Ground rules set for election campaigns **By Carl Scarbrough**

Daily staff writer

The race for Associated Students elections began Thursday as candidates for office registered at an orientation meeting held by the A.S. Election Board.

At the meeting, candidates were in-formed of qualifications for office and regulations for campaigning, which begins today. Three parties will be on the ballot for the

March 12 and 13 elections. The parties are; the Progressive Student Party, PSP; Respon sible Alliance, REAL; and Students Providing Action, Responsibility and Commitment, SPARC

No plan yet on lottery allotments

By Veda Anderson

Daily staff writer The CSU is still debating about who will determine how its share of the lottery funds will be spent in 1986-87

The CSU Long Range Financial Planning Committee, an advisory committee to the CSU Board of Trustees, is working to develop a process to distribute the funds

If adopted by the board of trustees and approved by the chancellor, the proposed process will be used for several years, said Boyd Horne, Cali-fornia State University chief of fiscal

Horne said the committee is con-sidering three options for distributing the funds: let the CSU Board of Trust-ees decide what the money will be used for and how much will go to each of the 19 schools, based on proposals submitted by each campus; allocate the funds directly to the campuses. and let a campus committee decide what the money will be used for; or distribute the money using a combination of both plans

"I think the general consensus is that it should be a combination of both," Horne said. "It's just a ques-tion of the combination."

However, John Burick, vice chairman of the California State Student Association and a student representative on the long range lottery committee, said that there is no general consensus.

The students and the campus presidents seem to want the funds to go directly to the campuses, while the board of trustees and the chancellor's office would like the funds to be distributed at the state level by the

trustees, Burick said. "... they (the board of trustees and the chancellor) would like to use the lottery money to stimulate programs that the state didn't give them money for," Burick said.

However, Horne said that he did not see the board of trustees and the

All three parties participating in the elec-tions are qualified as "full slate" parties — each party has candidates for the three executive offices and candidates for at least 10 of the 12 director positions. As "full slate" parties, they are allowed

to spend up to, but not exceed, \$1,000 for campaigning Locations of the three polls were announced Thursday by the election board. One poll will be outside the Student Union, another outside Clark Library and the third on the corner of Seventh and East San Carlos

streets Suzanne Schreiber, SPARC candidate for additional poll be established outside of the Dining Commons. The board declined, stating that adding a fourth poll outside of the Dining Commons would be a political deci-sion. Several members of the SPARC party are dormitory residents.

Schreiber, who is also a resident adviser in Allen Hall said the location would be good because of the large amount of traffic from the dormitories to the Dining Commons at mealtime.

Larry Dougherty, presidential candidate for the PSP party, opposed establishing a fourth poll. Only the original polls defined by

the election board should be established, said Dougherty, a five-year veteran of SJSU student government and current A.S. executive assistant

As stated in the qualification criteria candidates for student offices must have earned 14 semester units in the preceding year and have maintained a GPA of at least

Candidates must also be enrolled in a ninimum of seven units with a 2.0 GPA while the elections are in progress. Candidates and incumbents are disqual

2.0

ified if they are on either academic or disci-plinary probation, the qualifications state.

The candidate main in clear academic standing throughout their entire term of office. Students are prohibited to hold more than one A.S. office, with the exception of committee memberships. All officers must remain enrolled in a minimum of six semester units.

Independent candidates, those who are running without party affiliation, may spend up to, but not exceed, \$75. The A.S. government is divided into three

A.S. fee hike up for vote by students Board of directors decide to put initiative on ballot

By Carl Scarbrough Daily staff writer

The fate of a \$3 increase in student fees hangs in the balance, waiting for student approval. The Associated Students Board of Directors voted to

The Associated Students Board of Directors voted to place an initiative on the March A.S. election ballot to raise the current \$10 per semester A.S. fee by \$2. With the current enrollment of approximately 25,000, this will bring an extra \$100,000 to the A.S. budget next year. The board also voted during Wednesday's meeting to place an initiative for a \$1 increase of the \$5 per semester Instructionally Boltad Activities for BA fees are dis-

Instructionally Related Activities fee. IRA fees are dis-tributed to 11 laboratory classroom programs, such as the Spartan Daily and radio station KSJS. This year, \$287,818 was distributed to IRA groups.

The A.S. fee increase was originally proposed to the board as a \$4 increase, but was reduced after discussion.

We have not had a fee increase since 1955," said A.S. Director of Personnel Tom Boothe, in support of a \$4 increase. "If we are going to ask for a fee increase, then it would be appropriate to approve an increase that is not going to send us back to the students . . . for another 20

Paul Sonneman, A.S. executive assistant, suggested the increase should be applied to two priorities. He said the first priority should be to put \$17,000 into the A.S. operating reserve.

"It is essential that we bring the operating reserve back up to a fiscally prudent level," he said. Funds were removed from the operating reserve this

fall to give A.S. employees a cost of living increase, Sonneman said.

Another priority includes replacing the \$35,000 contribution the A.S. received last spring from Spartan Shops The money was part of surplus income that the shops continued on page 6

Limited financial aid cuts expected for 1986-87

By Linda Smith

Daily staff writer The Gramm-Rudman-Hollings bill will not affect SJSU financial aid recipi-ents as unfavorably as many think, said the director of financial aid. Don Ryan, director of Financial Aid

Student Services, said that the bill will cut non-exempt domestic spending, which includes financial aid, 4.3 percent

But because of the state allotment formula and a clause in the Higher Education Act that controls the allocation of funds. the amount of money allocated to SJSU for campus-controlled financial aid will not change for the 1986-87 school year.

Also, because the federal government's fiscal year is from October to October, and the university's fiscal year is from July to July, Congress forward-funds monies to the financial aid system, Ryan said.

This means that for the 1986-87 school year, funds have already been allocated from the government's 1985 fiscal year budget, he said. Therefore, the budget for financial aid in 1986-87 cannot be affected

Don Ryan Financial Aid Student Services director

by Gramm-Rudman-Hollings or by the president's proposed fiscal year 1987 bud-

get. The only programs affected are the federal government-controlled Pell Grants and the banks' Guaranteed Stu-Pell dent Loans, as specified by the Gramm-

Rudman-Hollings bill

University-controlled Supplemental Educational Opportunity Grants (SEOG), College Work-Study (CWS) and National Direct Student Loans will not be affected by the Gramm-Rudman-Hollings bill for the coming school year, Ryan said

The state allotment formula deter-mines the amount of money given to each state by the federal government for financial aid.

According to the Higher Education Act of 1965, this amount will not change. This act was extended from its original termination date of September 1985 to September 1986 and is now in the reauthorization process in Congress. The Higher Education Act also has a

clause which prohibits cutting funds at institutions where spending has been at a relatively constant level for at least three years, Ryan said.

The amount of students requiring aid at SJSU has not drastically increased or decreased over the past several years, he said. Basically, the same amount of students receive aid each year; some stu-

dents are new to the program and some students discontinue receiving aid for one reason or another, he said.

"When you put those two formulas (the Higher Education Act's state allotment and funds clauses) into effect, a school such as ours is not affected because we have been in these programs for so long and spending at a constant level. Theclause protects us so that we do not

drop below (what we need)," Ryan said.

He also said that schools with large increases or decreases in the number of students requiring financial aid are going to be affected because of the way the state al-lotment applies to those schools.

"Our school is experiencing no actual reduction in total dollars," Ryan said.

But the effects of the Gramm-Rudman-Hollings bill will be seen in the Guaranteed Student Loan Program as of March 1. he said.

The bill specifies that the origination fee charged by banks when issuing student loans will increase from 5 percent to 5.5 percent of the loan, Ryan said.

CSU standards

By Andrew'F. Hamn

Daily staff writer

The Hispanic student organization MEChA charged the CSU system Wednesday with neglecting the collegiate aspirations of Hispanics

The Chicano Student Organization of the Southwest, under its spanish acronym MEChA, met with various members of undergraduate studies to criticize the CSU's new requirements for admission.

"This is just one more problem the Chicano popula-tion has to deal with in its fight against discrimination," MEChA Secretary Elsie Martinez said.

The CSU Board of Trustees adopted a new set of admission standards last November which will increase re-quirements for incoming freshmen beginning in the fall of

"California's failure to provide real and substantial opportunities for higher education to ethnic students is well established," Martinez said. "If Chicanos and other minorities cannot meet the present standards of admis-sion, what makes them think they can meet these new tougher one

"The high schools of minority communities in California cannot prepare their students for college," Martinez said. "Why not try and improve the high schools before you raise the standards?"

Martinez said MEChA would not be against raising college standards if all things were equal.

"But all things are not equal; under the present stan-dards only 8.5 percent of Hispanics who graduate from high school now are eligible for the CSU system, and only 2 percent of Hispanics entering high school will graduate with a four-year college degree."

Martinez's assistant Angelica Vasquez said that CSU Chancellor Ann Reynolds is guilty of hypocrisy by entinued on page

Editorial

Keep college athletics drug-free

RUGS AND SPORTS. These words eem to be synonomous.

From the professional ranks to the high school programs, it has become apparent that drug use in athletics is slowly, but surely, growing to disproportionate levels

After all of the drug cases concerning sports over the past few years, the top-management in the athletic world finally is beginning to take steps to curtail this problem.

A measure passed at the Jan. 14 National Collegiate Athletic Association convention established drug testing for athletes competing in national championships and post-season bowl games

Unfortunately, the NCAA has only touched the surface of the solution to the problem. There is no ruling that covers drug testing during the regular season.

Proposal 30 limits testing to those teams entering post-season competition. Are teams that do not make it to post-season play immune from drug problems?

It seems doubtful

As the proposal now stands, it states that an athlete who tests positive for drugs will be suspended 90 days from post-season competition and, if tested positive again after that 90-day period, will be barred from post-season action for one year.

It is true that Proposal 30 is better than nothing at all, but the fact remains that it only covers a fraction of the problem.

A better solution would be to have the NCAA require that everyone, from the coaching staff to the players, take mandatory drug tests. The tests would be administered by NCAA officials, during pre-season games all the way through championship play. If all colleges were to get together under the plan, drug abuse in sports would all but be eliminated. Individuals who refuse to take the tests could be told by the college to take a hike without fear of another school recruiting the reluctant athlete.

Drug testing cannot and should not be isolated to championship teams. It should be required at colleges that do not continue on after their regular season.

It is a shame that society's problems have to interfere with athletics. The problem is not limited to the college level, but seems to be spreading throughout professional sports as well

At least the NCAA is on the right track, but it needs to carry it one step further. It can only be hoped that the NCAA will reach a plan that will insist on mandatory testing for everyone, not just a select few.

Sports figures losing heroic image

Where have you gone, Joe DtMaggio? - Simon and Garfunkel

American sports no longer consist of heroes like those in the early days of professional athletics. The future will hold no legends or amazing stories about the present-day athlete who has been dropped from an idol to a spoiled in-dividual in the eyes of the public. Greats of the past like baseball's Babe Ruth, foot-ball's Jim Brown and basketball's Bill Russell were truly

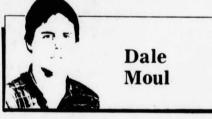

deserving of superstar status. Those men loved every thing about the sport they played. Even the myths that were associated with great play.

ers of the past added flair to that person. Ruth's famous called shot and Joe Namath's pre-Super Bowl III prediction of his 16-point underdog New York Jets win over the Baltimore Colts will always be remembered by those who follow sports. The public just does not see that kind of thing come from athletics anymore.

Professional athletes today do not even begin to come close to the sports heroes of yesteryear when comparing the two. This, in many ways, can be linked to the changing times and to how the boyhood games these grown men play have transformed into businesses rather than sports

Nowadays, the sports pages are plagued with head-lines and articles about athletes involved in various scandals. Such circumstances that have revolved around athletes, like those identified in the recent Pittsburgh drug trial in which caterer Curtis Strong was found guilty of selling cocaine to baseball players, leave a bad taste in the mouths of even the most fanatic sports enthusiast. The rising salaries of athletes have produced million-

aires out of people with a special talent in athletics. Even illegal gambling has crossed over into sports, most noteably in football with the conviction of former Baltimore her who ran up a large number of

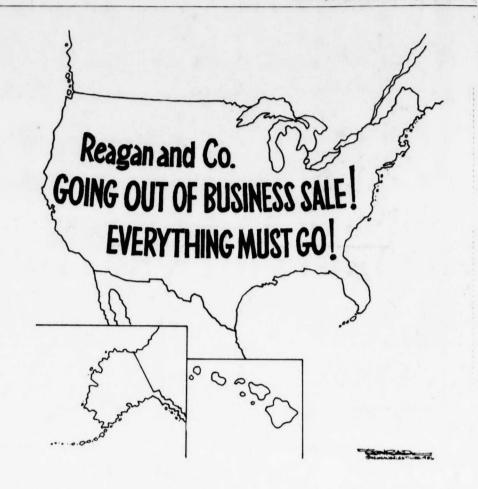

before had enjoyed.

Parents fear that professional sports and their partic pants are becoming more and more of a bad influence for their children. The main concern stems from the drug situation that seems to grow in popularity with each passing day. Parents are beginning to think: "Is this what I want my child to be exposed to and idolize?" The modern athlete's main concern is for himself.

This thinking and being able to brush off the ideas of team concepts put the player in a bad light with the public. He wants whatever is going to benefit him and could care less about the fans who come out and support him. With this sense of individualism, it is almost incon-

ceivable that the sports world will ever see dominant teams like those of the past. Dynasties cannot be built anymore because as soon as players find out they have a talent other teams would die to have and are willing to dish out the extra dollars to get, the whole nucleus of a club can be torn apart.

One can only hold onto the memories of such great teams that were able to win year in and year out. The Oakland A's, which won three straight world championships from 1972-74, were the last true dynasty. It, too, finally fell apart due to free agency and big bucks waved in front of their faces.

Condors plunge into extinction

'The Other Place'' stank of old cigarette butts and spilt beer. Grimy mirrors and posters of pretty women holding different brands of beer were splattered ran-domly on the bar's simulated wood walls like shotgun pellets across the tail of a condo

Besides a white-haired bartender, who resembled a Bowhead whale with a handlebar moustache and a dirty apron, Dave and I were the only patrons of the bar. Dave's one of my drinking buddies from school, and we both enjoy getting drunk and discussing the problems of

You know, people don't really think about the plight of the California condor these days. Ever since it made the endangered list in the '70s, the condor has faded into a piece of nostalgic sentiment. That is, until I brought up the idea to Dave on a sleepy Thursday afternoon. "You know, they fook alike," I said. "What?" Dave said slowly.

"The male and female species of the California con-dor look alike," I said.

"So ..., what's the big deal?" Taking a sip of a flat beer in a dirty glass I said, "I read somewhere that there are five condors left

in the wild. Twenty-two exist in captivity." "Yeah," Dave said, "I thought there were only two male condors left in the wild. There were three, but the last wild female died of blood poisoning from shotgun pellets." "They should but them

"They should put them

in captivity for breeding purposes," I said. "They would, but there's a federal injunction on the wild birds. The U.S.

flex woke up to choke

Wouldn't that put a limit on the gene pool?" I asked. "Well," Dave said giving me a forced grin, "when

Pedestrians beware

are these cheeky bicycle riders and skateboarders who think they own the side-walks?

Times are many when innocent pedestrians are forced off perimeter campus sidewalks by impatient bike riders who refuse to do their bike riding in the

your left!" the more polite of this crass bunch yell as they careen wildly along crowded sidewalks, scattering bewildered pedestrians this way and that

Of course, any warning at all is preferable to the zero warning issued from most of the bicyclists plaguing our campus. An unsuspecting pedestrian thinks he hears a bike rider approaching from the rear, and so he moves to the right. Alas, the biker also moves to the right. So both parties, in an attempt to avoid collision, move to the left.

IMPACT!!! While it is unfortunate that SJSU's campus is not equipped with bicycle-only paths, the lack thereof is no license for crazed bicyclists to monopolize the sidewalks.

There are several streets running through and around campus which, though not equipped with bi-cycle paths, are safer for bicyclists when automobile traffic is heavy than sidewalks are for pedes-trians when bicyclists abound.

When traveling on campus from class to class, bike riders should stay to the right and yield to pedestrians. Rudely forcing pedestrians off footpaths into wet grass or mud is unacceptable.

In league with bicyclists are skateboarders. Indeed, skateboard riders are even less polite than bike riders. Generally no warning at all issues from the mouths of determined platter-scooters. Cases are cited where speedy sidewalk surfers have plowed full speed into unaware students.

Unfortunately, skateboarders cannot be exiled to the streets. Pedestrians are forced to coexist with

in the wild. Twenty-two

Wildlife and Fish Service is trying to dump the injunc tion

I stretched my arms and took another swig of beer. It went down like sour milk, and my gag re-

debts and was accused of "fixing" games

From the early part of the century up to the 1960s, children identified with various sports personalities and would try to imitate their favorite heroes from the sports world. Kids would pretend to have the same talents as the athlete they were mimicking. The list of the players youngsters would idolize was endless.

Kids today lack the same experience that generations

These are not the type of role models we need to have in society for our children. Until the problems are corrected, the younger generation will face the fact that they will go through life without the understanding of how it feels to have a true hero to idolize.

REAGAN AID

there's a small population of a species, the hereditary factors are not advantageous to the species."

Robert G.

Comito

You mean, the subsiding generations will weaken when you inbreed?'

'Let's say that the situation becomes very indeterminate," Dave said.

"You know, ten years ago there were condor sightings in Palo Alto," I said. "No kidding," Dave said. "I remember reading

somewhere that in the 1800s condor eggs were collected like baseball cards. To have a condor egg in your egg collection was like having a Babe Ruth bubblegum card in mint condition. Condor eggs would bring in about two hun-dred dollars each for the collections. The egg fad helped with the decline of condors, and maybe with captive breeding, we can see a rise in its population." "But, some people think captive breeding is a terrible

thing," I said.

Dave scratched his blond beard, and turned to face me. "In regards to any endangered animal, population pressure is the cause of decline, and habitat destruction should be regarded a little more seriously. If it were, perhaps we wouldn't have to deal with endangered specie

'Can we justify taking space away from God's creatures, or even the space of an ugly scavenger like the con-'I asked. dor?

"It's a philosophical question," Dave said. Dave lit up a cigarette adding his curling smoke to the list of endangered species.

Letter Policy

The Spartan Daily encourages readers to write letters to the editor. Bring them to the Spartan Daily office, Dwight Bentel Hall, Room 208, or the Student **Union Information Desk**

All letters must bear the writer's name, major, class standing and phone number.

The Daily reserves the right to edit letters for libel and length.

aths

Skateboarders should, however, take care to observe pedestrian speed limits. Anti-speeding signs directed at both skateboarders and bicvclists should be posted on crucial sidewalk thoroughways and intersections.

new task force should be added to the University Police Department, designed to combat the problem of on-campus, high-speed bicyclists and skateboarders.

SPLAT, the Special Patrol Limiting Accidents from Tires, would be charged with maintaining the safety of sidewalks and footpaths of SJSU. UPD would delegate to SPLAT the authority to

issue citations to violators, and to confiscate incriminating evidence in order to prosecute the transgres-

Sister California State University campuses. like Chico, have an intricate and thorough system of bicycle paths, walking on which is deserving of a po-lice citation. So why shouldn't SJSU patrol its pedestrian paths?

Imagine nightsticks lengthened to accommodate their use as "disembarking devices" for forceably removing speeders from their instruments of speed

Until the powers that be determine that bicycle paths are indeed necessary, bicyclists should accept their lot and ride in the streets, as they are legally obligated to do.

Skateboarders ought to install brakes on their cooter-platters and take care that their high-tech, polyurethane, multi-colored wheels don't leave marks on the backs of someone's legs.

Both bicyclists and skateboarders, at any rate, are asked to ride more judiciously. They must resist the temptation to send customers to the health center.

Federal cuts threaten SJSU tutorial programs By Sally Finegan

Daily staff write

Two SJSU programs designed to help low-income and disabled students may face elimination and students and faculty opposed to looming federal cuts began to fight back Friday

Two SJSU tutorial programs had an information table set up for protesting stu-dents, faculty and staff in the foyer of Wahlquist Library Central, including petitions, sample letters and lists of legislative representatives to contact

Gramm-Rudman-Hollings, the automatic federal deficit reduction law, would re-duce the ASPIRE and Upward Bound budgets by 4.3 percent in 1986-87, said Connie Baker, director of the Academic Support Program for Increased Retention and Education. In three years, the programs would have to be eliminated, she said. ASPIRE provides free tutorial services

for 300 SJSU low income, physically disabled or first-generation college students. Upward Bound offers tutoring and classes for 85 local high school students, who are either from low-income families or the first in their families to go to college.

Both programs are federally funded. AS-PIRE received \$152,000 and Upward Bound received \$231,0000 in the present funding cycle, which ends May 31.

Gramm-Rudman-Hollings would also limit to five years the length of time that SJSU could have these programs.

Disabled students would be affected by the loss of federal monies, said Martin Schulter, director of Disabled Student Services. Forty to 50 students with learning and physical disabilities take advantage of the ASPIRE's tutoring services.

"So far as retention of these students is ncerned, it's a key issue," Schulter said. Both Baker and Betty Preciado, the di-rector of Upward Bound, said that students

'We're really hoping students, faculty and staff will respond. It's not just the protection of these programs alone but the concept of educational equity.'

> - Connie Baker, director of ASPIRE

who wish to keep federal monies in these programs need to contact their congressmen by phone or letter.

"We're really hoping students, faculty and staff will respond," Baker said. "It's not just the protection of these programs alone but the concept of educational equity

"These programs are across the nation. Thousands of students — disabled and low income - will be affected."

Debt reduction bill felt by programs

WASHINGTON (AP) - The first pinch of the Gramm-Rudman-Hollings deficit reduction law took effect Saturday, squeezing \$11.7 billion out of the federal budget by eliminat-ing 91,000 college scholarships, paying farmers less for milk and butter, and scaling back grants to scientists seeking cures for Alzheimer's disease.

The agencies learned six weeks ago how much they stood to lose from the 4.3 percent across-the-board cuts in most programs.

cation of at least \$3,000 from Asso-ciated Students for the Womyn's Week program, but they only re-ceived \$2,500, of which \$800 is a loan.

Several events that the center had budgeted for, such as a 10 kilo-meter run, had to be cut for lack of

funds "We've been able to put the program on despite financial cutbacks," said Marge Kintscher, a co-coordina-tor of the Women's Resource Center and an SJSU student. "We have lots of volunteers who've helped coordinate it and a lot of speakers are doing it for free."

UPD to oversee keys **Control tighter** The new setup will be more on door locks

By Lynn Louie

Daily staff writer The Key Control Center is now under the supervision of the University Police Department in-stead of Facilities Development and Operations.

The administrative move took place in January, although the center is still physically located in Facilities Development and Oper-ations, said Sgt. Ed Anderson, UPD crime analysis officer. The locksmiths and staff are

responsible for all campus keys and locks. The decision to make the tran-

sition was made last summer by Executive Vice President J Handel Evans.

and those which weren't re-turned," Evans said.

conducive to the locksmiths' ac-tivities because of the closer contact with the police, McElroy said. He also said that they will get more feedback from the depart-ment and discussion about key control situations will be easier 'We're trying to get a grip in

that type of crime and now is an opportune moment since they (the locksmiths) are re-keying the buildings," Evans said.

Anderson oversees the center. His assistant is Information Officer Russ Lunsford.

The center will remain in its current location until a vacant building that can accommodate all of the machinery and equip-ment necessary becomes available, Lunsford said.

Six other campuses in the CSU system have their Key Control Centers under the supervision of the police department. They are California State College at Bakersfield, California State University at Chico, California State University at Fresno, California State University at Los Angeles, San Diego State University and California State University at Stanislaus.

The centers at the remaining 12 campuses operate out of their Plant Operations Department.

"That means that for a \$2,500 loan, a student will pay an origination fee of \$137.50 compared to \$125 be-fore," he said.

Approximately 2,600 SJSU students currently receive guaranteed student loans, he said. Ryan said he does not foresee the banks withdrawing from the GSL program because of the change, although they have threatened to do so if Reagan's budget passes. Reagan's proposal specifies that changes to the GSL program include increasing the interest rate students pay and a reduction in the fee banks collect for granting GSLs.

SJSU began in the mid '70s when sev-

The Pell Grant eligibility index, which determines the amount of aid a student will receive, has been changed under Gramm-Rudman-Hollings, Ryan said. The eligibility index is determined by taking into account family income, student income and assets, he said.

The lower the index number is, the greater the student's need, Ryan said

"For those with eligibility indexes between zero and two hundred. the most needy, they will not be af-fected," Ryan said. "But students who have eligibility indexes above twelve hundred will be excluded." He added that students with an index between 200 and 1,200 will receive less money.

Students who were barely eligible for Pell Grants will probably not get any money, but they may then qualify for more money from the campus controlled programs, Ryan said

"If a student is barely qualifying for campus controlled programs this year, they aren't likely to get funds next year, because of this trickle down effect," Ryan said.

Those students who will be receiving less or no Pell Grant funds may get more SEOG, CWS or NDSL to cover the shortage, Ryan said. But that spreads out the funds available in the whole system to a greater num-

delay a disbursing Pell cause they were unsure of the funds available and the payment schedules did not arrive until October.

Pell Grant payment schedules are a list of eligibility indexes and the amount a person can receive is deter-mined by the federal government, Ryan said.

For the 1987-88 school year the fate of financial aid programs is un-certain, Ryan said. Until President Reagan's budget is approved and the Higher Education Act is reauthorized, it is unknown what changes will occur and who it will affect, Ryan said.

Murphy

striving

to build

success

on earlier

Sports

By Ken Johnston

If high school statistics are any indication of a player's capabilities, then SJSU ju-nior varsity left fielder Pat Murphy should have a bright future in the game of baseball.

The Spartan athlete brings with him some impressive numbers from Lindhurst High School in Marysville, Calif.

Murphy compiled batting averages above .370 each year at Lindhurst. In his four years, he hit .425, .375, .450 and .550.

Murphy (5-foot-10, 180 pounds) is cur rently in his first year at SJSU. The left fielder is trying to post the same numbers at the college level

Besides having a good batting average Murphy is also fast on the base paths. The SJSU athlete had 30 stolen bases his senior year and 25 his junior season.

Murphy not only played left and center field; he was also a pitcher. His senior year was his most successful on the mound, where he compiled a 9-0 record and an earned run average of 1.75.

He had the best of both worlds in high school because the designated hitter rule was not used.

Murphy's senior year was his most rewarding as he was the Sierra Foothill League's most valuable player and his team's MVP.

Murphy also played football and basket-ball at Lindhurst, where he was a four-year letterman in all three sports. He was also the league MVP in the other two sports his

senior year The Spartan athlete was a cornerback

in football and a guard in basketball. He was his team's MVP in both sports his junior year

"I like playing in all three sports," Mur-phy said. "I like baseball and basketball the

best. The reason why I didn't go out for bas-ketball here (at SJSU) was because I'm too

Murphy's height might have been a drawback for basketball, but it hasn't affected his performance in baseball. Spartan right-hander has been The

playing baseball longer than the other two sports. He started in little league at the age of seven and has stuck with the sport for 11

'If there was no JV team here, I would probably redshirt this year. This way I get to work on my skills before advancing to varsity'

> - Pat Murphy, Spartan JV left fielder

years since then

"My family has given me the biggest support, especially my dad," he said. "When they are at the game watching me, I work harder.

Murphy gives most of the credit for his success in high school to his coach Bob Aaberg because he was a disciplined coach and a motivator

"He (Aaberg) expected a lot out of his players," the Spartan outfielder said. "If you didn't attend practices on a regular basis, you didn't play and I think that's the way it should be. It helped me work harder at practices.

His hard work appears to have paid off for him because he is one of the starting outfielders for the JV team.

Murphy's immediate goal is to make the varsity team next year. He would like to bat over .350 and have 20 to 30 stolen bases.

He's off to a good start with six steals in only four games

Murphy said his style of stealing bases is similar to his idol, Ricky Henderson. He is glad that SJSU has a junior varsity

team because he gets to play every game. 'If there was no JV team here, I would

probably redshirt this year," he said. "This way, I get to work on my skills before advancing to varsity.

The Spartan athlete is currently batting ninth in coach Mike Spiers line up. He has also been a lead-off hitter for

SJSU. Murphy said that he would rather hit in the lead-off spot, but doesn't mind batting ninth

"I'll bat anywhere the coach wants me

Junior varsity left fielder Pat Murphy takes his cut at college baseball

to, but I would rather lead off," Murphy

The SJSU outfielder said that he enjoys both hitting and fielding, but prefers hitting.

"I really enjoy coming through in clutch situations with a double or a triple to the opposite field," he said. "I'm not a home run hitter so I have to try and get the key base hit

Murphy said that his long-range goal would be to get drafted and sign a profes-sional contract, especially with his favorite team, the Los Angeles Dodgers.

Ken Lam

'Murphy is a very talented individual and is one of the players most likely to go up to the varsity level next year," Spiers said. 'If he keeps up the hard work he should be playing the game for quite some time.

said. "I only started liking it a few

years ago. "It's kind of good that way, because the burnout rate for gymnasts is so high.

"It's not like football where you practice only part of the year. You practice it all year around."

He came to the United States at the age of 14 because his mother thought the schools were better.

"I didn't want to go at first, but then I started to look foward to it," Moyal said. "It is very different. The people are very different.

His two brothers were already in the United States when Moval arrived, one at Oregon State University and the other at Lousianna State. They helped him get situated at a

high school in Oregon. In 1982 he transfered to a school

in Louisana to finish high school with hopes of attending LSU. The year he was to enroll at LSU,

the gymnastics program was dropped, so Moyal transfered to SJSU in the spring of 1985.

There is a lot of variety on the team here, Moyal said.

'The caliber of the team is so high that it keeps me from competing all-around, but the variety is good for the team." he said.

Both of his brothers competed on the Israeli National Gymnastics Team, but weren't able to compete in

achieve my education and not the other way around. I didn't come here to compete in gymnastics."

Moyal is majoring in mathemat-ics, but has plans to transfer into en-

gineering. "I'd like to work in engineering when I graduate in a couple of years," he said. But he hasn't decided whether he will go back to Israel.

"My goal in gymnastics is to compete at the NCAA championship meet some time in the future," Moyal

said This year, his scores in all-

A NICE, RESPECTABLE, UPPER-CLASS BOY HAVE GOTTEN THE NOTION FOR SUCH A LIFE

Mayoral candidate speaks out

By Stew Hintz Daily staff writer

aily

The current mayor of San Jose has neglected the needs of SJSU and the city's neighborhoods only to further his own economic gains, said Dan Minutillo, a candidate for mayor

Minutillo, who is challenging Tom McEnery in San Jose's Novem-ber mayoral race, spoke to a meeting of the College Republicans in the Stu-dent Union Guadalupe Room on Wednesday

'They (McEnery's administration) are tuning you out completely," he said. "We want to know what your concerns are.'

Minutillo said that McEnery is ignoring the parking problem on campus and the city should use funds from the redevelopment agency to build parking structures for students.

He said that he supported the use of funds from the redevelopment agency to build parking structures for students

He said that he supported the closure of several streets surrounding campus and that, if feasible, he would close East San Carlos Street.

The university has been trying to close East San Carlos Street between Fourth and 10th streets for some time but the city has resisted those efforts.

Minutillo said that he was also concerned with lack of student housing near campus. The campus should be surrounded by student housing, he said.

He said that he was unhappy with the low income housing policy of the city because it discriminated against students

The city will collect \$100 million

in tax receipts designated for low income housing and there should be no problem with setting aside some of that money for the construction of housing for students, he said.

Bloom County

SIGH. I GUESS YOU'RE STILL DOING THE SAME THING FOR A LIVING, AREN'T YOU

Minutillo said he would also study the feasibility of connecting SJSU with the city's mass transit system if elected. "It may be an effective way to

minimize the parking problem," he said.

Minutillo said he has never held a political office, but admitted that unseating an incumbent would be difficult

Minutillo, an attorney who has lived in the area since 1958, served as the De Anza Associated Student Body President in 1964.

The office of mayor is non-partisan and Minutillo said that he wants to keep his affiliation with the Repub-

lican party out of the race.

made last year and the contribution was added to the A.S. budget and allocated to A.S.-budgeted groups. Next year's budget will be sub-

stantially smaller without the \$35,000, Sonneman said. The increase is necessary if the

A.S. budget is to be kept at its current level, he said.

Another argument in favor of placing a \$4 increase on the ballot was that SJSU, with the fourth larg-est enrollment in the CSU system, has the lowest A.S. fee in the system.

A.S. Vice President Mike Faber said, however, that having a larger increase on the ballot, as opposed to \$2, would not be as likely to receive student approval.

"We should cut the budget and not increase fees," he said. He said

there will be competition over lot-

he supported the \$2 increase

Tim Haines, director of California State Affairs, said SJSU students pay more to attend this university than any other students in the system

Students enrolled with more than six units pay \$727 a year at SJSU. At San Francisco State University, fulltime enrollment costs \$627 a year. At California State University at Hayward, students pay \$630 a year.

"What we're asking them (stu-dents) to do is take on a little bit more of this burden," he said. In addition to the \$10 A.S. fee, stu-

dents also pay a \$57 Student Union fee each semester.

With the proposed \$2 fee hike, Sonneman suggested that the Revised Automatic Funding Initiative be repealed, although no action was

taken due to lack of support. Approved by the students in 1982, RAFI is a payment schedule for the A.S. to follow, in funding seven specified groups which receive a predeter-mined amount of money per student per semester.

The initiative states that of each student's A.S. fee, 30 cents be allotted to the Music Department, 50 cents to the Spartan Daily 25 cents to each the spartan Daily 25 cents to each the radio station KSJS, radio and television news center and the Theatre Arts Department and 20 cents to the art gallery. A.S. President Erin O'Doherty,

vho said she was opposed to reducing RAFI allocations, said if the RAFI was repealed, RAFI-funded groups would be hurt

Sonneman criticized an inconsistency in RAFI allocations from one

Group vows to overturn new CSU requirements

continued from page 1

dorsing the new standards Vasquez cited a letter Reynolds wrote to the House of Representa-tives subcommittee on Postsecondary Education in December of 1983 letter cautioned against the federal government imposing new bar-riers to higher education for minorities. Vasquez said the letter is

contradictory to her stand on the new admissions requirements. "The CSU system is involved with a wide variety of programs with the high schools of California in pre-

paring students for college," Ralph Bigelow, associate dean of Educational Support Services. 'After extensive discussions on

the issues by the (CSU Board of Trustees) we have determined that these new guidelines will not affect Latinos any differently than anyone

Kathy Rose-Grippa, associate dean for curriculum, said that the only way to get high schools to act is to raise the standards.

"Some high school districts were doing a poor job in preparing stu-dents for college," Rose-Grippa said. "Hopefully with these new, more rigid standards, students will come better prepared."

SJSU and other California State University schools were spending too much time with remedial studies, Rose-Grippa said. The main reason the new standards were passed is to increase the chances for incoming students to succeed in higher education.

"This should decrease the drop out rate," Rose-Grippa said.

Ed Chambers, associate dean of Admissions and Records, said that the real issue is how the program will be carried out.

"SJSU is committed to educating its feeder organizations (high schools and junior colleges) in the require-ments for admission," Chambers

said. "If it can be determined that a student's high school was deficient, it

will be taken into account." He said the new conditional re-

quirement program will help stu-dents who did not meet all the requirements in high school.

Still in the planning stages, conditional admissions would allow certain students to fulfill admission requirements in their first 30 college units

is the attitudes of teachers and counselors at the high school level.

dent, college is not a viable alterna-

year to the next, despite the fixed levels described in the initiative

For example, since RAFI was es tablished in 1982, the amount allocated to RAFI groups decreased more than \$30,000 by 1984. In 1984, the Spartan Daily was not granted a RAFI allocation. The radio and television news center's 1984 allocation was \$2,500 less than its 1982 allocation of \$10,000.

"This is a contract between the A.S. and the students," Sonneman said. "It has been ignored, but it should be repealed.

In further criticism of RAFI, Larry Dougherty, A.S. executive assistant, said it is the university's job to fund the RAFI groups. He said that the current situation pits the RAFI groups against the student govern-ment. Three parties file for A.S. elections

continued from page 1

The executive branch consists of the president, vice president and the controller.

The judicial branch consists of the A.S. judiciary, composed of a chief justice and five justices. Three of the justices are students and two are SJSU faculty members. The chief justice is always a student.

Members of the judiciary will not be on the ballot because they are appointed to office by the A.S. president and approved by the board of directors. Also on the March ballot, will

be the election of five individuals to represent the A.S. on the Aca-demic Senate. The Academic Senate is the legislative branch of the

Monday, March 3, 1986/Spartan Daily

university. Candidates who filed for the election participated in a lottery to determine their position on the ballot. The appearance of their names on the ballot is dependent on the candidates' meeting the appropriate qualifications for office.

The A.S. Election Board will serve as a non-partisan observer, and will oversee the polling locations to ensure the validity of the elections.

G.E. Advisement Center offers academic guidance

said.

May meeting.

By Sally Finegan Daily staff writer

Undergraduates don't have to wait until the General Education Advisement Center looks like San Carlos Street at noon. Now is the time to get academic advice.

'Everyone waits until the beginning of the semester and CAR to come in," said Mary Moore, director of the G.E. Advisement Center. 'Now is the perfect time for students to come in.

Academic advisers are available

They may also consult an adviser from 5 to 6:30 p.m. Thursdays at Ad-

missions and Records. Students who don't have their transcripts in hand must make an ap-

pointment to see an adviser. Students with declared majors must see their major advisers first, Moore said, to get a referral to the advisement center

Martinez said that a big problem "For the typical Hispanic stu-

tive. It is not encouraged and there is

guys are pushed into becoming me-chanics, sheet metal workers and such." she said. Rose-Grippa said she agreed that there are problems in the school dis-

tensive fields.

tricts, but dropping the new standards will not make them go away "Students still need to be better

prepared when they come to the uni versity," Rose-Grippa said. Martinez said that the board of

trustees has no idea if the new standards will really help students be come better prepared. "We have enough problems now.

We don't like to be experimented on," she said.

Martinez said MEChA is fully committed to overturning the board of trustees' decision

Rep. Gloria Molina, D-Sac. and Rep Maxine Waters, D-L.A. are help ing MEChA seek legislation in the state Assembly to overturn the new standards, Martinez said.

'MEChA is trying to gain as much support as possible in order to persuade the board of trustees to change their mind," Martinez said.

no role model for him to look up to for an example," Martinez said. " feel alienated in a larger culture. Martinez said that counselors push minorities into certain labor-in-Larry Do Nick Gr Tom Bo Women are encouraged to be

an appointment and drop-in basis in the advisement center on the second floor of Wahlquist Library Central

They can help undergraduates select a major to meet their educa tional and career goals and who have questions about their general education requirements

Students holding their transcripts may go to the center on a drop-in basis, from 10 a.m. to noon and 2 to 4 p.m. weekdays, Moore said.

Americans still support shuttle

LOS ANGELES (AP) - Three out of four Americans support the space shuttle program and oppose re-ducing NASA's budget despite last month's explosion that destroyed the orbiter Challenger, a Los Angeles Times Poll said.

Fifty percent believe National Aeronautics and Space Administra-tion officials made "serious errors of judgment" in launching Challenger, according to the poll published last week

At the same time, 37 percent said decisions made by space agency officials were prudent.

Despite the number who said they were concerned about NASA's decisions that led to Challenger's launch, 75 percent of those surveyed considered themselves supporters of the space shuttle program and 69 percent opposed cuts in spending for NASA.
