# Frost says Nixon hid feelings, but admitted his wrongdoings

#### **By Dan Weems**

Richard Nixon is a private man who tries to mask his true feelings to keep interviewers from psychoanalyzing him, according to former talk-show host David Frost.

"I can say I now don't understand him on a deeper level than before," Frost said, referring to his now-famous Nixon interviews televised on CBS last fall.

"He revealed more about Watergate than I thought he would. He admitted to lying to the American people, and four or five of the counts in the impeachment proceedings."

Frost speaking at DeAnza College Thursday night, said he agreed with Nixon in his estimation of the interviews having been "tough but fair.

"I could never tell if Nixon was aware of the irony in the things he says. He told me, 'I wouldn't want to be a Russian leader. They never know when they're being taped.'''

When Frost told Nixon it was essential to air the interviews before

last summer to ensure a better audience, Nixon replied, "We got a hell of an audience on Aug. 9, 1974." Nixon resigned on national television on that date.

Among the most chilling interviews Frost conducted was with the head of the Hitler Youth organization who had just completed years in West Germany's 20 Spandau Prison for his war crimes.

"I asked him to tell me one thing future generations of Germans should remember about Adolf Hitler, " Frost said. 'The wonderful way he dealt with unemployment in the 30s' was the reply, according to Frost, who expected the man to mention Hitler's attempt to exterminate the Jews.

When interviewing politicians, Frost said the biggest obstacle is getting them to "bloody well say something."

Ask a politicain his favorite color and he'll say plaid."

Robert Kennedy was one politician Frost remembers as being refreshingly frank and genuine in his answers to questions.

A short time before his assassination, Kennedy spoke with Frost in Portland, Ore., and said that when he died, he would like to be remembered as having done something to lessen the suffering of children.

'For if we don't do this, who will?" Kennedy asked.

Frost's main means of preparing for an interivew is to do "a hell of a lot of reading."

"The most important thing when interviewing is to learn to listen," Frost said. "Instead of excessive planning of a format, I try to go with the flow of things.'

Nothing is more distracting to someone being interviewed, Frost said, than realizing the person you're speaking to is so busy preparing his next question that he isn't even listening to your reply.

When an interviewer does this, Frost said, the subject can't resist

the temptation to say things like "Yes, that happened after I married the Pope's first wife."

In order to keep reactions to his questions fresh, Frost said he never tells a subject what he intends to ask.

"My preference is to talk about anything else for the first 10 minutes to get the person to relax. Frost said he tries to keep in-

terviews focused on the subject rather than Frost.

"Your job is to be a catalyst," he said, "and not step in unless you see that facts are being done a real disservice.

Frost is planning a show called "Headliners" to premiere May 31 on NBC featuring a magazine format of interviews with principals in the news.

He also said he would like to interview President Jimmy Carter about "what makes him tick," a phrase Frost repeated time and again in describing his goal in an interview session.

Former talk-show host David Frost talked about his famous interviews with Richard Nixon and his questioning technique Thursday at DeAnza College.

## **BEOG audits 10%** of students applying to verify incomes

#### **By Corinne Asturias**

For the first time since the Basic Educational Opportunity Grant program was initiated a 10 percent random sample of federal grant applicants will be required to show proof of their annual income.

Between 2,000 and 3,000 SJSU students currently receive BEOG money totalling \$2 million, nearly half of the total financial aid

awarded at SJSU. Validation procedure will begin with applicants submitted for the 1978-79 school year.

"Obviously we think there may be a problem with students misreporting financial information or we wouldn't be taking on the program," said Jeanne Saunders, director of the validation section of the Bureau of Student Financial Assistance in the Washington, D.C. Office of Education.

She said the bureau has "no predictions," as to how much misreporting will be determined by the validation program. Saunders said the new program

was prompted by several studies begun in 1976 that showed that more applicants overall receive money

now than in previous years. She said the studies zeroed in on how student eligibility was affected by "certain actions" taken by students when filling out apand on the Tre

Pfaff said the financial aids office will be given a list of selected names and will have full responsibility for contacting those students and directing the required in-formation back to BEOG headquarters in Iowa City, Iowa.

"Students today are generally more serious, less hostile than five to six years ago," he said, "where there was more of an antiestablishment feeling to rip off the government, or that financial aid was 'owed' to students.

"We're past those days Students now are more patient, thoughtful and appreciative. I don't think very many students in tentionally misreport financial information.

According to financial aids counselor John Bradbury, who will replace Pfaff as associate director at the end of April, many errors and discrepancies are found by the financial office when comparing information on different applications that students submit.

He said the number of these discrepancies has been declining each year. "I think most of the students are

trying to be very conscientous about it." Bradbury said. "Maybe they realize that the government is also much stricter than it used to be."

#### By Nancy J. Smith

"A careful engineering analysis" of Morris Dailey of Morris Dailey Auditorium is needed before improvements can be made on the facility, SJSU President John Bunzel said in a statement released last week

A committee formed to study the auditorium and recommend necessary action to update it has submitted its report to Bunzel, but "further action will have to wait until the engineering report is made available to the campus," Bunzel said.

The engineering analysis has been requested through the Office of the State Architect or toher qualified engineering firms "at the earliest possible time," according to Bunzel.

# Auditorium analysis needed

He stated the committee's report "sets the stage for progress,"

and plans are being made to replace all the building's stage draperies. Funds have been located for the

draperies.

Randy Earle, associate professor of theater arts and a member of the review committee, estimated the new drapes may be ready by late July or early August.

Earle, who drew up the specifications for the draperies, said they will be "very similar to the ones in the University Theater, if not better.

Bids will be requested May 1. Earle said three months will elapse before the bids go through Sacramento, the contract is awarded and the drapes completed. He also said he has no idea what the cost will be until the bids are received.

But other problems must be solved before the drapes can be hung, according to Earle.

"There is no safe way to anchor the drapes without endangering the people standing under them," he said.

Earle said he and members of the committee who are aware of the technical difficulties in Morris Dailey initiated the action to have the engineering analysis of the auditorium made

"Stage technicians consider it an unsafe place to work," he said. they don't want to work there unless

considerable amount of money, which is difficult but not impossible to find, but coordination among state agencies," according to Bunzel. Robert Bosanko, chief of plant

said.

operations, has estimated it will cost approximately \$300,000 to renovate auditorium

"they can do so safely without en-

dangering anybody's life," Earle

Other improvements to the facility "will require not only a

Earle said Bunzel has been "extremely helpful" in planning the improvement of Morris Dailey and seems to want to see something done on the auditorium before his resignation becomes effective Aug. 31.

### It was 'love at first flight'

Family duo flies friendly skies

**By Judy Twitchell** 

It was just a simple fatherly suggestion to a daughter who had finished junior college at 17 and needed some rest.

Art Powers, a senior DC-8

At a recent press conference in San Francisco, Debra said although she didn't decide to be a pilot until those first flying lessons, she had always wanted to work for the airlines.

"Dad always said he

made on resubmitted applications She refused to specify what the

'certain actions'' were.

Richard Pfaff, associate director of financial aids, said he doesn't know how many students intentionally misreport information on BEOG applications.

"The potential is certainly there," he said. "Up until this decision, the program didn't require any proof of income at all."

### 6 candidates remain for 5 A.S. positions

A candidate for lower-division A.S. Council in this year's election has withdrawn, leaving only six candidates to vie for the five open seats.

According to A.S. Treasure Maryanne Ryan, Student Independent Party candidate for the A.S. presidency, Vanessa Pratts, a member of the SIP slate, withdrew her candidacy because of an-ticipated time conflicts.

Ryan said Pratts had put in an application to be a resident adviser in the dorms and doesn't think she will have the time next year to serve on the A.S. Council.

"She realized she had too many irons in the fire, so to speak," Ryan said. "She thinks she'll have too many things going next year to serve

Students who are unable to supply validation for income stated on their BEOG application will not be penalized. They will have to resubmit an application for which proof can be shown

The new validation procedure is not mentioned on the 78-79 BEOG application and instruction booklet.

"We're planning to have press releases sent out," Saunders said. "What actually happened is that the new applications were printed before a decision on the validation program was reached."

Saunders said the possibility of financial validation is "implied in the certification statement at th bottom of the application that ap-plications and their parents are supposed to sign.

She said signed certification statements have in the past allowed the BEOG program to require validation in a very small percentage of cases.

She said 10 percent is "much more" than has ever been checked before.

"We're just exercising an option as in the past, only now we're doing a greater number," she said.

The BEOG program was started in 1973 by then - President Richard Nixon as a nationwide attempt to give each school virtually unlimited access to money for financial aid.

According to Pfaff, the theory behind it was that no student could be denied aid at the institution of his choice on the grounds that the school "ran out of money."

photo by Ross Mehar

Debra Powers, a 1977 SJSU graduate, is now working for United Airlines as a Second Officer. Her father also flies for United.

United Airline, his dauthter might enjoy taking flying lessons and getting a pilot's license of her own.

For Debra Powers, it was "love at first flight.'

She got her license, became a flight instructor, logged over 2,000 hours of flying time and now, after graduating from flight training school, has been hired by United Airlines in San Francisco, as a second officer on their 737 jets.

Debra, 24, and her dad are probably the first father and daughter to fly for the same commercial airline, although they won't be sharing the cockpit, because of his seniority.

But Art Powers plans to retire in five years and both father and daughter are hoping they can be on the same crew for that sentimental last flight

As a second officer, Debra is the third member of the cockpit crew. She monitors all the plane's systems, including fuel, hydraulics and electronics, and makes the announcement to the passengers.

"Some people are very surprised when they hear a women's voice over the speakers," Debra said

"But when the flight is over, people will tell me what an inspiration I am, and will tell me the new things their own daughters are doing.'

job, even when he got up at 3 a.m. for an early flight," she said.

Art Powers said he was a little apprehensive when his daughter set her sights on being a commercial pilot

"I thought she had as much chance of doing that as she did breaking the sound barrier in a (Piper) Cub," Powers said.

"But now if people are qualified, they get the job."

Powers said if anyone would be aware of some of the negative things about being a pilot it would be his daughter, who had to grow up without having her father around during holidays.

"Children of airline pilots know that Christmas comes sometime in December," he laughed, "but they're not sure when.

Debra is a 1977 graduate of SJSU, where she attended full-time at night for two years to get a degree in liberal studies.

"Getting a college degree was a personal goal," she said.

"I would have preferred to get a degree in math or science, but the only degree they offered to night students was liberal studies."

Debra said now that she is through with flight training school and on reserve status for United, she has more time for herself than she has for a while.

Picking from the flowers

## Hunt for a president

#### By Scott Knies

"A president by July" was painted in big black letters on the scarecrow out in the middle of the meadow.

The inanimate dummy was inflated with hot air and bobbed up and down in the breeze, keeping rodents and birds away from the meadow.

#### Scott Knies is a Spartan Daily reporter

The advisors were still on the field's fringe, over one hundred long yards from their "president by July" goal. It had been a very wet winter with the meadow too soggy for the advisors to begin their search any earlier.

They began to walk meekly around the periphery getting their shoes muddy, baptising themselves with the grit of their directive. It was a large meadow and the advisors had the task of choosing three flowers they believed would thrive in the urban environment of SJSU.

The horticulturists who managed the meadow (and who erected barbed wire around their property) had given the advisors explicit directions on how to choose the flowers.

Two of the horticulturists had

had just passed over. "Forget them," barked the 'Chancellor'. "We should use our limited time to examine the ones growing closest to the scarecrow'

So the advisors huddled in the meadow's interior, neglecting the delicate life outside the scarecrow's shadow

"What about this one !?" exclaimed an anxious faculty advisor,

"No, no way," said both hor-ticulturists in unison. "Look at the pedals – it has obviously had contact with a bee. Orders from the laboratory express, and I quote: flowers must understand the role and mission of a campus operating within a statewide system'

"A flower like that is not subordinate to certain fertilizers we use to stabilize the system. Plus flowers with thorns do not respond to our plant-foods"

'Then what about this one !?" offered an anxious staff advisor, holding up a white daisy.

"No, no way," said both hor-ticulturists in unison. "It has a dominate stem coloration and we need either a minority pigmentation

or an unpollenated specimen to fulfill equality specifications'

The advisors searched the meadow without any success. The horticulturists kept rejecting all suggestions until the sun was ready

to merge with the horizon. "Well, tell you what," said the 'Chancellor'. "We have some hybrids growing in planters under special lamps back at the lab. We know these flowers will fit in with the shallow San Jose soil.

"Let us meet back here the last week of June and we will bring these crossbreeds along. Then we will make our final recommendations. O.K.?

The 'Chancellor' held out delicious plant food (in all its green splendor) for the advisors to see.

"This is what we use in the laboratory," he said. "Help yourselves'

The scarecrow was taken down in April, two months before the

official harvest season began. Making a premature decision itself, the sun beat down on the meadow with summer intensity, wilting the candidates that were never picked.

## Latinos' problems ignored; lack of equal representation

The problems of Latinos are ignored in the media, ignored in politics and are ignored in almost every other aspect of this society. In many instances, Latinos and

especially Chicanos are thought of as illegal aliens who have just arrived to this country.

#### Antonio Martinez is a Spartan Daily reporter

Yet Chicanos are not strangers to this land. Chicanos established the settlement of Santa Fe, New Mexico before the Mayflower even arrived in the New World.

The 1980 Census is expected to show that the Latino population in the United States will comprise at least 10 percent of the national total.

Within the next 15 years, the Latino-American population will reach 30 million or more, passing up blacks as the dominant minority in the United States and causing significant changes in this country's cultural, political and economic patterns

American politics will be substantially altered. Black suffrage resultiing from the civil rights legislation of the 1960's has had a tremendous political impact. Latinos are expected to have even greater clout.

Every congressional district in California is at least seven percent Latino. Most are at least 10 percent. This same pattern is visible in many

Latinos have already exerted political clout in the national level. The Latino vote was instrumental in the election of Jimmy Carter as President

In the 1976 election, Carter won the key electorate state, Texas, by only 129,019 votes. His plurality among Texas Chicanos was 205,800. He won Ohio, which has relatively few Latinos, by just 11,116 votes. His Latino plurality there was 18,000.

In another key state, New York, 227,680 Latinos voted for Carter, 89 percent of the Latino vote. Carter carried the election by just 288,676 votes.

This was with a Latino-American population estimated at between 16 and 17 million. Consider the political effect of 30 million Latinos, a total expected to be reached within the next 15 years.

Although the problem of inequality stands to improve in the future, today Latinos are still underrepresented in almost every aspect of this society and conditions of poverty and inequality persist.

In California, Chicanos comprise 15-18 percent of the State's population; yet they hold less than two percent of the state's elective offices in the U.S. Congress and State Legislature.

Gerrymandering and nondistrict elections are used in Calfironia by incumbents to insure used in their reelection and to perpetuate the low representation of Chicanos in political office. To allow Chicanos to vote in a community bloc would invite defeat at the polls for many incumbents.

For example, in East Los Angeles, with a Chicano population of 600,000 people, gerrymandering has been used to cut up districts in such a way that none of them had more than 35 percent Chicano voter representation.

Non-district elections in cities such as San Jose, although not necessarily directed at Chicanos, have served the purposed to keep Chicanos out of local political office.

District elections in areas such as the Almaden Valley and the eastside would enable these areas to elect candidates representative of their interests instead of others' special interests.

Contrary to what some people may believe, inequality, ethnic and

### 'Out in force'

Editor

Well it's election time again and the pseudo-politicians are out in force, or should I say farce. In this corner we have the Student Independent Party (SIP) and in the far corner we have "the Other 90

Both are doing battle to see who presides over the three hundred thousand or so dollars that we students pay to run the Associated Students, and what a battle it is, each side saying that it will do better than the other

Of course there are arguments and counter-arguments, especially as to why the SIP is running practically unopposed; Paul Boneberg spouting the statement that "as the status quo, the SIP has to defend their record - they have not appealed to the bulk of the student body or its specific constituencies.", while Joe Trippi in his infinte wisdom says, 'The fact that we're running unopposed is evidence that the people feel adequately represented' and the five percent voter turnout indicates that students feel that things are running smoothly.

These gentlemen speak with fine words, but I don't think that the low voter turnout can be attributed to satisfaction with the present government. Both men are totally off base.

I say that the SIP is running practically unopposed because few students could give a damn about student government. If the A.S. President, Vice

economic segregation are not im-proving. Rather they are getting

According to a Rand Cor-poration study on Santa Clara County, "inequality is not decreasing; if anything it has acnot tually increased and is continuing to do so.

The Rand Corporation study arrived at two major conclusions

· On the basis of median family income and other measures of economic well-being, the low-income areas of Santa Clara County have been declining relative to the better-off areas, and economic segregation has increased.

· By various indices of earning and occupations, the Chicano population has been getting worse off, or in some cases just holding its own, as compared to the Anglo population---this in a period of the most rapid economic growth

In 15 years, whatever the sitaution is, it will be impossible to avoid the needs and problems of 30 million Latinos.

otherwise nobody would really care. I say this because most people are here to continue their education; student government simply being a power and status trip for an "elite" clique who look forward to the day that it will say "Student body president;" or "Student body representative" on their job resume. Dave Raulino

### Disappointed

Editor:

I was disappointed to note an inaccuracy in the April 12 Flashback about the closing of Tower Hall.

The hall was originally made up of a u-shaped building and breezeway. After it was closed on April 11, 1963, the students and alumni association fought the trustees to a compromise. La Torre (the tower) and Morris Dailey Auditorium were saved; the rest of the building was demolished. Since what was left has been reopened, students have been allowed to use the auditorium.

The tower is now occupied by the upper administration. Tau Delta Phi, the original student occupants of the top of La Torre, have not been allowed back in.

> Moly Olds Math SOPHOMORE Tau Delta Phi member

### Muddles Zionism

Editor: Martie Costa has done he to muddle every aspect of Ms. Redgrave's protest of Zionism, at the same time recreantly while attacking a fairly good article by Jerome Coldwell. Costa finds it necessary, for the structure of his or her argument, to inform us that Ms. Redgrave is a "prominent member of England's Trotskyite Communist Party After establishing Ms. Redgrave's moral turpitude, Costra assures us that it is impossible to be against anti-Semitism and at the same time Zionism. In order for us to follow her twisted logic, Costa gives us his or her own private definition of Zionism. (The desire of the Jewish people to return to their homeland.) This is not the predominant understanding of the word Zionism. Zionism is the imperialsitic, military expansion of the state of Israel into Arab land. The question of what is Jewish homeland and what is Arab homeland will not be decided by the pages of the Bible, nor is it predicted therein. I also find Costa's contention that the PLO does not represent a majority of the Palestinian people to he erroneous. What does she think Yassar Arafat was doing at the U.N.1 I beleive Mr. Caldwell was correct in his use of such terms as Zionism, PLO and Vannessa Redgrave. It is you, Costa, who are bordering on the fringes of religious paranoia and advancing dangerous illusions where truth and fact are needed.

even traveled out to the field's edge from their Long Beach laboratory to assist the advisors in their floral selection.

Directions from the laboratory ordered the advisors to cover the whole field carefully so they would pick the most capable flowers.

The advisors would start on the meadow's edge and walk the whole circ, nference around and around, narrowing distance by successively smaller circles until they spiraled into the meadow's lush interior. By the time the advisors reached the scarecorw, the exact center of their circling search, they will have found the three best flowers.

The three flowers would then be taken back by the horticulturists to their Long Beach lab for extensive analysis and disection. After the experiments, the horticulturists would select one flower to plant at SJSU.

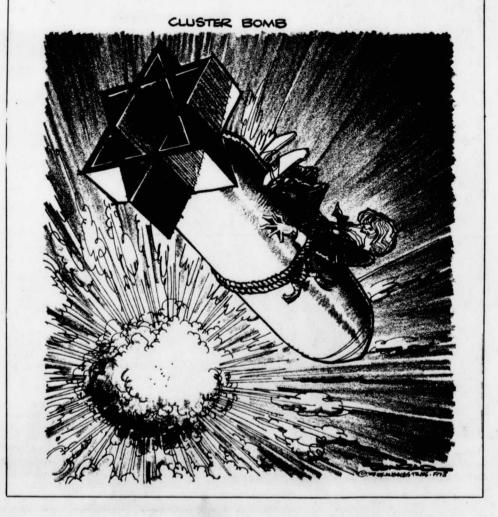

Only they would be allowed to water it.

The advisors knew this to be their job and wanted to recommend three really good flowers so severe alteration by the horticulturists would not be necessary.

But time was short. Soon the summer deadline would be upon them and thick weeds would infest the meadow.

'Let's go for it," cried the advising horticulturist called the 'Chancellor', as he stopped circling and scampered directly toward the scarecrow

What about all of these?" asked a disbelieving student-body-president advisor, pointing to the countless flowers the 'Chancellor'

President, and the whole A.S. Council took the entire A.S. treasury and went to the Bahamas, there might be a slight uproar, but

# Botany students bloom ir

flowing" "free Botany lab set up by Biological Science Science professor Clifford Schmidt has opened up new study opitons for 200 Botany 1 students at SJSU.

Booths are set up inside the lab where recorded lectures can be played, slides viewed, or film strips shown. "Various live materials can also be observed under

microscopes," Schmidt noted. At the beginning of

every week a new topic is set up in the center. Some past subjects have been plant anatomy, plant

ecology, and genetics of plants, Schmidt said. Teacher's assistant Carol Selter is in charge of 200

setting up physical ob servations in the lab, according to Schmidt. Schmidt, himself, is in charge of the overall lab system in the spring and biology professor Wanna Pitts is in charge in the fall.

The lab is not a separate class but is taught in addition to the lecture course. Instead, Schmidt explained, it functions as

one body. "The class itself is worth four units and a student must spend four hours minimum there weekly," he said.

The lab portion of the grade is very fairly organized, he added. A student may choose on whatever he wants to work on and go there around his schedule.

There are few problems with live materials spoiling in the lab. This is because we have a good backup," Schmidt said. Besides botany

biology, majors. psychology, and history majors are also among the Botany 1 students. Schmidt described the course as"well rounded" in the science division and attributes this fact to planning.

Past student of Botany 1. Mark Rothrock, explained that the course is somewhat impersonal at times, primarily because of the use of the tapes.

"Overall, though," he said, "the studying ex-perience is pretty good." Rothrock explained that a teacher or teacher's

assistant is always present in the lab to answer questions and tutor students. "The lab is run smoothly and efficiently," he said. "Personally, I got

a lot out of it." The lab is open and available to any student interested in learning about or observing plant

life. It is open Tuesday through Thursday 8:30 a.m. until 7:30 p.m. and Friday 8:30 a.m. untl 5 p.m. The lab is closed weekends and Mondays.

sunset, they provide asphalt paths around scenic gardens, ponds and flowing streams. If you head west through the gardens, you will emerge onto an en-trance to Happy Hollow, which also has trails you may wish to follow.

Senter Road.

Of course, streets provide easy access to any portion of San Jose, and if you don't mind being near cars, or breathing fumes, it's possible to travel in any direction.

For those people who live in the west side of the valley, there are some courses beginning at DeAnza College, 21250 Steven's Creek Blvd., Cuperting

photos by Blair Godbou

Botany students study plants, both underwater (insert) and above water species in Clifford Schmidt's new "free flowing" laboratory.

'The lab is a wonderful advantage for students. Self-paced, it is helpful for every student, one who wishes to work for two hours or one for eight," he said.

Schmidt became dissatisfied with the tradtional course system so devised the botany lab out of Duncan Hall room 337.

## Nobles not alone on mound

Golden

Donna

Gaters'

Except for an occasional conference with the catcher or the coach, the pitcher is usually on the mound alone. Such is not the case for Spartan pitcher Dave Nobles.

"I think of Jesus, the Lord, as being out there with me," Nobles said. "I have nothing to be scard of and I am able to relax."

Nobles, who is scheduled as SJSU's No. 1 relief pitcher, was to make first league start his Saturday against University of the Pacific but the game was rained out

With a 7-2 record

#### **Dave Nobles**

Nobles has the most wins on the Spartans' pitching squad

"I like starting bet-ter," Nobles said. "It can get nerve-racking when you are a reliever." Nobles said relieving is

a high pressure position because the relief pitcher usually comes into a game with runners on base and the team behind.

As a reliever in eight said.

games, he has won three and lost one. He started in his other five outings, winning four and losing one. His stats were in

nonleague games. When relieving Nobles said he goes into the game and starts throwing as hard as he can.

"The key thing is to hold the team where they are," Nobles said, "and to keep them off balance by throwing up, down, in or out.'

Hold the team and not allow any more runs is what he did two weeks ago against University of Santa

Clara. Nobles entered the game with SJSU behind 8-6 and was able to hold the Broncos while the Spartans went ahead to win 10-8.

A shortstop from Little League days, Nobles didn't start pitching until his sophomore year at Blackford High School, where he set an all-time school record for most wins in three years with 24.

Nobles was named team most valuable player his first year hurling and made the All West Valley League three years in a row from his sophomore

year On the advise of a scout, Nobles went to San Jose City College to work under coach John Oldhan. Working mainly on fundamentals, Nobles made few appearances as a

## Despite distance sweep Spikers crush Irvine

By Sharon Kuthe IRVINE-Despite bei-ng swept in the distance races, the Spartan track and field team had no problem defeating UC-Irvine, 87-57, here Saturday.

Although there were heavy rains throughout the meet, the Spartans were ready for the competition, according to Coach Ernie Bullard. 'I was pleased with the

way the team performed," Bullard said. "The rain took more of a toll on Irvine than it did on us. Every Irvine strong point was matched by us and we came out ahead in places we expected to be even. We competed very well as a whole team."

Coming off a dual meet loss to CSU-Long Beach, Spartans were con-

'It's a lot more exciting. The team really counts on Nobles attributes good

where to throw the ball, according to who the batter is.

### Pacific tops nine; rain cancels pair

Jaguar

It was along game for the Spartan Baseball team as they lost to University of the Pacific, 8-2, in Stockton Friday night.

The two teams were to meet Saturday for a doubleheader at PAL Stadium but the games were called off because of rain. The games have not been rescheduled.

The Tigers jumped to an early 3-0 in the first inning. The Spartans had a glimmer of hope as they scored two runs in the top of the fifth bringing the score to 3-2. UOP then scored five runs in the bottom of the fifth and the Spartans were unable to come back.

SJSU catcher Rick Lane was ejected from the game in the fifth inning for swearing at the umpire: the ejection was Lane's third this season. Spartan pitcher Randy Raphael was also ejected, after he had been relieved and was walking to the dugout.

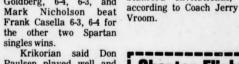

'Why don't you widen up the strike zone like it was in the first inning," Raphael said to the plate umpire.

SJSU and San Diego split in singles action, but the Spartans took all three double matches. The second singles match and their third doubles match

were defaulted by San Diego because one of their players, Milos Di Metaivio, developed blisters on his

feet. Paul Batten won by Di

Metaivio's default. Dave Couch defeated Rick Goldberg, 6-4, 6-3, and Mark Nicholson beat

## Catholic workers plan new home for women

By Craig Anderson en, women with children, and families Battered women will soon be able to find temporary housing in the down-town area, said Norma Miron, a member of the San Jose Catholic Worker Community.

The community is planning to open a second downtown house, at 318 N. Sixth St., by this summer. Their first house, on Second Street, provides those in need with two free meals per day and temporary housing.

The second house is being opened primarily to help women, some with children, Miron said.

She said the "environment" around the first house is not the best for women, especially women who have been battered.

The first house provides "hospitality," food and shelter, to mostly "street men:" transients, alcoholics, drug addicts and the emotionally ill.

The second house will offer food and shelter mainly for women, but also for families, Miron said

Williams to give honors speech

Otho Clinton Williams, one of the founders of the SJSU humanities program, will address the 15th Annual Honors Convocation April 28 in Morris Dailey Auditorium.

Williams, former SJSU professor emeritus of English and humanities, will speak at 1:30 p.m. on "The Importance of Excellence

Williams retired in 1974

He was also named

In the last four years,

previous year.

1974.

To be selected as a president's scholar, a student must maintain a 4.0 GPA, (which means the student earns all 'A" letter grades) and take a minimum of 24 units during two consecutive semesters.

Deans' selections must maintain a 3.65 ("B") GPA and take a minimum of 14 units during one of two pervious semesters.

Entertainment for the program will be provided by the SJSU Music Department.

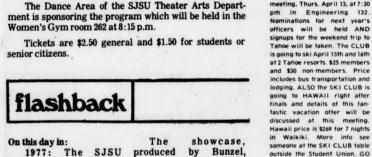

### Toes tap Thursday in SJSU terpsichery

SJSU dance and choreography students will be featured Thursday and Friday in "A Dance Fete."

The concert will include modern abstract to comical and dramatic dances. Some jazz and ballet will also be offered.

The Dance Area of the SJSU Theater Arts Department is sponsoring the program which will be held in the Women's Gym room 262 at 8:15 p.m.

Tickets are \$2.50 general and \$1.50 for students or enior citizens.

The Catholic Worker Community hopes to help women in need get established. The center refers women cies for counseling and other services.

The community also helps women find apartments and apply for government assistance, Miron said

The Victorian house, built in the 1890s, is undergoing novation in its wiring, plumbing, insulation and kitchen.

The Catholic Worker Community depends on contributions for the existence of its services.

Seven persons, who work part-time, make up the community. They live in the Second Street house and open it to those in need in order to "befriend" them, Miron said.

The community receives no money from the government or any other organization. It has no ties to any church, although most of the members are Roman Catholic.

The need for a second house was realized when women and children started showing up at the first house, Miron said.

Some of these people were living in their cars, she

It's "harder for women on the streets" than it is for men, Miron said. They are frequently harassed, and occasionally suffer violence and rape, she said.

The community's new house will be open to any omen, Miron said, who "need shelter, just whoever omes." Meals will also be served. comes."

Miron said most of the food for the program comes from "trash." She said community members go to produce terminals to pick up food that is thrown away because it is unsuitable for sale in grocery stores.

Some pretty good meals have been made out of "garbage," she said.

Miron said the community's home is not an in-stitution. She said the new home is just to help women who need a "secure, safe roof over their heads."

campus was abuzz with word of eight dapper young men nattily attired in white tuxedos and who broken onto the SJSU entertainment scene two nights before.

The octet, calling themselves the Spartoons, featured "The Bunz," a 50 ish ex-Ivy Leaguer with an obviously underdeveloped penchant for telling jokes and a singing voice which would make even the most ardent Johnnie and the Sex Pistols fan cringe.

"The Bunz," it turned out was in real life none other than SJSU President John Bunzel. The show was the Spartan Showcase.

SJSU STUDENT Cheri Pope injured her knee Friday morning while practicing a dance routine, and here University police and ambulance attendents place her on a litter. Pope was taken to San Jose Hospital where she was treated and released later Friday. She is pictured in front of the Science Building where the accident occured.

## Prison officials 'skirt' issue, but provide support for bras

VACAVILLE (AP) - Thirteen transsexual inmates at the California Medical Facility here are being given female hormones, and the majority of them are supplied with brassieres, a state prison spokesman said Friday.

State prisons spokesman Phil Guthrie confirmed a news account that said state officials do not let the transsexuals wear skirts, however. The Vacaville facility,

California's medical prison, is the site where state prison officials house transsexuals, who are predisposed to identify with the opposite sex or have undergone surgery and hormone injections to

emissions at that time.

doing anything else.

achieve a sex change Dr. Gene Prout, the facility's cheif medical officer, estimated the state is spending a "couple of hundred dollars a year" on brassieres.

"We've kicked this around and considered having the inmates buy them, but then they would have to be available to any inmate, and it's ridiculous to let anyone who wants a bra to buy one. That gets into problems in a prison population," Prout said.

Prout said only men who began treatment as transsexuals before being sentenced to prison are

smog.

Plants cause 56% of Tahoe smog

allowed to continue it. Female hormones produce a variety of female body characteristics, including enlarged breasts.

"We don't feel prison is any place to start a change in sexual identity," Prout said.

The program began about two years ago when two transsexuals, both well-developed, arrived at the facility, he said.

Prout said he knew the program might be considered controversial "it is established as the but. ethically and morally proper thing to do to assist people in their change to whatever their sexual identity seems to be.'

coached some football and participated in faculty basketball and badmitton.

He taught social science in Zambia, Africa for a year through a church program.

Pfaff was in Africa when Martin Luther King was killed and experienced an peculiar feeling of kinship with the native Africans.

"They could identify with Martin Luther King," he said. "They felt a great sadness which I felt, too.

Back in the United States, Pfaff continued his career in education and came to SJSU in 1971.

Now, he is leaving to "find something more fulfilling at this point" in his life.

"I am worn out by administrative work and red tape," Pfaff said. "I want to work more with people." Pfaff will be working in a parish in San Jose to get into

"spiritual and pastoral aspect" of working with the people

The other part of the team, Dr. Pfaff, is retiring because of age and has no definite plans. He may develop his hobbies of photography and "playing a lot of golf."
