Second suspect nabbed in car break-ins

Daily staff writer
A second man has been arrested in connection with the recent burglaries of SJSU parking garages

Anthony Jerome Morris, 18, has been booked into Santa Clara County Jail on charges of parole violation, second degree burglary and felonious assault on a police of-

Morris, who turned 18 in July, has served time in California Youth Authority, the state agency in charge of juvenile criminals. Infor mation about convictions against juvenile of fenders is not publicly released by CYA.

35 thefts reported since Sept. 1

The parole violation is a CYA charge and no bail can be posted. The other charges, sworn out by University Police Department, carry bail of \$40,000.

The CYA had taken out a warrant for a parole violation on Morris, according to campus police, who had contacted CYA when they learned the identity of Morris.

CYA arrested Morris at his East San Jose residence at 6:30 a.m. Friday. Morris, who did not list an occupation, lives at 2126 New-

in Santa Clara County Jail.

Another man arrested by UPD in connec tion with the recent thefts, Marcelo Tyrone Shelton, was scheduled to be arraigned in Santa Clara County Municipal Court on burglary charges Friday afternoon.

UPD believe it had found the source of the recent burglaries in the parking garages.

"We've tapped into a group of people who responsible for the 25 burglaries

"It is an assumption that they have been responsible for all of the thefts since last Sep-" Lane said. There have been 35 re ported thefts from cars in the parking lots since Sept. 1.

The victims of the burglaries have lost more than \$11,000 in stereo equipment and other valuables, according to UPD.

Police believe that the man who eluded

them in last Wednesday's stakeout, which resulted in the arrest of Shelton, was Morris.

According to Officer Tom Pomeroy, the man threw a pair of pliers at him, jumped 15 to 20 feet from the second floor of the garage

The man also managed to stay ahead of UPD last Thursday afternoon, when acting on a tip, UPD surrounded Roosevelt Park

We surrounded the park, but he had departed," Lane said. When arrested Friday morning, Morris

did not have any of the stolen items in his pos

According to police officials, all of the ods stolen on a Wednesday would probably

in the case but not enough evidence to justify

be fenced by Thursday afternoon. University police have two other suspects

Several issues left out by board

By Shannon Rasmussen

Daily staff writer
Although the \$1.4 billion 1986-87 support budget for the California State University system was adopted Wednesday, members of the board of trustees questioned missing items.

Child care programs, parking problems and lottery funds were three issues discussed at the CSU Board of Trustees meeting that were not addressed in the budget.

Several trustees questioned the need to address these problems as they continue to be a major concern to student representatives such as the California State Student Associa tion representatives from all 19 CSU campuses and students-at-large.
Mariann Landsdale, trustee, ex-

pressed concern that the child care program was not considered in the

The board of trustees had recently acknowledged its support in working with the CSSA and campuses

on its child care programs, she said. Chancellor W. Ann Reynolds said the board has established a planning group to take a look at the issues before them and see where the campus programs need help. She said the studies of individual campuses and the system as a whole needs to be complete before it will know what to

"We must do the studies first before we know what to do with it," Reynolds said.

One trustee, Dean Lesher, considered parking a problem to be discussed in the budget.
Parking is self-supportive on

each campus and the chancellor cannot press for funds because the students have a difficult time paying for for business affairs

To accomplish the goals to reduce parking problems at each of the 19 campuses, the trustees would have to raise fees even more, Hanner said. This is not feasable he said

"Balancing the cost with the need has been a problem," Hanner

Another concern was the lottery funds. The budget did not deal with the approprations of the lottery funds because it will be dealt with later, Hanner said.

S.U. games area still not finished

By Tyrone van Hooydonk

The remodeled portion of the Student Union games area will not be finished today, its third completion date, said Terry Gregory, S.U. recre-

The project has been slowed be cause materials supplied by subcontractors arrived late, Gregory said. All of the materials arrived last week and the contractor, Ray Wilson Co., is now completing the installation, he

"One way or another, we're going to be (done) on the 26th," Gre-

SUGALAND, in the basement of the S.U., missed its third completion date because of "just a lot of little

als for a lowered ceiling over the new video game area meant delaying the lowering of the area's sprinkler system, Gregory said.

New carpeting in the area was also not installed.

The first scheduled completion date was Sept. 27. The second was Oct. 14. SUGALAND missed its first two

completion dates because its new main and fire exit doors did not fit in their frames and because a fluorescent light and the ceiling materials were not shipped on time, Gregory

The custom-made fluorescent light, called a "super-tube," was shipped from the East Coast, Gre-

CSSA supports input

Daily staff writer
SJSU representatives will begin analyzing the effectiveness of student input into budget and program related issues now that they have re-ceived support from the other 18 campuses in the California State University system.

California State Student Associa tion representatives from the CSU system expressed their concern for students' active participation in universities' decision-making processes and adopted a student campaign to review budget processes at their October meeting.

Tim Haines, Associated Students director of California State Affairs and Paul Sonneman, A.S. executive assistant, presented a student cam paign proposal for a responsive university budget (SCRUB) to the External Affairs Committee of the

CSSA representatives adopted the proposal as an "advisory" campaign for each campus to pursue at their own discretion.

The CSU Board of Trustees set policy last July that each campus establish a "budget advisory commit-tee." The committee must provide a mechanism for student representatives to be given an opportunity to have a voice in major developments of program and budget related is-

GRADUATES	4,645	4,909	+264
Total	24,876	25,507	+631

Daily staff writer

SJSU enrollment figures for fall 1985 have risen 2.5 percent from last year. There are 25,507 students this semester, compared to 24,876 in fall 1984, according to Jack Foote, director of institutional studies.

The Full-Time Equivalent Student units went up too, with 19,803 this fall semester as compared to 18.347 in fall 1984.

The FTES standard is the total number of student credit units that are being taken on campus and divided by 15, Foote said.

The Full-Time Equivalent Student determines whether we have met with our obligations to the state of what we thought we were going to get and also determines to a certain

extent (the) next year's allocations (for the budget)," Foote said. "Budgetarily, this is the key el-

ement - the Full-Time Equivalent Student. These are the numbers that are used for our resource allocations from the state," he said.

Many factors are involved in explaining the increase in enrollment this semester. However, Foote said that no specific cause has had a direct effect, aside from competition from other schools.

"The demographics doesn't quite give any reason for this fluctuation (in enrollment figures)," Foote said.

"It seems to be very difficult to tie into anything directly. (Although) competition from other schools there's a certain amount of that going

No apology needed, Mr. President

For months, President Reagan has battled terrorists with little more than rhetoric. But when the opportunity came for action instead of words, Reagan responded decisively.

The interception of a chartered Egyptian Boeing 737 by U.S. warplanes Oct. 10 marked the first time Reagan has responded with military force against terrorists. Oct. 10 was a victory in a nightmarish war with terrorists the United States had been losing for too long. Last June, Shiite hijackers held 37 Americans hos-tage for 17 days in Beirut. U.S. Diplomat William Buckley

Steve Pipe

was kidnapped 18 months ago by another Shiite terrorist group, which last week claimed to have killed Buckley. But now, as a result of the dramatic interception by four F-14 Tomcats, the United States has made its message

clear to the world: terrorists will be dealt with head-on.
"We have shown the world that the U.S. is a force to be reckoned with in the global battle against terrorist actions," Senate Minority Leader Robert Byrd said.

"This is an important event in the fight against ter-rorism," Secretary of State George Shultz said. "Terror-ism is losing ground."

But if the act is a triumph for the United States, Egyptian President Hosni Mubarak sees it as something quite different. Mubarak, who had allowed the hijackers of the Italian cruise ship, Achille Lauro, to leave Egypt, is de-manding an apology from Reagan "to all Egyptians". Reagan has refused thus far, and he is entirely cor-rect for this stance. An apology to Mubarak now would

only erode the tremendous ground the United States

gained against terrorism everywhere on Oct. 10. Reagan sent Mubarak a letter reportedly expressing "considerable understanding" of Egypt's anger over the incident. Mubarak said he has not read the letter because he is too "upset." When he has settled down, perhaps Mu-barak should give the letter a good long read.

It would be folly for Reagan to say he's sorry for giv-ing the order to nab four pirates U.S. officials strongly felt would escape justice. This is not chest-thumping macho ego at risk if Reagan apologizes. It is something far more

If Reagan were to apologize to Mubarak and Egypt, and he may feel considerable diplomatic pressure to do so, it would give a clear signal to terrorists worldwide that the United States is still fair game for another hijack-ing or, far worse, murder of its citizens. White House spokesman Larry Speakes said it best Oct. 11.

"It should send a message — and a strong one — that we will do what is necessary to apprehend those who are involved in terrorism. We will do this again."

The message the United States conveyed to global

terrorists Oct. 10 is we will not tolerate fear and intimida-tion anymore. We are sick of being an oversized whipping boy for every fanatical group with a grudge. To apologize for forcing the Egyptian jet to land would make this message worthless. Terrorists would see the United States as weak and ripe for more bloodshed.

It's never easy to apologize, particularly when there is no clear evidence of wrongdoing. In the case of the Egyptian Boeing 737, there was no clear evidence of such wrongdoing. An apology now would be our greatest sin.

Editor In response to Jeff Duran's letter ("Facts lacking in

Taking a walk on the wordy side

The purpose of this memorandum is to put you into a

"The purpose of this memorandum is to put you into a position to have some understanding of the phenomena which took place in Cincinatti (sic), Ohio ..."

My former boss wrote that. My former boss is the founder, president, chief executive officer and commander in chief of a sinfully profitable string of savings and loan branches, the purpose of which is to put its customers into a position to have some understanding of the phenomena that occur when the organing phenomena. phenomena that occur when the ongoing phenomenon of compounding interest on a daily basis implements the precipitation of surplusage deposits.

David Wenstrom

I have nothing against my former boss. He is a nice enough guy. I don't even mind that he misspelled Cincinnati 14 times in his memorandum; he's probably never been to Cincinnati. But when a guy makes 4,000 times as much money as I do, he could at least hire a translator.

When I first read the above paragraph, I thought, "Exactly what position does my boss want me to assume? The supine, the fetal or the inverted pyramid?"

After further reflection, I thought, "Perhaps my boss is trying to tell me something about Cincinnati, Ohio."

That seemed to be a key phrase - Cincinnati, Ohio. That and "understanding." 'Let me reiterate that (Who's going to stop him? He

owns the bloody S&L) — the purpose of this memorandum $\ \$ make my job so much easier

is to be very sure that all of our people understand and are able to utilize the strength of that FSLIC emblem that we have on our window, our stationery, etc."

I had never understood the strength of an emblem

more than I understood the strength of that omnipotent FSLIC emblem, though I found it difficult to utilize when I was hauling around bales of money. But I'll be damned if I will ever understand what my federally insured boss was trying to say about Cincinnati, Ohio.

I quit, of course I thought that after I left the world of high finance, I would enter a simpler world, a world in which people speak to each other with the intention of being understood. I was wrong.

In my new occupation — disguised as a journalist to appropriate student loans — I have learned two things. First, I should have stuck with high finance. Second, people generally aren't interested in being understood

pie generally aren't interested in being understood — by journalists, in particular.

As to the first matter, "I cannot afford to waste my time making money," but donations would be appreciated. The second matter bears closer inspection.

To illustrate a point, I submit the following "word": "Timpling" Francisci.

"Timeline." Examine it closely, wrap your tongue around it a couple times, sink your teeth into it.

This little jewel made its debut among my regular sources about two weeks ago. It was an instant hit, rapidly gaining popularity. Rarely does a sentence go by now when timeline does not rear its flamboyant head.

It sounds nice, but what does it mean?
It could mean "schedule." It is most frequently used in that context. But any reasonable person would say schedule if he meant schedule. And my learned and socia-

lly conscious sources are reasonable people The word timeline must be examined from a literal standpoint. Time implies a clock and line implies a path. The only visible parts of a clock to follow a path are the hands. The hands of a clock move in circles. Therefore, timeline has something to do with moving in circles. When someone is following a timeline, he is running around in circles. That is what timeline means

I wish my sources would tell me these things. It would

THE PLO HAD ABSOLUTELY NOTHING TO DO WITH THE HIJACKING OF THE SHIP ...

Letters to the Editor

Boat of evolution would sink

letter about creationism") attack on Steve Cressy's letter, I can only ask how he, a French major not involved in science, nor the study of evolution or creation science, (I say this because his ignorance is obvious) is only at best, parroting the same old second- and third-hand evolutionary smoke screen that has been launched at creationists for years!

He obviously does not understand that our body is filled with interdependence and symmetry which is not that of random processes. Since he likes to quote Darwin so much, let's look at what Mr. Darwin himself wrote in a chapter from "The Origin of Species."

"To suppose that the eye, (with so many parts working together) ... could have been formed by natural selection, I freely confess is absurd in the highest degree."

What is this? You mean that there may be a leak in

the boat? The fact of the matter is, if evolutionary theory were a boat, it would no soon be launched, then sink.

were a boat, it would no soon be launched, then sink.

Maybe you are more into the Steven J. Gould model of
punctuated equilibria? This is a step backward for the
evolutionists, since they admit in this case that the fossil
record offers no support for gradual change and instead a
theory of evolutionary jumps is proposed.

This is an unproven, unscientific debauchery. And to
think, men will put their faith in Gould rather than God.
God's onlying has never changed. Gould's changes daily.

God's opinion has never changed, Gould's changes daily. Creationists use the same scientific data as evolution-

ists but don't need to make up new words to explain constant inconsistencies in their data. Creationism is equally scientific and can be taught without reference to the Bib-le.Those who flatly reject creation science are biased from the beginning and can hardly be called scientists. Many have never even read a creation science book

Many men such as Duane Gish, Richard Bliss, Gary Parker, Henry Morris, were all evolutionists and accom-plished scientists. They left evolution, not because of blind faith, but disturbing faults and flaws with the the-ory. Many were actually at one time anti-creationists be-

cause of their ignorance.
I'll close with this quote from Dean H. Kenyon, coordinator of the general biology program at San Francisco State University, taken from a foreward "What is Creation Science" by Parker and Morris, which was scrutinized by legal experts and found satisfactory for use in

public schools and libraries.
"If after reading this book carefully and reflecting on its arguments one still prefers the evolutionary view, or still contends that the creationist view is religion and the evolutionist view is pure science, he should ask himself whether something other than the facts of nature is influencing his thinking about origins

Obviously science is still French to you Jeff.

Between the Lines

Mariann Hansen

No doctor in the house

THREE WEEKS HAVE gone by since the last episode of St. Elsewhere and I'm just sick. Get me a doctor.

The Major League Baseball playoffs pre-empted the real-life drama for the past two weeks and three weeks ago NBC aired a health special in

Wednesday's 10 p.m. time slot.
A couple of phone calls were in order.
I telephoned the NBC "Program Information and Reaction Desk" in Los Angeles to react and

obtain some information.
"Is St. Elsewhere going to be pre-empted again

during this season?"
"There will be no more pre-empts," a

spokeswoman said. "Not that I know of anyway."
That's not a solid guarantee, but the woman
assured me that the program would air this
Wednesday since ABC was carrying the World

Viewers were left hanging Sept. 25 when Dr. Mark Craig's son, Steven, and his pregnant wife were in an automobile accident. The show concluded with Dr. Craig's wife, Myra, answering the dreaded late-night telephone call.

The burning questions remain unanswered: Will

Steven die and his wife and the baby live? Or will Steven and the baby survive and his wife die? Or will Steven and his wife die and leave Dr. and Myra Craig with a child to raise?

A phone call to the St. Elsewhere production office at Mary Tyler Moore Studios in Los Angeles didn't produce any answers. 'You'll just have to watch the show," was the

only answer I received.

There was another burning question I needed to "Is Mark Harmond really leaving the show

"Yes, I'm afraid he really is," the woman told me disappointedly. "He'll be on and off the show for the rest of the year, so you'll just have to record all the shows now so you'll have them."

Harmond plays the handsome, suave plastic surgeon, Bobby Caldwell. He's leaving the show to do more live theater and movies of the week How are they going to dump him off the show?

Rumors have it that he will be charged with sexually harassing one of the nurses on the show, but the oduction office would neither confirm nor deny the 'You'll just have to watch the show," was the

T. ELSEWHERE IS television drama at its best. The setting is a Boston hospital called St. Eligius that is aptly nicknamed St. Elsewhere because it exists in the shadow of Boston General.

The characters on the show are original, biting and believable. From Dr. Victor Ehrlich, who constantly sticks his foot in his mouth, to Dr. Wayne Fiscus, a resident who is a tad wacky but performs der the pressure of the emergency room.

The operating room sequences are true-to-life with the surgeons tossing bloodied sponges and organs into sterilized metal tins. The O.R. scenes

are as realistic as live surgery on public television. St. Elsewhere is a must-see, but if the network wants to keep its viewers, it had better relinquish the pre-empts. All pre-empting does is attract riewers to the other networks with winner programs 'Hotel' on ABC and "The Equalizer" on CBS.

Forget Dynasty, Dallas or MTV. I want my St. Elsewhere!

Mariann Hansen is the editor. "Between the

Lines" is an open forum for editors and appears

THIS HERE COURT FINDS YOU GUILTY AS CHARGED, WHICH YOU NO DOUBT, INDEED, PROBABLY ARE OR YOU WOULDN'T BE HANGING AROUND LIKE THAT.

High-tech firm seeks students By Jack Tordjman time for a meeting and eventual

Daily staff writer Hewlett-Packard started its yearly college recruitment program Wednesday at SJSU with a career panel followed by a wine and cheese reception. The company is looking for 33 students to fill part-time and

full-time positions. H-P had 22 representatives come to SJSU to meet with more than 300 engineering and business major students. They explained to students in-terested in working for the company what kind of employees they are looking for and told them about their iobs at H-P

Last year 33 SJSU students were hired by the program. The students interested in working for H-P are computer science, mechanical or in-dustrial engineer majors, said Nancy Thomas, H-P college recruitment manager for SJSU.

H-P's headquarters, located in Palo Alto, employs approximately 82,000 people. There are 900 SJSU en-gineering and business graduates,

said Thomas.
Thomas, who graduated from

'H-P provides the school with support.' - Jay Pinson, dean of engineering

SJSU 10 years ago, said the university is 11th on the list of the 100 colleges selected in the yearly college recruitment program for the quality of the school and the number of SJSU students or graduates hired.

According to Thomas, H-P is in-terested in SJSU and its students for two reasons. First, SJSU is located in the heart of the Silicon Valley. Second, the school has a good reputation, and its students are brilliant, Thomas

Because of the economic crisis, H-P has reduced its overall hiring on experienced workers, said Maureen Tyrell, the Bay Area college recruitment program manager.

recruitment program, designed to hire college students, has not been affected, Tyrell said. "Students are the future and are the company's most important asset.

Al Chien, a SJSU electrical engi-neer major, said he wants to work for H-P because he read in Fortune Mag-

'We want people who will make an impact. We expect them to be creative and innovative and there is a lot of these students at SJSU.

> - Maureen Tyrell, recruitment manager

azine that H-P is the No. 1 company to work for in the U.S. today. But he said that the competition is tough.

"Hewlett-Packard has the repu tation to be a company that takes care of its employees and creates a healthy atmosphere to work in. This is the third time I've applied, but I don't give up," Chien said.

Tyrell said what the company looks for is students with communication skills, who have the ability to work with others and make a team. who are involved in differents clubs or organizations and strive for excel-

"We want people who will make an impact. We expect them to be creative and innovative and there is a lot of these students at SJSU," Tyrell

During the career panel, several H-P employees talked about their job, their experience as a college student, what the company is looking for and what students have to work on.

Many of the speakers were grad-uates or students from SJSU who got their full- or part-time job through the company college recruitement

An example of an SJSU student is Joe Schreiber who worked for the company last summer. He apthe college recruitment manager, Maureen Tyrell, during last year's wine and cheese reception. Even though he was not sched-

'The idea of this program is to ive engineering and business students an opportunity to get to know the company and discuss with a wide range of H-P employees about job prospectives and what they (stu-dents) are interested in," Thomas

said.
"Hewlett-Packard is basically the leading supporter of education in the United States because of its financial donations. Here, H-P provides the school with support and the practical aspect is the project 1988," said Jay Pinson, dean of Engineering.

The 1988 project is the result of a proposal submitted by the School of Enginering about one year ago. The school asked for funds to renovate some existing labs and buildings and trainings for professors on a three-year period, Pinson said.

Sam Hickman, an H-P sales representative, was assigned to work with the dean (school of Engineering) and the professors to determine what needs to be changed, mod-ernized and updated, and where the money should be allocated. The \$300, 000 worth of equipment originally asked by the school for 1985-86 was finally granted by H-P about a month ago, Hickman said

In 1984, H-P gave more than \$30 million worth of equipment nation-wide to high schools and colleges, Hickman said.

'Since the beginning of Hewlett-Packard, representatives have been coming to colleges to meet with students interested in working for the company and presenting the comand its working possibilities, Tyrell said.

The partnership between William Hewlett and David Packard started in 1939 in Palo Alto. About two months ago, H-P sent brochures and sign-up invitations for the career panel and the wine and cheese recep tion to professors to pass on to the students, Thomas said.

H-P representatives will be on campus on Oct.29, March 3 and 4 to interview SJSU students who registered through the Career Planning and Placement on-campus interview

IFC will consider bringing new fraternities to campus

By Steve Pipe

Daily staff writer
The Inter-Fraternity Council, the campus board that coordinates and oversees all fraternity activity, is considering a long-range plan for expansion of new fraternities, according to Meredith Moran, IFC adviser.

The new plan for expansion, Moran said, will be to bring more organization to the selection pro-

"The IFC wants the system more organized," Moran said.
"The new plan they're considering will be to invite one group (frater-nity) at a time. They'll be sending a questionnaire to groups that are in terested in coming on campus. They'll be asking about local alumni support, whether they've had a chapter on campus before, and how much expansion they've had nationally."

Moran said the IFC is the group that determines fraternity recognition at SJSU. There are currently 13 fraternities on campus with three new groups seeking IFC recognition, IFC Secretary Roger Thornton said. The three groups are Tau Kappa Epsilon, Beta Theta Pi and Kappa Alpha.

"With the advent of Tau Kappa Epsilon and other groups, we've had to change our goals," Thornton said. "Before, we were considering whether to go out and recruit new groups on campus, but now we're getting a lot in at once, and we have to decide who to grant recognition to. We have to decide if we're going to let them all in at once, or restrict the number.'

The IFC body is comprised of six executive officers, and each fraternity on campus has two voting members. A new fraternity must submit an application to the IFC body, and they vote on whether or not to recognize that fraternity on campus, Thornton said

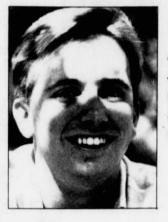

vote of the entire IFC body in order for a group to get recognition, Thornton said

Before a fraternity can be recognized by the IFC, the fraternity has to be affiliated with a large national fraternity. In addition, the fraternity seeking recognition must meet certain "minimum requirements," Thornton said.

"They have to show they're not a drinking club," Thornton "They have to meet requirements of the number of pledges.

"There'll be more choices for students to make when they're pledging, and there'll be more rivalry between the houses," Thorn-ton said. "But it may not be fair to the smaller houses, which already don't have enough members, and it may not be fair to the sororities.

Thornton said there are five so rorities on campus. "There's al-ready too high of a ratio of fraterni-ties to sororities," Thornton said. 'The ideal Greek system would be to have 13 fraternities and 13 sororities on campus, but that's not going to happen."

'We have to decide if we're going to let them all in at once, or restrict the number.'

- Roger Thornton IFC secretary

scholastics, sports and philanthro-

"You can't add groups any which way. You want to feel confident that group will meet their requirements and serve the campus well," Moran said.

Thornton said there are "positive and negative aspects" about new groups coming to SJSU.

"I'd like to see more fraternities on campus, but I'd want to see it done intelligently. I think it's important that we take a good look at all the new fraternities (that want recognition)," Thornton said. "The IFC has always thought Panhellenic (the sorority equivalent of IFC) should add more sororities, but it's their prerogative whether they add

Senate eyes doctoral program

By Herb Muktarian

Daily staff writer The Academic Senate is scheduled to act today on a Curriculum Committee recommendation reject-ing a state-wide Academic Senate resolution that opposes the creation of a California State University doc-

toral program. The recommendation "The unanimous opinion of the Curriculum Committee (is) that the California State University Academic Senate resolution opposing independent doctoral programs in the CSU, be rejected, and that San Jose State University go on record as support-ing the philosophy that the CSU should offer doctorates as appropri-

The state-wide Senate sent a resolution to all 19 CSU academic senates, asking for the opinions of the senates of each CSU campus.

For a good ad, call: 277-3171

that the University of California has long been recognized as the research oriented segment of California higher education, and is better equipped to offer doctoral programs.

The CSU does not have the finan-cial and other resources necessary to offer doctoral programs, the statewide resolution states.

The CSU is currently putting together a mission statement, which is statement of purpose, direction and

The working draft of the CSU Mission Statement states that the CSU will, in part, accomplish its mission through, "Offering instruction at the doctoral level jointly with the University of California and with private institutions of post-secondary education, or independently in fields of demonstrated need."

The state-wide resolution recom-mends that all references to independent doctoral programs be removed from the working draft of the CSU Mission Statement

'Just after I received my green forms I was very happy. Golden State. Golden girls!' - Grzegorz Sikorski

Exchange student lives it up for a year

By Antoinette Fleshman

Daily staff writer When Polish citizen Grzegorz Sikorski signed up for an AIESEC traineeship in the United States or Canada, he didn't know exactly where he'd end up. But he was

prepared for change, having moved six times around Europe. A SJSU International Business Association traineeship at Alza Corporation in Palo Alto came as a welcome surprise

"Just after I received my green forms I was very happy. Golden State. Golden girls!" said Grzegorz, who is known as Greg in America.

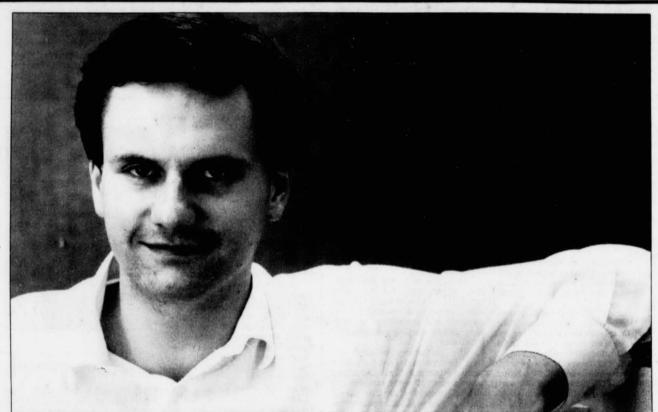

Sikorski's experience is not unique. Members of AIESEC, the French acronym for the International Business Association, can select the countries where they'd prefer to work; however, a computer randomly matches them with available traineeships. The traineeships are designed to give club members practical experience in the business world.

Sikorski is living in Palo Alto with a houseful of Germans, Mexicans, Danes, Norwegians and Israelis; all eight are AIESEC trainees affiliated with Stanford.

In the two-and-a-half months since his arrival, he has toured San Francisco, gambled during a whirlwind day in Lake Tahoe and enjoyed his first fried calamari

dinner in Monterey. Sikorski said he has frequented several discos and bars since he's been here, probably more than he's been to during his last few years in Poland. He's also been to many movies lately and attended several parties, one being his 24th birthday

But parties, movies and getting together with friends are not alien to Sikorski's life in Poland. He said he does notice some differences between Polish and American business, however. Sikorski designs

- Daily staff photographer

Grzegorz Sikorski, a Polish business intern, got his internship through SJSU's International Business Association

information systems for product management at Alza, a

pharmaceutical company "I think I must learn a lot because the computers I was working on in Poland are different,' he said. "Also I meet other kinds of

software and ways of processing.
"Of course technology is much

more advanced here in the United States. There's big business here and it's more specific (than other countries). I think the American market is most important in America (whereas, smaller countries need to concentrate more

on international markets)," he said Sikorski has a master's degree

in Organizational Management of the Foreign Trade from Karola Adieckieso Economic University in Katowice, Poland. When students enter this university to achieve a master's, they do not obtain a bachelor's degree. The whole program is more direct and takes five or six years to complete

therefore, it's possible to reduce the number of years compared to American universities, he said.

"I spent about 42 hours a week for lectures, classes, exercises, physical development and everything together (not including studies). I defined my program (like a concentration or a minor) with my

supervisors to change some things to adapt it more to my interests. Some of the changes in my program were some subjects from the computer science which were not expected to be part of my program in the beginning," Sikorski said of his college career.

He has been a member of AIESEC at Katowice University, which has an AIESEC "local committee," for four years. Poland has 14 local committees, and Katowice University offers 25 percent of the traineeships in

An avid skier, Sikorski looks forward to hitting the slopes of Lake Tahoe with some of his SJSU or Stanford AIESEC friends. During his one year stay in California, he wants to tour Los Angeles and go hiking at Yosemite National Park

When Sikorski returns to Poland he might pursue a Ph.D. in computer science and project management, as he would also like to make a career in these two fields "I'd like to try to establish my own business. Maybe in the foreign trade enterprise (in software and management consulting). I think it's more interesting to organize and conduct that which I've designed myself, formulated myself and managed myself

"It's just what I'm working on in Alza now and it's quite interesting. I think after one year, working on that, I will have quite a lot of materials and experience in that field. It's a new problem (field) in Poland so it will be interesting for many people too," he said.

So far, Sikorski said he does not miss his home in Poland, but that he looks forward to returning to Katowice after he spends one year here. "Maybe I will find my life here; however, I have no such plans

SJSU nurse educator says profession making some strides toward autonomy

By Denver Lewellen

Daily staff writer

Nursing is turning away from its passive reputation. According to Donna Agresta, registered nurse, women's awareness of themselves as active decision makers has hit the profession

'Women now are reevaluting things," Agresta said. "They're making more choices in career decisions

Keeping up with this trend, Agresta recently proposed that her position as staff R.N. at the SJSU Health Center be expanded to a position with a little more autonomy. Her proposal was accepted, and the result is her new role as SJSU's first nurse educator.

"I consider this move as making an active career choice," she said. "There weren't as many career choices for women when I was growing up. Becoming a nurse was a passive decision for me, partly based on expectations and 'shoulds and should nots.' By becoming a nurse educator I am now making an active choice.

The idea behind the role of "nurse educator" is to delve into the educational, preventive health aspects of nursing. Healthful habits can spare a person illness and thus the time and money spent getting over it.

"The philosophy of being a nurse educator has been around for a long time, it just hasn't been put into practice," said Agresta. "I think that now, especially, nurses are recognizing that the educational component is very impor-

Agresta will continue to Donna Agresta be a staff nurse for the Student Health Center, three days a week. On Wednesdays

and Thursdays she works in her new office. nurse educator, her job is to coordinate Student

Health Services' Outreach Program, which covers one or two topics a month. Every Tuesday in the Student Union, a representative from the Health Center sets up a pooth

designed to inform students about certain health issues This semester's topics include alcohol abuse, diabetes, stress mangement and sexual awareness

Agresta also works closely with the Student Health Advisory Board, an organization formed to provide networking between students and the Health Center. She is also involved in other health education programs, including cardio-pulmonary resuscitation instruction, self-breast examination and contraceptive instruction.

Agresta, a San Jose native, was inspired to go into nursing not only because her choices were limited, but because her brother suffered from cerebral palsy.
"Initially," she said, "my brother was the reason I

went in to nursing. I had grown up in a very caring and compassionate family, so this seemed like a natural progression. Because of my brother it was sort of a passion ate choice. I think some people may read this and think 'Oh, how corny, she went into nursing because her brother had cerebral palsy.' But that's the truth

She enrolled in the nursing program at SJSU right out of high school. Halfway through the program, she decided to marry and start a family, with the intention of coming back and finishing. When her two sons were in school she

After graduation, Agresta, now 37, took a job on staff at Kaiser Permanente at Santa Teresa, specializing in obstetrics and gynecology. The various hours, including night and weekend shifts, proved to be hard for her to see her family, so she began looking for another position, in an academic setting, because she knew the hours would be more regular. She sent resumes to several schools, and SJSU just happened to have an opening.

"Coming back to San Jose State was a very positive experience," she said. "I felt that I had developed my skills in the work place, and it was very comfortable to come back here.

Agresta is optimistic about the future of nursing in general, as well as her own career

"I still want to be a helping, compassionate person. But now I want to be a nurse for reasons much different than the original ones. By doing this, I'm helping change

Wildcats maul slumping SJSU in 41-0 pounding

By Rob Gibbany

Daily staff writer TUCSON, Ariz. — SJSU offensive coordinator Terry Shea predicted the Spartans would have their work cut out for them in Saturday's game against the Arizona Wildcats

He was right. For only the second time in the last 13 years, SJSU was shut out, losing 41-0 to an Arizona team that was 20th in the nation going into the

Last year, the Spartans were shut out by Arizona State 48-0.
"The Wildcats had us over-

matched," Head Coach Claude Gil-"We played as hard as we could, but we just couldn't do it.

"I'm not pleased with the results, but we hung in there and fought.

Shea was disappointed with an offensive attack that gained a total of just 200 yards and only 85 yards pass-ing, even considering the fact that Arizona, now 5-1, is second in the Pac-10 in total defense.

"I have to believe we're good enough to score," Shea said. "We just couldn't come up with the third down conversions.

That may be true - the 1-6 Spartans converted just six of their 20 third downs into first downs. What's

'I have to believe we're good enough to score.

- Terry Shea, SJSU offensive coordinator

even more telling is Arizona's third down conversion rate: the Wildcats converted on 14 of their 17 third

As linebacker Curt Lyon said, "We stopped them a lot on first and second down, but then they'd throw on third down and make the play.

Arizona was unable to "make the early in the game. In fact, SJSU held the Wildcats scoreless in the first quarter, in large part due to two Arizona interceptions and a fum-

interceptions nerback John King and free safety Freddie Payton) were on very deep passes that Jenkins threw into heavy

Unfortunately for the Spartans, they were unable to take advantage of Arizona's early-game ineffective-

n ob

see

ould

After the first interception, SJSU drove 32 yards to its own 48, but was stopped cold when quarterback Doug Allen's pass was picked off by Arizona free safety Allan Durden.

The Spartans were also unable to move the ball following Arizona's other two first-quarter giveaways,

punting on both occasions

We had a few opportunities, but we couldn't capitalize on them," said halfback K.C. Clark, who was the Spartans leading rusher with 45 vards on 10 carries

The rest of the first half was more of the same for the sputtering Spartan offense, with two more punts and two more interceptions.

"We have to decrease the num-ber of turnovers," offensive guard David Diaz-Infante said. "They're killing us. But I can't worry about that kind of stuff. I just have to continue blocking my butt off."
SJSU finished the first half with

80 yards rushing and just 13 yards passing, an amazing figure for a team that went into the game as the eighth best passing team in the nation with a 288-yard average.

But what had to be alarming to

the Spartans was the fact the Wild-cats finally got their offense on track in the second quarter, scoring with 14:07 left in the half on a 19-yard Jenkins to Derek Hill touchdown pass

Arizona also scored on 24- and 50yard field goals by placekicker Max Zendejas and a 3-yard touchdown run by running back David Eldrige. The Wildcats had a 20-0 halftime lead.

They were helped greatly by two penalties on SJSU for having 12 men on the field. In fact, throughout the game, the Spartans were shuttling players in and out right before the snap in an effort to find a combina tion that would work.

"We were trying to situation sub-ite," Gilbert said, "and we just got mixed up, and our guys didn't come out in time."

In the second half, the Wildcats continued their methodical march to the end zone, rolling up 21 more points on touchdown runs by Jenkins and running backs Chris McLemore and James DeBow.

Offensively, SJSU had two rea sonably long drives in the second half (50 and 40 yards), but no points. The second-half yardage total, 107, was only slightly better than the first half.

The busiest Spartan was un-doubtedly punter Sean Laughlin, who kicked six times in the game for a 38.5 yard average. Arizona punter

Ruben Rodriguez punted only once.
Arizona dominated every statistical category including first downs (24-11), passing yardage (273-85) and total yards (439-200).

Linebacker Jim Hollinger may have summed the game up best when he said, "They just outmatched us."

Dons outkick Spartans 2-0 in second half

Daily staff writer
After holding Pacific Soccer Conference favorite University of San Francisco scoreless in the first half, the SJSU soccer team suc cumbed 2-0 to the pressuring Dons

Saturday at Spartan Field. SJSU's record fell to 5-8-2, 2-2 in the PSC.

The Spartans were optimistic at halftime after spending much of the first half bothering San Fran-

cisco goalie Mark Powell.
"We had many opportunities to score. We just couldn't do it," SJSU coach Julius Menendez said.

The team outshot the Dons 16 to 9, with most attempts coming in the first 45 minutes.

In the second half, San Francisco looked like a different team. Controlling the ball with crisp passing, the Dons scored twice in the first 12 minutes of play

At the 49-minute mark, San Francisco's leading scorer Robert Magalhaes made it 1-0 on a shot from straight out. The ball hit the crossbar and bounced past SJSU goalie Joe Gangale.

Don midfielder Anders Kristensson then knocked in a rebound shot at 57:00 to complete the day's

The Spartans had their best scoring chance near the game's end, when San Francisco's Powell was caught 10 yards out of position by Spartan Allen Picchi. passed the ball to forward Matt Lord, who had a clear shot at an empty goal, but Lord's kick sailed high over the crossbar.

SJSU's Rich Rollins said chances like that could not be

"It's just not the mark of a good team," Rollins said.

Menendez said the second-half

Don turnaround came when the Dons began attacking SJSU's defensive right side, and one player in particular hurt them.

Their Nigerian (Ken Boardman) was really bringing the ball up on us," Menendez said. "Without him it would have been a good

The coach was also impressed with the depth of San Francisco's

"When they bring someone in, doesn't change their game much," he said.

Don coach Steve Negoesco didn't think his team, 8-4-2 and 2-1 in the PSC, played up to the form

Ron Cockerille - Daily staff photographer

USF's Robert Magalhaes (10) and SJSU's Larry Norris battle for the ball Saturday

that many feel will take them to the NCAA playoffs

"We played a scrappy game," Negoesco said. "Our timing was off. I think some of that was due to San Jose's performance today. It

had some good chances." The coach said USF is experiencing what SJSU has been all year lack of scoring punch and inju-

"We've had three or four men out all year, Negoesco said. "When you keep changing the lineup you're not going to play well. We had several chances today, and we didn't even get a shot off.

Although the loss stopped a Spartan winning streak at two games, Rollins wasn't dismayed with Saturday's performance, in

light of the opposition.

"It's hard to keep saying, 'You played a nice game but you still lost,' but if we're going to lose to a team like USF by two goals, then I don't think we have anything to be ashamed of," Rollins said.

The Spartans travel to Stock-ton on Wednesday to face Pacific, a team that has an 0-9 overall record.

Late orders create chaos Bookstore wants instructors' text requisitions soon

By Alision C. Ziganti Daily staff writer

A considerable attempt is being made by the Spartan Bookstore to have instructor text requisitions placed by Friday, said Jeff Yterdal, assistant textbook manager of the bookstore

However, Yterdal said, getting instructors to turn in their requisitions is considered just short of a monumental task.

Requisitions are a publisher's reference to book orders. Instructors place the requisition with the bookstore, which orders the books

from the appropriate publisher.
"In the past, we've had about 40 percent of the requisitions in on time," Yterdal said. "The rest sometimes stagger in as late as the middle of the summer

The bookstore's outcry is being backed by a number of reasons which they feel are valid as to why the requisitions are needed by the specified

The most important reason, Yterdal said, is that late requisitions slow down the entire book buying and

"It takes a long time to put the k department together for the start of the upcoming semester," Yterdal said. "We get thousands of boxes of books to unpack, price and put out on the shelves. When we have lines of students complaining that their books haven't come in it slows everything down so the process takes that much longer.'

"In most cases a book is late be-cause requisitions aren't in on time," Yterdal said. "However, other times it could be our fault or the publishers fault. Those (the latter) problems can be remedied much quicker if we didn't have to take care of the books ordered late, also.

Another area which would benefit from requisitions placed on time is the book buy-back period.

Ron Duval, manager of the ookstore, reinforced the above situation with an example.
"Take a calculus book that sells

for \$45," said Duval. "When the stu-dent sells it back at the end of the semester, they will get \$24 for it, that is if we know for certain it will be used the next semester. We won't know that until we get the requisition for it,

ough."

Duval went on to say that if the requisition on the calculus book had not been placed, the student selling it

back to the bookstore would receive only \$13 for it.

According to Duval, the bookstore has hundreds of books previously ordered for this semester that are still on the shelves, due to requisition mix-ups. At the same time, he said, many students are still waiting for other books that were short ordered, for one reason or another, to

"It goes in a circle," Duval said. "We have to spend so much time on the problems that arise due to late orders and the like, that it becomes difficult finding time to take care of legitimate problems that come up

The bookstore has provided an incentive for instructors to place their book orders by the due date. The incentive is a card allowing a 15 percent discount on almost all of the items the bookstore carries.

'We have done all we can about it," said Yterdal. "It's up to the pro-fessors and school departments

Homecoming of another color

By Alison C. Ziganti

Daily staff write The Spartan Bookstore is "going with the gold" by staging an assort-ment of events to take place during

the homecoming festivities which

begin today According to Bookstore Manager this year's Homecoming is to inform SJSU of its true school colors.

gold," Duval said. "We're tying to \$2.50 worth of free merchandise, will

promote the school's true colors, which are gold and white.

The bookstore is doing so by of-fering specified gold and white clothing items at a reduced price.

'We purchased a large quantity of T-shirts, sweatshirts, windbreak-ers, golf shirts and hats specifically Ron Duval, a goal of the bookstore at for Homecoming Week," Duval said.

For all of Homecoming Week most items in the bookstore will be of-"Contrary to popular belief, San ferred at a 10 percent discount. Also, Jose State's colors are not blue and 3,000 student packs, which include

Two Holocaust survivors to share their stories

Daily staff writer

The bomb saved her life and the lives of her family. Maryann Wynschenk was 5 years old when the Japa-nese infiltrated the Dutch colony of Indonesia, invading her country by surprise.

They came first as shopkeepers and photographers and set up busi-nesses. But they were high-ranking

officers in the Japanese services.

Because Indonesia was a mixed culture, the quiet takeover went un-noticed. However, the Japanese infiltrators had already mapped the country when war broke out in the

Dutch colony, Wynschenk said. The Indonesians tried to defend themselves, but Holland was em-broiled in its own struggle for existence in the war against the Nazis in Europe. And so begins the story of one survivor of a Japanese concentration camp.

Wynschenk has a message for Americans. She said there should be no guilt because of Hiroshima. And

Cal Poly students protest ruling

Students at California Polytechnic State University at San Luis Obispo are circulating petitions protesting a ban on the use of alcohol in

city parks.
The SLO City Council voted Sept 24 to ban the consumption of alcohol in designated areas of ten city parks They said the move was designed to stop transients from drinking and loi-

cal Poly Associated Students
President Mike Mendes said the petitions going around the campus are designed to protest the new ordi-

"The petitions are due to the pro-cess of the City Council and their lack of encouraging and utilizing student

Around other Campuses

input," Mendes said.

The council first heard the issue during the school's summer session, when most students could not attend,

The ordinance will be up for review in January, by which time Mendes hopes to have collected more than a thousand signatures

An abortion clause, and another for chemical dependence are part of the insurance package for full-time faculty and staff at Pepperdine Uni-

James Moore, personnel services director, said the clauses are "a standard part of many medical coverage plans," but added that, as far as he knows, "no decision has been made (by the university) of whether it's appropriate.'

Greg Baird, a representative for Prudential insurance, said that the company is "providing our standard provisions" for Pepperdine. Baird said that the abortion clause would cover the mother "even in elective

Bird's politics discussed

sions that have cost big business large sums of money, Wander said. They are the groups that support right wing politics in California

Richard Gardner, a Santa Clara County deputy district attorney, said Wander raised phony issues. He said Bird is too lenient on criminals and her personal views have interfered with her duty of office.

"That group (Associate Justices Joseph Grodin, Cruz Reynosos and Stanley Mosk) has formulated a policy that virtually wipes out most of existing California law and subsi tutes their own personal views,' Gardner said.

'A judge is supposed to take the law either from the people by initia-tive or she's supposed to interpret what the legislature has decided. Those people are all accountable to the public and follow those laws. Rose Bird has not been doing that."

But attorney Phil Pennypacker

He said the public has been given information that is result-oriented only and that "a gutter-sniping atti tude has been projected on the shoul

ders of one person."
"There is absolutely no sense for us to take a court that has been a dignified body and run it through the gutters of society and expect anybody to do anything else than to vote no on all four of the justices on the ballot," Pennypacker said.
"That court," Pen

"That court," Pennypacker added, "has been and will be one of the leading courts in the country in terms of its philosophy and in terms of its individual rights."

Doran Nielsen, representing Crime Victims for Court Reform, then changed the subject to capital punishment

Since the death penalty was en-acted in 1976, Nielsen said that more than 20,000 citizens have been "exe on the streets and in the neighborhoods of California.

However, he said, none of the

convicted murderers have been exe cuted for these crimes. He said that Bird has allowed too many reversals and has "made the law what she wants it to be," irrespective of how the public has voted on the death pen-

Attorney Patrick McMahon re

"Of all the cases that the Su preme Court has been asked to re riew, 95 percent are never touched, McMahon said. He said only those cases that have some significant error are reviewed by the Supreme Court and the decision to review is made by four people, not one person.

The death penalty is not the issue, McMahon said, but has been selected for its emotional impact on the electorate. He urged voters to be come informed about the role of the State Supreme Court before they step into the voting booth in 1986. He voting booth in 1986. added that society's problems delve deeper and will not be solved by removing Bird from the court

It's a little known fact that Ben Franklin also invented "Pez" candies

It's Hurricane Jane No, it's Hurricane Dave. No wait - uh oh...

Issues put off by board

continued from page 1

The \$1.4 billion support budget request includes pay levels of existing salaries and benefits for employers, purchasing of equipment and on-going programs, said Charles Davis, CSU public rela-

tions officer.
The CSU system is allotted \$13.1 million this year and is expected to receive \$25 to \$30 million annually in the future. The funds will be restricted to instructional purposes ranging from computer terminals to teacher scholarships to microscopes, according to Louis Messner, assistant vice chancellor for budget planning and administration. Instructional purposes are those items directly aimed toward students' educa-

The lottery funds will be "sup plemental" monies consistent with the California State Lottery Act of 1984

The Act states "that the peo-ple of the state of California fur-

ther declare that it is their intent that the net revenues of the Cali fornia State Lottery shall not be used as substitute funds but rather shall supplement the total amount of money allocated for public edu cation in California.

The lottery issue was not considered in the budget because it is a separate issue to be discussed in a long range planning committee scheduled to meet Nov. 19, Messner said.

If the predicted funds are available the first year, the system has allotted money to instructional replacement of equipment master teacher scholarships and contractual obligations such as teacher education, among other things

The long range committee will be determining what proce-dures will be used in terms of determining the actual use of the monies and the allocations to each university, Hanner said.

SUGALAND remodeling not done

gory said. It will form an arch around the entrance to the video game area.

"Somebody told me they weren't shipped (on time) because of the East Coast hurricane (Gloria)," said Larry Fulk, project foreman.

The new lighted ceiling form the Donn Corp. in Stockton will hang from steel wires between the walls over the new video game area. The ceiling's first frame did not fit, Fulk said. It was too small and allowed too much space between the ceiling and the walls so that electrical wiring was visible

The doors would not fit because their hinges did not match the hinge relief cutouts on the door frames. Gregory said. Brickwork around the frames could not be done until the doors were installed.

"They sent the wrong door frames twice," Fulk said.

Gregory did not have the names of the subcontractors. Fulk declined to name them

had been ordered from subcontrac-tors on July 31, before the construction began, said Ron Barrett S.U. di-

The architects, Sugimura and Associates of San Jose, said finishing the project on time meant it was nec cessary to order the items early, Barrett said. The contractor began work

Aug. 12. 'They were ordered, should have been here, the contractor was told they were going to be here, but they didn't come," Barrett said. "You give them a date and they say 'yes we think we can make that date that seems realistic.' The reality is that almost every project that I'm aware of that's been on this campus came in

Gregory said the construction was placed on a tight schedeule be-cause the S.U. Board of Directors approved the project during finals week last semester

"We knew (we would) be lucky if

we got it started by mid-August," he

Barrett said that he, Gregory, the contractor and the architect came up with the original Sept. 27 completion date.

We wanted to prod them along and point out to (the contractor) that it was important to get it done as soon as possible," Barrett said. "Had they been able to get their materials on time from the subcontractors, as they thought they were going be able to, it perhaps could have been done."

Barrett said that he will not know the cost of the project until it is completed but he estimated that it is still within the budget.

SUBOD allocated \$141,820 of S.U. money for the project last semester. Barrett said. Spartan Shops supplied \$17,935 he added.

Gregory said that a "Grand Re opening" is planned for the week of Oct. 28. SUGALAND will raffle off an Asteroids video game and feature reduced prices on bowling and pool, he

When finished, SUGLAND will have four pingpong tables, 10 pool tables, the new video game area and a new snack bar.

Bowlers and video game players have been able to use the games area during construction, but the area for pingpong and pool players has been "In one sense, I'm kind of disap-

pointed we didn't get it done by the 27th (of September) because its a tremendous inconvenience to the students," Gregory said. "On the other hand, I guess I would much rather they end up being late and doing the job well than piecing it together real

SUGALAND clerk Giang Lamb estimated that about 80 players usually use the pool tables on the weekend and about 40 use them each weekday

He said the pingpong tables are usually used by about 30 players each

Enrollment rises at SJSU

continued from page 1 on," he said.

"We clearly compete with community colleges for lower-division students," he said."We compete with the University of California and its

'Getting enough data for outer segment schools are not all that easy," Foote said. "You can get some pretty good correlations between what other campuses and their systems are doing and what we're

San Diego State competes for our first-time freshmen. We have not done that much recruiting in recent years outside of our general area

Foote cites SJSU's crime-laden surroundings as "another aspect which is much harder to put figures

The ambiance of the campus has had an effect on enrollment figures,

"There was a period a few years back when we were having rapes and

then a lot of them were attributed to us whether they were here or not. And, the campus went to sizable ex-tremes to make the campus a safer place to be, such as the blue light telephones" and the night escort service,

"So, this ambiance issue is a real The president (Gail Fullerton) feels that if we spend a lot of money and a lot of time, trying to increase the ambiance in an institution like this, (she) would like to think it would

have some impact," Foote said.
"The big increase this (fall) was the first-time freshmen and junior

transfers," he said.

change away from the social science discipline and into the applied areas applied arts and sciences, engineering, and business. (They) have felt the pressure of students wanting

CSSA adopts review

dards, said Dale Hanner, CSU vice chancellor for business affairs. Stanislaus has a new president and has not been able to address the issue in the students' best interest, Hanner

"Students ought to be heard. They can help carry the weight,'

But Haines and other members of the A.S. are concerned the students are not getting adequate input at SJSU and other campuses. They have designed SCRUB for this reason.

CSSA also sent out questionnaires to each campus prior to their monthly meeting that were similar to the presidents' questionnaire for the trustees review. There were still CSSA campus questionnaires unanswered as of last week.

CSSA representatives recently received the presidents' question-naire that they had requested from the chancellor's office, and Sonne man said he would be reviewing it before the next CSSA meeting in Noat Northridge

SCRUB is an attempt to establish a strong budget advisory committee on each CSU campus based on the policy that "students should be active participants in the consideration of program and budget related issues It would also serve as a unifying theme for expanding A.S. influence on each campus, the SJSU proposal

At a "Student Empowerment Training" at SJSU in late September, a weekend for discussing studen overnments ineffectiveness and aking suggestions for immaking suggestions for im-provements, four principles were de-veloped to serve as a guide for each

The principles were, as stated in the SCRUB proposal: the committee would be subject to open meeting law (meaning the meeting is open to the general public); be composed of at least 50 percent student members; review the entire campus budget and provide for an adequate public comperiod (estimated about a month); and make recommendations directly to the university president rather than through an intermediary committee or structure.

'We need direct input into budgetary processes," Booth said.

The SCRUB proposal also pro-vided criteria for evaluating the budget advisory committee at each campus. Some of the proposals included developing a SCRUB coalition, raising the issue with students by media sentations or class raps, gathering campus faculty and Academic nate support and presenting ideas and negotiating with the campus

Each campus has some collegiate group that recommends fiscal decisions to the campus president and each campus is different, Hanner

The committee is represented in the Financial and Student Affairs Committee at SJSU, which has been in place in the Academic Senate previous to the mandated policy implementation, according to SJSU President Gail Fullerton's questionnaire.

The committee is the major

source of recommendations on budgeting and planning issues to Fullerton, as president, for final appro-

val, the response stated.
The committee includes five students as well as faculty and adminis-
