#### **Briefing Paper**

#### Economic and Fiscal Impacts of Dallas Area Rapid Transit Operations and Capital Expenditures

#### Prepared by:

Terry L. Clower, Ph.D & Bernard L. Weinstein, Ph.D. Center for Economic Development and Research University of North Texas April 17, 2007

The following summarizes the findings of our analysis of the economic and fiscal impacts of Dallas Area Rapid Transit operations and capital spending. Our analysis specifically examines the impacts of spending associated with the development of the light rail system, projections of total capital spending for all transit modes over the next twenty years, and transit system operations for fiscal years 2007 and 2014. In Section 1 we examine the impacts of transit-related spending on the economy of the Dallas Fort Worth Metroplex. Section 2 examines the impacts on the state economy. Please note that state and local impacts are not additive.

All components of our analysis are based on:

- Spending estimates provided by DART.
- Data provided by DART are inflation adjusted.
- Economic impact assessments based on the IMPLAN input-output model developed by the Minnesota IMPLAN Group.
- Economic impacts include direct, indirect, and induced effects. Direct effects are
  direct expenditures by construction contractors and similar firms. Indirect effects
  capture spending by vendors and suppliers for contractors and others. Indirect
  effects are created by employees of the contractors and vendors spending a
  portion of their earnings in the local economy for goods and services. All
  spending estimates are adjusted to only include local spending.

#### Section 1: Impacts on the Dallas Fort Worth Metropolitan Area

• The study area for this section is the Dallas-Fort Worth Metropolitan Area, which includes Collin, Dallas, Denton, Collin, Hunt, Ellis, Delta, Johnson, Kaufman, Parker, Rockwall and Tarrant counties.

#### Part 1: Economic and Fiscal Impacts from Buildout of the DART LRT System

- Impact estimates are provided for the original starter system, the Northwest corridor including the NW1A segment, the Southeast corridor, the Northeast corridor, the Irving corridor, the Rowlett extension, the North Central corridor, and the second line for the Central Business District.
- Expenditures include previous and future spending.

- Expenditures include the cost of construction, acquisition of land, capital equipment purchases, professional services for engineering, design, and environmental assessments, and other development costs.
- In assessing the economic impact of land acquisition, we have assumed that a small portion of the purchase price will remain in the regional economy as disposable household income and will thereby contribute to local economic activity. Our approach likely understates the total impact of this transfer of income.

### Economic and Fiscal Impacts from Buildout of the DART LRT System Starter System Dallas-Fort Metropolitan Area

Description	Impact		
Total Expenditures	\$ 854,000,000		
Economic Activity	\$ 1,348,232,000

### Economic and Fiscal Impacts from Buildout of the DART LRT System All Corridors Dallas Fort Worth Metropolitan Area

Description	Impact		
Total Expenditures	\$ 4,868,866,000		
Economic Activity	\$ 7,686,716,000		
Labor Income	\$ 2,869,756,000		
Employment*	60,678		
Other Property Income**	\$ 823,187,000		
Indirect Business Taxes***	\$ 191,149,000		

<sup>\*</sup> Person years of employment. Actual employment levels will vary from year to year. \*\* Includes royalties, rents, dividends, and corporate profits. \*\*\* Includes state and local sales and use taxes, property taxes, license and permit fees. Source: DART, IMPLAN, authors' estimates

#### Part 2: Impacts of Future Dallas Area Rapid Transit Capital Spending

- Estimates based on FY2007 through FY 2026 spending projections for construction, capital equipment and related purchases for all transit modes including buses, light rail transit, commuter rail/railroad management, paratransit, High Occupancy Vehicle (HOV) transitways, capital planning and development, non-operating start up expenses, road improvements, intelligent traffic systems, and other spending.
- Spending includes projected expenditures for parts of the Northwest and Southeast LRT corridors as well as other light rail corridors. Therefore, the impacts presented in Part 1 and Part 2 of this briefing paper are not additive.
- We have assumed that only a small portion of the costs of land acquisition will contribute to local economic activity. Some land owners will spend their gains, others will use the proceeds from their property sales to acquire new property, still others will save or invest their proceeds, or some combination of these three actions. We have only considered the impacts of those households that choose to spend some or all of their proceeds. Our approach likely understates the total impact of this transfer of income.

## Economic and Fiscal Impacts of All Projected Capital Spending Dallas Area Rapid Transit (2007 through 2026) Dallas Fort Worth Metropolitan Area

Description	Impact		
Total Expenditures	\$ 5,324,570,000		
Economic Activity	\$ 7,898,418,000		
Labor Income	\$ 2,454,245,000		
Employment*	52,266		
Other Property Income**	\$ 736,131,000		
Indirect Business Taxes***	\$ 169,656,000		

<sup>\*</sup> Person years of employment. Actual employment levels will vary from year to year. \*\* Includes royalties, rents, dividends, and corporate profits. \*\*\* Includes state and local sales and use taxes, property taxes, license and permit fees. Source: DART, IMPLAN, authors' estimates

#### Part 3: Economic and Fiscal Impacts of Dallas Area Rapid Transit Operations

• Estimates based on current year operating budget and projections for 2014. Includes all transit operations.

#### Economic and Fiscal Impacts of Operations Dallas Area Rapid Transit Dallas Fort Worth Metropolitan Area

Description	2007	2014
Total Operating Expenditures	\$ 342,114,000	\$ 491,922,000
Economic Activity	\$ 494,377,000	\$ 651,090,000
Labor Income	\$ 102,807,000	\$ 135,396,000
Employment*	3,314	5,165
Other Property Income**	\$ 45,101,000	\$ 59,398,000
Indirect Business Taxes***	\$ 10,259,000	\$ 13,511,000

<sup>\*</sup> Number of jobs. \*\* Includes royalties, rents, dividends, and corporate profits. \*\*\* Includes state and local sales and use taxes, property taxes, license and permit fees. Source: DART,IMPLAN, authors' estimates

#### **Section 2: Impacts on the Texas Economy**

• There are two substantive differences in addressing the impacts of DART's capital and operating spending on the state economy versus the Dallas Fort Worth region. First, additional secondary spending is captured accounting for vendors and related employment that are located in Texas, but not the DFW Metropolex. Second, we have estimated an increase in the proportion of funds used to purchase land for DART right of way that we treat as income available for spending in the modeled economy to allow for individuals that own land in the DART service area but reside elsewhere in Texas.

#### Part 1: Economic and Fiscal Impacts from Buildout of the DART LRT System

- Impact estimates are provided for the original starter system, the Northwest corridor including the NW1A segment, the Southeast corridor, the Northeast corridor, the Irving corridor, the Rowlett extension, the North Central corridor, and the second line for the Central Business District.
- Expenditures include previous and future spending.
- Expenditures include the cost of construction, acquisition of land, capital equipment purchases, professional services for engineering, design, and environmental assessments, and other development costs.

### Economic and Fiscal Impacts from Buildout of the DART LRT System Starter System State of Texas

Description	Impact		
Total Expenditures	\$ 854,000,000		
Economic Activity	\$ 1,431,287,000

#### Part 2: Impacts of Future Dallas Area Rapid Transit Capital Spending

- As a reminder, estimates in this Part are based on FY2007 through FY 2026 spending projections for construction, capital equipment and related purchases for all transit modes including buses, light rail transit, commuter rail/railroad management, paratransit, High Occupancy Vehicle (HOV) transitways, capital planning and development, non-operating start up expenses, road improvements, intelligent traffic systems, and other spending.
- The impacts presented in Part 1 and Part 2 of this analysis are not additive.

## Economic and Fiscal Impacts of All Projected Capital Spending Dallas Area Rapid Transit (2007 through 2026) State of Texas

Description	Impact		
Total Expenditures	\$ 5,324,570,000		
Economic Activity	\$ 8,380,822,000		
Labor Income	\$ 2,603,567,000		
Employment*	55,490		
Other Property Income**	\$ 781,551,000		
Indirect Business Taxes***	\$ 180,180,000		

Estimates are not additive with estimates of transit rail corridor construction noted above. \*Person years of employment. Actual employment levels will vary from year to year. \*\* Includes royalties, rents, dividends, and corporate profits. \*\*\* Includes state and local sales and use taxes, property taxes, license and permit fees.
