streets, this would only move student parkers out to 14th Street and beyond, Moore said.

Parking prohibition on its way?

By Heidi Van Zant

A new prohibition may be coming the campus commi the one of the 1920's but still organized by citizens concerned with preserving the quality of their

During the summer a petition was signed by 63 residents on South 12th and South 13th streets asking the city to prohibit parking on their streets, which they say are full of student cars almost continuously. No students were asked to sign

the petition.

Homeowners recommendation Within the month, the San Jose

City Council is expected to act on the homeowners' recommendation: parking on 12th and 13th streets, between East San Salvador and East San Fernando streets, be prohibited from 9 a.m. to 2 p.m., Monday through Friday, and 6 p.m. to 8 p.m., Monday through Thursday.
If passed, red-and-white "no

parking" signs will be erected for a six-month trial period and enforced when classes are in session. Approximately 250 parking spaces will

According to a parking study completed by the city's traffic division, 52 per cent of the campusarea residents support the no-parking regulation. Perhaps the staunchest supporter is 12th Street resident Bill Plate, president of the Naglee Park Homeowners

Association.
Plate, who said he did not even student renters to sign the petition, stated he wants parked cars off the streets for three reasons: they generate too much traffic, the parkers are careless and it is visually unpleasant to see the

Some residents of the area say this car-lined 12th Street should only be tree-lined. To emphasize their

point, they have signed a petition to prohibit parking.

curb lined with automobiles.

Rights denied "My right to a peaceful and quiet neighborhood is being infringed

He admits it is going to be "a problem" for renters who have several cars, but quickly points out that the east-west streets will not be closed to parking.

'The current practice of unlimited student parking in this residential neighborhood is causing a significant decline in the quality of life of the residents," reads the petition, which Plate helped draft.

Across the street from Plate live four SJSU students, all opposed to the proposal.

Students opposed A cardboard sign out front reads,

"Zucchini-25¢ each." In back, Brad Howland is cleaning out the yard. The no parking prohibition does not sit well with him

'There are four to five people who live here and we'd all have to park in the driveway, which is insane," he said.

His roommate, Jim McNulty, comes around the corner of the house and adds, "It's B.S." Another roommate, Steve Radosevich, said he would not sign

the petition because, "I don't see any problem in parking."
"His (Plate's) big interest is in his property — trying to keep his value up," Radosevich contended. Needs parking
Across the street is another house

of students. Royann D'Amore, when told she may not be able to park on the street any more, exclaims, "Wow! What will we do with all our cars?"

the prohibition. She, along with her husband, have lived there 27 years. "Of course it's a problem," Rafloski said, "But I don't see how you can stop the parking. You've got

Opinion

Administration, UPC bicker when compromise is needed

By Nick Baptista

After listening to both sides of the most recent promotions squabble, one can only conclude that the attitudes of the administration and the United Professors of California (UPC) are wrong and to continue in them will only widen the deep division between the two groups.

The administration says it promotes only those faculty members who have earned this advancement in rank and money with no concern of how much money is available, and rightfully so, on the face of things.

Yet SJSU has a history of asking the state for more money than it

A seven-year study shows that SJSU, on the average, has used only 57 per cent of the money allocated for promotions, with the surplus — until last year — being rebudgeted back into the university.

It's ironic that last year's surplus was diverted by CSUC Chancellor Glenn Dumke to pay for the promotions of professors at six other CSUC campuses who promoted over their alloted budgets

The UPC could ask President Bunzel if he has ever heard of the saying, "Charity begins at home.

So, while trying to take the issue away from money, the administration has made a full circle. The weakest point in its argument is **Analysis**

using these surplus funds in other areas of the university while last year losing these funds to other colleges in the state system who obviously don't have the same promotion standards as our school.

And by using these funds in other areas, they create a motive for not promoting.

The UPC, on the other hand, believes all the funds should be used for promotions. Thus, it is tying promotions with money and not

Jack-Kurzweil, UPC president, says there are enough professors on this campus who merit promotion, thus using up all the funds. This may be true, but it is not his job to determine this. It is the ad-ministration's responsibility.

To end hostilities on both sides and for the process of promotions to become unquestionable based upon merit and not money, both sides must sit down and discusss the

problem with a compromising and unhostile attitude and make some changes

First, the administration should budget less money for promotions. Looking at the problem historically: Only twice in the last seven years has more than 70 per cent of the promotions budget been used.

Thus, it would be safe if each year the administration cut back its request by a quarter. It is doubtful that any professor would be denied a promotion because of a lack of funds through this method.

By having less of a surplus, it would end speculation that the administration was "perverting" the promotions process, and uphold the process' integrity that is vitally needed for this campus to be as prestigious as President Bunzel

Second, the UPC cannot expect for the administration to utilize the whole promotion allocation each year. They have to be satisfied with a little bit of a surplus or padding each year so a situation as that of last year, where the six CSUC campuses promoted over their budgets, won't happen here.

Because maybe next time the Chancellor will not bail out those universities who over-promote and some people may not get the just financial rewards of promotions.

A visit to New York: view the Big Apple's rotten core

By Steve Forsythe

This is the toughest time of the

Just as I had forced myself to accept the drab, daily routine of summer life, like going to the beach to Lake Tahoe, backpacking and just all-out lying around, SJSU reminded

It's not going to school that puts a damper on my fun in the sun, mainly because I'm here of my own free will. It's just that while my routine changes, the weather doesn't

It is still very sunny, pleasantly and baseball season isn' over How about those Giants this

The summer put on a good show and as I sit in my classes this early September, the memories are slow

in helping me to adjust. But, he said, with a twinkle in his eye and a raised brow, there is one memory I would like to forget. And since there were no viable outlets while in my accursed situation to let

my frustrations out. I will share my vacation with you I was fortunate enough to have the opportunity to travel to New York this summer, a "fortunate situation which was one hell of misconception, as I later was to find

It was so hot in New York (How hot was it?), anyone with hair that was coarse or tended to be curly, as my hair is, immediately took on the appearance of a runaway

We arrived at night, but the temperature was still in the high During the day, the tem perature bordered the century mark and the humidity was somewhere around 600 million, give or take a

Exit from any air-conditioned building onto the street, and your arms are covered by little droplets sweat the size of curled-up protective ladybugs

The first night my party was in New York, the general consensus was to merge into the ever-moving night life that is a characteristic of

Now anyone who has heard the

exaggeration of crime and violence in the big city, knows the literally moribund reputation New York possesses across the country.

Well, let me tell you, the exaggerations are true and the reputation is well earned and deserved.

ner step out of the hotel at 4 a.m., than we see a young man in full running stride, frantically attempting to maintain his slim lead over two equally young - but much madder looking - men.

One of the two is swinging a long ugly looking, metal belt while his partner is holding tight to a pipe resembling a foul pole at Candle

As we gasped in horror, the one member of our party familiar with New York - he was born and raised there - took off in a gallop. Over his

shoulder. I heard him yell, "What da hell are youse standin' aroun' for Come on!

Was he kidding?

As the trio disappeared around the corner of a building, followed closely by our own homeboy, a police siren pierced the air.

We rounded the corner to find a patrol car, up on the curb, separating the attackers and the attackee. A crowd quickly gathered, (no kidding, a big crowd at 4 a.m.) and two gruff, unruly looking officers emerged from the car wearing a look of "Why us?"

Eventually, the matter was resolved, all parties going merrily on their way after an exchange of handshakes. I stood there flabbergasted, not believing the movie-like scene that had just occurred.

My friend from New York grasped me firmly on my shoulders and said "Welcome to New York Thanks

In the days to follow, I personally encountered more strange people, places and things in one city than I think I'll ever see anywhere else in the whole country combined.

A midnight ride from a New York quaint, Early-American, open-air coaches led us conveniently past Central Park

driver knew we were tourists. He had to because after we politely declined an early morning, pitch black tour of the famed park he muttered "I wonder how many people are getting mugged in there

Was he kidding?

A taxi ride in New York can best be likened to being strapped onto a ball in a pinball machine and being given a ride for your money.

The streets are lined off into

but the taxi drivers, along with the rest of the maniacs on New York streets, choose to ignore them Thus, a cab covers 17 miles, swerving from curb to curb while trying to drive five miles through the city

A venture to the top of the Em pire State Building, where one can see for hundreds of miles on a clear day, revealed nothing but a disappointing, one-mile visibility and a

pair of waterey, burning eyes.
All this for \$3.75 and a direct route through the souvenir shop. The final leg of our visit was a

trip to the newly-refurbished Yankee Stadium, where a spec tacular total of \$125 million was spent. The new infield must've cost them \$4 million and the scoreboard another \$21 million, but I still wonder where the other \$100 million

The seats seemed to be merely painted over and the parking was non-existant. So were the security And the food, when you could find a vendor, was the worst.

As we left the Big Apple, the Eastern seaboard gave us a farewell thunder storm to rock the plane, upset our stomachs, and prevent us from sleeping.

Just like New York itself!

Letters

Time is right to stop waste

While working with the Financial Aids office on a temporary work study job this spring, I noticed a large amount of paper being shredded and dumped into various Browning-Ferris trash bins in the Building and Grounds maintenance

This bothered me because the paper (consisting of computer printouts, file cards, etc.) seemed to be of a recyclable nature.

I was wondering if there is any paper recycling program at San Jose State for general office waste paper. If so, is it being fully utilized? If not, can such a program be studied and implemented on as large a scale as possible? If yours is not the office to contact on these mat-ters, can you direct me to the appropriate agency or department?

It seems to me that such projects

lessening the amount of Spartan Dailies printed while still providing the present coverage might be possible by encouraging the students and other readers to return onceread Dailies to the distribution

I have noticed that several people have done just that in prior semesters, as I have myself.

The Daily could be just as effective in its coverage, save on newsprint costs (or maintain the current cost despite inflation), set an example for the community and other universities (though perhaps other universities already do these things), and show an environmental awareness which seems to be only mouthed by so many, if it undertakes a program to lessen its consumption of paper.

I recall a newspaper recycling bin on Seventh Street about three years ago. May I ask if anyone knows the reasons behind its demise? Would or could such a project be successful at this time? Could the Environmental Studies Department determine if such a project would be worth the effort needed to proceed with it?

Perhaps credit could be offered to students who would put such a project (or similar ones) together and make them work.

There are other areas in which the university can show awareness and even leadership. While realizing that university resources are limited and have to be allocated on a priority basis, the resources required for the study of these ideas would be compensated by the benefit that the university would acquire from the reputation as a progressive university.

Has anyone considered the feasibility of banning non-returnable beverage containers or flip-top cans from campus facilities?

Yosemite National Park, in conjunction with the EPA, and the concessionaire (Yosemite Park and Curry Co.), is experimenting with imposing a 5 cent deposit on some or all beverage cans sold in the park this summer.

Has anyone or is anyone from San Jose State University studying such a program with an eye toward implementing a similar program

With the First Step Compost Project, the solar heating project for some of the dorms, and other energy conservation measures, SJSU showing signs of becoming a more progressive, environmentally aware institution, which can instill pride in its students and its community that will complement and enhance the pride that successes in other areas has brought and hopefully will bring

If these ideas have merit, will they be studied and implemented as soon as it is feasible? Your response would be welcomed

Mitch Chambers SJS Affiliate Sierra Club

Editor's note: Ideas and proposals regarding recycling efforts should be directed to your and local elected and appointed representatives.

The Spartan Daily prints 10,000 papers each day for a student population of approximately 30,000, plus faculty and staff. A cleaner environment has always been our

SJSU ignores worthy grads

As an SJSU alumni. I was ap-palled to find that alumni are charged a fee to receive access to the job listings at the Career and Placement Center. The fee is charged to those least

able to pay it - the unemployed Even \$5 is quite a sum to one bereft of job, work-study and scholarship monies, parental support, federally insured loans and other programs

designed to make the lot of the hard-pressed student easier. To hard-pressed students I say -

you ain't seen nuthin' yet. After over four years of coming up with money for ever increasing fees and book prices, I believe San Jose State should take pity on its hordes of unemployed graduates and provide the job listing service at no charge.

I receive an alumni newsletter in the mail soliciting funds for new buildings and so forth. The message of these printouts is "Oh alumni where are you now that we need

Well SJSU, where are YOU when we need YOU? The outrage of this fee is no way to keep the goodwill of alumni against the day they do have jobs (and money to donate) Students, graduation may seem a

far off fantasy at the present. However, the odds are you, too, will step away from college, devalued diploma clenched in hot little hand, to find that you have just begun the struggle.

So I am not just speaking for

alumni, but for students also.

I am reminded of an ostensibly true anecdote. During rehearsal of a graduation ceremony, the coor-dinator makes a slip when he barks into the loud speaker. "Okay graduates, step out and join the recession

Protest this charge!

Birth to death: no one notices

Birth to death to obituaries to Steven C. Taylor's column.

Sad to say it, but Steve's column is a repeat. Unfortunately, we do not get awakened enough as such with the realization of those lost to death without notice, save but a few.

A child is born, but what happens to him or her. A life to follow - to write about - but how? How could we make room for the birth, history and death of each person?

The morticians provide only what they can and what the family of the deceased gives to them. Their job is not one I envy.

Death is a depressing situation and most care not to hear about it. Yet we cannot possibly cover each and every passing with a full-length True, it is a shame so few are

life. Still, everyone is noticed twice — first at birth and again at death though, at most, only by a few.

noticed in death, but it is the same in

Sorry to say the answer may be none, for we cannot cover all. Yet, I wonder. Society has created a number of who's who in life. Perhaps we need one in death with coverage not limited to the accomplished, but also for all —

from homemaker to gravedigger Bob Mever Accounting sophomore

New, improved, but not enough

Once again we have been folded. spindled and mutilated by our computerized marvel of an institution of higher learning.

It was evident from the sight of the assembled multitudes at walk through registration that very few people were satisfied with the schedule which the computer presented to them. When one attempted to participate in walkthrough registration, it was easy to see why it is called "arena registration" for it surely resembled a circus.

After waiting outside for what seemed to be an interminable time the doors were finally opened and each letter group, hour after hour, was herded into the hot stuffy men's gym to listen to a voice in a humdrum monotone give instructions on exactly what to do and what not to (Who said we have to wait until 1984 for Big Brother?)

After about an hour of that torture, the real fun began when the group was set free in the registration area. Now as each member frantically attempted to put some order into his schedule, he found that unless he had a leprechaun to guide his way, every class that could possibly fit into his schedule had no openings.

One cannot help but pity the poor people who were in the last group to through walk-through registration. By that time, half the departments were either packing up or were already on their way home. There was nothing left for these potential registrants to do but to give up and to go home too.

Then came their biggest shock when they discovered that the longest line of all was the one to get out of the building.

Probably this computer registration system with a follow-up walk-through session is better than the old system, but there is still much room for improvement.

Michael W. Lohr **Business Management Senior**

Band together, aid the needy

On Friday, Aug. 23, the California State Supreme Court refused to grant the final appeal in the International Hotel eviction case.

While this step may have marked the end of a long process of legal maneuverings as a part of the fight against the eviction, it has in no way dampened the resolve of the tenants and their supporters to continue the

"No Evictions! We Won't Move!" For eight years this battle cry has sounded throughout the San Francisco Bay Area. For eight years Philippino and Chinese retired workers have beaten back every attempt to tear down their home and they're not stopping now

Four Seas Investment Corporation, the current owner, has been trying to kick-out the residents of the I-Hotel and adjoining Victory Building. Low cost housing like the I-Hotel isn't as profitable as using the land for commercial development.

The miserable conditions under which people are forced to live and work are of no concern to the capitalist class of parasites in their relentless drive for profits.

Some people say, "What about the landlords, don't they have the right to evict since it's their land?" Four Seas is part of the same capitalist class that forces working people to have to live in run down hotels and apartments, that rips off millions from working people's labor and pays them pennies, that forces millions on to unemployment

when their labor is not profitable Hell no, they don't have the right to throw us out on the streets. They don't care about us or how we are forced to live, but that's o.k., we don't care about them or their

profits. The rich and their mouthpieces are trying to get us to give up this fight. They want us just to rely on them and they'll "save" the hotel for

Mayor Moscone has been pushing a phony plan for the city to buy the hotel. Sheriff Hongisto says he's for "humane evictions . . . but I've got to uphold the law." The courts? Every time they've stood on the side of Four Seas and the rich class they

are part of. The only reason the tenants have been able to stay in the hotel for so long is because they and their supporters have fought the owners every step of the way, relying on the strength of working people united as

their main weapon. Determined not to be ground into the dirt anymore, hundreds of workers, students and youth from all over the Bay Area are actively taking up this fight.

This is it! The battle of the I-Hotel is now at a crucial point. Four Seas may be sending the sheriffs any day from their homes.

The I-Hotel is an inspiring symbol of both the power of working people united and the growing fight of workers against the attacks of the capitalists.

We students can add tremendous strength to this fight by taking our stand with the tenants and the working class against Four Seas and their class. Join with the tenants in saving, "to hell with their profits, we won't move.

Voters register with post cards

card registration forms file into Santa Clara County Registrar of Voters office everyday.

'This will eliminate the last minute lines at the fire stations for voter regist-ration," said Dorothy Pio, deputy registrar.

Because of a new registration system which became effective in California on July 1, voters are no longer required to register in the presence of a deputy registrar.

One need only to obtain a copy of the registration form, fill it out, sign it under penalty of perjury and put the pre-addressed postage paid card in a mail

Registration forms may also be picked up at many locations including fire stations, city halls, libraries, post offices, League of Woman Voters offices political party headquarters and some union

halls Voter registration deadline for the November 4 general election is October 4. All cards must be in the registrar's office by

that date. If a person satisfact-orily fills out and ser.ds in the card, within two or three weeks the voter will receive a statement from the registrar's office indicating that the person is a registered voter.

Any California resident who is 18 years old, a U.S. citizen, and is not in prison or on parole for a felony conviction is eligible register.

Citizens who did not vote in the last guber-natorial election or have moved must reregister to vote again.

Surf, sun lures free spirits

It's a typical California scene: Mom and Dad taking a walk on the beach with the family cocker spaniel nipping at their heals while elsewhere tousle-haired youths toss the Frisbee and children make sand castles.

Only on this beach nobody wears any clothes.

This beach is one of the half-dozen "swimsuit optional" beaches that dot Highway 1 outside Santa Cruz. These beaches epitomize the wind-blow-ing-through-the-hair free spiritedness of California, besides being a cheap way to spend an afternoon, and it doesn't require special Not that one should ex-

pect Sodom and Gomorah with sunburned buttocks. On the contrary, the newcomer will find peaceful coexistence between the sexes at most beaches. Well known

The most well-known

nude beach would be the

patriotically striped mailbox that marks the entrance. Six miles north of Santa Cruz off Highway 1, the Red, White and Blue is a privately owned beach that charges \$3 admission for families, singles, and overnight campers alike.

"I've been running it for ten or eleven years now," says Ralph Edwards, pro-prietor of the beach. "We tried to get a variance permit allowing nude bathing for two-and-one-half years from the county. Finally we got one.

Business, he says, has leveled off in the last three years, but he still sees a lot of the same people every weekend.

"The people who come here are more openminded, more tolerant than your average person," Edwards continued. "But other than that, I don't see any difference. Oc-casionally someone with a camera will cause a problem. We just ask them to Red, White and Blue leave.

clean and geared for couples and families in their early thirties. There are barbeque pits and portable toilets as well as spaces for overnight camping.

Since the Red, White and Blue is known as a nude beach, bare skin is the de rigeur costume for the

Bonny Doon is eight miles down the road next to a sign that says Bonny Doon 8, Felton 3."

Free parking There is free parking off visitors travel over a brambly cliff.

The beach seemed to this reporter to be a young peoples' beach, with most of the sunbathers being males in their early twenties. There was even one group of scruffy-looking, fully-clothed young men drinking beer and

staring at everybody.

Besides being the second most known nude beach, Bonny Doon is one

beaches on its own merits. The beauty of its jagged cliffs and azure waters is marred only by the occasional heaps of beer cans and Dorito wrappers.
Four Mile Beach,

reputedly named because it is four miles from the last Mobile gas station before Davenport, is also a popular nude beach. Visitors walk one-half mile down a dirt road by fields

of some kind of cabbage to get to the beach. No hassles

Whether a beach is a nude beach depends on the people there. Legal hassles of nude bathing are vir-tually nil on the Santa Cruz county beaches. beaches, such as the Santa Cruz Boardwalk, are another matter.

'We sometimes use the lewd conduct laws to enforce the problems of nude beaches, but we don't use the law too much, said Sgt. Frank Bonar of the Santa Cruz County Sheriff's De-partment. "We have to prove that they are ex-posing their private parts sexual gratification, and that gets into more bizarre problems than just

nude bathing.' Bonar explained that the sheriff's department investigates all complaints

being committed. "Nudity is something we would cite or arrest on, but usually only if they're disturbing the peace."

After weeks of research

on this grueling assign-ment, this reporter can offer a few tips for the novice nude bather.

The first impression you will probably get is: it's cold. True, the advantages of running down the beach feeling free do have a few disadvantages — like double pneumonia. Pacific peaches are windier than in-city beaches. Find a cove away from the wind.

Second, the question arises: where do I put my keys? Lack of pockets IS a problem at nude beaches and all wallets, glasses, and loose change should be fir.nly packed.

Also, remember those never-seen-the-light-of-day spots on your body will fry quickly and should be protected by sunscreen.

Finally, for those new-comers who are em-barrassed about their flabby thighs, remember, it is a nude beach and everyone is in the same

And if you're not sure if it's a bona fide nude beach, just take off your clothes and see if anybody stares.

The nude beaches around Santa Cruz let everyone take full advantage of solar

'Jasmine' plays for enjoyment

By Steve Chavez

Wading through today's contemporary music scence one can find hard rock, disco, and pop types to satisfy a music appetite. But not to be forgotten is jazz, a sound that has survived for decades.

Hard living
"But jazz, that is
playing jazz, is hard to do
for a living," says pianist
Rick David of "Jasmine," a local jazz quintet. "Especially in this valley."

'Around here, there isn't much happening in the way of jazz," said drummer Steve Guzzetti. "So it's hard to make a living out of playing this music." But the love of the sound will always be there.

Together indefinitely

"We plan to keep playing together indefinitely, whether or not we ever make any money, claims Tim Jackson, who has been playing flute for four years. "We are all serious to the point of play-

ing together and sounding

And "sounding good" may be holding back a bit. Thursday night at the Factory Pub & Soup Co., Campbell, the group put together quality musicianship and a love for playing and it came across strong when they played traditional swing jazz, biues and 1950's be-bop. Songs like "Satin Doll"

by Duke Ellington combine strong bass-percussion backdrop with nice solos by Jackson on flute and Mike Oliver on viberaphone. Another tune, "Little Bee Poem," uses a foot-tapping jazz drumbeat with easy, flowing solos by Oliver, Jackson and Davis. Bassist Bob Ryan was steady, providing the melodic bottom

that is needed in jazz. As one sits and listens to "Jasmine" through the evening, it couldn't be helped but to enjoy them if one enjoys jazz. The only drawback the group may have is they only practice

Cawood's violin concert 'full of life'

By Myke Feinman Making his instrument sing, Harry Cawoods' performance of "Chaconne" from J.S. Bach's "Partita in D Minor for Solo Violin" was full of

Market St., until Oct. 15.

Bach's music is normally dry and mechanical, or light and giddy. This piece starts slow, almost sad and grows intensely.

Cawood, who just flew from London, after flying from Canada to London, suffered a little jet-lag, but the informal performance remained professional.

Cawood's style gives the listener the impression that his rare instrument is a part of him, almost alive.

musician, while Cawood obeyed its every whim. The more intense the music, the Cawood seemed to chase the notes. The instrument leapt from his hands, it seemed.

Cawood's bowing, appearing to saw the violin in half at times, made the tiny piece of wood sound like a full orchestra.

The dynamics changed drasticly from soft to fierce roars. Bach's "Chaconne" tests not only the musician, but the violin as well.

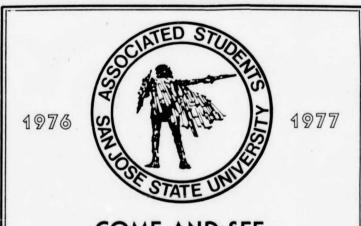

Perhaps Bach wrote the piece for violin makers, instead of for listeners. Certainly, seeing Cawood briskly stroking, joining

said to be written for listeners alone.

Cawood's only relaxation came when the music slowed. He remained intense through most the piece, breathing heavily enough to be heard. Either Bach wrote the piece to make professionals like Cawood (who has played concert master in British and Canadian symphonies) sweat, or Cawood's jet-lag proved to be too much for him.

The concert was for Prof. Patrick Meierotto's Music 118-A class, Survey of Music Literature, which offers live performances. The concerts are open to The violin seemed to be the union, the piece can't be and admission is free.

The College Plan.

12 months of checking for the price of 9.

The College Plan gives you a lot of bank. You get unlimited checkwriting all year long. But you only pay for nine months.

There's no minimum balance required. You get our monthly Timesaver* Statement. And at many offices near major college campuses you get Student Representatives to help solve your banking problems

You pay just \$1 a month for the nine-month school year. And there's no service charge at all for June, July, August, or for any month a balance of \$300 or more is maintained.

During the summer it's absolutely free. Write all the checks you want. Your account stays open through the summer, even with a zero balance, saving you the trouble of having to close it in June and reopen it in the fall.

You get more. You get overdraft protection and Student BankAmericard,* if you qualify. We offer educational loans and many different savings plans to choose from. And we serve you with more than twice as many offices as any other California bank. So if you move, your account can move with you, to a new office that's more convenient. We also offer several free booklets including helpful information on saving money, establishing credit, and finding a job after graduation.

The College Plan Checking Account is what you want. Why not stop by and find out more about it. And let \$1 a month buy all the bank you need.

> Depend on us. More California college students do.

BANKOFAMERICA

Spartans bury Utah State, 45-1

By Dave Johnson

By most yardsticks, a 45-10 victory should be quite gratifying to a college football team and a new head coach in his first game at that position.

But one game does not a season make, and the Spartans and head coach Lynn Stiles talk more of the small things which weren't accomplished than of the large things which were, in Saturday's season-opening rout of Utah State, before a crowd of 19.123.

"We really feel good about how we played tonight," said cornerback Gerald Small, "but you can never be satisfied. We played well - sure - but you can always be better."

Stiles agrees. "I am reasonably pleased with our execu-tion," he said. "We'll get better, though. I still don't we have as funda

mentally sound a base as we'd like, but we're work-

'This is an extremely hard working team. All things under consideration hard work, motivation, and talent - it is one of the finest teams with which I've been associated."

Saturday night. Establishing dominance on both sides of the line early, the Spartans all but ended matters for the Aggies with a three-touchdown blitz in just over five minutes at the end of the second quarter, to take a 28-3 lead off the field at the half. The first half scoring was capped by a 62-yard touchdown pass from quarter-Steve DeBerg to flanker Steve Joyce.

'For that play we had both wide receivers doing streaks," DeBerg said. "Gary (Maddocks) was on the left and Steve right. Steve looked more open like we had a better chance there.

Ground dominance That may have been the most spectacular offensive play of the night, but it was on the ground where SJSU asserted its cominance gaining 325 yards overland, with a whopping team average of more than seven

yards per carry.

Tailback Rick Kane led the ball carriers with 124 vards on 17 carries, but he was well supported by a cast of seven other runing backs. Tailback Walt Robinson (84 yards on six carries) and fullback Lewis Nelson (63 on six) made substantial contributions to the four sustained touchdown drives.

Spartans established their ability to run the ball on their first drive after receiving the opening

kickoff. Though the drive ended with a fumble, they had moved the ball from the San Jose 33 to the Utah State 20 in only five ground plays.

After an exchange of punts, the Spartans began their first touchdown drive toward the end of the first quarter. Key runs by Nelson and Kane took the ball quickly from the San Jose 45 to the Utah State 16. From there, DeBerg hooked up with Kane circling out of the backfield underneath the Aggies' deep coverage, for six points. Lou Rodriguez's conversion made it 7-0.

After the ensuing kickoff. Utah State embarked on its only sustained drive of the game. Moving the ball almost exclusively through the air, the Aggies survived a near interception by strong safety Dwayne O'Steen, and took the ball to the SJSU 27. There, on a key third down play, defensive tackle Wilson Faumuina and linebacker James Hawkins combined to stop a screen

pass for a two yard loss. Tom Mayes' 44-yard field goal cut the SJSU lead

to 7-3 SJSU's next touchdown drive began with the Spartans the benificiaries of a 31-yard punt which Robinson returned nine yards. Beginning the drive at the Utah State 33, it was quick four plays to the score: three totes by Kane. sandwiched around an 18vard pass from DeBerg to Gary Dudley on a slant pattern, which took the ball from the 24 to the six. Kane took it in from the three.

The Spartans had their next opportunity barely a minute later after line backer Pat McLaughlin fell on a Utah State fumble on the Aggie 45.

Nelson powered his way for 13, and after two incomplete passes, DeBerg hit Kane on the same pattern which produced the first score, and Rick took it to the 15. A personal foul pencut that distance in half, and three Kane carries netted six points. The scoring play was a one-yard buck off left tackle, Kane following Nelson through.

With only 1:35 showing on the clock, it looked as if the Spartans would take a 21-3 lead in at halftime before DeBerg's and

Joyce's fireworks.

SJSU's defense got the ball back quickly, holding Utah State to one series. and forcing the punt on a third down quarterback sack by Faumuina and nose guard Dan Durbin.

One punt and two plays later it was 28-3, and the Aggies might as well have started preparing for Arkansas

Gill paces defense The SJSU defense, led by defensive player-of-thegame Randy Gill, came out of the locker room fired up and Utah State was able to run exactly three plays before the margin was upped to 31-3.

The key plays of the Spartan scoring drive were a 33 yard gain by Kane off SJSU's I-formation option, and a 26-yard pass from DeBerg to freshman tight end Vic Rachashani. which gave them a first down on the Utah State 14. Stopped on third down two plays later, they called on

24-yarder for 31-3. Much of the third

quarter was characterized by stingy SJSU defense Gill was superb, breaking up pass plays, tackling, and forcing tackles. It was only fitting that the defense should score the only touchdown of the quarter. Defensive tackle DePorres Washington had just sacked quarterback Eric Hipple, forcing Utah State into a second-and-14 situation when linebacker Rayford Roberson stepped in front of a Hipple pass. Roberson took the ball eluded three or four wouldbe tacklers, then turned on the afterburners down the right sideline. Thirty-six yards later it was 38-3.

The second offensive unit accounted for the Spartans' final touchdown, in an impressive, 85 yard drive, consuming 11 plays — all on the ground. Walt Robinson, James Tucker, and Pat Kohlman shared rushing duties on the drive, with Robinson taking the ball from the San Jose 15 to the Utah State 16 and Kohlman getting the score from the one

Specialty teams excel

Stiles saw as encouraging signs, the play of the special teams and the defensive unit's accomplishment of holding the Aggies to 41 yards on the ground.

"Our goal for this game was to keep them under 100 yards rushing," he said.
"You can see we more than met our goal."

The special teams held Utah State to 67 yards returned on eight kickoffs, and covered both of Jeff Cunningham's punts well enough to force a fair catch each time. In fact, the coverage of the SJSU special teams was so good that only once all night did Utah State put the ball in play outside their own 20, following a Spartan kick. That they started from

their 22. "Our kicking game ena bled us to obtain good field position," Stiles said. "Randy Johnson really hangs his kickoffs and Paul Kolesnikow did a remarkable job on kickoff coverage.

Stiles did not express great concern with Utah State's ability to move the ball through the air against the SJSU defense (they gained 217 yards on 20 for

Spartan tailback Steve Bruce dives for yardage deep in Utah State territory in last Saturday nights opener. SJSU scored four touchdowns in the first half and went on to route the Aggies 45-10, behind the running of Rick Kane, the passing of Steve DeBerg and the tough Spartan defense. Kane rushed for 124 yards in only 17 and the defense held USU to 41 yards rushing. The Spartans take on the University of Hawaii this Saturday at Spartan Stadium. Last year Hawaii beat

When the number one defensive unit against the rush takes on the team that led the conference in rushing in 1975, that confrontation could well determine who will take home the PCAA crown for 1976.

The SJSU Spartans, stingiest in the PCAA against the rush last season, held their opponents to an average 103 yards per contest and seven touch downs

On the other hand, the Long Beach State 49ers led conference rushing with 2,660 yards on 584 carries (241.8 avg.) and 23 touchdowns in 1975.

With rebuilding tasks facing the other three conference teams (University of Pacific Fresno State and Fullerton State) the Oct. 16, Spartan Stadium showdown between the Spartans and 49ers could well decide if SJSU will bring home its second crown in two years.

Leading the 49er ground attack will be a 4.5-40 yard speedster, Johnny Washington along with Mark Bailey who scam-pered for 532 yards on 109 carries in 1975.

The Spartans who were undefeated in conference play last season (5-0-0), will face a remarkably strong 49er aerial attack as well. Throwing for 1,532 yards in 1975, 49er Quar-terback Joe Paopao will be aiming at two veteran receivers in Mike Willis and redshirt Dan Jones. Willis latched on to 39 passes in 1975 for 701 yards. Due to the recent success of the Spartan football team, along with the expansion of Spartan Stadium to accommodate 37,000 fans, SJSU President John Bunzel found it necessary to issue a letter of withdrawal to PCAA com-missioner Jesse Hill to insure the Spartans flexibility in the future, SJSU

New water polo coach optimistic about program

By Ron Coverson

Making a winner out of a waterpolo team that experienced one of its worst seasons in SJSU history must be considered a difficult task.

So lies the job facing newly appointed head waterpolo coach Tom Bel-

A graduate of UC, Berkeley, Belfanti replaces former coach Mike Monsees. Monsees was not asked to return to his old post after his contract expired last year.

With a host of players returning from last year's team and a list of jaycee transfers to go along, Belfanti is confident he can turn the program around.

"I'm very optimistic because we have a good nu-cleus of talented players here at school," Belfanti

Although Monsees did the real recruiting, it's up to Belfanti to mold the team into a solid unit.

Belfanti seee his task as being "a real challenge. Right now I have the guys doing two-a-day sessions (morning and afternoon). Hopefully they will be in good shape by the time the season starts," Belfanti

Among the players who are returning from last year's club are Jeff Pendel-ton, Gary Krage, Eric Belenfat and Vance De-

Also coming back this season is Carlos Gonzales. one of the stand-out players on last year's squad.

Jaycee transfer Larry Miller (Sacramento City College) should add

strength and depth to the

Many coaches think that defense is the key ingredient in any rebuilding job and Belfanti concurs with this ideology.
"We plan to solidify our

defense by using a tight man-to-man," explained

"Our players are fast, and we plan to utilize this speed in counterattacking our opponents whenever pos-"he added.

Belfanti plans to incor-porate a ball-control type offense into his team, using club's speed to get the ball down the pool. "I guess you could say

it's a hurry up, slow down type offense," he said. The team's first game is Saturday against Sacra-

SJSU grid future in limbo

By Dave Johnson

San Jose State University has officially notified the other member schools of the Pacific Coast Athletic Association that it in-tends to withdraw from PCAA football competition, beginning with the 1977 sea-

In a letter dated July 26. and sent to the presidents of the other PCAA universities, SJSU President John Bunzel wrote, "With the plans for expanding our stadium, classification in Division I, and the need to bring major football schools onto our at-home schedule, we feel that this action is most important to the future of our athletic program."
The decision to with-

draw, if followed to completion, will not affect the University's affiliation with the PCAA in other sports. This is permissible under PCAA rules adopted after San Diego State University withdrew its football program from the league last year, while asking to remain in the PCAA in other sports.

The notification, however, is only a statement of intent, and does not reflect an iron-clad determination on the part of SJSU to play as an independent. According to Spartan Athletic Director Bob Murphy, it was given to insure a greater degree of flexibility for the 1977 season. "We're not really

married to the idea of with-drawing," Murphy said. "It's just that the PCAA has a rule that member schools must give one year's advance notice of any intention to withdraw from the Association."

SJSU may retract its statement of intent at any time before the semiannual conference meeting, scheduled for June 1977. Division I

The Spartan decision comes in advance of a possible National Collegiate Athletic Association (NCAA) realignment of its member schools from three divisions to four. SJSU is currently ranked in the NCAA's Division I, the highest rating possible. Under the proposed

Fresno State, University of Pacific, and Fullerton State, would be down-

graded to a new Division

Realignment will be

Spartan officials believe, however, that there is little likelihood of

its adoption next year.
"I was just talking to
(PCAA Commissioner)
Jesse Hill," said Sports Information Director Wynn

"He said — and I agree with him — that realign-ment to four divisions from three is pretty much a dead issue. There have been too many howls against it.

The howls, according to Cook, have come largely from schools, such as the other PCAA teams, which would face downgrading under the four division alignment

Upgrade schedule

San Jose State's possible withdrawal from PCAA football is part of a continuing effort by Spartan intercollegiate athletic officials to upgrade the SJSU football schedule. The university has compiled a list of the 20 schools it would most like to play and has been in contact with some of these schools.

Among the major colleges with which SJSU has been negotiating for future games are Baylor University and the Universities of Colorado, West Virginia, and Houston.

Colorado and West Virginia are already on future Spartan schedules, with SJSU slated to visit the Buffaloes at Boulder in 1978, and the Mountaineers scheduled to pay San Jose a visit in 1981. According to Cook, the agreements with Baylor are "about 90 per cent complete," for a home-and-home series in

the expansion of Spartan Stadium will be an important factor in SJSU's ability to secure agree-

Other factors, however, favor San Jose, once the

stadium is enlarged.

"Because of our lo-cation, we are in a favorable position to draw quality schools from the East and Middle West." he said. "People want to come to the West Coast. The prospect of coming to the Bay Area — of perhaps spending a day in San Francisco — is more attractive to most than going to Little Rock or University Park at Penn State.

Educational Experience Murphy praised the virtues of travel which would accrue with a more national football schedule.

"Travel should be an educational experience, he said. "For instance, if we had Army on our schedule, a trip to West Point might be the only chance some of our kids get to see New York City. A game with Northwestern University would bring them to Chicago — give them a chance to see one of the country's most vital cities. The learning opportunities afforded by travel such as this would rival anything learned in the classroom or lab."

Murphy stressed that SJSU wants to be aggressive about its football future, but this does not necessarily exclude the PCAA.

"We aren't going to wait for something to happen, he said. "We're going to make things happen. We want to be opportunists, to seize the best opportunity possible. That may involve the PCAA."
PCAA future?

Murphy suggested that the future of the PCAA may be tied to the University of Hawaii, whose schedule already includes several PCAA teams, including SJSU. If Hawaii were introduced into the PCAA, it would not only make the

conference more attrac-

tive, but might provide a

possible post-season bowl site for the PCAA champion to host

'We might take a cue from the Western Athletic Conference," he said. "A few years ago, the Arizona schools (Arizona State University and the University of Arizona) weren't going to any bowl games, except maybe for an occasional appearance in the Sun Bowl. So they decided to start their own — the Fiesta Bowl."

According to Murphy, the Fiesta Bowl is now a highly successful, postseason promotion, having attracted a major team such as the University of Nebraska.

"Suppose we were to in-stitute 'the Aloha Bowl,' " he said, "hosted in Hawaii by the PCAA champion. The conference could invite another major college which may have been denied the opportunity to play in one of the more traditional bowl games.

"Last year's matchup would most likely have been SJSU vs. the Univer-sity of California, a pairing which might have generated more interest than last year's Rose Bowl.

Last year's Rose Bowl matched Ohio State University vs. UCLA, a rematch of a regular season game in which UCLA was trounced by the Buckeyes, 41-20. By contrast, SJSU and California had played a

by Cal, 27-24, on a last-minute desperation pass from Joe Roth to Wesley Walker.

Realign Pac-8

Among the options which the University wants to keep open is the somewhat remote possibility of a realignment of the Pac-8 Conference to include the University of Arizona, Arizona State University San Diego State, and San Jose State.

According to Murphy some of the members of the Pac-8 have expressed concern about playing in some of the other members' small home stadiums — particularly at Pullman, Washington (Washington State University), and at Corvallis, Oregon (Oregon State University), and this has led to speculation about a Pac-8 realignment.

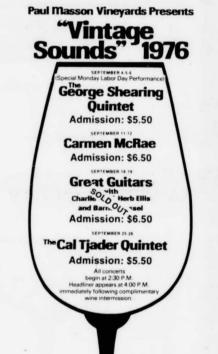

Flexibility

And San Jose State's Spartans, the opportunists, would like to be there to accept the nod if it is

"The key is flexibility." said Murphy.

"My guess is that if we don't withdraw this year. we will give notice of inten-tion of withdrawal again next year, as long as the rule (requiring a year's notice) still applies.

"We'd like to be in a conference, but if none of these ideas work, then we will go independent. But whatever happens, we want to cause it to happen here at San Jose State.

Long Beach leaves

49ers follow Spartans' lead

By Dave Johnson Long Beach State

University, following the SJSU lead, has also notified Pacific Coast Athletic Association Commissioner Jesse Hill that it intends to withdraw its football team from the conference, effective with the 1977

The Long Beach action, like that of SJSU, is considered a move of flexibility, and may be withdrawn at any time before June 30, 1977. In the letter sent to the

other PCAA schools last week, LBSU President Stephen Horn said that Long Beach decision will be dependent upon the final status of SJSU in the PCAA.

"Long Beach State will continue to work diligently on behalf of having a viable football conference in the PCAA," Dr. Horn said. "If we can continue a conference with a minimum of six competitive teams, Long Beach is strongly interested in that end."

If Dr. Horn's conditions require six conference teams, the PCAA will have to dig up one more team in

order to keep Long Beach in. The PCAA football conference now consists of only five teams, including SJSU and LBS. San Diego State, a sixth conference member, withdrew its football program after the 1975 season

The Long Beach decision, like those of SJSU and SDSU, involves only the football team, and will tionship with the PCAA in other sports.

According to SJSU Athletic Director Bob Murphy, Long Beach State's position purallels a that of SJSU in many ways

"We're in a slightly stronger position because of the plans to enlarge Spartan Stadium," he said. "They're saddled with a stadium with roughly the same seating capacity as ours has now

According to Murphy, LBSU also suffers from operating in the shadow of the University of Southern California and UCLA, two highly visible, nationally recognized football powers. The Spartans' position in

are here.

Student Money Cards

Pot covered by dorm rules

dope policy this semester is partially the result of the high demand for housing, according to Housing Director Cordell Koland.

'There are more people who want an academically supportive, sane situation," Koland said. "We will cater to the academically-oriented more than the party-oriented."

One warning Residents now will get one warning the first time they are caught smoking pot and may be evicted upon the second violation, according to Bill Clarkson Washburn Hall head

New \$10 limit on checks

Increased losses due to bad checks have resulted in a policy change concerning check cashing at the A.S. Business Office in the

Student Union.
Citing an estimated \$400 bad-check deficit for the fiscal year ending June 30. Greg Soulds, director of student business affairs, has reduced check cashing

privileges from \$15 to \$10. "A lot of checks were uncollectable and the majority of those were \$15 checks," Soulds said.

He indicated the \$10 maximum was an effort to cut down on that loss and would be used for one semester on a trial basis.

"In prior years we withhold student records in an attempt to students pay, Soulds added, "but it is now against a school directive prohibiting auxiliary organizations (A.S.) to withhold records."

The \$400 loss is up from \$300 the year before and \$170 in fiscal year 1973-74.

Rules in past semesters have been more lax, according to dorm residents. They cite cases where residents have received

three or more warnings.
Alcohol policy Dorm policy on alcoholic beverages did not change this semester. While the official policy bars drinking in hallways and lounges, alcohol may be carried in opaque containers, according to

Clarkson. 'We're not going to kick down doors to make sure kids aren't sipping beer,"

Clarkson said. Things have changed since the red brick dorms

opened 15 years ago. "I don't think there was any pot on campus at that Koland said. He said he didn't remember anyone being caught smoking dope

days.
"Drinking was beyond bounds and you could be evicted if caught, even on a first offense," Koland

added. Segregated sexes

Until 1968, men and women were segregated: men lived in the Tenth Street dorms and women lived in the Eigth Street dorms, Koland said.

He added that no visitation was allowed and women had to check into their dorms by 11 p.m. weekdays and 2 a.m. weekends. If they failed to check in, social privileges such as dating could be taken away, according to Koland.

If a man and woman were caught together in a dorm room, there was a chance that the man would be thrown out of the dorms, put on college probation, or even kicked out of school, Koland added.

The woman also was subject to disciplinary action if she lived in the dorms, according to

Money Cards Chairwoman chosen being offered

New therapist hired

The card is a creation of the American Campus Marketing Systems, Inc., which plans to be on campus until Friday promoting the card.
The Student Money Card offers a student 40 cupons worth over \$100 in

merchandise at area businesses. The cards cost \$4.50. At least 20 to 40 percent of the proceeds will go to the Spartan Bookstore, according to Dave Mor-tenson, president of American Campus Market-

ing Systems. Mortenson said local merchants are using the card as a method of getting students into their stores He said he plans to sell 2,000 cards on campus

Joyce Ward, has been named the new Occupational Therapy Department Chairwoman at SJSU.

Ward has held teaching positions at Cornell University and Brentwood Hospital in L.A., and served as chairwoman of the Occupational Therapy Department at the University of Puget Sound in Tacoma, Wash.

According to Dean Stanley Burnham of the School of Applied Sciences and Arts, Ward, "is considered an experienced, highly qualified and nation-

ally known leader in oc-cupational therapy." Outstanding reputation Ward served as chair-woman of the Accredita-

erican Occupational Ther-

apy Association, and "has established an outstanding reputation in the field of Occupational Therapy,"

said Burnham. Ward also served as a consultant to the Social and Rehabilitation Services of the Department of Health, Education and Welfare, demonstrating her expertise in curriculum planning and development, Bur-

nham continued. Replaces Burnell In addition, Ward has served as a consultant to the National Institute of Health and has served as chairwoman of the Committee of Basic Professional Education of American Occupational Therapy

Ward will replace Gwen Wright and Dr. Helen Ross, who were serving as cochairwomen after the removal of Dr. Diana Burnell as chairwoman during the spring semester break last year.

Burnell was asked to resign by Burnham, Academic Vice President Hobert Burns and

Bilingual aid program set

SJSU has started a new multicultural-bilingual program in the School of Education, financed by a \$140,000 grant from the National Institute of Education's Office of Bi-

lingual Education.
According to Dean Francis Villemain, of the School of Education, the project is unique because it will be infiltrated throughout each department in the

school. This will result in a uniform upgrading of multi-cultural-bilingual education in each department. He said curriclulm for the new program will continue to be developed on a longrange basis.

Planning ahead

The grant is renewable annually for three years, and, according to Villemain, the department now is working on a plan which will continue the program after federal funds have been exhausted.

Dr. Jack Crawford, director of the office of service and development in the School of Education, will be in charge of evaluation of the new program.

According to Crawford, the new program will initially be directed toward the Spanish-speaking student and will offer semi-nars, workshops and in-service training for education students.

The program will later be extended to include other minority groups.

Helping public

In addition to SJSU students, the program will include instruction for elementary and secondary education teachers in the San Jose area. Seminars also will be open to the public.

The purpose of the

program, according to Dr. Sylvia Gonzales, assistant professor of Mexican-American Graduate Studies, is to give teachers a better understanding of the Spanish culture and language.

Cultural pluralism

Gonzales, a consultant in setting up the program, education to work we must work toward cultural pluralism.'

news summary

Plan seeks cost cuts

WASHINGTON (AP) -The government's new five-year health plan released Tuesday places top priority on controlling runaway medical costs and de-emphasizes last year's proposal to boost liquor and cigarette taxes as a preventative health

The report, "Forward Plan for Health,''
represents the U.S. Public Health Services blueprint for tackling major health problems during 1978-82.

The major concern is health care costs, which rose 300 per cent during the last decade to \$118.5 billion last year, according to Dr. Theodore Cooper, assistant secretary for health in the Department of Health, Education and Welfare.

The new five-year plan, the third in a series, calls for a "major attack on cost escalation as the factor now driving national health

emphasizes greater It use of preventative services, such as public immunization programs, improved quality of care more research on medical malpractice.

The report makes mention, without specifically endorsing pro-posals advanced last year, to restrict liquor adver-tisements and boost liquor taxes and to increase taxes on cigarettes high in tar and nicotine.

Kissinger to Africa?

HAMBURG, West Germany (AP) — Secre-tary of State Henry Kissinger said Tuesday that Tanzanian President Julius Nyerere had invited him to come to Africa as soon as possible to begin efforts to head off a race war. A spokesman for Nyerere, however, said Kissinger had invited him-

In a news conference, Kissinger said he would hold up a definite decision on making such a trip until he received a report from William E. Schaufele Jr., the assistant secretary of state for African affairs, now in Africa. Schaufele went to Dar es Salaam, Tanzania, Tuesday, to be briefed on the outcome of a summit meeting by black African leaders.

Nyerere's press secretary, Sammy Mdee, said in Dar es Salaam that no invitation had been issued to Kissinger.

"He asked to come and we said all right come along," said Mdee.

If Schaufele relays back what Kissinger considers a positive report from Dar es Salaam, the secretary probably will leave Washington for Africa by

Gun mishap kills girl

AUBURN (AP) — A 15-year-old girl was killed when a 22-caliber revolver discharged, striking her in the upper chest, Placer County sheriff's officers said today.

They said the gun apparently went off accidentally Monday while it

was being loaded by a San Jose man, Bob Jellison.

Jellison and the girl were part of a group camped at the American River near Alta. Officers said they had not established a positive identification for the girl.

Holiday death rate up

CHICAGO (AP) - The nation's traffic death toll for the Labor Day weekend was 501, well past the estimate of 460 by the National Safety Council.

The Associated Press count began at 6 p.m. Friday and ended at midnight Monday in each time

The death rate dropped from 516 in 1974 to 407 last year before swinging up again. According to Safety Council figures, the worst Labor Day claimed 688 lives eight years ago.

Pesticide use ended

Two manufacturers have voluntarily ordered a halt to further sale or use of the pesticides Galecron and Fundal because tests indicate they may cause cancer in test animals, the **Environmental Protection** Agency said Tuesday.

EPA said these products, both containing a chemical called chlordemiform, are used only in agriculture, mainly against cotton pests.

It said chlordemiform, agent, is not contained in any products sold for use around homes or gardens. An EPA spokesman

Ciba-Giegy of Greensboro, N.C., and Nor-Am Agricultural Products, Inc. of Chicago, for moving quickly to notify EPA and to take Galecron and Fundal off the market after their own scientists found evidence of a cancer hazard. The spokesman said

there was no evidence that chlordemiform actually causes cancer in human beings. But he said the companies found that mice which were fed doses of chlordemiform during of their most developed malignant

Violence continues

JOHANNESBURG, So. Africa (AP) - Police fired on alleged railroad saboteurs Tuesday in the troubled black township of Soweto, killing one black and wounding another.

Several more people were reported wounded in the Cape Town area where police shot at non-white student demonstrators, apparently protesting the racial policies.

closing of their schools

The violence coincided with Prime Minister John Vorster's return home after three days of talks with U.S. Secretary of State Henry A. Kissinger in Zurich, Switzerland, and a government minister's statement that significant changes can be expected in this nation's domestic

Speech major wins medal, breaks handicapped record

SJSU co-ed Sally Staudte, stricken with polio for 21 years, won a U.S. gold medal in this year's Handicapped Olympic competition in Staudte, 22, helped to

win the team archery event, breaking the world record by 1400

The three-woman team shot four days during the competition, increasing the world record points from 4,185 to 5,585.

According to Staudte, the Handicapped Olympics holds the same events held in the regular Olympics.

"We have people competing in events ranging from basket-ball, track and swimming to high jumps and discus throwing," she

added.
''We compete against someone of the same disability," she said. For example, a paraplegic, someone who has paralysis of the legs, would not compete against an amputee, she explained.

Staudte, a speech pathology major who uses crutches to climb the steep steps of the Speech and Drama Building, dropped out of school last semester to train for the Olympics.

Because of a lack of athletic and handi-capped facilities at SJSU, Staudte trains at

De Anza College.
"We're trying to start more competition at De Anza. Sometimes we only get three meets a year and that's not enough to keep the adrenalin flowing," she said.

"By competing more, we can keep up a level of competency," she said. Staudte first heard of

the Olympics in an adapted P.E. course taken in 1973 and considers the Olympics "a great experience.

Sally Staudte displays the gold medal she Toronto. Staudte, a speech major, broke won during the Handicapped Olympics in the world archery record.

"I got interested and made it to nationals two years later. In 1974 I made it to state competition and was an alternate in last year's games, but I wasn't allowed to participate,' she added.

The Olympics started out with 53 nations and ended with

"A lot of Communist countries didn't enter the Olympics because they claim to have no handicapped persons," she said.

According to Staudte, Cuba, India, Jamaica, Poland and Yugoslavia pulled their applicants out of the Olympics to protest South Africa's treatment of its black majority. Because of the

Olympic incident in 1972, when 13 Israeli participants were

classes. Keller said.

massacred, armed guards were placed outside the separate quarters of the Israeli participants, Staudte

said.
"They did not go to any dances or mingle with the other countries. I guess that was their way of protecting their applicants," she continued.

Staudte plans to compete in the next Olympics.

Open education classes offered

ter classes at SJSU are available to the community through the Open University program.

This program allows public participation in regular university courses not completely filled by SJSU students. Both lower and upper division classes are offered.

"The unique aspect of this program is that Open University students do not have to apply for admission or go through the regular registration process," explained Robert Duman, program coordinator.

The community can come to campus, take classes and experience the academic life of a major university without a lot of red tape," Duman said. Registration open

Open University students pay extension fees (usually \$33 per unit) and register through the Office of Continuing Education. Although classes began Sept. 1, the Open Univer-sity program extends

registration to Sept. 22.
Disqualified SJSU students were first allowed to take a maximum of six units of Open University classes last year in an effort to raise their GPA

Nearly 2,000 fall semes- and requalify for ad-

'This program appears to have been particularly successful thus far," Duman said

Earn credit

Members of the community can earn up to 24 units of extension credit which may be applied toward a degree. Open University and regular students are tested and graded in the same manner, according to Duman.

Department decision 'Each department decides which of its classes will be open to persons of the community," Duman

said The classes are indicated by footnote 98 in the class schedule. However, departments often forget to add the footnote so Duman suggests students wanting a particular class should contact the Office of Continuing Education for updated information.

Last year more than 800 students participated in the program. This year, due to increased advertising and more community awareness, Duman anticipates an even higher enrollment.

For more information, call the Office of Continuing Education at 277-2182

Keller said.

The old and the new accentuates the moods of admirers as they stroll through the recently renovated Home Eco-

nomics Building. Shades of orange and ellow brighten the dimly lit hallway, creating a "cheery" and new look for

the building.

Reaction has been favorable from students, faculty and administrators, stated Rosalie Keller, technical assistant for the Home Economics Department.

The exterior remains the same, except for a new coat of paint, with all the mosaic designs and handcarved posts retained.

But the interior has been completely renovated with enlarged labs and relocated faculty offices. The main hallway is no longer a straight line from entrance to entrance.

Most equipment, such as ranges and testing devices, is modern, stated Keller. This allows students to experience a larger range of activities, she noted.

The \$1.4 million renovation project, estimated to cost 50 per cent less than a structure, was completed in May.

New library by 1980

Construction of a new five-story library to be completed in 1980, will give SJSU two seperate library facilites with one central card catalogue.
The new library, to be

located on the present site of the university corporation yard, will cost an estimated \$11 million.

Construction of the library is scheduled to begin in late 1978.

Space formula According to Dr. Douglas Picht, executive dean, the decision to build the new structure is the result of a "space available for-mula" set up by state fi-

nancial experts. The formula measures the relationship between the number of students on campus and the size of the existing library space. Picht forsees SJSU functioning easily on a twolibrary system

"It's not that earth-shattering," he said. "Many institutions have more than one library. Look at Stanford or Berkeley.

Not convenient James Martin, director of library public services,

"It will be a terrific

inconvenience for students and faculty alike," he said. "It's a bad deal for everyone concerned." Martin drew the

analogy of a student trying to research a topic such as

"This kind of subject will involve research in was finally returned in the several different areas 1973-74 fiscal budget Compromise plan

education, medicine, psychology and sociology According to Picht, the new library is a compro-mise of sorts. "It's con ceivable," he said, "that if with the card catalogue in one building and the documents scattered about, the student will have something happened to the a real problem.' state economy it could pre-Money reverted vent the building of the The library controversy dates back to 1966 when an library. I don't want to see that happen. I'd rather compromise and at least 18-story building was

have something now Picht added that the Board of Trustees last June hired John Pflugger, a San Francisco architect, to design the building and that his working drawings must be presented to the state legislature for approval before construction can get underway.

Tentative plan
The tentative plans call for the new building to house the card catalogue containing the most major works, while the old facility will be used for specia category volumes and documents.

The corporation yard will be moved to the corner of 10th and San Fernando streets after an architect is hired by the board trustees, either at their September or November meetings.

Institute offers overseas study

Students interested in competing for overseas study awards are invited to meet with Fulbright program adviser Donald DuShane Jr. at 10 a.m. Sept. 14 in the Guadalupe Room of the Student Union.

Five hundred and fifty awards for study in 50 countries will be made available to U.S. citizens for the 1977-78 academic year through the Institute of International Education, DuShane stated in a faculty memo. Applicants must be able to speak the language of the host country. DuShane stressed. Also, their study projects must be of the type that cannot completed in this country.

Accepted applicants will receive travel expenses, room, board and tuition for a year's study abroad, he said. The purpose of these

grants is to increase mutual understanding between the people of the United States and other countries through the exchange of persons, knowledge and skills, Du-Shane explained.

The campus deadline for submission of completed applications is Oct. 1, 1976, he said. So far no SJSU student has applied for this year's awards.

Two SJSU graduates are currently on the program, DuShane said.

Bill revises loans

Representatives recently passed a bill designed to make it easier for college students to receive educational loans but harder for them to default on repay-

The bill would revise several features of the Guaranteed Student Loans Program, under which the government insures student loans from private lending agencies or schools and in most cases sub-

sidizes the interest.

To encourage lending agencies to loan more money, the bill would revise the government incentive from its present one to three per cent special allowance for the lender, to one to five per cent, while at the same making loans easier to

Since repayment records are better in states which administer their own guarantee programs, the bill will allow states to set up their own agencies.

Offset costs Also, state guarantee agencies would receive a one per cent administra-

tive allowance to offset part of the cost in admini-

stering the program. The bill contains a provision that will prohibit students from claiming bankruptcy for five years after the first payment of a guraranteed loan becomes due, unless hardship can be proven on the part of the debtor or his family

The measure also contains provisions aimed at protecting borrowers and cutting defaults. These provisions provide for mandatory payment of loan proceeds by check, which must be endorsed by the students.

Troubles traced According to Richard Pfaff, associate director of financial aids at SJSU, the loan program with banks started out to be very per-

missive. "The trouble started when banks found themselves not making enough profits off student loans. An ordinary bank loan would bring in only seven per cent," he explained.

More trouble began with the Federal government's

state legislature, when the

state was in financial

trouble. During the next

two years the admin-

istration sought to get the

money reappropriated but

cost of \$11.4 million.

Bigger problem A bigger problem than bankruptcy, according to

Pfaff, is default. "It's like killing the goose that laid the golden egg," he said. "Students who skipped out and abused the program made difficult for future students.'

As a result, the banks began to tighten up their policies. Many banks have dropped out of the program altogether, while others make only renewal loans, he explained.

According to Pfaff, the percentage of student bankruptcy depends upon the comparison.

'Hypothetically speaking, five years ago SJSU had three bankruptcy cases, while the end of the 1976 school year saw 150,'

National Figures

But in comparison with national figures of the percentage of student loans taken out and those with bankruptcy claims, the percentage is much smaller, he explained.

In addition, the bill increases the income level that determines whether a student automatically qualifies for a subsidy for part of the interest paid on

a loan. The present adjusted income, set in 1965, is \$15,000. The bill would increase this to \$20,000 in

1977 and \$25,000 in 1978. The maximum amount an undergraduate may borrow will remain at \$7,500, while the maximum for graduate or professional students would be in-creased from \$10,000 to

The HP-22 easily handles the kinds of calculations you face in business courses today. in management tomorrow. Breeze through business math calculations. Build existing statistical data into reliable forecasts. If you're going into business administration, this is the calculator for you.

· Combines financial, mathematical and statistical capabilities.

· Performs complex time-value-of-money computations including interest rates.

· Performs rates of return and discounted cash flows for investment analysis.

• Performs extended percent calculations, accumulated interest, amortization, etc

• Ten addressable memories.

• Full decimal display control.

HP-25C Scientific Programmable with Continuous Memory. \$200.00*

The HP-25C is our keystroke programmable. It can solve automatically the repetitive problems every science and engineering

student faces. What's more, its Continuous Memory capability lets you retain programs and data even when it's turned off.

. Continuous memory capability.

• 72 built-in functions and operations

 Keystroke programmability. • Branching, conditional test and full editing

capability.

• Eight addressable memories.

• We also offer the HP-25, (without the Continuous Memory feature) for \$145.00%

HP-27 Scientific/Plus \$200.00*

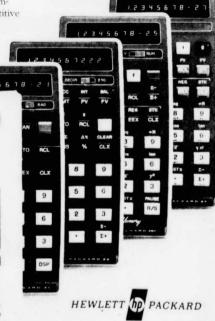

The HP-27 is for the science or engineering student-whose course work extends into business administration. The reason: It features every pre-programmed scientific function we've ever offered, plus comprehensive stat and financial functions. That's why we've dubbed it our Scientific/Plus.

• 28 pre-programmed exponential, log and trig functions, 15 statistical functions, 10 financial functions - 53 in all.

 10 addressable memories – 20 memories in all

• 6 selective clearing options give you flexible use of memories.

· Fixed decimal, scientific or engineering display formats.
