### Paseo fountain flows

Though water is scarce in northern California, the San Antonio fountain on Third Street continues to spill its 84,000 gallons over the concrete steps. The water is changed monthly and is unrecyclable because of

cleansing chemicals and litter. However if the drought is prolonged, the city will turn off the fountain, saving both water and energy. It would cost approximately \$50,000 to close it down, city officials said.

### Non-existent policy claimed for Wey's non-reinstatement

The university used a nonexistent policy when it refused to rehire Dr. Nancy Wey for a fourth year as a temporary art lecturer, charged Dr. George Sicular, Wey's advocate during her grievance hearing.

Wey lost her bid for reappointment last week when the campus grievance committee said she had not presented enough evi-dence to show she had been wronged.

The administration said Wey was not rehired because it is against SJSU policy to appoint temporary persons for more than three consecutive years unless an unusual need with the department requires

Wey maintained this policy does not exist. She is teaching at CSU Long Beach and is not yet sure whether she will appeal her case in court, said Sicular.

"It was never approved by the

### Dr. George Sicular

Academic Senate," Sicular said. 'It's just a matter of convenience. It's easier to get rid of people after three years than it is after four.

Sicular said this "policy" is applied to virtually all temporary faculty and was not arbitrarily brought in to the Wey case, although there had been some animosity between Wey and the administration.

Dean Robert Sasseen, administrative representative during the hearing, said it all depends on how 'policy" is defined.

signed by the president, then there is no policy limiting temporary ap-pointments," Sasseen said. "But I deny that definition."

in administrative memos and has been included in letters sent to temporary faculty members at the time they are hired, Sasseen said. "It's not that the policy is unknown," Sasseen said. "Every one that needs to know knows."

## **Ferguson: students** should control lease

### By David Willman A.S. President James Ferguson

has charged the SJSU administration does not want A.S. to control the Student Union lease. He further speculated the University Foundation is undercharging the Union for its services. "This building is maintained by

student fees and there is no reason why students shouldn't control the lease," Ferguson said at a news con-

ference Thursday. He did not specify the amount undercharged by the University Foundation or the areas of service that are not being fully billed. The University Foundation is

charging the Student Union \$11,991 for accounting this year. The rate is established annually by Glen Guttormsen, SJSU director of business affairs.

Guttormsen said there is no in tentional undercharging for S.U. accounting services and denied Ferguson's claim the administration opposes A.S. controlling the lease. We haven't taken a formal posi-

tion," Guttormsen said. An ad hoc committee of the Student Union Board of Governors tomorrow will again discuss the pros and cons of allowing A.S. to gain control of the S.U. lease.

The current university controlled lease expires June 30.

The five member committee consists of A.S. Treasurer Maryanne Ryan, A.S. Vice President Jeff Brown and students Rene Singleton and Michael Alvarado and S.U.

Director Ron Barrett. Ryan, Ferguson and some S.U. Board members have contended A.S. should maintain the lease because student fees are the major

basis of support for the union. Each SJSU student is charged \$11 per semester in S.U. fees.

Barrett, a non-voting member of the S.U. board, said the Student Union is run well now and sees no

County approval needed

reason to switch lease holders.

Ryan agrees with him in part. "We do have a damn good Union," she said. "But I say, why not change the lease?"

A major point of disagreement centers over A.S. executives' claim that the A.S. Business Office (ASBO) can handle the Student Union accounting services for less cost and more convenience than the University Foundation.

The University Foundation has supervised the account since 1967, when Student Union construction began. The account now totals \$775,000, according to Stella Berboth, University Foundation fiscal supervisor.

Ryan said the ASBO can handle Student Union accounting at a lower cost than the current \$11,991 rate.

'We haven't done a complete cost estimation, so I'm not yet completely sure," she said.

Guttormsen, however, said that even if A.S. attains the Student Union lease, the accounting services will not automatically be switched. "The lease is strictly for the physical facility," he said

Another question mark in the lease issue is whether or not A.S. will assume liability for paying back funds which were previously issued as revenue bonds by the CSUC Board of Trustees. The revenue was used for building the Student Union. Guttormsen said his office would

still be required by state law to pay back the funds. He said a "substantial" percentage of S.U. student fees would still be committed to paying back the bonds.

Ryan has argued that A.S. will assume the responsibility if it acquires the lease.

Although former ASBO Director Greg Soulds said in December that his office could perform Student Union accounting services at less expense through a new com-puterized system, interim ASBO Director Jean Lenart would not comment on the possibility.

Ferguson said no computer is needed. "One person in the (A.S.) Business Office can do the job," he said. "No additional personnel would have to be hired."

Ferguson said the accounting matter is far less important than opponents to the proposed lease change say

Berboth, of the University Foundation, said her office handles Student Union account-related items daily. "The Student Union account is

one of the most active," she said. "We process approximately 500 receipts from the (S.U.) games area a year, and about 100-150 checks a month.

"There is a tremendous amount of filing," Berboth continued. "Over one year, it might take one and a half qualified persons' salaries to do

Berboth said she does not know if any University Foundation personnel would be laid off if the S.U. account were taken away from her office

# **Computer sets up carpools**

A countywide carpooling program aimed at eventually involving 175,000 commuters begins operations tomorrow — that is, if it is approved by the Santa Clara

The program would utilize a computer to match persons who live

work or go to school within a similar area, Gedymin said. Operated jointly by the California Department of Transportation

(Caltrans) and the Santa Clara County Transportation Agency, the program would cost \$100,000 for the Gedymin continued, the cost would

be "virtually nothing," as the only expenses would be to operate the computer.

Information leaflets and registration cards will be distributed at major employers, shopping centers and colleges in the county, he said.

A person interested in becoming involved in the program can take a

card from the information center. fill it out, and mail it to the computer center in San Francisco.

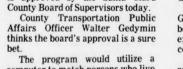

The computer will match persons who live and work in the same areas, and send to each person the names and telephone numbers of those persons with whom he is matched. Gedymin said.

It will then be the participants' responsibility to make contact with those he is matched with to work out specifics of their carpooling plan.

Gedymin said information leaflets and registration forms should arrive at the SJSU campus before April 1.

County Transportation Public Affairs Officer Walter Gedymin thinks the board's approval is a sure

## Female leaders hit stereotype

#### By Cheryl Dennison

Mayor Janet Gray Hayes and San Francisco Supervisor Dianne Feinstein discussed the political difficulties facing a woman and their fears for this country's future during a talk last week at Gavilan Com-

Relating some of her personal experiences, Hayes said many male mayors at her first U.S. Conference of Mayors were incredulous about her presence.

When I walked in the conference room, a few of the men asked me Whose secretary are you, dear-?' " Hayes said.

When introduced to her, a Kansan mayor said, "You mean they let women be mayors in your city

"Well, no one 'let' me be mayor," she told the 200 persons in the audience. "I worked hard to get where I am."

Hayes remembered her years as a city council member, when Representative Norm Mineta was mayor

"He kept introducing me as 'the prettiest member of the council,' " she said. "I told him I was flattered but that I preferred he wouldn't do it. But he kept on doing it anyway. Male rescue

Councilman Roy Naylor, sen-sitive to her discomfort, solved the

problem for her

"The next time the mayor introduced me as 'the prettiest member,' Roy jumped up and took a bow," she said

Feinstein, a supervisor since 1970, said she has had similar experiences.

"A radio commentator told me once I shouldn't accept the presidency of the board of supervisors because I was 'only a woman and a newcomer,' " Feinstein said. "This, despite the fact that I was the most experienced of the non-incumbents

Feinstein chastised the news media for "going out of their way to put women in an awkward position and to dramatize their femininity

In the supervisor's building, the women's restroom is so far from the meeting chambers that Feinstein said she would have to miss at least five votes to use it.

"So one time, I just used the men's restroom, which is right next to the meeting room," she con-tinued. "Well, someone must have seen me because every radio and TV station in the country called me to find out about the 'liberation of the restroom.'

"I knew I wanted to be in government since I was 16," Feinstein said. "My great misfor-

tune was to be put in a female shell."

Her husband, sitting in the first row, perked up and said, "I don't think so!

Women have always had difficulty getting in the political world. Feinstein and Hayes maintained.

At Stanford University, she said she found the other students would accept "a monkey, an orangutan, just about anything else besides a woman" for student body president.

Haves quoted St. Paul as saving "Let women learn in silence" and the philosopher Nietzsche as saying When women crave for learning there must be something wrong with their sexual apparatus.

"We had to fight for the vote and for credit," Feinstein continued. "And we're still fighting for a 24word amendment that does nothing more than give us equality under the law.

Hayes, the first woman to head an American city with more than 500,000 persons, said her election in 1975 encouraged two other women to become large-city mayors.

'One woman had been on the San Antonio, Tex., city council for years," Hayes explained. "She said she watched my election closely. When I won, she asked herself 'Why not?' She ran and won.

The United States faces serious

problems and needs good people, regardless of gender or race, Feinstein said.

'What I fear most in this country," Feinstein said, "is the creation of a climate similar to Germany in 1933, with our heavy unemployment and the radical groups on the right and the left."

While she spoke, seven plainclothed Santa Clara County Sheriffs, at the request of college and Gilroy officials, patrolled in and around the Gavilan Theater to prevent any attempts on Feinstein's life

Terrorists have threatened three San Francisco supervisors with bombs that were discovered before they could explode, Feinstein said.

"I've read and tried to un-derstand why they want to do us in," she said. "I've found that no member of a terrorist group has come before a government body to

advocate a program of change." It is easy to "carp" on society's problems, but it is much more dif-ficult to offer constructive suggestions, Feinstein continued.

'American foreign policy has not always been the greatest," she said. "But no other country has done more to feed the poor, had greater technical and human rights ad-vances, or enjoyed a freer life style.

Mayor Janet Gray Hayes relates her ordeals as a female politician

## takes over social controls

### By Nancy Steffen

Every day many Americans spend hours in front of TV while their minds unquestioningly absorb the images and messages that flash before them.

According to research and surveys done over the years, the consequences of a heavy amount of TV

Nancy Steffen is a Spartan Daily staff writer

viewing, especially violence, have a tremendous psychological effect of which most people are unaware. One-third of all American adults

watch an average of four or more hours of television per day. A study by the A.C. Nielsen

Company states that 75 per cent of all network dramatic programs contain violence with over seven violent episodes per program.

This exposure causes people to learn the role of a victim and to accept violence as a social reality they must live with or flee from.

Heavy viewers see the real world as more dangerous and frightening, and are less trustful of their fellow citizens than those who watch very little.

A top television research team reports that by mobilizing fear, the television medium has replaced the

### Reducing heat wastes fuel

### Editor:

San Jose State has started "Project Save Energy" by turning the thermostat down to 65°F. church as the toughest means of social control.

Although people aren't television hermits who depend solely on it for their view of the world, there are many aspects they will never see.

Most people will never see the inside of a hospital operating room, a corporate board meeting or a police station.

People accept TV characters as true representatives in the real world

That idea doesn't seem unrealistic when you learn that 250,-000 letters requesting medical advice were sent by viewers to Marcus Welby, M.D., during the first five

years of his "practice" on TV. If TV's influence on adults is that great, consider its effect on children.

Children between the ages of two and five watch an average of about 23 hours of television a week. They begin watching when they are threeyears-old, since parents use TV as the "electronic babysitter."

By the age of 10, the average child spends more hours a week in front of the TV screen than in the classroom.

This amount of exposure has caused children to become passive and apathetic towards violence and more aggressive.

Teachers see an increase in passive behavior, more shyness and more withdrawal. Children are asking fewer questions and volunteering fewer answers.

It's difficult for young children to distinguish between fantasy and reality so that the idea of being like Batman or the Bionic Woman might seem possible.

Television has even had an influence on the structure of family life

As set ownership jumped from 20 per cent to 50 per cent in 1951, the amount of visiting and entertaining dropped from 25 per cent on a typical day to 13 per cent.

Sixty per cent of families have changed their sleeping patterns, 55 per cent have altered meal times and 78 per cent use TV as an electronic babysitter.

The facts convey the dangerous potential of the "electronic brain-washer" that individuals must learn to control.

Watching television is a means of escaping the problems of life as the realities of the world become unbearable.

If you don't consider yourself a "addict," think again the next TV time you turn on the boob-tube and settle into a pattern of mindless watching.

### Horn of plenty almost empty; consumers can solve problems

By Tony Bizjak Last week California skies were spotlessly blue. In San Jose, temperatures climbed above 70 degrees. It seemed humorous then, when an order came from the California

Tony Bizjak is a Spartan Daily staff writer.

Public Utilities Commission to turn thermostats in buildings down to 65 degrees

Who in California had his heater on? The order, the PUC said, is to

help alleviate the national gas crisis. A national gas crisis, they say. How can anyone be as far removed and unconcerned with this supposed gas crisis than a person basking under the California sun?

But finally the weather is back in sync and maybe now we can begin to understand what our eastern compatriots have been made painfully aware of this winter.

The cornucopia of resources is running out.

Turn it upside down and shake it

### Sidewalks hazardous to health

### **By Brad Ryder**

Love a parade I thought I did until one day last week when I was late for class. Not

wanting to run, for it wears out the shoes. I was walking quickly through the crowd, weaving in and out, dodging other late students and checking my watch every other step. Once or twice I nearly ran head

on into another person checking his Brad Ryder is a Spartan Daily

staff writer

watch. With both our heads down in that vulnerable position, a collision really would have stripped our gears.

At last I saw daylight - a clearing in the woods, so to speak and since my claustrophobia was beginning to flare up, I headed for it anxiously.

The blast of an obnoxious horn behind me interrupted my quest for open space, however. I turned in time to jump from the path of a convoy consisting of a truck, a maintenance cart, and two 10speeds.

Slowly they passed, the truck honking students aside left and right, the cart and bikes following in the wake.

When they had gone by, emerged from my hiding place in the bushes and surveyed the scene. No one was hurt, but nerves were shaken and a few elbows bruised.

isolated incident, I continued toward class. (By now I'd missed the opening jokes of the lecture and would have to get them after class.)

# Comment

all you want. If a nice apple should roll out, will you eat it or will you know enough to slice it up and save some?

That is an important question. The answer indicates whether we will be ready for the future or whether we will continue to blindly over-consume what little resources we have left, whether they be oil, gas, or water.

The American continent was always thought to be a veritable cornucopia of resources. It was unique in the modern world because of its abundance of untapped natural gifts.

As the country stretched to the west and population grew, there remained a seemingly endless supply of resources. So Americans have righteously grown fat through

a lifestyle of gluttony.

But in recent years warnings have come that this cornucopia is a myth. In 1973 came the energy crisis and now there is the gas crisis. Lack of rain has nearly irreparably parched areas of California.

Granted the public is notoriously myopic but these problems are right before our eyes and are affecting people adversely. Everybody eats and food prices

are going up because of the drought's damage to crops. Cattle must be slaughtered because of the high price of grain.

It's impossible for people not to be aware of these things. Dealing with them is the stumbling block because it entails cutting back on a lifestyle of extravagance comething that is ingrained into Americans.

This is neither the time nor the situation where the people can sit back and expect someone else to solve the problem.

We've picked nature's resources clean. Now it is important that we explore a new frontier - the resourcefulness of our minds.

So get out there and under-consume

But just as I was nearing the building where I would be safe from any more crazy sidewalk molesters, I saw it: A girl on a bicycle was

coming right at me. No problem, I thought, and stepped to the right to avoid her. She turned to the left to avoid me, and we were still on a collision course.

My computer-like mind quickly calculated an alternate plan: I stepped to the left; she went right.

the left. She was faked out and

I feinted to the right, but dived to

escape maneuvers!

missed me completely. I remember her looking back at me with what may have been embarrassment on her face, but it could

have been disappointment. She mouthed, "I'm sorry." I nodded apologetically. Something I wonder, though: Was she sorry she almost hit me, or

sorry she missed? Anyway, I'm alive; my shoulder is still a little sore from the fall, but I'm alive.

Until trucks and bikes stop abusing the sidewalks, though, I be doing any long-range won't planning.

any obvious conclusions.

The University is an environment whereby mankind can teach traditional ideas and facilitate progressive ones. The idea of legislating away racial bigotry may resemble nonsense or even be impractical, but one must remember that the idea of man going to the

moon, was even more far-fetched. The U.S. Constitution provides for the freedom of speech. The

enough there are always Larry Flynt and Hustler magazine. On the one hand liberals are titilated by it, but must act pious on the other, damning with faint praise. The ACLU will take care of the

First Amendment, but who will take care of Hustler? Not the liberals. They're too busy

trying to resolve the Gilmore-Sirhan mma.

Letters

A.S. series

These writers offered three separate rebuttals to Pam's article. Their Aristotelian logic is almost as impeccable as Pam's. Slothower "If those conferences offer 'Bandsolutions, then surely her Aid' (Pam's) analysis is iodine". Craig — "Until the children and adults of our society can realize where the racial prejudices arose and be made to understand how silly they were in the first place, they will remain racist". Cornfield - "If Pam has her way, maybe I can land a job as a word monitor for the newly formed State Office of Bigotry Consequently, if the readers of those articles are not aware that other forms of logic exist, then they are left with the conclusion that "three ideas are better than one, and therefore, the rebuttals will prevail. This would lead to an reroneous conclusion within an institution of higher learning. The "Law of Identity," which is the basis of Aristotelian logic, asserts that "A thing is what it is." What this law of identity implies is that this pen with which I am writing is this pen. This paper on which I am writing is this paper. A is A. In a more strict sense, such a concept is not quite true, since minute changes are happening all the time, both within this pen and within this paper. An alternative to Aristotelian logic is what the Semanticists call, "The Law of Non-Identity," expressed "A is not A, A<sub>1</sub> is not A<sub>2</sub>, a thing is not what it is," and this paper is not this paper. If one was to apply the Law of Non-Identity to Pam's article, then he would con-clude that one must look more closely at an issue before drawing

Dismissing the whole thing as an

gy, but the way the heating system functions is that if the temperature is below 64°F, the heating unit will be on until 66°F is reached. If the temperature is above 68°F, the air conditioning is turned on until 66°F is reached.

Since the body heat of human beings in a room is generally about 68.5°F, the air conditioning unit has to be working at all times with a 65°F set. Since an air conditioning unit requires more power than a heating unit, we are having a very costly, unhealthy waste of energy.

If the air conditioning unit can be disconnected from the heating unit. I'm for a 65°F thermostat setting However, if the air conditioning can't be disconnected. I suggest either 68°F or 69°F setting to save energy.

## Cagers destroy Titans

#### By Ernie Hill

Toying with the Ful-lerton State Titans through the first half, the Spartan basketball team breezed to an easy 80-61 victory Saturday night in a final tune-up before Wednesday's PCAA playoff game.

The win gave SJSU a final 16-10 record for the regular season as well as an 11-1 home court mark Fullerton now leads the all time series between the two, 4-2.

The Spartans gained a 41-27 halftime lead mostly on the strength of a 16-4 run late in the first half.

Leading 23-18 with eight minutes left before intermission, SJSU erupted and pulled away to a 39-22 advantage

Fullerton State seemed overmatched in all facets of the game, appearing at imes to be playing with just four men on the court The Titans' zone and manto-man defenses were equally ineffective against the team they beat 84-64 on Jan. 20 in Fullerton.

Playing with its five starters through almost the entire game, SJSU scored with ease over the Titan defense

The Spartans hit 18 of 29 shots for 61 per cent in the

nitial half. Besides 13 from Ken Mickey, SJSU got 12 points by Tracy Haynes in the first half. Haynes also had five rebounds during the same period of time.

Fullerton's 11 first half turnovers were of no assistance to their offense, which shot a respectable 48 per cent in the opening 20 minutes.

The second half was more of the same domination by the Spartans, as the Titans were unable to mount a serious charge at SJSU before the 3,051 fans at Independence Fieldhouse.

The strong play by the Spartans proved they can survive without Stan Hill and Wally Rank, who were both declared ineligible for further PCAA play, last week

with 12 tallies. Guevara thought his Hill's replacement at team basically played the center, 6-foot-8 Steve same type of game as they did last Thursday against Sincock, scored 12 points, hitting six of 10 shots from San Diego State. the floor. Ron Ward, who could have won the 73-64 setback with shooting like became a backcourt starter when SJSU lost the duo, played in in his usual SJSU shot a woeful 34 per poised manner.

The former junior college All-American had six points and two of his team's three blocked shots. One odd note was that SJSU coach Ivan Guevara

Nation's top all-purpose back heads list of 33 grid recruits

### By Steve Dulas

For the Spartan football players, the season ended on a damp night in Stockton Nov. 13. For the coaches their second season of re cruiting, ended on a sunny day Feb. 16, receiving letters of intent from 33 prospective Spartan gridders

Heading the list of junior college transfers is J.J. Johnson, a 6-foot-1, 206-pound running back from Laney College. Johnson led the nation in allpurpose yards for junior college runners last year. piling up 1,230 yards on the ground (second in the state, fifth nationally), 202 vards on receptions and 354 yards returning kicks, for

5.)

Vasconcellos said California banks' reluctance to deal with Washington bureaucracy has resulted in a cut back on loan availability.

The San Jose legis-lator's bill would allow the California Student Aid Commission to guarantee student loans made by California banks in an effort to localize the operation to California students, campuses and banks.

Twenty-six states have adopted this idea and the amount of student loans has increased while the default rate has greatly de-creased from the federal

Assemblyman John program," Vasconcellos said

> Loans dropped In 1976, student loans dropped \$93 million na-tionally while states with guaranteed agencies increased loans by \$70 million, according to Vasconcellos.

Vasconcellos noted that there is no continuity between the school's fithe default rate in the guarantee system only had nancial aid offices, local bank chapters, student about a 10 per cent default rate while the federal loan departments of major government reported a 20 banks, per cent default rate. standardized system with one set way students can "The banks hate our department," he laughed. borrow money," he said. "Right now in California We lose money, we have errible public relations there are five different student loan programs and terrible public and the students think we I don't think anyone can are ripping them off."

'Sometimes I wonder O'Flock complained why the hell we have the student loan program," he added.

> Dave Fowler, representative of the downtown San Jose Wells Fargo Bank said, "Luckily students have been very patient with our student loan program. But I really don't know how long we are going to be able to operate in this confusion."

O'Flock stated his belief that students loan operations should be tougher.

"With a state office handling every aspect we (Wells Fargo) would get off with only a ten per cent de-fault rate," he said. "Let's have a good system where we can catch them and get Assemblyman John Vasconcellos, San Jose Democrat. our money back. Students

**Bill proposed** 

Women's group fights two McAlister bills

Attacks on women's rights are still happening, according to Terri Lankford, founder of the SJSU Women's Action Committee, and women "must launch a campaign to counter attacks on women's rights" sponsor-ing picket lines, rallies, and forums, she said.

The 10-member group decided at its first meeting last Thursday one of its first activities will be to protest Assemblyman Alister McAlister's (D-San Jose) anti-abortion bills. They will join the San Jose chapter of the National Organization of Women

(NOW) in a picket line in front of McAlister's office. 1595 E. Santa Clara St, at 4:30 pm March 15. **Bill's impact** 

McAlister's bills, AB 595 and AB 596 would prohibit abortion of a viable fetus, a stage generally reached at six or seven months and would require a minor to consult with one or both parents prior to obtaining

an abortion. McAlister has also urged Congress to propose a Right-to-Life constitutional amendment

According to Sal Bianco McAlister's administrative aid, right-to-life means that "if a fetus is declared alive

than that fetus ought to have a right to live.' The committee will also sponsor an abortion panel in the Student Union during

Women's Week, March 3-11.

The panel will "inform women of the attempts made to take away the right of women to have an abortion and tell them to join the committee if they want action taken to protect our rights," Lankford said.

"Women think the fight for women's rights is over because of the 1973 Supreme Court decision le-galizing abortion," she

**Besides** McAlister's bills, Lankford cited the Hyde Amendment as "an example of what could be done to take away women's rights."

has a court injunction against it specifies that Medicaid funds can not be used for abortion unless the life of the mother is threatened. The U.S. Supreme Court has not decided whether it will hear the case.

### Severe setbacks

"In recent months the attacks against us escalated dramatically," Lankford said. "Abortion rights, affirmative action plans, child care and the ERA have been dealt severe setbacks. We need to pay special attention to defense of these rights.

The group was formed because "we felt a group was needed on campus to take an active role in defending women's rights," Lankford said. But the group needs to

apply to the A.S. to become an official campus organization so they can re ceive funds, through special allocations, she said.

### Legislature studies capital punishment

### By Alan Janson

The fluctuating and controversial issue of capital punishment will be heard again in the California legislature this year. Assemblyman Alister

McAlister, D-San Jose, and Sen. George Deukmejian, R-Long Beach, have proposed legislation that would restore the death penalty to comply with the most recent U.S. and California Supreme Court deci-

#### sions. Court rules

The court ruled last year that the state's death penalty was unconstitutional because it made punishment mancapital datory for certain crimes without providing for extenuating circumstances.

The attorney general's office and the district attorney's association helped draft this bill so it would comply with the constitution, according to Sal Bianco, McAlister's ad-

ministrative aide Bianco believes that a majority of legislators will support the bill and perhaps even a two-thirds majority which would be enough to override a

gubernatorial veto. **Brown vetoes** Earlier this year Gov Jerry Brown promised he would not sign capital

punishment into law "as a matter of conscience." If the governor rejects the bill and a two-thirds majority cannot be raised. Bianco believes that the measure will be put to the

people as a referendum in 1978. Californians approved the death penalty when it appeared on the ballot in 1972 with 67 per cent of their votes.

The 1972 vote followed a U.S. Supreme Court decision that the death penalty as then practiced in America violated the Eighth Amendment as

cruel and unusual punish ment

However, the Court implied that the death penalty could be inflicted if it were mandatory for certain laws and thus not subject to the discretion of judges and juries.

without breaking

In its 1976 decision the court held that the death penalty could be constitutional provided that judges and juries were given adequate information and guidance for determining whether it is appropriate in

a given case. The new bill would permit the death penalty for hired assassins, police killers, mass and repeat murderers, persons who commit murder during rape, robbery, kidnapping, burglary, lewd acts upon children and those who kill

witnesses to a crime. This bill also permits the judge and jury to take extenuating circumstances into consideration.

By Gary Morse Death and taxes, as the jointly makes \$3,200, makes possible benefits including: several adage goes, are the only the refund of income

withheld from paychecks; • a \$37 refund from the state for apartment dwellers · potential eligibility for

the proposed \$50 rebate now before Congress; and • the possibility of in-

come averaging. Jachens said that full time students can earn up to a minimum of \$3,200 if single, \$6,500 if married, before paying federal in-come tax, but that each year some students forget to file for the money which tion opportunities in the law," Donald Roark, withheld from paywas

He said that students checks. State withholding taxes should become familiar will also be refunded if a single student earns \$5,000 with the law for legal tax The first step to take toor less or \$10,000 or less if ward reducing taxes for married, he said.

Refunds take approximany students - even those who don't owe the mately six weeks once filed, according to Bon-deroff, although he said government money on April 15 - is simply to file that the closer a student federal and state tax returns, according to Allan gets to April 15 before Bonderoff, lecturer of busifiling, the longer the refund takes. ness, and Bill Jachens, tax

accountant for H&R Block. State and federal income withholding taxes Filing, although not required by the federal can be avoided for full-time students by filing a W-4E form with the employer, said Bonderoff, who

partment on a long-term

basis," Curtis said.

assistance or pay state real estate taxes.

Both back paycheck withholdings and the renters' rebate can be claimed by persons who failed to file in the last three years, he said.

The \$50 rebate will probably apply to students, Bonderoff said, adding that in order to be on the refund list, students should have either filed a tax return or be receiving welfare.

Income averaging is most often used when a person has a high income one year in comparison to three previous years with low earnings, Bonderoff said Taxes are then paid on the average annual income and the payer saves money since the tax scale is progressive (that is, the more a person earns, the higher the percentage taken by taxes)

Bonderoff said the only catches to income averaging, valuable to students whose income rises dramatically after graduation, are that the person must have filed tax returns from the previous low earning years and cannot have been claimed as a dependent by another person. Bonderoff and Jachens

stressed that students can use the above tips to avoid paying taxes - well, at least for a few years.

Tax deductions and credits, two other means of lessening the state and federal income bite, will be discussed in Tuesday's article.

seismic equipment in the basement of Duncan Hall, the machine is designed to record only substantial shocks

George Curtis, a geology graduate student, explained that the strong motion seismograph measures the acceleration in structures such as dams after a seismic shock occurs in terms of the force of gravity (G's), and thus enables geologists to measure the structural effects of quakes on such structures

'We've set the machine so that it won't record a seismic event of less than 1 G of acceleration, but it can

confused

A San Diego federal court allowed fishing for yellowfin tuna, traditionally accompanied by porpoises. But Friday, the U.S. 9th circuit Court of appeals in San Francisco suspended the earlier permission to fish.

Thursday the national Marine Fisheries Service announced in Washington that U.S. fishermen would no longer be allowed to set nets around certain mixed schools of tuna and porpoises because one poise species, the eastern spinner, is in danger of extinction.

think it will completely destroy the in-dustry. Foreign fishermen are totally unregulated and they will take over fishing our people have had," said Steve Edney, president of the United Canners Workers.

The balloons radio back SAN BERNARDINO (AP) — Water balloons are flying at Cal-State San Bernardino. The specially equipped weather sensors seek out rainclouds and save up to \$600,000 in annual water supply costs. water officials said Friday. When clouds form, the Bernardino Valley San Municipal Water District sends aloft the weather balloons from the Cal State San Bernardino campus.

data the district can use to determine when and where to begin seeding clouds Larry Rowe, the dis-

trict's water resources engineer, said pinpoint cloud seeding probably increased the snowpack in the mountains around San Bernardino, about 80 miles east of Los Angeles, by as much as 10 per cent or one to two inches during storms in January and February.
