Research Question

impact (if any) librarian intervention in first-year courses have on IL performance in student work?"

Methodology

This project is part of the program "Assessment in Action: Academic Libraries and Student Success" which is undertaken by the Association of College and Research Libraries (ACRL) in partnership with the Association for International Research and the Association of Public and Land-grant Universities. The program, a cornerstone of ACRL's Value of Academic Libraries Initiative, is made possible by the Institute of Museum and Library Services.

Librarians Matter!* Librarian Impact on First-Year Information Literacy Skills at Five Liberal Arts Colleges

Data

Overall Results

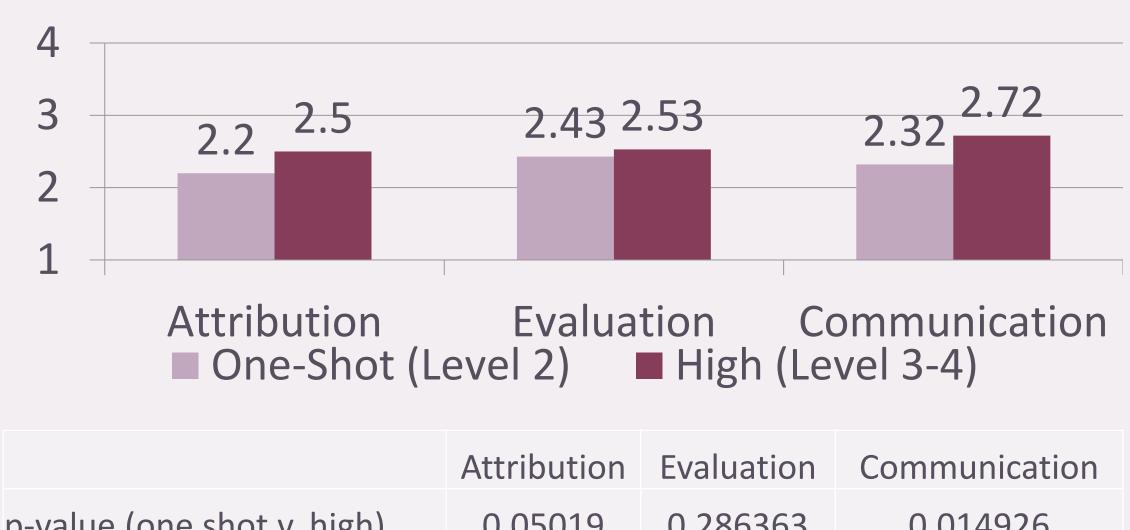

Total First-Year Paper Rubric Scores by Librarian Collaboration Level

College Specific-Results

College A: by Collaboration Level

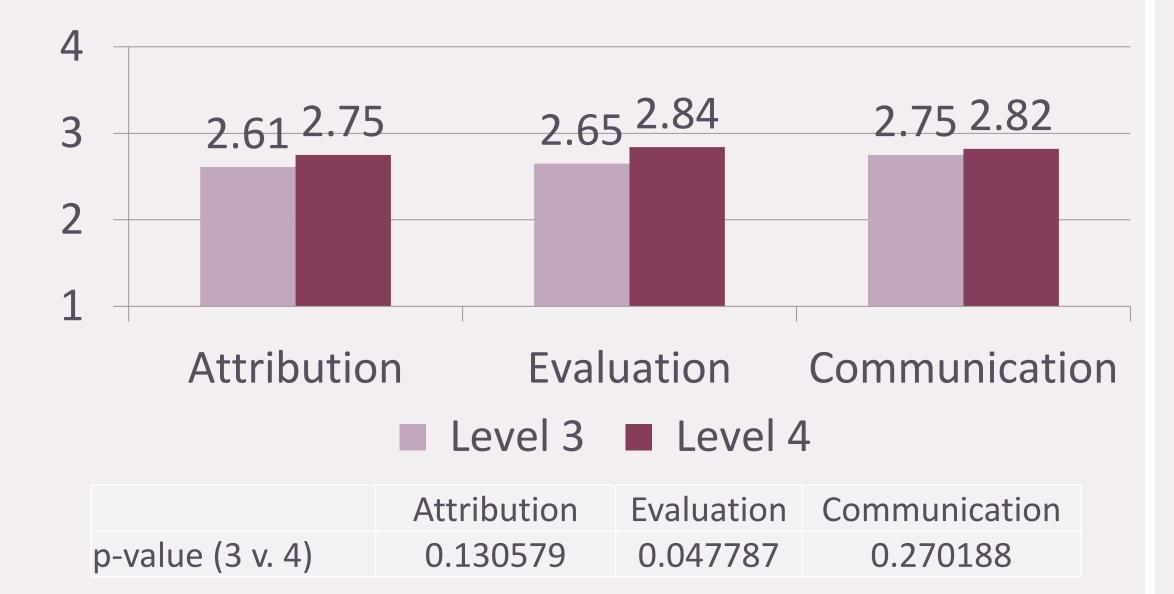

Papers from 11 of 31 sections (n=72). Most collaborations are one-shots.

p-value (one shot v. high) 0.286363 0.05019 0.014926

College B: by Collaboration Level

Papers from 17 of 17 sections (n=162). 95% confidence level (5% margin of error). All collaborations higher than one-shots (Level 3 or 4).

Results

- Students in courses with Level 2 (one-shot) Librarian Collaboration scored lower (statistically significantly lower) in all three Information Literacy rubric skill areas than those in courses with Level 3 and 4 Librarian Collaboration.
- No statistically significant difference overall between student's IL skills in Level 3 vs. Level 4 courses. Is there a library instruction "sweet spot"?
- Not enough Level 1 collaboration papers received to make any conclusions about students' IL skills in classes with no Librarian Collaboration.

Conclusion

While it has long been suspected that the one-shot is not as effective as more intensive collaborations on students' Information Literacy skills in the long-term, this project provides evidence that this is the case.

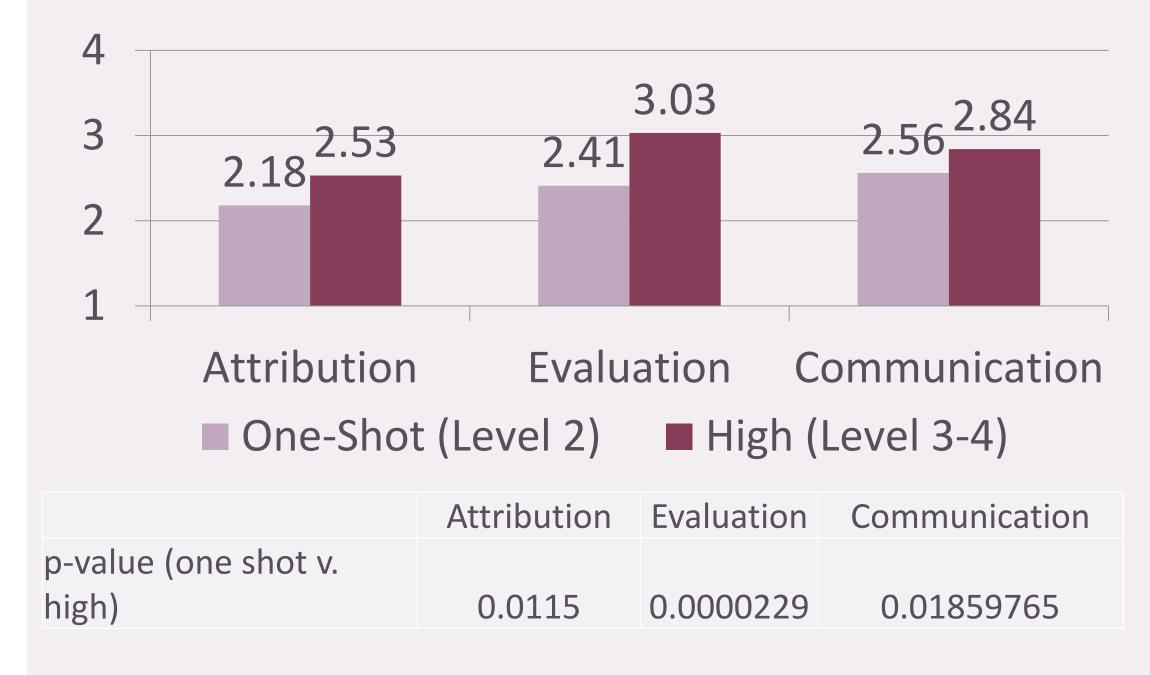

In short, the more collaborative and scaffolded the instruction, the more effective library instruction appears to be. Based on these results, we recommend librarians (and faculty) continue (or increase) their efforts to design assignments and syllabi in collaboration as well as strategically involve librarians in the classroom.

Sara Lowe, Assessment Librarian; Char Booth, Director of Research, Teaching, and Learning Services; Sean Stone, Science & Asian Studies Librarian; Natalie Tagge, Instruction Librarian - Claremont Colleges Library, Claremont, CA

College C: by Collaboration Level

Papers from 15 of 19 sections (n=151). 95% confidence level (5% margin of error). Equal balance of one-shot and higher level collaborations.

College D: total scores

Papers from 2 (one each Level 2 and Level 3) of 11 sections (n=31). Most courses do not collaborate with librarians. Sample size not large enough.

College E: by Collaboration Level

Papers from 9 of 13 sections (n=103). Most courses have higher level collaborations.

Attribution Evaluation Communication p-value (one shot 0.0000000000168 0.00000000155 v. high) 0.00000000314
