Program Board granted financial reprieve

By Lenny Bonsall and Jon Swartz

The A.S. Program Board, plagued by financial miseries, received a financial shot in the arm last Thursday with a \$10,916 injection into its budget for this semester The allocation was taken from non-reverting funds remaining from

the group's Programs and Events budget of last year.

After receiving its financial reprieve, the board requested \$88,500 from the A.S. Budget Committee last Friday for the 1982-1983 year, an increase of \$11,500 over its 1981-1982 budget request. Last Wednesday, the Program Board found itself with just \$3,000 in

uncommitted funds for the rest of the year. On Thursday, the \$10,916 reprieve was delivered, using funds that were left over from the groups 1981-1982 programs and events account.

A.S. Controller Angela Osborne explained how the money was obtained.

'The money that the board didn't use in their programs and events line items last year were non-reverting funds and were returned to that budget," Osborne said. "Had they been reverting funds, or money not used from their other accounts, the money would have been returned to the A.S. General Fund."

Just how the \$10,916 will be divided is up th the board, Osborne said. Bill Rolland, program board director, refused to comment on how the money would be spent.

At Friday's meeting of the A.S. Budget Committee, Program Board adviser Ted Gehrke presented his groups proposed 1982-1983 budget. The requested amount exceeds this year's allotment of \$77,000 by \$11,500.

Osborne asked Gehrke to explain the increase and why it was needed "The number one reason is expenses," Gehrke said. "Radio and advertising has become very expensive - well over a 100 percent increase over the last three years.

Gehrke told the committee that the program board was planning to concentrate on presenting more revenue-generating events for next year 'But a lot of your income-generating programs this year failed to generate any income," Osborne said.

She cited the Beatlemania and Samoan Spectacular presentations from last semester which lost \$2,000 and \$3,000 respectively.

"Yes, well, those can be considered throw-away events," Gehrke said. "However, concerts such as Greg Kihn sold out three days in advance of the event - we could keep scheduling these same sure things, but the students would get bored."

Gehrke then explained to the committee the difficulty of booking the

bigger, more popular acts

"Bill Graham has this place sewn up," Gehrke said, referring to the nationally renowned concert promoter. "Any act we can get has already been offered to Graham, and we are the only real competition he has in the South Bay

The board tried to secure the Dregs, a popular jazz-fusion group, for this semester but failed because of "cash flow problems."

The program board also presented its request for the summer program, events sponsored by the board during the summer session. Gehrke asked for \$9,950 for the summer of '82, up from last year's \$8,469 allotment. The increase, Gehrke said, is needed for clean-up

50,409 anothent. The increase, Genree said, is needed for clean-up following the annual Fountain Concert. "We could eliminate the concert for this summer to save money," Gehrke said. "But I'd hate to give it up – it's become such a popular event with the community."

Activists call for end of draft registration

David Harris, others speak against 'current situation'; compare it to Vietnam era

By Cary Wyant-Schairer

0

Approximately 400 students gathered in the Student Union Amphitheater at noon Friday to hear David Harris and other political activists speak out against draft registration.

"What you're signing at the post office," Harris told the crowd, "is a blank check that's going to be cashed in human lives.

registration was yesterday. Selective Service officials said

deadline for draft

The

Harris went to jail in 1970 for refusing to be drafted.

"how will our involvement poison our foreign relations?" He said he thought public op-position might keep the United States from involvement in El Salvador. Harris described President Reagan as a man who, as governor, "prided himself on not paying attention to those who op-

rally, Martin Maloney, 23, said he

"I'd like to think I wouldn't,"

Maloney said. "It's a big question that, fortunately, I don't have to face.

Steve Ohls, 21, another student, said he registered for the draft.

"I'm not a violent kid," he said. "I'd try to get out of a combat position.

Ohls said he didn't want to break the law and that he was afraid of prison because he might be raped or beaten.

en. "I don't think it's worth my while to get myself shot and killed," he said. "But I'd rather go into the military, even in combat, than go to prison.

Action taken against students termed 'crazy' SJSU officials condemn disenrollment of foreigners

By Scott Shifrel

The Chancellor's order causing 50 foreign students to e disenrolled from SJSU last semester has been called Unfair," "too stringent," and "crazy" by officials at 'Unfair,' SJSU and nationwide. "That's crazy," said Patricia Biddenger when she

was told of the students who were dropped from school from internal strife. when they were late paying installments on their nonresident tuition.

for the National Association for Foreign Student Affairs.

326 last spring has dropped by almost 100.

"It's a huge problem." Biddnenger said. The Iranian government would like the students, and money they pay to U.S. schools, back.

"They (Iran) are in a state of revolution," she said of the government which is at war with Iraq and is suffering

Some of the new rules imposed by the Iranian dient tuition. Biddenger is the Iranian student concerns coordinator have a government state that students must have a 2.5 GPA, biddenger is the Iranian student concerns coordinator have a government approved major, have fathers living in Iran, take classes no more than four years, and receive

students are disqualified and others are not. An added problem for the Iranian student is the poor

foreign exchange rating of the Central Bank of Iran, Rose said "They (the students) have to be right on top of it," she

said. "Everything has to go just right" for students to get their money through and on time, she said. Foreign students are permitted to make three in-

stallments and are giving a 10-day grace period for late payments. Students are sent a letter if they don't meet the initial deadline.

Last semester, students were disenrolled if they did

pay by the 10th and they had a 10 day extension," said the university's chief fiscal officer William Friedrichs.

Chancelolor Glenn S. 'Dumke's order, which took effect last fall, forced universites to tighten collection of installment payments made on the non-resident tuiton by foreign students.

Foreign students are allowed to pay installments on tuition in the CSU system because of the difficulty some have with the mail, government rules, political turmoil and other complications.

Non-residnt tution here is \$94.50 per unit. Foreign students must take at least 12 unite ep their st

Schools haven't given foreign students enough time to pay, said Julie Rose, another NAFSA official. "We just got a list (from Iran) of 30 blood "We just got a list (from Iran) of 30 bloody items that

Biddenger said the problem is not as large at Indiana disqualify a student," said Tom Coke, an SJSU foreign State University, where she works. The debt has gotten as student adviser. The restrictions seem to be employed large as \$130,000 there but the money was collected in selectively, he said. Rose said many Iranian students are being later years. Indiana State has 2,000 foreign students.

Nationwide, Biddenger reports, there are 45,000 discriminated against by their own government. nian students, by far the largest single group of foreign She said sometimes it is an overall GPA of 2.5 Iranian students, by far the largest single group of foreign required, sometimes a semster's average and sometimes students.

She said she has been impressed "by the stamina and the average in the major only is considered. If they go back and make a bribe, money can get stick-to-it-ness of the Iranian student in particular.

Three years ago there were only 30 more Iranian through easier, Rose said. Coke agreed that bribes happen students at Indiana State. SJSU's Iranian population of in some cases. He said he can't understand why some

not pay an installment by the 11th day

In the past, SJSU has allowed students to wait until \$15,000 per semester. they have to pay the next semster's fees and tuition until forcing them to pay.

Students were used to the "flexible" policy the school has had in the past, said Louie Barozzi, another SJSU foreign student adviser.

The three SJSU foreign student advisers though the new ruling was unfair and too restrictive.

SJSU and California State Universities officials said foreign students here. Although no they feel the students had enough warning

visas. Altoghether foreign students at SJSU pay up to

Students who were late on the third payment lost over \$1,000 and all units. Because of the newness of the rule, however, those who were late last semster have been allowed back in shcool. This will not be the case anymore.

Of the more than 1000 foreign students at SJSU about 25 percent are Iranian. That is the largest single group of official count available, one advisor estimated half of the 50 disenrolled

Academic Senate to review problems blocking proposed 'U' grade resolution

By Cindy Maro

The California State Universites Academic Senate may be reviewing problems with the "U" grade policy, pending action taken at todays SJSU Academic Senate meeting.

A resolution sponsred by A.S. President Tony Robinson and Statewide Academic Senator George Sicular would ask he CSU Academic Senate to evaluate its "U" grade policy and resolve any problems involved with it.

Students who fail to properly withdraw from a class receive a "U" grade, which is computed as an "F" when the student's GPA is completed.

Many students and instructors, including Robinson and Sicular, object to this.

"A student's grade point average should only be an indicator of a student's academic performance," they state in the resolution.

Neither Robinson nor Sicular could be reached for further comment.

Last semester the Academic Senate commended a "temporary exemption" in the 'U'' grade policy.

The recommendation to SJSU President Gail Fullerton would have allowed instructors to issue a "W" to students who failed to properly withdraw from a class but were academic standing when they stopped attending the class

The "W" grade, withdrawal without penalty, would have no effect on a student's GP/

However, Fullerton disagreed with the senate's recommendation. Insturctors might keep students on their rosters past the census date, raising questions about the validity of the census, she said.

This might lead funding to be based on enrollment at the end of the semester, with "U",

"W" and even "Incomplete" grades removed from the count.

"I can assure you that the fiscal implication for us of such a funding base, rather than the fourth week census, would be negative," accoring to Fullerton

She also noted that the temporary exemption would cause problems with transcripts, since SJSU would be the only CSU campus to have a different grading policy

'It is at present the student's responsibility to enroll and to withdraw ... I think that it should remain the responsibility of the student,' Fullerton stated.

However, the resolution before SJSU's Academic Senate today could cause the CSU Academic Senate to investigate the grading problems and alter the grading policy.

Prisoner to undergo psychological testing at Vacaville Hospital

By Dave Lewis

Rodolfo Loa, 28, charged with false imprisonment in connection with an attempted rape of an SJSU student was sent to Vacaville Medical facility for 30 days by observation by Superior Court Judge Marylin P. Zecher, Friday afternoon

Loa was originally arrested on Sept. 24 last year and charged with assault with intent to commit rape and the attempted of a female SJSU student on Aug. 29, 1981.

Loa originally pleaded not guilty to the assault charges during his Oct. 26 arraignment. He later entered a guilty plea to charges of false imprisonment at his January trial.

The defendant appeared with his attorney Tom Dettmer of the public defenders office, Dettmer had no comment after the sentencing

Loa was to begin his stay at Vacaville immediately according to Zecher and will return to court in 30 days for final sentencing.

We the people pay for it

Steelyard blues are bull

Big Business in this country is beginning to act like an incompetent, badly spoiled child, and the steel industry is its worst example

An unbelievable amount of moaning and whining comes out of the board rooms of United States Steel (USS), Bethelhem Steel and the rest of the major producers.

complaint? That Their biggest competition exists. A major problem if the industry,

according to industry represen-tatives, is the unfair competition the American steel companies faces from abroad. The major problem for the industry really is any competition at

Recently, USS has pushed for legislation seeking far tougher restrictions on the amount of steel that may be imported from other countries

USS maintains that foreign competitors sell the steel at an unfair price.

What's unfair about the price is that it is lower than the domestic price charged by USS. In order for a company like USS to compete with someone like the Japanese, USS would have to lower their prices, and God forbid, make less net profit.

In traditional economics that is the law of survivial. If your proice is too high, you either lower the price

or get out of the marketplace. USS and the rest of the steel

makers are seeking governmental exemption from the basic laws of economics. Like small children, they want to be protected from the realities of the world. USS, among others, claims it

has to have the profits in order to modernize its plants. Many of the facilities USS is using are more than30 years out of date. This obsolete equipment is blamed for the high prices the American steel companies have to charge. This argument sounds fine and

there would be no problem with it if the steel makers would truly modernize so they could charge a lower price in the future.

Unfortunately what they are doing with their profits has nothing to do with saving jobs and money in the industry. What USS has recently done is a

fine example of the greed which is running rampant through business today.

who work in the plants USS owns?

Not likely. At the same time USS was dealing for the oil company it shut down a plant in central California and another in the east coast, put-ting more than 600 persons out of work

The loans USS took out to buy the oil company won't be paid off for years, a lot of workers are out of jobs, and there isn't any money left over to do the modernizing that is necessary if American steel is to be competitive in the world market.

Is USS worried? Not a chance. The company knows that, just like a spoiled child who gets into trouble, they can go running to daddy for help.

In this case daddy is the government, and we the people will be paying for USS's poor management.

We will keep paying higher steel prices, which show up in everything from cars to buildings. We will also pick up the tab for the workers who

A badly spoiled child, it's the worst example

USS had a fine profit is 1981, but instead of investing in new equipment, they went ahead with a new venture. USS invested billions in buying Marathon Oil, a move which does nothing to help in updating their factories. But it does pently for the bank accounts of the company executives

And did the purchase of Marathon do anything for the people

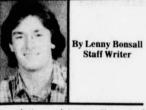

have lost their jobs due to the company's failure to modernize and we may wind up underwriting a loan to USS, just like Chrystler.

It is time for companies like USS to stop grabbing for everything they can and look at the long 4ange consequences of their actions. The American people can't afford any more of this type of irresponsible criminally

management to clear up the intent of the law

The Constitution of the United States is a sacred document, a testimonial to our forefathers and the nation they struggled to create in the name of freedom. But with every decision of the Supreme Court, this Constitution is

diluted and stretched into a highly

speculative and interpretive set of basic laws.

That is why it is time for a new constitutional convention to called in order to redefine these laws and bring them into the twentieth

century. The original Constitution was written by a collection of wise and brilliant men, with an acute sense of foresight

Even these men could not foresee the advent of radio and television, a highly sophisticated form of communication that allows one to contact someone thousands of miles away in just seconds, however.

The production of handguns, a printing press capable of producing literally thousands of volumes of

The law today is weighted down by years of accumulated precedents, a burden that must be carried by all the legal minds of this country. Lawyers and judges must wade through thousands of previous decisions in order to make or decide a case on accepted merits.

Buried under all this is the original Constitution, a foundation upon which has been built a veritable Winchester Mystery House of legalese.

Constitution needs restructuring

The highly interpretive act of defining the meaning of the Constitution has created a deeply split Supreme Court. Rarely is a unanimous decision found among

the court's present-day rulings. If the country were to to call together a convention to restructure the rights of our people as they apply to the present, speculative in-terpretations could be kept to a minimum while the intent of the law could be cleared up for the populace.

Naturally, this idea would meet violent opposition from all sides, particularly the far right. There would be the fear that even the rights we treasure now might be abolished in favor of clarity. Such fears would be unfounded.

The basic freedoms, speech, religion, the right to press, semble, the right to a speedy trial – all would be preserved. They would merely be reevaluated to include the recent decisions that affect them.

The Miranda decision, the New

concerned

Covering such areas as the rights of the accused (Miranda), libel (Sullivan) and fair and public trials (Estes), these decisions were added to the long list of American rights, piling one on top of the other. Now is the time to incorporate

these rulings, and the hundreds of others that affect us, into a workable and definable Constitution.

Of course, once the new Constitution is prepared, interpretation would still be needed to an extent. But the intent is not to take away the deductive powers of our authorities.

It is merely to make their job of defining the law easier and more efficient by combining all needed considerations into one convenient package.

There are procedural questions concerning such a proposal. Who would be responsible for assembling such a package? Who would decide what would be included and to what degree it would be used? How would it be approved?

Questions such as this present perhaps the biggest obstacle to ever having such a convention. Regardless of the procedure taken, however, the population would, and should, provide a major part of the input concerning the final decision, should such a proposal ever be enacted.

By including themselves, the people would be ensuring their security while at the same time demonstrating the greatest and least disposable right of all: individual involvement in their own government.

the mailbag instructors and technicians who I

Computer lab is in bad shape

Editor

This semester I've come across a very sad situation while taking a computer class in the Engineering Department.

The computer equipment (namely key-punch machines) is in bad shape with about fifty percent of the machines inoperative. The labs are overcrowded to the point of not being able to utilize that equipment which is working

It is surprising that a state university does not equal the quality of equipment/maintenance used at the junior college level.

If declining enrollment has been a problem, the inadequacies like this must be taken care of.

Fortunately, the Engineering Department is staffed with quality

am sure would like usable equipment also. Bruce D. Dehney Meteorlogy

SJSU health seminar focuses on problems of black community

By Marianne Croker Black people are facing a 'declining health picture' as they have a higher cancer rate and a lower expected life span than whites, according to Dr. Maria Smallwood, Afro-American Studies assistant professor

African Awareness Month sponsored a seminar titled "Health in Black Com-munity" last Thursday in the S.U. Costanoan Room, focusing on the heath problem

Problems facing blacks, including an infant mortality rate 65 percent higher than whites, a death rate in black men 43 percent higher than whites and black women being 66 percent higher than whites.

Four black SJSU students tried to examine the causes of these statistics and offer their solutions. The first, Margie Spikes, spoke on pesticides and the use of DDT.

If a cow grazes on grass sprayed with DDT, the pesticide will settle into the fatty ubstances of its body eventually getting into the cow's milk and thus being passed on to the consumer, according to Spikes. "Milk is not in (style)," Spikes said.

She advises not drinking it.

Pesticides sprayed on fruits were another concern. Spikes advises washing the fruit with vinegar and water to remove any residue.

"In order to make a significant change in our health, we have to be aware of some

0

things that affect us," she said.

Robert Bridges, another student, spoke on the 'new sickness' of radiation effects. Radiation is consumed through breathing, foods, dust particles, X-rays, and commercially radiated food, according to Bridges.

Protection from radiation is found in natural iodine (found in sea kelp and turnip greens), he said.

Bridges suggests avoiding un-cessary X-rays, luminous watches and clocks, excessive air travel, color television, and smoke detectors.

"I'm generally concerned about our people's health," Bridges said. "If you don't have your health, you don't have anything.'

Harriett Paster, speaking on the safety of drinking water advises people to boil their water for 15 minutes to eliminate impurities

Taking matters into our own hands said Paster, "we have to change our life style to survive."

Food substances are a problem, according to Marlies Yearby, the last speaker. She offered a 'Save Your Life Diet' consisting of whole grains and high regetable fiber. Yearby advises increased intake of fresh vegetables and fruits, more whole wheat bread, brown rice, less salt, less sugar and no milk.

'Do something with this information and you'll respect your body more and feel better," Yearby said.

One building, called the aquatic facility,

The floor plans show the building containing a diving well, sun deck, 50-meter swimming pool, ski slope and men's and women's locker rooms.

Racquetball courts, a changing room, lounge, shops, a golf cage, a climbing wall for rock climbing and an upper level with a game room and weight training room, also appear in the plans.

Across the street near Joe West Hall, will be the Events Building ,a facility for concerts and sporting events, with a seating capacity of 10,200.

"This could become a major concert center for the whole Bay Area," said Ted Gehrke, program board advisor.

According to Robinson, an avid Rec Center supporter, "It is a luxury item, but that seems to be what attracts students." "It will enhance the life of students around here and put a jolt into the enrollment," he said.

"Students are being attracted to campuses for other reasons than academia

The Rec Center, will be paid for by student fees. If the center is approved, students will being paying an extra \$10 per semester in fees next fall. The fee would go toward the planning and developemnt of the center.

Monday, March 1, 1982

by Dean Fortunati

After two years, fees will increase further, to between \$25 and \$40 a semester. This fee will graudally pay off the construction loan.

The center's \$13 million cost estimate is based on the space available for the com-plexes, student fees and the facilities desired. The conceptualizations are a "rough idea of what you'd get for the money," Gerhke

said. According to Ron Barrett, S.U. director, the center will be viewed "legally as an ad-dition to the S.U.," and the responsibility of

the S.U. board of governors. He said the center could be completed by

1984 or 1985 Both the Independent Weekly and the Spartan Daily have indicated their opposition to the proposal.

'The state's not going to build a rec center, they've made that quite clear," Robinson said. "I think the students will want to take a big step forward for themselves and the university.

"I do expect a lot of opposition, though," he said.

SUBOG approves \$3,700 to display recreation center conceptualization

By Holly Fletcher As a way to "help students visualize it," the Student Union board of governors allocated \$3,700 for an artist's conceptualization of the proposed \$13 million Recreation and Events Center.

The renderings recently were inspected by the board and will be displayed this week in the Student Union display case near the A.S. Business Office.

'I think they'll help students visualize it and let everyone see what they're voting on," said Tony Robinson, A.S. President.

The rendering by Bjorn Olsen, are part of a "campus blitz" that will precede the election in March. Students will vote on whether they want the Rec Center.

The conceptualizations were based on a student survey taken last semester, which found, in part, that students wanted more major concerts and racquetball courts on campus.

The five pictures show the center divided into two buildings.

is to be located on the north side of San Carlos Street, between Seventh Street and the Health Building.

on campus.

"We're here to serve the lents," said General Manager students," Jim McCarthy.

S.U. Information Booth aids KSJS provides traffic news

students with daily problems

Counter offers aspirin, pencils

Students who work behind the Student Union Information Booth counter are prepared for anything.

They have information on everything from dorm menus to car insurance to the location of the nearest telephone. They dispense aspirin, pencils and matches as well as coat hangers for people who lock their keys in their cars.

"Sometimes it's real stressful here," ' said Gloria Robertson, administrative assistant to the public in-formation service coordinator. "People are yelling at you, phones are ringing and everybody wants your atention.

But most of the time, said Tim Maigaard, a recreation therapy junior, "people are very friendly. You're offering them a free service and they're thankful."

Maigaard is one of six students who works at the booth

"I love it here, it's the best job I've every had," he said.

'People are yelling, the phones are ringing, everybody wants attention'

Students wander up to the counter, some ask for a encil or where to buy stamps, while others ask more difficult questions.

"Is there a sky-diving club at SJSU?" asked Emilio Bilbaenu, a freshman engineering student. "I want to take up sky-diving.

Robertson checks and finds there is no such club. There is diversity in questions asked and answered. on said all employees must go through an extensive training program.

"They learn by doing," she said. "If you don't give someone the right information, they're going to come

Spartan Daily

back and tell you.'

Students who work at the booth have to be prepared for anything. Jan Hoshino, a sophomore nursing major, recalled when a girl fainted in front of the booth.

"She had given blood and she fainted in front of the counter," she said. "I jumped over the counter to help

Usually their work is more mundane. The students estimated that 80 percent of the questions asked are easily answered.

Sometimes, though, students can get loud and abusive.

"I try not to get upset back at them," Maigaard said.

"I haven't blown up at anybody, it just adds to the fire." "Basically, people are usually nice. They aren't really frustrated at you, they are just frustrated,"Robertson said.

"You just have to forget about it or it'll wreck your whole day," she said.

But the students agreed that most of their experiences are positive.

For example, when they loan a student 50 cents so they can get their car out of the parking garage, "they always come to pay us back," said Maigaard.

'And they always bring back the hangers we loan them," added Hoshino.

The Information Booth has a \$10,000 a year operating budget, with the money coming from student fees and has existed since the S.U. opened.

"When I was hired, it was just an empty little shell," said Judy Hermann, public information service coordinator.

She said she worked to turn it into a "comprehensive information center" which was not concerned solely with the building or the university.

By Holly Taglier

Campus comuters, plagued by traffic jams and overflowing garages, can learn of the traffic outlook by listening to KSJS each morning. The student-oriented news show

made its debut last week on FM 91.

At 7 a.m. 8 a.m. and 9 a.m. each morning and again at noon, the station will report on traffic con-

ditions around the campus, as well as the parking situations at both the Ninth and Seventh street garages.

Each news break will last approximately five minutes and will

Funding for many may be eliminated

By Cindy Maro More than 700 SJSU students will find their financial aid reduced or eliminated because of cutbacks in state and federal student aid for 1982-83. Federal student aid programs will be

reduced by approximately 10 percent, while the Cal Grant program will be reduced by 2.5 percent.

The budget cuts will result in "some small reductions" in aid to students, but many may find their funds eliminated, said Don Ryan, financial aid director.

Gaila Hinkston, an engineering major who receives aid through the Pell Grant program (formerly known as the Basic Educational Opportunity Grant program), said any reduction in assistance would force her to enroll in school on a part-time basis.

"I need the money badly," Hinkston said. "(A reduction) means I would have to get a job in order to be able to attend school.'

Ny-Thu Phan, a business finance major

who recieves money through the Pell Grant Program, also wondered how the cuts would affect her

"If it's reduced it's OK - I could struggle," Phan said. "If it's eliminated I couldn't go to school."

Phan said government officials should trim their budgets in other areas.

"Some people don't have another form of income except the grant," she said. Next year, the \$2.36 billion Pell Grant

program, which awards money to the neediest students, will be cut by \$18 million.

"The \$186 million National Direct Student Loan Program, which provides students with low-interest loans, will be cut by \$8 million.

In addition, the \$550 million College Work Study program, which creates jobs for needy

students, will recieve a \$66 million cut. and the \$370 million Supplemental Educational Opportunity Grant program, which aids students whose Pell grants don't fully cover their needs, will recieve a \$92

problems.

These federal programs provided more than 6,450 awards to SJSU students in 1980-81, Ryan said. However, he noted that many students receive more than one form of financial aid.

A 2.5 percent reduction in the California Students Aid Commission's budget will affect 30 of SJSU's 1,150 Cal Grant recipients, Ryan said

Cal Grant A recipients usually recieve full payment of their fees, while Cal Grant B recipients usually receive a full fee payment and a monthly stipend, Ryan said.

Next year's redcutions are not nearly as drastic as President's Reagan's 1983-1984 student aid budget proposal. Rvan said.

"It (the 1982- 1983 budget) is nothing like these other reductions," Ryan said. The 1983-1984 proposal calls for the

elimination of Supplemental Educational Opportunity Grant and National Direct Student Loan programs. Federal financial aid programs would be cut by \$1.5 billion.

and

Astin.

By Vivian Vasquez At a recent conference, various department heads of the California State Univesrities system expressed concern on how to integrate women's studies into regular curriculums. the keynote

speaker, psychologist Helen S. Astin addressed this problem and several other areas during the conference of Higher Education for Women in the 1980s.

The conference was held in commemoration of the 10th year of Women's Studies and the 125th anof SJSU's niversary founding.

According to SJSU President Gail Fullerton, the conference was the first in a series Astin's solution to the

problem was for women to write the textbooks.

However, her conclusion was that textbooks were not as valuable as articles or a book based on research.

Most of Astin's research revolves around academic women: what happens to them; what is their status on campus; how they survive; are they satisfied and do they receive equal rewards.

She was recently in-volved in a study on the status and progress of minorities in higher educatin.

Data was collected from faculty and students 300 campuses on nationally, from 1966 to 1981. Facts were collected regarding family background, high school preparation, aspirations, self-concent and values. The study concluded that students today differ from

those in the past. Astin's paper from this study is entitled Women on the Campus in the 80s and from it she gave the

with the necessary skills for success in the labor market," Astin said, "but also with a greater sense of self-assurance and leadership that will help them overcome some of the handicaps stemming from

past hstory for dependence and conformity. Astin focused on self-esteem and the effect of college "I expect college to

Astin said. our colleges and univeristies are ac-complishing one of their most important missions

ferential has narrowed. that of psychological and personal development." "Several goals have declined for both sex," Astin

Astin's primary concern is discovering whether the impact of college is equally beneficial to men and women and to identify those particular factors that seem most favorable to the development of the

woman student. During the 1970s, the roles of women underwent change, according to Astin. "More women, par-ticularly married women with children had jobs outside the home," Astin

said. "Young women began to delay marriage and child-bearing." People of both sexes

became more aware of sex roles and stereotypes and in many cases and worked to overcome them, she said.

"Rights for women became a political issue," Astin said. While the national

economy was changing, inflation soared and the job market tightened. These forces appear to have affected the degree aspirations and career

Health Service says flu cases increasing

By Dawn Furukawa SJSU Health Service is part of a survey the Santa ara County Health Department has started.

According to Dr. Raymond Miller, health services lirector, blood samples and throat washings are taken. If viral isolates growth and acute and convalescent blood is found, the reading is considered positive.

These samples are then sent to the State Health Department for confirmation.

"A significant point is that other county groups participating in the surveillance have not had a in-' said Miller.

Miller stresses that this is not of epidemic proportions, since only eight of 24 cases have come back positive.

In the last couple of weeks there has been a slight rease in flu-like symptoms, according to Miller. There has been a confirmation from the State

Health Department of eight positive cases in the Influenza A group.

"Fortunately, the subtype on two of the cases confirmed is the England flu," said Miller, adding that England flue is a milder type.

The symptoms of this flu are a severe headaches, fatigue, aching muscles, loss of appetite, mild cough and fever

According to Miller, if a student becomes ill he or she should get lots of rest, take fluids and take sponge baths and/or aspirin to keep the temperature down. Miller also encourages the person stay home for two to three days or until he or she feels better.

to establish the atmosphere and programming abilities associated with a coffee house

The plan to remodel the bakery resutled from the

"We want to improve the environment aesthetically,"

following discourse.

"The college years are a time when young adults make critical decisions which will affect their lives," Astin said.

Some critical decisions are: breaking loose from families and their establishing an in-dependent identity, dependent identity, evaluating their strengths and weaknesses and making decisions about marriage, children and work.

According to Astin, more women than ever are now participating in the labor force. More women are also aspiring to and are entering higher levels of education.

"One hopes and ex-pects that colleges are providing women not only

choices of successive coherts of college students, Astin said, espeically, women

Data collected from faculty,

students on 300 schools

The proportion of women who aspired to professional degrees grew steadily. Business, law and engineering are growing fields for women.

For men, business and engineering enrollment is increasing according to Astin.

A much higher proportion of men and women see a college education as a means to better jobs and money. 'We're also seeing a said

dramatic change in the proportion of women seeking higher degrees: M.B.A.'s, medical degrees and Ph.D's," Astin said.

wishing to postpone the raising of a family has It has also grown creased for men. She said men are also

more liberal with sex encounters. However, they still cling to their belief when children are born, the women's role is in the home.

They have not fully accepted the idea that raising children should be an equal responsibility. "Finally, being very

well off financially was much more important (to both male and female students) in 1980 than to students in 1971," Astin

A conclusion would suggest over time, both men and women become much more intersted "in goals of gaining power,

self-esteem," Astin said. "Perhaps, such faculty members not only serve as role models and mentors but aslo communicate that they take their women students serious, this increasing the women's intellectual self-confiden-

Astin's conclusion was Asun's conclusion was that faculty members should take time out to socialize with women students. It'll help develop their self-esteem and

leadership. Another conclusion of Astin's was that if women are to emerge from college, independent, self-assured and prepared to take over whatever future goals they have chosen for themselves whether work college, marriage and family, the need more

board and the Student Union board of governors

The final decision on the coffee house must be made by the Spartan Shops board of directors.

"I would like the board to appoint a committee to find out what funds would be available," Zant said.

The money would come from Spartan Shops building funds, he said. It would accept bids from private contractors.

He estimated the cost of the work at \$150,000

Zant pointed out that timing was one of the major factors involved in establishing the coffee house

"It would have to be done at a time when the building is normally closed," Zant said. "Between the fall and spring semester would be too tight." The remodeling project on the Pub took longer than expected and Spartan Shops lost a lot of money, he said.

The committee was enthusiastic about the coffee house project due to the success of the temporary one established in the Student Union on two previous occasions

The first one was established in October of 1979 for the 10th anniversary of the Student Unior

SAME OWNER SINCE 1953

According to Miller, the average number of students seen at the Health Center is 200. But two weeks ago the average was 217 cases and last Wednesday the figure was 266 cases.

Miller said if a student has something he or she can't explain, it should be checked out in the Health Service, especially if it hasn't improved in two to three weeks.

Due to the increase of the number of cases seen with a limited staff, Miller recommends students go between 8-9:30 a.m. to avoid long waits. The most crowded time is between 10 a.m. and 2 p.m.

By Mark DuFrene SJSU forward Cindy Galarza, the only senior on the Lady Spartans, tries to slow USF player in a game earlier this season.

Cindy Galarza: SJSU's consistent player

By Mike Thomas

When this season is over, the name Cindy Galarza will not appear in the record books of SJSU women's basketball like the names of Elinor Banks. Karen Mason or Wanda Thompson, all of whom Galarza played with last year

But Galarza will be remembered by the people who have played on the same team with her, and the memories will probably be good ones.

Cindy was born in San Francisco on April 2, 1960 to Rose and Ernest Galarza. She grew up in San Mateo and attended Hillsdale High, where she played four years of var-sity basketball.

She was voted all-league in the Mid-Peninsula League three of those years. 'I've been playing

since I can remember, Galarza said. "I started playing with my brother (Richard) and my father.'

After high school, Galarza attended the College of San Mateo, majored in aeronautics and played basketball.

'We saw her play in summer league here and I was really impressed, SJSU head coach Sharon Chatman said. "I regretted that she hadn't had a chance ot play for us because she had already made a commitment to CSM."

In her first season at CSM, Galarza was voted all-league and all-NorCal. But in the third game of her second season disaster struck as she landed wrong trying to catch a pass and tore cartilage on both sides of her right knee.

The doctor said that I would be able to play again," Galarza noted, "but I had to sit down with my parents and decide whether that was what I wanted to do and what was

the best thing for me." Galarza decided to play but the road back was not easy.

"It was one of the hardest things that I have ever done," Galarza said. "My training program consisted of lifting weights, stretching, whirlpool, and

ice. The road back was hard but Galarza was able to come back that same season and help her team win the NorCal championship.

Much of the strength and determination that Galarza shows comes from her parents.

"I really depend on them," Galarza hem," Galarza said. 'They are at every game that they can possibly come to and I get disappointed when they are not there.

Because of the injury to her knee, one would that most colleges think would stay away from recruiting her, but USF,

'I don't think I would have enjoyed school as much if I didn't play.' -- Galarza

the questionnaires

players

Fresno State, Hayward and, of course, SJSU were still interested. "You're always leary that the other players would like to play with. She player with injuries, Chatman recalled, "but I had a chance to see her was also picked as the friendliest on 90 pecent of

about four games play after the injury. "The injury didn't seem to effect her playing that much and she had the

tenacity to come back from the injury.' One of the first things

that Galarza did when she got to SJSU was to change her major from aeronautics to physical education.

"I would like to continue flying," Galarza said, "I would like to flight instruct and teach, but I definitely want to coach.'

In her first season, Galarza played well and it was evident that she was going to be a catalyst for this year's team.

When Chatman was asked to describe Galarza, she answered, "Consistent, a leader, and a hard worker.' On a questionnaire given to all of the players at

the beginning of the season, Galarza was mentioned by all of them in all of the different categories.

Recruiting star

SJSU football coach Jack Elway said in a radio in-terview last year that recruiting is 90 percent of the for-mula for producing winning teams in college football. Elway's efforts since he was named head coach four

years ago has shown his belief in that formula.

After all, it was Elway and his staff which got com-mitments from such talent as running back Gerald Willhite, quarterback Steve Clarkson and wide receiver Mark Nichols. A few weeks ago, Elway's staff completed yet another

successful recruiting campaign with the signing of 23 junior college players and seven high school players.

But this year's recruiting efforts were even more successful in light of two important improvements. First, Elway was able to sign a couple of high school players that were also recruited by such national powers as USC and UCLA.

Two players in particular are Marc Oliver, a 6-foot-2, 240-pound center from Galileo of San Francisco and Ed Huse, a 6-foot-8, 245 pound tight end from Branham of San

Oliver was liked by other colleges due to his outstanding strength and quickness. He was also an All-California selection and it's not that often that a school like SJSU gets an All-California pick. Those players tend to sign with Pac-10 schools. Huse, who is a three-sport star at Branham, was recruited by other colleges because of his great size and mobility. Tight ends that are 6-foot-8, and 245 pounds also tend to go with Pac-10 programs

It's true that SJSU has successfull recruited some junior college players over Pac-10 schools in the past, but recruiting high school players over the same schools is more significant because high school recruits were high school players are better prospects. Many junior college recruits were high school players not recruited earlier.

The second major improvement in Elway's recruiting is that five of the seven high school players signed are from San Jose-area schools.

If SJSU can continue to recruit local players, then a solid base of local fan support can be built.

On the average, however, SJSU still cannot recruit with Pac-10 schools. While Elway was able to land Oliver and Huse, he couldn't come close to signing super-star Kevin Willhite from Rancho Cordova, who even laughed at the thought of playing for SJSU.

For SJSU to improve even more in its recruiting, Spartan Stadium will have to be expanded. If SJSU played Pac-10 schools in home games, then maybe Elway could compete even more strongly with those schools in recruiting. Those schools won't play in Spartan Stadium unless there are at least 30,000 seats.

Bill Berry's basketball recruiting also suffers greatly due to the lack of an adequate playing facility.

While Elway has had some success recruiting with Pac-10 schools, Berry has had very little.

Civic Auditorium-'lost in space'

Top high school and junior college players simply don't want to play in a small arena such as Civic Auditorium, which seats a little over 2,000 persons.

One such t o high school recruit, guard Ernest Lee from Kennedy of Sacramento, recently visited Civic

from Kennedy of Sacramento, recently visited civic Auditorium while being recruited by Berry. "I wouldn't want to come here," Lee said, who watched SJSU play Fresno State. "This is supposed to be a home game for San Jose, but most of the people here are rooting for the visiting team."

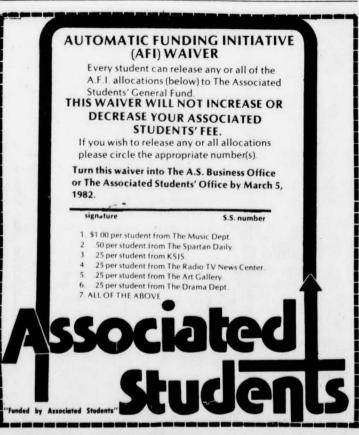

Lee, who is averaging 22 points and eight assists for a team which is 24-0, would rather play for a school with a big-time image.

"I'm kind of a flashy player," Lee noted, "and I want to play in front of a lot of people. San Jose just doesn't have the kind of schedule or fan support I'm looking for."

Galarza goes for a lay-up against USF

With a REC Center, Berry's program could build better schedule which in turn would build better fansuppor

If Lee had seen SJSU play Fresno State in a new REC Center with 7,000-10,000 fans rooting for SJSU, then Berry would certainly be able to interest Lee.

Berry, however, views the REC Center as much more than a basketball arena.

"The REC Center would be a focal point for the community," Berry stated. "The students would benefit greatly, especially in the area of concerts. I just think it would greatly improve the whole atmosphere here." And a great atmosphere at SJSU will help both Berry

and Elway recruit and sign great players. SHORT STUFF: Fresno State also enjoyed a strong

recruiting campaign for football, but its success can be directly related to the fact that coach Jim Sweeney was able to recruit his son.

Sweeney's quarterback son, Kevin, was the Northern California Player of the Year at Bullard High in Fresno after he threw for 3,039 yards and 40 touchdowns in just 12 games.

Sweeney was also able to land his son's favorite target at Bullard, split end Pete Sartini, who caught 23 touchdown passes and was named to the All-California team

Fullerton State's baseball team was ranked number one in a pre-season national poll and coach Augie Garrido

"We've called the trophy company and ordered a copy of our 1979 NCAA championship trophy," Garrido quipped. "That way we don't even have to play."

Garrido's team must have felt the same way because the Titans then proceeded to lose four of their first seven games

Jack Elway participated in a Champion Coach-of-the-Year football clinic last weekend at the Jack Tar Hotel in San Francisco.

Elway was one of several coaches present which included former Michigan State coach Duffy Daugherty, former Oklahoma coach Bud Wilkinson and current Cal coach Joe Kapp ...

ugust 6, 1945, 8:15 a.m. At first, there was no 0 noise - only a sudden flash of light. Seconds later, the walls and windows shattered and Kiyoko Oda's home lay in a pile of burning splinters.

When the first atomic bomb was dropped on Hiroshima, an estimated 70,000 persons were reported killed or missing and about 70.000 others were injured.

Among the victims were 4,800 American citizens, including Oda, who was born in Loomis. Calif.

During that same period, Takashi Inouye, a sergeant in the U.S. Army, was working as an interpreter in the Philippines

"At the time, all I heard were rumors about how devastating the bomb was," said Inouye, a second generation

Japanese-American. Thirty-six years later, Oda, a 65-year-old San Jose resident, suffers from heart disease and internal tissue damage caused by radiation.

She is now under the care of her family physician - Dr. Takashi Inouye. In an attempt to aid

Hiroshima: A-bomb has lasting repercussions

the American bomb survivors, a team of physicians from Japan meets with the victims and some American doctors every two years to exchange knowledge and check on the progress of the victims.

On their first "mission" ten years ago, Inouye allowed the Japanese physicians to use his office on North First Street for the examinations. Since then the physicians have been allowed to conduct examinations at the U.S.

Public Service Hospital in San Francisco. Inouye, along with other Volunteer American

The United States has no such provisions for its 600 American survivors who often pay up to \$500 per month in medical expenses, he said.

> The victims face a constant struggle scrimping on medical expenses and avoiding costly hospitalization.

Inouye said that some victims try to keep their illnesses a secret because they encounter insurance descrimination.

"Some survivors are denied medical insurance coverage when insurance companies discover that they are victims of the atomic bomb," he said. 'They are considered 'bad risks'.'

Besides physical and financial hardships, the victims also suffer from emotional distress.

"I saw a lot of people with burned skin and flesh hanging from their bodies," Oda said.

Amid a smoking heap of rubble that had been a bomb shelter, she saw the skeletons of victims crouched on the floor and sitting upright in chairs.

"It was the most horrible thing I've ever experienced in my life,' she said. "I still have nightmares about it today.

"I dream that the bodies of my dead friends would suddenly come alive and talk to me.'

According to Inouye, "The biggest problem for the victims is probably the

psychological fear of not owing the long-term effects of radiation.'

The reason Inouye takes an active part in helping the bomb victims is not because of his duty as a physician and healer. The real reason stems back to his days in the U.S. Army.

Inouye, a graduate of Indiana University, was in Tokyo during the U.S. occupation of Japan after World War II.

Tokyo had been demolished as a result of incendiary bombing and was a "shambles," Inouye said.

"Tokyo looked bad enough," he said. "I didn't want to think Hiroshima looked any worse.

"The people in Japan anything, but I sensed that they wanted to. Every time they saw an American uniform the American uniform, the oks on their faces asked, Why did you do this?'

Inouye was in Japan for one year but "I didn't have the nerve to go to Hiroshima. I was afraid of what I might see."

To this day he has never visited Hiroshima.

"As a human being I feel responsible to the bomb victims," he said. 'The bombing of Hiroshima should be on everybody's conscience.

"In a way I am trying to appease my own guilt. When I treat Mrs. Oda, I am treating my own conscience.

Budget cuts don't affect EOP funds

By Stewart Emerson

President Reagan's budget cuts haven't affected SJSU's Educational Opportunity Program according to Gabe Réyes, program director.

'It's hard to say what will happen next year," Reyes said, referring to Reagan's proposed \$1.5 billion cuts in student financial aid for 1983-1984.

Reyes said since the Educational Opportunity Program hasn't suffered the same declining enrollment as SJSU "our funding hasn't been ad-versely affected."

Although the final data for spring enrollment isn't yet available, Reyes said the approximately 1,400 students in the program this semester is less than usual

He said the department just now examining the fall enrollment figures. The final figures for this semester won't be available until April.

Opportunity

student grant, succeed which ranges from \$200 to \$1,000 per student per year, is based on the applicant's level of need. Reyes said guidelines EOP aid is awarded based on standard financial aid

criteria. "The formula is based on the number of students being serviced in the program," Reyes said.

A student must first apply at the admissions office. If cleared by ad-missions, the student must then apply for financial aid and EOP aid.

A professional staff, the EOP director, coun-selors, recruiters, and tutorial specialists, then determines if the student is eligible for the EOP grant eligible for the EOP grant. Low income is the first step in evaluating EOP applicants, Reyes said. Subjective criteria include self-perception, perception

by others, ex-perience/maturity motivation, he added. The applicant should

interview

"Students need to keep the conversation (in an interview) on their abilites rather than focus on their disabilites," she said.

To help disabled students prepare for interviews. "Effective interviewing for people with disabilites" offered by Career Planning and Placement.

'This course is open to students from freshmen on up," said Sampson. "It deals with the kinds of things students should be aware of in the job market."

Sampson also beps students deal with application forms.

"It is considered discriminatory to ask 'Do you have a dicap?" whereas it is not to ask " 'Do you have any handicap?' disability that can hinder your ability in this job', " said Sampson

Sampson stressed that disabled persons are not only those with visual disabilites, such as wheelchair users. "We give assistance to people with epilepsy, hear problems and emotional disabilities," she said. Sampson helps students decide what occupations they

should get that won't handicap their disabilites. "If a student has a back problem, to get a job that

requires a lot of bending and lifting heavy objects will handicap the problem, whereas a desk job won't, "she said

Sampson said many students with disabiilites are afraid of losing social security if they work. But there is a "Plan for Achieving" enabling recipients to work without jeopardizing social security if they need social security money for services.

Sampson also works with employers to try and increase receptibility to students with disabilites.

"Interviewers are receptive and do ask about disabled students," she said.

Sampson also helps students become aware of their rights

"Employers cannot discriminate based on projective disabilites," she said. "You cannot say that you can predict when someone with multiple sclerosis will have about anymore than you can predict you won't be hit by a car tomorrow.

House Office Building Washington, D.C. 20515

(choose one or the name of another congressman if these three are not your representatives)

Dear Congressman

I am a student at San Jose State University receiving, or planning to apply for, financial aid. The proposed cutbacks in the federal financial aid programs developed by the Reagan administration will cut an estimated fifty percent of the federal student aid funds for California college students in the 1983 budget. This may adversely affect my financial aid package.

In my opinion, the Reagan administration is unaware of the seriousness or need for student financial aid. Expenses for basic college costs are rising sharply every year. It is becoming more difficult for the to finance my own education. Also, I may be unable to pursue any graduate work since almost all the graduate financial programs are being eliminated. A master's or other professional degree is becoming vital to any career that I may want to pursue.

Please continue to support federal financial aid programs for college students. After all, it's an investment for your society as well as mine. Why sacrafice the future^o
