## A.S. may face loss if yearbook sales maintain slow pace

er 18, 1982

Associated Students face a tremendous financial loss if the A.S.-funded yearbook project is unable to sell more

One thousand yearbooks have to be sold for the project to break even financially, but so far only 68 are reported to have been purchased through pre-sales

> A.S. breaks law See page 3

If even 300 books are sold, A.S. will still incur a loss of \$11,648, according to figures compiled by Jean Lenart, A.S. business manager

Barry Probst, A.S. director of students rights, told the A.S. board of directors Wednesday, "If it's even going to be a substantial loss, we should think about closing down

A.S. officials said they are optimistic that more of the \$18 yearbooks have been sold through pre-sales than have

The A.S. general fund, which could possibly be tapped to cover a financial loss, is expected to contain no more than \$6,476 by next semester when the yearbooks are

However, A.S. will not be indebted to Josten's, the yearbook publisher, until Dec. 10 when the cover is esheduled to be printed and "services will be rendered" for the first time, Probst said.

But A.S. will then be liable for the cost of printing the cover and any following publishing expenses, he said. If no services are rendered at all, the contract

doesn't count," Probst said. "Right now, we're still in a freeze area. There is no liability to Josten's

The total cost of the project is projected at \$16,640 but A.S. officials have said from the beginning

## **Admissions and Records** dispels registration myths

Forms not processed 'first come, first served'

By Jacquie Toth

Despite what appears to be a common belief among students, class request forms at SJSU are not processed on a "first come, first served" basis.

"That's a myth," according to Linda Harris, assistant director of records. The date at which a form is turned in to a student's major department -- as long as it is within submission deadlines -- has no effect on his or her chances of getting the classes requested.

Which class request forms are processed first is determined by a policy recommended and approved by the Academic Senate in 1973, Harris said.

Although all students would, of course, like their forms to be processed first, handicapped students are given that privilege, according to Harris.

Because many of these students are limited to a wheelchair or have difficulty getting from one class to another, the location of the classes

they receive is vital, Harris said. Class request forms belonging to students entering SJSU's Educational Opportunity Program and varsity athletes are processed

'This priority was given to EOF students to try to get them off on the right foot," said Edgar Chambers, director of admissions and records. 'It's an additional step in getting them through the adjustment process of going to a major

The fact that varsity athletes share second priority status has, according to Chambers, been a controversial topic among some students and faculty members.

Athletes are allowed second priority at registration, but only in semester in which they are formally participating in their sport,

because they must arrange their schedules around games and practice times, Harris said.

Athletes, as well as handicapped and EOP students, must be certified by the university before they receive these priorities, she said.

Certification takes the form of a card that the student must request and that is signed by the appropriate department chairperson, Harris

Next in line for the classes of their choice are student assistants who are classified as "registration

workers." Students who volunteer for these

health officers to the basement to inspect it following Wednesday's article, said from what they could tell, the leftover debris was not an "imminent health hazard," but added, there's always a potential for disease. You can't eliminate that possibility," he said.

On Nov. 1, a nearby city sewer overflowed, and raw sewage poured into the Science Building basement, inundating the hallways and surrounding rooms in sewage an inch deep, according to workers from the Science Education

Resource Center. The initial spill was cleaned up by city workers and the Plant Operations plumbing crew.

However, Science Education Resource workers complained the cleanup was not thorough and that SJSU custodians didn't show up to clean the basement until Nov. 11. more than a week after the spill

## Students use many birth control forms

This is the fifth and final installment of a Daily series investigating sex and

### By Karol Warner

A study of sexual trends on college campuses was done by Playboy Magazine this year. Researchers polled students from 20 univerities throughout the United States At the universities involved in the study, nine and one-half percent of the

students who participated in sex used no method of birth control The pill was used by 32.7 percent, condoms by 17 percent, diaphragms and diaphragm-condom combinations by 16 percent, and the rhythm method

by five percent of the students who were sexually active. Students who participate, or who are considering participating, in

sexual intercourse, should know some facts about pregnancy and birth control, according to Oscar Battle, health educator at the Health Center. The Health Center offers information on birth control and provides vaginal checkups and related blood work for women. Pregnancy tests and a

referral service for pregnant women with both wanted and unwanted pregnancies are also offered. Prevention is offered in two categories: prescription and non-prescription methods. Prescrition methods in lade "the pill," intrauterine

devices and the diaphragm. Non-prescription methods include condoms, contraceptive foams, fertility awareness with abstinence and sterilization.

'The pill," which contains one or both of two compounds similar to the hormones which naturally regulate a woman's menstrual cycle, is convenient to use.

A recent study showed that women who take oral contraceptives are approximately one-half as likely to develop ovarian and endometrial cancer, according to a publication released by the Center for Disease Control. Not all women can use the pill, however. In some cases, it can cause

serious blood clotting and, in extreme cases, can pose a life-threatening problem such as a heart attack. Danger signals for women on "the pill" are severe abdominal or chest pains with shortness of breath, intense headaches and blurred vision or

blindness. These symptoms require immediate attention by a physician. One out of 100 women a year become pregnant while using the combination pill while two to three women a year become pregnant while using

ice, makes an adjustment on "Smokey Sam," a nequin that smokes cigarettes with the aid of a hazards of smoking, and was lent by the American nokeout" last Thursday. For 24 hours, Americans were ked to give up smoking. "Sam" was on display in the

## Television flaws

Television has been called a mirror of our society. Conversely, some have also said that we are influenced by television.

If there is truth to be found in either of these statements, then women in our society are in dire straits.

According to a study of television programming during the 1976-77 season, the most prevalent occupation for women in television dramas was prostitution. After that came secretary and waitress. The last occupation listed was dancer and/or stripper.

Study researcher Eve Simpson also found that women on television were "typically pretty, but not unique, young, and resided in California." She also found that those 20 years of age or older constituted 45 percent of all women shown in television programs, about twice the rate found in the American population.

"In the infrequent cases when professional career women were

By Jacquie Toth Staff writer

actually a real part of a story," Simpson states in her report, "they were often failure as wives and/or mothers or they hated men."

were often failure as wives and/or mothers or they hated men."

Matilda Butler, author of a study of media stereotyping titled
"Women in the Mass Media," expresses similar views.

In her book, published in 1980, Butler makes several propositions about television programs: women are seen less than men, men are more often employed than women and have higher-status jobs, and marital status is known more often for women than for men.

But none of us really expects television shows to be exact reflections of our society, nor would we want them to be. They are, after all, devised to entertain.

The question that remains, though, is what affect does television's distorted protrayal of women have on viewers?

According to Simpson, television programs may actually be detrimental to the status of women in our society.

High amounts of television watching (25 hours per week) among children, for example, have been found to be "distinctly associated with a stronger internalization of traditional sex roles than among those who spend less time with television," she reports.

Similarly, Butler says that media content can make children more sex-stereotyped. In her book, Butler states that sex-stereotyped media content is "attended by children, learned and used in constructing their own sex roles."

"And since the content (of television) is more stereotypic than real life, the effect of the media is to make children more sex-typed than they would otherwise be."

Although both Butler's and Simpson's studies of television shows were conducted between two and four years ago, their conclusions still seem to remain valid when applied to this year's shows.

In my own study, albeit an "unscientific" one, of prime-time television, I found only one portrayal of a woman than I would want to identify with – that of attorney Joyce Davenport on "Hill Street

Other than Davenport, a competent attorney who is at the same time attractive and warm, female characters ranged from depressing to offensive.

"Macho" oriented series' such as "Gavilan," "The Fall Guy,"
"Magnum P.I.," "Matt Houston," and "The Dukes of Hazzard'
portray women as bubble-headed sex objects.

"Soap opera" type series' such as Dynasty" and "Dallas" seem to view women as either super bitches or put them on pedestals, and "Hart to Hart's" Mrs. Hart seems to do nothing except spend Mr.

Although television's portrayal of women appears to be dismal, efforts to reduce sexism in the media have recorded some successes.

Advertiser's consciousness of sexism, for example, has been raised by protest, according to Butler, and the portrayal of women in television programs has improved somewhat since the days of "Charlie's Angels."

Letters written to network chiefs protesting sexism in television programs can also help. Perhaps the most effective form of protest, however, is to simply "tune out."

## Kennedy case unresolved

Nineteen years ago today, John F. Kennedy was assassinated in Dallas.

Since that day, many Americans have questioned the Warren Commission's conclusion that a single gunman, Lee Harvey Oswald, shot Kennedy from behind. Critics of the report, such as Mark Lane in "Rush to Judgement," and Edward J. Epstein in "Inquest," lash out

By Christine McGeever Staff Writer

against the commission, charging members with covering up a con-

In the mid-60s, when both these books were published, the public, still feeling the wounds of losing a popular president to an assassin's bullet, reacted with disbelief.

It was a matter of credibility. On one side stood the highly respected members of the commission, which included Chief Justice Earl Warren himself and Gerald R. Ford. On the other side, a group of surly radicals, pointing fingers, and ranting and raving about conspiracies and cover ups in high governmental places.

Yet, criticism of the report is warranted. The Warren Commission's investigation, from a legal standpoint, has many weak spots. The evidence they chose to admit would never have held up in court.

The commission never saw an X-ray of the president's body. They were shown drawings by a Navy artist, drawn to the specifications of Dr. James Humes, who performed the autopsy at Bethesda Naval Hospital in Washington, D.C.

In his testimony, Humes presented the commission his autopsy

In his testimony, Humes presented the commission his autopsy report and told them, "In the privacy of my own home, early in the morning of Sunday Nov. 24, I made a draft of this report which I later revised, and of which this represents the revision. That draft I personally burned in the fireplace of my recreation room."

Neither the attorney for the commission, Arlen Specter, nor any member of the commission itself asked Humes why he burned the draft. Humes' commanding officer, Admiral Calvin Galloway, who attended the autopsy and might have known about any changes in the report, was never called to testify.

Indeed, the Warren Report itself never mentioned that any documents had been burned. That information came from the 26 volumes of evidence that were published, unindexed, separately from the report itself.

The 26 volumes of evidence also included testimony of 90 witnesses. Of those witnesses, 64 testified that the shots that killed Kennedy originated from somewhere in front of the motercade he was riding in, not from behind, as the commission concluded.

Also present in the 26 volumes is a copy of a now famous home

Also present in the 26 volumes is a copy of a now famous home movie made by Abraham Zapruder, who he ppened to have his camera running when the fatal shots were fired. The president's limousine moves left to right in the frames of the film. According the Warren Commission, the origin of the shots, the Texas School Book Depository, was behind the President, or to the left of Zapruder. In the film, however, as the shots strike Kennedy's skull, the president's head snaps backward, toward the Texas School Depository. This was a major point of argument with the critics. Unless Kennedy was endowed with the ability of defying the laws of physics at the moment of his death, a shot fired from above and behind could not possibly force his head to snap in the direction from which the bullet came.

In the volumes of evidence, two frames of the Zapruder film were transposed. Whether this was done accidentally or purposely, it interrupts the movement of the president's head after the impact of the bullet, and makes it very difficult to examine the film. The Warren Commission had a color copy of the original film which clearly shows a head snap toward the back of the limousine, yet they did not see it as

realiable evidence

Instead they hypothesized that the movement could possibly be a muscle contraction, or an effect of the motion of the car, which was travelling at 10 to 15 miles an hour.

The commission did not even consider the possibility that a bullet travelling at 2,000 miles per hour may have struck him from the front, which would be a likely explanation for the violent thrust of his head to the back.

In 1978 the House Select Committee on Assassinations was formed to reinvestigate the case. The new investigation was spurred by the discovery of a tape from a Dallas police unit that recorded the shots. Analysis of the tape revealed with scientific certainty at least one gunshot originated from the "grassy knoll," a memorial known as Dealey Plaza. At the time of the shooting, Dealey Plaza was in front and to the right of the president's motorcade, the same location that 64 witnesses said was the origin of the shots.

In January 1979, the committee concluded that there was probably more than one gunman, and probably a conspiracy that may have been the Mafia's doing.

The press reacted skeptically. The Washington Post, in an editorial criticism, said, "leave the matter where it now rests, as one of the history's most agonizing unresolved mysteries."

The Justice Department did just that. The case was never

But critics are still vocal today, and new evidence is still being

In 1981, David Lifton completed "Best Evidence," the produce of a 15 year search for new evidence in old documents, including the autopsy report from Bethesda, FBI reports of the shooting and the autopsy, media accounts and eyewitness statements. The result is a chilling new theory, backed by indisputably credible evidence.

Humes' autopsy report contains staements indicating that a "preautopsy autopsy," as Lifton called it, had been performed on the body. Humes' description of the wounds does not jibe with the account of doctors at Parkland Hospital in Dallas, where Kennedy was pronounced dead.

While the body left Dallas in an ornamental casket, hospital attendants at Bethesda said that it arrived there in an aluminum shipping casket and body bag, much like the way Vietnam casualities came home.

Lifton's thesis aquits the commission of the charges of conspiracy. However, it convicts them of ignorance and of misreading evidence. Lifton asserts that the body in the autopsy room at Bethesda was not in that same condition it was in when it left Dallas. Sometime before the autopsy, it was tampered with, and evidence of a bullet wound from the front was erased.

Nineteen years of healing has produced a complacent America. Criticism of the Warren report is viewed as even crazier than it was in 1963.

But it is impossible to research the report and not find fault in it. The evidence was presented scientifically, nor was it analyzed carefully. In rushing to provide answers for a grieving public, the Warren Commission may have committed an even greater crime than murder. They performed a sloppy, shaky investigation, which left more questions unanswered than answered.

It was accepted by the public, and still is, because to disbelieve it means to give up all trust in the U.S. government. It Lifton's theory is correct, then many of our trusted officials were involved in a plot so thick and so evil that the American mind cannot and will not perceive it. Doubt would unlock a Pandora's box, and gnaw away at the values of truth, beauty and the American way.

It is easier to ignore the questions and the doubt, but is it right? Do we complacently ignore the fact that the most crucial piece of evidence, Kennedy's brain, was removed from the body after the autopsy and disappeared without a trace along with tissue slides and certain X-rays? Do we shove the doubt aside because it causes discomfort?

We have chosen the path of least resistance, an attitude contrary to the American work ethic. The time is long overdue to expend a little energy and close a case which, in many American minds, has been open foc 19 years.

## The bike stops here

Edito

Again the SJSU administration shows how to combine cruelty and clumsiness to not solve a problem. The campus has a parking problem.

The two dozen people who bring motorized bicycles (mopeds) to campus do not add to the campus parking problem; they help solve the problem. If either health or distance requires them to use a motorized rather than non-motorized bicycle, this fact should not deny them equal access to the use of the bicycle racks.

A full size motorcycle can park free in specially provided street spaces. However, these spaces are useless for a moped that weighs only a hundred pounds and must have the anti-theft protection of being locked to something like the bicycle racks. Since being ticketed, fined and punished for brining a moped to campus, my moped stays home.

Now my car is one more here competing for scarce parking space.

E

I am "sick" and disappointed that the SJSU administration thus uses a big chunk of my parking fee dollars to add to yet another of the campus problems. Has the SJSU administration no better duty for the campus constabulary than this crack-down on the "criminal" users

R

E

of mopeds?

Will the few dollars from fees and fines exacted from a mere handful of moped riders be more important to SJSU administrators than their nurture of a reputation for institutional courtesy, humaneness, good sense and "style?"

Do you join me in disap pointment in this one more example of SJSU administration's counterproductive "solutions" to our problems?

Richard S. Mitchell Professor of Education

#### Domino's Pizza still delivers

Edito

S

This letter concerns the Spartan Daily's Oct. 25 crime report on pizza deliveries to the dorms. We would like to state it is not our policy to boycott delivery to Washburn or Moulder halls. We did stop for the remainder of the early morning in question (Oct. 23) to prevent any further problem.

It is a pleasure to serve the campus community and we will look forward to filling orders to it's residents.

David J. Peters Manager of Domino's Pizza

## TALKMAN

'Do you believe that Lee Harvey Oswald assasinated John F. Kennedy, or would you like to see the investigation reopened?

Asked at various placed on campus.

I've done a lot of reading on it because I'm interested and I feel they should reopen the case. There is definite information leading to the idea that there might have been other people involved. There might have been other reasons behind the assassination other than his (Oswald's) own personal reasons of being angry, being dissatisfied with what Kennedy had to

Susan Martin Social Science

investigate it because I feel the CIA was behind the whole thing. I think there's definitely something fishy. The way Oswald was murdered later on, I think that was set up by the CIA. Kennedy was Catholic, and the CIA didn't really like his views. I think they didn't like the way he handled the Bay of Pigs. I don't think they really like his policies. There are just too many unanswered

questions. Frans Honig marketing

Based on a book I read, I don't know if it's true or not. The book revealed that it wasn't just Oswald alone who was behind killing Kennedy. It was the Mafia also. It mentioned something about Castro of Cuba. I believe that Oswald wasn't alone, and if they came to the conclusion that it was just one person, then I believe (that the investigation should be reopened).

Jesse Ramirez Criminal Justice Administration freshman

My personal opinion about the whole thing is that it was a reaction of the Castro regime. I can't really say for sure, but I thought it was a reaction to the Bay of Pigs. I don't think Oswald was acting alone. He was just the only person they could link to it. He was crazy. I don't know what it would solve, but I'd like to see the case

Tom Savage Entomology

I'm more believing that it was American organized crime that was involved. And therefore the Warren Commission had no real authority. I feel that the people on that commission were already paid off. Ford was on the Commission, and he's the one who let Nixon off. It would be cool to expose the people who did it.

Don Andrews
Human performance

going to need a big push" in

vearbook sales to minimize

Robin Sawatzky, A.S. controller, said A.S. would not look bad if directors

'But how can

they sustain

a loss of

\$10,000?

any losses.

## A.S. officials break law by holding wage increase for 10 full-time employees

Associated Students officials readily admit they are violating state law by holding back wage increases for 10 A.S. employees, but also say they don't have the money for the payments.

A.S. full-time employees, such as secretaries and A.S. business office workers, are each entitled to a \$50-per-month raise in their retirement and health benefit accounts, which would cost A.S. \$6,000 per year, according to Robin Sawatzky, A.S. controller

University employees in June received a \$50-per month increase in their retirement and health benefit accounts from the state, and A.S. employees are entitled to the same increases, according to Barry Probst, A.S. director of students' rights.

Title V of the state education code requires that comparable increases be made for "auxiliary" employees, such as A.S. employees, whenever university workers receive theirs

But A.S. cannot afford to pay the raises for its

employees, Probst said.

The A.S. general fund contains \$149, although another \$175 is expected to revert to the fund Dec. 1 from the homecoming activities budget

A.S. directors earlier voted to revert another \$6,152 next semester from a never-published A.S. magazine Also, A.S. has another \$1,980 in its emergency fund. However, financially troubled groups such as the A.S. yearbook, which A.S. directors have called a "pet project," and the Independent Weekly are expected to request major portions of the entire general fund next

Sawatzky said full-time A.S. employees who are entitled to the health and retirement benefits could sue A.S. if directors do not make the increased payments

A.S. secretary Holly Steinberg said "If the board (of directors) had the money and deliberately weren't paying it, I might do something. I don't know what Maybe go on strike.

'If they have the money obligation to pay," she said. "But I find it hard to believe the board would, knowing it was state law, deliberately break state law. I think the board's pretty fair about this and will probably do something about

A.S. will pay the employee raises will be retroactive to June, when university employees received their in-

"Off the top of my head I can't think of other ways (other than the general fund) to fund this," Probst said. "That's what's under investigation A.S. President Tony Anderson told the A.S. board

of directors Sept. 15 that A.S. employees were entitled But a week later, two days after this year's small

general fund figure was announced, Anderson suggested that the board hold off on the increases. Until recently, however, A.S. officials said they did

not know they were violating state law by holding back the raises until A.S. could afford to pay them

"We didn't realize it was a state law," Probst said.
"Who reads Title V? It's like going through law

Sawatzky said "But the employees have the right to receive the same benefits" as university employees Steinberg said all other auxiliary employers, such

as Spartan Shops and the University Foundation, have received raises from their employers

'We didn't realize it was a state law . . . who reads Title V? It's like going through law books.' -- Barry Probst, A.S. director

## munications, said "We're

YEARBOOK

Continued from page 1 that they expect the yearbook to sustain a loss the first year

This year's project is the first attempt to publish a yearbook in 13 years and A.S. directors said it will take a few years for the idea to catch on.

Yearbook editors plan edition containing pictures of all undergraduate classes, clubs, activities, organizations, fraternities, soririties and dormitories

Editors said they are targeting sales to dor-mitories, fraternities and sororities, which they said have a combined potential market of more than 2,000.

Representatives have told A.S. officials that the company is willing to reduce some costs to help the yearbook get going its first year

(A.S.) probably sustain a minimal loss because Josten's is willing to help out with that loss," Probst said. "But how can they sustain a loss

chose to "bail out" before

running up a large debt.

- Barry Probst

The money that comes in from pre-sales can be returned if the yearbook is not published. Sawatzky

Production costs will be paid by advertising revenue and A.S., which allocated \$700 to the The first effort to publish a project, she said. yearbook in 13

But that advertising revenue would have to be returned to advertisers out of A.S. funds, Sawatzky said, if expenses are paid and the project folds.

Rick Spargo, vertising manager for the yearbook, said no advertising revenue has been used to pay expenses so the money can be returned with little trouble if the project folds.

## Program Board defends policy

In his October activity report, Program Board Director Dan Ross told the Associated Students board of directors that the program board is responsible for the cultural enrichment of San Jose State.

Profit from shows, he said, is not

Ross told the board that the program board sponsored 20 events in October, spending \$7,631. Profits for the month totaled \$4,821.66 leaving an overall loss of

shows, which cost a total of \$2,411

A total of \$5,220 was spent on the other seven shows. Six of the shows at which admission was charged were part of the Wednesday Night Cinema and Friday Flicks series. Admission was also charged for the presentation of Daniel Ellsberg in the Morris Dailey Auditorium October 28

The Ellsberg presentation was the single biggest loser last month. Expenses totaled \$2,600. Three hundred attended the 810. speech at ticket prices of \$3 and \$4. Total income was \$850, leaving a loss of \$1,750.

The biggest profit-making show for the month was the three-night showing of the movie, "Poltergeist." The six showings on October 27, 29 and 30 cost the board \$1,067 to present and were attended by 909 pecole. Income totaled \$1,868.71, leaving a profit of \$801.71. Admission prices were \$1

Ross asked the directors to remember that the program board's priority is to present shows that contribute to "the cultural enrichment of SJSU." ' According to Act 50 of the A.S. Constitution which

on, directors say making a profit is not required

'Mention of losses or profits is really irrelevant to the board," "\$4.821.66 isn't mandatory

In defining the purpose of the program board, Act 50 states that the board shall be responsible for the cultural, educational and special enrichment of the student body by responding to the needs of all members of the SJSU campus and community Diversified programs of activities and events must be presented within

## 'Rocky Horror' film draws low turnout

early

Low turnout, no groupies, and a poor sound system made the "Rocky Horror Picture Show" a little bit of a disappointment for some last Wednesday night

The "Rocky Horror Picture Show," which was sponsored by the Associated Students program board, drew a crowd of "about 350," said Dan Ross, program

"Not as many came as we had hoped - we expected a lot more," he said. Ross explained the movie has been shown several times before with better attendance

'Rocky Horror" is a movie that is shown routinely by theaters across the country. Groupies who have seen the film 65 times are common.

'Rocky Horror" audiences are sometimes the real

stars of the show, with many dressing up like characters However, the only Frankenfurter, "just a sweet

transvestite," at Morris Dailey was in the movie. One of the audience members Wednesday night

recalled the long lines of groupies who attended the movies on Saturday nights when she was in high school "It's just not the same without them," she said

Another student recalled that people who had not seen the movie before were made fun of by the groupies who sang "Ring around the virgin, ring around the virgin.

The "Rocky Horror Picture Show" is, perhaps, one of the only movies that requires audience participation. This showing was no exception. Most were equipped with rice,

lighters and squirt guns

'The crowd was real rowdy,'' Ross said. Wednesday night's crowd knew all the lines and did not bother to be secretive about it

Some people complained that the sound system was inadequate. "We did get some complaints," Ross said. Ross said that the sound system in Morris Dailey

Auditorium is "somewhat outdated. 'We have to do the best with what we have," he ad-

Ross said that the idea of renting a better sound

system "had occurred" to him. He added that, in the future, the program board plans

to play rock musicals and will probably rent a sound

## Faculty to perform tonight in memory of music chairman

The Music Department will present a concert in memory of W. Gibson Walters, former department chairman, at 8:15 tonight in the Concert Hall.

Walters, who served as chairman from 1965 until his retirement in 1976, died of a heart attack Nov. 8. He

Baritone David Rohrbaugh, tenor Raymond Nilsson and pianist Patrick Meierotto will perform in the concert. All are Music Department faculty

Walters was a music professor at SJSU for 29 years. In addition to teaching, he was a professional violinist, and played first violin with the Chicago Civic Symphony Orchestra

## Corrections

called a static line. Used for beg umpers, the static line releases the parachute when the jumper has fallen far enough from the plane. Lindner, along with 47 other people, is a

## The courage of skydiving

Parachuters throw fates to wind

Photos by Bart AhYou Text by Rose Zamudio

and once you have tasted flight, you will walk the earth with your eyes turned skyward, for there you have been, and there you long to return.

'SKYDIVE" yelled the jumpmaster pilot to the tense wind-whipped body of Mike Wolf as he hung from the wing strut of the small Cessna 182. And in that split-second he

dropeed to earth from 3,000 feet above in hopes of living. Then, only a minute-and-a-half later, Wolf's friend, Peter Lindner was to hear the same command "SKYDIVE!" And at that moment he, too, was put into

Wolf and Lindner are among a growing number of SJSU students who must challenge their own inner strengths to see if they have the ultimate courage to

Belly to earth they fell, with their arms out-stretched like eagles in flight owning the entire sky. Their backs arched and their legs pointed toward the heavens, creating a badminton shuttlecock effect descending toward the ground.

Three things are in the back of every skydiver's mind and Wolf and Lindner are no exceptions. As they fell, they wondered about the pack harnessed to their backs. 'Will the parachute be a good one? Will the parachute

be a bad one? Will the parachute open at all? Theses were important things to worry about but nothing to really lose their cool over, because they still had a reserve parachute harnessed to their stomachs.

And then 'poof,' the static line was released, the

parachute wnet up and the opening shock set in

At static line is attached to the plane and is used for beginning jumpers. Because this line is also attached to the jumpers parachute, it insures that the parachute will open two-to-six seconds after he has jumped

With the third worry our of the way, there began a slight tugging at the shoulders and inner leg muscles near the crotch. And then their bodies were pulled per-

pendicular to the ground

And their minds' began to relax with the knowlege that their parachutes had opened. With this, Wolf's body sighed a touch of relief. And Lindner let loose a big 'Yeaooohhhh! Right On!'' for everyone to hear. But all was not safe yet. The skydivers still had to

make sure they had reliable parachutes without rips, tangles or holes in them. Their heads turned skyward and the examination began.

Wolf said the first thing to look for is that the parachute has opened up completely and that nothing has

"If something has messed up then you would have to

'After skydiving, I realized this is a stressful situation and everything else in my life is low key,' Wolf said.

get rid of your chute and use your reserve," he said.

To remove the main chute, the skydiver must release the two main clasps on his chest harness and the canopy

#### Vents of chute

The next thing a skydiver would check for is that the two vents or panels in the rear of his parachute are not ripped or torn. He also must be sure the hole at the top of the chute is not letting in too much sky

Too much sky refers to a rip in the upper opening, causing a hole bigger than five feet in diameter. If this happens, the skydiver will not obtain enough drag and thus he will end up sailing down to earth a bit faster than the average of five miles an hour.

In this case, to avoid injury, the parachute would be

discarded promptly so that the reserve parachute could

Another sigh of relief occurs once the canopy ob servation period is over

"It's so wonderful up there, just floating down with the birds," Lindner said. "It's like nothing you have ever experienced before. The landing area looks like a postage stamp, but up there you can see forever.

It's great

Wolf and Lindner both learned on a static line. Their other option of leacning parachutting was through the accelerated free fall method

#### Accelerated free fall method

This is where the customer pays \$250 for his first lesson versus \$85 for the static line method. But what the accelerated free fall student gets is quite a bit more, even though the static line student will end up paying the same \$250 price tag once he has finished with all of his jumps.

The accelerated free fall method uses the dynamic square prachutes and teaches the student to free fall without the use of a static line, but with the help of two instructors at his side while he falls.

The static line method requires the student jumper to

make at least 10 good jumps with the 16-foot, 90-pound line before he is allowed to make a free fall jump, a public of the free fall is when the jumper is dependent upon his own inner strength to pull the rip cord before reaching 2,500 feet above the ground

Skydiving, along with other sports used to be thought of just for men, is for women, as well.

Cathy Pull, the secretary for the SJSU Skydivers Club and one-time jumper said, "It is the most wonderful, most beautiful thing to do. The sky is so clear that you can see forever. There is nothing else in the world like it.

Pull said that she normally does not risks with her life, so for her to do this she was taking a big step in her

### 'Taking a big risk'

Her rationale was, "You are taking a big risk, but as long as you have your brains, and you are ready to act and are alert, everthing should run pretty smoothly.

On her first jump she was known as a screamer. "I was so excited the pilot could hear me screaming from the plane as I floated down to the ground.

"After that I was able to run my first 10K (kilometer) race and that is something that I had wanted to do for

Pull said she had a new sense of accomplishment about herself after she jumped out of the plane.

"This was definitely a growth producing experience," she said. "I did it for me, not to prove to anybody else that I could do it. This is the first thing that I really did for me and it was wonderful!

Wolf and Lindner, both had the same reaction that "once you skydive, everything else seems easy." Stress situations are not as stressful anymore and a weight is lifted from your shoulders.

"After skydiving, I realized that this is a stressful situation and everything else in my life is now very low key," Wolf said.

#### SJSU Skydivers Club

Pull, Wolf and Lindner all belong to the first SJSU "Yeah.

Skydivers Club along with 45 other people. But you won't see any of them jumping from the top of the Business Tower because all they do is discuss the latest techniques, catch up on the who's who of skydiving and figure out what's what in the world of parachuting.

With a simple name to get a simple idea across, Mike Brown formed the first SJSU Skydivers Club this fall. Plans began in April, 1981 when Brown along with two other interested skydivers decided to arouse the interest of other SJSU students toward this hidden sport

The club meets twice a month with a keynote speaker attending at least one of those meetings

"Since the university will not sanction any rganization on campus to fly in a small non-commercial

plane, we will remain just a social club," Brown said. Because the club does not have the university ap roval, it cannot go out to any of the drop zones and use the SJSU name in conjunction with parachuting, he said.

"The reason for this," Brown explained, "is that the school does not want to be held liable if an accident did occur and they think the sport is too dangerous.

"Relatively speaking, I don't think it is a dangerous sport. As a matter of fact, it is one of the safest adventure sports compared to scuba diving, hang gliding and skiing."

Flying is great, it's like defying Mother Nature. It's like saying "Ha, Ha, Mother Nature, gravity can't hold me down

It's a new experience, something you have never experienced

You're up there free, nothing else matters. You're free. All that space and just you

So much space

You're so small and the space you're floating in is so huge. Its beyond comprehension.

It seems like nothing can stop you. Nobody has a hold on you

You're so important that it shocks you

because you have never felt this way before

#### -- Bart AhYou

His reason for it being a safe sport is that certain aspects of skydiving are federally regulated, such as the aircraft and the reserve parachutes Reserve chutes must be packed by officially licensed

riggers, thus creating a watchdog effect to insure the safety of the sport. Once Wolf and Linder had landed, they gathered up

their parachutes, wrapped them in their arms and returned them to be repacked by the experts.

Since the reserve chutes weren't pulled, they too were returned. Every 120 days, however, they get opened and repacked by the licensed riggers. Outside of the return center, a simple exchange of

feelings took place between two different guys who were packing their chutes and discussing the merits of skydiving.

Without realizing anyone else was listening, one guy said, "Skydiving is like kissing a girl."

His buddy responded looking up from his chute. You don't ever want it to stop.

## **BIRTH CONTROL**

The Intrauterine device or IUD, a small piece of shaped plastic which is inserted into a woman's uterus, cannot be felt and does not need adjustment at the time of intercourse.

But IUDs can cause infection. Although infections can be treated with the device in place, severe cases may cause sterility or the need to remove reproductive organs. In extreme cases, the infection may be fatal.

Danger signals for women using an IUD are pain and tenderness in the abdomen, very heavy or abnormal bleeding, flu symptoms, unusual pain, fever and lower-back pain.

Two to four women per 100 become pregnant each year while using the IUD.

#### Diaphragm

The diaphragm, a shallow rimmed cup that fits in the vagina and covers the cervix, is not frequently associated with side effects but a few cases allergic reaction have occurred.

Preparation before intercourse is needed with the diaphragm. A woman may also have more bladder infections as a result of diaphragm use and may have to change The device can also become dislodged during intercourse in the womansuperior position or if the diaphragm isn't the correct size.

Two to four women per 100 get pregnant when the diaphragm is their sole means of contraception

#### Nonprescription

methods have advantages and disadvantages as well. A

condom, a thin rubber or animal-tissue tube which is used to cover the penis, can be used without consulting a doctor. Condoms are disposable and provide protection against venereal disease

Care is needed to avoid the condom's slipping or tearing. Spontaneity and sensation may be decreased when using a condom.

Two to four women per 100 become pregnant each year when the form of birth control used is a condom and the women uses no other form of contraception.

Contraceptive foam, a spermicide which is placed in the vagina to cover the cervix, is easy to insert. It must be used at the time of intercourse and leakage may be a problem There have been rare cases of allergic

Two to four women per 100 become pregnant each year while using a spermicidal foam for protection.

Fertility awareness and abstinence, a system which estimates the time of the menstrual cycle when an egg is most likely to be relased from the ovary, requires that both partners exercize self-control. Failure is more likely with this method than with other methods, even when correctly performed

Five to 10 women per 100 become pregnant when using this method.

#### Sterilization

Sterilization, a surgical procedure that blocks the tubes of a man or woman, is only necessary for one partner. Another method of contraception should be used for a short time after a vasectomy until the man's semen no

women each year do not have success with

Fertility can rarely be restored, even if an operation is performed to unblock the

A woman who is pregnant has three choices: she can have the child and keep it she can have the child and put it up for adoption, or she can have an abortion.

If the pregnancy is wanted, a woman should make arrangements to have a physician monitor her through her pregnancy. Plans for delivery should also be

For a student who is pregnant, stress can be a problem. The physical stress which a child places on a woman's body, in addition to the emotional strain and pressure from school work, can be overwhelming.

An expectant mother should not overload herself with school work, especially if she also has to work to support herself, Battle said.

Eating properly, getting enough sleep and avoiding stress are necessary for the health of the mother and the fetus. Battle

If a woman wants to have the baby and put it up for adoption, the Counseling Center and Planned Parenthood, 17 N. San Pedro St. can refer her to an adoption agency

The Santa Clara County Children' Services Bureau, 100 N. Winchester Blvd., is Children's the county's adoption agency.

## Stabilization of 5-year drop in education enrollment, dean says

According to a report recently completed by SJSU's office of instructional research, enrolllment in the School of Education has decreased by 1.8 percent since fall 1981.

Enrollment, which is tabulated in FTES (full-time equivalent students) numbers, measures the amount of instructional service the university provides

FTES is calculated by dividing the total number of course units taken in a department by 15. The school is given credit for one FTES for every 15 units of student enrollment in its classes

The fall 1981 count for the school was 1,054, or 15,818 total student units. The fall 1982 FTES count is 1,036, or 15,536 total student units

Enrollment in the School of Education has been declining for the last five years, according to Francis Villemain, dean of the school. Some of the reasons he cited for the enrollment drop were less funding for teachers, a more complicated workload and less job satisfaction

"There was an exodus from the profession," he said.
"What we have now is roughly a leveling-out,"
Villemain said. "The important fact is that we seem to have stabilized.

Education enrollment as SJSU parallels that at other schools in the country, Villemain said.

"In fact, California seems to be doing better than most of its counterparts," he said.

The only department in the School of Education that had a decrease was Administration and Higher Education, which dropped from 86 to 81 FTES, a 6 percent

'The drop is so slight that it hardly means a thing, Villemain said. "We have an aging teaching force, and as those professors begin to retire, administration will become very attractive to the younger educators who want to move up.

Villemain predicted a complete replacement of the total administraiton staff in about five years

Enrollment in all other departments in the School of Education has increased since fall 1981. The most dramatic of these is Child Development, which went from

24 to 68 FTES, a 9 percent increase. Child Development, which was begun in 1981, is a very diversified major that the university was sorely lacking, Villemain said.

Another department in which enrollment has increased is Counselor Education, which rose from 84 to 111 FTES, a 3 percent increase. Counselor Education increased even though high schools all over the country are getting rid of half their counselors, Villemain said.

David Migocki, associate dean of the School of Education, suggested that enrollment in the department may have increased because "students seem to be gravitating to other programs with more interesting

courses," such as counseling. Enrollment in the Department of Secondary Education increased from 78 to 96 FTES, a 2 percent "The reason for this," Villemain said, "is that people are beginning to see the statistics. Aging teachers are retiring and the U.S. Department of Education predicts a teacher shortage around 1988.

In contrast to the recent teacher glut, Villemain noted an increase in placement of teachers graduating from SJSU. "It is a complete turnaround," he said. "We have more positions vacant than we have applicants.

The Department of Elementary Education has also seen an increase from 223 to 255 FTES, a 1.4 percent jump, for many of the same reasons. An added factor, Villemain said, is that the baby boom babies of the late '50s and early '60s have grown up and are ready for their own baby boom. "The number of school children will probably start

rising agian by 1985," he said.

The Department of Special Education has also seen a jump from 327 to 336 FTES, a .2 percent increase.

## Laundry fees down in residence halls

Dryer costs now lower than last year

The owners of the washing and drying machines in the residence halls conceded more than students bargained for as the drying costs were reduced lower than last year's price.

Vending Manager Ron Matuszak announced Wednesday night at a Residence Hall Community Council meeting that the costs for drying was reduced to 25 cents for 30 minutes. The cost was raised this fall from 35 cents to 50 cents; however a student petition submitted Nov. 5 asked Spartan Shops and the housing office to reevaluate the increase this week

RHCC President Chuck Moore, who circulated the petition, said earlier he would settle for a reduction to last year's price. Nevertheless, representatives from

Spartan Shops, the housing office, and Auxiliary Enterprises met with the laundry company Tuesday, and labels were placed on the machines Wed-nesday notifying students of the

"Fortunately it came out to where everyone seems happy," Matuszak said. Moore said he was pleased with

the outcome. The vendor, the Pulver Corporation, and Spartan Shops also agreed to maintain better lines of communication in servicing brokendown machines

Students had complained of inoperable machines in a resolution from the RHCC. And a memo from Housing Director McKendall last week expressed concern that the Pulver company was not meeting maintenance stipulations in

According to Matuszak, Pulver's contract with the school expires at the end of the spring semester.
Instructions for using the machines

and a number to call for service will be posted in the laundry rooms. Students are advised to call Spartan Shops if they have problems with machines. Residence assistants can call the Pulver company for service on weekends, Matuszak said.

Matuszak added that students can be refunded for lost coins at customer service in the Student Union.

Matuszak said he had been receiving three to four service calls a day. However, Wednesday his office had received none

He added that many of the calls in the past had involved jammed coin

Matusak also said rennovations were being considered for the laundry rooms, including new flooring permanent trash cans patio furniture and possibly some murals

slots caused by students inserting coins fastened to strings, in attempts to get a free dry. He pointed out that this practice hurts students financially because part of the vending money goes back to student funds

Matuszak also said renovations were being considered for the laundry rooms, including new flooring, per manent trash cans, and patio furniture.

According to Rene Singleton, residence hall director, the housing office plans to sponsor a design contest for murals to be painted in the laundry

## Clarkson caps SJSU career in 49-26 win

By Michael McIntyre

Spurred by seniors Steve Clarkson and Tim Kearse the SJSU Spartans exploded for three third-quarter touchdowns en route to a season-ending 49-26 stomping of PCAA rival Utah State last Saturday night.

The 14,359 Spartan Stadium spectators who braved an exceptionally cold night saw the Spartans, who finished 8-3 for 1982, roar from a second-quarter 23-7 deficit to victory on Clarkson's two scoring passes and another pair of

Kearse, who caught seven tosses for 118 yards started the come-from-behind effort with a 43-yard touchdown catch with six and one-half minutes left in the

Junior fullback Ron Thornburg also tallied three scoring runs for SJSU on carries of one, two and five

Spartan coach Jack Elway was especially pleased after the win, his first season-ending triumph since taking over at SJSU in 1979.

"We got off to a slow start," Elway said, "but we howed what we're made of in the second half. I'm really happy and proud that our seniors can go out with a win

The Spartans, who hadn't practiced since Tuesday due to rainy weather, did indeed appear sluggish in the

SJSU cornerback Ray Williams' interception at the Sportans' five yardline snuffed out the Aggies' first drive, bul only temporarily postponed Utah State from taking

Aggies take the lead

Less than two minutes after Williams' theft, Utah State starting quarterback Chico Canales found wide receiver Fred Fernandes open down the left sideline for a a-vard touchdown connection and a surprising 7-0 Aggie

Aggie coach Bruce Snyder then inexplicably put the Spartans in wonderful field position by calling for an unside kick on the ensuing kickoff.

SJSU freshman John Aimonetti covered the ill-

advised squib kick at the Utah State 49 yardline.

Seven plays and three minutes later, Thornburg

capitalized with his first touchdown on a one-yard dive to chot the game at 7-7. "I thought we might catch them off-guard," Snyder,

said afterwards in an emotionally-drained Aggie lockerroom. "But I guess it kind of backfired on us." SJSU cornerback Gill Byrd, another departing senior,

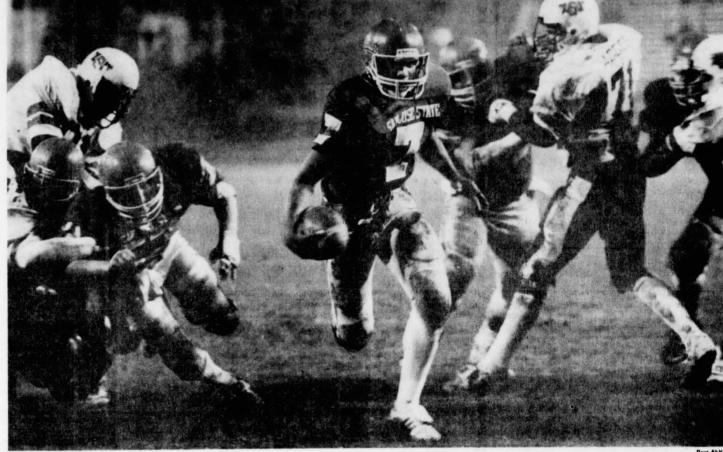

stopped the next Utah State march with two minutes left. in the opening period with an interception, again on the

However, Clarkson, trapped in his own end zone two plays later, was forced to intentionally ground the ball for a safety and a 9-7 Aggie margin That margin increased to 23-7 on a pair of second

quarter Utah State touchdowns within two and one-half minutes of one another First, Aggie fullback Andre Bynum culminated a 63-

vard drive with a one-yard dive.

That was quickly followed by a perfectly-executed flea flicker from quarterback Doug Samuels (replacing the interception-plagued Canales) to runningback Maurice Turner on a reverse, who handed to wide receiver Paul Jones on a counter-reverse, who then

launched an arching 40-yard scoring strike to tight end James Samuels (Doug's brother

The circus play upped Utah State's cushion to 16 points and, while disheartening the SJSU fans, seemed to awaken the struggling Spartans

Spartans strike back

Thirty seconds after the Aggies' deception, Clarkson spotted the streaking Kearse splitting the Utah State secondary for the 43-yard touchdown pass.

The Spartans' first march of the second half narrowed Utah State's lead to two points as Clarkson hit tight end Bill Nicholas with a two-yard scoring aerial, only the second of the receiver's SJSU career.

Two minutes later, Clarkson went around left end for six yards and the go-ahead touchcown. The senior signal caller, who became SJSU's all-time leading passer with 7,309 career yacds, admitted the Spartans took quite a while to get rolling.

"Having virtually no practice this week hurt," Clarkson said. "The field condition (muddy) and the cold

SJSU seniors played a large role in the Spartans' season ending 49-26 win over PCAA nemesis Utah State. Quarterback Steve Clarkson scored his second rushing touchdown of the game in the third quarter (above), while cornerback Gill Byrd made his 12th career interception to kill a first quarter Aggie drive (right). SJSU ended the 1982 season with an overall 8-3 record.

SAN JOSE

'Our ballhandling was atrocious," a slightly perturbed Berry said after the contest. "We're not taking care of the ball well

"We open up against Puget Sound in a week and a half and in between now and then we are really going to have to work on the fundamentals.

McNealy, who led all scores, scored 17 of his 27 points in the first half. On the night, he was 11 of-14 from the field while pulling down a game-high 11 rebounds.

Other White Squad players in double figures included Dwayne Warner (12), Gavin Copeland (11) and Kevin Bowland (11)

Center Greg Vinson was also instrumental in the White Squad win by illing down 11 re Meanwhile, cat quick guard Mike Dixon came off the bench to dish out five assists:

'As expected Chris McNealy turned in another excellent performance," Berry said. "Without a doubt, he will be one of the keys to our success in the upcoming season.

Sophomore center Paul paced the Blue Phifer Squad with 19 points. He also pulled down 10 also pulled rebounds and blocked four

Phifer got help from freshman sensation Vic

Watson, who added 15 points while Keith Norwood poured in 11.

"I was really pleased with the way Vic Watson performed," Berry said.
"Only a freshman, he hustled from the start of the game to its finish."

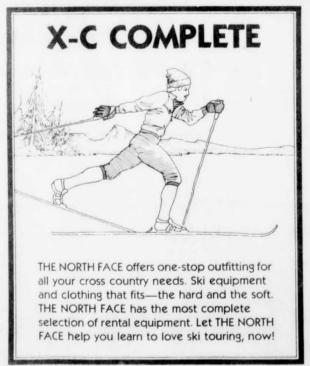

Sparked by the heady play of Watson, the Blue Squad jumped off to an early 11-10 lead in the first 13 minutes of the contest.

McNealy got the White Squad untracked shortly thereafter by scoring four quick points on a tip-in and one of his patented slam dunks to put the White Squad up 14-10. They never relinquished the lead from that point on.

We really played in spurts Wednesday night," Berry said. "At times, we times the play was shabby to say the very least. Meanwhile, we didn't play the clock well at all.

The White Squad which shot 54.9 percent from the field on the night to the Blue Squad's 37.3 percent, led 46-35 at the half and upped its lead to as many as 15 points in the second half.

'Overall, we need a lot of work before we open up our season Nov. 27," Berry suid. "This year's team has a lot of potential. We just have to put it all to good

made it tough for me to throw well."

The Aggies temporarily closed the gap to 28-26 on Willie Breecher's 49-yard field goal with four minutes left in the third quarter, but SJSU came right back.

**Kickoff caper works** 

Spartans Dave Criswell and Kearse worked some kickoff return shenanigans to put the offense in superb field position.

In the spirit of California's last-play kickoff return for a touchdown to beat Stanford 25-20 earlier in the day, Criswell fielded a short kick and scooted 30 yards before lateralling to Kearse, who carried it another 19 yards from the SJSU 45 yardline to the Utah State 26 yardline.

"I took the kick, ran upfield and broke a few tackles," Criswell said. "Then I heard Tim hollering at me and I pitched it to him.

Kearse saw the play in an almost-identical manner "I saw Dave dump a couple of guys and I thought I'd follow him since there was no way I was going to be able to block for him," Kearse said. "Then, he was just about to be tackled and I yelled for him to lateral it back. I'm glad it worked out so well."

After Kearse's attempted pass to wide receiver Eric Richardson resulted in a pass interference penalty and a personal foul penalty on Utah State had moved the Spartans closer, Clarkson notched his second six-yard

Thornburg added a pair of fourth quarter scoring rushes to account for the final score.

touchdown and the Spartans assumed a commanding 35-

SJSU defense shines again

The Spartans' first home triumph over Utah State since 1976 was aided significantly by a defense which improved its second-place national-ranking rushing allowance from 78 to 73 yards per game.

Utah State could manage a mere 54 net yards on the ground and were pressured into four crucial turnovers.

Leading the defensive effort for SJSU were senior safety Brian Hawkins (nine tackles and an interception), junior linebacker Mike Maurer (nine tackles and two sacks) and senior end Kerry Ford (eight tackles and two

"In the first half," Ford said, "we were having trouble picking up the back they were sending out on pass routes. But we just exploded off the ball in the second half and didn't give them any time to throw.

SJSU sacked Canales and Samuels five times, while the patchwork, yet gutty, Spartan offensive line allowed Clarkson to go down behind the line for the first and only time in the last four contests (all SJSU victories).

Special teams fare well

The special teams were an unexpected boost for Elway's troups as well.

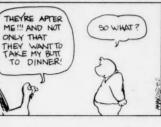

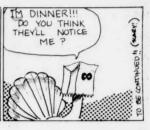

#### **HOWIE AND HIS BARNYARD PALS**

**BASILIO AMARO** 

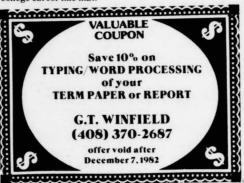

Punter Phillipe Rebboah enjoyed his finest game of 1982 with a 39-yard average on six kicks, including a towering 56-yard boot.

SJSU's kickoff coverage squad applied thundering hits on Aggie kickoff returners throughout the game. Criswell, Lou Patrone, Kevin Reeder and Tim Makela did most of that damage.

Criswell said afterwards that he thought the Aggies were attempting to take "cheap shots" at him and other SJSU players on kick returns. The officials must have seen things similarly as they tagged Utah State for five illegal blocking and clipping penalties on returns.

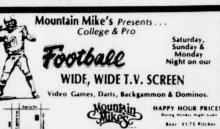

Clarkson spoke proudly of the victory, which was virtually a standoff in most statistical areas.

"I watched the seniors go out on a loss the last two years," Clarkson recalled, "and I didn't want to end my college career like that.'

"It was a good year for SJSU football," Elway said. 'Playing the last four games the way we did, our kids showed what football is all about."

"But I tell you something," he said with a weary voice, "I'm really glad it's over.

## Custodian injured

Malfunctioning elevator snaps worker's leg; inquiry planned

By Pamela Steinriede

27-year-old night custodian suffered a broken leg and lacerations after a MacQuarrie Hall elevator malfunctioned Thursday night, according to university officials.
Arthur Morales was in

satisfactory condition at San Jose Hospital Friday after undergoing minor surgery on his lower left

"Apparently the elevator door fail-safe mechanism didn't work and his leg was caught between," said Dick Staley, university public information manager

Morales was still under sedation Friday morning and was unable to discuss the accident.

Morales' leg was sticking out of the elevator and the rest of his body was

Arthur Morales, a maintenance worker, was injured by an elevator in MacQuarrie Hall.

Police said six to eight

'Apparently the elevator door fail-safe mechanism didn't work, and his leg was caught between

inside the elevator car. University Police said. Another custodian was

persons helped pry open the elevator on the second floor of the building to

holding Morales in his release Morales.

A rescue squad from San Jose Fire Department administered first aid to Morales before an ambulance took him to San Jose Hospital.

Doctors performed debridement on Morales' leg. That surgical process involves cleaning out the wound -- cutting away all dead tissues to get to the layer of tissue, according to

hospital doctors.

A report of how the accident happened is expected to be submitted to university officials by the campus environmental health and occupational safety office this week.

"As far as I know, it was a faulty elevator, Ken McLean, an assistant at that office.

Plant operations also is expected to make an investigation of the matter.

## Theft suspect may be released

Owner of stolen bike fails to report campus crime

A bike theft investigation University Police are conducting lacks one important element

Attempted theft charges may be dropped against Raymond Johnston, 21, of San Jose because the owner of a stolen bike has not reported the

Police say the attempted theft of silver bike occurred outside the

Men's Gym last week. Johnston is being held at Santa Clara County jail on charges stemming from other warrants at other police agencies together with the attempted petty theft charge.

The incident occurred about 2:30 a.m. Nov. 16 outside the Men's Gym. Two custodians said they saw the attempted theft and then helped police apprehned Johnston.

The bike is at the campus police

'We will hold it for evidence until we find the victim," Police Investigator Jeff Higginbotham

said. Higginbotham said the owner

should come to the station (near the intersection of San Carlos and Fifth streets) with proof of ownership or a detailed descritpion of the bike.

I have talked to the district attorney, and all we need is a victim before we can try to convict him, Higginbothan said of Johnston. There are four other bikes that

police have confiscated recently

police will send it off for auctioning n three months, according to Higginbotham.

Higginbotham said that bike thefts go unreported often because "don't have much faith they are going to get it back.

Police recover only five percent of all stolen bikes in San Jose, cording to a San Jose City Police

### 'I have talked to the District Attorney, all we need is a victim,' ... Investigator Jeff Higginbotham

which have not been claimed.

"If the bikes are involved in a crime, we wait anywhere from one to two years before turning it over to university property for auction,"

Higginbotham said However, if the bike is simply "found property" and is unclaimed,

Obtaining a license from local authorities makes it easier to claim bike if police do recover it, Higginbotham said.

Licensing is required by law in San Jose. The three-year licences are sold at local fire stations for \$6.

## Chambers said They (first time freshman)

PRIORITY-

need to get into introductory-level courses," he said. If they do

not get these classes, they cannot take the next level of courses because they lack prerequisites Class request forms submitted by seniors are the sixth to

be processed primarily because they have seniority, Harris said. To obtain senior status, a student must have completed between 90 and 124 units.

Graduate students receive seventh priority, followed by juniors (60 units), sophomores (30 units), and second-semester freshman (up to 29.9 units)

Neither Chambers nor Harris

could explain why graduate students are placed in seventh position, but Harris said that sophomores juniors, freshmen follow in that order on the basis of seniority.

In addition to being the order in which class request forms are processed, this priority assignment will also be applied to arena registration next semester, Chambers said. In past semesters, students

have received priority at arena registration according to the first letter of their last name

There are also two exceptions to the priority policy, Harris said. Honor students,

those admitted to SJSU with a grade point average of 3.65 or higher, and students who register for impacted programs receive different treatment

In 1979, the Academic Senate advance registration priority assignment policy to allow honor students first priority at registration, but only during their first semester

Impacted programs, such as engineering which has more applicants than it can acplace additional commodate, restrictions on admissions and registration

## \$20 million in SJSU thefts to be studied by committee

How to keep \$20 million worth of SJSU property from thieves' clutches will be examined by a review committee established by the university administration.

"It really is a housekeeping committee," said Executive Vice President J. Handel Evans.

"I am not putting this committee together because somebody has come around with a big furniture van and hauled off a load," Evans said.

State property worth \$47,116 was either damaged by vandals or stolen from SJSU last year, according to police

Exact figures are not available for this year. However, during the first six months, about \$13,800 of damage and thefts were reported.

Also, property taken from SJSU this semester in eight incidents is estimated at about \$3,300.

There has been a decrease this year, and "we want to keep the razor sharp," Evans said

The committee will consist of representatives from five areas of the campus: purchasing, University Police facility planning and operations, property, and academics.

"It will be a part of their (committee members') jobs and normal day-to-day routine," Evans said. "It's a matter of bringing our minds together and talking about Police are expected to share ideas about persons most

likely to steal equipment, together with ways to prevent

### Dancers/Singers Wanted:

Auditioning for a Semi-Professional 1920's Musical Review. Student Artists call:

(415) 435-4491 or (415) 332-5297

Ask for Peter

The representatives from property and purchasing will discuss the acquisition of equipment and materials and how it is inventoried. Also, they will provide information about how thefts are detected

The facilities member of the committee plans to contribute information about the operation of university

equipment and how to appropriately safeguard it Input from the academic representative will include use of department equipment and materials by students

"Campus thefts are more than pencil sharpeners now," Evans said. "As we get more sophisticated equipment, there is more of a need to protect all of it."

A \$2,000 computer was taken from the Industrial Studies Building on Sept. 24.

Evans said the thefts are not concentrated in one area of the campus

"Everybody loses a little bit," he said. The committee is expected to report its findings and make recommendations to Evans at the beginning of next
