Proposed state budget keeps fees down

By Veda Anderson
Daily staff writer

An expected 10 percent increase in student fees will not occur this fall if the governor's proposed budget is approved.

Gov. George Deukmejian's 1986-87 proposed state budget provides an additional \$16 million to the CSU system that will allow student fees to remain at the 1985-86 level next fall.

The state legislature must approve the budget to insure no fee increase. It could take several months, said Louis Messner, assistant vice chancellor of budget planning.

The budget is going through the legislative process, which includes several assembly and senate hearings.

The support budget proposed by the CSU Board of Trustees included a 10 percent fee

increase based on recently enacted state policy for setting and adjusting fees.

Senate Bill 195 provides a mechanism for specifically adjusting the fee level at all CSU and University of California campuses. The bill also states that student fees cannot be increased or decreased by more than 10 percent of the previous year's fee level.

Under the new law, student fees would have increased from \$333 to \$366 per year for part-time students (0-6 units) and from \$573 to \$630 per year for full-time students (6 or more units).

Boyd Horne, chief of CSU fiscal services, said the governor's effort to get around a fee increase is good in one sense but bad in the long run.

"The present state law provides for regular fee increases. The governor's budget is

not consistent with that law," Horne said, adding that the avoidance of a fee increase could lead to a sudden, major rise in fees.

"We don't like fee increases," said Damon Hale, chairman of the CSU student association. "We fought for the policy so students could know how the increase would be calculated and so that we could keep the increase moderate."

"What bothers us is that this is an election year, and the governor obviously wants brownie points," Hale added.

Hale and Dale Hanner, CSU vice chancellor for business affairs, said that the money from the fee increase could have been used to improve programs.

The governor's budget eliminates general fund support for faculty development, a program providing continuing educational

opportunities to the faculty.

This program could have been funded with the fee increase, Hale said.

Program change proposals are designed to improve funding of existing programs or provide funding for new programs.

Another important program change proposal, designed to increase representation of minority students and provide better training for educators at the kindergarten through 12th grade level, could also have been enhanced with fee increase funds, Hale said.

The CSU Trustees requested \$6 million to alleviate minority underrepresentation and improve teaching. They were only allotted \$600,000 in the governor's proposed budget.

"We just increased admission requirements," Hale said. "One way to increase access (to colleges) is to prepare high school

teachers better."

Another significant proposed program that was not allocated funds is the Administration Management System plan, Horne said.

The AIMS plan, as stated in the CSU Support Budget, involves using computers, operating systems, and office automation tools to improve academic evaluation, admissions processing, student record keeping, academic progress reporting, course scheduling and more.

Also left out of the Governor's budget is funding for predictable inflationary increase requested for utilities, communications, library volumes and other goods and services, Horne said.

Repair of heater uncertain

By Suzanne Espinosa
Daily staff writer

The damaged solar water-heating system on Hoover, Royce and Washburn halls was shut down in 1984, and while no one is complaining about insufficient hot water, plans for what will become of the system remain uncertain.

Executive Vice President Handel Evans said the \$180,000 system will either be repaired, updated or replaced. He said the outcome will depend on cost analyses.

SJSU Energy Manager Vi San Juan, who will determine which choice will be more worthwhile, said she hasn't started looking into any possibilities yet.

"I would have to speak with housing to find out what they would like to see done with it," she said.

The system, which was completed in 1977 under the direction of environmental studies Prof. Donald Aitken, was built by environmental studies students to provide an alternative to gas-heated water for the three dorms. The system was damaged and became inoperable after the panels were exposed to rain. Water for the three dorms is now being heated by fuel.

A thermostat adjustment solved the lack of hot water in Washburn Hall last semester, Residence Director Debbie Morales said. Residence directors said they have received no complaints from students regarding a lack of hot water since then.

Housing Director Willie Brown said at least one attempt to repair the system and install a system on the other three brick dorms was already made without success.

Brown said in 1984 the chancellor's office worked with the state Office of Energy Assessments, and arranged for a contractor to come and repair the damaged system and install a new one on Allen, Markham and Moulder halls. The contractor, Sun Energy Systems of Redding, was to be financed through a third party and the job would be completed at no cost to the university or state.

However, Sun Energy Systems was not able to produce a financier

Committee cools KSJS' hopes for move to S.U. space

Multiple reasons cited

By Maria J. Gunter and Carl Scarbrough
Daily staff writers

The House Committee of the Student Union Board of Directors voted Tuesday to recommend to SUBOD that radio station KSJS not be allowed to move its operations to the Student Union.

The committee said that the policy of the S.U. is to not get involved in academic programs and that KSJS doesn't have the financial resources to pay rent.

Joel Wyrick, general manager of KSJS, said he wasn't notified of the House Committee meeting Tuesday.

"It's news to me," he said, adding he was informed only of the S.U. Board meeting scheduled for Feb. 4.

"When other academic programs want additions to their facilities, they should go through their own department," said S.U. Director Ron Barrett.

Since the radio station would operate outside the building's normal hours, special arrangements would have to be made to allow KSJS personnel access to the S.U. Also, lights normally turned off at night would have to be left on for the station's personnel, Barrett said.

Campus' offer fails to attract transit trolleys

By Carl Scarbrough
Daily staff writer

The renovation of San Jose's 107-year-old trolleys and construction of a new system will not include service to SJSU but will operate to link the Southern Pacific railway with the downtown transit mall.

"We were never told that it was going to come to the university," said Kevin Rice, president of the Inter-Fraternal Council and coordinator of the fraternity volunteers working on the historic transportation system's restoration.

Rice said the volunteer work wasn't something the Greek system was doing for the university but rather for San Jose.

However, Mike Holm, administrative aide to the Santa Clara Board of Supervisors, said in November that the trolleys would reach the university.

But recent plans for the trolley line have not included the university, largely due to cost, Holm said.

San Jose Councilwoman Susan Hammer said she thought it unlikely that the trolley would reach SJSU in the near or distant future.

Dave Clark of the San Jose Transportation Planning Department said the trolley system will provide transportation

Focus on support sparks Center's name change

By Carl Scarbrough
Daily staff writer

In an attempt to alleviate past problems of political differences and to focus on offering support to the campus and the surrounding community, the SJSU Women's Center has recently changed its name to the "Women's Resource Center."

The reason for the change is that "one of the (center's) problems of the past was it got political," said Trisha Keen, a coordinator at the center.

Last spring, the center launched an unsuccessful campaign to remove Penthouse magazine from the shelves of the campus bookstore. Much of the controversy centered

around the December 1985 issue that depicted Asian women in bondage on the cover.

The magazine tends to objectify women and bring out violence, said Lisa Kirmsee, a coordinator for the center last spring.

"Our campus isn't a place for this kind of industry to continue," said Jacqui Kaufman, also a coordinator last spring.

"I'm sympathetic to their concerns, but there is only so far we can go without getting involved in censorship," Spartan Bookstore Manager Robert Duval said at the

Plus and minus system gets good grades in survey

By Craig Quintana
Daily staff writer

After a three-semester test period, the revised plus and minus grading system received generally positive marks from both students and faculty.

A sample of 10 instructors and an equal number of students was taken to gauge feelings about the grading system, which since Fall '84 has made use of plus and minus grade modifiers in calculating individual GPAs.

Plus and minus grading has been at SJSU for more than a decade, but previously the grade modifiers never affected a student's

GPA.

Partly in response to the problem of grade inflation, a Spring 1983 proposal was made to the Academic Senate by Louie Barozzi to adopt a grading system similar to proposals circulating elsewhere in the CSU system.

President Gail Fullerton signed the proposal at that time and it went into effect the following semester.

A grade with a plus adds three-tenths to a student's GPA. Minus grades dock the same amount.

Instead of getting the full two points for a C-minus, a student would receive a 1.7; a C-plus is worth 2.3. No provision is made for

an A-plus or F-minus.

This became a hardship for students struggling in their majors because grades below a C would disqualify them from their programs. Subsequently, the Academic Senate passed legislation allowing students who receive a grade lower than a C in a core class the opportunity to repeat the course.

Both before and after the system went into effect, students protested the change.

Additionally, a number of administrative hassles followed the inclusion of grade modifiers. The dissemination of grades was hampered the first semester the system

was used. Because additional computing time was needed, the new process required more time to calculate class standings.

Drucilla Redwine, associate director of records, said all of the problems have since disappeared and the plus and minus system now runs smoothly.

Of the instructors sampled, all said they approved of using the grade modifiers.

"I think I like it better because it gives you a greater range and is more accurate," said history Prof. David Eakins. "For a student who gets a B-plus, it doesn't mean any-

Closing airport not the solution

Before Christmas, a small plane crashed in a Concord mall leaving several dead and many injured. Shortly after, a small plane crashed near Eastridge Mall in San Jose leaving only the pilot with minor injuries. When two incidents such as the above happen almost at the same time, solutions are sought to end future similar occurrences. Closing of the Reid-Hillview Airport is not the solu-

Michael McCarthy

tion, but San Jose officials are studying possibilities of a closure. Those who support this idea believe that the 4,000 landings per week make for a dangerous environment for shoppers as well as residents. But this is true for all neighborhoods with an airport nearby. In the Bay Area, Hayward supports both a busy airport and a large shopping mall almost across the street from each other. And in Los Angeles, several airports, including John Wayne Airport, the busiest for general aviation flights in the nation, are in the center of residential areas and near shopping centers. Do these same people who support the closing of Reid-Hillview also support shutting down half the airports across the country? Obviously closing is not very feasible, both conventio-

nally and financially. Not only would a closure force owners to find a new home for the 800 planes that are based at Reid-Hillview, but millions of dollars would be lost or wasted. The Federal Aviation Administration said that if Reid-Hillview were to close, the \$1.3 million the federal government gave for improvements may have to be paid back. Also, the FAA has set aside another \$1.2 million for additional improvements. If closed, the county lacks the funds to build another airport, let alone finding the space. But Reid-Hillview is important because it serves as an alternate airport for San Jose International in the event of an emergency, according to Jim Pasa, a pilot instructor at Reid-Hillview. "It should not be closed down. It is a safe airport," Pasa said, a veteran of more than 200 landings at Reid-Hillview. "The airport was operating long before construction even began for Eastridge." The county began operating Reid-Hillview in 1965, while Eastridge did not open until 1971. "I believe that the incident (Eastridge crash) is being amplified because of the incident in Concord," Pasa said. "I've only heard of three similar accidents since it (Reid-Hillview) has been there." Vice-Chairman of the airport commission, A. Berkeley Driessel, told the Mercury that he disagreed with the closure. "This is not Concord. We had a plane that didn't kill or injure anyone except the pilot," he said. Both Pasa and Driessel are correct in their stand. Closing an airport does not provide instant safety because air traffic will be directed to other areas, endangering another section of the city. Reid-Hillview Airport should continue in its normal operation. Closure would create more problems than it would solve.

All cigarette ads should be banned

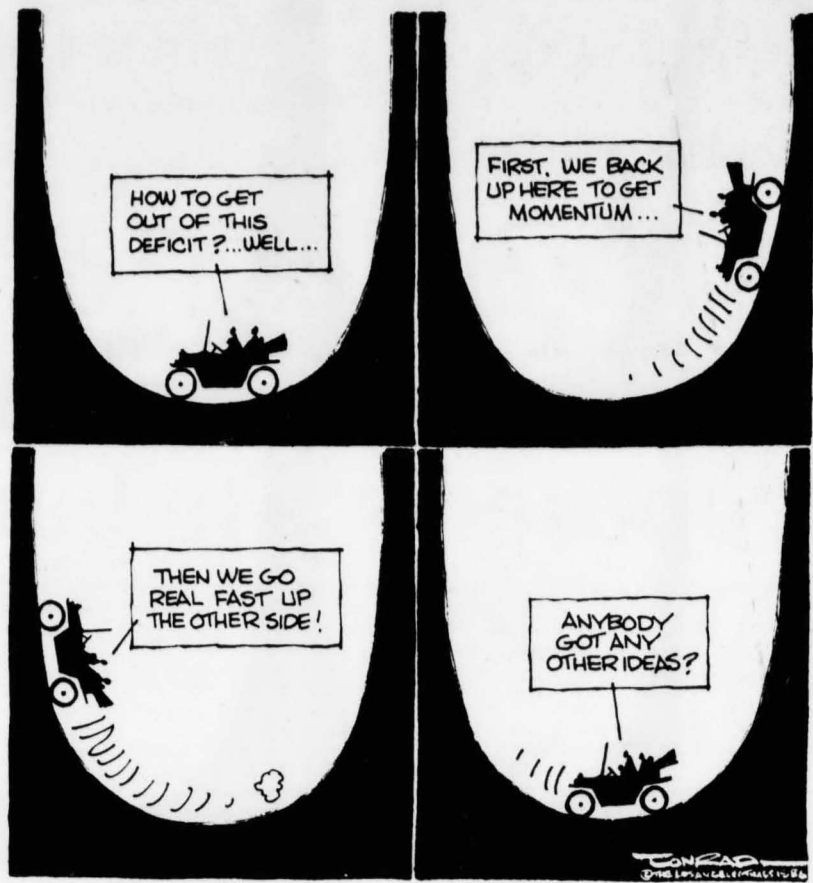

When cigarette smoking was found to cause lung cancer, heart diseases, emphysema and strokes, the government responded by requiring health warnings on cigarette packs and by banning cigarette advertising from TV and radio. In 1970 the last cigarette ads were allowed on television. Now cigarette smoking has been linked to uterine cancer, birthweight deficiencies and illness in children born to women who smoke during pregnancy. Smoking causes 340,000 premature deaths a year. Four of the five leading causes of death are related to cigarette smoking. And what's even more significant is that smoking is the most important single cause of preventable death in the

Veda Anderson

United States today. A recent report of the National Institute on Drug Abuse ranks tobacco as the most lethal and the most addictive of all drugs. Granted, tobacco is not intoxicating as marijuana is, nor does it cause immediate harm. But as is shown by the extensive research done on tobacco use, cigarette smoking is deadly. And its victims are not always the abusers of the drug — there is growing evidence that parental cigarette smoking can be harmful to children's health. Evidence also indicates that the noxious chemicals released by cigarettes into the air — carbon monoxide, hydrogen cyanide, nitrosamines (naturally occurring radioactive compounds) — are present in higher concentrations in sidestream smoke (the smoke released directly into the air by burning cigarettes) than in mainstream smoke drawn into the smoker's lungs. Sidestream smoke not only annoys non-smokers and

leaves them with a disgusting odor, it also causes watery eyes (particularly in contact lens wearers) and headaches. The effects are even worse on those who suffer from lung diseases. Despite the disheartening statistics and the bleak medical findings, cigarettes are still allowed to be glamorously advertised in newspapers, magazines and on billboards. In short, the cigarette industry is promoting and selling a deadly drug, and we're letting it happen. When Congress banned cigarette ads from TV and radio, the industry voluntarily agreed that its print advertising would "not suggest that smoking is essential to social prominence, distinction, success or sexual attraction." But the ads show that the industry has not kept its promise. If you smoke Virginia Slims, you've come a long way baby. If you've got the Salem spirit, you've got what it takes. And best of all is More cigarette's challenge: Dare to be More. The sleek, sexy woman in the ad obviously took the dare. If these ads don't suggest that smoking is essential to sexual attraction and distinction, what does? Cigarette advertisements also usually show people engaging in vigorous, refreshing activity, like playing football in the snow. This is extremely misleading considering that the drug hardly promotes good health. These ads that say smoking is the "in thing to do" make young people more inclined to start smoking. More than 95 percent of smokers began smoking before the age of 21. A doctor who was fed up with cigarette advertisements recently made news when he allegedly sprayed a cancer warning on a billboard ad reading, "Camel... it's a whole new world." The doctor added the words "of cancer." He said that he added these words because "cigarette smoking is a contagious disease, and advertising is the carrier." The good doctor said it right. Banning the promotion of cigarettes from radio and TV and not newspapers, magazines and billboards is not enough to really curtail the problem of cigarette smoking. The chemicals in cigarettes are deadly and that makes smoking a slow form of suicide. Any ads that push this dangerous drug on young people and adults should be banned.

Foreign policy disgraces U.S.

One of the Reagan administration's favorite themes is the Soviet Union's lack of regard for human rights. As the president details the abuses of the "evil empire" around the globe, our American conscience is shocked, and rightly so. Unfortunately, our handling of foreign affairs easily demonstrates that Reagan is just another in a long line of hypocritical leaders. U.S. foreign policy is so misinformed, misguided, and disgraceful that it makes a mockery of our demands for justice. While the current administration rails at the Soviet Union for sponsoring "terrorism" in Nicaragua, it effectively turns its back on the abuses in South Africa. It appears that Reagan considers American investments and strategic ties more important than a commitment to human rights in the troubled African nation. The policy of "constructive engagement" will inevitably lead to a disastrous marriage, a marriage based on money and power rather than truth and understanding. The longer our president continues this line of thinking, the more our nation's prestige will suffer in the eyes of even our strongest allies. As we listen to Reagan detail the Soviets' atrocious human rights record around the globe, his hand in the national treasury doling out dollars to the corrupt regime of Ferdinand Marcos. The Philippine president, in turn, has allegedly taken this money, intended for the betterment of his people, and invested it for personal gain and profit. While the Philippine people live in poverty that is both inhumane and unnecessary, it is revealed that Marcos "engaged in a secretive deal with a Bay Area businessman that may have cost his nation more than \$50 million."

Thomas Morlan

The Reagan administration has remained strangely quiet about this gross misuse of U.S. aid. Reports of such corruption have circulated for years, during which time Reagan has extended gracious hospitality to Marcos and his infamous wife Imelda. Again, U.S. strategic interests are being gained at the expense of human suffering. A nation that supposedly symbolizes the quest for human dignity should not allow such conditions to continue unabated. I hold these truths to be self-evident: that money is quickly becoming our "strongest" ally; that the United States is losing the respect of freedom-loving nations, and that this country is in a position to do something about it. Until Reagan seeks to change his administration's shortsighted approach to foreign policy, he should "judge not, lest he be judged."

I Must Say . . .

Scott Van Camp

The dying breed

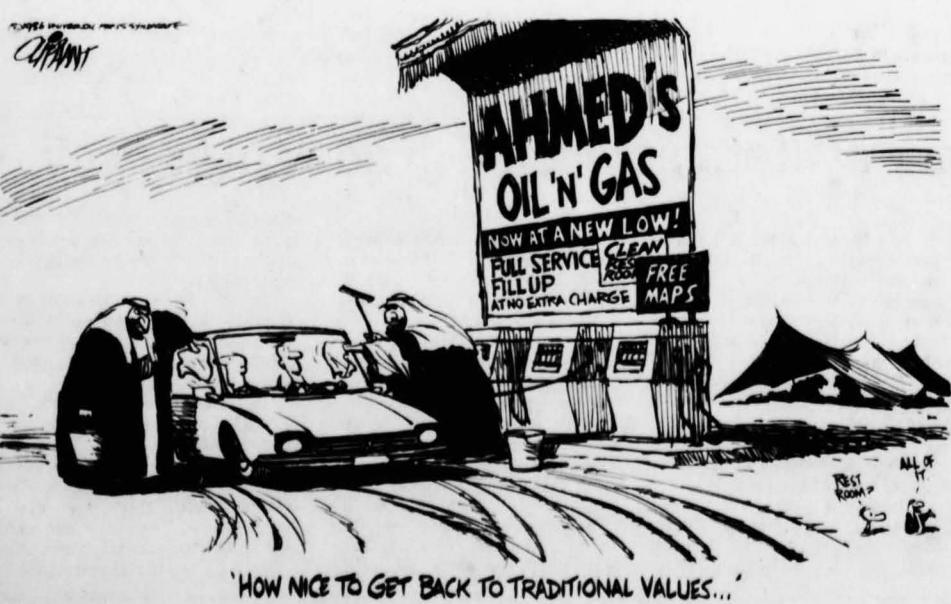

AC3 suffered four indignities before she died on Jan. 19. First was her name. Wayward whales get common names. Dying condors get a few letters and a number from their captors. Secondly, AC3 wasn't able to eat. She contracted lead poisoning in her digestive tract after eating the carcass of an animal that had been shot by a hunter. She was dying of starvation because of a bullet. Next, a few hours before her death, her captors implanted a tube running from her neck to her stomach so that food could be forced into the digestive system. Just before dying, she had just enough energy left to try to tear the tube from her neck. But AC3's feet had been tied down, and her struggling was useless. It was to be the last indignity for a once majestic bird. AC3 was one of the last wild female California condors, until captured by the U.S. Fish and Wildlife Service in early this month in a last-ditch effort to save her. Five of the birds with the nine-foot wingspans, black feathers and beady red eyes are believed to survive in their 54,000 acre habitat in the Los Padres National Forest in Southern California. Another 21 are in zoos, entered in a questionable captive breeding program initiated by concerned humans. Controversy surrounds the attempt to save the birds. Some say they will die just as easily in captivity as in the wild. But it is nice and only fair that humans put out some effort to help them. Humans play a big part of their demise. SJSU ecology Prof. Michael Kutilek, who teaches a wildlife biology and management course, said that humans are the cause for most endangered species. "By far, the human destruction of the habitat is responsible," Kutilek said. He also doesn't see much hope for the revival of AC3's remaining friends. "I have to be pessimistic. They've been disappearing for a long, long time, Kutilek said, adding, "and we've sped up the process."

Letter to the Editor

Engineer pays tribute to astronauts

Editor, As an engineer I've followed the space program with keen interest. The space shuttle is an engineering marvel as yet unparalleled in human history. It is, by far, the greatest achievement by the human mind. The problems of celestial mechanics and other factors involved in hurtling tons of machinery and its irreplaceable and precious human cargo into orbit above our beautiful and fragile home has always fascinated me and stimulated my imagination. The engineer in me has always felt this way. But on Tuesday seven of my fellow human beings of such stature and courage that I could not hope to honor them in the space of this letter, died. Their deaths are a monument to the human spirit. They died fulfilling a dream. Dreams are something most of us have cynically given up. But these humans dream for us. They prove to us that man can do anything if only we try hard enough, that somehow there is hope in this world. We engineers often forget that all our creations support humans in some way. Often lives depend on them. It takes a tragedy of this magnitude to brutally remind us of this fact. We often become so involved with the science of our field we forget we forget our humanity. As I watched the destruction of the Challenger, the engineer in me felt shock, grief and wonder at what went wrong.

Sorority recognizes black history month

By Lucy Santopietro
Daily staff writer

A scholarship is being offered to black women by Eta Phi Beta Sorority, Inc. for black history month in February. Latressa Wilson Alford, Eta Phi Beta education coordinator said.

The scholarship is the only one offered by a black women's sorority on campus this semester. Alford said.

There will be, however, two \$500 scholarships offered by the Beta Gamma Sorority next fall and in the spring of 1987.

The Eta Phi Beta scholarship gives \$500 for the best 1,000 word essay. Entrants must title it "Today's Black Collegian: Achieving Excellence in School Work And

Community To Improve Standards For Black Women."

The essays will be judged based on grammar, mechanics, opinion and clarity.

"It is a good opportunity to help black women financially," Alford said.

Alford said applicants must be full-time black female students at SJSU, have 15 units of college work completed and have at least a 3.0 GPA.

Applications for the scholarship contest are in the Financial Aid Office at the Wahlquist Library South, Room 208.

The deadline for applications is Wednesday, Feb. 19 at 4 p.m. The winners will be notified by mail around March, Alford said.

State budget may halt fee increase

continued from page 1

CSU Chancellor W. Ann Reynolds stated in a news release that the absence of funding for predictable increased inflation (\$14 million) will make it difficult to keep pace with educational needs.

Reynolds said she was pleased that the governor recommended a 6.8 percent increase in faculty salaries and a 5 percent increase in non-faculty salaries.

However, Reynolds said that the lack of funding for non-faculty merit salary adjustments, totaling in excess of \$7 million, would "hamper our ability to maintain the level of services currently being provided."

The most encouraging aspect of the governor's budget, Reynolds said, is the support given to the CSU Capital Outlay Program.

The CSU trustees requested \$116,964,000 for capital outlay. The

governor's budget includes \$109,918,000 — only a slight modification and the single largest capital outlay sum ever budgeted for CSU.

The money will be used to fund major and minor construction projects throughout the CSU system.

SJSU will receive funds which will go towards renovating the old science building, remodeling the old library (Wahlquist) and renovating and expanding the engineering building.

The governor's proposed budget also accommodates an expected enrollment increase of 5,000 students. The CSU sees this as a very important provision, Horne said.

The use of lottery money, however, presents a problem for CSU trustees.

The board requested general fund support for expenditures total-

ing over \$11 million financed by lottery revenues in 1985-86. This proposal was based on the rationale that the expenditures were in the past funded by the state, Messner said. But as stated in the CSU Support Budget, the California State Lottery Act requires that the expenditures be "supplemental" (something that would not normally be funded by the state).

The expenditures included instructional replacement equipment, master teacher stipends and scholarships, instructional related computing and experimental clinical supervision.

"They are critical items, and they are going to have to be financed," Horne said. "We don't think that it is appropriate (that they) be financed by lottery funds."

There was also a related complaint from Hale that lottery funds

seem to be replacing funding for programs that are not supplemental.

"Now that you have lottery funds," Hale said, "you see some of these programs (that are usually funded) not being funded."

But Robert Harris, state program budget manager of the department of finance education unit, said that lottery money is used for proposals asked for that are over and above the general amount.

"We didn't save any state money," Harris said.

The governor's budget projects \$18 million in total lottery revenue for the CSU system in 1986-87. Of this total amount, it is possible that \$11 million will be allocated for the same purposes in 1986-87 that it was in 1985-86.

A balance of \$7 million in lottery money will be left unallocated, and a long range committee will decide how to distribute the funds.

KSJS move to S.U. nixed by committee

continued from page 1

The cost of utilities, heating and telephones is a lot for the S.U. to absorb, Barrett said. He also said the station is not in a position to pay rent.

"They are busy work spaces and not necessarily clean," he said.

In moving to the S.U., the station would have to remodel to meet specific needs. The cost of creating the necessary facilities, including a broadcast room, offices and a reception room, is estimated at \$22,500 to \$40,000, said House Committee Chairwoman Pat Grilione.

"If the S.U. is no good, we'll see about getting into the Rec Center," said Joel Wyrick, general manager of KSJS, before Tuesday's meeting. "They've drawn up most of the plans but they're not set in stone."

However, the committee also concluded that the Recreation and Events Center should not be an option.

The Rec Center, approved by a one percent margin in a student election held November 1984, is a recreation facility scheduled to open in 1988.

Barrett said before the meeting, "The likelihood it will be located in the Rec Center is extremely remote (because the plans are set)," Barrett said before the meeting.

Nevertheless, Wyrick said Wednesday, the radio station will fight "tooth and nail" to secure space in the Rec Center.

Lack of space and visibility are the reasons KSJS is looking for a new location, Wyrick said.

"We are a campus radio station, not just a theater arts radio station,

and we've been trying to get that through people's heads for a long time," he said. "KSJS is for all students of all majors," he said.

KSJS first began seeking space in the S.U. in March 1984. At that time, the House Committee said KSJS had top priority as soon as space became available.

Later that month, Wyrick received a letter from Barrett stating the radio station was first in line for space allocation, without listing any specific date.

However, in September 1985, Barrett said that a move to the S.U. was unlikely, and added that the S.U. does not provide for academic programs.

Plans for repairing solar heater in dorms uncertain

continued from page 1

and the project was canceled, Brown said. He said he believes the present system will eventually be removed.

Yet, Aitken said the state did have a signed contract with another contractor, Heliodyne Inc., of Richmond, that was able to produce a third party financier.

"We had a contract with the state to start it last spring," said Jurg Bieri, president of Heliodyne. "We had the financing lined up and then the state people called up and said, 'Well, it's off. The university doesn't want it.'"

"We have not been able to find out who is trying to block this project, which was a good project for the school. In the bidding process, they (Office of Energy Assessments) had a clause that said, 'If the first bidder should not come through, we will go

to the next one in line,'" he said.

Bieri said he considered suing the state for breach of contract, but because his company is small, he decided it would be too expensive.

"We spent a tremendous amount of time on it. We had done all the engineering," Bieri said. "We had contractors who work with us down there spending their time. We look like complete fools."

John Baca, energy resources specialist at the Office of Energy Assessments, was reviewing the va-

rious bids for the SJSU project. He confirmed that Sun Energy Systems had originally been awarded the job, but could not come up with financing.

"Heliodyne was going to be the next in line after Sun Energy Systems," Baca said. "They were awarded the project but they never did have a contract with us. They were given 30 days to get financing. They never showed financing."

He said Heliodyne insisted they had a contract, but when they failed to produce an approved third party fi-

nancier within 30 days, the project was terminated.

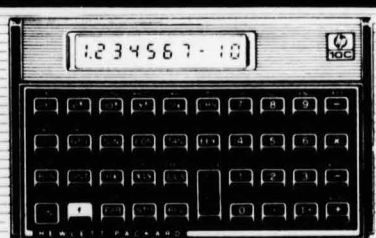

"We had rules laid out and they didn't follow them. It was a big mess, and the project just died," Baca said.

Baca said the Office of Energy Assessments has successfully coordinated and awarded contracts to various contractors for the completion of solar water-heating systems at California state universities in San Bernardino, Pomona, Northridge, San Luis Obispo and Sacramento.

S.J. City Council has no plans to bring trolley line to campus

continued from page 1

tation from the Cahill Street train station to San Carlos Street — six blocks west of the university.

The concept, said Clark, is to have the trolley link the Guadalupe light rail project and the transit mall project to the Southern Pacific train station at Cahill Street.

In an effort to attract the trolleys, SJSU President Gail Fullerton offered to donate a right of way for the system on campus, said Holm, administrative aide for the county. This idea was proposed last fall with the IFC's volunteer drive, but "died along the way," he said.

The aim of the transit mall is to renovate the downtown area and to make it visually attractive, said Candy Hale, spokeswoman for the city of San Jose. The project calls for the planting of 550 sycamore trees as well as "bubbling fountains," she said.

Hale said the completed mall

would attract customers for the existing businesses. The mall is not intended to replace old businesses with new, she said.

The purpose of the light rail is to "get people out of their cars and off the streets and freeways," Councilwoman Hammer said. The light rail will run from the Almaden area of San Jose to the "Golden Triangle" area in Santa Clara.

The Golden Triangle is the area where the cities of San Jose, Santa Clara and Sunnyvale meet and is heavily laden with high-tech firms.

Hammer said there will be stations along the entire route, offering riders numerous opportunities to get off the light rail in San Jose.

In addition to light rail and trolleys, the mall will offer two lanes for traffic — one for buses and one for cars, Hale said.

The trolleys will add a touch of nostalgia to the area, Hale said.

The trolleys debuted in 1879 as horse-drawn rail cars, and electricity eventually replaced the horses, Holm said. The last trolley ran in San Jose in 1938, but in its prime, the cars served much of the valley on 126 miles of track, he said.

Car number 124, the "flagship" of the line, operated for about 20 years, Holm said.

With imported mahogany paneling and seats of woven Chinese rattan, number 124 is considered the "Cadillac of trolleys," Holm said.

In November, Holm estimated that the project would cost about \$2 million upon completion.

Since November, Greek system volunteers have been painting, inventorying parts, pulling out wood, sweeping, sanding and landscaping around the historic trolley barn located in Kelley Park.

The completion of the trolley renovation and the transit mall are scheduled for the end of 1987.

Grading system popular

continued from page 1

thing unless it applies to GPA." Prof. Reid Scott said he likes the system because "it allows you to be more accurate than just using five grades."

"It seems to me a B-minus is a lot less of a grade than a B-plus."

However, Scott said that if the university was going to take off for an A-minus, students should also be able to get credit for an A-plus.

"In the long haul of things I don't think it means much," said Dale Wise, associate professor of psychology.

"They hate getting pluses; they don't mind getting minuses," Wise said. "If you gave them a B-plus, they'll want an A-minus. But if they get a B-minus, they'll be

happy."

While the instructors overwhelmingly favored plus and minus grading, the student responses varied between the positive, the disconcerted and those expressing outright hatred.

"I figure if you're a good student you won't need the extra three-tenths. But if you're a bad student it won't help," said Donna Lee Kirsch, a junior majoring in graphic design.

James McCoy, a sophomore in aerodynamics, was one of two students surveyed who objected to plus or minus grading.

"It changes the standard that you have to work for," he said. "Sometimes, it's tougher to get that same grade because teachers expect more."

Center's name changed to alter image

continued from page 1

time of the Penthouse campaign.

Although the effort did not succeed, Keen said she did not personally consider the campaign a defeat for the center. Most people do not associate the issue with the center, she said.

"We are trying to offer support separated from politics," Keen said.

Womyn's Week, March 3-8, is one of the center's main activities. They

would like to top the bill of fare with Alice Walker, author of "The Color Purple," said Marge Kintscher, a coordinator at the center. Funding has been approved, but Walker has yet to accept the invitation.

Former Presidential Candidate Sonya Johnson, author of "From Housewife to Heretic," is slated to speak, as is Louisa Teish, author of "Jambalaya."

On Saturday, March 8, the con-

clusion will feature a concert with Judy-Gorman-Jacobs.

Other events slated are a dance demonstration, drum group Maiko, an anti-pornography slide show, a question and answer session on women's rights, and "Men Against Rape," a group from Santa Cruz, Kintscher said. Also, a crafts fair on the main floor of the Student Union, with 15 different artists, will be open all week.

Accredited programs increase as state universities 'mature'

FRESNO (AP) — A quarter century after a master plan for higher education was implemented, California's state universities "stand tall academically," the chairman of their board said.

The 19-campus system has 187 nationally accredited programs compared to 16 a century ago, Roy T. Brophy said. The number of faculty members holding doctorates has increased from 56 percent to 73 percent, he added.

"The campuses have matured," Brophy said.

Brophy noted that trustees have adopted tougher entrance standards, effective in the fall of 1988.

Freshmen will need to have completed four years of English in high school, three years of math, two years of a foreign language and one year each of U.S. history and government, lab science, art plus three electives.

Correction

The dates for students to pick up their fall semester grades were incorrectly reported in the Jan. 23 issue of the Spartan Daily.

Grades may be picked up now through Feb. 7 in the Late Registration Center in the Student Union Umunhum Room. The center is not open on weekends so grades will not be available to pick up on Feb. 1 and 2.

All grades remaining after Feb. 7 will be mailed to students.

WANT \$\$\$?

Before you pay too much for books this semester, check out the SJSU Book Exchange Board. You can choose from an entire wall of literature, cutting out the textbook middleman and saving yourself valuable money.

It's so simple, even you can do it. Book Board shall appear Jan. 27-29 in front of the A.S. Office, 2nd level of the Student Union. And also Jan. 30 & 31 and Feb. 3-7 on the first level of the Student Union by the North Entrance.

Rise to the top.

You're a nuclear-trained officer. It goes beyond special. It's elite! And your status reflects a job that demands your best. Proving your skills at the heart of today's nuclear-powered Navy.

Over half of America's nuclear reactors are in the Navy. That adds up to more years of experience with reactors than any company

in the world, and it means working with the most sophisticated training and equipment anywhere.

There's no boot camp. College graduates get Officer Candidate School leadership training, and a year of graduate-level training in the Navy Nuclear Power School.

The rewards are topnotch, too. Generous bonuses upon

commissioning and also upon completion of nuclear training. Sign up while still in college and you could be earning \$1,000 a month right now.

Be one of the most accomplished professionals in a challenging field. Lead the adventure as an officer in the Nuclear Navy. Contact your Navy Officer Recruiter or call 1-800-327-NAVY.

NAVY OFFICER.

LEAD THE ADVENTURE.

London trip offers theater, history

By Jamie Rackley
Daily staff writer

London bridge may have fallen down, but this theater capital of the world remains and students have a chance to earn credit this spring break by taking a trip to London.

The eight-day trip, offered through SJSU's Travel Study in the Continuing Education Department, includes four evening theater performances, air fare and transfers, hotel accommodations in the Hyde Park area with continental breakfasts, and tuition and instructional charges, all for approximately \$1,044.

It is a special draw for theater buffs because London has the reputa-

roles for such companies as Provincetown Players, Barn Theatre, and the Imperial Players.

On a previous trip to London, Reeds said she fell in love with the city and that this time around, "I fully intend to run everybody's tail off — anybody who wants to come with me."

"We'll see the changing of the guard, local pubs, all these things you've read about and heard about," Reeds said. "It's such an astonishing feeling to know you're right there where others (throughout history) have walked before."

As a special treat, she is arranging for one of her friends, John Napier, an award winning costume and set designer, to come and talk to the group about the theater and his career.

There will be plenty of time for the students to visit the landmarks during the free daytime hours, and Reeds cautions the students to bring a comfortable pair of shoes for all the walking they'll be doing.

Of the trip itself, Reeds says, "It's one of the most educational things one could do. The history of England is part of our heritage."

The application and fee deadline for the trip is Jan. 31, but it may be extended on a space available basis. Reeds said that about 16 people have signed up for the trip so far.

Interested persons should contact SJSU University Travel Studies on the second floor of Dwight Bentel Hall at 277-3781, or tour leader Dusty Reeds in Hugh Gillis Hall, Room 110, or call her at 277-2767 (office) or 247-5644 (home).

'It's one of the most educational things one could do. The history of England is part of our heritage.'

—Dusty Reeds,

SJSU theatre arts professor

Early tax filing will bring early refund

WASHINGTON (AP) — A foreteller in Washington claims to have the formula for getting your tax return through the Internal Revenue Service without an audit or any other hitch. Just be sure you file it when the moon is in proper alignment with the stars, she says.

There are four periods in 1986 when that will happen, says Lynn Koiner. The final "wax moon" is from 6 p.m. to 11:43 p.m. on April 14.

If you don't believe in astrology and you're due a refund, you might want to file your return as quickly as possible. Although the IRS is going all-out to avoid a repetition of last year's delays in processing returns, the sooner you file, the sooner you are likely to get your refund.

An early filing could produce a refund in as little as four weeks; waiting until the April 15 deadline may mean a wait of up to 10 weeks.

Some other tips that might expedite your refund and help you avoid a costly or troublesome mistake:

—There's just no way to pay the tax you owe now? Don't let that keep you from filing a return and working out an arrangement with the IRS to pay later. There's one penalty for failure to file and a separate penalty for not paying on time.

—If you don't have the records in hand to complete your return by the April 15 deadline, file a Form 4868 by that time and get an automatic four-month extension. You'll still have to estimate what you owe and pay it by April 15.

—Generally, a person you claim as a dependent must have had a gross income of \$1,040 or less last year. But the limitation does not apply if the dependent is your child who was under 19 at the end of the year, or was a full-time student (including on-the-farm training courses) during five months of the year.

—Such a dependent child also must file his or her own return if income totaled \$3,430 or more, or if self-employment income was at least

\$400, or if unearned income, such as interest, was \$1,040 or more. Even if you don't have to file, do so to get a refund if any tax was withheld.

—Income averaging is less beneficial since passage of a 1984 law but it still can save money for a person, such as a farmer, whose income can fluctuate sharply from year to year, or an author, who gets a large burst of income in one year. IRS Publication 506 explains it.

—Be prepared to substantiate any deduction you claim.

—Deduct 12 cents a mile for use of your car, plus tolls and parking, in connection with volunteer work for a charitable organization. If you keep records, deduct oil and gas costs plus tolls and parking. Don't deduct the value of your services to charity.

—Those little numbers under "1985" in the upper right corner of many forms — such as 07 on Schedule A — have a purpose. Attach documents to your return in numerical order. Papers without those numbers

should go last.
—You may defer reporting interest on Series E or EE Savings Bonds until the year they mature or you cash them, whichever is earlier.

—An employee who claims a deduction for driving a personal car for business will have to answer a new series of questions on Form 2106.

—A worker who uses a company car for personal purposes should find the value of that personal use included on the W-2 earnings statement. It's taxable. If W-2 Box 10 includes the car's total value, the worker may deduct any business use on Form 2106. See Publication 463.

Budding pop vocalist to sing at Spartan Pub

By Roger Gilbert
Daily staff writer

Pop vocalist Robert Seidler is not a household name yet, but he's being touted by Bay Area pop music critics to be one of the "next" crooners and charismatic pop band leaders.

Seidler plays the Spartan Pub at 10 tonight, and his low-key music promises to be worth a listen.

"This will be a major event for the Pub," said Paul Goeltz, the Pub's program director.

Those who have heard Seidler's KQAK hit, "Christian Boy," with its bewitching hook, "no more scooter rides through the cemetery," may sense an intangible vitality in the sound of this ambitious Bay Area pop unknown.

Reviews of the Robert Seidler Band, and their independently labeled EP, "Dotted Line," liken Seidler to enigmatics David Bowie and Bryan Ferry.

Powered by subtle, hard-edged guitars and melodic keyboards, the Robert Seidler Band creates a controlled sound that enables Seidler's lyrics and strong vocals to stand out and achieve vivid imagery.

"The band plays kind of musical short stories really," said Tim Seidler, the band's manager. "Robert writes about personal experiences," he said.

Seidler's band has received glowing praise from music critics and radio station program directors in the Bay Area. "Christian Boy," the band's 1984 single, has

had heavy rotation on the play lists of KQAK and KMBY, according to program directors from the two stations.

The Oakland-based band has changed its personnel since the EP "Dotted Line." Performing tonight, the band's new members consist of one-time SJSU student Michael Fisher on keyboards, guitarist Johnny Nieman, and ex-Eddie Money drummer Jeff Campitelli. The band's original bassist Jim Clausen is the only holdover from the original band, Tim Seidler said.

"We're really excited about playing the Pub," Tim Seidler said. "Both Robert and I grew up in San Jose, and Michael was a freshman at State last spring," he added.

The Oakland-based band will be trying out new material tonight in preparation for their next album, Seidler said.

"We're looking for a major label right now," Seidler said.

"Robert's not intending to go into the studio until he's tried his songs out and seen people's reactions," Seidler said. "That process can take months as he changes his songs and gets new ideas."

Goeltz expects it to be a good show. "I've heard the new band, and I think they're even better now," said Goeltz.

Opening for the Robert Seidler Band will be Erotic Sneeze. They will play from 9 to 10 p.m., Goeltz said. Admission is free.

Reality hits sports

SPORTS IS supposed to be fun, a diversion from the news about disasters and depressions and a relief from day-to-day pressures.

Unfortunately, it seems that the line between the fun of sports and the harshness of the "real world" is fast disappearing.

Several years ago, USF basketball star Quintin Dailey was accused of sexually assaulting a young woman. Dailey and the university's entire basketball program were sent reeling.

Sports are no longer fun fluff. Last Friday, three University of Minnesota basketball players were arrested and charged with sexually assaulting an 18-year-old woman at a Madison, Wis. hotel.

The arrests of the players (Kevin Smith, Mitchell Lee and George Williams Jr.) came while the team was waiting Friday morning to board a flight back home following a 67-65 victory Thursday night over Wisconsin.

The three have been charged with second-degree sexual assault, which carries a maximum penalty of a \$10,000 fine or 10 years in prison or both.

THE CRUEL world once again has intruded into the sports sanctuary.

And, of course, college athletics isn't the only area of sports being dragged down by news like this.

The New England Patriots are Exhibit A to show that pro sports, long thought to be made up solely of red-blooded American heroes like Lou Gehrig and Willie McCovey, is also full of stories about real-world tragedy.

Hours after being blown out by the Chicago Bears in Super Bowl XX, word leaked out that as many as 12 of the Patriots have serious drug problems.

Great role models for the millions of young people who watched the Super Bowl and wanted to be like the "heroes" they saw on the TV screen.

But perhaps the fault lies not with the perpetrators of these acts, but with those of us who have developed an image of sports and athletes that is impossible to live up to.

Athletes are no better or no worse than anyone else.

That doesn't make it any easier to accept, but it ought to help prepare us for these type of stories. The "real world" is unavoidable.

Spartans shoot for 10th-ranked UNLV

By Dale Moul
Daily staff writer

The SJSU men's basketball team hopes to keep a current streak alive and end two others when Jerry Tarkanian and his 10th-ranked Runnin' Rebels visit the San Jose Civic Auditorium tonight at 7:30.

The Spartans, 12-6 (5-4 in PCAA play), are coming off a four-game road trip against conference teams that saw SJSU ride home with three consecutive wins.

"We feel good about the three road wins, but those are behind us and we are looking ahead to UNLV and UCI (UC-Irvine)," said Spartan head coach Bill Berry.

Meanwhile, two trends the Spartans would gladly like to see stopped are a UNLV 10-game winning streak this year and its perfect 9-0 lifetime series record against SJSU, including a 106-80 drubbing of the Spartans in their first meeting earlier this month in Las Vegas.

However, Tarkanian believes that SJSU is a better team than he saw the first time the two squads battled.

"I think they (the Spartans) were real tired when they came to play us earlier in the year," Tarkanian said. SJSU played

'I think they (the Spartans) were real tired when they came to play us earlier this year'

— Jerry Tarkanian
UNLV head coach

three road games that included the Hoosier Classic in Indiana a week before stopping at UNLV, now 19-2 overall and 9-0 in the PCAA.

"We were a little tired, but we now have three days to prepare at home rather than one day on the road," Berry said.

Tarkanian credits good shooting — 57.1 percent from the floor — as the key to the Rebels' victory over the Spartans the last time. Three UNLV starters (senior forward Anthony Jones, junior forward Armon Gilliam and junior guard Freddie

Banks) combined for 74 points en route to the victory.

"San Jose is a good, solid team that makes you aware of everybody on the court," Tarkanian said. "Coach Berry has done an excellent job there. I just hope we play a good game."

Spartan sophomore forward Ricky Berry, averaging 18.2 points per game, poured in a season high of 32 to pace SJSU's attack against the Runnin' Rebels.

"Last game, we had to play catch-up most of the way," coach Berry said. "This

time, we need to dictate the flow of the game and stay ahead or even most of the way."

"They (UNLV) play a hard, fast tempo type of game," he said. "It should be exciting for both the players and fans."

NOTES: SJSU's three consecutive wins on the road marked the first time since the 1983 season that a Spartan team has won three straight on foreign courts. The three straight conference road wins were the team's first since 1981. The last seven opponents have shot less than 50 percent from the field against the Spartans. The last club to make at least half of their attempts against SJSU was UNLV with its 57.1 figure — the best by a Spartan opponent this year. SJSU enters the week shooting 51.6 percent (16 of 31) from three-point range. Berry tops the club with 10 three-point conversions in 15 tries. Also, Berry's next two successful free throws will move him into tenth place on the Spartans' season list for free throwmade. Seven free throws would put Berry's total of 101 ninth on the SJSU single season list. The Spartans' 12-6 record marks the first time this year the team has been six games above .500.

Ex-pro to coach football defense

By Dale Moul
Daily staff writer

The SJSU football program is expected to name an ex-United States Football League coach to fill the defensive coordinator position.

According to the San Jose Mercury News, former Los Angeles Express offensive line coach Sam Gruneisen, 45, would take over the position vacated by John Godden, who was fired in early December.

Spartan head coach Claude Gilbert declined comment.

Gruneisen, a center for the San Diego Chargers (1962-72) and Houston Oilers (1973), spent two seasons with the now-defunct Express of the USFL and held the same job at UC-Berkeley under head coach Joe Kapp from

1982-83.

Gruneisen, a native of Louisville, Ky., has mainly geared all of his coaching experience to offense, but has received strong support for the defensive duty from former San Diego coach Sid Gillman.

Services set for Hyman

LOS ANGELES (AP) — Funeral services for volleyball standout Flo Hyman, 31, who collapsed suddenly during a match in Japan Friday and died later of heart failure, will be held tomorrow morning at Trinity Church in downtown Los Angeles.

Hyman helped the U.S. women's team win a silver medal in the 1984 Olympic Games.

Yesterday

CAMPUS

While the fate of the asbestos abatement program remains uncertain at the California State Chancellor's Office, an outside consultant is warning SJSU that several areas need immediate attention because of the amount of hazardous materials present. SJSU administrators, however, maintain that no one is at risk while attending classes or being on

campus under the current conditions.

The SJSU Gerontology center received a three-year \$370,000 grant from the National Institute on Aging, to fund a project on Alzheimer's disease. The project will include a study of the stresses involved in caring for an Alzheimer patient.

A \$20,000 grant and a gift of software will enable the SJSU Ac-

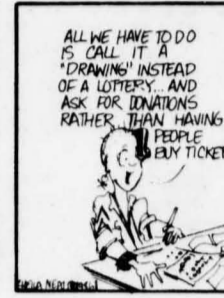

counting and Finance Department to update the business school to meet the computer literacy standards of professional accounting firms.

Michael Oreschak, a 22-year-old SJSU criminal justice graduate, was hired as an officer by the University Police Department. UPD is still planning to hire a police chief, a sergeant and a lieutenant.

The Real World

Voyager finds new Uranus ring

PASADENA (AP) — Voyager 2 has found another ring circling Uranus, a faint 1,900-mile-wide lane of material orbiting within the other rings and only 7,000 miles above the planet's cloud tops, scientists said yesterday.

"It's a diffuse sheet of material," said Jeff Cuzzi, National Aeronautics and Space Administration scientist. "I'd call it a ring."

The ring, photographed by Voyager 2 less than an hour before its closest approach to Uranus last Friday, is so faint it was never seen before. It is more like the broad rings orbiting Saturn than Uranus' previously known nine thin rings and a 10th discovered by Voyager 2.

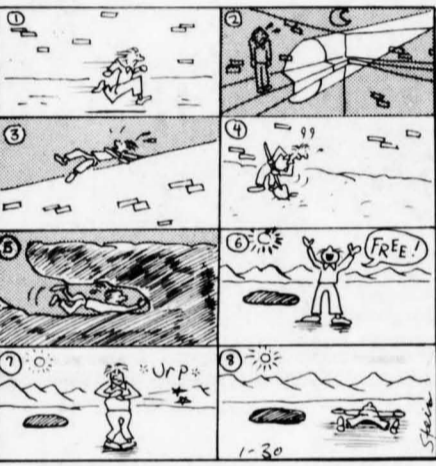

But because Voyager's photos have shown so many bands of dusty material between the 10 previously known rings, scientists are no longer sure what they should call a ring or how many exist around Uranus.

The material making up the new ring has not been identified, Cuzzi said. Scientists had said earlier the other 10 rings that were identified individually apparently contain chunks larger than three feet across, although only the material in one of the rings actually was studied.

They also have said the band of dust between the rings is produced by the collision of chunks in the surrounding rings.

Drying out

Julie L. Lugar — Daily staff photographer

Tu Nguyen, a senior in computer science and math, finds a dry spot to read the newspaper. If he's reading the weather report, rain is predicted through tomorrow.

Shuttle astronaut worked in Bay Area

By Thomas Gary Morlan
Daily staff writer

Steve Pehanick, a Lockheed public relations spokesman, said that doomed Challenger astronaut Judith Rasnik worked previously in the Bay Area. He also said that Lockheed's Florida division was in charge of the shuttle's pre-flight preparation.

Rasnik made several trips to Lockheed's Palo Alto division in preparation for a previous shuttle mission, said Pehanick of the Sunnyvale division. She was involved in studying the feasibility of large structures in space. Rasnik was also a mission specialist for a Discovery flight in fall 1984 and worked in Lockheed's Palo Alto Research Laboratory, he said.

Although Pehanick declined to speculate on what may have caused the Challenger to explode Tuesday shortly after liftoff, he said that Lockheed's Florida division was responsible for "the processing of the shuttle — from its landing to take off."

The processing of the shuttle involves the installation of rocket boosters, liquid fuel tanks and payloads, as well as the overall preparation of the shuttle for flight, Pehanick said. Early speculation has focused on the possibility of a malfunction of the craft's fuel system.

Asked if the Sunnyvale division was taking any special action in light of Tuesday's tragedy, Pehanick replied, "At this time, no. But we would help out any way we can if requested."

Pehanick said the shuttle disaster shouldn't have any lasting negative impact on America's space program, which has expanded during the Reagan Administration.

"We just have to find out what happened, fix it and go on," he said, echoing President Reagan's tone, who said after the disaster, "Nothing stops here."

Air crash claims 21 lives

LOS MOCHIS, Mexico (AP) — An AeroCalifornia DC-3 airliner carrying 21 people crashed Wednesday on a hill near the fog-covered airport of this Pacific port, and an airline spokeswoman said all aboard were killed.

"There were no survivors," said Mara Castellon, spokeswoman for

the airline's main office in La Paz on the Baja California peninsula. She said the twin-engine propeller plane was flying from Ciudad Constitucion on Baja California to Los Mochis, carrying 18 passengers and three crew members.

All aboard were Mexican citizens.

In 7 days the Lord created heaven and earth.

Give us 7 days, and we'll get you your Guaranteed Student Loan.

Within seven days after Educaid receives your **correctly completed** application, your GSL check will be on its way to you. See your FAO and ask for Educaid. Or call us and we'll send you an application.

BONUS!
GSL's from Educaid are not only a lot faster, but a little bigger. Educaid's insurance

premium is less (0.75%) than that charged by most other California lenders (1%). You get more money for your education.

PLEASE NOTE:

1. Educaid processing time is 7 days. School processing time may take longer.
2. Be patient with your financial aid officers. They are overworked.
3. Students with prior loans are advised not to cross-borrow.
4. Federal regulations prohibit lenders from releasing GSL checks earlier than 30 days prior to the start of the loan period.
