Dear Maribel,

Thank you for your email and apologies for the delay in my reply, I had to check with our Contracts & Copyrights department.

I have been told;

" We do not allow authors to deposit the final PDF of their article in their institutional repository. As this paper was published in 2007 they can deposit the paper now.

Please advise that all SJSU authors can deposit the accepted versions of their papers subject to 12 month embargo from the date of acceptance.

The papers need to be fully acknowledged and link included back to the article on our website."

If you require more information then please do let me know and I will get back to them again.

With Thanks,

Jenny Abbott

Subject: Website Email: Re-posting Materials in SJSU Institutional Repository

To: ChemComm Editorial Office

This Email was sent from the following [rsc.org](http://www.rsc.org) page:
/publishing/journals/cc/chemcommteam.asp (<http://www.rsc.org/AboutUs/EmailPage.asp?address=nspxnzxxK%7D%7En9z%7Dr&CCaddress=&name=ChemComm> Editorial Office &url=/publishing/journals/cc/chemcommteam.asp)

Dear Editor,

I am contacting you on behalf of Professor Daryl Eggers who is a contributing author to your journal.

Professor Eggers is a member of the faculty here at San Jose State University and would like to deposit the full text of the following article from Chemical Communications in the University's institutional repository. Professor

Eggers has authorized me to contact you to seek permission to do this on his behalf.

Rocha, V.A., and D.K. Eggers: Hydrophobic, organically-modified silica gels enhance the structure of encapsulated apomyoglobin. ChemComm, 1266-1268 (2007).

The institutional repository is a not-for-profit service for our academic authors, providing access to the full-text of their publications. Full bibliographic details are given for each article, including the journal of original publication.

If possible, it is preferred to archive the finalized PDF version as it appears in print. Archiving the published version has an advantage over mounting the author's own version in that the article maintains consistency in appearance wherever it is read. This also maintains a closer association of the article with the Journal through the header-title and journal house-style.

I would be grateful if you could contact me to give your permission to include this article in SJSU's institutional repository and pass on any conditions associated with the article's inclusion. Please confirm if it would be possible to use the published PDF version of the article for this purpose.

If it is not possible to use the published PDF version, may I include the author's own version in the repository?

In the future if we need to contact you for additional permissions for SJSU-affiliated authors would there be any way to expedite the process or acquire a blanket permission statement allowing SJSU-affiliated authors publishing in your journal to post their works to the institutional repository?

Thank you for your attention to this matter. I look forward to hearing from you.
