

FEDERAL REGISTER

Vol. 76

Thursday,

No. 160

August 18, 2011

Pages 51245–51868

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402 is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.ofr.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.fdsys.gov, a service of the U.S. Government Printing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 59, 1 (January 2, 1994) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Printing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpo@custhelp.com.

The annual subscription price for the **Federal Register** paper edition is \$749 plus postage, or \$808, plus postage, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$165, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Printing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 76 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Printing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 76, No. 160

Thursday, August 18, 2011

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Parts 51 and 602

[TD 9544]

RIN 1545-BK34

Branded Prescription Drug Fee

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Temporary regulations.

SUMMARY: This document contains temporary regulations that provide guidance on the annual fee imposed on covered entities engaged in the business of manufacturing or importing branded prescription drugs. This fee was enacted by section 9008 of the Patient Protection and Affordable Care Act, as amended by section 1404 of the Health Care and Education Reconciliation Act of 2010. The regulations affect persons engaged in the business of manufacturing or importing certain branded prescription drugs. The text of the temporary regulations also serves as the text of the proposed regulations set forth in the notice of proposed rulemaking on this subject in the Proposed Rules section of this issue of the **Federal Register**.

DATES: *Effective Date:* These regulations are effective on August 18, 2011.

Applicability Date: For dates of applicability, see §§ 51.11T and 51.6302-1T(b).

FOR FURTHER INFORMATION CONTACT: Celia Gabrysh, (202) 622-3130 (not a toll-free number).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

These temporary regulations are being issued without prior notice and public procedure pursuant to the Administrative Procedure Act (5 U.S.C. 553). For this reason, the collection of information contained in these

regulations has been reviewed and pending receipt and evaluation of public comments, approved by the Office of Management and Budget under control number 1545-2209.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

For further information concerning this collection of information, and where to submit comments on the collection of information and the accuracy of the estimated burden, and suggestions for reducing this burden, please refer to the preamble to the cross-reference notice of proposed rulemaking on this subject in the Proposed Rules section in this issue of the **Federal Register**.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document adds the Branded Prescription Drug Fee Regulations to the Code of Federal Regulations (26 CFR Part 51) under section 9008 of the Patient Protection and Affordable Care Act (ACA), Public Law 111-148 (124 Stat. 119 (2010)), as amended by section 1404 of the Health Care and Education Reconciliation Act of 2010 (HCERA), Public Law 111-152 (124 Stat. 1029 (2010)). All references in this preamble to section 9008 are references to section 9008 of ACA, as amended by section 1404 of HCERA. Section 9008 did not amend the Internal Revenue Code (Code) but cross-references to specified Code sections.

Statutory Provisions

Section 9008(a) imposes an annual fee on each covered entity engaged in the business of manufacturing or importing branded prescription drugs, to be paid not later than the annual date specified by the Secretary of the Treasury or his delegate (Secretary), but in no event later than September 30th of each calendar year in which a fee must be paid (fee year).

Section 9008(d)(1) defines a *covered entity* as any manufacturer or importer with gross receipts from branded

prescription drug sales. Section 9008(d)(2) provides a controlled group rule under which all persons treated as a single employer under section 52(a), 52(b), 414(m), or 414(o) of the Code are treated as a single covered entity. For this purpose, a foreign entity subject to tax under section 881 is included within a controlled group under section 52(a) or 52(b). Under section 9008(d)(3), all persons treated as a single employer under section 9008(d)(2) are jointly and severally liable for the fee.

Section 9008(e)(2) defines *branded prescription drug* as (i) any prescription drug the application for which was submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (FFDCA) (21 U.S.C. 355(b)), or (ii) any biological product the license for which was submitted under section 351(a) of the Public Health Service Act (42 U.S.C. 262(a)). For this purpose, a *prescription drug* is any drug that is subject to section 503(b) of the FFDCA (21 U.S.C. 353(b)).

Section 9008(b) provides rules for determining the amount of the annual fee for each covered entity. Under section 9008(b)(4), the aggregate fee amount each year for all covered entities (referred to as the *applicable amount*) is \$2.5 billion for fee year 2011; \$2.8 billion for fee years 2012 and 2013; \$3 billion for fee years 2014 through 2016; \$4 billion for fee year 2017; \$4.1 billion for fee year 2018; and \$2.8 billion for fee year 2019 and thereafter. Section 9008(b)(1) requires the applicable amount for each year to be allocated, using a specified formula, among covered entities with aggregate branded prescription drug sales of over \$5 million to specified government programs or pursuant to coverage under such programs. Section 9008(e)(4) provides that the *specified government programs* are the Medicare Part B program, the Medicare Part D program, the Medicaid program, any program under which branded prescription drugs are procured by the Department of Veterans Affairs, any program under which branded prescription drugs are procured by the Department of Defense, and the TRICARE retail pharmacy program (collectively, the Programs).

Specifically, section 9008(b)(1) provides that the annual fee for each covered entity is calculated by determining the ratio of (i) the covered entity's branded prescription drug sales

taken into account during the preceding calendar year to (ii) the aggregate branded prescription drug sales taken into account for all covered entities during the same year, and applying this ratio to the applicable amount. *Sales taken into account* means branded prescription drug sales after the application of the percentage adjustment table in section 9008(b)(2). The sales data is generally to be provided by the Centers for Medicare and Medicaid Services of the Department of Health and Human Services (CMS), the Department of Veterans Affairs (VA), and the Department of Defense (DOD) (collectively, the Agencies) pursuant to section 9008(g).

Section 9008(b)(3) requires the Secretary to determine the amount of each covered entity's fee and permits the Secretary to rely on reports submitted by the Agencies and any other source of information available to the Secretary in determining that amount. Section 9008(i) also directs the Secretary to publish guidance necessary to carry out the purposes of the statute.

Section 9008(f) treats the fee as an excise tax with respect to which only civil actions for refunds under the provisions of subtitle F of the Code will apply. Thus, the fee may be assessed and collected using the procedures in subtitle F without regard to the restrictions on assessment in section 6213 (relating to petitions to the Tax Court). Section 9008(f) also characterizes the fee as a nondeductible tax under section 275 of the Code.

IRS Guidance

On November 29, 2010, the Internal Revenue Service (IRS) released Notice 2010-71 (2010-50 IRB 822), which proposed an approach to implementing the section 9008 fee and requested comments on the proposed approach. The proposed approach included an opportunity to report certain information to the IRS relevant to the fee calculation and provided that the IRS would provide each covered entity with notice of a preliminary fee calculation. This notice was modified and superseded by Notice 2011-9 (2011-6 IRB 459), which was released on January 14, 2011.

On April 29, 2011, the IRS released Rev. Proc. 2011-24 (2011-20 IRB 787), which established a process for covered entities to submit claimed errors in their preliminary fee calculations for consideration before final fee calculations for 2011. On May 27, 2011, the IRS released Notice 2011-46 (2011-25 IRB 887) to defer the due date for submission of error reports and the last

possible date for sending final fee calculations for 2011.

Explanation of Provisions

The temporary regulations describe the rules related to the fee and the actions to be taken before the September 30th due date of each year's fee. The temporary regulations first provide a general overview of the rules and then provide an explanation of terms used in implementing the fee. Next, the temporary regulations describe the information requested from covered entities and provided by the Agencies. The temporary regulations then describe how the fee is calculated and provide for a subsequent adjustment. The temporary regulations then provide for a notice of the preliminary fee calculation, a dispute resolution process to allow covered entities to submit error reports relating to the preliminary fee calculation, and a notice of the final fee calculation. The temporary regulations also explain how to pay the fee, how the fee is treated for tax purposes, and how to make refund claims.

These temporary regulations are generally consistent with the approach proposed in previous IRS guidance. Certain modifications and additions were made in response to public comments that were received in response to the solicitation in Notice 2011-9. The changes and the public comments are discussed in more detail in this preamble.

I. Overview

The temporary regulations provide guidance on the annual fee imposed on covered entities engaged in the business of manufacturing or importing branded prescription drugs by section 9008. Generally, each covered entity with aggregate branded prescription drug sales of over \$5 million to the Programs (or pursuant to the Programs) is liable for an annual fee in each fee year that is based on its sales of branded prescription drugs in the sales year that corresponds to the fee year in an amount determined by the IRS under these temporary regulations.

II. Explanation of Terms

The temporary regulations define numerous key terms used in section 9008 and in these regulations, including *agencies*, *branded prescription drug*, *covered entity*, *fee year*, *government programs*, *sales taken into account*, and *sales year*. Explanations of several terms are discussed in more detail in this preamble.

A. Manufacturer or Importer

Section 9008(d)(1) provides that *covered entity* means any manufacturer or importer with gross receipts from branded prescription drug sales. Consistent with the proposal in previous IRS guidance, the temporary regulations define a manufacturer or importer of a branded prescription drug as the person identified in the Labeler Code of the National Drug Code (NDC) for such a drug. The NDC is an identifier assigned by the FDA to a prescription drug. The Labeler Code is the first five numeric characters of the NDC or the first six numeric characters when the available five-character code combinations are exhausted.

B. Designated Entity

Consistent with the proposal in previous IRS guidance, the temporary regulations provide that, in the case of a controlled group that is treated as a single covered entity under section 9008(d)(2), the controlled group may identify a person as the designated entity that acts for the controlled group concerning the section 9008 fee. However, the temporary regulations further provide that if the controlled group, without regard to foreign corporations included under section 9008(d), is also an affiliated group that filed a consolidated return for Federal income tax purposes, the designated entity is the common parent of the affiliated group identified on the tax return filed for the sales year. If the controlled group is not an affiliated group that filed a consolidated return for Federal income tax purposes, it may select a person as the designated entity on Form 8947, "Report of Branded Prescription Drug Information." If the controlled group does not select a person as a designated entity on its Form 8947, the IRS will select a person as a designated entity for the controlled group and advise the filer accordingly.

C. Orphan Drug Sales

Section 9008(e)(3) excludes orphan drug sales from the definition of branded prescription drug sales. Consistent with the proposal in previous IRS guidance, the temporary regulations define *orphan drug*, subject to certain exceptions, as any branded prescription drug for which any person claimed a section 45C credit and that credit was allowed for any taxable year. The temporary regulations further provide that an orphan drug does not include any drug for which there has been a final assessment or court order disallowing the full section 45C credit taken for the drug. Additionally, an

orphan drug does not include any drug for any sales year after the calendar year in which the FDA approved the drug for marketing for any indication other than the treatment of a rare disease or condition for which a section 45C credit was allowed, regardless of whether a section 45C credit was allowed for the drug either before, at the same time, or after this FDA approval.

Several commentators suggested that a drug should be considered an orphan drug if the section 45C credit was "allowable"; that is, the section 45C credit could have been claimed, rather than was claimed. Other commentators suggested that orphan drug status should be given to a drug for which a section 45C credit was allowed even though the drug had been approved by the FDA for marketing for an indication other than the treatment of a rare disease or condition for which a section 45C credit was allowed.

The temporary regulations do not adopt these suggestions. The plain language of section 9008(e)(3) requires the section 45C credit to have actually been allowed rather than to have merely been allowable. In addition, the Treasury Department and the IRS interpret section 9008(e)(3) to mean that if a drug is ever approved for an indication other than the treatment of a rare disease or condition for which a section 45C credit was allowed, whether before, during, or after a section 45C credit was allowed for the drug, sales of that drug are not considered sales of an orphan drug. However, a drug will retain its orphan drug status if the drug receives approval for a subsequent indication for a rare disease or condition for which a subsequent section 45C credit was allowed.

III. Information Requested From Covered Entities

Consistent with the proposal in previous IRS guidance, the temporary regulations give each covered entity the opportunity to provide information relevant to the determination of the section 9008 fee by annually submitting Form 8947, "Report of Branded Prescription Drug Information," and providing the information specified by the form and instructions, including the NDCs for branded prescription drugs that the covered entity sold to the Programs (or pursuant to coverage under the Programs), Medicare and Medicaid rebate information, section 45C orphan drug information, members of controlled groups, and designated entity information.

One commentator suggested that the Treasury Department and the IRS confirm that submission of Form 8947 is

voluntary. Section 51.3T(a) of the temporary regulations provides that a covered entity *may* file a completed Form 8947; thus, the submission of Form 8947 is voluntary.

Commentators expressed a preference for CMS to include all rebate data in their reports to the IRS rather than collecting rebate data from the covered entities on Form 8947. The IRS and CMS are continuing to work on this issue. Until CMS can report all the relevant rebate data, covered entities will continue to have the opportunity to submit rebate data as requested on Forms 8947 and in the format prescribed in the form instructions.

Several commentators suggested that the Treasury Department and the IRS provide guidance on how covered entities may amend their Form 8947 to correct errors or omissions in the information reported. A number of covered entities notified the IRS of corrections to their Forms 8947 in the error reports that they submitted as part of the dispute resolution process provided under Rev. Proc. 2011-24. That proved to be an efficient and effective way to relay corrections. Accordingly, under the temporary regulations, a covered entity may notify the IRS of any changes or additions to information it submitted on Form 8947 by submitting error reports in the dispute resolution process, discussed later in this preamble.

IV. Information Provided by the Agencies

Consistent with the proposal in the previous IRS guidance, the temporary regulations provide that the IRS will (1) compile a list of branded prescription drugs by NDC using the data submitted on Forms 8947; (2) apply appropriate due diligence; and (3) provide the Agencies with the list. The temporary regulations describe the data the Agencies are to provide the IRS annually for each NDC on the list by Program. The temporary regulations further clarify that the IRS may revise the list of NDCs as a result of information received in the dispute resolution process, and that the data the IRS uses to produce the final fee determination includes any revisions provided by the Agencies at the completion of the dispute resolution process.

Commentators raised questions about the descriptions in previous IRS guidance of the methodology used by the Agencies to report branded prescription drug sales to the IRS and asked that these descriptions be clarified. In addition, some of the error reports submitted as part of the dispute

resolution process under Rev. Proc. 2011-24 identified the need for clarification in describing Agency data. In response to the comments and the issues illuminated by the error reports, the temporary regulations provide revised descriptions of the data and computations for some of the Programs.

Commentators raised questions about the methodology proposed for computing branded prescription drug sales for Medicare Part B. Specifically, they questioned the use of Medicare-allowed charges to establish the sales rather than a computation based on the per-unit average sales price (ASP) and the units paid for under Medicare Part B as specified in section 9008(g)(2). Commentators also asked whether CMS would use ASP (that is, ASP plus 0%) or ASP plus 6% (which reflects amounts actually paid) in computing the sales figures. After considering the comments, CMS refined its calculation process. Thus, the temporary regulations provide that branded prescription drug sales for Medicare Part B will be computed based on ASP and units paid for under Medicare Part B.

Commentators also requested clarification about how sales will be calculated for branded prescription drugs that are not separately payable or reported. In the unusual situation where CMS is unable to establish a reliable proportion of sales by NDC, for example due to unavailable, inaccurate, or incomplete manufacturer sales data, the temporary regulations clarify that CMS has a back-up method that will use Medicare Part D utilization percentages in lieu of manufacturer data. It should be noted, however, that for the 2011 fee calculations, this back-up method was not required.

Commentators also expressed concerns about whether Medicare Part B is capturing complete data with respect to non-separately payable drugs, that is, drugs that are not directly correlated with a specific HCPCS Code. CMS recognizes the commentators' concern and has made extensive efforts to gather as complete a data set as possible. CMS will continue to work with the data available to capture non-separately payable drugs.

Some commentators asked whether the sales data from Medicaid reflected sales where Medicaid was the secondary payer, resulting potentially in duplicate reporting where another one of the Programs (for example, Medicare Part B), was the primary payer. In response, CMS has revised the Medicaid methodology to exclude non-Medicaid payments, and the temporary regulations include a description of this aspect of the methodology.

Commentators asked whether TRICARE sales data would be net of refunds and rebates associated with specific NDCs. The temporary regulations make clear that DOD will report for TRICARE the sales data for each NDC based on retail pharmacy claims submitted during the sales year, net of any refunds or rebates. Commentators questioned whether the VA sales data excluded purchases made at individual treatment facilities. The VA includes most of its purchases made at the individual medical treatment facility level in its data because most of these purchases are made via VA's Pharmaceutical Prime Vendor. The description of VA sales data contained in the temporary regulation is revised from the description contained in earlier guidance to eliminate language suggesting that sales at the individual medical treatment facility level are not included and to clarify that the sales data is net of refunds and rebates.

V. Fee Calculation Including Adjustment

The temporary regulations clarify that the IRS will compute the fee for a covered entity based on the branded prescription drug sales data for each NDC reported by the Agencies and any rebate data for each NDC reported by the covered entities. For purposes of computing the fee, each NDC will be assigned to the covered entity that owns the NDC as of the end of the day on December 31st of the sales year. For a covered entity that is a controlled group, this includes all NDCs that a member of the covered entity owns as of the end of the day on December 31st of the sales year.

The temporary regulations provide that two years are relevant to the calculation of the section 9008 fee: The fee year, and the calendar year of the branded prescription drug sales, which will be used to determine the amount of the fee (the sales year). As proposed in previous IRS guidance, the temporary regulations use the second calendar year preceding the fee year as the sales year for purposes of calculating the section 9008 fee. The Treasury Department and the IRS have determined that, although DOD and VA are expected to have complete data on branded prescription drug sales for the calendar year immediately preceding the fee year within the time frame necessary to administer the fee, CMS is not expected to have comparable data because it cannot complete its data processing within the necessary time frame. Accordingly, the IRS will calculate the fee based on the branded prescription drug sales data provided by the Agencies for the second calendar year

preceding the fee year. Because the use of the second preceding year as the sales year, rather than the immediately preceding year, may affect the amount of the fee paid by a covered entity, the annual fee due in every year after 2011 will include an adjustment amount. This adjustment amount will be added (or subtracted), as appropriate, to (or from) the fee otherwise payable by the covered entity in the fee year in which the adjustment is calculated.

The proposal in previous guidance was to compute the adjustment separately for each NDC. Commentators raised questions about the effect of the adjustment where a drug is owned by different covered entities in the second preceding year and immediately preceding year and asked whether the adjustment could be computed at the covered entity level rather than the NDC level. The Treasury Department and the IRS have considered these questions, and have decided to calculate the adjustment at the covered entity level.

The adjustment will reflect the difference between the fee determined for a covered entity in the immediately preceding fee year, using data from the second calendar year preceding that fee year, and what the fee for the covered entity would have been for the immediately preceding fee year using data from the calendar year immediately preceding the prior fee year. For example, for 2012, the adjustment amount for a covered entity will be the difference between the 2011 fee computed using 2009 sales data, and what the 2011 fee would have been using 2010 sales data. Although the adjustment reflects a revision of the prior year's fee based on data from the sales year immediately preceding the prior fee year, the adjustment is only taken into account by adding it to or subtracting it from the fee computed for the current fee year.

VI. Notice of Preliminary Fee Calculation

Consistent with the proposal in the previous IRS guidance, the temporary regulations provide that the IRS will provide each covered entity with a notice of preliminary fee calculation each year that will include the covered entity's preliminary fee calculation; the covered entity's branded prescription drug sales, by NDC, for each Program; the covered entity's branded prescription drug sales taken into account after application of section 9008(a)(2); the aggregate branded prescription drug sales taken into account for all covered entities; after the 2011 fee year, a preliminary adjustment amount; and a reference to the fee

dispute resolution process set forth in guidance published in the Internal Revenue Bulletin. The date by which the IRS will send the preliminary fee calculation notice will be specified for future years in guidance published in the Internal Revenue Bulletin. For 2011, the IRS sent the notices by May 16, 2011. The Treasury Department and the IRS anticipate sending these notices earlier in future years.

VII. Dispute Resolution Process

Consistent with previous IRS guidance, the temporary regulations provide for a dispute resolution process that allows a covered entity to submit error reports in response to the preliminary fee calculation for the IRS to consider before performing a final fee calculation. The temporary regulations describe the information that covered entities must submit. The IRS will specify in guidance published in the Internal Revenue Bulletin the format for error report submissions and the date by which a covered entity must submit an error report(s). For 2011, a covered entity's error report was required to be submitted no later than June 10, 2011. The Treasury Department and the IRS anticipate that covered entities will have more time to prepare and send their error reports to the IRS in future years.

Several commentators requested the ability to submit additional error reports after the IRS sends notification of the final fee determination. In the interest of providing finality to the fee calculation process, the temporary regulations do not adopt this suggestion.

VIII. Notification and Payment of Fee

Section 9008(a) provides that the annual fee must be paid not later than the annual date specified by the Secretary, but in no event later than September 30th of each fee year. The temporary regulations provide that the IRS will send each covered entity its final fee calculation for that year no later than August 31st and that the covered entity must pay the fee by September 30th by electronic funds transfer. For 2011, the IRS will send covered entities notification of their 2011 final fee calculation by August 24th. This notification will include the covered entity's final fee; the covered entity's branded prescription drug sales by NDC for each Program; the covered entity's branded prescription drug sales taken into account after application of section 9008(a)(2); the aggregate branded prescription drug sales taken into account for all covered entities; after the 2011 fee year, an adjustment

amount; and the final determination with respect to error reports.

There is no tax return to be filed for the section 9008 fee.

IX. Tax Treatment of Fee

Section 9008(f)(1) provides that the branded prescription drug fee for purposes of subtitle F of the Internal Revenue Code shall be treated as an excise tax with respect to which only civil actions for refund under procedures of subtitle F shall apply. Thus, under the temporary regulations, the section 9008 fee is treated as an excise tax for purposes of subtitle F of the Code (sections 6001–7874) to which the deficiency procedures of sections 6211–6216 do not apply. The temporary regulations provide that the IRS must assess the amount of the section 9008 fee for any fee year within three years of September 30th of that fee year.

X. Refund Claims

The temporary regulations provide that any claim for refund must be filed on Form 843, “Claim for Refund and Request for Abatement.”

Availability of IRS Documents

IRS notices and the revenue procedure cited in this preamble are published in the Internal Revenue Bulletin or Cumulative Bulletin and are available at IRS.gov.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866, as supplemented by Executive Order 13563. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (APA) (5 U.S.C. chapter 5) does not apply to these regulations. For applicability of the Regulatory Flexibility Act (5 U.S.C. chapter 6), please refer to the Special Analysis section in the preamble to the cross-referenced notice of proposed rulemaking in the Proposed Rules section in this issue of the **Federal Register**. Pursuant to section 7805(f) of the Code, these regulations have been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small businesses.

Section 553(b) of the APA does not apply to these regulations because they are interpretative rules. Alternatively, the Treasury Department and the IRS have determined that good cause exists under section 553(b)(B) of the APA. That section provides that an agency is not required to publish a notice of

proposed rulemaking in the **Federal Register** when the agency, for good cause, finds that notice and public comment thereon are impracticable, unnecessary, or contrary to the public interest. Due to the novel and complex issues raised by the branded prescription drug fee provision and the required coordination with other governmental agencies, the Treasury Department and the IRS have concluded that it would take significantly longer than the time between enactment (March 23, 2010) and the date of collection of the first fee (no later than September 30, 2011) to draft and issue a proposed rule with a comment period, review comments thoroughly, and then draft and issue a final rule. Accordingly, the Treasury Department and the IRS have determined that the notice and comment procedures are impracticable.

In the months following enactment of section 9008, the Treasury Department and the IRS, in coordination with other governmental agencies, developed the proposed methodologies and processes to compute, verify, assess and collect the annual fee amounts, and published notices and a revenue procedure in the Internal Revenue Bulletin describing the proposed approach and soliciting public comments. The Treasury Department and the IRS provided an extended comment period to give the covered entities an opportunity to review their preliminary fee calculations before submitting comments on the proposed approach. In addition, the Treasury Department and the IRS engaged in discussions with affected external stakeholders and extensively coordinated with other governmental agencies. Consequently, the Treasury Department and the IRS also have determined that additional notice and comment before implementation of the process set forth in these regulations is unnecessary.

Since Congress mandated that the IRS collect the applicable fee amount for the first fee year no later than September 30, 2011, it is necessary that these regulations be issued immediately in order to provide covered entities with the rules governing the fee and payment prior to issuance of final fee determinations. However, comments are being solicited in the cross-referenced notice of proposed rulemaking that is in the Proposed Rules section in this issue of the **Federal Register** and will be considered before final regulations are issued regarding the branded prescription drug fee.

Drafting Information

The principal author of these regulations is Celia Gabrysh, Office of

the Associate Chief Counsel (Passthroughs and Special Industries). However, other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects

26 CFR Part 51

Drugs, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR chapter 1 is amended by adding part 51 to subchapter D and amending part 602 as follows:

■ **Paragraph 1.** Part 51 is added to read as follows:

PART 51—BRANDED PRESCRIPTION DRUG FEE

Sec.

- 51.1T Overview (temporary).
- 51.2T Explanations of terms (temporary).
- 51.3T Information requested from covered entities (temporary).
- 51.4T Information provided by the agencies (temporary).
- 51.5T Fee calculation (temporary).
- 51.6T Notice of preliminary fee calculation (temporary).
- 51.7T Dispute resolution process (temporary).
- 51.8T Notification and payment of fee (temporary).
- 51.9T Tax treatment of fee (temporary).
- 51.10T Refund claims (temporary).
- 51.11T Effective/applicability date (temporary).
- 51.12T Expiration date (temporary).
- 51.6302–1T Method of paying the branded prescription drug fee (temporary).

Authority: 26 U.S.C. 7805; sec. 9008, Public Law 111–347 (124 Stat. 119).

Section 51.8 also issued under 26 U.S.C. 6302(a).

Section 51.6302–1 also issued under 26 U.S.C. 6302(a).

§ 51.1T Overview (temporary).

(a) The regulations in this part 51 are designated “Branded Prescription Drug Fee Regulations.”

(b) The regulations in this part 51 provide guidance on the annual fee imposed on covered entities engaged in the business of manufacturing or importing branded prescription drugs by section 9008 of the Patient Protection and Affordable Care Act (ACA), Public Law 111–148 (124 Stat. 119 (2010)), as amended by section 1404 of the Health Care and Education Reconciliation Act of 2010 (HCERA), Public Law 111–152 (124 Stat. 1029 (2010)). All references in

these regulations to section 9008 are references to section 9008 of the ACA, as amended by section 1404 of HCERA. Unless otherwise indicated, all other section references are to sections in the Internal Revenue Code. All references to “fee” in these regulations are references to the fee imposed by section 9008.

(c) Section 9008(b)(4) sets an applicable fee amount for each year, beginning with 2011, that will be apportioned among covered entities with aggregate branded prescription drug sales of over \$5 million to government programs or pursuant to coverage under such programs. Generally, each covered entity is liable for a fee in each fee year that is based on its sales of branded prescription drugs in the sales year that corresponds to the fee year in an amount determined by the Internal Revenue Service (IRS) under the rules of this part.

§ 51.2T Explanation of terms (temporary).

(a) *In general.* This section explains the terms used in this part for purposes of the fee imposed by section 9008 on branded prescription drugs.

(b) *Agencies.* The term *agencies* means—

(1) The Centers for Medicare and Medicaid Services of the Department of Health and Human Services (CMS);

(2) The Department of Veterans Affairs (VA); and

(3) The Department of Defense (DOD).

(c) *Branded prescription drug*—(1) *In general.* The term *branded prescription drug* means—

(i) Any prescription drug the application for which was submitted under section 505(b) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(b)); or

(ii) Any biological product the license for which was submitted under section 351(a) of the Public Health Service Act (42 U.S.C. 262(a)).

(2) *Prescription drug.* The term *prescription drug* means any drug that is subject to section 503(b) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 353(b)).

(d) *Branded prescription drug sales.* The term *branded prescription drug sales* means sales of branded prescription drugs to any government program or pursuant to coverage under any such government program. However, the term does not include sales of orphan drugs.

(e) *Covered entity*—(1) *In general.* The term *covered entity* means any manufacturer or importer with gross receipts from branded prescription drug sales including—

- (i) A single-person covered entity; or
- (ii) A controlled group.

(2) *Single-person covered entity.* The term *single-person covered entity* means a covered entity that is not affiliated with any other covered entity.

(3) *Controlled group.* The term *controlled group* means a group of at least two covered entities that are treated as a single employer under section 52(a), 52(b), 414(m), or 414(o).

(4) *Special rules for controlled groups.* For purposes of paragraph (e)(3) of this section (related to controlled groups)—

(i) A foreign entity subject to tax under section 881 is included within a group under section 52(a) or 52(b); and

(ii) A covered entity is treated as being a member of a controlled group if it is a member of the group on the end of the day on December 31st of the sales year.

(f) *Designated entity*—(1) *In general.* The term *designated entity* means the person that acts for a controlled group regarding the fee by—

(i) Filing Form 8947, “Report of Branded Prescription Drug Information”;

(ii) Receiving IRS communications about the fee for the group;

(iii) Filing an error report for the group, if applicable, as described in § 51.7T; and

(iv) Paying the fee to the IRS.

(2) *Selection of designated entity*—(i) *Choice of controlled group.* Unless the controlled group is an affiliated group that filed a consolidated return for Federal income tax purposes, the controlled group may select a person as the designated entity by filing Form 8947 in accordance with the form instructions. Among other requirements, the designated entity must state that all the manufacturers or importers of branded prescription drugs that are members of the group have consented to the selection of the designated entity.

(ii) *Requirement for affiliated groups; common parent.* If the controlled group, without regard to foreign corporations included under section 9008(d)(2)(B), is also an affiliated group that filed a consolidated return for Federal income tax purposes, the designated entity is the common parent of the affiliated group as identified on the tax return filed for the sales year. The covered entities in an affiliated group must name the common parent as the designated entity on Form 8947.

(iii) *IRS selection of a designated entity.* If a controlled group does not select a designated entity, the IRS will select a member of the controlled group as the designated entity for the controlled group.

(g) *Fee year.* The term *fee year* means the calendar year in which the fee for a

particular sales year must be paid to the government.

(h) *Government programs.* The term *government programs* (collectively “Programs”), means—

(1) The Medicare Part B program;

(2) The Medicare Part D program;

(3) The Medicaid program;

(4) Any program under which branded prescription drugs are procured by the Department of Veterans Affairs;

(5) Any program under which branded prescription drugs are procured by the Department of Defense; and

(6) The TRICARE retail pharmacy program.

(i) *Manufacturer or importer.* The term *manufacturer or importer* means the person identified in the Labeler Code of the National Drug Code (NDC) for a branded prescription drug.

(j) *NDC.* The term *NDC* means the National Drug Code. The NDC is an identifier assigned by the Food and Drug Administration (FDA) to a branded prescription drug, as well as other drugs. The Labeler Code is the first five numeric characters of the NDC or the first six numeric characters when the available five-character code combinations are exhausted.

(k) *Orphan drugs*—(1) *In general.* Except as provided in paragraph (j)(2) of this section, the term *orphan drug* means any branded prescription drug for which any person claimed a section 45C credit and that credit was allowed for any taxable year.

(2) *Exclusions.* The term *orphan drug* does not include—

(i) Any drug for which there has been a final assessment or court order disallowing the full section 45C credit taken for the drug; or

(ii) Any drug for any sales year after the calendar year in which the FDA approved the drug for marketing for any indication other than the treatment of a rare disease or condition for which a section 45C credit was allowed, regardless of whether a section 45C credit was allowed for the drug either before, in the same year as, or after this FDA designation.

(3) *FDA marketing approval for treatment of another rare disease or condition.* If a drug has prior FDA marketing approval for the treatment of a rare disease or condition for which a section 45C credit was allowed, and the FDA subsequently gives the drug marketing approval for the treatment of another rare disease or condition for which another section 45C credit was also allowed, the drug retains its status as an orphan drug provided the FDA has never approved the drug for marketing for any indication other than the treatment of a rare disease or condition

for which a section 45C credit was allowed.

(4) *Examples.* The following examples illustrate the rules of this paragraph (k):

Example 1: Allowance of section 45C credit and later FDA marketing approval of drug for an indication other than the treatment of a rare disease or condition. (i) *Facts.* Drug A is a branded prescription drug that was not on the market before 2008. In 2008, a covered entity claimed a section 45C credit for its qualified clinical testing expenses related to Drug A. There was no final IRS assessment or court order that disallowed the full credit for Drug A. In 2009, the FDA approved Drug A for marketing for an indication other than the treatment of the rare disease or condition for which the section 45C credit was allowed and this indication was not for another rare disease or condition for which a section 45C was allowed.

(ii) *Analysis.* In 2008 and 2009, Drug A is an orphan drug because: first, it was a branded prescription drug for which a person claimed a section 45C credit and for which that credit was allowed for a taxable year; second, there was not a final assessment or court order disallowing the full credit taken for the drug; and third, before 2009, the FDA did not approve the drug for marketing for any indication other than the treatment of a rare disease or condition for which a section 45C credit was allowed. However, Drug A is not an orphan drug for the 2010 sales year or later sales years because in 2009 the FDA approved Drug A for marketing for an indication other than the treatment of the rare disease or condition for which the section 45C credit was allowed and this indication was not for treatment of another rare disease or condition for which a section 45C credit was allowed.

Example 2: FDA marketing approval of drug for an indication other than the treatment of a rare disease or condition and later allowance of section 45C credit. (i) *Facts.* Drug B is a branded prescription drug that was not on the market before 2008. In 2008, FDA approved Drug B for marketing for an indication other than the treatment of a rare disease or condition for which a section 45C credit was allowed. In 2009, a covered entity claimed a section 45C credit for its qualified clinical testing expenses related to Drug B. There was no final IRS assessment or court order that disallowed the full credit for Drug B.

(ii) *Analysis.* In 2008, Drug B is not an orphan drug because no section 45C credit was allowed. In 2009, although the covered entity was allowed a section 45C credit for its qualified clinical testing expenses related to Drug B and there was no final IRS assessment or court order that disallowed the full credit, Drug B still is not an orphan drug because the FDA had approved the drug in 2008 for marketing for an indication other than the treatment of a rare disease or condition for which a section 45C credit was allowed in 2009. Thus, Drug B is not an orphan drug for the 2009 sales year or later sales years.

Example 3: Allowance of section 45C credit and subsequent allowance of section 45C

credit with no intervening FDA marketing approval of drug for an indication other than the treatment of a rare disease or condition for which a section 45C credit was allowed.

(i) *Facts.* Drug C is a branded prescription drug that was not on the market before 2007. In 2007, a covered entity claimed a section 45C credit for its qualified clinical testing expenses related to Drug C. In 2009, a covered entity claimed an additional section 45C credit for its qualified clinical testing expenses related to Drug C for marketing for the treatment of a rare disease or condition different than the one for which the section 45C credit was claimed in 2007. There was no final IRS assessment or court order that disallowed the full credit for Drug C in 2007 or 2009. The FDA has not approved Drug C for an indication other than the treatment of a rare disease or condition for which a section 45C was allowed.

(ii) *Analysis.* In 2007 and 2008, Drug C is an orphan drug because: first, it was a branded prescription drug for which a person claimed a section 45C credit and for which that credit was allowed for a taxable year; second, there was not a final assessment or court order disallowing the full credit taken for the drug; and third, FDA had not approved the drug for marketing for any indication other than the treatment of a rare disease or condition for which a section 45C credit was allowed. In 2009, Drug C retains its orphan drug status because another section 45C credit was allowed and the FDA did not approve Drug C for marketing for any indication other than the treatment of another rare disease or condition for which a section 45C credit was allowed. Thus, Drug C is an orphan drug for the 2010 sales year.

(l) *Sales taken into account.* The term *sales taken into account* means branded prescription drug sales after application of the percentage adjustment table in section 9008(b)(2) (relating to annual sales less than \$400,000,001). See § 51.5T(a)(3).

(m) *Sales year.* The term *sales year* means the second calendar year preceding the fee year. Thus, for example, for the fee year of 2011, the sales year is 2009.

§ 51.3T Information requested from covered entities (temporary).

(a) *In general.* Annually, each covered entity may submit a completed Form 8947, "Report of Branded Prescription Drug Information," in accordance with the instructions for the form. Generally, the form solicits information from covered entities on NDCs, orphan drugs, designated entities, rebates, and other information specified by the form or its instructions.

(b) *Due date.* Form 8947 must be filed by the date prescribed in guidance in the Internal Revenue Bulletin.

§ 51.4T Information provided by the agencies (temporary).

(a) *In general.* For each sales year, the IRS will compile a list of branded

prescription drugs by NDC using the data submitted on Forms 8947 and in error reports submitted as part of the dispute resolution process (described in § 51.7T) and, after applying appropriate due diligence, will provide this list to the Agencies. The Agencies will provide data to the IRS on branded prescription drug sales during the sales year by Program and NDC. The Agencies will provide data for use in preparing the preliminary fee calculation (described in §§ 51.5T and 51.6T) and may revise or supplement that data following review of error reports submitted as part of the dispute resolution process. The calculation methodology for calculating the sales amounts for each Program, including any reasonable estimation techniques and assumptions that the Agencies expect to use, is described in this section.

(b) *Medicare Part D.* CMS will aggregate the ingredient cost reported in the "Ingredient Cost Paid" field and the units reported in the "Quantity Dispensed" field of the Prescription Drug Event (PDE) records at the NDC level for each sales year. Only PDE data that Part D sponsors have submitted by the PDE submission deadline (within 6 months after the end of the sales year) and have been approved for inclusion in the Part D payment reconciliation will be included.

(c) *Medicare Part B—(1) In general.* CMS will determine branded prescription drug sales under Medicare Part B using the following two data sources:

(i) CMS will use data reported by manufacturers pursuant to section 1847A(c) of the Social Security Act to calculate the annual weighted average sales price (ASP) for each Healthcare Common Procedure Coding System (HCPCS) code for the sales year.

(ii) CMS will use the Medicare Part B National Summary Data File located at http://www.cms.gov/NonIdentifiableDataFiles/03_PartBNationalSummaryDataFile.asp to obtain the number of allowed billing units per HCPCS code for claims incurred during the sales year.

(2) *Calculation.* Using the data described in paragraph (c)(1) of this section, CMS will determine branded prescription drugs sales under Medicare Part B as described in paragraphs (c)(3), (4), and (5) of this section.

(3) *HCPCS code; single entity.* For each HCPCS code consisting solely and exclusively of branded prescription drugs (as identified by their respective NDCs) manufactured by a single entity, CMS will multiply the annual weighted ASP by the total number of allowed billing units paid during the sales year

to determine the total sales for all NDCs associated with the HCPCS code attributed to Medicare Part B.

(4) *HCPCS code; multiple manufacturers and/or multiple drugs—*

(i) *Step one.* For each HCPCS code consisting of a mixture of branded prescription drugs made by different manufacturers and/or a mixture of branded prescription and generic drugs, CMS will determine—

(A) The annual weighted ASP for the HCPCS code;

(B) The total number of allowed billing units paid by Medicare Part B for each HCPCS code during the sales year;

(C) The names of the entities engaged in manufacturing each NDC assigned to the HCPCS code; and

(D) Those entities (if any) identified in paragraph (c)(4)(C) of this section that are manufacturing branded prescription drugs assigned to the HCPCS code.

(ii) *Step two.* Using the information from paragraph (c)(4)(i) of this section, CMS will then do the following:

(A) Calculate the proportion of sales, expressed as a percentage, attributed to each NDC assigned to the HCPCS code by determining the percentage of total sales reported to CMS by each manufacturer of NDC(s) that are assigned to the HCPCS code. For example, if HCPCS code JXXXX contains three drugs with a total of \$310,000 sales reported by manufacturers to CMS for the sales year, and \$100,000 was reported for Drug A, \$200,000 was reported for Drug B, and \$10,000 was reported for Drug C, the proportion of sales attributed to each NDC will be 32.26 percent for Drug A, 64.52 percent for Drug B, and 3.22 percent for Drug C; and

(B) For each NDC, multiply the product of the annual weighted ASP and the total allowed billing units paid by Medicare Part B for the HCPCS code by the proportion of sales calculated in paragraph (c)(4)(ii)(A) of this section to determine the sales reportable to the IRS (that is, percentage × (annual weighted ASP × allowed units) = total sales reported to IRS for the NDC). The sales for each manufacturer's NDCs assigned to a HCPCS code are summed and the total sales for each manufacturer's NDCs in a HCPCS code will be reported to the IRS.

(5) *HCPCS code; unable to establish a reliable proportion of sales.* If CMS is unable to establish a reliable proportion of sales attributable to each NDC assigned to the HCPCS code using the method described in paragraph (c)(4)(ii)(A) of this section, CMS will use

Medicare Part D utilization percentages in lieu of the proportion of sales determined under paragraph (c)(4)(ii)(A) of this section to perform the calculation described in paragraph (c)(4)(ii)(B) of this section.

(d) *Medicaid.* (1) CMS will determine the branded prescription drug sales for Medicaid as the per-unit Average Manufacturer Price (AMP) less the Unit Rebate Amounts (URA) that CMS calculates based on manufacturer-reported pricing data multiplied by the number of units reported billed by states to manufacturers. This data will be based on the data reported to CMS during the sales year by covered entities and the states for drugs paid for by the states in the Medicaid drug rebate program during the sales year.

(2) For any covered entity identified in the first five (or six) digits of an NDC during any of the four quarters of a sales year, CMS will use the following methodology to derive the sales figures that account for third-party payers, such as Medicare Part B:

(i) Report total dollars per NDC for AMP-URA multiplied by the units reported by a state or states.

(ii) Determine the percentage of the total amount reimbursed that is the Medicaid amount of that reimbursement. For example, if the total amount reimbursed is \$100,000, and the Medicaid amount reimbursed is \$20,000, then the percentage is 20 percent.

(iii) Multiply the percentage of the Medicaid amount of that reimbursement (in the example in paragraph (d)(2)(ii) of this section, 20 percent) by the dollar figure derived from paragraph (d)(2)(i) of this section (AMP minus URA multiplied by units) to get the new adjusted sales dollar totals.

(e) *Department of Veterans Affairs.* VA will provide, by NDC, the total amount paid (net of refunds and rebates, when they are associated with a specific NDC) for each branded prescription drug procured by the VA for its beneficiaries during the sales year. For this purpose, a drug is procured on the invoice (billing) date. The basis of this information will be national procurement data reported during the sales year by VA's Pharmaceutical Prime Vendor to the VA Pharmacy Benefits Management Service and National Acquisition Center.

(f) *Department of Defense.* The DOD will provide, by Labeler Code, the manufacturer's name, the NDC, brand name, and the amount paid (net of rebates and or refunds) for each branded

prescription drug procured by DOD (for DOD programs other than the TRICARE retail pharmacy program) during the sales year. For DOD programs other than the TRICARE retail pharmacy program, a drug is procured based upon the date it was ordered. DOD will provide, by Labeler Code, the manufacturer's name, the NDC, brand name, and the amount paid (net of rebates or refunds) for each branded prescription drug procured by DOD through the TRICARE Retail Pharmacy Program during the sales year. For the TRICARE retail pharmacy program, a drug is procured based upon the date it was dispensed. The amount paid is based on the submitted ingredient cost paid, aggregated by NDC, for eligible TRICARE retail pharmacy claims submitted during the program year, minus any refunds or rebates for the corresponding claims.

§ 51.5T Fee calculation (temporary).

(a) *Fee components—(1) In general.* For every fee year, the IRS will calculate a covered entity's total fee as described in this section. For each fee year after 2011, the IRS will determine a covered entity's total fee by applying, if applicable, the adjustment amount described in paragraph (e) of this section to the entity's allocated fee described in paragraph (d) of this section.

(2) *Calculation of branded prescription drug sales.* Each covered entity's allocated fee for any fee year is equal to an amount that bears the same ratio to the applicable amount as the covered entity's branded prescription drug sales taken into account during the sales year bears to the aggregate branded prescription drug sales of all covered entities taken into account during the sales year.

(3) *Applicable amount.* The applicable amounts for fee years are—

Fee year	Applicable amount
2011	\$2,500,000,000
2012	2,800,000,000
2013	2,800,000,000
2014	3,000,000,000
2015	3,000,000,000
2016	3,000,000,000
2017	4,000,000,000
2018	4,100,000,000
2019 and thereafter	2,800,000,000

(3) *Sales taken into account.* A covered entity's branded prescription drug sales taken into account during any calendar year are as follows:

Covered entity's branded prescription drug sales during the calendar year that are:	Percentage of branded prescription drug sales taken into account is
Not more than \$5,000,000	0
More than \$5,000,000 but not more than \$125,000,000	10
More than \$125,000,000 but not more than \$225,000,000	40
More than \$225,000,000 but not more than \$400,000,000	75
More than \$400,000,000	100

(b) *Determination of branded prescription drug sales.* The IRS will compile each covered entity's branded prescription drug sales for each Program by NDC. Each NDC will be attributed to the covered entity that owns the NDC as of the end of the day on December 31st of the sales year. For a covered entity that is a controlled group, this includes all NDCs that a member of the covered entity owns as of the end of the day on December 31st of the sales year. For this purpose, the IRS may revise the list of NDCs as a result of information received in the dispute resolution process, and the data the IRS uses to produce the final fee calculation will include any revisions provided by the Agencies at the completion of the dispute resolution process. Each covered entity's branded prescription drug sales will be reduced by its Medicare Part D rebates and Medicaid state supplemental rebate amounts in the following manner. If CMS has the rebate information for these Programs for a sales year, CMS will report to the IRS branded prescription drug sales net of rebates. If CMS does not have the rebate information for these programs for a sales year, the IRS will reduce the branded prescription drug sales reported for these Programs by rebates reported by the covered entities on Forms 8947.

(c) *Determination of sales taken into account.* (1) For each sales year and for each covered entity, the IRS will calculate sales taken into account. The resulting number is the numerator of the ratio described in paragraph (d)(1) of this section.

(2) For each sales year, the IRS will calculate the aggregate branded prescription drug sales taken into account for all covered entities. The resulting number is the denominator of the ratio described in paragraph (d)(2) of this section.

(d) *Allocated fee calculation.* For each covered entity for each fee year, the IRS will calculate the entity's allocated fee by multiplying the applicable amount from paragraph (a)(2) of this section by a fraction—

(1) The numerator of which is the covered entity's branded prescription

drug sales taken into account during the sales year (described in paragraph (c)(1) of this section); and

(2) The denominator of which is the aggregate branded prescription drug sales taken into account for all covered entities during the same year (described in paragraph (c)(2) of this section).

(e) *Adjustment amount.* For each fee year after 2011, in addition to the allocated fee computed under paragraph (d) of this section, the IRS will also calculate an adjustment amount that reflects the difference between the allocated fee determined for the covered entity in the immediately preceding fee year, using data from the second calendar year preceding that fee year, and what the allocated fee would have been for that entity for the immediately preceding fee year using data from the calendar year immediately preceding that fee year. For example, for 2012, the adjustment amount for a covered entity will be the difference between the entity's 2011 allocated fee, using 2009 data, and what the 2011 allocated fee would have been using 2010 data. Although the adjustment reflects a revision of the prior year's fee based on data from the year immediately preceding the prior fee year, the adjustment is only taken into account by adding it to or subtracting it from the allocated fee computed under paragraph (d) of this section for the current fee year to arrive at the total fee for the current fee year.

§ 51.6T Notice of preliminary fee calculation (temporary).

(a) *Content of notice.* For each sales year, the IRS will make a preliminary calculation of the fee for each covered entity as described in § 51.5T. The IRS will notify each covered entity of its preliminary fee calculation for that sales year. The notification to a covered entity of its preliminary fee calculation will include—

- (1) The covered entity's allocated fee;
- (2) The covered entity's branded prescription drug sales, by NDC, by Program;
- (3) The covered entity's branded prescription drug sales taken into

account after application of § 51.5T(a)(3);

(4) The aggregate branded prescription drug sales taken into account for all covered entities;

(5) After the 2011 fee year, the covered entity's adjustment amount calculated as described in § 51.5T(e); and

(6) A reference to the fee dispute resolution procedures set forth in guidance published in the Internal Revenue Bulletin.

(b) *Time of notice.* The IRS will send each covered entity notice of its preliminary fee calculation by the date prescribed in guidance published in the Internal Revenue Bulletin.

§ 51.7T Dispute resolution process (temporary).

(a) *In general.* Upon receipt of its preliminary fee calculation, each covered entity will have an opportunity to dispute this calculation by submitting to the IRS an error report as described in this section. The IRS will provide its final determination with respect to error reports no later than the time the IRS provides a covered entity with a final fee calculation.

(b) *Program errors.* To assert that there has been one or more errors in drug sales data, a covered entity must submit a separate error report for each Program with the asserted errors. Each report must include the following information—

(1) Entity name, entity number (if applicable, from Part I (a) of the Form 8947), address, and Employer Identification Number (EIN) as previously reported on the Form 8947;

(2) The name, telephone number, and e-mail address (if available) of one or more employees or representatives of the entity with whom the Agencies may discuss the claimed errors. A Form 2848, "Power of Attorney and Declaration of Representative," must be filed with the error report; and

(3) The name of the Program that reported the data, the NDC, the specific amount of sales data disputed, the proposed corrected amount, an explanation of why the Agency should use the proposed corrected data instead,

and documentation of any Program drug sales data or other information used to establish the existence of any errors.

(c) *Errors other than Program drug sales errors.* To assert that there has been one or more errors in the mathematical calculation of the fee, the rebate data, the listing of an NDC for an orphan drug, or any other error (other than Program drug sales data errors), a covered entity must submit one error report, separated into sections by type of error, and must include the following information—

(1) Entity name, entity number (if applicable, from Part I (a) of the Form 8947), address, and EIN as previously reported on the Form 8947;

(2) The name, telephone number, and e-mail address (if available) of one or more employees or representatives of the entity with whom the IRS and/or the Agencies may discuss the claimed errors. If the representative is not an employee of the entity, a Form 2848 must be filed with the error report;

(3) For a mathematical calculation error, the specific calculation element(s) that the entity disputes and its proposed corrected calculation;

(4) For a rebate data error, the NDC for the drug to which it relates; a discussion of whether the data used in the preliminary fee calculation matches previously reported Form 8947 data on rebates; and, if the data used in the preliminary fee calculation does match the Form 8947 data, an explanation of why the Form 8947 data was erroneous and why the IRS should use the proposed corrected data instead;

(5) For the listing of an NDC for an orphan drug, the name and NDC of the orphan drug; a discussion of whether the data used in the preliminary fee calculation matches previously reported Form 8947 data on orphan drugs; and, if the data used in the preliminary fee calculation does match the Form 8947 data, an explanation of why the Form 8947 data was erroneous and why the IRS should use the proposed corrected data instead;

(6) For any other asserted error, an explanation of the nature of the error, how the error affects the fee calculation, an explanation of how the entity established that an error occurred, the proposed correction to the error, and an explanation of why the IRS or Agency should use the proposed corrected data instead;

(7) If an entity is using data to establish the existence of an error and that data was not reported on Form 8947 or contained in the notification of the preliminary fee calculation, a description of what the data is, how the

entity acquired the data, and who maintains it; and

(8) Documentation of any rebate and orphan drug data, or other information used to establish the existence of any errors.

(d) *Form, manner, and timing of submission.* Each covered entity must submit its error report(s) in the form and manner that is prescribed in guidance published in the Internal Revenue Bulletin. This guidance will also prescribe the date by which each covered entity must submit its report(s).

§ 51.8T Notification and payment of fee (temporary).

(a) *Notification of final fee calculation.* No later than August 31st of each fee year, the IRS will send each covered entity its final fee calculation for that year. In any fee year, the IRS will base its final fee calculation on data provided to it by the Agencies as adjusted pursuant to the dispute resolution process. The notification to a covered entity of its final fee calculation will include—

(1) The covered entity's allocated fee;

(2) After the 2011 fee year, an adjustment amount calculated as described in § 51.5T;

(3) The covered entity's branded prescription drug sales, by NDC, by Program;

(4) The covered entity's branded prescription drug sales taken into account after application of § 51.5T(a)(3);

(5) The aggregate branded prescription drug sales taken into account for all covered entities; and

(6) The final determination with respect to error reports.

(b) *Differences in preliminary fee calculation and final fee calculation.* A covered entity's final fee calculation may differ from the covered entity's preliminary fee calculation because of changes made pursuant to the dispute resolution process described in § 51.7T. Even if a covered entity did not file an error report described in § 51.7T, a covered entity's final fee may differ from a covered entity's preliminary fee because of a change in data reported by the Agencies after resolution of error reports, including a change in the aggregate prescription drug sales figure. A change in aggregate prescription drug sales data can affect each covered entity's fee because each covered entity's fee is a fraction of the aggregate fee collected from all covered entities. A covered entity's final fee may also differ from its preliminary fee calculation because the data used in the preliminary fee calculation may have contained inaccurate branded prescription drug

sales information that was corrected or updated at the conclusion of the dispute resolution process.

(c) *Payment of final fee.* Each covered entity must pay its final fee by September 30th of the fee year. For a controlled group, the payment must be made using the designated entity's EIN as reported on Form 8947. The fee must be paid by electronic funds transfer as required by § 51.6302-1T. There is no tax return to be filed for the fee.

(d) *Joint and several liability.* In the case of a controlled group that is liable for the fee, all covered entities within the controlled group are jointly and severally liable for the fee. Accordingly, if a covered entity's fee is not paid, the IRS will separately assess each covered entity in the group for the full amount of the controlled group's fee.

§ 51.9T Tax treatment of fee (temporary).

(a) *Treatment as an excise tax.* The fee imposed by section 9008 is treated as an excise tax for purposes of subtitle F of the Code (sections 6001-7874). Thus, references in subtitle F to "taxes imposed by this title," "internal revenue tax," and similar references, are also references to the fee imposed by section 9008. For example, the fee imposed by section 9008 is assessed (section 6201), collected (sections 6301, 6321, and 6331), enforced (section 7602), subject to examination and summons (section 7602), and subject to confidentiality rules (section 6103), in the same manner as taxes imposed by the Code.

(b) *Deficiency procedures.* The deficiency procedures of sections 6211-6216 do not apply to the fee imposed by section 9008.

(c) *Limitation on assessment.* The IRS must assess the amount of the fee for any fee year within three years of September 30th of that fee year.

(d) *Application of section 275.* The fee is treated as a tax described in section 275(a)(6) (relating to taxes for which no deduction is allowed).

§ 51.10T Refund claims (temporary).

Any claim for a refund of the fee must be made by the person that paid the fee to the government and must be made on Form 843, "Claim for Refund and Request for Abatement," in accordance with the instructions for that form.

§ 51.11T Effective/applicability date (temporary).

Sections 51.1T through 51.10T apply to any fee on branded prescription drug sales that is due on or after September 30, 2011.

§ 51.12T Expiration date (temporary).

The applicability of §§ 51.1T through 51.10T expires August 15, 2014.

§ 51.6302–1T Method of paying the branded prescription drug fee (temporary).

(a) *Fee to be paid by electronic funds transfer.* Under the authority of section 6302(a), the fee imposed on branded prescription drug sales by section 9008 and § 51.5T must be paid by electronic funds transfer as defined in § 31.6302–1(h)(4)(i), as if the fee were a depository tax. For the time for paying the fee, see § 51.8T.

(b) *Effective/applicability date.* This section applies on and after August 18, 2011.

(c) *Expiration date.* The applicability of this section expires August 15, 2014.

PART 602—OMB CONTROL NUMBERS UNDER THE PAPERWORK REDUCTION ACT

■ **Par. 2.** The authority citation for part 602 continues to read as follows:

Authority: 26 U.S.C. 7805.

■ **Par. 3.** In § 602.101, paragraph (b) is amended by adding the following entry in numerical order to the table to read as follows:

§ 602.101 OMB Control numbers.

CFR part or section where identified and described	Current OMB Control No.
51.8T	1545–2209

Sarah Hall Ingram,
Deputy Commissioner for Services and Enforcement.

Approved: August 12, 2011.

Emily S. McMahon,
Acting Assistant Secretary of the Treasury (Tax Policy).

[FR Doc. 2011–21011 Filed 8–15–11; 11:15 am]

BILLING CODE 4830–01–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket No. USCG–2011–0760]

RIN 1625–AA87

Security Zone; Potomac River, Georgetown Channel, Washington, DC

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary security zone encompassing certain waters of the Potomac River, Georgetown Channel, in Washington, DC, in order to safeguard high-ranking public officials from terrorist acts and incidents. This action is necessary to ensure the safety of persons and property, and prevent terrorist acts or incidents. This rule prohibits vessels and people from entering the security zone and requires vessels and persons in the security zone to depart the security zone, unless specifically exempt under the provisions in this rule or granted specific permission from the Coast Guard Captain of the Port Baltimore.

DATES: This rule is effective from 6 a.m. until 6 p.m. on August 28, 2011.

ADDRESSES: Documents indicated in this preamble as being available in the docket are part of docket USCG–2011–0760 and are available online by going to <http://www.regulations.gov>, inserting USCG–2011–0760 in the “Keyword” box, and then clicking “Search.” They are also available for inspection or copying at the Docket Management Facility (M–30), U.S. Department of Transportation, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: If you have questions on this temporary rule, call or e-mail Mr. Ronald L. Houck, at Sector Baltimore Waterways Management Division, Coast Guard; telephone 410–576–2674, e-mail Ronald.L.Houck@uscg.mil. If you have questions on viewing the docket, call Renee V. Wright, Program Manager, Docket Operations, telephone 202–366–9826.

SUPPLEMENTARY INFORMATION:

Regulatory Information

The Coast Guard is issuing this temporary final rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is contrary to public interest to delay the effective date of this rule. The Coast Guard is establishing the security zone

to protect high-ranking government officials, mitigate potential terrorist acts, and enhance public and maritime safety and security. The Coast Guard was unable to publish a NPRM due to the short time period between event planners notifying the Coast Guard of the event and publication of the security zone. Furthermore, delaying the effective date would be contrary to the security zone’s intended objectives of protecting high-ranking government officials, mitigating potential terrorist acts and enhancing public and maritime safety security.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Due to the need for immediate action, the restriction of vessel traffic is necessary to protect life, property and the environment, therefore, a 30-day notice period is impracticable. Delaying the effective date would be contrary to the security zone’s intended objectives of protecting high-ranking government officials, mitigating potential terrorist acts and enhancing public and maritime safety and security.

Background and Purpose

The President of the United States will be attending the Martin Luther King, Jr. National Memorial in Washington, DC dedication ceremony on August 28, 2011. The ceremony is located along the waterfront in Washington, DC, in close proximity to navigable waterways within the Captain of the Port’s Area of Responsibility.

The Coast Guard has given each Coast Guard Captain of the Port the ability to implement comprehensive port security regimes designed to safeguard human life, vessels, and waterfront facilities while still sustaining the flow of commerce. The Captain of the Port Baltimore is establishing this security zone to protect high-ranking government officials, mitigate potential terrorist acts, and enhance public and maritime safety and security in order to safeguard life, property, and the environment on or near the navigable waters.

Discussion of Rule

Through this regulation, the Coast Guard will establish a security zone. The security zone will be in effect from 6 a.m. until 6 p.m. on August 28, 2011. The security zone will include all navigable waters of the Potomac River, Georgetown Channel, within 75 yards from eastern shore measured perpendicularly to the shore between the Theodore Roosevelt Memorial Bridge and the Arlington Memorial

Bridge, and within 150 yards from eastern shore measured perpendicularly to the shore from the Arlington Memorial Bridge to the George Mason Memorial Bridge (the most western bridge of the 5-span, Fourteenth Street Bridge Complex), including all waters of the Georgetown Channel Tidal Basin, located in Washington, DC. This location is entirely within the Area of Responsibility of the Captain of the Port Baltimore, as set forth at 33 CFR 3.25–15.

This rule requires that entry into, attempted entry into, or remaining in this security zone is prohibited unless authorized by the Coast Guard Captain of the Port Baltimore. Except for persons or vessels authorized by the Captain of the Port Baltimore, no person or vessel may enter or remain in the regulated area during the enforcement period. All vessels underway within the security zone at the time it is in effect are to depart the zone immediately. To seek permission to transit the area, the Captain of the Port Baltimore can be contacted at telephone number 410–576–2693 or on Marine Band Radio, VHF–FM channel 16 (156.8 MHz). Coast Guard vessels enforcing the security zone can be contacted on Marine Band Radio, VHF–FM channel 16 (156.8 MHz). The Coast Guard will issue Broadcast Notices to Mariners to further publicize the security zone.

Regulatory Analyses

We developed this rule after considering numerous statutes and executive orders related to rulemaking. Below we summarize our analyses based on 13 of these statutes or executive orders.

Regulatory Planning and Review

This rule is not a significant regulatory action under section 3(f) of Executive Order 12866, Regulatory Planning and Review, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that Order. The Office of Management and Budget has not reviewed it under that Order. Although this security zone restricts vessel traffic from transiting through the affected area, vessels may transit safely around the zone. Furthermore, the effect of this regulation will not be significant due to the limited size and duration that the regulated area will be in effect. In addition, notifications will be made to the maritime community via marine information broadcasts so mariners may adjust their plans accordingly.

Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this rule would have a significant economic impact on a substantial number of small entities. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities. This rule may affect the following entities, some of which might be small entities: The owners or operators of vessels intending to operate or transit through or within the security zone during the enforcement period. The security zone will not have a significant economic impact on a substantial number of small entities for the following reasons. The security zone is of limited size and duration. Vessel traffic may safely transit around the zone. Before the effective period, maritime advisories will be widely available to the maritime community.

Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we offer to assist small entities in understanding the rule so that they can better evaluate its effects on them and participate in the rulemaking process.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency’s responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

Federalism

A rule has implications for federalism under Executive Order 13132,

federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them. We have analyzed this rule under that Order and have determined that it does not have implications for federalism.

Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

Taking of Private Property

This rule will not effect a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

Civil Justice Reform

This rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

Protection of Children

We have analyzed this rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and does not create an environmental risk to health or risk to safety that may disproportionately affect children.

Indian Tribal Governments

This rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

Energy Effects

We have analyzed this rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a “significant

energy action” under that order because it is not a “significant regulatory action” under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy. The Administrator of the Office of Information and Regulatory Affairs has not designated it as a significant energy action. Therefore, it does not require a Statement of Energy Effects under Executive Order 13211.

Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023-01 and Commandant Instruction M16475.1D, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321-4370f), and have concluded this action is one of a category of actions which do not individually or cumulatively have a significant effect on the human environment. This rule is categorically excluded, under figure 2-1, paragraph (34)(g), of the Instruction. This rule involves establishing a temporary security zone. An environmental analysis checklist and a categorical exclusion determination are available in the docket where indicated under **ADDRESSES**.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 33 U.S.C. 1231; 46 U.S.C. Chapter 701, 3306, 3703; 50 U.S.C. 191, 195; 33 CFR 1.05-1, 6.04-1, 6.04-6, 160.5; Pub. L. 107-295, 116 Stat. 2064; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T05-0760 to read as follows:

§ 165.T05-0760 Security Zone; Potomac River, Georgetown Channel, Washington, DC.

(a) *Location.* The following area is a security zone: All waters of the Potomac River, Georgetown Channel, within 75 yards from eastern shore measured perpendicularly to the shore between the Theodore Roosevelt Memorial Bridge and the Arlington Memorial Bridge, and within 150 yards from eastern shore measured perpendicularly to the shore from the Arlington Memorial Bridge to the George Mason Memorial Bridge (the most western bridge of the 5-span, Fourteenth Street Bridge Complex), including all waters of the Georgetown Channel Tidal Basin, located in Washington, DC.

(b) *Definitions.* As used in this section:

Captain of the Port Baltimore means the Commander, U.S. Coast Guard Sector Baltimore, Maryland.

Designated representative means any Coast Guard commissioned, warrant, or petty officer who has been authorized by the Captain of the Port Baltimore to assist in enforcing the security zone described in paragraph (a) of this section.

(c) *Regulations.* The general security zone regulations found in 33 CFR 165.33 apply to the security zone created by this temporary section, § 165.T05-0760.

(1) All persons are required to comply with the general regulations governing security zones found in 33 CFR 165.33.

(2) Entry into or remaining in this zone is prohibited unless authorized by the Coast Guard Captain of the Port Baltimore. All vessels underway within this security zone at the time it is implemented are to depart the zone.

(3) Persons desiring to transit the area of the security zone must first obtain authorization from the Captain of the Port Baltimore or his designated representative. To seek permission to transit the area, the Captain of the Port Baltimore and his designated representatives can be contacted at telephone number 410-576-2693 or on Marine Band Radio, VHF-FM channel 16 (156.8 MHz). The Coast Guard

vessels enforcing this section can be contacted on Marine Band Radio, VHF-FM channel 16 (156.8 MHz). Upon being hailed by a U.S. Coast Guard vessel, or other Federal, State, or local agency vessel, by siren, radio, flashing light, or other means, the operator of a vessel shall proceed as directed. If permission is granted, all persons and vessels must comply with the instructions of the Captain of the Port Baltimore or his designated representative and proceed at the minimum speed necessary to maintain a safe course while within the zone.

(4) *Enforcement.* The U.S. Coast Guard may be assisted in the patrol and enforcement of the zones by Federal, State, and local agencies.

(d) *Enforcement period.* This section will be enforced from 6 a.m. until 6 p.m. on August 28, 2011.

Dated: August 4, 2011.

Mark P. O'Malley,

Captain, U.S. Coast Guard, Captain of the Port Baltimore.

[FR Doc. 2011-21027 Filed 8-17-11; 8:45 am]

BILLING CODE 9110-04-P

POSTAL SERVICE

39 CFR Part 111

First-Class Package Service

AGENCY: Postal Service™.

ACTION: Final rule.

SUMMARY: The Postal Service is revising *Mailing Standards of the United States Postal Service*, Domestic Mail Manual (DMM®), 401, 402, 433, 434, 435, 436, 503, 507, 602, and 705 to introduce a new competitive product called First-Class Package Service, which will replace and remove First-Class Mail® commercial base and commercial plus parcels from the market-dominant product offering. First-Class Mail retail single-piece parcels remain a market-dominant product offering.

DATES: *Effective Date:* October 3, 2011.

FOR FURTHER INFORMATION CONTACT: Markes Lucius at 202-268-6140 or Bill Chatfield at 202-268-7278.

SUPPLEMENTARY INFORMATION: On February 24, 2011, the Postal Service filed a notice with the Postal Regulatory Commission to institute a new competitive product, then tentatively called “Lightweight Commercial Parcels,” and to remove First-Class Mail commercial base and commercial plus parcels from the market-dominant product offerings. The Commission completed its review on April 6, 2011.

In this final rule, the Postal Service provides a description of the conditions

for eligibility for the new competitive product, now called First-Class Package Service. First-Class Package Service parcels will receive the same service as First-Class Mail, however, parcels mailed at commercial base prices may not contain any content that meets the definition of 'letter' in 39 CFR 310.1 (for example, no personal correspondence is permitted). First-Class Package Service parcels mailed at commercial plus prices have no content restrictions, other than the generic restrictions on nonmailable matter.

Effective Dates and More Information

The Postal Service will begin to account for any First-Class Mail commercial base or commercial plus priced parcels as the competitive First-Class Package Service product on October 1, 2011. Mailers will retain the option to mail eligible items weighing 13 ounces or less at retail First-Class Mail single-piece parcel prices.

Mailers may begin using the new labeling and marking methods outlined in this final rule as of October 3, 2011, but will not be required to do so until May 2012.

The Postal Service adopts the following changes to *Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM)*, which is incorporated by reference in the *Code of Federal Regulations*. See 39 CFR 111.1.

List of Subjects in 39 CFR Part 111

Administrative practice and procedure, Postal Service.

Accordingly, 39 CFR Part 111 is amended as follows:

PART 111—[AMENDED]

■ 1. The authority citation for 39 CFR Part 111 is revised to read as follows:

Authority: 5 U.S.C. 552(a); 13 U.S.C. 301–307; 18 U.S.C. 1692–1737; 39 U.S.C. 101, 401, 403, 404, 414, 416, 3001–3011, 3201–3219, 3403–3406, 3621, 3622, 3626, 3632, 3633, and 5001.

■ 2. Revise the following sections of *Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM)*, as follows:

Mailing Standards of the United States Postal Service, Domestic Mail Manual (DMM)

* * * * *

400 Commercial Parcels

401 Physical Standards

1.0 Physical Standards for Parcels

* * * * *

1.3 Maximum Weight and Size

[Revise the second sentence of 1.3 as follows:]

* * * Lower weight limits apply to parcels mailed at Priority Mail commercial plus cubic, Regional Rate Box, First-Class Package Service, Standard Mail, Parcel Select Regional Ground, and Bound Printed Matter prices. * * *

* * * * *

2.0 Additional Physical Standards by Class of Mail

* * * * *

[Revise the title of 2.3 as follows:]

2.3 First-Class Package Service Parcels

2.3.1 Weight

[Revise the text of 2.3.1 as follows:]

First-Class Package Service parcels cannot exceed 13 ounces, except for commercial plus parcels, which may exceed 13 ounces but must weigh less than 16 ounces.

2.3.2 Additional Physical Standards

[Revise the second sentence of the introductory text of 2.3.2 as follows:]

* * * First-Class Package Service parcels are eligible for Delivery Confirmation and Signature Confirmation services. A First-Class Package Service parcel is:

* * * * *

402 Elements on the Face of a Mailpiece

* * * * *

2.0 Placement and Content of Markings

* * * * *

[Revise the heading of 2.4 as follows:]

2.4 First-Class Package Service Markings

2.4.1 Placement and Content

Markings must be placed as follows:

[Revise the second sentence of item 2.4.1a as follows:]

a. * * * The basic required marking “Presorted (or “PRSRT”) First-Class Package” (or “PKG”) must be printed as part of; directly below; or to the left of the postage on presorted parcels. * * *

* * * * *

[Revise the second sentence of item 2.4.1b as follows:]

b. * * * In addition to the basic marking in 2.4.1a, First-Class Package Service parcels claiming commercial

parcel prices must be marked as follows in a prominent location on the address side of the parcel:

[Revise items 2.4.1b1 and b2 as follows:]

1. Except for parcels with permit imprint postage, parcels claiming commercial base prices must be marked “Commercial Base Price” or “ComBasPrice.”

2. All parcels claiming commercial plus prices must be marked “Commercial Plus Price” or “ComPlsPrice.”

* * * * *

430 First-Class Package Service

433 Prices and Eligibility

[Revise the title of 1.0 as follows:]

1.0 Prices and Fees for First-Class Package Service

1.1 Price Application

[Add a new last sentence to item 1.1 as follows:]

* * * All prices and fees can be found in Notice 123–Price List.

* * * * *

[Revise the title and text of 1.2 as follows:]

1.2 Price Determination for First-Class Package Service Parcels

First-Class Package Service commercial base prices are the same price for the first three ounces, with additional prices per additional ounce or fraction thereof; any fraction of an ounce after the first three ounces is considered a whole ounce. The minimum postage per addressed piece is that for a piece weighing 3 ounces. First-Class Package Service commercial plus prices are not based on ounce increments but are flat rate prices at each sortation level for parcels weighing less than 16 ounces.

1.3 Commercial Base Parcel Prices

[Revise the text of 1.3 as follows:]

First-Class Package Service presorted parcels no more than 13 ounces in weight are eligible for commercial base prices. Nonpresorted First-Class Package Service parcels no more than 13 ounces in weight mailed under the following conditions are eligible for single-piece commercial base prices:

a. The residual portion of a presorted mailing prepared under 435.4.0.

b. Nonpresorted mailings paid by permit imprint, IBI meter, or PC Postage.

c. See 402.2.4 for marking requirements.

1.4 Commercial Plus Prices

[Revise the text of 1.4 as follows:]

First-Class Package Service machinable parcels less than 16 ounces and Merchandise Return Service parcels are eligible for commercial plus prices for customers that:

a. Establish a customer commitment agreement with the Postal Service to mail more than 5,000 First-Class Package Service machinable parcels (including those parcels returned using Merchandise Return Service) at commercial plus prices in a calendar year. Customers may contact their account manager or the manager, Shipping Support (see 608.8.0 for address) for additional information.

b. Pay for postage by using a permit imprint.

c. Enter a minimum of 500 pieces of mail for each presorted mailing, or a minimum of 200 pieces or 50 pounds of mail for each single-piece mailing, or receive parcels returned using Merchandise Return Services.

d. Use the Electronic Verification System (eVS) or submit an electronic postage statement with a computerized manifest.

e. Mark parcels under 402.2.4.

* * * * *

1.6 Presort Mailing Fee

[Revise the text of 1.6 as follows:]

Payment of a presort mailing fee is required once each 12-month period at each office of mailing by any person or organization entering mailings at automation or Presorted First-Class Mail or any First-Class Package Service prices. Payment of one fee allows a mailer to enter mail at all those prices. Persons or organizations paying this fee may enter mail of their clients as well as their own mail. The fee may be paid in advance only for the next 12 months and only during the last 60 days of the current service period. The fee charged is that which is in effect on the date of payment.

[Revise the title and text of 1.7 as follows:]

1.7 Computing Postage for First-Class Package Service

Affix postage to each piece or, for permit imprint mailings, multiply the number of pieces at each price increment by the corresponding postage price, add the *unrounded* products (amounts), and round off the total postage to the nearest whole cent.

* * * * *

[Revise the title of 2.0 as follows:]

2.0 Content Standards for First-Class Package Service Parcels**2.1 General**

[Revise the text of 2.1 as follows:]

With the exception of restricted material described in 601.8.0, any mailable item may be mailed at First-Class Package Service commercial plus prices. Parcels mailed at First-Class Package Service commercial base prices are not sealed against inspection and may not contain documents or personal correspondence, except that such parcels may contain invoices, receipts, incidental advertising, and other documents that relate in all substantial respects to merchandise contained in the parcels.

[Revise the title and text of 2.2 as follows:]

2.2 Matter Required To Be Mailed as First-Class Mail

See 133.3.0 for a detailed description of matter required to be mailed as First-Class Mail (or Express Mail or Priority Mail). The following types of contents must be mailed as First-Class Mail (or Express Mail or Priority Mail):

a. Bills and statements of account.

b. Personal information.

c. Handwritten and typewritten material.

[Delete items 2.3 through 2.5 in their entirety and renumber current 2.6 as new 2.3 and revise the title and text as follows:]

2.3 Restricted Air Transportation

All First-Class Package Service parcels are subject to limitations for air transportation. See 601.10.0 for restrictions on air transportation.

[Revise the title of 3.0 as follows:]

3.0 Basic Standards for First-Class Package Service Parcels**3.1 Description of Service**

[Revise the text of 3.1 as follows:]

First-Class Package Service parcels receive expeditious handling and transportation.

3.2 Defining Characteristics**3.2.1 Inspection of Contents**

[Revise the text of 3.2.1 as follows:]

Parcels mailed at First-Class Package Service commercial plus prices are closed against postal inspection. Federal law and USPS regulations restrict both opening and reviewing the contents of First-Class Package Service commercial

plus parcels by anyone other than the addressee.

[Revise the title and text of 3.2.2 as follows:]

3.2.2 Forwarding and Return Services

The postage price of First-Class Package Service parcels includes forwarding service to a new address for up to 12 months and return of undeliverable parcels to the sender.

[Delete current 3.2.3, Return Service, in its entirety and renumber current 3.2.4 as new 3.2.3 and revise as follows:]

3.2.3 Extra Services for First-Class Package Service Parcels

Extra services available for First-Class Package Service parcels are certificate of mailing service, Certified Mail service, COD service, Delivery Confirmation service, insured mail service (merchandise only), Registered Mail service, return receipt service, restricted delivery service, Signature Confirmation service, and special handling. See information regarding extra services in 503. See 508.7.0 for details about Hold for Pickup service.

[Delete current 3.2.5 and 3.2.6 in their entirety.]

[Revise the heading of 3.3 as follows:]

3.3 Additional Basic Standards for First-Class Package Service Parcels

All presorted First-Class Package Service parcels must:

[Delete current items 3.3a through 3.3e in their entirety; and replace as follows:]

a. Meet the applicable postage payment standards in 434 and 604.7.0.

b. Bear a delivery address that includes the correct ZIP Code or ZIP+4 code and that meets the address quality standards in 3.4 and 3.5.

[Delete 3.4, Presort Mailing Fee, in its entirety and renumber current 3.5 through 3.6 as new 3.4 through 3.5.]

* * * * *

[Revise the title of 4.0 as follows:]

4.0 Price Eligibility for Presorted First-Class Package Service Parcels

* * * * *

434 Postage Payment and Documentation**1.0 Basic Standards for Postage Payment****1.1 Postage Payment Options**

[Revise the first sentence of 1.1 and add a new second sentence as follows:]

Postage for First-Class Package Service parcels must be paid with

affixed postage or permit imprint as specified below. Parcels mailed at commercial plus prices must be mailed with permit imprint postage.* * *

[Revise the title of 2.0 as follows:]

2.0 Postage Payment for Presorted First-Class Package Service Parcels

2.1 Permit Imprint Postage

[Revise the first sentence of 2.1 as follows:]

All First-Class Package Service parcels may bear permit imprint postage under 604.5.0.* * *

[Revise the title and text of 2.2 as follows:]

2.2 Affixed Postage for First-Class Package Service Parcels

Each First-Class Package Service parcel bearing affixed postage (not allowed for commercial plus parcels) must bear the full postage at the First-Class Package Service price for which it qualifies.

* * * * *

3.0 Mailing Documentation

* * * * *

3.2 Basic Documentation Standards

[Revise the text of 3.2 as follows:]

Supporting documentation (see 708.1.0) of postage is required for each mailing except for eVS mailings under 705.2.9, or unless the correct price is affixed to each piece or each piece is of identical weight and the pieces are separated by price when presented for acceptance.

* * * * *

[Delete current 3.5, Standard Format for Documentation, in its entirety (standards are in 708.1.0 referred to above) and renumber current 3.6 through 3.8 as new 3.5 through 3.7.]

* * * * *

435 Mail Preparation

1.0 General Information for Mail Preparation

* * * * *

1.3 Terms for Presort Levels

Terms used for presort levels are defined as follows:

[Revise the introductory line in 1.3a as follows:]

a. 5-digit scheme for First-Class Package Service parcels: * * *

* * * * *

3.0 Sack Labels

* * * * *

3.3 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

* * * * *

[Revise 3.3b as follows:]

b. Codes: The codes shown below must be used as appropriate on Line 2 of sack labels. See 708.6.

[Revise the second row in the table in 3.3 and add a new third row as follows:]

Table with 2 columns: Content type, Code. Row 1: First-Class Package Service, FC. Row 2: Parcels, PARCELS. Row 3: (new), (new).

[Revise the title of 4.0 as follows:]

4.0 Preparing Parcels

4.1 Basic Standards

[Revise the text of 4.1 as follows:]

Each Presorted First-Class Package Service mailing must be prepared in USPS-approved sacks and each parcel marked "Presorted" (or "PRSRT") and "First-Class Package Service." All parcels must be sorted together and prepared under 4.3 and 4.4.

[Revise the title and text of 4.2 as follows:]

4.2 Single-Piece Mail

Single-piece (nonpresorted) First-Class Package Service parcels may be presented as a separate mailing or with a presorted mailing and reported on the same postage statement as follows:

- a. The single-piece mail must be physically separated from other pieces.
b. The single-piece mail must bear no presorted price marking, or must be marked with the correction marking: "Single-Piece" or "SNGLP" under 402.2.4.

* * * * *

4.4 Sacking and Labeling

Preparation sequence, sack size, and labeling:

[Revise item 4.4a2 by changing "FCM" to "FC" as follows:]

a. * * * labeling: * * * * *

2. Line 2: For 5-digit scheme sacks, "FC PARCELS 5D SCH." For 5-digit sacks, "FC PARCELS 5D."

[Revise item 4.4b2 by changing "FCM" to "FC" as follows:]

b. * * * labeling: * * * * *

2. Line 2: "FC PARCELS 3D."

[Revise item 4.4c2 by changing "FCM" to "FC" as follows:]

c. * * * labeling: * * * * *

2. Line 2: "FC PARCELS ADC."

[Revise item 4.4d2 by changing "FCM" to "FC" as follows:]

d. * * * labeling: * * * * *

2. Line 2: "FC PARCELS WKG."

* * * * *

436 Enter and Deposit

1.0 Deposit

[Delete 1.1, Service Objective, in its entirety (stated in 433), and renumber current 1.2 through 1.4 as new 1.1 through 1.3.]

1.1 Time and Location of Deposit

[Revise the text of renumbered 1.1 as follows:]

First-Class Package Service parcels must be deposited at locations and times designated by the postmaster. Metered mail must be deposited in locations under the jurisdiction of the licensing Post Office except under 604.4.5.3. Permit imprint mail must be deposited under 604.5.0 and 705.

1.2 Approved Collections

[Revise the introductory text of renumbered 1.2 as follows:]

The USPS may collect First-Class Package Service parcels at a mailer's facility if part of an approved collection service for other classes of mail; space is available on the transportation; and:

* * * * *

2.0 Verification

2.1 USPS Verification and Mailer Correction

[Revise the text of 2.1 as follows:]

Mailings are subject to USPS procedures to verify correct preparation and postage payment. If, at the acceptance unit, a mailing is found not to qualify for a First-Class Package Service presort price, the mailer must take corrective action or pay a single-piece price (see 2.3). The return of mailings to the mailer's facility for reworking is the mailer's responsibility.

* * * * *

2.3 Payment at Single-Piece Price Rather Than Correcting Errors

[Revise the text of 2.3 as follows:]

A mailer who pays a single-piece First-Class Package Service price rather than correcting presorting errors in a mailing paid with meter or precanceled stamps must either affix metered postage for the additional amount on each piece or pay the difference in cash (or by check) and present the receipt to the acceptance point before the mail may be released for processing. A mailer who makes the same choice for a permit imprint mailing must correct the postage statement to show the higher price.

* * * * *

500 Additional Mailing Services**503 Extra Services**

* * * * *

2.0 Registered Mail

* * * * *

2.2 Basic Information About Registered Mail

* * * * *

2.2.2 Eligible Matter

[Revise the first sentence of 2.2.2 as follows:]

Only mailable matter prepaid with postage at the First-Class Mail, First-Class Package Service, or Priority Mail (excluding Critical Mail) prices may be sent as Registered Mail. * * *

* * * * *

3.0 Certified Mail

* * * * *

3.2 Basic Information

* * * * *

3.2.2 Eligible Matter

[Revise the text of 3.2.2 as follows:]

Only mailable matter prepaid with postage at the First-Class Mail, First-Class Package Service, or Priority Mail (excluding Critical Mail) prices may be sent as Certified Mail.

* * * * *

4.0 Insured Mail

* * * * *

4.2 Basic Information

* * * * *

4.2.2 Eligible Matter

The following types of mail may be insured:

[Revise the text of item 4.2.2a as follows:]

a. First-Class Mail, First-Class Package Service and Priority Mail (including Critical Mail), if it contains matter that is eligible to be mailed at Standard Mail or Package Services prices.

* * * * *

4.3 Mailing

* * * * *

4.3.5 Integrated Barcodes

The following options are available for mailers who print their own labels:

* * * * *

[Revise the first sentence of 4.3.5c as follows:]

c. Mailers must use an integrated barcode (see Exhibit 4.3.5c) when insurance is purchased online for Priority Mail and for parcels mailed at First-Class Mail, First-Class Package Service, Media Mail, Parcel Post, or Parcel Select prices. * * *

* * * * *

5.0 Certificate of Mailing**5.1 Certificate of Mailing Fees**

[Revise the second sentence of 5.1 as follows:]

* * * The correct fee must be paid in addition to postage for mailings of identical pieces of First-Class Mail, First-Class Package Service (except for parcels mailed at commercial plus prices), Priority Mail (excluding Critical Mail), and Package Services. * * *

* * * * *

5.2 Basic Information

* * * * *

5.2.4 Eligible Matter—Bulk Quantities

[Revise the second sentence of 5.2.4 as follows:]

* * * This certificate is provided only for a mailing of identical pieces of First-Class Mail, First-Class Package Service (except for parcels mailed at commercial plus prices), Priority Mail (excluding Critical Mail), Standard Mail, and Package Services. * * *

* * * * *

6.0 Return Receipt

* * * * *

6.2 Basic Information

* * * * *

6.2.2 Eligible Matter

Return receipt service is available for:

* * * * *

[Revise the text of 6.2.2b as follows:]

b. First-Class Mail, First-Class Package Service, and Priority Mail (excluding Critical Mail) when purchased at the time of mailing with Certified Mail, COD, insured mail (for more than \$200.00), or Registered Mail service.

* * * * *

7.0 Restricted Delivery

* * * * *

7.2 Basic Information

* * * * *

7.2.2 Eligible Matter

Restricted Delivery service is available for:

[Revise the text of 7.2.2a as follows:]

a. First-Class Mail, First-Class Package Service, and Priority Mail (excluding Critical Mail) when purchased at the time of mailing with Certified Mail, COD, insured mail (for more than \$200.00), or Registered Mail service.

* * * * *

10.0 Delivery Confirmation

* * * * *

10.2 Basic Information

* * * * *

10.2.2 Eligible Matter

[Revise the first sentence of 10.2.2 as follows:]

Delivery Confirmation is available for First-Class Mail parcels and First-Class Package Service parcels; all Priority Mail pieces; Standard Mail Not Flat-Machinable pieces and machinable or irregular parcels (electronic option only); Package Services, Parcel Select, and Parcel Select Regional Ground parcels (electronic option only) under 401.1.0. * * *

* * * * *

11.0 Signature Confirmation

* * * * *

11.2 Basic Information

* * * * *

11.2.2 Eligible Matter

[Revise the first sentence of 11.2.2 as follows:]

Signature Confirmation is available for First-Class Mail parcels and First-Class Package Service parcels; all Priority Mail pieces; Standard Mail Not Flat-Machinable pieces and machinable or irregular parcels (electronic option only); Package Services, Parcel Select, and Parcel Select Regional Ground

parcels (electronic option only) under 401.1.0. * * *

* * * * *

12.0 Collect on Delivery (COD)

* * * * *

12.2 Basic Information

* * * * *

12.2.2 Eligible Matter

[Revise the introductory sentence of 12.2.2 as follows:]

COD service may be used for Express Mail, First-Class Mail, First-Class Package Service, Priority Mail (excluding Critical Mail), and any Package Services or Parcel Select sub-category if:

* * * * *

12.2.4 Registered COD Mail

[Revise the first sentence of 12.2.4 as follows:]

Sealed domestic mail of any class bearing First-Class Mail or First-Class Package Service postage may be sent as registered COD mail. * * *

* * * * *

13.0 Special Handling

* * * * *

13.2 Basic Information

* * * * *

13.2.2 Availability

[Revise the text of 13.2.2 as follows:]

Special handling service is available only for First-Class Mail, First-Class Package Service, Priority Mail (excluding Critical Mail), Package Services, and Parcel Select pieces.

* * * * *

13.2.4 Bees and Poultry

[Revise the text of 13.2.4 as follows:]

Unless sent at First-Class Mail, First-Class Package Service, or Priority Mail prices, special handling is required for parcels containing honeybees or baby poultry.

* * * * *

507 Mailer Services

1.0 Treatment of Mail

* * * * *

1.4 Basic Treatment

* * * * *

1.4.5 Extra Services

Mail with extra services is treated according to the charts for each class of mail in 1.5, except that:

* * * * *

[Revise the text of 1.4.5b as follows:]

b. All insured First-Class Mail, First-Class Package Service and Priority Mail pieces are forwarded and returned at no additional charge. All insured Standard Mail, Package Services, and Parcel Select pieces are forwarded or returned.

* * * * *

1.5 Treatment for Ancillary Services by Class of Mail

[Revise the title and the introductory text of 1.5.1 as follows:]

1.5.1 First-Class Mail, First-Class Package Service, and Priority Mail

Undeliverable-as-addressed First-Class Mail (including postcards), First-Class Package Service, and Priority Mail pieces are treated under Exhibit 1.5.1, with these additional conditions:

* * * * *

[Revise the text of 1.5.1d as follows:]

d. First-Class Mail, First-Class Package Service or Priority Mail pieces bearing Standard Mail markings and endorsements under 202 and 244.5.1 for letters, 302 and 344.5.1 for flats, and 402 and 444.4.1 for parcels receives forwarding, return, and address correction services for Standard Mail under 1.5.3.

e. "Change Service Requested" is not permitted for the following:

* * * * *

[Revise the text of items 1.5.1e2 and e3 as follows:]

2. First-Class Mail, First-Class Package Service, or Priority Mail pieces containing hazardous materials under 601.10.0.

3. First-Class Mail, First-Class Package Service or Priority Mail pieces with an extra service other than Delivery Confirmation or Signature Confirmation.

[Revise the introductory text of 1.5.1f as follows:]

f. Address Change Service under 4.0 is available for First-Class Mail, First-Class Package Service, and Priority Mail pieces with the ACS participant code for an authorized ACS participant and a valid ancillary service endorsement. Mailers participating in OneCode ACS under 4.2.6 may print an Intelligent Mail barcode on First-Class Mail automation letters instead of a participant code and endorsement. The only endorsements permitted on First-Class Mail, First-Class Package Service and Priority Mail valid ACS pieces are "Address Service Requested", "Change Service Requested" or "Electronic

Service Requested" subject to the following:

* * * * *

[Revise the title of Exhibit 1.5.1 as follows:]

Exhibit 1.5.1 Treatment of Undeliverable First-Class Mail, First-Class Package Service and Priority Mail

* * * * *

[In the table for Change Service Requested, in the third column, last row, revise item (1)(b) as follows:]

(b) First-Class Mail and First-Class Package Service (excluding hazardous materials).

* * * * *

1.8 Returning Mail

* * * * *

[Revise the title and text of 1.8.3 as follows:]

1.8.3 Express Mail, Priority Mail, First-Class Mail, and First-Class Package Service

Mailpieces sent as Express Mail, Priority Mail, First-Class Mail, or First-Class Package Service that cannot be delivered as addressed or forwarded to a new address, unless otherwise requested by the sender, are returned to the sender at no additional charge. Excluding pieces containing live animals, the following are disposed of by the USPS:

a. Priority Mail pieces with a valid Address Change Service (ACS) participant code marked "Perishable" and endorsed "Change Service Requested."

b. First-Class Mail or First-Class Package Service pieces with a valid ACS participant code and endorsed "Change Service Requested."

* * * * *

1.9 Dead Mail

1.9.1 Basic Information

[Revise the introductory text of 1.9.1 as follows:]

Dead mail is matter deposited in the mail that is undeliverable and cannot be returned to the sender. A reasonable effort is made to match articles found loose in the mail with the envelope or wrapper and to return or forward the articles. The disposition of dead mail items is as follows:

* * * * *

[Revise the text of 1.91e as follows:]

e. Except for unendorsed Standard Mail, undeliverable Standard Mail and Package Services, and insured First-Class Mail or First-Class Package

Service pieces containing Standard Mail or Package Services enclosures, that cannot be returned because of an incorrect, incomplete, illegible, or missing return address is opened and examined to identify the sender or addressee.

* * * * *

2.0 Forwarding

* * * * *

2.2 Forwardable Mail

* * * * *

2.2.3 Discontinued Post Office

[Revise the text of 2.2.3 as follows:]

All Express Mail, Priority Mail, First-Class Mail, First-Class Package Service, Periodicals, and Package Services pieces addressed to a discontinued Post Office may be forwarded without added charge to a Post Office that the addressee designates as more convenient than the office to which the USPS ordered the mail sent.

2.2.4 Rural Delivery

[Revise the text of 2.2.4 as follows:]

When rural delivery service is established or changed, a customer of any office receiving mail from the rural carrier of another office may have all Express Mail, Priority Mail, First-Class Mail, First-Class Package Service, Periodicals, and Package Services pieces forwarded to the latter office for delivery without added charge, if the customer files a written request with the postmaster at the former office.

* * * * *

2.2.6 Mail for Military Personnel

[Revise the first sentence of 2.2.6 as follows:]

All Express Mail, First-Class Mail, First-Class Package Service, Periodicals, and Package Services mailpieces addressed to persons in the U.S. Armed Forces (including civilian employees) serving where U.S. mail service operates is forwarded at no added charge when the change of address is caused by official orders. * * *

* * * * *

2.3 Postage for Forwarding

* * * * *

[Revise the title and text of 2.3.3 as follows:]

2.3.3 Priority Mail, First-Class Mail, and First-Class Package Service

Priority Mail, First-Class Mail (including postcards), and First-Class Package Service mailpieces are

forwarded without charge when postage is fully prepaid by the sender.

* * * * *

3.0 Premium Forwarding Service

* * * * *

3.3 Preparation

* * * * *

3.3.3 Mailpieces Requiring a Scan or Signature at Delivery

[Revise the introductory text of 3.3.3 and item 3.3.3a as follows:]

Mailpieces requiring a scan or signature at delivery, such as Express Mail or numbered insured mail, are scanned, and then rerouted immediately and separately to the temporary address, subject to the following:

a. Express Mail, Priority Mail, First-Class Mail and First-Class Package Service mailpieces are rerouted at no additional charge.

* * * * *

[Revise the title and text of 3.3.5 as follows:]

3.3.5 First-Class Mail, First-Class Package Service, and Periodicals Parcels Not Requiring a Scan or Signature at Delivery

First-Class Mail, First-Class Package Service, and Periodicals parcels not requiring a scan or signature at delivery and that do not fit into the weekly Priority Mail shipment are separately rerouted at no additional charge.

* * * * *

3.4 Enter and Deposit

3.4.1 Mailpieces Arriving Postage Due at the Primary Address

* * * Mailpieces arriving postage due are rerouted as follows:

[Revise 3.4.1a as follows:]

a. Postage due First-Class Mail and First-Class Package Service mailpieces are rerouted as First-Class Mail or First-Class Package Service postage due. Only the original postage due amount is collected. There is no additional charge for rerouting the mailpiece.

* * * * *

4.0 Address Correction Services

4.1 Address Correction Service

* * * * *

4.1.5 Other Classes

[Revise the text of 4.1.5 as follows:]

When possible, "on-piece" address correction is provided for Express Mail, Priority Mail, First-Class Mail, First-Class Package Service, Standard Mail,

Package Services, and Parcel Select pieces. If the piece cannot be forwarded, it is returned with new address information or reason for nondelivery attached. When separate corrections are necessary, Form 3547 is mailed to the sender with the address correction fee charged and the mail is forwarded. This service is not available for mailpieces to be delivered by military personnel at any military installation, including APOs and FPOs.

* * * * *

5.0 Recall of Mail

5.1 Who May Recall Mail

* * * * *

5.1.3 Expenses and Postage

[Revise the first sentence of 5.1.3 as follows:]

The mailer must pay all expenses of recalling mail (including return postage for other than First-Class Mail or First-Class Package Service mailpieces).

* * *

* * * * *

600 Basic Standards for All Mailing Services

* * * * *

602 Addressing

1.0 Elements of Addressing

* * * * *

1.3 Address Elements

[Revise the introductory text of 1.3 as follows:]

All mail not bearing a simplified address must bear a delivery address that contains at least the following elements in this order from the top line:

* * * * *

[Revise items 1.3e and 1.3e1 as follows:]

e. ZIP Code where required:

1. ZIP Codes are required on Express Mail, commercial First-Class Mail, First-Class Package Service, Periodicals, Standard Mail, Package Services and Parcel Select mailpieces, all mail sent to military addresses within the United States and to APO and FPO addresses, official mail, Business Reply Mail, and merchandise return service mail.

* * * * *

1.9 Additional Addressing Standards by Class

[Revise the text of 1.9 as follows:]

Basic addressing standards are in the Prices and Eligibility section for each class of mail.

* * * * *

604 Postage Payment Methods

* * * * *

4.0 Postage Meters and PC Postage Products (Postage Evidencing Systems)

4.1 Basic Information

* * * * *

4.1.5 Authorized Classes of Mail

[Revise the text of 4.1.5 as follows:]

Mailers may use postage evidencing systems to affix or apply indicia on any class of mail except First-Class Package Service commercial plus parcels, Periodicals, and Bound Printed Matter.

* * * * *

4.5 Mailings

4.5.1 Mailing Date Format

* * * The mailing date format used in the indicia is also subject to the following conditions.

a. Complete Date. Mailers must use a complete date for the following:

[Revise 4.5.1a1 as follows:]

1. All Express Mail, Priority Mail, First-Class Mail, and First-Class Package Service pieces.

* * * * *

5.0 Permit Imprint (Indicia)

5.1 General Standards

5.1.1 Definition

[Revise the text of 5.1.1 as follows:]

A mailer may be authorized to mail material without affixing postage when payment is made at the time of mailing from a permit imprint advance deposit account established with USPS. This payment method may be used for postage and extra service fees for Express Mail (“eVS” only), Priority Mail, First-Class Mail, First-Class Package Service, Standard Mail, Package Services, and Parcel Select mailpieces. This method is not available for Periodicals.

* * * * *

5.3 Indicia, Design, Placement, and Content

* * * * *

[Revise the title and the first sentence of 5.3.6 as follows:]

5.3.6 Express Mail, Priority Mail, Critical Mail, First-Class Mail and First-Class Package Service Format

A permit imprint indicia on Express Mail, Priority Mail, Critical Mail, First-Class Mail, or First-Class Package Service mailpieces must show “Express Mail,” “Priority Mail” (or “Priority”), “Critical Mail,” “First-Class Mail,” or

“First-Class Package” (or “First-Class Pkg”) as applicable; “U.S. Postage Paid”; city and state; and permit number. * * *

* * * * *

700 Special Standards

* * * * *

705 Advance Preparation and Special Postage Payment Systems

* * * * *

8.0 Preparing Pallets

* * * * *

8.6 Pallet Placards

* * * * *

8.6.5 Line 2 (Content Line)

Line 2 (content line) must meet these standards:

* * * * *

[Revise the table in 8.6.5 by adding a new 7th row (between “First-Class Mail” and “Flats” with “First-Class Package Service” in the Content Type column and “FC PKG” in the Code column as follows:]

Content type	Code
* * * * *	* * * * *
First-Class Package Service FC PKG.

* * * * *

We will publish an appropriate amendment to 39 CFR Part 111 to reflect these changes.

Stanley F. Mires,
Chief Counsel, Legislative.

BILLING CODE 7710–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R02–OAR–2010–1058; FRL–9453–2]

Approval and Promulgation of Implementation Plans; New York Reasonable Further Progress Plans, Emissions Inventories, Contingency Measures and Motor Vehicle Emissions Budgets

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving portions of a proposed State Implementation Plan revision submitted by New York that are intended to meet several Clean Air Act

requirements for attaining the 0.08 part per million 8-hour ozone national ambient air quality standards.

Specifically, EPA is approving into the SIP the following elements which are required by the Act: The 2002 base year and 2008 projection year emissions inventories, the 2008 motor vehicle emissions budgets used for planning purposes, the 2008 Reasonable Further Progress (RFP) plan, and the 2008 RFP Plan contingency measures as they apply to the New York portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT 8-hour ozone moderate nonattainment area. EPA is also approving the 2002 base year emissions inventory for the Poughkeepsie 8-hour ozone moderate nonattainment area and the state-wide 2002 base year ozone emissions inventory.

DATES: *Effective Date:* This rule is effective on September 19, 2011.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R02–OAR–2010–1058. All documents in the docket are listed on the <http://www.regulations.gov> Web site. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute.

Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through <http://www.regulations.gov> or in hard copy at the Environmental Protection Agency, Region II Office, Air Programs Branch, 290 Broadway, 25th Floor, New York, New York 10007–1866. This Docket Facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The Docket telephone number is 212–637–4249.

FOR FURTHER INFORMATION CONTACT: Raymond K. Forde, Air Programs Branch, Environmental Protection Agency, 290 Broadway, 25th Floor, New York, New York 10278, (212) 637–3716.

SUPPLEMENTARY INFORMATION:

I. Background

On March 31, 2011 (76 FR 17801), EPA proposed approval of the New York State Implementation Plan (SIP) submitted on February 8, 2008 and supplemented on December 28, 2009 and January 26, 2011. The SIP submittal addresses the requirements for the New York portion of the New York-Northern New Jersey-Long Island and Poughkeepsie 8-hour ozone moderate nonattainment areas. The New York portion of the New York-Northern New

Jersey-Long Island area is composed of the five boroughs of New York City and the counties of Nassau, Suffolk, Westchester and Rockland (referred to as the New York Metro Area). The Poughkeepsie area is composed of Dutchess, Orange and Putnam counties.

The following Clean Air Act (CAA) requirements were the subject of the March 31, 2011 proposal: The 2002 base year emissions inventory, the 2008 projection year emissions inventories, the 2008 motor vehicle emissions budgets used for planning purposes, the 2008 RFP plan, the 2008 RFP Plan contingency measures as they apply to the New York portion of the New York Metro ozone moderate nonattainment area, the 2002 base year emissions inventory for the Poughkeepsie 8-hour ozone moderate nonattainment area and the state-wide 2002 base year ozone emissions inventory.

With respect to the Poughkeepsie area, EPA has evaluated its air quality monitoring data and has determined the Poughkeepsie area has attained the 8-hour ozone standard. On December 7, 2009, EPA announced this determination in the **Federal Register** (74 FR 63993). Consistent with 40 CFR 51.918, this determination suspends the requirements for various SIP items, including, the requirement to submit an attainment demonstration, an RFP plan, and section 172(c)(9) contingency measures for the eight-hour ozone NAAQS for so long as the area continues to attain the ozone NAAQS. Therefore, EPA is not taking action on these proposed SIP elements for the Poughkeepsie area that are contained in the 8-hour ozone SIP proposal that was submitted to EPA on February 8, 2008. However, EPA is taking action on the 2002 base year emissions inventory for the Poughkeepsie Area.

A detailed discussion of the SIP revisions and EPA's rationale for approving them is contained in the March 31, 2011 proposal and will not be restated here. The reader is referred to the proposal for more details.

II. Public Notice

EPA received no comments in response to the March 31, 2011 proposal. Therefore, in this action, EPA is approving New York's plans.

III. Conclusion

EPA has evaluated New York's submittal for consistency with the Clean Air Act and Agency regulations and policy. EPA is approving into the SIP the following components for the New York portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT 8-hour ozone moderate nonattainment

area which are required by the Act: the 2002 base and 2008 projection year emissions inventories, the 2008 motor vehicle emissions budgets used for planning purposes, the 2008 RFP plan, and the 2008 RFP Plan contingency measures. These components were submitted to EPA by New York in a package entitled "New York SIP for Ozone—Attainment Demonstration for New York Metro Area," dated February 8, 2008 and supplemented on December 28, 2009 and January 26, 2011.

EPA is also approving the 2002 base year emissions inventory for the Poughkeepsie 8-hour ozone moderate nonattainment area and the state-wide 2002 base year emissions inventory. New York submitted these revisions to EPA for review and approval on February 8, 2008 in a package entitled, "New York SIP for Ozone—Attainment Demonstration for Poughkeepsie, NY Area" and supplemented on December 28, 2009 and January 26, 2011.

IV. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);
- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or

safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and

- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this rule does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by October 17, 2011. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference,

Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: August 4, 2011.

Judith A. Enck,

Regional Administrator, Region 2.

Part 52, chapter I, title 40 of the Code of Federal Regulations is amended as follows:

PART 52—[AMENDED]

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart HH—New York

■ 2. Section 52.1670 is amended by adding an entry to end of table in paragraph (e) to read as follows:

§ 52.1670 Identification of plan.

* * * * *
(e) * * *

Action/SIP element	Applicable geographic or nonattainment area	New York submittal date	EPA approval date	Explanation
* * * * *	* * * * *	* * * * *	* * * * *	* * * * *
2002 base year emissions inventory; 2008 projection year emissions inventories; 2008 motor vehicle emissions budgets used for planning purposes; 2008 ozone reasonable further progress (RFP) plan; and 2008 RFP Plan contingency measures.	New York portion of the New York-Northern New Jersey-Long Island 8-hour ozone non-attainment area.	2/8/2008 supplemented on 12/28/2009 and 1/26/2011	August 18, 2011.	
2002 base year emissions inventory.	Poughkeepsie 8-hour ozone moderate nonattainment area.	2/8/2008 supplemented on 12/28/2009 and 1/26/2011	August 18, 2011.	
2002 base year emissions inventory.	State-wide	2/8/2008 supplemented on 12/28/2009 and 1/26/2011	August 18, 2011.	

■ 3. Section 52.1683 is amended by adding paragraph (l) to read as follows:

§ 52.1683 Control Strategy: Ozone.

* * * * *

(l)(1) The following State Implementation Plan (SIP) elements are approved: The 2002 base year emissions inventory, the 2008 projection year emissions inventories, the 2008 motor vehicle emissions budgets used for planning purposes, the 2008 ozone reasonable further progress (RFP) plan, and the 2008 RFP Plan contingency measures as they apply to the New York portion of the New York-Northern New Jersey-Long Island, NY-NJ-CT 8-hour ozone moderate nonattainment area. These elements are included in the package entitled “New York SIP for Ozone-Attainment Demonstration for New York Metro Area,” dated February 8, 2008 and supplemented on December 28, 2009 and January 26, 2011.

(2) The following SIP elements are approved: The 2002 base year emissions inventory for the Poughkeepsie 8-hour ozone moderate nonattainment area and the state-wide 2002 base year emissions inventory. These elements are included in a package entitled, “New York SIP for Ozone-Attainment Demonstration for Poughkeepsie, NY Area,” dated February 8, 2008 and supplemented on

December 28, 2009 and January 26, 2011.

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Deletion of the Barceloneta Landfill Superfund Site

AGENCY: Environmental Protection Agency.

ACTION: Direct final rule.

SUMMARY: The Environmental Protection Agency (EPA) Region II is publishing a direct final Notice of Deletion of the Barceloneta Landfill Superfund Site (Site), located in Florida Afuera, Puerto Rico, from the National Priorities List (NPL). The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). This direct

final deletion is being published by EPA with the concurrence of the Commonwealth of Puerto Rico, through the Puerto Rico Environmental Quality Board, because EPA has determined that all appropriate response actions under CERCLA, other than operation, maintenance, and five-year reviews, have been completed. However, this deletion does not preclude future actions under Superfund.

DATES: This direct final deletion is effective October 3, 2011 unless EPA receives adverse comments by September 19, 2011. If adverse comments are received, EPA will publish a timely withdrawal of the direct final deletion in the **Federal Register** informing the public that the deletion will not take effect.

ADDRESSES: Submit your comments, identified by Docket ID no. EPA–HQ–SFUND–1983–0002, by one of the following methods:

- <http://www.regulations.gov>. Follow on-line instructions for submitting comments.
- *E-mail:* Luis E. Santos, Remedial Project Manager, santos.luis@epa.gov.
- *Fax:* 787–289–7104.
- *Mail:* Luis E. Santos, Remedial Project Manager, U.S. Environmental Protection Agency, Region II, Caribbean Protection Division, Centro Europa Building, Suite 417, Ponce de León

Ave., Stop 22, San Juan, Puerto Rico 00907-4127.

• *Hand delivery:* U.S. Environmental Protection Agency, Region II, Caribbean Protection Division, Centro Europa Building, Suite 417, Ponce de León Ave., Stop 22, San Juan, Puerto Rico 00907-4127. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-HQ-SFUND-1983-0002. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through <http://www.regulations.gov> or e-mail. The <http://www.regulations.gov> Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through <http://www.regulations.gov>, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in the hard copy. Publicly available docket materials are available either electronically in <http://www.regulations.gov> or in hard copy at: U.S. Environmental Protection Agency, Region II, Superfund Records Center,

290 Broadway, 18th Floor, New York, NY 10007-1866, *Phone:* 212-637-4308, *Hours:* Monday to Friday from 9 a.m. to 5 p.m.

Or

U.S. Environmental Protection Agency, Region II, Caribbean Environmental Protection Division, Centro Europa Building, Suite 417, 1492, Ponce de León Ave., Stop 22, San Juan, Puerto Rico 00907-4127, *Phone:* (787) 977-5802, *Hours:* 8:30 a.m. to 4:30 p.m.—Monday through Friday (excluding holidays), *Contact:* Luis E. Santos.

FOR FURTHER INFORMATION CONTACT: Luis E. Santos, Remedial Project Manager, U.S. Environmental Protection Agency, Region II, telephone at (787) 977-5824; fax at 787-289-7104; or e-mail at santos.luis@epa.gov.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
- II. NPL Deletion Criteria
- III. Deletion Procedures
- IV. Basis for Site Deletion
- V. Deletion Action

I. Introduction

EPA Region II is publishing this direct final Notice of Deletion of the Barceloneta Landfill Superfund Site (Site), from the National Priorities List (NPL). The NPL constitutes Appendix B of 40 CFR part 300, which is the National Oil and Hazardous Substances Pollution Contingency Plan (NCP), which EPA promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, as amended. EPA maintains the NPL as the list of sites that appear to present a significant risk to public health, welfare, or the environment. Sites on the NPL may be the subject of remedial actions financed by the Hazardous Substance Superfund (Fund). As described in 300.425(e) (3) of the NCP, sites deleted from the NPL remain eligible for Fund-financed remedial actions if future conditions warrant such actions.

Because EPA considers this action to be noncontroversial and routine, this action will be effective October 3, 2011 unless EPA receives adverse comments by September 19, 2011. Along with this direct final Notice of Deletion, EPA is co-publishing a Notice of Intent to Delete in the "Proposed Rules" section of the **Federal Register**. If adverse comments are received within the 30-day public comment period on this deletion action, EPA will publish a timely withdrawal of this direct final Notice of Deletion before the effective date of the deletion, and the deletion

will not take effect. EPA will, as appropriate, prepare a response to comments and continue with the deletion process on the basis of the Notice of Intent to Delete and the comments already received. There will be no additional opportunity to comment.

Section II of this document explains the criteria for deleting sites from the NPL. Section III discusses procedures that EPA is using for this action. Section IV discusses the Barceloneta Landfill Superfund Site and demonstrates how it meets the deletion criteria. Section V discusses EPA's action to delete the Site from the NPL unless adverse comments are received during the public comment period.

II. NPL Deletion Criteria

The NCP establishes the criteria that EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. In making such a determination pursuant to 40 CFR 300.425(e), EPA will consider, in consultation with the state, whether any of the following criteria have been met:

- i. Responsible parties or other persons have implemented all appropriate response actions required;
- ii. all appropriate Fund-financed response under CERCLA has been implemented, and no further response action by responsible parties is appropriate; or
- iii. the remedial investigation has shown that the release poses no significant threat to public health or the environment and, therefore, the taking of remedial measures is not appropriate.

Pursuant to CERCLA section 121 (c) and the NCP, EPA conducts five-year reviews to ensure the continued protectiveness of remedial actions where hazardous substances, pollutants, or contaminants remain at a site above levels that allow for unlimited use and unrestricted exposure. EPA conducts such five-year reviews even if a site is deleted from the NPL. EPA may initiate further action to ensure continued protectiveness at a deleted site if new information becomes available that indicates it is appropriate. Whenever there is a significant release from a site deleted from the NPL, the deleted site may be restored to the NPL without application of the hazard ranking system.

III. Deletion Procedures

The following procedures apply to deletion of the Site:

- (1) EPA consulted with the Commonwealth of Puerto Rico prior to

developing this direct final Notice of Deletion and the Notice of Intent to Delete co-published today in the "Proposed Rules" section of the **Federal Register**.

(2) EPA has provided the state 30 working days for review of this notice and the parallel Notice of Intent to Delete prior to their publication today, and the Commonwealth, through the Puerto Rico Environmental Quality Board, has concurred on the deletion of the Site from the NPL.

(3) Concurrently with the publication of this direct final Notice of Deletion, a notice of the availability of the parallel Notice of Intent to Delete is being published in a major local newspaper, *El Norte y Puerto Rico Daily Sun*. The newspaper notice announces the 30-day public comment period concerning the Notice of Intent to Delete the Site from the NPL.

(4) The EPA placed copies of documents supporting the proposed deletion in the deletion docket and made these items available for public inspection and copying at the Site information repositories identified above.

(5) If adverse comments are received within the 30-day public comment period on this deletion action, EPA will publish a timely notice of withdrawal of this direct final Notice of Deletion before its effective date and will prepare a response to comments and continue with the deletion process on the basis of the Notice of Intent to Delete and the comments already received.

Deletion of a site from the NPL does not itself create, alter, or revoke any individual's rights or obligations. Deletion of a site from the NPL does not in any way alter EPA's right to take enforcement actions, as appropriate. The NPL is designed primarily for informational purposes and to assist EPA management. Section 300.425(e)(3) of the NCP states that the deletion of a site from the NPL does not preclude eligibility for future response actions, should future conditions warrant such actions.

IV. Basis for Site Deletion

The following summary provides the Agency's rationale for recommending deletion of the Barceloneta Landfill Superfund Site from the NPL:

Site Background and History

The Barceloneta Landfill, an inactive non-hazardous domestic and industrial waste disposal facility, is located in Barceloneta, Puerto Rico on the north coast of the island, approximately 20 miles due west of San Juan. The Landfill is about 4.5 kilometers south of the

Town of Barceloneta in Florida Afuera Ward. The property which contains the Barceloneta Landfill is approximately 32.6 hectares (80.6 acres) in size and is owned by the Municipality of Barceloneta. The Landfill is surrounded by a tropical forest. The Quebrada Cimarrona, a tributary of the Rio Grande de Manatí, is located 0.8 kilometers north of the Landfill. A small residential area of approximately 150 residences in Barrio Bajura Adentro is located approximately one kilometer east of the Landfill. Approximately two kilometers north of the Landfill, in an area with more gentle topographic relief, there are a series of manufacturing facilities. The nearest village is Cruce Magueyes, located approximately two kilometers to north-west of the Landfill. The residences in the area of the Landfill are served by a public water supply system that uses ground water as a source.

The property contained three surface depressions which were used for waste disposal. These waste disposal areas are known as the northern, southern, and southeastern disposal areas. Each disposal area was located in a depression or "sumidero" (sinkhole) that is surrounded by conical limestone hills referred to as "mogotes". The three waste disposal areas cover about 15 acres. The northern disposal area is separated into two sections by an access road. The southern disposal area was also known as the Superfund disposal area or "El Superfondo". The northern and southern disposal areas were filled and inactive at the time of the 1996 Record of Decision (ROD). The southeastern disposal area remained active until December 31, 1998. Although the southern disposal area was known as the Superfund disposal area, all three disposal areas are covered by the Superfund National Priorities List (NPL) site listing and were addressed under CERCLA.

The Barceloneta Landfill is located in a belt of rugged karst topography that extends along the north coast from 30 kilometers (19 miles) east of San Juan to the west of the island. In the vicinity of the Site, this belt is located from about one kilometer south of the coast to about 20 kilometers (12 miles) inland. North (seaward) of this rugged karst region is a belt of relatively flat coastal plain sediments. South (landward), the rugged karst terrain transitions into the central mountainous core of the island. Features of this karst landscape include numerous sumideros, steep scarp cliffs on the mogotes and adjoining ridges which surround the sumideros, and a lack of surface streams or drainage features associated with individual sumideros.

The Site is underlain by the northern limestone province of Puerto Rico which consists of blanket deposits, the Aymamon Limestone, the Aguada Limestone, the Cibao Formation, and the Lares Formation. Groundwater exists under unconfined conditions in the Aymamon and Aguada Limestones and under confined conditions in the Cibao and Lares Formations. Groundwater flow is to the north.

Groundwater in this area of the northern province discharges to the Rio Grande de Manatí (river) and the Cano Tiburones (wetlands) which are 2.7 kilometers (1.7 miles) north of the Site. Groundwater also feeds the Ojo de Guillo spring located 1 kilometer (0.6 miles) northeast of the Site.

The property on which the Barceloneta Landfill is located was purchased by the Municipality of Barceloneta during the early 1970s. Preparation of the Site for landfill use began in April 1972, and the landfill operations commenced in August 1973. Reportedly, the Landfill was initially approved to receive both municipal and industrial waste, but was restricted to only municipal waste disposal in 1975. However, disposal of industrial wastes appears to have continued past 1975. Specific dates of active filling in each of the three disposal areas are difficult to determine given the lack of detailed record keeping. The Puerto Rico Environmental Quality Board (EQB) has information which indicates that the Landfill (all three disposal areas) was used in the late 1970's for disposal of wastes which contained hazardous substances. Personnel from EQB and the Department of Health conducted numerous inspections of the Site and listed various violations. These violations included: Insufficient cover material; allowing refuse to burn; the presence of flies, rats and mosquitoes; allowing unlimited access to the Landfill; and, allowing people to inhabit structures in the Landfill. The Site was proposed for inclusion on the NPL in December 1982 (47 FR 58476), and was subsequently approved and listed as an NPL site in September 1983 (48 FR 40658). No activities were conducted using EPA removal authority at this site. The site property consists mainly of forested areas which provide a habitat for various plant, insect and animal species. In order to protect the landfill cap, trees will not be allowed to grow on the capped area. However, grasses will be permitted to grow and it is expected that the landfill areas will be comparable to surrounding ecology. No reuse is planned for the site.

Remedial Investigation/Feasibility Study

In 1984, a Remedial Action Master Plan (RAMP) was prepared by an EPA contractor for the Site. Based on the RAMP, a Remedial Investigation and Feasibility Study (RI/FS) Work Plan was developed. In September 1990, Consent Order was signed in which ten Settling Defendants (SDs) agreed to perform the RI/FS for the Site. Pursuant to the Work Plan, sampling of subsurface soils, ground water and surface water was completed. The first phase of the RI was completed in 1992 and the second phase of the RI field work was completed in January 1994. A final RI report was received by EPA in March 1995 and the streamlined Risk Assessment was completed in May 1995. An abbreviated Final FS was conducted in accordance with EPA's Presumptive Remedy approach and was received by EPA in September 1995.

Consistent with EPA's Presumptive Remedy approach, EPA conducted a streamlined baseline Risk Assessment by comparing the levels of contaminants in ground water to MCLs. These levels were exceeded, indicating that the Landfill is a source of contamination to the ground water and therefore remedial measures are necessary to protect human health and the environment. EPA's Risk Assessment indicated that the levels of contaminants present in the ground water pose a relatively low long-term threat to the human health. However, if no action were to be taken with respect to the Landfill, the continued release of contaminants into ground water could potentially result in a greater risk at some point in the future. Therefore, based on the results of the Risk Assessment, it was determined that actual or threatened release of hazardous substances from this Site present a threat to public health, welfare, or the environment.

Selected Remedy

On July 5, 1996, the Regional Administrator signed a ROD. The following remedial action objectives were established for the Site:

- To prevent direct contact with waste material;
- To reduce or eliminate the potential for the Landfill disposal areas to release hazardous substances to ground water;
- To reduce or eliminate the potential for migration of hazardous substances to ground water downgradient of the Landfill;
- To prevent the migration of and control Landfill gas; and
- To minimize any potential future impacts of hazardous substances that may migrate into environmental media.

The major components of the selected remedy are as follow:

- Installing a low permeability cover system for the three Landfill cells meeting the requirements of the RCRA Subtitle D and Puerto Rico's Regulations Governing Landfill Closure. This cover system or landfill cap(s) will further reduce infiltration of precipitation water into the landfill and reduce leachate generation thus mitigating impacts to ground water.

- Regrading the Site and installing storm water management improvements at the Site to reduce infiltration of storm water into the Landfill and reduce leachate generation.

- Conducting long term ground water and surface water monitoring to evaluate the effectiveness of the cover system. It is anticipated that monitoring will be conducted on a quarterly basis for the first year, semi-annually for the next four years, and then annually. Monitoring will include the eight existing monitoring wells. Initially, the wells will be sampled for a broad parameter list. The list has been developed based on constituents detected above Safe Drinking Water Act Maximum Contaminant Levels in the Remedial Investigation and on the requirements of the RCRA Subtitle D and Puerto Rico's Regulation Governing Landfill Closure (RMNHSW). After the first five years, the parameter list would be reviewed and those parameters not detected above standards would be omitted. The exact long term ground water monitoring program will be further defined remedial design (RD).

- Conducting a landfill gas survey during pre-design to determine the necessity of a landfill gas collection system. The appropriate type of system, if necessary, will be determined during RD.

- Implementing a long term operation and maintenance program for the cover system which will include inspection of the system and provision for repair.

- Recommending to appropriate authorities that institutional controls be emplaced. Institutional controls are recommended in order to protect the integrity of the landfill cover system and to reduce potential exposure to landfill contents. The institutional controls will include recommending that zoning restrictions be applied to the Site to limit future land use and recommending that a deed restriction be established to limit future land and ground-water use.

- Installing a perimeter fence with signs to restrict access.

- Reevaluating Site conditions at least once every five years to determine if a modification of the selected remedy is necessary.

Response Actions

A September 30, 1997 Consent Decree (CD) memorialized a settlement whereby ten parties agreed to implement the remedy which was selected in the ROD. The SDs hired M&S Ingenieria y Ciencia Asociados who prepared remedial design plans and specifications, which EPA approved on September 17, 1999. On December 16, 1999, EPA approved the Remedial Action Work Plan and M&S Ingenieria y Ciencia Asociados as the Settling Defendants proposed a remedial action contractor.

During the RD activities a new area of waste disposal was discovered at the Site outside the limits of the three waste cells delineated for closure in the ROD. The waste was located in a sinkhole which lies immediately to the east of the Superfund cell. In agreement with EPA & EQB, the SDs relocated this waste material and performed a clean closure. This waste was incorporated and capped with the waste in Superfund disposal area.

The gas venting system was constructed on the Site. The gas venting system is monitored by the PRPs' contractor and results reviewed by EPA. The system is functioning as intended and it is not a necessity landfill gas collection system.

The groundwater monitoring program was developed during the RD phase: The system included the eight existing monitoring wells. It was determined that groundwater sampling would be conducted quarterly for the first year, semi-annually for the next four years, and then conducted annually. It was determined that the wells would be sampled for a broad parameter list developed based on constituents detected above MCLs and SDWS in the RI, RCRA Subtitle D requirements, and Puerto Rico's Regulation Governing Landfill Closure. This initial list of parameters included:

- Volatile Organic Compounds of Concern (VOCs). Only 1,1-dichloroethane was detected above MCLs during the RI. However, a more conservative approach that included the complete EPA Method Scan for volatile organic compounds was implemented.

- Metals of Concern include mercury, chromium, manganese and nickel. These were detected above MCLs and SDWS during the RI.

After the first five years, the parameter list would be reviewed and those parameters not detected above standards would be omitted; The O&M Plan, dated March 28, 2000, and approved by EPA, establishes the criteria used to reevaluate and modify

the number of wells and list of parameters sampled.

EPA approved early Remedial Actions to be carried out prior to the final approval of the Remedial Design Report. These activities included the excavation and stockpiling of clay and the excavation and relocation of waste from the discovered waste area. These activities were started on September 7, 1999. The Remedial Action on-site construction started in January 24, 2000 and was completed on August 30, 2000.

On September 5, 2000, EPA and the State conducted a prefinal inspection and notified the Settling Defendants to proceed with the development of the draft Remedial Action (RA) Report. Punch list items identified during the prefinal inspection will be addressed in the final inspection. On September 27, 2001, EPA approved the final RA Report.

The Municipality of Barceloneta has implemented the Institutional Controls at the Site. The Institutional Controls including zoning restrictions and a deed restriction are in place. These controls were implemented at Barceloneta Landfill Deed on February 22, 2010.

Cleanup Goals

The ROD called for conducting long-term groundwater monitoring to evaluate the effectiveness of the cover system, ensure that the concentrations of contaminants in the groundwater are decreasing over time, and monitor the natural attenuation of contaminants within the plume.

MW-3, has had only one parameter, 1,1-dichloroethene, exceeding MCLs during the two years of monitoring. However, on two consecutive monitoring periods (March 2003 and October 2003), the results for 1,1-dichloroethene were non-detect and 4.9 mg/l, respectively, and below the MCL of 7 mg/l. Based on the June 2004 groundwater monitoring report for the Site and according to the criteria in the O&M Plan, on September 2004, groundwater monitoring was reduced to five of the original eight wells and to the following parameters: mercury, chromium, manganese and nickel. These five wells are currently sampled annually. Mercury and chromium are monitored to ensure that levels remain below MCLs. Chromium was identified below the MCLs for three consecutive monitoring events it was omitted from the parameter list according to the O&M Plan, dated March 28, 2000. Since the ROD was signed, the MCL and MCLG were remanded for nickel. As a result, EPA no longer has an enforceable legal limit for nickel in drinking water. Therefore, mercury, nickel and

manganese contaminant concentrations are still monitoring but there is no MCL threshold. The remaining five wells (MW-1, MW-4, MW-6, MW-7 and MW-8) are currently sampled annually.

Since 2004, the results of the Site Groundwater Analytical Results are summarized on a well by well basis below:

- MW-1, the background well, had concentrations below MCLs and SDWS for manganese, mercury and nickel during the Spring 2011 sampling event. These results showed similar concentrations to the last annual sampling event in March 2010.

- MW-4, located in the middle of the site, had concentrations of mercury below the MCL of 0.002 mg/L (0.00132 mg/L) during the Spring 2011 sampling event. These concentrations have decreased since 2004. Manganese and nickel were below SDWS during this sampling event.

- MW-6, a downgradient well, had concentrations of mercury below the MCL of 0.002 mg/L during the Spring 2011 sampling event. These concentrations have been consistently below the MCL since 2004. Nickel was found at a concentration of 0.192 mg/L. Concentrations of nickel at this well continue to decrease compared to previous sampling events. Manganese was detected above the SDWS and shows concentrations similar to the March 2010 sampling event.

- MW-7, a downgradient well, had concentrations of mercury, nickel and manganese below MCLs and SDWS. The last sampling event of March 2010 also showed concentrations similar to this sampling event.

- MW-8, a downgradient well, had concentrations of mercury, nickel and manganese below MCLs and SDWS. The last two sampling events, October 2009 and March 2010, show all parameters below MCLs and SDWS.

In summary, all wells monitored at the site show contaminants below MCLs. Although nickel and manganese are present in groundwater, these contaminants do not have an enforceable MCL and will continue to be monitored.

Operation and Maintenance

Currently, five groundwater monitoring wells are sampled and analyzed on an annually basis for mercury, manganese and nickel, and the results are compared to the Maximum Contaminant Levels or Secondary Drinking Water Standards identified in the Record of Decision. The five groundwater monitoring wells are designated MW-1, MW-4, MW-6, MW-7 and MW-8 will continue to be

monitored by annual inspections and the five-year review process.

Five-Year Review

Hazardous substances were not remediated to levels that would allow for unlimited use and unrestricted exposure, therefore the five-year review requirement of Section 121(c) of CERCLA, as amended, is applicable. On August 2005 and 2010 respectively, two five-year reviews (FYR) were conducted. In August 2010, the FYR concluded that the remedy at the Barceloneta Landfill currently protects human health and the environment in the short term because all remedy components are functioning as intended and institutional controls are in place to prevent exposure to contaminated groundwater. In order for the remedy to be protective in the long term, the O & M plan should be reviewed to ensure that the appropriate monitoring wells are being sampled and the correct analytes are being reported.

Since the FYR was conducted, EPA requested the PRP to review the O & M plan to ensure that the appropriate monitoring wells are being sampled and the correct analytes are being reported. It was concluded that the correct monitoring wells are being sampled and the appropriate parameters are being evaluated and reported. However, because Chromium was identified below the MCL for three consecutive periods, it was omitted from the parameter list. The groundwater will continue to be monitored annually based on the criteria identified in the 2000 O&M Plan.

In addition, the ROD stated that surface water monitoring would be conducted. After the FYR was completed, it was concluded that surface water sampling would not be conducted because there was no surface waters present at the Site. The nearest surface water is the Ojo de Guillo, a spring located 1 kilometer (0.6 miles) northeast of the Site. Therefore, this recommendation was not implemented.

The next FYR will be completed on or before August 30, 2015.

Community Involvement

Public participation activities for this Site have been satisfied as required in CERCLA sections 113(k) and 117, 42 U.S.C. 9613(k) and 9617. Throughout the remedial process, EPA and the Puerto Rico Department of Environmental Quality have kept the public informed of the activities being conducted at the Site by way of public meetings, progress fact sheets, and the announcement through local newspaper advertisement on the availability of documents such as the RI/FS, Risk

Assessment, ROD, Proposed Plan and Five-Year Reviews.

Determination That the Site Meets the Criteria for Deletion in the NCP

EPA has determined that this Site poses no significant threat to public health or the environment because the landfill has been capped, removing direct contact exposure (*i.e.*, ingestion or dermal contact of soil) to the public. In addition, the Municipality of Barceloneta put in place deed restrictions for future land use and groundwater extraction. The potential impacts to the groundwater have been addressed and groundwater monitoring indicates MCLs are being met at the landfill unit boundary. Groundwater monitoring will continue to ensure groundwater protection continues to be achieved.

V. Deletion Action

The EPA, with concurrence of the Puerto Rico Environmental Quality Board, has determined that all appropriate response actions under CERCLA, other than operation, maintenance, monitoring and five-year reviews have been completed. Therefore, EPA is deleting the Site from the NPL.

Because EPA considers this action to be noncontroversial and routine, EPA is taking it without prior publication. This action will be effective October 3, 2011 unless EPA receives adverse comments by September 19, 2011. If adverse comments are received within the 30-day public comment period, EPA will publish a timely withdrawal of this direct final notice of deletion before the effective date of the deletion, and it will not take effect. EPA will prepare a response to comments and continue with the deletion process on the basis of the notice of intent to delete and the comments already received. There will be no additional opportunity to comment.

List of Subjects in 40 CFR Part 300

Environmental protection, Air pollution control, Chemicals, Hazardous waste, Hazardous substances, Intergovernmental relations, Penalties, Reporting and recordkeeping requirements, Superfund, Water pollution control, Water supply.

Dated: August 8, 2011.

Judith Enck,

Regional Administrator, Region 2.

For the reasons set out in this document, 40 CFR part 300 is amended as follows:

PART 300—[AMENDED]

■ 1. The authority citation for part 300 continues to read as follows:

Authority: 33 U.S.C. 1321(c)(2); 42 U.S.C. 9601–9657; E.O. 12777, 56 FR 54757, 3 CFR, 1991 Comp., p. 351; E.O. 12580, 52 FR 2923; 3 CFR, 1987 Comp., p. 193.

■ 2. Table 1 of Appendix B to part 300 is amended by removing Barceloneta Landfill”, “Florida Afuera, PR”.

[FR Doc. 2011–21123 Filed 8–17–11; 8:45 am]

BILLING CODE 6560–50–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 90

[PS Docket No. 06–229; WT Docket 06–150; WP Docket 07–100; FCC 11–6]

Implementing a Nationwide, Broadband, Interoperable Public Safety Network in the 700 MHz Band

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission adopts an initial set of rules necessary to ensure the development of a nationwide interoperable public safety broadband network. The establishment of a common air interface for 700 MHz public safety broadband networks will create a foundation for interoperability and provide a clear path for the deployment and evolution of the nationwide network.

DATES: *Effective:* August 18, 2011, except § 90.1407(f) which contains information collections requirements that have not been approved by OMB. The Federal Communications Commission will publish a document in the **Federal Register** announcing the effective date. The incorporation by reference of certain publications listed in the rules is approved by the Director of the Federal Register as of August 18, 2011.

FOR FURTHER INFORMATION CONTACT: Jennifer Manner, Federal Communications Commission, Public Safety and Homeland Security Bureau, 445 12th Street, SW., Room 7–C761, Washington, DC 20554. Telephone: (202)–418–3619, e-mail: jennifer.manner@fcc.gov.

SUPPLEMENTARY INFORMATION: In the *Third Report and Order*, FCC 11–6, adopted January 25, 2011, and released January 26, 2011, the Commission adopted rules to promote development

of a nationwide interoperable public safety broadband network. The Commission designated Long Term Evolution (LTE), in particular at least 3GPP Standard, Evolved Universal Terrestrial Radio Access (E–UTRA) Release 8 (LTE) and associated Evolved Packet Core (EPC), as the common technology platform for the nationwide network. The Commission also required that public safety broadband network operators submit to the Public Safety and Homeland Security Bureau a certification that their networks support required LTE interfaces. The Commission also stayed certain Part 90 rules that were designed to implement a mandatory public-private partnership that has not materialized. These rules include 47 CFR 90.1403(b)(1), (2), (3), (5), (8); 90.1405 through 90.1430; and 90.1435. The *Third Report and Order* is available at http://www.fcc.gov/Daily_Releases/Daily_Business/2011/db0204/FCC–11–6A1.pdf.

As required by the Regulatory Flexibility Act, the Commission certifies that the requirements of the *Third Report and Order* will not have a significant economic impact on a substantial number of small entities. The *Third Report and Order* contains new or modified information collection requirements subject to the Paperwork Reduction Act of 1995 (PRA), Public Law 104–13. It will be submitted to the Office of Management and Budget (OMB) for review under Section 3507(d) of the PRA. OMB, the general public, and other Federal agencies are invited to comment on the new or modified information collection requirements contained in this proceeding. The Commission shall send a copy of the *Third Report and Order* in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

List of Subjects in 47 CFR Part 90

Administrative practice and procedure, Business and industry, Civil defense, Common carriers, Communications equipment, Emergency medical services, Incorporation by reference, Individuals with disabilities, Radio, Reporting and recordkeeping requirements.

Federal Communications Commission.

Marlene H. Dortch,
Secretary.

For the reasons discussed in the preamble, The Federal Communications Commission amends 47 CFR part 90 as follows:

PART 90—PRIVATE LAND MOBILE RADIO SERVICES

■ 1. The authority citation for part 90 continues to read as follows:

Authority: Sections 4(i), 11, 303(g), 303(r), and 332(c)(7) of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 161, 303(g), 303(r), and 332(c)(7) unless otherwise noted.

■ 2. Section 90.7 is amended by adding definitions for “Public Safety Broadband Network Operator” and “Service Availability” and revising the definition for “Upper 700MHz D Block license” to read as follows:

§ 90.7 Definitions.

* * * * *

Public Safety Broadband Network Operator. A Public Safety Network Operator is a public safety entity that is authorized by lease or other permitted mechanism under the Public Safety Broadband License to operate a public safety broadband network in the 763–768 MHz and 793–798 MHz bands.

* * * * *

Service Availability. The use of a public safety broadband network on a day-to-day basis for operational purposes by at least fifty users.

* * * * *

Upper 700 MHz D Block license. The Upper 700 MHz D Block license authorizes services in the 758–763 MHz and 788–793 MHz bands.

* * * * *

■ 3. Section 90.203 is amended by adding paragraph (p) to read as follows:

§ 90.203 Certification required

* * * * *

(p) *Equipment certification for transmitters in the 763–769 and 793–799 MHz Bands.* Applications for all transmitters must show support for at least 3GPP TS 23.401, V8.8.0 (2009–12), “3rd Generation Partnership Project; Technical Specification Group Services and System Aspects; General Packet Radio Service (GPRS) enhancements for Evolved Universal Terrestrial Radio Access Network (E-UTRAN) access (Release 8),” December, 2009, which is incorporated by reference. The Director of the Federal Register approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be inspected at the Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554 or National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal_register/

[code_of_federal_regulations/ibr_locations.html](http://www.archives.gov/federal_register/ibr_locations.html). Copies of the 3GPP Standard E-UTRA Release 8 can be obtained from 3GPP Mobile Competence Centre, c/o ETSI, 650, route des Lucioles, 06921 Sophia-Antipolis Cedex, France, Tel: +33 (0)4 92 94 42 00, Fax: +33 4 93 65 47 16, <http://www.3gpp.org>.

■ 4. Section 90.1407 is amended by adding paragraphs (d) through (f) to read as follows:

§ 90.1407 Spectrum use in the network.

* * * * *

(d) Public Safety Broadband Network Operators must use at least 3GPP TS 23.401, V8.8.0 (2009–12), “3rd Generation Partnership Project; Technical Specification Group Services and System Aspects; General Packet Radio Service (GPRS) enhancements for Evolved Universal Terrestrial Radio Access Network (E-UTRAN) access (Release 8),” December, 2009 (incorporated by reference). The Director of the Federal Register approves this incorporation by reference in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. Copies may be inspected at the Federal Communications Commission, 445 12th Street, SW., Washington, DC 20554 or National Archives and Records Administration (NARA). For information on the availability of this material at NARA, call 202–741–6030, or go to: http://www.archives.gov/federal_register/code_of_federal_regulations/ibr_locations.html. Copies of the 3GPP Standard E-UTRA Release 8 can be obtained from 3GPP Mobile Competence Centre, c/o ETSI, 650, route des Lucioles, 06921 Sophia-Antipolis Cedex, France, Tel: +33 (0)4 92 94 42 00, Fax: +33 4 93 65 47 16, <http://www.3gpp.org>. Later versions of this standard may be employed by Public Safety Broadband Network Operators provided they are backwards-compatible with this version.

(e) Systems in the network must support the following interfaces: Uu—LTE air interface; S6a—Visited MME to Home HSS; S8—Visited SGW to Home PGW; S9—Visited PCRF to Home PCRF for dynamic policy arbitration; S10—MME to MME support for Category 1 handover support; X2—eNodeB to eNodeB; S1-u—between eNodeB and SGW; S1-MME—between eNodeB and MME; S5—between SGW and PGW; S6a—between MME and HSS; S11—between MME and SGW; SGI—between PGW and external PDN; Gx—between PGW and PCRF (for QoS policy, filter policy and charging rules); Rx—between PCRF and AF located in a PDN; Gy/Gz—offline/online charging interfaces.

(f) A Public Safety Broadband Network Operator must submit to the Chief of the Public Safety and Homeland Security Bureau prior to deployment of any Radio Access Network equipment a certification that it will be in compliance with paragraph (e) of this section prior to the date its network achieves service availability.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 100804323–0569–02]

RIN 0648–XA617

Fisheries of the Northeastern United States; Atlantic Mackerel, Squid, and Butterfish Fisheries; Closure of the 2011 Trimester 2 Directed Loligo Squid Fishery

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; closure.

SUMMARY: NMFS announces that 90 percent of the Trimester 2 *Loligo* squid (*Loligo*) quota is projected to be harvested by 0001 hours, August 23, 2011. Therefore, the directed *Loligo* fishery in the Exclusive Economic Zone (EEZ) will be closed as of 0001 hours, August 23, 2011, and vessels issued a Federal permit are prohibited from possessing or landing more than 2,500 lb (1.13 mt) of *Loligo* for the remainder of Trimester 2 (through August 31, 2011). The directed *Loligo* fishery will re-open for Trimester 3 on September 1, 2011. This action is necessary to prevent the fishery from exceeding its Trimester 2 allocation of 11,190,664 lb (5,076 mt), and to allow for effective management of this stock.

DATES: Effective 0001 hours, August 23, 2011, through 2400 hours, August 31, 2011.

FOR FURTHER INFORMATION CONTACT: Lindsey Feldman, Fishery Management Specialist, 978–675–2179, Fax 978–281–9135.

SUPPLEMENTARY INFORMATION: Regulations governing the *Loligo* fishery are found at 50 CFR part 648. The regulations require specifications for maximum sustainable yield, initial optimum yield, allowable biological catch, domestic annual harvest (DAH),

domestic annual processing, joint venture processing, and total allowable levels of foreign fishing for the species managed under the Atlantic Mackerel, Squid, and Butterfish Fishery Management Plan (FMP). The procedures for setting the annual initial specifications are described in § 648.21.

The 2011 specification of DAH for *Loligo* was set at 3,384 mt (76 FR 8306, February 14, 2011). Due to an under harvest of the Trimester 1 *Loligo* quota, on May 16, 2011, the Trimester 2 quota was increased to 5,076 mt. Section 648.22 requires NMFS to close the directed *Loligo* fishery in the EEZ when 90 percent of the Trimester 2 quota is projected to be harvested. NMFS is required to notify the Executive Directors of the Mid-Atlantic, New England, and South Atlantic Fishery Management Councils; mail notification of the closure to all *Loligo* permit holders at least 72 hr before the effective date of the closure; provide adequate notice of the closure to recreational participants in the fishery; and publish

notification of the closure in the **Federal Register**.

The Administrator, Northeast Region, NMFS, based on dealer reports and other available information, has determined that 90 percent of the Trimester 2 *Loligo* quota for the 2011 fishing year will be harvested on August 23, 2011. Therefore, effective 0001 hours, August 23, 2011, Trimester 2 directed *Loligo* fishery is closed and vessels issued Federal permits for *Loligo* are prohibited from possessing or landing more than 2,500 lb (1.13 mt) of *Loligo* through August 31, 2011. The Trimester 3 *Loligo* fishery will open at 0001 hours, September 1, 2011.

Classification

This action is required by 50 CFR part 648, and is exempt from review under Executive Order 12866.

The Assistant Administrator for Fisheries, NOAA (AA), finds good cause pursuant to 5 U.S.C. 553(b)(B) to waive prior notice and the opportunity for public comment because it would be

contrary to the public interest. This action closes the directed *Loligo* fishery until August 31, 2011, under current regulations. The regulations at § 648.21 require such action to ensure that *Loligo* vessels do not exceed the 2011 Trimester 2 quota. Data indicating the *Loligo* fleet will have landed at least 90 percent of the 2011 Trimester 2 quota have only recently become available. If implementation of this closure is delayed to solicit prior public comment, the quota for Trimester 2 will be exceeded, thereby undermining the conservation objectives of the FMP. The AA further finds, pursuant to 5 U.S.C. 553(d)(3), good cause to waive the 30-day delayed effectiveness period for the reasons stated above.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: August 15, 2011.

James P. Burgess,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[FR Doc. 2011-21109 Filed 8-17-11; 8:45 am]

BILLING CODE 3510-22-P

Proposed Rules

Federal Register

Vol. 76, No. 160

Thursday, August 18, 2011

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Food and Nutrition Service

7 CFR Parts 273 and 276

RIN 0584-AD98

Supplemental Nutrition Assistance Program: Major System Failures

AGENCY: Food and Nutrition Service, USDA.

ACTION: Proposed rule.

SUMMARY: This rule proposes to amend Supplemental Nutrition Assistance Program (SNAP—formerly the Food Stamp Program) regulations to implement the Food, Conservation, and Energy Act of 2008, (“FCEA”). Section 4133, The “Major System Failures” section of the FCEA, amends the Food and Nutrition Act of 2008 (“the Act”) to require the United States Department of Agriculture (USDA) to determine when a systemic State error is resulting in the overissuance of benefits to a substantial number of SNAP households and the actions the Department may take if such a determination were made. This rule proposes criteria for determining if a State experienced a systemic error that resulted in the overissuance of benefits to a substantial number of households and specifies the steps that the Department may take to collect data, instruct the State to terminate claims collection from the affected households, and issue a bill to the State for the value of the over-issuances. It also identifies the review and appeal process for any such billing.

DATES: Comments must be received on or before October 17, 2011.

ADDRESSES: The Food and Nutrition Service invites interested persons to submit comments on this proposed rule. Comments may be submitted by any of the following methods:

- *Federal eRulemaking Portal:* Preferred method. Go to <http://www.regulations.gov>; follow the online instructions for submitting comments on Docket FNS-2009-0025.

- *Fax:* Submit comments by facsimile transmission to (703) 305-2486, attention: Lizbeth Silbermann.

- *Mail:* Send comments to Lizbeth Silbermann, Director, Program Development Division, Food and Nutrition Service, 3101 Park Center Drive, Room 810, Alexandria, Virginia 22302, (703) 305-2494.

- *Hand delivery or Courier:* Deliver comments to Lizbeth Silbermann at the above address. All comments on this proposed rule will be included in the record and will be made available to the public. Please be advised that the substance of the comments and the identity of the individuals or entities submitting the comments will be subject to public disclosure. FNS will make the comments publicly available on the Internet via <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: For further information concerning this proposed rule, you may contact Moira Johnston, Program Development Division, Supplemental Nutrition Assistance Program, 3101 Park Center Drive, Room 800, Alexandria, Virginia 22302 or via the Internet at moira.johnston@fns.usda.gov.

SUPPLEMENTARY INFORMATION: *Additional electronic filing information:* You may download a copy of this rule from <http://www.fns.usda.gov/SNAP>. You may also comment via the Internet at the same address. Please include ATTENTION RIN 0548-AD98 in the subject line and your name and address in the message. If you do not receive a confirmation that we have received your comment please call 703-305-2515.

Written Comments: Written comments on this rule should be specific, confined to issues pertinent to the rule, and should explain the reason for any change you recommend. Where possible, you should reference the specific section or paragraph of the rule you are addressing. We may not consider or include in the Administrative Record for the final rulemaking comments that we receive after the close of the comment period or comments delivered to an address other than that listed above. We will make available all comments for public inspection, including, name, address and other contact information of respondents. If you wish to request that we consider withholding your name, address, or other contact information from public review or from disclosure

under the Freedom of Information Act, you must state this prominently at the beginning of your comment. We will honor requests for confidentiality on a case-by-case basis to the extent allowed by law. We will make available for public inspection in their entirety all submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organizations or businesses.

Executive Order 12866

This rule has been determined to be not significant and was reviewed by the Office Management and Budget in conformance with Executive Order (E.O.) 12866.

Regulatory Flexibility Act

This rule has been reviewed with regard to the requirements of the Regulatory Flexibility Act of 1980 (5 U.S.C. 601-612). It has been certified that this rule will not have a significant economic impact on a substantial number of small entities. State agencies that administer SNAP will be affected to the extent they implement major changes in program operations.

Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), Public Law 104-4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under Section 202 of the UMRA, the Department generally must prepare a written statement, including a cost/benefit analysis, for proposed and final rules with Federal mandates that may result in expenditures to State, local, or tribal governments, in the aggregate, or to the private sector, of \$100 million or more in any one year. When such a statement is needed for a rule, section 205 of the UMRA generally requires the Department to identify and consider a reasonable number of regulatory alternatives and adopt the least costly, more cost-effective or least burdensome alternative that achieves the objectives of the rule.

This rule contains no Federal mandates (under the regulatory provisions of Title II of the UMRA) that impose costs on State, local, or tribal governments or to the private sector of \$100 million or more in any one year. This rule is, therefore, not subject to the

requirements of sections 202 and 205 of the UMRA.

Executive Order 12372

The SNAP is listed in the Catalog of Federal Domestic Assistance under No. 10.551. For the reasons set forth in the final rule in 7 CFR part 3015, Subpart V and related document published June 24, 1983 (48 FR 29114 for SNP; 48 FR 29115 for FSP), this Program is excluded from the scope of E.O. 12372, which requires intergovernmental consultation with State and local officials.

Federalism Impact Statement

E.O. 13132 requires Federal agencies to consider the impact of their regulatory actions on State and local governments. Where such actions have federalism implications, agencies are directed to provide a statement for inclusion in the preamble to the regulations describing the agency's considerations in terms of the three categories called for under section 6(b)(2)(B) of E.O. 13132. FNS has considered the impact of this rule on State and local governments and has determined that this rule does not have Federalism implications. This rule does not impose substantial or direct compliance costs on State and local governments. Therefore, under Section 6(b) of the E.O., a federalism summary impact statement is not required.

Prior Consultation With State Officials

After the FCEA was enacted on June 18, 2008, FNS held a series of conference calls with State agencies and FNS regional offices to explain the SNAP provisions included in the public law and to answer questions that State agencies had about implementing the changes to the program. On July 3, 2008, FNS issued an implementation memorandum that described each SNAP-related provision in the FCEA and provided basic information to assist State agencies in meeting statutorily-mandated implementation timeframes. FNS responded to additional questions that State agencies submitted and posted the answers on the FNS Web site. Another forum for consultation with State officials on implementation of the FCEA provisions included various conferences hosted by FNS regional offices, State agency professional organizations, and program advocacy organizations. During these conferences, held in the latter part of 2008 and early months of 2009, FNS officials responded to a range of questions posed by State agency officials related to implementation of FCEA provisions.

Executive Order 12988

This rule has been reviewed under E.O. 12988, "Civil Justice Reform." This rule, when published final, is not intended to have preemptive effect with respect to any State or local laws, regulations, or policies that conflict with its provisions or that would otherwise impede its full implementation. This rule is not intended to have retroactive effect unless so specified in the "Effective Date" paragraph of the final rule. Prior to any judicial challenge to the provisions of this rule or the application of its provisions, all applicable administrative procedures must be exhausted. In SNAP, the administrative procedures are as follows: For program benefit recipients—State administrative procedures issued pursuant to 7 U.S.C. 2020(e)(10) of the Food and Nutrition Act of 2008 and regulations at § 273.15; for State agencies—administrative procedures issued pursuant to 7 U.S.C. 2023 of the Act and regulations at § 276.7 (for rules related to non-Quality Control liabilities) or 7 CFR part 283 (for rules related to Quality Control liabilities); or Program retailers and wholesalers—administrative procedures issued pursuant to 7 U.S.C. 2023 and 7 CFR part 279.

Civil Rights Impact Analysis

FNS has reviewed this rule in accordance with the Department Regulation 4300-4, "Civil Rights Impact Analysis," to identify and address any major civil rights impacts the rule might have on minorities, women, and persons with disabilities. After a careful review of the rule's intent and provisions, and the characteristics of SNAP households and individual participants, FNS has determined that an important impact of this rule will be to help relieve the adverse effects of errors in program operations on recipients, including protected classes. All data available to FNS indicate that protected individuals have the same opportunity to participate in SNAP as non-protected individuals. FNS specifically prohibits State and local government agencies that administer the Program from engaging in actions that discriminate based on race, color, national origin, gender, age, disability, marital or family status. SNAP non-discrimination policy can be found at 7 CFR 272.6(a). Where State agencies have options, and they choose to implement a certain provision, they must implement it in such a way that it complies with 7 CFR 272.6.

Executive Order 13175—Consultation and Coordination With Indian Tribal Governments

E.O. 13175 requires Federal agencies to consult and coordinate with tribes on a government-to-government basis on policies that have tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. We are unaware of any current Tribal laws that could be in conflict with the proposed rule. We request that commenters address any concerns in this regard in their responses.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. Chap. 35; see 5 CFR part 1320) requires that the Office of Management and Budget (OMB) approve all collections of information by a Federal agency from the public before they can be implemented. Respondents are not required to respond to any collection of information unless it displays a current valid OMB control number. This proposed rule contains information collections that are subject to review and approval by OMB; therefore, FNS is submitting for public comment the changes in the information collection burden that would result from adoption of the proposals in the rule. Comments on this proposed rule must be received by October 17, 2011.

Send comments to Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for FNS, Washington, DC 20503. Please also send a copy of your comments to Lizbeth Silbermann, Director Program Development Division, Food and Nutrition Service, U.S. Department of Agriculture, 3101 Park Center Drive, Alexandria, VA 22302. For further information, or for copies of the information collection package, please contact Moira Johnston at the above address or via the Internet at Moira.Johnston@fns.usda.gov.

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) ways to enhance the quality, utility, and

clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on those who are to respond, including use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record. For further information, or for copies of the information collection requirements, please contact Moira Johnston at the address indicated above.

Title: Major System Failures.

OMB Number: 0584–New.

Expiration Date: Not yet determined.

Type of Request: New Collection.

Abstract: Section 4133 of the FCEA,

Major System Failures, amended the Act to require the United States Department of Agriculture (USDA) to determine when a systemic State error is resulting in the overissuance of SNAP benefits to a substantial number of SNAP households and the actions the Department may take if such a determination were made. To make this determination, the Department may require that States with potential Systemic Error situations to collect specific data concerning the systemic error. Such data may be obtained from the State's Information Management System or it may be necessary for the State to select and review a statistical (random) sample of cases and report the results to the Department.

Respondents: The 53 state agencies that administer SNAP.

Estimated Number of Annual Responses per Respondent:

Based on experience from the past twenty years (1990–2010) and considering the need for replacement of legacy systems in many States, out of the 53 State Agencies FNS estimates that one state agency will experience one systemic error every other year. If this provision had been in effect (using the proposed definition for a systemic error and States' history of overissuance in SNAP), there were two or three

instances between 1990 and 2010 in which the Department may have required States to provide additional data following implementation of a new information management system. While there is no hard data that would indicate an increase in the frequency of such situations, the implementation of new systems with new technology may introduce additional risk. FNS' estimate represents the highest number of systemic error situations that can be expected.

Estimated Total Annual Responses:

One required response every year. Based upon the above estimate of one systemic error situation every other year, an individual State might be expected to be required to provide additional data under the authority of 7 CFR 273.19 about once every 53 years.

Estimated Total Annual Reporting Burden on Respondents:

Proposed Section 273.19 requires States to provide the data specified by FNS when a systemic error that affects a substantial number of households occurs. Such data is expected to either be available from a State's Information Management System (IMS) or the State will be required to collect the information from reviewing a sample of its case files for the systemic error. As noted above it is expected that there would be one respondent once every year. The average number of staff days required per systemic error occurrence is expected to be 255 so the total annual burden would be 2040 hours.

The above estimate is based upon the following assumptions and calculations:

- *IMS data*—Production of a data file containing case level information and/or summary reports that would provide the necessary information concerning a systemic error should not require more than 80 hours given the growing sophistication of States' systems.

- *Sample of cases*—FNS believes that the number of sample cases required for Quality Control (QC) each year would be sufficient to measure the cost of a systemic error but would be needed for a 6-month period rather than annually.

While this rule does not specify the number of cases a State will select for review, the maximum FNS would require based upon this rulemaking would be 500 over a 6-month period. Since the number required for a large State's QC sample is about 1,000 cases annually, FNS and the State would have 500 cases available from QC to measure a systemic error in a 6-month period and would need an additional 500 cases in a 6-month period to reach a sample size comparable to the QC sample. In the smaller States (14–16 States) the number would be between 300 and 400 additional cases. The QC reporting burdens have already been approved by OMB as shown in the following chart.

OMB Approval No.	Expiration date
OMB 0584–0303	12/31/2013
OMB 0584–0034	12/31/2012
OMB 0584–0074	4/30/2013
OMB 0584–0299	3/31/2013

It is estimated that it would take a State about 10 staff days to construct a sample frame, and select and assign the sample. An additional 20 staff days would be necessary to develop the review guidance and forms. Since desk reviews of case files together with some phone interviews with households and collateral contacts should provide sufficient information, each case review should require no more than one staff day to complete (for example, given an average of 450 case reviews, the average burden to complete the case reviews would be 450 staff days). Another 20 staff days would be needed to compile and report the results of the sample including examination of the cases originally selected for QC review. Based upon the above, the average requirement would be the 500 staff days when a sample of cases is required.

Averaging the 80 hours (10 staff days) with the 500 staff days yields 255 days per systemic error if the frequency of using IMS data and reviews of case samples were equal (there is no information to suggest otherwise).

E-Government Act Compliance

FNS is committed to complying with the E-Government Act of 2002 to promote the use of the Internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

Background

Section 4133 of the FCEA amends Section 13 of the Act to provide the Secretary with the authority to define and determine when a State has overissued SNAP benefits to a substantial number of households in a fiscal year as a result of a major systemic error. If the Secretary made such a determination, the State agency could be prohibited from collecting these overissuances from some or all of the affected households and a claim would be established against the State for the value of the overissuances caused by the systemic error. States are required to provide the Secretary with information on which to base such a determination. The State has the right to appeal such a claim under the provisions of Section 14 of the Act. With many State's automated systems aging and the growing potential for replacement of those systems over the next several years, this provision provides a protection to households from claims collections if errors in the new system designs or their implementation result in systemic over-issuances to a substantial number of households.

What acronyms or abbreviations are used in this supplementary discussion of the proposed provisions?

In the discussion of the proposed provisions in this rule, we use the following acronyms or abbreviations to stand in for certain words or phrases:

Phrase	Acronym, abbreviation, or symbol

U.S. Department of Agriculture.	the Department

What does the Food and Nutrition Act of 2008 say about State liability for major systemic errors?

The legislative language includes the following:

- The Secretary will define what constitutes a major systemic error that affects a substantial number of households.
- State agencies shall provide all information requested by the Secretary concerning the issuance of benefits to households by the State agency in the applicable fiscal year.
- The Secretary will make a final determination after reviewing relevant information provided by a State agency.
- The final determination will include whether the State agency overissued benefits to a substantial number of households as a result of a systemic error and the amount of the overissuance in the applicable fiscal year.
- The Secretary shall establish a claim against the State agency equal to the value of the overissuance caused by the systemic error.
- Administrative and judicial review, as provided in Section 14 of the Act, shall apply to the final determinations by the Secretary once the claim is established.
- The State agency shall, as soon as practical, remit to the Secretary the dollar amount specified in the claim if the determination of the Secretary is not appealed.
- When the determination of the Secretary is appealed, and after completion of the administrative or judicial review there is a finding of liability on the part of the State, it shall

remit to the Secretary the dollar amount of the liability found in the administrative or judicial review. The payment shall be made by the State to the Secretary as soon as practical.

- The Secretary may reduce any amount due to the State agency under any other provision of the Act by the amount due if a State agency fails to make a payment within a reasonable period of time determined by the Secretary.

The FCEA language does not specifically define what constitutes a substantial number of households being overissued benefits or a major systemic error. The language is not specific to "systems failures," and could be interpreted to include errors resulting from a variety of causes. Given the other authorities the Act provides to deal with error situations, the Department believes the intent of this provision is to focus on errors associated with automated eligibility systems and the effects of their implementation.

What is a major systemic error?

States have experienced technological and operational failures in the past when major systems were implemented before they were fully tested and staff fully trained in their use. The Department is proposing that a major systemic error be defined as an error resulting from a State's implementation of a new SNAP automated eligibility (data processing) system, reprogramming of an existing system, or adding new programming to an older system. While the legislative language does not limit the term systemic to "systems" errors, given the other authorities and remedies in the Act, the Department believes this is the most reasonable interpretation of this new authority (there is no practical utility relative to this proposed rulemaking in defining what might constitute a "minor" systemic error). The second criterion for use of the subject authority is that the systemic error affects a substantial number of households as discussed below.

What constitutes a "substantial" number of households?

The Department is particularly interested in comments on this aspect of the proposal. Clearly, defining "substantial" in the context of this rule is problematic. The Department considered using a specific number of households, but with the vast differences in States' caseload sizes, a single number could not be equitable between States. The better alternative is use of a percentage of States' caseloads that experience overissuances to define substantial. Since the national average case error rate has been around seven percent for several years and this number represents all of the errors made in the certification of households, it is reasonable to view this rate as "substantial." Therefore, the Department proposes that when an average of 8 percent or more of a State's caseload receives overissuances due to a systemic error over a 6-month period, this would be considered a substantial number of households. The reason for specifying a minimum of 6 months is that if a systemic error that affected 8 percent of the caseload lasted less than 6 months, it could affect less than 4 percent of the State's case load on an annual basis.

Will States have the opportunity to take corrective action regarding the systemic error and avoid suspension of claims collection and the resulting liability?

States are required to take corrective action immediately when they are become aware of a potential systemic error and, if the action were effective, could prevent the error affecting 8 percent of its households over the 6-month period, thus avoiding liability under these provisions. However, once the systemic error has affected 8 percent of the caseload over the 6-month period, the Act does not provide for any consideration of a State's corrective action efforts. Even if a major systemic error was determined to exist, timely corrective action could reduce the State's exposure to additional months of liability.

Will FNS take the amount of the individual overissuances into account in determining the percentage of households affected by the systemic error?

The Department is proposing that the amount of the error be at least \$21 per month for a case to be included in the calculation of a "substantial" number of households. The primary purpose of this proposed provision is to relieve households from payment of claims

resulting from systemic errors. Since States have the option of establishing claims of less than \$125 against those households that are no longer on the Program, households overissued less than \$21 per month over a 6-month period would not reach \$125 and may not be required to pay a claim even in the absence of this provision. Therefore, including cases with monthly losses of less than \$21 in the count of households would not contribute to the purpose of this provision.

What authorities does USDA currently have when errors are made in a State's administration of SNAP?

This proposal does not represent a significant departure from the Department's policy in dealing with State error and compliance issues. FNS has long focused on working in partnership with States to prevent errors or develop strong corrective action measures through technical assistance and identifying promising State practices. While most States already test new automated eligibility systems extensively, this provision should help encourage all States to implement new systems using sound testing. The Act has four other primary authorities for billing States for the loss of Federal funds and non-compliance with Federal law and regulations. Each is based on a different set of concepts, but there is potential for overlap, depending on the nature of the error or compliance issue. None of these other authorities allow for prohibition of claims collection against households for overissuances.

Suspension/Disallowance of Administrative Funding

Section 11(g) of the Act, 7 CFR 276.4, specifies that if FNS determines that a State agency's administration of the Program is inefficient or ineffective, FNS may warn the State agency that a suspension and/or disallowance of administrative funds is being considered. After a State agency receives a warning, FNS may either suspend or disallow administrative funds if the problem is not corrected. Since this authority deals with administrative funds and the systemic error authority deals with overissued benefits, there can be no direct overlap between the claim amounts. In addition, while FNS could use the two authorities sequentially or simultaneously in dealing with a severe compliance issue, the suspension/disallowance authority is generally viewed as more appropriate to issues of non-compliance that affect program access or application processing.

Negligence

Section 11(h) of the Act, 7 CFR 276.3 specifies that FNS may determine that a State agency has been negligent in the certification of applicant households if a State agency disregards SNAP requirements or implements procedures that deviate from the Act, the regulations, or the FNS-approved State Plan of Operation without first obtaining FNS approval, and the result is a loss of Federal funds. In computing amounts of losses of Federal funds due to negligence, FNS may use actual, documented amounts or amounts which have been determined through the use of statistically valid projections. When a statistically valid projection is used, the methodology will include a 95 percent, one-sided confidence level.

If FNS makes a determination that there has been negligence or fraud on the part of a State agency in the certification of households for participation in the Program, FNS is authorized to bill the State agency for an amount equal to the amount of benefits issued as a result of the negligence or fraud.

While there are some structural similarities in terms of benefit loss and claim calculation, the systemic error authority does not require the State to "disregard" or "deviate from" a policy. There is potential for overlap in the use of the two authorities and to the extent that a State actually pays the Federal government for either a negligence billing or a systemic error billing under this authority, the second collection amount would be reduced.

Direct Liability

In accordance with Section 7(e) of the Act, 7 CFR 276.1(a)(2), FNS holds State agencies strictly liable for all losses that occur during issuance. This authority can only be used in cases of issuance errors. Since errors that fall outside of QC data are difficult to identify without review of States' issuance and certification files, FNS has employed data mining as necessary to determine if losses are occurring in the process of issuing benefits. It is possible that the systemic error in a States' operation could be in the issuance process so there is potential for overlap in the use of the two authorities and to the extent that a State actually pays the Federal government for both a strict liability billing and for a systemic error billing under this authority, the second collection amount would be reduced.

QC Sanctions

States' payment error rates are measured annually based on an in-

depth review of a sample of cases receiving SNAP benefits each month of the year. The review determines the amount of benefits cases should have been issued based on correct policy and verified household information relative to the amount that they were issued. The differences in the two amounts (over a threshold) constitute the error dollars that are divided by the total amount issued to the sample cases to calculate States' payment error rates. Because the sample is random and State-wide, these error rates represent the States' actual error rates. For a complete description of the QC process see Section 16(c) of the Act, 7 CFR 275.12, and QC Handbook 310 (may be found on the FNS Web site at <http://www.fns.usda.gov/snap/qc/default.htm>). Section 16(c)(1) of the Act specifies the process for determining when a State's payment error rate is excessive and State funds are subject to a liability. See § 275.23 for a complete description of the QC sanction provisions.

The key differences between the QC sanction and this authority is that the QC error rate is an index made up of errors with many different causes (potentially including certain systemic errors), QC liability amounts are not dollar-for-dollar relative to the over-issuances measured, and QC liability amounts are not necessarily repaid to the Federal government. To the extent that a State is billed by the Federal government for both a QC based liability and for a systemic error under this authority, the second collection amount would be reduced.

Could the Department invoke more than one of these authorities for the same error or compliance issue?

Yes. In certain situations the Department could use the systemic error authority and another authority to address different aspects of an issue in a State. However, any collections based on the same overissuance or direct liability loss would be offset in the second collection amount.

What is the relationship of this rule to the "FCEA Testing Requirements Rule?"

Section 16(g) of the Act requires States designing new automated eligibility systems to thoroughly test and pilot such systems prior to full implementation. Through the advanced planning document process (7 CFR 277.18), FNS strives to work closely with States in their planning, and later, in their implementation of new systems. While it is not unusual for such potential errors to be present in the early stages of new software

development and application, it is the purpose of the testing and piloting process to identify and correct such errors. A cautious and measured roll-out of new systems within a State also allows for identification and correction of any errors before they can affect the entire caseload. If a State complies with the required testing and piloting provisions of the Act and resulting regulations, deals effectively with issues identified in this process prior to rolling the new system out, and implements effectively in terms of case conversion and worker training, the potential for a systemic error that affects a substantial number of households is minimal.

However unlikely, it is possible that a State could experience a systemic error situation even if all precautions have been taken. While FNS would be reluctant to use the systemic error authority in this situation, the intent of the subject provision of the FCEA is to relieve the burden of reduced benefits by prohibiting claims collection for systemic overissuances to households. While the FCEA does give the Department discretion regarding the prohibition of collecting claims against households when a major systemic error occurs, it does not allow discretion regarding a State's liability for such an error; even when the State has been prudent in its planning and implementation. While such a situation would preclude a negligence billing, the Department would prohibit individual household claims collection and establish a liability against the State under this proposal.

Could the Department prohibit claims collection, but not bill the State for a systemic error?

No, the FCEA is clear that the determination that a systemic error has occurred will result in a claim against the State for the amount of the systemic error. This rule links the determination to prohibit claims collection for resulting overissuances to the mandate to bill the State. However, the Department has general discretionary authority under Section 13 of the Act to waive part or all of a claim against a State. If a State has adhered to the planning, testing, and piloting requirements of the Act and regulations, FNS would strongly consider recommending reduction or elimination of any claim against the State for a systemic error.

Will this authority only be used relative to computer programming problems that result in systemic errors?

No, the implementation of a new system or significant system changes

may also require worker training, case conversion, sufficient server capacity, proper equipment and changes to the States' business processes in the local offices. If systemic errors arose from factors related to implementation, the Department could prohibit claims collection for the error and pursue a claim against the State.

How will the Department become aware of system problems that may result in the use of the systemic error authority?

The Department monitors States' implementation of new systems and their impact on program performance through on-site reviews and standard reports such as QC and participation reports. In addition, recipients, advocate groups and the media can provide indications of problems that FNS follows up on with inquires to the State, requests for additional data, and/or additional reviews of States operations. FNS can go further by using data mining techniques on States' data or analyzing QC data for error patterns that may have a systemic cause. Therefore, except in the most extreme circumstances, the process of identifying a systemic error would typically require a series of steps, within each of which FNS would be seeking to work with the State to correct the problem. If, upon State-wide implementation of a system, the systemic error was pervasive and readily identified, the process for using this authority to prohibit claims collection could be more immediate.

What data will States be required to provide to FNS?

FNS' data needs will be determined by the nature and timing of the systemic error. While the FCEA and this proposal requires States to provide all information requested by the Department, FNS will negotiate with the State on the data request to ensure that only the information needed to make a determination and calculate the proper amount of a claim would be required from the State. For example, FNS could use the authority of the FCEA to require States to conduct additional reviews of a sample of cases (similar to a QC review) to determine the extent of a potential systemic error, but would negotiate with the State on the extent of the review process, the timing of reviews and the size of the sample. States could also be required to provide data from their automated eligibility system. FNS will base its determination on whether there has been a systemic error that affected a substantial number of households on the data it gathers from the State. FNS would base its determination on the point estimate of

the sample data when sample data is used.

How will the Department notify States of the potential for prohibiting claims collection?

FNS will be in communication with any State that may be subject to this authority, but will notify the State that the State will have 10 days from the date of notification to stop claims collection against households affected by the systemic error.

How long will States have to provide required information to FNS?

Unless otherwise specified by FNS, States shall provide required information to FNS within 3 months of being notified of the data requirements.

How long will States have to implement the prohibition of recipient claims collection for overissuances based upon systemic errors?

States will have 10 business days after notification from FNS to stop claims collection against households affected by the systemic error.

Will States be required to return any claims resulting from the systemic error that are collected prior to the FNS notification prohibiting their collection?

Yes, claims resulting from the systemic error that are collected must be restored to households' Electronic Benefit Transfer (EBT) accounts.

When this authority is invoked, will claims be prohibited for all households?

No, claims establishment and collection would only be prohibited for the claims resulting from the systemic error(s) identified by FNS. States would be expected to continue to pursue claims against households that are overissued benefits in accordance with the Act, except those affected by the systemic error.

How long will recipient claims collection be prohibited under this provision?

Once FNS notifies a State that claims collection is to be prohibited for a systemic error, all claims in process and any claims that could be pursued for that error would be prohibited until the systemic error is determined by FNS to have been substantially corrected. For example, a State implements a major system change on March 1, and on August 1, FNS notifies the State to prohibit claims collection due to a systemic error in the certification process arising from that system change. The State takes corrective action to address the problem on October 1 and

the State is notified on December 1 that FNS has determined that the systemic error has been eliminated. All claims against cases arising from systemic errors made between March 1st and December 1st would be prohibited, including benefits issued to such cases after December 1st until they are recertified. However, no claims resulting from an error occurring after December 1st could have claim collection prohibited.

What information will States be required to report on the prohibited claims collection?

While the State will be required to document the cases where overissuances are caused by the systemic error and claims are not being pursued, no additional reporting will be required.

How will FNS determine the claim amount against a State following prohibition of recipient claims collection?

FNS will use information from its standard reports together with the data it obtains from the State under the authority of this provision of the FCEA. QC data alone may be used or it may be used in conjunction with an additional sample of cases. Data mining techniques may be employed when QC data cannot provide the necessary information on the error. When FNS uses sample data, it will apply a 95 percent one-sided confidence level to determine the amount of a claim. The example of how this calculation will be made is provided in § 273.19(c)(5) as: the sample estimate of the major systemic error is 8 percent over a 6 month period, but based on a 95 percent confidence interval of 2 percentage points, the rate used would be 6 percent. Therefore the claim would be 6 percent of value of the State's total issuance over the 6 months.

What are the appeal procedures for claims against states?

The administrative appeal process for claims asserted under this authority is specified in § 276.7 and permits States to request an administrative review within 10 days of the date of delivery of the notice of claim. This proposed rule adds reference to billings based upon systemic errors into § 276.7(a)(1).

Can a State appeal the Department's decision to prohibit claims collection against households affected by a systemic error?

FNS' decision on prohibiting collection of recipient claims resulting from systemic error cannot be appealed.

Only the related, but separate, claim against the State can be appealed.

If a State disagrees with the ruling of the SNAP appeals board, can it seek judicial review?

As specified in § 276.7(j), "State agencies aggrieved by the final determination may obtain judicial review and trial de novo by filing a complaint against the United States within 30 days after the date of delivery of the final determination, requesting the court to set aside the final determination."

If the State does not appeal the billing or there is a remaining liability amount after the administrative and or judicial review process, what are the next steps in the process?

As soon as practicable, the State would remit the claim amount as specified in the FNS billing. If a State agency fails to make a payment within a reasonable period of time, FNS would reduce the administrative funding due to the State agency by the amount of the claim.

List of Subjects

7 CFR Part 273

Administrative practice and procedure, Aliens, Claims, Employment, Grant programs—social programs, Income taxes, Reporting and recordkeeping requirements, Students, Supplemental Security Income.

7 CFR Part 276

State agency liabilities, Negligence or fraud, Suspension/disallowance of administrative funds, Injunctive relief, Good cause, Administrative review process.

Accordingly, 7 CFR parts 273 and 276 are proposed to be amended as follows:

PART 273—CERTIFICATION OF ELIGIBLE HOUSEHOLDS

1. The authority citation for part 273 and continues to read as follows:

Authority: 7 U.S.C. 2011–2036.

2. Add § 273.19 to read as follows.

§ 273.19 Recipient claims resulting from major systemic errors.

(a) *Major systemic errors.* (1) Major systemic errors are overissuance errors that effect eight percent or more of a State's caseload over a 6 month period that result from the State's implementation of a new SNAP automated eligibility (data processing) system, reprogramming of an existing system, or adding new programming to an existing system.

(2) The causes of major systemic errors may include, but are not limited to: Incorrect computer programming, ineffective worker training, problems in case conversion, insufficient server capacity, improper equipment, and ineffective States' business processes in the local offices related to the systems change.

(b) *State reporting.* (1) When the Food and Nutrition Service (FNS) determines that major systemic errors may have occurred in a State, the State shall provide the information that FNS identifies as necessary to make its determination that a systemic error has, or has not, occurred. Based on the data FNS gathers from the State, FNS will determine whether there has been a systemic error that affected a substantial number of households. FNS' data needs will be determined by the nature and timing of the systemic error, but will generally cover at least a 6 month time period. FNS will only request the information necessary to make its determination and calculate the proper amount of any potential claim against the State. FNS may require States to conduct additional reviews of cases randomly sampled from the State's caseload to determine the extent of a potential systemic error. When sample data is used, FNS will base its determination on the point estimate of the sample data and negotiate with the State on the size of the sample. FNS may also require a State to provide data from its automated eligibility (data processing) system.

(2) Unless otherwise specified by FNS, States shall report to FNS within 3 months of being notified of the data requirements.

(c) *FNS determination.* (1) FNS shall base its determination of whether a major systemic error exists on the data it requires to be provided by the State and any data from Federal review sources including the USDA Office of Inspector General, the General Accounting Office, and FNS reviews. FNS may also validate data provided by a State.

(2) FNS will notify a State of its determination and, when a major systemic error is determined to exist, inform the State of the specifics of the error(s) and prohibit claims collection from the affected cases. FNS will establish and inform the State on the time period for which overissuances to the subject cases are not subject to recipient claims collection.

(3) When FNS determines that a major systemic error exists, FNS shall determine the amount of the overissuance caused by the major systemic error. FNS will calculate the

claim amount based on the best information available and may require the State to provide information from its information management system or review a sample of cases.

(4) Error amounts below \$20 in a given month shall not be included in the determination of a systemic error.

(5) When a sample is used, the claim shall be based on the lower boundary of a 95 percent confidence interval. Example of calculation based on information from a sample: The sample estimate of the major systemic error is 8 percent over a 6 month period, but based on a 95 percent confidence interval of 2 percentage points, the rate used would be 6 percent. Therefore the claim would be 6 percent of value of the State's total issuance over the 6 months.

(6) If any funds resulting from the systemic error caused overissuances are collected based on the negligence or quality control provisions of 7 CFR parts 276 and 275, the claim calculated under paragraph (c)(3) of this section would be reduced by the amount collected.

(d) *Action on recipient claims collection.* (1) When FNS determines that a major systemic error has occurred, the State will be notified that claims resulting from the systemic error overissuances shall not be collected. FNS will specify the beginning date of the major systemic error the time period in which the errors occurred.

(2) States shall have 10 days from the date of notification by FNS to stop collection of the claims resulting from the systemic error.

(3) Once FNS determines that the systemic error has been corrected to the extent that it no longer affects a substantial number of households, the State will be notified of the ending date for prohibition on collection of claims for overissuances resulting from the major systemic error and that claims shall again be collected for all overissuances.

(4) If claims are collected from households based on overissuances caused the major systemic error, the State shall return the claim amount collected to these households by restoring benefits to households EBT account.

(e) *Collection of liabilities and appeals.* FNS shall initiate collection action unless an administrative appeal relating to the liability is pending. Appeals include administrative appeals in accordance with the procedures specified in § 276.7 and judicial appeals. While the amount of a State's liability may be recovered through offsets to their letter of credit as identified in § 277.16(c) of this chapter, FNS shall also have the option of billing

a State directly or using other claims collection mechanisms authorized under the Federal Claims Collection Act, depending upon the amount of the State's liability.

PART 276—STATE AGENCY LIABILITIES AND FEDERAL SANCTIONS

3. The authority citation for part 276 continues to read as follows:

Authority: 7 U.S.C. 2011–2036.

4. In § 276.7, paragraph (a)(1) is revised to read as follows:

§ 276.7 Administrative review process.

(a) * * *

(1) Whenever FNS asserts a claim against a State agency, the State agency may appeal the claim by requesting an administrative review. FNS claims that may be appealed are billings resulting from financial losses involved in the acceptance, storage, and issuance of coupons (§ 276.2), billings based on charges of negligence or fraud (§ 276.3), billings based on over-issuances for systemic errors (§ 276.3) and disallowances of Federal funds for State agency failures to comply with the Food and Nutrition Act, regulations, or the FNS-approved State Plan of Operations (§ 276.4).

* * * * *

Dated: August 8, 2011.

Audrey Rowe,
Administrator, Food, Nutrition, and Consumer Services.

DEPARTMENT OF ENERGY

10 CFR Part 431

[Docket No. EERE–2010–BT–NOA–0028]

RIN 1904–AC24

Energy Conservation Program for Consumer Products and Certain Commercial and Industrial Equipment: Statement of Policy for Adopting Full-Fuel-Cycle Analyses Into Energy Conservation Standards Program

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Statement of Policy.

SUMMARY: In its effort to adopt several National Academy of Sciences (the Academy) recommendations, the U.S. Department of Energy (DOE) intends to modify the methods it uses to estimate the likely impacts of energy

conservation standards for covered products on energy use and emissions and will work to expand the energy use and emissions information made available to consumers. Specifically, DOE intends to use full-fuel-cycle (FFC) measures of energy use and emissions, rather than the primary (or site) energy measures it currently uses.

Additionally, DOE intends to work collaboratively with the Federal Trade Commission (FTC) to make readily available to consumers information on the FFC energy and greenhouse gas (GHG) emissions of specific products to enable consumers to make cross-class comparisons of product energy use and emissions.

ADDRESSES: The docket is available for review at <http://www.regulations.gov>, including the **Federal Register** notice of proposed policy, the public meeting attendee list and transcript, all comments received, and other supporting documents/materials. All documents in the docket are listed in the <http://www.regulations.gov> index. However, not all documents listed in the index may be publicly available, such as information that is exempt from public disclosure.

A link to the docket Web page can be found at: http://www1.eere.energy.gov/buildings/appliance_standards/full_fuel_cycle_analyses.html. The regulations.gov Web page will contain simple instructions on how to access all documents, including public comments, in the docket.

- III. General Discussion and Discussion of Comments
 - A. Considering FFC Energy and Emission Impacts of Prospective Efficiency Standards
 - B. Using FFC Energy Efficiency Metrics in DOE's Assessment of Energy Conservation Standards Impacts
 - C. Estimated Impacts From Expansion of Considered GHG Emissions
 - D. Methodology for Estimating FFC Energy and Emission Impacts

- E. Consumer Information on FFC Impacts of Specific Covered Products
- IV. Procedural Issues and Regulatory Review
 - A. Review Under the National Environmental Policy Act of 1969
 - B. Review Under the Information Quality Bulletin for Peer Review
- V. Approval of the Office of the Assistant Secretary

I. Summary of the Policy

In its August 2010 Notice of Proposed Policy (referred to herein as "Notice" or "NOPP") (75 FR 51423), the U.S. Department of Energy (DOE) proposed to use full-fuel-cycle (FFC) measures of energy use and greenhouse gas (GHG) and other emissions in the national impact analyses and environmental assessments included in rulemakings for future energy conservation standards (referred to herein as "energy conservation standards" or "energy efficiency levels"). DOE stated that using the FFC measure in these analyses will provide more complete information about the total energy use and GHG emissions associated with a specific energy efficiency level than the primary (or site) energy measures currently used by DOE. DOE also indicated that utilizing the FFC measure for environmental assessments and national impact analyses would not require alteration of the measures used to determine the energy efficiency of covered products (referred to herein as "appliances and equipment" or just "appliances") because the Energy Policy and Conservation Act (EPCA), as amended, requires that such measures be based solely on the energy consumed at the point of use. (42 U.S.C. 6291(4)-(6), 6311(3)-(4), (18)) However, the Notice stated that using the FFC measure in lieu of primary energy in environmental assessments and national impact analyses could affect the alternative standard levels that DOE considers before choosing an energy efficiency level in the future. A policy change to consider FFC impacts would increase the energy and emission reductions estimated to result from energy efficiency levels. This shift would, consequently, increase some of the estimated benefits of such standards.

The NOPP also proposed that DOE would significantly improve upon the Federal Trade Commission's (FTC) existing online databases of appliance site energy use and efficiency ratings by including FFC energy use and emissions data. DOE's Notice indicated that the improved databases could provide tools to enable users to easily compare a product's energy use, emissions, and costs to similar products, including products that are in different classes, have different features or use different

fuels. DOE solicited public comment on whether such an online service would likely benefit consumers and, if so, the most effective way to present this information. DOE also solicited comments on the merits of providing GHG emissions and other product-specific comparative data on Energy Guide labels.

After consideration of the comments received on its NOPP, DOE has decided to use FFC measures of energy use and GHG and other emissions in the national impact analyses and environmental assessments included in future energy conservation standards rulemakings. DOE currently uses primary (or site) energy consumption for national impact analyses and environmental assessments using the National Energy Modeling System (NEMS) developed by DOE's Energy Information Administration (EIA). DOE will continue to rely upon NEMS-based estimates of primary energy and emission impacts, but intends to use conversion factors generated by the DOE Argonne National Laboratory (ANL) Greenhouse Gases, Regulated Emissions, and Energy Use in Transportation (GREET) model to convert these estimates into estimates of FFC energy and emission impacts. DOE also will, subject to the availability of funds, support efforts to make readily available to consumers and other users of regulated products information on the FFC energy use and emissions associated with specific products, and the means to compare this energy use and emissions to other comparable products, whether or not those other products use the same type of energy. The following sections more clearly state today's policy as it applies to the different issues raised in DOE's NOPP.

II. Background

Section 1802 of the Energy Policy Act of 2005 (EPACT 2005) directed DOE to commission a study with the National Academy of Sciences (the Academy) to examine whether the goals of energy conservation standards are best served by measurement of energy consumed, and efficiency improvements at, the actual point-of-use or through the use of the FFC, beginning at the source of energy production (Pub. L. 109-58). The FFC measure includes point-of-use energy, the energy losses associated with generation, transmission, and distribution of electricity, and the energy consumed in extracting, processing, and transporting or distributing primary fuels. The study, "Review of Site (Point-of-Use) and Full-Fuel-Cycle Measurement Approaches to DOE/EERE Building Appliance Energy-

Efficiency Standards,” (Academy report) was completed in May 2009 and included five recommendations. A copy of the study can be downloaded at: http://www.nap.edu/catalog.php?record_id=12670.

The Academy’s primary recommendation is that “DOE consider moving over time to use of a FFC measure of energy consumption for assessment of national and environmental impact, especially levels of GHG emissions, and to providing more comprehensive information to the public through labels and other means such as an enhanced Web site.”¹ The Academy further recommended that DOE work with the FTC to consider options for making product specific GHG emissions estimates available to consumers. More specifically, the Academy recommended that DOE use the FFC measure of energy consumption for the environmental assessment and national impact analyses used in energy conservation standards rulemakings.

DOE’s energy conservation program for consumer products and certain commercial and industrial equipment sets energy conservation standards to reduce U.S. energy consumption in residential and commercial buildings. DOE separates covered products into classes differentiated by energy source, technology, and capacity. EPCA, as amended, requires DOE to set energy conservation standards for covered products based on energy consumption at the point-of-use. (42 U.S.C. 6291(4)–(6), 6311(3)–(4), (18))

The point-of-use method for measuring energy consumption considers the use of electricity, natural gas, propane, and/or fuel oil by an appliance at the site where the appliance is operated. DOE uses point-of-use measures of energy consumption, usually presented in the physical units typically used for the relevant fuel (or electricity), for setting energy conservation standards. Before choosing an energy conservation standard, however, DOE performs several analyses to estimate the likely impacts of alternative standard levels. DOE impact analyses include a: life-cycle cost analysis, manufacturer impact analysis, national impact analysis, engineering analysis, screening analysis, environmental assessment, utility impact assessment, and employment impact assessment. For many years, DOE has used primary energy measures of energy consumption and related emissions in several of these analyses, including the national impact analysis and the environmental assessment, to

estimate the total projected energy savings and emission impacts likely to result from the imposition of alternative standard levels. Primary energy includes energy consumed on-site, plus energy losses that occur in the generation, transmission, and distribution of electricity.

Based on the results of these various analyses, DOE then proposes (and, ultimately, adopts) the energy conservation standard that it determines achieves the maximum energy efficiency improvement that is technologically feasible and economically justified as required by EPCA, as amended. (42 U.S.C. 6295(o)(2)(A) Additionally, DOE must determine that the establishment of a new or amended energy conservation standard will result in significant energy conservation. (42 U.S.C. 6295(o)(3)(B))

III. General Discussion and Discussion of Comments

In response to DOE’s Notice, DOE received comments from 41 entities. Comments were submitted by utilities, research facilities, consumer representatives, non-profit organizations, farmers and others. In the following sections, the comments received concerning this proposed change in policy are summarized and addressed, and DOE provides a statement of the resulting policy that it will apply in the development of future energy efficiency rules and related activities.

There were, however, a number of comments received in response to the Notice that are peripheral to the issues addressed in the Notice. For example, several comments indicated that the Department should not use estimates of the social cost of carbon in assessing the impacts of prospective energy conservation standards and others disagreed with the methods now used by DOE to estimate such cost. (See *e.g.*, NRECA, Public Comment, EERE–2010–BT–NOA–0028–0001, p. 3) These issues have been addressed in previous rulemakings, would not be affected by today’s policy change to use FFC analyses, and were not the subject of the Academy’s report.

American Public Power Association (APPA) commented that DOE should be noting the high degree of subjectivity involved in the monetary benefit of reduced carbon dioxide (CO₂) in the monetization of societal benefits. (APPA, Public Comment, EERE–2010–BT–NOA–0028–0033, p. 4) This comment on the treatment of the monetary benefits of reduced CO₂ emissions is outside the scope of the Notice and this final Policy Statement.

However, DOE notes that DOE’s analysis does identify such benefits separately in its life-cycle cost and net present value benefit calculations.

The Edison Electric Institute (EEI) indicated that the method used by DOE to derive estimates of primary energy inappropriately “assigns” a fossil fuel heat rate for electricity generated by renewable and nuclear resources. EEI indicated that this approach resulted in an inflated value for the national energy savings associated with the electricity demand reductions estimated by appliance efficiency standards analyses. (EEI, Public Comment, EERE–2010–BT–NOA–0028–0007, p. 3) Today’s policy would not modify the methods used by DOE to calculate primary energy.

Michigan dairy farmers provided a comment concerning the final water heater energy conservation standard. (Weiss, Public Comment, EERE–2010–BT–NOA–0028–0009, p. 1) Comments on DOE directives made under previous energy conservation standards rulemakings are outside the scope of the Notice and are not addressed in this Statement of Policy.

A. Considering FFC Energy and Emission Impacts of Prospective Efficiency Standards

In its August 2010 Notice, DOE proposed to modify the methods it uses to estimate the likely impacts of energy conservation standards for covered products in order to use FFC measures of energy and related emissions in national impact analyses and environmental assessments, rather than the primary energy measures that DOE currently uses in these analyses. The NOPP also provided various tables with examples of the preliminary estimates of the conversion factors that DOE would use to shift its estimates of the primary energy savings and emission reductions likely to result from various energy efficiency levels to their FFC equivalents.

A few of the comments noted that existing law requires the development of efficiency standards based on the energy consumed by an appliance at its point-of-use (or site energy). While some commenters questioned whether this legal constraint was appropriate, no comments argued that DOE was not obligated by existing law to set its energy conservation standards using metrics derived from point-of-use (or site) energy. In a related comment, the American Council for an Energy-Efficient Economy (ACEEE) recommended that DOE make a statement indicating DOE’s intention of keeping gas and electric appliances in separate product classes for energy

¹ Academy Report at p. 10.

conservation standards. (ACEEE, Public Comment, EERE-2010-BT-NOA-0028-0013, p. 1) The Consumer Energy Council of America (CECA) recommended that energy conservation standards continue to be fuel neutral, as they indicated was directed by EPCA, as amended, and that DOE should not identify or establish favored energy sources. (CECA, Public Comment, EERE-2010-BT-NOA-0028-0012, p. 2)

In response, DOE is confirming that it intends to continue to set energy conservation standards for covered products based on energy consumption at the point-of-use, as required by EPCA, as amended. (42 U.S.C. 6291(4)-(6), 6311(3)(4), (18)) DOE is also confirming that it will continue to consider comparable products that use different fuels in separate classes as required by 42 U.S.C. 6295(q)(1). However, DOE does not agree that EPCA, as amended, mandates fuel neutral energy conservation standards. In evaluating and establishing energy conservation standards, DOE divides covered products into classes based on the type of energy used, their size or capacity and other features that directly affect the product's energy use or efficiency. EPCA, as amended, specifically provides that energy conservation standards for different product classes can have higher or lower levels. (See 42 U.S.C. 6295(q)) DOE sets the energy conservation standard for each product class independently based upon the maximum energy efficiency improvement that is technologically feasible and economically justified, and that results in significant conservation of energy for each product class. (See 42 U.S.C. 6295(o)(2)(A)-(B) and (3)(B))

A number of comments focused on the primary issue raised by the Notice: Should DOE consider the FFC energy and emission impacts of prospective energy conservation standards in determining whether a particular standard should be selected? An appliance efficiency standard is chosen based on the results of various analyses—some of which EPCA, as amended, directs DOE to perform and some of which DOE performs under the discretionary provisions of EPCA. (42 U.S.C. 6295(o)(2)(B)) EPCA, as amended, does not mandate the use of point-of-use measures in these analyses, although the ultimate energy conservation standard chosen must be expressed as a point-of-use measure. (42 U.S.C. 6291(4)-(6), 6311(3)-(4), (18))

Several commenters supported DOE's proposal to begin considering the FFC energy and emission impacts of prospective energy conservation standards. The American Gas

Association (AGA) indicated their support by stating, "Current efficiency standards and appliance labels rely on incomplete energy consumption and emission measurements." (AGA, Public Comment, EERE-2010-BT-NOA-0028-0004, p. 1) Also in support, the National Propane Gas Association commented that the FFC approach will enable "a more comprehensive analysis of total energy and environmental impacts of energy efficiency standards." (NPGA, Public Comment, EERE-2010-BT-NOA-0028-0034, p. 2)

The Air-Conditioning, Heating, and Refrigeration Institute (AHRI) expressed their concern that the use of FFC factors would lengthen the rulemaking process by sidetracking discussions of important aspects of a rulemaking, such as benefits to the consumer. (AHRI, Public Comment, EERE-2010-BT-NOA-0028-0017, p. 3)

DOE does not believe that the incorporation of FFC energy and emission impact analyses will substantially alter the focus of public review and comment on DOE's energy conservation standards rulemakings. DOE already conducts and presents the results of analyses on a broad range of criteria other than the direct impacts of appliance efficiency standards on the users of the covered product, as required by statute. While new impact analyses or methods often receive considerable attention when they are introduced, over time, public comments tend to focus on those elements of DOE's analysis that have the greatest impact on the identification and selection of the minimum standard level that is ultimately adopted. DOE does not believe that the use of FFC factors in the national impacts analysis and environmental assessment will significantly impact the selection of the minimum standard level adopted.

Other commenters also opposed such a change to the use of FFC factors. CECA and EEI both stated that considering FFC impacts would push the analysis used to set energy conservation standards beyond what is economically feasible and technically justified. EEI also questioned whether DOE had a sufficiently reliable basis for estimating FFC energy and emission impacts. (CECA, Public Comment, EERE-2010-BT-NOA-0028-0042, p. 7; EEI, Public Comment, EERE-2010-BT-NOA-0028-0007, p. 2) Specifically, EEI commented that "there is significant disagreement" as to the appropriate FFC and primary energy factors for the same energy source among different entities. (EEI, Public Comment, EERE-2010-BT-NOA-0028-0037, pp. 5-6)

Under today's policy, DOE will continue to use EIA estimates of primary energy and emission impacts as the basis for its impact analyses and the GREET model will be used simply to convert these primary energy values to their FFC equivalents. This approach avoids making any changes to the methods long used by DOE's EIA (and by DOE's appliance efficiency standards program) to convert energy end-use values to primary energy values, which are the source of many of the disagreements referenced by EEI. DOE's ANL has, in the past, compared different life-cycle assessment methods and found that the results are consistent with those generated by GREET when the same critical input parameters are used. This analysis will be cited in future standards rulemakings, as appropriate.

The statute specifically directs DOE to set appliance efficiency standards at levels that achieve the maximum energy savings that is technologically feasible and economically justified; DOE must also determine that the establishment of the chosen standard will result in significant energy conservation. (42 U.S.C. 6295(o)(2)-(3)) DOE does not believe that the consideration of the FFC energy and emission impacts in the national impacts analysis and environmental assessment of a standard under consideration is in conflict with this statutory directive. In practice, the consideration of FFC energy and emission impacts is likely to have comparatively small effects on DOE's analysis of the economic justification of specific alternative appliance efficiency standards. As indicated by the illustrative tables included in the NOPP that provided preliminary estimates of FFC conversion factors, the estimated energy savings likely to result from efficiency levels under consideration using the FFC method could increase by approximately seven to fifteen percent for gas or oil-fired appliances and two to fifteen percent for electric appliances, relative to the estimates of primary energy savings used currently. These relative increases were based on the ratio of FFC energy use and primary energy use, which were estimated by the GREET model. This increase in energy savings would not affect the estimated value or cost of the resulting energy savings, nor the estimated net present value of consumer life-cycle costs savings, since all energy costs savings are based on DOE estimates of the energy costs (derived from retail energy prices) paid directly by energy users. As a result of a change to consider FFC impacts, there also would be a

comparable increase in the CO₂ emission reductions and in the estimated monetary value of such emission reductions. DOE believes that these adjustments in the estimated energy savings and in the value of the benefits associated with reduced CO₂ emissions would enhance, rather than distort, DOE's analyses by more fully representing the total energy and emissions associated with the delivery of energy to consumers.

While estimates of the additional energy use and emissions resulting from the FFC methodology will add some new uncertainties to DOE's impact analyses, these new uncertainties are small relative to the total additional energy and emission impacts being estimated and are comparable to the uncertainties associated with previous DOE analyses. Since FFC-based estimates will more fully reflect the total energy and emission reductions associated with the imposition of energy conservation standards and are not significantly less reliable than current methods, DOE has concluded that such estimates should be used in future impact analyses.

Policy Statement: In the national impacts analyses and environmental assessments of future energy conservation standards rulemakings, DOE intends to include impact estimates based on FFC energy and emissions, rather than the previous practice of estimating such impacts based on the likely effects on primary energy and emissions.

B. Using FFC Energy Efficiency Metrics in DOE's Assessment of Energy Conservation Standards Impacts

In the NOPP, DOE proposed to use FFC measures of energy use and related emissions in the national impact analyses and environmental assessments included in future energy conservation standards rulemakings, but did not propose to create or use extended site or FFC measures of energy efficiency in its rules or regulatory impact analyses.

For rulemakings for covered products for which there is a choice of fuel, AGA noted the Academy's third recommendation that "efficiency ratings should be calculated using the extended site (source) measure of energy consumption until the Department can consider and complete a transition to the use of a full fuel-cycle measure of consumption." AGA recommended that DOE make "side-by-side comparisons of the calculated energy savings from proposed efficiency standard for each appliance" as part of its analysis of the likely impacts of prospective standards.

While recognizing that DOE does not have the statutory authority to use FFC energy efficiency metrics as the basis for DOE conservation standards, AGA recommended that DOE create and use such metrics as part of its analysis of the likely impacts of prospective energy conservation standards. (AGA, Public Comment, EERE-2010-BT-NOA-0028-0035, pp. 4-5)

DOE has the statutory authority to create and consider extended site or FFC energy efficiency metrics as part of its analysis of the likely impacts of prospective energy conservation standards. (See 42 U.S.C. 6295(o)(2)(B)(i)(VII)) Extended site or FFC energy efficiency metrics would provide DOE with a rough indication of the likely energy impacts of a shift in the market of products using different fuels (*i.e.*, fuel switching) that might result from the imposition of alternative energy conservation standards under consideration. If DOE's analysis indicated that a particular standard level under consideration would likely lead to a shift in consumer purchases from products with higher FFC efficiency to products with lower FFC efficiency, then DOE decision-makers would be alerted that such a shift would likely undercut the energy savings (and emission reductions) resulting from that standard level.

For this reason, DOE carefully considered whether it should establish a policy to calculate and use in future rulemakings such extended-site or FFC efficiency metrics for appliances for which there is a fuel choice. DOE concluded, however, that the use of extended site or FFC energy efficiency metrics would only provide a rough indicator of the impacts of possible fuel switching on total energy savings and emissions and, therefore, would not enhance current DOE estimates of the direct impacts of alternative standard levels on fuel choice, energy savings, emissions and other factors. On the other hand, such FFC energy efficiency metrics may prove to be a useful mechanism for conveying complex information to consumers. The issue of consumer information is discussed further in Section E of this notice.

Policy Statement: After careful consideration, DOE has concluded that calculating and comparing efficiency ratings on an FFC basis is not likely to significantly enhance the considerable information already available on the likely impacts of prospective energy conservation standards on total energy use, emissions and other factors. Consequently, DOE does not intend to create or use such metrics in the development of future appliance

efficiency standards. While DOE already accounts for the potential impacts of fuel switching in its energy conservation standards analyses (where appropriate), it will make the methodologies and results of fuel switching more explicit in all rulemakings in which fuel switching might occur.

C. Estimated Impacts From Expansion of Considered GHG Emissions

As part of its rulemaking analyses, DOE currently estimates the impacts of alternative standard levels on emissions of Carbon Dioxide (CO₂), Sulfur Dioxide (SO₂), Nitrogen Oxide (NO_x) and Mercury. Of these, CO₂ is the only GHG addressed in DOE's rulemaking analyses. In the NOPP, DOE proposed to add estimates of the impact of alternative energy conservation standards on the emissions of two other types of GHGs, methane (CH₄) and nitrous oxide (N₂O), as part of the environmental assessments included in future rulemakings. These estimates would be provided both as physical units of the emissions of these gases and as CO₂ equivalents of these emissions based on their climate forcing effects (using generally accepted conversion factors). Although not directly addressed in the Academy's report, such emissions have a direct association with the production and use of energy and adding reduction estimates of these gases will allow DOE to provide a more comprehensive assessment of the impact of standards on GHG emissions. These two gases are included in national GHG emissions inventories worldwide and, according to the EPA, they are among the principle GHGs that enter the atmosphere due to energy production. Addition of reduction estimates of these gases to the environmental assessments of future energy efficiency rulemakings could increase the estimated impacts of alternative standard levels on CO₂-equivalent GHG emissions by approximately five to seventeen percent, as indicated by the preliminary estimates provided in the NOPP.

Southern Company agreed in their comments that it is reasonable to use estimates of the CO₂-equivalent emissions of these two gases in environmental assessments, stating that the addition would provide "useful, more complete information on the environmental impacts of appliance use." They also noted "that most leakage of methane from natural gas comes from distribution systems, and electric generation generally receives direct service from natural gas transmission systems without using gas distribution systems. Therefore the

methane-related global warming impact for electric generation should be much less than the adjustment for methane leakage for direct consumer use of natural gas, which does use natural gas distribution systems.” (Southern, Public Comment, EERE–2010–BT–NOA–0028–0027, p. 4)

DOE notes that, for electricity generation from natural gas, the GREET model includes methane leakage associated with gas transmission systems, but not leakage associated with gas distribution from city gate to households. Also, methane leakage in gas production is accounted for in the natural gas fuel cycle in GREET.

NEEA questioned whether the flaring of natural gas and other gases during oil production, and methane from coal mining, is included in the FFC emissions analysis. (NEEA, Public Comment, EERE–2010–BT–NOA–0028–0021, p. 3) The emissions from both flaring and venting of gas in oil production are accounted for in GREET simulations. Methane released into the atmosphere during the production of oil or gas, or during coal mining, is also considered as an emission.

DOE did not receive any comments opposing the addition of these gases.

Policy Statement: DOE intends to add estimates of the impacts of alternative energy conservation standards on emissions of CH₄ and N₂O, two significant GHGs, to future environmental assessments. These impact estimates will be provided in the physical units of these gases, as well as their CO₂-equivalent values. These values, however, will not be used to develop estimates of the monetary value of reductions in CO₂ emissions until such time as the methodology used to calculate the social cost of carbon is explicitly modified to cover such gases.

D. Methodology for Estimating FFC Energy and Emission Impacts

DOE proposed to use the GREET model in energy conservation standards rulemakings to convert primary energy and emission impacts, including CH₄ and N₂O, to FFC energy and emission impacts. The GREET model was originally developed in 1995 and is routinely updated with support from several DOE programs. It includes more than 100 fuel production pathways, including those addressed by the FFC methodology to be used for product standards rulemakings. The model and its technical documentation are available at the GREET Web site (<http://greet.es.anl.gov/>). At present, there are more than 15,000 registered GREET users worldwide.

In the NOPP, for each alternative energy conservation standard under consideration, DOE proposed to first estimate the primary energy and related emission impacts by using the same methodologies and NEMS projections that DOE’s conservation standards program has traditionally used. Second, for each alternative energy conservation standard under consideration, DOE proposed to use the energy conversion factors that are generated using the GREET model to convert primary energy use and emission impacts to FFC energy use and emission impacts.

EI asked which version of the GREET model was used to derive the preliminary conversion values shown in Tables 1 and 2 of the Notice. (EEL, Public Comment, EERE–2010–BT–NOA–0028–0037, p. 5) The most recent version of the GREET model available at the time, version 1.8d, was used to calculate the values in Tables 1 and 2. There will be a new version of GREET released in 2011. The latest version of GREET will be used when the FFC is calculated in future energy conservation standards rulemakings.

Southern Company commented that DOE’s proposal to use existing methodologies and NEMS, together with conversion factors generated by the GREET model, was a reasonable approach. (Southern, Public Comment, EERE–2010–BT–NOA–0028–0027, p. 3) Both AGA and the Natural Gas Supply Association (NGSA) commented in support of the GREET model, stating that GREET provides “an adequate modeling platform for the calculation of energy consumption and greenhouse gas emissions data as part of the Department’s energy conservation standards program.” (AGA, Public Comment, EERE–2010–BT–NOA–0028–0035, p. 3; NGSA, Public Comment, EERE–2010–BT–NOA–0028–0019, p. 2)

The American Public Gas Association (APGA) commented that it is important that DOE use a transparent process to ensure that stakeholders understand how the GREET model would be used to calculate FFC energy and GHG emissions impacts as part of energy conservation standards rulemakings. The National Association of Home Builders expressed concern about the level of technical documentation and verifiable data provided in the Notice. (APGA, Public Comment, EERE–2010–BT–NOA–0028–0024, p. 5)

The methods, data and assumptions used in the GREET model were subject to public review and comment under separate Federal and State rulemakings. When the current GREET model, or a new version of the model, is used in future DOE rulemakings, the methods,

data and assumptions will again be fully documented and subject to public review and comment.

The Northwest Energy Efficiency Alliance (NEEA) commented that the conversion factors and other GREET model estimates presented in the Notice appeared frozen in time, yielding minimal changes for most fuels analyzed from 2010 to 2030. (NEEA, Public Comment, EERE–2010–BT–NOA–0028–0021, p. 1) The NEMS and GREET models both forecast or simulate changes in energy use and emissions over time. The small changes in the conversion factors in Tables 1 and 2 of the Notice reflect the fact that large, long-lived capital stocks dominate the energy production and transport sector, and change slowly over time. New facilities or processes replace existing facilities and processes only gradually over many decades. Retrofitting of existing facilities to alter the fuels used or substantially reduce emissions can result in more rapid changes, and there are efforts to continually improve the ability of the GREET model to capture these types of changes.

Additionally, NEEA asked how to interpret the analyses as they apply to nuclear-fueled electricity, noting that the energy returned on energy invested (EROEI) for nuclear electricity is likely different than the two EROEI values reflected in the current DOE ANL estimates of the FFC factors for this source of energy. (NEEA, Public Comment, EERE–2010–BT–NOA–0028–0021, p. 2) GREET simulations for energy input versus output are based on fossil energy input only. This may be the reason why the imputed EROEI from the GREET model appears higher than some other estimates. The FFC factors are not the same as the EROEI values, since EROEI cannot separate use of different types of energy sources, which is necessary for FFC and GHG emission estimation. Details of the nuclear electricity pathway used in GREET are documented in a paper published in 2007 and posted at the GREET Web site.

EI commented that the values in Tables 1 and 2 of the Notice are stochastic and do not include all aspects of energy production (such as energy used for oil drilling or to produce chemicals used in the natural gas hydraulic fracturing process). In addition, the tables do not show the range of values in the GREET model for different energy production methods. (EEL, Public Comment, EERE–2010–BT–NOA–0028–0037, p. 5)

DOE agrees that the values generated by the GREET model reflect industry averages that are the product of widely variable processes and practices. DOE

also agrees that the values do not represent all emissions associated, either directly or indirectly, with the production and delivery of energy to end-users, although DOE believes that the values generated by the GREET model will enable DOE to use estimates of energy and emission impacts that are a close approximation of the definition of FFC analysis recommended by the Academy. More specifically, while the current GREET model does not include energy use and emissions of oil exploration, it does include the impacts of upstream oil operations (including recovery and drilling). In addition, the energy and emission impacts of shale gas production will be added to the 2011 update of the GREET model.

Details of the estimates used for specific technology pathways (such as residual oil production, natural gas production, electricity generation) are provided in the GREET model and the methods, data and assumptions underlying these estimates are provided in the GREET documentation, both of which are available at <http://greet.es.anl.gov/>.

APPA commented that the GREET model is susceptible to multiple forms of error because of its large set of base assumptions. APPA also stated that the model is subject to manipulation. (APPA, Public Comment, EERE-2010-BT-NOA-0028-0033, p. 3) APPA is correct that the GREET model, like any life-cycle assessment (LCA) model, is based on a multitude of assumptions. The data supporting these assumptions come from Federal and State databases, as well as data provided by industry. The public can view the model, its assumptions, and the data. This transparency helps produce reliable estimates of FFC impacts.

CECA commented that: "A simple conversion factor from site energy to full fuel cycle is not adequate. There are myriad criteria for determining full-fuel-cycle analysis and reaching agreement on a satisfactory procedure would likely be beyond DOE/EERE's time and resources." CECA also cited environmental externalities such as those in the European Commission's ExternE model. The ExternE model includes not just energy costs but societal concerns such as environmental impacts, global warming, accidents, energy security, employment impacts, and depletion of non-renewable resources. (CECA, Public Comment, EERE-2010-BT-NOA-0028-0012, p. 3) The State of California developed a model for transportation fuels which defines a "Full Fuel Cycle Assessment" as evaluating and comparing the full environmental and health impacts of

each step in the life-cycle of a fuel, which include, but are not limited to, feedstock extraction, transport, storage, fuel production, distribution, vehicle operation, refueling, combustion, or conversion and evaporation. (California Energy Commission, Development of the State Plan for Alternative Transportation Fuels, AB 1007, 3/2/2007) These and other models, in addition to GREET, are cited in the Academy's report. Other entities had similar concerns regarding other available models. (AHRI, Public Comment, EERE-2010-BT-NOA-0028-0017, p. 3) AHRI also noted that the GREET model was not "specifically designed for use in DOE efficiency standard rulemakings."

Today's Policy Statement addresses the energy use and associated emissions directly used in, or emitted from, the point of primary fuel production to the point of end-use, as specified in the recommendations of the Academy's report. Consequently, the scope of FFC, as this term is used in this Policy Statement, is limited. Other social and environmental impacts, such as the indirect energy and emission impacts associated with the manufacture of covered appliances and equipment, or the manufacture of the equipment used in fuel production and refining, as well as other impacts on health or the environment, are not within the scope of the FFC estimates referenced in this Policy Statement.

In its evaluation of alternative transportation fuels under AB 1007, the California Energy Commission uses GREET and a fuel-cycle definition that is very similar to the FFC approach proposed for use in the development of DOE energy conservation standards.

DOE acknowledges that the GREET model was not specifically designed to generate the factors necessary to convert the primary energy and emission values now used in DOE's energy conservation standards impact analyses into FFC values. DOE is not aware of any model that was specifically designed for this purpose. Nevertheless, DOE has concluded that the GREET model can be appropriately used for this purpose and that the resulting values will be sufficiently reliable to significantly improve the usefulness of the resulting energy and emission impact estimates. The GREET model has been previously used to support certain Federal and State regulatory actions on GHG emissions (such as the EPA's Renewable Fuel Standard development and California's low-carbon fuel standard development) and Federal vehicle fuel efficiency labeling by EPA and DOE. It has already been subject to considerable

public review and comment. For these reasons, DOE concludes that GREET is the best model to use for the purposes of today's Policy Statement.

Policy Statement: In future energy conservation standards rulemakings, DOE intends to calculate FFC energy and emission impacts by applying conversion factors generated by the GREET model to the NEMS projections currently used by DOE. When DOE uses the GREET factors in a rulemaking, the factors will be subject to public review and comment. These factors will be used to convert the primary energy and emission values generated by methodologies that have been traditionally used by DOE in its appliance efficiency standards rulemakings to their FFC equivalents. The GREET model will also be used to generate estimates of the FFC emissions of methane and nitrous oxides.

From time to time, DOE will review alternative approaches to estimating these factors and may decide to use a model other than GREET to estimate the FFC energy and emission impacts in any particular future appliance efficiency standards rulemaking. For example, DOE is aware that a future version of the NEMS model may provide the detail necessary to estimate FFC energy and emission impacts. Whether DOE uses the GREET model or another model identified in the future, the model and FFC energy and emission impacts will be subject to public review and comments within an energy conservation standards rulemaking.

E. Consumer Information on FFC Impacts of Specific Covered Products

The Academy recommended that DOE work with the FTC to initiate a project to consider the merits of providing consumers with information about FFC energy use and GHG emissions of individual appliances so that the public can make more informed purchasing decisions. In particular, the Academy recommended that DOE and FTC should initiate a project to consider the merits of adding to the Energy Guide label an indicator of how an appliance's total energy consumption might affect levels of GHG emissions.² The FTC has statutory authority over Energy Guide labels.

DOE indicated in its NOPP that the FTC maintains online databases of the site energy use and efficiency ratings of appliances currently on the market. These databases do not, however, include FFC energy use or any energy cost or emissions-related data. While it is possible to compare the site energy

² Academy report at p. 12.

use and efficiency ratings of different products using these databases, such comparisons are often difficult, especially if they involve products that have different features. Furthermore, comparing products that use different fuels is often not feasible because of differences in the measures of energy use or efficiency of products that use different fuels.

In response to the Academy's recommendations, DOE proposed to significantly improve upon the FTC's existing on-line databases by making FFC energy use and emissions data (and possibly annual energy cost data) available to the public. The improved databases could enable users to easily compare a product's energy use, associated emissions, and costs to similar products, including products that are in different classes because they have different features or use different fuels. Additional energy, emissions, and cost data could be included by updating FTC's online database with the emissions factors developed with the GREET model and estimated annual energy use and/or energy cost data reported by manufacturers on appliance Energy Guide labels. This proposed action was also supported by comments from the Natural Resources Defense Council. (NRDC, Public Comment, EERE-2010-BT-NOA-0028-0030, p. 2)

Regarding the Energy Guide label, DOE stated in the NOPP that it is not clear to DOE that including additional label disclosures, such as the GHG emissions indicator mentioned by the Academy, would be valuable to customers unless they could easily compare the GHG emissions associated with one product to other comparable products or other common energy uses. DOE indicated in its proposal that because the GHG emissions associated with a particular class of products using the same fuel would be directly proportional to that class of products' estimated annual energy costs, simply comparing an individual product to products of the same class using the same fuel would add little useful information to the label. DOE also stated that providing comparisons to the energy use, costs or emissions associated with other comparable products with different features or that use different fuels on the Energy Guide label may increase the complexity of the label, making the label more difficult to understand and decreasing the utility of the basic annual operating cost information already on the label.

AGA supported the inclusion of emissions information on Energy Guide labels to allow customers to better understand the emissions implications

of their appliance choices. AGA commented that "any concerns regarding the complexity and utility of any particular Energy Guide label can and should be addressed in a rulemaking proceeding by the FTC to revise the labels. The potential that some labels may be perceived by some users as less than clear should not be a basis for denying consumers the emissions information they need to make environmentally sound appliance choices." (AGA, Public Comment, EERE-2010-BT-NOA-0028-0004, pp. 3-4)

DOE will make available to the FTC the FFC energy and emission factors that it generates for use in rulemakings. DOE still has some concerns that using these factors to provide FFC information to consumers via the Energy Guide Label is likely to increase the complexity of the label and, therefore, may decrease its effectiveness. However, DOE believes that other means of providing this information to consumers could be as or more effective.

The Institute for Policy Integrity disagreed with DOE's concerns about adding GHG emissions to the Energy Guide labels. The Institute pointed out that other labels are far more complex, which indicates that consumers are accustomed to relatively complex labels, and encouraged DOE to work with the FTC on label modifications. (Institute, Public Comment, EERE-2010-BT-NOA-0028-0032, pp. 5-6)

In contrast, EEI commented that providing consumers with accurate product-specific GHG emissions data associated with electricity use would likely be extremely complex because each utility has its own distinct GHG emission mix. As a result, national or even regional average data can be very misleading. If product-specific GHG emissions data was made available, EEI, along with others, indicated that it supported the use of a website providing such information as opposed to including the information on Energy Guide labels. (EEI, Public Comment, EERE-2010-BT-NOA-0028-0007, p. 3)

EEI and CECA Solutions commented that DOE's proposal to provide customers with energy use and emissions data back to the point of extraction of fossil fuels would lead consumers to incorrectly believe that they will save more energy than is the case and could harm the ability of consumers to make smart purchasing decisions. (EEI, Public Comment, EERE-2010-BT-NOA-0028-0007, p. 2; CECA, Public Comment, EERE-2010-BT-NOA-0028-0012, p. 2)

Similarly, NRECA stated that consumers will not accurately

understand the amount of energy being utilized by their appliances and providing this information would burden manufacturers, possibly resulting in higher costs for the consumer. (NRECA, Public Comment, EERE-2010-BT-NOA-0028-0002, p. 3)

In response, DOE emphasizes that it is not proposing to provide consumers with information that might lead them to conclude that the benefits associated with the reduction of FFC energy or emissions would be reflected in additional consumer cost savings. DOE does not believe that providing consumers with information about the FFC impacts of appliances on GHG emissions would mislead consumers about the actual energy use of their appliances, nor that providing such information would place a significant new cost on manufacturers that would increase product costs. However, DOE agrees that providing this type of information in a meaningful way, given the large regional variations in the electric sector, may well be difficult.

NRECA went on to comment that "the analysis and cost effectiveness of the efficiency standard must be based upon costs and savings that the customers experience." They indicated that they believe that "placing source energy consumption on a label for the customer is misleading at best, and very confusing. Customers could choose the "highest" efficiency unit on the label but find their utility bills increasing because the appliance would not be operating on the most efficient energy source at the site." (NRECA, Public Comment, EERE-2010-BT-NOA-0028-0002, p. 3)

DOE agrees that energy conservation standards should continue to be based, in large part, on the costs and savings that user's experience. However, EPCA, as amended, and other laws direct DOE to consider a range of other factors as well, including the energy resource and environmental impacts of alternative standard levels. While ongoing changes in the electric sector sometimes may make this type of analysis complex and less certain, DOE believes that such analyses are nevertheless possible and, ultimately, useful to government decision-makers and many consumers. Regarding the information made available to consumers, DOE agrees that information on energy costs and life-cycle costs should continue to be emphasized. However, DOE also believes that consumers should be given ready access to better information on the energy resource and environmental impacts of their appliance choices. DOE believes that this objective can be achieved, at least in part, through web-

based information tools, although DOE will also work collaboratively with the FTC to determine if changes to Energy Guide labeling requirements would be beneficial to consumers.

DOE agrees with NEEA's comment that the difference between primary energy use estimates and FFC energy use estimates is relatively small. (NEEA, Public Comment, EERE-2010-BT-NOA-0028-0021, p. 2) However, to date, consumers have not had ready access to information on either the primary or FFC energy and emission impacts of products. Making such information available in a manner that would enable consumers to make cross-fuel and cross-class comparisons of comparable products could provide consumers with significant new information.

The Consumer's Union commented that the Energy Guide labels must increase consumer awareness of GHG emissions to effectively educate consumers and engage them in energy and climate change policy. Such labels should "address regional variation of electricity fuel mixes and provide consumers guidance on how to interpret the data given their region or particular utility." (Consumers, Public Comment, EERE-2010-BT-NOA-0028-0028, p. 5) DOE agrees that consumers should be given ready access to better information on the energy resource and environmental impacts of their appliance choices and how to provide this information in a meaningful way will be a significant issue for DOE and the FTC to consider.

Policy Statement: Subject to the availability of funds, DOE will work with other Federal agencies to make readily available to consumers improved information on the energy use, life-cycle cost and associated emissions of comparable products, even if those products use different forms of energy. Consumers should be able to easily identify the likely energy use, life-cycle costs and associated emissions of individual products (based on their local energy costs and utility system characteristics), but should also be able to compare those attributes to a range of other products providing similar utility. In developing better ways of conveying such information to consumers, DOE will explore the possible role of common efficiency metrics for products using different fuels or energy, and will, as appropriate, solicit further public review and comment on the mechanisms developed to make available this information to consumers.

Any updates to Energy Guide labels will be promulgated by the FTC, which

has statutory authority over Energy Guide labels.

IV. Procedural Issues and Regulatory Review

A. Review Under the National Environmental Policy Act of 1969

DOE has determined that this Policy Statement falls into a class of actions that are categorically excluded from review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and DOE's implementing regulations at 10 CFR part 1021. Specifically, this Policy Statement describes methods for data analysis and how DOE plans to incorporate such data analysis into future energy conservation standards. For this reason, and because the Policy Statement does not establish an energy conservation standard or take any action that might have an impact on the environment, it is covered by the Categorical Exclusion A9 under 10 CFR part 1021, subpart D. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

B. Review Under the Information Quality Bulletin for Peer Review

In consultation with the Office of Science and Technology Policy (OSTP), OMB issued on December 16, 2004, its "Final Information Quality Bulletin for Peer Review" (the Bulletin). 70 FR 2664 (Jan. 14, 2005). The Bulletin establishes that certain scientific information shall be peer reviewed by qualified specialists before it is disseminated by the Federal government, including influential scientific information related to agency regulatory actions. The purpose of the Bulletin is to enhance the quality and credibility of the government's scientific information. Under the Bulletin, the Academy recommendations and GREET model are "influential scientific information," which the Bulletin defines as "scientific information that the agency reasonably can determine will have or does have a clear and substantial impact on important public policies or private sector decisions." 70 FR 2664, 2667 (Jan. 14, 2005). The Academy recommendations have been peer reviewed pursuant to section II.2 of the Bulletin. The GREET model, which is in the public domain, has been reviewed through its development and applications over the past 16 years.

V. Approval of the Office of the Assistant Secretary

The Assistant Secretary of DOE's Office of Energy Efficiency and Renewable Energy has approved publication of this final policy.

Issued in Washington, DC, on August 10, 2011.

Roland J. Risser,

Program Manager, Building Technologies Program, Energy Efficiency and Renewable Energy.

BILLING CODE 6450-01-P

FARM CREDIT ADMINISTRATION

12 CFR Part 615

RIN 3052-AC50

Funding and Fiscal Affairs, Loan Policies and Operations, and Funding Operations; Investment Management

AGENCY: Farm Credit Administration.

ACTION: Proposed rule.

SUMMARY: The Farm Credit Administration (FCA, Agency, us, our, or we) proposes to amend our regulations governing investments held by institutions of the Farm Credit System (FCS or System). We propose to strengthen our regulations governing investment management, interest rate risk management, and association investments; revise the list of eligible investments to ensure it is limited only to high-quality, liquid investments; reduce regulatory burden for investments that fail to meet eligibility criteria after purchase or are unsuitable; and make other changes that will enhance the safety and soundness of System institutions. In this proposal, we also seek comments on compliance with section 939A of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act or DFA), which requires us to remove all references to and requirements relating to credit ratings and to substitute other appropriate standards of creditworthiness. We also seek comment on other issues.

DATES: You may send us comments by November 16, 2011.

ADDRESSES: We offer a variety of methods for you to submit comments on this proposed rule. For accuracy and efficiency reasons, commenters are encouraged to submit comments by e-mail or through the Agency's Web site. As facsimiles (fax) are difficult for us to process and achieve compliance with section 508 of the Rehabilitation Act, we are no longer accepting comments submitted by fax. Regardless of the method you use, please do not submit your comment multiple times via different methods. You may submit comments by any of the following methods:

- *E-mail*: Send us an e-mail at reg-comm@fca.gov.
- *FCA Web site*: <http://www.fca.gov>. Select “Public Commenters,” then “Public Comments,” and follow the directions for “Submitting a Comment.”
- *Federal eRulemaking Portal*: <http://www.regulations.gov>. Follow the instructions for submitting comments.
- *Mail*: Gary K. Van Meter, Director, Office of Regulatory Policy, Farm Credit Administration, 1501 Farm Credit Drive, McLean, VA 22102–5090.

You may review copies of all comments we receive at our office in McLean, Virginia, or on our Web site at <http://www.fca.gov>. Once you are in the Web site, select “Public Commenters,” then “Public Comments,” and follow the directions for “Reading Submitted Public Comments.” We will show your comments as submitted, but for technical reasons we may omit items such as logos and special characters. Identifying information that you provide, such as phone numbers and addresses, will be publicly available. However, we will attempt to remove e-mail addresses to help reduce Internet spam.

FOR FURTHER INFORMATION CONTACT:

Timothy T. Nerdahl, Senior Financial Analyst, Office of Regulatory Policy, Farm Credit Administration, McLean, VA 22102–5090, (952) 854–7151 extension 5035, TTY (952) 854–2239; or Jennifer A. Cohn, Senior Counsel, Office of General Counsel, Farm Credit Administration, McLean, VA 22102–5090, (703) 883–4020, TTY (703) 883–4020.

SUPPLEMENTARY INFORMATION:

I. Objectives

The objectives of this proposed rule are to:

- Ensure that Farm Credit banks¹ hold sufficient high-quality, readily marketable investments to provide sufficient liquidity to continue operations and pay maturing obligations in the event of market disruption;
- Strengthen the safety and soundness of System institutions;
- Discuss the requirements of section 939A of the Dodd-Frank Act;
- Reduce regulatory burden with respect to investments that fail to meet eligibility criteria after purchase or are unsuitable; and
- Enhance the ability of the System to supply credit to agriculture and aquatic producers by ensuring adequate availability to funds.

¹ Section 619.9140 of FCA regulations defines Farm Credit bank to include Farm Credit Banks, agricultural credit banks, and banks for cooperatives.

II. Background

Congress created the System as a Government-sponsored enterprise (GSE) to provide a permanent, stable, and reliable source of credit and related services to American agriculture and aquatic producers. Farm Credit banks obtain funds used by System banks and associations to provide credit and related services primarily through the issuance of System-wide debt securities.² If access to the debt market becomes temporarily impeded, Farm Credit banks must have enough readily available funds to continue operations and pay maturing obligations.

Subpart E of part 615 imposes comprehensive requirements regarding the investments of System institutions (primarily Farm Credit banks).³ Section 615.5134(a) of FCA regulations requires each Farm Credit bank to maintain a specified liquidity reserve.⁴ This liquidity reserve may only be funded from cash and eligible investments.⁵

We adopted our last major revisions to our investment regulations in 1999 and amended them in a more limited manner in 2005. Since 1999, the marketplace pertaining to investments has changed significantly. Innovations in investment products have led to their increasing complexity, and investors need to have greater expertise to fully understand them. In addition, the financial crisis that began in 2007 resulted in numerous investment downgrades and the loss of billions of dollars by financial institutions.

While System banks suffered considerably less stress during the crisis than many other financial institutions, they did experience numerous downgrades and some losses on individual investments. In 2010, we issued a booklet that provides clarification and guidance regarding our regulations and expectations with respect to the key elements of a robust investment asset management framework that institutions should establish to prudently manage their investments in changing markets.⁶ The

² Farm Credit banks use the Federal Farm Credit Banks Funding Corporation (Funding Corporation) to issue and market System-wide debt securities. The Funding Corporation is owned by the Farm Credit banks.

³ Section 615.5142 authorizes associations to hold eligible investments with the approval and oversight of their funding banks, for specified purposes. Associations that hold investments, as well as service corporations that hold investments, are subject to our investment management regulation at § 615.5133.

⁴ We expect to propose revisions to § 615.5134 in an upcoming rulemaking.

⁵ § 615.5134(a).

⁶ FCA Bookletter BL–064, *Farm Credit System Investment Asset Management* (December 9, 2010).

issuance of this booklet was an interim measure towards strengthening our investment regulations.

In July 2010, the President signed into law the Dodd-Frank Act to strengthen regulation of the financial industry in the wake of the financial crisis that unfolded in 2007 and 2008. As discussed in greater detail below, section 939A of the DFA requires each Federal agency to revise all of its regulations that refer to or require reliance on credit ratings to assess creditworthiness of an instrument to remove the reference or requirement and to substitute other appropriate creditworthiness standards.

We now propose amendments that would strengthen our investment regulations. In addition, in certain areas, including compliance with section 939A of the DFA, we seek comments but propose no specific regulatory revisions. In these areas, we will likely have to propose revisions before we will be able to adopt revisions as final. We will consider all comments received in this or future rulemakings, as appropriate.

III. Section-by-Section Description of the Proposed Rule

Following is a section-by-section description of the proposed revisions to our rules.

A. Section 615.5131—Definitions

We propose to amend § 615.5131 to add two new definitions to reflect clarifications we propose to make to § 615.5140, as discussed below. We propose adding a definition for *Government agency*, which we would define as the United States Government or an agency, instrumentality, or corporation of the United States Government whose obligations *are* fully and explicitly insured or guaranteed as to the timely repayment of principal and interest by the full faith and credit of the United States Government. We also propose adding a definition for *Government-sponsored agency*. We would define this term as an agency, instrumentality, or corporation chartered or established to serve public purposes specified by the United States Congress but whose obligations *are not* explicitly insured or guaranteed by the full faith and credit of the United States Government. This definition would include GSEs such as the Federal National Mortgage Association (Fannie Mae) and the Federal Home Loan Mortgage Corporation (Freddie Mac), as well as Federal agencies, such as the

This Bookletter may be viewed at <http://www.fca.gov>. Under Quick Links, click on Bookletters.

Tennessee Valley Authority, that issue obligations that are not explicitly guaranteed by the Government of the United States' full faith and credit.

B. Section 615.5132—Investment Purposes

In 2005, we modified § 615.5132 to increase the permissible level of investments that Farm Credit banks may hold from 30 to 35 percent of total outstanding loans. The reason for the increase was to provide the banks with additional flexibility to meet their liquidity needs and accomplish their asset/liability management strategies in varying economic conditions. At this time, we continue to believe that the investment maximum of 35 percent of total outstanding loans provides the banks adequate flexibility to maintain their liquidity reserve at an appropriate amount. However, as discussed below, we solicit public comments on this issue.

In this discussion, we emphasize the proper application of a provision of this regulation. We also discuss a proposed revision and an area where we specifically seek the views of commenters.

1. Permissible Investment Purposes

Section 615.5132 permits each Farm Credit bank to hold eligible investments for the purposes of maintaining a liquidity reserve, managing surplus short-term funds, and managing interest rate risk. These purposes do not authorize Farm Credit banks to accumulate investment portfolios for arbitrage activities or to engage in trading for speculative or primarily capital gains purposes.⁷ Realizing gains on sales before investments mature is not a regulatory violation as long as the profits are incidental to the specified permissible investment purposes. Farm Credit banks must ensure that their internal controls, required under §§ 615.5133(e) and 618.8430, ensure that eligible investments listed in § 615.5140(a) are limited to those that are appropriate under § 615.5132.

2. Excluding Investments Pledged To Meet Margin Requirements for Derivative Transactions

Section 615.5132 permits Farm Credit banks to hold eligible investments, for specified purposes, in an amount not to exceed 35 percent of its total outstanding loans. We propose to permit banks to exclude investments pledged to meet margin requirements for derivative

transactions (collateral) when calculating the 35-percent investment limit. We note that investments that are pledged as collateral do not count toward a Farm Credit bank's compliance with its liquidity reserve requirement.⁸ Derivatives are used as a hedging tool against interest rate risk and liquidity risk. Farm Credit banks use derivative products as an integral part of their interest rate risk management activities and as a supplement to the issuance of debt securities in the capital markets. We recognize that banks are required to post collateral to counterparties resulting from entering into derivative transactions, and we believe banks should not be discouraged from implementing appropriate risk management practices.

3. Treasury Securities and the 35-Percent Investment Limit

Historically, Farm Credit banks have invested in instruments that generate yield in excess of the cost of funds (positive carry). Since the recent financial crisis, however, the banks have experienced decreased liquidity with these instruments at times, and they have turned to United States Treasury securities because of their high liquidity.⁹ Treasury securities generally have yields that are lower than the cost of the underlying Farm Credit debt that would fund such securities, and this negative carry has an adverse impact on bank earnings.

Under our existing 35-percent investment limit, holding Treasury securities reduces the maximum amount of investments that Farm Credit banks may hold in other eligible securities. Thus, the banks must choose between greater liquidity but a negative carry, or a positive carry but reduced liquidity.¹⁰ Banks would be able to avoid making this choice if they were permitted to exclude a portion of or all Treasuries or to apply a discount to Treasury securities when calculating the 35-percent limit.

We currently believe that the 35-percent limit continues to provide sufficient flexibility for Farm Credit banks to maintain adequate liquidity.

⁸ Under § 615.5134(b), all investments that a bank holds for the purpose of meeting the liquidity reserve requirement must be free of lien.

⁹ A System workgroup has recommended the establishment of a minimum level of cash and/or investments in Treasury securities as part of the liquidity reserve requirement of Farm Credit banks. FCA expects to propose revisions to § 615.5134, governing this liquidity reserve requirement, in an upcoming rulemaking.

¹⁰ Cash, which is also held for liquidity, also has a negative carry, but it is not subject to the 35-percent investment limit, and so it does not pose the same challenge.

However, we have received a request from a System workgroup asking us to consider treating Treasury securities as cash for purposes of this provision.

Consequently, we seek comment on whether and how to address the situation Farm Credit banks face in holding Treasury securities. Are Farm Credit banks able to purchase sufficient Treasury securities to enhance liquidity, while remaining within the constraint that total investments may not exceed 35 percent of total outstanding loans? Or should the percentage be raised and, if so, to what level and why? Should Treasuries be excluded from total investments when calculating the percentage of total investments to total loans outstanding? Would it be appropriate to exclude a portion of Treasury securities from the calculation? Would it be appropriate to apply a discount to Treasuries? What would be the basis for such a calculation change?

C. Section 615.5133—Investment Management

Effective investment management requires financial institutions to establish policies that include risk limits, approved mechanisms for identifying, measuring, and reporting exposures, and strong corporate governance. The recent crisis and its lingering effects have re-emphasized the importance of sound investment management, and we believe that strengthened regulation would further ensure the safe and sound management of investments. Accordingly, we are proposing significant changes to § 615.5133, which governs investment management.¹¹

In addition, we propose minor technical, clarifying, and non-substantive language changes to this section that we do not specifically discuss in this preamble.

1. Proposed § 615.5133(a)—Responsibilities of Board of Directors

We propose enhancements to the responsibilities of each board of directors set forth in § 615.5133(a). The existing regulation requires the board to review its investment policies annually and to make any changes that are needed. We believe that depending on the situation, this review may need to occur more than once a year. We would continue to require a review at least annually but, to reduce unnecessary regulatory burden, we propose to permit a designated board committee to conduct this review and to validate the

¹¹ This rule would supersede the guidance contained in Bookletter BL-064.

⁷ FCA has consistently taken this position. See, e.g., 70 FR 51587, August 31, 2005; 58 FR 63039, November 30, 1993.

sufficiency of the investment policies, provided that the board must adopt any changes to the policies.

2. Proposed § 615.5133(b)—Investment Policies—General Requirements

Section 615.5133(b) lists the items that a board's investment policy must address, but it currently does not include every requirement of § 615.5133. For example, existing § 615.5133(e) requires an institution to establish internal controls, and existing § 615.5133(f) requires specified securities valuation, but existing § 615.5133(b) does not require these items to be addressed in the investment policy. Our proposal would require that the investment policy address every requirement of § 615.5133. This revision would clarify our expectations as to the appropriate content of the board's policies.

We would also require that investment policies must address the means for reporting, and approvals needed for, exceptions to established policies. Because the investment policies are established by the board, we believe it is important for the board's policies to address how exceptions to those policies will be handled. We believe exceptions to a policy should be rare, because frequent exceptions call into question the adequacy of the policy.

In addition, we propose that institutions must document in their records or board minutes any analyses used in formulating policies or amendments to the policies. An accurate record of the analysis used to formulate investment policies documents appropriate governance. It also provides a trail for future directors and managers to review to fully understand how previous boards of directors arrived at their decisions and why they approved the policy in the form they did.

3. Proposed § 615.5133(c)—Investment Policies—Risk Tolerance

Our proposed changes are intended to make the investment policies' risk tolerance discussion more robust. In addition to the existing requirements of this section, investment policies would have to establish concentration limits for the various types and sectors of eligible investments and for the entire investment portfolio. We propose to delete the requirement that investment policies must establish diversification requirements, because the new concentration limit requirement would necessarily lead to diversification.

a. Proposed § 615.5133(c)(1)—Credit Risk

Existing § 615.5133(c)(1)(i) provides that investment policies must establish credit quality standards, limits on counterparty risk, and risk diversification standards that limit concentrations based on a single or related counterparty(ies), a geographical area, industries, or obligations with similar characteristics. We propose to clarify that concentration limits be based on either a single or related counterparty(ies). Further, concentration limits must also be based on a geographical area, industries or sectors, asset classes, or obligations with similar characteristics. We believe this amendment would ensure that diversification is more thoroughly considered by System institutions.

Existing § 615.5133(c)(1)(ii) requires investment policies to establish criteria for selecting securities firms. It requires the board annually to review the criteria for selecting securities firms and determine whether to continue existing relationships. To reduce unnecessary regulatory burden, we propose to permit a designated committee of the board to review the criteria and to determine whether to continue existing relationships, but the board must approve any changes to the criteria and any changes to the existing relationships. This change would permit a designated committee to use its technical expertise to assist the board in carrying out its responsibilities.

Existing § 615.5133(c)(1)(iii) requires investment policies to establish collateral margin requirements on repurchase agreements. We propose to require institutions to regularly mark the collateral to market and ensure appropriate controls are maintained over collateral held. We believe it is prudent for institutions to manage potential counterparty risk and to establish appropriate counterparty margin requirements based on the quality of the collateral and the terms of the agreement.

b. Proposed § 615.5133(c)(2)—Market Risk

We propose changes to § 615.5133(c)(2), which relates to market risk. Specifically, we propose to link this regulation to our stress-testing requirements contained in proposed § 615.5133(f)(2), our interest rate risk requirements contained in § 615.5135, and other policies and guidance. These changes clarify our expectations that the board consider all aspects of market risk.

4. Proposed § 615.5133(e)—Internal Controls

We propose to modify our internal controls requirements in § 615.5133(e). In § 615.5133(e)(2), we propose adding additional personnel to the list of personnel whose duties and supervision should be separated from personnel who execute investment transactions. These additional personnel are those who post accounting entries, reconcile trade confirmations, and report compliance with investment policy. We believe this additional separation is a best practice that System institutions should have in place to ensure controls are sufficient and appropriate.

We also propose a new § 615.5133(e)(4). This provision would require each institution to implement an effective internal audit program to review, at least annually, investment controls, processes, and compliance with FCA regulations and other regulatory guidance. The internal audit program would specifically have to include a review of the processes used for ensuring all investments, at the time of purchase, are eligible and suitable for purchase under the board's investment policies and for ensuring investments continue to meet all applicable generally accepted accounting principles even if they are no longer part of the liquidity portfolio.

Existing § 618.8430 requires each institution's board to adopt an internal control policy that provides direction to the institution in establishing effective control over, and accountability for, operations, programs, and resources. Our regulations do not, however, discuss the internal audit of the investment function specifically. However, FCA Bookletter BL-064 provides guidance on FCA expectations in this area. We now propose to strengthen this guidance by adding it as a regulatory requirement in § 615.5133(e)(4).

As we stated in FCA Bookletter BL-064, under § 618.8430 an institution's board is responsible for ensuring that sound systems and controls are in place to manage investment risks. Senior management is responsible for implementing an effective control environment to manage risk in an institution's investment portfolio, as well as to ensure compliance with applicable laws and regulations. Internal audit is a critical function that ensures appropriate internal controls are in place. Accordingly, our proposal would require System institutions to establish internal controls to ensure that an independent review over investment practices and controls, including

specifically the process for determining eligibility and suitability, is conducted.

An institution's audit plan must include a risk assessment, at least annually, of the investment function by the internal audit department or by an outside vendor if the expertise in-house does not exist. Moreover, an institution must conduct an internal audit of the investment function at least annually. As we stated in FCA Bookletter BL-064, the frequency and scope of review should be based on the complexity and size of the investment portfolio. In addition, auditors should be rotated to obtain alternate views of investment operations. Outside audits of the portfolio should be conducted periodically as necessary to ensure an objective evaluation of practices and controls by qualified auditors.

5. Proposed § 615.5133(f)—Due Diligence To Determine Eligibility, Suitability, and Value of Investments

We propose to add a new § 615.5133(f). This provision would cover the due diligence institutions must perform to determine eligibility, suitability, and value of investments. This provision would combine in one location the requirements governing securities valuation and those governing stress testing that are now in existing § 615.5133(f) and § 615.5141, respectively. Our proposed revisions would make these requirements more robust and less burdensome.

a. Proposed § 615.5133(f)(1)—Eligibility and Suitability for Purchase

In new § 615.5133(f)(1), we propose that before an institution purchases an investment, it must conduct sufficient due diligence to determine whether the investment is eligible under § 615.5140 and suitable for purchase under the investment policies of the institution's board. We propose to retain from existing § 615.5133(f)(1) the requirement that the institution must verify the value of the investment (unless it is a new issue) with a source that is independent of the broker, dealer, counterparty, or other intermediary to the transaction. We also propose to require that an institution's investment policies must fully address the extent of pre-purchase analysis that management must perform for various classes of investments and that the institution must document its assessment of eligibility and suitability, including the information used in its assessment. The provision would permit the institution to use all available sources, including third party sources, to assess the investment. Finally, the provision would require that the institution's assessment of each

investment at the time of purchase must at a minimum include an evaluation of credit risk, liquidity risk, market risk, and interest rate risk, and an assessment of the cash flows and the underlying collateral of the investment.

This proposed regulation builds on our expectations for institutions to conduct proper due diligence, which we conveyed in FCA Bookletter BL-064. System institutions must conduct due diligence prior to purchasing a security. The degree of due diligence that an institution conducts must be commensurate with the complexity of the security. The need to evaluate and make a decision on a transaction quickly does not obviate the due diligence requirement. FCA expects that institutions must thoroughly understand the risks and cash flow characteristics of their investments, particularly for products that have unusual, leveraged, or highly variable cash flows. System institutions must identify and measure risks prior to acquisition. In general, institutions should conduct and document due diligence analyses separately for each investment security. Modeling cash flows and assumptions at the time of purchase provides insight into the changing risks certain investments present.

We believe that documentation of the analysis conducted is a critical component for assessing and verifying eligibility and suitability. Investment policies must require that an adequate level of analysis be conducted on the various classes of investments purchased. Under this proposed regulation, System institutions that engage in investment activity will need to strengthen their due diligence process and improve their documentation as to why the investment was purchased.

We expect that institutions will evaluate each investment they purchase using various sources available to them, including third parties if warranted, to assess whether an investment meets the eligibility requirements. Institutions may not, however, rely exclusively on third parties to justify the purchase of a security. Institutions must always conduct their own due diligence, because management and the board are ultimately responsible for any decisions. Moreover, because of the particular concerns surrounding the accuracy of credit ratings, institutions must be especially cautious if they choose to consider them.

b. Proposed § 615.5133(f)(2)—Pre-Purchase and Quarterly Stress Testing

We propose moving our investment stress-testing requirements into § 615.5133(f)(2), as part of our due

diligence and security valuation requirements, and removing existing § 615.5141 as a stand-alone, stress-testing regulation. We propose this change because stress-testing is a key component of due diligence. It is used to assess the risk presented by an investment and the changes in valuation that may be experienced from movements in interest rates. In addition, we propose changes to the substance of the stress-testing requirements.

Existing § 615.5141 requires pre-purchase and quarterly interest rate stress testing for mortgage securities. It provides that mortgage securities are not eligible investments unless they pass a stress test, and it requires divestiture of a mortgage security that no longer complies with the stress-testing requirements.

In the preamble to the 1999 final rule, in which we adopted the existing stress-testing requirements, we stated that we believed stress-testing was an essential risk management practice because even highly rated mortgage securities may expose investors to significant interest rate risk.¹² We therefore stated that “each System institution needs to employ appropriate analytical techniques and methodologies to measure and evaluate interest rate risk inherent in mortgage securities. More specifically, prudent risk management practices require every System institution to examine the performance of each mortgage security under a wide array of possible interest rate scenarios.”¹³

Because of the importance of stress testing and the increasing complexity of investments, we propose in a new § 615.5133(f)(2) that all investments—not just mortgage securities, and including Treasury securities—must be stress tested before purchase and on a quarterly basis. This new requirement would enable System institutions to gain insight into the price movements of all securities they purchase. We understand that stress-testing for investments that have indexed rates that reprice at intervals of 12 months or less or have extremely short terms (such as Fed Funds and certain commercial paper) may be viewed as unnecessary. However, we believe that all investments must be stress tested to build a robust stress-testing environment that provides for a comprehensive and consistent analytical framework from which to evaluate the risks in the investment portfolio. It is also an important part of

¹² See 64 FR 28893, May 28, 1999.

¹³ *Id.*

due diligence and the ongoing evaluation process.

Existing § 615.5141 provides two stress-testing options. In the first option, we set forth a standardized, three-pronged stress test that includes an average life test, an average life sensitivity test, and a price sensitivity test. In the second prong, we permit institutions to use alternative stress-test criteria and methodologies to evaluate the price sensitivity of mortgage securities.

We now propose to eliminate the standardized stress test. Since we first allowed the alternative stress test, we believe that every Farm Credit bank that invests in mortgage securities has moved to the alternative test and that none continue to use the standardized test. We discuss new stress-testing requirements, set forth in § 615.5133(f)(2)(iii), below.

To reduce regulatory burden, we propose in new § 615.5133(f)(2)(i) that an institution may purchase, with board approval, an investment that exceeds the stress-test parameters defined in its board's policies. We believe this flexibility is necessary because the financial markets continue to be very dynamic and a particular investment may not meet a board's parameters but may nevertheless provide additional liquidity or interest risk protection.

We propose in new § 615.5133(f)(2)(ii) that at the end of each quarter, each institution must stress test its entire investment portfolio, including a stress test of each individual investment, in accordance with paragraph (f)(2)(iii), as defined in its board policy. An investment that exceeds the board-defined stress parameters would not become ineligible and would not need to be divested. Rather, the board policy defining the stress tests would have to specify what actions the institution would take if its portfolio (but not an individual investment) exceeded the quarter-end, stress-test parameters defined in the policy, including the development of a plan to bring the portfolio back into compliance with those parameters.

We believe that stress testing the entire investment portfolio at each quarter-end will provide significant insight into the risks associated with the investment portfolio. We also believe that requiring the stress testing of individual investments on a quarterly basis is just a component of understanding how each individual investment affects the entire portfolio. Should an institution's entire portfolio exceed its board's stress-testing policy parameters it would have to develop a plan to bring the portfolio back into

compliance. This plan should specify how the institution would bring the portfolio back into compliance and what timeframes are involved.

As discussed below, in § 615.5133(g)(2) we propose to require an institution to provide immediate notification to the board or a designated board committee if its stress test for the entire portfolio exceeds its board's policy parameters. We believe that a portfolio stress test that exceeds board parameters discloses a serious situation that could threaten the safety and soundness of the institution and that directors should be notified and a plan developed to reduce portfolio risk.

Proposed § 615.5133(f)(2)(iii) sets forth the requirements for pre-purchase and quarter-end stress tests. These requirements are for the most part unchanged from our existing requirements in § 615.5141 governing the alternative stress test. We discuss the differences below.

Proposed § 615.5133(f)(2)(iii) would require that the pre-purchase and quarter-end stress tests be defined in a board approved policy and include defined parameters for the types of securities an institution purchases. The stress tests would have to be comprehensive and appropriate for the risk profile of the institution. At a minimum, the stress tests would have to be able to measure the price sensitivity of investments over different interest rate/yield curve scenarios. The methodology that the institution uses to analyze investment securities would have to be appropriate for the complexity, structure, and cash flows of the investments in its portfolio.

The stress tests would have to enable the institution to determine at the time of purchase and each subsequent quarter-end that its investment securities, either individually or on a portfolio-wide basis, do not expose its capital, earnings, or liquidity to excessive risks. Also, the stress tests would have to enable the institution to evaluate the overall risk in the investment portfolio and compare it with defined board policy limits.

Two of the new requirements in this proposal—the requirement that all securities, not just mortgage securities, must be stress tested; and the requirement that securities must be stress tested on a portfolio-wide basis—are discussed above. The other new requirement is that stress tests would have to enable an institution to determine that its investment securities do not expose it to excessive liquidity risk. We propose this requirement because we believe an institution should have insight into the amount of

cash it could obtain through the sale of investments, if necessary.

In conducting its stress tests, an institution would have to rely, to the maximum extent practicable, on verifiable information to support all of its assumptions, including prepayment and interest rate volatility assumptions, when applying its stress tests. An institution would have to document the basis for all assumptions used to evaluate a security and its underlying collateral, and it would also have to document all subsequent changes in its assumptions.

In this proposal, we specifically seek comment on several areas related to stress testing. Should FCA retain a standardized stress-testing option for institutions that do not wish to or do not have the capability of defining their own stress tests? Given that the Dodd-Frank Act requires us to eliminate credit ratings as a criterion for the eligibility of investments, would allowing System institutions to develop their own standards result in a variety of investment portfolios that exhibit substantially different risk profiles? Could this result in an inappropriate amount of risk in some investment portfolios? Also, should our regulations require stress-testing on all investments at the time of purchase? If not, on which investments should we require stress-testing, and why? Should institutions be required to stress test their individual investments and their entire investment portfolio on a quarterly basis? Why or why not?

c. Proposed § 615.5133(f)(3)—Ongoing Value Determination

We propose to redesignate existing § 615.5133(f)(2) as § 615.5133(f)(3). We propose to revise the last sentence of this provision to require an institution to evaluate the credit quality and price sensitivity of each investment in its portfolio and of its whole investment portfolio to the change in market interest rates. This change would clarify the meaning of this provision. We also propose to make other non-substantive changes to this provision.

d. Proposed § 615.5133(f)(4)—Presale Value Verification

We propose to redesignate existing § 615.5133(f)(3) as § 615.5133(f)(4) and to change the word "security" to "investment."

6. Proposed § 615.5133(g)—Reports to the Board of Directors

We propose revisions to § 615.5133(g), which specifies information that management must report to the board or a board committee each quarter.

Proposed § 615.5133(g)(1) would retain the general quarterly reporting requirements but would add to and modify them to strengthen the overall reporting requirements. Proposed § 615.5133(g)(2) would add a special reporting requirement.

Proposed § 615.5133(g)(1) would require management to report to the board of directors or a designated board committee at least quarterly on the following:

- Plans and strategies for achieving the board's objectives for the investment portfolio;
- Whether the investment portfolio effectively achieves the board's objectives;
- The current composition, quality, and liquidity profile of the investment portfolio;
- The performance of each class of investments and the entire investment portfolio, including all gains and losses that the institution incurred during the quarter on individual investments that it sold before maturity and why they were liquidated;
- Potential risk exposure to changes in market interest rates as identified through quarterly stress testing and any other factors that may affect the value of the institution's investment holdings;
- How investments affect the institution's capital, earnings, and overall financial condition;
- Any deviations from the board's policies (must be specifically identified); and
- The results of the institution's quarterly stress test.

We believe that these reporting requirements are best practices and are items that boards of directors or a designated board committee must know to exercise proper governance. We also believe that the use of the investment plan discussed below would be an important tool and an effective way to report to the board on the requirements above. Presenting an investment plan and its results to the board or designated board committee would provide assurances that all required reporting takes place.

Proposed § 615.5133(g)(2) would add a special reporting requirement. It would require an institution to provide immediate notification to its board of directors or to a designated board committee if its portfolio exceeded the quarterly stress-test parameters defined in the board policy required by proposed § 615.5133(f)(2)(ii). We propose this requirement because exceeding board policy parameters could lead to serious risk exposures for the institution.

7. Investment Plan and Investment Oversight Committee

Although not a regulatory requirement, each System institution that maintains an investment portfolio should develop an investment plan and establish a formal investment oversight committee. These practices enable management to implement the investment direction provided by the institution's board. In addition, as discussed above under reporting, management's presentation of an investment plan to the board or designated board committee, along with the investment portfolio results, would provide assurances that required reporting takes place.

An institution's senior management should develop a sufficiently detailed investment plan to appropriately execute the board's approved investment strategies and achieve business plan goals of the institution. The plan should be approved by senior management or an appropriate management committee. The investment plan should help provide for effective guidelines and control over the investment portfolio. The plan should be a working document that can deal with changes in market conditions. Investment plans should describe:

- The target portfolio composition given the board's investment policy, current market conditions, and projected liquidity needs;
- The rebalancing activities needed to achieve the target portfolio; and
- The performance measures that will be used to measure portfolio performance. Such measures should include target portfolio spread given the target portfolio composition and anticipated various spreads in relation to the institution's cost of funds.

To effectively implement the investment plan, each institution should consider establishing a formal investment committee to provide additional expertise and to serve as an additional control over investment management. In the past, the asset/liability management committees, which oversee the management of investment portfolios in most System institutions, have generally provided sufficient oversight of these portfolios. However, the importance, volume, and growing complexity of System investments may warrant additional expertise in the form of a more specialized investment committee. In addition to providing additional expertise, the investment committee would also provide for separation of duties between allocation and risk strategies and the actual traders. This

committee could also provide appropriate monitoring and governance as well as provide structure or formalization of many of the informal processes.

D. Section 615.5135—Management of Interest Rate Risk

Interest rate risk management is an important part of the overall financial management of a Farm Credit bank. The potentially adverse effects that interest rate risk may have on net interest income and the market value of equity is of particular importance.

We believe that strong policy direction from a Farm Credit bank's board of directors is essential to an effective interest rate risk management program. Existing § 615.5135 requires a bank's board to adopt an interest rate risk management section of an asset/liability management policy. Our proposed revisions to this rule would strengthen a bank's interest rate risk management program. The existing requirements would remain. In addition, the revisions would require the interest rate risk management section of the asset/liability management policy to establish policies and procedures for the bank to:

- Address the purpose and objectives of interest rate risk management;
- Consider the impact of investments on interest rate risk based on the results of the stress testing required under proposed § 615.5133(f)(2);¹⁴
- Describe actions needed to obtain its desired risk management objectives;
- Identify exception parameters and approvals needed for any exceptions to the requirements of the board's policies;
- Describe delegations of authority;
- Describe reporting requirements, including exceptions to limits contained in the board's policies; and
- Consider the nature and purpose of derivative contracts and establish counterparty risk thresholds and limits for derivatives used to manage interest rate risk.

Boards of directors set policy direction for the institution. Bank management carries out this direction and is responsible for reporting back to

¹⁴ Existing § 615.5135 already requires Farm Credit banks to include investments in their interest rate shock analysis. Farm Credit banks may wish to review an advisory on interest rate risk management, issued by certain other agencies in January 2010, that discusses stress testing. See, *Advisory on Interest Rate Risk Management*, issued by the Board of Governors of the Federal Reserve System, the Federal Deposit Insurance Corporation, the National Credit Union Administration, the Office of the Comptroller of the Currency, the Office of Thrift Supervision, and the Federal Financial Institutions Examination Council State Liaison Committee (January 6, 2010).

the board on its implementation of board direction and results. Consequently, we would expect that many of the above requirements would be carried out by management or a committee comprised of management and directors.

In addition, our proposal would require that management of each Farm Credit bank must report at least quarterly to its board of directors, or to a designated committee of the board, describing the nature and level of interest rate risk exposure. Any deviations from the board's policy on interest rate risk must be specifically identified in the report and approved by the board or a designated committee of the board.

Finally, we propose several minor technical and clarifying amendments, such as changing "shall" to "must".

E. Section 615.5136—Emergencies Impeding Normal Access of Farm Credit Banks to Capital Markets

This section provides that an emergency shall be deemed to exist whenever a financial, economic, agricultural, or national defense crisis could impede the normal access of Farm Credit banks to the capital markets. Whenever FCA determines, after consultations with the Funding Corporation, that such an emergency exists, the FCA Board shall, in its sole discretion, adopt a resolution that increases the amount of eligible investments that banks are authorized to hold pursuant to § 615.5132, and/or modifies or waives the liquidity reserve requirement in § 615.5134.

We propose revisions to provide additional flexibility to the resolution that the FCA Board may adopt. First, in recognition that events such as the 2008 market turmoil may not allow for the deliberation contemplated by this regulation, we propose to clarify that the Funding Corporation consultation should occur only "to the extent practicable." Second, the proposed rule would provide that FCA "may", rather than "shall", adopt a resolution. Third, rather than permitting the resolution to increase the authorized amount of eligible investments, the proposed rule would permit the resolution to modify the amount, qualities, and types of authorized, eligible investments. Finally, we propose to expressly permit the resolution to authorize other actions as deemed appropriate.

F. Section 615.5140—Eligible Investments

We last revised our listing of eligible investments, at § 615.5140, in 1999.¹⁵ Those amendments expanded the list of eligible investments and relaxed or repealed certain restrictions that had previously been in the regulation. As a result, those amendments allowed System institutions to purchase and hold a broader array of high-quality and liquid investments. Those revisions reflected changes in the financial markets and helped fulfill our objective of developing a regulatory framework that could more readily accommodate innovations in financial products and analytical tools.

The recent financial crisis resulted in substantial turmoil in the financial markets. Overall, System institutions weathered this crisis better than many other regulated financial institutions. We believe this is due in part to the limited scope of authorized investments. Even so, some System institutions did experience losses on certain types of investments.

Based on this experience, we now propose amendments that would clarify which investments are eligible, eliminate certain investments, and reduce portfolio limits where appropriate. In addition, we ask questions about the most effective way to comply with section 939A of the DFA. As discussed in greater detail below, that provision requires each Federal agency to revise all regulations that refer to or require reliance on credit ratings to assess creditworthiness of an instrument to remove the reference or requirement and to substitute other appropriate creditworthiness standards.

1. Proposed Revisions to § 615.5140(a)

a. Proposed § 615.5140(a)—Introductory Paragraph

We propose revisions to the language in the introductory paragraph of § 615.5140(a). The existing language authorizes institutions to hold only the eligible investments that are listed and prohibits institutions from purchasing investments that are not listed. It also prohibits them from holding investments that were eligible when purchased but that subsequently became ineligible.

Like our existing regulation, our proposal would permit institutions to purchase only those investments that satisfy the eligibility criteria in § 615.5140. An investment that does not satisfy the eligibility criteria would not be eligible for purchase and would be

subject to the divestiture requirements of proposed § 615.5143(a) if it were purchased.¹⁶

In a change from our existing approach, however, eligibility would be determined only at the time of purchase. An investment that satisfies the eligibility criteria at the time of purchase but that subsequently failed to satisfy the eligibility criteria would not become ineligible and would not have to be divested. Instead, it would be subject to the requirements of proposed § 615.5143(b), which would permit an institution to retain the investment subject to certain conditions.¹⁷ As discussed below, in our discussion of our proposed amendments to § 615.5143, we believe this change would reduce regulatory burden without creating safety and soundness concerns.

In addition, existing § 615.5140(a) states that all investments must be denominated in United States dollars. We propose to relocate this language to § 615.5140(b).

b. Proposed § 615.5140(a)(1) and (a)(2)—Obligations of the United States and Obligations of Government-Sponsored Agencies

Existing § 615.5140(a)(1) lists "Obligations of the United States" as an eligible asset class. Under that heading three items are listed: Treasuries; agency securities (except mortgage securities); and other obligations fully insured or guaranteed by the United States, its agencies, instrumentalities, and corporations. We believe this listing is confusing and does not appropriately differentiate among obligors. Although the heading reads "Obligations of the United States", the second and third items are intended to include debt securities and other non-mortgage obligations of GSEs such as Fannie Mae and Freddie Mac, which are not obligations of the United States.¹⁸

¹⁶ In this context, "purchase" would include an acquisition such as a swap of one security in exchange for another. It would not include an acquisition through a merger or consolidation of institutions. This interpretation is consistent with our interpretation of the existing rule.

¹⁷ Investments that do not meet our eligibility criteria that are acquired through a merger or consolidation would also be subject to the requirements of § 615.5143(b).

¹⁸ We use the term "Obligations of the United States" to refer to obligations that are fully and explicitly insured or guaranteed by the full faith and credit of the United States. Although the United States Government placed Fannie Mae and Freddie Mac in conservatorship in September 2008 and has taken certain actions to effectively provide protection to the holders of obligations issued and guaranteed by the GSEs, these obligations are not explicitly insured or guaranteed by the United States Government's full faith and credit.

¹⁵ See 64 FR 28884 (May 28, 1999).

Accordingly, we propose to split this listing into two categories. We do not intend any substantive changes with this proposed revision. We intend only to clarify the existing language.

The first listing, under § 615.5140(a)(1), would be headed “Obligations of the United States”, and it would include only non-mortgage obligations, including but not limited to Treasuries, that are fully insured or guaranteed by a *Government agency* (which by definition means they are backed by the full faith and credit of the United States).¹⁹ The second listing, under § 615.5140(a)(2), would be headed “Obligations of Government-Sponsored Agencies”, and it would include debt securities and other non-mortgage obligations of GSEs, as well as of Federal agencies, such as the Tennessee Valley Authority, that issue obligations that are not explicitly insured or guaranteed by the full faith and credit of the United States.²⁰

Proposed § 615.5140(a)(2) would permit institutions to purchase obligations of Government-sponsored agencies only if the obligations are senior debt securities. We believe that limiting permissible investments in this manner helps to ensure that institutions maintain only the highest quality investments in their portfolios.

c. Proposed § 615.5140(a)(3)—Municipal Securities

Existing § 615.5140(a)(2) places no investment portfolio limits for general obligation municipal securities. We propose to modify this provision (redesignated as § 615.5140(a)(3)) to impose a 15-percent investment portfolio limit on these securities. We propose this limit because we believe that a portfolio solely comprised of general obligation municipal securities would not provide sufficient liquidity in the event of a crisis in that particular market. We note that this limit is consistent with our existing revenue bond municipal securities investment portfolio limit.

¹⁹ As discussed above, in § 615.5131 we propose to define *Government agency* as “the United States Government or an agency, instrumentality, or corporation of the United States Government whose obligations are fully and explicitly insured or guaranteed as to the timely repayment of principal and interest by the full faith and credit of the United States.”

²⁰ As discussed above, in § 615.5131 we propose to define *Government-sponsored agency* as “an agency, instrumentality, or corporation chartered or established to serve public purposes specified by the United States Congress but whose obligations are not explicitly insured or guaranteed by the full faith and credit of the United States Government, including but not limited to any Government-sponsored enterprise.”

d. Proposed § 615.5140(a)(4)—International and Multilateral Development Bank Obligations

Existing § 615.5140(a)(3) places no final maturity limit and no investment portfolio limit on international and multilateral development bank obligations. In redesignated § 615.5140(a)(4), we propose imposing a 10-year maturity limit and a 15-percent investment portfolio limit, to ensure a more diversified and liquid portfolio. We believe that a portfolio containing longer term obligations or comprised of an excess of these obligations would not provide sufficient liquidity in the event of a crisis in that particular market. We note that System institutions have invested in these obligations only on a limited basis.

e. Proposed § 615.5140(a)(5)—Money Market Instruments

Existing § 615.5140(a)(4) permits institutions to invest in repurchase agreements that satisfy specified conditions. If the counterparty defaults, the regulation requires the institution to divest non-eligible securities in accordance with the divestiture requirements of § 615.5143. Under our proposal, (redesignated § 615.5140(a)(5)) as discussed above, an eligible investment could not become ineligible, and would not be required to be divested. Accordingly, we propose to delete this divestiture requirement.

f. Proposed § 615.5140(a)(6)—Mortgage Securities

Existing § 615.5140(5) requires stress testing of all mortgage securities. As discussed above, proposed § 615.5133(f) would require stress testing on all investments held in an institution’s portfolio. Accordingly, we propose to delete the specific stress-testing requirement for mortgage securities (which would be listed in redesignated § 615.5140(a)(6)).

The first category listed in existing § 615.5140(a)(5) is mortgage securities that are issued or guaranteed by the United States. In redesignated § 615.5140(a)(6), we propose to revise this category to refer to mortgage securities that are fully guaranteed or fully insured by a Government agency.²¹ This change makes clear that this category includes only mortgage securities that are fully backed by the

²¹ As discussed above, in § 615.5131 we propose to define *Government agency* as “the United States Government or an agency, instrumentality, or corporation of the United States Government whose obligations are fully and explicitly insured or guaranteed as to the timely repayment of principal and interest by the full faith and credit of the United States.”

full faith and credit of the United States. If the United States Government issues a mortgage security that is not fully guaranteed or fully insured by the full faith and credit of the United States Government, it is not eligible under this category.

The second category listed in existing § 615.5140(a)(5) is Fannie Mae and Freddie Mac mortgage securities. As discussed above, the United States Government placed these two housing GSEs in conservatorship in September 2008, and their future remains uncertain. As long as they remain in conservatorship, we believe the existing 50-percent investment portfolio limit is appropriate. Accordingly, we propose no changes to this category (which would be included in redesignated § 615.5140(a)(6)) at this time. Depending on what happens to these GSEs in the future, a portfolio limit reduction or other restriction may become warranted. We invite your comments regarding revisions you believe we should make to this category of investments.

The third category listed in existing § 615.5140(a)(5) is non-Agency securities that comply with 15 U.S.C. 77d(5) or 15 U.S.C. 78c(a)(41). For the purpose of clarification, in redesignated § 615.5140(a)(6), we propose to replace the term “non-Agency” with a reference to securities that are not fully insured or guaranteed by a Government agency, Fannie Mae, or Freddie Mac. We intend no substantive change with this clarification. Furthermore, in this preamble we continue the shorthand reference to these securities as non-Agency mortgage securities.

Under proposed § 615.5140(a)(6), a position in a non-Agency mortgage security would be eligible only if it is the senior-most position at the time of purchase. The FCA considers a position in a non-Agency mortgage security to be the senior-most position only if it currently meets both of the following criteria:

- No other remaining position in the securitization has priority in liquidation. Remaining positions that are the last to experience losses in the event of default and which share those losses pro rata meet this criterion.

- No other remaining position in the securitization has a higher priority claim to any contractual cash flows. Remaining positions that have the first priority claim to contractual cash flows (including planned amortization classes), as well as those that share on a pro rata basis a first priority claim to cash flows meet this criterion.

Institutions should be aware that the tranche that is the senior-most position at the time they are considering

purchase is not necessarily the same tranche that was in the senior-most position at the time of issue. Institutions should also be careful not to be misled by the labeling of tranches as “super senior” or “senior” in a prospectus (or on market reporting services). Institutions may purchase non-Agency mortgage-backed securities (MBS) only if the securities satisfy the above two criteria at the time of purchase. Any security that would not satisfy the eligibility criteria after purchase because of the terms of the contract or because of structural issues would not be eligible.

In addition, we propose to reduce the investment portfolio limit for non-Agency mortgage securities from 15 to 10 percent to reduce the exposure in MBS that are not fully insured or guaranteed by the United States. We believe reducing exposure in this area of uninsured securities would result in a more diversified and liquid portfolio.

We note that the Office of the Comptroller of the Currency, Board of Governors of the Federal Reserve System, Federal Deposit Insurance Corporation, United States Securities and Exchange Commission, Federal Housing Finance Agency, and Department of Housing and Urban Development (collectively, the other agencies) have proposed a rule to implement the credit risk retention requirements of section 15G of the Securities and Exchange Act of 1934, as added by section 941 of the DFA.²² If this proposed rule of the other agencies is finalized, it could change the risk characteristics of investments that System institutions invest in. Consequently, FCA may consider further revisions to portfolio limits at that time.²³

Finally, we propose to eliminate commercial mortgage-backed securities, which are included in existing § 615.5140(a)(5), from the list of eligible investments. We believe that these securities pose undue risk due to the nature of the collateral underlying these securities.

g. Proposed § 615.5140(a)(7)—Asset-Backed Securities

Existing § 615.5140(a)(6) authorizes investments in asset-backed securities with a 20-percent investment portfolio limit. In redesignated § 615.5140(a)(7), we propose to reduce the investment

portfolio limit from 20 to 15 percent, with no more than 5 percent of the investment portfolio in any one type of collateral. We propose this change because we believe that certain asset-backed securities, such as home equity loans and manufactured housing loans, present appreciable, albeit manageable, risk. We believe this reduction will help limit the exposure of System institutions in investments such as manufactured housing and home equity loans that experienced considerable stress during the financial crisis.

h. Proposed § 615.5140(a)(8)—Corporate Debt Securities

Existing § 615.5140(a)(7) authorizes investments in corporate debt securities, subject to a 20-percent investment portfolio limit. The provision also prohibits investments in securities that are convertible to equity securities.

In redesignated § 615.5140(a)(8), we propose to add a requirement that the securities must be senior debt securities to be eligible for purchase. We would leave the portfolio limit the same, but we would create additional diversification by requiring that no more than 10 percent of the investment portfolio be in any one of the 10 industry sectors as defined by the Global Industry Classification Standard (GICS).²⁴

i. Proposed § 615.5140(a)(9)—Diversified Investment Funds

We propose to clarify our expectations for diversified investment funds contained in our existing § 615.5140(a)(8). We believe the term “diversified investment funds” could include closed-end funds, which are typically exchange-traded. We propose to add language stating that only open-end funds are eligible, in order to reduce the possibility that investments are purchased for potentially speculative purposes.

In addition, the existing rule imposes no investment portfolio limitation, as long as shares in each investment company comprise 10 percent or less of an institution’s portfolio. Our proposal would impose a 50-percent total investment portfolio limit, with no more than 10 percent in any single fund. We believe this proposal would provide for more appropriate diversification across an institution’s investment portfolio.

2. Dodd-Frank Act Compliance

In July 2010, to strengthen regulation of the financial industry in the wake of the financial crisis that unfolded in 2007 and 2008, the President signed into law the Dodd-Frank Act. Section 939A of the DFA requires the following:

- Each Federal agency must review (i) all of its regulations that require the use of an assessment of the creditworthiness of a security or money market instrument, and (ii) any references to or requirements in its regulations regarding credit ratings.

- Each Federal agency must modify its regulations to remove any reference to or requirement of reliance on credit ratings and to substitute in the regulations such standards of creditworthiness as the agency determines is appropriate. In making this determination, the agency must seek to establish, to the extent feasible, uniform standards of creditworthiness.

We have completed our review of FCA regulations that impose creditworthiness requirements or that refer to or require the use of credit ratings. Existing § 615.5140(a) is one such regulation; it requires minimum NRSRO²⁵ credit ratings for many categories of investments—including municipal securities, certain money market instruments, non-Agency mortgage securities, asset-backed securities, and corporate debt securities—in order for them to be eligible.

There are a number of different ways to assess creditworthiness, and we are considering which approach or combination of approaches would be most appropriate in this context. It may well be that we would want to propose several of these approaches in concert with one another. In the discussion below, we explore various approaches that could be considered for assessing creditworthiness as a determinant of eligibility for purposes of § 615.5140(a).²⁶

First, our regulation could specify financial measurements, benchmark indexes, and other measurable criteria against which institutions could evaluate the creditworthiness of their investments. The regulation could

²⁵ Nationally recognized statistical rating organization.

²⁶ In addition, existing § 615.5140(b), which we propose to redesignate as § 615.5140(c), provides that whenever the obligor or issuer of an eligible investment is located outside the United States, the host country must maintain the highest sovereign rating for political and economic stability by an NRSRO. The DFA requires us to replace that NRSRO standard with an appropriate substitute. The following discussion also applies to that provision.

²² See 76 FR 24090 (April 29, 2011).

²³ Future revisions could include changes to the portfolio limits for asset-backed securities contained in proposed § 615.5140(a)(7), as well as to changes to the portfolio limits for non-Agency mortgage securities contained in proposed § 615.5140(a)(6).

²⁴ GICS was developed by Morgan Stanley Capital International and Standards and Poor’s. The GICS is an industry analysis framework for investment research portfolio management and asset allocation. The GICS structure consists of 10 sectors, 24 industry groups, 68 industries, and 154 sub-industries. More information can be found at <http://www.msicbarra.com/products/indices/gics>.

specify factors and standards of criteria for various classes of investments. Institutions would need to ensure that these criteria were met in order for an investment to be eligible or suitable at the time of purchase. Some of the factors that could be considered as criteria to ensure a high quality, highly liquid investment portfolio include:

- Credit spreads (*i.e.*, whether it is possible to demonstrate that a position in certain investments is subject to a minimal amount of credit risk based on the spread between the security's yield and the yield of Treasury or other securities, or based on credit default swap spreads that reference the security);
- Default statistics (*i.e.*, whether providers of credit information relating to securities express a view that specific securities have a probability of default consistent with other securities with a minimal amount of credit risk);

- Inclusion on an index (*i.e.*, whether a security, or issuer of the security, is commonly included as a component of a recognized index of instruments that are subject to a minimal amount of credit risk);

- Priorities and enhancements (*i.e.*, the extent to which a security includes credit enhancement features, along with an evaluation of the relative strength of the enhancements, such as overcollateralization and reserve accounts, or has priority under applicable bankruptcy or creditors' rights provisions);

- Price, yield and/or volume (*i.e.*, whether the price and yield of a security or a credit default swap that references the security are consistent with other securities that are subject to a minimal amount of credit risk and whether the price resulted from active trading); and
- Asset class-specific factors (*e.g.*, in the case of structured finance products, the risk characteristics of the specific underlying collateral).

Is this approach one that FCA should consider, and are there other criteria that should be included? Should the creditworthiness standard include specific standards for probability and loss given default? If so, why, and where could the Agency source such data to derive such probabilities? Also, should this vary by asset class and/or type of investment? Finally, would it be appropriate to combine this approach with one or more of the other approaches, and if so, which ones, and why?

Second, our regulation could require System institutions to develop their own internal assessment process for evaluating the creditworthiness of investments. We believe that the level of

due diligence needed to validate such a system could require significant effort on the part of System institutions. In addition, the internal evaluation system would need to be validated and might need to be frequently recalibrated based on changes in the marketplace. Institutions would need to be able to demonstrate to FCA that the probability of default characteristics and loss given default characteristics are verifiable and accurate. Any internal assessment would also have to consider an investment's marketability, liquidity, and pricing risk for determining eligibility and suitability.

The System has developed a standardized 14-point risk rating summary that institutions use to classify their loan portfolios. Similar criteria could possibly be used in the assessment of whether an investment is eligible or suitable for the portfolio. However, additional validation would likely be needed to ensure appropriate recognition of the critical factors present in investments.

Is this second approach one that we should consider? Do System institutions have the capability of validating an internal assessment system for investments, and is it appropriate to allow institutions to develop their own internal model for assessing creditworthiness of investments? If so, what standards of creditworthiness should be included, and why? If we consider an internal model approach, what would be the criteria for eligibility, and why? Also, should an assessment of creditworthiness link directly to a bank's loan rating system and if so, how should differences in classifications pertaining to eligibility be handled? Finally, would it be appropriate to combine this approach with one or more of the other approaches and, if so, which ones, and why?

Third, FCA could develop regulations that would require institutions to use third party assessments to assess creditworthiness. Organizations other than NRSROs may have the capability to evaluate creditworthiness, and this evaluation could be considered in an institution's eligibility and suitability assessment. We also believe that the DFA does not prohibit System institutions from looking to the NRSROs as a tool for assessing creditworthiness. Institutions that do so, however, should evaluate the quality of third party assessments by considering whether issuers or investors pay the rating fees. Moreover, as we have seen in the recent crisis, reliance on third party analysis can be problematic and cannot be used in isolation. Accordingly, if we were to require this approach, it would likely be

in concert with one or more of the other approaches.

Is this third approach one that we should consider? What reliable third party sources exist? Would it be appropriate to combine this approach with one or more of the other approaches and if so, which ones, and why?

Fourth, FCA could develop a set of clearly defined criteria from which we would create a scale that ranks creditworthiness. We would then require System institutions to conduct due diligence to ensure that an investment they purchase actually complies with the criteria. The criteria could be as follows:

Highest Standard—Obligations must be of the highest quality with minimal credit risk. Issuers must have an extremely strong capacity to meet its long-term financial obligations and a superior ability to repay short-term debt obligations.

High Standard—Obligations must be of a high quality and subject to very low credit risk. Issuers must have a very strong capacity to meet its long-term financial obligations and a strong ability to repay short-term debt obligations.

We recognize that these standards may be viewed differently by different System institutions. This approach would require significant due diligence and controls in place to ensure consistency. It could also result in one institution determining an investment is eligible while another may determine an investment is not eligible at the time of purchase.

Is this fourth approach one that we should consider and, if so, what definitional criteria should be used? Would it be appropriate to combine this approach with one or more of the other approaches and, if so, which ones, and why?

In considering the requirements of the Dodd-Frank Act and the reasons for its enactment, do the above approaches allow for too much subjectivity and inconsistency? Alternatively, is there an approach that would allow for objective criteria that would lead to consistency in assessing eligibility? We are also considering how difficult and costly in practice any of the potential approaches or combination of approaches would be. In addition, we are considering whether there are other approaches to assessing creditworthiness that would be more appropriate. Finally, as a related matter, we are interested in what specific methods and standards an institution should be required to apply to appropriately assess the political and economic stability of a foreign country

that hosts the obligor or issuer of an eligible investment.

3. Changes to Remainder of § 615.5140

As discussed above, we propose to relocate to § 615.5140(b) the requirement, currently contained in the introductory paragraph of § 615.5140(a), that all investments must be denominated in United States dollars.

We propose to delete our existing § 615.5140(c), which requires that all eligible investments, except money market instruments, must be marketable. We expect that in an upcoming rulemaking, we will propose to include that requirement in § 615.5134.

We propose to reduce to 15 percent the 20-percent obligor limit contained in our existing § 615.5140(d)(1). We believe this reduction is appropriate because it helps to ensure diversification among obligors.

We also propose to clarify, consistent with the amendments to terminology that we propose in § 615.5140(a) and (b), that the obligor limit does not apply to obligations that are issued or guaranteed as to interest and principal by Government agencies or Government-sponsored agencies (rather than to obligations that are issued or guaranteed as to interest and principal by the United States, its agencies, instrumentalities, or corporations). We intend no substantive change with this clarification.

Obligations that are not fully insured or fully guaranteed by a Government agency or Government-sponsored agency present relatively greater risk than do obligations that are so insured or guaranteed. We also believe that money market instruments generally present more limited risk. We seek comment on whether an overall combined portfolio limit—including all obligations except for money market instruments and those fully insured or fully guaranteed by Government agencies and Government-sponsored agencies—would be appropriate. Should we implement such a limit and, if so, what should the limit be? In addition, in light of the concentration that can occur in the housing sector, should we consider implementing a housing sector limit? Why or why not?

G. Section 615.5141—Stress Tests for Mortgage Securities

Because we propose to relocate our stress-testing requirements to § 615.5133(f), we also propose to remove this stand-alone, stress-testing section from our regulations.

H. Section 615.5142—Association Investments

Section 615.5142 implements sections 2.2(10) and 2.12(18) of the Act, which require each funding bank to supervise and approve the investment activities of its affiliated associations. Section 615.5142 authorizes an association to hold eligible investments, listed in § 615.5140, with the approval of its funding bank, for the purposes of reducing interest rate risk and managing surplus short-term funds. Each bank must review annually the investment portfolio of every association that it funds.

Although funding banks are required to supervise and approve the investment activities of an association, when we adopted this regulation in 1999, we emphasized that bank oversight does not absolve an association's board and managers of their fiduciary duties to manage investments in a safe and sound manner. We stated that the fiduciary responsibilities of association boards obligate them to develop appropriate investment management policies and practices to manage the risks associated with investment activities. We also stated that each association's investment managers must fully understand the risks of its investments and make independent and objective evaluations of investments prior to purchase.²⁷

In addition, we emphasized that each association with a nonagricultural investment portfolio is required to develop an investment policy that is based on its unique characteristics and that is commensurate with the nature of its investment activities and portfolio. An association must comply with all the requirements in § 615.5133 if the level or type of its investments could expose its capital to material loss.²⁸

This guidance is still valid today. However, we believe additional clarification and a regulatory revision are appropriate.

As a point of clarification, although § 615.5142 permits association investments for the purpose of, in pertinent part, reducing interest rate risk, the interest rate risk of most associations is managed by their respective funding banks. Accordingly, interest rate risk at the association level is generally minimized although not completely eliminated. The use of investments for reducing interest rate risk should be commensurate with the actual interest rate risk exposure of the association. Furthermore, associations that engage in investment activities

must ensure that their investments do not increase interest rate risk.

Section 615.5142 also permits associations to invest surplus short-term funds. We are concerned that an association could draw on its line of credit with its funding bank to obtain "surplus" short-term funds that it would invest in an investment with a longer term or repricing characteristics than the term and repricing characteristics of the funding. Funding a longer term investment with short-term funds creates the potential for interest rate risk. Because of this potential risk, associations must carefully manage their investments of surplus short-term funds.

Accordingly, we propose to add paragraph (b) to § 615.5142. Paragraph (b) would require that before an association purchases an eligible investment for the purpose of managing surplus short-term funds, it must ensure that the investment's repricing and maturity characteristics match the characteristics of the surplus short-term funds to be invested.

In addition, although we do not propose this as a requirement at this time, we believe that in order for an investment to be made for the purpose of managing surplus "short-term" funds, the funds generally should be invested in instruments that are "overnight" or that have maturities of 30 days or less. We seek comment on whether we should define surplus short-term funds and if so how. Further, is our belief that surplus short-term funds should only be invested in overnight investments or in investments with maturities of 30 days or less appropriate? Lastly, is our proposed limitation on the permissible characteristics of investments purchased for the purpose of managing surplus short-term funds appropriate for associations, or does it unreasonably restrict an association's ability to properly hold and manage investments?

I. Section 615.5143—Management of Ineligible and Unsuitable Investments

Existing § 615.5143 requires an institution to dispose of an investment that is ineligible (under the § 615.5140 criteria) within 6 months unless we approve, in writing, a plan that authorizes the institution to divest the instrument over a longer period of time. An acceptable divestiture plan must require the institution to dispose of the ineligible investment as quickly as possible without substantial financial loss. Until the institution actually disposes of the ineligible investment, the institution's investment portfolio managers must report on specified

²⁷ See 64 FR 28885–28886 (May 28, 1999).

²⁸ *Id.*

matters to the board of directors at least quarterly.

During the financial crisis of the past few years, we have received numerous divestiture plans from System institutions seeking our permission to continue to retain ineligible investments. Nearly all of these plans have involved investments that have become ineligible due to credit ratings downgrades.²⁹ Typically, the analyses in the divestiture plans have indicated that holding the instruments until maturity or until market conditions improve would minimize losses, compared with incurring a substantial loss with a sale in the then-current market. Moreover, the investments have not materially affected the financial capacity of the institution. Accordingly, we have approved all investment plans that we have received in at least the last 5 years.

The automatic 6-month divestiture requirement, with FCA approval needed for a longer divestiture period, has proven to be inefficient and unnecessary. The existing regulation requires institutions to expend time and effort to develop a divestiture plan, requires FCA staff to expend time and effort reviewing the plan and developing a recommendation, and requires the FCA Board to expend time and effort determining whether to approve the plan.

Accordingly, to reduce the regulatory burden on System institutions and to improve efficiency, proposed § 615.5143(b) would permit an institution to retain an investment that no longer satisfies the eligibility criteria set forth in § 615.5140 (that satisfied the criteria when purchased), without the need for FCA approval, subject to specified requirements that are summarized below.

Section 615.5143(b) would also permit an institution to retain an investment that satisfies the § 615.5140 eligibility criteria but that is not suitable because it does not satisfy the risk tolerance established in the institution's board policy pursuant to § 615.5133(c), subject to the same specified requirements.

The specified requirements that would have to be satisfied in order to retain an investment that no longer satisfies the § 615.5140 eligibility criteria or that is unsuitable are as follows:

1. The institution must notify FCA promptly in writing upon determining that the investment no longer satisfies the § 615.5140 eligibility criteria or is unsuitable;
2. The investment must not be used to fund the liquidity reserve requirement in § 615.5134;
3. The institution must include the investment in the § 615.5132 investment portfolio limit;
4. The institution must include the investment as collateral under § 615.5050 and net collateral under § 615.5301(c) at the lower of cost or market value; and
5. The institution must develop a plan to reduce risk arising from the investment.

The first requirement, regarding FCA notification, is necessary so that we can evaluate whether the institution is responding appropriately to the situation. The second and fourth requirements, regarding exclusion from the liquidity reserve and inclusion in collateral and net collateral, are warranted by safety and soundness concerns. The third condition, regarding inclusion in the investment portfolio limit under § 615.5132, is simply an express statement that we find no basis to exclude these investments from that limit. And the final requirement, regarding the development of a risk reduction plan, is necessary for safety and soundness purposes.

Proposed § 615.5143(a) provides that an investment that does not satisfy the § 615.5140 eligibility criteria at the time of purchase is ineligible. Institutions must not purchase ineligible investments. An institution that purchases an ineligible investment must notify us promptly, in writing, and must divest of the investment no later than 60 calendar days after determining that the investment is ineligible unless we approve, in writing, a plan that authorizes divestiture over a longer period of time.³⁰

Although it is not stated in the regulation, we clarify here that an acceptable divestiture plan must require an institution to dispose of the

investment as quickly as possible without substantial financial loss. The plan must also contain sufficient analysis to support continued retention of the investment, including its impact on the institution's capital, earnings, liquidity, and collateral position. Our decision will not be based solely on financial loss.

Until the institution divests of the investment:

1. It must not be used to fund the liquidity reserve requirement in § 615.5134;
2. It must be included in the § 615.5132 investment portfolio limit; and
3. It must not be included as collateral under § 615.5050 or net collateral under § 615.5301(c).

We believe each institution should exercise sufficient due diligence to ensure it does not purchase ineligible investments. Such a purchase would indicate weaknesses in an institution's internal controls and due diligence, and the institution should expect greater examination scrutiny if this occurs. We expect such a purchase to be extremely rare.

Proposed § 615.5143(c) would require each institution to report to its board at least quarterly on the following:

1. The status and performance of each investment that is ineligible; was eligible when purchased but now does not meet the eligibility criteria; or is unsuitable because it does not fit the institution's risk tolerance;
2. The impact that the investments described above may have on the institution's capital, earnings, liquidity, and collateral position; and
3. The terms and status of any required divestiture plan or risk reduction plan.

This reporting allows the institution's board to exercise appropriate oversight over investments that are ineligible, unsuitable, or otherwise problematic.

Finally, proposed § 615.5143(d) would reserve FCA's authority to require an institution to divest of any investment at any time for safety and soundness purposes. In using this authority, the FCA would consider the expected loss on the transaction (or transactions) and the impact on the institution's financial condition and performance. Because the proposed rule would not require divestiture of any investment that was eligible when purchased, FCA must reserve the authority to require divestiture of investments when necessary.

²⁹ As discussed elsewhere in this preamble, section 939A of the Dodd-Frank Act requires us to remove credit ratings from our eligibility criteria and to substitute other appropriate standards of creditworthiness. We are currently asking questions about how best to develop appropriate creditworthiness standards to include in our eligibility criteria in § 615.5140. Once we have revised our eligibility criteria, a credit-rating downgrade would no longer cause an investment to fail to satisfy the criteria, but an inability to meet the new creditworthiness standards would cause an investment to fail to satisfy the criteria.

³⁰ In this context, "purchase" would include an acquisition such as a swap of one ineligible security for another. It would not include an acquisition through a merger or consolidation of institutions. Investments that do not meet our eligibility criteria that are acquired through a merger or consolidation would be subject to the requirements of § 615.5143(b).

J. Section 615.5174—Farmer Mac Securities

We propose changes to § 615.5174(d), which governs stress testing of Farmer Mac securities, which Farm Credit banks, associations, and service corporations are permitted to purchase and hold for the purposes of managing credit and interest rate risk and furthering their mission to finance agriculture. Existing § 615.5174(d) requires institutions to perform stress tests on Farmer Mac securities in accordance with the requirements of § 615.5141. It also requires institutions to divest Farmer Mac securities that fail a stress test, as required by § 615.5143.

Institutions often participate existing mortgage loans to Farmer Mac in exchange for mortgage-backed securities guaranteed by Farmer Mac. These securities are, in essence, loans that have had the credit risk transferred to Farmer Mac. The loans were not subject to the stress-testing requirements applicable to investments, and it does not seem reasonable to impose those stress-testing requirements on the securities with which the loans were exchanged. Accordingly, we propose to remove the requirement that a System institution must subject Farmer Mac securities backed by loans that the institution originated to the stress testing applicable to investments.³¹ If a System institution purchases a Farmer Mac security from another System institution or from outside the System, however, the security would remain subject to the stress testing applicable to investments.³²

In addition, because other investments would no longer have to be divested if they fail a stress test, we propose to remove this requirement for Farmer Mac securities as well.

We also propose to add a definition of the term “you” in a new § 615.5174(e), to clarify that the regulation applies to Farm Credit banks, associations, and service corporations.

Finally, throughout § 615.5174 we propose conforming changes to references to regulations we are proposing to revise, to ensure the references continue to refer to the appropriate regulatory provisions.

³¹ Institutions remain subject to the stress-testing expectations we set forth in our Informational Memorandum dated March 4, 2010. These expectations apply to all sources of risk to an institution’s balance sheet, including but not limited to loans and investments.

³² As discussed above, we propose to move the investment stress-testing requirements from § 615.5141 to § 615.5133(f).

IV. Regulatory Flexibility Act

Pursuant to section 605(b) of the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*), the FCA hereby certifies that the proposed rule will not have a significant economic impact on a substantial number of small entities. Each of the banks in the System, considered together with its affiliated associations, has assets and annual income in excess of the amounts that would qualify them as small entities. Therefore, System institutions are not “small entities” as defined in the Regulatory Flexibility Act.

List of Subjects in 12 CFR Part 615

Accounting, Agriculture, Banks, banking, Government securities, Investments, Rural areas.

For the reasons stated in the preamble, part 615 of chapter VI, title 12 of the Code of Federal Regulations is proposed to be amended as follows:

PART 615—FUNDING AND FISCAL AFFAIRS, LOAN POLICIES AND OPERATIONS, AND FUNDING OPERATIONS

1. The authority citation for part 615 is revised to read as follows:

Authority: Secs. 1.5, 1.7, 1.10, 1.11, 1.12, 2.2, 2.3, 2.4, 2.5, 2.12, 3.1, 3.7, 3.11, 3.25, 4.3, 4.3A, 4.9, 4.14B, 4.25, 5.9, 5.17, 6.20, 6.26, 8.0, 8.3, 8.4, 8.6, 8.7, 8.8, 8.10, 8.12 of the Farm Credit Act (12 U.S.C. 2013, 2015, 2018, 2019, 2020, 2073, 2074, 2075, 2076, 2093, 2122, 2128, 2132, 2146, 2154, 2154a, 2160, 2202b, 2211, 2243, 2252, 2278b, 2278b–6, 2279aa, 2279aa–3, 2279aa–4, 2279aa–6, 2279aa–7, 2279aa–8, 2279aa–10, 2279aa–12); sec. 301(a) of Pub. L. 100–233, 101 Stat. 1568, 1608; sec. 939A of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Pub. L. 111–203, 124 Stat. 1326, 1887 (15 U.S.C. 780–7 note) (July 21, 2010).

Subpart E—Investment Management

2. Section 615.5131 is amended by:

- Removing designations for paragraphs (a) through (l); and
- Adding alphabetically two new definitions to read as follows:

§ 615.5131 Definitions.

* * * * *

Government agency means the United States Government or an agency, instrumentality, or corporation of the United States Government whose obligations *are* fully and explicitly insured or guaranteed as to the timely repayment of principal and interest by the full faith and credit of the United States Government.

Government-sponsored agency means an agency, instrumentality, or corporation chartered or established to

serve public purposes specified by the United States Congress but whose obligations *are not* explicitly insured or guaranteed by the full faith and credit of the United States Government, including but not limited to any Government-sponsored enterprise.

* * * * *

3. Section 615.5132 is amended by adding a new sentence at the end to read as follows:

§ 615.5132 Investment purposes.

* * * Eligible investments listed under § 615.5140 that are pledged by a Farm Credit bank to meet margin requirements for derivative transactions may be excluded when calculating the amount of eligible investments held by the Farm Credit bank pursuant to this section.

4. Revise §§ 615.5133 to read as follows:

§ 615.5133 Investment management.

(a) *Responsibilities of board of directors.* Your board of directors must adopt written policies for managing your investment activities. Your board must also ensure that management complies with these policies and that appropriate internal controls are in place to prevent loss. At least annually, the board, or a designated committee of the board, must review and affirmatively validate the sufficiency of these investment policies. Any changes to the policies must be adopted by the board.

(b) *Investment policies—general requirements.* Your board’s written investment policies must address the purposes and objectives of investments; risk tolerance; delegations of authority; internal controls; due diligence to determine eligibility, suitability, and the value of investments; and reporting requirements. Furthermore, your investment policies must address the means for reporting, and approvals needed for, exceptions to established policies. Investment policies must be sufficiently detailed, consistent with, and appropriate for the amounts, types, and risk characteristics of your investments. You must document in your records or board minutes any analyses used in formulating your policies or amendments to the policies.

(c) *Investment policies—risk tolerance.* Your investment policies must establish risk and concentration limits for the various types, classes, and sectors of eligible investments and for the entire investment portfolio. These policies must ensure that you maintain appropriate and prudent diversification of your investment portfolio. Risk limits must be based on your institutional

objectives, capital position, and risk tolerance. Your policies must identify the types and quantity of investments that you will hold to achieve your objectives and control credit, market, liquidity, and operational risks. Each association or service corporation that holds significant investments and each bank must establish risk limits in its investment policies for the following four types of risk.

(1) *Credit risk.* Investment policies must establish:

(i) *Credit quality standards, limits on counterparty risk, and risk diversification standards that limit concentrations as follows.*

Concentration limits must be based on a single or related counterparty(ies). Concentration limits must also be based on a geographical area, industries or sectors, asset classes, or obligations with similar characteristics.

(ii) *Criteria for selecting brokers, dealers, and investment bankers (collectively, securities firms).* You must buy and sell eligible investments with more than one securities firm. As part of your review of your investment policies required under paragraph (a) of this section, your board of directors, or a designated committee of the board, must review the criteria for selecting securities firms. Any changes to the criteria must be approved by the board. Also, as part of your review required under paragraph (a) of this section, the board, or a designated committee of the board, must review your existing relationships with securities firms and determine whether to continue your relationships with them. Any changes to the existing relationships with securities firms must be approved by the board.

(iii) *Collateral margin requirements on repurchase agreements.* You must regularly mark the collateral to market and ensure appropriate controls are maintained over collateral held.

(2) *Market risk.* Investment policies must set market risk limits for specific types of investments and for the investment portfolio. Your board of directors must establish market risk limits in accordance with these regulations (including, but not limited to, § 615.5135 and paragraph (f)(2) of this section) and our other policies and guidance.

(3) *Liquidity risk.* Investment policies must describe the liquidity characteristics of eligible investments that you will hold to meet your liquidity needs and institutional objectives.

(4) *Operational risk.* Investment policies must address operational risks, including delegations of authority and internal controls in accordance with paragraphs (d) and (e) of this section.

(d) *Delegation of authority.* All delegations of authority to specified personnel or committees must state the extent of management's authority and responsibilities for investments.

(e) *Internal controls.* You must:

(1) Establish appropriate internal controls to detect and prevent loss, fraud, embezzlement, conflicts of interest, and unauthorized investments.

(2) Establish and maintain a separation of duties and supervision between personnel who execute investment transactions and personnel who post accounting entries, reconcile trade confirmations, report compliance with investment policy, and approve, revalue, and oversee investments.

(3) Maintain management information systems that are appropriate for the level and complexity of your investment activities.

(4) Implement an effective internal audit program to review, at least annually, your investment controls, processes, and compliance with FCA regulations and other regulatory guidance. Your internal audit program must specifically include a review of your process for ensuring all investments, at the time of purchase, are eligible and suitable for purchase under your board's investment policies.

(f) *Due diligence to determine eligibility, suitability, and value of investments.*

(1) *Eligibility and suitability for purchase.* Before you purchase an investment, you must conduct sufficient due diligence to determine whether it is eligible under § 615.5140 and suitable for purchase under your board's investment policies. You must verify the value of the investment (unless it is a new issue) with a source that is independent of the broker, dealer, counterparty or other intermediary to the transaction. Your investment policies must fully address the extent of pre-purchase analysis that management must perform for various classes of investments. You must document your assessment of eligibility and suitability, including the information used in your assessment. You may use all sources available to you, including third party sources, to assess the investment. Your assessment of each investment at the time of purchase must at a minimum include an evaluation of credit risk, liquidity risk, market risk, and interest rate risk, and an assessment of the cash flows and the underlying collateral of the investment.

(2) *Pre-purchase and quarterly stress testing.*

(i) Prior to purchasing an investment, you must stress test it, in accordance with paragraph (f)(2)(iii) of this section,

as defined in your board policy. Your board must approve the purchase of any investment that exceeds the stress-test parameters defined in your board policy.

(ii) On a quarter-end basis, you must stress test your entire investment portfolio, including a stress test of each individual investment, in accordance with paragraph (f)(2)(iii) of this section, as defined in your board policy. The policy defining the stress tests must specify what actions you will take if your portfolio exceeds the quarter-end, stress-test parameters defined in the board policy, and, at a minimum must include the development of a plan to bring your portfolio back into compliance with those parameters.

(iii) Your pre-purchase and quarter-end stress tests must be defined in a board approved policy and must include defined parameters for the types of securities you purchase. The stress tests must be comprehensive and appropriate for the risk profile of your institution. At a minimum, the stress tests must be able to measure the price sensitivity of investments over different interest rate/yield curve scenarios. The methodology that you use to analyze investment securities must be appropriate for the complexity, structure, and cash flows of the investments in your portfolio. The stress tests must enable you to determine at the time of purchase and each subsequent quarter that your investment securities, either individually or on a portfolio-wide basis, do not expose your capital, earnings, or liquidity to excessive risks. Your stress tests must enable you to evaluate the overall risk in the investment portfolio compared to your defined board policy limits. You must rely to the maximum extent practicable on verifiable information to support all your assumptions, including prepayment and interest rate volatility assumptions, when you apply your stress tests. You must document the basis for all assumptions that you use to evaluate the security and its underlying collateral. You must also document all subsequent changes in your assumptions.

(3) *Ongoing value determination.* At least monthly, you must determine the fair market value of each investment in your portfolio and the fair market value of your whole investment portfolio. In doing so you must also evaluate the credit quality and price sensitivity to the change in market interest rates of each investment in your portfolio and your whole investment portfolio.

(4) *Presale value verification.* Before you sell an investment, you must verify its value with a source that is

independent of the broker, dealer, counterparty, or other intermediary to the transaction.

(g) *Reports to the board of directors.*

(1) *Quarterly.* At least quarterly, your management must report on the following to your board of directors or a designated board committee:

(i) Plans and strategies for achieving the board's objectives for the investment portfolio;

(ii) Whether the investment portfolio effectively achieves the board's objectives;

(iii) The current composition, quality, and liquidity profile of the investment portfolio;

(iv) The performance of each class of investments and the entire investment portfolio, including all gains and losses that you incurred during the quarter on individual investments that you sold before maturity and why they were liquidated;

(v) Potential risk exposure to changes in market interest rates as identified through quarterly stress testing and any other factors that may affect the value of your investment holdings;

(vi) How investments affect your capital, earnings, and overall financial condition;

(vii) Any deviations from the board's policies (must be specifically identified); and

(viii) The results of your quarterly stress test.

(2) *Special.* You must provide immediate notification to your board of directors or to a designated board committee if your portfolio exceeds the quarterly stress test parameters defined in the board policy required by paragraph (f)(2)(ii) of this section.

5. Revise §§ 615.5135, 615.5136 and 615.5140 to read as follows:

§ 615.5135 Management of interest rate risk.

(a) The board of directors of each Farm Credit Bank, bank for cooperatives, and agricultural credit bank must develop and implement an

interest rate risk management program as set forth in subpart G of this part.

(b) The board of directors of each Farm Credit Bank, bank for cooperatives, and agricultural credit bank must adopt an interest rate risk management section of an asset/liability management policy that establishes interest rate risk exposure limits as well as the criteria to determine compliance with these limits. At a minimum, the interest rate risk management section must establish policies and procedures for the bank to:

(1) Address the purpose and objectives of interest rate risk management;

(2) Identify and analyze the causes of risks within its existing balance sheet structure;

(3) Measure the potential impact of these risks on projected earnings and market values by conducting interest rate shock tests and simulations of multiple economic scenarios at least on a quarterly basis and by considering the impact of investments on interest rate risk based on the results of the stress testing required under § 615.5133(f)(2);

(4) Describe, explore, and implement actions needed to obtain its desired risk management objectives;

(5) Document the objectives that the bank is attempting to achieve by purchasing eligible investments that are authorized by § 615.5140 of this subpart;

(6) Evaluate and document, at least quarterly, whether these investments have actually met the objectives stated under paragraph (b)(5) of this section;

(7) Identify exception parameters and approvals needed for any exceptions to the requirements of the board's policies;

(8) Describe delegations of authority;

(9) Describe reporting requirements, including exceptions to limits contained in the board's policies;

(10) Consider the nature and purpose of derivative contracts and establish counterparty risk thresholds and limits for derivatives used to manage interest rate risk.

(c) At least quarterly, management of each Farm Credit Bank, bank for

cooperatives, or agricultural credit bank must report to its board of directors, or a designated committee of the board, describing the nature and level of interest rate risk exposure. Any deviations from the board's policy on interest rate risk must be specifically identified in the report and approved by the board.

§ 615.5136 Emergencies impeding normal access of Farm Credit banks to capital markets.

An emergency shall be deemed to exist whenever a financial, economic, agricultural or national defense crisis could impede the normal access of Farm Credit banks to the capital markets. Whenever the Farm Credit Administration determines, after consultation with the Federal Farm Credit Banks Funding Corporation to the extent practicable, that such an emergency exists, the Farm Credit Administration Board may, in its sole discretion, adopt a resolution that:

(a) Modifies the amount, qualities, and types of eligible investments that Farm Credit Banks, banks for cooperatives and agricultural credit banks are authorized to hold pursuant to § 615.5132 of this subpart;

(b) Modifies or waives the liquidity reserve requirement in § 615.5134 of this subpart; and/or

(c) Authorizes other actions as deemed appropriate.

§ 615.5140 Eligible investments.

(a) You may purchase only the investments that satisfy the eligibility criteria in this section. An investment that does not satisfy the eligibility criteria at the time of purchase is not eligible for purchase and is subject to the requirements of § 615.5143(a) if purchased. An investment that satisfies the eligibility criteria at the time of purchase but subsequently fails to satisfy the eligibility criteria is subject to the requirements of § 615.5143(b).

BILLING CODE 6705-01-P

Investment Eligibility Criteria Table

Asset Class	Final Maturity Limit	NRSRO Credit Rating	Other Requirements	Investment Portfolio Limit
(1) Obligations of the United States Obligations (except mortgage securities) fully insured or guaranteed by a Government agency	None	NA	None	None
(2) Obligations of Government-sponsored agencies Government-sponsored agency securities (except mortgage securities) Other obligations (except mortgage securities) fully insured or fully guaranteed by Government-sponsored agencies	None	NA	Senior debt securities only	None
(3) Municipal Securities				
• General obligations	10 years	One of the highest two	None	15 percent
• Revenue bonds	5 years	Highest	At the time of purchase, you must document that the issue is actively traded in an established secondary market	15 percent
(4) International and Multilateral Development Bank Obligations	10 years	None	The United States must be a voting shareholder	15 percent
(5) Money Market Instruments				
• Federal funds	1 day or continuously callable up to 100 days	One of the two highest short-term	None	None
• Negotiable certificates of deposit	1 year		None	None
• Bankers acceptances	None		Issued by a depository institution	None
• Commercial paper	270 days	Highest short-term		None

• Non-callable Term Federal funds and Eurodollar time deposits	100 days		None	20 percent
• Master notes	270 days			20 percent
• Repurchase agreements collateralized by eligible investments or marketable securities rated in the highest credit rating category by an NRSRO	100 days	NA		None
(6) Mortgage Securities				
• Fully insured or guaranteed by a Government agency	None	NA		None
• Fannie Mae or Freddie Mac mortgage securities	None	NA		50 percent
• Securities that are not fully insured or fully guaranteed by a Government agency, Fannie Mae, or Freddie Mac and that comply with 15 U.S.C. 77d(5) or 15 U.S.C. 78c(a)(41)	None	Highest	Senior-most position only	10 percent
(7) Asset-Backed Securities secured by: Credit card receivables Automobile loans Home equity loans Wholesale automobile dealer loans Student loans Equipment loans Manufactured housing loans	None	Highest	5-year WAL for fixed rate or floating rate ABS at their contractual interest rate caps 7-year WAL for floating rate ABS that remain below their contractual interest rate cap	15 percent in total and no more than 5 percent of any single collateral type

(8) Corporate Debt Securities	5 years	One of the two highest	Senior debt securities only Cannot be convertible to equity securities	20 percent in total, and no more than 10 percent in any one of the 10 industry sectors as defined by the Global Industry Classification Standard (GICS)
(9) Diversified Investment Funds Shares of an investment company registered under section 8 of the Investment Company Act of 1940	NA	NA	Open-end funds only The portfolio of the investment company must consist solely of eligible investments authorized by §§ 615.5140 and 615.5174. The investment company's risk and return objectives and use of derivatives must be consistent with FCA guidance and your investment policies.	50 percent in total. No more than 10 percent in any single fund; otherwise counts towards limit for each type of investment.

BILLING CODE 6705-01-C

(b) *Denomination.* All investments must be denominated in United States dollars.

(c) *Rating of foreign countries.* Whenever the obligor or issuer of an eligible investment is located outside the United States, the host country must maintain the highest sovereign rating for political and economic stability by an NRSRO.

(d) *Obligor limits.*

(1) *General.* You may not invest more than 15 percent of your total capital in eligible investments issued by any single institution, issuer, or obligor. This obligor limit does not apply to obligations, including mortgage securities, that are issued or guaranteed as to interest and principal by

Government agencies or Government-sponsored agencies.

(2) *Obligor limits for your holdings in an investment company.* You must count securities that you hold through an investment company towards the obligor limit of this section unless the investment company's holdings of the security of any one issuer do not exceed five (5) percent of the investment company's total portfolio.

(e) *Other investments approved by the FCA.* You may purchase and hold other investments that we approve. Your request for our approval must explain the risk characteristics of the investment and your purpose and objectives for making the investment.

§ 615.5141 [Removed]

6. Section 615.5141 is removed.

7. Section 615.5142 is amended by:

a. Adding the designation (a) to the existing paragraph; and

b. Adding a new paragraph (b) to read as follows:

§ 615.5142 Association investments.

(a) * * *

(b) Before an association purchases an eligible investment for the purpose of managing surplus short-term funds, it must ensure that the investment's repricing and maturity characteristics match the characteristics of the surplus short-term funds to be invested.

8. Section 615.5143 is revised to read as follows:

§ 615.5143 Management of ineligible and unsuitable investments.

(a) *Investments ineligible when purchased.* Investments that do not satisfy the eligibility criteria set forth in § 615.5140 at the time of purchase are ineligible. You may not purchase ineligible investments. If you determine that you have purchased an ineligible investment, you must notify us promptly in writing after such determination. You must divest of the investment no later than 60 calendar days after you determine that the investment is ineligible unless we approve, in writing, a plan that authorizes you to divest the investment over a longer period of time. Until you divest of the investment:

(1) It must not be used to fund the liquidity reserve necessary to meet the liquidity reserve requirement in § 615.5134;

(2) It must be included in the § 615.5132 investment portfolio limit; and

(3) It must not be included as collateral under § 615.5050 or net collateral under § 615.5301(c).

(b) *Investments that no longer satisfy eligibility criteria or are unsuitable.* If an investment (that satisfied the eligibility criteria set forth in § 615.5140 when purchased) no longer satisfies the eligibility criteria, or if an investment is not suitable because it does not fit the risk tolerance established in your board policy pursuant to § 615.5133(c), you may continue to hold it, subject to the following requirements:

(1) You must notify FCA promptly in writing upon your determination that the investment no longer satisfies the eligibility criteria contained in § 615.5140 or is not suitable;

(2) You must not use the investment to fund the liquidity reserve necessary to meet the liquidity reserve requirement in § 615.5134;

(3) You must include the investment in the § 615.5132 investment portfolio limit;

(4) You must include the investment as collateral under § 615.5050 and net collateral under § 615.5301(c) at the lower of cost or market value; and

(5) You must develop a plan to reduce the investment's risk to you.

(c) *Board reporting requirements.* You must report to your board at least quarterly on the following:

(1) The status and performance of each investment described in paragraphs (a) and (b) of this section.

(2) The impact that any investments described in paragraphs (a) and (b) of this section may have on your capital, earnings, liquidity, and collateral position; and

(3) The terms and status of any required divestiture plan or risk reduction plan.

(d) *Reservation of authority.* FCA retains the authority to require you to divest of any investment at any time for safety and soundness reasons. The timeframe set by FCA will consider the expected loss on the transaction (or transactions) and the impact on your financial condition and performance.

Subpart F—Property, Transfers of Capital, and Other Investments

9. Section 615.5174 is amended by:

- a. Removing the reference “§ 615.5131(f)” and adding in its place, the reference “§ 615.5131” in paragraph (a); and
- b. Revising paragraph (d); and
- c. Adding a new paragraph (e) to read as follows:

§ 615.5174 Farmer Mac securities.

* * * * *

(d) *Stress Test.* You must perform stress tests, in accordance with § 615.5133(f)(2), on mortgage securities, issued or guaranteed by Farmer Mac, that are backed by loans that you did not originate.

(e) *You.* Means a Farm Credit bank, association, or service corporation.

Dated: August 12, 2011.

Dale L. Aultman,

Secretary, Farm Credit Administration Board.

BILLING CODE 6705–01–P

FEDERAL TRADE COMMISSION**16 CFR Part 424****Retail Food Store Advertising and Marketing Practices Rule**

AGENCY: Federal Trade Commission (“FTC” or “Commission”).

ACTION: Advance notice of proposed rulemaking; request for public comment.

SUMMARY: As part of the Commission’s systematic review of all current FTC rules and guides, the Commission requests public comment on the overall costs, benefits, necessity, and regulatory and economic impact of the FTC’s rule for “Retail Food Store Advertising and Marketing Practices” (“Unavailability Rule” or “Rule”).

DATES: Comments must be received on or before October 19, 2011.

ADDRESSES: Interested parties may file a comment online or on paper, by following the instructions in the Request for Comment part of the

SUPPLEMENTARY INFORMATION section below. Write “16 CFR Part 424—Retail Food Store Advertising Rule, Project No. P104203” on your comment, and file your comment online at <https://ftcpublic.commentworks.com/ftc/unavailabilityruleanpr>, by following the instructions on the web-based form. If you prefer to file your comment on paper, mail or deliver your comment to the following address: Federal Trade Commission, Office of the Secretary, Room H–113 (Annex N), 600 Pennsylvania Avenue, NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: Jock Chung, (202) 326–2984, Attorney, Division of Enforcement, Bureau of Consumer Protection, Federal Trade Commission, 600 Pennsylvania Avenue, NW., Washington, DC 20580.

SUPPLEMENTARY INFORMATION:**I. Background**

The Unavailability Rule states that it is an unfair or deceptive act or practice for “retail food stores” to advertise “food, grocery products or other merchandise” at a stated price if those stores do not have the advertised products in stock and readily available to consumers during the effective period of the advertisement. The original Rule, promulgated in 1971,¹ permitted food retailers to defend against a charge of failure to have items available by maintaining records showing that the advertised items were timely ordered and delivered in quantities sufficient to meet reasonably anticipated demand.²

In 1989, after a comment period and public hearings, the Commission concluded that the costs of complying with the original Rule exceeded the benefits to consumers and amended the Rule.³ The Rule now provides that even if stores do not have the advertised products in stock and readily available during the effective period of their advertisement, they comply with the Rule if “the advertisement clearly and adequately discloses that supplies of the advertised products are limited or the advertised products are available only at some outlets.”⁴ In addition, the amendment provides that it would not be a rule violation if: (1) The store ordered the advertised products in adequate time for delivery in quantities

¹ *Federal Trade Commission: Retail Food Store Advertising and Marketing Practices: Statement of Basis and Purpose: The Rule*, 36 FR 8777 (May 13, 1971). The Rule became effective on July 12, 1971.

² *Id.* at 8781.

³ *Federal Trade Commission: Amendment to Trade Regulation Rule Concerning Retail Food Store Advertising and Marketing Practices*, 54 FR 35456 (Aug. 28, 1989).

⁴ *Id.* at 35467.

sufficient to meet reasonably anticipated demand; (2) the store offers a “raincheck” for the advertised products; (3) the store offers a comparable product at the advertised price or at a comparable price reduction; or (4) the store offers other compensation at least equal to the advertised value.⁵ The Commission stated that the amended Rule “will not significantly reduce consumer protection because injury caused by such instances of unexpected unavailability * * * will be substantially mitigated by the amended Rule’s requirement that consumers be offered rainchecks or comparable substitute items.”⁶

II. Regulatory Review Program

The Commission reviews its rules and guides periodically. These reviews seek information about the costs and benefits of the rules and guides as well as their regulatory and economic impact. These reviews assist the Commission in identifying rules and guides that warrant modification or rescission. Therefore, the Commission now solicits comments on, among other things, the economic impact of, and the continuing need for, the Unavailability Rule; the benefits of the Rule to consumers purchasing products at retail food stores; and the burdens the Rule places on firms subject to its requirements.

III. Request for Comments

The Commission solicits comments on the following specific questions related to the Unavailability Rule:

(1) Is there a continuing need for the Rule? Why or why not?

(2) What benefits has the Rule provided to consumers, or what significant costs has the Rule imposed on consumers? Provide any evidence that supports your position.

(3) What modifications, if any, should the Commission make to the Rule to increase its benefits or reduce its costs to consumers?

(a) Provide any evidence that supports your proposed modifications.

(b) How would these modifications affect the costs and benefits of the Rule for consumers?

(c) How would these modifications affect the costs and benefits of the Rule

for businesses, particularly small businesses?

(4) What impact has the Rule had on the flow of truthful information to consumers and on the flow of deceptive information to consumers? Provide any evidence that supports your position.

(5) What benefits, if any, has the Rule provided to businesses, or what significant costs, including costs of compliance, has the Rule imposed on businesses, particularly small businesses? Provide any evidence that supports your position.

(6) What modifications, if any, should be made to the Rule to increase its benefits or reduce its costs to businesses, particularly small businesses?

(a) Provide any evidence that supports your proposed modifications.

(b) How would these modifications affect the costs and benefits of the Rule for consumers?

(c) How would these modifications affect the costs and benefits of the Rule for businesses, particularly small businesses?

(7) Provide any evidence concerning the degree of industry compliance with the Rule. Does this evidence indicate that the Rule should be modified? If so, why, and how? If not, why not?

(8) Provide any evidence concerning whether any of the Rule’s provisions are no longer necessary. Explain why these provisions are unnecessary.

(9) What potentially unfair or deceptive practices, not covered by the Rule, concerning price advertising of products by retail food stores are occurring in the marketplace?

(a) Provide any evidence, such as empirical data, consumer perception studies, or consumer complaints, that demonstrates the extent of such practices.

(b) Provide any evidence that demonstrates whether such practices cause consumer injury.

(c) With reference to such practices, should the Rule be modified? If so, why, and how? If not, why not?

(10) Should the Commission broaden the Rule to include stores not currently covered, such as drugstores, department stores, electronics retailers, etc.? Provide any evidence that supports your position.

(11) What modifications, if any, should be made to the Rule to account for current or impending changes in technology or economic conditions?

(a) Provide any evidence that supports your position.

(b) How would these modifications affect the costs and benefits of the Rule for consumers and businesses, particularly small businesses?

(12) Does the Rule overlap or conflict with other federal, state, or local laws or regulations? If so, how?

(a) Provide any evidence that supports your position.

(b) With reference to the asserted conflicts, should the Rule be modified? If so, why, and how? If not, why not?

(c) Provide any evidence concerning whether the Rule has assisted in promoting national consistency with respect to the advertising by retail food stores of products for sale at a stated price.

You can file a comment online or on paper. For the Commission to consider your comment, we must receive it on or before October 19, 2011. Write “16 CFR Part 424—Retail Food Store Advertising Rule, Project No. P104203” on your comment. Your comment—including your name and your state—will be placed on the public record of this proceeding, including, to the extent practicable, on the public Commission Web site, at <http://www.ftc.gov/os/publiccomments.shtml>. As a matter of discretion, the Commission tries to remove individuals’ home contact information from comments before placing them on the Commission Web site.

Because your comment will be made public, you are solely responsible for making sure that your comment doesn’t include any sensitive personal information, such as anyone’s Social Security number, date of birth, driver’s license number or other state identification number or foreign country equivalent, passport number, financial account number, or credit or debit card number. You are also solely responsible for making sure that your comment doesn’t include any sensitive health information, like medical records or other individually identifiable health information. In addition, don’t include any “[t]rade secret or any commercial or financial information which is obtained from any person and which is privileged or confidential,” as provided in Section 6(f) of the FTC Act, 15 U.S.C. 46(f), and FTC Rule 4.10(a)(2), 16 CFR 4.10(a)(2). In particular, don’t include competitively sensitive information such as costs, sales statistics, inventories, formulas, patterns, devices, manufacturing processes, or customer names.

If you want the Commission to give your comment confidential treatment, you must file it in paper form, with a request for confidential treatment, and you have to follow the procedure explained in FTC Rule 4.9(c), 16 CFR

⁵ *Id.* at 35467–35468.

⁶ *Id.* at 35457. Although the majority of the Commission voted to amend the Rule, Commissioner Calvani dissented, stating that “existing market forces adequately police unavailability, and * * * therefore, no Federal Trade Commission rule is necessary, amended or otherwise.” *Id.* at 35468. Conversely, Commissioner Strenio dissented, stating that there was “insufficient evidence * * * to conclude that these changes will result in net consumer benefits;” thus, he could not support these amendments. *Id.*

4.9(c).⁷ Your comment will be kept confidential only if the FTC General Counsel, in his or her sole discretion, grants your request in accordance with the law and the public interest.

Postal mail addressed to the Commission is subject to delay due to heightened security screening. As a result, we encourage you to submit your comments online. To make sure that the Commission considers your online comment, you must file it at <https://ftcpublic.commentworks.com/ftc/unavailabilityruleanpr>, by following the instructions on the Web-based form. If this Notice appears at <http://www.regulations.gov/#!home>, you also may file a comment through that Web site.

If you file your comment on paper, write "16 CFR Part 424—Retail Food Store Advertising Rule, Project No. P104203" on your comment and on the envelope, and mail or deliver it to the following address: Federal Trade Commission, Office of the Secretary, Room H-113 (Annex N), 600 Pennsylvania Avenue, NW., Washington, DC 20580. If possible, submit your paper comment to the Commission by courier or overnight service.

Visit the Commission Web site at <http://www.ftc.gov> to read this Notice and the news release describing it. The FTC Act and other laws that the Commission administers permit the collection of public comments to consider and use in this proceeding as appropriate. The Commission will consider all timely and responsive public comments that it receives on or before October 19, 2011. You can find more information, including routine uses permitted by the Privacy Act, in the Commission's privacy policy, at <http://www.ftc.gov/ftc/privacy.htm>.

⁷In particular, the written request for confidential treatment that accompanies the comment must include the factual and legal basis for the request, and must identify the specific portions of the comment to be withheld from the public record. See FTC Rule 4.9(c), 16 CFR 4.9(c).

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 51

[REG–112805–10]

RIN 1545–BJ39

Branded Prescription Drug Fee

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking by cross-reference to temporary regulations.

SUMMARY: In the Rules and Regulations section of this issue of the **Federal Register**, the IRS is issuing temporary regulations relating to the branded prescription drug fee imposed by the Affordable Care Act (ACA). The regulations affect persons engaged in the business of manufacturing or importing certain branded prescription drugs. The text of the temporary regulations also serves as the text of the proposed regulations.

DATES: Written and electronic comments and requests for a public hearing must be received by November 16, 2011.

ADDRESSES: Send submissions to: CC:PA:LPD:PR (REG–112805–10), room 5205, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand-delivered Monday through Friday between the hours of 8 a.m. and 4 p.m. to: CC:PA:LPD:PR (REG–112805–10), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC, or sent electronically via the Federal eRulemaking Portal at <http://www.regulations.gov> (IRS REG–112805–10).

FOR FURTHER INFORMATION CONTACT: Concerning the proposed regulations, Celia Gabrysh at (202) 622–3130; concerning submissions of comments and requests for a hearing *Richard.A.Hurst@irs.counsel.treas.gov*, (202) 622–7180 (not toll free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) and assigned control number 1545–2209.

Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk

Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, *Attn:* IRS Reports Clearance Officer, SE:W:CAR:MP:T:T:SP, Washington, DC 20224. Comments on the collection of information should be received by October 17, 2011. Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the Internal Revenue Service, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information;

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up costs of operation, maintenance, and purchase of service to provide information.

The collection of information in this proposed regulation is in § 51.7. This information is necessary to evaluate whether an error report regarding a preliminary fee calculation is valid and justifies an adjustment to the preliminary fee calculation. The likely respondents are manufacturers and importers of branded prescription drugs.

Estimated total annual reporting and/or recordkeeping burden: 1800 hours.

Estimated annual burden per respondent/recordkeeper: 40 hours.

Estimated number of respondents and/or recordkeepers: 45.

Estimated frequency of responses: Annually.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

Temporary regulations in the Rules and Regulations section of this issue of the **Federal Register** add a new part, part 51, to subchapter D, Miscellaneous

Excise Taxes. Part 51 provides guidance on the annual fee imposed on covered entities engaged in the business of manufacturing or importing branded prescription drugs by section 9008 of the ACA. The text of those regulations also serves as the text of these proposed regulations. The preamble to the temporary regulations explains the new part.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in Executive Order 12866, as supplemented by Executive Order 13563. Therefore, a regulatory flexibility assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations. It is hereby certified that the collection of information in these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that these regulations primarily affect large corporations. Thus, Treasury Department and the IRS do not expect a substantial number of small entities to be effected. Therefore, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required. Pursuant to section 7805(f) of the Internal Revenue Code, this notice of proposed rulemaking has been submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (a signed original and eight (8) copies) or electronic comments that are submitted timely to the IRS. Comments are requested on all aspects of the proposed regulations. In addition, the IRS and the Treasury Department specifically request comments on the clarity of the proposed regulations and how they may be made easier to understand. All comments will be available for public inspection and copying. A public hearing may be scheduled if requested in writing by any person that timely submits written comments. If a public hearing is scheduled, notice of the date, time, and place for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these regulations is Celia Gabrysh, Office of Associate Chief Counsel (Passthroughs and Special Industries). However, other personnel from the IRS and the Treasury Department participated in their development.

POSTAL REGULATORY COMMISSION

39 CFR Part 3020

[Docket No. RM2011-8; Order No. 666]

Administrative Practice and Procedure, Postal Service

AGENCY: Postal Regulatory Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: A Federal statute directs the Commission to implement a modern classification system. This proposal responds to that directive by presenting a comprehensive Mail Classification Schedule. Issuance of this document will allow the Commission to consider comments and, if appropriate, to make revisions prior to adoption of a final schedule.

DATES: *Comments are due:* September 6, 2011.

ADDRESSES: Submit comments electronically by accessing the "Filing Online" link in the banner at the top of the Commission's Web site (<http://www.prc.gov>) or by directly accessing

the Commission's Filing Online system at <https://www.prc.gov/prc-pages/filing-online/login.aspx>. Commenters who cannot submit their views electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section as the source for case-related information for advice on alternatives to electronic filing.

FOR FURTHER INFORMATION CONTACT:

Stephen L. Sharfman, General Counsel, at 202-789-6820 (case-related information) or DocketAdmins@prc.gov (electronic filing assistance).

SUPPLEMENTARY HISTORY: *Regulatory History:*

I. Introduction

The Postal Regulatory Commission (Commission) establishes a rulemaking docket pursuant to its responsibilities under the Postal Accountability and Enhancement Act (PAEA), Public Law 109-435, 120 Stat. 3198, December 20, 2006, to consider modifications to the Commission's rules governing the Mail Classification Schedule (MCS). Modifications are proposed to add material describing some Postal Service products and make conforming changes. The Commission provides this notice and opportunity for comment on whether the Commission should incorporate the proposed modifications by final rule into the Commission's rules at 39 CFR 3020, Subpart A—Mail Classification Schedule.

For products currently being offered by the Postal Service, this rulemaking does not add products to, remove products from, or transfer products between the existing market dominant or competitive product lists. However, this rulemaking does reorganize how products appear within each individual list. This reorganization is most apparent within the competitive product list where, at the suggestion of the Postal Service, the vestiges of "class" groupings have been replaced with functional product groupings.

Additionally, the currently published product lists require updating to remove

products no longer offered (certain negotiated service agreements) and otherwise to correct for inaccuracies as a better understanding of how the Postal Service's product structure has developed under the PAEA. This task is incorporated into the rulemaking.

The Commission has consulted with the Postal Service as the proposed MCS was developed and has found the Postal Service's input invaluable in concisely and accurately describing all product offerings.

II. Background

On August 15, 2007, the Commission initiated the process of developing an MCS with a request to the Postal Service to develop language describing individual products.¹ The Postal Service was requested to draw from existing material provided in the Domestic Mail Classification Schedule (DMCS) and the International Mail Manual to develop a model MCS at a comparable level of detail as provided in the DMCS. The Postal Service complied with this request and provided a MCS proposal on September 24, 2007.²

An initial MCS was published on October 29, 2007.³ This publication met the requirements of publishing market dominant and competitive product lists necessary for operation of the regulatory system. However, the initial MCS did not include descriptions of individual products.

The publication of the initial product lists, which for the first time included international products and a division of products into market dominant and competitive categories, generated a need for additional descriptive material to more accurately describe the then-current state of the product lists. The Commission again asked the Postal Service to provide additional proposals for MCS language. Order No. 26 at 4002-4. The additional material focused on treatment of negotiated service agreements, certain international products, and the final categorization of products as either market dominant or competitive. The Postal Service complied with this request and provided additional proposals on November 20, 2007.⁴

In the interim, the Commission developed a "draft" MCS which included material describing each product. As various market dominant product price adjustments, competitive product price adjustments, and classification changes have been reviewed and approved by the Commission, the Commission has kept this draft version of the MCS up to date. Price and classification changes have been incorporated into the proposed MCS as of December 31, 2010. The Commission intends to incorporate any subsequently approved rate or classification changes that occur prior to issuing the final rule in this docket into the final rule in this docket. This proceeding shall consider formal incorporation of all draft material describing each market dominant and competitive product into the official MCS, and conforming language to the Commission's rules governing the MCS.

III. Accessibility of the Mail Classification Schedule

The Commission intends to make two versions of the MCS available. The first version will be posted to the Commission's Web site in a format that will allow interested persons the ability to search and copy sections of the MCS for use in Commission proceedings. The Postal Service, and others, may find this version most convenient for communicating proposals to the Commission. The second version will appear in the Code of Federal Regulations (CFR). The organization and appearance of the MCS in the CFR will be different to meet CFR publication requirements. However, there should be no difference in substantive material between the Web site and the CFR versions.⁵

The electronic documentation appearing on the Commission's Web site with this order will contain both versions of the MCS. The Commission would find it helpful if comments addressing the contents of the MCS refer to the version of the MCS that will appear on the Commission's Web site.

IV. Mail Classification Schedule Structure

The revised MCS, as proposed, consists of preface material followed by four substantive sections. The preface material includes a Revision History, which is intended to comply with the 39 U.S.C. 3642(d)(2) requirement to "indicate how and when" product lists

Classification Schedule Information in Response to Order No. 43, November 20, 2007.

⁵ If any substantive discrepancies inadvertently appear, the CFR version will govern, until such time as both versions again can be made consistent.

are modified, Trademark Notices, and a Table of Contents. The four substantive sections that follow are titled Part A—Market Dominant Products, Part B—Competitive Products, Part C—Glossary of Terms and Conditions, and Part D—Country Price Lists for International Mail.

Part A—Market Dominant Products, is divided into two major sections: the Market Dominant Product List, and the Market Dominant Product Descriptions. Both sections retain the "class" structure for categorizing products developed under the Postal Reorganization Act with the classes including: First-Class Mail, Standard Mail (Commercial and Nonprofit), Periodicals, Package Services, and Special Services.⁶ Three new separate categories are added to this part to contain market dominant Negotiated Service Agreements, market dominant Nonpostal Services, and market dominant Market Tests. International products, which did not appear in the former DMCS, now are included within the appropriate associated class.

Each class subsection in Part A follows a similar structure. The individual class subsections first provide a description of class-wide characteristics and a list of all products in the class. This is followed by information about each product in the class. The individual product descriptions generally include the following topics in the following order: (1) Product description (where necessary); (2) size and weight limitations; (3) minimum volume requirements; (4) price categories; (5) optional features; and (6) prices. The Special Services subsection requires less detail and generally includes the following topics in the following order: (1) Product description; and (2) prices.

Part B—Competitive Products also is divided into two major sections: the Competitive Product List, and the Competitive Product Descriptions. As originally published in Order No. 43, the competitive product list retained a class-like structure for organizing competitive products. In informal discussions, the Postal Service appropriately pointed out that a class-like structure has lost much of its meaning for competitive products under the PAEA. The Postal Service proposed that the products in the competitive product list be reorganized into three subsections: Domestic Products, International Products, and Negotiated Service Agreements. The proposed organization better aligns competitive

⁶ Special Services is treated as a class for MCS purposes.

¹ Docket No. RM2007-1. Order Proposing Regulations to Establish a System of Ratemaking, August 15, 2007, at paras. 4008-9 (Order No. 26).

² Docket No. RM2007-1. United States Postal Service Submission of Initial Mail Classification Schedule in response to Order No. 26, September 24, 2007.

³ Docket No. RM2007-1. Order Establishing Regulations to Establish a System of Ratemaking and Competitive Products, October 29, 2007 (Order No. 45); see also 72 FR 63662 (November 9, 2007).

⁴ Docket No. RM2007-1. United States Postal Service Submission of Additional Mail

products with the separate domestic and international business functions of the Postal Service. It also allows all products that are not of general applicability to be grouped within a Negotiated Service Agreement section. This concept is reflected in the proposed MCS. Note that the Negotiated Service Agreement subsection is further subdivided into Domestic, Outbound International, and Inbound International. Two additional separate subsections are added to this part, one for competitive Special Services, and one for competitive Nonpostal Services.

Part B has a similar structure to Part A, except that class separations are not made in competitive products. Thus, there is no need for class descriptions. Each subsection contains a list of all products appearing within that heading. Descriptions applicable to several related products are provided where appropriate. This is followed by information about each product in the subsection. The product descriptions generally include the following topics in the following order: (1) Product description (where necessary); (2) size and weight limitations; (3) minimum volume requirements; (4) price categories; (5) optional features; and (6) prices. The competitive Special Services subsection requires less detail and generally includes the following topics in the following order: (1) Product description; and (2) prices. Note that many of the Negotiated Service Agreement products merely reference the product name, associated dockets, PRC order numbers, and termination dates due to the confidential nature of these agreements.

Part C—Glossary of Terms and Conditions is self explanatory. Part D—Country Price Lists for International Mail contains the country codes used to identify individual countries in the various international product price lists appearing in Parts A and B.

V. Rule Modifications

The Commission's rules concerning the MCS currently are codified at 39 CFR 3020, Subpart A—Mail Classification Schedule. The existing MCS itself is codified at Appendix A to Subpart A—Mail Classification Schedule of 39 CFR 3020.

This rulemaking proposes changes to the rules governing the MCS and replaces the existing Appendix A with four more administratively manageable appendices. The intent of the rule changes are to incorporate the market dominant product list and the competitive product list into the Commission's rules so that the lists are prominently available for examination,

and to incorporate the majority of the material describing individual products into four appendices.

Rule 3020.2 General (old rule 3020.10) is revised to describe the proposed new format of the MCS.

Rule 3020.11 Initial Mail Classification Schedule is being deleted. It only was applicable to the initial MCS that is now being replaced.

Rule 3020.3 Publication of the Mail Classification Schedule (old rule 3020.12), paragraph (a), is revised to indicate that the MCS is being incorporated into the rules themselves, *i.e.*, the MCS no longer will be contained solely in Appendix A. Paragraph (b) is modified to indicate that the Commission only will be making the most recent version of the MCS available to the public. With almost weekly revisions to the MCS, it would be administratively burdensome, and confusing to the public, to make multiple, mainly outdated, versions readily available. In any event, all changes will be published in the **Federal Register** for interested persons to reference if the need arises to reconstruct earlier versions.

Rule 3020.4 Notice of change (old rule 3020.14) is revised to indicate that any changes to the material describing products will cause notice to be published in the **Federal Register**.

Rule 3020.5 Contents of the Mail Classification Schedule (old rule 3020.13) will contain the MCS. The same information contained within the MCS version proposed to appear on the Commission's Web site will be divided among paragraphs (b) through (h) of this rule.

Paragraph (b) will provide a revision history as required by 39 U.S.C. 3642(d)(2).

Paragraph (c) will provide trademark notices.

Paragraph (d) will provide a table of contents by section numbers. The section numbers will correspond to the section numbers appearing in the Appendices.

Paragraph (e) will provide information concerning market dominant products. This paragraph is divided into (e)(1), which contains the list of market dominant products, and (e)(2), which specifies the market dominant product descriptive information that is to be provided and references Appendix A where that information is provided.

Paragraph (f) will provide information concerning competitive products. This paragraph is divided into (f)(1), which contains the list of competitive products, and (f)(2), which specifies the competitive product descriptive

information that is to be provided and references Appendix B where that information is provided.

Paragraph (g) references Appendix C, which provides a glossary of terms of conditions.

Paragraph (h) references Appendix D, which provides the country price lists for international mail.

The four appendices will contain the majority of the descriptive material. Appendix A will contain the description of market dominant products. This corresponds to Part A, Section 1001, Market Dominant Product Descriptions provided in the proposed Web version of the MCS. Appendix B will contain the description of competitive products. This corresponds to Part B, Section 2001, Competitive Product Descriptions provided in the proposed Web version of the MCS. Appendix C will contain a glossary of terms and conditions. This corresponds to Part C, Section 3000, Glossary of Terms and Conditions provided in the proposed Web version of the MCS. Appendix D, Section 4000, will contain the country price lists for international mail. This corresponds to Part D, Country Price Lists for International Mail provided in the proposed Web version of the MCS.

VI. Public Representative

Pursuant to 39 U.S.C. 505, Kenneth E. Richardson is appointed to serve as officer of the Commission (Public Representative) to represent the interests of the general public in this docket.

VII. Public Comments

Comments concerning the proposed modifications to the MCS by interested persons are due September 6, 2011.⁷ Interested persons previously filing comments in response to this Notice appearing on the Commission's Web site with an earlier due date may file supplemental comments, if necessary. All comments previously filed in this docket shall be considered and need not be re-filed.

VIII. Directions for Federal Register Publication and Access to Unpublished Material

An abbreviated version of this notice shall be published in the **Federal Register**. This version shall include the material appearing up to the signature of this notice. This material includes among other items "a description of the subjects and issues involved" with the

⁷ All references to August 5, 2011 in Order No. 666 issued February 7, 2011 will be replaced with September 6, 2011.

proposed rule as required by 5 U.S.C. 553(b)(3).

The abbreviated version shall also include pages 1 through 13 of the material titled "Mail Classification Schedule" appearing after the signature in Order No. 666 issued on February 7, 2011. This material describes the textual changes proposed to existing 39 CFR part 3020, subpart A.

As previously stated in paragraph III of this notice, all material, including the proposed four new appendices, appears on the Commission's Web site. For interested persons without access to the Internet, a copy of all material is available for inspection at the Postal Regulatory Commission, 901 New York Avenue, NW., Suite 200, Washington, DC 20268-0001. Reasonable alternative access also may be arranged by contacting the Commission's docket section at 202-789-6846.

It is ordered:

1. Docket No. RM2011-8 is established for the purpose of receiving comments on the Commission's proposal.

2. The Commission proposes to amend its rules of practice and procedure. The proposed amendments involve amending 39 CFR part 3020 Subpart A—Mail Classification Schedule.

3. Kenneth E. Richardson is designated as an officer of the Commission representing the interests of the general public in this docket.

4. Interested persons may submit comments by September 6, 2011.

5. The Secretary shall arrange for publication of this notice in the **Federal Register** as directed in the body of this notice.

List of Subjects in 39 CFR Part 3020

Administrative practice and procedure, Postal Service.

By the Commission.

Ruth Ann Abrams,

Acting Secretary.

BILLING CODE 7710-FW-P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA-R03-OAR-2011-0610; FRL-9452-9]

Approval and Promulgation of Air Quality Implementation Plans; Maryland; Adoption of Drum and Pail Coating Standards

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a State Implementation Plan (SIP) revision submitted by the State of Maryland (Maryland). This SIP revision includes amendments to the Code of Maryland (COMAR) 26.11.19.13, Volatile Organic Compounds from Specific Processes, Drum and Pail Coating. Maryland's SIP revision meets the requirement to adopt Reasonably Available Control Technology (RACT) for sources covered by EPA's Control Techniques Guidelines (CTG) for Miscellaneous Metal and Plastic Parts Coatings and will help Maryland attain and maintain the National Ambient Air Quality Standard (NAAQS) for ozone. This action is being taken under the Clean Air Act (CAA).

DATES: Written comments must be received on or before September 19, 2011.

ADDRESSES: Submit your comments, identified by Docket ID Number EPA-R03-OAR-2011-0610 by one of the following methods:

A. <http://www.regulations.gov>. Follow the on-line instructions for submitting comments.

B. *E-mail:* fernandez.cristina@epa.gov.

C. *Mail:* EPA-R03-OAR-2011-0610, Cristina Fernandez, Associate Director, Office of Air Program Planning, Mailcode 3AP30, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103.

D. *Hand Delivery:* At the previously-listed EPA Region III address. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID No. EPA-R03-OAR-2011-0610. EPA's policy is that all comments received will be included in the public docket without change, and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through <http://www.regulations.gov> or e-mail. The <http://www.regulations.gov> Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly

to EPA without going through <http://www.regulations.gov>, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the electronic docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, i.e., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the Internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically in <http://www.regulations.gov> or in hard copy during normal business hours at the Air Protection Division, U.S. Environmental Protection Agency, Region III, 1650 Arch Street, Philadelphia, Pennsylvania 19103. Copies of the State submittal are available at the Maryland Department of the Environment, 1800 Washington Boulevard, Suite 705, Baltimore, Maryland 21230.

FOR FURTHER INFORMATION CONTACT: Irene Shandruk, (215) 814-2166, or by e-mail at shandruk.irene@epa.gov.

SUPPLEMENTARY INFORMATION: On June 22, 2011, the Maryland Department of the Environment (MDE) submitted to EPA a SIP revision concerning the adoption of the drum and pail coating standards found in the Miscellaneous Metal and Plastic Parts Coatings CTG.

I. Background

Section 172(c)(1) of the CAA provides that SIPs for nonattainment areas must include reasonably available control measures (RACM), including RACT for sources of emissions. Section 182(b)(2)(A) provides that for certain nonattainment areas, states must revise their SIPs to include RACT for sources of VOC emissions covered by a CTG document issued after November 15, 1990 and prior to the area's date of attainment.

CTGs are intended to provide state and local air pollution control

authorities information that should assist them in determining RACT for VOCs from various sources, including drum and pail coatings. In developing these CTGs, EPA, among other things, evaluated the sources of VOC emissions from this industry and the available control approaches for addressing these emissions, including the costs of such approaches. Based on available information and data, EPA provided recommendations for RACT for VOCs from drum and pail coatings.

In June 1978, EPA published a CTG for controlling VOC emissions from surface coating of miscellaneous metal and plastic products (EPA-450/2-78-015), which includes drum and pail coatings. This CTG discusses the nature of VOC emissions from this industry, available control technologies for addressing such emissions, the costs of available control options, and other items. EPA promulgated national standards of performance for new stationary sources New Source Performance Standards for miscellaneous metal and plastic products industry and EPA also

published a national emission standard for hazardous air pollutants (NESHAP) for this industry.

In 2008, after conducting a review of currently existing state and local VOC emission reduction approaches for this industry, reviewing the 1978 CTG and the NESHAP for this industry, and taking into account the information that has become available since then, EPA developed a new CTG for miscellaneous metal and plastic parts, entitled *Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings* (Publication No. EPA 453/R-08-003).

The miscellaneous metal product and plastic parts surface coatings categories under section 183(e) of the CAA includes the coatings that are applied to the surfaces of a varied range of metal and plastic parts and products. Such parts or products are constructed either entirely or partially from metal or plastic. The VOC emissions from miscellaneous metal product and plastic parts surface coating processes result from the evaporation of the volatile components of the coatings and

cleaning materials used in these operations.

II. Summary of SIP Revision

On June 22, 2011, MDE submitted to EPA a SIP revision (#11-04) concerning the adoption of the emission limits for drum and pail coatings, part of the EPA miscellaneous metal and plastic parts coatings CTG. EPA develops CTGs as guidance on control requirements for source categories. States can follow the CTGs or adopt more restrictive standards. Maryland has adopted EPA's CTG standards for drum and pail coating processes. These regulations are in COMAR 26.11.19, Volatile Organic Compounds from Specific Processes. Specifically, this revision amends the existing regulation in Section 26.11.19.13 to include emission limits for drum and pail coatings (Table 1). A detailed summary of EPA's review of and rationale for proposing to approve this SIP revision may be found in the Technical Support Document (TSD) for this action which is available on line at <http://www.regulations.gov>, Docket number EPA-R03-OAR-2011-0610.

TABLE 1—DRUM AND PAIL COATING STANDARDS

Coating types	Pounds VOC/ gallon coating (minus water)	Kilogram VOC/ liter coating (minus water)
New, Exterior	2.8	0.34
New, Interior	3.5	0.42
Reconditioned, Exterior	3.5	0.42
Reconditioned, Interior	4.2	0.50

III. Proposed Action

EPA is proposing to approve Maryland's SIP revision for adoption of the CTG standards for drum and pail coatings. EPA is soliciting public comments on the issues discussed in this document. These comments will be considered before taking final action.

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely proposes to approve state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this proposed action:

- Is not a "significant regulatory action" subject to review by the Office

of Management and Budget under Executive Order 12866 (58 FR 51735, October 4, 1993);

- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);

- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and

- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, this proposed rule concerning Maryland's adoption of CTG standards for drum and pail coatings does not have tribal implications as specified by Executive Order 13175 (65 FR 67249, November 9, 2000), because the SIP is not approved to apply in Indian country located in the state, and EPA notes that it will not impose substantial direct costs on tribal governments or preempt tribal law.

National Oil and Hazardous Substances Pollution Contingency Plan; National Priorities List: Deletion of the Barceloneta Landfill Superfund Site

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule; notice of intent.

SUMMARY: The Environmental Protection Agency (EPA) Region II is issuing a Notice of Intent to Delete the Barceloneta Landfill Superfund Site (Site) located in Florida Afuera, Puerto Rico from the National Priorities List (NPL) and requests public comments on this proposed action. The NPL, promulgated pursuant to section 105 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) of 1980, as amended, is an appendix of the National Oil and Hazardous Substances Pollution Contingency Plan (NCP). The EPA and the Commonwealth of Puerto Rico, through the Puerto Rico Environmental Quality Board, have determined that all appropriate response actions under CERCLA, other than operation, maintenance, and five-year reviews, have been completed. However, this deletion does not preclude future actions under Superfund.

DATES: Comments must be received by September 19, 2011.

Protection Agency, Region II, Caribbean Protection Division, Centro Europa Building, Suite 417, Ponce de León Ave., Stop 22, San Juan, Puerto Rico 00907-4127.

• *Hand delivery:* U.S. Environmental Protection Agency, Region II, Caribbean Protection Division, Centro Europa Building, Suite 417, Ponce de León Ave., Stop 22, San Juan, Puerto Rico 00907-4127. Such deliveries are only accepted during the Docket's normal hours of operation, and special arrangements should be made for deliveries of boxed information.

Instructions: Direct your comments to Docket ID no. EPA-HQ-SFUND-1983-0002. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through <http://www.regulations.gov> or e-mail. The <http://www.regulations.gov> Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through <http://www.regulations.gov>, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses.

Docket: All documents in the docket are listed in the <http://www.regulations.gov> index. Although listed in the index, some information is not publicly available, e.g., CBI or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, will be publicly available only in the hard copy. Publicly available docket materials are available either electronically in <http://www.regulations.gov> or in hard copy at:

Santos

FOR FURTHER INFORMATION CONTACT: Luis E. Santos, Remedial Project Manager, U.S. Environmental Protection Agency, Region II, telephone at (787) 977-5824; fax at 787-289-7104; or e-mail at santos.luis@epa.gov.

SUPPLEMENTARY INFORMATION:

In the "Rules and Regulations" Section of today's **Federal Register**, we are publishing a direct final Notice of Deletion of Barceloneta Landfill Superfund Site without prior Notice of Intent to Delete because we view this as a noncontroversial revision and anticipate no adverse comment. We have explained our reasons for this deletion in the preamble to the direct final Notice of Deletion, and those reasons are incorporated herein. If we receive no adverse comment(s) on this deletion action, we will not take further action on this Notice of Intent to Delete. If we receive adverse comment(s), we will withdraw the direct final Notice of Deletion, and it will not take effect. We will, as appropriate, address all public comments in a subsequent final Notice of Deletion based on this Notice of Intent to Delete. We will not institute a second comment period on this Notice of Intent to Delete. Any parties interested in commenting must do so at this time.

For additional information, see the direct final Notice of Deletion which is located in the Rules section of this **Federal Register**.

46 CFR Part 28

[Docket No. USCG-2010-0625]

RIN 1625-AB50

Waiver of Citizenship Requirements for Crewmembers on Commercial Fishing Vessels

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to add to its regulations a description of the procedures for requesting and processing waivers of citizenship requirements on commercial fishing vessels. The Coast Guard aims to improve its efforts to inform the commercial fishing industry of this opportunity by publishing the application procedure policy into the Code of Federal Regulations (CFR).

DATES: Comments and related material must either be submitted to our online docket via <http://www.regulations.gov> on or before November 16, 2011 or reach the Docket Management Facility by that date. Comments sent to the Office of Management and Budget (OMB) on the collection of information must reach OMB on or before November 16, 2011.

ADDRESSES: You may submit comments identified by docket number USCG-2010-0625 using any one of the following methods:

(1) *Federal eRulemaking Portal:* <http://www.regulations.gov>.

(2) *Fax:* 202-493-2251.

(3) *Mail:* Docket Management Facility (M-30), U.S. Department of Transportation, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue, SE., Washington, DC 20590-0001.

(4) *Hand delivery:* Same as mail address above, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202-366-9329.

To avoid duplication, please use only one of these four methods. See the "Public Participation and Request for Comments" portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

Collection of Information Comments: If you have comments on the collection of information discussed in section V.D of this NPRM, you must also send comments to the Office of Information and Regulatory Affairs (OIRA), Office of Management and Budget. To ensure that your comments to OIRA are received on time, the preferred methods are by e-mail to oira_submission@omb.eop.gov (include the docket number and "Attention: Desk Officer for Coast Guard, DHS" in the subject line of the e-mail) or fax at 202-395-6566. An alternate, though slower, method is by U.S. mail to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725 17th Street, NW., Washington, DC 20503, ATTN: Desk Officer, U.S. Coast Guard.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, call or e-mail Mr. David Belliveau, Office of Vessel Activities (CG-5433), Coast Guard; telephone 202-372-1247, e-mail David.J.Belliveau@uscg.mil. If you have questions on viewing or submitting material to the docket, call Ms. Renee V. Wright, Program Manager, Docket Operations, telephone 202-366-9826.

I. Public Participation and Request for Comments

We encourage you to participate in this rulemaking by submitting comments and related materials. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided.

A. Submitting Comments

If you submit a comment, please include the docket number for this rulemaking (USCG-2010-0625), indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation. You may submit your comments and material online or by fax, mail, or hand delivery, but please use only one of these means. We recommend that you include your name and a mailing address, an e-mail address, or a phone number in the body of your document so that we can contact you if we have questions regarding your submission.

To submit your comment online, go to <http://www.regulations.gov> and type "USCG-2010-0625" in the "Enter Keyword or ID" box. If you submit your comments by mail or hand delivery, submit them in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing. If you submit comments by mail and would like to know that they reached the Facility, please enclose a stamped, self-addressed postcard or envelope.

We will consider all comments and material received during the comment period and may change this proposed rule based on your comments.

B. Viewing Comments and Documents

To view comments, as well as documents mentioned in this preamble as being available in the docket, go to <http://www.regulations.gov>, click on the "read comments" box, which will then become highlighted in blue. In the "Enter Keyword or ID" box, insert "USCG-2010-0625" and click "Search." Click the "Open Docket Folder" in the "Actions" column. If you do not have access to the Internet, you may view the docket online by visiting the Docket Management Facility in Room W12-140 on the ground floor of the Department of Transportation West Building, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. We have an agreement with the Department of Transportation to use the Docket Management Facility.

C. Privacy Act

Anyone can search the electronic form of comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review a Privacy Act notice regarding our public dockets in the January 17, 2008, issue of the **Federal Register** (73 FR 3316).

D. Public Meeting

We do not now plan to hold a public meeting. But you may submit a request for one to the docket using one of the methods specified under **ADDRESSES**. In your request, explain why you believe a public meeting would be beneficial. If we determine that a public meeting would aid this rulemaking, we will hold one at a time and place announced by a later notice in the **Federal Register**.

 INA Immigration and Nationality Act, as amended (8 U.S.C. 1101 *et seq.*).
 § Section symbol.
 U.S.C. United States Code.

III. Background

Under title 46 United States Code (U.S.C.) 8103(i)(1), each unlicensed seaman on a fishing, fish processing, or fish tender vessel that is engaged in the fisheries in the navigable waters of the United States or the exclusive economic zone must be—

1. A citizen of the United States;
2. An alien lawfully admitted to the United States for permanent residence; or
3. Any other alien allowed to be employed under the Immigration and Nationality Act (8 U.S.C. 1101 *et seq.*) (INA).

Furthermore, 46 U.S.C. 8103(i)(2) states that no more than 25 percent of the unlicensed seamen on these vessels may be non-permanent resident aliens authorized for employment in the United States under the Immigration and Nationality Act (INA), category 3 above.

Relief from these citizenship and permanent resident status requirements is provided in 46 U.S.C. 8103(b)(3)(C). If the Secretary of Homeland Security determines, after an investigation, that qualified seamen who are citizens of the United States are not available, the Secretary may waive these citizenship requirements.

Congress did not specify a procedure for requesting the waiver allowed under section 8103(b)(3). To fill the need for a procedure, the Coast Guard published a policy letter in June 2001 titled “Procedures for Waiver of Requirements for Citizenship Aboard Commercial Fishing Vessels” (2001 policy letter). This policy letter is available at <http://homeport.uscg.mil/mycg/portal/ep/>

[programView.do?channelId=17679&programId=12861](http://www.fishsafe.info/programView.do?channelId=17679&programId=12861). This policy letter explains the steps involved in the request for a waiver process. The Coast Guard intended the letter to be the means of informing the fishing industry of the waiver opportunity and the application procedure.

In past years, the Coast Guard received between 125 and 200 waiver requests annually. In 2008, that volume slowed appreciably.¹ Through experience gained during the ten years since the publication of the policy letter and feedback received from the Commercial Fishing Industry Vessel Safety Advisory Committee, the Coast Guard believes that not all fishing vessel owners, operators, and employers are aware they can request a waiver from citizenship requirements. As a result, these vessels often either sail short-handed, creating potential safety issues, or choose to exceed the 25 percent limit for non-permanent resident aliens authorized for employment in the United States under the INA without an approved waiver. This proposed rule mirrors the requirements that exist in the 2001 policy letter with the exception of the mandatory dockside examination.

Despite the benefits of the waiver option for owners, operators, and employers, the Coast Guard is concerned that the continued practice of granting requests for waivers under this program gives rise to potential safety and emergency preparedness problems on fishing vessels for U.S. citizen and alien crewmembers. It is incumbent on owners, operators, and employers to ensure the vessel is in full compliance with all safety, survival equipment, and systems requirements.

Therefore, in this proposed rule, the Coast Guard proposes to make satisfactory completion of a dockside safety examination under the Coast Guard’s Commercial Fishing Industry Vessel Safety program a condition for receiving a waiver from the citizenship requirements. (For more information on this program, see <http://www.fishsafe.info/>) Section 604 of the Coast Guard Authorization Act of 2010 (Pub. L. 111–281) mandates dockside examinations for commercial fishing vessels operating beyond 3 nautical miles from shore. For vessels operating inside of 3 nautical miles from shore, examinations would remain voluntary. Under these proposed rules, any commercial fishing vessel requesting a waiver would be required to show satisfactory completion of a dockside

¹ In 2008, the Coast Guard received a total of six waiver requests.

safety examination, regardless of its area of operation.

IV. Discussion of Proposed Rule

Through this rulemaking, the Coast Guard would amend 46 CFR part 28, Requirements for Commercial Fishing Industry Vessels, by adding a new subpart to specifically address the citizenship waiver program. This subpart would formally incorporate the 2001 policy letter into the CFR and would also require that any vessel citizenship waiver request and approval be conditioned on the successful completion of a required dockside exam.

In the proposed new subpart, the Coast Guard would explain that owners, operators, and employers must send to the Coast Guard a written citizenship waiver request, which would include the number of alien seamen to be employed who are not lawfully admitted for permanent residence but are otherwise authorized for employment in the United States under the INA, along with certification that the vessel(s) would comply with all other applicable citizenship requirements regarding the Master or other officers in charge of deck or engineering watches on a documented vessel. The owner, operator, or employer would also be required to provide a U.S. Citizenship and Immigration Services (USCIS) or other DHS-issued authorization for employment in the U.S. under the INA for each alien seaman it intends to employ who is not lawfully admitted for permanent residence, as well as information, as discussed below, demonstrating that there are no qualified U.S. seamen available for the position.

If, within 30 days of receipt of a request for a waiver, the Coast Guard does not make a determination, or informs the employer that the Coast Guard needs more time for review, the waiver request would be provisionally approved for 90 days from the end of the original 30 days. If the Coast Guard grants a waiver, the term of the approval would be for the same period as specified by the USCIS or other DHS-issued authorization for employment in the U.S. under the INA.

Additionally, to help ensure the safe condition of the vessel, the Coast Guard would require the employer to submit documentation of a satisfactory dockside safety examination conducted by the Coast Guard.

The written request for a waiver must contain the following:

1. *Vessel owner, operator, or employer’s contact information.* This information is required to cross-

reference with the Marine Information for Safety and Law Enforcement database to verify vessel ownership; to facilitate contact with the owner, operator, or employer if any questions arise after reviewing the request for a waiver package; and to mail a waiver letter back to the owner, operator, or employer in an expeditious manner.

2. *List of fishing vessels and information on those vessels that the owner, operator, or employer wishes to exempt.* The owner, operator, or employer would be asked to provide, for each vessel that he/she wants a waiver, the following: the fishing vessel's name, official number, length (in feet), gross tonnage, and the types of fisheries the vessel will fish. This information would be used to verify the documentation of the vessel, to check the vessel's safety history, and to ensure that the vessel belongs to the person who is making the request for citizenship waiver.

3. *A list of persons working on the vessel(s).* The list would include: The total number of crewmembers; the number of seamen who are neither U.S. citizens nor lawful permanent residents; the name, nationality, birth place, position to be held, and basis for employment authorization in the U.S. under the INA of each seaman who is neither a U.S. citizen nor a lawful permanent resident; and the number of alien seamen who are neither U.S. citizens nor lawful permanent residents for whom the waiver is being requested. This requested information would allow the Coast Guard to ascertain what percentage of a vessel's crew would be non-permanent resident aliens to ensure that non-U.S. citizens would only be used as seamen and not Watch Officers or Masters, and to ensure that the persons named on a waiver request would be non-permanent resident aliens who are authorized for employment in the United States under the INA.

4. *Identification of the time period over which the 25 percent limit would be exceeded:* This information would include the start date (MM/DD/YYYY) and expiration date (MM/DD/YYYY) of the requested waiver. This information would be required to ensure the owner, operator, or employer is asking for an exemption that falls within the period of the named individuals' authorization for employment in the U.S. under the INA.

5. *Demonstration that the vessel(s) is/are in full compliance with all applicable safety and other regulatory requirements set forth in 46 CFR part 28.* In order to document compliance, the owner, operator, or employer would be required to submit documentation that shows that: a dockside safety examination was conducted; the

examination was successfully passed; the vessel(s) received a safety examination decal (and include the serial number of the decal; the decal is displayed on the vessel; and that the decal will not expire during the entire time period of the requested waiver. Since commercial fishing vessels operating within 3 nautical miles from shore are generally not required to be examined, compliance with 46 CFR part 28 requirements would usually be determined by a random boarding or by the vessel owner, operator, or employer requesting a dockside safety examination. Thus absent these rules, it is conceivable that a vessel could go to sea and fish for months, or even years, without being checked for its compliance with regulations. Through these examinations, we intend to identify and correct safety issues, eliminate preventable hazards, and minimize any problems that might exist prior to the Coast Guard approving a request for a waiver. Satisfactory completion of a dockside safety examination for all commercial fishing vessels requesting a waiver under this proposed rule would ensure all applicable vessels provide all emergency equipment and instruction for all crewmembers and otherwise comply with applicable laws and regulations.

6. *Owner, operator, or employer's statement certifying that the vessel(s) would operate in compliance with all other applicable citizenship requirements regarding the Master or other Officers in Charge of deck or engineering watches on U.S. documented vessels.*

7. *Documentation demonstrating satisfactory evidence of authorization for employment as a seaman with the owner, operator, or employer under the INA for aliens who are not lawful permanent residents but are otherwise authorized for employment in the United States under the INA; and that qualified seamen who are United States citizens are not available.*

The H-2B visa has proven to be the primary avenue for demonstrating compliance with these statutory requirements. The 2001 policy letter thus required a temporary labor certification from the Department of Labor (DOL) for the position in question in addition to DHS authorization for the alien's employment with the owner, operator, or employer as an H-2B nonimmigrant. Together, the documents from DHS and DOL demonstrate that these prerequisites are met. In this proposed rulemaking, we plan on removing the requirement in the 2001 policy letter that an alien authorized for

employment with the owner, operator, or employer as a seaman pursuant to admission as H-2B nonimmigrant provide evidence of a DOL temporary labor certification; the owner, operator, or employer need only provide evidence of the alien's authorization from DHS to work with the employer as a crewman in H-2B nonimmigrant status. The requirement to provide evidence of the DOL temporary labor certification is being removed because USCIS approval of an H-2B nonimmigrant visa petition is premised on DOL certification that there are no qualified and available U.S. workers (a term which includes U.S. citizens) to perform the respective temporary services or labor as a seaman. See 8 CFR 214.2(h)(6)(iii)(A); 20 CFR 655.4 (defining "United States Worker" for H-2B purposes).

Additionally, we seek comment on alternative documentation that may be submitted for our review and evaluation if an alien is not authorized for employment with the owner, operator, or employer as an H-2B nonimmigrant. H-2B nonimmigrant status is but one means by which a non-permanent resident alien might be authorized for employment in the U.S. under the INA. If an alien who is neither a lawful permanent resident nor an H-2B nonimmigrant is authorized for employment, the owner, operator, or employer must nevertheless establish that qualified seamen who are citizens of the United States are not available in order to qualify for a waiver. In this instance, the burden is upon the requestor of the waiver to provide satisfactory evidence (1) Of authorization for employment with the owner, operator, or employer as a seaman under the INA, as required by 46 U.S.C. 8103(i)(1)(C), and (2) that qualified U.S. citizen seamen are not available as required by 46 U.S.C. 8103(b)(3)(C). We seek comments on the type of documents that could possibly be submitted to establish compliance with the statutory requirements when an alien's authorization for employment in the U.S. with the owner, operator, or employer is not derived from his or her classification as an H-2B nonimmigrant.

VI. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and executive orders related to rulemaking. Below, we summarize our analyses based on 13 of these statutes or executive orders.

A. Executive Order 12866 and Executive Order 13563

This proposed rule is not a significant regulatory action under section 3(f) of

Executive Order 12866, Regulatory Planning and Review, as supplemented by Executive Order 13563, and does not require an assessment of potential costs and benefits under section 6(a)(3) of that

Order. The Office of Management and Budget has not reviewed it under that Order.

The following table summarizes the costs and benefits of this rule. We

estimated annual and 10-year costs of the rule. And, based on data availability, we identified qualitative benefits of the proposed rule.

TABLE 1—SUMMARY OF COSTS AND BENEFITS

Category	Estimate
Costs	
Annual Cost to Apply for Waiver	\$42,365.
Cost of Dockside Examination *	\$9,160.
Ten Year Monetized Costs	\$330,812.
(rounded values, 7% discount rate)	
Benefits	
Qualitative Benefits	This proposed rule would provide industry with greater visibility to the waiver application procedures. The inclusion of the dockside examination would ensure that all vessels granted waivers are in compliance with existing safety regulations.

* The cost to apply for a waiver is an annual cost. The cost of the dockside exam occurs every two years.

This proposed rule would create a regulatory burden for those owners and operators of commercial fishing vessels electing to request a waiver. From 2005 to 2009, there was an average of 91 requests for waivers sent to the Coast Guard per year. Note that applications for waivers have declined from a high of 203 in 2005 to 20 in 2009. The number of applications for waivers will vary from year to year based on many factors, such as national and regional economic conditions and management programs for specific fisheries. We use a 5-year average to reflect the range of conditions that may occur over the 10-year period of analysis. In addition, during the period of 2005 to 2009, Coast Guard issued an average of 108 violations of 46 U.S.C. 8103, which would include violations related to the citizenship requirements for the crew of fishing vessels and the citizenship requirements for the Master and Officer in charge of deck or engineering watches. During 2009, 75 of these violations were issued. Based on the continuing level of violations of citizenship requirements for fishing vessels, the average over 5 years of requests for waivers, rather than the low number of recent requests, is more indicative of the future use of waivers once their use is established in the regulations.

We estimate that it takes an owner or operator approximately 9.25 hours² to compile and submit the appropriate documentation to the Coast Guard per the 2001 policy letter. The Bureau of Labor Statistics provides a wage of \$34.01 for captains, mates, and pilots of

water vessels.³ We apply a load factor of 1.48 to this wage to account for benefits, which makes the hourly wage for a captain, mate, or pilot approximately \$50.33.⁴ At a cost of \$50.33 per hour to the civilian sector, the cost is \$465.55 per request for a waiver (\$50.33 per hour × 9.25 hours). The total annual burden would be approximately 842 labor hours (9.25 hours per request × 91 requests per year) for a cost to industry of \$42,377 (\$50.33 × 842 hours) to submit the request for a waiver. This cost is only borne if a vessel owner, operator, or employer chooses to seek relief of the citizenship requirement. The proposed rule would require that all vessels requesting a waiver undergo a dockside examination.

As noted, the Coast Guard Authorization Act of 2010 added a requirement for mandatory dockside safety examinations once every 2 years for vessels that operate beyond 3 nautical miles from the shoreline. Some of the vessels requesting citizenship waivers may be required to undergo the dockside examinations due to the Authorization Act. Since this proposal would make the dockside safety examination a requirement for obtaining a waiver, the total cost of these examinations is attributable to this proposed rule.

According to Coast Guard Fishing Vessel Safety Division subject matter experts, the dockside safety examination takes, on average, 2 hours to complete, which would represent an opportunity cost to the vessel owner, operator, or

employer equal to the time lost multiplied by the wage for a captain, mate or pilot. This opportunity cost would equal approximately \$9,160 (2 hours × \$50.33 × 91 examinations).

The dockside examination would serve as a check to ensure that the vessel is in full compliance with all applicable safety and other regulatory requirements set forth in 46 CFR part 28. Vessels may have to take corrective actions as a result of the dockside examinations. As the examinations focus on compliance with existing regulations, the costs of any corrective actions would not be attributable to this rulemaking, but instead is attributable to compliance with existing regulations.

The total annual cost to industry associated with this proposal would be approximately \$51,537. This includes the \$42,365 cost for applying for a waiver per the 2001 policy letter and the \$9,160 opportunity cost associated with the addition of the dockside examination to the current request for a waiver process.

Reviewing a waiver application currently takes a Coast Guard employee approximately 3 hours, on average. We assume a wage rate equal to that of a GS-13 for the reviewer. Based on Commandant Instruction (COMDTINST) 7310.1L, Coast Guard Reimbursable Standard Rates, (available at http://uscg.mil/directives/ci/7000-7999/CI_7310_1L.PDF), the hourly wage for the reviewer would be \$67 per hour. The total annual projected cost to the Coast Guard to review applications would be \$18,291 (3 hours × \$67 × 91 requests). The dockside examination portion of this proposal would also create additional government costs to perform the examinations. Civilian

² Time estimates provided by Coast Guard Fishing Vessel Safety Division subject matter experts.

³ <http://www.bls.gov/oes/2009/may/oes535021.htm>. This wage information is from May 2009 and is the most recent figure from BLS.

⁴ The load factor is determined by dividing BLS total compensation by BLS wages.

examiners are usually GS-11 or GS-12 positions while Coast Guard uniformed examiners are usually E-5 or E-6 grades, which, according to COMDTINST 7310.1L, would lead to an average wage for examiners of \$49.⁵ According to Coast Guard subject matter experts, a dockside examination, including travel time and administrative time, would take an examiner 4 hours to complete. The total cost to the government from this requirement would be \$17,836 (4 hours per examination × \$49 × 91 examinations). As with the costs to industry, government costs would only be incurred if owners or operators opt to apply for a waiver.

By incorporating the current policy into regulation, the Coast Guard would promote greater awareness of the policy, and provide commercial fishermen with one location for all rules governing their operations. Greater visibility of the application procedures may help reduce the number of crew requirement violations. Also, the inclusion of the dockside examination would ensure that all vessels granted waivers are in compliance with existing safety regulations that apply to commercial fishing vessels.

B. Small Entities

Under the Regulatory Flexibility Act (5 U.S.C. 601–612), we have considered whether this proposed rule would have a significant economic impact on a substantial number of small entities. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000.

Based on 2007 data, we identified 79,058 entities owning fishing vessels. Of these, a small number (13) were owned by government entities or non-profits, all of which exceed the threshold for being classified as a small entity. The remaining owners are classified as businesses. Based on available revenue data, approximately 99.8 percent (78,901) of the commercial fishing businesses fall below the Small Business Administration threshold for a small business based on their primary North American Industry Classification System designation.

Based on historical data, we expect an average of 91 requests for a waiver per year. If we assume that all of these requests are from small commercial fishing businesses, we can assess the

potential impacts of this proposal on the industry. Coast Guard records show that the majority of vessels requesting waivers in the period from 2006–2009 are between 50 and 70 feet in length. By comparing the \$566 cost per vessel of the proposal to the revenues for commercial fishing vessels in the 50–70 ft. size range, we estimate that only 3 percent of all commercial fishing vessels would have a revenue impact greater than 3 percent from this proposal. Table 2 shows the percent of vessels by revenue impact.

TABLE 2—REVENUE IMPACTS OF PROPOSED RULE

Revenue impact	Percent of vessels
0% < Impact ≤ 1%	62
1% < Impact ≤ 3%	35
3% < Impact ≤ 5%	1
5% < Impact ≤ 10%	2
Above 10%	0

The primary purpose of this proposed rule is to codify existing policy into regulation, although, there would be one new cost element introduced. We estimate 91 of approximately 80,000 commercial fishing vessels apply for a waiver annually, which is not a substantial number. Furthermore, because the waiver process is voluntary, in that vessel owners, operators, or employers would only apply for a waiver if the benefits of doing so outweigh the costs, we can assume that if the approximate \$566 per vessel cost of this rulemaking is prohibitive, vessel owners would choose to not pursue a waiver. Therefore, the Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities. If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment to the Docket Management Facility at the address under **ADDRESSES**. In your comment, explain why you think it qualifies and how and to what degree this rule would economically affect it.

C. Assistance for Small Entities

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule so that they can better evaluate its effects on them and participate in the rulemaking. If the proposed rule would affect your small business, organization, or

governmental jurisdiction and you have questions concerning its provisions or options for compliance, please consult with the Coast Guard personnel listed under **FOR FURTHER INFORMATION CONTACT** section of this proposed rule. The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

D. Collection of Information

This proposed rule would call for a revision to an existing collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). This revision is explained below under ESTIMATE OF TOTAL ANNUAL BURDEN. As defined in 5 CFR 1320.3(c), “collection of information” comprises reporting, recordkeeping, monitoring, posting, labeling, and other, similar actions. The title and description of the information collections, a description of those who must collect the information, and an estimate of the total annual burden follow. The estimate covers the time for reviewing instructions, searching existing sources of data, gathering and maintaining the data needed, and completing and reviewing the collection.

Title: Commercial Fishing Industry Vessel Safety Regulations.

OMB Control Number: 1625–0061.

Summary of the Collection of Information: This information collection is intended to improve safety on board vessels in the commercial fishing industry. The requirements apply to those vessels and to seamen on them.

Need for Information: The Coast Guard needs to collect this information for all vessels requesting a waiver for relief of the citizenship requirements on a commercial fishing vessel.

Proposed Use of Information: The Coast Guard would use this information solely to determine whether or not a vessel should be granted relief of the citizenship requirements on a commercial fishing vessel.

Description of the Respondents: The respondents are vessel owners, operators, and employers of U.S. commercial fishing vessels who opt to seek relief of the citizenship requirements on a commercial fishing vessel.

Number of Respondents: The existing OMB-approved number of respondents, as adjusted in May 2008, is 5,103. The proposed rule would not change that total.

Frequency of Response: 91 respondents, based on a five-year average.

⁵ COMDTINST 7310.1L lists reimbursable rates for government workers.

Burden of Response: Those vessels that voluntarily choose to request a waiver bear the burden of this collection. We estimate that a request for a waiver would take about 9.25 hours per response.

Estimate of Total Annual Burden: The existing OMB-approved total annual burden, as adjusted in May 2008, is 5,917 hours. The annual increase from the proposed rule would be approximately 842 hours to the public, assuming 91 waiver requests are submitted per year.

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)), we will submit a copy of this proposed rule to the Office of Management and Budget (OMB) for its review of the collection of information.

We ask for public comment on the proposed collection of information to help us determine how useful the information is; whether it can help us perform our functions better; whether it is readily available elsewhere; how accurate our estimate of the burden of collection is; how valid our methods for determining the burden are; how we can improve the quality, usefulness, and clarity of the information; and how we can minimize the burden of collection.

If you submit comments on the collection of information, submit them both to OMB and to the Docket Management Facility where indicated under **ADDRESSES**, by the date under **DATES**.

You need not respond to a collection of information unless it displays a currently valid control number from OMB. Before the Coast Guard could enforce the collection of information requirements in this proposed rule, OMB would need to approve the Coast Guard's request to collect this information.

E. Federalism

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on State or local governments and would either preempt State law or impose a substantial direct cost of compliance on them.

We have analyzed this proposed rule under that Order and have determined that it does not have implications for federalism because states may not regulate citizenship requirements onboard fishing, fish processing, or fish tender vessels engaged in the fisheries in the navigable waters of the United States or the exclusive economic zone.

F. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires

Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule would not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

G. Taking of Private Property

This proposed rule would not cause a taking of private property or otherwise have taking implications under Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights.

H. Civil Justice Reform

This proposed rule meets applicable standards in sections 3(a) and 3(b)(2) of Executive Order 12988, Civil Justice Reform, to minimize litigation, eliminate ambiguity, and reduce burden.

I. Protection of Children

We have analyzed this proposed rule under Executive Order 13045, Protection of Children from Environmental Health Risks and Safety Risks. This rule is not an economically significant rule and would not create an environmental risk to health or risk to safety that might disproportionately affect children.

J. Indian Tribal Governments

This proposed rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

K. Energy Effects

We have analyzed this proposed rule under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. We have determined that it is not a “significant energy action” under that order because it is not a “significant regulatory action” under Executive Order 12866 and is not likely to have a significant adverse effect on the supply, distribution, or use of energy.

L. Technical Standards

The National Technology Transfer and Advancement Act (NTTAA) (15 U.S.C. 272 note) directs agencies to use voluntary consensus standards in their regulatory activities unless the agency provides Congress, through the Office of Management and Budget, with an explanation of why using these standards would be inconsistent with applicable law or otherwise impractical. Voluntary consensus standards are technical standards (e.g., specifications of materials, performance, design, or operation; test methods; sampling procedures; and related management systems practices) that are developed or adopted by voluntary consensus standards bodies.

This proposed rule does not use technical standards. Therefore, we did not consider the use of voluntary consensus standards.

M. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01 and Commandant Instruction M16475.ID, which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f), and have made a preliminary determination that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. A preliminary environmental analysis checklist supporting this determination is available in the docket where indicated under the “Public Participation and Request for Comments” section of this preamble. This rule involves the qualifying of maritime personnel and the manning of vessels and falls under § 2.B.2, figure 2–1, paragraphs (c) and (d) of the Instruction. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

List of Subjects in 46 CFR Part 28

Alaska, Fire prevention, Fishing vessels, Marine safety, Occupational safety and health, Reporting and recordkeeping requirements, Seamen.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 46 CFR Part 28 as follows:

PART 28—REQUIREMENTS FOR COMMERCIAL FISHING INDUSTRY VESSELS

1. The authority citation for part 28 is revised to read as follows:

Authority: 46 U.S.C. 4502, 4505, 4506, 8103; Department of Homeland Security Delegation No. 0170.1.

Subpart H—[Reserved]

2. Amend part 28 by reserving subpart H.
3. Amend part 28 by adding new subpart I to read as follows:

Subpart I—Citizenship Waiver Procedures

Sec.

- 28.1100 General
 28.1105 Request for a waiver
 28.1110 Waiver approval
 28.1115 Waiver request and approval records

Subpart I—Citizenship Waiver Procedures

§ 28.1100 General.

As set forth in 46 U.S.C. 8103, a citizenship requirement, other than a requirement that applies to the master of a documented vessel, on commercial fishing vessels may be waived for unlicensed seamen when qualified seamen who are citizens of the United States are not available. Under the provisions of this subpart, the Coast Guard approves or denies requests for a waiver of the citizenship requirement from owners, operators, or employers seeking to exceed the 25 percent limit applicable to unlicensed seamen aboard fishing industry vessels who are non-permanent resident aliens authorized for employment in the United States under the Immigration and Nationality Act (INA) (8 U.S.C. 1101 *et. seq.*).

§ 28.1105 Request for a waiver.

(a) Vessel owners, operators, or employers who desire a waiver of citizenship requirements from the Coast Guard must submit a written request to the Commandant (CG-5433), United States Coast Guard, 2100 Second St., SW., Stop 7581, Washington, DC 20593-7581.

(b) The written request required under paragraph (a) of this section must contain—

- (1) The vessel owner, operator, or employer's contact information—
 - (i) The vessel owner, operator, or employer's full name (last, first, middle initial);
 - (ii) Address;
 - (iii) Work phone number;
 - (iv) Fax number (if applicable); and
 - (v) E-mail address (if applicable);
- (2) Information on fishing vessel(s) for which the owner, operator, or employer requests a citizenship waiver. For each listed vessel, the owner, operator, or employer must include—
 - (i) Fishing vessel name;

- (ii) Fishing vessel official number;
- (iii) Fishing vessel length (in feet);
- (iv) Fishing vessel gross tonnage; and
- (v) Type(s) of fishery(ies) in which the vessel is engaged;

(3) Information on persons who will work on the vessel(s). For each listed vessel, the owner, operator, or employer must include—

- (i) The total number of unlicensed crew normally employed;
- (ii) The name, nationality, birth place, position to be held, and basis for employment authorization in the United States of each alien who is not lawfully admitted for permanent residence but is otherwise authorized for employment in the United States under the INA; and
- (iii) The number of alien seamen who are not lawfully admitted for permanent residence but are otherwise authorized for employment in the United States under the INA for which the waiver is requested; and

(4) The time period over which the 25 percent limit will be exceeded—

- (i) Start date (MM/DD/YYYY); and
- (ii) Expiration date (MM/DD/YYYY).

(c) The vessel owner, operator, or employer submitting a request for a waiver under paragraph (a) of this section is required to demonstrate that the vessel(s) is/are in full compliance with all applicable safety and other regulatory requirements set forth in 46 CFR part 28. To that end, the owner, operator, or employer must submit documentation that shows—

- (1) A dockside safety examination was conducted;
- (2) The examination was successfully passed and a safety decal was issued and affixed to the vessel;
- (3) The serial number of the decal issued; and
- (4) The period of validity of the safety decal issued.

(d) The owner, operator, or employer submitting a request for a waiver under paragraph (a) of this section must include a statement certifying that the vessel(s) will operate in compliance with all other applicable citizenship requirements regarding the Master or other Officers in Charge of deck or engineering watches on U.S. documented vessels.

(e) The owner, operator, or employer submitting a request for a waiver under paragraph (a) of this section must provide evidence that aliens who are not lawfully admitted for permanent residence are authorized for employment with the owner, operator, or employer under the INA and evidence that qualified seamen who are U.S. citizens are not available for employment. The following documentation is satisfactory evidence

both of authorization for employment with the owner, operator, or employer under the INA and that qualified seamen who are U.S. citizens are not available:

Documentation for H-2B nonimmigrants.

(1) U.S. Citizenship and Immigration Services (USCIS) Form I-797, "Notice of Action: Approval Notice" classifying the alien as an H-2B nonimmigrant for purposes of employment with the owner, operator, or employer submitting a request for a waiver under paragraph (a) of this section; and

(2) USCIS Form I-94 indicating that the alien has been lawfully admitted to the United States (or has been lawfully granted a change of nonimmigrant status or extension of nonimmigrant stay in H-2B classification) for the dates covered by the proposed employment.

(f) Upon receipt of a request submitted under paragraph (a) of this section and required information submitted in accordance with paragraphs (b)–(e) of this section, the Coast Guard (CG-5433) will evaluate the information and may investigate further, as necessary, to determine the validity of the information provided.

§ 28.1110 Waiver approval.

(a)(1) If, within 30 days of receipt of a properly submitted request for a waiver, the Coast Guard does not make a determination whether to approve the request or does not advise the owner, operator, or employer that additional time is needed for consideration, the request will be considered provisionally approved for 90 days from the end of that 30-day period.

(2) If the Coast Guard does not make a determination whether to approve a properly submitted request for a waiver in writing within 30 days of receipt, the owner, operator, or employer must have a copy of the request and supporting documentation available onboard the vessel as proof of submission of a request for waiver of the citizenship requirement for unlicensed seamen for that vessel.

(b)(1) If the Coast Guard determines, based on the waiver request, supporting documentation, and any other relevant information, that no qualified U.S. citizen seamen are available, the Coast Guard (CG-5433) will grant the waiver to exceed the 25 percent limit for employment of non-permanent resident alien seaman for the period of employment authorized for each alien under the INA. The Coast Guard will issue a letter of approval to the owner, operator, or employer for the applicable vessel(s).

(2) The owner, operator or employer must have a copy of the waiver approval letter available onboard the vessel as proof of waiver of the citizenship requirement for unlicensed seamen for that vessel.

§ 28.1115 Waiver request and approval records.

The Coast Guard will maintain a record of citizenship waiver requests and approvals. Approvals will be documented for the applicable vessel(s) in the Coast Guard's vessel information database.

Dated: August 9, 2011.

James A. Watson,

Rear Admiral, U.S. Coast Guard, Director of Prevention Policy.

BILLING CODE 9110-04-P

DEPARTMENT OF TRANSPORTATION

Pipeline and Hazardous Materials Safety Administration

49 CFR Parts 171, 172, 173, 174, 179, and 180

[Docket No. PHMSA-2010-0018 (HM-216B)]

RIN 2137-AE55

Hazardous Materials: Incorporating Rail Special Permits Into the Hazardous Materials Regulations

AGENCY: Pipeline and Hazardous Materials Safety Administration (PHMSA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: The Pipeline and Hazardous Materials Safety Administration is proposing to amend the Hazardous Materials Regulations to incorporate provisions contained in certain widely used or longstanding special permits that have general applicability and established safety records. Special permits allow a company or individual to package or ship a hazardous material in a manner that varies from the regulations provided that an equivalent level of safety is maintained. The revisions in this proposed rule are intended to provide wider access to the regulatory flexibility offered in special permits and eliminate the need for numerous renewal requests, thus reducing paperwork burdens and facilitating commerce while maintaining an appropriate level of safety. This rulemaking also proposes to respond to two petitions for rulemaking, P-1497 concerning the use of electronic shipping papers, and P-1567

concerning the removal of the Association of American Railroad's (AAR's) AAR-600 portable tank program for previously adopted standards that meet or exceed the AAR-600 requirements.

DATES: Written comments should be submitted on or before October 17, 2011.

ADDRESSES: You may submit comments identified by the docket number (PHMSA-2010-0018 (HM-216B)) by any of the following methods:

Federal eRulemaking Portal: Go to <http://www.regulations.gov>. Follow the online instructions for submitting comments.

Fax: 1-202-493-2251.

Mail: Docket Operations, U.S. Department of Transportation, West Building, Ground Floor, Room W12-140, Routing Symbol M-30, 1200 New Jersey Avenue, SE., Washington, DC 20590.

Hand Delivery: To Docket Operations, Room W12-140 on the ground floor of the West Building, 1200 New Jersey Avenue, SE., Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Instructions: All submissions must include the agency name and docket number for this notice at the beginning of the comment. All comments received will be posted without change to the Federal Docket Management System (FDMS), including any personal information.

Docket: For access to the dockets to read background documents or comments received, go to <http://www.regulations.gov> or DOT's Docket Operations Office (see **ADDRESSES**).

Privacy Act: Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the document (or signing the document, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78).

FOR FURTHER INFORMATION CONTACT: Eileen Edmonson or Steven Andrews, Standards and Rulemaking Division, Office of Hazardous Materials Safety, (202) 366-8553, Pipeline and Hazardous Materials Safety Administration (PHMSA), or Karl Alexy, Office of Safety Assurance and Compliance, (202) 493-6247, Federal Railroad Administration (FRA), 1200 New Jersey Avenue, SE., Washington, DC 20590.

SUPPLEMENTARY INFORMATION:

I. Background

II. Overview of Proposed Amendments
III. Regulatory Analyses and Notices

I. Background

Special Permits

The Pipeline and Hazardous Materials Safety Administration (PHMSA) is proposing to amend the Hazardous Materials Regulations (HMR; 49 CFR parts 171-180) to incorporate certain requirements based on existing special permits for transportation by railroad issued by PHMSA under 49 CFR part 107, subpart B (§§ 107.101 to 107.127). A special permit sets forth alternative requirements (variances) to the requirements in the HMR by means that achieve a safety level that at a minimum corresponds to the safety level required under the regulations and is consistent with the public interest. Congress expressly authorized DOT to issue these variances in the Hazardous Materials Transportation Act of 1975.

The HMR generally are performance-oriented regulations that provide the regulated community a certain amount of flexibility in meeting safety requirements. Even so, not every transportation situation can be anticipated and built into the regulations. Innovation is a strength of our economy, and the hazardous materials community is particularly strong at developing new materials and technologies as well as innovative ways of transporting materials. Special permits enable the hazardous materials industry to quickly, effectively, and safely integrate new products and technologies into the production and transportation streams. Thus, special permits provide a mechanism for testing new technologies, promoting increased transportation efficiency and productivity, and ensuring global competitiveness.

A special permit must achieve at least an equivalent level of safety to that specified in the HMR. Implementation of new technologies and operational techniques can enhance safety because the authorized operations or activities may achieve a greater level of safety than currently required under the regulations. Special permits also reduce the volume and complexity of the HMR by addressing unique or infrequent transportation situations that would be difficult to accommodate in regulations intended for use by a wide range of shippers and carriers.

PHMSA conducts ongoing reviews of special permits to identify widely used and longstanding special permits having general applicability with established safety records for adoption into regulations for broader applicability. To

obtain a special permit, interested parties must prepare and submit a detailed application that PHMSA reviews extensively. If granted and its use is needed after the expiration date assigned, the person authorized to use the special permit must submit an application to continue their use of it and undergo an extensive PHMSA renewal process. Converting these special permits into regulations reduces paperwork burdens and facilitates commerce while maintaining an acceptable level of safety. Additionally, adoption of special permits as rules of general applicability provides wider access to the benefits and regulatory flexibility of the provisions granted in the special permits. Factors that influence whether a specific special permit is a candidate for regulatory action include: the safety record for hazardous materials transported, or the transport operations conducted, under a special permit; the potential for broad application of a special permit; suitability of provisions in the special permit for incorporation into the HMR; rulemaking activity in related areas; and agency priorities. Special permits involving packaging used by a large number of persons—such as those issued to many persons with party status or issued to a manufacturer as a “manufacture, mark, and sell”—are potentially among the most suitable types of special permits for adoption into the HMR. Such special permits have broad applicability; moreover, many of them have been in effect for a number of years and have demonstrated safety records.

Further, although we make every effort to stay as true as possible to the conditions prescribed in each special permit when converting it to proposed regulatory text, PHMSA recognizes that sometimes, due to existing regulations or historical interpretations, provisions in a special permit may require revision to convert them into regulations of general applicability. In addition, when converting special permits we often have to modify the language to describe documents and procedures that are authorized under the special permit but not specifically described in it or to modify the language to comply with requirements for proposed regulatory text prescribed by this agency, the Department of Transportation, and the **Federal Register**.

This notice of proposed rulemaking (NPRM) proposes to incorporate seven (7) special permits that authorize tank car transportation operations not specifically permitted under the HMR. These special permits were initially issued to members of industry

associations or similar organizations.

They are DOT–SP:

1. 7616
2. 9388
3. 11184
4. 12095
5. 12905
6. 14333
7. 14622

These special permits have well-established safety records and, thus, are candidates for incorporation into the HMR. A few of the special permits in this NPRM have expired for various reasons, such as from delays that occur during the renewal process, or as a result of modifications to the HMR, packagings, processes, or other technologies that eliminate the need for the special permit. PHMSA has included them in this NPRM because both PHMSA and the Federal Railroad Administration (FRA) have determined these special permits also have well-established safety records and would benefit the regulated industry if incorporated into the HMR. Incorporating these special permits into the HMR would eliminate the need for over 250 current grantees to reapply for the renewal of these special permits every four years and for PHMSA to process the renewal applications.

Incorporation of these special permits into the HMR also eliminates a significant paperwork burden for the recipient. Unless otherwise excepted by this agency, a copy of each special permit must be: maintained at each facility where a packaging is manufactured under a special permit, maintained at each facility where a package is offered or re-offered for transportation under a special permit, carried on board each cargo vessel or aircraft, and, in some cases, carried on board each transport vehicle when used to transport a hazardous material under a special permit.

Petitions for Rulemaking

Two proposals PHMSA is addressing in this proposed rulemaking were also presented to PHMSA in petitions for rulemaking. A more detailed description of each is provided below.

Petition No. P–1497

The petition from the International Vessel Operators Hazardous Materials Association, Inc. (IVOHMA) (P–1497), dated March 15, 2007, is similar to relief authorized under DOT–SP 7616 in that it requests PHMSA allow shipping paper information required under 49 CFR Part 172, Subpart C (shipping papers) to be transmitted electronically by computer through use of electronic data interchange (EDI). The IVOHMA

states “differences in hazard communication or the interpretation of their application are a principle[sic] source of disharmony in intermodal and/or international transportation of [hazardous materials].” The IVOHMA also states “electronic data interchange has become a recognized method of efficient and accurate communication currently being used successfully throughout the industrialized world” that permits “immediate access to hazard communication by all those involved in the transportation infrastructure as well as by emergency responders equipped” with this technology. Further, the IVOHMA states in its petition that the proposals it submitted were vetted with its staff and members and determined to be opportunities for regulatory amendment to promote efficiencies in the modal interchange of these containers in both domestic and international transportation.

PHMSA and the FRA met with the IVOHMA, on January 17, 2007, to discuss several issues concerning the HMR and containerized hazardous materials cargo that the association and its members believe may be presenting operational difficulties, impediments, and obstacles to efficient and safe intermodal transportation. These issues included inconsistencies between the shipping paper requirements for each mode for documents that can be construed as meeting the HMR shipping paper requirements, “such as work orders, dock receipts or train consists,” and determining which shipping document is considered legally in control of the shipment. The IVOHMA also identified two problems associated with the train consist. The first problem is §§ 174.24 and 174.26 do not require that the agency or person be identified that corresponds to the emergency response information telephone number on the document. The HMR requires this information on a shipping paper document under § 172.604(b). The IVOHMA states “valuable time is often lost” while emergency responders using these telephone numbers or inspectors checking their validity track down the correct individual and/or organization associated with a specific telephone number. The IVOHMA also states a similar problem occurs when international telephone numbers are offered as the emergency response telephone number that provides access from the United States to the emergency responder, and includes delays that occur obtaining a telephonic connection while using the international access codes. The second problem is the

emergency response telephone number needs to be accessible by all the persons associated with the transport of the shipment, such as those carriers trying to obtain information to respond to a shipboard emergency.

To address these concerns, the IVOHMA submitted proposed regulatory language that would define the term "interlining carrier" in § 171.8, establish requirements for "interlining carrier documents" in a new § 172.206, and make several additional related revisions concerning shipping papers and emergency response information in §§ 172.204(d), 172.604(a), and 174.26(b). Although the petition the IVOHMA submitted primarily concerned the transportation of containerized hazardous materials between railcars and vessels, the regulatory language the IVOHMA proposed would apply to interlining carriers in all modes. This rulemaking applies to rail transportation only. Therefore, PHMSA determined proposing regulations that apply to carriers in all modes would exceed the scope of this rulemaking. PHMSA considered revising the IVOHMA's proposals to limit them to rail transport only with the possibility of considering their application to other modes of transport in a future rulemaking. However, FRA determined the IVOHMA's proposals are not needed because the language in existing § 174.24(a) applies to the transfer of all interlining documents. This section requires that each person accept a hazardous material for rail transportation or transport a hazardous material by rail only if that person has received a shipping paper for that material. If the material is excepted from the shipping paper requirements under the HMR, this section does not apply. PHMSA requests public comment not only on the proposals in this rulemaking, but on IVOHMA's suggestions not included in this rulemaking and on the possible effects EDI may have on distributing hazardous materials shipping paper information if its use is permitted in all modes of transport. Based on the comments received, PHMSA may consider the use of EDI in other modes of transport in a future rulemaking.

Petition No. P-1567

PHMSA adopted standards for portable tanks in container-on-flat-car (COFC) or trailer-on-flat-car (TOFC) service under § 174.63 and other sections of the HMR that meet or exceed the AAR-600 requirements. The petition from the Gold Tank Inspection Service, Inc. (P-1567), requests that PHMSA discontinue the AAR-600

program and amend § 174.63(c) to remove the requirement that portable tanks in COFC or TOFC service comply with the standard "AAR-600" of the Association of American Railroad's (AAR's) Specification for Tank Cars, entitled "Specifications for the Acceptability of Tank Containers," because: (1) The current HMR regulations exceed the AAR 600 requirements; (2) after January 1, 2003, all the specifications for original portable tank construction listed in the AAR 600 standard are not allowed to be built except DOT Specification 60 and International standard 1496-3 portable tanks, which are already covered under §§ 178.255 and 178.274, respectively, of the HMR; and (3) after January 1, 2010, the AAR 600 standard will no longer be needed since, in accordance with § 171.14, all portable tanks will have to meet or exceed the AAR 600 requirements and AAR 600 does not cover portable tank requirements. In a May 20, 2009 letter of clarification PHMSA issued to Robert E. Fronczak, Assistant Vice President, Environment and Hazardous Materials, Association of American Railroads, under Reference No. 09-0125, PHMSA states "most of the portable tanks listed in the AAR-600 standard are prohibited from new construction, although they may remain in service provided they continue to meet the applicable standard," and that "we intend to propose a revision to § 174.63(c) as soon as practicable." The changes Mr. Fronczak described have effectively made the HMR's reference to the AAR-600 standard outdated. Therefore, PHMSA proposes to revise § 173.63(c) to remove its reference to the AAR 600 standard and to require that portable tanks transported in COFC or TOFC service must conform to all HMR requirements applicable to portable tanks in this type of service.

II. Overview of Proposed Amendments

In this NPRM, PHMSA is proposing to incorporate into the HMR provisions that: (a) Establish an alternative tank car qualification program; (b) permit the electronic transmission of shipping paper information; (c) permit straight threads in the clean out and/or inspection port openings of a DOT Specification 110A500W multi-unit tank car tank; (d) permit alternative start-to-discharge pressure requirements for certain DOT Specification 105J500W tank cars containing chlorine; (e) permit alternative pressure relief requirements for pressure relief devices for DOT Specification 105J300W tank cars containing certain flammable liquids; (f) permit certain DOT and AAR specification tank cars with stainless

steel identification plates to have their specification and other required information stamped on the identification plate instead of the tank car head provided certain requirements are met; (g) permit liquefied anhydrous ammonia gas to be measured by a metering device when loaded into a tank car as an alternative to measuring the cars by weight; (h) revise § 179.13(b) to require that rail tank cars with a gross weight that exceeds 263,000 but not 286,000 pounds containing poisonous-by-inhalation (PIH) materials must be approved for use by the Federal Railroad Administration's (FRA's) Associate Administrator for Railroad Safety; and (i) eliminate use of the AAR 600 program concerning the FRA's approval of bulk packagings in COFC and TOFC service that is incorporated into § 174.63(c)(2). PHMSA invites comment on the potential costs and safety benefits associated with the proposals in this NPRM, including any information that may be used in a cost-benefit safety analysis. Each proposal is discussed in greater detail in the following preamble sections.

A. Alternative Tank Car Qualification Program

The FRA established the Alternative Tank Car Qualification Program, also known as TCQ-1, in 1998 in collaboration with the railroad industry and PHMSA under Special Permit DOT-SP 12095. The TCQ-1 program serves as a minimally acceptable framework for owners to qualify their DOT specification and non-specification tank cars and components using requirements in place of those prescribed in 49 CFR Part 180. The TCQ-1 program permits owners to develop tank car inspection requirements specific to their construction and use, provided the FRA has determined the new methods are as safe or safer than those prescribed in the HMR. FRA determined the new program is successful and its use has dramatically increased since its inception. In fact, FRA and PHMSA have determined the industry's use of the TCQ-1 program is so complete that it essentially is the only tank car inspection standard used today. Currently, 559 parties are operating under TCQ-1. PHMSA and FRA are not aware of any incidents that have occurred as a result of the issuance of special permits for the tank car qualification program.

PHMSA and FRA believe incorporating Special Permit DOT-SP 12095 into the HMR will provide an equivalent level of safety for the qualification of both specification and

non-specification rail tank cars, and will reduce the administrative burden of reapplying for this special permit. Therefore, in this NPRM, PHMSA and FRA are proposing to incorporate Special Permit DOT-SP 12095 into the

HMR. This proposal pertains to: marking and stamping; adding new definitions pertaining to tank cars; adding qualifications for tank car inspections and tests; revising the requirements for tank car repairs,

alterations, conversions, and modifications; clarifying recordkeeping requirements; and listing hazardous and other materials corrosive to tanks or service equipment. The following table summarizes the proposed changes:

Number	Section No.	Proposed change to 49 CFR part 180	Proposed change from DOT-SP 12095
1	180.501	Applicability	Existing paragraph (b) is now paragraph (c), and new paragraph (b) and (d) are added to clarify, respectively, the minimally acceptable framework each owner's tank car qualification program must have, and specifies that documents must be made available upon request to FRA or an authorized representative of the U.S. Department of Transportation.
2	180.503 (Definitions)	Bottom shell	Not added. This definition already exists in § 171.8.
		Corrosive to the tank or service equipment.	No change.
		Defects	Added to eliminate industry confusion.
		Design level of reliability and safety.	Minor edits.
		Interior heating system	No change.
		Lining/Coating owner	No change.
		Maintenance	Minor edits.
		Modification	Added to aid industry compliance.
		Objectively reasonable and articulable belief.	Added to explain the use of this term in § 180.509(b)(4).
		Qualification	First sentence states what the term means instead of how to achieve it. Second sentence (essentially unchanged) states how to achieve qualification and emphasizes that "qualification" requires a representation that the process has been completed successfully.
		Railworthy, Railworthiness	Explains the term. When FRA requires a recall of a tank car or series of tank cars it issues a "Railworthiness Directive."
		Reactive to the tank or service equipment.	Adds reactivity language based on § 173.24(b)(2) and (3).
		Reinforced tank shell butt weld	No change.
		Reinforcing plate	No change.
		Reliability	No change.
		Representation	Reworded.
		Safety system	No change.
		Service equipment	Minor edits.
		Service equipment owner	Added to clarify the party responsible and to accommodate a growing trend in the industry that the owner of the car may or may not own the service equipment.
		Tank car owner	This is a codification of previous FRA interpretations and statements.
		Top shell	Not added. This definition already exists in § 171.8.
3	180.507	Paragraph (b)(2)	"Marked" replaces "stamped" to allow for flexibility with regulatory compliance.
		Paragraph (b)(5)	This TCQ-1 paragraph is omitted but language is used from existing § 180.507(b)(5).
4	180.509	Paragraph (a)(4)	Added last sentence to ameliorate a concern from tank car owners that modifications have been made to their cars without their knowledge; minor edits.
		Paragraph (b)(4)	Replaced "probable cause" with the wording "objectively reasonable and articulable belief" because the former is a term of art in criminal law and is also used in FRA drug and alcohol regulations. The intent of § 180.509(b)(4) is to create a standard less strict than that of an emergency order, but rigorous enough to compel a tank car owner to reinspect and repair, if necessary, tank cars considered potential hazards irrespective of their periodic test and inspection requirements.
		Paragraph (c)(1)	Minor edits.
		Paragraph (d)	Minor edits.
		Paragraph (d)(2)	Added last sentence for clarity.
		Paragraph (d)(3)	Added "Corrosion" as specific element for inspection.
		Paragraph (d)(5)	To insure inclusiveness, added "all closures" as substitute for specific item names.
		Paragraph (d)(6)	Dropped "operability" test of excess flow valves because it is not a practical test and a successful result might damage the excess valve seat and preclude seating in a future event.
		Paragraph (e)(1)	Replace "high-stressed structural elements" with the simpler words "structural elements."

Number	Section No.	Proposed change to 49 CFR part 180	Proposed change from DOT-SP 12095
		Paragraph (f)(1) Paragraph (f)(4)	Added the responsibility of the tank car owner for clarity. Added a general prohibition against operating overly thin tank cars; this responsibility is changed from putting it solely on tank car owners who often have no control over the day to day movements of their tank cars.
		Paragraph (g)	Minor edits; removes the language that implies only a "qualified individual" could find a thin tank car and invoke the restrictions in this paragraph.
		Paragraph (h)	No change.
		Paragraph (i)	Minor edits.
		Paragraph (j)	Minor edits; Replaced the wording "after reassembly of a tank car" from Part 180, Subpart F, and "installed on the tank car" with "installed, replaced, or reinstalled on the tank car."
		Paragraph (l)	Minor edits.
		Paragraph (m)	After 12/2010 the requirements of paragraph (m) should have been fulfilled. There may be late tank cars or tank cars with extended alternate inspection intervals; therefore, this provision will be retained for an additional 5-10 years.
5	180.511	Added minor edits; included those in Part 180, Subpart F, to capture requirements for qualifying service equipment.
6	180.513	Paragraph (a)	Reworded to encompass the entire AAR Tank Car Manual rather than certain appendices.
		Paragraph (b)	Added for clarification and as a reminder that tank car or component owners are responsible for verifying compliance with the owner's maintenance instructions.
		Paragraph (c)	Is the same language as existing paragraph (b) from DOT-SP 12095. The last sentence was added for clarification.
7	180.515	Paragraph (a)	Added last sentence to clarify the primacy of dates marked in Appendix C of the AAR Tank Car Manual.
8	180.517	Revised to clarify that marking or retaining the specification on the tank, either after initial construction in paragraph (a) or subsequent qualification in paragraph (b), is the "representation" of "qualification" defined in § 180.503.

Additional provisions from Special Permit DOT-SP 12095 as proposed will be in §§ 179.201-10, 179.220-25, and 180.501, and 180.503, 180.507, 180.509, 180.511, 180.513, 180.515, 180.517, and Appendix D of part 180.

B. Telephone and Electronic Data Interchange Shipping Papers

Special Permit DOT-SP 7616 permits the transmission of shipping paper information by telephone and electronic data interchange (EDI). Special Permit DOT-SP 7616 is currently used by 626 parties. Prior to this special permit, shippers entered information on shipping papers by hand, typewriter, or with the use of a computer and then transmitted these documents by hand, railroad agent, facsimile, or postal system to a train crew or rail yard. These methods were very time consuming. This shipping information would then be entered into the receiver's tracking system, a process that resulted in a large number of key entry errors for hazardous materials shipments.

Starting in the 1960s, many companies began using in-house computer systems and networks to assist with preparing and tracking shipping information, but technological

limitations often prevented or restricted one company's system from communicating with another's. Rail companies and shippers attempting to address these issues and find solutions formed the Transportation Data Coordination Committee (TDCC) in 1968, and started publishing standards on EDI in 1975. In the mid-1970's, the U.S. Department of Transportation (USDOT) issued Exemption DOT-E 7616 to permit railroad companies to "certify" their shipping papers for hazardous materials by permitting the shipper to leave a "voice" message stating that a hazardous materials shipment loaded on a railcar was being offered for transportation. Eventually, the exemption was revised to allow an "electronic" shipping document to be faxed and later transmitted electronically from computer to computer. Today, EDI standards are used worldwide for most industries that rely on electronic data transfer of information, such as banks, medical institutions, and shipping companies outside of railroad-related businesses.

In consultation with USDOT, the TDCC evolved, and the EDI standards were published as guidelines on electronic data standards for the transportation industry. These

guidelines established format codes and protocols for communicating and verifying the accuracy of electronic information, including hazardous materials information on a shipping paper, for hazardous materials shippers and carriers. Currently, the Accredited Standards "X12" Committee (ACS) of the American National Standards Institute (ANSI) creates standards specifically for EDI. Industry organizations take these standards and modify them to fit the types of electronic transmissions and/or transactions needed by each industry. This is what is done in the railway industry. As a result, there is no one specific standard that includes all the electronic transmissions permitted as EDI.

Special Permit DOT-SP 7616 allows a carrier to accept shipping paper information via telephone (i.e., voice communications) for hazardous material shipments that have been transported by railroad, and authorizes several variations in the certification requirement when this information is transmitted telephonically or through EDI. The Federal Aviation Administration and Federal Motor Carrier Safety Administration have informed PHMSA and FRA that some

inconsistencies exist when these standards are applied between the different transportation modes. Therefore, in this NPRM, PHMSA and FRA are proposing to incorporate into the HMR the provisions for EDI prescribed in Special Permit DOT-SP 7616 and requested in Petition No. P-1497 for any hazardous materials shipment transported by rail only. This will exclude, for example, the use of voice communications as an authorized method for carriers to accept hazardous materials shipping paper information for transporting these shipments by aircraft or motor vehicle. Further, PHMSA and FRA are proposing to allow a signature in the signature block of an EDI form to represent completion of the shipper's certification prescribed under § 172.204. Users of EDI may wish to consult the ANSI's ACS X12 Committee for guidance on EDI transmissions and transactions for electronic shipping documents, along with any other guidance developed on this subject by the Department's agencies, such as the FRA.

PHMSA and FRA are not aware of any incidents that have occurred as a result of the issuance of Special Permit DOT-SP 7616. PHMSA and FRA have also determined the overall effect of the special permit has improved the timely and accurate receipt of hazardous materials information, thereby improving safety. As mentioned earlier in this preamble, the IVOHMA also requested through a petition for rulemaking (P-1497) that PHMSA revise the HMR to include the transmission of shipping documents through EDI. PHMSA and FRA acknowledge that hazardous materials shipping document information is routinely transmitted by computer but no provision in the HMR specifically addresses this. PHMSA and FRA also note that the use of EDI to transmit this information does not eliminate the requirement for the printed copy of a shipping paper to accompany a hazardous materials shipment. PHMSA and FRA specifically request comments on the costs and safety benefits associated with these proposals, as well as the possible effects and/or modifications needed to permit EDI to transmit successfully the shipping paper information for hazardous materials in all transportation modes.

The provisions for Special Permit DOT-SP 7616 and Petition No. P-1497 are proposed in §§ 172.201, 172.202, 172.204, and 172.604. The changes that IVOHMA proposed for § 174.24 are also located in § 172.202; therefore, they are not needed in § 174.24 and we are not proposing to revise that section.

C. Straight Threads on Multi-Unit Tank Cars

Special Permit DOT-SP 14333 authorizes the manufacture, marking, sale and use of a non-DOT specification tank car conforming to all the regulations applicable to the DOT Specification 110A500W multi-unit tank car tank, except that the tank must be equipped with straight threads in the clean-out/inspection port openings instead of the National Gas Taper Threads. Four parties currently use this special permit.

This special permit also permits retrofitting. Section 179.300-13(b) requires that taper threads must be used on the valve opening. In the safety equivalency evaluation for Special Permit DOT-SP 14333, PHMSA and FRA determined that straight threads on the clean-out/inspection port opening would provide an equivalent level of safety. Tapered threads are designed to provide a seal when torqued. The seal is a result of the compression of the male and female threads. Because they compress, there is an inevitable degree of deformation. This deformation decreases the likelihood that a proper seal can be obtained upon subsequent applications. Straight threads are used on connections where a gasket is compressed to create a seal. Therefore, a seal can be obtained by repeated application as long as the gasket has not degraded. The clean-out/inspection port openings are used repeatedly and introduce an opportunity for leaks. The straight threads on these openings help to minimize leaking. Special Permit DOT-SP 14333 limits the use of the straight threads opening to certain high-hazard Division 2.3 (poisonous gas), Division 6.1 (poisonous), and Class 8 (corrosive) hazardous materials, as well as those materials authorized to be transported in DOT Specification 110A500W multi-unit tank car tanks. However, PHMSA and FRA believe straight threads in inspection ports can be used for all hazardous materials authorized to be transported in DOT Specification 110A multi-unit tank car tanks and are proposing this action in this NPRM.

PHMSA and FRA are not aware of any incidents that have occurred as a result of the issuance of this special permit, and believe these provisions, if adopted, will provide an adequate level of safety. Therefore, PHMSA and FRA are proposing to incorporate Special Permit DOT-SP 14333 into the HMR and further allowing straight threads in inspection ports to be used for all hazardous materials authorized to be transported in DOT Specification 110A

multi-unit tank car tanks. The provisions for this special permit are proposed in § 179.300-13(b) for DOT Specification 110A multi-unit tank cars only.

D. Alternative Start-to-Discharge Pressure Requirements for Tank Cars Containing Chlorine

Special Permit DOT-SP 14622 authorizes the transportation of certain DOT Specification 105J500W tank cars containing chlorine that have start-to-discharge settings that do not meet the regulatory requirements for pressure relief devices. Three parties currently use this special permit.

In its original application for this special permit, Occidental Chemical Corporation (OxyChem) requested relief from § 179.15(b) to allow tank cars in chlorine service to be equipped with combination pressure relief valves (PRV) with a set pressure of 360 pounds per square inch (psi) rather than the required set pressure of 356 psi. OxyChem justified its request based on its history of operating tank cars safely in a manner similar to what it was requesting. OxyChem also based its request on the HMR's regulatory history prior to the final rule issued under Docket No. HM-216, effective on October 1, 1996 (61 FR 28666; 61 FR 38642; 61 FR 50252), which permitted DOT Specification 105J500W tank cars used to transport chlorine to be equipped with a PRV with a set pressure of 356 psi.

The FRA conducted an evaluation of the level of safety provided by the terms and allowances of Special Permit DOT-SP 14622. As part of this evaluation, FRA staff contacted the Chlorine Institute, which represents all of the companies that are a party to this special permit. The Chlorine Institute reported it has not received a report of any incident related to the conditions allowed under Special Permit DOT-SP 14622. In addition, the Chlorine Institute found the PRV setting does not affect the standard start-to-discharge pressure that is the basis for the flow rating pressure. The flow rating pressure, in turn, is used to calculate the required PRV flow capacity. Therefore, the FRA finds the valve is sized appropriately for the required design conditions.

The FRA has one safety concern related to Special Permit DOT-SP 14622. If the relief discs or pins burst or break within their tolerances, there is the potential that the valve will be exposed to the lading and its vapor for an extended period of time. A rupture disc or breaking pin is used in conjunction with a reclosing PRV to

provide a barrier between the valve and its components from the lading and the vapor of the lading, as exposure to these can lead to corrosion and ultimately the malfunctioning of the valve.

Furthermore, the FRA believes it is important that combination PRVs are equipped with "tell-tale devices" located outboard (outside) of the rupture disc (or breaking pin) and inboard (inside) of the valve. When the disc or breaking pin is intact, the valve indicates no pressure. If the disc or pin has been compromised, the valve will show an elevated pressure. An operator inspecting the condition of the tell-tale device can determine if the rupture disc or breaking pin has been compromised.

A rupture disc has a rated pressure burst-pressure tolerance of $+/- 5$ percent. A breaking pin has a rated pressure burst-pressure tolerance of $+/- 10$ percent (see ASME Section VIII, UG-126 Pressure Relief Valves). An evaluation of the special permit relative to both the rupture disc and breaking pin is provided in the following paragraph.

Special Permit DOT-SP 14622 allows for the PRV to have a set pressure of 360 psi. The special permit allows the burst pressure of the relief device to be 96 percent of the start-to-discharge pressure rather than the required maximum of 95 percent. As stated earlier, the set pressure in SP-14622 is within the rated pressure burst tolerance of the rupture disc and rated pressure burst tolerance of the breaking pin described earlier in this paragraph. However, it is possible that a rupture disc could burst at the limit of its negative tolerance at 356 psi. In this case, the valve with a set pressure of 360 psi would be undetected and exposed to the lading or the vapor of the lading. While this sequence is possible, the negative effects to the valve are very limited. This can be demonstrated by reviewing the thermodynamic properties of chlorine and the time needed to increase the vapor pressure of the chlorine to the set pressure of the PRV. Based on the vapor pressure-temperature relationship of chlorine, the temperature of chlorine at a vapor pressure of 356 psi is approximately 165 °F and its temperature at 360 psi is approximately 170 °F. It is evident that as the temperature of chlorine increases, the vapor pressure of the chlorine also increases at a slightly faster rate.

A pool fire represents the only scenario in which the temperature of chlorine in a tank could reach 165 °F. In this scenario, the heat input is so great that the specific heat and heat of vaporization requirements would be met quickly and raise the temperature and

the respective vapor pressure of the chlorine in the tank car to a level that would actuate the PRV, causing the PRV to function and vent the pressure in the tank. Under these hazardous conditions, corrosion of the PRV body and components are very minor considerations.

Regarding the breaking pin, as stated earlier, the rated pressure tolerance is $+/- 10$ percent. Both the start-to-discharge pressure requested in Special Permit DOT-SP 14622 and required in the HMR are within the design tolerance of the breaking pin. As a result, neither poses a greater risk to the safe operation of the relief valve and tank car.

Based on this analysis, PHMSA and FRA believe operation of a tank car under the terms of Special Permit DOT-SP 14622 provides a level of safety that is equivalent to that of a similar tank car operated under the HMR. Therefore, we propose to adopt this requirement into the HMR. The provisions for this special permit are proposed in § 173.314(k)(2).

E. Alternative Pressure Relief Requirements for Pressure Relief Devices for Tank Cars Containing Certain Flammable Liquid Materials

Special Permit DOT-SP 11184 authorized the transportation in commerce of certain Class 3 materials in DOT Specification 105J300W tank cars with a pressure relief device rated at 25 percent of tank test pressure. The commodities authorized under this special permit were typically shipped in general purpose (GP) tank cars (e.g., DOT Specification 111A100W). In 1996, PHMSA, then known as the Research and Special Programs Administration, added § 179.15 to the HMR in a final rule it issued on June 5, 1996, under Docket No. HM-216 (61 FR 28666). In paragraph (b)(2)(i) of that section, the agency added the requirement that reclosing pressure relief devices in tank cars, other than DOT Class 106, 107, 110, and 113 tank cars, may not have a start-to-discharge pressure setting lower than 5.17 Bar (75 psig) or higher than 33 percent of the minimum tank burst pressure, a range that included the 25 percent of tank test pressure relief device rating required in paragraph 2.a of DOT-SP 11184. As a result, DOT-SP 11184 was no longer needed and PHMSA let it expire. When it was active, 21 parties used this special permit.

PHMSA and FRA are discussing DOT-SP 11184 in this NPRM to clarify that the rulemaking action issued under Docket No. HM-216 eliminated the need for this special permit, and to emphasize that this revision improved safety in two ways. First, it lowered the

start-to-discharge pressure for the PRV, which allowed the car to vent at lower pressures when in an overheated condition—such as a pool fire. Commodities listed in this special permit when exposed to extreme heat and pressure will undergo rapid polymerization that could result in an energetic and catastrophic failure of the tank car. Second, the DOT Specification 105J300W tank car's thicker shell and head will result in the tank car having a significantly greater survivability than its GP tank car counterparts. PHMSA and FRA have determined these revisions to the HMR are performing satisfactorily; therefore, we are expiring this special permit. PHMSA and FRA are not aware of any incidents that have occurred as a result of the issuance of Special Permit DOT-SP 11184.

F. Transportation in Commerce of Certain Tank Cars With Identification Plates in Lieu of Stamping the Tank Car Heads

Special Permit DOT-SP 12905 permits certain DOT and AAR specification tank cars with stainless steel identification plates to have their specification and other required information stamped on the identification plate instead of the tank car heads if certain requirements are met. The AAR requires all cars built after December 31, 2003, to be equipped with identification plates as specified in Appendix C, paragraph 4.0. Additionally, for several years manufacturers have built portable tanks and cargo tanks with a data plate containing all pertinent information related to the construction of the tank. Incorporating Special Permit DOT-SP 12905 into the HMR will bring the railcar data identification in line with the AAR standards and the portable tank and cargo tank industries. Also, FRA acknowledges that stamping this information into the tank car wall may introduce a defect into its steel. Although minimal, stamping results in a stress concentration in the area of the stamp. Use of a data plate would eliminate this defect. Currently, 22 parties use this special permit.

PHMSA and FRA are not aware of any incidents that have occurred as a result of the issuance of Special Permit DOT-SP 12905. PHMSA and FRA believe that incorporating this special permit into the HMR will provide an equivalent level of safety for the qualification of both specification and non-specification rail tank cars. AAR tank cars are required to have an identification plate after December 31, 2011. Therefore, PHMSA and FRA are proposing to amend the HMR to require tank cars to

have a stamped identification plate one year after the publication date of the final rule issued as a result of this proposed rulemaking. We propose to adopt this requirement into new section § 179.24 and existing sections §§ 179.100–20, 179.200–24, 179.201–10, and 179.220–25 of the HMR.

G. Measuring Liquefied Gases Loaded into a Tank Car With Metering Devices as an Alternative to Measuring These Cars by Weight

Special Permit DOT–SP 9388 authorizes the transportation in commerce of DOT specification tank cars that have “UN 1005, Ammonia, anhydrous, 2.2 (non-flammable gas)” liquefied gas measured by a metering device when loaded into the tank. Although anhydrous ammonia is defined as meeting both a Division 2.3 (poisonous gas) and Class 8 (corrosive) hazard class under the United Nations Recommendations on the Transport of Dangerous Goods, International Civil Aviation Organization Technical Instructions on the Transport of Dangerous Goods by Air, and International Maritime Dangerous Goods Code, the HMR permits anhydrous ammonia to be defined as meeting the Division 2.2 hazard class in domestic transportation only. For increased safety, DOT–SP 9388 requires that each of these tank cars must be loaded and unloaded using procedures that specify at a minimum: Employee safety equipment; proper signage; set brakes and installed wheel blocks; an examination of the tank and/or jacket, its undercarriage assembly, hoses, connections, valves, and accessories inside the loading dome for damage; recording of defects; certification of inspection and completion of loading and/or unloading procedures, as well as other recordkeeping requirements. PHMSA and FRA propose to incorporate these requirements in new § 173.314(e)(2)(i). Also, DOT–SP 9388 requires that one out of every 10 tanks cars must have the metered gauge verified with the tank car gauge in accordance with certain procedures to determine the current capacity of the car. PHMSA and FRA propose to incorporate these procedures in new § 173.314(e)(2)(ii). Although Special Permit DOT–SP 9388 is currently expired, 28 parties previously used it. Since the original issuance of DOT–SP 9388, flow meter technology is much more accurate and reliable.

PHMSA and FRA are not aware of any incidents that have occurred as a result of the issuance of this special permit. PHMSA and FRA believe that incorporating this special permit into

the HMR will provide an equivalent level of safety for the qualification of both specification and non-specification rail tank cars. Therefore, we propose to adopt this requirement, with the additions noted above, into § 173.314(e) of the HMR.

H. Approval for Gross Weight on Rail Tank Cars

Special Permits DOT–SP 11241, 11654, 11803, 12423, 12561, 12613, 12768, 12858, 12903, 13856, 13936, 14004, 14038, 14442, 14505, 14520, 14570, and 14619, allowed rail tank cars with a gross weight on rail that exceeded 263,000 pounds but not exceeding 286,000 pounds to be used to transport certain hazardous materials provided the tank car is approved by the FRA’s Associate Administrator for Railroad Safety. PHMSA adopted these special permits, along with several others, in a final rule issued under Docket No. PHMSA–2009–0289 (HM–233A; 75 FR 27205, 5/14/2010) because they were widely used and had established safety records. However, the final rule erroneously omitted from § 179.13(b) a provision to require FRA approval for those gross-weight-on-rail tank cars authorized to contain materials that are poisonous-by-inhalation. PHMSA is proposing to correct this omission in this rulemaking by revising § 179.13(b) to add the FRA approval statement.

I. Reference to the Association of American Railroads AAR 600 Program

The AAR Tank Car Committee and the AAR Hazardous Materials Committee have recommended the discontinuance of the AAR 600 program as incorporated in § 174.63(c)(2). Currently, this program requires that a bulk packaging, including a portable tank, transported in COFC or TOFC service must conform to the conditions specified in § 174.63 of the HMR. These regulations require approval by FRA’s Associate Administrator for Railroad Safety, unless, among other things, the tank conforms to requirements in AAR 600 of the AAR Specifications for Tank Cars, “Specifications for Acceptability of Tank Containers.” In accordance with AAR 600, approval and registration of compliant portable tanks is required based on a determination that the tank meets all applicable standards and payment of a registration fee.

Since incorporation of the AAR 600 standard into the HMR, PHMSA has adopted standards for portable tanks that meet or exceed the AAR 600 requirements. The AAR committees believe that the current HMR portable tank regulations have now exceeded the

AAR 600 requirements and that all of the specifications for original construction listed in the AAR 600 Standard were not allowed to be built after January 1, 2003, except for the DOT Specification 60 and other United Nations (UN) portable tanks that are authorized in the HMR. As stated earlier in this rulemaking, PHMSA agreed with the AAR proposal in a letter dated May 20, 2009 and stated we would propose a revision to § 174.63(c). As also discussed earlier in this preamble, PHMSA received a petition (P–1567) dated July 9, 2010, from Gold Tank Inspection Services, Inc., requesting the removal of the reference to the AAR 600 program in § 174.63 because the HMR now includes standards for portable tanks that meet or exceed AAR 600 requirements. Accordingly, in this NPRM, PHMSA is proposing to require that portable tanks transported in COFC or TOFC service must conform to all HMR requirements applicable to portable tanks. Consistent with this proposed revision, PHMSA is proposing to remove the reference in § 171.7(a)(3) to § 173.63 under the listing “AAR Manual of Standards and Recommended Practices, Section C–Part III, Specifications for Tank Cars, Specification M–1002, (AAR Specifications for Tank Cars), December 2000.”

III. Rulemaking Analyses and Notices

A. Statutory/Legal Authority for This Rulemaking

This NPRM is published under the authority of 49 U.S.C. 5103(b) which authorizes the Secretary to prescribe regulations for the safe transportation, including security, of hazardous material in intrastate, interstate, and foreign commerce. 49 U.S.C. 5117(a) authorizes the Secretary of Transportation to issue a special permit from a regulation prescribed in sections 5103(b), 5104, 5110, or 5112 of the Federal Hazardous Materials Transportation Law to a person transporting, or causing to be transported, hazardous material in a way that achieves a safety level at least equal to the safety level required under the law, or consistent with the public interest, if a required safety level does not exist. If adopted as proposed, the final rule would amend the regulations incorporating provisions from certain widely used and longstanding special permits that have established a history of safety and which may, therefore, be converted into the regulations for general use.

B. Executive Order 12866, Executive Order 13563, and DOT Regulatory Policies and Procedures

This proposed rule is not considered a significant regulatory action under section 3(f) and was not reviewed by the Office of Management and Budget (OMB). The proposed rule is not considered a significant rule under the Regulatory Policies and Procedures order issued by the Department of Transportation [44 FR 11034].

Executive Orders 12866 (“Regulatory Planning and Review”) and 13563 (“Improving Regulation and Regulatory Review”) require agencies to regulate in the “most cost-effective manner,” to make a “reasoned determination that the benefits of the intended regulation justify its costs,” and to develop regulations that “impose the least burden on society.” In this notice, PHMSA proposes to amend the HMR by incorporating alternatives this agency has permitted under widely used and longstanding special permits with established safety records that we have determined meet the safety criteria for inclusion in the HMR. Incorporation of these special permits into regulations of general applicability will provide shippers and carriers with additional flexibility to comply with established safety requirements, thereby reducing transportation costs and increasing productivity. In addition, the proposals in this NPRM will reduce the paperwork burden on industry and this agency caused by continued renewals of special permits. The provisions of this proposed rule will promote the continued safe transportation of hazardous materials while reducing transportation costs for the industry and administrative costs for the agency. Therefore, the requirements of Executive Orders 12866 and 13563, and the DOT policies and procedures concerning these orders have been satisfied.

C. Executive Order 13132

This proposed rule was analyzed in accordance with the principles and criteria contained in Executive Order 13132 (“Federalism”). This proposed rule would preempt state, local and Indian Tribe requirements but does not propose any regulation that has substantial direct effects on the states, the relationship between the national government and the states, or the distribution of power and responsibilities among the various levels of governments. Therefore, the consultation and funding requirements of Executive Order 13132 do not apply. Federal hazardous material transportation law, 49 U.S.C. 5101, *et*

seq., contains an express preemption provision (49 U.S.C. 5125(b)) preempting state, local and Indian Tribe requirements on certain covered subjects. Covered subjects are:

- (1) The designation, description, and classification of hazardous material;
- (2) The packing, repacking, handling, labeling, marking, and placarding of hazardous material;
- (3) The preparation, execution, and use of shipping documents related to hazardous material and requirements related to the number, contents, and placement of those documents;
- (4) The written notification, recording, and reporting of the unintentional release in transportation of hazardous material; or
- (5) The designing, manufacturing, fabricating, marking, maintaining, reconditioning, repairing, or testing of a package, container or packaging component that is represented, marked, certified, or sold as qualified for use in transporting hazardous material in commerce.

This proposed rule addresses covered subject items (2), (3), and (5) and would preempt any State, local, or Indian Tribe requirements not meeting the “substantively the same” standard. Federal hazardous materials transportation law provides at 49 U.S.C. 5125(b)(2) that if PHMSA issues a regulation concerning any of the covered subjects, PHMSA must determine and publish in the **Federal Register** the effective date of Federal preemption. The effective date may not be earlier than the 90th day following the date of issuance of the final rule and not later than two years after the date of issuance. PHMSA proposes the effective date of Federal preemption be 90 days from publication of a final rule in this matter in the **Federal Register**.

D. Executive Order 13175

This proposed rule was analyzed in accordance with the principles and criteria contained in Executive Order 13175 (“Consultation and Coordination with Indian Tribal Governments”). Because this proposed rule does not have Tribal implications and does not impose substantial direct compliance costs on Indian Tribal governments, the funding and consultation requirements of Executive Order 13175 do not apply.

E. Regulatory Flexibility Act, Executive Order 13272, and DOT Procedures and Policies

The Regulatory Flexibility Act (5 U.S.C. 601–611) requires each agency to analyze regulations and assess their impact on small businesses and other small entities to determine whether the

rule is expected to have a significant impact on a substantial number of small entities. The NPRM proposes to amend the HMR to incorporate provisions contained in seven widely used or longstanding railroad special permits that have an established safety record. Although many of the applicants may be small businesses or other small entities, PHMSA believes that the revisions in this proposed rule are intended to provide wider access to the regulatory flexibility offered in special permits and eliminate the need for numerous renewal requests, thus reducing paperwork burdens and facilitating commerce while maintaining an appropriate level of safety. Therefore, PHMSA certifies that the provisions of this NPRM would not have a significant economic impact on a substantial number of small entities.

This proposed rule has been developed in accordance with Executive Order 13272 (“Proper Consideration of Small Entities in Agency Rulemaking”) and DOT’s procedures and policies to promote compliance with the Regulatory Flexibility Act to ensure that potential impacts of draft rules on small entities are properly considered.

F. Paperwork Reduction Act

PHMSA has approved information collections under OMB Control Number 2137–0051, “Rulemaking, Special Permits, and Preemption Requirements,” OMB Control Number 2137–0557, “Approvals for Hazardous Materials,” and OMB Control Number 2137–0559, “(Rail Carriers and Tank Car Requirements) Requirements for Rail Tank Cars—Transportation of Hazardous Materials by Rail. This NPRM may result in a decrease in the annual burden and costs under OMB Control Number 2137–0051 and an increase in the annual burden and costs under OMB Control Number 2137–0557 and OMB Control Number 2137–0559 due to proposed changes to incorporate provisions contained in certain widely used or longstanding special permits that have an established safety record.

Under the Paperwork Reduction Act of 1995, no person is required to respond to an information collection unless it has been approved by OMB and displays a valid OMB control number. Section 1320.8(d), title 5, Code of Federal Regulations requires that PHMSA provide interested members of the public and affected agencies an opportunity to comment on information and recordkeeping requests.

This notice identifies a revised information collection request that PHMSA will submit to OMB for approval based on the requirements in

this proposed rule. PHMSA has developed burden estimates to reflect changes in this proposed rule. PHMSA estimates that the information collection and recordkeeping burden as proposed in this rule is as follows:

OMB Control No. 2137-0051:	
Decrease in Annual Number of Respondents	255
Decrease in Annual Responses: ..	255
Decrease in Annual Burden Hours	255
Decrease in Annual Burden Costs	\$9,500
OMB Control No. 2137-0557:	
Increase in Annual Number of Respondents	200
Increase in Annual Responses:	200
Increase in Annual Burden Hours	50
Increase in Annual Burden Costs	\$1,100
OMB Control No. 2137-0559:	
Increase in Annual Number of Respondents	350
Increase in Annual Responses	350
Increase in Annual Burden Hours	350
Increase in Annual Burden Costs	\$10,500

PHMSA specifically requests comments on these information collections and recordkeeping burdens associated with developing, implementing, and maintaining these requirements for approval under this proposed rule.

Requests for a copy of this information collection should be directed to Deborah Boothe or Steven Andrews, Standards and Rulemaking Division, (PHH-10), Pipeline and Hazardous Materials Safety Administration, 1200 New Jersey Avenue, SE., Washington, DC 20590-0001, Telephone (202) 366-8553.

Address written comments to the Dockets Unit as identified in the **ADDRESSES** section of this rulemaking. We must receive comments regarding information collection burdens prior to the close of the comment period identified in the DATES section of this rulemaking. In addition, you may submit comments specifically related to the information collection burden to the PHMSA Desk Officer, Office of Management and Budget, at fax number 202-395-6974.

G. Regulation Identifier Number (RIN)

A regulation identifier number (RIN) is assigned to each regulatory action listed in the Unified Agenda of Federal Regulations. The Regulatory Information Service Center publishes the Unified Agenda in April and October of each year. The RIN contained in the heading

of this document may be used to cross-reference this action with the Unified Agenda.

H. Unfunded Mandates Reform Act of 1995

This proposed rule does not impose unfunded mandates under the Unfunded Mandates Reform Act of 1995. It does not result in costs of \$141.3 million or more to either state, local or Tribal governments, in the aggregate, or to the private sector, and is the least burdensome alternative that achieves the objective of the rule.

I. Environmental Assessment

The National Environmental Policy Act of 1969 (NEPA), as amended (42 U.S.C. 4321-4347), and implementing regulations by the Council on Environmental Quality (40 CFR part 1500) require Federal agencies to consider the consequences of Federal actions and prepare a detailed statement on actions that significantly affect the quality of the human environment.

The hazardous materials regulatory system is a risk management system that is prevention oriented and focused on identifying a hazard and reducing the probability and quantity of a hazardous materials release. This rulemaking is concerned with the transportation of hazardous materials by rail, but is prepared with the understanding that these materials are often transported by aircraft, vessel, and highway before or after they are transported by rail. The need for hazardous materials to support essential services means transportation of highly hazardous materials is unavoidable. However, these shipments frequently move through densely populated or environmentally sensitive areas where the consequences of an incident could be loss of life, serious injury, or significant environmental damage. The ecosystems that also could be affected by a hazardous materials release during transportation include atmospheric, aquatic, terrestrial, and vegetal resources (for example, wildlife habitats). The adverse environmental impacts associated with releases of most hazardous materials are short-term impacts that can be greatly reduced or eliminated through prompt clean-up of the incident scene. In this NPRM, we are requesting comments on the potential environmental impacts of the proposals.

In all modes of transport, the potential for environmental damage or contamination exists when packages of hazardous materials are involved in transportation incidents. Most of the special permits considered in this rulemaking involve bulk packages of

hazardous materials in DOT specification and non-specification tank cars. While the volume of hazardous material present in these packagings has the potential to be released into the environment during a transportation incident, these packagings are constructed to withstand greater forces during impact and are also equipped with safety relief devices and valves specifically designed to maintain the containment ability of the tank car.

The purpose and need of this rulemaking is to incorporate widely used special permits or those with an established safety record into the HMR for universal use. More information about benefits of the proposed action can be found in the preamble (*i.e.*, "Overview of Proposed Amendments") to this rulemaking. The alternatives considered in the analysis include (1) the proposed action, that is, incorporation of the proposed special permits as amendments to the HMR; (2) incorporation of some subset of the proposed special permits (*i.e.*, only some of the proposed special permits) as amendments to the HMR; and (3) the "no action" alternative, meaning that none of the proposed special permits would be incorporated into the HMR. PHMSA believes that the each of these alternatives would result in equal environmental risk and/or impact because special permits are intended to offer equivalent safety and environmental protection as the HMR.

In considering the potential environmental impacts of the proposed action, PHMSA does not anticipate that the incorporation of the listed special permits will result in any significant impact on the human environment because the process through which special permits are issued requires the applicant to demonstrate that the alternative transportation method or packaging proposed provides an equivalent level of safety as that provided in the HMR. However, PHMSA welcomes and will consider and address comments about foreseeable environmental impacts or risk associated with the incorporation of any proposed special permit. The agencies and persons consulted in the development of this regulatory proposal include the International Vessel Operators Hazardous Materials Association, Inc.; Gold Tank Inspection Services, Inc.; Surface Deployment and Distribution Command (SDDC); Conrail; Agrium N.A. Wholesale Transportation Compliance; Koch Nitrogen Company; Columbiana Boiler Company; and subject matter expert staff in FRA and PHMSA.

Given that this rulemaking proposes to amend the HMR to incorporate provisions contained in certain widely used or longstanding railroad special permits that have an established safety record, these proposed change in regulation would increase safety and environmental protections. There are no significant environmental impacts associated with this proposed rule.

J. Privacy Act

Anyone is able to search the electronic form of all comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, *etc.*). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70, pages 19477–78), or at <http://www.regulations.gov>.

List of Subjects

49 CFR Part 171

Exports, Hazardous materials transportation, Hazardous waste, Imports, Reporting and recordkeeping requirements.

49 CFR Part 172

Education, Hazardous materials transportation, Hazardous waste, Labeling, Markings, Packaging and containers, Reporting and recordkeeping requirements.

49 CFR Part 173

Hazardous materials transportation, Packaging and containers, Radioactive materials, Reporting and recordkeeping requirements, Uranium.

49 CFR Part 174

Hazardous materials transportation, Radioactive materials, Rail carriers, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 179

Hazardous materials transportation, Railroad safety, Reporting and recordkeeping requirements.

49 CFR Part 180

Hazardous materials transportation, Motor carriers, Motor vehicle safety, Packaging and containers, Railroad safety, Reporting and recordkeeping requirements.

In consideration of the foregoing, we propose to amend 49 CFR Chapter I as follows:

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

1. The authority citation for part 171 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.45 and 1.53; Pub. L. 101–410 section 4 (28 U.S.C. 2461 note); Pub. L. 104–134 section 31001.

§ 171.7 [Amended]

2. In the “Table of material incorporated by reference,” at § 171.7(a)(3), for the entry “AAR Manual of Standards and Recommended Practices, Section C—Part III, Specifications for Tank Cars, Specification M–1002, (AAR Specifications for Tank Cars), December 2000, the reference to § 174.63 is removed.

3. In § 171.8, the definition “Train consist” is added in alphabetical order to read as follows:

§ 171.8 Definitions and abbreviations.

* * * * *

Train consist means a written record of the contents and location of each rail car in a train.

* * * * *

PART 172—HAZARDOUS MATERIALS TABLE, SPECIAL PROVISIONS, HAZARDOUS MATERIALS COMMUNICATIONS, EMERGENCY RESPONSE INFORMATION, TRAINING REQUIREMENTS, AND SECURITY PLANS

4. The authority citation for part 172 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.53.

5. In § 172.201, revise paragraph (a)(2) and add paragraph (a)(5) to read as follows:

§ 172.201 Preparation and retention of shipping papers.

(a) * * *

(2) The required shipping description on a shipping paper and all copies of the shipping paper used for transportation purposes must be legible and printed (manually or mechanically) in English.

* * * * *

(5) *Electronic shipping papers.* For transportation by rail, a rail carrier may accept shipping paper information either telephonically (*i.e.*, voice communications and facsimiles) or electronically (EDI) from an offeror of a hazardous materials shipment in accordance with the provisions in paragraphs (a)(5)(i) through (v) of this section. For the purposes of this section *electronic data interchange* (EDI) means

the computer-to-computer exchange of business data in standard formats. In EDI, information is organized according to a specific format (electronic transmission protocol) agreed upon by the sender and receiver of this information, and transmitted through a computer transaction that requires no human intervention or retyping at either end of the transmission.

(i) When the information applicable to the consignment is provided under this requirement the information must be available to the shipper and carrier at all times during transport, and the carrier must have and maintain a printed copy of this information until delivery of the hazardous materials on the shipping paper is complete. When a paper document is produced, the data must be presented as required by this subpart.

(ii) The offeror must forward the shipping paper (record) for a loaded movement to the carrier prior to shipment unless the carrier prepares the shipping paper on behalf of the offeror. The offeror is only relieved of the duty to forward the shipping paper once the offeror has received a copy of the shipping paper from the carrier;

(iii) A carrier that generates a residue shipping paper using information from the previous loaded movement of a hazardous materials packaging must ensure the description of the hazardous material that accompanies the shipment complies with the offeror's request;

(iv) *Verification.* The carrier and the offeror must have a procedure by which the offeror can verify accuracy of the transmitted hazard communication information that will accompany the shipment; and

(v) *Retention.* The shipping document that is generated must be retained in conformance with § 172.201(e).

* * * * *

6. In § 172.202, paragraph (b) is amended by adding a third sentence to read as follows:

§ 172.202 Description of hazardous material on shipping papers.

* * * * *

(b) * * * Shipping descriptions for hazardous materials offered or intended for transportation by rail that contain all the information required in this subpart and that are formatted and ordered in accordance with recognized electronic data interchange standards and, to the extent possible, in the order and manner required by this subpart are deemed to comply with this paragraph.

* * * * *

7. In § 172.204 paragraph (a) introductory text, a sentence is added to the end and paragraphs (a)(3) and (d)(3) are added to read as follows:

§ 172.204 Shipper's certification.

(a) * * * For transportation by rail only, the certification may be received verbally or with abbreviated written language in conformance with paragraphs (a)(3)(i) and (ii) of this section.

* * * * *

(3) *Rail only certifications.* For transportation by rail, the shipping paper certification may also be accomplished by one of the following methods:

(i) *Verbal certification.* When received telephonically, by the carrier reading the complete shipping description that will accompany the shipment to the offeror and receiving verbal acknowledgment that the description is as required. This verbal acknowledgement must be recorded, either on the shipping document or in a separate record, e.g., the train consist, in accordance with § 174.24, and must include the date and name of the person who provided this information; or

(ii) *Written abbreviated certification.* When transmitted electronically, by including the following abbreviated certification, in lieu of the full certification: “* * *, on behalf of shipper [or “offeror”] avers [or “declares”] certification specified in § 172.204(a).” The name of the principal partner, officer, or employee of the offeror or his agent must be substituted for the asterisks;

* * * * *

(d) * * *

(3) For transportation by rail, when transmitted by telephone or electronically, the signature may be in one of the following forms: the name of the principal person, partner, officer, or employee of the offeror or his agent in a computer field defined for that purpose.

8. In § 172.604, paragraphs (a) introductory text and (a)(3)(ii) are revised to read as follows:

§ 172.604 Emergency Response Telephone Number.

(a) A person who offers a hazardous material for transportation must provide an emergency response telephone number, including the area code, for use in an emergency involving the hazardous material. For telephone numbers outside the United States, the international access code or the “+” (plus) sign, country code, and city code, as appropriate, that are needed to complete the call must be included. The telephone number must be—

* * * * *

(3) * * *

(ii) Entered once on the shipping paper in the manner prescribed in

paragraph (b) of this section in a prominent, readily identifiable, and clearly visible manner that allows the information to be easily and quickly found, such as by highlighting, use of a larger font or a font that is a different color from other text and information, or otherwise setting the information apart to provide for quick and easy recognition. This provision may be used only if the telephone number applies to each hazardous material entered on the shipping paper, and if it is indicated that the telephone number is for emergency response information (for example: “EMERGENCY CONTACT: * * *”).

* * * * *

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

9. The authority citation for part 173 continues to read as follows:

Authority: 49 U.S.C. 5101–5128, 44701; 49 CFR 1.45, 1.53.

10. In § 173.314, paragraph (e) is redesignated as (e)(1) and its first sentence is revised, paragraph (k) is redesignated as (k)(1), and paragraphs (e)(2) and (k)(2) are added to read as follows:

§ 173.314 Compressed gases in tank cars and multi-unit tank cars.

* * * * *

(e) *Verification of content.* (1) The amount of liquefied gas loaded into each tank may be determined either by measurement or calculation of the weight, except that DOT specification tank car tanks authorized for the transportation of ammonia solution and anhydrous ammonia may have the amount of liquefied gas loaded into the tank car measured by a metering device in conformance with paragraph (e)(2) of this section. * * *

(2) *Metering device.* (i) *Loading procedures.* Tank cars loaded with a metering device in conformance with this section are not required to be weighed, but must have their outage measured with a magnetic gauging device to determine that the tank car is properly loaded in compliance with this subchapter. Each tank car using a metering device must be loaded using the following procedures. A copy of these procedures must be available at each location where such loading takes place. Certification in writing of the inspection and completion of these loading and/or unloading procedures must be maintained for each tank car loaded with a metering device and maintained in accordance with the recordkeeping requirements in

paragraph (e)(2)(iii) of this section, and all necessary records must be completed. At a minimum, these procedures will specify:

(A) The minimum safety equipment that must be worn by each employee performing a loading and unloading task under this paragraph (e)(2). The equipment must be designed to protect employees from the dangers associated with exposure to and contact with the hazardous material and must also comply with the laws of the Department of Labor's Occupational Safety and Health Administration, and the state and local laws of the jurisdiction where the task is being performed.

(B) That prior to loading a rail tank car all truck brakes must be set and chock blocks installed on one set of truck's wheels, and the rail tank car must be properly spotted and signed, and the tank visually inspected for any sign of damage in the—

- (1) Hoses, connections, and valves;
- (2) Truck and rail car under carriage assemblies;
- (3) Tank and/or jacket; and
- (4) Accessories inside of loading dome.

(C) Any defects found must be recorded, and the tank must not be loaded until the repairs to eliminate each defect are completed.

(D) The tank car must be allowed to sit undisturbed for at least 10 minutes after loading to allow material within the tank to settle. After this has occurred a final check for leaks must be conducted prior to closing the dome cover and properly inserting the dome pin.

(ii) *Verification.* One out of every 10 tank cars loaded by the use of the metering device must be gauged utilizing the fixed gauging equipment on the tank car to verify by calculation the amount of ammonia solution or anhydrous ammonia contained in the tank car.

(iii) *Recordkeeping.* The following information must be maintained and be made available to any representative of the DOT upon request for each tank car loaded with the use of a metering device:

- (A) Date loaded,
- (B) Date shipped,
- (C) Tank car reporting marks,
- (D) DOT Specification,
- (E) Tank car stenciled shell capacity (gallons),
- (F) Tank car stenciled tare weight (pounds),
- (G) Outage or innage table number,
- (H) Water capacity of tank car (pounds),
- (I) Maximum permitted filling density (see § 173.314, Table note 1),

(J) Specific gravity of NH₃ (@105 °F = 0.5796 and @115 °F = 0.5706),

(K) Tank car outage (inches/gallons),

(L) Gallons of liquid ammonia in tank car,

(M) Quantity of vapor ammonia in tank car, and

(N) Total calculated ammonia (liquid & vapor) in tank car (pounds).

* * * * *

(k) * * *

(2) DOT105J500W tank cars may be used as authorized packagings, as prescribed in this subchapter for transporting "Chlorine, 2.3 (8), UN 1017, Poison Inhalation Hazard, Zone B, RQ," if the tank cars meet all DOT specification requirements and the tank cars are equipped with combination safety relief valves with a start-to-discharge pressure of 360 psi, rather than the 356 psi. The start-to-discharge pressure setting must be marked on the pressure relief device in conformance with the AAR Specification for Tank Cars (IBR, see § 171.7 of this subchapter).

* * * * *

PART 174—CARRIAGE BY RAIL

11. The authority citation for part 174 continues to read as follows:

Authority: 49 U.S.C. 5101–5128; 49 CFR 1.53.

§ 174.63 [Amended]

12. In § 174.63(c)(2) is removed and reserved.

PART 179—SPECIFICATIONS FOR TANK CARS

13. The authority citation for part 179 is revised to read as follows:

Authority: 49 U.S.C. 5101–5128; 49 CFR 1.53.

14. In § 179.13, paragraph (b) is revised to read as follows:

§ 179.13 Tank car capacity and gross weight limitation.

* * * * *

(b) Tank cars containing poisonous-by-inhalation material meeting the applicable authorized tank car specifications listed in § 173.244(a)(2) or (3), or § 173.314(c) or (d) may have a gross weight on rail of up to 286,000 pounds upon approval by the Associate Administrator for Railroad Safety, FRA. Tank cars exceeding 263,000 pounds and up to 286,000 pounds gross weight on rail must meet the requirements of AAR Standard S–286, Free/Unrestricted Interchange for 286,000 lb Gross Rail Load Cars (IBR, see § 171.7 of this subchapter). Any increase in weight above 263,000 pounds may not be used

to increase the quantity of the contents of the tank car.

15. In Subpart B, add § 179.24 to read as follows:

§ 179.24 Stamping.

(a)(1) After December 31, 2011, to certify compliance with Federal requirements, the tank manufacturer must install two identical permanent identification plates, one located on both inboard surfaces of the "A" (*i.e.*, opposite) end of the tank car. One identification plate must be installed on the right side (AR) of the tank car, and the other must be installed on the back end left side (BL) body bolster webs so that each plate is readily accessible for inspection. The plates must be at least 3/32-inch thick and manufactured from corrosion resistant metal. When the tank jacket (flashing) covers the body bolster web and identification plates, additional identical plates must be installed on the AR and BL corners of the tank in a visible location. Tank cars built before December 31, 2011, may have the plate instead of or in addition to the stamping.

(2) Each plate must be stamped, embossed, or otherwise marked by an equally durable method in letters 3/16-inch high with the following information (parenthetical abbreviations may be used, and the AAR form reference is to the AAR Specifications for Tank Cars, December 2000 edition (IBR, see § 171.7 of this subchapter)):

(i) *Tank Manufacturer (Tank MFG)*: Full name of the car builder as shown on the certificate of construction (AAR form 4–2).

(ii) *Tank Manufacturer's Serial Number (SERIAL NO)*: For the specific car.

(iii) *AAR Number (AAR NO)*: The AAR number from line 3 of AAR Form 4–2.

(iv) *Tank Specification (SPECIFICATION)*: The specification to which the tank was built from line 7 of AAR form 4–2.

(v) *Tank Shell Material/Head Material (SHELL MATL/HEAD MATL)*: ASTM or AAR specification of the material used in the construction of the tank shell and heads from lines 15 and 16 of AAR Form 4–2. For Class DOT–113W, DOT–115W, AAR–204W, and AAR–206W, the materials used in the construction of the outer tank shell and heads must be listed. Only list the alloy (*e.g.*, 5154) for aluminum tanks and the type (*e.g.*, 304L or 316L) for stainless steel tanks.

(vi) *Insulation Material (INSULATION MATL)*: Generic names of the first and second layer of any thermal protection/insulation material applied.

(vii) *Insulation Thickness (INSULATION THICKNESS)*: In inches.

(viii) *Underframe/Stub Sill Type (UF/SS DESIGN)*: The design from Line 32 of AAR Form 4–2.

(ix) *Date of Manufacture (DATE OF MFR)*: The month and year of tank manufacture. If the underframe has a different built date than the tank, then show both dates.

(3) When a modification to the tank changes any of the information shown in paragraph (a)(2) of this section, the car owner or the tank car facility making the modification must install an additional variable identification plate on the tank in accordance with paragraph (a)(1) of this section showing the following information:

(i) *AAR Number (AAR NO)*: The AAR number from line 3 of AAR Form 4–2 for the alteration or conversion.

(ii) All items of paragraph (a)(2) of this section that were modified, followed by the month and year of modification.

(b) [Reserved]

16. In § 179.100–20, paragraph (b) is added to read as follows:

§ 179.100–20 Stamping.

* * * * *

(b) Authorized DOT tank cars with stainless steel identification plates must have their DOT Specification and other required information stamped plainly and permanently on their identification plate in conformance with the applicable requirements prescribed in § 179.24(a).

17. In § 179.200–24, paragraph (c) is added to read as follows:

§ 179.200–24 Stamping.

* * * * *

(c) Authorized DOT non-pressure tank car tanks with stainless steel identification plates may have their DOT Specification and other required information stamped plainly and permanently on their identification plate instead of into the metal of the tank in conformance with the applicable requirements prescribed in § 179.24(a).

18. In § 179.201–10, paragraph (b) is added to read as follows:

§ 179.201–10 Water capacity marking.

* * * * *

(b) After December 31, 2011, authorized DOT non-pressure tank cars that comply with this section and are equipped with stainless steel identification plates may have the water capacity of the tank in pounds prescribed in the first sentence of paragraph (a) of this section stamped plainly and permanently on their identification plate instead of into the

metal of the tank, or immediately below the stamped marks specified in § 179.200–24(a) in conformance with the applicable marking requirements prescribed in § 179.24(a).

19. In § 179.220–25, the existing text is redesignated as paragraph (a) and paragraph (b) is added to read as follows:

§ 179.220–25 Stamping.

* * * * *

(b) Authorized Class DOT–115 non-pressure tank car tanks with stainless steel identification plates may have their DOT Specification and other required information stamped plainly and permanently on their identification plate instead of into the metal of the tank in conformance with the applicable requirements prescribed in § 179.24(a).

20. In § 179.300–13, paragraph (b) is revised to read as follows:

§ 179.300–13 Venting, loading and unloading valves.

* * * * *

(b) Threads for openings must be National Gas Taper Threads (NGT) tapped to gauge, clean cut, even and without checks. Threads for the clean-out/inspection ports of DOT Specification 110A multi-unit tank car tanks may be straight threads instead of taper threads. The straight threads must meet the requirements of § 178.61(h)(3)(i) and (iii). Taper threads must comply with § 178.61(h)(3)(i) and (ii). Hex plugs may be secured to threaded boss ports using stainless steel safety wire of adequate strength and design for its intended use.

PART 180—CONTINUING QUALIFICATION AND MAINTENANCE OF PACKAGINGS

21. The authority citation for part 180 continues to read as follows:

Authority: 49 U.S.C. 5101–5128; 49 CFR 1.53.

22. Revise § 180.501 to read as follows:

§ 180.501 Applicability.

(a) This subpart prescribes requirements, in addition to those contained in parts 107, 171, 172, 173, 174, and 179 of this subchapter, applicable to any person who manufactures, fabricates, marks, maintains, repairs, inspects, or services tank cars to ensure continuing qualification.

(b) This subpart also establishes the minimum acceptable framework for an owner’s qualification program for tank cars and components. Owners should follow this subpart in developing their written procedures (work instructions), as required under § 179.7(d), for use by tank car facility employees. The owner’s qualification program for each tank car, or a fleet of tank cars, must identify where to inspect, how to inspect, and the acceptance criteria. Tank car facilities must incorporate the owner’s qualification program in their quality assurance program, as required under § 179.7(a)(2), (b)(3), and (b)(5).

(c) Any person who performs a function prescribed in this part must perform that function in accordance with this part.

(d) Where, in this subpart, a person is required to make documents available to FRA upon request, such request means that credentialed FRA personnel or an authorized representative of the Department may view the documents and make copies of them. The document owner’s may seek confidential treatment of the documents presented. See § 105.30.

23. Revise § 180.503 to read as follows:

§ 180.503 Definitions.

The following definitions and those contained in §§ 171.8 and 179.2 of this subchapter apply:

Corrosive to the tank or service equipment means a material identified in Appendix D of this part or a material when in contact with the inner shell of the tank or service equipment may have a severe corrosion rate on steel or aluminum based on criteria in § 173.137(c)(2).

Defects mean abrasions; corrosion; cracks; dents; flaws in welds; distortions; erosion; missing, damaged, leaking or loose components and fasteners; and other conditions or imperfections that may make a tank car unsafe for transportation and/or require it to be removed from service.

Design level of reliability and safety means the level of reliability and safety built into the tank car and therefore inherent in its specification, design, and manufacture.

Interior heater system means a piping system located within the tank shell that uses a fluid medium to heat the lading for the purposes of unloading.

Lining/Coating owner means the person responsible for bearing the costs of maintaining the lining/coating.

Maintenance means inspection, upkeep, or preservation, including ordinary repairs necessary and proper.

Modification means any change to a tank car that affects the certificate of construction prescribed in § 179.5, including an alteration prescribed in § 179.6, or conversion.

Objectively reasonable and articulable belief means a belief based on particularized and identifiable facts that provide an objective basis to believe or suspect that a tank car or a class or design of tank cars may be in an unsafe operating condition.

Qualification, as relevant to a tank car, means the car conforms to the specification to which it was built or modified, to the requirements of this subpart, to the requirements of the AAR Tank Car Manual (IBR, see § 171.7 of this subchapter) and to the owner’s acceptance criteria. Qualification is accomplished by careful and critical examination using inspections and tests based on a written program that verifies conformance, followed by a written representation of that conformance. A tank car that passes the appropriate tests for its specification, has a signed test report, is marked to denote this passage, and is considered qualified for hazardous materials transportation under this subchapter.

Qualification of	Tests and Inspections	§ 180.509(*)
Tank	Visual Inspection	d
	Structural Integrity Inspection	e
	Thickness Test: Note 1	f
	Safety System Inspection	h
	Leakage Pressure Test	j
Service Equipment	Service Equipment	k
Lining/Coating	Linings and Coatings	i

Note 1: Paragraph (f)(2) in § 180.509 of this part may require thickness tests at an interval different from the other items for qualification of the tank.

Railworthy, Railworthiness for a tank car, means that the tank, service equipment, safety systems, and all other components are capable of performing their intended function until their next qualification.

Reactive to the tank or service equipment means a material that, in contact with the inner shell of the tank, or with the service equipment, may react to produce heat, gases, and/or pressure which could substantially reduce the effectiveness of the packaging or the safety of its use.

Reinforced tank shell butt weld means the portion of a butt weld covered by a reinforcing plate.

Reinforcing plate means an attachment welded directly to the tank supporting major structural components for the purpose of preventing damage to the tank through fatigue, overstraining, denting, puncturing, or tearing.

Reliability means the quantified ability of an item or structure to operate without failure for the specified period of its design life or until its next qualification.

Representation means attesting through documenting, in writing or by marking on the tank (or jacket), that a tank car is qualified and railworthy.

Safety system means one or more of the following: thermal protection systems, insulation systems, tank head puncture resistance systems, coupler vertical restraint systems, and systems used to protect discontinuities (e.g., skid protection and protective housings) as required under the HMR.

Service equipment means equipment used for loading and unloading (including an interior heating system), sampling, venting, vacuum relief, pressure relief, and measuring the amount of lading or the lading temperature.

Service equipment owner means the party responsible for bearing the cost of the maintenance of the service equipment.

Tank car owner means the person to whom a rail car's reporting marks are assigned, as listed in the Universal Machine Language Equipment Register (UMLER).

24. In § 180.507, the first sentence in paragraph (b)(2) is revised to read as follows:

§ 180.507 Qualification of tank cars.

* * * * *

(b) * * *

(2) For each tank car conforming to and used under a special permit (exemption) issued before October 1, 1984, which authorized the transportation of a cryogenic liquid in a tank car, the owner or operator must remove the exemption number stenciled on the tank car and mark the tank car with the appropriate Class DOT-113 specification followed by the applicable Special Permit (DOT SP) number. * * *

* * * * *

25. Amend § 180.509 as follows:

a. Revise paragraphs (a), (b)(1), (2), and (4), (c) introductory text heading, and (c)(3);

b. Add paragraphs (d)(1)(i) and (ii);

c. Revise paragraphs (d)(2) through (6);

d. Add paragraph (d)(7);

e. Revise paragraphs (e) and (f);

f. Redesignate paragraph (g)(1) as (g) and revise it;

g. Revise paragraphs (h) through (l); and

h. Add paragraph (m).

The revisions and additions read as follows:

§ 180.509 Requirements for qualification of specification tank cars.

(a) *General.* Each tank car owner must ensure that a tank car facility:

(1) Inspects and tests each item according to the requirements specified in this section;

(2) Evaluates each item according to the acceptable results of inspections and tests specified in § 180.511;

(3) Marks each tank car as specified in § 180.515 for each item that successfully passes an inspection and test, and

(4) Prepares the documentation as required by § 180.517 for each item qualified under this section. A copy of the documentation required by § 180.517 must be sent to the builder or owner as appropriate and according to the builder's or owner's instructions.

(b) *Conditions requiring inspection and test of tank cars.* Without regard to the qualification compliance date requirements of any paragraph of this section, an owner of a tank car or a lining or coating must have an appropriate inspection and test according to the type of defect and the type of maintenance or repair performed if:

(1) The tank car shows evidence of abrasion, corrosion, cracks, dents, distortions, defects in welds, or any other condition that may make the tank car unsafe for transportation,

(2) The tank car was in an accident and shows evidence of damage to an extent that may adversely affect its capability to retain its contents or to otherwise remain railworthy.

* * * * *

(4) The Associate Administrator for Railroad Safety, FRA, requires it based on the existence of an objectively reasonable and articulable belief that a tank car or a class or design of tank cars may be in an unsafe operating condition.

(c) *Frequency of qualification.* * * *

(3) Fusion welded tank cars must be inspected and tested to be qualified and maintained in accordance with the following table. All qualification requirements need not be done at the same time or at the same facility.

Frequency of qualification inspection and tests.

Section 180.509(*)	Description	Maximum interval
d	Visual inspection	10 years.
e	Structural integrity inspection	10 years.
f	Thickness test	See § 180.509(f).
h	Safety Systems	10 years.
i	Lining or coating (for materials corrosive or reactive to the tank) (See definitions at § 180.503)	See § 180.509(i).
j	Leakage pressure test	After reassembly.
k	Service equipment (including pressure relief device)	See § 180.509(k).

(d) * * *
(1) * * *

(i) Except in areas where tank structure, insulation, head protection, thermal protection, internal linings or coatings preclude it, an internal and

external inspection of the tank shell and heads for abrasion, corrosion, cracks, dents, distortions, flaws in welds, or any other condition that may make the tank car unsafe for transportation; and

(ii) For DOT 115 class tank cars, an internal inspection of the inner container and external inspection of the outer shell and heads for defects in welds, or any other condition that may

make the tank car unsafe for transportation;

(2) When a lining, coating, head protection, insulation, or thermal protection is removed in part or in whole, the exposed surface, *i.e.*, internal and external, of the tank must be visually inspected for defects in welds, or any other condition that may make the tank car unsafe for transportation. This inspection must precede any application or reapplication of a lining or coating.

(3) An inspection of the service equipment, including gaskets, for indications of corrosion and other conditions that may make the tank car unsafe for transportation;

(4) An inspection for missing or loose bolts, nuts, or elements that may make the tank car unsafe for transportation;

(5) An inspection of all closures on the tank car for conditions that may make the tank car unsafe for transportation, including an inspection of the protective housings for proper condition;

(6) An inspection of excess flow valves with threaded seats for tightness; and

(7) An inspection of the required markings on the tank car for legibility.

(e) *Structural integrity inspections and tests.* (1) Each tank car owner must ensure the structural elements on the tank car qualify with the applicable requirements of this subchapter. At a minimum, the structural integrity inspection and test must include:

(i) All transverse fillet welds greater than 0.64 cm (0.25 inch) within 121.92

cm (4 feet) of the bottom longitudinal centerline except body bolster pad attachment welds;

(ii) The termination of longitudinal fillet welds greater than 0.64 cm (0.25 inch) within 121.92 cm (4 feet) of the bottom longitudinal centerline; and

(iii) The tank shell butt welds within 60.96 cm (2 feet) of the bottom longitudinal centerline, unless the tank car owner can determine by analysis (*e.g.*, finite element analysis, damage-tolerance analysis, or service reliability assessment) that the structure will not develop defects that reduce the design level of safety and reliability or fail within its operational life or prior to the next required inspection. The owner must maintain all documentation used to make such determination at its principal place of business and make the data available to FRA or an authorized representative of the Department upon request.

(2) For DOT 115 class tanks, paragraphs (e)(1)(i—iii) of this section apply only to the outer shell fillet welds and to the non-reinforced exposed outer shell butt welds.

(3) The inspection requirements of paragraph (e)(1)(iii) of this section do not apply to reinforced tank shell butt welds until the time of lining removal or application for tank cars with an internal lead, glass, or rubber lining.

(4) Each tank car facility must inspect and test the elements identified in paragraph (e)(1) of this section by one or more of the following methods:

(i) Dye penetrant testing (PT);

(ii) Radiographic examination (RT);
 (iii) Magnetic particle testing (MT);
 (iv) Ultrasonic testing (UT); and
 (v) Direct, remote, or enhanced visual inspection, using, for example, magnifiers, fiberscopes, borescopes, and/or machine vision technology (VT).

(f) *Thickness tests.* (1) The tank car owner must ensure that each tank car facility measures the thickness of the tank car shell, heads, sumps, domes, and nozzles on each tank car by using a device capable of accurately measuring the thickness to within ± 0.05 mm (± 0.002 inch).

(2) The tank car owner must ensure that each tank car has a thickness test measurement:

(i) At the time of an internal lining or coating application or replacement, or

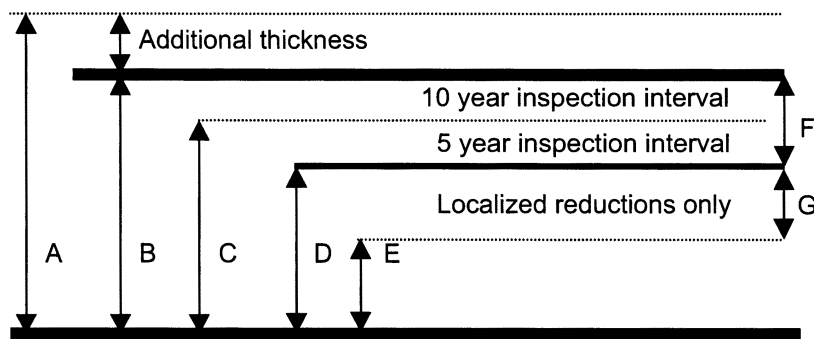

(ii) At least once every ten (10) years for a tank that does not have an internal lining or coating, or

(iii) At least once every five (5) years for a tank that does not have an internal lining or coating when:

(A) The tank is used to transport a material that is corrosive or reactive to the tank (see Appendix D of this part) or service equipment as defined § 180.503, and

(B) The remaining shell and head thickness is at or below line C in Figure A of this paragraph.

Figure A
Tank and Shell Thickness Qualification Frequencies

Where:

A As-built tank shell or head thickness with additional thickness.

B Required minimum tank shell or head thickness after forming per part 179.

C Inspection frequency adjustment point (design minimum shell or head thickness, minus $\frac{1}{2}$ of the table value in paragraph (g) of this section).

D Condemning limit for general corrosion (required minimum shell or head thickness, minus the value in paragraph (g) of this section).

E Condemning limit for localized corrosion (required minimum shell or head thickness, minus the table value in paragraph (g) of this section, minus 1.58 mm ($\frac{1}{16}$ -inch)). See Note 1 in paragraph (g) of this section for diameter limitations and minimum separation distances.

F Allowable shell or head thickness reduction (table value in paragraph (g) of this section).

G Additional thickness reduction for localized areas in paragraph (g) of this section.

(3) For a localized repair of an internal lining or internal coating where a material corrosive to the tank or service equipment as defined § 180.503 has contacted the tank, a qualified individual must verify conformance with paragraph (g) of this section by measuring the shell or head in the area of the repair. The thickness test applies only to the non-lined or coated repaired area, and is not a qualification event.

Modification of the tank stencil is not required.

(4) Operation of a tank car below the condemning limit for general corrosion or the condemning limit for localized corrosion (as shown in Figure A of this section) is prohibited.

(5) For sumps, domes, nozzles, and nozzle reinforcements, the tank car owner must determine if any reduction in wall thickness affects the design levels of reliability and safety built into sump, dome, nozzle, or nozzle reinforcement. Each tank car owner

must maintain at its principal place of business documentation describing the allowable thickness reductions for sumps, domes, and nozzles, and nozzle reinforcements. This documentation must be made available to FRA or an authorized representative of the Department upon request.

(6) After repairs, alterations, conversions, modifications, or blasting of tank car that results in a reduction of the tank's thickness, a qualified individual must measure the thickness of the tank in the area of reduced

thickness to ensure that the thickness of the tank conforms to paragraph (g) of this section.

(g) *Service life thickness allowance.* A tank car found with a thickness below the required minimum thickness after forming for its specification, as stated in part 179 of this subchapter, may continue in service if any reduction in the required minimum thickness is not more than that provided in the following table:

ALLOWABLE SHELL THICKNESS REDUCTIONS

Marked tank test pressure	Top shell and tank head	Bottom shell
60 psig < 200 psig	3.17 mm	1.58 mm
	1/8 inch	1/16-inch
≥200 psig	0.79 mm	0.79 mm
	1/32 inch	1/32-inch

Note 1. A tank car owner may add an extra 1.58 mm (1/16 inch) to the values in the table for local reductions. Local reductions are those that do not exceed 20.32 linear centimeters (8 linear inches) measured at the longest diameter, and are separated from the other local reductions by at least 40.64 cm (16 inches).

Note 2. Any reduction in the tank car shell thickness may not affect the structural strength of the tank car to the extent that the tank car no longer conforms to Section 6.2 of the AAR Specifications for Tank Cars (IBR, see § 171.7 of this subchapter).

Note 3. For DOT 115 class tank cars, shell thickness reductions apply only to the outer shell of the tank car. There is no shell or head thickness reduction authorized for the inner tank.

(h) *Safety system inspections.* Each tank car owner must ensure qualification of the tank car safety systems. However, inspections of foam or cork insulation systems are not required.

(i) *Lining and coating inspection and test.* (1) At a minimum, the owner of a lining or coating applied to protect a tank used to transport a material that is corrosive or reactive to the tank must ensure accomplishment of an inspection adequate to detect defects or other conditions that could reduce the reliability of the tank. In addition, the owner of a lining of tank cars used to transport hazardous materials must ensure the lining complies with § 173.24(b)(2) and (3) of this subchapter.

(2) The owner of the lining or coating must establish and maintain a record of the service life of the lining or coating and commodity combination, that is, the specific hazardous materials that were loaded into a tank and the lining or coating in place at the time of loading. The owner of the lining or coating must use its knowledge of the service life of each lining or coating and commodity combination to establish an appropriate inspection interval for that lining or coating and commodity combination. This interval must not exceed eight (8) years, unless the lining or coating owner can establish, document, and show that the service history or scientific analysis of the lining or coating and commodity pairing supports a longer inspection

interval. The owner must maintain at its principal place of business a written procedure for collecting and documenting the life of the lining or coating applied within the tank car. The lining or coating owner must provide this documentation, including inspection and test, repair, removal, and application procedures, to the FRA or car owner upon request. In addition, any person who offers a loaded tank car into transportation must provide commodity information to the car owner and the owner of the lining or coating upon request.

(3) The owner of the lining or coating must provide the test method and acceptance criteria for the lining or coating to the tank car owner and to the person responsible for qualifying the lining or coating. The tank car facility inspecting and testing the lining or coating must follow the inspection and test requirements, including the acceptance requirements, established by the lining or coating owner.

(j) *Leakage pressure test.* Unless the design of the service equipment arrangement precludes it (e.g., there is no fitting to pressurize the tank), each owner of a tank car must ensure that the tank, service equipment, and closures installed, replaced, or reinstalled on the tank car are leak tested. The test may be conducted with the lading in the tank. When the test pressure exceeds the start-to-discharge or burst pressure of a pressure relief device, the device must

be rendered inoperative. The written procedures and test method for leak testing must ensure for the sensitivity and reliability of the test method and for the serviceability of components to prevent premature failure. This section does not apply to facilities that remove closures for the sole purpose of loading or unloading the lading (e.g., blind flanges, pipe plugs, etc.).

(k) *Service equipment inspection and test.* (1) Each tank car owner must ensure for the qualification of tank car service equipment at least once every ten (10) years. The tank car owner must analyze the service equipment inspection and test results for any given lading and, based on the analysis, adjust the inspection and test frequency to ensure that the design level of reliability and safety of the equipment is met. The owner must maintain at its principal place of business all supporting documentation used to make such analyses and inspection and test frequency adjustments. The supporting documentation must be made available to FRA or an authorized representative of the Department upon request.

(2) Each tank car facility must qualify service equipment, including reclosing pressure relief devices and interior heater systems in accordance with Appendix D of the AAR Specifications for Tank Cars (IBR, see § 171.7 of this subchapter).

(l) *Alternative inspection and test procedures.* When approved by the

Associate Administrator for Railroad Safety, FRA, a tank car owner, or a lining or coating owner may use an alternative inspection and test procedure or interval based on a damage-tolerance analysis (that must include a determination of the probable locations and modes of damage due to fatigue, corrosion, and accidental damage), or based on a service reliability assessment (that must be supported by analysis of systematically collected data) in lieu of the other requirements of this section.

(m) *Qualification compliance date for tank cars.* (1) After July 1, 2000, each tank car with a metal jacket or with a thermal protection system must have an inspection and test conforming to this section no later than the date the tank car requires a periodic hydrostatic pressure test (*i.e.*, the marked due date on the tank car for the hydrostatic test).

(2) For insulated or jacketed tank cars on a 20-year periodic hydrostatic pressure test interval (*i.e.*, Class DOT 103W, 104W, 111A60W1, 111A100W1, and 111A100W3 tank cars), the next inspection and the test date is the midpoint between the compliance date in paragraph (m)(1) of this section and the remaining years until the tank would have had a hydrostatic pressure test.

26. In § 180.511, revise the introductory text and paragraphs (d) and (g) and add paragraph (h) to read as follows:

§ 180.511 Acceptable results of inspections and tests.

Provided it conforms to other applicable requirements of this subchapter, a tank car is qualified for use if it successfully passes the inspections and tests set forth below conducted in accordance with this subpart. A representation of that qualification must consist of marking the tank in accordance with § 180.515.

* * * * *

(d) *Safety system inspection.* A tank car successfully passes the safety system inspection when each thermal protection system, tank head puncture resistance system, coupler vertical restraint system, and system used to protect discontinuities (*e.g.*, breakage grooves on bottom outlets and protective housings) on the tank car conform to this subchapter and show no indication of a defect that may reduce reliability before the next inspection and test interval.

* * * * *

(g) *Hydrostatic test.* A Class 107 tank car, the inner tank of a Class 115 tank car, or a riveted tank car successfully passes the hydrostatic test when it

shows no leakage, distortion, excessive permanent expansion, or other evidence of weakness that might render the tank car unsafe for transportation service.

(h) *Service equipment.* A tank car successfully passes the service equipment inspection and test when this equipment conforms to this subchapter and AAR Appendix D (IBR, see § 171.7 of this subchapter) and shows no indication of a defect that may reduce reliability before the next inspection and test interval.

27. Revise § 180.513 to read as follows:

§ 180.513 Repairs, alterations, conversions, and modifications.

(a) To work on tank cars, a tank car facility must comply with the applicable requirements of this subpart, the AAR Specifications for Tank Cars (IBR, see § 171.7 of this subchapter), and the owner's requirements.

(b) An owner of a tank car or component is responsible for ensuring that each tank car facility complies with the owner's maintenance program by conducting periodic analyses and surveillance activities.

(c) Unless the exterior tank car shell or interior tank car jacket has a protective coating, after a repair that requires the complete removal of the tank car jacket, the exterior tank car shell and the interior tank car jacket must have a protective coating applied to prevent the deterioration of the tank shell and tank jacket. Previously applied coatings that still provide effective protection need not be covered over.

(d) After repair, replacement, or qualification of tank car service equipment, the tank service equipment must successfully pass the leak test prescribed in § 180.509(j).

28. Revise § 180.515 to read as follows:

§ 180.515 Markings.

(a) When a tank car passes the required inspection and test with acceptable results, the tank car facility must mark the date of the inspection and test and the due date of the next inspection and test qualified on the tank car in accordance with Appendix C of the AAR Specifications for Tank Cars (IBR, see § 171.7 of this subchapter). When a tank car facility performs multiple inspections and tests at the same time, one date may be used to satisfy the requirements of this section. One date also may be shown when multiple inspections and test have the same due date. Dates displayed on the "consolidated stencil" (see Appendix C of the AAR specifications for Tank Cars) take precedence over dates modified,

and not stenciled, pursuant to interval adjustments for service equipment, linings, and granted alternative inspection intervals.

(b) Converted DOT 105, 109, 112, 114, or 120 class tank cars must have the new specification and conversion date permanently marked in letters and figures at least 0.95 cm (0.375 inch) high on the outside of the manway nozzle or the edge of the manway nozzle flange on the left side of the car. The marking may have the last numeral of the specification number omitted (*e.g.*, "DOT 111A100W" instead of "DOT 111A100W1").

(c) When qualified within six months of installation and protected from deterioration, the test date marking of a reclosing pressure relief device is the installation date on the tank car.

29. In § 180.517, revise paragraph (a), paragraph (b) introductory text, and paragraphs (b)(3), (4), and (7), and add paragraph (b)(8) to read as follows:

§ 180.517 Reporting and record retention requirements.

(a) *Certification and representation.* Each owner of a specification tank car must retain the certificate of construction (AAR Form 4–2) and related papers certifying that the manufacture of the specification tank car identified in the documents is in accordance with the applicable specification. The builder's signature on the certificate of construction, and the marking of the tank car with the tank specification is the representation that all of the appropriate inspections and tests were successfully performed to qualify the tank for use. The owner must retain the documents throughout the period of ownership of the specification tank car and for one year thereafter. Upon a change of ownership, the requirements in Section 1.3.15 of the AAR Specifications for Tank Cars (IBR, see § 171.7 of this subchapter) apply. The builder of the car or a facility performing work on the car may retain copies of relevant records.

(b) *Inspection and test reporting.* Each tank car that is inspected and tested as specified in § 180.509 must have a written report, in English, prepared according to this paragraph. For qualification inspections and tests performed after initial service, marking the tank car with the specification (or retaining the specification marking on the tank) is the representation that all of the appropriate inspections and tests were successfully performed to qualify the car for continued use. The report may be created and retained electronically, but, upon request by FRA for a copy of the report, it must be made

available in common readable form. The owner must retain a copy of the inspection and test reports until successfully completing the next inspection and test of the same type. The inspection and test report must include the following:

* * * * *

(3) Tank car reporting mark and number;

(4) Tank car specification;

* * * * *

(7) The name and address of the tank car facility and the name and signature of inspector; and

(8) The unique code (station stencil) identifying the facility.

30. Add Appendix D to Part 180 to read as follows:

Appendix D to Part 180—Hazardous Materials Corrosive to Tanks or Service Equipment

This list contains materials identified either by proper shipping name in 49 CFR 172.101 or shipped under an “n.o.s.” shipping description that, under certain conditions, can corrode carbon steel tanks or service equipment at a rate that will reduce the design level of reliability and safety of the tank or equipment to an unsafe level before the next qualification. Materials identified on this list are considered corrosive to the tank or service equipment.

While every effort was made to identify materials deemed corrosive to the tank or service equipment, owners and operators are cautioned that this list may not be inclusive. Tank car owners and operators are reminded of their duty to ensure that no in-service tank will deteriorate below the specified

minimum thickness requirements in this subchapter. See § 180.509(f)(3). In addition, FRA states a tank car owner must designate an interior coating or lining appropriately based on their knowledge of the chemical and not rely simply on this list. Regarding future thickness tests, this list may also be modified based on an analysis of the test results by the car owner, the Department of Transportation, or the Association of American Railroads’ Tank Car Committee.

Hazardous Materials Table Proper Shipping Names (See § 172.101)

Acetic acid, glacial *or* Acetic acid solution
 Aluminum chloride, solution
 Arsenic acid, liquid
 Arsenic acid, solid
 Butyric acid
 Ferric chloride, solution
 Fertilizer ammoniating solution (*Nitrogen fertilizer solution*)
 Fluoroboric acid
 Fluorosilicic acid
 Formaldehyde, solutions, flammable
 Formaldehyde, solutions
 Hydrobromic acid
 Hydrochloric acid Hydrochloric acid solution
 Hydrofluoric acid and Sulfuric acid mixtures
 Hydrofluoric acid
 Hydrogen peroxide and peroxyacetic acid mixtures, stabilized
 Hydrogen, peroxide, aqueous solutions
 Hydrogen peroxide, stabilized *or* Hydrogen peroxide aqueous solutions, stabilized
 Hypochlorite solutions
 Methyl methacrylate monomer, stabilized
 Nitric acid
 Phenyl phosphorus dichloride
 Phenyl phosphorus thiodichloride
 Phosphoric acid solution
 Phosphoric acid, solid
 Phosphorus trichloride (*Phosphorus chloride*)

Sodium chlorate
 Sodium chlorate, aqueous solution
 Sodium hydrosulfide
 Sulfur, molten
 Sulfuric acid
 Sulfuric acid, fuming
 Sulfuric acid, spent
 Zinc chloride, anhydrous
 Zinc chloride, solution

Materials Transported Under an “N.O.S.” Description

Benzoic acid (Environmentally hazardous substance, liquid, n.o.s., (RQ 5,000 pounds)
 Bisulphites, aqueous solution, n.o.s. (Ammonium bisulfide)
 Black liquor (Corrosive liquids, n.o.s. (contains sulfuric acid))
 Calcium lignosulfonate (not regulated under this subchapter)
 Hexanoic acid (Corrosive liquids, n.o.s. (contains hexanoic acid))
 Lignin liquor (not regulated under this subchapter)
 Lithium chloride (not regulated under this subchapter)
 Sodium polyacrylate (not regulated under this subchapter)
 Titanium sulfate solution (Corrosive liquids, n.o.s. (contains sulfuric acid))
 White liquor (not regulated under this subchapter)

Issued in Washington, DC, on August 10, 2011 under authority delegated in 49 CFR part 106.

R. Ryan Posten,

Senior Director for Hazardous Materials Safety.

Notices

Federal Register

Vol. 76, No. 160

Thursday, August 18, 2011

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Document No. AMS-FV-11-0050, FV-11-326]

United States Standards for Grades of Grapefruit Juice

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: The Agricultural Marketing Service (AMS), prior to undertaking research and other work associated with revising official U.S. grade standards, is soliciting comments on a request to revise the United States Standards for Grades of Grapefruit Juice. AMS received a petition from the Florida Citrus Processors Association asking AMS to consider revising the current U.S. grade standards for grapefruit juice to account for advances in industry processing technology.

DATES: Comments must be received by October 17, 2011.

ADDRESSES: Interested persons are invited to submit written comments on the Internet at <http://www.regulations.gov> or to Brian E. Griffin, Inspection and Standardization Section, Processed Products Branch, Fruit and Vegetable Programs, Agricultural Marketing Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., Room 0709, South Building; STOP 0247, Washington, DC 20250; telephone (202) 720-4693; fax (202) 690-1527, e-mail brian.griffin@ams.usda.gov. Comments should make reference to the date and page number of this issue of the **Federal Register** and will be made available for public inspection at the above office during regular business hours.

Please be advised that all comments submitted in response to this notice will be included in the record and will be

made available to the public on the Internet via <http://www.regulations.gov>. Also, the identity of the individuals or entities submitting the comments will be made public. The U.S. Standards for Grades of Grapefruit Juice identified in this notice are available either at the above address or by accessing the AMS Web site at: <http://www.ams.usda.gov/processedinspection>.

FOR FURTHER INFORMATION CONTACT: Brian E. Griffin, Inspection and Standardization Section, Processed Products Branch, Agricultural Marketing Service, U.S. Department of Agriculture, telephone (202) 720-5021; or fax (202) 690-1527.

SUPPLEMENTARY INFORMATION:

Background

AMS received a petition from the Florida Citrus Processors Association, an association of citrus producers, requesting revisions to the United States Standards for Grades of Grapefruit Juice. These standards are issued under the Agricultural Marketing Act of 1946 (7 U.S.C. 1621-1627). The petitioners are requesting the removal of the maximum limit for "free and suspended pulp" (referred to in the industry as "sinking pulp") from the U.S. grade standards for all forms of grapefruit juice.

The current grade standards, effective since September 12, 1983, provide that grapefruit juice from concentrate, grapefruit juice, and frozen concentrated grapefruit juice establish limits for maximum free and suspended pulp as follows: Grade A—10 percent by volume, Grade B—15 percent by volume. Concentrated grapefruit juice for manufacturing requirements for maximum free and suspended pulp are as follows: Grade A—10 percent by volume, and Grade B—12 percent by volume.

The petitioners believe that, with respect to maximum values for free and suspended pulp, the existing U.S. Standards for Grades of Grapefruit Juice do not take into account modern extraction and finishing technologies, nor are they supported by evidence of a correlation between these criteria and acceptable flavor. The petitioners are requesting that AMS revise the U.S. Standards for Grades of Grapefruit Juice by removing any parameters for maximum free and suspended pulp.

The petitioners believe that removing the free and suspended pulp values

from the grade standards would allow processors to process the entire grapefruit crop without resorting to expensive technologies that increase the cost of juice with no concomitant benefit. More mature grapefruit tends to be sweeter, but when juiced tends to cause the product to exceed maximum free and suspended pulp values. The petitioners have submitted research data covering a six-season period which illustrates levels of sinking pulp vs. naringin, and levels of sinking pulp vs. limonin using various extractor setups. The petitioners have also submitted data on a sensory evaluation performed by the University of Florida on consumer acceptability of grapefruit juice with two free and suspended pulp levels. A copy of the petitioner's request and supporting documentation is located on the Internet at <http://www.regulations.gov> along with the current U.S. Standards for Grades of Grapefruit Juice.

Agricultural Marketing Service

AMS is soliciting comments on the proposed revision of the U.S. Standards for Grades of Grapefruit Juice. In particular, AMS would welcome comments and information regarding the probable impact on processors and growers. Further details are provided in the petition and are available from Brian E. Griffin at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section or can be found on the Internet at <http://www.regulations.gov>. This notice provides for a 60-day comment period for interested parties to comment on the proposed revision of the U.S. Standards for Grades of Grapefruit Juice.

Authority: 7 U.S.C. 1621-1627.

Dated: August 10, 2011.

David R. Shipman,

Acting Administrator, Agricultural Marketing Service.

BILLING CODE 3410-02-P

DEPARTMENT OF AGRICULTURE

Forest Service

Mendocino Resource Advisory Committee

AGENCY: Forest Service, USDA.

ACTION: Notice of meeting.

SUMMARY: The Mendocino County Resource Advisory Committee will meet September 16, 2011 (RAC) in Willits, California. Agenda items to be covered include: (1) Approval of minutes, (2) Handout Discussion (3) Public Comment, (4) Financial Report (5) Sub-committees (6) Matters before the group (7) Discussion—approval of projects (8) Next agenda and meeting date.

DATES: The meeting will be held on September 16, 2011, from 9 a.m. until 12 noon.

ADDRESSES: The meeting will be held at the Mendocino County Museum, located at 400 E. Commercial St. Willits, California.

FOR FURTHER INFORMATION CONTACT: Roberta Hurt, Committee Coordinator, USDA, Mendocino National Forest, Covelo Ranger District, 78150 Covelo Road, Covelo, CA 95428. (707) 983-6658; e-mail: windmill@willitsonline.com.

SUPPLEMENTARY INFORMATION: The meeting is open to the public. Persons who wish to bring matters to the attention of the Committee may file written statements with the Committee staff by September 10, 2011. Public comment will have the opportunity to address the committee at the meeting.

Dated: August 11, 2011.

Lee Johnson,

Designated Federal Official.

BILLING CODE 3410-11-P

DEPARTMENT OF AGRICULTURE

Forest Service

Butte County Resource Advisory Committee (RAC)

AGENCY: Forest Service, USDA.

ACTION: Notice of Meeting.

SUMMARY: The Butte County Resource Advisory Committee (RAC) will hold a meeting on August 29, 2011 in Oroville, CA. The purpose of the meeting is to review Cycle 2 project applications for potential funding recommendations to Lassen, Plumas or Mendocino National Forest Supervisors. The funding is made available under Title II provisions of the Secure Rural Schools and Community Self-Determination Act of 2000. This is the last cycle of funding under the current legislation.

DATES & ADDRESSES: The meeting will take place from 6:30-9 p.m. at the Feather River Ranger District Office, 875 Mitchell Avenue, Oroville, CA.

FOR FURTHER INFORMATION CONTACT: (or for special needs): Lee Anne Schramel

Taylor, Forest Coordinator, USDA, Plumas National Forest, P.O. Box 11500/159 Lawrence Street, Quincy, CA 95971; (530) 283-7850; or by e-mail eataylor@fs.fed.us. Other RAC information may be obtained at <http://www.fs.usda.gov> and <http://www.fs.fed.us/srs>.

Dated: August 11, 2011

Laurence Crabtree,

Deputy Forest Supervisor.

Rural Housing Service

Notice of Funds Availability for Section 514 Farm Labor Housing Loans and Section 516 Farm Labor Housing Grants for Off-Farm Housing for Fiscal Year (FY) 2011

AGENCY: Rural Housing Service, USDA.

ACTION: Notice; correction.

SUMMARY: This notice corrects the scoring points available to a Notice published in the **Federal Register** on July 7, 2011 regarding Funds Availability for Section 514 Farm Labor Housing Loans and Section 516 Farm Labor Housing Grants for Off-Farm Housing for FY 2011. The correction changes the scoring under section VI. Pre-Application Review Information, (A)(1)(v)(b) entitled Energy Conservation for Purchase and Substantial Rehabilitation for an existing non-Farm Labor Housing (FLH) property. The scoring has changed to increase the maximum points from 16 points to 32 points.

FOR FURTHER INFORMATION CONTACT:

Mirna Reyes-Bible, Finance and Loan Analyst, Multi-Family Housing Preservation and Direct Loan Division, STOP 0781 (Room 1263-S), USDA Rural Development, 1400 Independence Avenue, SW., Washington, DC 20250-0781, telephone: (202) 720-1753 (This is not a toll free number), or via e-mail: Mirna.ReyesBible@wdc.usda.gov. If you have questions regarding Net Zero Energy Consumption and Energy Generation please contact Carlton Jarratt, Finance and Loan Analyst, Multi-Family Housing Preservation and Direct Loan Division at (804) 287-1524 or via e-mail: carlton.jarrat@wdc.usda.gov.

Correction

In the notice beginning on page 39,813 in the issue of July 7, 2011, make the following correction under paragraph (b) entitled Energy

Conservation for Purchase and Substantial Rehabilitation for an existing non-FLH property. In the first column for page 39,818 replace the entire paragraph (b) with the following:

(b) *Energy Conservation for Purchase and Substantial Rehabilitation of an Existing Multifamily Property (maximum 32 points).* Pre-applications for the purchase and substantial rehabilitation of non-program MFH and related facilities in rural areas may be eligible to receive 32 points for the following initiatives:

Note: If you are participating in (1) The Green Communities program, you may not receive additional points for items listed under (2). In other words, you may participate in (1) and (3) or (2) and (3), but not all three:

(1) Participation in the Green Communities program by the Enterprise Community Partners, <http://www.enterprisecommunity.org>, will be awarded 30 points for any project that qualifies for the program. (30 points) At least 30 percent of the points needed to qualify for the Green Communities program must be earned under the Energy Efficiency section of the Green Communities qualification program; or,

(2) Energy conservation points can be awarded for the following energy conservation measures only when the applicant is not enrolled in Green Communities and conservation measures are listed in the preliminary plans for substantial rehabilitation. (maximum 20 points).

- Replacement of heating, ventilation and air conditioning (HVAC) equipment with Energy Star qualified heating, HVAC equipment. (3 points).

- Replacement of windows and doors with Energy Star qualified windows and doors. (3 points).

- Additional insulation is added to the property to exceed the required R-Value of those building elements in that area of the country per the International Energy Conservation Code 2009. Two points will be awarded if all exterior walls exceed insulation code and 1 point will be awarded if attic insulation exceeds code for a maximum of 3 points. (maximum 3 points).

- Reduction in building shell air leakage by at least 15 percent as determined by pre- and post-rehabilitation blower door testing on a sample of units. Building shell air leakage may be reduced through materials such as caulk, spray foam, gaskets, and house-wrap. Sealing of duct work with mastic, foil-backed tape, or aerosolized duct sealants can also help reduce air leakage. (3 points).

- 100 percent of installed appliances and exhaust fans are Energy Star qualified. (2 points).
 - 100 percent of installed water heaters as Energy Star qualified. (2 points).
 - 100 percent of toilets with flush capacity of more than 1.6 gallon flush capacity are replaced with new toilets with 1.6 gallon capacity or less, with Environmental Protection Agency (EPA) Water Sense label. (1 point).
 - 100 percent of showerheads are replaced with new showerheads with EPA Water Sense label. (1 point).
 - 100 percent of faucets are replaced with new faucets with EPA Water Sense label. (1 point).
 - 100 percent Energy-efficient lighting including Energy Star qualified fixtures, compact fluorescent replacement bulbs in standard incandescent fixtures, and Energy Star Ceiling Fans. (1 point); *and*,
- (3) Participation in local green/energy efficient building standards. Applicants, who participate in a city, county or municipality program, will receive an additional 2 points. The applicant should be aware of and look for additional requirements that are sometimes embedded in the third-party program's rating and verification systems. (2 points).

Dated: August 11, 2011.

Robert Lewis,

Acting Administrator, Housing and Community Facilities Programs.

BILLING CODE 3410-XV-P

ARCHITECTURAL AND TRANSPORTATION BARRIERS COMPLIANCE BOARD

On Behalf of the Accessibility Committee of the Federal Chief Information Officers Council; Listening Session Regarding Improving the Accessibility of Government Information

AGENCY: Federal Chief Information Officers Council, Architectural and Transportation Barriers Compliance Board.

ACTION: Notice of meeting.

SUMMARY: This notice announces a listening session that the Federal Chief Information Officers Council will be conducting to hear from the public on ways the federal government can take stronger steps toward improving the acquisition and implementation of accessible technology for people with disabilities. In order to better understand the needs of diverse

communities, the Federal Chief Information Officers Council, in collaboration with the Chief Acquisition Officers Council, the General Services Administration Office of Governmentwide Policy, and the U.S. Access Board, will hold a virtual listening session, where participants may either call in or log onto a Web site to participate and express concerns and propose ideas.

DATES: The listening session will be held on September 8, 2011 from 2 p.m. to 5 p.m. Eastern Time (E.T.).

ADDRESSES: The listening session will be held by telephone and online. Instructions on how to participate are at: <http://www.access-board.gov/sec508/session-instructions.htm>.

FOR FURTHER INFORMATION CONTACT: Tim Creagan, Office of Technical and Information Services, Architectural and Transportation Barriers Compliance Board, 1331 F Street, NW., Suite 1000, Washington, DC 20004-1111. Telephone (202) 272-0016 (voice) or (202) 272-0074 (TTY). e-mail address creagan@access-board.gov.

SUPPLEMENTARY INFORMATION: In 1998, Congress amended the Rehabilitation Act of 1973 to require Federal agencies to make their electronic and information technology accessible to people with disabilities. Inaccessible technology interferes with an ability to obtain and use information quickly and easily. Section 508 of the Rehabilitation Act (29 U.S.C. 794d) was created to eliminate barriers in information technology, open new opportunities for people with disabilities, and encourage development of technologies that will help achieve these goals. The law applies to all federal agencies when they develop, procure, maintain, or use electronic and information technology. Under Section 508, agencies must give employees with disabilities and members of the public with disabilities access to information that is comparable to access available to others without disabilities.

Effective implementation of Section 508 is an essential element of President Obama's principles of open government, requiring that all government and data be accessible to all citizens. In order for the goal of open government to be meaningful for persons with disabilities, technology must also be accessible, including digital content.

On July 19, 2010, the Office of Management and Budget (OMB) took steps to assure that the Federal government's progress in implementing Section 508 is stronger and achieves results more quickly by releasing a memorandum to agencies, titled

"Improving the Accessibility of Government Information" (see http://www.whitehouse.gov/sites/default/files/omb/assets/procurement_memo/improving_accessibility_gov_info_07192010.pdf).

The OMB has directed that a series of listening sessions be held to gain feedback on ways to improve Section 508 performance. The Federal Chief Information Officers Council, in collaboration with the Chief Acquisition Officers Council, the General Services Administration Office of Governmentwide Policy, and the U.S. Access Board, have held four listening sessions to engage citizens and federal employees and hear their concerns and ideas. Transcripts from the previous listening sessions can be found on the Federal Chief Information Officers Council Accessibility Committee webpage (<http://www.cio.gov/pages.cfm/page/Listening-Sessions>). This final listening session will be a virtual session, where participants may either call in or log onto a website to participate. The listening session will focus on what steps the federal government can take to increase the accessibility and usability of government information and data for persons with disabilities. Input from private industry is sought on the following questions:

- What is private industry doing to implement information technology (IT) accessibility that the federal government should follow?

- How can implementation of Section 508 be improved?

- What could the federal government ask for that would allow vendors to better show that their products meet accessibility provisions?

- What support do newly emerging technology companies need to build in accessibility in their product and service offerings?

Input is also sought on the following questions:

- What can the federal government do to use technology better or in new ways?

- What can the federal government do to make technology more accessible?

- What emerging technologies does the federal government use that you cannot?

- What technologies should the federal government use that would enhance your interactions with government agencies?

- What are state and local governments doing to implement information technology accessibility that the federal government should follow?

- What is academia doing to implement IT accessibility that the federal government should follow?
- What can the federal government do to influence technology accessibility?
- What can the federal government do to support the availability of effective communities of practice on IT accessibility?
- Would the IT industry benefit from a professional certification or credential that denotes a company's expertise in accessibility? If so, how could it be implemented and what role should the government play?

Feedback from the listening session will be used by, and shared across agencies to improve accessibility and usability of electronic and information technology. The listening session will be accessible. Computer assisted real-time transcription (CART) will be provided. Persons wishing to participate in the virtual listening session can either call in and speak their comments over the telephone or go online and type them on the afternoon of the listening session. Callers should dial 1-877-939-0745 and then enter 51300082 # to join the session; callers must use a touch-tone telephone. Persons going online should go to the Access Board's Web site at <http://www.access-board.gov/sec508/session-instructions.htm> for instructions.

David M. Capozzi,

Executive Director.

[FR Doc. 2011-21144 Filed 8-17-11; 8:45 am]

BILLING CODE 8150-01-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Pacific Islands Region Vessel and Gear Identification Requirements.

OMB Control Number: 0648-0360.

Form Number(s): NA.

Type of Request: Regular submission (revision and extension of a current information collection).

Number of Respondents: 295.

Average Hours per Response: Vessel marking, 45 minutes or 75 minutes, depending on type of vessel; gear-marking, 2 minutes per each piece of gear.

Burden Hours: 1,110.

Needs and Uses: This request is for revision and extension of a current information collection.

Regulations at 50 CFR part 665, and at 50 CFR part 300 subparts D and O, require that all vessels (and their gear) with permits issued under authority of the National Marine Fishery Service's (NMFS) Fishery Management Plan for United States (U.S.) Pacific Island Region Fisheries display the vessel's official number. The numbers must be of a specific size and format and located at specified locations. The display of the identifying number aids in fishery law enforcement.

Affected Public: Business or other for-profit organizations.

Frequency: Annually.

Respondent's Obligation: Mandatory.

OMB Desk Officer:

OIRA_Submission@omb.eop.gov.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at dHynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to

OIRA_Submission@omb.eop.gov.

Dated: August 15, 2011.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 2011-21037 Filed 8-17-11; 8:45 am]

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Alaska Prohibited Species Donation Program.

OMB Control Number: 0648-0316.

Form Number(s): NA.

Type of Request: Regular submission (revision and extension of a current information collection).

Number of Respondents: 1.

Average Hours per Response: 40.

Burden Hours: 13.

Needs and Uses: This request is for revision and extension of a currently approved information collection.

A prohibited species donation (PSD) program for Pacific salmon and Pacific halibut has effectively reduced regulatory discard of salmon and halibut by allowing fish that would otherwise be discarded to be donated to needy individuals through tax-exempt organizations. Vessels and processing plants participating in the donation program voluntarily retain and process salmon and halibut bycatch. An authorized, tax-exempt distributor, chosen by NMFS, is responsible for monitoring the retention and processing of fish donated by vessels and processors. The authorized distributor also coordinates the processing, storage, transportation, and distribution of salmon and halibut.

The PSD program requires a collection-of-information so that the National Marine Fisheries Service (NMFS) can monitor the authorized distributors' ability to effectively supervise program participants and ensure that donated fish are properly processed, stored, and distributed.

Affected Public: Not-for-profit institutions.

Frequency: Every three years.

Respondent's Obligation: Voluntary.

OMB Desk Officer:

OIRA_Submission@omb.eop.gov.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at dHynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *OIRA_Submission@omb.eop.gov*.

Dated: August 15, 2011.

Gwellnar Banks,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 2011-21038 Filed 8-17-11; 8:45 am]

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of

information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Annual Retail Trade Survey.

OMB Control Number: 0607-0013.

Form Number(s): SA-44, SA-44A, SA-44C, SA-44E, SA-44N, SA-44S, SA-45, SA-45C, SA-721A, SA-721B, SA-721E, SA-721F, SA-722A and SA-722E.

Type of Request: Revision of a currently approved collection.

Burden Hours: 33,416.

Number of Respondents: 21,775.

Average Hours per Response: 1 hour and 32 minutes.

Needs and Uses: The Annual Retail Trade Survey (ARTS) covers employer firms with establishments located in the United States and classified in retail trade and/or accommodation and food services sector as defined by the North American Industry Classification System (NAICS). The survey requests firms to provide annual sales, e-commerce sales, year-end inventories held inside and outside the United States, total operating expenses, purchases, and accounts receivable. We also request, for selected industries, sales by merchandise line, percent of sales by class of customer, and percent of e-commerce sales to customers located outside the United States. These data are collected to provide a sound statistical basis for the formation of policy by various government agencies, as well as to serve as a benchmark for the estimates compiled from the Monthly Retail Trade Report (OMB No. 0607-0717). Results will be made available, at the United States summary level, for selected retail trade, accommodation and food services industries approximately fifteen months after the end of the reference year.

For the 2011 ARTS the Census Bureau will request two years of data to link our old and new samples, ensuring that our published estimates continue to be reliable and accurate. For the 2012 ARTS the Census Bureau will request data on detailed operating expenses. These data items were previously requested under a separate supplemental mailing that was conducted every 5 years. The last supplemental mailing was conducted in conjunction with the 2007 ARTS under OMB No. 0607-0942. While the retail portion of that program will be collapsed into the ARTS, we will continue to ask only the additional detailed expense questions every 5 years.

The Bureau of Economic Analysis (BEA) uses the data to estimate the change in private inventories

component of gross domestic product (GDP) and output in both the benchmark and annual input-output (I-O) accounts and GDP by industry. Data on sales taxes are also used to prepare estimates of GDP by industry and to derive industry output for the I-O accounts. Data on detailed operating expenses, which will now be collected on this survey quinquennially, are used to produce national estimates of value added, gross output, and intermediate inputs and serve as a benchmark for the annual industry accounts, which provide the control totals for the GDP-by-state accounts. The Bureau of Labor Statistics uses the data as input to its Producer Price Indexes and in developing productivity measurements. Private businesses use the estimates in computing business activity indexes. Other government agencies and businesses use the data to satisfy a variety of public and business needs such as economic market analysis, company performance, and forecasting future demands.

Affected Public: Business or other for-profit.

Frequency: Annually.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13 U.S.C., Sections 182, 224, and 225.

OMB Desk Officer: Brian Harris-Kojetin, (202) 395-7314.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at dhynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Brian Harris-Kojetin, OMB Desk Officer either by fax (202-395-7245) or e-mail (bharrisk@omb.eop.gov).

Dated: August 15, 2011.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 2011-21086 Filed 8-17-11; 8:45 am]

BILLING CODE 3510-07-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the

Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Survey of Housing Starts, Sales, and Completions.

OMB Control Number: 0607-0110.

Form Number(s): SOC-QI/SF.1, SOC-QI/MF.1.

Type of Request: Extension of a currently approved collection.

Burden Hours: 14,630.

Number of Respondents: 22,200.

Average Hours per Response: 5 minutes.

Needs and Uses: The U. S. Census Bureau is requesting an extension of the currently approved collection for the Survey of Housing Starts, Sales, and Completions, otherwise known as the Survey of Construction (SOC). Government agencies and private companies use statistics from SOC to monitor and evaluate the large and dynamic housing construction industry. Data for two principal economic indicators are produced from the SOC: New Residential Construction (housing starts and housing completions) and New Residential Sales. In addition, a number of other statistical series are produced, including extensive information on the physical characteristics of new residential buildings, and indexes measuring rates of inflation in the price of new buildings. These statistics are based on a sample of residential buildings in permit-issuing places and a road canvass in a sample of land areas not covered by building permit systems.

Census Bureau field representatives (FRs) mail forms SOC-QI/SF.1 and SOC-QI/MF.1 to new respondents to complete. A few days later, the FRs either call or visit the respondents to enter their survey responses into a laptop computer using the Computer Assisted Personal Interviewing (CAPI) software. The respondents are home builders, real estate agents, rental agents, or new homeowners of sampled residential buildings. FRs contact respondents multiple times based on the number of projects in the sample and the number of months required to complete the project.

The Census Bureau uses the information collected in the SOC to publish estimates of the number of new residential housing units started, under construction, completed, and the number of new houses sold and for sale. The Census Bureau also publishes many financial and physical characteristics of new housing units. Government agencies use these statistics to evaluate economic policy, measure progress towards the national housing goal, make policy decisions, and formulate

legislation. For example, the Board of Governors of the Federal Reserve System uses data from this survey to evaluate the effect of interest rates in this interest-rate sensitive area of the economy. The Bureau of Economic Analysis uses the data in developing the Gross Domestic Product (GDP). The private sector uses the information for estimating the demand for building materials and the many products used in new housing and to schedule production, distribution, and sales efforts. The financial community uses the data to estimate the demand for short-term (construction loans) and long-term (mortgages) borrowing.

Affected Public: Individuals or households; business or other for-profit.

Frequency: Monthly.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13 U.S.C., Sections 131 and 182.

OMB Desk Officer: Brian Harris-Kojetin, (202) 395-7314.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at dhynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Brian Harris-Kojetin, OMB Desk Officer either by fax (202-395-7245) or e-mail (bharrisk@omb.eop.gov).

Dated: August 15, 2011.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

BILLING CODE 3510-07-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Annual Wholesale Trade Survey.

OMB Control Number: 0607-0195.

Form Number(s): Forms SA-42, SA-42A, SA-42(MSBO), SA-42A(MSBO), SA-42(AGBR), SA-42A(AGBR).

Type of Request: Revision of a currently approved collection.

Burden Hours: 10,442.

Number of Respondents: 8,176.

Average Hours per Response: 1 hour and 16 minutes.

Needs and Uses: The Annual Wholesale Trade Survey (AWTS) covers employer firms with establishments located in the United States and classified in wholesale trade as defined by the North American Industry Classification System (NAICS). This sector comprises two main types of wholesalers: (1) Merchant wholesalers that sell goods on their own account (including sales offices and sales branches, except retail stores, maintained by manufacturing, refining, or mining enterprises apart from their plants or mines for the purpose of marketing their products) and (2) business to business electronic markets, agents, and brokers that arrange sales for purchases for others generally for a commission or fee.

Respondents are separated into three classifications: (1) Merchant wholesale establishments, excluding manufacturers' sales branches and offices; (2) manufacturers' sales branches and offices; and (3) agents, brokers, and business to business electronic markets. The first classification is asked to provide sales, e-commerce, inventories, method of inventory valuation, inventories held outside the United States, purchases, and operating expenses. The second classification is asked to provide sales, e-commerce, inventories, method of inventory valuation, inventories held outside the United States, and operating expenses. The third classification is asked to provide commissions, sales on their own account, and operating expenses. These data are collected to provide a sound statistical basis for the formation of policy by various government agencies, as well as to serve as a benchmark for the estimates compiled from the Monthly Wholesale Trade Survey (OMB No. 0607-0190). Results will be made available, at the United States summary level, for selected wholesale industries approximately fourteen months after the end of the reference year.

For the 2011 AWTS the Census Bureau will request two years of data to link our old and new samples, ensuring that our published estimates continue to be reliable and accurate. For the 2012 AWTS the Census Bureau will request data on detailed operating expenses. These data items were previously requested under a separate supplemental mailing that was conducted every 5 years. The last

supplemental mailing was conducted in conjunction with the 2007 AWTS under OMB No. 0607-0942. While the wholesale portion of that program will be collapsed into the AWTS, we will continue to ask only the additional detailed expense questions every 5 years. These detailed expense questions are only applicable to the merchant wholesale establishments, excluding manufacturers' sales branches and offices. Additionally, the 2012 AWTS will collect data on sales taxes, which is done once every 5 years.

The Bureau of Economic Analysis (BEA) uses the data to estimate the change in private inventories component of gross domestic product (GDP) and output in both the benchmark and annual input-output (I-O) accounts and GDP by industry. Data on sales taxes, which are collected on this survey quinquennially, are also used to prepare estimates of GDP by industry and to derive industry output for the I-O accounts. Data on detailed operating expenses, which will now be collected on this survey quinquennially, are used to produce national estimates of value added, gross output, and intermediate inputs and serve as a benchmark for the annual industry accounts, which provide the control totals for the GDP-by-state accounts. The Bureau of Labor Statistics uses the data as input to its Producer Price Indexes and in developing productivity measurements. Private businesses use the estimates in computing business activity indexes. Other government agencies and businesses use the data to satisfy a variety of public and business needs such as economic market analysis, company performance, and forecasting future demands.

Affected Public: Business or other for-profit.

Frequency: Annually.

Respondent's Obligation: Mandatory.

Legal Authority: Title 13 U.S.C., Sections 182, 224, and 225.

OMB Desk Officer: Brian Harris-Kojetin, (202) 395-7314.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington, DC 20230 (or via the Internet at dhynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Brian Harris-Kojetin, OMB Desk Officer either by fax (202-395-7245) or e-mail (bharrisk@omb.eop.gov).

Dated: August 15, 2011.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 2011-21091 Filed 8-17-11; 8:45 am]

BILLING CODE 3510-07-P

DEPARTMENT OF COMMERCE

Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: U.S. Census Bureau.

Title: Survey of Residential Building or Zoning Permit Systems.

OMB Control Number: 0607-0350.

Form Number(s): C-411(V), C-411(M), C-411(C).

Type of Request: Revision of a currently approved collection.

Burden Hours: 500.

Number of Respondents: 2,000.

Average Hours per Response: 15 minutes.

Needs and Uses: The Census Bureau produces statistics used to monitor activity in the large and dynamic construction industry. These statistics help state and local governments and the federal government, as well as private industry, to analyze this important sector of the economy. The accuracy of the Census Bureau statistics regarding the amount of construction authorized depends on data supplied by building and zoning officials throughout the country. The Census Bureau uses Form C-411 to obtain information from state and local building permit officials needed for updating the universe of permit-issuing places which serves as the sampling frame for the Report of Privately-Owned Residential Building or Zoning Permits Issued (OMB number 0607-0094), also known as the Building Permits Survey (BPS), and the Survey of Housing Starts, Sales, and Completions (OMB number 0607-0110), also known as Survey of Construction (SOC). These two sample surveys provide widely used measures of construction activity, including the principal economic indicators New Residential Construction and New Home Sales. Data from the BPS and SOC are also used by the Bureau of Economic Analysis (BEA) in the calculation of estimates of the Residential Fixed Investment portion of the Nation's Gross Domestic Product (GDP). In addition, data from the BPS are used by the Census Bureau in the

calculation of annual population estimates; these estimates are widely used by government agencies to allocate funding and other resources to local governments.

The questions on Form C-411 pertain to the legal requirements for issuing building or zoning permits in the local jurisdictions. Information is obtained on such items as geographic coverage and types of construction for which permits are issued.

We have redesigned the form to create three versions: C-411(V) for verification of coverage for jurisdictions with existing permit systems; C-411(M) for municipalities where a new permit system may have been established; and C-411(C) for counties where new permit systems may have been established.

This will clarify the instructions and the information requested in each of these situations but will not affect respondent burden.

The appropriate form is sent to a jurisdiction when we have reason to believe that a new permit system has been established or an existing one has changed. This is based on information from a variety of sources including survey respondents, regional councils and our own efforts to keep abreast of changes in corporate status.

We use the information to verify the existence of new permit systems or changes to existing systems. Based on the information, we add new permit-issuing places to the universe, delete places no longer issuing permits, and make changes to the universe to reflect those places that have merged.

Failure to maintain the universe of permit-issuing places would result in deficient samples and inaccurate statistics. This in turn jeopardizes the accuracy of the above mentioned economic indicators. These indicators are closely monitored by the Board of Governors of the Federal Reserve System and other economic policy makers because of the sensitivity of the housing industry to changes in interest rates.

Affected Public: State, local or Tribal Government.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

Legal Authority: Title 13, United States Code, Sections 9(b), 161, and 182.

OMB Desk Officer: Brian Harris-Kojetin, (202) 395-7314.

Copies of the above information collection proposal can be obtained by calling or writing Diana Hynek, Departmental Paperwork Clearance Officer, (202) 482-0266, Department of Commerce, Room 6616, 14th and Constitution Avenue, NW., Washington,

DC 20230 (or via the Internet at dhynek@doc.gov).

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to Brian Harris-Kojetin, OMB Desk Officer either by fax (202-395-7245) or e-mail (bharrisk@omb.eop.gov).

Dated: August 15, 2011.

Glenna Mickelson,

Management Analyst, Office of the Chief Information Officer.

[FR Doc. 2011-21066 Filed 8-17-11; 8:45 am]

BILLING CODE 3510-07-P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Docket 54-2011]

Foreign-Trade Zone 72—Indianapolis, IN; Application for Manufacturing Authority, Brevini Wind USA, Inc., (Wind Turbine Gear Boxes), Yorktown, IN

A request has been submitted to the Foreign-Trade Zones Board (the Board) by the Indianapolis Airport Authority, grantee of FTZ 72, requesting manufacturing authority on behalf of Brevini Wind USA, Inc. (Brevini), to manufacture wind turbine gear boxes under FTZ procedures within FTZ 72. The application was submitted pursuant to the provisions of the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally filed on August 11, 2011.

The Brevini facility (approximately 400 employees, 20 acres) is located at 2400 Priority Way, within the Muncie Delaware County Park One Industrial Park in Yorktown, Indiana. The facility is used to manufacture and repair wind turbine gear boxes and related winches (up to 2,000 units of each per year) for the U.S. market and export. Components and materials sourced from abroad (representing 25% of the value of the finished products) include: parts of gear boxes, seals (rubber, metal), fasteners, pumps, filters, valves, bearings, shafts, gears, parts of gear boxes, clutches, brakes, cooling units, covers, discs, flanges, housings, sprockets, heating units, hoses, hydraulic parts, lubrication units, pinions, planet carriers, reduction stages, rotor lock discs, and electric motors (duty rate ranges from free to 5.8%).

FTZ procedures could exempt Brevini from customs duty payments on the foreign materials and components used in export production. The company

anticipates that some 30 percent of the plant's shipments will be exported. On its domestic sales, Brevini would be able to choose the duty rates during customs entry procedures that apply to wind turbine gear boxes and winches (duty rates—free, 2.5%) for the foreign-origin inputs noted above. FTZ designation would further allow Brevini to realize logistical benefits through the use of weekly customs entry procedures. Customs duties also could possibly be deferred or reduced on foreign status production equipment. Brevini would also be exempt from duty payments on foreign inputs that become scrap during the production process. The application indicates that the savings from FTZ procedures would help improve the facility's international competitiveness.

In accordance with the Board's regulations, Pierre Duy of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case record and to report findings and recommendations to the Board.

Public comment is invited from interested parties. Submissions (original and 3 copies) shall be addressed to the Board's Executive Secretary at the address below. The closing period for receipt of comments is October 17, 2011. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to November 1, 2011.

A copy of the application will be available for public inspection at the Office of the Executive Secretary, Foreign-Trade Zones Board, Room 2111, U.S. Department of Commerce, 1401 Constitution Avenue, NW., Washington, DC 20230-0002, and in the "Reading Room" section of the Board's Web site, which is accessible via <http://www.trade.gov/ftz>.

For further information, contact Pierre Duy at Pierre.Duy@trade.gov or (202) 482-1378.

Dated: August 11, 2011.

Andrew McGilvray,
Executive Secretary.

BILLING CODE P

DEPARTMENT OF COMMERCE

International Trade Administration

Aerospace Executive Service Trade Mission (AESTM) to Seoul, Korea

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Notice.

SUMMARY:

Mission Description

The U.S. Department of Commerce, International Trade Administration (ITA), Aerospace & Defense Technologies Team and the U.S. Commercial Service in Seoul (CS Korea) are organizing an Aerospace Executive Service Trade Mission (AESTM) to Seoul in conjunction with the Seoul ADEX 2011 (International Aerospace & Defense Exhibition) (<http://www.seoulairshow.com>).

The AESTM, to be led by a senior official of the Department of Commerce, will include representatives from a variety of U.S. aerospace and defense industry manufacturers and service providers. These mission participants will be introduced to international agents, distributors and end-users whose capabilities are targeted to each U.S. participant's needs. Mission participants will also be briefed by key local industry players and Joint U.S. Military Affairs Group—Korea (JUSMAG-K) who can advise on local market conditions and opportunities.

Commercial Setting

The Republic of Korea (Korea) is an economic leader in East Asia. Korea is the 7th largest market for U.S. exports as well as the 9th largest market for U.S. aerospace exports with \$3.0 billion of U.S. aerospace exports in 2010. Korea is a growing market for the aerospace and defense industry, with U.S. aerospace exports growing 51% from 2004 and 2010. With the world's sixth largest military, and continued spending for new weapon systems as part of its defense modernization program, Korea continues to attract the interest of U.S. defense suppliers. In addition to its traditional focus on air power, Seoul ADEX 2011 will also incorporate land forces technology.

Seoul ADEX is one of the world's premier aerospace and defense technology events. The 2009 ADEX show was the largest to date and featured 273 exhibitors from 27 countries, 72 VIPs from 41 countries, and approximately 20,000 trade visitors. Encompassing all civil and military sectors of the international aerospace and ground support industry, Seoul ADEX is the foremost platform for companies to showcase their products and services in the region. Attendees and visitors to the Seoul ADEX include foreign and Korean VIPs, government officials, senior company managers, and high-level executives involved in the

aerospace and defense market in Korea and the rest of the region.

With a close working relationship between the U.S. and Korean governments and private aerospace and defense companies, the AESTM service at this major aerospace and defense show will assist American companies in making important contact with the industry's key players in this region.

The U.S.-Korea Trade Agreement (KORUS) would provide significant commercial opportunities to U.S. aerospace exporters, including duty-free treatment for all U.S. aerospace exports to Korea within three years of implementation of KORUS (Korean aerospace tariffs currently average 3.5 percent, ranging up to 8 percent).

Mission Goals

The goal of the AESTM at the Seoul ADEX 2011 is to facilitate an effective presence for small- and medium-sized companies while combining aspects of a trade mission, such as one on one pre-scheduled business-to-business meetings, trade show participation, and networking activities, in one package.

The AESTM Program enables U.S. aerospace companies to familiarize themselves with this important trade fair, to conduct market research and to explore export opportunities through pre-arranged meetings with potential partners. AESTM participants will be supported by knowledgeable Commercial Service specialists focused on furthering their company-specific objectives.

Mission Scenario

Participants will have individual company kiosk space within the U.S. Pavilion where they can display company literature and conduct meetings with visitors to the air show. Company information and literature will be forwarded by the companies to CS Korea in advance whereupon CS Korea will search for relevant partners and coordinate logistics with respect to arranging meetings for each participant at the show. Prior to the end of the AESTM program, CS Korea staff will undertake a debriefing session with mission participants as well as counsel and coordinate with them on appropriate follow-up procedures.

In summary, participation in the AESTM Program includes:

- Pre-show Outreach and Press Release by CS Korea;
- Pre-show breakfast briefing on October 17, 2011, by CS Korea and other inter agencies in American Embassy such as JUSMAG-K;

- Daily Transportation between AESTM hotel and ADEX 2011 and vice versa;
- Pre-scheduled meetings with potential partners, distributors, and/or end users and on-site meeting if requested;
- One show entry pass per company representative;
- Participation in U.S. Exhibitors Welcome Reception on October 17 by the show organizer;

- One invitation to the U.S. VIP reception per participant by the U.S. Ambassador to Korea;
- Access to Official U.S. Pavilion/ Business Information Office amenities, including meeting area;
- Individual kiosk space within the U.S. Pavilion for display of company literature, poster and meetings;
- Copy of the official ADEX 2011 Air Show Exhibitor's Directory;

- Copy of AES Trade Mission Directory;
- On-site AESTM program coordinator.

Proposed Timetable

Mission Timetable: ITA Aerospace & Defense Technologies Team members arrive in Seoul prior to the show. The proposed program is below:

October 16 (Sunday)	AES Participants Arrive.
A.M., October 17 (Monday)	Program and pre-show briefing at hotel.
P.M., October 17 (Monday)	1-on-1 meeting (2–3 meetings) at hotel.
Evening, October 17 (Monday)	Show Organizer's Welcome Reception at official hotel of the show organizer (6:30–8:30 p.m.).
A.M., October 18 (Tuesday)	Show Opens.
P.M., October 18 (Tuesday)	1-on-1 meeting at Seoul ADEX 2011.
Evening, October 18 (Tuesday)	Welcome Reception (subject to date change) by the U.S. Ambassador.
A.M., October 19 (Wednesday)	1-on-1 meeting at Seoul ADEX 2011.
P.M., October 19 (Wednesday)	Follow-Up meetings.
October 20 (Thursday)	On site meeting with exhibitors upon request.
October 21 (Friday)	On your own schedule.
October 22–23 (Saturday–Sunday)	Public Days.

Participation Requirements

All parties interested in participating in the Aerospace Executive Service Trade Mission must complete and submit an application for consideration by the Department of Commerce. All applicants will be evaluated on their ability to meet certain conditions and best satisfy the selection criteria as outlined below. A minimum of 8 and a maximum of 11 companies will be selected to participate in the mission from the applicant pool. U.S. companies already doing business in Korea as well as U.S. companies seeking to enter the market for the first time are encouraged to apply.

Fees and Expenses

After a company has been selected to participate in the mission, a payment to the Department of Commerce in the form of a participation fee is required. The participation fee will be \$5,000 for a small or medium-sized enterprise (SME)¹ and \$5,500 for large firms. The fee for each additional firm representative (SME or large) is \$300. Expenses for travel, lodging, meals, and incidentals will be the responsibility of each trade mission participant.

¹ An SME is defined as a firm with 500 or fewer employees or that otherwise qualifies as a small business under SBA regulations. See <http://www.sba.gov/contractingopportunities/owners/basics/whatis-small-business/index.html>. Parent companies, affiliates, and subsidiaries will be considered when determining business size. The dual pricing reflects the Commercial Service's user fee schedule that became effective May 1, 2008. See <http://www.export.gov/newsletter/march2008/initiatives.html>.

Conditions for Participation

- An applicant must submit a completed and signed mission application and supplemental application materials, including adequate information on the company's products and/or services, primary market objectives, and goals for participation. If the U.S. Department of Commerce receives an incomplete application, the Department may reject the application, request additional information, or take the lack of information into account when evaluating the applications.
- Each applicant must also certify that the products and services it seeks to export through the mission are either produced in the United States, or, if not, marketed under the name of a U.S. firm and have at least 51 percent U.S. content of the value of the finished product or service.

Selection Criteria for Participation

- Suitability of the company's products or services to the Korean market.
- Consistency of the applicant's goals and objectives with the stated scope and design of the mission.
- Applicant's potential for business in Korea, including likelihood of exports resulting from the mission.

Referrals from political organizations and any documents containing references to partisan political activities (including political contributions) will be removed from an applicant's submission and not considered during the selection process.

Timeframe for Recruitment and Applications

Mission recruitment will be conducted in an open and public manner, including publication in the **Federal Register** (<http://www.gpoaccess.gov/fr>), posting on ITA's trade mission calendar—<http://www.trade.gov/trade-missions>—and other Internet Web sites, press releases to general and trade media, direct mail, broadcast fax, notices by industry trade associations and other multiplier groups, and publicity at industry meetings, symposia, conferences, and trade shows.

Recruitment for the mission will begin August 8, 2011, and conclude August 26, 2011. The U.S. Department of Commerce will review applications and make selection decisions on a rolling basis, and will inform all applicants of selection decisions as soon as possible. Applications received after the August 26 deadline will be considered only if space and scheduling constraints permit.

BILLING CODE 3510-FF-P

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration**

RIN 0648-XA645

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of receipt and request for comment.

SUMMARY: Notice is hereby given that NMFS has received an application from the Washington Department of Fish and Wildlife (WDFW), for a direct take permit pursuant to the Endangered Species Act of 1973, as amended (ESA). The duration of the proposed Permit is ten years. This document serves to notify the public of the availability for comment of the permit application. All comments received will become part of the public record and will be available for review pursuant to the ESA.

DATES: Written comments on the application must be received at the appropriate address or fax number (see **ADDRESSES**) no later than 5 p.m. Pacific time on *September 19, 2011*.

ADDRESSES: Written responses to the application should be sent to Brian Allee, National Marine Fisheries Services, Salmon Management Division, 1201 N.E. Lloyd Boulevard, Suite 1100, Portland, OR 97232. Comments may also be submitted by e-mail to: LowerColumbiaWeirs.nwr@noaa.gov. Include in the subject line of the e-mail comment the following identifier: Comments on three weirs in the Lower Columbia. Comments may also be sent via facsimile (fax) to (503) 872-2737. Requests for copies of the permit applications should be directed to the National Marine Fisheries Services, Salmon Management Division, 1201 NE. Lloyd Boulevard, Suite 1100, Portland, OR 97232. The documents are also available on the Internet at <http://www.nwr.noaa.gov>. Comments received will also be available for public inspection, by appointment, during normal business hours by calling (503) 230-5412.

FOR FURTHER INFORMATION CONTACT: Brian Allee at (503) 231-2009 or e-mail: brian.allee@noaa.gov.

SUPPLEMENTARY INFORMATION:**Species Covered in This Notice**

Chinook salmon (*Oncorhynchus tshawytscha*): threatened, naturally produced and artificially propagated Lower Columbia River.

Chum salmon (*O. keta*): threatened, naturally produced and artificially propagated Columbia River.

Coho salmon (*O. kisutch*): threatened, naturally produced and artificially propagated Lower Columbia River.

Steelhead (*O. mykiss*): threatened, naturally produced and artificially propagated Lower Columbia River.

Background

Section 9 of the ESA and Federal regulations prohibit the "taking" of a species listed as endangered or threatened. The term "take" is defined under the ESA to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. NMFS may issue permits to take listed species for any act otherwise prohibited by section 9 for scientific purposes or to enhance the propagation or survival of the affected species, under section 10(a)(1)(A) of the ESA. NMFS regulations governing permits for threatened and endangered species are promulgated at 50 CFR 222.307.

In an application dated May 2, 2011, and updated on May 23, 2011, the Washington Department of Fish and Wildlife proposes to install weirs in the Grays River and Elochoman River, both tributaries of the Columbia River, and the Coweeman River, a tributary of the Cowlitz River in southwest Washington State. The weir on the Grays River would represent a re-location of an existing weir. The weirs are intended to address adult salmonid monitoring needs outlined in the Lower Columbia Fish Recovery Board's Watershed Conservation Plan through development of accurate and precise abundance estimates, and remove hatchery fall Chinook salmon from naturally spawning tule fall Chinook salmon populations.

Authority

This notice is provided pursuant to section 10(c) of the ESA. NMFS will evaluate each application, associated documents, and comments submitted thereon to determine whether the applications meet the requirements of section 10(a)(1)(A) of the ESA. If it is determined that the requirements are met, the permit will be issued to WDFW for the purpose of carrying out the installation, operation, and management of the weirs. NMFS will publish a record of its final action in the **Federal Register**.

Dated: August 15, 2011.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE**National Oceanic and Atmospheric Administration**

RIN 0648-XA513

Taking and Importing Marine Mammals: Taking Marine Mammals Incidental to Navy Operations of Surveillance Towed Array Sensor System Low Frequency Active Sonar

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice; issuance of four Letters of Authorization.

SUMMARY: In accordance with the Marine Mammal Protection Act (MMPA), as amended, and implementing regulations, notification is hereby given that NMFS has issued four one-year Letters of Authorization (LOAs) to take marine mammals by harassment incidental to the U.S. Navy's operation of Surveillance Towed Array Sensor System Low Frequency Active (SURTASS LFA) sonar operations to the Chief of Naval Operations, Department of the Navy, 2000 Navy Pentagon, Washington, DC 20350 and persons operating under his authority.

DATES: Effective from August 16, 2011, through August 15, 2012.

ADDRESSES: Electronic copies of the Navy's March 31, 2011, LOA application letter, the LOAs, the Navy's 2010 annual report are available by writing to P. Michael Payne, Chief, Permits, Conservation, and Education Division, Office of Protected Resources, National Marine Fisheries Service, 1315 East-West Highway, Silver Spring, MD 20910-3225, by telephoning the contact listed here (see **FOR FURTHER INFORMATION CONTACT**), or online at: <http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications>. Documents cited in this notice may be viewed, by appointment, during regular business hours, at the aforementioned address.

FOR FURTHER INFORMATION CONTACT: Jeannine Cody, Office of Protected Resources, NMFS (301) 427-8401.

SUPPLEMENTARY INFORMATION:

Background

Section 101(a)(5)(A) of the MMPA (16 U.S.C. 1361 *et seq.*) directs the Secretary of Commerce to allow, upon request, the incidental, but not intentional taking of marine mammals by U.S. citizens who engage in a military readiness activity if certain findings are made and regulations are issued.

Authorization may be granted for periods of five years or less if NMFS finds that the taking will have a negligible impact on the species or stock(s), and will not have an unmitigable adverse impact on the availability of the species or stock(s) for certain subsistence uses. In addition, NMFS must prescribe regulations that include permissible methods of taking and other means effecting the least practicable adverse impact on the species and its habitat, and on the availability of the species for subsistence uses, paying particular attention to rookeries, mating grounds, and areas of similar significance. The regulations also must include requirements pertaining to the monitoring and reporting of such taking.

Regulations governing the taking of marine mammals incidental to the U.S. Navy's operation of SURTASS LFA sonar were published on August 21, 2007 (72 FR 46846) and remain in effect through August 15, 2012. They are codified at 50 CFR part 216 subpart Q. These regulations include mitigation, monitoring, and reporting requirements for the incidental taking of marine mammals by the SURTASS LFA sonar system. For detailed information on this action, please refer to the August 21, 2007 **Federal Register** document and 50 CFR part 216 subpart Q.

Summary of LOA Request

NMFS received an application from the U.S. Navy for four LOAs, one covering the USNS VICTORIOUS (T-AGOS 19), one covering the USNS ABLE (T-AGOS 20), one covering the USNS EFFECTIVE (T-AGOS 21), and one covering the USNS IMPECCABLE (T-AGOS 23), under the regulations issued on August 21, 2007 (72 FR 46846). (**Note:** The R/V CORY CHOUEST has been retired and has been replaced by the USNS ABLE.) The Navy requested that these LOAs become effective on August 16, 2011. The application requested authorization, for a period not to exceed one year, to take, by harassment, marine mammals incidental to employment of the SURTASS LFA sonar system for training, testing and routine military operations on the aforementioned ships

in areas of the Pacific Ocean, as described in the 2007 regulations.

Monitoring and Reporting

In compliance with NMFS' 2007 SURTASS LFA sonar regulations, the Navy submitted an annual report (No. 3) for SURTASS LFA sonar operations during 2009–2010. The Navy also submitted a comprehensive report on SURTASS LFA sonar operations and the mitigation and monitoring activities conducted under the LOAs issued under its previous rule for the 2002 through 2007 period. A copy of these reports can be viewed and/or downloaded at: <http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications>. Based on these reports, the Navy has conducted the specified activities in the manner described in the regulations and LOAs, and has implemented the required mitigation and monitoring measures. Additionally, marine mammal detections and behavioral observations suggest that the actual impacts of SURTASS LFA sonar operation and training fall within the scope and nature of those analyzed and anticipated by the regulations and LOAs.

In accordance with the current SURTASS LFA sonar regulations (50 CFR 216.186), the Navy has submitted classified quarterly mission reports. Under the first three LOA periods in the current rule, the Navy has not exceeded the take authorized by NMFS. Based on the submitted quarterly reports for the 2010 LOAs, NMFS does not expect the Navy to exceed authorized take (requested and authorized) based on the Navy's 2010 application. The annual report (No. 4) for the 2010–2011 LOAs is due on September 30, 2011. Upon receipt, NMFS will post this annual report at <http://www.nmfs.noaa.gov/pr/permits/incidental.htm#applications>.

Authorization

NMFS has issued four LOAs to the U.S. Navy, authorizing the incidental harassment of marine mammals, incidental to operating the four SURTASS LFA sonar systems for training, testing and routine military operations. Issuance of these four LOAs is based on findings, described in the preamble to the final rule (72 FR 46846, August 21, 2007) and supported by information contained in the Navy's required reports on SURTASS LFA sonar, that the activities described under these four LOAs will have no more than a negligible impact on marine mammal stocks and will not have an unmitigable adverse impact on the availability of the affected marine mammal stocks for subsistence uses.

These LOAs remain valid through August 15, 2012, provided the Navy remains in conformance with the conditions of the regulations and the LOAs, and the mitigation, monitoring, and reporting requirements described in 50 CFR 216.184–216.186 (72 FR 46846, August 21, 2007) and in the LOAs are undertaken.

Dated: August 12, 2011.

James H. Lecky,

*Director, Office of Protected Resources,
National Marine Fisheries Service.*

BILLING CODE 3510–22–P

DEPARTMENT OF DEFENSE

Department of the Navy

Nominations for Membership on the Ocean Research Advisory Panel

AGENCY: Department of the Navy, DoD.

ACTION: Notice.

SUMMARY: The Ocean Research Advisory Panel (ORAP) is soliciting nominations for new members.

DATES: Nominations should be submitted no later than September 15, 2011.

ADDRESSES: Nominations should be submitted via e-mail to CDR Stephen D. Martin, U.S. Navy, at stephen.d.martin@navy.mil.

Contact Information: Office of Naval Research, 875 North Randolph Street Suite 1425, Attn: ONR Code 322B Room 1075, Arlington, VA 22203, telephone 703–696–4395.

FOR FURTHER INFORMATION CONTACT: Dr. Charles L. Vincent, Office of Naval Research, 875 North Randolph Street Suite 1425, Arlington, VA 22203–1995, telephone 703–696–4120.

SUPPLEMENTARY INFORMATION: ORAP is a statutorily mandated federal advisory committee that provides senior advice to the National Ocean Research Leadership Council (NORLC), the governing body of the National Oceanographic Partnership Program (NOPP). Under the National Ocean Policy, the National Ocean Council (NOC) Deputy-level Committee has assumed the responsibilities of the NORLC. ORAP provides independent advice and guidance to the NOC. The NOC routinely provides guidance and direction on the areas for which it seeks advice and recommendations from ORAP. ORAP also advises on selection of projects and allocation of funds for NOPP.

Panel Member Duties and Responsibilities: Members of the panel

represent the National Academy of Sciences, the National Academy of Engineering, the Institute of Medicine, ocean industries, state governments, academia and others, including individuals who are eminent in the fields of marine science, marine policy, or related fields, including ocean resource management. Members are appointed annually and may serve a term of four years, and are not normally compensated except for travel expenses and per diem while away from their homes in performance of services for the panel.

The panel meets for at least one two-day public meeting per year, but possibly meets three times per year, on dates agreeable by the panel members; attendance at meetings is expected. Intercessional activities not involving formal decisions or recommendations may be carried out electronically, and the panel may establish sub-panels composed of less than full membership to carry out panel duties.

Nominations: Any interested person or organization may nominate qualified individuals (including one's self) for membership on the panel. Nominated individuals should have extended expertise and experience in the field of ocean science and/or ocean resource management. Nominations should be identified by name, occupation, position, address, telephone number, e-mail address, and a brief paragraph describing their qualifications in the context of the ORAP Charter, that can be found on-line at (<http://www.nopp.org/committees/orap/>), and ability to represent a stakeholder group. Nominations should also include a résumé or curriculum vitae.

Process and Deadline for Submitting Nominations: Submit nominations via e-mail to CDR Stephen Martin (stephen.d.martin@navy.mil) no later than September 15, 2011. ORAP nomination committees under the direction of the National Ocean Council will evaluate the nominees identified by respondents to this Federal Register notice and down-select to a short-list of available candidates (150% of the available open positions for consideration). These selected candidates will be required to fill-out the "Confidential Financial Disclosure Report" OGE form 450. This confidential form will allow Government officials to determine whether there is a statutory conflict between a person's public responsibilities and private interests and activities, or the appearance of a lack of impartiality, as defined by federal regulation. The form and additional guidance may be viewed at:

(http://www.usoge.gov/forms/oge450_pdf/oge450_automated.pdf).

In accordance with section 7903 of title 10, United States Code, the short-list of candidates will then be submitted for approval by the Secretaries of the Navy and Defense who are the appointing officials for their consideration. At this time, six openings are envisioned on the Panel and the final set of nominees will seek to balance a range of geographic and sector representation and experience. Applicants must be U.S. citizens. Successful nominees must provide detailed information required to evaluate potential conflicts of interest. Typically the time required to achieve the final appointments to the Panel is 10–12 months. Members of the Panel serve as Special Government Employees who volunteer their time but whose travel costs for Panel business is provided by the Government. ORAP is a Federal Advisory Committee and operates under the principles of open and transparent development of advice to the government.

The selection of new panel members will be based on the nominee's qualifications to provide senior advice to the NOC; the availability of the potential panel member to fully participate in the panel meetings; absence of any conflict of interest or appearance of lack of impartiality, and lack of bias; the candidates' areas of expertise and professional qualifications; and achieving an overall balance of different perspectives, geographic representation, and expertise on the panel.

Dated: August 11, 2011.

J. M. Beal

Lieutenant Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

[FR Doc. 2011–21116 Filed 8–17–11; 8:45 am]

BILLING CODE 3810–FF–P

DEPARTMENT OF EDUCATION

Notice of Proposed Information Collection Requests

AGENCY: Department of Education.

ACTION: Comment Request.

SUMMARY: The Department of Education (the Department), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed and continuing collection of information. This helps the Department assess the impact of its information collection requirements and minimize

the reporting burden on the public and helps the public understand the Department's information collection requirements and provide the requested data in the desired format. The Director, Information Collection Clearance Division, Privacy, Information and Records Management Services, Office of Management, invites comments on the proposed information collection requests as required by the Paperwork Reduction Act of 1995.

DATES: Interested persons are invited to submit comments on or before October 17, 2011.

ADDRESSES: Comments may be submitted electronically to FAFSA.Comments@ed.gov. We ask that you copy them to ICDocketMgr@ed.gov or mail to U.S. Department of Education, UCP Building, 1830 First Street, NE., Washington, DC 20202–4357. Please note that written comments received in response to this notice will be considered public records.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that Federal agencies provide interested parties an early opportunity to comment on information collection requests. The Director, Information Collection Clearance Division, Privacy, Information and Records Management Services, Office of Management, publishes this notice containing proposed information collection requests at the beginning of the Departmental review of the information collection. The Department of Education is especially interested in public comment addressing the following issues: (1) Is the collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology.

Dated: August 12, 2011.

Darrin A. King,

Director, Information Collection Clearance Division, Privacy, Information and Records Management Services.

As required by the Paperwork Reduction Act of 1995, this notice requests comments on the 2012–2013 versions of the forms used by individuals applying for Federal student aid including the Free Application for Federal Student Aid (FAFSA) and the Student Aid Report (SAR).

Title: 2012–2013 Federal Student Aid Application.

Type of Review: Revision.

OMB Number: 1845–0001.

Frequency: Annually.

Respondents: Individuals.

Annual Respondents: 24,705,864.

Annual Responses: 46,447,024.

Annual Burden Hours: 29,357,853.

Abstract: Section 483 of the Higher Education Act of 1965, as amended (HEA), mandates that the Secretary of Education “* * * shall produce, distribute, and process free of charge common financial reporting forms as described in this subsection to be used for application and reapplication to determine the need and eligibility of a student for financial assistance.”

The determination of need and eligibility are for the following Title IV, HEA, Federal student financial assistance programs: the Federal Pell Grant Program; the Campus-Based programs (Federal Supplemental Educational Opportunity Grant (FSEOG), Federal Work-Study (FWS), and the Federal Perkins Loan Program); the William D. Ford Federal Direct Loan Program; the Teacher Education Assistance for College and Higher Education (TEACH) Grant; and the Iraq and Afghanistan Service Grant.

Federal Student Aid, an office of the U.S. Department of Education (hereafter “the Department”), developed an application process to collect and process the data necessary to determine a student’s eligibility to receive Title IV,

HEA program assistance. The application process involves an applicant’s submission of the *Free Application for Federal Student Aid* (FAFSA). After submission of the FAFSA, an applicant receives a *Student Aid Report* (SAR) which is a summary of the data they submitted on the FAFSA. The applicant reviews the SAR, and, if necessary, will make corrections or updates to their submitted FAFSA.

The Department seeks OMB approval of all application components as a single “collection of information”. The aggregate burden will be accounted for under OMB Control Number 1845–0001. The specific application components, descriptions and submission methods for each are listed in Table 1.

TABLE 1—FEDERAL STUDENT AID APPLICATION COMPONENTS

Component	Description	Submission method
Initial Submission of FAFSA		
FAFSA on the Web (FOTW)	Online FAFSA that offers applicants a customized experience..	Submitted by the applicant via http://www.fafsa.gov .
FOTW—Renewal	Online FAFSA for applicants who have previously completed the FAFSA.	
FOTW—EZ	Online FAFSA for applicants who qualify for the Simplified Needs Test (SNT) or Automatic Zero (Auto Zero) needs analysis formulas.	
FOTW—EZ Renewal	Online FAFSA for applicants who have previously completed the FAFSA and who qualify for the SNT or Auto Zero needs analysis formulas.	
FAFSA on the Phone (FOTP)	The Federal Student Aid Information Center (FSAIC) representatives assist applicants by filing the FAFSA on their behalf through FOTW.	Submitted through http://www.fafsa.gov for applicants who call 1–800–4–FED–AID.
FOTP—EZ	FSAIC representatives assist applicants who qualify for the SNT or Auto Zero needs analysis formulas by filing the FAFSA on their behalf through FOTW.	
FAA Access	Online tool that a financial aid administrator (FAA) utilizes to submit a FAFSA..	Submitted through http://www.faaaccess.ed.gov by a FAA on behalf of an applicant.
FAA Access—Renewal	Online tool that a FAA can utilize to submit a Renewal FAFSA.	
FAA Access—EZ	Online tool that a FAA can utilize to submit a FAFSA for applicants who qualify for the SNT or Auto Zero needs analysis formulas.	
FAA Access—EZ Renewal	Online tool that a FAA can utilize to submit a FAFSA for applicants who have previously completed the FAFSA and who qualify for the SNT or Auto Zero needs analysis formulas.	
Electronic Other	This is a submission done by a FAA, on behalf of the applicant, using the Electronic Data Exchange (EDE).	The FAA may be using their mainframe computer or software to facilitate the EDE process.
PDF FAFSA or Paper FAFSA	The paper version of the FAFSA printed by the Department for applicants who are unable to access the Internet or the online PDF FAFSA for applicants who can access the Internet but are unable to complete the form using FOTW.	Mailed by the applicant.
Correcting Submitted FAFSA Information and Reviewing FAFSA Information		
FOTW—Corrections	Any applicant who has a Federal Student Aid PIN (FSA PIN)—regardless of how they originally applied—may correct using FOTW Corrections.	Submitted by the applicant via http://www.fafsa.gov .
Electronic Other—Corrections	With the applicant’s permission, corrections can be made by a FAA using the EDE.	The FAA may be using their mainframe computer or software to facilitate the EDE process.

TABLE 1—FEDERAL STUDENT AID APPLICATION COMPONENTS—Continued

Component	Description	Submission method
Paper SAR—This is a SAR and an option for corrections.	The full paper summary that is mailed to paper applicants who did not provide an e-mail address, to applicants who did not sign their application and to applicants whose records were rejected during processing because the Social Security Number did not match with the SSA. Applicants can write corrections directly on the paper SAR and mail for processing.	Mailed by the applicant.
FAA Access—Corrections	An institution can use FAA Access to correct the FAFSA ...	Submitted through http://www.faaaccess.ed.gov by a FAA on behalf of an applicant.
Internal Department Corrections	The Department will submit an applicant's record for system-generated corrections.	There is no burden to the applicants under this correction type as these are system-based corrections.
FSAIC Corrections	Any applicant, with their Data Release Number (DRN), can change the postsecondary institutions listed on their FAFSA or change their address by calling FSAIC.	These changes are made directly in the CPS system by a FSAIC representative.
SAR Electronic (eSAR)	This is the PDF version of the SAR for applicants who applied electronically or by paper and provided an e-mail address.	Cannot be submitted for processing.
SAR Acknowledgment	This is the condensed paper SAR that is mailed to applicants who applied electronically but did not provide an e-mail address.	

This information collection also documents an estimate of the annual public burden as it relates to the application process for Federal student aid. The Applicant Burden Model (ABM), measures applicant burden through an assessment of the activities each applicant conducts in conjunction with other applicant characteristics. The ABM has been designed to accurately describe, in terms of burden, the average applicant's experience. Key determinants of the ABM include:

- The total number of applicants that will potentially apply for Federal student aid;
- How the applicant chooses to complete and submit the FAFSA, *e.g.*, by paper or electronically via FOTW;
- How the applicant chooses to submit any corrections and/or updates (*e.g.*, the paper SAR or electronically via FOTW Corrections);
- The type of SAR document the applicant receives (paper SAR, SAR acknowledgment, or the eSAR);
- The formula applied to determine the applicant's EFC (full need analysis formula, Simplified Needs Test or Automatic Zero); and
- The average amount of time involved in preparing to complete the application.

The ABM is largely driven by the number of potential applicants for the application cycle. The total application projection for 2012–2013 is based upon two factors—estimates of the total enrollment in all degree-granting institutions and the percentage change in FAFSA submissions for the last completed application cycle. The ABM is also based on the application options available to students and parents. The Department accounts for each application component based on web trending tools, survey information, and other Department data sources.

For 2012–2013, the Department is reporting a net burden reduction of 2,881,475 hours. The reduction is a reflection of the effects of simplifying FAFSA on the Web, which is utilized by the majority of applicants who apply for aid. For example, data reported in the 2011–2012 burden estimates reflected that an applicant that completed FOTW and had the ability to use a renewal version of the application (see FOTW—Renewal component in Table 1) would take approximately 1.20 hours (72 minutes). The most recent statistics reflect that on average that renewal applicant would actually spend about 1.08 hours (64.8 minutes).

Updated completion times were calculated for each component and have been used to estimate the burden, excluding the change in the applicant volume. The results demonstrate that the burden for all applicants would have decreased by almost 13 percent or 4,181,899 hours, if the application volume had remained constant.

If the Department had not simplified the application process, thus reducing the time required to complete the FAFSA, the new burden estimates would only need to account for the change in applicants. The 4.63% increase in applicants would result in an increase in burden of 1,300,424 hours.

Accounting for both the increase in total applicants and the decrease in individual applicant burden, the net change is an overall decrease of almost 9 percent or 2,881,475 hours. The following Table shows the net burden change and total cost for applicants. The change in total annual responses is also listed in the Table. Total annual responses include the original FAFSA submission, which is counted as one response for each applicant; and also includes a response for any subsequent correction generated by the applicant.

TABLE 2—NET BURDEN CHANGE

	2011–2012	2012–2013	Change	% Change	Burden disposition
					Accounting for change in applicant burden and change in applicants

TABLE 2—NET BURDEN CHANGE—Continued

	2011–2012	2012–2013	Change	% Change	Burden disposition
Total Applicants	23,611,500	24,705,864	+1,094,364	+4.63	Net decrease in burden. The increase in applicants is offset by the results of the Department's simplification changes. This has created an overall decrease in burden of 8.94% or 2,881,475 hours.
Total Applicant Burden	32,239,328	29,357,853	–2,881,475	–8.94	
Total Annual Responses	32,239,328	46,447,024	+14,207,696	+44.07	
Cost for All Applicants	\$159,370.20	\$234,804.24	\$75,434.04	+47.33	

The Department is proud that efforts to simplify the FAFSA submission process have resulted in a continued decrease in the burden associated with the application process, even as the Department serves more students each year. The results demonstrate the significant improvements that have been made to the application process. The Department believes that these changes will contribute to more students completing the FAFSA and will assist more students with their pursuit of postsecondary education.

Request for Copies: Comments should be submitted to the Department as indicated. All comments will become a matter of public record. Requests for copies of the proposed information collection request may be accessed from <http://edicsweb.ed.gov>, by selecting the “Browse Pending Collections” link and by clicking on link number 4703. When you access the information collection, click on “Download Attachments” to view. Written requests for information should be addressed to U.S. Department of Education, 400 Maryland Avenue, SW., LBJ, Washington, DC 20202–4537. Requests may also be electronically mailed to ICDocketMgr@ed.gov or faxed to 202–401–0920. Please specify the complete title of the information collection when making your request. Comments regarding burden and/or the collection activity requirements should be electronically mailed to ICDocketMgr@ed.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m. Eastern time, Monday through Friday.

BILLING CODE

DEPARTMENT OF ENERGY

Notice of Availability: American Assured Fuel Supply

AGENCY: The U.S. Department of Energy.

ACTION: Notice of availability.

SUMMARY: The U.S. Department of Energy (DOE) is creating the American Assured Fuel Supply (AFS), a reserve of low enriched uranium (LEU) to serve as a backup fuel supply for foreign recipients to be supplied through U.S. persons, or for domestic recipients, in the event of a fuel supply disruption. DOE is committed to making the AFS available to eligible recipients in the case of supply disruptions in the nuclear fuel market. This effort supports DOE's nuclear nonproliferation objectives by supporting civil nuclear energy development while minimizing proliferation risks. This notice announces the availability of the AFS and the DOE policy and process for eligible recipients to purchase LEU from the AFS.

FOR FURTHER INFORMATION CONTACT: Rich Goorevich, Senior Policy Advisor, Office of Nonproliferation and International Security, National Nuclear Security Administration, U.S. Department of Energy, 1000 Independence Ave., SW., Washington, DC 20585, *Tel:* 202–586–0589, *Fax:* 202–586–1348.

SUPPLEMENTARY INFORMATION:

I. Background

The Secretary of Energy is authorized pursuant to the Atomic Energy of 1954, as amended (Pub. L. 83–703), and the Nuclear Non-Proliferation Act of 1978 (NNPA) (Pub. L. 95–242) to encourage the widespread use of atomic energy for peaceful purposes, and to enter into and distribute nuclear material in cooperation with other nations where appropriate safeguard measures are in place to ensure the material is properly controlled and used for peaceful purposes. Consistent with those

responsibilities and missions, in 2005, Secretary of Energy Samuel Bodman announced that the United States would set aside 17.4 metric tons of surplus highly-enriched uranium (HEU) to be down-blended to LEU and held in reserve to address disruptions in the nuclear fuel supply of foreign recipients that have good nonproliferation credentials. This initiative was originally referred to as the Reliable Fuel Supply Initiative, and more recently renamed the American Assured Fuel Supply (AFS).

Congress appropriated \$49,540,000 in the Consolidated Appropriations Act, 2008 (Pub. L. 110–161) to fund a portion of the International Atomic Energy Agency's (IAEA) International Nuclear Fuel Bank (INFB) initiative, which is envisioned as an LEU reserve that will be administered by the IAEA and that will serve as a back-up for global supply disruptions. Congress, in the Explanatory Statement accompanying the House Appropriations Committee Print (which in this Act was given the same effect as a joint explanatory statement), noted that the INFB freed up the LEU set-aside initiated pursuant to Secretary Bodman's 2005 announcement, and recommended DOE also “allow U.S. interests to purchase uranium fuel from the Reliable Fuel Supply [now the AFS] in the event of supply disruption.” (H. Approp. Cmte. Print at 592.)

The AFS is intended to complement the INFB. Specifically, the AFS will support countries that pursue peaceful civilian nuclear programs by providing a back-up source of fuel in the event of a supply disruption that threatens the normal operation of their programs. In addition, in accordance with the congressional request, the AFS will be available to address supply disruptions affecting domestic nuclear power plants. The AFS reserve is modest in size and designed to not disrupt or replace market mechanisms. Rather, it is to be drawn upon only in the event of

demonstrated need and after all other market options are exhausted.

The National Nuclear Security Administration (NNSA), a semi-autonomous agency within DOE, is responsible for the administration and implementation of the AFS. Down-blending of the 17.4 metric tons of surplus HEU began in 2007 and is scheduled for completion in 2012. When complete, the down-blending will result in approximately 290 metric tons of LEU, of which approximately 230 metric tons will form the reserve. The remainder will be used to pay for the down-blending and processing costs.

For additional information on the potential environmental impacts of DOE's ongoing HEU disposition activities and the AFS initiative in particular, please see "Amended Record of Decision: Disposition of Surplus Highly Enriched Uranium Environmental Impact Statement," also published in today's **Federal Register**.

II. Policy and Process for Accessing AFS Material

DOE intends to implement the following policies and processes to evaluate requests for purchases and the sale of LEU from the AFS.

Policy. DOE intends for the AFS to be made available to eligible recipients that meet certain nonproliferation criteria in the case of supply disruptions in the nuclear fuel market. DOE will sell LEU from the AFS consistent with applicable laws, regulations, and Departmental policies concerning excess uranium disposition. DOE will sell LEU to U.S. persons who will in turn sell to domestic or foreign recipients only where DOE has confirmed that there is a fuel supply disruption that cannot be addressed by normal market mechanisms. If foreign reactor operators face a supply disruption, the AFS will be available to them through their U.S. suppliers.

The sale of LEU from the AFS will be conducted consistent with the policies and guidance in the "Secretary of Energy's 2008 Policy Statement on Management of Department of Energy's Excess Uranium Inventory" (March 11, 2008) and the DOE Excess Uranium Inventory Management Plan. In all cases, the U.S. person purchasing the LEU must meet all applicable licensing requirements and other authorizations for the possession, use, and transportation of nuclear materials. If the AFS is used to supply a foreign recipient, the U.S. person exporting the LEU must obtain or possess an appropriate license from the Nuclear Regulatory Commission. DOE will establish the price of the LEU at the

time of delivery using commercially acceptable market indices, to the extent practical, and ensure that reasonable value is obtained. All proceeds from the sale will be deposited in the U.S. Treasury.

Process. Any U.S. person requesting to purchase LEU from the AFS must submit a request in writing to the NNSA Office of Nonproliferation and International Security. The request must set forth facts demonstrating that there is a fuel supply disruption for which fuel cannot be obtained through normal market conditions and that the end-user, if foreign, has good nonproliferation credentials. In addition, the request must include specific information about the purchase, including but not limited to: the time and place of delivery; the desired quantity and composition of LEU; the recipient and associated country of final end-use; confirmation of qualification for an export license, as required; and, if applicable, information on any intermediate consignee and country. Any foreign persons requesting to purchase LEU from the AFS can do so through their U.S. supplier.

The U.S. person purchasing LEU from the AFS will be solely responsible for transportation, insurance, safety, and liability issues once title to the LEU transfers. The LEU will be in the form of uranium hexafluoride at a specific assay (generally 4.95% U-235); DOE will assume no responsibility beyond certification that the LEU meets ASTM International, formerly American Society for testing (ASTM), specifications and is of a certain quantity and assay.

DOE will respond to requests within a reasonable time period, consistent with the requester's needs, the circumstances surrounding the request, and other relevant and necessary governmental interests. DOE reserves the right to prioritize requests, and to seek additional information as necessary to review the request.

DOE will establish an AFS Committee, which will be responsible for reviewing requests for LEU in the AFS and make recommendations to the Secretary of Energy on the sale of LEU from the AFS. The Committee will be chaired by the NNSA Office of Nonproliferation and International Security and include representatives from NNSA's Office of Fissile Material Disposition, DOE's Office of Nuclear Energy, DOE's Office of Environmental Management, and the DOE and NNSA Offices of General Counsel. For transactions that trigger the requirements of section 3112(d) of the USEC Privatization Act, DOE will assess the impact of a sale from the AFS on the

domestic uranium market, and will provide its recommendation to the Secretary to make the requisite determination that the transfer will not have an adverse material impact on the domestic uranium enrichment, conversion, or mining industries.

DOE will receive concurrence from the Department of State, and consult with the Department of Commerce and the Department of Defense, prior to the approval and sale of AFS material to a U.S. person for use in a foreign country. For all sales from the AFS, DOE will notify other federal agencies (e.g., U.S. Nuclear Regulatory Commission, Department of State, Department of Commerce and the Department of Defense) prior to the sale, as appropriate.

III. Projected Timeline

The LEU from the AFS will come from down-blending 17.4 metric tons of HEU. When complete, the down-blending will result in approximately 290 metric tons of LEU, of which approximately 230 metric tons will form the reserve. The remainder will be used to pay for the down-blending and processing costs. This will leave the AFS with approximately 6 reloads for an average 1000 MW reactor. The down-blending will be completed in 2012.

As of the publication of this notice, most of the down-blending for the AFS has been completed. DOE will begin accepting requests for purchases of the AFS material pursuant to the above-stated policy and process at this time.

Issued in Washington, DC, this 13th day of May, 2011.

Steven Chu,

Secretary, U.S. Department of Energy.

DEPARTMENT OF ENERGY

National Nuclear Security Administration Amended Record of Decision: Disposition of Surplus Highly Enriched Uranium Environmental Impact Statement

AGENCY: National Nuclear Security Administration, U.S. Department of Energy.

ACTION: Amended Record of Decision.

SUMMARY: The National Nuclear Security Administration (NNSA), a semi-autonomous agency within the U.S. Department of Energy (DOE), is amending the August 5, 1996, Record of Decision (the 1996 ROD) (61 FR 40619) for the *Disposition of Surplus Highly Enriched Uranium Environmental*

Impact Statement (HEU EIS) (DOE/EIS-0240). The 1996 ROD included DOE's decision to implement a program to render a nominal 200 metric tons of surplus highly-enriched uranium (HEU) non-weapons-usable by blending it down to low-enriched uranium (LEU) and selling as much of the resulting LEU as possible (up to 85 percent) for use as reactor fuel. In 2007, NNSA prepared a Supplement Analysis (DOE/EIS-0240-SA1) to the HEU EIS but did not make a decision at that time. The Supplement Analysis analyzed the potential environmental impacts associated with ongoing HEU disposition activities and potential changes to those activities: supplying LEU to reactors in foreign countries through U.S. persons under certain circumstances; establishing new pathways for disposing of HEU materials that would not be converted to LEU for reactor fuel; and down-blending additional quantities of HEU for use as reactor fuel. NNSA now is amending the 1996 ROD to make decisions regarding each of these proposals.

FOR FURTHER INFORMATION CONTACT: For further information about the Surplus HEU Disposition Program and the American Assured Fuel Supply, contact: Robert M. George, HEU Disposition Program Manager, Office of Fissile Materials Disposition, National Nuclear Security Administration, U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585; (202) 586-1530.

For general information concerning the DOE National Environmental Policy Act (NEPA) process, contact: Ms. Carol M. Borgstrom, Director, Office of NEPA Policy and Compliance (GC-54), U.S. Department of Energy, 1000 Independence Avenue, SW., Washington, DC 20585; (202) 586-4600; leave a message at (800) 472-2756; or send an e-mail to askNEPA@hq.energy.gov. Additional information regarding DOE NEPA activities and access to many DOE NEPA documents are available on the Internet through the DOE NEPA Web site at <http://nepa.energy.gov>. Some of these documents, including the HEU EIS referenced in this Amended ROD, are available upon request as described at http://nepa.energy.gov/nepa_request.cfm.

SUPPLEMENTARY INFORMATION:

Background

Following the end of the Cold War, the United States identified a surplus of weapons-usable HEU. HEU has a concentration of 20 percent or more of uranium-235, which is a fissile material that can be used to make nuclear

weapons. In 1994, the United States declared 174 metric tons of HEU to be surplus to defense needs. In the HEU EIS, DOE analyzed alternatives to disposition a nominal 200 metric tons of surplus HEU in order to reduce the threat of nuclear weapons proliferation in an environmentally safe manner by reducing stockpiles of weapons-usable fissile materials, setting a nonproliferation example for other nations, and allowing peaceful beneficial re-use of the material.

Alternatives analyzed in the HEU EIS involved the continued storage of HEU or mixing the surplus HEU with other uranium materials (LEU, natural uranium, or depleted uranium) to lower the concentration of uranium-235 so that it is not weapons-usable, a process called "down-blending." DOE analyzed a range of scenarios regarding how much HEU would be down-blended (to approximately four percent uranium-235) for use in commercial reactors as opposed to blending to approximately 0.9 percent uranium-235 for disposal as low-level radioactive waste (LLW).

The HEU EIS evaluated the potential environmental impacts of down-blending at up to four existing U.S. facilities: DOE's Y-12 National Security Site in Oak Ridge, Tennessee; DOE's Savannah River Site (SRS) in Aiken, South Carolina; The Babcock & Wilcox Company (now B&W Nuclear Operations Group, Inc. [B&W NOG]) in Lynchburg, Virginia; and Nuclear Fuel Services, Inc., (NFS) in Erwin, Tennessee. These sites were considered because they have technically viable HEU conversion and blending capabilities and could down-blend surplus HEU to LEU for use in commercial fuel or for disposal as waste. B&W NOG and NFS, which is now owned by B&W NOG, are both licensed by the U.S. Nuclear Regulatory Commission (NRC) to process HEU.

As described in the 1996 ROD (61 FR 40619; August 5, 1996), DOE planned to down-blend as much surplus HEU as possible (then assumed to be up to 85 percent of the 200 metric tons, *i.e.*, approximately 170 metric tons) into LEU for use as commercial reactor fuel. The remainder (approximately 30 metric tons) would be down-blended and then disposed of as low-level waste (LLW). DOE planned to use a combination of the four sites and estimated that the blend-down program would be completed in about 15-20 years. This alternative was identified in the 1996 ROD as the environmentally preferable alternative. To date, almost 15 years after the ROD was issued, DOE has down-blended approximately 120 metric tons of surplus HEU to LEU and

provided all the LEU for use in commercial or research reactors.

In the fall of 2005, up to an additional 200 metric tons of HEU were declared surplus to nuclear weapon program needs. Of this, up to 160 metric tons were designated for the U.S. Naval Reactors Program for use as reactor fuel. However, based on historical data, DOE anticipated that up to approximately 32 metric tons of this HEU might be unsuitable for use as naval reactor fuel, and proposed to down-blend rejected material to LEU. Another 20 metric tons of the 200 metric ton declaration were designated for down-blending. Down-blending this HEU began in 2009, consistent with the 1996 ROD.

American Assured Fuel Supply Initiative

In 2005, the Secretary of Energy announced that DOE would set aside a stockpile of LEU derived from 17.4 metric tons of surplus HEU to be held in reserve to address potential disruptions in the nuclear fuel supply of eligible foreign recipients that meet certain nonproliferation criteria. In the Explanatory Statement accompanying the House Appropriations Committee Print for the Consolidated Appropriations Act, 2008 (Pub. L. 110-161), which was given the same effect as a joint explanatory statement, Congress recommended that DOE also make the LEU available to domestic reactors in the event of a supply disruption. This effort to establish and manage an LEU reserve was originally referred to as the Reliable Fuel Supply Initiative, but now is called the American Assured Fuel Supply (AFS).

Proposed Action and Program Changes

NNSA proposes to implement the AFS initiative and modify certain elements of the existing surplus HEU disposition program:

(1) *American Assured Fuel Supply.* Under the AFS, a portion of LEU derived from down-blending surplus HEU would be held in reserve to respond, through U.S. intermediaries, to disruptions in the foreign or domestic supply of nuclear fuel. In the 2007 Supplement Analysis, this initiative was referred to as the Reliable Fuel Supply Initiative and was limited in scope to ensuring that foreign countries with good nonproliferation credentials have access to the nuclear fuel market and the benefits of nuclear power. Under the current proposal, the AFS would supply LEU in the event of a supply disruption both to recipients in foreign countries through a U.S. person or recipients in the United States. This would further nuclear nonproliferation objectives by

supporting civilian nuclear energy development while minimizing proliferation risks.

Down-blending the 17.4 metric tons of surplus HEU commenced in 2007 and is scheduled to be completed by 2012.¹ These operations are the same as analyzed in the HEU EIS and are consistent with the existing ROD. The down-blending will result in approximately 290 metric tons of LEU, of which approximately 230 metric tons will form the AFS. The remainder of the LEU will be used to pay for the down-blending and processing costs. Forty metric tons of LEU will be stored in existing facilities at the Westinghouse fuel fabrication facility in Columbia, South Carolina, and the rest of the DOE-owned LEU will be available for the facility's working inventory subject to contract conditions for providing LEU upon request by DOE.

The sale of LEU from the AFS will be conducted consistent with the policies and guidance in the "Secretary of Energy's 2008 Policy Statement on Management of Department of Energy's Excess Uranium Inventory" (March 11, 2008) and the DOE Excess Uranium Inventory Management Plan.² In all cases, the U.S. persons purchasing the LEU must meet all applicable licensing requirements and other authorizations for the possession, use, and transportation of nuclear materials. If the AFS is used to supply a foreign recipient, the U.S. persons exporting the LEU will obtain a license from the NRC. DOE will establish the price of the LEU at the time of delivery using commercially acceptable market indices, to the extent practical, and ensure that reasonable value is obtained. All proceeds from the sale will be deposited in the U.S. Treasury.

The U.S. persons purchasing LEU from the AFS will be solely responsible for transportation, insurance, safety, and liability issues once title is transferred. The LEU will be in the form of uranium hexafluoride (UF₆) at a specific assay (generally 4.95% U-235); DOE assumes no responsibility beyond certification that the LEU meets ASTM International, formerly American Society for Testing Materials (ASTM), specifications and is of a certain quantity and assay.

For additional information on the policies and process for use of the AFS,

¹ NNSA awarded the contract for down-blending to a team consisting of WesDyne International (a subsidiary of Westinghouse Electric Company) and NFS. NFS is down-blending the surplus HEU to LEU at its facility in Erwin, Tennessee.

² These documents are available on the internet at: <http://www.ne.doe.gov/pdfFiles/Excess%20Uranium%20Inventory.pdf> and http://www.ne.doe.gov/pdfFiles/inventory_plan_unclassified.pdf.

please see "Notice of Availability: American Assured Fuel Supply," also published in today's **Federal Register**.

(2) *New Disposition Pathways for HEU Discard Material*. The HEU EIS analyzed the down-blending of low-enrichment³ HEU materials to an enrichment level of 0.9 percent uranium-235, and disposing of the resulting LEU at a low-level radioactive waste facility. NNSA now proposes instead to directly dispose of these materials only if they meet acceptance criteria for disposal as LLW.⁴ Most disposal would occur at DOE's Nevada National Security Site (NNS) (formerly the Nevada Test Site).

(3) *Down-blending Additional HEU Over a Longer Period of Time*. The quantity of surplus HEU available for disposition and the expected period of program implementation both have increased since the 1996 ROD. Additional quantities of surplus HEU primarily derive from two sources: new material declared excess to weapons needs in 2005, and HEU returned to DOE from foreign research reactor and domestic research reactor programs. NNSA proposes to down-blend these additional quantities of HEU to LEU for use in fabricating fuel for nuclear power plants, research reactors and isotope production facilities. The 1996 ROD foresaw HEU down-blending activities continuing for 15–20 years. NNSA now anticipates that down-blending may continue over an extended period, out to at least 2050, based on the pace of ongoing activities and because the material addressed by the 2005 declaration is coming from nuclear weapon dismantlement over the coming decades.

Down-blending of HEU from foreign or domestic research reactor spent nuclear fuel would occur only if DOE decides to chemically process, (reprocess) that fuel, which would separate the HEU from other components of the fuel. DOE currently plans to accept research reactor spent nuclear fuel through 2019, as announced in amended RODs (69 FR 69901; December 1, 2004 and 74 FR 4173; January 23, 2009) for the *Environmental Impact Statement on a*

³ Low-enrichment items include materials with varying enrichments that are no longer needed to meet programmatic needs, have no further defined use, and are commonly considered uneconomical for recovery due to low concentration of HEU or due to impurities.

⁴ The Supplement Analysis also analyzes the potential environmental impacts of direct disposal in a geologic repository of 15 metric tons of spent nuclear fuel containing HEU. That fuel currently is in safe and secure storage along with a much larger quantity of spent nuclear fuel at Idaho National Laboratory, and DOE is not proposing any change at this time in the management of that material.

Proposed Nuclear Weapons Nonproliferation Policy Concerning Foreign Research Reactor Spent Nuclear Fuel (FRR SNF EIS) (DOE/EIS-0218).

Associated reprocessing operations are evaluated in the *Savannah River Site Spent Nuclear Fuel Management Final Environmental Impact Statement* (SRS SNF EIS) (DOE/EIS-0279 2000). DOE has no plans to reprocess spent nuclear fuel solely for the purpose of extracting HEU. However, activities associated with managing the fuel for the purposes of stabilization, facility cleanup, treatment, waste management, safe disposal, or environment, safety, and health protection could result in the separation of HEU in weapons-usable form that could pose a proliferation threat. If HEU is recovered from spent fuel for one or more of these reasons, it would be available for down-blending consistent with the 1996 ROD for the HEU EIS.

Basis for Decision and Associated Environmental Impacts

The Council on Environmental Quality (CEQ) regulations implementing NEPA at 40 CFR 1502.9(c) require Federal agencies to prepare a supplement to an EIS when an agency makes substantial changes in the proposed action that are relevant to environmental concerns or when there are significant new circumstances or information relevant to environmental concerns and bearing on the proposed action or its impacts. DOE NEPA Implementing Procedures at 10 CFR 1021.314(c) direct that a supplement analysis be prepared to assist in making that determination when it is unclear whether a supplement to an EIS is required. NNSA prepared the *Supplement Analysis for the Disposition of Surplus Highly Enriched Uranium* (DOE/EIS-0240-SA1) in 2007 in accordance with these CEQ and DOE procedures.

In the HEU Supplement Analysis, NNSA analyzed the potential environmental impacts from the ongoing HEU disposition program, as well as potential impacts from port activities and transportation of LEU by ship across the global commons (ocean) to support the proposal to make LEU available to reactors in foreign countries. The Supplement Analysis did not identify an end date for implementation of the proposed activities because, as noted above, receipt of surplus HEU into the disposition program is ongoing.

The Supplement Analysis assumed the continued availability of the four facilities identified in the HEU EIS for continued blend down of HEU.

Potential impacts were based on processing 10 metric tons of HEU per year at each facility.

The potential impacts would remain similar to those analyzed in the HEU EIS and Supplement Analysis. NNSA expects that there would be changes over time due to factors such as normal population fluctuations among work forces and in communities near the involved facilities. These changes would not create any significant new circumstances or information related to the proposed actions. Activities would continue in existing, appropriately licensed or approved facilities. Potential environmental impacts would remain small and within applicable regulatory and other limits.

For AFS, which was not envisioned in the HEU EIS, potential impacts of the domestic program would be identical to those associated with the ongoing HEU disposition program. Prior to delivery to a reactor, one or more commercial nuclear fuel fabrication facilities would accommodate the LEU for the AFS reserve in its working inventory and existing storage capacity. This activity would be consistent with the facilities' existing NRC operating licenses and would not require additional construction. In addition, as analyzed in the Supplement Analysis, transportation activities to provide LEU to foreign reactors would add small potential impacts associated with transfer activities at the port of departure and overseas shipments through the global commons.

Disposal of certain HEU materials as LLW would result in potential impacts associated with transportation and disposal. Nevada National Security Site (NNS) is the most likely disposal site for this LLW. The HEU EIS included an analysis of transporting 0.9 percent LEU to NNS for disposal. Without down-blending, the low-equity HEU materials would have a higher concentration of uranium-235, but with approved packaging and other required controls, the potential impacts would be similar to the transportation and disposal of 0.9 percent LEU at NNS. DOE also has analyzed transportation of low-level radioactive wastes to NNS in the *Environmental Impact Statement for the Nevada Test Site and Off-Site Locations in the State of Nevada* (DOE/EIS-0243). That EIS also included analysis of waste disposal activities and resulted in a ROD identifying the NNS as available for the disposal of LLW if it meets the NNS waste acceptance criteria (61 FR 65551, December 13, 1996). If NNSA were to use a different facility for disposal, the transportation impacts would be similar to those associated

with use of NNS (i.e., similar distances and population distributions would be involved), and disposal would occur in existing, licensed facilities so that impacts would be consistent with approved operations at the facility. Recognizing the potential for disposal at other sites, the HEU EIS identified the analysis of transportation impacts to NNS as representative of other possible routes. In addition, DOE has analyzed the transportation and disposal of LLW in other NEPA analyses, including the *Waste Management Programmatic Environmental Impact Statement for Managing Treatment, Storage, and Disposal of Radioactive and Hazardous Waste* (DOE/EIS-0200, 1997).

Amended Decision

Consistent with the decisions announced in the ROD issued pursuant to the HEU EIS (61 FR 40619; August 5, 1996), NNSA will continue ongoing surplus HEU disposition program activities. NNSA has decided to also make the following changes to the HEU disposition program:

(1) Implement the AFS, including storage of LEU and, as needed, transportation of the LEU by ship across the ocean for use in foreign reactors.

(2) Dispose of certain HEU materials as low-level radioactive waste without prior down-blending if the materials meet applicable waste acceptance criteria.

(3) Increase the quantity of HEU available for down-blending and continue down-blending operations beyond the 20 years anticipated in the 1996 HEU EIS.

NNSA will use all practicable means to avoid or minimize environmental harm when implementing the actions described in this Amended ROD. NNSA operates pursuant to a number of Federal laws including environmental laws, DOE Orders, and Federal, State, and local controls and agreements. Also, the commercial activities associated with the down-blending, transportation, and storage of HEU and LEU are regulated by the NRC and the Department of Transportation. Many of these requirements mandate actions that serve to mitigate potential adverse environmental impacts.

For transactions that trigger the requirements of section 3112(d) of the United States Enrichment Corporation Privatization Act, DOE will assess the impact of a release from the AFS on the domestic market, and will provide its recommendation to the Secretary to make the appropriate determination as to whether the transfer will have an adverse material impact on the domestic

uranium enrichment, conversion, or mining industries.

Issued in Washington, DC, this 29th day of April, 2011.

Thomas P. D'Agostino,
Administrator, National Nuclear Security Administration.

BILLING CODE 6450-01-P

DEPARTMENT OF ENERGY

Environmental Management Site-Specific Advisory Board, Northern New Mexico

AGENCY: Department of Energy (DoE).

ACTION: Notice of Open Meeting.

SUMMARY: This notice announces a meeting of the Environmental Management Site-Specific Advisory Board (EM SSAB), Northern New Mexico. The Federal Advisory Committee Act (Pub. L. 92-463, 86 Stat. 770) requires that public notice of this meeting be announced in the **Federal Register**.

DATES: Wednesday, September 28, 2011; 1 p.m.–7 p.m.

ADDRESSES: Sagebrush Inn and Conference Center, 1508 Paseo de Pueblo Sur, Taos, New Mexico.

FOR FURTHER INFORMATION CONTACT: Menice Santistevan, Northern New Mexico Citizens' Advisory Board (NNMCAB), 1660 Old Pecos Trail, Suite B, Santa Fe, NM 87505. Phone (505) 995-0393; Fax (505) 989-1752 or e-mail: msantistevan@doeal.gov.

SUPPLEMENTARY INFORMATION: *Purpose of the Board:* The purpose of the Board is to make recommendations to DOE-EM and site management in the areas of environmental restoration, waste management, and related activities.

Tentative Agenda

- 1 p.m. Call to Order by Co-Deputy Designated Federal Officers (DDFO), Ed Worth and Lee Bishop; Establishment of a Quorum: Roll Call and Excused Absences; Welcome and Introductions, Ralph Phelps; Welcome to Taos, Mayor Darren Cordova; Approval of Agenda and July 27, 2011 Meeting Minutes.
- 1:30 p.m. Public Comment Period.
- 1:45 p.m. Old Business;
- Written Reports;
 - Other Items.
- 2 p.m. New Business;
- Report from Nominating Committee (Section V, F. of NNMCAB Bylaws), Deb Shaw;

- Election of Chair and Vice Chair for Fiscal Year (FY) 2012;
- Consideration and Action on FY 2012 Work Plans, Ralph Phelps;
- Discuss NNM CAB Meeting Locations for 2012;
- Appoint Ad Hoc Committee for Annual Self Evaluation;
- Other items.

2:45 p.m. Items from DDFOs, Ed Worth and Lee Bishop.

3:15 p.m. Presentation on Long-Term Stewardship, Tom Longo.

4:30 p.m. Discussion of Draft Recommendation(s) to DOE.

5 p.m. Dinner Break.

6 p.m. Public Comment Period.

6:15 p.m. Consideration and Action on Draft Recommendation(s), Ralph Phelps.

- Draft Recommendation 2011-06 (Tabled 7/20/11) .

6:45 p.m. Open Forum for Board Members.

7 p.m. Adjourn, Ed Worth and Lee Bishop.

Public Participation: The EM SSAB, Northern New Mexico, welcomes the attendance of the public at its advisory committee meetings and will make every effort to accommodate persons with physical disabilities or special needs. If you require special accommodations due to a disability, please contact Menice Santistevan at least seven days in advance of the meeting at the telephone number listed above. Written statements may be filed with the Board either before or after the meeting. Individuals who wish to make oral statements pertaining to agenda items should contact Menice Santistevan at the address or telephone number listed above. Requests must be received five days prior to the meeting and reasonable provision will be made to include the presentation in the agenda. The Deputy Designated Federal Officer is empowered to conduct the meeting in a fashion that will facilitate the orderly conduct of business. Individuals wishing to make public comments will be provided a maximum of five minutes to present their comments.

Minutes: Minutes will be available by writing or calling Menice Santistevan at the address or phone number listed above. Minutes and other Board documents are on the Internet at: <http://www.nnmcab.org/>.

Issued at Washington, DC, on August 12, 2011.

LaTanya R. Butler,

Acting Deputy Committee Management Officer.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OAR-2007-1121; FRL9452-6]

Agency Information Collection Activities; Proposed Collection; Comment Request; Recordkeeping and Reporting Requirements for Motor Vehicle and Non-Road Diesel Fuel

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) (44 U.S.C. 3501 *et seq.*), this document announces that EPA is planning to submit a request to renew an existing Information Collection Request (ICR) to the Office of Management and Budget (OMB). This ICR is scheduled to expire on December 31, 2011. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before October 17, 2011.

ADDRESSES: Submit your comments, clearly identified as referring to Docket ID No. EPA-HQ-OAR-2007-1121, by one of the following methods:

- <http://www.regulations.gov>: Follow the on-line instructions for submitting comments.

- *E-mail:* a-and-r-Docket@epa.gov.

- *Fax:* (202) 566-9744.

- *Mail:* Air and Radiation Docket, Environmental Protection Agency, Mail Code: 2822T, 1200 Pennsylvania Ave., NW., Washington, DC 20460. You may telephone the Air and Radiation Docket at 202-566-1742.

- *Hand Delivery:* The Public Reading Room is located at the EPA West Building, 1301 Constitution Avenue, NW., Room 3334, Washington, DC 20460. Such deliveries are only accepted during the Docket's normal hours of operation, and special

arrangements should be made for deliveries of boxed information. You may telephone the Air and Radiation Docket at 202-566-1742.

Instructions: Direct your comments to Docket ID No. EPA-HQ-OAR-2007-1121. EPA's policy is that all comments received will be included in the public docket without change and may be made available online at <http://www.regulations.gov>, including any personal information provided, unless the comment includes information claimed to be Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Do not submit information that you consider to be CBI or otherwise protected through <http://www.regulations.gov> or e-mail. The <http://www.regulations.gov> Web site is an "anonymous access" system, which means EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an e-mail comment directly to EPA without going through <http://www.regulations.gov>, your e-mail address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the Internet. If you submit an electronic comment, EPA recommends that you include your name and other contact information in the body of your comment and with any disk or CD-ROM you submit. If EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, EPA may not be able to consider your comment. Electronic files should avoid the use of special characters, any form of encryption, and be free of any defects or viruses. For additional information about EPA's public docket visit the EPA Docket Center homepage at <http://www.epa.gov/epahome/dockets.htm>.

FOR FURTHER INFORMATION CONTACT: Anne-Marie C. Pastorkovich, Attorney/Advisor, Mail Code: 6406J, Environmental Protection Agency, 1200 Pennsylvania Ave., NW., Washington, DC 20460; *telephone number:* 202-343-9423 *fax number:* 202-343-2801; *e-mail address:* pastorkovich.anne-marie@epa.gov.

SUPPLEMENTARY INFORMATION:

How can I access the docket and/or submit comments?

EPA has established a public docket for this ICR under Docket ID No. EPA-HQ-OAR-2007-1121, which is available for online viewing at <http://www.regulations.gov>, or in person viewing at the Air and Radiation Docket in the EPA Docket Center (EPA/DC),

EPA West, Room 3334, 1301 Constitution Ave., NW., Washington, DC. The EPA/DC Public Reading Room is open from 8 a.m. to 4:30 p.m., Monday through Friday, excluding legal holidays. The telephone number for the Reading Room is 202-566-1744, and the telephone number for the Air Docket is 202-566-1742.

Use <http://www.regulations.gov> to obtain a copy of the draft collection of information, submit or view public comments, access the index listing of the contents of the docket, and to access those documents in the public docket that are available electronically. Once in the system, select "search," then key in the docket ID number identified in this document.

What information is EPA particularly interested in?

Pursuant to section 3506(c)(2)(A) of the PRA, EPA specifically solicits comments and information to enable us to:

- (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;
- (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- (iii) enhance the quality, utility, and clarity of the information to be collected; and
- (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. In particular, EPA is requesting comments from very small businesses (those that employ less than 25) on examples of specific additional efforts that EPA could make to reduce the paperwork burden for very small businesses affected by this collection.

What should I consider when I prepare my comments for EPA?

You may find the following suggestions helpful for preparing your comments:

1. Explain your views as clearly as possible and provide specific examples.
2. Describe any assumptions that you used.
3. Provide copies of any technical information and/or data you used that support your views.

4. If you estimate potential burden or costs, explain how you arrived at the estimate that you provide.

5. Offer alternative ways to improve the collection activity.

6. Make sure to submit your comments by the deadline identified under **DATES**.

7. To ensure proper receipt by EPA, be sure to identify the Docket ID number assigned to this action in the subject line on the first page of your response. You may also provide the name, date, and **Federal Register** citation.

What information collection activity or ICR does this apply to?

Affected entities: Entities potentially affected by this action (*with SIC Code/2002 NAICS Code indicated in parentheses*) are refiners (2911/324110), importers (5172/424720), pipelines (4613), petroleum marketers and other distributors (5171, 5172/424710, 424720), terminals (5171/424710), fuel oil dealers (5172/424720), fuel additive manufacturers (2911/424720), petroleum retailers and wholesale purchaser-consumers (5171, 5172/424710, 424720) and laboratories (8734/541380).

Title: Recordkeeping and Reporting Requirements for Motor Vehicle and Non-Road Diesel Fuel.

ICR numbers: EPA ICR No. 1718.09, OMB Control No. 2060-0308.

ICR status: This ICR is currently scheduled to expire December 31, 2011. An Agency may not conduct or sponsor, and a person is not required to respond to, a collection of information, unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations in title 40 of the CFR, after appearing in the **Federal Register** when approved, are listed in 40 CFR part 9. They are also displayed by publication in the **Federal Register** or by other appropriate means, such as on the related collection instrument or form. The display of OMB control numbers in certain EPA regulations is consolidated in 40 CFR part 9.

Abstract: This ICR covers recordkeeping and reporting requirements for motor vehicle diesel fuel and non-road, locomotive and marine diesel fuel. It also includes recordkeeping and reporting associated with the placement of codes on dyed diesel fuel (the dye is required under IRS regulations). The main purpose for recordkeeping and reporting is to ensure compliance with the regulations at 40 CFR part 80, *Subpart I—Motor Vehicle, Non-Road, Locomotive, and Marine Diesel Fuel*. Most reporting is mandatory. Parties may assert a claim of business confidentiality and

submissions covered by such a claim will be treated in accordance with procedures at 40 CFR part 2 and established Agency procedures.

Burden Statement: The annual public reporting and recordkeeping burden for this collection of information is estimated to average less than one hour per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements which have subsequently changed; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

A document entitled "Proposed Supporting Statement—Part A: Recordkeeping and Reporting Related to Fuel Quality Regulations for Diesel Fuel Sold in 2001 & Later Years; for Tax-Exempt (Dyed) Highway Diesel Fuel; and Non-Road Locomotive & Marine Diesel Fuel: Renewal" has been placed in Docket No. EPA-HQ-OAR-2007-1121. This draft document provides a more detailed explanation of the Agency's estimate, which is only briefly summarized here:

Estimated total number of potential respondents: 6,806.

Frequency of response: Annual, quarterly and/or on occasion.

Estimated total number of responses: 265,406.

Estimated total average number of responses for each respondent: 39.

Estimated total annual burden hours: 18,950.

Estimated total annual costs: \$2,044,300.

Are there changes in the estimates from the last approval?

There is a decrease in the total estimated respondent burden and cost compared to the currently approved ICR. Most of the decrease is because motor vehicle diesel reporting requirements are no longer applicable and because virtually all laboratory qualifications for test methods have already been submitted to, and acted upon by, EPA.

What is the next step in the process for this ICR?

EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval pursuant to 5 CFR 1320.12. At that time, EPA will issue another **Federal Register** notice pursuant to 5 CFR 1320.5(a)(1)(iv) to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB. If you have any questions about this ICR or the approval process, please contact the technical person listed under **FOR FURTHER INFORMATION CONTACT**.

Dated: August 12, 2011.

Lori Stewart,

Acting Director, Office of Transportation and Air Quality, Office of Air and Radiation.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9452-7]

Notification of a Public Teleconference of the Science Advisory Board Panel for the Review of the Great Lakes Restoration Initiative Action Plan

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA or Agency) Science Advisory Board (SAB) Staff Office announces a public teleconference of the SAB Panel to discuss its draft advisory report on the interagency *Great Lakes Restoration Initiative Action Plan FY 2010-2014*.

DATES: The teleconference will be held on September 16, 2011 from 1 p.m. to 5 p.m. (Eastern Daylight Time).

ADDRESSES: The public teleconference will be conducted by telephone only.

FOR FURTHER INFORMATION CONTACT: Any member of the public wishing further information regarding this teleconference meeting may contact Mr. Thomas Carpenter, Designated Federal Officer (DFO), SAB Staff Office, by telephone/voice mail at (202) 564-4885; by fax at (202) 565-2098 or via e-mail carpenter.thomas@epa.gov. General information concerning the EPA Science Advisory Board can be found at the EPA SAB Web site at <http://www.epa.gov/sab>.

SUPPLEMENTARY INFORMATION: The SAB was established pursuant to the Environmental Research, Development,

and Demonstration Authorization Act (ERDAA), codified at 42 U.S.C. 4365 to provide independent scientific and technical advice to the Administrator on the technical basis for Agency positions and regulations. The SAB is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. Pursuant to FACA and EPA policy, notice is hereby given that an *ad hoc* SAB Panel will hold a public teleconference to discuss its draft advisory report on the Great Lakes Restoration Initiative Action Plan. The SAB will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

Background: EPA is leading an interagency Great Lakes Restoration Initiative (GLRI) to protect and restore the chemical, biological, and physical integrity of the Great Lakes. The GLRI Action Plan is designed to target the most significant environmental problems in the region, as documented in extensive scientific studies, conferences and workshops. To guide the efforts of the GLRI, EPA and its Federal partners, through the Great Lakes Interagency Task Force, developed a comprehensive multi-year Action Plan. The GLRI Action Plan identifies outcome-oriented performance goals, objectives, measurable ecological targets, and specific actions for five major focus areas: toxic substances and areas of concern; invasive species; near-shore health and nonpoint source pollution; habitat and wildlife protection and restoration; and accountability, education, monitoring, evaluation, communication, and partnerships. EPA is seeking SAB review and comment regarding the Great Lakes Restoration Initiative's Action Plan. Additional information describing the scientific background and basis for the Action Plan can be found at http://yosemite.epa.gov/sab/sabproduct.nsf/fedrgstr_activites/Review%20of%20GLRI%20Action%20Plan?OpenDocument.

The panel held a public meeting on July 12 and 13, 2011 (76 FR 115, 34977-34978 and 76 FR 131 40355) to discuss their comments on the Action Plan. The purpose of the September 16, 2011 teleconference is for the Panel to discuss their draft advisory report.

Availability of Meeting Materials: The agenda and the draft Advisory Report on the Great Lakes Restoration Initiative Action Plan will be available on the SAB Web site at <http://www.epa.gov/sab> in advance of the meeting.

Procedures for Providing Public Input: Public comment for consideration by EPA's federal advisory committees and

panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office. Federal advisory committees and panels, including scientific advisory committees, provide independent advice to EPA. Members of the public can submit comments for a Federal advisory committee to consider as it develops advice for EPA. Input from the public to the SAB will have the most impact if it consists of comments that provide specific scientific or technical information or analysis for SAB panels to consider or if it relates to the clarity or accuracy of the technical information included. Members of the public wishing to provide comment should contact the Designated Federal Officer for the relevant advisory committee directly.

Oral Statements: In general, individuals or groups requesting an oral presentation at this public teleconference will be limited to three minutes per speaker. Interested parties should contact Mr. Thomas Carpenter, DFO, in writing (preferably via e-mail), at the contact information noted above, by September 12, 2011 to be placed on the list of public speakers for the meeting.

Written Statements: Written statements should be received in the SAB Staff Office by September 12, 2011 so that the information may be made available to the SAB Oil Spill Research Review Panel for their consideration. Written statements should be supplied to the DFO in the following formats: one hard copy with original signature and one electronic copy via e-mail (acceptable file format: Adobe Acrobat PDF, WordPerfect, MS Word, MS PowerPoint, or Rich Text files in IBM-PC/Windows 98/2000/XP format). Submitters are requested to provide two versions of each document submitted: One each with and without signatures, because the SAB Staff Office does not publish documents with signatures on its Web sites. It is the SAB Staff Office general policy to post written comments on the Web page for the advisory meeting or teleconference. Members of the public should be aware that their contact information, if included in any written comments, will appear on the web. Furthermore, special care should be taken not to include copy-righted material.

Accessibility: For information on access or services for individuals with disabilities, please contact Mr. Thomas Carpenter at the phone number or e-mail address noted above, preferably at

least ten days prior to the meeting, to give EPA as much time as possible to process your request.

Dated: August 10, 2011.

Vanessa T. Vu,
Director, EPA Science Advisory Board Staff Office.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9452-8]

Notification of a Public Teleconference of the Clean Air Scientific Advisory Committee (CASAC) Lead Review Panel

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The EPA Science Advisory Board (SAB) Staff Office announces a public teleconference of the CASAC Lead Review Panel to discuss its draft letter reviewing EPA's *Integrated Science Assessment for Lead (First External Review Draft—May 2011)*.

DATES: The CASAC Lead Review Panel teleconference will be held on Thursday, September 15, 2011, from 12 p.m. to 3 p.m. (Eastern Time).

ADDRESSES: The public teleconference will take place by telephone only.

FOR FURTHER INFORMATION CONTACT: Any member of the public wishing to obtain general information concerning the public teleconference may contact Mr. Aaron Yeow, Designated Federal Officer (DFO), via telephone at (202) 564-2050 or e-mail at yeow.aaron@epa.gov. General information concerning the EPA CASAC can be found on the EPA Web site at <http://www.epa.gov/casac>.

SUPPLEMENTARY INFORMATION: The CASAC was established pursuant to the Clean Air Act (CAA) Amendments of 1977, codified at 42 U.S.C. 7409D(d)(2), to provide advice, information, and recommendations to the Administrator on the scientific and technical aspects of issues related to the criteria for air quality standards, research related to air quality, sources of air pollution, and the strategies to attain and maintain air quality standards and to prevent significant deterioration of air quality. The CASAC is a Federal Advisory Committee chartered under the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. The CASAC Lead Review Panel and the CASAC will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies.

Section 109(d)(1) of the CAA requires that the Agency periodically review and revise, as appropriate, the air quality criteria and the NAAQS for the six "criteria" air pollutants, including lead. EPA is currently reviewing the primary (health-based) and secondary (welfare-based) NAAQS for lead. The Lead Review Panel held a face-to-face meeting on July 20-21, 2011 (as noticed in 76 FR 36120-36121) to provide a peer review of EPA's draft *Integrated Science Assessment for Lead (First External Review Draft—May 2011)* and to provide consultative advice on EPA's *Review of the National Ambient Air Quality Standards for Lead: Risk and Exposure Assessment Planning Document*. Information about this review activity may be found on the CASAC Web site at <http://www.epa.gov/casac/>. Pursuant to FACA and EPA policy, notice is hereby given that the CASAC Lead Review Panel will hold a follow-up public teleconference to discuss the NAAQS review process and its draft letter reviewing EPA's *Integrated Science Assessment for Lead (First External Review Draft—May 2011)*.

Availability of Meeting Materials: Agendas and materials in support of the meeting will be placed on the CASAC Web site at <http://www.epa.gov/casac> in advance of the meeting. For technical questions and information concerning EPA's *Integrated Science Assessment for Lead (First External Review Draft)*, please contact Dr. Ellen Kirrane of EPA's Office of Research and Development at (919) 541-1340, or kirrane.ellen@epa.gov.

Procedures for Providing Public Input: Public comment for consideration by EPA's federal advisory committees and panels has a different purpose from public comment provided to EPA program offices. Therefore, the process for submitting comments to a federal advisory committee is different from the process used to submit comments to an EPA program office.

Federal advisory committees and panels, including scientific advisory committees, provide independent advice to EPA. Members of the public can submit comments for a federal advisory committee to consider as it develops advice for EPA. Input from the public to the CASAC will have the most impact if it provides specific scientific or technical information or analysis for CASAC panels to consider or if it relates to the clarity or accuracy of the technical information. Members of the public wishing to provide comment should contact the Designated Federal Officer directly.

Oral Statements: In general, individuals or groups requesting an oral

presentation at a teleconference will be limited to three minutes. Interested parties should contact Mr. Aaron Yeow, DFO, in writing (preferably via e-mail) at the contact information noted above by September 8, 2011, to be placed on the list of public speakers for the meeting.

Written Statements: Written statements should be supplied to the DFO via e-mail at the contact information noted above by September 8, 2011 for the meeting so that the information may be made available to the Panel members for their consideration. Written statements should be supplied in one of the following electronic formats: Adobe Acrobat PDF, MS Word, MS PowerPoint, or Rich Text files in IBM-PC/Windows 98/2000/XP format. It is the SAB Staff Office general policy to post written comments on the Web page for the advisory meeting or teleconference. Submitters are requested to provide an unsigned version of each document because the SAB Staff Office does not publish documents with signatures on its Web sites. Members of the public should be aware that their personal contact information, if included in any written comments, may

be posted to the CASAC Web site. Copyrighted material will not be posted without explicit permission of the copyright holder.

Accessibility: For information on access or services for individuals with disabilities, please contact Mr. Aaron Yeow at (202) 564-2050 or yeow.aaron@epa.gov. To request accommodation of a disability, please contact Mr. Yeow preferably at least ten days prior to the teleconference to give EPA as much time as possible to process your request.

Dated: August 11, 2011.

FEDERAL DEPOSIT INSURANCE CORPORATION

Update to Notice of Financial Institutions for Which the Federal Deposit Insurance Corporation Has Been Appointed Either Receiver, Liquidator, or Manager

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Update Listing of Financial Institutions in Liquidation.

SUMMARY: Notice is hereby given that the Federal Deposit Insurance Corporation (Corporation) has been appointed the sole receiver for the following financial institutions effective as of the Date Closed as indicated in the listing. This list (as updated from time to time in the **Federal Register**) may be relied upon as "of record" notice that the Corporation has been appointed receiver for purposes of the statement of policy published in the July 2, 1992 issue of the **Federal Register** (57 FR 29491). For further information concerning the identification of any institutions which have been placed in liquidation, please visit the Corporation Web site at <http://www.fdic.gov/bank/individual/failed/banklist.html> or contact the Manager of Receivership Oversight in the appropriate service center.

Dated: August 15, 2011.

FEDERAL ELECTION COMMISSION

[Notice 2011-12]

Filing Dates for the Oregon Special Election in the 1st Congressional District

AGENCY: Federal Election Commission.
ACTION: Notice of filing dates for special election.

SUMMARY: Oregon has scheduled elections on November 8, 2011, and January 31, 2012, to fill the U.S. House seat in the 1st Congressional District vacated by Representative David Wu. Committees required to file reports in connection with the Special Primary Election on November 8, 2011, shall file a 12-day Pre-Primary Report. Committees required to file reports in connection with both the Special Primary and Special General Election on January 31, 2012, shall file a 12-day Pre-

Primary Report, a consolidated 12-day Pre-General Report and Year-End Report, and a 30-day Post-General Report.

FOR FURTHER INFORMATION CONTACT: Mr. Greg J. Scott, Information Division, 999 E Street, NW., Washington, DC 20463; Telephone: (202) 694-1100; Toll Free (800) 424-9530.

SUPPLEMENTARY INFORMATION:

Principal Campaign Committees

All principal campaign committees of candidates who participate in the Oregon Special Primary and Special General Elections shall file a 12-day Pre-Primary Report on October 27, 2011; a consolidated 12-day Pre-General and Year-End Report on January 19, 2012; and a 30-day Post-General Report on March 1, 2012. (See chart below for the closing date for each report.)

All principal campaign committees of candidates participating *only* in the Special Primary Election shall file a 12-day Pre-Primary Report on October 27,

2011. (See chart below for the closing date for each report).

Note that these reports are in addition to the campaign committee's regular quarterly filings. (See chart below for the closing date for each report.)

Unauthorized Committees (PACs and Party Committees)

Political committees filing on a semi-annual basis in 2011 or a quarterly basis in 2012 are subject to special election reporting if they make previously undisclosed contributions or expenditures in connection with the Oregon Special Primary or Special General Election by the close of books for the applicable report(s). (See chart below for the closing date for each report).

Since disclosing financial activity from two different calendar years on one report would conflict with the calendar year aggregation requirements stated in the Commission's disclosure rules, unauthorized committees that trigger the filing of the consolidated Pre-General & Year-End Report will be

required to file this report on two separate forms: One form to cover 2011 activity, labeled as the Year-End Report; and the other form to cover only 2012 activity, labeled as the Pre-General Report. Both forms must be filed by January 19, 2012.

Committees filing monthly that make contributions or expenditures in connection with the Oregon Special Primary or General Elections will continue to file according to the monthly reporting schedule.

Additional disclosure information in connection with the Oregon Special Election may be found on the FEC Web

site at http://www.fec.gov/info/report_dates.shtml.

Disclosure of Lobbyist Bundling Activity

Campaign committees, party committees and Leadership PACs that are otherwise required to file reports in connection with the special elections must simultaneously file FEC Form 3L if they receive two or more bundled contributions from lobbyists/registrants or lobbyist/registrant PACs that aggregate in excess of the lobbyist bundling disclosure threshold during the special election reporting periods

(see charts below for closing date of each period). 11 CFR 104.22(a)(5)(v).

The lobbyist bundling disclosure threshold for calendar year 2011 is \$16,200. This threshold amount may change in 2012 based upon the annual cost of living adjustment (COLA). As soon as the adjusted threshold amount is available, the Commission will publish it in the **Federal Register** and post it on its Web site. 11 CFR 104.22(g) and 110.17(e)(2). For more information on these requirements, see **Federal Register** Notice 2009-03, 74 FR 7285 (February 17, 2009).

CALENDAR OF REPORTING DATES FOR OREGON SPECIAL ELECTION

Report	Closed of books ¹	Reg./cert. & overnight mailing deadline	Filing deadline
Committees Involved in Only the Special Primary (11/08/11) Must File:			
Pre-Primary	10/19/11	10/24/11	10/27/11
Year-End	12/31/11	01/31/12	01/31/12
Committees Involved in Both the Special Primary (11/08/11) and Special General (01/31/12) Must File:			
Pre-Primary	10/19/11	10/24/11	10/27/11
Pre-General & Year-End ²	01/11/12	³ 01/16/12	01/19/12
Post-General	02/20/12	03/01/12	03/01/12
April Quarterly	03/31/12	04/15/12	⁴ 04/15/12
Committees Involved in Only the Special General (01/31/12) Must File:			
Pre-General & Year-End ²	01/11/12	³ 01/16/12	01/19/12
Post-General	02/20/12	03/01/12	03/01/12
April Quarterly	03/31/12	04/15/12	⁴ 04/15/12

¹ These dates indicate the end of the reporting period. A reporting period always begins the day after the closing date of the last report filed. If the committee is new and has not previously filed a report, the first report must cover all activity that occurred before the committee registered as a political committee with the Commission up through the close of books for the first report due.

² Committees should file a consolidated Pre-General & Year-End Report by the filing deadline of the Pre-General Report.

³ Notice that the registered/certified & overnight mailing deadline falls on a Federal holiday. The report should be postmarked on or before that date.

⁴ Notice that this filing deadline falls on a weekend. Filing deadlines are not extended when they fall on nonworking days. Accordingly, reports filed by methods other than Registered, Certified or Overnight Mail, or electronically, must be received before the Commission's close of business on the last business day before the deadline.

Dated: August 11, 2011.
On behalf of the Commission.

Cynthia L. Bauerly,
Chair, Federal Election Commission.

BILLING CODE 6715-01-P

FEDERAL MARITIME COMMISSION

[Docket No. 11-12]

China Shipping Container Lines Co., Ltd.; COSCO Container Lines Company Limited; Evergreen Line A Joint Service Agreement; Hanjin Shipping Co., Ltd.; Horizon Lines, LLC; Kawasaki Kisen Kaisha, Ltd.; Nippon Yusen Kaisha; United Arab Shipping Company (S.A.G.); and Yang Ming Marine Transport Corporation v. The Port Authority of New York and New Jersey; Notice of Filing of Complaint and Assignment

Notice is given that a complaint has been filed with the Federal Maritime Commission (Commission) by China Shipping Container Lines Co., Ltd.; COSCO Container Lines Company

Limited; Evergreen Line A Joint Service Agreement; Hanjin Shipping Co., Ltd.; Horizon Lines, LLC; Kawasaki Kisen Kaisha, Ltd.; Nippon Yusen Kaisha; United Arab Shipping Company (S.A.G.); and Yang Ming Marine Transport Corporation, hereinafter "Complainants," against the Port Authority of New York and New Jersey, hereinafter "Respondent".

Complainants are each ocean common carriers. Complainants allege that Respondent is a marine terminal operator that "owns and operates marine terminal facilities in the New York and New Jersey area, including leased marine terminal facilities and public berths."

Complainants allege that Respondent violated the Shipping Act of 1984, 46 U.S.C. 41102(c) and 41106(2) because

through adoption and implementation of its published Tariff's provisions the Port "(a) has failed and continues to fail to establish, observe, and enforce just and reasonable regulations and practices relating to or connected with receiving, handling, storing, or delivering property; and (b) has given and continues to give undue and unreasonable preference and advantage or impose undue or unreasonable prejudice or disadvantage with respect to persons." In particular, Complainants allege that the Port has adopted a "Cargo Facility Charge" (CFC) which is "unlawful because Complainants do not receive services commensurate with the fee; because it severely and unreasonably prejudices Complainants while unduly preferring other users of the Port's facilities; and because the Cargo Facility Charge and the rules applying it provide for unlawful expulsion of Complainants from the Port." Complainants request that the Commission issue an order "declaring Respondent's CFC and Section H [of Respondent's tariff] to be unlawful, and commanding Respondent: to cease and desist from the aforesaid violations; to establish and put in force such practices as the Commission determines to be lawful and reasonable; to pay to Complainants by way of reparations for the unlawful conduct herein described a sum to be determined, with interest and attorney's fees and such other sums as the Commission may determine to be proper as an award of reparations; and that such other and further order or orders be made as the Commission determines to be proper in the premises." The full text of the complaint can be found in the Commission's Electronic Reading Room at <http://www.fmc.gov>.

This proceeding has been assigned to the Office of Administrative Law Judges. Hearing in this matter, if any is held, shall commence within the time limitations prescribed in 46 CFR 502.61, and only after consideration has been given by the parties and the presiding officer to the use of alternative forms of dispute resolution. The hearing shall include oral testimony and cross-examination in the discretion of the presiding officer only upon proper showing that there are genuine issues of material fact that cannot be resolved on the basis of sworn statements, affidavits, depositions, or other documents or that the nature of the matter in issue is such that an oral hearing and cross-examination are necessary for the development of an adequate record. Pursuant to the further terms of 46 CFR 502.61, the initial decision of the

presiding officer in this proceeding shall be issued by August 13, 2012 and the final decision of the Commission shall be issued by December 11, 2012.

Karen V. Gregory,
Secretary.

BILLING CODE 6730-01-P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR Part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The applications listed below, as well as other related filings required by the Board, are available for immediate inspection at the Federal Reserve Bank indicated. The application also will be available for inspection at the offices of the Board of Governors. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)). If the proposal also involves the acquisition of a nonbanking company, the review also includes whether the acquisition of the nonbanking company complies with the standards in section 4 of the BHC Act (12 U.S.C. 1843). Unless otherwise noted, nonbanking activities will be conducted throughout the United States.

Unless otherwise noted, comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors not later than September 12, 2011.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690-1414:

1. *C-B-G, Inc.*, West Liberty, Iowa; to acquire up to 50.01 percent of the voting shares of Washington Bancorp, and thereby indirectly acquire voting shares of Federation Bank, both in Washington, Iowa.

B. Federal Reserve Bank of Kansas City (Dennis Denney, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198-0001:

1. *Community Bank Partners, Inc.*, Denver, Colorado; to acquire 100

percent of the voting shares of First National Bancshares, Inc., and thereby indirectly acquire voting shares of First National Bank, both in Goodland, Kansas.

Board of Governors of the Federal Reserve System, August 15, 2011.

Robert deV. Frierson,

Deputy Secretary of the Board.

BILLING CODE 6210-01-P

FEDERAL TRADE COMMISSION

SES Performance Review Board

AGENCY: Federal Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given of the appointment of members to the FTC Performance Review Board.

FOR FURTHER INFORMATION CONTACT: Karen Leydon, Chief Human Capital Officer, 600 Pennsylvania Avenue, NW., Washington, DC 20580, (202) 326-3633.

SUPPLEMENTARY INFORMATION:

Publication of the Performance Review

Board (PRB) membership is required by 5 U.S.C. 4314(c)(4). The PRB reviews and evaluates the initial appraisal of a senior executive's performance by the supervisor, and makes recommendations regarding performance ratings, performance awards, and pay-for-performance pay adjustments to the Chairman.

The following individuals have been designated to serve on the Commission's Performance Review Board:

Eileen Harrington, Executive Director, Chair.

Willard K. Tom, General Counsel.

Pauline M. Ippolito, Deputy Director, Bureau of Economics.

Richard A. Feinstein, Director, Bureau of Competition.

Jessica L. Rich, Deputy Director, Bureau of Consumer Protection.

By direction of the Commission.

Richard C. Donohue,

Acting Secretary.

[FR Doc. 2011-21021 Filed 8-17-11; 8:45 am]

BILLING CODE 6750-01-M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Meeting of the National Biodefense Science Board

AGENCY: Department of Health and Human Services, Office of the Secretary.

ACTION: Notice.

SUMMARY: As stipulated by the Federal Advisory Committee Act, the U.S. Department of Health and Human Services is hereby giving notice that the National Biodefense Science Board (NBSB) will be holding a public meeting. The meeting is open to the public.

DATES: The NBSB will hold a public meeting on September 22, 2011 from 9 a.m. to 5 p.m. E.S.T. The agenda is subject to change as priorities dictate.

ADDRESSES: Almas Temple—Sphinx Grand Ballroom; 1315 K Street, NW., Washington, DC 20005 (adjacent to the Hamilton Crowne Plaza Washington). To attend by teleconference, please check the NBSB September meeting webpage, <http://www.phe.gov/Preparedness/legal/boards/nbsb/meetings/Pages/110922meeting.aspx>. Individuals who wish to attend the meeting in person should send an e-mail to NBSB@HHS.GOV with "NBSB Registration" in the subject line.

FOR FURTHER INFORMATION: e-mail: NBSB@HHS.GOV

SUPPLEMENTARY INFORMATION: Pursuant to section 319M of the Public Health

Service Act (42 U.S.C. 247d-7f) and section 222 of the Public Health Service Act (42 U.S.C. 217a), the Department of Health and Human Services established the National Biodefense Science Board. The Board shall provide expert advice and guidance to the Secretary on scientific, technical, and other matters of special interest to the Department of Health and Human Services regarding current and future chemical, biological, nuclear, and radiological agents, whether naturally occurring, accidental, or deliberate. The Board may also provide advice and guidance to the Secretary and/or the Assistant Secretary for Preparedness and Response on other matters related to public health emergency preparedness and response.

Background: The majority of this public meeting will be dedicated to a discussion of the findings of the NBSB's Anthrax Vaccine Working Group. Subsequent agenda topics will be added as priorities dictate. Any additional agenda topics will be available on the Board's September meeting webpage prior to the public meeting.

Availability of Materials: The meeting agenda and materials will be posted prior to the meeting on the September meeting webpage at <http://www.phe.gov/Preparedness/legal/boards/nbsb/meetings/Pages/110922meeting.aspx>.

Procedures for Providing Public Input: Any member of the public providing oral comments at the meeting must sign-in at the registration desk and provide his/her name, address, and affiliation. All written comments must be received prior to September 21, 2011 and should be sent by e-mail to NBSB@HHS.GOV with "NBSB Public Comment" as the subject line. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should e-mail nbsb@hhs.gov.

Dated: August 8, 2011.

Nicole Lurie,

Assistant Secretary for Preparedness and Response.

[FR Doc. 2011-21163 Filed 8-17-11; 8:45 am]

BILLING CODE 4150-37-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Submission for OMB Review; Comment Request

Title: Low Income Home Energy Assistance Program (LIHEAP) Household Report.

OMB No.: 0970-0060.

Description: This report is an annual activity required by statute (42 U.S.C. 8629) and Federal regulations (45 CFR 96.92) for the Low Income Home Energy Assistance Program (LIHEAP).

Submission of the completed report is one requirement for LIHEAP grantees applying for Federal LIHEAP block grant funds. States, the District of Columbia, and the Commonwealth of Puerto Rico are required to report statistics for the previous Federal fiscal year on:

- Assisted and applicant households, by type of LIHEAP assistance;
- Assisted and applicant households, by type of LIHEAP assistance and poverty level;
- Assisted households, regardless of the type(s) of LIHEAP assistance;
- Assisted households, by type of LIHEAP assistance, having at least one vulnerable member broken out; by a person at least 60 years or younger, disabled person, or a child five years older or younger;
- Assisted households, by type of LIHEAP assistance, with at least one member age 2 years or under;
- Assisted households, by type of LIHEAP assistance, with at least one member ages 3 years through 5 years; and
- Assisted households, regardless of the type(s) of LIHEAP assistance, having at least one member 60 years or older, disabled, or five years old or younger.

Insular areas (other than the Commonwealth of Puerto Rico) and Indian Tribal Grantees are required to submit data only on the number of households receiving heating, cooling, energy crisis, or weatherization benefits.

The information is being collected for the Department's annual *LIHEAP Report to Congress*. The data also provide information about the use of LIHEAP funds. Finally, the data are used in the calculation of LIHEAP performance measures under the Government Performance and Results Act of 1993. The data elements will allow the accuracy of measuring LIHEAP targeting performance and LIHEAP cost efficiency.

Respondents: State Governments, Tribal Governments, Insular Areas, the District of Columbia, and the Commonwealth of Puerto Rico.

ANNUAL BURDEN ESTIMATES

Instrument	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Assisted Household Report—Long Form	52	1	25	1,300
Assisted Household Report—Short Form	164	1	1	164
Applicant Household Report	52	1	13	676

Estimated Total Annual Burden Estimates: 2,140.

Additional Information:

Copies of the proposed collection may be obtained by writing to the Administration for Children and Families, Office of Administration, Office of Information Services, 370 L'Enfant Promenade, SW., Washington, DC 20447, *Attn:* ACF Reports Clearance Officer. All requests should be identified by the title of the information collection. *E-mail address:* infocollection@acf.hhs.gov.

OMB Comment:

OMB is required to make a decision concerning the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment is best assured of having its full effect if OMB receives it within 30 days of publication. Written comments and recommendations for the proposed information collection should be sent directly to the following:

Office of Management and Budget, Paperwork Reduction Project, *Fax:* 202-395-6974, *Attn:* Desk Officer for the Administration for Children and Families.

Robert Sargis,

Reports Clearance Officer.

[FR Doc. 2011-21107 Filed 8-17-11; 8:45 am]

BILLING CODE 4184-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2011-N-0424]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Temporary Marketing Permit Applications

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Fax written comments on the collection of information by September 19, 2011.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, *Attn:* FDA Desk Officer, *FAX:* 202-395-7285, or e-mailed to oir_submission@omb.eop.gov. All comments should be identified with the OMB control number 0910-0133. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Denver Presley, Jr., Office of Information Management, Food and Drug Administration, 1350 Piccard Dr., PI50-400B, Rockville, MD 20850, 301-796-3793.

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Temporary Marketing Permit Applications—21 CFR 130.17(c) and (i)—(OMB Control Number 0910-0133)—Extension

Section 401 of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 341) directs FDA to issue regulations establishing definitions and standards of identity for food “[w]henver * * * such action will promote honesty and fair dealing in the interest of consumers * * *.” Under section 403(g) of the FD&C Act (21 U.S.C. 343(g)), a food that is subject to a definition and standard of identity prescribed by regulation is misbranded if it does not conform to such definition and standard of identity. Section 130.17 (§ 130.17) provides for the issuance by FDA of temporary marketing permits that enable the food industry to test consumer acceptance and measure the technological and commercial feasibility in interstate commerce of experimental packs of food that deviate from applicable definitions and standards of identity. Section 130.17(c) enables the Agency to monitor the manufacture, labeling, and distribution of experimental packs of food that deviate from applicable definitions and standards of identity. The information so obtained can be used in support of a petition to establish or amend the applicable definition or standard of identity to provide for the variations. Section 130.17(i) specifies the information that a firm must submit to FDA to obtain an extension of a temporary marketing permit.

In the **Federal Register** of June 10, 2011 (76 FR 34080), FDA published a 60-day notice requesting public comment on the proposed collection of information. No comments were received.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹

21 CFR section	No. of respondents	No. of responses per respondent	Total annual responses	Average burden per response	Total hours
130.17(c)	13	2	26	25	650

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN¹—Continued

21 CFR section	No. of respondents	No. of responses per respondent	Total annual responses	Average burden per response	Total hours
130.17(i)	1	2	2	2	4
Total					654

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

The estimated number of temporary marketing permit applications and hours per response is an average based on the Agency's experience with applications received for the past 3 years, and information from firms that have submitted recent requests for temporary marketing permits. Based on this information, we estimate that there will be, on average, approximately 13 firms submitting requests for two temporary marketing permits per year over the next 3 years.

Thus, FDA estimates that 13 respondents will submit 2 requests for temporary marketing permits annually under § 130.17(c). The estimated number of respondents for § 130.17(i) is minimal because this section is seldom used by the respondents; therefore, the Agency estimates that there will be one or fewer respondents annually with two or fewer requests for extension of the marketing permit under § 130.17(i). The estimated number of hours per response is an average based on the Agency's experience and information from firms that have submitted recent requests for temporary marketing permits. We estimate that 13 respondents each will submit 2 requests for temporary marketing permits under § 130.17(c) and that it will take a respondent 25 hours per request to comply with the requirements of that section, for a total of 650 hours. We estimate that one respondent will submit two requests for extension of its temporary marketing permits under § 130.17(i) and that it will take a respondent 2 hours per request to comply with the requirements of that section, for a total of 4 hours.

Dated: August 12, 2011.

Leslie Kux,

Acting Assistant Commissioner for Policy.

[FR Doc. 2011-21039 Filed 8-17-11; 8:45 am]

BILLING CODE 4160-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2011-N-0425]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; Infant Formula Recall Regulations

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995. **DATES:** Fax written comments on the collection of information by September 19, 2011.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, *Attn:* FDA Desk Officer, *FAX:* 202-395-7285, or e-mailed to *oira_submission@omb.eop.gov*. All comments should be identified with the OMB control number 0910-0188. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT: Denver Presley, Jr., Office of Information Management, Food and Drug Administration, 1350 Piccard Dr., PI50-400B, Rockville, MD 20850, 301-796-3793.

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

Infant Formula Recall Regulations—21 CFR 107.230, 107.240, 107.250, 107.260, and 107.280—(OMB Control Number 0910-0188)—Extension

Section 412(e) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act)

(21 U.S.C. 350a(e)) provides that if the manufacturer of an infant formula has knowledge that reasonably supports the conclusion that an infant formula processed by that manufacturer has left its control and may not provide the nutrients required in section 412(i) of the FD&C Act or is otherwise adulterated or misbranded, the manufacturer must promptly notify the Secretary of Health and Human Services (the Secretary). If the Secretary determines that the infant formula presents a risk to human health, the manufacturer must immediately take all actions necessary to recall shipments of such infant formula from all wholesale and retail establishments, consistent with recall regulations and guidelines issued by the Secretary. Section 412(f)(2) of the FD&C Act states that the Secretary shall by regulation prescribe the scope and extent of recalls of infant formula necessary and appropriate for the degree of risk to human health presented by the formula subject to recall. FDA's infant formula recall regulations in part 107 (21 CFR part 107) implement these statutory provisions.

Section 107.230 requires each recalling firm to conduct an infant formula recall with the following elements: (1) Evaluate the hazard to human health, (2) devise a written recall strategy, (3) promptly notify each affected direct-account (customer) about the recall, and (4) furnish the appropriate FDA district office with copies of these documents. If the recalled formula presents a risk to human health, the recalling firm must also request that each establishment that sells the recalled formula post (at point of purchase) a notice of the recall and provide FDA with a copy of the notice. Section 107.240 requires the recalling firm to conduct an infant formula recall with the following elements: (1) Notify the appropriate FDA district office of the recall by telephone within 24 hours, (2) submit a written report to that office within 14 days, and (3) submit a written status report at least every 14 days until the recall is terminated. Before terminating a recall, the recalling firm is required to submit a recommendation

for termination of the recall to the appropriate FDA district office and wait for written FDA concurrence (§ 107.250). Where the recall strategy or implementation is determined to be deficient, FDA may require the firm to change the extent of the recall, carry out additional effectiveness checks, and issue additional notifications (§ 107.260). In addition, to facilitate location of the product being recalled, the recalling firm is required to maintain distribution records for at least 1 year after the expiration of the shelf life of the infant formula (§ 107.280).

The reporting and recordkeeping requirements described previously are designed to enable FDA to monitor the

effectiveness of infant formula recalls in order to protect babies from infant formula that may be unsafe because of contamination or nutritional inadequacy or otherwise adulterated or misbranded. FDA uses the information collected under these regulations to help ensure that such products are quickly and efficiently removed from the market.

In the **Federal Register** of June 7, 2011 (76 FR 32976), FDA published a 60-day notice requesting public comment on the proposed collection of information. No comments were received.

FDA has added a new table 2 to this document to comply with the new requirement to report third-party disclosure burden hours in a separate table. The third-party disclosure burden

hours were previously reported in the 60-day notice under the reporting burden table (table 1). In compliance with the new requirement, we have broken out the third-party disclosure burden hours in a new third-party disclosure burden table (table 2). FDA has moved 50 hours per recall from line 1 of table 1 to line 1 of table 2, and 25 hours per recall from line 4 of table 1 to line 2 of table 2. This is being done to show the third-party disclosure burden previously disclosed in table 1. The total estimated burden of this collection remains unchanged at 12,864 hours.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN ¹

21 CFR Section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response (in hours)	Total hours
107.230	2	1	2	4,450	8,900
107.240	2	1	2	1,482	2,964
107.250	2	1	2	120	240
107.260 ²	1	1	1	625	625
Total					12,729

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

² No burden has been estimated for the recordkeeping requirement in § 107.280 because these records are maintained as a usual and customary part of normal business activities. Manufacturers keep infant formula distribution records for the prescribed period as a matter of routine business practice.

The reporting and third-party disclosure burden estimates are based on Agency records, which show that there are five manufacturers of infant formula and that there have been, on average, two infant formula recalls per year for the past 3 years. Based on this information, we estimate that there will be, on average, approximately two infant formula recalls per year over the next 3 years.

Thus, FDA estimates that two respondents will conduct recalls annually under §§ 107.230, 107.240, and 107.250. The estimated number of respondents for § 107.260 is minimal because this section is seldom used by FDA; therefore, the Agency estimates that there will be one or fewer respondents annually for § 107.260.

The estimated number of reporting burden hours per response is an average based on the Agency's experience and information from firms that have conducted recalls. We estimate that two respondents will conduct infant formula recalls under § 107.230 and that it will

take a respondent 4,450 hours to comply with the requirements of that section, for a total of 8,900 hours. In the 60-day notice, we estimated that it will take a respondent 4,500 hours per recall to comply with § 107.230 for a total of 9,000 hours. As noted, we have added a new table 2 to report third-party disclosure burden hours. The new lower figure of 4,450 hours per recall reflects that 50 hours are being reported in new table 2. We estimate that two respondents will conduct infant formula recalls under § 107.240 and that it will take a respondent 1,482 hours to comply with the requirements of that section, for a total of 2,964 hours. We estimate that two respondents will submit recommendations for termination of infant formula recalls under § 107.250 and that it will take a respondent 120 hours to comply with the requirements of that section, for a total of 240 hours. Finally, we estimate that one respondent will need to carry out additional effectiveness checks and issue additional notifications under

§ 107.260, for a total of 625 hours. In the 60-day notice, we estimated that it will take a respondent 650 hours per recall to comply with § 107.260 for a total of 650 hours. As noted, we have added a new table 2 to report third-party disclosure burden hours. The new lower figure of 625 hours per recall reflects that 25 hours are being reported in new table 2.

Under 5 CFR 1320.3(b)(2), the time, effort, and financial resources necessary to comply with a collection of information are excluded from the burden estimate if the reporting, recordkeeping, or disclosure activities needed to comply are usual and customary because they would occur in the normal course of activities. No burden has been estimated for the recordkeeping requirement in § 107.280 because these records are maintained as a usual and customary part of normal business activities. Manufacturers keep infant formula distribution records for the prescribed period as a matter of routine business practice.

TABLE 2—ESTIMATED ANNUAL THIRD-PARTY DISCLOSURE BURDEN¹

21 CFR Section	Number of respondents	Number of disclosures per respondent	Total annual disclosures	Average burden per disclosure (in hours)	Total hours
107.230	2	1	2	50	100
107.260	1	1	1	25	25
Total					125

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

New table 2 reports the Agency's third-party disclosure burden estimates for §§ 107.230 and 107.260. The estimated burden hours per disclosure is an average based on the Agency's experience. The third-party disclosure burden in § 107.230 is the requirement to promptly notify each affected direct-account (customer) about the recall and if the recalled formula presents a risk to human health, the requirement that the recalling firm must also request that each establishment that sells the recalled formula post (at the point of purchase) a notice of the recall. We estimate that two respondents will conduct infant formula recalls under § 107.230 and that it will take a respondent 50 hours to comply with the third-party disclosure requirements of that section, for a total of 100 hours. The third-party disclosure burden in § 107.260 is the requirement to issue additional notifications where the recall strategy or implementation is determined to be deficient. We estimate that one respondent will issue additional notifications under § 107.260 and that it will take a respondent 25 hours to comply with the third-party disclosure requirements of that section, for a total of 25 hours.

Dated: August 12, 2011.

Leslie Kux,

Acting Assistant Commissioner for Policy.

[FR Doc. 2011-21040 Filed 8-17-11; 8:45 am]

BILLING CODE 4160-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2011-N-0402]

Agency Information Collection Activities; Submission for Office of Management and Budget Review; Comment Request; State Petitions for Exemption From Preemption

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a proposed collection of information has been submitted to the Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995.

DATES: Fax written comments on the collection of information by September 19, 2011.

ADDRESSES: To ensure that comments on the information collection are received, OMB recommends that written comments be faxed to the Office of Information and Regulatory Affairs, OMB, *Attn:* FDA Desk Officer, *Fax:* 202-395-7285, or e-mailed to *oira_submission@omb.eop.gov*. All comments should be identified with the OMB control number 0910-0277. Also include the FDA docket number found in brackets in the heading of this document.

FOR FURTHER INFORMATION CONTACT:

Denver Presley, Jr., Office of Information Management, Food and Drug Administration, 1350 Piccard Dr., PI50-400B, Rockville, MD 20850, 301-796-3793.

SUPPLEMENTARY INFORMATION: In compliance with 44 U.S.C. 3507, FDA has submitted the following proposed collection of information to OMB for review and clearance.

State Petitions for Exemption From Preemption—21 CFR 100.1(d) (OMB Control Number 0910-0277)—Extension

Under section 403A(b) of the Federal Food, Drug, and Cosmetic Act (the FD&C Act) (21 U.S.C. 343-1(b)), States may petition FDA for exemption from Federal preemption of State food labeling and standard of identity requirements. Section 100.1(d) (21 CFR 100.1(d)) sets forth the information a State is required to submit in such a petition. The information required under § 100.1(d) enables FDA to determine whether the State food labeling or standard of identity requirement satisfies the criteria of section 403A(b) of the FD&C Act for granting exemption from Federal preemption.

In the **Federal Register** of June 10, 2011 (76 FR 34082), FDA published a 60-day notice requesting public comment on the proposed collection of information. No comments were received.

FDA estimates the burden of this collection of information as follows:

TABLE 1—ESTIMATED ANNUAL REPORTING BURDEN¹

21 CFR section	Number of respondents	Number of responses per respondent	Total annual responses	Average burden per response	Total hours
100.1(d)	1	1	1	40	40

¹ There are no capital costs or operating and maintenance costs associated with this collection of information.

The reporting burden for § 100.1(d) is minimal because petitions for exemption from preemption are seldom submitted by States. In the last 3 years, FDA has not received any new petitions

for exemption from preemption; therefore, the Agency estimates that one or fewer petitions will be submitted annually. Although FDA has not received any new petitions for

exemption from preemption in the last 3 years, it believes these information collection provisions should be extended to provide for the potential future need of a State or local

government to petition for an exemption from preemption under the provisions of section 403A of the FD&C Act.

Dated: August 12, 2011.

Leslie Kux,

Acting Assistant Commissioner for Policy.

BILLING CODE 4160-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2011-N-0012]

Direct Discovery of HLA Associated Influenza Epitopes Isolated From Human Cells for Vaccine and Therapeutic Evaluation and Development (U01)

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of grant funds for the support of a sole source cooperative agreement with the University of Oklahoma Health Sciences Center. The goal of the FDA, Center for Drug Evaluation and Research, Office of Chief Scientist, is to develop technology to molecularly characterize peptide epitopes that are processed and presented on soluble HLA (human leucocyte antigen) expressed by human cells. Initial studies will examine and characterize influenza peptides isolated from several different soluble Class I HLAs produced from influenza infected human lung cell lines. There is a growing interest in developing universal vaccines for influenza by targeting conserved internal proteins to stimulate cross-protective CTLs (cytolytic T lymphocyte) to provide long-lasting immunity. It is therefore critically important to identify which viral epitopes are generated by antigen processing in influenza infected lung cells, the target cells of cell mediated immune response to respiratory viruses. FDA seeks a collaboration to develop this technology for this purpose which can then be applied to identifying and characterizing other HLA-presented epitopes in viral infections, cancer, and immune toxicities.

DATES: Important dates are as follows:

1. The application due date is September 1, 2011.
2. The anticipated start date is November 1, 2011.
3. The opening date is August 18, 2011.

4. The expiration date is November 2, 2011.

FOR FURTHER INFORMATION AND ADDITIONAL REQUIREMENTS CONTACT:

For Programmatic questions and concerns contact: Michael Norcross, Center for Drug Evaluation and Research, Food and Drug Administration, 9000 Rockville Pike, N29B, Rm. 4NN (HFD 122), Bethesda, MD 20892, Telephone: 301-827-0793; E-mail: Michael.norcross@fda.hhs.gov.

For Financial and Administrative questions and concerns contact: Gladys M. Bohler, Food and Drug Administration, Office of Acquisitions and Grant Services, 5630 Fisher's Lane, Rm. 1078 (HFA 500), Rockville, MD 20857, Telephone: 301-827-7175, E-mail: gladys.bohler@fda.hhs.gov.

For more information on this funding opportunity announcement (FOA) and to obtain detailed requirements, please refer to the full FOA located at: <http://www.fda.gov/AboutFDA/CentersOffices/CDER/ucm088761.htm>.

SUPPLEMENTARY INFORMATION:

I. Funding Opportunity Description

Funding Opportunity Number: RFA-FD-12-001.

Catalog of Federal Domestic Assistance Number: 93.103.

A. Background

Knowledge on how viral and self proteins are processed and presented in HLA molecules is important to understand how the body defends itself from infection and how immune responses can lead to tissue toxicities. Developing technology to allow direct identification of epitopes bound by HLA molecules is critical to vaccine and therapeutic immune strategies. FDA is interested in collaborative research to develop and implement this technology which will be valuable in evaluation and review of vaccines and therapeutics. Initial studies will address identifying epitopes from influenza that are presented by different HLA alleles in infected lung cells.

Influenza virus infection affects a significant proportion of the population and is associated with serious morbidity and mortality. Although many epitopes can be predicted by computer programs and by screening peripheral blood cells with panels of viral peptides from influenza, the peptides that are presented on the infected target cells in the tissues and the infiltrating T cells that recognize the HLA-peptide complexes are the critical elements to control and recover from infection. The technology of directly identifying viral epitopes in HLA can elucidate viral targets for T cells and provide the

foundation for new approaches for rapid development of effective vaccines. More effective vaccines to prevent and control influenza infections will have broad public health benefits by reducing morbidity and mortality of this infectious disease.

B. Research Objectives

For this purpose, a direct epitope elution approach is needed to allow milligram quantities of HLA-peptide complexes to be purified from influenza infected lung cells lines that express soluble HLA. Human lung cell lines engineered to secrete soluble HLA from three supertypes (A*01, A*03, and B*27) should be infected with at least two current influenza strains and HLA collected during infection. HLA will be purified and bound peptides eluted. Influenza peptides should be systematically identified by mass spectrometry analysis and sequencing. Synthetic viral peptides can then be tested for binding to recombinant HLA to verify binding specificity and affinity. Influenza epitopes identified in this initial phase of the project can be evaluated for immunogenicity and antigenicity in follow up studies.

This project will provide the regulatory science to facilitate development and evaluation of direct discovery of HLA presented epitopes. The direct epitope methodology will be applied to current influenza strains initially, but has the flexibility to address novel pandemic strains and other pathological agents.

Goal 1: Identify virus-encoded class I HLA peptides presented during influenza infection of human lung cells.

Goal 2: In vitro validation of class I HLA-presented influenza peptides.

Goal 3: Develop HLA-epitope direct-discovery technology for use in FDA laboratories.

C. Eligibility Information

The technology requires extensive infrastructure for growing cells, purifying HLA from culture supernatants, and for mass spectrometry analysis. Staff at the University of Oklahoma Health Sciences Center are leaders in this technology and have published the first reports on applying this method to influenza. Support of this project will allow the extension of the methodology to examine other HLA types. FDA believes this is a novel and valuable methodology that should be implemented at FDA. Funding this collaborative initiative will allow FDA to acquire the proteomic expertise, training, and tissue culture support to establish a laboratory in the field of immunoproteomics. The direct

identification of viral epitopes is critically important to understanding immune responses to infection and vaccination, and there are currently no comparable methods besides the classic screening of vast arrays of overlapping viral peptides on blood lymphocytes. Peptide screening methods only identify possible target epitopes, but do not define which epitopes are expressed in lung tissue. The technology will be valuable for vaccine development and evaluation, and has the flexibility to allow rapid analysis of novel pandemic strains for immunogenic epitopes. The technology can be applied to other infectious diseases, cancer, and immunotoxicities.

II. Award Information/Funds Available

A. Award Amount

Only one grant award will be made in fiscal year (FY) 2012. The application budget is not limited, but it needs to reflect the actual needs of the proposed project. However, presently for FY 2012, the funds are available in the amount of \$400,000 (total cost), and are subject to change based on the availability of funds.

B. Length of Support

The maximum period is 1 year with the option of 4 more years of budget support depending on the availability of funds.

III. Paper Application, Registration, and Submission Information

To submit a paper application in response to this FOA, applicants should first review the full announcement located at <http://www.fda.gov/AboutFDA/CentersOffices/CDER/ucm088761.htm>. Persons interested in applying for a grant may obtain an application at <http://grants2.nih.gov/grants/funding/phs398/phs398.html>. For all paper application submissions, the following steps are required:

- Step 1: Obtain a Dun and Bradstreet (DUNS) Number.
- Step 2: Register With Central Contractor Registration.
- Step 3: Register With Electronic Research Administration (eRA) Commons.

Steps 1 and 2, in detail, can be found at http://www07.grants.gov/applicants/organization_registration.jsp. Step 3, in detail, can be found at <https://commons.era.nih.gov/commons/registration/registrationInstructions.jsp>. After you have followed these steps, submit paper applications to: Gladys Bohler, Grants Management Specialist (see **FOR FURTHER INFORMATION CONTACT** section of this document).

Dated: August 9, 2011.

Leslie Kux,

Acting Assistant Commissioner for Policy.

Food and Drug Administration

[Docket No. FDA-2011-N-0002]

Dialogues in Diversifying Clinical Trials: Successful Strategies for Engaging Women and Minorities in Clinical Trials

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of meeting.

The Food and Drug Administration (FDA) is announcing the following Office of Women's Health and Society for Women's Health Research jointly sponsored meeting: Dialogues in Diversifying Clinical Trials: Successful Strategies for Engaging Women and Minorities in Clinical Trials. The purpose of this symposium is to facilitate the broader discussion and dissemination of innovative strategies for increasing the recruitment and retention of women and minority subpopulations into clinical trials. The overarching goal of this symposium is to use a best practices learning exchange to share information and encourage successful methods and/or model implementation within a broad research community—industry, academia, and government.

Date and Time: The meeting will be held on September 22, 2011, from 8 a.m. to 9 a.m. (registration); 9 a.m. to 5:30 p.m. (program); 5:30 p.m. to 6:30 p.m. (reception); and September 23, from 8 a.m. to 1:30 p.m.

Location: The meeting will be held at L'Enfant Plaza Hotel, 480 L'Enfant Plaza, SW., Washington, DC 20024.

Contact: Deborah Kallgren, FDA Office of Women's Health, 10903 New Hampshire Ave., Bldg. 32, Rm. 2314, Silver Spring, MD 20993-0002, 301-796-9442, Fax: 301-847-8604, e-mail: deborah.kallgren@fda.hhs.gov.

Registration: Registration is free, but seating is limited to 200. Registration will be accepted online and is available at <http://www.swhr.org> through September 16, 2011. For information regarding registration contact: Rachel Griffith, Society for Women's Health Research (SWHR), 1025 Connecticut Ave., NW., Suite 701, Washington, DC 20036, 202-496-5001, Fax: 202-833-3472, e-mail: rachel@swhr.org.

If you need special accommodations due to a disability, please contact Rachel Griffith at least 7 days in advance.

Dated: August 12, 2011.

Leslie Kux,

Acting Assistant Commissioner for Policy.

BILLING CODE 4160-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Secretary's Advisory Committee on Heritable Disorders in Newborns and Children; Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463, codified at 5 U.S.C. App. 2), notice is hereby given of the following meeting:

Name: Secretary's Advisory Committee on Heritable Disorders in Newborns and Children.

Dates and Times: September 22, 2011, 8:30 a.m. to 5 p.m.; September 23, 2011, 8:30 a.m. to 3:30 p.m.

Place: Renaissance Washington, DC DuPont Circle Hotel, 1143 New Hampshire Avenue, NW., Washington, DC 20037.

Status: The meeting will be open to the public with attendance limited due to space availability. Participants are asked to register for the meeting by going to the registration Web site at <http://altarum.cvent.com/event/SACHDNC092011>. The registration deadline is Tuesday, September 20, 2011. Individuals who need special assistance, such as sign language interpretation or other reasonable accommodations, should indicate their needs on the registration website. The deadline for special accommodation requests is Friday, September 19, 2011. If there are technical problems gaining access to the Web site, please contact Maureen Ball, Meetings Coordinator, at conferences@altarum.org.

Purpose: The Secretary's Advisory Committee on Heritable Disorders in Newborns and Children (Advisory Committee) was established by Congress to advise and guide the Secretary regarding the most appropriate application of universal newborn screening tests, technologies, policies, guidelines and programs for effectively reducing morbidity and mortality in newborns and children having (or at risk) for heritable disorders. The Advisory Committee, as authorized by Public Law 106-310, which added

section 1111 of the Public Health Service Act, codified at 42 U.S.C. 300b-10, also provides advice and recommendations concerning grants and projects authorized under section 1109 of the Public Health Service Act (42 U.S.C. 300b-8).

Agenda: The meeting will include a review and reflection of the previous 24 meetings and a look forward. The agenda will include topics related to the past, present, and future work of the Committee, including: (1) A presentation of the previous, current and future endeavors of the External Review Workgroup's activities; (2) an update from the Evidence Evaluation and Methods workgroup's progress on developing the Decision Process Tree; (3) review of previous reports, workgroups and publications from the Committee and next steps for public health genetics; and (4) discussion and presentations on the previous and continued work and reports of the Advisory Committee's subcommittees on laboratory standards and procedures, follow-up and treatment, and education and training. Proposed agenda items are subject to change as priorities dictate. You can locate the Agenda, Committee Roster and Charter, presentations, and meeting materials at the home page of the Advisory Committee's Web site at <http://www.hrsa.gov/heritabledisorderscommittee/>.

Public Comments: This meeting will include an extended public comment period during the morning session on September 22, 2011. Members of the public can submit written comments and/or present oral comments during the public comment period of the meeting. Those individuals who want to make oral comments are requested to register online by Tuesday, September 20, 2011, at <http://altarum.cvent.com/event/SACHDNC092011>. Requests should contain the name, address, telephone number, and any professional or business affiliation of the person desiring to make an oral comment. Groups having similar interests are requested to combine their comments and present them through a single representative. Written comments should be e-mailed no later than Tuesday, September 20, 2011 for consideration. Oral and written public comment will be included in the transcripts of the meeting and will be posted to the committee's Web site. Written comments should contain the name, address, telephone number, and any professional or business affiliation of the author. Submit written comments to Maureen Ball, Meetings Coordinator, Conference and Meetings Management, Altarum Institute, 1200 18th Street,

NW., Suite 700, Washington, DC 20036, telephone: 202 828-5100; fax: 202 785-3083, or e-mail: conferences@altarum.org.

Contact Person: Anyone interested in obtaining other relevant information should write or contact Alaina M. Harris, Maternal and Child Health Bureau, Health Resources and Services Administration, Room 18A-19, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, Telephone (301) 443-0721, aharris@hrsa.gov. More information on the Advisory Committee is available at <http://mchb.hrsa.gov/heritabledisorderscommittee>.

Dated: August 12, 2011.

Reva Harris,

Acting Director, Division of Policy and Information Coordination.

Government-Owned Inventions; Availability for Licensing

AGENCY: National Institutes of Health, Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The inventions listed below are owned by an agency of the U.S. Government and are available for licensing in the U.S. in accordance with 35 U.S.C. 207 to achieve expeditious commercialization of results of federally-funded research and development. Foreign patent applications are filed on selected inventions to extend market coverage for companies and may also be available for licensing.

ADDRESSES: Licensing information and copies of the U.S. patent applications listed below may be obtained by writing to the indicated licensing contact at the Office of Technology Transfer, National Institutes of Health, 6011 Executive Boulevard, Suite 325, Rockville, Maryland 20852-3804; *telephone:* 301-496-7057; *fax:* 301-402-0220. A signed Confidential Disclosure Agreement will be required to receive copies of the patent applications.

Quantitative Measurement of Syndesmophytes in Ankylosing Spondylitis Using Computed Tomography (CT)

Description of Technology: Syndesmophyte (abnormal bone) growth in the spine is a hallmark of Ankylosing Spondylitis, a type of inflammatory

arthritis. Syndesmophyte growth is currently monitored using semi-quantitative scoring of radiographs, but radiographs consider only a small part of the vertebra, and the method is subject to reader error. Because syndesmophytes grow slowly, radiographs also lack sensitivity. The invention provides a method to measure syndesmophytes using data from computed tomography scans of the lumbar spine. It provides computer algorithm that fully quantitates syndesmophyte volumes in three-dimension space. This method allows precise and accurate measurement of the presence and rate of growth of syndesmophytes over time, which for the first time will permit testing of whether any treatments can slow the progression of this type of spinal arthritis.

Potential Commercial Applications:

- The method would be useful for clinical trials of drugs against Syndesmophyte growth.
- Because of the improved precision, achieving statistical significance in assessing the efficacy of a drug would require smaller samples.

Competitive Advantages:

- The present method is more automated than existing methods.
- The method is more precise and sensitive than existing methods, thus providing more reliable statistical analysis and improved planning in treatment regimen.

Development Stage: In vivo data available (human).

Inventors: Sovira Tan (NIAMS), *et al.*

Publication: Tan S, Yao J, Ward MM, Yao L, Summers RM. Computer aided evaluation of ankylosing spondylitis using high-resolution CT. *IEEE Trans Med Imaging* 2008 Sep;27(9):1252-1267. [PMID 18779065].

Intellectual Property: HHS Reference No. E-167-2011/0—Software. Patent protection is not being pursued for this technology.

Licensing Contact: Michael Shmilovich, *Esq.*; 301-435-5019; shmilovm@mail.nih.gov.

Collaborative Research Opportunity: The National Institute of Arthritis and Musculoskeletal and Skin Diseases is seeking statements of capability or interest from parties interested in collaborative research to further develop, evaluate or commercialize this technology. For collaboration opportunities, please contact Brian W. Bailey, Ph.D. at bbailey@mail.nih.gov.

An Automated Method for Precise Measurement of Vertebral Body Height and Intervertebral Disk Height Using Computed Tomography

Description of Technology: Vertebral fractures due to osteoporosis result in loss of vertebral height. Degenerative disk disease in the spine results in loss of disk height. Currently, radiography and magnetic resonance imaging are used to assess vertebral and disk height, and measurements are done manually. The present invention offers improved method to measure vertebral and disk heights. The invention provides computer algorithm that substantially automates the task, and uses computed tomography. The advantage of computed tomography over radiography is that of 3D imaging over 2D imaging. Computed tomography's advantage over MRI is better image resolution. The combination of automation and superior imaging capability makes the method substantially more precise than previous ones. This allows better detection of changes in vertebral height and disk height over time, and thus aids in the planning of appropriate medical treatment in cases associated with the loss of vertebral or disk heights, such as in osteoporosis for example.

Potential Commercial Applications:

- The method would be useful for clinical trials of drugs for osteoporosis.
- Because of the improved precision, achieving statistical significance in assessing the efficacy of a drug would require smaller samples.

Competitive Advantages:

- The present method is semi-automated.
- The method is more precise and sensitive than existing methods, thus providing more reliable statistical analysis and improved planning in treatment regimen.

Development Stage: In vivo data available (human).

Inventors: Sovira Tan (NIAMS), *et al.*

Intellectual Property: HHS Reference No. E-166-2011/0—Software. Patent protection is not being pursued for this technology.

Licensing Contact: Michael Shmilovich, *Esq.*; 301-435-5019; shmilovm@mail.nih.gov.

Collaborative Research Opportunity: The National Institute of Arthritis and Musculoskeletal and Skin Diseases is seeking statements of capability or interest from parties interested in collaborative research to further develop, evaluate or commercialize this technology. For collaboration opportunities, please contact Brian W. Bailey, Ph.D. at bbailey@mail.nih.gov.

Monoclonal Antibodies Against Poliovirus

Description of Technology: Early work by Hammond *et al.* showed gamma globulin to be effective for the prevention of poliomyelitis. Therefore, passive immunotherapy could be another way to treat chronic excretors. Even though prior attempts to use intravenous immunoglobulin (IVIG) and breast milk were unsuccessful, there is reason to think that higher doses of antipoliovirus antibodies could result in complete clearance of poliovirus from chronically infected individuals. Six poliovirus-neutralizing MABs were recovered from a combinatorial Fab phage display library constructed from bone marrow-derived lymphocytes of immunized chimpanzees. The six MABs neutralized vaccine strains and virulent strains of poliovirus. Five MABs were serotype specific, while one MAB cross-neutralized serotypes 1 and 2. Both serotype 2-specific antibodies recognized antigenic site 1. No escape mutants to serotype 3-specific MABs could be generated. The administration of a serotype 1-specific MAB to transgenic mice susceptible to poliovirus at a dose of 5 µg/mouse completely protected them from paralysis after challenge with a lethal dose of wild-type poliovirus. Moreover, MAB injection 6 or 12 h after virus infection provided significant protection. This application claims the antibodies described above and methods for their use.

Potential Commercial Applications:

- Prophylaxis/therapeutic for poliovirus.
- Post-exposure emergency prophylaxis of poliovirus.

Competitive Advantages:

- No humanization required.
- Highly potent neutralizing antibodies.
- Biological materials available.

Development Stage:

- Pre-clinical.
- In vitro data available.
- In vivo data available (animal).

Inventors: Zhaochun Chen, Robert H. Purcell, Konstantin Chumakov (NIAID).

Publication: Chen Z, *et al.*

Chimpanzee-human monoclonal antibodies for treatment of chronic poliovirus excretors and emergency postexposure prophylaxis. *J Virol.* 2011 May;85(9):4354-4362. [PMID: 21345966].

Intellectual Property: HHS Reference No. E-076-2011/0—U.S. Provisional Application No. 61/443,915 filed 17 Feb 2011.

Licensing Contact: Peter Soukas, J.D.; 301-435-4646; soukasp@mail.nih.gov.

Methods of Treating Giardiasis Using FDA-Approved Compounds

Description of Technology: This technology includes a group of at least twenty-nine, diverse, commercially available compounds that are newly identified for activity against *Giardia lamblia* parasites. At least six of the candidate compounds, Bortezomib, Decitabine, Hydroxocobalamin, Amlexanox, Idarubicin, and Auranofin have preexisting FDA approval for human use for other (non-Giardia) conditions. Another three compounds, Fumagillin, Nitarosone and Carbadox have preexisting approval for veterinary use for non-Giardia conditions. Additional active compounds identified include: Acivicin, Riboflavin butyrate, BTO-1, GW9662, Dinitroph-dfgp, Deserpidine, Tetramethylthiuram disulfide, Disulfiram, Mitoxantrone, Ecteinascidin 743, 17-allyaminogeldanamycin, Carboquone and Nocodazole. The anti-Giardial activity of these compounds presents a cost saving opportunity for the rapid development of new, better tolerated treatments for the most prevalent human intestinal parasite infection in the United States and the world.

Potential Commercial Applications:

- Treatment of Giardia in humans.
- Treatment of Giardia in animals—dogs and cats.

Competitive Advantages: These compounds have currently been approved for human and veterinary uses of other indications which provides an opportunity to greatly reduce risk and pre-market investments both in terms of time and costs associated with development and regulatory approval for new Giardia applications including the drug resistant Giardiasis.

Development Stage:

- Early-stage.
- Pre-clinical.
- In vitro data available.

Inventors:

• Wei Zheng, Catherine Chen, Juan J. Marugan, Noel T. Southall, Christopher P. Austin (NHGRI).

• Osnat Hertzberg, Luidmila Kulakova, Andrey Galkin (Institute for Bioscience & Biotechnology Research, University of Maryland).

Publication: Chen CZ, *et al.* High-throughput Giardia lamblia viability assay using bioluminescent ATP content measurements. *Antimicrob Agents Chemother.* 2011 Feb;55(2):667-675. [PMID 21078930].

Intellectual Property: HHS Reference No. E-211-2010/1—U.S. Provisional Application No. 61/411,509 filed 09 Nov 2010.

Licensing Contact: Tedd Fenn; 301-435-5031; Tedd.Fenn@nih.gov.

Collaborative Research Opportunity: The NHGRI is seeking statements of capability or interest from parties interested in collaborative research to further develop, evaluate, or commercialize Novel Compounds for Treatment of Giardiasis. For collaboration opportunities, please contact Claire Driscoll, NHGRI, at cdriscol@mail.nih.gov.

DEPARTMENT OF HEALTH AND HUMAN SERVICES**National Institutes of Health****National Institute of Mental Health Notice of Meeting**

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a meeting of the National Advisory Mental Health Council.

The meeting will be open to the public as indicated below, with attendance limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should notify the Contact Person listed below in advance of the meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Name of Committee: National Advisory Mental Health Council.

Date: September 23, 2011.

Open: 8:30 a.m. to 12:30 p.m.

Agenda: Presentation of NIMH Director's report and discussion on NIMH program and policy issues.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Conference Room C/D/E, Rockville, MD 20852.

Closed: 1:30 p.m. to 5 p.m.

Agenda: To review and evaluate grant applications.

Place: National Institutes of Health, Neuroscience Center, 6001 Executive Boulevard, Conference Room C/D/E, Rockville, MD 20852.

Contact Person: Jane A. Steinberg, PhD, Director, Division of Extramural Activities, National Institute of Mental Health, NIH, Neuroscience Center, 6001 Executive Blvd., Room 6154, MSC 9609, Bethesda, MD 20892-9609, 301-443-5047.

Any member of the public interested in presenting oral comments to the committee may notify the Contact Person listed on this notice at least 10 days in advance of the meeting. Interested individuals and representatives of organizations may submit a letter of intent, a brief description of the organization represented, and a short description of the oral presentation. Only one representative of an organization may be allowed to present oral comments and if accepted by the committee, presentations may be limited to five minutes. Both printed

and electronic copies are requested for the record. In addition, any interested person may file written comments with the committee by forwarding their statement to the Contact Person listed on this notice. The statement should include the name, address, telephone number and when applicable, the business or professional affiliation of the interested person.

In the interest of security, visitors will be asked to show one form of identification (for example, a government-issued photo ID, driver's license, or passport) and to state the purpose of their visit.

Information is also available on the Institute's/Center's home page: <http://www.nimh.nih.gov/about/advisory-boards-and-groups/namhc/index.shtml>, where an agenda and any additional information for the meeting will be posted when available.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute of Mental Health Notice of Meeting

Pursuant to section 10(a) of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), notice is hereby given of a conference call of the Interagency Autism Coordinating Committee (IACC).

The IACC Full Committee will be having a conference call on Wednesday, September 7, 2011. The committee plans to discuss a draft letter to the Secretary of Health and Human Services on issues related to seclusion and restraint. This conference call will be accessible to the public through a call-in number and access code.

Name of Committee: Interagency Autism Coordinating Committee (IACC).

Type of meeting: Conference Call.

Date: September 7, 2011.

Time: 3 to 5 p.m. *Eastern Time*—Approximate end time.

Agenda: The committee will discuss a draft letter to the Secretary of Health and Human Services on issues related to seclusion and restraint.

Place: No in-person meeting; conference call only.

Conference Call: Dial: 800-369-1673, *Access code:* 2298100.

Cost: The conference call is free and open to the public.

Contact Person: Ms. Lina Perez, Office of Autism Research Coordination, National Institute of Mental Health, NIH, 6001 Executive Boulevard, NSC, Room 8185a, Rockville, MD 20852, *Phone:* (301) 443-6040, *E-mail:* IACCPublicInquiries@mail.nih.gov.

Please Note:

The conference call will be accessible to the public through a call-in number and access code. Members of the public who participate using the conference call phone number will be able to listen to the meeting but will not be heard. If you experience any technical problems with the conference call, please e-mail

IACCTechSupport@acclaroresearch.com or call the IACC Technical Support Help Line at 443-680-0098.

Individuals who participate by using this electronic service and who need special assistance, such as captioning of the conference call or other reasonable accommodations, should submit a request to the Contact Person listed on this notice at least 7 days prior to the meeting.

Schedule subject to change.

Information about the IACC and a registration link for this meeting are available on the Web site: <http://www.iacc.hhs.gov>.

Dated: August 11, 2011.

Anna P. Snouffer,

Deputy Director, Office of Federal Advisory Committee Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Refugee Resettlement

Supplemental Awards to Seven Unaccompanied Alien Shelter Care Providers

AGENCY: Office of Refugee Resettlement, ACF, HHS.

ACTION: The Office of Refugee Resettlement announces the award of single-source expansion supplement grants to seven Unaccompanied Alien Shelter Care Providers.

CFDA Number: 93.676.

Statutory Authority: Awards announced in this notice are authorized by Section 462 of the Homeland Security Act, Public Law 6 U.S.C. 279(b)(A)–(J) and Section 235(a)(5)(C); 235(d); of the Trafficking Victims Protection Reauthorization Act of 2008, (8 U.S.C. 1232).

Project Period: October 1, 2010—September 30, 2011.

Summary: The Administration for Children and Families (ACF), Office of Refugee Resettlement (ORR) announces the award of single-source expansion supplement grants to seven unaccompanied alien shelter care providers for a total of \$5,016,218. The additional funding provided by the awards will support services to refugees through September 30, 2011.

These grants will support the expansion of bed capacity to meet the number of unaccompanied alien

children referrals from the Department of Homeland Security (DHS). The funding program is mandated by Section 462 of the Homeland Security Act to ensure appropriate placement of all referrals from the DHS. ORR's ability to meet this mandate is often a challenge since the program is completely tied to DHS apprehension strategies and the sporadic number of border crossers.

The program has specific requirements for the provision of

services. Existing grantees are the only entities with the infrastructure, licensing, experience and appropriate level of trained staff to meet the service requirements and the urgent need for expansion. The program's ability to avoid a backlog of children waiting in border patrol stations for placement can only be accommodated through the expansion of existing programs through this supplemental award process.

The single-source expansion supplement recipients are:

Grantee	Location	Award amount
Heartland Alliance	Chicago, IL	\$232,380
Southwest Key	TX and CA	2,123,131
Morrison Child and Family Services	Portland, OR	487,986
Catholic Charities Houston	Houston, TX	473,405
Catholic Charities Miami-Boystown	Miami, FL	320,940
International Education Services-Harlingen	Harlingen, TX	206,616
His House	Miami, FL	1,171,760

FOR FURTHER INFORMATION CONTACT:

Kenneth Tota, Deputy Director, Office of Refugee Resettlement, Administration for Children and Families, 370 L'Enfant Promenade, SW., Washington, DC 20447, Telephone (202) 401-4858.

Dated: August 11, 2011.

Eskinder Negash,

Director, Office of Refugee Resettlement.

BILLING CODE 4120-27-P

DEPARTMENT OF HOMELAND SECURITY

U.S. Citizenship and Immigration Services

Agency Information Collection Activities: Form I-566; Extension of an Existing Information Collection; Comment Request

ACTION: 60-Day Notice of Information Collection Under Review: Form I-566, Interagency Record of Request, A, G, or NATO Dependent Employment Authorization or Change/Adjustment of Status To/From A, G, or NATO Status.

The Department of Homeland Security, U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request for review and clearance in accordance with the Paperwork Reduction Act of 1995. The information collection is published to obtain comments from the public and affected agencies. Comments are encouraged and will be accepted for 60 days until October 17, 2011.

Written comments and suggestions regarding items contained in this notice, and especially with regard to the estimated public burden and associated response time should be directed to the Department of Homeland Security (DHS), USCIS, Chief, Regulatory Products Division, Office of the Executive Secretariat, 20 Massachusetts Avenue, NW., Washington, DC 20529-2020. Comments may also be submitted to DHS via facsimile to 202-272-0997 or via e-mail at

USCISFRComment@dhs.gov. When submitting comments by e-mail please add the OMB Control Number 1615-0027 in the subject box.

Note: The address listed in this notice should only be used to submit comments concerning this information collection. Please do not submit requests for individual case status inquiries to this address. If you are seeking information about the status of your individual case, please check "My Case Status" online at: <https://egov.uscis.gov/cris/Dashboard.do>, or call the USCIS National Customer Service Center at 1-800-375-5283.

Written comments and suggestions from the public and affected agencies concerning the collection of information should address one or more of the following four points:

- (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- (2) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

(1) *Type of Information Collection:* Extension of an existing information collection.

(2) *Title of the Form/Collection:* Interagency Record of Request, A, G, or NATO Dependent Employment Authorization or Change/Adjustment of Status To/From A, G, or NATO Status.

(3) *Agency form number, if any, and the applicable component of the Department of Homeland Security sponsoring the collection:* Form I-566; U.S. Citizenship and Immigration Services (USCIS).

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. This information collection facilitates processing of applications for benefits filed by dependents of diplomats, international organizations, and NATO personnel by U.S. Citizenship and Immigration Services, and the Department of State.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* 5,800 responses at 15 minutes (0.25 hours) per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* 1,450 annual burden hours.

If you need a copy of the information collection instrument, please visit the Web site at: <http://www.regulations.gov/>.

We may also be contacted at: USCIS, Regulatory Products Division, Office of the Executive Secretariat, 20 Massachusetts Avenue, NW., Room 5012, Washington, DC 20529–2020, Telephone number 202–272–8377.

Dated: August 12, 2011.

Sunday A. Aigbe,

Chief, Regulatory Products Division, Office of the Executive Secretariat, U.S. Citizenship and Immigration Services, Department of Homeland Security.

BILLING CODE 9111–97–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management, Regulation and Enforcement

[Docket No. BOEM–2011–0049]

Commercial Leasing for Wind Power on the Outer Continental Shelf (OCS) Offshore Rhode Island and Massachusetts—Call for Information and Nominations (Call)

AGENCY: Bureau of Ocean Energy Management, Regulation and Enforcement (BOEMRE), Interior.

ACTION: Call for Information and Nominations for Commercial Leasing for Wind Power on the OCS Offshore Rhode Island and Massachusetts.

SUMMARY: BOEMRE invites the submission of nominations for one or more commercial leases that would allow a lessee to propose the construction of a wind energy project(s) on the OCS offshore Rhode Island and Massachusetts and to develop a project if further environmental review is successful. Although this announcement is not itself a leasing announcement, the area described herein may be subject to future leasing, and BOEMRE will use the responses to this Call for Information and Nominations (Call) to gauge specific interest in acquiring commercial wind leases in some or all of the area described, and to determine whether competitive interest exists in any particular area, as required by 43 U.S.C. 1337(p)(3). Parties wishing to submit a nomination in response to this Call should submit detailed and specific information in response to the requirements described in the section

entitled, “Required Nomination Information.”

This announcement also requests that interested and affected parties comment and provide information about site conditions, resources and multiple uses within the area identified in this notice that would be relevant to BOEMRE’s review of the nominations submitted and any subsequent decision to offer all or part of the area for commercial wind leasing. The information that BOEMRE is requesting is described below in the section entitled, “Requested Information from Interested or Affected Parties.”

This notice is published pursuant to subsection 8(p)(3) of the OCS Lands Act, 43 U.S.C. 1337(p)(3), as well as the implementing regulations at 30 CFR Part 285.

The area under consideration for this Call (Call Area) is located on the OCS off the coast of Rhode Island and Massachusetts within the Area of Mutual Interest (AMI), as described by a Memorandum of Understanding (MOU) between the Governors of Rhode Island and Massachusetts.

The Call Area is divided into two areas which are separated by an existing Traffic Separation Scheme (TSS). The first section of the Call Area is northwest of the TSS beginning approximately 9 nautical miles (nmi) southeast of Point Judith, Rhode Island, and extending approximately 2 nmi seaward (Northwest section). This section of the Call Area is approximately 1.25 square nmi and contains 1 partial OCS lease block. The second section of the Call Area is southeast of the TSS beginning approximately 10 nmi south of the Newport, Rhode Island coast, and extending approximately 20 nmi seaward (Southeast section). This section of the Call Area is approximately 246 square nmi and contains 31 whole OCS lease blocks as well as 10 partial OCS lease blocks.

The Call Area was identified by BOEMRE in consultation with the State of Rhode Island and the Commonwealth of Massachusetts, and further delineated in consultation with the BOEMRE/Rhode Island and BOEMRE/Massachusetts Renewable Energy Task Forces. A detailed description of the area and how it was identified is found later in this notice.

DATES: BOEMRE must receive your nomination describing your interest in this potential commercial leasing area postmarked by October 3, 2011 for your nomination to be considered. BOEMRE requests comments or other submissions of information by this same date. BOEMRE will consider only the nominations we receive by that time.

Submission Procedures: If you are submitting a nomination for a lease in response to this Call, please submit your nomination by mail to the following address: Bureau of Ocean Energy Management, Regulation and Enforcement, Office of Offshore Alternative Energy Programs, 381 Elden Street, Mail Stop 4090, Herndon, Virginia 20170. In addition to a paper copy of the nomination, please include an electronic copy of the nomination on a compact disc (CD). Nominations must be postmarked by October 3, 2011 to be considered by BOEMRE. BOEMRE will list the parties that submitted nominations and the location of the proposed lease areas (i.e., OCS blocks nominated) on the BOEMRE Web site after the 45-day comment period has closed.

Comments and other submissions of information may be submitted by either of the following two methods:

1. Federal eRulemaking Portal: <http://www.regulations.gov>. In the entry entitled, “Enter Keyword or ID,” enter BOEM–2011–0049, and then click “search”. Follow the instructions to submit public comments and view supporting and related materials available for this notice. BOEMRE will post all comments which are not marked “Contains Confidential Information.”

2. By U.S. Postal Service or other delivery service, sending your comments and information to the following address: Bureau of Ocean Energy Management, Regulation and Enforcement, Office of Offshore Alternative Energy Programs, 381 Elden Street, Mail Stop 4090, Herndon, Virginia 20170. All responses will be reported on <http://www.regulations.gov>.

If you wish to protect the confidentiality of your nomination or comments, clearly mark the relevant sections and request that BOEMRE treat them as confidential. Please label privileged or confidential information with “Contains Confidential Information,” and consider submitting such information as a separate attachment. Treatment of confidential information is addressed in the section of this Call entitled, “Privileged or Confidential Information.” Information that is not labeled as privileged or confidential will be regarded by BOEMRE as suitable for public release.

FOR FURTHER INFORMATION CONTACT: Jessica Bradley, Project Coordinator, BOEMRE, Office of Offshore Alternative Energy Programs, 381 Elden Street, Mail Stop 4090, Herndon, Virginia 20170, (703) 787–1320.

SUPPLEMENTARY INFORMATION:

Purpose of the Call for Information and Nominations

The OCS Lands Act requires BOEMRE to award leases competitively, unless BOEMRE makes a determination that there is no competitive interest (43 U.S.C. 1337(p)(3)). The issuance of this notice is not intended to indicate that BOEMRE has determined that competitive interest exists in the area identified. Rather, this notice is the first step in the renewable energy planning and leasing process in the AMI offshore Rhode Island and Massachusetts. The responses to this notice will assist BOEMRE in determining if there is any competitive interest in the area identified. This notice also requests information from interested and affected parties on issues relevant to BOEMRE's review of nominations for potential leasing in the area identified.

BOEMRE is issuing a Call instead of an Request for Interest (RFI) to facilitate and expedite the leasing process in keeping with the goals and objectives of the Secretary of the Interior's "Smart from the Start" initiative. If an RFI were issued and the responses to it indicated competitive interest, the applicable regulations would require BOEMRE to issue a Call, which BOEMRE believes would be duplicative of the RFI process and, therefore, unnecessary and inefficient. Issuance of this Call, without a RFI, is designed to enable BOEMRE to analyze information needed to support appropriate commercial leasing, while ensuring ample opportunity for input from interested and affected parties.

The responses to this Call could lead to the initiation of a competitive leasing process in some areas of the AMI (i.e., where competition exists for certain tracts), and a noncompetitive process in other areas of the AMI (i.e., where no competitive interest exists in certain tracts). The leasing process is described more completely under the "Determination of Competitive Interest" and "Noncompetitive Leasing Process," sections of this notice. If BOEMRE determines that there is no competitive interest in some or all of this area offshore Rhode Island and Massachusetts, BOEMRE may proceed with the noncompetitive lease process pursuant to 30 CFR 285.232 for any area(s) where no competitive interest exists. If BOEMRE determines that there is competitive interest in some or all of this area offshore Rhode Island and Massachusetts, BOEMRE may proceed with Area Identification, as set forth in 30 CFR 285.211(b), and the competitive leasing process set forth under 30 CFR 285.211 through 285.225. Whether the leasing process would be competitive or

noncompetitive, it would (1) include additional opportunities for the public to provide input; (2) be reviewed thoroughly for potential environmental and multiple use impacts; and (3) be conducted in conformance with all applicable laws and regulations. The area that may be offered for lease, if any, has not yet been determined, and may be reduced in size from the area identified in this Call.

Background

Energy Policy Act of 2005 (EPAct)

The EPAct amended the OCS Lands Act by adding subsection 8(p)(1)(C), which authorizes the Secretary of the Interior to grant leases, easements, or rights-of-way (ROWs) on the OCS for activities that are not otherwise authorized by law and that produce or support production, transportation, or transmission of energy from sources other than oil or gas. The EPAct also required the issuance of regulations to carry out the new authority pertaining to renewable energy on the OCS. The Secretary delegated this authority to issue leases, easements, and ROWs, and to promulgate regulations, to the Director of BOEMRE. On April 29, 2009, BOEMRE published the Renewable Energy and Alternate Uses (REAU) rule, at 30 CFR Part 285, which can be found at: <http://www.boemre.gov/offshore/RenewableEnergy/PDF/FinalRenewableEnergyRule.pdf>.

Executive Order 13547: Stewardship of the Ocean, Our Coasts, and the Great Lakes

On July 19, 2010, the President signed Executive Order 13547 establishing a national ocean policy and the National Ocean Council (75 FR 43023).

The Order establishes a comprehensive, integrated national policy for the stewardship of the ocean, our coasts, and the Great Lakes. Where BOEMRE actions affect the ocean, the Order requires BOEMRE to take such action as necessary to implement this policy, the stewardship principles, and national priority objectives adopted by the Order, and guidance from the National Ocean Council.

BOEMRE appreciates the importance of coordinating its planning endeavors with other OCS users and regulators and intends to follow principles of coastal and marine spatial planning, and coordinate with the regional planning bodies as established by the National Ocean Council to inform its leasing processes. BOEMRE anticipates that continued coordination with the state Renewable Energy Task Forces will help

inform comprehensive coastal and marine spatial planning efforts.

Department of the Interior "Smart From the Start" Atlantic Wind Initiative

Secretary Ken Salazar announced the "Smart from the Start" OCS renewable energy initiative on November 23, 2010. This initiative includes three key elements: (1) Streamlined processes for commercial wind lease issuance; (2) the identification of Wind Energy Areas (WEA) followed by concrete information gathering; and (3) processing OCS energy transmission line proposals on a parallel but separate track from generation projects.

A WEA is an OCS area identified as having high wind resource potential along with relatively low potential use conflict, making it suitable for the consideration of wind energy leasing. Some of the area delineated for this Call may be identified as a WEA during the Area Identification stage of the leasing and planning process.

BOEMRE/State Renewable Energy Task Forces

BOEMRE established the Rhode Island Task Force in November 2009, at the request of Governor Donald Carcieri, to facilitate coordination among affected Federal agencies and state, local, and tribal governments throughout the entire leasing process. The first meeting was held on November 17, 2009, to introduce the intergovernmental members, discuss the purpose of the task force, explain the BOEMRE renewable energy leasing and environmental review process, and discuss a draft charter. BOEMRE began working on a RFI with the BOEMRE/Rhode Island Renewable Energy Task Force, and originally intended to issue a RFI for an area offshore Rhode Island. Rhode Island and Massachusetts then developed a partnership that resulted in an MOU signed by the Governors of both States in July of 2010. This MOU created the AMI and set a framework for the two states to collaborate on issues concerning offshore wind development on the OCS. In October and November of 2010, two developers submitted separate unsolicited requests pursuant to 30 CFR 285.230 for commercial leases within the AMI that partially overlap geographically. BOEMRE convened joint meetings of the BOEMRE/Rhode Island and BOEMRE/Massachusetts Renewable Energy Task Forces to coordinate on offshore renewable energy leasing within this area. The BOEMRE/Rhode Island Renewable Energy Task Force meeting materials and information related to the joint Task Force efforts are

available on the BOEMRE web site at: <http://www.boemre.gov/offshore/RenewableEnergy/StateActivities-RhodeIsland.htm>.

In light of these partially overlapping unsolicited requests, as well as the high level of interest that has been expressed for potential commercial wind leasing in other areas of the OCS (e.g. Maryland and New Jersey), we anticipate that there will be competitive interest within the Call Area. Issuance of this Call is designed to enable BOEMRE to proceed with the competitive process in an efficient manner while ensuring ample opportunity for input from interested and affected parties.

Environmental Review Process

BOEMRE intends to prepare an environmental assessment (EA), which will consider the environmental consequences associated with issuing commercial wind leases and approving site assessment activities on those leases within all or some of this Call area. BOEMRE is seeking public input in identifying the environmental issues and alternatives to be considered through the publication of a Notice of Intent (NOI) to prepare an EA, concurrently with this Call.

The EA will consider the environmental consequences associated with reasonably foreseeable leasing and site characterization scenarios within the Call Area (including geophysical, geotechnical, archaeological, and biological surveys), and reasonably foreseeable site assessment scenarios (including the installation and operation of meteorological towers and buoys) on the potential leaseholds. At a minimum, the alternatives that will be considered are: no action, (i.e. no issuance of leases or approval of site assessment activities); and the issuance of leases and approval of site assessment activities within the areas described in this Call. The NOI solicits input on the environmental effects associated with the activities described above. The EA will not, however, be used to support any future decision regarding the approval of the construction or operation of any wind energy facility on leases that may be issued within this Call Area. Instead, any proposed project will go through a thorough environmental review process at a future date.

Several consultations will be conducted concurrently with and integrated into the National Environmental Policy Act (NEPA) process. These consultations include, but are not limited to, those required by the Coastal Zone Management Act (CZMA), the Endangered Species Act

(ESA), the Magnuson-Stevens Fishery Conservation and Management Act, the National Historic Preservation Act (NHPA), and Executive Order 13175—"Consultation and Coordination With Tribal Governments." The results of these consultations will assist BOEMRE in deciding whether and where leases may be issued. These consultations would take place prior to the issuance of any leases. BOEMRE has initiated government-to-government tribal consultation pursuant to Executive Order 13175 with three federally recognized tribes that have expressed interest in wind energy development in the New England area. After evaluating the responses to the Call, but before publishing the Proposed Sale Notice (PSN) for a competitive lease sale or issuing a lease noncompetitively, BOEMRE will conduct consultations pursuant to Section 106 of the NHPA. When possible, BOEMRE will conduct consultations concurrently with the NEPA process (30 CFR 800.8(3)(c)).

Actions Taken by the States of Rhode Island and Massachusetts in Support of Offshore Renewable Energy Development

BOEMRE recognizes the importance of the steps that the State of Rhode Island and the Commonwealth of Massachusetts have taken to encourage environmentally sound offshore wind energy development. While a state may promote such development through initiatives such as the creation of screening tools that inform the BOEMRE planning process, BOEMRE retains the exclusive authority to issue leases, easements, and rights-of-way on the OCS for renewable energy purposes. Below is a summary of the initiatives and actions undertaken by the State of Rhode Island and the Commonwealth of Massachusetts that promote the development of wind energy on the OCS.

The State of Rhode Island has devised a process for identifying areas it believes are suitable for renewable energy development, by considering wind development's compatibility with existing uses and the character of the natural resources in those areas. This effort tiered off two previous initiatives: (1) The Rhode Island Winds Report of 2005, which made a preliminary assessment of the feasibility of wind energy projects offshore Rhode Island; and (2) the Baird's Sea Grant Science Symposium, Sound Connections: The Science of Rhode Island and Block Island Sounds, October 2008; findings of which can be found at http://seagrantadm.gso.uri.edu/Baird_08/default.htm. The Baird Symposium

provided a forum for researchers, resource managers, and stakeholders to discuss the state of the science in various areas important to Rhode Island coastal communities, including ecosystems and fisheries.

The State of Rhode Island has completed and adopted a Marine Spatial Planning Plan called the Ocean Special Area Management Plan (SAMP) for the areas offshore Rhode Island that support siting activities for offshore renewable energy and reflects extensive stakeholder input. This document, adopted by the National Oceanic and Atmospheric Administration (NOAA) on July 22, 2011, will become the basis for the State of Rhode Island's Federal consistency process for the AMI and is recognized in the July 2010 MOU between Rhode Island and Massachusetts as the guiding document for the AMI area.

The State of Rhode Island continues to gather data for a number of areas on the OCS, including data on avian species, fish habitat, marine mammals, physical oceanographic measurements, acoustics, geophysical and other data. BOEMRE appreciates the importance of this information and will use the data and information gathered by the state in its evaluation of potential lease issuance in the AMI.

The July 2010 MOU between Rhode Island and Massachusetts recognizes the benefits of collaborating in the evaluation and potential development of the AMI. Rhode Island and Massachusetts officials held a series of public meetings in Massachusetts to discuss SAMP data and the process involved. Rhode Island and Massachusetts officials expect that similar stakeholder discussions will continue, such as through the convening of a Fisheries Advisory Board consisting of fishing representatives from both States. In the development of the Call Area, input from both the BOEMRE/Rhode Island and BOEMRE/Massachusetts Task Forces has provided a regional perspective on the physical, biological, and socioeconomic resources of the AMI.

BOEMRE's Planning and Leasing Process

BOEMRE has been involved in a planning process for the AMI area since the establishment of the BOEMRE/Rhode Island Renewable Energy Task Force in 2009. The planning process has involved coordination with the joint BOEMRE/Rhode Island and BOEMRE/Massachusetts Renewable Energy Task Forces on the development of this Call. In addition, at the request of the State of Rhode Island and the Commonwealth

of Massachusetts, BOEMRE has participated in ten public information sessions with stakeholders from both states to provide information regarding BOEMRE's planning process. Additional information, including presentations and materials from the public information sessions and the joint Task Force meetings can be found at: <http://www.boemre.gov/offshore/RenewableEnergy/StateActivities-RhodeIsland.htm>.

Determination of Competitive Interest

The first step in the leasing process is to determine whether or not there is interest in acquiring a lease and whether there is competitive interest in acquiring a lease in any particular area. At the conclusion of the comment period for this Call, BOEMRE will review the nominations received, undertake a completeness review and qualifications review, and make a determination as to whether competitive interest exists in any specific location within the Call Area.

If two areas of interest fully or partially overlap, BOEMRE may proceed with the competitive leasing process as described below. For areas where BOEMRE determines that there is no competitive interest, BOEMRE may proceed with the noncompetitive leasing process also described below. While BOEMRE anticipates that this Call will result in multiple nominations for the area that indicate competitive interest exists, it is nonetheless possible that the responses to the Call could lead to following a competitive process, noncompetitive process, or both. BOEMRE may consult with the BOEMRE/Rhode Island and BOEMRE/Massachusetts Task Forces throughout these processes.

Situations may arise in which several parties nominate project areas that do not overlap. Under these circumstances, BOEMRE could choose to employ an allocation system of leases that involves the creation of competition across tracts. This system is referred to as intertract competition and would also be implemented under the competitive process outlined in the regulations. BOEMRE may consult with the BOEMRE/Rhode Island and BOEMRE/Massachusetts Task Forces in determining intertract competition.

Respondents to this Call and members of the public should be aware that no lease will be issued, either competitively or noncompetitively, until the necessary consultations and environmental analysis have been completed and the public has been given ample opportunity to comment. As a result, it is possible that certain

areas nominated may not be leased, or that the areas nominated may be modified from their original, proposed form before being offered for lease.

Competitive Leasing Process

If, after receiving responses to this Call, BOEMRE proceeds with the competitive leasing process for certain areas, it would follow the steps required by 30 CFR 285.211 through 285.225:

(1) *Area Identification*: Based on the information submitted in response to this Call, BOEMRE would identify an area in which interest exists, and which will be subject to environmental analysis, in consultation with appropriate Federal agencies, states, local governments, tribes and other interested parties. The area identified will constitute a WEA under the "Smart from the Start" initiative, which will be the area analyzed in the EA. The NOI to prepare the EA is being published concurrently with this Call.

(2) *Proposed Sale Notice*: If BOEMRE decides to proceed with lease issuance in the area, then BOEMRE would publish the PSN in the **Federal Register** and send the PSN to any affected tribes, the State Historic Preservation Office, the Governor of any affected state, and the executive of any affected local government. The PSN would describe the areas to be offered for leasing and the proposed conditions of a lease sale, including the proposed auction format, lease form, and lease provisions/stipulations. Additionally, the PSN would describe the criteria and process for evaluating bids. The PSN would be issued after completion of any final NEPA documentation, preparation of the Consistency Determination as required by the CZMA and its implementing regulations, and preparation of various analyses of proposed lease sale economic terms and conditions. The comment period following issuance of a PSN would be 60 days.

(3) *Final Sale Notice*: If BOEMRE decides to proceed with lease issuance after considering comments on the PSN, it would then publish the Final Sale Notice (FSN) in the **Federal Register** at least 30 days before the date of the sale. BOEMRE may use one of the following four auction formats to select the winning bidder(s) as required by 30 CFR 285.220: Multiple-factor bidding; sealed bidding; ascending bidding; or two-stage bidding (a combination of ascending bidding and sealed bidding). BOEMRE would publish the criteria for winning bid determinations in the FSN.

(4) *Bid Submission and Evaluation*: Following publication of the FSN in the **Federal Register**, qualified bidders

would be able to submit their bids to BOEMRE in accordance with procedures in the FSN. The bids, including the bid deposits if applicable, would be reviewed for technical and legal adequacy. BOEMRE would evaluate the bids to determine if the bidder has complied with all applicable regulations. BOEMRE reserves the right to reject any or all bids and the right to withdraw an offer to lease an area from the sale.

As stated above, BOEMRE may consider using the multiple-factor auction format in addition to the three other auction formats described at 30 CFR 285.220. If BOEMRE were to use a multiple-factor auction format, the evaluation of bids would be made by a panel composed of members selected by BOEMRE, and factors that BOEMRE may choose to include in the auction could be selected from a wide array of options. Factors that BOEMRE may consider for inclusion in this auction process are: Compatibility with existing state and local needs; or public benefits. These factors would be identified in the FSN.

If BOEMRE were to use a multiple-factor auction format, it is possible that a negotiation stage may be included in the bid assessment criteria, to be used if it becomes necessary to modify a proposed lease prior to acceptance. BOEMRE would coordinate with the state and other stakeholders, as appropriate, to establish procedures designed to assure the selection of the most worthy proposal that would provide a fair return to the United States pursuant to subsection 8(p)(2)(A) of the OCS Lands Act (43 U.S.C. 1337(p)(2)(A)).

(5) *Issuance of a Lease*: Following the selection of a winning bid(s) by BOEMRE, the submitter(s) would be notified of the decision and provided a set of official lease documents for execution. The successful bidder would be required to execute the lease, pay the remainder of the bonus bid, if applicable, and file the required financial assurance within 10 days of receiving the lease copies. Upon receipt of the required payments, financial assurance, and properly executed lease forms, BOEMRE would issue a lease to the successful bidder.

Noncompetitive Leasing Process

If, after evaluating the responses to this notice, BOEMRE determines that there is no competitive interest in a proposed lease area, it may proceed with the noncompetitive lease issuance process pursuant to 30 CFR 285.232, as amended by a rulemaking, which took effect on June 15, 2011 (76 FR 28178).

Should BOEMRE decide to proceed with the noncompetitive leasing process, it would ask if the respondent wants to proceed with acquiring the lease, and if so, the respondent must submit an acquisition fee as specified by 30 CFR 285.502(a). After receiving the acquisition fee, BOEMRE would follow the process outlined in 30 CFR 285.231. After determining that no competitive interest exists, BOEMRE would publish a notice in the **Federal Register** announcing this determination. Within 60 days of the date of that notice, the respondent would be required to submit a Site Assessment Plan (SAP), as described in 30 CFR 285.231(d)(2)(i).

BOEMRE will comply with the requirements of NEPA, CZMA, ESA, NHPA, and other applicable Federal statutes before issuing a lease noncompetitively. BOEMRE would coordinate and consult, as appropriate, with relevant Federal agencies, affected tribes, affected state and local governments, and provide opportunity for public comment prior to issuing a noncompetitive lease and in formulating lease terms, conditions, and stipulations.

It is possible that responses to this notice may result in a determination that there is competitive interest in acquiring leases in some areas but not in others. BOEMRE will announce

publicly its determinations before proceeding with any leasing process.

Description of the Area

The Call Area is located on the OCS off the coast of Rhode Island and Massachusetts. The Call Area is divided into two areas separated by an existing TSS. The first section of the Call Area is northwest of the TSS beginning approximately 9 nmi southeast of Point Judith, Rhode Island and extending approximately 2 nmi seaward (Northwest section). This section of the Call Area is approximately 1.25 square nmi and contains 1 partial OCS lease block. The second section of the Call Area is southeast of the TSS beginning approximately 10 nmi south of the Newport, Rhode Island coast and extending approximately 20 nmi seaward (Southeast section). This section of the Call area is approximately 246 square nmi and contains 31 whole OCS lease blocks as well as 10 partial OCS lease blocks.

The following partial OCS lease block is included within the Northwest section of the Call Area, in Providence NK19-07:

Block No.	Sub block
6764	A,B,E

The following whole OCS lease blocks, are included within the

Southeast section of the Call Area in Providence NK19-07: 6817, 6866, 6915, 6916, 6919, 6965, 6966, 6967, 6968, 6969, 6970, 6971, 7015, 7016, 7017, 7018, 7019, 7020, 7021, 7064, 7065, 7066, 7067, 7068, 7069, 7070, 7071, 7114, 7115, 7116, and 7117. The following partial OCS lease blocks, are included within the Southeast section of the Call Area in Providence NK19-07:

Block No.	Sub block
6766	L,O,P
6815	P
6816	B,C,D,F,G,H,I,J,K,L,M,N,O,P
6865	C,D,F,G,H,J,K,L,M,N,O,P
6867	A,B,C,D,E,I,M
6914	D,G,H,K,L,O,P
6917	A,E,F,G,H,I,J,K,L,M,N,O,P
6918	B,C,D,E,F,G,H,I,J,K,L,M,N,O,P
6964	C,D,G,H,K,L,O,P
7014	C,D,G,H,J,K,L,N,O,P

The boundary of the Call Area follows the points listed in the tables below for both the Northwest and Southeast sections of the Call Area in clockwise order. Point numbers 1 and 7 are the same in table 1 (Northwest section boundary) and point numbers 1 and 39 are the same in table 2 (Southeast section boundary). Coordinates are provided in X, Y (eastings, northings) UTM Zone 19N, NAD 83 and geographic (longitude, latitude), NAD83.

RHODE ISLAND CALL AREA—NORTHWEST SECTION BOUNDARY (TABLE 1)

Point No.	X (Easting)	Y (Northing)	Longitude	Latitude
1	308000	4574400	-71.293243	41.298222

Map of the Call Area

A map of the area can be found at the following URL: <http://www.boemre.gov/offshore/RenewableEnergy/StateActivities-RhodeIsland.htm>.

A large-scale map of the Call Area showing boundaries of the area with numbered blocks is available from BOEMRE at the following address: Bureau of Ocean Energy Management, Regulation and Enforcement, Office of Offshore Alternative Energy Programs, 381 Elden Street, Mail Stop 4090, Herndon, Virginia 20170, Phone: (703) 787-1320.

Development of the Call Area

The Call Area was identified by BOEMRE in consultation with the State of Rhode Island and the Commonwealth of Massachusetts, and further delineated through consultation with the BOEMRE/Rhode Island Renewable Energy Task Force and the BOEMRE/Massachusetts Renewable Energy Task Force. Specific mitigation, stipulations, or exclusion areas may be developed as a result of comments and information received in response to this Call, continued coordination with the BOEMRE/Rhode Island Renewable Energy Task Force and the BOEMRE/Massachusetts Renewable Energy Task Force, and the EA for which BOEMRE is concurrently issuing a NOI in the **Federal Register**, and consultations. Issues discussed through consultation with the BOEMRE/Rhode Island Task Force and the BOEMRE/Massachusetts Renewable Energy Task Force and areas where site-specific stipulations may be required are described below.

Unsolicited Requests

In October and November 2010, BOEMRE received two separate unsolicited requests, pursuant to 30 CFR 285.230, for commercial leases for areas within the AMI that partially overlap geographically. Because the unsolicited lease requests identified areas within the AMI, BOEMRE organized a joint meeting with both the BOEMRE/Rhode Island and BOEMRE/Massachusetts Renewable Energy Task Forces to discuss the proposals on December 10, 2010.

The following whole OCS lease blocks were requested in an unsolicited commercial lease request by Deepwater Wind New England, LLC: In Providence NK19-07, blocks, 6815, 6816, 6817, 6864, 6865, 6866, 6867, 6914, 6915, 6970, 6971, 7014, 7015, 7016, 7017, 7019, 7020, 7021, 7064, 7065, 7066, 7067, 7068, 7069, 7070, 7071, 7114, 7115, 7116, and 7117.

The following whole OCS lease blocks were requested in an unsolicited commercial lease request by Neptune Wind, LLC: In Providence NK19-07, blocks, 6970, 6971, 7018, 7019, 7020, and 7021.

Portions of the following OCS blocks submitted in Deepwater Wind New England, LLC's unsolicited request have not been included within the Call Area: In Providence NK19-07:

Block No.	Sub block
6815	A,B,C,D,E,F,G,H,I,J,K,L,M,N,O
6816	A,E
6864	All sub blocks
6865	A,B,E,I
6914	A,B,C,E,F,I,J,M,N

Block No.	Sub block
7014	A,B,E,F,I,M

Should Deepwater Wind New England, LLC wish to modify its proposal, it may do so pursuant to the section of this Call entitled "Required Nomination Information."

Charted Unexploded Ordnance

BOEMRE is aware of unexploded ordnance, as indicated on the NOAA nautical chart, and has excluded the following OCS lease blocks that overlap: In Providence NK19-07:

Block No.	Sub block
6867	F,G,H,J,K,L,N,O,P
6917	B,C,D
6918	A

Marine Fisheries and Habitats Within the Call Area

The SAMP has identified portions of the Call Area as important for commercial and recreational fishing activities, as well as important marine fish habitat. Specifically, the area in the vicinity of Cox Ledge is identified in the SAMP as important for a range of commercial fishing activities, including scallop dredging, gillnetting, lobster trapping, bottom trawling and recreational activities. The area also contains complex marine habitats. Specific information on fishery resources, fishing activities and important marine habitats can be found in the Ocean SAMP Fisheries Chapter at: http://www.crmc.ri.gov/samp_ocean.html.

Data suggest that future development in and around Cox Ledge would potentially conflict with fishing activities and marine habitats. The National Marine Fisheries Service (NMFS) has expressed concern regarding impacts to these fishery resources that may result from potential future development. BOEMRE may exclude additional areas from further consideration for potential commercial wind energy leasing based on the information acquired in response to this Call and the results of the environmental review process conducted pursuant to NEPA, as described earlier in this notice.

BOEMRE received several comments, in consultation with the joint BOEMRE Rhode Island and Massachusetts Renewable Energy Task Forces, on the development of this Call on commercial and recreational fishing activities and fish habitat within the Call Area. BOEMRE has included a summary of these comments for consideration by respondents preparing to submit an expression of interest in response to this Call. The following associations forwarded comments for consideration through consultation with the joint Rhode Island and Massachusetts Renewable Energy Task Forces: Atlantic Offshore Lobstermen's Association, Eastern New England Scallop Association, Martha's Vineyard/Dukes County Fishermen's Association, Rhode Island Lobsterman's Association, Rhode Island Party and Charter Boat Association, and Sakonnet Point Fishermen's Association. BOEMRE has aggregated these comments and provided the following summary:

The entire area included in this Call was identified as being important for commercial and recreational fishing and marine habitat for several species, including Atlantic blue fin tuna, black sea bass, cod, dogfish, groundfish species, lobster, monkfish, scup, sea scallops, large pelagic sharks, winter flounder, and yellowtail flounder. The following OCS blocks were requested to be removed from further consideration from the Call area, in Providence NK19-07: 6764, 6815, 6816, 6865, 6866, 6914, 6915, 6916, 6964, 6966, 6967, 6968, 6969, 6970, 6971, 7014, 7015, 7016, 7017, 7018, 7019, 7020, 7021, 7064, 7065, 7066, 7067, 7068, 7069, 7070, and 7071. BOEMRE has identified these areas for consideration by respondents preparing to submit an expression of interest in response to this Call.

Navigational Issues

The U.S. Coast Guard (USCG) has provided the following information for consideration by respondents and other

interested parties to this Call. The USCG has a responsibility to ensure the safety of navigation under the Ports and Waterways Safety Act (PWSA). The PWSA requires the USCG to provide safe access routes for the movement of vessel traffic proceeding to or from ports or places subject to the jurisdiction of the United States. This is accomplished through designation of necessary fairways and TSS for vessels operating in the territorial sea of the United States and in high sea approaches, outside the territorial sea. The USCG may also determine that establishment of other ships' routing measures would enhance navigational safety, and it works with its Federal interagency and International Maritime Organization partners to establish these voluntary measures as necessary.

The potential for navigational safety risk posed by building structures in the proximity of shipping is affected by numerous factors, including but not limited to: vessel size, vessel type, density of traffic, prevailing conditions, cumulative impacts of multiple obstructions (for example, wind assessment or development facilities), existence of multiple shipping routes (for example, crossing or meeting situations), radar/automatic radar plotting aid (ARPA) interference, and existence of mitigating factors such as navigational aids, vessel traffic services, or pilotage.

Currently, there is no standard recommended separation distance between offshore renewable energy facilities and shipping routes. The USCG has reviewed guidance published by other countries such as the United Kingdom's Maritime Guidance Note MGN-371 and consulted with its own waterways subject matter experts. Currently, the USCG considers that the placement of offshore wind assessment and generation facilities in any areas less than 1 nmi from traditional shipping routes poses a high risk to navigational safety and therefore does not recommend placement of offshore renewable energy facilities in such areas. The USCG considers placement of such wind facilities in areas greater than 5 nmi from existing shipping routes to pose minimal risk to navigational safety. Areas considered for placement of wind facilities between 1 nmi and 5 nmi would require additional USCG analysis to determine if mitigation factors could be applied to bring navigational safety risk to within acceptable levels. Respondents to this Call should note that impacts to radar and ARPA still occur outside of 1 nmi and will have to be evaluated along with other potential impacts. The above are only planning

guidelines and may be changed based on the completion of the Atlantic Coast Port Access Route Study (ACPARS) which is described below. In addition, these guidelines maybe further modified upon completion of a Navigational Safety Risk Assessment (NSRA) that may be required before BOEMRE approves construction of any offshore renewable energy facilities.

The USCG is conducting an ACPARS to determine how best to route traffic on the Atlantic coast. (See **Federal Register** 76 FR 27288; May 11, 2011). This study will better inform the USCG about the navigational safety risks, if any, associated with construction of offshore renewable energy facilities. The data gathered during this ACPARS may result in the establishment of new vessel routing measures, modification of existing routing measures, or removal of some existing routing measures off the Atlantic Coast from Maine to Florida.

As a member of the BOEMRE Rhode Island and Massachusetts Renewable Energy Task Forces, the USCG conducted an evaluation, using the best available information, of the Rhode Island and Massachusetts Call Area. The USCG recommended OCS blocks (including sub-blocks) that, if developed, may have an unacceptable effect on navigational safety, and other OCS blocks (including sub-blocks) that would require further study to determine the potential effect that the installation of wind facilities in these blocks would have on navigation safety. In evaluating the practical effect of the OCS blocks that are the subject of this Call Area, the USCG applied the criteria described above and also conducted a review of other available information including: existing AIS data and user input; existing traffic patterns; and a literature review of material relevant to historical and current coastwise and international uses in the Call Area. In addition, the USCG considered the opinions and advice of USCG Subject Matter Experts (SMEs) and the ACPARS workgroup concerning waterways management, and the potential for modifications to existing routing measures and the creation of new routing measures in the area.

The USCG has advised BOEMRE that, at this time, all blocks included in the Call may be considered for possible leasing and potential development. However, the USCG advises that all blocks included in the Call require further study and analysis related to existing traffic usage and patterns, as well as projected future traffic increases based on the development of adjacent and adjoining blocks, which will be accomplished during the development

of the ACPARS. Such an evaluation will help the USCG determine what, if any, risks exist, and whether USCG should recommend that BOEMRE remove any blocks included in the Call Area from consideration for leasing and potential development at a later stage in the leasing or plan approval process. This process will also allow the USCG to consider potential mitigation measures for blocks that are made available for leasing and potential development.

Department of Defense (DOD) Activities

The DOD conducts offshore testing, training, and operations on the OCS. BOEMRE will consult with the DOD on all areas nominated for leasing to ensure that any future development can be compatible with defense activities on the OCS.

Telecommunications Cable

BOEMRE received a request from Verizon to eliminate OCS blocks 7014, 7064, 7065, 7115, and 6017 from consideration for potential future leasing due to the presence of the CB-1 (formerly Gemini) underwater telecommunications cable. BOEMRE has included this information for consideration by potential respondents to this Call.

BOEMRE Approach to Exclusion Requests

Several task force reviewers of the Rhode Island/Massachusetts Call have recommended areas to be excluded from consideration of potential leasing. As explained in the section of the Call entitled, "Purpose of the Call for Information and Nominations," the inclusion of an area in the Call is not a decision to lease that area. It is a decision to solicit information from all interested and affected parties that BOEMRE can use in arriving at an ultimate decision on whether to offer the area for lease. The information the Call seeks relates to both renewable energy development interest and to other resources and uses. After considering the information it receives in response to the Call, BOEMRE may decide to exclude certain areas at the next step in the planning process—the Area Identification—or to include those areas for further consideration and analysis in the NEPA review. Please refer to the NOI that is concurrently published with this notice. Generally, BOEMRE's approach is to analyze areas thoroughly with the goal of eliminating or reducing to an acceptable level any potential resource and use conflicts. However, if BOEMRE concludes that such conflicts cannot be properly mitigated, exclusions may be necessary.

BOEMRE intends to make fully informed decisions on exclusions at the appropriate time in the lease planning process.

The Rhode Island/Massachusetts Call includes areas in which competing uses have been identified by task force members. BOEMRE has highlighted in the Call two such uses: (1) Vessel traffic and (2) commercial fishing, for which we are requesting specific data and information to inform subsequent decisions. We will consider the information we receive from interested developers, maritime interests, commercial fishers, and others concerning these areas and uses in reaching an Area Identification and in planning the ensuing NEPA analysis. It is possible that certain geographic areas and associated mitigation measures could be framed as alternatives in the NEPA analysis to enable thorough and conclusive consideration by BOEMRE in its decisionmaking.

Required Nomination Information

If you intend to submit a nomination for a commercial wind energy lease within the Call Area to BOEMRE, you must provide the following:

(1) The BOEMRE Protraction name, number, and specific whole or partial OCS blocks or sub-blocks within the Call Area that are of interest for commercial wind leasing, including any required buffer area. This information should be submitted as a spatial file compatible with ArcGIS 9.3 in a geographic coordinate system (NAD 83) in addition to your hard copy submittal. If your proposed lease area includes one or more partial blocks please describe those partial blocks in terms of a sixteenth (*i.e.*, sub-block) of an OCS block. Note that any nomination identifying areas greater than what would be reasonably necessary to develop a commercial wind facility may not be considered as a valid nomination. BOEMRE will not consider any areas outside of the Call Area in this process;

(2) A description of your objectives and the facilities that you would use to achieve those objectives including: A general description of devices and infrastructure you intend to use; anticipated power production and likely purchasers; a statement that the proposed activity conforms with state and local energy planning requirements, initiatives or guidance, as appropriate;

(3) A preliminary schedule of proposed activities, including those leading to commercial operations;

(4) Available and pertinent data and information concerning renewable energy resources and environmental conditions in the area you wish to lease,

including energy and resource data and information used to evaluate the Call Area. Where applicable, spatial information should be submitted in a format compatible with ArcGIS 9.3 in a geographic coordinate system (NAD 83);

(5) If available, identification of potential cable landfall sites, staging areas and any other support sites that may be necessary for your project;

(6) If available, information regarding proposed land-side and near-shore project elements and their potential effects on historic and cultural resources;

(7) Description of the compatibility of your project with commercial fishing activity (*e.g.*, spacing between individual turbines, array configurations, cable burial depths, routing measures, inspections, cable configurations or consolidations, etc.) in this area;

(8) Documentation demonstrating that you are legally qualified to hold a lease as set forth in 30 CFR 285.106 and 107. Examples of documentation appropriate for demonstrating your legal qualifications can be found in Chapter 2 and Appendix B of the BOEMRE Renewable Energy Framework Guide Book available at http://www.boemre.gov/offshore/RenewableEnergy/PDFs/REnGuidebook_03August2009_3_.pdf. Legal qualification documents will be placed in an official file that may be made available for public review. If you wish that any part of your legal qualification documentation be kept confidential, clearly identify what should be kept confidential, and submit it under separate cover (see Protection of Privileged or Confidential Information Section, below).

(9) You must also include documentation demonstrating that you are technically and financially capable of constructing, operating, maintaining and decommissioning the facilities described in (2) above. Guidance regarding documentation appropriate for demonstrating your technical and financial qualifications can be found at: <http://www.boemre.gov/offshore/RenewableEnergy/RegulatoryInformation.htm>.

Documentation you submit to demonstrate your legal, technical, and financial qualifications must be provided to BOEMRE in both paper and electronic formats. BOEMRE considers an Adobe PDF file stored on a compact disc (CD) to be an acceptable format for submitting an electronic copy; and

(10) Information submitted previously in an unsolicited request need not be re-submitted in response to this Call unless

the applicant wishes to modify its nomination.

It is critical that you submit a complete nomination so that BOEMRE may evaluate your submission in a timely manner. If BOEMRE reviews your nomination and determines that it is incomplete, BOEMRE will inform you of this determination in writing. This letter will describe the information that BOEMRE determined to be missing from your nomination, and indicate the information that you must submit in order for BOEMRE to deem your submission complete. You will be given 15 business days from the date of the letter to submit the information that BOEMRE found to be missing from your original submission. If you do not meet this deadline, or if BOEMRE determines this second submission to be insufficient, then BOEMRE may deem your nomination invalid. In such a case, BOEMRE would not move forward with your nomination submitted in response to this Call.

Requested Information From Interested or Affected Parties

BOEMRE is requesting from the public and other interested or affected parties specific and detailed comments regarding the following conditions in the area identified:

- (1) Geological and geophysical conditions (including bottom and shallow hazards);
- (2) Known archaeological and/or cultural resource sites on the seabed or nearshore and methodologies used to acquire that data;
- (3) Historic properties potentially affected by the construction of meteorological towers, the installation of meteorological buoys, or commercial wind development in the area identified in this Call;
- (4) Multiple uses of the area, including navigation (in particular, commercial and recreational vessel use), recreation, and fisheries (commercial and recreational); and
- (5) Other relevant socioeconomic, biological, and environmental information.

Protection of Privileged or Confidential Information

Freedom of Information Act

BOEMRE will protect privileged or confidential information that you submit as required by the Freedom of Information Act (FOIA). Exemption 4 of FOIA applies to trade secrets and commercial or financial information that you submit that is privileged or confidential. If you wish to protect the confidentiality of such information,

clearly mark it and request that BOEMRE treat it as confidential. BOEMRE will not disclose such information, subject to the requirements of FOIA. Please label privileged or confidential information "Contains Confidential Information" and consider submitting such information as a separate attachment.

However, BOEMRE will not treat as confidential any aggregate summaries of such information or comments not containing such information. Additionally, BOEMRE will not treat as confidential (1) the legal title of the nominating entity (for example, the name of your company), or (2) the list of whole or partial blocks that you are nominating. Information that is not labeled as privileged or confidential will be regarded by BOEMRE as suitable for public release.

Section 304 of the National Historic Preservation Act (16 U.S.C. 470w-3(a))

BOEMRE is required, after consultation with the Secretary, to withhold the location, character, or ownership of historic resources if it determines that disclosure may, among other things, risk harm to the historic resources or impede the use of a traditional religious site by practitioners. Tribal entities should designate information that falls under Section 304 of NHPA as "Confidential".

Dated: August 1, 2011.

Michael R. Bromwich,

Director, Bureau of Ocean Energy Management, Regulation and Enforcement.

[FR Doc. 2011-21136 Filed 8-17-11; 8:45 am]

BILLING CODE 4310-MR-P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management, Regulation and Enforcement

[Docket No. BOEM-2011-0063]

Commercial Wind Lease Issuance and Site Characterization Activities on the Atlantic Outer Continental Shelf (OCS) Offshore Rhode Island and Massachusetts

AGENCY: Bureau of Ocean Energy Management, Regulation and Enforcement (BOEMRE), Interior.

ACTION: Notice of Intent to Prepare an Environmental Assessment.

SUMMARY: This notice is being published as an initial step for the purpose of involving Federal agencies, states, tribes, local government, offshore wind energy developers, and the public in the Department of the Interior's (DOI) "Smart from the Start" wind energy

initiative. The purpose of the "Smart from the Start" wind energy initiative is to identify areas that may be most suitable for wind energy leasing on the OCS, and to obtain public and expert input that will inform the Department's decisionmaking with regard to issuing leases and approving site assessment activities in these areas, in accordance with the DOI and the Council on Environmental Quality (CEQ) regulations implementing the provisions of the National Environmental Policy Act (NEPA) of 1969 as amended (42 U.S.C. 4321 *et seq.*). On November 23, 2010, Secretary of the Interior Ken Salazar announced the "Smart from the Start" renewable energy initiative to accelerate the responsible development of renewable energy resources on the Atlantic OCS. The initiative focuses on the identification and refinement of areas on the OCS that are most suitable for renewable energy development (Wind Energy Areas (WEAs)), and utilizes coordinated environmental studies, large-scale planning processes, and expedited review processes within these areas to achieve an efficient and responsible renewable energy leasing process.

In consultation with other Federal agencies and the Rhode Island and Massachusetts Renewable Energy Task Forces, BOEMRE has identified an area for consideration for potential future wind energy leasing. This area, offshore Rhode Island and Massachusetts, is identified in the *Commercial Leasing for Wind Power on the Outer Continental Shelf (OCS) Offshore Rhode Island and Massachusetts-Call for Information and Nominations (Call)*, which is being published concurrently with this notice. The area identified in the Call and this notice is located within the Area of Mutual Interest (AMI), as described by a Memorandum of Understanding (MOU) between the Governors of Rhode Island and Massachusetts.

More information on the task forces and the "Smart from the Start" initiative can be found at: <http://www.boemre.gov/offshore/RenewableEnergy/StateActivitiesProjects.htm> and <http://www.doi.gov/news/pressreleases/Salazar-Launches-Smart-from-the-Start-Initiative-to-Speed-Offshore-Wind-Energy-Development-off-the-Atlantic-Coast.cfm>.

BOEMRE intends to prepare an environmental assessment (EA), which will consider the environmental consequences associated with issuing commercial wind leases and approving site assessment activities on those leases (within all or some of this Call Area). The EA will not analyze or support

development activities. If a successful lessee proposes development activity, the specific proposal will be given full review at that time. BOEMRE is seeking public input regarding the identification of the important environmental and/or socioeconomic issues and alternatives to be considered in the EA.

Authority: This Notice of Intent (NOI) to prepare an environmental assessment is published pursuant to 43 CFR 46.305.

FOR FURTHER INFORMATION CONTACT: Michelle Morin, BOEMRE Office of Offshore Alternative Energy Programs, 381 Elden Street, MS 4090, Herndon, Virginia 20170-4817, (703) 787-1340 or michelle.morin@boemre.gov.

SUPPLEMENTARY INFORMATION:

1. The OCS Wind Energy Leasing and Development Process

There are three key phases of the wind energy leasing and development process on the OCS: (1) Lease issuance; (2) approval of a site assessment plan (SAP); and (3) approval of a construction and operation plan (COP). The first phase, issuance of a commercial renewable energy lease, gives the lessee an exclusive right to apply for approval of subsequent plans, the approval of which is necessary for a lessee to advance to the next stage of the renewable energy development process. The second phase is the applicant's submission, and BOEMRE's subsequent review and approval of a SAP. Approval of a SAP would allow the lessee to construct and install a meteorological tower and/or buoys on the leasehold. See 30 CFR 285.600-285.601; 285.605-285.618. After the lessee has collected sufficient site characterization and assessment data, the lessee may submit a COP, the review of which could authorize the actual construction and operation of a renewable energy facility on the lease. See 30 CFR 285.620-285.629. Although BOEMRE does not authorize site characterization activities (i.e., geological and geophysical surveys and core samples), a lessee must submit the results of such surveys before BOEMRE can consider its COP. See 30 CFR 285.626.

2. Proposed Action and Scope of Analysis

The proposed action that will be the subject of the EA is the issuance of renewable energy leases within all or some of the Call Area described in this Notice, and the approval of site assessment activities on those leases (i.e., Phases 1 and 2 of the wind energy leasing and development process). BOEMRE will also consider in the EA

the environmental impacts associated with the site characterization activities that it anticipates lessees might eventually undertake to fulfill the COP information requirements at 30 CFR 285.626.

The EA will not, however, be used to support any future decision regarding the approval of the construction or operation of any wind energy facility on leases that may be issued within all or some of this Call Area. BOEMRE is not currently considering any such plan, nor has any plan been submitted. If and when a lessee is ready to begin this third phase of renewable energy development, it will submit a COP. If a COP is submitted for a particular project on a lease, a separate site- and project-specific NEPA analysis would be prepared. This would take the form of an Environmental Impact Statement (EIS) and would provide additional opportunities for public involvement pursuant to NEPA and the CEQ regulations at 40 CFR parts 1500-1508. Such an EIS process would provide the public and Federal officials with comprehensive site- and project-specific information, and the EIS would consider the reasonably foreseeable environmental impacts of the specific project that the lessee is proposing. These potential impacts will be taken into account when deciding whether to approve, approve with modification, or deny the COP pursuant to 30 CFR 285.628.

The EA, which is the subject of this notice, will consider the environmental consequences associated with reasonably foreseeable leasing scenarios (not development itself), reasonably foreseeable site characterization scenarios within these lease areas (including geophysical, geotechnical, archeological, and biological surveys), and reasonably foreseeable site assessment scenarios (including the installation and operation of meteorological towers and buoys) on the leases that may be issued within all or some of the Call Area. At a minimum, the alternatives that will be considered are: no action (i.e., no issuance of leases or approval of site assessment activities); and the issuance of leases and approval of site assessment activities within the areas described in Section 4 of this Notice. BOEMRE is therefore soliciting input on the environmental issues and alternatives to be considered in the EA related to the potential environmental effects of the activities described above.

Federal, state, and local government agencies, tribal governments, and other interested parties may assist BOEMRE in determining the issues and any

additional alternatives to be analyzed in the EA. Input is also requested on measures (e.g., limitations on activities based on technology, distance from shore, or timing) that would mitigate impacts to environmental resources and socioeconomic conditions that could result from leasing, site characterization, and site assessment in and around the Call Area described below. Consultation with other Federal agencies, tribal governments, and affected states will be carried out during the EA process and will be completed before a final decision is made on whether any particular lease will be issued or site assessment activities on those leases approved.

If BOEMRE determines during the EA process that issuing leases and conducting site characterization and assessment activities offshore within the Call Area would result in significant environmental impacts, then BOEMRE would publish a NOI to prepare an EIS for the issuance of renewable energy leases and approval of site assessment activities within all or some of this Call Area. If BOEMRE determines during the EA process that issuing leases and conducting site characterization and assessment activities within all or some of this Call Area would not result in significant environmental impacts, then BOEMRE would issue a Finding of No Significant Impact (FONSI). After either a FONSI is issued or the EIS process is completed, BOEMRE may issue one or more renewable energy leases within all or some of this Call Area. In the event that a particular lease is issued, and the lessee submits a SAP, BOEMRE will determine whether the EA adequately considers the environmental consequences of the activities proposed in the lessee's SAP. If the analysis in the EA adequately addresses these consequences, then no further NEPA analysis would be required before the SAP is approved. If that analysis is inadequate, additional NEPA analysis would be conducted before the SAP could be approved.

3. Information That Will Be Incorporated Into the EA

On November 6, 2007, BOEMRE published a Notice of Availability in the **Federal Register** (72 FR 62,672) of the Programmatic EIS for Alternative Energy Development and Production and Alternate Use of Facilities on the Outer Continental Shelf, Final EIS (OCS Report MMS 2007-046) (Programmatic EIS). On June 26, 2009, BOEMRE published a Notice of Availability in the **Federal Register** (74 FR 30,616) of the EA for Issuance of Leases for Wind Resource Data Collection on the Outer

Continental Shelf Offshore Delaware and New Jersey (OCS EIS/EA MMS 2009-025) (Interim Policy EA), which addressed similar activities.

BOEMRE will incorporate the environmental and socioeconomic analyses of site characterization and assessment activities from the Programmatic EIS, Interim Policy EA, and other public information to inform its analysis in the EA. The EA will be developed using many of the principles of coastal and marine spatial planning, such as comprehensive interagency coordination, to identify information needs for COP submittals necessary for future decisionmaking regarding wind energy development.

4. Description of the Call Area

BOEMRE has identified an area for consideration for potential future wind energy leasing in consultation with other Federal agencies and the Rhode Island and Massachusetts Renewable Energy Task Forces. The area identified in the Call and this notice is located within the AMI, as described by a MOU between the Governors of Rhode Island and Massachusetts. The Call Area is divided into two areas separated by an existing traffic separation scheme. A detailed description of the area can be found in the Call that is published concurrently with this notice.

Map of the Call Area

A map of the area can be found at the following URL: <http://www.boemre.gov/offshore/RenewableEnergy/StateActivities-RhodeIsland.htm>.

A large-scale map of the Call Area showing boundaries of the area with numbered blocks is available from BOEMRE at the following address: Bureau of Ocean Energy Management, Regulation and Enforcement, Office of Offshore Alternative Energy Programs, 381 Elden Street, Mail Stop 4090, Herndon, Virginia 20170, Phone: (703) 787-1320.

Based on the information submitted in response to this notice and the aforementioned Call, BOEMRE would identify an area in which interest exists, and which will be subject to environmental analysis, in consultation with appropriate Federal agencies, states, local governments, tribes and other interested parties. The area identified will constitute a WEA under the "Smart from the Start" initiative, which will be the area analyzed in the EA.

5. Cooperating Agencies

BOEMRE invites other Federal agencies and state, tribal, and local governments to consider becoming

cooperating agencies in the preparation of this EA. CEQ regulations implementing the procedural provisions of NEPA define cooperating agencies as those with "jurisdiction by law or special expertise" (40 CFR 1508.5). Potential cooperating agencies should consider their authority and capacity to assume the responsibilities of a cooperating agency and to remember that an agency's role in the environmental analysis neither enlarges nor diminishes the final decisionmaking authority of any other agency involved in the NEPA process.

Upon request, BOEMRE will provide potential cooperating agencies with a draft Memorandum of Agreement that includes a schedule with critical action dates and milestones, mutual responsibilities, designated points of contact, and expectations for handling predecisional information. Agencies should also consider the "Factors for Determining Cooperating Agency Status" in Attachment 1 to CEQ's January 30, 2002, Memorandum for the Heads of Federal Agencies: Cooperating Agencies in Implementing the Procedural Requirements of the NEPA. A copy of this document is available at: <http://ceq.hss.doe.gov/nepa/regs/cooperating/cooperatingagenciesmemorandum.html> and <http://ceq.hss.doe.gov/nepa/regs/cooperating/cooperatingagencymemofactors.html>.

BOEMRE, as the lead agency, will not provide financial assistance to cooperating agencies. Even if an organization is not a cooperating agency, opportunities will exist to provide information and comments to BOEMRE during the normal public input phases of the NEPA/EA process.

6. Comments

Federal, state, local government agencies, tribal governments, and other interested parties are requested to send their written comments regarding environmental issues and the identification of reasonable alternatives related to the proposed actions described in this notice in one of the following ways:

1. *Electronically:* <http://www.regulations.gov>. In the entry titled "Enter Keyword or ID," enter BOEM-2011-0063, then click "search." Follow the instructions to submit public comments and view supporting and related materials available for this document.

2. In written form, delivered by hand or by mail, enclosed in an envelope labeled "Comments on Rhode Island and Massachusetts EA" to Program Manager, Office of Offshore Alternative

Energy Programs (MS 4090), Bureau of Ocean Energy Management, Regulation and Enforcement, 381 Elden Street, Herndon, Virginia 20170. Comments should be submitted no later than October 3, 2011.

Dated: July 27, 2011.

Robert P. LaBelle,

Acting Associate Director for Offshore Energy and Minerals Management.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLWYP00000-L51100000-GA0000-LVEMK09CK370; WYW176095]

Notice of Availability of the Record of Decision for the Wright Area South Porcupine Coal Lease-by-Application and Environmental Impact Statement, Wyoming

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of availability.

SUMMARY: In accordance with the National Environmental Policy Act of 1969, as amended, the Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the South Porcupine Coal Lease-by-Application (LBA) included in the Wright Area Coal Lease Applications Environmental Impact Statement (EIS).

ADDRESSES: The document is available electronically on the following Web site: <http://www.blm.gov/wy/st/en/info/NEPA/HighPlains/Wright-Coal.html>. Paper copies of the ROD are also available at the following BLM office locations:

- Bureau of Land Management, Wyoming State Office, 5353 Yellowstone Road, Cheyenne, Wyoming 82009; and
- Bureau of Land Management, Wyoming High Plains District Office, 2987 Prospector Drive, Casper, Wyoming 82604.

FOR FURTHER INFORMATION CONTACT: Mr. Tyson Sackett, Acting Wyoming Coal Coordinator, at (307) 775-6487, or Ms. Sarah Bucklin, EIS Project Manager, at (307) 261-7541. Mr. Sackett's office is located at the BLM Wyoming State Office, 5353 Yellowstone Road, Cheyenne, Wyoming 82009. Ms. Bucklin's office is located at the BLM High Plains District Office, 2987 Prospector Drive, Casper, Wyoming 82604. Persons who use a telecommunications device for the deaf

(TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 to contact the above individual during normal business hours. The FIRS is available 24 hours a day, 7 days a week, to leave a message or question with the above individual. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The ROD covered by this Notice of Availability is for the South Porcupine Coal Tract and addresses leasing Federal coal in Campbell County, Wyoming, administered by the BLM Wyoming High Plains District Office. The BLM approves Alternative 2, which is the preferred alternative for this LBA in the Wright Area Coal Final EIS. Under Alternative 2, the South Porcupine Coal LBA area, as modified by the BLM, includes approximately 3,243 acres. The BLM estimates that it contains approximately 401,830,508 tons of mineable Federal coal reserves under the selected configuration.

The BLM will announce a competitive coal lease sale in the **Federal Register** at a later date. The Environmental Protection Agency published a **Federal Register** notice announcing that the Final EIS was publicly available on July 30, 2010 (75 FR 44951).

This decision is subject to appeal to the Interior Board of Land Appeals (IBLA), as provided in 43 CFR part 4, within thirty (30) days from the date of publication of this Notice of Availability in the **Federal Register**. The ROD contains instructions for filing an appeal with the IBLA.

Donald A. Simpson,
State Director.

BILLING CODE 4310-22-P

DEPARTMENT OF THE INTERIOR

National Park Service

[2031-A047-409]

DRAFT General Management Plan and Draft Environmental Impact Statement, Biscayne National Park, FL

AGENCY: National Park Service, Interior.

ACTION: Notice of Availability of the Draft General Management Plan and Environmental Impact Statement.

SUMMARY: Pursuant to the National Environmental Policy Act of 1969, 42 U.S.C. 4332(2)(C), the National Park Service (NPS) announces the availability of a Draft Environmental Impact Statement (EIS) for the General Management Plan (GMP) for Biscayne National Park (Park), Florida.

Consistent with NPS laws, regulations, and policies and the purpose of the Park, the Draft EIS/GMP describes the NPS preferred alternative—Alternative 4—to guide the management of the Park over the next 20 to 30 years. The preferred alternative incorporates various management prescriptions to ensure protection, access and enjoyment of the park's resources.

An up-to-date GMP is needed to address how visitors access and use the park and the facilities needed to support those uses, how resources are managed, and how the NPS manages its operations. Recent studies have enhanced the NPS's understanding of resources, resource threats, and visitor use in the park.

DATES: The NPS will accept comments from the public on the Draft EIS/GMP for at least 60 days, starting from the date the Environmental Protection Agency publishes this Notice of Availability. The date, time, and location of the public meetings on the Draft EIS/GMP will be announced through the NPS Planning, Environment, and Public Comment (PEPC) *Web site*: <http://parkplanning.nps.gov/BISC> and media outlets.

ADDRESSES: Electronic copies of the Draft EIS/GMP will be available online at <http://parkplanning.nps.gov/BISC>. To request a copy, contact Biscayne National Park Superintendent Mark Lewis, 9700 SW 328 Street, Homestead, FL 33033-5634.

Comments may be submitted by several methods. The preferred method is commenting via the internet on the PEPC Web site above. An electronic public comment form is provided on this Web site. You may also mail comments to Superintendent, Biscayne National Park, 9700 SW 328 Street, Homestead, FL 33033-5634. Finally, you may hand-deliver comments to the park. Before including your address, phone number, e-mail address, or other personal identifying information in your comment, please be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so. We will always make submissions from organizations or businesses, and from individuals identifying themselves as representatives of or officials of organizations or businesses, available for public inspection in their entirety. A

limited number of compact disks and printed copies of the Draft GMP/EIS will be made available at Biscayne National Park headquarters, 9700 SW 328 Street, Homestead, FL.

SUPPLEMENTARY INFORMATION: Public meetings, newsletters, and internet updates have kept the public informed and involved throughout the planning process. The draft GMP provides a framework for management, use, and development of the national park for the next 20 or more years. It presents and analyzes five alternatives: Alternative 1 (no action) provides a baseline for evaluating changes and impacts of the four action alternatives. Alternative 2 provides the highest level of visitor services in the form of increased facilities and access to areas of the park. Alternative 3 adds a visitor permit system and marine reserve zone. Alternative 4 is the NPS Preferred Alternative. It was crafted to emphasize strong natural and cultural resource protection while providing a diversity of visitor experiences. Visitor opportunities in this alternative would range from the challenges of exploring the natural environment alone to the conveniences of built surroundings. A limited amount of moderate resource impacts would be tolerated in high-use areas of the park. While the majority of the park would be open for public enjoyment and appreciation, some areas would be closed to visitors to protect sensitive resources and allow wildlife a respite from people. Alternative 5 provides the highest protection of natural and cultural resources on the park, including a larger marine reserve zone.

The five alternatives are described in detail in chapter 2 of the draft plan. The key impacts of implementing the five alternatives are detailed in chapter 4 and summarized in chapter 2.

FOR FURTHER INFORMATION CONTACT: Biscayne National Park Superintendent Mark Lewis, 9700 SW 328 Street, Homestead, FL 33033-5634 or telephone at (305) 230-1144. The authority for publishing this notice is contained in 40 CFR 1506.6

The responsible official for this Draft EIS is the Regional Director, NPS Southeast Region, 100 Alabama Street SW., 1924 Building, Atlanta, Georgia 30303.

Dated: August 8, 2011.

Gordon Wissinger,

Acting Regional Director, Southeast Region.

BILLING CODE 4310-ML-P

DEPARTMENT OF THE INTERIOR**National Park Service**

[5017-7152-409]

Draft Environmental Impact Statement for the General Management Plan (DEIS/GMP), Canaveral National Seashore, FL**AGENCY:** National Park Service, Interior.**ACTION:** Notice of availability of a Draft Environmental Impact Statement for the General Management Plan (DEIS/GMP), Canaveral National Seashore (Seashore).**SUMMARY:** Pursuant to 42 U.S.C. 4332(2)(C) of the National Environmental Policy Act of 1969 the NPS announces the availability of a DEIS/GMP for Canaveral National Seashore, Florida.

The document provides a framework for management, use, and development options for the Seashore by the NPS for the next 15 to 20 years. It describes four management alternatives for consideration, including a No-Action Alternative that continues current management policies and the NPS's preferred alternative. The document analyzes the environmental impacts of the alternatives.

DATES: There will be a 60-day comment period beginning with the Environmental Protection Agency's publication of this notice of availability in the **Federal Register**.**ADDRESSES:** Copies of the DEIS/GMP are available by contacting the Park Superintendent at Canaveral National Seashore, 212 S. Washington Avenue, Titusville, Florida 32796-3553; telephone: 321-267-1110. An electronic copy of the DEIS/GMP is available on the Internet at <http://parkplanning.nps.gov>.**SUPPLEMENTARY INFORMATION:** There will be a 60-day comment period beginning with the Environmental Protection Agency's publication of this notice of availability in the **Federal Register**. If you wish to comment on the DEIS/GMP, you may submit your comments by any one of several methods. You may mail comments to the Superintendent at the address shown above. You may also submit a comment via the Internet at <http://parkplanning.nps.gov>. Finally, you may present your comments in person at the public meetings to be held during the public review period in and around the Seashore.

Before including your address, phone number, e-mail address, or other personal identifying information in your comment, please be advised that your entire comment—including your

personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold from public review your personal identifying information, we cannot guarantee that we will be able to do so.

The DEIS/GMP presents three management alternatives for the Seashore in addition to the no-action alternative. The four alternatives are as follows:

Alternative A (No-action Alternative): The continuation of current management practices and trends, as set forth general in the 1982 GMP and 1998 GMP amendment.

Alternative B (The NPS Preferred Alternative): Would provide the highest protection of natural and cultural resources associated with the Seashores barrier island system.

Alternative C: Would provide the highest level of visitor services in the form of increased facilities and access to areas of the park.

Alternative D: Would provide a limited level of facility development and would enhance visitor and educational opportunities through partnerships.

FOR FURTHER INFORMATION CONTACT: The Superintendent, Canaveral National Seashore, at the address and telephone number shown above. An electronic copy of the DEIS/GMP is available on the Internet at <http://parkplanning.nps.gov>. The authority for publishing this notice is 40 CFR 1506.6.

The responsible official for this DEIS/GMP is the Regional Director, Southeast Region, NPS, 100 Alabama Street SW., 1924 Building, Atlanta, Georgia 30303.

Dated: August 8, 2011.

Gordon Wissinger,*Acting, Regional Director, Southeast Region.*

BILLING CODE 4310-5X-P**INTERNATIONAL TRADE COMMISSION****Notice of Receipt of Complaint; Solicitation of Comments Relating to the Public Interest****AGENCY:** U.S. International Trade Commission.**ACTION:** Notice.**SUMMARY:** Notice is hereby given that the U.S. International Trade Commission has received a complaint entitled *In Re Certain Digital Televisions Containing Integrated Circuit Devices and Components Thereof*, DN 2840; the Commission is soliciting comments on

any public interest issues raised by the complaint.

FOR FURTHER INFORMATION CONTACT: James R. Holbein, Secretary to the Commission, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205-2000. The public version of the complaint can be accessed on the Commission's electronic docket (EDIS) at <http://edis.usitc.gov>, and will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205-2000.

General information concerning the Commission may also be obtained by accessing its Internet server (<http://www.usitc.gov>). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at <http://edis.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205-1810.

SUPPLEMENTARY INFORMATION: The Commission has received a complaint filed on behalf of Renesas Electronics Corporation and 511 Technologies, Inc. on August 12, 2011. The complaint alleges violations of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) in the importation into the United States, the sale for importation, and the sale within the United States after importation of certain digital televisions containing integrated circuit devices and components thereof. The complaint names as respondent Vizio, Inc. of CA.

The complainant, proposed respondents, other interested parties, and members of the public are invited to file comments, not to exceed five pages in length, on any public interest issues raised by the complaint. Comments should address whether issuance of an exclusion order and/or a cease and desist order in this investigation would negatively affect the public health and welfare in the United States, competitive conditions in the United States economy, the production of like or directly competitive articles in the United States, or United States consumers.

In particular, the Commission is interested in comments that:

- (i) Explain how the articles potentially subject to the orders are used in the United States;
- (ii) identify any public health, safety, or welfare concerns in the United States relating to the potential orders;
- (iii) indicate the extent to which like or directly competitive articles are

produced in the United States or are otherwise available in the United States, with respect to the articles potentially subject to the orders; and

(iv) indicate whether Complainant, Complainant's licensees, and/or third party suppliers have the capacity to replace the volume of articles potentially subject to an exclusion order and a cease and desist order within a commercially reasonable time.

Written submissions must be filed no later than by close of business, five business days after the date of publication of this notice in the **Federal Register**. There will be further opportunities for comment on the public interest after the issuance of any final initial determination in this investigation.

Persons filing written submissions must file the original document and 12 true copies thereof on or before the deadlines stated above with the Office of the Secretary. Submissions should refer to the docket number ("Docket No. 2840") in a prominent place on the cover page and/or the first page. The Commission's rules authorize filing submissions with the Secretary by facsimile or electronic means only to the extent permitted by section 201.8 of the rules (see Handbook for Electronic Filing Procedures, http://www.usitc.gov/secretary/fed_reg_notices/rules/documents/handbook_on_electronic_filing.pdf). Persons with questions regarding electronic filing should contact the Secretary (202-205-2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. See 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. All nonconfidential written submissions will be available for public inspection at the Office of the Secretary.

This action is taken under the authority of section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and of sections 201.10 and 210.50(a)(4) of the Commission's Rules of Practice and Procedure (19 CFR 201.10, 210.50(a)(4)).

By order of the Commission.

Issued: August 15, 2011.

James R. Holbein,

Secretary to the Commission.

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Inv. No. 337-TA-798]

Certain Light-Emitting Diodes and Products Containing Same; Notice of Institution of Investigation

Institution of investigation pursuant to 19 U.S.C. 1337.

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that a complaint was filed with the U.S. International Trade Commission on July 15, 2011, under section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, on behalf of Samsung LED Co., Ltd. of Korea and Samsung LED America, Inc. of Atlanta, Georgia. The complaint alleges violations of section 337 based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain light-emitting diodes and products containing same by reason of infringement of certain claims of U.S. Patent No. 6,551,848 ("the '848 patent"); U.S. Patent No. 7,268,372 ("the '372 patent"); U.S. Patent No. 7,282,741 ("the '741 patent"); U.S. Patent No. 7,771,081 ("the '081 patent"); U.S. Patent No. 7,893,443 ("the '443 patent"); U.S. Patent No. 7,838,315 ("the '315 patent"); U.S. Patent No. 7,959,312 ("the '312 patent"); and U.S. Patent No. 7,964,881 ("the '881 patent"). The complaint further alleges that an industry in the United States exists as required by subsection (a)(2) of section 337.

The complainants request that the Commission institute an investigation and, after the investigation, issue an exclusion order and a cease and desist order.

ADDRESSES: The complaint, except for any confidential information contained therein, is available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Room 112, Washington, DC 20436, telephone (202) 205-2000. Hearing impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205-1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205-2000. General information concerning the Commission may also be obtained by accessing its Internet server at

<http://www.usitc.gov>. The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at <http://edis.usitc.gov>.

FOR FURTHER INFORMATION CONTACT: The Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205-2560.

Authority: The authority for institution of this investigation is contained in section 337 of the Tariff Act of 1930, as amended, and in section 210.10 of the Commission's Rules of Practice and Procedure, 19 CFR 210.10 (2011).

Scope of Investigation: Having considered the complaint, the U.S. International Trade Commission, on August 12, 2011, *ordered that—*

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930, as amended, an investigation be instituted to determine whether there is a violation of subsection (a)(1)(B) of section 337 in the importation into the United States, the sale for importation, or the sale within the United States after importation of certain light-emitting diodes and products containing same that infringe one or more of claims 1, 3, 5-10, and 13-16 of the '848 patent; claims 1-9 of the '372 patent; claims 1 and 5-9 of the '741 patent; claims 1, 2, 4, 6-8, 10, and 11 of the '081 patent; claims 1, 4, 5, and 7-14 of the '443 patent; claims 1-4, 6, and 9-13 of the '312 patent; claims 1-5 of the '315 patent; and claims 1-12 of the '881 patent, and whether an industry in the United States exists as required by subsection (a)(2) of section 337;

(2) For the purpose of the investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainants are:
Samsung LED Co., Ltd., 314, Maetan 3-Dong, Yeongtong-gu, Suwon City, Gyeonggi-Do 443-743, Korea.
Samsung LED America, Inc., 6 Concourse Parkway NE., Atlanta, GA 30328.

(b) The respondents are the following entities alleged to be in violation of section 337, and are the parties upon which the complaint is to be served:
OSRAM GmbH, Hellabrunner Strasse 1, 81543 Munich, Germany.
OSRAM Opto Semiconductors GmbH, Leibnizstr 4, 93055 Regensburg, Germany.
OSRAM Opto Semiconductors Inc., 1150 Kifer Road Suite 100, Sunnyvale, CA 94086.
OSRAM Sylvania Inc., 100 Endicott Street, Danvers, MA 01923.

(c) The Office of Unfair Import Investigations, U.S. International Trade

Commission, 500 E Street, SW., Suite 401, Washington, DC 20436; and

(3) For the investigation so instituted, the Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding Administrative Law Judge.

The Office of Unfair Import Investigations will not participate as a party in this investigation.

Responses to the complaint and the notice of investigation must be submitted by the named respondents in accordance with section 210.13 of the Commission's Rules of Practice and Procedure, 19 CFR 210.13. Pursuant to 19 CFR 201.16(d)–(e) and 210.13(a), such responses will be considered by the Commission if received not later than 20 days after the date of service by the Commission of the complaint and the notice of investigation. Extensions of time for submitting responses to the complaint and the notice of investigation will not be granted unless good cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and to authorize the administrative law judge and the Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and this notice and to enter an initial determination and a final determination containing such findings, and may result in the issuance of an exclusion order or a cease and desist order or both directed against the respondent.

By order of the Commission.
Issued: August 12, 2011.

William R. Bishop,

Acting Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Settlement Agreement Under the Resource Conservation and Recovery Act and the Emergency Planning and Community Right-to-Know Act

Notice is hereby given that on August 12, 2011, a proposed Consent Decree in *United States v. Clean Harbors of Braintree, Inc.*, No. 11–11440, was lodged with the United States District Court of the District of Massachusetts. The United States filed this action, on the same day that the Consent Decree was lodged with the Court, under the Resource Conservation and Recovery Act (“RCRA”), 42 U.S.C. 6901, *et seq.*, and the Emergency Planning and Community Right-to-Know Act (“EPCRA”), 42 U.S.C. 11001, *et seq.* The Complaint alleges that Clean Harbors of Braintree, Inc. (“Clean Harbors”) violated various provisions of RCRA and EPCRA, as well as their implementing permits and regulations, at the hazardous waste treatment, storage, and disposal facility operated by Clean Harbors at 1 Hill Avenue in Braintree, Massachusetts (“Facility”).

Under the Consent Decree, Clean Harbors has agreed to certain injunctive relief, to pay a penalty in the amount of \$650,000, and to implement a Supplemental Environmental Project, at a cost of at least \$1,062,500, involving the planting of approximately 1,400 trees in low-income or minority areas located in the City of Boston. The Consent Decree resolves the civil claims

of the United States for the violations alleged in the Complaint through the date of lodging of the Consent Decree.

For a period of thirty days from the date of this publication, the Department of Justice will receive and consider comments relating to the Consent Decree. All comments must be received by the Department of Justice within this thirty-day period. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either e-mailed to pubcomment-ees.enrd@usdoj.gov or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044, and should refer to *United States v. Clean Harbors of Braintree, Inc.*, No. XX (D. Mass.) and D.J. Ref. No. 90–7–1–09439. A copy of any comments should be sent to Donald G. Frankel, Senior Counsel, Department of Justice, Environmental Enforcement Section, One Gateway Center, Suite 616, Newton, MA 02458, or e-mailed to douglas.frankel@usdoj.gov.

The Agreement may be examined at the Office of the United States Attorney, District of Massachusetts, United States Federal Courthouse, 1 Courthouse Way, Boston, MA 02210 (contact George B. Henderson, II at 617–748–3100). During the public comment period, the Agreement may also be examined on the following Department of Justice Web site, http://www.usdoj.gov/enrd/Consent_Decrees.html. A copy of the Agreement may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, or by faxing or e-mailing a request to Tonia Fleetwood (tonia.fleetwood@usdoj.gov), fax no. (202) 514–0097, phone confirmation number (202) 514–1547. In requesting a copy of the Agreement from the Consent Decree Library, please enclose a check in the amount of \$9.50 (25 cents per page reproduction cost) payable to the U.S. Treasury (if the request is by fax or e-mail, forward a check to the Consent Decree library at the address stated above).

Ronald G. Gluck,

Assistant Section Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Under the Clean Water Act

Notice is hereby given that on August 11, 2011, a proposed Consent Decree in *Environment Rhode Island et al. and the*

United States and Rhode Island v. City of Newport, Rhode Island, Civil Action No. 08–265S, was filed with the United States District Court for Rhode Island.

In this action, the United States and the other plaintiffs sought penalties and injunctive relief for the Defendant’s violations of the Clean Water Act, 33 U.S.C. 1251 *et seq.*, at its sewer system and water pollution control plant. To resolve the United States’ claims, the Defendants will pay a penalty of \$170,000, and will undertake extensive work to its sewer system and water pollution control plant to eliminate violations of the Clean Water Act.

The Department of Justice will receive for a period of thirty (30) days from the date of this publication comments relating to the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and either e-mailed to pubcomment-ees.enrd@usdoj.gov or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to either: *Environment Rhode Island et al. and the United States and Rhode Island v. City of Newport, Rhode Island*, Civil Action No. 08–265S, or D.J. Ref. 90–5–1–1–09855. The Consent Decree may be examined at the Office of the United States Attorney, District of Rhode Island, Fleet Center, 50 Kennedy Plaza, 8th Floor, Providence, Rhode Island 02903, and at the United States Environmental Protection Agency, 5 Post Office Square, Suite 100, Boston, Massachusetts 02109. During the public comment period, the Consent Decree may also be examined on the following Department of Justice Web site, http://www.usdoj.gov/enrd/Consent_Decrees.html. A copy of the Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611 or by faxing or e-mailing a request to Tonia Fleetwood (tonia.fleetwood@usdoj.gov), fax no. (202) 514–0097, phone confirmation number (202) 514–1547. In requesting a copy from the Consent Decree Library, please enclose a check, payable to the U.S. Treasury, in the amount of \$21.50 (25 cents per page reproduction cost), or, if by e-mail or fax, forward a check in the applicable amount to the Consent Decree Library at the stated address.

Ronald Gluck,

Assistant Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Notice of Proposed Partial Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act and the Clean Air Act

Notice is hereby given that on August 12, 2011, a proposed Partial Consent Decree in *United States v. C.A.I., Inc., et al.*, Civil Action No. 1:10–cv–10390–GAO, was lodged with the United States District Court for the District of Massachusetts.

The proposed Partial Consent Decree will settle the United States’ claims on behalf of the U.S. Environmental Protection Agency (“EPA”) against Defendants C.A.I., Inc. (“CAI”), Sartorelli Realty, LLC (“SRLLC”), and Roy A. Nelson as Trustee of Nelson Danvers Realty Trust (“NDRT”), pursuant to Section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act (“CERCLA”), 42 U.S.C. 9607, and Sections 112(r) and 114(a) of the Clean Air Act (“CAA”), 42 U.S.C. 7412(r), 7414(a), with respect to the Danversport Superfund Site, a former inks and paint products manufacturing facility, in Danvers, Massachusetts (“Site”). Pursuant to the Partial Consent Decree, based on demonstrations of limited financial resources: CAI will pay \$400,000, including \$300,000 in response costs under CERCLA and \$100,000 as a civil penalty under the CAA; SRLLC will pay \$150,000 in response costs; NDRT will pay \$140,000 in response costs; and the settling defendants will transfer to the United States funds from an escrow account totaling approximately \$27,000 as of March 2011. In addition, SRLLC and NDRT will make best efforts to sell the Site property and will transfer all net sales proceeds to the United States. Finally, the settling defendants will pay the United States 90% of any net proceeds from the resolution of other Site-related proceedings, up to the total amount of the United States’ unreimbursed response costs. The proposed Partial Consent Decree, together with a Partial Consent Decree between the United States and Defendant Arnel Company, Inc. entered on July 1, 2011, will resolve this action in its entirety.

The Department of Justice will receive comments relating to the proposed Partial Consent Decree for a period of 30 days from the date of this publication. Comments on the Partial Consent Decree should be addressed to the Assistant Attorney General, Environment and Natural Resources

Division, and either e-mailed to pubcomment-ees.enrd@usdoj.gov or mailed to P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611, and should refer to *United States v. C.A.I., Inc., et al.*, Civil Action No. 1:10–cv–10390–GAO, D.J. Ref. 90–11–2–09184 & 90–11–2–09184/1.

During the public comment period, the proposed Partial Consent Decree may be examined at the following Department of Justice Web site: http://www.usdoj.gov/enrd/Consent_Decrees.html. A copy of the proposed Partial Consent Decree may also be obtained by mail from the Consent Decree Library, P.O. Box 7611, U.S. Department of Justice, Washington, DC 20044–7611 or by faxing or e-mailing a request to Tonia Fleetwood (tonia.fleetwood@usdoj.gov), fax number (202) 514–0097, phone confirmation number (202) 514–1547. If requesting a copy by mail from the Consent Decree Library, please enclose a check in the amount of \$15.75 (\$0.25 per page reproduction cost) payable to the U.S. Treasury or, if requesting by e-mail or fax, forward a check in that amount to the Consent Decree Library at the above-referenced address.

Ronald G. Gluck,

Assistant Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

BILLING CODE 4410–15–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Importer of Controlled Substances; Notice of Application

Pursuant to Title 21 Code of Federal Regulations 1301.34(a), this is notice that on May 4, 2011, Cambrex Charles City, Inc., 1205 11th Street, Charles City, Iowa 50616–3466, made application by renewal to the Drug Enforcement Administration (DEA) for registration as an importer of the following basic classes of controlled substances:

Drug	Schedule
Phenylacetone (8501)	II
Opium, raw (9600)	II
Poppy Straw Concentrate (9670)	II

The company plans to import the listed controlled substances to manufacture a bulk intermediate for sale to its customers. With regards to the phenylacetone, the company plans to use it as a base material in the bulk manufacture of another controlled substance.

No comments, objections, or requests for any hearings will be accepted on any application for registration or re-registration to import crude opium, poppy straw, concentrate of poppy straw, and coca leaves. As explained in the Correction to Notice of Application pertaining to Rhodes Technologies, 72 FR 3417 (2007), comments and requests for hearings on applications to import narcotic raw material are not appropriate.

Any bulk manufacturer who is presently, or is applying to be, registered with DEA to manufacture such basic classes of controlled substances listed in schedule I or II, which fall under the authority of section 1002(a)(2)(B) of the Act 21 U.S.C. 952(a)(2)(B) may, in the circumstances set forth in 21 U.S.C. 958(i), file comments or objections to the issuance of the proposed registration and may, at the same time, file a written request for a hearing on such application pursuant to 21 CFR 1301.43 and in such form as prescribed by 21 CFR 1316.47.

Any such written comments or objections should be addressed, in quintuplicate, to the Drug Enforcement Administration, Office of Diversion Control, Federal Register Representative (ODL), 8701 Morrisette Drive, Springfield, Virginia 22152; and must be filed no later than September 19, 2011.

This procedure is to be conducted simultaneously with, and independent of, the procedures described in 21 CFR 1301.34(b), (c), (d), (e), and (f). As noted in a previous notice published in the **Federal Register** on September 23, 1975, 40 FR 43745, all applicants for registration to import a basic class of any controlled substance in schedule I or II are, and will continue to be, required to demonstrate to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, that the requirements for such registration pursuant to 21 U.S.C. 958(a); 21 U.S.C. 823(a); and 21 CFR 1301.34(b), (c), (d), (e), and (f) are satisfied.

Dated: August 11, 2011.

Joseph T. Rannazzisi,
Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 2011-21117 Filed 8-17-11; 8:45 am]

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Importer of Controlled Substances; Notice of Application

Pursuant to 21 U.S.C. 958(i), the Attorney General shall, prior to issuing a registration under this Section to a bulk manufacturer of a controlled substance in schedule I or II, and prior to issuing a regulation under 21 U.S.C. 952(a)(2) authorizing the importation of such a substance, provide manufacturers holding registrations for the bulk manufacture of the substance an opportunity for a hearing.

Therefore, in accordance with 21 CFR 1301.34(a), this is notice that on May 4, 2011, Cambrex Charles City, 1205 11th Street, Charles City, Iowa 50616-3466, made application by renewal to the Drug Enforcement Administration (DEA) to be registered as an importer of Noroxymorphone (9668), a basic class of controlled substance listed in schedule II.

The company plans to import the basic class of controlled substance in bulk for sale to its customers.

Any bulk manufacturers who are presently, or are applying to be, registered with DEA to manufacture such basic class of controlled substance may file comments or objections to the issuance of the proposed registration and may, at the same time, file a written request for a hearing on such application pursuant to 21 CFR 1301.43 and in such form as prescribed by 21 CFR 1316.47.

Any such written comments or objections should be addressed, in quintuplicate, to the Drug Enforcement Administration, Office of Diversion Control, Federal Register Representative (ODL), 8701 Morrisette Drive, Springfield, Virginia 22152; and must be filed no later than September 19, 2011.

This procedure is to be conducted simultaneously with, and independent of, the procedures described in 21 CFR 1301.34(b), (c), (d), (e), and (f). As noted in a previous notice published in the **Federal Register** on September 23, 1975, 40 FR 43745, all applicants for registration to import a basic class of any controlled substance in schedule I or II are, and will continue to be, required to demonstrate to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, that the requirements for such registration pursuant to 21 U.S.C. 958(a); 21 U.S.C. 823(a); and 21 CFR 1301.34(b), (c), (d), (e), and (f) are satisfied.

Dated: August 10, 2011.

Joseph T. Rannazzisi,
Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 2011-21121 Filed 8-17-11; 8:45 am]

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Importer of Controlled Substances; Notice of Application

Pursuant to Title 21, of the CFR 1301.34(a), this is notice that on June 8, 2011, Aptuit, 10245 Hickman Mills Drive, Kansas City, Missouri 64137, made application by renewal to the Drug Enforcement Administration (DEA) for registration as an importer of the following basic classes of controlled substances:

Drug	Schedule
Marihuana (7360)	I
Poppy Straw Concentrate (9670)	II

The company plans to import a finished pharmaceutical product containing cannabis extracts in dosage form for packaging for a clinical trial study. In addition, the company also plans to import an ointment for the treatment of wounds which contain trace amounts of the controlled substances normally found in poppy straw concentrate for packaging and labeling for clinical trials.

No comments, objections, or requests for any hearings will be accepted on any application for registration or re-registration to import crude opium, poppy straw, concentrate of poppy straw or coca leaves. As explained in the Correction to Notice of Application pertaining to Rhodes Technologies, 72 FR 3417(2007), comments and requests for hearings on applications to import narcotic raw material are not appropriate.

Any bulk manufacturer who is presently, or is applying to be, registered with DEA to manufacture such basic classes of controlled substances listed in schedule I or II, which fall under the authority of section 1002(a)(2)(B) of the Act (21 U.S.C. 952(a)(2)(B)) may, in the circumstances set forth in 21 U.S.C. 958(i), file comments or objections to the issuance of the proposed registration, and may, at the same time, file a written request for a hearing on such application pursuant to 21 CFR 1301.43 and in such form as prescribed by 21 CFR 1316.47.

Any such comments or objections should be addressed, in quintuplicate, to the Drug Enforcement Administration, Office of Diversion Control, Federal Register Representative (ODL), 8701 Morrisette Drive, Springfield, Virginia 22152; and must be filed no later than September 19, 2011.

This procedure is to be conducted simultaneously with, and independent of, the procedures described in 21 CFR 1301.34(b), (c), (d), (e), and (f). As noted in a previous notice published in the **Federal Register** on September 23, 1975, 40 FR 43745, all applicants for registration to import a basic class of any controlled substance in schedule I or II are, and will continue to be, required to demonstrate to the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, that the requirements for such registration pursuant to 21 U.S.C. 958(a); 21 U.S.C. 823(a); and 21 CFR 1301.34(b), (c), (d), (e), and (f) are satisfied.

Dated: August 9, 2011.

Joseph T. Rannazzisi,
Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.
[FR Doc. 2011-21068 Filed 8-17-11; 8:45 am]
BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Importer of Controlled Substances; Notice of Registration

By Notice dated May 13, 2011, and published in the **Federal Register** on May 27, 2011, 76 FR 30968, Almac Clinical Services Inc., (ACSI), 25 Fretz Road, Souderton, Pennsylvania 18964, made application by renewal to the Drug Enforcement Administration (DEA) to be registered as an importer of the following basic classes of controlled substances:

Drug	Schedule
Oxycodone (9143)	II
Hydromorphone (9150)	II
Tapentadol (9780)	II
Fentanyl (9801)	II

The company plans to import small quantities of the listed controlled substances in dosage form to conduct clinical trials.

No comments or objections have been received. DEA has considered the factors in 21 U.S.C. 823(a) and 952(a), and determined that the registration of Almac Clinical Services Inc. (ACSI) to import the basic classes of controlled substances is consistent with the public interest, and with United States obligations under international treaties, conventions, or protocols in effect on May 1, 1971. DEA has investigated Almac Clinical Services Inc. (ACSI) to

ensure that the company's registration is consistent with the public interest. The investigation has included inspection and testing of the company's physical security systems, verification of the company's compliance with state and local laws, and a review of the company's background and history. Therefore, pursuant to 21 U.S.C. 952(a) and 958(a), and in accordance with 21 CFR 1301.34, the above named company is granted registration as an importer of the basic classes of controlled substances listed.

Dated: August 11, 2011.

Joseph T. Rannazzisi,
Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Importer of Controlled Substances; Notice of Registration

By a Notice dated April 28, 2011, and published in the **Federal Register** on May 4, 2011 76 FR 25374, Rhodes Technologies, 498 Washington Street, Coventry, Rhode Island 02816, made application by renewal to the Drug Enforcement Administration (DEA) to be registered as an importer of the following basic classes of controlled substances:

Dated: August 11, 2011.

Drug	Schedule
Raw Opium (9600)	II
Concentrate of Poppy Straw (9670)	II

Joseph T. Rannazzisi,
Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.
[FR Doc. 2011-21076 Filed 8-17-11; 8:45 am]
BILLING CODE 4410-09-P

The company plans to import the listed controlled substances in order to bulk manufacture controlled substances in Active Pharmaceutical Ingredient (API) form. The company distributes the manufactured API's in bulk form only to its customers.

As explained in the Correction to Notice of Application pertaining to Rhodes Technologies, 72 FR 3417 (2007), comments and requests for hearings on applications to import narcotic raw material are not appropriate.

DEA has considered the factors in 21 U.S.C. 823(a) and 952(a), and determined that the registration of Rhodes Technologies to import the basic classes of controlled substances is consistent with the public interest, and with United States obligations under international treaties, conventions, or

protocols in effect on May 1, 1971. DEA has investigated Rhodes Technologies to ensure that the company's registration is consistent with the public interest. The investigation has included inspection and testing of the company's physical security systems, verification of the company's compliance with state and local laws, and a review of the company's background and history. Therefore, pursuant to 21 U.S.C. 952(a) and 958(a), and in accordance with 21 CFR 1301.34, the above named company is granted registration as an importer of the basic classes of controlled substances listed.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Manufacturer of Controlled Substances; Notice of Application

Pursuant to § 1301.33(a), Title 21 of the Code of Federal Regulations (CFR), this is notice that on June 17, 2011, Cambridge Isotope Lab, 50 Frontage Road, Andover, Massachusetts 01810, made application by renewal to the

Drug Enforcement Administration (DEA) to be registered as a bulk manufacturer of Morphine (9300), a basic class of controlled substance listed in schedule II.

The company plans to utilize small quantities of the listed controlled substance in the preparation of analytical standards.

Any other such applicant, and any person who is presently registered with DEA to manufacture such a substance, may file comments or objections to the issuance of the proposed registration pursuant to 21 CFR 1301.33(a).

Any such written comments or objections should be addressed, in quintuplicate, to the Drug Enforcement Administration, Office of Diversion Control, Federal Register Representative (ODL), 8701 Morrisette Drive, Springfield, Virginia 22152; and must be filed no later than October 17, 2011.

Dated: August 10, 2011.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Manufacturer of Controlled Substances; Notice of Application

Pursuant to § 1301.33(a), Title 21 of the Code of Federal Regulations (CFR), this is notice that on June 13, 2011, AMRI Rensselaer, Inc., 33 Riverside Avenue, Rensselaer, New York 12144, made application by renewal to the Drug Enforcement Administration (DEA) to be registered as a bulk manufacturer of the following basic classes of controlled substances:

Drug	Schedule
Marihuana (7360)	I
Tetrahydrocannabinols (7370)	I
Amphetamine (1100)	II
Lisdexamfetamine (1205)	II
Methylphenidate (1724)	II
Pentobarbital (2270)	II
Meperidine (9230)	II
4-Anilino-N-Phenethyl-4-Piperidine (8333)	II
Fentanyl (9801)	II

The company plans to manufacture bulk controlled substances for use in product development and for distribution to its customers.

In reference to drug code 7360 (Marihuana), the company plans to bulk manufacture cannabidiol as a synthetic

intermediate. This controlled substance will be further synthesized to bulk manufacture a synthetic THC (7370). No other activity for this drug code is authorized for this registration.

Any other such applicant, and any person who is presently registered with DEA to manufacture such substance, may file comments or objections to the issuance of the proposed registration pursuant to 21 CFR 1301.33(a).

Any such written comments or objections should be addressed, in quintuplicate, to the Drug Enforcement Administration, Office of Diversion Control, Federal Register Representative (ODL), 8701 Morrisette Drive, Springfield, Virginia 22152; and must be filed no later than October 17, 2011.

Dated: August 10, 2011.

Pentobarbital (2270)	II
Nabilone (7379)	II

With regard to Gamma Hydroxybutyric Acid (2010), Tetrahydrocannabinols (7370), and Methamphetamine (1105) only, the company manufactures these controlled substances in bulk solely for domestic distribution within the United States to customers engaged in dosage-form manufacturing.

With regard to Nabilone (7379) only, the company presently manufactures a small amount of this controlled substance in bulk solely to conduct manufacturing process development within the company. It is the company's intention that, when the manufacturing process is refined to the point that its Nabilone bulk product is available for commercial use, the company will export the controlled substance in bulk solely to customers engaged in dosage-form manufacturing outside the United States. The company is aware of the requirement to obtain a DEA registration as an exporter to conduct this activity.

No comments or objections have been received. DEA has considered the factors in 21 U.S.C. 823(a) and determined that the registration of Norac, Inc. to manufacture the listed basic classes of controlled substances is consistent with the public interest at this time. DEA has investigated Norac, Inc. to ensure that the company's registration is consistent with the public interest. The investigation has included inspection and testing of the company's physical security systems, verification of the company's compliance with state and local laws, and a review of the company's background and history. Therefore, pursuant to 21 U.S.C. 823(a), and in accordance with 21 CFR 1301.33, the above named company is granted registration as a bulk manufacturer of the basic classes of controlled substances listed.

Dated: August 9, 2011.

Joseph T. Rannazzisi,
Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Manufacturer of Controlled Substances; Notice of Registration

By Notice dated April 13, 2011, and published in the **Federal Register** on April 20, 2011, 76 FR 22146, Stepan Company, Natural Products Dept., 100 W. Hunter Avenue, Maywood, New Jersey 07607, made application by renewal to the Drug Enforcement Administration (DEA) to be registered as a bulk manufacturer of the following basic classes of controlled substances:

Drug	Schedule
Cocaine (9041)	II
Ecgonine (9180)	II

The company plans to manufacture the listed controlled substances in bulk for distribution to its customers.

No comments or objections have been received. DEA has considered the factors in 21 U.S.C. 823(a), and determined that the registration of Stepan Company to manufacture the listed basic classes of controlled substances is consistent with the public interest at this time. DEA has investigated Stepan Company to ensure that the company's registration is consistent with the public interest. The investigation has included inspection and testing of the company's physical security systems, verification of the company's compliance with state and local laws, and a review of the company's background and history. Therefore, pursuant to 21 U.S.C. 823(a), and in accordance with 21 CFR 1301.33, the above named company is granted registration as a bulk manufacturer of the basic classes of controlled substances listed.

Dated: August 10, 2011.

Joseph T. Rannazzisi,
Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[FR Doc. 2011-21081 Filed 8-17-11; 8:45 am]

BILLING CODE 4410-09-P

application by renewal to the Drug Enforcement Administration (DEA) to be registered as a bulk manufacturer of the following basic classes of controlled substances:

Drug	Schedule
Tetrahydrocannabinols (7370)	I
Methylphenidate (1724)	II
Codeine (9050)	II
Dihydrocodeine (9120)	II
Oxycodone (9143)	II
Hydromorphone (9150)	II
Hydrocodone (9193)	II
Oripavine (9330)	II
Thebaine (9333)	II
Oxymorphone (9652)	II
Noroxymorphone (9668)	II
Fentanyl (9801)	II

The company plans to manufacture the listed controlled substances in bulk for conversion and sale to dosage form manufacturers.

No comments or objections have been received. DEA has considered the factors in 21 U.S.C. 823(a) and determined that the registration of Rhodes Technologies to manufacture the listed basic classes of controlled substances is consistent with the public interest at this time. DEA has investigated Rhodes Technologies to ensure that the company's registration is consistent with the public interest. The investigation has included inspection and testing of the company's physical security systems, verification of the company's compliance with state and local laws, and a review of the company's background and history. Therefore, pursuant to 21 U.S.C. 823(a), and in accordance with 21 CFR 1301.33, the above named company is granted registration as a bulk manufacturer of the basic classes of controlled substances listed.

Dated: August 10, 2011.

Joseph T. Rannazzisi,
Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration.

[Docket No. 05-16]

Lyle E. Craker, PhD; Order Regarding Officially Noticed Evidence and Motion for Reconsideration

Lyle E. Craker, PhD (Respondent) has requested that I reconsider the Final Order I issued on January 7, 2009 (74 FR 2101), which denied his application to

become registered as a bulk manufacturer of marijuana. For the reasons provided below, Respondent has failed to demonstrate that the Final Order contains any erroneous material findings of fact or conclusions of law. Accordingly, Respondent's motion for reconsideration does not provide a basis for altering the decision in the Final Order to deny his application.

I. Post-Final-Order Proceedings

Following the issuance of the January 7, 2009, Final Order, Respondent submitted a letter to me dated January 21, 2009, noting that, in several places in the Final Order, I indicated I was taking official notice of certain documents that were not submitted during the administrative hearing. With respect to such documents, the Final Order states: "To allow Respondent the opportunity to refute the facts of which I take official notice, Respondent may file a motion for reconsideration within fifteen days of service of this order which shall commence with the mailing of the order." Thus, Respondent had until January 23, 2009, to file a motion for reconsideration of the facts of which I took official notice. In his January 21, 2009, letter, Respondent requested an extension of this filing deadline until January 30, 2009. I granted this request for an extension by letter dated January 22, 2009.

On January 30, 2009, Respondent submitted to me a document entitled "Request for Opportunity Under 5 U.S.C. 556(e) To Respond to New Officially Noticed Evidence and Motion for Reconsideration." In this document, Respondent provided a preliminary response to those documents of which I took official notice. However, Respondent asked for additional time to supplement his preliminary response, given the length of the Final Order as well as that of the documents of which I took official notice. I granted this request, allowing Respondent until March 11, 2009, to supplement his response and motion. I further instructed that counsel for the Government would have to submit its response no later than 15 days after being served with Respondent's submission.

On March 11, 2009, Respondent submitted "Respondent's Supplemental Brief in Support of Request Under 5 U.S.C. 556(e) To Respond to New Officially Noticed Evidence and Motion for Reconsideration." In this document, Respondent provided the legal and factual bases for his motion for reconsideration of the Final Order. Also in the document, Respondent requested that the administrative hearing be

reopened so that he may call additional witnesses in view of certain documents of which I took official notice in the final order. The Government submitted its response on April 13, 2009. In view of these submissions, and to clarify Respondent's request, I issued an interim order on May 18, 2009, directing Respondent to submit a list of all witnesses he would call if his request to reopen the administrative hearing were granted and to provide a summary of the proposed testimony for each witness. This interim order further instructed Respondent to indicate precisely which documents he sought to introduce for purposes of his motion for reconsideration and, for each document, whether he wanted me to take official notice of it, or whether he wished to introduce it through witnesses if his request to reopen the hearing were granted.

On June 5, 2009, Respondent submitted his "Witness List and Document List in Support of Motion for Reconsideration." On December 2, 2010, I issued an order granting in part, and denying in part, Respondent's request that I take official notice of certain documents. The order denied Respondent's request that I reopen the hearing to allow him to call additional witnesses. Having ruled on which new documents would be considered part of the record (through my taking official notice thereof), the order then gave Respondent an additional opportunity to file a final brief in support his motion for reconsideration. The order stated that Respondent was required to submit such brief on or before March 7, 2011, and that the Government's responsive brief was due no later than 30 days after receipt of Respondent's brief. Respondent submitted his brief on March 7, 2011 (hereafter, "Respondent's latest submission"), and the Government submitted its responsive brief on April 1, 2011.

II. Respondent's Additional Proposed Documentary Exhibits

Respondent's request to introduce additional documents for purposes of his motion for reconsideration was addressed at length in my December 2, 2010, Order. For each such document Respondent sought to introduce, the December 2, 2010, Order stated (pages 23–27) whether I would take official notice of the document, and the reasons therefor. Only *one* category of documents that Respondent sought to introduce was left unresolved by the December 2, 2010, Order. As to this category, the order stated (page 26):

If Respondent submits all of the correspondence between Chemic and HHS (or any of its components) relating to this application [Chemic's application to HHS to receive marijuana for research] that he has in his possession or can reasonably access (including, but not limited to, any such correspondence on the MAPS website, such as the January 23, 2009, letter from HHS to Chemic), I will take official notice of all such correspondence.

Thus, the only additional documents that might be considered at this juncture for inclusion in the record (by my taking official notice thereof) are the "correspondence between Chemic and HHS" described in the above-quoted sentence. Respondent's latest brief seeks to introduce 11 new documents (which Respondent labels Exhibits A–K). However, only four of these documents (Exhibits C, I, J, and K) appear to be correspondence between Chemic and HHS. The remaining seven documents (A, B, D, E, F, G, and H) do not appear to be correspondence between Chemic and HHS, and Respondent makes no assertion in his brief that they are such. The Government asserts in its responsive brief that these Exhibits A, B, E, F, G, and H are not "correspondence" and further that "Respondent has not laid any foundation to demonstrate that these exhibits were provided to HHS by Chemic." For this reason, among others, the Government objects to including these documents in the record.

Accordingly, I rule as follows with respect to these latest proposed exhibits:

- (1) I will take official notice of Exhibits C, I, J, and K; and
- (2) As Exhibits A, B, D, E, F, G, and H do not comport with the instructions contained in the December 2, 2010, Order, I will not take official notice of these documents, and they will not be considered part of the administrative record considered by the agency in this adjudication.

III. Respondent's Motion for Reconsideration

Given the number of written submissions made by Respondent following the issuance of the January 7, 2009, Final Order, along with the Government's responses thereto and the interim orders I issued regarding these submissions, it is important to reiterate here the purpose for which Respondent was given an opportunity to file a motion for reconsideration. That purpose was stated in the January 7, 2009, Final Order: "To allow Respondent the opportunity to refute the facts of which I take official notice, Respondent may file a motion for reconsideration within fifteen days of service of this order which shall

commence with the mailing of the order.” 74 FR at 2108 n.24. This was restated in the interim orders I issued following the Final Order. As explained in the Final Order and the December 2, 2010, Order, this opportunity to seek reconsideration of facts of which the agency takes official notice is derived from the Administrative Procedure Act (5 U.S.C. 556(e)) and the DEA regulations (21 CFR 1316.59(e)).

Respondent’s post-Final-Order submissions have, in many respects, gone beyond seeking reconsideration of facts of which I took official notice. Respondent has essentially sought broad reconsideration of the factual and legal bases for the Final Order—generally without predicating such arguments on the taking of official notice of any fact. Neither the Controlled Substances Act (CSA) nor the DEA regulations provide for such a broad-based motion for reconsideration of a Final Order.¹ Nonetheless, in the exercise of my discretion, taking into account the complex and sometimes novel issues involved in this matter, I have considered all of the arguments Respondent has submitted in his post-Final-Order submissions—including those that go beyond the scope of what is permitted by 5 U.S.C. 556(e) and 21 CFR 1316.59(e).

The arguments contained in Respondent’s post-Final-Order submissions are, for the most part, reiterations of the same arguments that were addressed at length and rejected in the Final Order. In a few instances, as noted below, Respondent does present some slightly different assertions than he previously offered. However, even in these instances, Respondent’s core contentions remain those that I previously rejected. Furthermore, Respondent fails in these latest submissions to rebut the fundamental reasons that were provided in the Final Order for denying his application.

¹ The CSA appeal provision, 21 U.S.C. 877, states: “All final determinations, findings, and conclusions of the [Administrator of DEA] under this subchapter shall be final and conclusive decisions of the matters involved, except that any person aggrieved by a final decision of the [Administrator] may obtain review of the decision in the United States Court of Appeals * * *.” This provision suggests that—outside of the scenario provided by the DEA regulations and APA in which a party, on timely request, seeks the opportunity to controvert facts of which the agency took official notice—DEA is not obligated to allow parties to seek reconsideration of final orders regarding applications for registration. DEA also adheres to the Supreme Court’s decision in *Interstate Commerce Comm’n v. Bhd. of Locomotive Eng’rs*, 482 U.S. 270 (1987), regarding the reopening of proceedings where it is alleged that new evidence or changed circumstances render the agency’s original order inappropriate. See also *Fry v. DEA*, 353 F.3d 1041, 1044 (9th Cir. 2003).

A. Respondent’s Arguments Relating to the Review of Research Protocols by the Department of Health and Human Services

In his post-Final-Order submissions, Respondent continues to focus on what was his primary theme throughout the adjudication proceedings leading up to the Final Order: his desire to have the Public Health Service and the National Institute on Drug Abuse (NIDA) removed from the process by which the Department of Health and Human Services (HHS) carries out its statutory duty to review proposed research involving marijuana. For purposes of context, it is repeated here, as explained in the Final Order, that under the CSA (21 U.S.C. 823(f)), the Secretary of HHS is responsible for reviewing all proposed research involving schedule I controlled substances. Specifically, section 823(f) provides that, with respect to applications for registration by practitioners wishing to conduct research with schedule I controlled substances, “the Secretary * * * shall determine the qualifications and competency of each practitioner requesting registration, *as well as the merits of the research protocol.*” (Emphasis added.) Thus, under section 823(f), a research proposal involving marijuana may only go forward where the Secretary both (1) Deems the practitioner qualified and competent and (2) determines the research protocol to be meritorious. Or, as stated by HHS in its 1999 announcement of its policies for providing marijuana to researchers: “To receive such a registration [under § 823(f)], a researcher must first be determined *by HHS* to be qualified and competent, and the proposed research must be determined *by HHS* to have merit.” 74 FR at 2120 n.70 (emphasis added in Final Order).

Respondent does not dispute that the statute assigns the foregoing functions to the Secretary of HHS. However, Respondent objects to the manner in which these functions are carried out within HHS. In particular, Respondent seeks to have the Public Health Service and NIDA stripped of any role in this process.²

For purposes of addressing this issue, it is useful to repeat the following parts of the Final Order, which discussed the scientific review process that has been utilized by HHS since 1999 to evaluate marijuana research proposals:

[I]n 1999, due in part to an increased interest in marijuana research and taking into

² See, e.g., 74 FR at 2106 (noting testimony of Rick Doblin, the Director of MAPS, that “what we’re trying to do is get the Public Health Service and NIDA out of the picture”).

account the IOM report, HHS decided to change the procedures by which it would supply marijuana to researchers. The new procedures were announced in a document released by NIH on May 21, 1999. In the announcement, “HHS recognize[d] the need for objective evaluations of the potential merits of cannabinoids for medical uses[.]” and that “[i]f a positive benefit is found, * * * the need to stimulate development of alternative, safer dosage forms.” Toward this end, NIH explained that the new procedures were designed to increase the availability of marijuana for research purposes by, among other things, making such marijuana “available on a cost-reimbursable basis.” This new procedure allowed researchers who were privately funded to obtain marijuana from HHS by reimbursing the NIDA contractor for the cost of the marijuana. This was a departure from the prior practice (pre-1999), whereby HHS only made marijuana available to persons who received NIH funding. The new procedures implemented by HHS in 1999 remain in effect today.

* * * * *

At the administrative hearing in this case, Steven Gust, PhD, Special Assistant to the Director of NIDA, explained that, in addition to seeking to facilitate research into the possible medical utility of marijuana, the new procedures implemented by HHS in 1999 were intended “to make the process more standardized, and to * * * provide some expertise that did not really exist at NIDA in terms of reviewing applications that involved * * * the use of marijuana * * * for treatment of diseases.” Accordingly, HHS “established a separate peer review process that * * * moved the review into the Public Health Service [a component of HHS] * * * where additional expertise from other NIH Institutes and other Federal agencies” could be utilized in reviewing the scientific merit of the applications. Dr. Gust further explained that the members of the review committee are drawn from the various specialty institutes of NIH, and the Substance Abuse and Mental Health Services Administration (SAMHSA). Dr. Gust also testified that the “scientific bar has been set very low, [so] that any project that has scientific merit is approved,” and that “anything that gets approved gets NIDA marijuana.” As of April 2004, HHS had approved at least seventeen pre-clinical or clinical studies of marijuana, which were sponsored by the California Center for Medical Cannabis Research (CMCR). According to one witness who testified on behalf of Respondent, all of the CMCR-sponsored researchers who applied to NIDA for marijuana did in fact receive marijuana from NIDA.

* * * * *

In his testimony, Dr. Gust explained the term “peer review” as follows: “Peer review is a process that has been used, certainly by NIH, and I think in other agencies in the Department of Health and Human Services, and probably the Federal Government, where outside expertise is acquired and outside opinions on the scientific merit of specific research proposals.” Dr. Gust added that the NIH peer review committees “review

proposals three times a year for the NIH, and there are—occasionally a Federal employee participates in one of those reviews, but probably 90 percent or more of the participants are researchers who are in the private sector, for the most part in academic institutions.”

74 FR at 2015, 2119 n.67 (footnotes and citations omitted).

Again, it is Respondent’s contention that the involvement of the Public Health Service and NIDA in reviewing proposed marijuana research protocols has the effect of blocking legitimate research into marijuana. Indeed, the primary argument Respondent puts forth in support of his proposed registration is that the current system by which the United States Government makes marijuana available to researchers fails to provide an adequate supply of marijuana within the meaning of 21 U.S.C. 823(a)(1)—precisely because, in Respondent’s opinion, the Public Health Service and NIDA have “institutional biases” against certain types of marijuana research.

This argument was carefully examined in the Final Order. See 74 FR at 2107–08, 2119–20. Respondent’s post-Final-Order submissions as to this issue are not materially different from the claims that were rejected in the Final Order. In fact, the new documents that Respondent has submitted following the Final Order, and of which I have taken official notice, provide further confirmation of certain determinations made in the Final Order. Respondent’s latest submission contains no citations to actual *evidence* in the record that supports his claims of “institutional biases” or “political” motivation on the part of the Public Health Service and NIDA.

As to this issue, the Final Order stated, among other things:

Respondent also introduced into evidence a letter from the President of Chemic to HHS responding to several points raised by the PHS Committee in denying Chemic’s application. Respondent’s letter does not, however, establish that HHS impermissibly denied Chemic’s application for marijuana. To the contrary, *the evidence supports the conclusion that HHS (acting through the PHS Committee) made its determination not to supply marijuana on this occasion based on scientific considerations, finding that Chemic’s then-latest proposed study was duplicative of prior and ongoing research and not likely to provide useful data.*

74 FR at 2109 (emphasis added; footnote and citation omitted). As noted, I granted Respondent’s post-Final-Order request to introduce additional correspondence between Chemic and HHS relating to Chemic’s proposed research protocol involving marijuana. Respondent produced six additional

pieces of correspondence between Chemic and HHS relating to this matter that were not produced in the administrative hearing. As indicated above and in the December 2, 2010, Order, I have taken official notice of all six of these documents. Each of these documents further confirms that HHS’s rejection of the Chemic protocol was—as the Final Order found—based purely on scientific merit.

It is difficult to understand why Respondent would seek to introduce at this juncture six letters between Chemic and HHS that reaffirm what was found in the Final Order—and how Respondent construes these letters as “rebuttal” evidence. The statements by HHS in these letters are, without question, focused entirely on the scientific inadequacies of various iterations of Chemic’s research proposal. The letters demonstrate that the HHS scientists have actively engaged in a dialogue with Chemic for many years, and have gone to great lengths to explain to Chemic each of the areas in which Chemic needs to revise its protocol so that it can be deemed scientifically meritorious. The letters thereby reaffirm that HHS (including, but not limited to, the Public Health Service and NIDA) has never indicated any opposition (political, philosophical, or otherwise) to any *category* of marijuana research. To the contrary, the letters—particularly the most recent one submitted by Respondent, dated January 23, 2009—actually show that HHS is interested in Chemic’s proposal and willing to supply Chemic with marijuana, provided that Chemic provides validation data that is necessary to support Chemic’s scientific measurements. In short, the evidence continues to point squarely to the conclusion that HHS is doing precisely what it is required to do under 21 U.S.C. 823(f): Allow only those schedule I research proposals that it determines to be scientifically meritorious to go forward. As the Final Order stated: “That Respondent finds this process to be scientifically rigorous—and thereby not automatically accepting of any proposed study sponsored by MAPS—provides no basis for any valid objection or any contention that the HHS supply of marijuana is inadequate.” 74 FR at 2120 (footnotes omitted).³

³ It is unclear whether Respondent is suggesting that I should refuse to accept at face value what HHS stated in its correspondence with Chemic and instead conclude—without any evidentiary basis for doing so—that the HHS scientists who are responsible for reviewing proposed marijuana research have conspired for years to carry out an elaborate ruse aimed at thwarting marijuana research. If this is Respondent’s mind-set, adopting

Moreover, Respondent’s “institutional bias” theory is belied by the following crucial fact. As stated in the Final Order: “The record reflects that since HHS changed its policies in 1999 to make marijuana more readily available to researchers (by, among other things, allowing privately funded researchers to obtain marijuana), every one of the 17 CMCR [California Center for Medical Cannabis Research]-sponsored pre-clinical or clinical studies that requested marijuana from NIDA was provided with marijuana.” 74 FR at 2119. Despite the enormity of this fact in relation to Respondent’s “institutional bias” claim, Respondent makes only the following vague reference to it in his latest submission (page 9): “Though the DEA points to other marijuana research that NIDA has allowed, none of these studies aimed to develop marijuana into a legal prescription medicine.” What Respondent downplays as “other marijuana research that NIDA has allowed” is, in fact, *seventeen* different clinical trials involving marijuana proposed by CMCR—all of which were approved by the Public Health Service and NIDA. As stated in the Final Order:

Any suggestion that the HHS scientific review process is unduly rigorous is belied by the testimony of Dr. Gust that the “scientific bar has been set very low, [so] that any project that has scientific merit is approved,” and that “anything that gets approved gets NIDA marijuana” (Tr. at 1700–01) as well as the uncontroverted evidence that every one of the 17 CMCR-sponsored research protocols submitted to HHS was deemed scientifically meritorious by HHS and was supplied with marijuana (GX 31, at 3; Tr. 694–95).

74 FR at 2120 n.71.

As for Respondent’s contention that “none of these studies aimed to develop marijuana into a legal prescription medicine,” this too is contradicted by the record. As stated in the Final Order:

The California research studies were conducted pursuant to a law enacted by California in 1999 known as the Marijuana Research Act of 1999. Cal. Health & Safety Code § 11362.9. This state law established the “California Marijuana Research Program” to develop and conduct studies on the potential medical utility of marijuana. *Id.* (The program is also referred to as the “Center for Medicinal Cannabis Research” (CMCR). Tr. 396.) The state legislature

it would be the antithesis of the principle inherent to the Administrative Procedure Act (APA) that agency action must be presumed to be valid where a reasonable basis exists for its decision. See, e.g., *Kern County Farm Bureau v. Allen*, 450 F.3d 1072, 1076 (9th Cir. 2006). It is also at odds with the APA concept that bars a reviewing court—much less a member of the public—from substituting its judgment for that of the agency. *Id.*

appropriated a total of \$9 million for the marijuana research studies. Tr. 397.

74 FR at 2105–06 n.16. It is thus beyond question that the CMCR studies were aimed at what Respondent characterizes as “develop[ing] marijuana into a legal prescription medicine.”⁴

For the same reasons, the record contradicts Respondent’s related claim that the involvement of the Public Health Service and NIDA in determining the scientific merit of proposed marijuana research “renders the supply [of marijuana] inadequate because entire categories of legitimate medical research are effectively foreclosed.” Respondent fails to explain what “categories of legitimate medical research” are supposedly being foreclosed. Again, it seems (but is unclear) that Respondent is suggesting that the Chemic research proposal, and/or Dr. Russo’s proposal (see below), were more geared toward “develop[ing] marijuana into a legal prescription medicine” than were the 17 CMCR studies. In other words, Respondent appears to be suggesting that the Public Health Service and NIDA went into their alleged “institutional bias” mode when reviewing the Chemic and Russo proposals, but turned off that mode when reviewing the 17 CMCR proposals because the latter were less geared toward developing marijuana into an FDA-approved medicine. If this is what Respondent is suggesting, there is no evidentiary foundation for such a claim as neither Chemic’s proposal nor Dr. Russo’s could be characterized as closer than the CMCR studies to the goal of obtaining FDA approval of marijuana as a drug.⁵

To address further the portion of Respondent’s latest submission pertaining to Dr. Russo, the following part of the Final Order is recited:

[Dr. Ethan Russo] sought funding from NIDA to study the use of marijuana to treat migraine headaches beginning around 1996. The precise dates of the events related to Dr. Russo are somewhat unclear as Respondent presented these events through the testimony of Mr. Doblin. (Dr. Russo did not testify.) Based on Mr. Doblin’s testimony, it appears that during 1996–97, NIDA twice rejected Dr. Russo’s protocol for reasons which are not clearly established by the record. However, according to Mr. Doblin, Dr. Russo conceded

that, on both of these two occasions when NIDA rejected his protocol, NIDA’s bases for doing so did include “some valid critiques.” Mr. Doblin testified that Dr. Russo subsequently attempted for a third time to obtain marijuana from NIDA, but on this third occasion he decided not to seek government funding but to seek private funding to purchase the marijuana from NIDA. According to Mr. Doblin, this third protocol submitted by Dr. Russo was approved by both the FDA and Dr. Russo’s institutional review board, but NIDA again refused to supply marijuana. When asked when this last denial by NIDA occurred, Mr. Doblin testified: “I think it was 1999.”

As noted above, NIH announced on May 21, 1999, HHS’s new procedures for making marijuana available to researchers. Bearing in mind that Respondent had the burden of proving any proposition of fact that he asserted in the hearing, 21 CFR 1301.44(a), nothing in Mr. Doblin’s testimony, or any other evidence presented by Respondent, established that HHS denied Dr. Russo’s request for marijuana under the new procedures implemented by the agency in 1999. Indeed, Respondent produced no evidence showing that HHS has denied marijuana to any clinical researcher with an FDA-approved protocol subsequent to the adoption of the 1999 guidelines.

74 FR at 2108 (citations omitted).

In his post-Final-Order submissions, Respondent submitted a letter dated February 1, 2000, from the Public Health Service and NIDA to Dr. Russo (Exhibit C to Respondent’s March 11, 2009, Supplemental Brief). In the December 2, 2010, Order, I granted Respondent’s request to take official notice of this document. As Respondent indicates, this letter was issued after HHS announced in 1999 its new procedures for providing marijuana to researchers. Even assuming, arguendo, that this letter demonstrates that the third protocol submitted by Dr. Russo was evaluated by HHS under the new procedures established in 1999,⁶ this does not materially alter the conclusions in the Final Order. This is because the Final Order stated, in essence, that even if Dr. Russo’s proposal had been evaluated by HHS under the post-1999 procedures, “the evidence indicates that the denials involving * * * Dr. Russo were based on HHS finding [his] protocols to be lacking in scientific merit.” See 74 FR at 2119 n.68.

The most recent document submitted by Respondent regarding Dr. Russo (the February 1, 2000, letter from Public Health Service to Dr. Russo) confirms yet again that the Public Health Service

and NIDA focus on *scientific merit* in reviewing proposed marijuana research. The February 1, 2000, letter advised Dr. Russo that a scientific review of his protocol had been conducted by the Center for Scientific Review (CSR) of the National Institutes of Health on behalf of the Public Health Service, and that the CSR recommended certain changes to the protocol. If, the letter continued, such changes were incorporated into a new protocol and submitted by Dr. Russo, the Public Health Service would reconsider his request. Among the specific changes that Dr. Russo was advised to make were the following: Including a placebo arm; taking steps to account for possible attrition of research subjects; and ensuring that research subjects received equivalent doses of THC. These are quintessentially scientific refinements that the researcher was being asked to make—not, as Respondent alleges, a refusal to allow a category of research to take place.

Thus, even when viewing Respondent’s newly submitted evidence regarding Dr. Russo as an example of a denial by HHS of marijuana under the post-1999 HHS procedures, it is in the same category as the Chemic protocols: A denial based on scientific merit under the post-1999 procedures. This would bring the total figures under the post-1999 procedures to the following: 17 studies approved and supplied with marijuana; two studies denied until the researcher makes certain changes in the protocol to render the proposal scientifically meritorious. Stated alternatively, under the post-1999 procedures, HHS’s approval rate for marijuana studies is at least 89.5 percent, with the possibility of that figure rising to 100 percent if two of the researchers were willing to make adjustments to their protocols to make them scientifically meritorious.

Respondent’s latest submission also refers to certain documentary and testimonial statements by NIDA officials, which Respondent contends support his claim of “institutional bias.” As these statements were part of the record that the parties addressed in their pre-Final-Order submissions, and since the Final Order already addressed this type of argument by Respondent, it is not necessary to reexamine this issue at length here. Moreover, the *actions* by HHS in response to actual research proposals are by far the best evidence of the agency’s true willingness to supply marijuana to researchers, and these actions render inconsequential any attempt by Respondent to surmise “institutional bias” from abstract statements isolated from the documents

⁴ The process by which FDA approves new drugs for marketing is summarized in the Final Order. 74 FR at 2106 n.21.

⁵ As stated in the Final Order, no clinical trials involving marijuana—not even the 17 CMCR studies—have advanced beyond Phase 1 of the three phases required for FDA approval of a new drug. 74 FR at 2107 n.23. The proposed Chemic study does not even appear to be a clinical trial, let alone a study more advanced in the phases of FDA approval than the CMCR studies.

⁶ While the letter itself is dated February 1, 2000, Respondent failed to present evidence indicating when Dr. Russo submitted his third protocol, or when HHS began its review of that protocol. Thus, it remains uncertain whether this third protocol was evaluated under the pre-1999 or post-1999 HHS procedures.

and testimony. The same considerations apply with respect to Respondent's argument that NIDA's mission stands as an obstacle to allowing legitimate marijuana research to take place. This argument was addressed in the Final Order and is overwhelmingly refuted by the evidence of HHS's actual track record in supplying marijuana to researchers.⁷

Respondent also asserts that two provisions of the Federal Food, Drug, and Cosmetic Act (FDCA) and an FDA regulation mandate that the FDA—and not NIDA—must carry out the Secretary of HHS's responsibility under 21 U.S.C. 823(f) to determine the scientific merit of proposed marijuana research. Specifically, Respondent cites 21 U.S.C. 393(b) (FDA's mission statement), 21 U.S.C. 355 (new drug approval process), and 21 CFR 312.22(a) (general principles of submission of an investigational new drug application (IND)), in support of this assertion.

This assertion is mistaken in a number of respects, including, but not limited to, the following. First, the fact that the FDA's statutory mission statement lists certain functions by no means precludes other agencies within HHS from having overlapping functions.⁸ Second, while FDA is

⁷ Although HHS's actual record in supplying marijuana to researchers is the best evidence of its willingness to do so, the following testimony of Dr. Gust at the hearing explains how HHS took steps in 1999 to ensure the availability of marijuana to researchers—including those interested in pursuing medical uses of marijuana—irrespective of NIDA's mission:

It was about this time [1999] when there was some increased interest in research, in pursuing the medical use of marijuana, and in an effort to make the process more standardized, and to basically provide some expertise that did not really exist at NIDA in terms of reviewing applications that involved primarily the use of marijuana or any other substance for that matter for treatment of diseases, which did not really fall within NIDA's mission, the department [HHS] established a separate peer review process that made the review—that moved the review into the Public Health Service at the time where additional expertise from other NIH Institutes and other Federal agencies could be brought to bear to help—and help provide reviews, appropriate reviews, of the scientific merit of these applications.

Tr. 1632–33. Thus, Respondent's attempt to focus on NIDA's particular mission, without regard to the mission of other components of HHS involved in review of marijuana research proposals, and without regard to the overall aims of the procedures established by HHS in 1999 for providing marijuana to researchers, is misplaced.

⁸ Moreover, not even those functions expressly listed in FDA's statutory mission statement are carried out solely by the FDA. As stated in the very next subsection after the one cited by Respondent, 21 U.S.C. 393(c), which is entitled "Interagency collaboration": "The Secretary [of HHS] shall implement programs and policies that will foster collaboration between the [FDA], the National Institutes of Health, and other science-based Federal agencies, to enhance the scientific and technical expertise available to the Secretary in the

indeed the agency within HHS that is chiefly responsible for administering the new drug approval process under 21 U.S.C. 355, this is a distinctly different function than the determination under 21 U.S.C. 823(f) of the scientific merit of proposed research involving schedule I controlled substances. There is certainly no basis for Respondent (or any other member of the public) to dictate to the Secretary that the same agency within HHS that carries out the former function must also carry out the latter.⁹ Third, although the review by FDA of an IND may (depending on the phase of the investigation) be similar in certain respects to the review under § 823(f) of a schedule I research proposal, the two types of reviews are distinct administrative functions carried out within HHS. This is evident from the first sentence of the very regulation that Respondent cites, 21 CFR 312.22(a), which states: "FDA's primary objectives in reviewing an IND are, in all phases of the investigation, to assure the safety and rights of subjects, and in Phase 2 and 3, to help assure that the quality of the scientific evaluation of drugs is adequate to permit an evaluation of the drug's effectiveness and safety." Thus, in reviewing an IND for a Phase 1 investigation, FDA's primary objective is to assure the *safety and rights of subjects*—not to assess the scientific quality of the clinical investigation. This is especially notable since, as stated above, none of the clinical trials involving marijuana that have been proposed to HHS has advanced beyond Phase 1.

The foregoing discussion also sheds light on another assertion made by Respondent in his latest submission: That "several research projects have been blocked by NIDA in spite of FDA-approved protocols."¹⁰ Preliminarily, it should be noted that Respondent fails to specify exactly what he means here by "several research projects." The record reveals only *two* clinical research proposals submitted to HHS involving marijuana that did not receive marijuana: Dr. Abrams's proposal (in the pre-1999 era) and Dr. Russo's proposal.¹¹ In addition, it is important

conduct of the duties of the Secretary with respect to the development, clinical investigation, evaluation, and postmarket monitoring of emerging medical therapies, including complementary therapies. * * *

⁹ Under 21 U.S.C. 823(f), Congress assigned to the Secretary of HHS sole discretion to determine how HHS carries out its responsibility to review the scientific merit of schedule I research proposals.

¹⁰ Respondent uses this particular wording on page 9 of his latest submission, and he reiterates the assertion numerous times in the document.

¹¹ As Respondent seems to concede, Chemic's proposed research involving marijuana is *not* a

at this juncture to correct an error in terminology. *FDA does not "approve" INDs.* Rather, the IND process works as follows. An investigator seeking to use an investigational new drug in a clinical trial must submit an IND for the drug to the FDA. 21 CFR 312.40. The IND automatically goes into effect 30 days after the FDA receives the IND,¹² unless the FDA notifies the sponsor that the investigation is subject to a clinical hold. *Id.*

Thus, it is incorrect for Respondent to state that the FDA "approved" any "protocols" for proposed marijuana research.¹³ More accurately stated, the most that can be inferred from the evidence is that the FDA *reviewed* INDs submitted by Dr. Abrams and Dr. Russo, and that the FDA did not place a clinical hold on either proposed investigation.¹⁴ However, as just explained, the FDA regulations indicate that, for Phase 1 investigations, FDA's review of an IND focuses primarily on the safety and rights of subjects—not the scientific quality of the clinical investigation. Thus, while the FDA appears to have concluded that allowing Dr. Russo's and Dr. Abrams's Phase 1 studies to proceed would not have presented an unacceptable risk of harm to the human research subjects,¹⁵ there is no evidentiary basis to conclude that FDA evaluated the scientific quality of either proposal—and particularly no basis to conclude that FDA determined that the studies were scientifically meritorious within the meaning of 21 U.S.C. 823(f).

As stated in the Final Order, under the procedures implemented by HHS in 1999 for reviewing proposed marijuana research, the review by FDA on an IND is *one part* of that process.¹⁶ Yet, Respondent seems to want FDA's

clinical trial. Accordingly, Respondent does not appear to be suggesting that Chemic submitted an IND to the FDA for its research proposal. Thus, it does not appear that Respondent is including the Chemic situation in his category of "research projects [that] have been blocked by NIDA in spite of FDA-approved protocols."

¹² The FDA may also notify the investigator that the clinical investigation may begin earlier than 30 days after the FDA receives the IND. 21 CFR 312.40(b)(2).

¹³ The word "approve" (or "approval") is a term of art in the FDCA. The FDA "approves" new drug applications upon an adequate showing of safety and efficacy for the uses in the proposed labeling, which allows a drug to be legally marketed. 21 U.S.C. 355; 21 CFR 314. An effective IND is considered "accepted," not "approved," by FDA.

¹⁴ I am assuming, for the sake of discussion, that Dr. Russo and Dr. Abrams submitted INDs and that the FDA did not issue clinical holds, even though Respondent did not introduce such INDs or call Dr. Russo or Dr. Abrams to testify.

¹⁵ See 21 CFR 312.42(b) (grounds for imposition of a clinical hold of a Phase 1 study under an IND).

¹⁶ See 74 FR at 2105.

review of an IND for Phase 1 investigations—which focuses on the safety and rights of subjects, rather than the scientific quality of the clinical investigation—to serve as the entire review process, *i.e.*, to supplant the full-fledged evaluation of the scientific merit required by 21 U.S.C. 823(f). Had Congress intended such a result, it could have easily stated in 21 U.S.C. 823(f) that the only scientific prerequisite to conducting research with a schedule I controlled substance is that an IND be in effect with respect to such research.¹⁷ But it is evident from the language of § 823(f) that Congress intended HHS to conduct a different type of evaluation of the scientific merit of research proposals than that which will suffice for purposes of an IND. It is unclear whether Respondent fails to understand this distinction between the review by FDA of a Phase 1 IND and the review of the scientific merit of a research proposal under § 823(f), or if Respondent does understand this distinction and simply wishes that the less rigorous review (the Phase 1 IND review) would suffice so that even those marijuana research proposals that lack scientific merit could be carried out.¹⁸ For the reasons noted above, neither of the foregoing is a legally valid position.

In sum, Respondent's motion for reconsideration provides no basis for deviating from the conclusions in the Final Order relating to the process by which HHS determines the scientific merit of proposed marijuana research pursuant to 21 U.S.C. 823(f). Congress assigned to the Secretary of HHS responsibility for deciding how to carry out that function within HHS, and the evidence demonstrates that the procedures established by HHS in 1999, including the Public Health Service interdisciplinary review process, properly focus on the scientific merit of research proposals. As the Final Order indicated, that process makes marijuana available to all researchers who meet the criteria of § 823(f), and Respondent's post-Final-Order submissions provide no evidence suggesting otherwise. Respondent's desire to substitute his opinion for that of the Secretary as to what type of scientific review should be carried out under § 823(f), and who

within HHS should carry it out, is legally untenable.

Respondent's claim that the supply of marijuana is inadequate is dependent on his supposition that the current HHS process for supplying marijuana to researchers improperly denies marijuana to researchers. That supposition was found in the Final Order to be without merit, and his latest submission warrants no departure from that finding, as explained above. Accordingly, Respondent has provided no basis to change the conclusion in the Final Order that he failed to meet his burden of proving that the supply of marijuana is inadequate within the meaning of 21 U.S.C. 823(a)(1).

B. Respondent's Arguments Relating to the Single Convention on Narcotic Drugs, 1961

Respondent seeks reconsideration of the determinations in the Final Order relating to the Single Convention on Narcotic Drugs, 1961 (Single Convention). Respondent's post-Final-Order arguments relating to the Single Convention are not predicated on the taking of official notice of any fact. Nonetheless, as indicated, I have considered these arguments. Respondent's core contentions regarding the Single Convention were addressed in the Final Order and, therefore, it is unnecessary to repeat all of that discussion here. However, in view of his latest submissions, a few points warrant reiteration and/or clarification.

Under 21 U.S.C. 823(a), DEA must deny an application by a person seeking to become registered as a bulk manufacturer of a schedule I controlled substance if the agency determines that such registration would be inconsistent with United States obligations under applicable international drug control treaties—*i.e.*, the Single Convention. When it comes to marijuana (referred to under the treaty as “cannabis”), one of the key principles of the Single Convention is that the federal government maintain a monopoly over the wholesale distribution of the drug. As to this point, the Final Order recited the following statement from the Official Commentary to the Single Convention:

Countries * * * which produce * * * cannabis * * *, [i]n so far as they permit private farmers to cultivate the plants * * *, cannot establish with sufficient exactitude the quantities harvested by individual producers. If they allowed the sale of the crops to private traders, they would not be in a position to ascertain with reasonable exactitude the amounts which enter their controlled trade. The effectiveness of their control regime would thus be considerably

weakened. In fact, experience has shown that permitting licensed private traders to purchase the crops results in diversion of large quantities of drugs into illicit channels. * * * [T]he acquisition of the crops and the wholesale and international trade in these agricultural products cannot be entrusted to private traders, but must be undertaken by governmental authorities in the producing countries. Article 23 * * * and article 28 * * * therefore require a government monopoly of the wholesale and international trade in the agricultural product in question in the country which authorizes its production.

74 FR at 2115 (citing Commentary at 278).

As indicated in the Final Order, the United States has, since 1968, implemented this aspect of the treaty through the following system carried out within HHS. NIDA enters into a contract with a private grower, with the grower being obligated under the contract to produce the amount and quantity of marijuana specified by NIDA and to produce marijuana cigarettes to supply researchers as directed by NIDA.¹⁹ Throughout the 44 years since the United States ratified the Single Convention in 1967, the entire United States supply of marijuana for researchers has been distributed through this system. In this manner, the United States Government has always monopolized the wholesale trade in marijuana, consistent with its obligations under the treaty.

It is true, as Respondent points out in his post-Final-Order submissions, that the Single Convention (article 23, paragraph 3) calls upon parties to carry out the functions of article 23 by a single government agency. It is also true, as Respondent indicates, that the United States fails to adhere strictly to this provision of the treaty as both DEA and HHS carry out certain functions set forth in article 23, paragraph 2.²⁰ Specifically, DEA carries out those functions of article 23 paragraph 2 that are encompassed by the DEA registration system, and HHS (through NIDA) carries out those functions relating to purchasing the marijuana and maintaining a monopoly over the wholesale distribution. That these

¹⁹Prior to 1999, NIDA entered into two contracts: one with the grower and one with the entity that produced the cigarettes. In 1999, NIDA decided that a single contract should be awarded for both activities, which resulted in the contractor (a division of the University of Mississippi) continuing to grow the marijuana, but subcontracting to Research Triangle Institute the responsibility of producing the cigarettes. 74 FR at 2122 n.79.

²⁰Respondent is incorrect, however, in asserting that the Final Order stated that NIDA carries out all the functions under article 23, paragraph 2. No such statement appears in the Final Order.

¹⁷ Several provisions of the CSA reference the IND provision of the FDCA. For example, 21 U.S.C. 827(c)(2)(A) expressly excludes “research conducted in conformity with an exemption granted under [21 U.S.C. 355(i)]” from the CSA's recordkeeping requirements.

¹⁸ Illustrative of this point is Respondent's statement in his latest submission (page 14) that “if a research protocol is good enough for the FDA, it should be good enough to be carried out.”

functions are divided among the two agencies—rather than being carried out by a single agency—is a result of the existing statutes, regulations, and Congressional appropriations.²¹ Nonetheless, when evaluating an application for registration under 21 U.S.C. 823(a), DEA must attempt to conform with the provisions of the Single Convention to the fullest extent possible under the existing statutory and regulatory framework. Accordingly, even in the absence of a single government agency carrying out all the functions referred to in article 23, paragraph 2, DEA must seek to adhere to the other provisions of this article that are attainable within the existing statutory and regulatory framework, including that which calls upon the United States Government to monopolize the wholesale distribution of marijuana.²²

Therefore, for the reasons detailed in the Final Order, Respondent's stated goal of becoming registered for the purpose of ending the Government monopoly on the wholesale distribution of marijuana to researchers is directly at odds with the Single Convention, which independently warrants denial of his application. Respondent seems to continue to either ignore and/or misunderstand this fundamental aspect of the treaty. In his latest submission, Respondent states (pages 20–21): "It is certainly true Dr. Craker seeks to cultivate marijuana outside NIDA's monopoly, but it does not follow that Dr. Craker seeks to cultivate marijuana outside the structures of *any government regulation*. * * * Dr. Craker and [Mr. Doblin] are in no way opposed to the regulation of marijuana by [DEA]." (Emphasis in original.) This statement suggests that Respondent believes incongruously that as long as he agrees to comply with the DEA regulations relating to registration and security, his proposed registration should be deemed consistent with the Single Convention. Based on this flawed assumption, Respondent is effectively

²¹ Whether, in the absence of Congressional action, DEA could promulgate regulations that would result in DEA alone carrying out all the functions of article 23 is beyond the scope of this adjudication.

²² Although Respondent argues that the Government does not take actual physical possession of the marijuana grown by the NIDA contractor (as contemplated by article 23, paragraph 2(d)), one could conclude that the NIDA contract process does fulfill this obligation. For the reasons indicated above, this does not compel DEA to abandon the provision of article 23 requiring a government monopoly on the wholesale distribution of marijuana. See 74 FR at 2114 ("taking possession and engaging in wholesale distribution are two separate activities under the Convention").

arguing that the provision of the Single Convention requiring a Government monopoly over the wholesale distribution of marijuana may be jettisoned whenever an applicant for registration promises to comply with the DEA regulations governing registration and security.

Respondent also continues to argue that the marijuana he seeks to grow is "exempt" from the Single Convention requirement of a government monopoly over the wholesale distribution of marijuana. According to Respondent, because he is seeking to supply marijuana to researchers for the purpose of conducting research that he hopes will someday lead to the FDA approval of marijuana as medicine, the marijuana he is seeking to grow should be deemed "medicinal cannabis" within the meaning of the Single Convention and thus the government monopoly set forth in article 23, paragraph 2(e) should be considered inapplicable to his proposed activity. The Government correctly suggests in its responsive brief (pages 8–9) that Respondent's interpretation would vitiate the language of article 23, paragraph 2(e). As I stated in the December 2, 2010, Order, it is theoretically possible that a marijuana-derived drug might be approved by the FDA in the future that would constitute "medicinal cannabis" within the meaning of the Single Convention. However, no drug product derived from marijuana has been approved by the FDA and, therefore, there is currently no such thing as "medicinal cannabis" in the United States. For this reason, the exception in article 23, paragraph 2(e) for "medicinal cannabis" has no bearing on this adjudication.

For purposes of the Single Convention, the marijuana that Respondent seeks to produce is clearly "cannabis" subject to the government monopoly under article 23, paragraph 2(e). As to this point, the Final Order observed:

In its 2005 Annual Report, the [International Narcotics Control Board] reiterated: "Articles 23 and 28 of the [Single] Convention provide for a national cannabis agency to be established in countries where the cannabis plant is cultivated licitly for the production of cannabis, even if the cannabis produced is used for research purposes only."

74 FR at 2115 (footnote omitted).

Respondent also makes the following statement in his latest submission (pages 15–16): "Additionally, the conduct of the one currently DEA-licensed manufacturer, who has been permitted by DEA to grow large amounts of marijuana *outside* of the NIDA contract, disproves the theory that

marijuana grown for any purpose other than to supply NIDA-approved research would violate the Convention." (Emphasis in original.) Respondent is referring here to the cultivation of marijuana by the National Center for Natural Products Research (National Center), a division of the University of Mississippi.²³ As explained in the Final Order, in 1999, DEA and the National Center entered into a Memorandum of Agreement (MOA) under which the National Center was granted an additional registration to manufacture marijuana and THC independent of its contract with NIDA. 74 FR at 2104 n.13. The Final Order further explained:

As set forth in the MOA, the purpose of the registration was "to allow the Center to develop a new product formulation for effecting delivery of THC in a pharmaceutically acceptable dosage form suppository * * * and to provide crude THC extract to a DEA-registered manufacturer of THC for further purification." The MOA further stated that, under the terms thereof, the Center would "manufacture marijuana for the purpose of extracting THC therefrom." Subsequently, the Center submitted a new application for a registration to bulk manufacture marijuana and THC "to prepare marijuana extract for further purification into bulk active [THC] for use in launching FDA-approved pharmaceutical products." DEA has not yet issued a final order as to this application. (DEA publishes in the Federal Register all final orders on applications for registration to bulk manufacture schedule I and II controlled substances.)

The MOA further provided that "[i]n accordance with articles 23 and 28 of the Single Convention on Narcotic Drugs * * * private trade in 'cannabis' is strictly prohibited. Therefore, the Center shall not distribute any quantity of marijuana to any person other than an authorized DEA employee." Continuing, the MOA explained that "[t]he Single Convention does not prohibit private trade in 'cannabis preparations,'" and noted that this term, "within the meaning of the Single Convention, is a mixture, solid or liquid containing cannabis, cannabis resin, or extracts or tinctures of cannabis." Because "[t]he THC that the Center will extract from marijuana [is] considered such a 'cannabis preparation[.]" * * * the Center may, in accordance with the Single Convention, distribute the crude THC extract to private entities" provided the Center otherwise complies with the CSA and DEA regulations. The MOA also set forth a detailed series of controls to maintain accountability of the marijuana from acquisition of the seeds through the extraction of THC from the harvested material.

Id. (emphasis added; citations omitted). The Final Order further stated:

²³ For ease of understanding, the National Center is sometimes referred to here and in the Final Order as "the University of Mississippi."

In 2005, the University of Mississippi applied for a new registration to manufacture marijuana “to prepare marijuana extract for further purification into bulk active [THC] for use in launching FDA-approved pharmaceutical products.” DEA has not yet issued a final order as to this application and the University therefore does not currently have DEA authorization to undertake such activity. As with Respondent’s application, DEA may only grant the pending University of Mississippi application if the agency determines that the University has demonstrated that the registration would be consistent with United States treaty obligations and the public interest. In making such determinations, DEA will not simply rely on the prior issuance of registration under the 1999 MOA but will consider the application anew, in view of the current circumstances and consistent with this final order. Among other things that must be considered with respect to the pending University of Mississippi application, I note that the Commentary to the Single Convention states the following with respect to the exemption for “opium preparations” under Article 23, paragraph (e): “Opium-producing countries may thus authorize private manufacture of, and private international and domestic wholesale trade in, medicinal opium and opium preparations. *The opium other than medicinal opium needed for such manufacture must however be procured from the national opium agency.*” Commentary at 284 (emphasis added). Whether the University of Mississippi’s proposed registration would be consistent with this aspect of the treaty has not yet been determined by DEA and is not the subject of this adjudication.

74 FR at 2118 n.61 (emphasis in original; citations omitted).

When viewing the foregoing statements from the Final Order in juxtaposition with Respondent’s latest assertions regarding the National Center, two points should be considered. First, the above statements reflect that as part of the 1999 MOA with the National Center, DEA insisted—as it has in Respondent’s case—on adherence to the principle under the Single Convention of prohibiting private trading in cannabis. The National Center has never been permitted to distribute marijuana to any persons except upon the specific instructions of NIDA through the system described above. Second, contrary to Respondent’s assertion, DEA has never taken the position that “marijuana grown for any purpose other than to supply NIDA-approved research would violate the Convention.” Rather, as just noted, DEA has consistently taken the position that, in accordance with the Single Convention, the Government must maintain a monopoly on the wholesale distribution of cannabis.

One other argument made by Respondent in his latest submission warrants a brief response. Respondent

repeatedly makes erroneous assertions about the legal and factual circumstances surrounding his application, then denounces the situation as a “catch-22.” For example, on page 17 of his latest submission, Respondent describes the following as a “catch-22”: “Medical marijuana does not exist, according to DEA, unless it is an FDA-approved medicine, but Dr. Craker’s license to supply marijuana for the research necessary to test such a medicine and secure FDA approval cannot be granted because medical marijuana does not exist.” In fact, not only DEA, but also the United States Supreme Court, interpreting the text of the CSA, has stated—*unanimously*—that marijuana is not medicine. In *United States v. Oakland Cannabis Buyers’ Cooperative*, 532 U.S. 483, 491 (2001), the Court stated: “[F]or purposes of the [CSA], marijuana has ‘no currently accepted medical use’ at all.” Moreover, Respondent, in denouncing the notion that marijuana must gain FDA-approval to be considered medicine, is objecting to what has been a cornerstone of the FDCA for 50 years—that a drug may not be marketed as medicine in this country unless the FDA has determined, based on submissions of scientific evidence established in clinical trials, that the drug is safe and effective for the treatment of a disease or condition. As for Respondent’s contention that marijuana research cannot go forward unless he becomes registered to grow marijuana, as explained above in section A., this is flatly refuted by the fact that HHS and DEA authorized 17 of the last 17 marijuana research proposals submitted by CMCR—all of which were aimed at establishing a scientific foundation for the FDA approval of marijuana. Thus, Respondent’s use of the term “catch-22” is empty rhetoric.

C. Respondent’s Arguments Relating to the Involvement of Rick Doblin in Respondent’s Proposed Activities

Respondent also seeks reconsideration of my determinations in the Final Order relating the involvement of Rick Doblin in Respondent’s application and proposed activities. Again, in the exercise of my discretion, I have considered Respondent’s post-hearing submissions as to this issue, even though they do not arise out of the taking of official notice of any fact.

To briefly recap, the Final Order listed the various ways in which Mr. Doblin was involved in Respondent’s application process and how Mr. Doblin would have a role in Respondent’s activities if the application were

granted. 74 FR at 2126. The Final Order then stated:

In short, Mr. Doblin has mapped out and assisted in most acts, if not every act, that Respondent has taken toward applying for a registration to manufacture marijuana and, if the registration were granted, Mr. Doblin would continue to maintain responsibility for managing and monitoring the activities of the registrant. Given this level of involvement by Mr. Doblin—and the passive, if not subservient, nature of Respondent’s involvement—it is appropriate under factor six to consider the following conduct by Mr. Doblin relating to controlled substances. First, Mr. Doblin admits that he smokes marijuana for “recreational use” on a weekly basis. Thus, Mr. Doblin violates federal and state laws relating to controlled substances on a weekly basis. This demonstrates that Mr. Doblin has disregard for the controlled substances laws. It is simply inconceivable that DEA would—consistent with its obligations under the CSA—grant a registration to engage in certain activities involving controlled substances where it is clear that a person who will have *any* role in the oversight and management of such activities routinely engages in the illegal use of controlled substances. It is still more untenable where that person has the level of oversight and management that Mr. Doblin would have—and where the controlled substance he illegally uses is the very controlled substance the applicant seeks to produce. Indeed, it is remarkable that Mr. Doblin would—given his admitted illegal involvement in controlled substances—ask DEA to effectively grant him permission to take on such a prominent role in the manufacture of the most widely abused illegal controlled substance in the United States.

Id. (emphasis in original; citations and footnotes omitted).

In his latest submission, Respondent points out that in the Final Order, under the fifth public interest factor (21 U.S.C. 823(a)(5)), I concluded that if the registration were granted, Respondent would have in the establishment (*i.e.*, in his growing facility) effective controls against diversion. 74 FR 2125–26. Respondent contends that this conclusion precludes me from concluding under the sixth public interest factor (21 U.S.C. 823(a)(6)) that Mr. Doblin’s involvement in Respondent’s activity weighs against granting his application.

It is plain when comparing the text of factor five with that of factor six that a favorable finding with respect to factor five does not preclude an unfavorable finding under factor six. As explained in the Final Order, under public interest factor five, “the existence in the establishment of effective control against diversion” includes, among other considerations, appropriate physical security and employee screening as required by the DEA

regulations as confirmed through a DEA on-site inspection of the premises. 74 FR at 2128 (citing 21 CFR 1310.71–1301.93). Factor six, in contrast, is a catchall category that is designed to give DEA wide latitude to consider all evidence that might reasonably bear on the suitability of an applicant for registration. In other words, even if a registrant has promised to undertake security procedures sufficient to obtain a favorable finding under factor five, if other evidence (not covered by factors one through five) casts doubt on whether the applicant can be entrusted with the responsibility of a DEA manufacturing registration, such evidence may be considered under factor six.

Consider, for example, if a person were seeking to become registered as a manufacturer of oxycodone, and the applicant promised to install and maintain in the facility all the physical security measures and employee screening procedures required by the regulations. Assume further that evidence came to light that the main investor in the facility, who planned to make the decisions as to how the facility would distribute oxycodone, admitted that he obtains oxycodone illegally and uses it for “recreational” purposes on a weekly basis. In such circumstances, it would certainly be appropriate for DEA to draw an adverse inference under factor six based on such person’s illicit activity involving oxycodone—regardless of whether the applicant made assurances that it would comply with the security regulations. Thus, I cannot adopt Respondent’s suggestion that Mr. Doblin’s regular marijuana use should be ignored as a factor relevant to his application.

Nonetheless, it bears repeating that the ultimate decision in this matter did not turn on consideration of Mr. Doblin’s marijuana activity. As stated in the Final Order, two other independent grounds existed for denying the application and, therefore, the same result would have been reached had I determined that Mr. Doblin’s marijuana activity were irrelevant.

To be clear, if I determined that the proposed registration were consistent with United States obligations under the Single Convention and further that the supply of marijuana available to researchers in the United States were inadequate within the meaning of 21 U.S.C. 823(a)(1), it is conceivable that arrangements could have been made to mitigate the concerns regarding Mr. Doblin’s marijuana activity. For example, under a conditional grant of registration or memorandum of agreement, sufficient terms perhaps

could have been imposed to ensure that Mr. Doblin would not be allowed to have access to the growing facility and would have no role in any decision making relating to management of the facility or the distribution of marijuana. However, consideration of such an approach was not feasible here given the other grounds for denying the application.

IV. Conclusion

For the foregoing reasons, Respondent’s motion for reconsideration is hereby denied. The administrative record is modified as indicated herein and in my December 2, 2010, order. The January 14, 2009, Final Order, as supplemented by this order, is effective on September 7, 2011.

Dated: August 8, 2011.

Michele M. Leonhart,
Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Joe C. Fermo, M.D.; Revocation of Registration

On September 30, 2009, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, issued an Order to Show Cause to Joe C. Fermo, M.D. (Registrant), of Tulsa, Oklahoma. The Show Cause Order proposed the revocation of Registrant’s DEA Certificate of Registration, BF7430781, as well as the denial of any pending applications to renew or modify his registration, on the ground that his “continued registration would be inconsistent with the public interest.” Show Cause Order at 1 (citing 21 U.S.C. 823(f) and 824(a)(4)).

The Show Cause Order specifically alleged that on February 23, 1990, Registrant was convicted in the District Court for Oklahoma County, State of Oklahoma, of ten counts of submitting false claims to the Oklahoma Department of Human Services in violation of Oklahoma law, and that on June 20, 1990, the United States Department of Health and Human Services excluded him from participating in federal health care programs under 42 U.S.C. 1320a–7(a). *Id.* at 1–2. The Order further alleged that based on his convictions, on June 21, 1990, the Oklahoma State Board of Medical Licensure placed his medical license on probation and that Registrant materially falsified three separate

applications (in 1991, 1994, and 1997) to renew his DEA registration by failing to disclose the state board’s action. *Id.* at 2 (citing 21 U.S.C. 824(a)(1)).¹

Finally, the Show Cause Order alleged that on August 27, September 24, and September 26, 2007, an undercover officer had obtained prescriptions from Registrant for alprazolam (at all three visits) and propoxyphene (at the first two visits), both of which are schedule IV controlled substances. *Id.* The Order further alleged that these prescriptions lacked a legitimate medical purpose and were issued outside of the usual course of professional practice in violation of Federal and State laws. *Id.* (citing 21 CFR 1306.04 and Okla. Admin. Code 475.30–1–3(a)).

On or about October 5, 2009, the Show Cause Order, which also notified Registrant of his right to either request a hearing on the allegations or to submit a written statement in lieu of a hearing, the procedures for doing so, and the consequence if he failed to do so, was served on Registrant by certified mail addressed to him at the address of his registered location. *Id.* at 2–3 (citing 21 CFR 1301.43). Since service of the Show Cause Order, more than thirty days have now passed and neither Registrant, nor anyone purporting to represent him, has either requested a hearing or submitted a written statement in lieu of a hearing. *See* 21 CFR 1301.43(b)–(d). Accordingly, I find that Registrant has waived his rights to a hearing or to submit a written statement. *Id.* 1301.43(d). I therefore issue this Decision and Final Order without a hearing based on relevant evidence contained in the investigative record submitted by the Government.

Findings

Registrant is the holder of DEA Certificate of Registration, BF7430781, which authorizes him to dispense controlled substances in schedules II through V as a practitioner at the registered location of 5970 E. 31 St., Suite O, Tulsa, Oklahoma. While his registration was to expire on September 30, 2010, on August 13, 2010, Registrant filed a renewal application. In accordance with the Administrative Procedure Act and DEA regulations, I find that Registrant’s registration remains in effect pending the issuance

¹ The Show Cause Order alleged that in March 2001, Registrant and DEA entered into a Memorandum of Agreement (MOA) which settled a Show Cause Proceeding filed in April 2000 based on the allegations described above. Show Cause Order at 2. The Show Cause Order also alleged that under the MOA, Registrant surrendered his registration and was allowed to reapply no earlier than March 2004, and that in October 2004, DEA issued him a new registration. *Id.*

of this Final Order. See 5 U.S.C. 558(c); 21 CFR 1301.36(i).

On August 27, 2007, an Agent with the Oklahoma Bureau of Narcotics went to Registrant's office to perform an undercover visit with Merli Fermo, M.D., Registrant's wife, who was also a DEA registrant.² Upon meeting the receptionist, to whom she paid \$65, the Agent was told that she would have to wait one hour to see Merli Fermo and was asked if she wanted to see Registrant, who was available immediately. The Agent agreed and was taken to his office.

After the Agent and Registrant discussed the former's having spent some time in Minnesota and why she had returned to Oklahoma, who she lived with, how she was supporting herself, and her address, Registrant asked the Agent: "So what do you want me to put you on?" The Agent replied: "I've been on Xanax. Two milligrams." Registrant then asked the Agent if she had "been on it for a while?" The Agent replied that she had been, that she had "continued it when" she had gone to Minnesota, and had gotten it "from a doctor up there."

Registrant then asked: "You're taking Xanax three times a day?"; the Agent replied "four times a day." Registrant responded: "It says three times a day," to which the Agent said, "I know but it was increased up there." Registrant then told the Agent to "take it two times a day. Two milligrams." The Agent asked: "So I'm only get[ing] it two times a day?" Registrant replied affirmatively and asked, "What else are you taking?" The Agent answered: "I was taking Darvocet too."

Registrant then asked "are you having some pain?" The Agent replied: "Oh, every once in a while." Registrant told the Agent to "[t]ake it two times a day and I'll give you a hundred"; the Agent replied: "Okay. I wish you'd give me the four on this Xanax though." After several comments which were unintelligible, Registrant and the Agent discussed how far the latter had lived from Minneapolis, whether the Agent went there much when she lived in Minnesota, and Registrant's having previously lived in the Minneapolis area. Before the visit ended, Registrant gave the Agent prescriptions for 100 Xanax (alprazolam) 2 mg and 100 Darvocet-N (propoxyphene) 100 mg, both of which are schedule IV controlled substances, see 21 CFR 1308.14(b), (c), as well as Celera, a non-controlled anti-depressant.

On September 24, 2007, the Agent returned to Registrant's office and paid

the receptionist \$65. While the Agent was scheduled to see Registrant's wife, when informed that the latter was not available, she agreed to see Registrant, and after a short wait, was taken to his office.

Registrant asked the Agent how she was doing; she replied "great." Registrant then asked "what's going on with you?" The Agent answered: "Not a thing. I wonder if I could get a hundred and twenty of the Xanax instead of a hundred?" Registrant asked why she wanted one hundred twenty; the Agent answered: "I ran out."³ Registrant then said: "No, not if you take it down * * * the way it is prescribed for you, you wouldn't run out." After the Agent said "I know," Registrant stated—in contrast to his instruction at the previous visit to take the Xanax twice a day—"Just take it three times a day, that's precisely why it's controlled because people have a tendency to (*Inaudible*) take it more than what's prescribed." Registrant then apparently warned the Agent that she could have seizures if she took more than what he prescribed "and then if you don't take it for some reason or another" and added "it's not good to be doing that."

After telling the Agent that she could take the Xanax "three times a day," Registrant asked her: "Do you still need the Darvocet?"; the Agent answered: "Yes." After a conversation about such subjects as how much social security the Agent was getting, what type of work she had previously done, her shopping habits, and whether she had a boyfriend, Registrant told the Agent to take the Celexa because it is an anti-depressant that works with Xanax and would help her to get going in the morning. After still more conversation about the Agent's social life, Registrant gave her new prescriptions for 100 Xanax 2 mg, 100 Darvocet-N 100 mg, and Celexa. Shortly thereafter, the visit ended.⁴

³ Based on the dosing instruction he gave the Agent at the initial visit, the Xanax should have lasted 50 days; the Agent was thus seeking the drug approximately three weeks early.

⁴ The Government also submitted a copy of the Information filed by the State of Oklahoma charging Registrant with ten counts of submitting false claims to the Oklahoma Department of Human Services; a "Deferred Sentence, Plea of Guilty, Summary of Facts" filed in the state court proceedings; a June 20, 1990, letter from the Office of Inspector General, U.S. Department of Health & Human Services, which excluded Registrant "from participation in the Medicare program and any State health program" for a period of fifteen years based on his state court convictions; and a Final Order of the Oklahoma State Board of Medical Licensure and Supervision (issued on June 21, 1990) which placed him on probation for four years and nine months based on his guilty plea in the state criminal proceeding.

Discussion

Section 304(a) of the Controlled Substances Act (CSA) provides that "[a] registration pursuant to section 823 of this title to * * * dispense a controlled substance * * * may be suspended or revoked by the Attorney General upon a finding that the registrant * * * has committed such acts as would render his registration under section 823 of this title inconsistent with the public interest as determined under such section." 21 U.S.C. 824(a)(4). In making the public interest determination in the case of a practitioner, Congress directed that the following factors be considered:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The applicant's experience in dispensing * * * controlled substances.

(3) The applicant's conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety. 21 U.S.C. 823(f).

"[T]hese factors are considered in the disjunctive." *Robert A. Leslie*, 68 FR 15227, 15230 (2003). I may rely on any one or a combination of factors and may give each factor the weight I deem appropriate in determining whether to revoke an existing registration or to deny an application. *Id.* Moreover, I am "not required to make findings as to all of the factors." *Hoxie v. DEA*, 419 F.3d 477, 482 (6th Cir. 2005); (citing *Morall v. DEA*, 412 F.3d 165, 173–74 (D.C. Cir. 2005)).

The Government did not, however, submit either the MOA, which Registrant entered into with DEA, or any of the applications which it alleged he had materially falsified. Instead, it submitted the MOA that DEA entered into with his wife and an affidavit of an Agency Investigator stating that he had "received information from" an Investigator in another office that Registrant's MOA "was identical" to his wife's. Affidavit of Diversion Investigator, at 1.

Even accepting this would establish that Registrant settled the Show Cause Proceeding on the same terms as his wife did, his wife's MOA merely stated that an April 21, 2000 Order to Show Cause "further alleged that on August 13, 1991, September 22, 1994, and again on August 28, 1997, the Respondent materially falsified her renewal applications by failing to disclose that the Board placed her medical license on probation in June 1990." MOA, at 2. Continuing, the MOA states: "The above matters, if proven at an administrative hearing, constitute grounds for revocation of the Respondent's DEA Certificate of Registration, and denial of her pending application for renewal of that registration." *Id.* Nowhere in the MOA did Registrant's wife admit to the material falsification allegation. Thus, even if Registrant's MOA imposed the same terms, it is clear that the Government has not proved the allegation that he materially falsified his 1991, 1994, and 1997 applications.

²Merli Fermo has since passed away.

In this matter, while I have considered all of the factors, I conclude that it is not necessary to make findings with respect to factors one (the recommendation of the state licensing board), three (registrant's conviction record) and five (such other conduct which may threaten public health and safety). I find that the Government's evidence with respect to Registrant's experience in dispensing controlled substances (factor two) and his compliance with applicable Federal and State laws related to the distribution and dispensing of controlled substances (factor four) makes out a *prima facie* case that Registrant has committed acts which render his registration "inconsistent with the public interest." 21 U.S.C. 823(f), 824(a)(4). I will therefore order that his registration be revoked and that his pending application to renew his registration be denied.

Factors Two and Four—Registrant's Experience in Dispensing Controlled Substances and Compliance With Applicable Laws Related to Controlled Substances

Under a longstanding DEA regulation, a prescription for a controlled substance is not "effective" unless it is "issued for a legitimate medical purpose by an individual practitioner acting in the usual course of his professional practice." 21 CFR 1306.04(a). This regulation further provides that "an order purporting to be a prescription issued not in the usual course of professional treatment * * * is not a prescription within the meaning and intent of [21 U.S.C. 829] and * * * the person issuing it, shall be subject to the penalties provided for violations of the provisions of law related to controlled substances." *Id.*; see also 21 U.S.C. 802(10) (defining the term "dispense" as meaning "to deliver a controlled substance to an ultimate user by, or pursuant to the lawful order of, a practitioner, including the prescribing and administering of a controlled substance") (emphasis added); Okla. Admin. Code 475:30-1-3(a) ("A prescription for a controlled dangerous substance to be effective must be issued for a legitimate medical purpose by a registered or otherwise authorized individual practitioner acting in the usual course of his/her professional practice.").

As the Supreme Court recently explained, "the [CSA's] prescription requirement * * * ensures patients use controlled substances under the supervision of a doctor so as to prevent addiction and recreational abuse. As a corollary, [it] also bars doctors from

peddling to patients who crave the drugs for those prohibited uses." *Gonzales v. Oregon*, 546 U.S. 243, 274 (2006) (citing *United States v. Moore*, 423 U.S. 122, 135, 143 (1975)).

Under the CSA, it is fundamental that a practitioner must establish and maintain a bonafide doctor-patient relationship in order to act "in the usual course of * * * professional practice" and to issue a prescription for a "legitimate medical purpose." *Laurence T. McKinney*, 73 FR 43260, 43265 n.22 (2008); see also *Moore*, 423 U.S. at 142-43 (noting that evidence established that physician "exceeded the bounds of 'professional practice,'" when "he gave inadequate physical examinations or none at all," "ignored the results of the tests he did make," and "took no precautions against * * * misuse and diversion"). The CSA generally looks to state law to determine whether a doctor and patient have established a bonafide doctor-patient relationship. See *Kamir Garcés-Mejías*, 72 FR 54931, 54935 (2007); *United Prescription Services, Inc.*, 72 FR 50397, 50407 (2007).⁵

Under the Oklahoma Board of Medical Licensure and Supervision's rule on the "[u]se of controlled substances for the management of chronic pain," "[a] medical history and physical examination must be obtained, evaluated and documented in the medical record." Okla. Admin. Code 435:10-7-11(1). Moreover, "[t]he medical record should document the nature and intensity of the pain, current and past treatments for pain, underlying or coexisting diseases or conditions, the effect of the pain on physical and psychological function and history of substance abuse." *Id.* The Oklahoma rule also requires, *inter alia*, that a "physician should discuss the risk and benefits of the use of controlled substances with the patient." *Id.* at 435:10-7-11(3).

⁵ However, on October 15, 2008, the President signed into law the Ryan Haight Online Pharmacy Consumer Protection Act of 2008, Public Law. 110-425, 122 Stat. 4820 (2008). Section 2 of the Act prohibits the dispensing of a prescription controlled substance "by means of the Internet without a valid prescription," and defines, in relevant part, the "[t]he term 'valid prescription' [to] mean[] a prescription that is issued for a legitimate medical purpose in the usual course of professional practice by * * * a practitioner who has conducted at least 1 in-person medical evaluation of the patient." 122 Stat. 4820 (codified at 21 U.S.C. 829(e)(1) & (2)). Section 2 further defines "[t]he term 'in-person medical evaluation' [to] mean[] a medical evaluation that is conducted with the patient in the physical presence of the practitioner, without regard to whether portions of the evaluation are conducted by other health professionals." *Id.* (codified at 21 U.S.C. 829(e)(2)(B)). These provisions do not, however, apply to Respondent's conduct.

As found above, on two occasions, Registrant prescribed Darvocet-N 100 mg., a drug which includes propoxyphene, a schedule IV narcotic controlled substance, as well as Xanax (alprazolam) to an OBN Agent acting in an undercover capacity. Notably, during the first visit, Registrant did not ask the Agent whether she had any medical complaints. Rather, after engaging in small talk and asking for her address, Registrant asked the Agent: "So what do you want me to put you on?" While the Agent stated Xanax 2 mg, and told her she had been getting it from another doctor, Registrant did not even ask her if she had anxiety.

Moreover, Registrant then asked the Agent: "what else are you taking?" After the Agent replied that she "was taking Darvocet too," Registrant asked: "I think, are you having some pain?" While the Agent replied: "[e]very once in a while," Registrant did not ask the Agent any questions regarding "the nature and intensity of the pain," the "effect of the pain on [the Agent's] physical and psychological function," whether the Agent had been previously treated for pain, or whether she had a "history of substance abuse" as required under the Oklahoma rule. See Okla. Admin. Code 435:10-7-11(1). Moreover, while under the Oklahoma rule a physical examination must "be obtained," the transcript of the undercover visit contains no indication that Registrant performed a physical examination and developed a diagnosis. See *id.* I thus conclude that at the Agent's first visit, Registrant failed to establish a doctor-patient relationship with her. I further conclude that he lacked a legitimate medical purpose and acted outside of the usual course of professional practice in prescribing Xanax and Darvocet-N to her and thus violated Federal law. See 21 CFR 1306.04(a); 21 U.S.C. 841(a)(1).

The Xanax and Darvocet prescriptions Respondent gave the Agent at her second visit also violated Federal law. While at this visit, Registrant, after being told by the Agent (who was seeking an even larger quantity of the drug and was three weeks early in seeking the refill) that she had run out of Xanax, did discuss with her that she should not take more of the drug than he prescribed and explained that the drug is controlled "because people have a tendency to" take more than is prescribed, once again, he did not determine that the Agent had anxiety or another medical condition that might warrant a prescription for the drug.

Likewise, after telling the Agent to only take the Xanax three times per day, he then asked her if she "still need[ed]

the Darvocet?" The Agent answered "yes," but Registrant did not even ask her if she had pain, let alone ask her any questions regarding the nature and intensity of the pain, whether the Darvocet was helping to alleviate her pain, or how the pain was affecting her physical and psychological function. Accordingly, with respect to the Agent's second visit, I again conclude that Registrant failed to establish a doctor-patient relationship with her. I also conclude that Registrant lacked a legitimate medical purpose and acted outside of the usual course of professional practice in prescribing Xanax and Darvocet-N to her and violated Federal law. See 21 CFR 1306.04(a); 21 U.S.C. 841(a)(1).

As the forgoing demonstrates, Registrant has committed acts which "render his registration * * * inconsistent with the public interest." 21 U.S.C. 824(a)(4). I will therefore order that his registration be revoked and that any pending applications be denied.

Order

Pursuant to the authority vested in me by 21 U.S.C. 823(f) and 824(a), as well as by 28 CFR 0.100(b), I hereby order that DEA Certificate of Registration, BF7430781, issued to Joe C. Fermo, M.D., be, and it hereby is, revoked. I further order that any pending application of Joe C. Fermo, M.D., to renew or modify his registration be, and it hereby is, denied. This Order is effective September 19, 2011.

Dated: August 5, 2011.

Michele M. Leonhart,
Administrator.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Ideal Pharmacy Care, Inc., D/B/A Esplanade Pharmacy; Revocation of Registration

On November 12, 2010, I, the then Deputy Administrator of the Drug Enforcement Administration, issued an Order to Show Cause and Immediate Suspension of Registration to Ideal Pharmacy Care, Inc., d/b/a Esplanade Pharmacy (Registrant), of New Orleans, Louisiana. The Show Cause Order proposed the revocation of Registrant's DEA Certificate of Registration FF1125651, which authorizes it to dispense controlled substances in schedules II through V as a retail pharmacy, on the ground that it has

committed acts which render its registration "inconsistent with the public interest." Show Cause Order at 1 (citing 21 U.S.C. 824(a)(4)). The Show Cause Order also proposed the denial of any pending applications to renew or modify Registrant's registration. *Id.*

The Show Cause Order specifically alleged that on October 14, 2010, investigators conducted an accountability audit of Registrant and found that it had "significant shortages" of various controlled substances. *Id.* The Order alleged that these included shortages of: (1) 3,891 dosage units of hydrocodone 7.5/650 mg, 78 percent of the accountable total; (2) 27,179 dosage units of hydrocodone 7.5/750 mg, 59 percent of the accountable total; (3) 5,514 dosage units of hydrocodone 10/500 mg, 48 percent of the accountable total; (4) 114,826 dosage units of hydrocodone 10/650 mg, 96 percent of the accountable total; (5) 83,254 dosage units of alprazolam 2 mg, 96 percent of the accountable total; and (6) 1,616,420 ml of promethazine with codeine, 99 percent of the accountable total. *Id.* at 1-2. Based on the audit results, the Order alleged that the Registrant had violated 21 U.S.C. 827(a)(3) and 842(a)(5), as well as 21 CFR 1304.03, 1304.04, and 1304.21. *Id.* at 2.

Next, the Show Cause Order alleged that various distributors make deliveries of controlled substances to Registrant when it "is closed," and that the "deliveries are received and signed for by" non-employees who work "at the grocery store in which [it] is located," and that the deliveries are then "diverted in violation of 21 U.S.C. 843(a)(3)." *Id.* The Order thus alleged that Registrant "has failed to provide effective controls" against theft and diversion of controlled substances. *Id.* (citing 21 CFR 1301.71).

The Show Cause Order also alleged that Registrant had violated a Memorandum of Agreement (MOA) it entered into with DEA. *Id.* The Order alleged that in the MOA, Registrant agreed that it would not employ its former owners "in any capacity relating to [its] business," and that it would not permit its former owners to have "access to any area of [it] where controlled substances are kept, stored, or maintained." *Id.* The Order alleged that Registrant "has permitted [its former owners] to enter the pharmacy where controlled substances are present in violation of" the MOA and 21 CFR 1301.72(d). *Id.*

Based on the matters set forth above, I concluded that Registrant's continued registration during the pendency of the proceeding would constitute "an imminent danger to public health and

safety." *Id.* (citing 21 U.S.C. 824(d)). I, therefore, ordered the immediate suspension of Registrant's registration. *Id.*

On November 17, 2010, the Order to Show Cause and Immediate Suspension of Registration, which also notified Registrant of its right to request a hearing on the allegations or to submit a written statement in lieu of a hearing, the procedures for doing either, and the consequences for failing to do either, *id.* at 3 (citing 21 CFR 1301.43(a) & (c)), was personally served on Registrant's Pharmacist-in-Charge. GX 2. Since the date of service of the Order, more than thirty days have now passed, and neither Registrant, nor anyone purporting to represent it, has requested a hearing or submitted a written statement. Accordingly, I find that Registrant has waived its right to a hearing or to submit a written statement in lieu of a hearing. 21 CFR 1301.43(a), (c) & (d). I, therefore, issue this Decision and Final Order based on relevant material contained in the record submitted by the Government. 21 CFR 1301.43(e).

Findings

Registrant is the holder of DEA Certificate of Registration FI1125651, which authorizes it to dispense controlled substances in schedules II through V as a retail pharmacy, at the registered address of 1400 Esplanade Ave., New Orleans, Louisiana. Registrant's registration does not expire until November 30, 2011. Registrant is apparently located in a building which also contains a grocery store. Affidavit of DI, at 8 (GX 22).

On October 14, 2010, DEA Investigators conducted an audit of Registrant's handling of controlled substances. *Id.* at 9. The audit covered the period of October 22, 2008, on which date Registrant had no controlled substances on hand, through the beginning of business on October 14, 2010, at which time the closing inventory for the audit was taken. *Id.* According to the DI, she obtained invoices provided by Registrant's suppliers to determine the total amount of the controlled substances it had purchased during the audit period and was accountable for; the DI also obtained Registrant's records (including the prescriptions on file), as well as data from the state's prescription monitoring program showing the pharmacy's dispensings, and added the amount of its dispensings to the closing inventory to determine the total amount of each drug which it could account for. *Id.* Upon comparing the two amounts, the DI found that Registrant had large

shortages of six different drugs. These included:

1. A shortage of 3,891 dosage units of hydrocodone/apap 7.5/650 mg, which was 78 percent of the total amount for which it was accountable;

2. A shortage of 27,179 dosage units of hydrocodone/apap 7.5/750 mg, which was 59 percent of the total amount for which it was accountable;

3. A shortage of 5,514 dosage units of hydrocodone/apap 10/500 mg, which was 48 percent of the total amount for which it was accountable;

4. A shortage of 114,826 dosage units of hydrocodone/apap 10/650 mg, which was 96 percent of the total amount for which it was accountable;

5. A shortage of 83,254 dosage units of alprazolam 2 mg., which was also 96 percent of the total amount for which it was accountable; and

6. A shortage of 1,616,420 ml of promethazine with codeine, a shortage of 99 percent of the total amount for which it was accountable.

Id. at 9.

While pharmacy employees told the DI that they were the only persons who accepted controlled substance deliveries, based on the records obtained from one of Registrant's distributors, the DI determined that many of the shipments had been delivered on Saturdays, a day when the pharmacy was closed, and that a number of the shipments were signed for by non-pharmacy employees who worked in the grocery store. *Id.* at 7–8, 10. Moreover, while Registrant's employees had told the DI that McKesson was the only distributor it purchased controlled substances from, Registrant was also purchasing from ANDA and Smith Drug Company. *Id.* at 7–8.

Discussion

Section 304(a) of the Controlled Substances Act (CSA) provides that a registration to “dispense a controlled substance * * * may be suspended or revoked by the Attorney General upon a finding that the registrant * * * has committed such acts as would render [its] registration under section 823 of this title inconsistent with the public interest as determined under such section.” 21 U.S.C. 824(a)(4). In making the public interest determination, the CSA requires that the following factors be considered:

(1) The recommendation of the appropriate state licensing board or professional disciplinary authority.

(2) The applicant's experience in dispensing * * * controlled substances.

(3) The applicant's conviction record under Federal or State laws relating to the

manufacture, distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety.

21 U.S.C. 823(f).

These factors are considered in the disjunctive. *Robert A. Leslie, M.D.*, 68 FR 15227, 15230 (2003). I may rely on any one or a combination of factors, and I may give each factor the weight I deem appropriate in determining whether to revoke an existing registration. *Id.* Moreover, I am “not required to make findings as to all the factors.” *Hoxie v. DEA*, 419 F.3d 477, 482 (6th Cir. 2005); see also *Morall v. DEA*, 412 F.3d 165, 173–74 (D.C. Cir. 2005). The Government bears the burden of proof. 21 CFR 1316.56.

Having considered all of the factors, I conclude that the evidence pertinent to Registrant's compliance with applicable laws related to controlled substances (factor four) is dispositive and supports a finding that it has committed acts which render its registration “inconsistent with the public interest.” 21 U.S.C. 824(a)(4).

As found above, DIs conducted an audit of Registrant's handling of various controlled substances and found that it could not account for extraordinary quantities of four different formulations of hydrocodone, a schedule III controlled substance, and alprazolam 2 mg (generic for Xanax), a schedule IV controlled substance; both of these drugs are highly popular with drug abusers. See 21 CFR 1308.13(e); 13018.14(c). More specifically, approximately 150,000 dosage units of various hydrocodone drugs and 83,000 dosage units of alprazolam (96% of the amount purchased) were purchased by Registrant and could not be accounted for. In addition, 1.6 million mls of promethazine with codeine (99% of the amount purchased), another highly-abused controlled substance, was purchased by Registrant and could not be accounted for.

Pursuant to DEA regulations, all “registrants shall provide effective controls and procedures to guard against theft and diversion of controlled substances.” 21 CFR 1301.71(a). Among the factors DEA considers in assessing whether a registrant maintains effective controls against theft and diversion, is “[t]he adequacy of the registrant's * * * system for monitoring the receipt * * * distribution, and disposition of controlled substances in its operations.” *Id.* 1301.71(b)(14).

Moreover, under Federal law and DEA regulations, “every registrant

under this subchapter * * * distributing, or dispensing a controlled substance or substances shall maintain, on a current basis, a complete and accurate record of each such substance * * * received, sold, delivered, or otherwise disposed of by [it].” 21 U.S.C. 827(a)(3). See also 21 CFR 1304.03; 1304.04, 1304.21, 1304.22(c). A registrant is required to maintain these records for at least two years. *Id.* § 827(b) (“every inventory or other record required under this section * * * shall be kept and be available, for at least two years, for inspection and copying”). See also 21 CFR 1304.03 (“Each registrant shall maintain the records and inventories and shall file the reports required by this part, except as exempted by this section.”); *id.* § 1304.04 (mandating that records be maintained for at least two years and be available for inspection and copying). See also *Paul H. Volkman*, 73 FR 30630, 30644 (2008) (“Recordkeeping is one of the CSA's central features; a registrant's accurate and diligent adherence to this obligation is absolutely essential to protect against the diversion of controlled substances.”).

Whether the shortages are attributable to outright diversion by either pharmacy or store employees, theft, or the failure to maintain accurate records, does not matter. What is clear is that Registrant purchased several hundred thousand dosage units of highly abused controlled substances which cannot be accounted for and that it has committed acts which render its registration “inconsistent with the public interest.” 21 U.S.C. 824(a)(4). Accordingly, I will order that Registrant's registration be revoked and that any pending application be denied.¹

¹ On November 17, 2010, the Louisiana Board of Pharmacy issued an Active Suspension Notice to Registrant, which placed its Louisiana Pharmacy Permit in active suspension pending further proceedings. Thus, Registrant also no longer meets the CSA's requirement for holding a registration that it be “authorized to dispense * * * controlled substances under the laws of the State in which [it] practices.” 21 U.S.C. 823(f); see also *id.* § 824(a)(3) (authorizing revocation where registrant's “[s]tate license or registration [has been] suspended * * * by competent State authority and [registrant] is no longer authorized by State law to engage in the * * * dispensing of controlled substances”); *id.* § 802(21) (defining “[t]he term ‘practitioner’ [to] mean[] a * * * pharmacy * * * licensed, registered, or otherwise permitted, by the United States or the jurisdiction in which [it] practices * * * to dispense * * * a controlled substance in the course of professional practice”).

Registrant's loss of state authority thus provides an additional ground to revoke its registration. See *Bourne Pharmacy, Inc.*, 72 FR 18273, 18274 (2007). However, the State's suspension was not cited as a basis for Agency action in the Order to Show Cause (as it occurred five days after the latter was issued) and there are no pleadings establishing that the Agency subsequently gave notice of its intent to rely

Order

Pursuant to the authority vested in me by 21 U.S.C. 823(f) & 824(a), as well as 28 CFR 0.100(b), I order that DEA Certificate of Registration FI1125651, issued to Ideal Pharmacy Care, Inc., d/b/a/Esplanade Pharmacy, be, and it hereby is, revoked.

I further order that any pending application to renew or modify this registration, be, and it hereby is, denied.

Dated: August 5, 2011.

Michele M. Leonhart,

Administrator.

[FR Doc. 2011-21060 Filed 8-17-11; 8:45 am]

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE**Drug Enforcement Administration**

[Docket No. 10-2]

Surinder Dang, M.D.; Revocation of Registration

On August 31, 2009, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, issued an Order to Show Cause to Surinder Singh Dang, M.D. ("Respondent"), of Fountain Valley, California. The Order proposed the revocation of Respondent's DEA Certificate of Registration, AD6122143, as a practitioner, as well as the denial of any pending applications to renew or modify his registration "for reason that [Respondent's] continued registration[] would be inconsistent with the public interest, as that term is used in 21 U.S.C. 823(f) and 824(a)(4)." ALJ Ex.1, at 1.

The Order specifically alleged that between January 2004 and July 2007, Respondent and his wife, Dr. Satinder Dang, "who also possesses a DEA registration and shares [Respondent's] registered location," ordered "more than 5,000,000 dosage units of hydrocodone" and that Respondent "failed to properly account for, secure, and otherwise handle these controlled substances." *Id.* The Order alleged that on January 17, 2006, one of Respondent's "employees removed 30,000 dosage units of controlled substances" from his registered location and "attempted to take them to her residence." *Id.* The Order further alleged that on the same day, "DEA Special Agents seized another 10,000 dosage units of controlled substances from this employee's residence." *Id.* at 1-2. Continuing, the Order alleged that on March 16, 2006, "DEA Special Agents

seized 50,000 dosage units more from this employee's residence." *Id.* at 2.

Next, the Order alleged that on March 16, 2006, DEA conducted an accountability audit of Respondent's handling of hydrocodone and that Respondent "could not account for more than 3,500,000 dosage units" that Respondent and his wife "had ordered," and that Respondent "failed to keep accurate and complete records of each controlled substance received, sold, delivered, or otherwise disposed of as required by 21 U.S.C. 827(c) and 21 CFR 1304.01 *et seq.*" *Id.* Finally, the Order alleged that when Respondent "made dispensing records," he "frequently failed to indicate whether" he or his wife "actually dispensed the controlled substances as required by 21 CFR 1304.03(b)." ¹ *Id.*

By letter of October 2, 2009, Respondent, through his counsel, requested a hearing on the allegations. ALJ Ex. 2. The matter was then assigned to an Administrative Law Judge (ALJ), who conducted a hearing on March 3, 2010, in Santa Ana, California.

At the hearing, the Government called one witness to testify and introduced documentary evidence. Respondent did not call any witnesses and introduced a single exhibit, this being a letter from the counsel for Respondent's employee R.K. stating that she intended to assert her Fifth Amendment privilege if called to testify. *See* RX 1. Following the hearing, both parties submitted briefs containing their proposed findings of fact, conclusions of law and argument.

On May 19, 2010, the ALJ issued her Recommended Decision (also ALJ). Therein, the ALJ considered the five public interest factors, *see* 21 U.S.C. 823(f), and concluded that Respondent's continued registration would be inconsistent with the public interest and recommended that his registration be revoked. ALJ at 26, 30-31.

As to the first factor—the recommendation of the appropriate State licensing board or professional disciplinary authority—the ALJ found that the California Medical Board "has not taken any formal action to limit Respondent's right to practice medicine nor has it recommended limiting his ability to prescribe controlled substances." *Id.* at 23. However, the ALJ recognized that under Agency precedent "the fact that the Medical Board of California has currently authorized * * * Respondent to practice medicine is not dispositive in this administrative determination as to whether continuation of a registration is consistent with the public interest." ALJ at 22-23 (citing *Patrick W. Stodola*, 74 FR 20727, 20730 (2009); *Jayam Krishna-*

Iyer, 74 FR 459, 461 (2009)). The ALJ thus concluded that "this factor does not fall in favor of revocation." *Id.* at 23. Likewise, with respect to factor three—Respondent's record of convictions for offenses relating to the manufacture, distribution, or dispensing of controlled substances—the ALJ found that Respondent has not been convicted of such an offense and that this factor also did not "fall in favor of revocation." *Id.*

The ALJ then considered factors two and four—Respondent's experience in dispensing controlled substances and his compliance with Federal, State, and local laws relating to controlled substances—together. *Id.* at 23-26. The ALJ specifically found that: (1) "Respondent authorized" his employee R.K. "to purchase large amounts of hydrocodone using his DEA registration and that of his wife"; (2) another physician who practiced at Respondent's clinic had "stated that the patient load" at the clinic "would not justify such large purchases of controlled substances"; (3) R.K. remained in Respondent's employ even after "drugs were discovered in [her] personal vehicle by the California Highway Patrol"; (4) "[l]arge bundles of cash, controlled substances, and other * * * evidence, such as receipts and money order stubs were discovered at [her] home"; and (5) "[a]fter being questioned, [R.K.] stated that she was ordering and transporting controlled substances all at the direction of the Respondent." *Id.* at 24. Based on these findings, the ALJ concluded that "either [Respondent] is personally involved in hydrocodone diversion or he is facilitating such diversion on the part of his employee." *Id.*

The ALJ further found that Respondent "prescribed Vicodin," a schedule III controlled substance, to patient B.R. "on many occasions without a thorough examination." *Id.* Based on Cal. Bus. & Prof. Code § 2242(a), which provides that it is "unprofessional conduct" to "[p]rescrib[e], dispens[e] or furnish[] dangerous drugs as defined in Section 4022 without an appropriate prior examination and a medical indication," the ALJ concluded that Respondent prescribed Vicodin to B.R. without an "appropriate prior examination." *Id.* at 25. The ALJ thus concluded that Respondent "prescribed controlled substances without establishing a bona-fide patient relationship" and violated both Federal and state law. *Id.* at 24-25.

Next, the ALJ found that Respondent did not have any inventories for the controlled substances his clinic dispensed, that he "failed to maintain accurate records of the controlled

on the State's suspension. *See* 5 U.S.C. 554(b). I therefore do not rely on it.

substances he dispensed,” and that an audit could not account for “almost four million dosage units of hydrocodone.” *Id.* at 26. The ALJ thus concluded that Respondent “violated federal regulations by not conducting a biennial inventory and maintaining the appropriate records of his controlled substances.” *Id.* The ALJ further held that the Government’s evidence under factors two and four “established prima facie grounds for revocation of * * * Respondent’s DEA Certificate of Registration.” *Id.*

Turning to factor five—other conduct which may threaten the public health and safety—the ALJ found “it likely that * * * Respondent is engaged in the illegal diversion of hydrocodone.” *Id.* As support for her conclusion, the ALJ noted her findings that Respondent “was involved in the ordering of the hydrocodone,” that “[h]is colleagues stated that his practice did not justify such exorbitant purchases,” his inability “to account for the whereabouts of the controlled substances,” and the “circumstances,” which she did not further specify, “surrounding [the DEA Group Supervisor’s] investigations.” *Id.* According to the ALJ, these facts “suggest[ed] that * * * Respondent is at least recklessly, if not intentionally, contributing to this illegal diversion.” *Id.*

The ALJ further explained that “[e]ven if Respondent did not commit the above violations of Federal law and DEA regulations,” she would still find that he had “committed acts which constitute ‘conduct which may threaten the public health and safety’ and which render his registration ‘inconsistent with the public interest.’” *Id.* (quoting 21 U.S.C. 823(f)(5) & 824(a)(4)). Noting that “[u]nder DEA precedent, a registrant who entrusts his registration to another person is strictly liable for the latter’s misuse of his registration,” the ALJ reasoned that “even if there had been no conspiracy between Respondent and [R.K.] to unlawfully distribute the drugs, he would still be liable for the acts she committed while being allowed to use his registration.” ALJ at 26–27 (citations omitted). The ALJ concluded that “Respondent is thus liable for [R.K.’s] acts of unlawful possession and distribution of the controlled substances that she obtained under his registration.” *Id.* (citations omitted).

The ALJ then addressed whether Respondent had rebutted the

² The ALJ also rejected Respondent’s argument that R.K. had stolen the drugs, noting that as of the hearing, she was still an employee. *Id.* at 27 (citations omitted).

Government’s *prima facie* case. ALJ at 29–30. The ALJ found that “Respondent has not admitted any fault whatsoever,” but rather “has merely pointed an accusing finger at his employee.” *Id.* at 30. Noting that Respondent did not testify in the proceeding, the ALJ concluded that “[t]he fact that the Respondent has chosen not to hold himself accountable for his own indiscretions weighs heavily against his continued registration.” *Id.* While the ALJ further considered facts she deemed favorable to Respondent, she nonetheless concluded that “none of these factors outweigh the overwhelming security violations and evidence of diversion,” which she deemed to be “egregious.” *Id.* at 31. The ALJ therefore recommended that I revoke Respondent’s registration. *Id.*

Neither party filed exceptions to the ALJ’s decision. Thereafter, the record was forwarded to me for Final Agency Action. Having considered the entire record, I adopt the ALJ’s findings of fact and conclusions of law except as expressly noted herein. I further adopt the ALJ’s ultimate conclusion that Respondent’s “continued registration is not in the public interest,” *id.* at 30, and her recommendation that his registration be revoked. As ultimate factfinder, I make the following findings:

Findings

Respondent is the holder of DEA Certificate of Registration, AD6122143, which authorizes him to dispense controlled substances in schedules II through V, as a practitioner, at the registered location of 17150 Euclid #200, Fountain Valley, California. GX 1. While Respondent’s registration was to expire on June 30, 2009, *Id.*, on May 13, 2009, Respondent filed an application to renew his registration. GX 2. Accordingly, his registration remains in effect pending the issuance of this Decision and Final Order. 5 U.S.C. 558(c); *see also* ALJ Ex. 3, at 2 (Prehearing Order; Stipulations).

Respondent currently holds a license to practice medicine in California and the California Medical Board has not taken any formal action to limit his ability to practice medicine or to prescribe controlled substances. ALJ Ex. 3, at 3. Also, Respondent has not been convicted of an offense related to the manufacture, distribution, or dispensing of controlled substances. *Id.*

Respondent is married to Satinder Dang, M.D.³ She and Respondent

³ Dr. Satinder Dang holds DEA Certificate of Registration, AD9234446; she is registered at the same address as Respondent. ALJ Ex. 3, at 2

practice medicine at Complete Medical Care, Inc. (“CMC”). Tr. 41; GX 6, at 20. Their son, Sameer Dang, also works in the CMC office. Tr. 51. At all relevant times (including through the date of the hearing) CMC’s office manager was Ms. Rani K.⁴ (R.K.). *Id.* at 26, 164.

In November 2005, a Diversion Group Supervisor (GS) in DEA’s Riverside Diversion Group reviewed ARCOS⁵ records and found that Respondent was the largest purchaser of controlled substances from Anda Pharmaceuticals, Inc. (“Anda”). Tr. 21. The GS also determined that Respondent was buying controlled substances “from other companies too.” *Id.*

Of particular concern to the GS were Respondent’s purchases of hydrocodone, a schedule III controlled substance. Tr. 22; 21 CFR 1308.13(e)(iv). According to ARCOS records, while in 2004, Respondent purchased 190,600 tablets of hydrocodone from all suppliers, in 2005, he purchased 1,353,600 such tablets. Tr. 24; GX 4, at 2–6. ARCOS data further showed that in 2005, Respondent and his wife had ordered a combined total of 3,626,400 tablets of hydrocodone. GX 3, at 13; GX 4, at 6; *see also* Tr. 121, 124 (GS’s testimony that between January 1, 2005 and March 16, 2006, Respondent and his wife purchased approximately four million tablets of hydrocodone).

Upon reviewing the ARCOS data, the GS contacted several of the firms that were distributing controlled substances to Respondent. *See, e.g.*, GX 6, at 7. At several points throughout the investigation, these firms provided copies of various documents to the GS including sales records, invoices, statements of account, delivery records, applications for credit, and correspondence.⁶ *See generally* GX 5 (records from Moore Medical, L.L.C.), GX 6 (record from Henry Schein, Inc.), GX 9 (records from ParMed Pharmaceuticals, Inc.).

Throughout the investigation, several of the firms also provided the GS with information regarding when various deliveries were to be made to Respondent’s clinic. On December 14, 2005, the GS, who had received information from two different distributors (Henderson and Moore Medical) that controlled substances

⁴ R.K.’s first name is spelled as both Rani and Roni in various documents.

⁵ Pursuant to 21 CFR 1304.33(c), manufacturers and distributors of various controlled substances including schedule III narcotics are required to report their distributions of controlled substances to DEA through the Automated Records and Consolidated Orders System (ARCOS). *See also* Tr. 21–22.

⁶ Some of the documents may have been obtained pursuant to a search warrant.

deliveries were to be made that day, conducted "surveillance at the [Dangs's] clinic" from 9 a.m. to 6 p.m. Tr. 39–42. During the surveillance, the GS observed both deliveries and noted that "no more than ten or fifteen" people entered the clinic that day. *Id.* at 41–42.

On January 13, 2006, from "[m]orning till late afternoon," the GS conducted a second surveillance. *Id.* at 42. During the surveillance, the GS saw Ms. R.K. "taking boxes out of the clinic and plac[ing] them in her vehicle," which was "a green SUV." *Id.* at 42–43.

On January 17, 2006, from 9 a.m. to 6 p.m., the GS, who had received notice of a controlled substance delivery from another distributor (ParMed Pharmaceuticals, Inc.), conducted another surveillance. *Id.* at 43. Once again, Investigators observed R.K. "tak[e] boxes from the clinic" and place them in "her vehicle." *Id.* at 44. The GS observed R.K. drive away and notified the California Highway Patrol (CHP). *Id.* at 44–45. After observing R.K., who was driving forty miles per hour, operate her vehicle within five feet of the vehicle in front of her, a CHP officer conducted a traffic stop. *Id.* at 45; GX 10 at 2.

As he approached R.K., the CHP officer observed "cardboard boxes that were taped shut in the rear cargo area." GX 10, at 2. The CHP officer advised R.K. of the reason for the stop and requested her license, registration, and insurance. *Id.* He then asked R.K. "what the boxes were." *Id.* R.K. stated that the boxes held Vicodin, a schedule III controlled substance which contains hydrocodone. *Id.*; ALJ Ex. 3, at 1. When the CHP officer asked R.K. if she was a doctor, she stated that "she was the president of a medical facility and that she was going to give the Vicodin to the doctor at her facility." GX 10, at 2. The CHP Officer asked her a second time if she was a doctor; R.K. again said "no" and became "extremely nervous." *Id.*

After the CHP Officer asked R.K. to step out of her car, he asked "why she had cases of Vicodin." *Id.* She responded that she ran a medical office and handed him a business card listing her name as R.K. and her position as "president." *Id.* R.K. further stated that "she received a delivery of Vicodin from a delivery company at about 1100 hours and that she needed to give it to" Respondent. *Id.* When the Officer asked R.K. if the Vicodin had been delivered "to her car or to her office," R.K. stated that it had been delivered to the office. *Id.* When the Officer asked if her office had a locker in which to store the Vicodin, R.K. answered "yes," but added that she had to personally give the drugs to Respondent. *Id.*

The CHP Officer then asked how the Vicodin had ended up in her vehicle, R.K. stated that "she [had] carried the boxes to her vehicle around noon time and left them there," and that she had stayed in her office until about 5 p.m., at which point "she left * * * to get something to eat." *Id.* When the Officer told R.K. that he was "concerned that she was in possession of so much of a controlled substance," R.K. said she would return it to the office. *Id.* R.K. then stated that Respondent was "doing a procedure at an unknown hospital and he would be returning at an unknown time to the office" and that she would then give him the Vicodin. *Id.*

The CHP Officer then "asked R.K. to open the boxes" to confirm that they contained Vicodin. *Id.* R.K. opened six boxes containing a total of 70 bottles of hydrocodone bitartrate/acetaminophen (hereinafter, hydrocodone/apap or hydrocodone). *Id.* at 2–3. Each of the bottles contained between 100 and 500 tablets (for a total of "approximately 31,000 tablets") in 7.5/500 mg, 10/500 mg, and 10/325 mg strengths. *Id.* The Officer then seized the Vicodin and gave R.K. a receipt for it. *Id.* After giving R.K. a citation, the officer allowed her to leave. *Id.* at 3.

The CHP Officer then contacted a DEA Task Force Officer (TFO) and arranged to transfer custody of the drugs to DEA; upon the TFO's arrival at the Officer's location, the TFO took possession of the drugs. *Id.* The TFO gave the CHP Officer a receipt which confirms the figures in the latter's report.⁷ *Id.* at 6.

R.K. then drove to her residence in Anaheim Hills; Investigators followed her there in order to question her about the drugs that were found in her vehicle. Tr. 47. R.K. told the Investigators that she had taken the hydrocodone with her for safekeeping because Respondent was out of the office; she also maintained that she intended to return them to the office after she ate. *Id.* at 47–48. While R.K. initially claimed that this was the first time she had done this, upon being confronted with the fact that Investigators had on another occasion observed her placing boxes in her vehicle, she admitted that this was the second time she had done so. *Id.* at 48.

R.K. stated that there were about five physicians who worked at Respondent's clinic, that they dispensed the pills in 30 and 60-count bottles, and that the

clinic had approximately twenty to twenty-five patients per day. *Id.* R.K. further said that she used her personal credit card to purchase drugs from wholesalers and that Respondent would reimburse her with cash. *Id.* at 49. R.K. would then obtain money orders to pay off her credit card bills. *Id.*

The Investigators then asked R.K. if she would consent to a search of her residence; she agreed. *Id.* at 49–50. According to the GS, the Investigators found approximately \$69,500 in cash in an upstairs closet, which was "wrapped up in paper"; a "small quantity of drugs," which included 2000 lorazepam tablets and 1400 hydrocodone tablets; "a lot of money order stubs"; "some bank records"; and "[s]ome credit card information." *Id.* at 50, 113, 117. The GS testified that these records confirmed that R.K. paid her credit card bills with money orders. *Id.* at 50. However, on cross-examination, the GS acknowledged that he had no documentary evidence to substantiate R.K.'s assertion that Respondent reimbursed her in cash. *Id.* at 146. To explain the cash, R.K. claimed the sum was a combination of money she received from the sale of a house in India, a home-based business she had previously run, and a gift from relatives. *Id.* at 51, 142.

On cross-examination, the GS acknowledged that the amount of drugs found at R.K.'s residence could indicate she was stealing drugs from Respondent's clinic. *Id.* at 116. The GS further testified that at the time of the search, the street value of hydrocodone tablets was between three and five dollars per pill. *Id.* at 132.

On February 7, 2006, the GS obtained notice of another delivery of controlled substances and conducted another surveillance. *Id.* at 51–52. While on this date, UPS made a delivery, nothing was moved out of CMC. *Id.* at 52.

On February 24, 2006, Respondent wrote a letter to CHP requesting the return of the hydrocodone which had been seized during the traffic stop of R.K. Tr. 52–53; GX 12. The letter stated that R.K. was Respondent's "office manager," and that she had "informed CHP that the property was not hers, and instead belonged to her employer, Complete Medical Care Inc." GX 12.

On March 16, 2006, DEA executed search warrants at both Respondent's clinic and R.K.'s residence. Tr. 61, 67–68, 70. At the clinic, the Investigators took an inventory of the controlled substances on hand and found 48,000 tablets of hydrocodone, which they seized; the Investigators also seized CMC's controlled substance purchasing records and dispensing log. *Id.* at 94.

⁷ More specifically, there were 14 bottles of 500 count of hydrocodone/apap 7.5/500 mg, 10 bottles of 500 count hydrocodone/apap 10/500 mg, 36 bottles of 500 count hydrocodone/apap 10/325 mg, and 10 bottles of 100 count hydrocodone/apap 10/500 mg. GX 10, at 6.

During the search of the clinic, Respondent declined to be interviewed.⁸ Tr. 68.

The Investigators did, however, interview four of Respondent's employees and a patient who was present. A.N. had been a medical assistant at CMC since 1992; her duties involved taking patients to the examination room. *Id.* at 86–87. A.N. told the Investigators that R.K. inventoried the drugs when they arrived at CMC and also maintained the dispensing log. *Id.* at 89–91. She also stated that the dispensings to patients were noted in the patient records and identified the handwriting in the dispensing log as R.K.'s. *Id.* at 89, 91–92.

K.G. had been a medical assistant at CMC for seven months; her duties included taking patients' blood pressure, drawing blood, and performing other tests. *Id.* at 92–93. K.G. stated that both R.K. and Respondent ordered the drugs for CMC. *Id.* at 94. K.G. further stated that R.K. usually accepted deliveries of drug orders; however, sometimes K.G. would accept delivery of drug orders and she "would leave them unopened for R.K. to handle." *Id.* at 93. K.G. commented that she saw only R.K. write in the dispensing log. *Id.* at 95.

L.Y. had been hired as medical assistant in November 2005; her responsibilities included the scheduling of appointments and flu shots. *Id.* at 95–96. According to L.Y., the clinic saw twenty to twenty-five patients per day. *Id.* at 97. L.Y. also stated that both Respondent and R.K. handled the drugs once they had arrived. *Id.* at 96. When shown the dispensing log, L.Y. identified handwriting belonging to both Respondent and R.K.; she also stated that Respondent's wife primarily prescribed drugs, while Respondent typically dispensed them. *Id.* at 97.

S.B. had worked at CMC for three years and did patient billing. *Id.* at 98. S.B. stated that R.K. would order the drugs and that Sameer Dang (Respondent's son) would check the deliveries. *Id.* at 98–99. She also stated that R.K. handled the dispensing log. *Id.* at 100.

S.B. further stated that CMC had approximately twenty-five patients per day, of which fifteen saw Respondent and ten saw his wife. *Id.* According to S.B., both Sameer Dang and R.K. paid for the drugs.⁹ *Id.* She also said that both

Respondent and R.K. had access to the controlled substances received at the CMC office. *Id.* at 103.

As found above, on March 16, 2006, DEA Investigators also executed a search warrant at R.K.'s residence. *Id.* at 70. R.K. was present during the search and was interviewed during which she provided "the same information" as she had two months earlier. *Id.* at 71. R.K. stated that since January 17, 2006, she had stopped using her personal credit card to order the drugs and only dispensed drugs in the presence of a physician. *Id.* at 72. R.K. also stated that all of the clinic's drug orders were approved by Respondent. *Id.* Finally, R.K. stated that Respondent was the clinic's "primary dispenser" of the drugs. *Id.*

In April 2006, the GS interviewed Dr. B., one of the physicians listed as being part of Respondent's clinic. *Id.* at 76. Dr. B. stated that he had worked at CMC for about five years on a part-time basis. *Id.* Dr. B., who also worked at a psychiatric facility for the local county government, saw some of these patients at Respondent's clinic. *Id.* at 77–78.

Dr. B. stated that he rarely prescribed controlled substances to his patients, and that when he did, he did not dispense drugs. *Id.* at 78. He also stated that the patient load at CMC did not justify the quantities of controlled substances that were being purchased by the clinic. *Id.* at 79.

In May 2006, a Diversion Investigator (DI) interviewed one of Respondent's patients, A.A., who said that she saw him for knee pain and "asthmatic issues." Tr. 81. A.A. had worked for twelve years as a patient care representative in "a couple hospitals"; at one, she was the Quality Care Coordinator with "duties related to medical, financial counseling and medical billing." *Id.* at 81–82.

A.A. stated that on several occasions during her visits to Respondent's clinic, she observed R.K. take persons "into a back room" and that "several minutes later," these persons "would come out with bags in their hands." *Id.* at 83. A.A. stated that she did not believe these persons had seen Respondent. *Id.* A.A. further stated (and wrote a letter to DEA to the same effect) that she had told Respondent that R.K. "was * * * dispensing drugs in some form or fashion, or selling medications without" the patients "seeing the doctor." *Id.*

The Government also submitted into evidence a portion of a Report of Investigation relating an interview of another of Respondent's patients, B.R.

Tr. 167; *see also* GX 17. According to the Report, B.R. told Investigators that she had been Respondent's patient since 2001 and had been treated for leg pain. GX 17, at 1. B.R. stated that Respondent "did not examine her thoroughly and did not request any tests," yet he dispensed Vicodin to her. *Id.* B.R. further stated that she had started seeing another physician who examined her thoroughly and ordered an MRI and X-ray. *Id.* B.R.'s new doctor concluded that her back was the cause of her leg pain and that she was over-medicated; he referred her to a pain clinic. *Id.*

B.R. further said that she was buying bottles of 100 tablets of Vicodin 7.5 mg every two weeks for \$20 per bottle and that Respondent had instructed her to take the Vicodin as needed with no further instructions. *Id.* Both R.K. and Respondent had given Vicodin to her, and on occasion she would simply telephone R.K. for a refill and receive it from her without seeing Respondent. *Id.* at 2.

However, the report of B.R.'s interview contains no evidence suggesting that she was not a legitimate patient. Moreover, the Government did not introduce B.R.'s patient record into evidence and offered no evidence (beyond the conclusory assertion that his exam was not thorough) regarding the scope of the physical examination Respondent performed on her. Nor did it offer any evidence from an Expert (whether through testimony or a report) establishing that Respondent failed to perform a medically appropriate prior examination and lacked a medical indication when he prescribed Vicodin to B.R.

Using the records seized during the search of Respondent's clinic and its patient files (which were subsequently obtained with Respondent's consent), ARCOS data, and information provided by several of the distributors,¹⁰ the GS conducted an audit of the hydrocodone ordered under both Respondent's and his wife's registrations between January 1, 2005 and March 16, 2006. Tr. 59–60, 67; GX 15. Because the Dangs did not maintain records of their inventory (notwithstanding Federal law requiring them to do so, *see* 21 U.S.C. 827(a) & (b)), the GS chose January 1, 2005 as the starting date and assumed that no

¹⁰ Moore Medical provided DEA with records of its hydrocodone sales under Respondent's registration from late 2005 to early 2006. Tr. 25; GX 5. ANDA provided DEA with a spreadsheet listing all sales under the registrations of Respondent and his wife from May 2000 through mid-October 2005. Tr. 30; GX 8. DEA also acquired sales records and a sales summary from ParMed which show Respondent's purchases of controlled substances between November 28, 2005 and January 4, 2006. GX 9.

⁸ Later that day, Investigators went to Respondent's residence and sought consent to search his house. Tr. 69. Respondent and his wife declined to provide consent. *Id.*

⁹ S.B. also told Investigators that Respondent had changed the clinic's procedures and now required

R.K. to get his approval before she dispensed any drugs. Tr. 101–02.

controlled substances were then on hand; for the closing inventory, the GS used the inventory taken (48,000 tablets) when the search warrant was issued.¹¹ Tr. 59–60; GX 15. To this latter figure, the DI added the hydrocodone that was seized during the January 17, 2006 traffic stop of R.K. (31,000 tablets) and the 1,400 tablets found during the search of R.K.'s residence which occurred later that day.¹²

Using both the ARCOS data and distributor invoices, the GS determined that 4,037,900 tablets of hydrocodone had been ordered during the audit period.¹³ Tr. 61; GX 15. The clinic's dispensing logs, which did not identify which doctor had authorized the various dispensings, see GX 14, showed that only 12,000 tablets had been dispensed;¹⁴ in addition, the GS reviewed the clinic's patient files and determined that another 75,000 tablets had been dispensed.¹⁵ Tr. 61–63, 119, 129; GXs 12, 15. Accordingly, the Dangs could only account for approximately 167,000 tablets of hydrocodone.¹⁶ Tr. 64–65, 119; GX 15. Thus, Respondent (and his wife) could not account for approximately 3,870,500 tablets.¹⁷ Tr. 66, 119; GX 15.

Among the documents the Government entered into evidence is a November 7, 2005 letter from Respondent to J.N., a compliance coordinator at Henry Schein. GX 6, at 20. Therein, Respondent wrote that he

¹¹ The practical effect of assigning a zero starting inventory is to reduce the size of any shortage.

¹² According to the computation chart prepared by the GS, he used 1200 tablets as the amount seized during the search of R.K.'s residence. GX 15, at 1. As the ALJ noted, given that the audit found that nearly four million tablets could not be accounted for, the error is inconsequential. ALJ at 13 n.5.

¹³ Respondent does not contend that the GS double-counted any of the orders that were used in calculating this figure.

¹⁴ The dispensing logs also did not contain the name of the dispensing physician, the initials of the person dispensing the drugs, and the patient's address as required by 21 CFR 1304.22(c). Tr. 58, 147; see also GX 14. Moreover, while there were some dispensing logs from 2003, the remaining logs only covered the period from February 28 through March 15, 2006. Tr. 57; see also GX 14.

¹⁵ The GS credited CMC with dispensing 87,000 tablets of hydrocodone as he could not determine whether the dispensings recorded in the dispensing logs overlapped with those noted in the patient files. Tr. 129–30.

¹⁶ Neither Respondent nor his wife had reported to DEA any thefts, losses, or destructions of controlled substances. Tr. 65.

¹⁷ According to the GS, the street value of a hydrocodone tablet is between three to five dollars, Tr. 132, and that the value of the drugs, which Respondent could not account for, would be about \$15 to 20 million. *Id.* at 133. The GS also acknowledged that although the Government had seized various accounts controlled by R.K., Respondent and his wife, he found no evidence of bank deposits approaching this amount; nor did he find evidence of extravagant purchases. Tr. 134–35.

was the Medical Director of “a multiple specialty medical group,” comprised of five physicians including himself, his wife, the aforementioned Dr. B., as well as Drs. H.L. and D.S. *Id.* Respondent further wrote that the clinic had “introduced a program of dispensing some medications to our patients” for their “convenience * * * and to help them save some money.” *Id.* Respondent also wrote that his clinic “provide[s] physical therapy and pain management to our patients,” that it “dispense[d] medications to our patients only,” and that the “practice has been growing.” *Id.*

The Government also entered into evidence a credit application submitted on behalf of CMC to ParMed. GX 9, at 4. The application, which is dated November 21, 2005, lists Respondent as the person making the application; his name is printed in the signature block (which is signed), and the application also contains the name of a ParMed Sales Representative.¹⁸ See *id.*

The Government further entered into evidence reports prepared by ParMed on January 5, 2006, which list ParMed's controlled substance distributions to Respondent and his wife. See *id.* at 1–2. The report for Respondent's wife bears a handwritten note, which according to the GS, was written by D.L., an employee of ParMed's regulatory affairs section. Tr. 34–35. The note read: “pain management—group of Dr's—about 30 Dr's in this medical group & she purchases for all Dr's (as per sales rep).” GX 9, at 2. The note then listed the names and registration numbers of Respondent and his wife and stated: “Both new accounts from 11–05.”¹⁹ *Id.*

Respondent did not testify in the proceeding and offered only one exhibit, a letter from R.K.'s attorney stating that she would invoke her Fifth Amendment privilege if called to testify. RX1.

Discussion

Section 304(a) of the Controlled Substances Act (CSA) provides that “[a] registration pursuant to section 823 of this title to * * * dispense a controlled substance * * * may be suspended or revoked by the Attorney General upon a finding that the registrant * * * has committed such acts as would render his registration under section 823 of this

title inconsistent with the public interest as determined under such section.” 21 U.S.C. 824(a)(4). In making the public interest determination in the case of a practitioner, Congress directed that the following factors be considered:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The applicant's experience in dispensing * * * controlled substances.

(3) The applicant's conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety.

21 U.S.C. 823(f).

“[T]hese factors are considered in the disjunctive.” *Robert A. Leslie*, 68 FR 15227, 15230 (2003). I may rely on any one or a combination of factors and may give each factor the weight I deem appropriate in determining whether to revoke an existing registration or to deny an application. *Id.* Moreover, I am “not required to make findings as to all of the factors.” *Hoxie v. DEA*, 419 F.3d 477, 482 (6th Cir. 2005) (citing *Morall v. DEA*, 412 F.3d 165, 173–74 (DC Cir. 2005)).

With respect to a practitioner's registration, the Government bears the burden of proving by a preponderance of the evidence that the continuation of a registration would be inconsistent with the public interest. 21 CFR 1301.44(d). However, where the Government satisfies its *prima facie* burden, as for example, by showing that a registrant has committed acts which are inconsistent with the public interest, the burden then shifts to the registrant to demonstrate why he can be entrusted with a registration. *Medicine Shoppe-Jonesboro*, 73 FR 363, 380 (2008).

In this matter, having considered the entire record and all of the statutory factors, I reject the ALJ's finding that Respondent violated Federal and State law when he prescribed Vicodin to B.R. However, I agree with the ALJ's conclusions that the Government's evidence under factors two, four, and five makes out a *prima facie* case that Respondent has committed acts which render his registration inconsistent with the public interest.²⁰ ALJ at 26, 30. I

¹⁸ The application also lists R.K. as the “accounts payable contact.” GX 9, at 4.

¹⁹ The GS testified that on or about January 6, 2006, he had spoken with D.L., who told him that R.K. was the contact person for Respondent and his wife, and that R.K. had represented to ParMed that the reason for the quantities of controlled substances that were being ordered was that there were thirty doctors at the clinic. Tr. 36–37.

²⁰ I acknowledge that Respondent holds a valid medical license from the State of California. Moreover, the State Board has not taken action against him nor made any recommendation in this matter (factor one). ALJ Ex. 3, at 3.

Be that as it may, in enacting the CSA, Congress vested this Agency with “a separate oversight responsibility [apart from that which exists in state

further agree with the ALJ's conclusion that Respondent has not accepted responsibility for his misconduct and that he has not rebutted the Government's *prima facie* case.

Factors Two, Four, and Five—Respondent's Experience in Dispensing Controlled Substances, Compliance With Applicable Laws Related to Controlled Substances, and Other Conduct Which May Threaten Public Health and Safety

The Government's case implicates each of these factors. As found above, during an approximately fifteen month period, more than four million tablets of highly abused combination drugs containing hydrocodone, a schedule III controlled substance, were purchased by R.K., Respondent's office manager, using his and his wife's DEA registrations. When DEA Investigators audited Respondent's handling of hydrocodone, they could account for only 167,000 tablets, leaving nearly 3.9 million tablets unaccounted for.²¹ In addition, law enforcement authorities found that R.K. had large quantities of hydrocodone in her possession during both a traffic stop and a search of her residence; Investigators also found a large quantity of cash in R.K.'s home.

At a minimum, the evidence clearly shows that Respondent violated the

authorities] with respect to the handling of controlled substances." *Mortimer B. Levin*, 55 FR 8209, 8210 (1990). DEA has therefore long recognized that it has "a statutory obligation to make its independent determination as to whether the granting of [a registration] would be in the public interest." *Id.* Accordingly, "a State's failure to take action against a registrant's medical license is not dispositive in determining whether the continuation of a registration is in the public interest." *Jayam Krishna-Iyer*, 74 FR 459, 461 (2009); see also *Levin*, 55 FR at 8210 (holding that practitioner's reinstatement by state board "is not dispositive" in public interest inquiry). Thus, that the Medical Board of California has taken no action with respect to Respondent's medical license is not dispositive in determining whether his continued registration is consistent with the public interest.

There is also no evidence that Respondent has been convicted of an offense related to the manufacture, distribution, or dispensing of controlled substances under either Federal or state law (factor three). ALJ Ex. 3. However, while a history of criminal convictions for offenses involving the distribution or dispensing of controlled substances is a highly relevant consideration, there are any number of reasons why a registrant may not have been convicted of (or even prosecuted for) such an offense, and thus, the absence of such a conviction is of considerably less consequence in the public interest inquiry. *Krishna-Iyer*, 74 FR at 461; *Edmund Chein*, 72 FR 6580, 6593 n.22 (2007). Accordingly, that Respondent has not been convicted of an offense related to the distribution or dispensing of controlled substances is not dispositive of whether the continuation of his registration is consistent with the public interest.

²¹During 2005 alone, approximately 1.35 million dosage units were ordered under Respondent's registration. Thus, Respondent could not account for at least 1.1 million tablets.

CSA's various recordkeeping provisions. Under Federal law, as soon as Respondent "first engage[d] in the * * * distribution or dispensing of controlled substances, and every second year thereafter," he was required "to make a complete and accurate record of all stocks thereof on hand." 21 U.S.C. 827(a)(1) (emphasis added); see also 21 CFR 1304.03(a)–(b), 1304.04(a) & (g), 1304.11. As found above, during the audit, Respondent could not produce an inventory record for any of the controlled substances that were purchased under his registration.

Under Federal law, Respondent was also required to "maintain, on a current basis, a complete and accurate record of each such substance * * * received, sold, delivered, or otherwise disposed of by him." 21 U.S.C. 827(a)(3) (emphasis added). With respect to a practitioner who engages in dispensing, DEA regulations require that the record include "the number of units or volume of such finished form dispensed, * * * the name and address of the person to whom it was dispensed, the date of dispensing, the number of units or volume dispensed and the written or typewritten name or initials of the individual who dispensed * * * the substance on behalf of the dispenser." 21 CFR 1304.22(c); see also *id.*; 21 CFR 1304.03(a)–(b), 1304.04(a) & (g), 1304.21, 1304.22(c). However, as found above, while Respondent had purchased large quantities of controlled substances throughout 2004 and 2005, he had no dispensing logs for these years and his 2006 logs covered only from February 28 through March 15. Moreover, the logs that were maintained lacked required information such as the name of the dispensing doctor, the initials/name of the person doing the dispensing, and the address of the patient. GX 14.

Recordkeeping is one of the central features of the CSA's closed system of distribution. See *Paul H. Volkman*, 73 FR 30630, 30644 (2008), *pet. for rev. denied* 567 F.3d 215, 224 (6th Cir. 2009). As I have previously explained, "a registrant's accurate and diligent adherence to this obligation is absolutely essential to protect against the diversion of controlled substances." *Id.* Given that millions of dosage units of a highly abused controlled substance that were ordered under Respondent's registration cannot be accounted for, his failure to comply with the CSA's recordkeeping requirements is egregious. This finding provides reason alone to conclude (with respect to factors two and four) that his continued registration "is inconsistent with the public interest." 21 U.S.C. 823(f); see also *Volkman*, 73 FR at 30644 (holding

that recordkeeping violations alone supported denial of practitioner's application).

While in his brief, Respondent, who did not testify, acknowledges that "he failed * * * to maintain complete records reflecting his dispensing of controlled substances," Resp. Br. at 6, he argues that R.K. "ordered, received and paid for" the drugs, and that she "distributed or sold the drugs outside [of] the CMC practice." *Id.* at 5. Respondent's brief implies that he was unaware of R.K.'s illegal activities, and his brief is otherwise silent on the issue of whether he bears any responsibility for the missing drugs. See generally *id.* He does.

DEA has long held that a registrant is strictly liable for the misuse of his registration by a person to whom he entrusts his registration. See *Anthony L. Capelli*, 59 FR 42288 (1994); see also *Harrell E. Robinson*, 74 FR 61376, 61377 (2009); *Paul H. Volkman*, 73 FR 30630, 30644 n.42 (2008); *Rosemary Jacinta Lewis*, 72 FR 4035, 4041 (2007) (citing *Capelli*); *Leonard Merkow*, 60 FR 22075, 22076 (1995). The record clearly supports the conclusion that Respondent entrusted his registration to R.K.

Moreover, several documents in evidence support the conclusion that Respondent was clearly aware that controlled substances were being ordered under his registration. These include Respondent's November 2005 letter to Schein declaring that he had "decided to order medications through your company," GX 7, and the credit application he submitted to ParMed. GX 9, at 4.

The evidence also supports the inference that Respondent authorized R.K. to use his registration to order controlled substances. Several clinic employees told Investigators that R.K. would order the drugs. See, e.g., Tr. 94. Moreover, several invoices prepared by Schein, both before and after Respondent's November 2005 letter, include the notation: "Roni, Thank you for your order," GX 6, at 9, 14–15, 18; and on the ParMed credit application, Respondent listed R.K. as his accounts payable contact. GX 9, at 4. Finally, R.K. stated in her January 2006 interview that, while she paid for the drugs with her personal credit card, Respondent reimbursed her with cash. Tr. 94.

Thus, it is clear that Respondent authorized R.K. to order controlled substances using his registration. And even if it were the case that Respondent was unaware of R.K.'s illegal activities (although it is not), he is still strictly liable for her misuse of his registration and his failure to properly monitor how

his registration was being used. See *Jacinta Lewis*, 72 FR at 4041–42; *Robinson*, 74 FR at 61377; *Volkman*, 73 FR at 30644 n.42; *Capelli*, 59 FR at 49288.

As for Respondent's implicit suggestion that he lacked knowledge of R.K.'s activities, the evidence is to the contrary. See Resp. Br. at 5. Most significantly, as demonstrated by the letter Respondent sent seeking the return of the hydrocodone seized during the traffic stop of R.K., he knew that she had removed 31,000 tablets from his clinic. GX 12. Yet even after this, Respondent continued to employ R.K. (indeed, the evidence shows that she was still employed by him as of the date of the hearing) and R.K. continued to order controlled substances. See GX 6, at 5 (Schein invoice dated March 13, 2006 for hydrocodone and temazepam and stating: "RONI, Thank You For Your Order"); Tr. 72. This begs the question—which is unanswered because Respondent did not testify—as to what he thought R.K. planned to do with the drugs she had in her possession when she was stopped by the CHP.²²

It is well established that the Agency may draw an adverse inference from a respondent's failure "to testify in response to probative evidence offered against" him. *Baxter v. Palmigiano*, 425 U.S. 308, 318 (1976); see also *United States v. Solano-Godines*, 120 F.3d 957, 962 (9th Cir. 1997) ("In civil proceedings * * * the Fifth Amendment does not forbid fact finders from drawing adverse inferences against a party who refuses to testify."); *Dewey C. MacKay*, 75 FR 49956, 49977 (2010). It is appropriate to draw an adverse inference here, where the Government produced evidence showing that Respondent authorized R.K. to use his registration to obtain massive quantities of controlled substances, of which only a small fraction can be accounted for, and Respondent failed to testify and respond to this evidence.

I thus conclude that Respondent knew that R.K. was engaging in illegal activity and did nothing to prevent it. Respondent's misconduct clearly threatened public health and safety, 21 U.S.C. 823(f)(5), and is especially egregious given that nearly four million dosage units of hydrocodone cannot be accounted for and were likely diverted.²³ These findings provide

²² The GS also related that a patient (A.A.) had told Respondent that she believed that R.K. was selling drugs to patients who did not see him. Tr. 83.

²³ Respondent elicited testimony from the G.S. that when the Government seized the accounts and/or cash of R.K., Respondent, and his wife, it did not find a money trail consistent with the potential

further reason to conclude that Respondent's registration is "inconsistent with the public interest."²⁴ 21 U.S.C. 823(f); 824(a)(4).

Sanction

Under Agency precedent, where the Government has made out a *prima facie* case that a registrant has committed acts which render his "registration inconsistent with the public interest," he must "present[] sufficient mitigating evidence to assure the Administrator that [he] can be entrusted with the responsibility carried by such a registration." *Samuel S. Jackson*, 72 FR 23848, 23853 (2007) (quoting *Leo R. Miller*, 53 FR 21931, 21932 (1988)). "Moreover, because 'past performance is the best predictor of future performance,' *ALRA Labs., Inc. v. DEA*, 54 F.3d 450, 452 (7th Cir. 1995), this Agency has repeatedly held that where a registrant has committed acts inconsistent with the public interest, the registrant must accept responsibility for his actions and demonstrate that [he] will not engage in future misconduct." *Medicine Shoppe-Jonesborough*, 73 FR at 387.

As noted above, Respondent failed to testify in this proceeding. While in his brief, he now acknowledges that he violated Federal law and DEA regulations by failing to maintain proper records, notably, he does not acknowledge his misconduct in failing to properly monitor how R.K. was using his registration.²⁵ I thus conclude that

sales value in the illicit market of the unaccounted for hydrocodone. However, Respondent offered no evidence challenging the results of the audit. Nor has he offered any explanation as to the disposition of the unaccounted for drugs. The audit results alone provide enough evidence to support the conclusion that the drugs were diverted; the Government is not obligated to show that it found a money trail consistent with the potential sales value of the drugs in the illicit market.

²⁴ The ALJ further found that Respondent "prescribed controlled substances without establishing a bona-fide doctor-patient relationship" with B.R. ALJ at 24–25 (citing Cal. Bus. & Prof. Code § 2242(a)). The ALJ apparently based her conclusion on B.R.'s statement that Respondent "did not examine her thoroughly and did not request any tests." GX 17, at 1.

The evidence suggests, however, that B.R. had a legitimate medical complaint, and there is absolutely no evidence (such as B.R.'s medical record) other than the conclusory assertion set forth above as to the scope of the examination Respondent performed. Finally, there is no evidence as to the scope of the medical examination necessary to properly diagnose and treat B.R.'s condition. I therefore conclude that the ALJ's finding is not supported by substantial evidence.

²⁵ Because Respondent has not addressed his misconduct in failing to prevent the misuse of his registration, I need not decide whether the assertion in his brief that he "recognizes that he failed * * * to maintain complete records," Resp. Br. at 6, satisfies the Agency's rule requiring that he accept responsibility for his misconduct. Respondent

has not accepted responsibility for his misconduct and has not rebutted the Government's *prima facie* case.²⁶

Given the grievous nature of Respondent's misconduct and his failure to accept responsibility, none of the "favorable facts" cited by the ALJ provide any reason to impose a sanction less than revocation. While the record may contain no other evidence of misconduct on Respondent's part, ALJ at 31, as I have previously explained, the fact that a practitioner can point to even an extensive body of compliance with the CSA does not negate a *prima facie* showing that he has committed acts inconsistent with the public interest.²⁷ *Jayam Krishna-Iyer*, 74 FR 459, 463 (2009). While such evidence is entitled to some weight in assessing whether a practitioner has credibly shown that he has reformed his practices, where, as here, a practitioner commits egregious acts (whether intentional or not) that have likely resulted in diversion, and fails to accept responsibility for his actions, "such evidence is entitled to no weight." *Id.* Indeed, that there is no other evidence of misconduct on his part does nothing to mitigate the harm Respondent has caused to public health and safety. Finally, given Respondent's failure to accept responsibility, and the nature of his misconduct, I conclude that it would be inconsistent with the public interest to grant him even a restricted registration. Accordingly, I will order that Respondent's registration be revoked and that any pending application be denied.

Order

Pursuant to the authority vested in me by 21 U.S.C. 823(f) and 824(a), as well as by 28 CFR 0.100(b), I hereby order that DEA Certificate of Registration, AD6122143, issued to Surinder Singh Dang, M.D., be, and it hereby is, revoked. I further order that any pending application of Surinder Singh

offered no evidence to support this assertion, and statements of counsel in a brief are not evidence. See *INS v. Phinpathya*, 464 U.S. 183, 186 n.6 (1984).

²⁶ While the ALJ concluded that "Respondent has not admitted any fault" and that he was "either intentionally engaged in diversion or * * * at least facilitating such diversion on the part of his employee," she nonetheless concluded that "the inquiry does not end here" and proceeded to analyze what she deemed to be favorable facts. ALJ at 30 (citing *Martha Hernandez*, 62 FR 61,145, 147 (1997)).

²⁷ To similar effect, the ALJ found that Respondent "warned at least one patient about the dangers surrounding narcotics." ALJ at 31. As explained in *Krishna-Iyer*, this finding is too insubstantial to warrant any further discussion. 74 FR at 463.

Dang, M.D., to renew or modify his registration be, and it hereby is, denied. This Order is effective September 19, 2011.

Dated: August 5, 2011.

Michele M. Leonhart,
Administrator.

[FR Doc. 2011-21062 Filed 8-17-11; 8:45 am]

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 10-4]

Satinder Dang, M.D.; Revocation of Registration

On August 31, 2009, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, issued an Order to Show Cause to Satinder K. Dang, M.D. (Respondent), of Fountain Valley, California. The Order proposed the revocation of Respondent's DEA Certificate of Registration, AD9234446, as a practitioner, as well as the denial of any pending applications to renew or modify her registration, "for reason that [Respondent's] continued registration[] would be inconsistent with the public interest, as that term is used in 21 U.S.C. 823(f) and 824(a)(4)." ALJ Ex.1, at 1.

The Order specifically alleged that between January 2004 and July 2007, Respondent and her husband Surinder Dang, "who also possesses a DEA registration and shares [Respondent's] registered location," ordered "more than 5,000,000 dosage units of hydrocodone" and that Respondent "failed to properly account for, secure, and otherwise handle these controlled substances." *Id.* The Order alleged that on January 17, 2006, one of Respondent's "employees removed 30,000 dosage units of controlled substances" from her registered location and "attempted to take them to her residence." *Id.* The Order further alleged that on the same day, "DEA Special Agents seized another 10,000 dosage units of controlled substances from this employee's residence." *Id.* Continuing, the Order alleged that on March 16, 2006, "DEA Special Agents seized 50,000 dosage units more from this employee's residence." *Id.*

Next, the Order alleged that on March 16, 2006, DEA conducted an accountability audit of Respondent's handling of hydrocodone and that Respondent "could not account for more than 3,500,000 dosage units" that Respondent and her husband "had ordered"; the Order thus also alleged

that Respondent "failed to keep accurate and complete records of each controlled substance received, sold, delivered, or otherwise disposed of as required by 21 U.S.C. 827(c) and 21 CFR 1304.01 *et seq.*" *Id.* at 2. Finally, the Order alleged that, when Respondent "made dispensing records," she "frequently failed to indicate whether" she or her husband "actually dispensed the controlled substances as required by 21 CFR 1304.03(b)." *Id.*

By letter of October 2, 2009, Respondent, through her counsel, requested a hearing on the allegations. ALJ Ex. 2. The matter was then assigned to an Administrative Law Judge (ALJ), who conducted a hearing on March 2-3, 2010, in Santa Ana, California.

At the hearing, the Government called two witnesses to testify and introduced documentary evidence. Respondent testified on her own behalf. Following the hearing, both parties submitted briefs containing their proposed findings of fact, conclusions of law and argument.

On June 18, 2010, the ALJ issued her Recommended Decision (also ALJ). Therein, the ALJ considered the five public interest factors, *see* 21 U.S.C. 823(f), and concluded that Respondent's continued registration would be inconsistent with the public interest and recommended that her registration be revoked. ALJ at 29, 37-38.

As to the first factor—the recommendation of the appropriate State licensing board or professional disciplinary authority—the ALJ found "no evidence that the Medical Board of California has taken any action against the Respondent." *Id.* at 27. However, the ALJ recognized that under Agency precedent, "the fact that the Medical Board of California has currently authorized * * * Respondent to practice medicine is not dispositive in this administrative determination as to whether continuation of a registration is consistent with the public interest." *Id.* (citing *Patrick W. Stodola*, 74 FR 20727, 20730 (2009); *Jayam Krishna-Iyer*, 74 FR 459, 461 (2009)). The ALJ then concluded that "this factor does not fall in favor of revocation." *Id.* Likewise, with respect to factor three—Respondent's record of convictions for offenses relating to the manufacture, distribution, or dispensing of controlled substances—the ALJ found that Respondent has not been convicted of such an offense and that this factor also did not "fall in favor of revocation." *Id.* at 27-28.

The ALJ then considered factors two and four—Respondent's experience in dispensing controlled substances and her compliance with Federal, State, and

local laws relating to controlled substances—together. *Id.* at 28-29. The ALJ found that the record was "replete with Respondent's lack of oversight concerning the use of her controlled substances registration." *Id.* at 28. Specifically, the ALJ found that: (1) Respondent's clinic was unable to provide a biennial inventory (or an inventory of any kind); (2) "Respondent was unable to account for any of the controlled substances ordered using her DEA registration number"; and (3) Respondent had admitted that "she did not maintain a key to the controlled substance cabinet" at her clinic. *Id.* at 28-29. Further, the ALJ found that an "audit revealed that the approximately 3,870,700 dosage units of hydrocodone were unaccounted for." *Id.* at 29. Based on these findings, the ALJ concluded that "Respondent failed to maintain adequate records." *Id.*

The ALJ rejected Respondent's argument that "the DEA's findings did not distinguish between the controlled substances prescribed or dispensed to Respondent's patients versus the patients of" her husband. *Id.* The ALJ found that "the missing controlled substances were ordered under both DEA registration numbers in a haphazard manner and subsequently mixed into an incoherent *mélange*." *Id.* The ALJ reasoned that if "Respondent maintained some oversight of her controlled substances registration, then DEA would most likely be able to 'distinguish between controlled substances prescribed or dispensed to Respondent's patients versus' those of her husband." *Id.* Based on these findings, the ALJ concluded that "Respondent's circular reasoning does not absolve her [of] culpability." *Id.* The ALJ thus held that the Government's evidence under factors two and four "established prima facie grounds for revocation of * * * Respondent's DEA Certificate of Registration." *Id.*

Turning to factor five—such other conduct as may threaten the public health and safety—the ALJ explained that "[e]ven if Respondent was not directly involved in the illegal diversion of controlled substances * * * she committed acts which constitute 'conduct which may threaten the public health and safety' and which render her registration 'inconsistent with the public interest.'" *Id.* (quoting 21 U.S.C. 823(f)(5), 824(a)(4)). Noting that "[u]nder DEA precedent, a registrant who entrusts [her] registration to another person is strictly liable for the latter's misuse of [her] registration," the ALJ reasoned that "even if there had been no conspiracy amongst Respondent, her husband, and [R.K., the

office manager of the clinic where she practiced with her husband] to unlawfully distribute the drugs, [Respondent] would still be liable for the acts [R.K.] committed while being allowed to use [her] registration.” *Id.* (citations omitted).

The ALJ further found incredible Respondent’s testimony that “she was unaware of [R.K.’s] actions.” *Id.* Noting Respondent’s “admitted lack of supervision” over R.K.—including that Respondent would “tell [R.K.] which drug she wanted to dispense,” R.K. “would retrieve the controlled substances from the steel cabinet and update the logbook,” and “only [R.K.] had a key to the controlled substances cabinet”—placed R.K. in a “position where she could take advantage of the lax security” of Respondent’s controlled substances, the ALJ rejected Respondent’s contention that these were “minor record-keeping violations” and held that she was “responsible for enabling [R.K.’s] acts of unlawful possession and distribution of the controlled substances that [R.K.] obtained under Respondent’s registration.” *Id.* (citing *Harrell E. Robinson, M.D.*, 74 FR 61370, 61376–77 (2010)). The ALJ also found that Respondent is “still engaged in an ongoing working relationship with [R.K.],” *id.* at 32, and held that “[a] practitioner’s failure to properly supervise patients or staff to prevent them from personally abusing controlled substances or selling them to others constitutes conduct ‘inconsistent with the public interest’ and can support * * * the revocation of an existing registration.” *Id.* at 33 (citing *Jeri Hassman, M.D.*, 75 FR 8194, 8227 (2010); *Gonzales v. Oregon*, 546 U.S. 243, 274 (2006)).

Noting that Respondent blamed her husband and R.K. for her misconduct, the ALJ further found that “Respondent’s acceptance of responsibility has been minimal” and “weighs heavily against her continuing registration.” *Id.* at 35. The ALJ further held that Respondent’s “lack of cooperation with the DEA investigation nominally weighs against her continued registration.” *Id.* at 36–37.

The ALJ also found that “the fact that [Respondent] still works alongside [R.K.] is an aggravating factor.” *Id.* at 35. While noting Respondent had offered to file quarterly reports of her prescriptions with the Agency, the ALJ found that “Respondent’s careless use of her DEA Certificate of Registration coupled with her lack of assurances that she will no longer enable others such as [R.K.] and her husband to abuse her controlled substances registration

weighs heavily against her continuing registration.” *Id.* at 37. The ALJ therefore recommended that “Respondent’s DEA Certificate of Registration be revoked.” *Id.* at 38.

On August 9, 2010, Respondent filed Exceptions to the ALJ’s Decision, and on August 18, the ALJ forwarded the record to me for Final Agency Action. On September 10, 2010, the Government filed a motion with my Office to accept its response to Respondent’s Exceptions. In its motion, the Government stated that Respondent’s counsel had consented to its filing. Accordingly, by this Order I grant the Government’s motion.

Having considered the entire record, I adopt the ALJ findings of fact and conclusions of law except as expressly noted herein. I further adopt the ALJ’s ultimate conclusion that Respondent’s “continued registration is not in the public interest,” ALJ at 38, and her recommendation that her registration be revoked. As ultimate factfinder, I make the following findings:

Findings

Respondent is the holder of DEA Certificate of Registration, AD9234446, which authorizes her to dispense controlled substances in schedules II through V, as a practitioner, at the registered location of 17150 Euclid #200, Fountain Valley, California. GX 1. While Respondent’s registration was to expire on June 30, 2007, *id.*, on June 4, 2007, Respondent filed an application to renew her registration. GX 2. Accordingly, her registration remains in effect pending the issuance of this Decision and Final Order. 5 U.S.C. 558(c); *see also* ALJ Ex. 3, at 2 (Prehearing Order; Stipulations).

Respondent currently holds a medical license issued by the Medical Board of California. Moreover, the Board has not taken any formal action to limit her ability to practice medicine or to prescribe controlled substances. ALJ Ex. 3, at 3. Also, Respondent has not been convicted of an offense related to the manufacture, distribution, or dispensing of controlled substances. *Id.*

Respondent is married to Surinder Dang, M.D.¹ He and Respondent practice medicine at Complete Medical Care, Inc. (“CMC”). Tr. 188–189; GX 6, at 20. Their son, Sameer Dang, also works in the CMC office. Tr. 58, 188. At all relevant times (including through the date of the hearing), CMC’s office

¹ Dr. Surinder Dang holds DEA Certificate of Registration AD6122143; he is registered at the same address as Respondent. ALJ Ex. 3, at 2, GX 2 at 2.

manager was Ms. Rani K. (R.K.).² *Id.* at 190–91, 194–95, 203–04.

In November 2005, a Diversion Group Supervisor (GS) in DEA’s Riverside Diversion Group reviewed ARCOS³ records which showed that large amounts of controlled substances, including hydrocodone,⁴ were being ordered under the DEA registration numbers of both Respondent and her husband.⁵ Tr. 30–32; GXs 3 & 4. Upon reviewing the ARCOS data, the GS contacted several of the firms that were distributing controlled substances to Respondent. *See, e.g.*, GX 6, at 7. At several points throughout the investigation, these firms provided the GS with copies of various documents, including sales records, invoices, statements of account, delivery information, applications for credit, and correspondence. *See generally* GX 5 (records from Moore Medical, L.L.C.),⁶ GX 6 (record from Henry Schein, Inc.), GX 9 (records from ParMed Pharmaceuticals, Inc.).

The majority of the controlled substances ordered under Respondent’s DEA registration were obtained from Anda Pharmaceuticals. GX 3; Tr. 130, 139. The GS obtained purchase records from Anda showing hydrocodone and other controlled substances purchases by both Respondent and her husband between 2000 and 2005. GX 8; Tr. 47–49. However, there is no evidence that Respondent ever personally ordered these controlled substances. Tr. 140.

CMC also ordered controlled substances, primarily hydrocodone, from another drug distributor, Henry Schein, Inc. GX 6; Tr. 44. The Schein records show that the orders were placed under Respondent’s husband’s name, but a number of the invoices note Respondent’s name as well as her husband’s. GX 6, at 8–9, 11, 14–15, 17–18, 29. R.K.’s name was also listed as

² In various documents R.K.’s first name was spelled as both Rani and Roni. *Compare* GX 5, at 7, with GX 6, at 1, 5, 9, 14–15, 18, 29; *see also* GX 10 at 1.

³ Pursuant to 21 CFR 1304.33(c), manufacturers and distributors of various controlled substances including schedule III narcotics are required to report their distributions of controlled substances to DEA through the Automated Records and Consolidated Orders System (ARCOS). *See also* Tr. 33.

⁴ As a combination product, hydrocodone is a schedule III controlled substance. 21 CFR 1308.13(e)(1)(iv).

⁵ The ARCOS system reports the registration number used, but not necessarily the person who actually ordered the drugs. Tr. 114–16.

⁶ Moore Medical Supply reported to DEA that CMC ordered excessive amounts of hydrocodone. Tr. 32–34; GX 5. The order to Moore was placed under Respondent’s husband’s DEA registration and R.K.’s name appears on a fax sheet sent to Moore Medical and related to CMC’s account number. GX 5, at 7; Tr. 131.

the contact person for the Henry Schein account. Tr. 132–34.

In a letter dated November 7, 2005, Respondent's husband explained to Henry Schein that CMC would begin ordering controlled substances so that CMC's physicians could dispense medications directly to CMC's patients. GX 7; Tr. 46. This letter listed the CMC physicians as Surinder Dang, M.D.; Satinder Dang, M.D.; Robert Belanger, D.O.; Huey Lin, M.D.; and Davinder Singh, M.D. GX 7. The letter also stated: "We dispense medications to our patients only. Our practice has been growing." *Id.* However, none of the records obtained in the investigation show that controlled substances were ordered from Schein under the registrations of any of the doctors besides those of Respondent and her husband. GX 6, at 7; Tr. 176–79.

The DEA registration numbers of both Respondent and her husband were used to order controlled substances from Darby Medical Supply and ParMed Pharmaceuticals. GX 16; GX 9, 11; Tr. 51, 61–62. The Darby records show that Respondent ordered hydrocodone fourteen times. GX 16, at 1, 5, 7, 11. The ParMed records show that between December 29, 2005 and January 4, 2006, 88,800 dosage units of hydrocodone were ordered under Respondent's registration. GX 9, at 2. At one point, D.L., ParMed's Regulatory Affairs officer, reported to the GS that CMC's orders were "excessive and suspicious"; D.L. also identified R.K. as the point of contact for the clinic and that R.K. had opened the CMC accounts. Tr. 51–53.

According to ARCOS records, while in 2004, Respondent purchased 157,100 dosage units of hydrocodone, in 2005, she purchased 2,272,800 dosage units. GX 3, at 2–13. ARCOS data further showed that in 2005, Respondent and her husband had ordered a combined total of 3,626,400 tablets of hydrocodone. GX 3 at 13; GX 4, at 6; *see also* Tr. 93–94 (GS's testimony that between January 1, 2005 and March 16, 2006, Respondent and her husband purchased approximately 4 million tablets of hydrocodone).⁷

Throughout the investigations, several of the firms also provided the GS with information regarding when various deliveries were to be made to Respondent's clinic. On December 14, 2005, the GS, who had received information from two different distributors (Henry Schein and Moore Medical) that controlled substances

deliveries were to be made that day, conducted surveillance at the [Dangs'] clinic from approximately 9:00 a.m. until 6:00 p.m. Tr. 43, 67–68, 75. During the surveillance, the GS observed both deliveries and noted that "approximately no more than a dozen" people entered the clinic that day. *Id.* at 75.

On January 13, 2006, the GS conducted a second surveillance from approximately 9:00 a.m. until 3 p.m. *Id.* at 76–77. During the surveillance, the GS saw R.K. "tak[ing] boxes from the office and plac[ing] them in the trunk of her * * * SUV." *Id.* at 77.

On January 17, 2006, the GS, who had received notice of a controlled substance delivery from another distributor (ParMed Pharmaceuticals, Inc.), conducted another full-day surveillance. *Id.* at 77–78. Once again, Investigators observed R.K. "place numerous boxes in her vehicle that had been delivered to the clinic" and "put them in the back of her * * * SUV." *Id.* at 78. The GS observed R.K. drive away and notified the California Highway Patrol (CHP). *Id.* at 78, 80, 147–48. After observing R.K., who was driving forty miles per hour, operate her vehicle within five feet of the vehicle in front of her, the CHP officer conducted a traffic stop. *Id.* at 78; GX 10, at 2.

As he approached R.K., the CHP officer observed "cardboard boxes that were taped shut in the rear cargo area." GX 10, at 2. The CHP officer advised R.K. of the reason for the stop and requested her license, registration, and insurance. *Id.* He then asked R.K. "what the boxes were." *Id.* R.K. stated that the boxes held Vicodin, a schedule III controlled substance which contains hydrocodone. *Id.*; ALJ Ex. 3, at 1; 21 CFR 1308.13(e)(iv). When the CHP officer asked R.K. if she was a doctor, she stated that "she was the president of a medical facility and that she was going to give the Vicodin to the doctor at her facility." GX 10, at 2. The CHP Officer asked R.K. a second time if she was a doctor; R.K. again said "no" and became "extremely nervous." *Id.*

After the CHP Officer asked R.K. to step out of her car, he asked "why she had cases of Vicodin." *Id.* R.K. answered that she ran a medical office and handed him a business card listing her name and her position as "president." *Id.* R.K. further stated that "she received a delivery of Vicodin from a delivery company at about 1100 hours and that she needed to give it to" Respondent. *Id.* When the Officer asked R.K. if the Vicodin had been delivered "to her car or to her office," R.K. stated that it had been delivered to the office. *Id.* When the Officer asked if her office

had a locker in which to store the Vicodin, R.K. answered "yes," but that she had to personally give the drugs to Respondent. *Id.*

The CHP Officer then asked how the Vicodin had ended up in her vehicle; R.K. stated that "she [had] carried the boxes to her vehicle around noon time and left them there," and that she had stayed in her office until about 5 p.m., at which point "she left * * * to get something to eat." *Id.* When the Officer told R.K. that he was "concerned that she was in possession of so much of a controlled substance," she said she would return it to the office. *Id.* R.K. then stated that Respondent was "doing a procedure at an unknown hospital and he would be returning at an unknown time to the office" and that she would then give him the Vicodin. *Id.*

The CHP Officer then "asked R.K. to open the boxes" to confirm that they contained Vicodin. *Id.* R.K. opened six boxes containing a total of 70 bottles of hydrocodone bitartrate/acetaminophen (hereinafter, hydrocodone/apap or hydrocodone). *Id.* at 2–3. Each of the bottles contained between 100 and 500 tablets (for a total of "approximately 31,000 tablets") in 7.5/500 mg, 10/500 mg, and 10/325 mg strengths. *Id.* The Officer then seized the Vicodin and gave R.K. a receipt for it. *Id.* at 3. After giving R.K. a citation, the officer allowed her to leave. *Id.*

The CHP Officer then contacted a DEA Task Force Officer (TFO) and arranged to transfer custody of the drugs to DEA; upon the TFO's arrival at the Officer's location, the drugs were transferred to the TFO. *Id.* The TFO gave the CHP Officer a receipt which confirms the figures in the latter's report.⁸ *Id.* at 6.

R.K. then drove to her residence in Anaheim Hills; Investigators followed her there in order to question her about the drugs that were found in her vehicle. Tr. 82. R.K. told the Investigators that she had taken the hydrocodone with her for safekeeping because Respondent was out of the office; she also maintained that she intended to return them to the office after she ate. *Id.* at 83. While R.K. initially claimed that this was the first time she had done this, upon being confronted with the fact that Investigators had on another occasion observed her placing boxes in her vehicle, R.K. admitted that this was the second time she had done so. *Id.*

⁸ More specifically, there were 14 bottles of 500 count of hydrocodone/apap 7.5/500 mg; 10 bottles of 500 count hydrocodone/apap 10/500 mg; 36 bottles of 500 count hydrocodone/apap 10/325 mg; and 10 bottles of 100 count hydrocodone/apap 10/500 mg. GX 10, at 6.

⁷ The GS stated that he analyzed ARCOS data, distributors' sales records, audit inventories, patient files and dispensing logs when creating GX 15. Tr. 92–97.

R.K. stated that there were about five physicians who worked at Respondent's clinic, that they dispensed the pills in 30- and 60-count bottles, and that the clinic had approximately twenty to twenty-five patients per day. *Id.* at 84. R.K. further said that she used her personal credit card to purchase drugs from wholesalers and that Respondent would reimburse her. *Id.*

The Investigators then asked R.K. if she would consent to a search of her residence; she agreed. *Id.* According to the GS, the Investigators found approximately \$69,500 in cash in an upstairs closet, a "quantity of hydrocodone and lorazepam in the house" (2000 lorazepam tablets and 1400 hydrocodone tablets), "money order receipts," and receipts of "payments made to the credit card companies by [R.K.]." *Id.* To explain the cash found at her residence, R.K. claimed the sum was a combination of money received from the sale of a house in India and a home-based business she had previously run. *Id.* at 85–86.

On February 24, 2006, Respondent's husband wrote a letter to CHP requesting the return of the hydrocodone which had been seized during the traffic stop of R.K. Tr. 88–89; GX 12. The letter asserted that R.K. was the clinic's "office manager," and had "informed CHP that the property was not hers, and instead belonged to her employer, Complete Medical Care Inc." GX 12.

On March 16, 2006, DEA executed search warrants at both Respondent's clinic and R.K.'s residence. Tr. 90, 104. At the clinic, the Investigators took an inventory of the controlled substances on hand and found 48,000 tablets of hydrocodone, which they seized; the Investigators also seized CMC's controlled substance purchasing records and dispensing log. Tr. at 90, 95. Later that day, Investigators went to Respondent's residence and sought consent to search her house. Tr. 103. Respondent declined to provide consent and refused to talk with Investigators without an attorney present. *Id.*

R.K. was present during the search of her residence and was interviewed. *Id.* at 104. R.K. stated that since January 17, 2006, she had stopped purchasing the drugs on her own, and that the drugs were being purchased by Respondent's husband, Dr. Surinder Dang. *Id.* at 105. R.K. stated that Respondent's husband was the clinic's "primary dispenser" of the drugs and that she "dispensed drugs to the patients under the direction of * * * Dr. Surinder Dang." *Id.*

On March 16, 2006, the Diversion Investigator (DI) interviewed several

CMC employees, including A.N.,⁹ C.G.,¹⁰ L.Y.,¹¹ and S.B.¹² In April 2006, the GS interviewed Dr. B., a physician who had worked at CMC on a part-time basis since approximately 2004. *Id.* 109–110. Dr. B. also worked at a facility for the local county government, but he saw some of his patients at CMC. *Id.* at 110. Dr. B. stated that while he worked at CMC, he rarely, if ever, prescribed or dispensed controlled substances to his patients. *Id.* at 111. He also stated that the patient load at CMC did not justify the quantities of controlled substances that were being purchased by the clinic. *Id.* at 114.

Using the records seized during the search of Respondent's clinic and its patient files, ARCOS data, and information provided by several of the distributors,¹³ the GS conducted an audit of the hydrocodone ordered under both Respondent's and her husband's registrations between January 1, 2005 and March 16, 2006. Tr. 93–96, 67; GX 15. Because CMC did not maintain records of their inventory (notwithstanding Federal law requiring

⁹ A.N. stated that Respondent, her husband, and R.K. handled drug deliveries when they came into CMC. *Id.* at 238–39. A.N. further stated that both Respondent and her husband kept records of dispensed drugs in the patient files and dispensing logs; she identified the writing in the patient log as R.K.'s. *Id.* at 239–40.

¹⁰ The transcript notes the coworker's initials as C.G.; however, other documents suggest that her initials are K.G. See Resp. Brief at 8. C.G. stated that both R.K. and Respondent's husband ordered the drugs for CMC. Tr. 241, 249–250. R.K. usually accepted deliveries of drug orders; however, sometimes C.G. would sign for the delivery but not open the boxes. *Id.* at 241–42. C.G. further stated that she witnessed R.K. writing in the dispensing log the day before the search warrant was executed and heard R.K. comment that CMC's drug procedures had changed. *Id.* at 242.

¹¹ According to L.Y., the clinic saw twenty to twenty-five patients per day. *Id.* at 244. L.Y. also stated that R.K. handled the drugs once they arrived. *Id.* at 243. When shown the dispensing log, L.Y. identified the handwriting as belonging to R.K. *Id.* at 243–44. She further stated that Respondent only wrote prescriptions. *Id.* at 250.

¹² S.B. stated that R.K. and Respondent's husband handled the drugs that were dispensed directly to patients and that R.K. handled the drug inventory and payment for the drugs that were ordered. *Id.* at 246. S.B. also stated that R.K. handled the dispensing log. *Id.* at 247. S.B. further stated that CMC had approximately twenty-five patients per day, of whom ten saw Respondent. *Id.* According to S.B., both Sameer Dang and R.K. paid for the drugs. *Id.* She also stated that R.K. had access to the controlled substances received at the CMC office. *Id.* at 248.

¹³ Moore Medical provided DEA with sales records under Respondent's registration for hydrocodone from late 2005 to early 2006. Tr. 34, 43; GX 5. ANDA provided DEA with a spreadsheet listing all sales under the registrations of Respondent and her husband from May 2000 through mid-October 2005. Tr. 47–49; GX 8. DEA also acquired sales records and a sales summary from ParMed which show Respondent's purchases of controlled substances between November 28, 2005 and January 4, 2006. Tr. 51–52; GX 9.

them to do so, see 21 U.S.C. 827(a) & (b)), the GS chose January 1, 2005 as the starting date and assumed that no controlled substances were then on hand; for the closing inventory, the GS used the inventory taken (48,000 tablets) when the search warrant was executed.¹⁴ Tr. 92–93, 95; GX 15. To this latter figure, the GS added the hydrocodone that was seized during the January 17, 2006 traffic stop of R.K. (31,000 tablets) and the 1,200 tablets¹⁵ found during the search of R.K.'s residence which occurred later that day. Tr. 95; GX 12, 15.

Using both the ARCOS data and distributor invoices, the GS determined that 4,037,900 tablets of hydrocodone had been ordered during the audit period. Tr. 94; GX 15. The clinic's dispensing logs, which did not identify which doctor had authorized the various dispensings, see GX 14, showed that only 12,000 tablets had been dispensed;¹⁶ in addition, the GS reviewed the clinic's patient files and credited another 75,000 tablets as having been dispensed.¹⁷ Tr. 95–96; GX 15. Accordingly, CMC could only account for approximately 167,000 tablets of hydrocodone.¹⁸ Tr. 96–97; GX 15. While the DI combined the purchases of Respondent and her husband, the ARCOS data and distributor invoices did list whose registration was used to place the various orders. See, e.g., GXs 3 & 4. This evidence shows that in 2005 alone, 2,272,800 dosage units of hydrocodone were ordered under Respondent's registration. Accordingly, Respondent still could not account for more than two million dosage units.¹⁹ GX 3, at 13.

Respondent testified that she had no knowledge that her "DEA registration

¹⁴ If any controlled substances were in fact on hand on the starting date of the audit period, assigning a zero starting inventory would reduce the size of any shortage.

¹⁵ I acknowledge that this figure differs from the quantity of 1,400 tablets which, according to the GS's testimony, was found in R.K.'s house. The difference, however, is inconsequential given the result of the audit.

¹⁶ The dispensing logs also did not contain the name of the dispensing physician, the initials of the person dispensing the drugs, and the patient's address as required by 21 CFR 1304.22(c). Tr. 90; see also GX 14. Moreover, while there were some dispensing logs from 2003, the remaining logs only covered the period from February 28 through March 15, 2006. See GX 14.

¹⁷ The GS credited CMC with dispensing a total of 87,000 hydrocodone tablets; this calculation counted the prescriptions issued by Respondent or her husband, because the prescriptions may have been filled in the office. Tr. 100; GX 15.

¹⁸ Neither Respondent nor her husband had reported to DEA any thefts, losses, or destructions of controlled substances. Tr. 99–101.

¹⁹ This calculation gives Respondent credit for all of the 167,000 tablets for which the GS could account.

number was being used to order large quantities of hydrocodone that were being delivered to CMC." Tr. 192. She asserted that she did not order any controlled substances between 2002 and March 16, 2006, and that she did not order any controlled substances after that period. *Id.* at 195–96. Specifically, she testified that she did not order Lorazepam in October 2006. *Id.*

Respondent testified that while during this time period, she was aware that her husband was ordering drugs for his pain management practice, she did not know how much he was ordering. *Id.* at 201. Respondent stated that she had no knowledge of the controlled substances being delivered to CMC during this time period; while she admitted to having seen boxes being delivered to the clinic, she claimed to not know what they contained. *Id.* 197–198. Respondent further stated that R.K. would open the boxes after they were delivered. *Id.* at 200.

Respondent further testified that she was unaware that R.K. had taken drugs from CMC to her residence until learning of it through these proceedings; she also stated that she was not sure if her husband had instructed R.K. regarding taking drugs to her residence. *Id.* at 204–205. However, the ALJ did not find credible Respondent's testimony that she was unaware of R.K.'s activities. ALJ at 30.

Regarding the controlled substance drug storage area, Respondent stated that she had "no idea" how the drugs were organized. Tr. 198–99. Respondent testified that she did not pay attention to what was in that storage area, but then stated there was a basic cabinet that was locked at night and that she did not have a key. *Id.* at 200–01. According to Respondent, the key was either kept by R.K. or in a place where her husband could find it; Respondent also did not know if the storage cabinet was locked during the day. *Id.* at 234.

While Respondent testified on direct examination that she had not dispensed drugs at CMC, on cross-examination, she stated "I don't recall. I might have dispensed but I dispensed rarely." *Id.* at 195. Respondent then admitted dispensing, stating "maybe I might have given [hydrocodone] once or twice to my patients only." *Id.* She stated that other people had ordered these drugs that she dispensed. *Id.* at 229. On the occasions that she did dispense, Respondent asked R.K. for the drug. *Id.* at 230. R.K. would retrieve the controlled substances from the cabinet and give them to Respondent to hand to the patient. *Id.* In these instances, R.K. would record the dispensed controlled

substances in a "separate log." *Id.* at 228.

Discussion

Section 304(a) of the Controlled Substances Act (CSA) provides that "[a] registration pursuant to section 823 of this title to * * * dispense a controlled substance * * * may be suspended or revoked by the Attorney General upon a finding that the registrant * * * has committed such acts as would render [her] registration under section 823 of this title inconsistent with the public interest as determined under such section." 21 U.S.C. 824(a)(4). In making the public interest determination in the case of a practitioner, Congress directed that the following factors be considered:

- (1) The recommendation of the appropriate State licensing board or professional disciplinary authority.
- (2) The applicant's experience in dispensing * * * controlled substances.
- (3) The applicant's conviction record under Federal or State laws relating to the manufacture, distribution, or dispensing of controlled substances.
- (4) Compliance with applicable State, Federal, or local laws relating to controlled substances.
- (5) Such other conduct which may threaten the public health and safety.

21 U.S.C. 823(f).

"[T]hese factors are considered in the disjunctive." *Robert A. Leslie*, 68 FR 15227, 15230 (2003). I may rely on any one factor, or a combination of factors, and may give each factor the weight I deem appropriate in determining whether to revoke an existing registration or to deny an application. *Id.* Moreover, I am "not required to make findings as to all of the factors." *Hoxie v. DEA*, 419 F.3d 477, 482 (6th Cir. 2005) (citing *Morall v. DEA*, 412 F.3d 165, 173–74 (DC Cir. 2005)).

With respect to a practitioner's registration, the Government bears the burden of proving by a preponderance of the evidence that the continuation of a registration would be inconsistent with the public interest. 21 CFR 1301.44(d). However, where the Government satisfies its *prima facie* burden by showing that a registrant has committed acts which are inconsistent with the public interest, the burden then shifts to the applicant to demonstrate why he can be entrusted with a registration. *Medicine Shoppe-Jonesboro*, 73 FR 364, 380 (2008).

In this matter, having considered the entire record and all of the factors, I agree with the ALJ's conclusions that the Government's evidence under factors two, four, and five makes out a *prima facie* that Respondent has committed acts which render her

registration inconsistent with the public interest.²⁰ ALJ at 29. I further agree with the ALJ's conclusion that Respondent has not accepted responsibility for her misconduct and has thus not rebutted the Government's *prima facie* case.

Factors Two, Four, and Five— Respondent's Experience in Dispensing Controlled Substances, Compliance With Applicable Laws Related to Controlled Substances, and Other Conduct Which May Threaten Public Health and Safety

The Government's case implicates each of these factors. As found above, during an approximately fifteen-month period, more than four million tablets of highly abused combination drugs containing hydrocodone, a schedule III controlled substance, were purchased by R.K., Respondent's office manager, using her and her husband's DEA registrations, approximately 2.3 million of which were ordered under her registration during 2005 alone. When DEA Investigators audited Respondent's and her husband's handling of the hydrocodone, they could account for only 167,000 tablets, leaving Respondent with over two million

²⁰I acknowledge that Respondent holds a valid medical license from the State of California. Moreover, the State Board has not taken action against her, nor made any recommendation in this matter (factor one). ALJ at 27.

Be that as it may, in enacting the CSA, Congress vested this Agency with "a separate oversight responsibility [apart from that which exists in state authorities] with respect to the handling of controlled substances." *Mortimer B. Levin*, 55 FR 8209, 8210 (1990). DEA has therefore long recognized that it has "a statutory obligation to make its independent determination as to whether the [continuation] of [a registration] would be in the public interest." *Id.* Accordingly, "a State's failure to take action against a registrant's medical license is not dispositive in determining whether the continuation of a registration is in the public interest." *Jayam Krishna-Iyer*, 74 FR 459, 461 (2009); see also *Levin*, 55 FR at 8210 (holding that practitioner's reinstatement by state board "is not dispositive" in public interest inquiry). Thus, that the Medical Board of California has taken no action with respect to Respondent's medical license is not dispositive in determining whether her continued registration is consistent with the public interest.

There is also no evidence that Respondent has been convicted of an offense related to the manufacture, distribution, or dispensing of controlled substances under either Federal or state law (factor three). ALJ at 27–28. However, while a history of criminal convictions for offenses involving the distribution or dispensing of controlled substances is a highly relevant consideration, there are any number of reasons why a registrant may not have been convicted of (or even prosecuted for) such an offense, and thus, the absence of such a conviction is of considerably less consequence in the public interest inquiry. *Krishna-Iyer*, 74 FR at 461; *Edmund Chein*, 72 FR 6580, 6593 n.22 (2007). Accordingly, that Respondent has not been convicted of an offense related to the distribution or dispensing of controlled substances is not dispositive of whether the continuation of her registration is consistent with the public interest.

tablets unaccounted for. In addition, law enforcement authorities found that R.K. had large quantities of hydrocodone in her possession during both a traffic stop and a search of her residence; Investigators also found a large quantity of cash in R.K.'s home.

At a minimum, the evidence clearly shows that Respondent violated the CSA's various recordkeeping provisions. Under Federal law, as soon as Respondent "first engage[d] in the * * * distribution[] or dispensing of controlled substances, and every second year thereafter," she was required "to make a complete and accurate record of all stocks thereof on hand." 21 U.S.C. 827(a)(1) (emphasis added); see also 21 CFR 1304.03(a)-(b), 1304.04(a), (g), 1304.11. However, as found above, during the audit, Respondent could not produce an inventory record for any of the controlled substances that were purchased under her registration.

Under Federal law, Respondent was also required to "maintain, on a current basis, a complete and accurate record of each such substance * * * received, sold, delivered, or otherwise disposed of by [her]." 21 U.S.C. 827(a)(3) (emphasis added). With respect to a practitioner who engages in dispensing, DEA regulations require that the record include "the number of units or volume of such finished form dispensed, * * * the name and address of the person to whom it was dispensed, the date of dispensing, the number of units or volume dispensed and the written or typewritten name or initials of the individual who dispensed * * * the substance on behalf of the dispenser." 21 CFR 1304.22(c); see also *id.*; 21 CFR 1304.03(a)-(b), 1304.04(a), (g), 1304.21. However, as found above, while large quantities of controlled substances were purchased under her registration throughout 2004 and 2005, Respondent had no dispensing logs for these years and the 2006 logs covered only from February 28 through March 15. Moreover, the logs that were maintained lacked required information such as the name of the dispensing doctor, the initials/name of the person doing the dispensing, and the address of the patient. GX 14.

Recordkeeping is one of the central features of the CSA's closed system of distribution. See *Paul H. Volkman*, 73 FR 30630, 30644 (2008), *pet. for rev. denied* 567 F.3d 215, 224 (6th Cir. 2009). "[A] registrant's accurate and diligent adherence to this obligation is absolutely essential to protect against the diversion of controlled substances." *Id.* Given that millions of dosage units of a highly abused controlled substance that were ordered under Respondent's

registration cannot be accounted for, her failure to comply with the CSA's recordkeeping requirements is egregious. This finding provides reason alone to conclude (with respect to factors two and four) that her continued registration "is inconsistent with the public interest." 21 U.S.C. 823(f); see also *Volkman*, 73 FR at 30644 (holding that recordkeeping violations alone supported denial of practitioner's application).

In her Exceptions to the ALJ's decision, Respondent argues that "she had no knowledge that her DEA Registration was being used by her husband or [R.K.] to order controlled substances" until DEA executed the search warrant on March 16, 2006. However, DEA has long held that a registrant is strictly liable for the misuse of her registration by a person to whom she entrusts her registration. See also *Harrell E. Robinson*, 74 FR 61370, 61377 (2009); *Paul H. Volkman*, 73 FR 30630, 30644 n.42 (2008); *Rose Mary Jacinta Lewis*, 72 FR 4035, 4041 (2007) (citing *Anthony L. Capelli*, 59 FR 42288 (1994)); *Leonard Merkow*, 60 FR 22075, 22076 (1995); *Capelli*, 59 FR at 49288. The record clearly supports the conclusion that Respondent entrusted her registration number to R.K. Thus, even if it were the case that Respondent was unaware of R.K.'s illegal activities, she is still strictly liable for R.K.'s misuse of her registration and her failure to properly monitor how her registration was being used. See *Jacinta Lewis*, 72 FR at 4041-42; *Robinson*, 74 FR at 61377; *Volkman*, 73 FR at 30644 n.42; *Capelli*, 59 FR at 49288.

Contrary to Respondent's understanding, the purpose of this proceeding is to protect the public interest, and in determining whether a registrant has committed acts which render her registration "inconsistent with the public interest," 21 U.S.C. 824(a)(4), the standards of *mens rea* for imposing criminal liability are not controlling. Accordingly, the Government is not required to show that Respondent had knowledge that her DEA Registration was being used by her husband or R.K. to order controlled substances.

In any event, the ALJ did not find credible Respondent's testimony that she was unaware of R.K.'s activities. ALJ at 30. I agree. Given the duration and scope of R.K.'s activities, Respondent's denial of knowledge is implausible.

In her Exceptions, Respondent also argues that the ALJ's decision "fails to distinguish between the drugs ordered under Respondent's DEA Registration and the drugs ordered under her husband's." Res. Exc. at 22. This is true.

However, as ultimate factfinder, I have reviewed the evidence and found that the ARCOS data shows that in 2005 alone, more than 2.27 million dosage units of hydrocodone were ordered under Respondent's registration, and that at most, 167,000 dosage units can be accounted for. Thus, Respondent is responsible for more than two million dosage units that cannot be accounted for and were likely diverted.

Respondent's misconduct thus clearly threatened public health and safety. See 21 U.S.C. § 823(f)(5). Moreover, the scope of the diversion is egregious. I therefore conclude that the Government has satisfied its *prima facie* burden of showing that Respondent has committed acts which render her registration is "inconsistent with the public interest." 21 U.S.C. 824(a)(4); 823(f).

Sanction

Under Agency precedent, where the Government has made out a *prima facie* case that a registrant has committed acts which render her "registration inconsistent with the public interest," she must "present[] sufficient mitigating evidence to assure the Administrator that [she] can be entrusted with the responsibility carried by such a registration." *Samuel S. Jackson*, 72 FR 23848, 23853 (2007) (quoting *Leo R. Miller*, 53 FR 21931, 21932 (1988)). "Moreover, because 'past performance is the best predictor of future performance,' *ALRA Labs., Inc. v. DEA*, 54 F.3d 450, 452 (7th Cir. 1995), this Agency has repeatedly held that where a registrant has committed acts inconsistent with the public interest, the registrant must accept responsibility for [her] actions and demonstrate that [she] will not engage in future misconduct." *Medicine Shoppe-Jonesborough*, 73 FR at 387.

During her testimony, Respondent continued to deny that she was responsible for the unaccounted-for hydrocodone and blamed her husband and R.K. Furthermore, the ALJ found incredible Respondent's denial that she had knowledge of R.K.'s illegal activities. DEA has repeatedly held that a registrant's lack of candor is a highly relevant consideration in determining the appropriate sanction. See *Hoxie v. DEA*, 419 F.3d 477, 483 (6th Cir. 2005); *Robert F. Hunt*, 75 FR 49995, 50004 (2010); *Rosemary Jacinta Lewis*, 72 FR 4035, 4042 (2007). Respondent's lack of candor further supports the revocation of her registration.

Given the scope of the diversion which likely occurred here and what the ALJ characterized as Respondent's minimal acceptance of responsibility

(which was limited to the statements of counsel in a post-hearing brief and which do not constitute evidence, see *INS v. Phinpathya*, 464 U.S. 183, 186 n.6 (1984)), I conclude that none of the “favorable facts” cited by the ALJ provide any reason to impose a sanction less than revocation. *Jayam Krishna-Iyer*, 74 FR 459, 463 (2009). Indeed, none of Respondent’s proposed remedial measures mitigate the egregious harm Respondent has caused to public health and safety.

I therefore conclude that it would be inconsistent with the public interest to grant her even a restricted registration. Accordingly, I will order that Respondent’s registration be revoked and that any pending application be denied.

Order

Pursuant to the authority vested in me by 21 U.S.C. 823(f) and 824(a), as well as by 28 CFR 0.100(b), I hereby order that DEA Certificate of Registration, AD9234446, issued to Satinder K. Dang, M.D., be, and it hereby is, revoked. I further order that any pending application of Satinder K. Dang, M.D., to renew or modify her registration be, and it hereby is, denied. This Order is effective September 22, 2011.

Dated: August 9, 2011.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Roots Pharmaceuticals, Inc.; Revocation of Registration

On September 9, 2010, the Deputy Assistant Administrator, Office of Diversion Control, Drug Enforcement Administration, issued an Order to Show Cause to Roots Pharmaceuticals, Inc. (Registrant), of American Fork, Utah. The Show Cause Order proposed the revocation of Registrant’s DEA Certificate of Registration BR9610571, which authorizes it to dispense controlled substances as a retail pharmacy, on the ground that Registrant’s state pharmacy and controlled substance licenses had expired on September 30, 2009, and that it therefore lacks authority under the laws of the State in which it is registered with DEA to dispense controlled substances. Show Cause Order at 1 (citing 21 U.S.C. 823(f) and 824(a)(3)). The Show Cause Order also notified Registrant of its right to request

a hearing on the allegations or to submit a written statement in lieu of a hearing, the procedures for doing either, and the consequence for failing to do either. *Id.* at 2.

The Government’s initial attempt to serve Registrant by certified mail was unsuccessful. Thereafter, as evidenced by the signed return receipt card, on January 14, 2011, the Government accomplished service by mailing the Show Cause Order to Registrant’s Registered Agent. On January 11, 2011, the Government also sent an electronic version of the Show Cause Order to Registrant’s Registered Agent at the e-mail address he had previously provided to the Agency. However, since the date of service of the Show Cause Order, no person has requested a hearing, or submitted a written statement in lieu of a hearing, on behalf of Registrant. Because thirty days have now passed since service of the Show Cause Order, I find that Registrant has waived its right to request a hearing or to submit a written statement in lieu of a hearing. See 21 CFR 1301.43(a), (c), and (d). I therefore issue this Decision and Final Order without a hearing based on relevant evidence contained in the record submitted by the Government. *Id.* § 1301.43(e).

Findings

Registrant is the holder of DEA Certificate of Registration BR9610571, which authorizes it to dispense controlled substances in schedules II through V as a retail pharmacy, at the registered location of 12 W 100N, Suite 201B, American Fork, Utah. GX A. Registrant’s registration does not expire until April 30, 2012. *Id.*

According to a Pharmacy Licensing Specialist with the State of Utah, Department of Commerce, Division of Occupational and Professional Licensing, Registrant’s Utah Pharmacy License and Utah Controlled Substance Dispensing License expired on September 30, 2009. GX B. Registrant did not renew either license. *Id.*

Discussion

Under the Controlled Substances Act (CSA), a practitioner must be currently authorized to handle controlled substances in the “jurisdiction in which [it] practices” in order to maintain a DEA registration. See 21 U.S.C. 802(21) (“[t]he term ‘practitioner’ means a * * * pharmacy * * * licensed, registered, or otherwise permitted, by * * * the jurisdiction in which [it] practices * * * to * * * dispense * * * a controlled substance in the course of professional practice”). See also *id.* § 823(f) (The Attorney General shall

register practitioners * * * to dispense * * * controlled substances * * * if the applicant is authorized to dispense * * * controlled substances under the laws of the State in which [it] practices.”). As these provisions make plain, possessing authority under state law to handle controlled substances is an essential condition for obtaining and maintaining a DEA registration.

The CSA further authorizes the Agency to revoke a registration “upon a finding that the registrant * * * has had [its] State license or registration suspended [or] revoked * * * and is no longer authorized by State law to engage in the * * * distribution [or] dispensing of controlled substances.” 21 U.S.C. 824(a)(3). Moreover, because holding state authority is a statutory requirement for registration as a practitioner, see 21 U.S.C. 802(21) and 823(f), DEA has held that revocation is warranted even when a registrant has merely allowed his state licenses to expire. *James Stephen Ferguson*, 75 FR 49994, 49995 (2010); *Mark L. Beck*, 64 FR 40899, 40900 (1999). See also *Anne Lazar Thorn*, 62 FR 12847, 12848 (1997) (“the controlling question is not whether a practitioner’s license to practice medicine in the state is suspended or revoked; rather, it is whether the Respondent is currently authorized to handle controlled substances”).

As found above, Registrant allowed its state pharmacy and controlled substance licenses to expire, and thus, it no longer holds authority under Utah law to dispense controlled substances. See Utah Code Ann. §§ 58–17b–302(1); 58–37–6(2)(a)(i). Accordingly, Registrant no longer satisfies the CSA’s requirement that it be currently “authorized to dispense controlled substances” under Utah law. 21 U.S.C. 823(f). Accordingly, its DEA registration will be revoked. *Id.* § 824(a)(3).

Order

Pursuant to the authority vested in me by 21 U.S.C. 824(a)(3), as well as 28 CFR 0.100(b), I order that DEA Certificate of Registration BR9610571, issued to Roots Pharmaceuticals, Inc., be, and it hereby is, revoked. I further order that any pending application of Roots Pharmaceuticals, Inc., to renew or modify its registration, be, and it hereby is, denied. This Order is effective September 19, 2011.

Dated: August 5, 2011.

Michele M. Leonhart,
Administrator.

DEPARTMENT OF LABOR**Employee Benefits Security Administration****Prohibited Transaction Exemptions and Grant of Individual Exemptions****Notice of Technical Correction**

Prohibited Transaction Exemptions and Grant of Individual Exemptions Involving D-11468 and D-11469, The Krispy Kreme Doughnut Corporation Retirement Savings Plan and The Krispy Kreme Profit-Sharing Stock Ownership Plan, 2011-14; D-11634, The United Brotherhood of Carpenters Pension Fund, 2011-15; L-11651 and L-11652, Verizon Communications, Inc. and Cellco Partnership, 2011-16, *et al.*

In the **Federal Register** notice document 2011-20342, beginning on page 49788 of the Thursday, August 11, 2011 issue, the prohibited transaction exemption numbers were incorrectly cited. Accordingly, the Department is hereby making the following technical corrections to above referenced grant notices:

1. On page 49788, in the third column, above the heading "Exemption," for "The Krispy Kreme Doughnut Corporation Retirement and Savings Plan (the Savings Plan) and the Krispy Kreme Profit-Sharing Stock Ownership Plan the KSOP; together, the Plans)" replace the bracketed text "[Prohibited Transaction Exemption 2011-10;]" with "[Prohibited Transaction Exemption 2011-14;]."

2. On page 49790, in the second column, above the heading "Exemption," for "The United Brotherhood of Carpenters Pension Fund (the Plan)," replace the bracketed text "[Prohibited Transaction Exemption 2011-11;]" with "[Prohibited Transaction Exemption 2011-15;]."

3. On page 49790, in the third column, above the heading "Exemption," for "Verizon Communications, Inc. (Verizon) and Cellco Partnership, doing business as Verizon Wireless (Verizon Wireless; collectively, the Applicants)," replace the bracketed text "[Prohibited Transaction Exemption 2011-12;]" with "[Prohibited Transaction Exemption 2011-16;]."

Signed at Washington, DC, this 12th day of August, 2011.

Ivan L. Strasfeld,

*Director of Exemption Determinations,
Employee Benefits Security Administration,
U.S. Department of Labor.*

[TA-W-75,056; TA-W-75,056A]

Ericsson Services, Inc., Currently Known as Ericsson, Inc., Service Assurance, Deployment and Integration, and Engineering and IS/IT Divisions, Including On-Site Leased Workers From Brook Consultants, Inc., Cortech LLC, Adex Corporation, American Cybersystems, Inc., Apeiron, Inc., Apex Systems, Inc., ARC Partners, Inc., Avion Systems, Inc., BCI Communications, Inc., Brosna Communications, Collaborative, LLC, Convergenz, LLC, Fusion Solutions, Inc., GCB Services LLC, Global Technology Associates, HCONN, Inc., J.M. Neil and Associates, Inc., JMA Chartered, Makro Technologies, Inc., Multi Services, Inc., Multipoint International, Nexius, Inc., Technisource, Inc., Teksystems, Inc., T-Force, Inc., Thinktel, Inc., United Information Technologies, Wireless Facilities, Inc., Overland Park, KS; Ericsson Services, Inc., Currently Known as Ericsson, Inc., Service Assurance, Deployment and Integration, and Engineering and IS/IT Divisions, Including On-Site Leased Workers From Convergenz, LLC, Kansas City, MO; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended ("Act"), 19 U.S.C. 2273, the Department of Labor issued a Certification of Eligibility to Apply for Worker Adjustment Assistance on February 3, 2011, applicable to workers of Ericsson Services, Inc., currently known as Ericsson, Inc., Service Assurance, Deployment and Integration, and Engineering and IS/IT Division, including on-site leased workers from Brook Consultants Inc., Cortech LLC, Adex Corporation, American Cybersystems Inc., Apeiron Inc., Apex Systems Inc., ARC Partners Inc., Avion Systems Inc., BCI Communications Inc., Brosna Communications, Collaborative LLC, Convergenz LLC, Corestaff Services LP, FMHC Corporation, Fusion Solutions Inc., GCB Services LLC, Global Technology Associates, HCONN Inc., J.M. Neil and Associates Inc., JMA Chartered, Makro Technologies Inc., Multi Services Inc., Multipoint International, Nexius Inc., Technisource Inc., Teksystems Inc., T-Force Inc., Thinktel Inc., United Information Technologies, and Wireless Facilities,

Inc., Overland Park, Kansas. The workers provide telecommunications services. The notice was published in the **Federal Register** on February 24, 2011 (76 FR 10399).

At the request of a company official, the Department reviewed the certification for workers of the subject firm.

New information provided by the company confirms that workers at the Kansas City, Missouri location of Ericsson Services, Inc., currently known as Ericsson, Inc., Service Assurance, Deployment and Integration, and Engineering and IS/IT Divisions are part of the same worker group as the group certified under TA-W-75,056. Moreover, worker separations at the Kansas City, Missouri facility are attributable to the same shift of services that was the basis for certification TA-W-75,056.

Based on these findings, the Department is amending this certification to include employees of the Kansas City, Missouri location of Ericsson Services, Inc., currently known as Ericsson, Inc., Service Assurance, Deployment and Integration, and Engineering and IS/IT Division, including on-site leased workers from Convergenz, LLC.

The amended notice applicable to TA-W-75,056 is hereby issued as follows:

All workers of Ericsson Services, Inc., currently known as Ericsson, Inc., Service Assurance, Deployment and Integration, and Engineering and IS/IT Divisions including on-site leased workers from Brook Consultants Inc., Cortech LLC, Adex Corporation, American Cybersystems Inc., Apeiron Inc., Apex Systems Inc., ARC Partners Inc., Avion Systems Inc., BCI Communications Inc., Brosna Communications, Collaborative LLC, Convergenz LLC, Corestaff Services LP, FMHC Corporation, Fusion Solutions Inc., GCB Services LLC, Global Technology Associates, HCONN Inc., J.M. Neil and Associates Inc., JMA Chartered, Makro Technologies Inc., Multi Services Inc., Multipoint International, Nexius, Inc., Technisource Inc., Teksystems Inc., T-Force Inc., Thinktel Inc., United Information Technologies, and Wireless Facilities, Inc. Overland Park, Kansas (TA-W-75,056) and Ericsson Services, Inc., currently known as Ericsson, Inc., Service Assurance, Deployment and Integration, and Engineering and IS/IT Divisions, including on-site leased workers from Convergenz, LLC, Kansas City, Missouri (TA-W-75,056A) who became totally or partially separated from employment on or after December 29, 2009, through February 3, 2013, and all workers in the group threatened with total or partial separation from employment on February 3, 2011 through February 3, 2013, are eligible to apply for adjustment assistance under

Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 4th day of August, 2011.

Del Min Amy Chen,

Certifying Officer, Office of Trade Adjustment Assistance.

Employment and Training Administration

[TA-W-70,520; TA-W-70,520A]

The Boeing Company; Amended Certification Regarding Eligibility To Apply for Worker Adjustment Assistance

In The Matter of: TA-W-70,520; The Boeing Company,

Commercial Aircraft Group; Including On-Site Leased Workers From Comforce Corporation, Adecco, Multax, Inconen, CTS, Hi-Tec, Woods, Ciber, Kelly Services, Analysts Internatinal Corp, Comsys, Filter LLC, Excell, Entegee, Chipton-Ross, Ian Martin, Can-Tech, IT Services, IDEX Solutions (NWCAD), Media Logic, HL YOH, Volt, PDS, CDI Corp, Teksystems, Innovative Systems, Inc., Murphy & Associates, Dell, PFI Tech, RMS and PSC Industrial Services, Inc.; Puget Sound, Washington.

In the matter of: TA-W-70,520A; The Boeing Company, Commercial Aircraft Group; Including On-Site Leased Workers From Comforce Corporation, Adecco, Multax, Inconen, CTS, Hi-Tec, Woods, Ciber, Kelly Services, Analysts Internatinal Corp, Comsys, Filter LLC, Excell, Entegee, Chipton-Ross, Ian Martin, Can-Tech, IT Services, IDEX Solutions (NWCAD), Media Logic, HL YOH, Volt, PDS, CDI Corp, Teksystems, Innovative Systems, Inc., Murphy & Associates, Dell, PFI Tech, RMS And PSC Industrial Services, Inc., Portland, Oregon; Amended Certification Regarding Eligibility To Apply For Worker Adjustment Assistance.

In accordance with section 223 of the Trade Act of 1974, as amended ("Act"), 19 U.S.C. 2273, the Department of Labor issued a Certification of Eligibility to apply for Worker Adjustment Assistance on October 19, 2009, applicable to workers of The Boeing Company, Commercial Aircraft Group, Puget Sound, Washington, (TA-W-70,520), and The Boeing Company, Commercial Aircraft Group, Portland, Oregon (TA-W-70,520A). The notice was published in the **Federal Register** on December 11, 2009 (74 FR 65794-65795). The notice was amended on January 8, 2010 and March 26, 2010 to include on-site leased workers. The notices were published in the **Federal Register** on January 20, 2010 (75 FR 3250-3251) and on April

19, 2010 (75 FR 20385-20386), respectively. The workers are engaged in activities related to the production of large commercial aircraft.

The company reports that on-site leased workers from PSC Industrial Services, Inc. were employed on-site at both the Puget Sound, Washington and Portland, Oregon locations of The Boeing Company, Commercial Aircraft Group. The Department has determined that these workers were sufficiently under the control of the subject firm to be considered leased workers.

Based on these findings, the Department is amending the certification to include leased workers from PSC Industrial Services, Inc. working on-site at the Puget Sound, Washington and Portland, Oregon locations of The Boeing Company, Commercial Aircraft Group.

The amended notice applicable to the TA-W-70,520 and TA-W 70,520A are hereby issued as follows:

All workers of The Boeing Company, Commercial Aircraft Group, including on-site leased workers from Comforce Corporation, Adecco, Multax, Inconen, CTS, Hi-Tec, Woods, Ciber, Kelly Services, Analysts Internatinal Corp, Comsys, Filter LLC, Excell, Entegee, Chipton-Ross, Ian Martin, Can-Tech, IT Services, IDEX Solutions (NW CAD), Media Logic, HL YOH, Volt, PDS, CDI Corp, Teksystems, Innovative Systems, Inc., Murphy & Associates, Dell, PFI Tech, RMS and PSC Industrial Services, Inc., Puget Sound, Washington (TA-W-70,520), and Portland, Oregon (TA-W-70,520A), who became totally or partially separated from employment on or after May 22, 2008, through October 19, 2011, and all workers in the group threatened with total or partial separation from employment on the date of certification, are eligible to apply for adjustment assistance under Chapter 2 of Title II of the Trade Act of 1974, as amended.

Signed in Washington, DC, this 4th day of August, 2011.

Michael W. Jaffe,

Certifying Officer, Office of Trade Adjustment Assistance.

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended (19 U.S.C. 2273) the Department of Labor herein presents summaries of

determinations regarding eligibility to apply for trade adjustment assistance for workers (TA-W) number and alternative trade adjustment assistance (ATAA) by (TA-W) number issued during the period of July 25, 2011 through July 29, 2011.

In order for an affirmative determination to be made for workers of a primary firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(a) of the Act must be met.

I. Section (a)(2)(A) all of the following must be satisfied:

A. A significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm, have become totally or partially separated, or are threatened to become totally or partially separated;

B. the sales or production, or both, of such firm or subdivision have decreased absolutely; and

C. increased imports of articles like or directly competitive with articles produced by such firm or subdivision have contributed importantly to such workers' separation or threat of separation and to the decline in sales or production of such firm or subdivision; or

II. Section (a)(2)(B) both of the following must be satisfied:

A. A significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm, have become totally or partially separated, or are threatened to become totally or partially separated;

B. There has been a shift in production by such workers' firm or subdivision to a foreign country of articles like or directly competitive with articles which are produced by such firm or subdivision; and

C. One of the following must be satisfied:

1. The country to which the workers' firm has shifted production of the articles is a party to a free trade agreement with the United States;

2. The country to which the workers' firm has shifted production of the articles to a beneficiary country under the Andean Trade Preference Act, African Growth and Opportunity Act, or the Caribbean Basin Economic Recovery Act; or

3. There has been or is likely to be an increase in imports of articles that are like or directly competitive with articles which are or were produced by such firm or subdivision.

Also, in order for an affirmative determination to be made for secondarily affected workers of a firm and a certification issued regarding

eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(b) of the Act must be met.

(1) Significant number or proportion of the workers in the workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) The workers' firm (or subdivision) is a supplier or downstream producer to a firm (or subdivision) that employed a group of workers who received a certification of eligibility to apply for trade adjustment assistance benefits and such supply or production is related to the article that was the basis for such certification; and

(3) Either—

(A) The workers' firm is a supplier and the component parts it supplied for the firm (or subdivision) described in paragraph (2) accounted for at least 20 percent of the production or sales of the workers' firm; or

(B) A loss or business by the workers' firm with the firm (or subdivision) described in paragraph (2) contributed importantly to the workers' separation or threat of separation.

In order for the Division of Trade Adjustment Assistance to issue a certification of eligibility to apply for Alternative Trade Adjustment Assistance (ATAA) for older workers, the group eligibility requirements of Section 246(a)(3)(A)(ii) of the Trade Act must be met.

1. Whether a significant number of workers in the workers' firm are 50 years of age or older.

2. Whether the workers in the workers' firm possess skills that are not easily transferable.

3. The competitive conditions within the workers' industry (i.e., conditions within the industry are adverse).

Affirmative Determinations for Worker Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of Section 222(b) (supplier to a firm whose workers are certified eligible to apply for TAA) of the Trade Act have been met.

TA-W-80,093; The Pearlson Company, LLC, Montpelier, Ohio: March 7, 2010.

Affirmative Determinations for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of Section 222(a)(2)(A) (increased imports) and Section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA-W-80,002; Babcock & Wilcox Power Generation Group, Inc., Barberton, Ohio: February 15, 2010

TA-W-80,046; General Aluminum, Rome, Georgia: March 14, 2010

TA-W-80,226; Camco Cedar, Tacoma, Washington: June 28, 2010

The following certifications have been issued. The requirements of Section 222(a)(2)(B) (shift in production) and Section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA-W-80,107; Muller Martini Manufacturing Corp., Newport News, Virginia: April 13, 2010

TA-W-80,149; Doral Manufacturing, Inc., Doral, Florida: July 1, 2011

TA-W-80,158; Flextronics, San Diego, California: May 3, 2010

TA-W-80,169; Boardman Molded Products, Kessler Marketing Group, Youngstown, Ohio: April 30, 2010

TA-W-80,181; L'Oreal, USA Products, Clark, New Jersey: May 9, 2010

TA-W-80,237; Inteva Products, LLC, Gadsden, Alabama: June 15, 2010

TA-W-80,255; Technicolor Business Group, Camarillo, California: October 3, 2011

TA-W-80,259; Welded Tube of Canada, Inc., Delta, Ohio: June 15, 2010

Negative Determinations for Alternative Trade Adjustment Assistance

In the following cases, it has been determined that the requirements of 246(a)(3)(A)(ii) have not been met for the reasons specified.

The Department has determined that criterion (1) of Section 246 has not been met. The firm does not have a significant number of workers 50 years of age or older.

TA-W-80,093; The Pearlson Company, LLC, Montpelier, Ohio: Negative Determinations For Worker Adjustment Assistance And Alternative Trade Adjustment Assistance

In the following cases, the investigation revealed that the eligibility criteria for worker adjustment assistance have not been met for the reasons specified.

Because the workers of the firm are not eligible to apply for TAA, the workers cannot be certified eligible for ATAA.

The investigation revealed that criteria (a)(2)(A)(I.A.) and (a)(2)(B)(II.A.) (employment decline) have not been met.

TA-W-208; General Motors Components Holdings, LLC, Rochester, New York
TA-W-80,247; DMAX Ltd., LLC, Moraine, Ohio

The investigation revealed that criteria (a)(2)(A)(I.C.) (increased imports) and (a)(2)(B)(II.B.) (shift in production to a foreign country) have not been met.

TA-W-80,015; ACS Commercial Solutions, Inc., Liberty, Kentucky

TA-W-80,028; Affiliated Computer Services, Inc., Hillsboro, Oregon

TA-W-80,052; Lancaster Eagle-Gazette, Lancaster, Ohio

TA-W-80,053; Shiloh Steel Fabricators, Bethel Heights, Arkansas

TA-W-80,057; Orchard Brands, Athens, Georgia

TA-W-80,266; BAE Systems, Survivability Systems, LLC, Fairfield, Ohio

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-80,013; Robb & Stucky Limited, LLP, Fort Myers, Florida

Determinations Terminating Investigations Of Petitions For Worker Adjustment Assistance

After notice of the petitions was published in the **Federal Register** and on the Department's Web site, as required by Section 221 of the Act (19 USC 2271), the Department initiated investigations of these petitions.

The following determinations terminating investigations were issued because the petitioning groups of workers are covered by active certifications. Consequently, further investigation in these cases would serve no purpose since the petitioning group of workers cannot be covered by more than one certification at a time.

TA-W-80,012; Siemens Medical Solutions USA, Inc., Malvern PA
TA-W-80,171; Panasonic Corporation of North America, Rolling Meadow, Illinois

I hereby certify that the aforementioned determinations were issued during the period of *July 25, 2011 through July 29, 2011*. Copies of these determinations may be requested under the Freedom of Information Act. Requests may be submitted by fax, courier services, or mail to FOIA Disclosure Officer, Office of Trade Adjustment Assistance (ETA),

U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 or tofoiarequest@dol.gov. These determinations also are available on the Department's Web site at <http://www.doleta.gov/tradeact> under the searchable listing of determinations.

Dated: August 5, 2011.

Del Min Amy Chen,

Certifying Officer, Office, Trade Adjustment Assistance.

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of Determinations Regarding Eligibility To Apply for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In accordance with Section 223 of the Trade Act of 1974, as amended (19 U.S.C. 2273) the Department of Labor herein presents summaries of determinations regarding eligibility to apply for trade adjustment assistance for workers (TA-W) number and alternative trade adjustment assistance (ATAA) by (TA-W) number issued during the period of *August 1, 2011 through August 5, 2011*.

In order for an affirmative determination to be made for workers of a primary firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(a) of the Act must be met.

I. Section (a)(2)(A) all of the following must be satisfied:

A. A significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm, have become totally or partially separated, or are threatened to become totally or partially separated;

B. The sales or production, or both, of such firm or subdivision have decreased absolutely; and

C. Increased imports of articles like or directly competitive with articles produced by such firm or subdivision have contributed importantly to such workers' separation or threat of separation and to the decline in sales or production of such firm or subdivision; or

II. Section (a)(2)(B) both of the following must be satisfied:

A. A significant number or proportion of the workers in such workers' firm, or an appropriate subdivision of the firm, have become totally or partially separated, or are threatened to become totally or partially separated;

B. There has been a shift in production by such workers' firm or subdivision to a foreign country of articles like or directly competitive with articles which are produced by such firm or subdivision; and

C. One of the following must be satisfied:

1. The country to which the workers' firm has shifted production of the articles is a party to a free trade agreement with the United States;

2. The country to which the workers' firm has shifted production of the articles to a beneficiary country under the Andean Trade Preference Act, African Growth and Opportunity Act, or the Caribbean Basin Economic Recovery Act; or

3. There has been or is likely to be an increase in imports of articles that are like or directly competitive with articles which are or were produced by such firm or subdivision.

Also, in order for an affirmative determination to be made for secondarily affected workers of a firm and a certification issued regarding eligibility to apply for worker adjustment assistance, each of the group eligibility requirements of Section 222(b) of the Act must be met.

(1) Significant number or proportion of the workers in the workers' firm or an appropriate subdivision of the firm have become totally or partially separated, or are threatened to become totally or partially separated;

(2) The workers' firm (or subdivision) is a supplier or downstream producer to a firm (or subdivision) that employed a group of workers who received a certification of eligibility to apply for trade adjustment assistance benefits and such supply or production is related to the article that was the basis for such certification; and

(3) Either—

(A) The workers' firm is a supplier and the component parts it supplied for the firm (or subdivision) described in paragraph (2) accounted for at least 20 percent of the production or sales of the workers' firm; or

(B) A loss of business by the workers' firm with the firm (or subdivision) described in paragraph (2) contributed importantly to the workers' separation or threat of separation.

In order for the Division of Trade Adjustment Assistance to issue a certification of eligibility to apply for Alternative Trade Adjustment Assistance (ATAA) for older workers, the group eligibility requirements of Section 246(a)(3)(A)(ii) of the Trade Act must be met.

1. Whether a significant number of workers in the workers' firm are 50 years of age or older.

2. Whether the workers in the workers' firm possess skills that are not easily transferable.

3. The competitive conditions within the workers' industry (*i.e.*, conditions within the industry are adverse).

Affirmative Determinations for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

The following certifications have been issued. The date following the company name and location of each determination references the impact date for all workers of such determination.

The following certifications have been issued. The requirements of Section 222(a)(2)(A) (increased imports) and Section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA-W-80,081; SuperMedia, LLC, Los Alamitos, Texas; March 29, 2010.

TA-W-80,130; Oak Patch Gifts, LLC, Eugene, Oregon; April 19, 2010.

TA-W-80,133; Nevion USA, Inc., Oxnard, California; April 26, 2010.

TA-W-80,276; Foster Needle Co., Inc., Manitowoc, Wisconsin; June 30, 2010.

TA-W-80,296; B&H Flowers, Inc., Watsonville, California; July 31, 2010.

The following certifications have been issued. The requirements of Section 222(a)(2)(B) (shift in production) and Section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA-W-80,254; PI. US Holding, Inc., Fort Smith, Arkansas; June 24, 2010.

TA-W-80,277; Vermont Transformer, Inc., Saint Albans, Vermont; July 7, 2010.

The following certifications have been issued. The requirements of Section 222(b) (supplier to a firm whose workers are certified eligible to apply for TAA) and Section 246(a)(3)(A)(ii) of the Trade Act have been met.

TA-W-80,210; United Solar Ovonic, Greenville, Michigan; June 1, 2010.

TA-W-80,283; Craftwood, Inc., High Point, North Carolina; February 7, 2011.

Negative Determinations for Worker Adjustment Assistance and Alternative Trade Adjustment Assistance

In the following cases, the investigation revealed that the eligibility criteria for worker adjustment assistance have not been met for the reasons specified.

Because the workers of the firm are not eligible to apply for TAA, the

workers cannot be certified eligible for ATAA.

The investigation revealed that criteria (a)(2)(A)(I.C.) (increased imports) and (a)(2)(B)(II.B.) (shift in production to a foreign country) have not been met.

TA-W-80,066; *Ivex Packaging Paper, LLC, Joliet, Illinois.*

TA-W-80,195; *Preferred Dental Lab, Roseland, New Jersey.*

The workers' firm does not produce an article as required for certification under Section 222 of the Trade Act of 1974.

TA-W-80,008; *Twin County Ford, Woodlawn Virginia.*

TA-W-80,152; *Compone Services, LTD, Ithaca, New York.*

TA-W-80,154; *State Street Corporation, Irvine, California.*

TA-W-80,192; *Sykes Enterprises, Inc., Morganfield, Kentucky.*

TA-W-80,257; *Liz Claiborne, Inc., West Chester, Ohio.*

TA-W-80,281; *Priceline.com, Inc., Grand Rapids, Michigan.*

TA-W-80,800; *Rancho La Puerta, LLC, San Diego, California.*

I hereby certify that the aforementioned determinations were issued during the period of August 1, 2011 through August 5, 2011. Copies of these determinations may be requested under the Freedom of Information Act. Requests may be submitted by fax, courier services, or mail to FOIA Disclosure Officer, Office of Trade Adjustment Assistance (ETA), U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210 or tofoiarequest@dol.gov. These determinations also are available on the Department's Web site at <http://www.doleta.gov/tradeact> under the searchable listing of determinations.

BILLING CODE 4510-FN-P

DEPARTMENT OF LABOR

Employment and Training Administration

Request for Certification of Compliance; Rural Industrialization Loan and Grant Program

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

SUMMARY: The Employment and Training Administration is issuing this notice to announce the receipt of a "Certification of Non-Relocation and Market and Capacity Information

Report" (Form 4279-2) for the following:

Applicant/Location: LWRC International, LLC, Cambridge, Maryland.

Principal Product/Purpose: The loan, guarantee, or grant application is to support the expansion of business to the international market. The project will be located in Cambridge, Maryland. The NAICS industry code for this enterprise is: 332994 (rifles and services).

DATES: All interested parties may submit comments in writing no later than September 1, 2011.

Copies of adverse comments received will be forwarded to the applicant noted above.

ADDRESSES: Address all comments concerning this notice to Anthony D. Dais, U.S. Department of Labor, Employment and Training Administration, 200 Constitution Avenue, NW., Room S-4231, Washington, DC 20210; or e-mail Dais.Anthony@dol.gov; or transmit via fax (202) 693-3015 (this is not a toll-free number).

FOR FURTHER INFORMATION CONTACT: Anthony D. Dais, at telephone number (202) 693-2784 (this is not a toll-free number).

SUPPLEMENTARY INFORMATION: Section 188 of the Consolidated Farm and Rural Development Act of 1972, as established under 29 CFR part 75, authorizes the United States Department of Agriculture to make or guarantee loans or grants to finance industrial and business activities in rural areas. The Secretary of Labor must review the application for financial assistance for the purpose of certifying to the Secretary of Agriculture that the assistance is not calculated, or likely, to result in: (a) A transfer of any employment or business activity from one area to another by the loan applicant's business operation; or, (b) An increase in the production of goods, materials, services, or facilities in an area where there is not sufficient demand to employ the efficient capacity of existing competitive enterprises unless the financial assistance will not have an adverse impact on existing competitive enterprises in the area. The Employment and Training Administration within the Department of Labor is responsible for the review and certification process. Comments should address the two bases for certification and, if possible, provide data to assist in the analysis of these issues.

Signed: at Washington, DC this 15th day of August, 2011.

Jane Oates,

Assistant Secretary for Employment and Training.

BILLING CODE 4510-FN-P

POSTAL REGULATORY COMMISSION

[Docket No. A2011-44; Order No. 800]

Post Office Closing

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: This document informs the public that an appeal of the closing of the Grant, Iowa post office has been filed. It identifies preliminary steps and provides a procedural schedule. Publication of this document will allow the Postal Service, petitioners, and others to take appropriate action.

DATES: *Administrative record due (from Postal Service):* August 26, 2011; *deadline for notices to intervene:* September 6, 2011. See the Procedural Schedule in the **SUPPLEMENTARY INFORMATION** section for other dates of interest.

ADDRESSES: Submit comments electronically by accessing the "Filing Online" link in the banner at the top of the Commission's Web site (<http://www.prc.gov>) or by directly accessing the Commission's Filing Online system at <https://www.prc.gov/prc-pages/filing-online/login.aspx>. Commenters who cannot submit their views electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section as the source for case-related information for advice on alternatives to electronic filing.

FOR FURTHER INFORMATION CONTACT: Stephen L. Sharfman, General Counsel, at 202-789-6820 (case-related information) or DocketAdmins@prc.gov (electronic filing assistance).

SUPPLEMENTARY INFORMATION: Notice is hereby given that, pursuant to 39 U.S.C. 404(d), on August 11, 2011, the Commission received a petition for review of the Postal Service's determination to close the post office in Grant, Iowa. The petition was filed by Laurenda Mifflin (Petitioner) and is postmarked August 5, 2011. The Commission hereby institutes a proceeding under 39 U.S.C. 404(d)(5) and establishes Docket No. A2011-44 to consider Petitioner's appeal. If Petitioner would like to further explain her position with supplemental information or facts, Petitioner may

either file a Participant Statement on PRC Form 61 or file a brief with the Commission no later than September 15, 2011.

Categories of issues apparently raised. Petitioner contends that: (1) The Postal Service failed to consider the effect of the closing on the community (see 39 U.S.C. 404(d)(2)(A)(i)); and (2) the Postal Service failed to adequately consider the economic savings resulting from the closure (see 39 U.S.C. 404(d)(2)(A)(iv)).

After the Postal Service files the administrative record and the Commission reviews it, the Commission may find that there are more legal issues than those set forth above, or that the Postal Service's determination disposes of one or more of those issues. The deadline for the Postal Service to file the applicable administrative record with the Commission is August 26, 2011. See 39 CFR 3001.113. In addition, the due date for any responsive pleading by the Postal Service to this notice is August 26, 2011.

Availability; Web site posting. The Commission has posted the appeal and supporting material on its Web site at <http://www.prc.gov>. Additional filings in this case and participants' submissions also will be posted on the Commission's Web site, if provided in electronic format or amenable to conversion, and not subject to a valid protective order. Information on how to use the Commission's Web site is available online or by contacting the Commission's webmaster via telephone

at 202-789-6873 or via electronic mail at prc-webmaster@prc.gov.

The appeal and all related documents are also available for public inspection in the Commission's docket section. Docket section hours are 8 a.m. to 4:30 p.m., eastern time, Monday through Friday, except on Federal government holidays. Docket section personnel may be contacted via electronic mail at prc-dockets@prc.gov or via telephone at 202-789-6846.

Filing of documents. All filings of documents in this case shall be made using the Internet (Filing Online) pursuant to Commission rules 9(a) and 10(a) at the Commission's Web site, <http://www.prc.gov>, unless a waiver is obtained. See 39 CFR 3001.9(a) and 3001.10(a). Instructions for obtaining an account to file documents online may be found on the Commission's Web site or by contacting the Commission's docket section at prc-dockets@prc.gov or via telephone at 202-789-6846.

The Commission reserves the right to redact personal information which may infringe on an individual's privacy rights from documents filed in this proceeding.

Intervention. Persons, other than Petitioner and respondent, wishing to be heard in this matter are directed to file a notice of intervention. See 39 CFR 3001.111(b). Notices of intervention in this case are to be filed on or before September 6, 2011. A notice of intervention shall be filed using the Internet (Filing Online) at the Commission's Web site unless a waiver

is obtained for hardcopy filing. See 39 CFR 3001.9(a) and 3001.10(a).

Further procedures. By statute, the Commission is required to issue its decision within 120 days from the date it receives the appeal. See 39 U.S.C. 404(d)(5). A procedural schedule has been developed to accommodate this statutory deadline. In the interest of expedition, in light of the 120-day decision schedule, the Commission may request the Postal Service or other participants to submit information or memoranda of law on any appropriate issue. As required by the Commission rules, if any motions are filed, responses are due 7 days after any such motion is filed. See 39 CFR 3001.21.

It is ordered:

1. The Postal Service shall file the applicable administrative record regarding this appeal no later than August 26, 2011.
2. Any responsive pleading by the Postal Service to this notice is due no later than August 26, 2011.
3. The procedural schedule listed below is hereby adopted.
4. Pursuant to 39 U.S.C. 505, Emmett Rand Costich is designated officer of the Commission (Public Representative) to represent the interests of the general public.
5. The Secretary shall arrange for publication of this notice and order in the **Federal Register**.

By the Commission.
Ruth Ann Abrams,
Acting Secretary.

PROCEDURAL SCHEDULE

August 11, 2011	Filing of Appeal.
August 26, 2011	Deadline for the Postal Service to file the applicable administrative record in this appeal.
August 26, 2011	Deadline for the Postal Service to file any responsive pleading.
September 6, 2011	Deadline for notices to intervene (see 39 CFR 3001.111(b)).
September 15, 2011	Deadline for Petitioner's Form 61 or initial brief in support of petition (see 39 CFR 3001.115(a) and (b)).
October 5, 2011	Deadline for answering brief in support of the Postal Service (see 39 CFR 3001.115(c)).
October 20, 2011	Deadline for reply briefs in response to answering briefs (see 39 CFR 3001.115(d)).
October 27, 2011	Deadline for motions by any party requesting oral argument; the Commission will schedule oral argument only when it is a necessary addition to the written filings (see 39 CFR 3001.116).
December 5, 2011	Expiration of the Commission's 120-day decisional schedule (see 39 U.S.C. 404(d)(5)).

POSTAL REGULATORY COMMISSION

[Docket No. A2011-45; Order No. 801]

Post Office Closing

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: This document informs the public that an appeal of the closing of the Sublime, Texas post office has been filed. It identifies preliminary steps and provides a procedural schedule. Publication of this document will allow the Postal Service, petitioners, and others to take appropriate action.

DATES: *Administrative record due (from Postal Service):* August 26, 2011; *deadline for notices to intervene:* September 6, 2011. See the Procedural Schedule in the **SUPPLEMENTARY INFORMATION** section for other dates of interest.

ADDRESSES: Submit comments electronically by accessing the "Filing Online" link in the banner at the top of the Commission's Web site (<http://www.prc.gov>) or by directly accessing the Commission's Filing Online system at <https://www.prc.gov/prc-pages/filing-online/login.aspx>. Commenters who cannot submit their views electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section as the source for case-related information for advice on alternatives to electronic filing.

FOR FURTHER INFORMATION CONTACT: Stephen L. Sharfman, General Counsel, at 202-789-6820 (case-related information) or DocketAdmins@prc.gov (electronic filing assistance).

SUPPLEMENTARY INFORMATION: Notice is hereby given that, pursuant to 39 U.S.C. 404(d), on August 11, 2011, the Commission received a petition for review of the Postal Service's determination to close the post office in Sublime, Texas. The petition was filed by Betty Bunch on behalf of the Save the Sublime Post Office Committee (Petitioner) and is postmarked August 6, 2011. The Commission hereby institutes a proceeding under 39 U.S.C. 404(d)(5) and establishes Docket No. A2011-45 to consider Petitioner's appeal. If Petitioner would like to further explain her position with supplemental information or facts, Petitioner may either file a Participant Statement on PRC Form 61 or file a brief with the Commission no later than September 15, 2011.

Categories of issues apparently raised. Petitioner contends that the Postal Service failed to consider whether or not it will continue to provide a maximum degree of effective and regular postal services to the

community. See 39 U.S.C. 404(d)(2)(A)(iii).

After the Postal Service files the administrative record and the Commission reviews it, the Commission may find that there are more legal issues than the one set forth above, or that the Postal Service's determination disposes of one or more of those issues. The deadline for the Postal Service to file the applicable administrative record with the Commission is August 26, 2011. See 39 CFR 3001.113. In addition, the due date for any responsive pleading by the Postal Service to this notice is August 26, 2011.

Availability; Web site posting. The Commission has posted the appeal and supporting material on its Web site at <http://www.prc.gov>. Additional filings in this case and participants' submissions also will be posted on the Commission's Web site, if provided in electronic format or amenable to conversion, and not subject to a valid protective order. Information on how to use the Commission's Web site is available online or by contacting the Commission's webmaster via telephone at 202-789-6873 or via electronic mail at prc-webmaster@prc.gov.

The appeal and all related documents are also available for public inspection in the Commission's docket section. Docket section hours are 8 a.m. to 4:30 p.m., eastern time, Monday through Friday, except on Federal government holidays. Docket section personnel may be contacted via electronic mail at prc-dockets@prc.gov or via telephone at 202-789-6846.

Filing of documents. All filings of documents in this case shall be made using the Internet (Filing Online) pursuant to Commission rules 9(a) and 10(a) at the Commission's Web site, <http://www.prc.gov>, unless a waiver is obtained. See 39 CFR 3001.9(a) and 3001.10(a). Instructions for obtaining an account to file documents online may be found on the Commission's Web site or by contacting the Commission's docket section at prc-dockets@prc.gov or via telephone at 202-789-6846.

The Commission reserves the right to redact personal information which may infringe on an individual's privacy rights from documents filed in this proceeding.

Intervention. Persons, other than Petitioner and respondent, wishing to be heard in this matter are directed to file a notice of intervention. See 39 CFR 3001.111(b). Notices of intervention in this case are to be filed on or before September 6, 2011. A notice of intervention shall be filed using the Internet (Filing Online) at the Commission's Web site unless a waiver is obtained for hardcopy filing. See 39 CFR 3001.9(a) and 3001.10(a).

Further procedures. By statute, the Commission is required to issue its decision within 120 days from the date it receives the appeal. See 39 U.S.C. 404(d)(5). A procedural schedule has been developed to accommodate this statutory deadline. In the interest of expedition, in light of the 120-day decision schedule, the Commission may request the Postal Service or other participants to submit information or memoranda of law on any appropriate issue. As required by the Commission rules, if any motions are filed, responses are due 7 days after any such motion is filed. See 39 CFR 3001.21.

It is ordered:

1. The Postal Service shall file the applicable administrative record regarding this appeal no later than August 26, 2011.
2. Any responsive pleading by the Postal Service to this notice is due no later than August 26, 2011.
3. The procedural schedule listed below is hereby adopted.
4. Pursuant to 39 U.S.C. 505, Cassandra L. Hicks is designated officer of the Commission (Public Representative) to represent the interests of the general public.
5. The Secretary shall arrange for publication of this notice and order in the **Federal Register**.

By the Commission.

Ruth Ann Abrams,
Acting Secretary.

PROCEDURAL SCHEDULE

August 11, 2011	Filing of Appeal
August 26, 2011	Deadline for the Postal Service to file the applicable administrative record in this appeal.
August 26, 2011	Deadline for the Postal Service to file any responsive pleading.
September 6, 2011	Deadline for notices to intervene (see 39 CFR 3001.111(b)).
September 15, 2011	Deadline for Petitioner's Form 61 or initial brief in support of petition (see 39 CFR 3001.115(a) and (b)).
October 5, 2011	Deadline for answering brief in support of the Postal Service (see 39 CFR 3001.115(c)).
October 20, 2011	Deadline for reply briefs in response to answering briefs (see 39 CFR 3001.115(d)).

PROCEDURAL SCHEDULE—Continued

October 27, 2011	Deadline for motions by any party requesting oral argument; the Commission will schedule oral argument only when it is a necessary addition to the written filings (see 39 CFR 3001.116).
December 6, 2011	Expiration of the Commission's 120-day decisional schedule (see 39 U.S.C. 404(d)(5)).

[FR Doc. 2011-21023 Filed 8-17-11; 8:45 am]

BILLING CODE 7710-FW-P

SECURITIES AND EXCHANGE COMMISSION**Submission for OMB Review; Comment Request**

Upon Written Request, Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549.

Extension:

Rule 17f-2(e); SEC File No. 270-37; OMB Control No. 3235-0031.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget a request for approval of extension of the previously approved collection of information provided for in Rule 17f-2(e) (17 CFR 240.17f-2(e)) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Rule 17f-2(e) requires members of national securities exchanges, brokers, dealers, registered transfer agents, and registered clearing agencies claiming exemption from the fingerprinting requirements of Rule 17f-2 to prepare and maintain a statement supporting their claim exemption. There is no filing requirement. Instead, Rule 17f-2(e)(2) requires covered entities to make and keep current a copy of the notice required by Rule 17f-2(e) in an easily accessible place at the organization's principal office and at the office employing the persons for whom exemptions are claimed and shall be made available upon request for inspection by the Commission, appropriate regulatory agency (if not the Commission) or other designated examining authority. Notices prepared pursuant to Rule 17f-2(e) must be maintained for as long as the covered entity claims an exemption from the fingerprinting requirements of Rule 17f-2. The recordkeeping requirement under Rule 17f-2(e) assists the Commission and other regulatory agencies with ensuring compliance with Rule 17f-2.

This rule does not involve the collection of confidential information.

We estimate that approximately 75 respondents will incur an average burden of 30 minutes per year to comply with this rule, which represents the time it takes for a staff person at a covered entity to properly document a claimed exemption from the fingerprinting requirements of Rule 17f-2, and properly retain that document according to the entities record retention policies and procedures. The total annual burden for all covered entities is approximately 38 hours (75 entities × .5 hours).

Written comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's estimates of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

The Commission may not conduct or sponsor a collection of information unless it displays a currently valid control number.

Background documentation for this information collection may be viewed at the following link, <http://www.reginfo.gov>. Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an e-mail to: Shagufta_Ahmed@omb.eop.gov; and (ii) Thomas Bayer, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 6432 General Green Way, Alexandria, VA 22312 or send an e-mail to: PRA_Mailbox@sec.gov. Comments must be submitted to OMB within 30 days of this notice.

August 12, 2011.

Elizabeth M. Murphy,
Secretary.

[FR Doc. 2011-21030 Filed 8-17-11; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION**Submission for OMB Review; Comment Request**

Upon Written Request Copies Available From: Securities and Exchange Commission, Office of Investor Education and Advocacy, Washington, DC 20549-0213.

Extension:

Rule 17a-10; SEC File No. 270-154; OMB Control No. 3235-0122.

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) ("PRA"), the Securities and Exchange Commission ("Commission") has submitted to the Office of Management and Budget ("OMB") a request for approval of extension of the previously approved collection of information provided for in Rule 17a-10 (17 CFR 240.17a-10) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) ("Exchange Act").

Paragraph (a)(1) of Rule 17a-10 generally requires broker-dealers that are exempted from the requirement to file monthly and quarterly reports pursuant to paragraph (a) of Exchange Act Rule 17a-5 (17 CFR 240.17a-5) to file with the Commission the Facing Page, a Statement of Income (Loss), and balance sheet from Part IIA of Form X-17A-5¹ (17 CFR 249.617), and Schedule I of Form X-17A-5 not later than 17 business days after the end of each calendar year.

Paragraph (a)(2) of Rule 17a-10 requires a broker-dealer subject to Rule 17a-5(a) to submit Schedule I of Form X-17A-5 with its Form X-17A-5 for the calendar quarter ending December 31 of each year. The burden associated with filing Schedule I of Form X-17A-5 is accounted for in the PRA filing associated with Rule 17a-5.

¹ Form X-17A-5 is the Financial and Operational Combined Uniform Single Report ("FOCUS Report"), which is used by brokers and dealers to provide certain required information to the Commission.

Paragraph (b) of Rule 17a-10 provides that the provisions of paragraph (a) do not apply to members of national securities exchanges or registered national securities associations that maintain records containing the information required by Form X-17A-5 and which transmit to the Commission copies of the records pursuant to a plan which has been declared effective by the Commission.

The primary purpose of Rule 17a-10 is to obtain the economic and statistical data necessary for an ongoing analysis of the securities industry. As originally adopted in 1968, Rule 17a-10 required brokers and dealers to provide their revenue and expense data on a special form. The Rule was amended in 1977 to eliminate the form. The data previously reported on the form is now reported using Form X-17A-5 and its supplementary schedules.

The Commission estimates that approximately 103 broker-dealers will spend an average of approximately 12 hours per year complying with Rule 17a-10. Thus, the total compliance burden is estimated to be approximately 1,236 burden-hours per year.²

The Commission may not conduct or sponsor a collection of information unless it displays a currently valid OMB control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

Background documentation for this information collection may be viewed at the following link, <http://www.reginfo.gov>. Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503 or by sending an e-mail to: Shagufta_Ahmed@omb.eop.gov; and (ii) Thomas Bayer, Director/Chief Information Officer, Securities and Exchange Commission, c/o Remi Pavlik-Simon, 6432 General Green Way, Alexandria, VA 22312 or send an e-mail to: PRA_Mailbox@sec.gov. Comments

² The number of burden hours stated in this notice is lower than the number of burden hours stated in the 60 day notice ("Proposed Collection; Comment Request") published earlier this year in connection with this OMB control number. The reason for this difference is that the burden hours stated in the 60-day notice had been based on the number of respondent broker-dealers who had complied with Rule 17a-10 during 2009 (*i.e.*, 168 respondents), whereas the burden hours in this notice reflect the more updated number of respondent broker-dealers who complied with Rule 17a-10 during 2010 (*i.e.*, 103 respondents).

must be submitted to OMB within 30 days of this notice.

August 12, 2011.

Elizabeth M. Murphy,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-65114; File No. SR-NSX-2011-10]

Self-Regulatory Organizations; National Stock Exchange, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change to Amend NSX Rule 11.19(c) Relating to Clearly Erroneous Transactions

August 11, 2011.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the "Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on August 11, 2011, National Stock Exchange, Inc. filed with the Securities and Exchange Commission ("Commission") the proposed rule change, as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comment on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

National Stock Exchange, Inc. ("NSX" or "Exchange") proposes to amend its rules to ensure NSX Rule 11.19(c) will continue to operate in the same way after changes to the single stock trading pauses are effective.

The text of the proposed rule change is available on the Exchange's Web site at <http://www.nsx.com>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

Background

The exchanges³ and FINRA (collectively, the "Markets"), in consultation with the Securities and Exchange Commission ("SEC" or the "Commission"), have made changes to their respective rules in a concerted effort to strengthen the markets after the severe market disruption that occurred on May 6, 2010. One such effort by the Markets was to adopt a uniform trading pause process during periods of extraordinary market volatility as a pilot in S&P 500 Index stocks ("Pause Pilot"), approved by the Commission on June 10, 2010.⁴ On September 10, 2010, the Commission approved the Market's proposals to add the securities included in the Russell 1000 Index and specified ETPs to the Pause Pilot.⁵ On September 10, 2010, the Commission also approved changes proposed by the Markets to amend certain of their respective rules to set forth clearer standards and curtail their discretion with respect to breaking erroneous trades.⁶ The changes, among other things, provided uniform treatment of clearly erroneous execution

³ For purposes of this filing, the term "Exchanges" refers collectively to BATS Exchange, Inc., BATS Y-Exchange, Inc., NASDAQ OMX BX, Inc., Chicago Board Options Exchange, Inc., Chicago Stock Exchange, Inc., EDGA Exchange, Inc., EDGX Exchange, Inc., International Securities Exchange LLC, The NASDAQ Stock Market LLC, New York Stock Exchange LLC, NYSE Amex LLC, NYSE Arca, Inc., National Stock Exchange, Inc., and NASDAQ [sic] OMX PHLX LLC.

⁴ Securities Exchange Act Release Nos. 62252 (June 10, 2010), 75 FR 34186 (June 16, 2010) (File Nos. ⁶ Securities Exchange Act Release No. 62886 (September 16, 2010), 75 FR 56613 (September 16, 2010) (File Nos. SR-BATS-2010-016; SR-BX-2010-040; SR-CBOE-2010-056; SR-CHX-2010-13; SR-EDGA-2010-03; SR-EDGX-2010-03; SR-ISE-2010-62; SR-NASDAQ-2010-076; SR-NSX-2010-07; SR-NYSE-2010-47; SR-NYSEAmex-2010-60; and SR-NYSEArca-2010-58).

reviews in the event of transactions that result in the issuance of an individual stock trading pause pursuant to the Pause Pilot on the listing market and those that occur up to the time the trading pause message is received by the other markets from the single plan processor responsible for consolidation and dissemination of information for the security (“Latency Trades”).

As part of the changes to the clearly erroneous process under Rule 11.19, the Exchange replaced existing Rule 11.19(c)(4) with all new text to provide clarity in the clearly erroneous process when a Pause Pilot trading pause is triggered. Pursuant to Rule 11.19(c)(4), Latency Trades will be broken by the Exchange if they exceed the applicable percentage from the Reference Price, as noted in the table found under Rule 11.19(c)(1).⁷ The Reference Price, for purposes of Rule 11.19(c)(4), is the price that triggered a trading pause pursuant to the Pause Pilot (the “Trading Pause Trigger Price”). As such, Latency Trades that occur on the Exchange would be broken by the Exchange pursuant to Rule 11.19(c)(4) if the transaction occurred at either three, five or ten percent above the Trading Pause Trigger Price.⁸

On June 23, 2011, the Commission approved a joint proposal to expand the respective Pause Pilot rules of the Markets to include all remaining NMS stocks (“Phase III Securities”).⁹ The new pilot rules, which will be implemented on August 8, 2011, not only expand the application of the Pause Pilot, but also apply larger percentage moves that trigger a pause to the Phase III Securities. Specifically, the rules of the listing markets were amended so that a pause in a Phase III Security with a closing price on the previous trading day of \$1 or more is triggered by a 30 percent price move within a five minute period. A pause in a Phase III Security with closing price on the previous trading day of less than \$1 is triggered by a 50 percent price move within a five minute period. If no prior day closing price is available, the last sale reported

to the Consolidated Tape on the previous trading day is used.

The Issue

The recently-approved changes to the Pause Pilot will have the unintended effect of removing the Phase III Securities from the normal clearly erroneous process and potentially result in unfair outcomes in the face of severe volatility in such securities. Phase III Securities are currently subject to the clearly erroneous process under Rules 11.19(c)(1) to 11.19(c)(3), which apply to all securities except the current Pause Pilot securities subject to a pause. For purposes of transactions in securities not involving Pause Pilot securities, or transactions involving Pause Pilot securities that occur when there is not a pause pursuant to the Pause Pilot, the Reference Price is the consolidated last sale price immediately prior to the execution(s) under review, subject to certain exceptions.¹⁰ As noted above, the Trading Pause Trigger Price is used as the Reference Price when a Pause Pilot pause is in effect. As a consequence, under the current rules, a Latency Trade is subject to the clearly erroneous thresholds based on the Trading Pause Trigger Price, which represents a ten percent or greater move in the transacted price of the security in a five minute period.

Under the new Pause Pilot rules, a Latency Trade in a Phase III Security occurs only after either a 30 or 50 percent (or greater) move in the transacted price of the security in a five minute period. As a result, a ETP Holder that trades in a Phase III Security that triggers a clearly erroneous threshold of three, five or ten percent from the Reference Price, yet falls below the Pause Pilot trigger of either 30 or 50 percent, would be able to avail themselves of a clearly erroneous review. A similarly situated ETP Holder that transacts in the same security as a Latency Trade at a price equal to or greater than the Phase III Security thresholds, yet less than the clearly erroneous thresholds under Rule 11.19(c)(1), would not be able to avail themselves of the clearly erroneous process. Another ETP Holder that transacts in the same security as a Latency Trade that exceeds three, five or ten percent from the Trading Pause Trigger Price would automatically receive clearly erroneous relief. The Exchange believes that this would be an inequitable result and an arbitrary application of the clearly erroneous process. Specifically, the Exchange believes that, since the 30 and 50 percent triggers of the Pause Pilot are

substantially greater than the 10 percent threshold of the original Pause Pilot, the Phase III Securities should remain under the current clearly erroneous process of Rules 11.19(c)(1)–(3).

Applying the clearly erroneous process under Rules 11.19(c)(1)–(3) to the Phase III Securities would allow the Exchange to review all transactions that exceed the normal clearly erroneous thresholds and Reference Price, and, importantly, avoid arbitrary selection of “winners” and “losers” in the face of severe volatile moves in a security of 30 or 50 percent over a five minute period. For example, an ETP Holder that trades in a Phase III Security that triggers a clearly erroneous threshold of three, five or ten percent, yet falls below the Pause Pilot trigger threshold trading at 29 percent from the prior day’s closing price, would be potentially entitled to a clearly erroneous break pursuant Rule 11.19(c)(1). Should trading in that same stock trigger a trading pause at a price of 30 or 50 percent greater than the prior day’s close, the ETP Holder would not be entitled to a clearly erroneous trade break unless that trade exceeded three, five or ten percent beyond the price that triggered the pause. This scenario causes an inequity among a group of ETP Holders that have transactions in the Phase III Securities falling between the three, five and ten percent thresholds from the Reference Price under the normal Rule 11.19(c)(1) clearly erroneous process and the Pause Pilot clearly erroneous triggers of three, five or ten percent away from the Trading Pause Trigger Price. Such ETP Holders would not be provided relief under the clearly erroneous rules merely due to the imposition of a Pause Pilot halt, notwithstanding that other ETP Holders with transactions that occur at the same rolling five minute percentage difference. The Exchange believes a better outcome is to afford all ETP Holders transacting in Phase III Securities the opportunity of having such trades reviewed.

Summary

The expansion of the Pause Pilot to the Phase III Securities will have the unintended consequence of setting the point at which a clearly erroneous transaction occurs once a Pause Pilot pause is initiated far beyond the triggers applied prior to the expansion, which will, in turn, prevent certain market participants from availing themselves of the clearly erroneous rules, notwithstanding that other similarly situated participants are able to do so. The Exchange believes that this would be an arbitrary application of the clearly erroneous process in a manner that is

⁷ Pursuant to Rule 11.19(c)(1), a security with a Reference Price of greater than zero and up to and including \$25 is subject to a 10% threshold; a security with a Reference Price of greater than \$25 and up to and including \$50 is subject to a 5% threshold; and a security with a Reference Price of greater than \$50 is subject to a 3% threshold.

⁸ Rule 11.19(c)(4).

⁹ Securities Exchange Act Release No. 64735 (June 23, 2011), 76 FR 38243 (June 29, 2011) (File Nos. SR-BATS-2011-016; SR-BYX-2011-011; SR-BX-2011-025; SR-CBOE-2011-049; SR-CHX-2011-09; SR-EDGA-2011-15; SR-EDGX-2011-14; SR-FINRA-2011-023; SR-ISE-2011-028; SR-NASDAQ-2011-067; SR-NYSE-2011-21; SR-NYSEAmex-2011-32; SR-NYSEArca-2011-26; SR-NSX-2011-06; SR-Phlx-2011-64).

¹⁰ *Id.*

unfair and not consistent with the spirit and purpose of the rule. Accordingly, the Exchange is proposing to amend Rules 11.19(c)(1)–(4) to specify that Rule 11.19(c)(4) applies only to the current securities of Pause Pilot, and not to Phase III Securities.¹¹

2. Statutory Basis

The statutory basis for the proposed rule change is Section 6(b)(5) of the Securities Exchange Act of 1934 (the “Act”),¹² which requires the rules of an exchange to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The proposed rule change also is designed to support the principles of Section 11A(a)(1)¹³ of the Act in that it seeks to assure fair competition among brokers and dealers and among exchange markets. The Exchange believes that the proposed rule meets these requirements in that it promotes transparency and uniformity across markets concerning decisions to break erroneous trades, yet also ensures fair application of the process so that similarly situated ETP Holders are provided the same opportunity of a clearly erroneous review. The Exchange notes that the changes proposed herein will in no way interfere with the operation of the Pause Pilot process, as amended.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has neither solicited nor received written comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has

become effective pursuant to Section 19(b)(3)(A) of the Act¹⁴ and Rule 19b–4(f)(6)(iii) thereunder.¹⁵ The Exchange has asked the Commission to waive the 5-day written notice requirement and the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because such waiver will allow the clearly erroneous rules to continue to operate as they did prior to the effectiveness of the Pause Pilot expansion to Phase III Securities so that similarly situated ETP Holders are provided the same opportunity of a clearly erroneous review. Accordingly, the Commission waives the 30-day operative delay requirement and designates the proposed rule change as operative upon filing with the Commission.¹⁶

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission’s Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to rule-comments@sec.gov. Please include File Number SR–NSX–2011–10 on the subject line.

¹⁴ 15 U.S.C. 78s(b)(3)(A).

¹⁵ 17 CFR 240.19b–4(f)(6)(iii). In addition, Rule 19b–4(f)(6)(iii) requires that a self-regulatory organization submit to the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission is waiving the five day written notice requirement in this case. Therefore, the Commission notes that the Exchange has satisfied this requirement.

¹⁶ For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule’s impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549–1090.

All submissions should refer to File Number SR–NSX–2011–10. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission’s Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission’s Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make publicly available. All submissions should refer to File Number SR–NSX–2011–10 and should be submitted on or before September 8, 2011.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁷

Elizabeth M. Murphy,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-65126; File No. SR-NYSEArca-2011-51]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing of Proposed Rule Change To List and Trade Managed Fund Shares of TrimTabs Float Shrink ETF Under NYSE Arca Equities Rule 8.600

August 12, 2011.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (the “Act” or “Exchange Act”)² and Rule 19b-4 thereunder,³ notice is hereby given that, on July 29, 2011, NYSE Arca, Inc. (the “Exchange” or “NYSE Arca”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to list and trade TrimTabs Float Shrink ETF under NYSE Arca Equities Rule 8.600. The text of the proposed rule change is available at the Exchange, the Commission’s Public Reference Room, and <http://www.nyse.com>.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to list and trade the following Managed Fund

Shares⁴ (“Shares”) under NYSE Arca Equities Rule 8.600: the TrimTabs Float Shrink ETF (“Fund”).⁵ The Shares will be offered by AdvisorShares Trust (the “Trust”), a statutory trust organized under the laws of the State of Delaware and registered with the Commission as an open-end management investment company.⁶ The investment adviser to the Fund is AdvisorShares Investments, LLC (the “Adviser”). Trim Tabs Asset Management, LLC (“TrimTabs” or “Sub-Adviser”) is the Fund’s sub-adviser and provides day-to-day portfolio management of the Fund. Foreside Fund Services, LLC (the “Distributor”) is the principal underwriter and distributor of the Fund’s Shares.

Commentary .06 to Rule 8.600 provides that, if the investment adviser to the Investment Company issuing Managed Fund Shares is affiliated with a broker-dealer, such investment adviser shall erect a “fire wall” between the investment adviser and the broker-

⁴ A Managed Fund Share is a security that represents an interest in an investment company registered under the Investment Company Act of 1940 (15 U.S.C. 80a) (“1940 Act”) organized as an open-end investment company or similar entity that invests in a portfolio of securities selected by its investment adviser consistent with its investment objectives and policies. In contrast, an open-end investment company that issues Investment Company Units, listed and traded on the Exchange under NYSE Arca Equities Rule 5.2(j)(3), seeks to provide investment results that correspond generally to the price and yield performance of a specific foreign or domestic stock index, fixed income securities index or combination thereof.

⁵ The Commission approved NYSE Arca Equities Rule 8.600 and the listing and trading of certain funds of the PowerShares Actively Managed Exchange-Traded Funds Trust on the Exchange pursuant to Rule 8.600 in Securities Exchange Act Release No. 57619 (April 4, 2008), 73 FR 19544 (April 10, 2008) (SR-NYSEArca-2008-25). The Commission also has approved listing and trading on the Exchange of a number of actively managed funds under Rule 8.600. *See, e.g.*, Securities Exchange Act Release Nos. 57801 (May 8, 2008), 73 FR 27878 (May 14, 2008) (SR-NYSEArca-2008-31) (order approving Exchange listing and trading of twelve actively-managed funds of the WisdomTree Trust); 60460 (August 7, 2009), 74 FR 41468 (August 17, 2009) (SR-NYSEArca-2009-55) (order approving listing of Dent Tactical ETF); 63737 (January 19, 2011), 76 FR 4968 (January 27, 2011) (SR-NYSEArca-2010-107) (order approving Exchange listing and trading of AdvisorShares Active Bear ETF); 63802 (January 31, 2011), 76 FR 6503 (February 4, 2011) (SR-NYSEArca-2010-118) (order approving Exchange listing and trading of SIM Dynamic Allocation Diversified Income ETF and SIM Dynamic Allocation Growth Income ETF).

⁶ The Trust is registered under the 1940 Act. On January 19, 2011, the Trust filed with the Commission Form N-1A under the Securities Act of 1933 (15 U.S.C. 77a), and under the 1940 Act relating to the Fund (File Nos. 333-157876 and 811-22110) (“Registration Statement”). The description of the operation of the Trust and the Fund herein is based in part on the Registration Statement. In addition, the Commission has issued an order granting certain exemptive relief to the Trust under the 1940 Act. *See* Investment Company Act Release No. 29291 (May 28, 2010) (File No. 812-13677) (“Exemptive Order”).

dealer with respect to access to information concerning the composition and/or changes to such Investment Company portfolio. In addition, Commentary .06 further requires that personnel who make decisions on the open-end fund’s portfolio composition must be subject to procedures designed to prevent the use and dissemination of material nonpublic information regarding the open-end fund’s portfolio.⁷ Commentary .06 to Rule 8.600 is similar to Commentary .03(a)(i) and (iii) to NYSE Arca Equities Rule 5.2(j)(3); however, Commentary .06 in connection with the establishment of a “fire wall” between the investment adviser and the broker-dealer reflects the applicable open-end fund’s portfolio, not an underlying benchmark index, as is the case with index-based funds. Neither the Adviser nor the Sub-Adviser is affiliated with a broker-dealer. In the event (a) the Adviser or the Sub-Adviser becomes newly affiliated with a broker-dealer, or (b) any new adviser or sub-adviser becomes affiliated with a broker-dealer, it will implement a fire wall with respect to such broker-dealer regarding access to information concerning the composition and/or changes to the portfolio, and will be subject to procedures designed to prevent the use and dissemination of material non-public information regarding such portfolio.

Description of the Fund

According to the Registration Statement, the Fund is an actively managed exchange-traded fund that seeks to achieve its investment objective primarily by investing in the broad U.S. equity market, as represented by the

⁷ An investment adviser to an open-end fund is required to be registered under the Investment Advisers Act of 1940 (the “Advisers Act”). As a result, the Adviser and Sub-Adviser and their related personnel are subject to the provisions of Rule 204A-1 under the Advisers Act relating to codes of ethics. This Rule requires investment advisers to adopt a code of ethics that reflects the fiduciary nature of the relationship to clients as well as compliance with other applicable securities laws. Accordingly, procedures designed to prevent the communication and misuse of non-public information by an investment adviser must be consistent with Rule 204A-1 under the Advisers Act. In addition, Rule 206(4)-7 under the Advisers Act makes it unlawful for an investment adviser to provide investment advice to clients unless such investment adviser has (i) adopted and implemented written policies and procedures reasonably designed to prevent violation, by the investment adviser and its supervised persons, of the Advisers Act and the Commission rules adopted thereunder; (ii) implemented, at a minimum, an annual review regarding the adequacy of the policies and procedures established pursuant to subparagraph (i) above and the effectiveness of their implementation; and (iii) designated an individual (who is a supervised person) responsible for administering the policies and procedures adopted under subparagraph (i) above.

² 15 U.S.C. 78a.

³ 17 CFR 240.19b-4.

Russell 3000® Index (“Index”). The Fund seeks to achieve this goal by investing in stocks with liquidity and fundamental characteristics that are historically associated with superior long-term performance. The Sub-Adviser has designed the following quantitative stock selection rules to make allocation decisions and to protect against dramatic over or under weighting of individual securities in the Fund’s portfolio.

Decile Ranking of Russell 3000 Stocks. The Sub-Adviser ranks stocks in the Index based on the following criteria:

I. The decrease in their outstanding shares over approximately the past 120 days (“float shrink”);

II. The increase in free cash flow (the money available to the company that is not used to pay for its daily operations) over approximately the past 120 days; and

III. The decrease in leverage over approximately the past 120 days. Leverage is measured as the ratio of total liabilities to total assets. The Sub-Adviser uses the relative decrease in leverage rather than amount of leverage itself as a criterion because the degree of leverage varies across industries.

The top decile of each respective ranking consists of the stocks of the companies with (I) the strongest reduction in shares outstanding, (II) the strongest growth in free cash flow, and (III) the largest decrease in leverage, respectively.

Stock Selection Algorithm

The Sub-Adviser uses an algorithm to give a relative weight to the three decile rankings, combining them in a single ranking (combined ranking). The algorithm places a higher weight on the float shrink ranking, followed by the free cash flow ranking, followed by the leverage ranking. The Fund under normal circumstances⁸ will invest in 80 to 120 stocks from among the top 10% of stocks in the combined ranking.

According to the Registration Statement, the Sub-Adviser’s investment process is quantitative. Based on extensive historical research, the Sub-Adviser designed the following stock selection rules, which involve rebalancing, weighting, liquidity, and trading considerations:

⁸ The term “under normal market circumstances” includes, but is not limited to, the absence of extreme volatility or trading halts in the fixed income markets or the financial markets generally; operational issues causing dissemination of inaccurate market information; or force majeure type events such as systems failure, natural or man-made disaster, act of God, armed conflict, act of terrorism, riot or labor disruption or any similar intervening circumstance.

Liquidity Screening

Before trading, the Fund will estimate the liquidity impact of its suggested trades. Specifically, the Fund will avoid stocks whose average trading volume over the past 30 days would be less than 50% of the size of the Fund’s proposed trades. As a result, the Fund will not invest in stocks that meet its investment criteria in terms of float shrink, free cash flow growth and leverage if their trading volume is below such levels. As a result, the Fund will not invest in stocks that it deems to be illiquid.

Weighting and Sector Allocation

Although the Fund initially will invest an equal dollar amount in the stocks that meet its investment criteria, the Fund is not market capitalization weighted. As a result, the Fund will overweight small-cap stocks and mid-cap stocks relative to traditional, market cap weighted indices.⁹

The relative weights of the sectors in the Fund may vary significantly from those of traditional, market cap weighted indices. Stocks with favorable liquidity characteristics may be concentrated in certain sectors. Sector concentration might increase the Fund’s volatility over the short term. According to the Registration Statement, the Fund will not correct these sector effects because the Sub-Adviser’s research shows that historically they are a source of long-term outperformance.

Other Investments

To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in short-term, high-quality debt securities and money market instruments. The Fund may invest in these instruments for extended periods, depending on the Sub-Adviser’s assessment of market conditions. These debt securities and money market instruments include shares of other mutual funds, commercial paper, certificates of deposit, bankers’ acceptances, U.S. Government securities, including U.S. Treasury zero-coupon bonds, repurchase and reverse repurchase

⁹ According to the Registration Statement, mid-sized companies may be more volatile than large-capitalization companies and returns on investments in stocks of mid-size companies could trail the returns on investments in stocks of larger or smaller companies. Stock prices of small capitalization companies may be more volatile than those of larger companies and therefore the Fund’s Share price may be more volatile than those of funds that invest a larger percentage of their assets in stocks issued by larger-capitalization companies.

agreements¹⁰ and bonds that are BBB or higher.

Diversification. The Fund may not (i) with respect to 75% of its total assets, purchase securities of any issuer (except securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities or shares of investment companies) if, as a result, more than 5% of its total assets would be invested in the securities of such issuer; or (ii) acquire more than 10% of the outstanding voting securities of any one issuer.¹¹

Concentration. The Fund may not invest 25% or more of its total assets in the securities of one or more issuers conducting their principal business activities in the same industry or group of industries. This limitation does not apply to investments in securities issued or guaranteed by the U.S. Government, its agencies or instrumentalities, or shares of investment companies. The Fund will not invest 25% or more of its total assets in any investment company that so concentrates.¹²

The Fund will not purchase illiquid securities.¹³ In addition, the Fund will not invest in non-U.S.-registered equity securities, loan participation agreements and Rule 144A securities.

According to the Registration Statement, the Fund will seek to qualify for treatment as a Regulated Investment Company (“RIC”) under Subchapter M of the Internal Revenue Code.¹⁴

¹⁰ According to the Registration Statement, the Fund may enter into repurchase agreements with financial institutions, which may be deemed to be loans. The Fund follows certain procedures designed to minimize the risks inherent in such agreements. These procedures include effecting repurchase transactions only with large, well-capitalized and well-established financial institutions whose condition will be continually monitored by the Sub-Adviser. The Fund may enter into reverse repurchase agreements without limit as part of the Fund’s investment strategy. Reverse repurchase agreements involve sales by the Fund of portfolio assets concurrently with an agreement by the Fund to repurchase the same assets at a later date at a fixed price.

¹¹ The diversification standard is contained in Section 5(b)(1) of the 1940 Act.

¹² See Form N-1A, Item 9. The Commission has taken the position that a fund is concentrated if it invests more than 25% of the value of its total assets in any one industry. See, e.g., Investment Company Act Release No. 9011 (October 30, 1975), 40 FR 54241 (November 21, 1975).

¹³ A fund’s portfolio security is illiquid if it cannot be disposed of in the ordinary course of business within seven days at approximately the value ascribed to it by the ETF. See Investment Company Act Release No. 14983 (March 12, 1986), 51 FR 9773 (March 21, 1986) (adopting amendments to Rule 2a-7 under the 1940 Act); Investment Company Act Release No. 17452 (April 23, 1990), 55 FR 17933 (April 30, 1990) (adopting Rule 144A under the Securities Act of 1933).

¹⁴ 26 U.S.C. 851. One of several requirements for RIC qualification is that a Fund must receive at least

Pursuant to the terms of the Exemptive Order, the Fund will not invest in options contracts, futures contracts or swap agreements. The Fund's investments will be consistent with the Fund's investment objective and will not be used to enhance leverage.

The Shares will conform to the initial and continued listing criteria under NYSE Arca Equities Rule 8.600. The Exchange represents that, for initial and/or continued listing, the Fund will be in compliance with Rule 10A-3¹⁵ under the Exchange Act, as provided by NYSE Arca Equities Rule 5.3. A minimum of 100,000 Shares will be outstanding at the commencement of trading on the Exchange. The Exchange will obtain a representation from the issuer of the Shares that the net asset value ("NAV") per Share will be calculated daily and that the NAV and the Disclosed Portfolio, as defined in NYSE Arca Equities Rule 8.600(c)(2), will be made available to all market participants at the same time.

Creation and Redemption of Shares

The Fund issues and redeems Shares on a continuous basis at NAV only in a large specified number of Shares called a "Creation Unit." The Shares of the Fund that trade on the Exchange are "created" at their NAV by Authorized Participants only in block-size Creation Units of at least 25,000 Shares. An Authorized Participant enters into an agreement ("Participant Agreement") with the Distributor or uses a Depository Trust Company participant who has executed a Participant Agreement, and deposits into the Fund a portfolio of securities closely approximating the holdings of the Fund and a specified

amount of cash, together totaling the NAV of the Creation Unit(s), in exchange for 25,000 Shares of the Fund (or multiples thereof). Shares are not redeemable from the Fund except when aggregated in Creation Units. The prices at which creations and redemptions occur are based on the next calculation of NAV after an order is received in a form prescribed in the Participant Agreement.

Availability of Information

The Fund's Web site (<http://www.advisorshares.com>), which will be publicly available prior to the public offering of Shares, will include a form of the prospectus for the Fund that may be downloaded. The Fund's Web site will include additional quantitative information updated on a daily basis, including, for the Fund, (1) daily trading volume, the prior business day's reported closing price, NAV and mid-point of the bid/ask spread at the time of calculation of such NAV (the "Bid/Ask Price"),¹⁶ and a calculation of the premium and discount of the Bid/Ask Price against the NAV, and (2) data in chart format displaying the frequency distribution of discounts and premiums of the daily Bid/Ask Price against the NAV, within appropriate ranges, for each of the four previous calendar quarters. On each business day, before commencement of trading in Shares in the Core Trading Session on the Exchange, the Fund will disclose on its Web site the Disclosed Portfolio that will form the basis for the Fund's calculation of NAV at the end of the business day.¹⁷

On a daily basis, the Adviser will disclose on the Fund's Web site for each portfolio security or other financial instrument of the Fund the following information: ticker symbol (if applicable), name of security or financial instrument, number of shares or dollar value of financial instruments held in the portfolio, and percentage weighting of the security or financial instrument in the portfolio. The Web site information will be publicly available at no charge.

In addition, a basket composition file, which includes the security names and

share quantities required to be delivered in exchange for Fund Shares, together with estimates and actual cash components, will be publicly disseminated daily prior to the opening of the New York Stock Exchange ("NYSE") via the National Securities Clearing Corporation. The basket will represent one Creation Unit of the Fund.

The NAV of the Fund will normally be determined as of the close of the regular trading session on the NYSE (ordinarily 4 p.m. Eastern Time) on each business day.

The Fund will calculate its NAV by: (i) Taking the current market value of its total assets; (ii) subtracting any liabilities; and (iii) dividing that amount by the total number of Shares owned by shareholders. The Fund will calculate NAV once each business day as of the regularly scheduled close of normal trading on the Exchange (normally, 4 p.m., Eastern Time). In calculating NAV, the Fund generally will value its investment portfolio at market price. If market prices are unavailable or the Fund thinks that they are unreliable, or when the value of a security has been materially affected by events occurring after the relevant market closes, the Fund will price those securities at fair value as determined in good faith using methods approved by the Fund's Board of Trustees.

Investors can also obtain the Trust's Statement of Additional Information ("SAI"), the Fund's Shareholder Reports, and its Form N-CSR and Form N-SAR, filed twice a year. The Trust's SAI and Shareholder Reports are available free upon request from the Trust, and those documents and the Form N-CSR and Form N-SAR may be viewed on-screen or downloaded from the Commission's Web site at <http://www.sec.gov>. Information regarding market price and trading volume of the Shares is and will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services. Information regarding the previous day's closing price and trading volume information for the Shares will be published daily in the financial section of newspapers. Quotation and last sale information for the Shares will be available via the Consolidated Tape Association ("CTA") high-speed line. In addition, the Portfolio Indicative Value, as defined in NYSE Arca Equities Rule 8.600(c)(3), will be disseminated by the Exchange at least every 15 seconds during the Core Trading Session by one or more major market data vendors. The dissemination of the Portfolio Indicative Value, together with the Disclosed Portfolio, will allow investors to

90% of the Fund's gross income each year from dividends, interest, payments with respect to securities loans, gains from the sale or other disposition of stock, securities or foreign currencies, or other income derived with respect to the Fund's investments in stock, securities, foreign currencies and net income from an interest in a qualified publicly traded partnership (the "90% Test"). A second requirement for qualification as a RIC is that a Fund must diversify its holdings so that, at the end of each fiscal quarter of the Fund's taxable year: (a) At least 50% of the market value of the Fund's total assets is represented by cash and cash items, U.S. Government securities, securities of other RICs, and other securities, with these other securities limited, in respect to any one issuer, to an amount not greater than 5% of the value of the Fund's total assets or 10% of the outstanding voting securities of such issuer; and (b) not more than 25% of the value of its total assets are invested in the securities (other than U.S. Government securities or securities of other RICs) of any one issuer or two or more issuers which the Fund controls and which are engaged in the same, similar, or related trades or businesses, or the securities of one or more qualified publicly traded partnership (the "Asset Test").

¹⁵ 17 CFR 240.10A-3.

¹⁶ The Bid/Ask Price of the Fund will be determined using the highest bid and the lowest offer on the Exchange as of the time of calculation of the Fund's NAV. The records relating to Bid/Ask Prices will be retained by the Fund and its service providers.

¹⁷ Under accounting procedures followed by the Fund, trades made on the prior business day ("T") will be booked and reflected in NAV on the current business day ("T+1"). Accordingly, the Fund will be able to disclose at the beginning of the business day the portfolio that will form the basis for the NAV calculation at the end of the business day.

determine the value of the underlying portfolio of the Fund on a daily basis and to provide a close estimate of that value throughout the trading day. The intra-day, closing and settlement prices of the portfolio securities are also readily available from the national securities exchanges trading such securities, automated quotation systems, published or other public sources, or on-line information services such as Bloomberg or Reuters.

Additional information regarding the Trust and the Shares, including investment strategies, risks, creation and redemption procedures, fees, portfolio holdings disclosure policies, distributions and taxes is included in the Registration Statement. All terms relating to the Fund that are referred to, but not defined in, this proposed rule change are defined in the Registration Statement.

Trading Halts

With respect to trading halts, the Exchange may consider all relevant factors in exercising its discretion to halt or suspend trading in the Shares of the Fund.¹⁸ Trading in Shares of the Fund will be halted if the circuit breaker parameters in NYSE Arca Equities Rule 7.12 have been reached. Trading also may be halted because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable. These may include: (1) The extent to which trading is not occurring in the securities and/or the financial instruments comprising the Disclosed Portfolio of the Fund; or (2) whether other unusual conditions or circumstances detrimental to the maintenance of a fair and orderly market are present. Trading in the Shares will be subject to NYSE Arca Equities Rule 8.600(d)(2)(D), which sets forth circumstances under which Shares of the Fund may be halted.

Trading Rules

The Exchange deems the Shares to be equity securities, thus rendering trading in the Shares subject to the Exchange's existing rules governing the trading of equity securities. Shares will trade on the NYSE Arca Marketplace from 4 a.m. to 8 p.m. Eastern Time in accordance with NYSE Arca Equities Rule 7.34 (Opening, Core, and Late Trading Sessions). The Exchange has appropriate rules to facilitate transactions in the Shares during all trading sessions. As provided in NYSE Arca Equities Rule 7.6, Commentary .03, the minimum price variation ("MPV")

for quoting and entry of orders in equity securities traded on the NYSE Arca Marketplace is \$0.01, with the exception of securities that are priced less than \$1.00 for which the MPV for order entry is \$0.0001.

Surveillance

The Exchange intends to utilize its existing surveillance procedures applicable to derivative products (which include Managed Fund Shares) to monitor trading in the Shares. The Exchange represents that these procedures are adequate to properly monitor Exchange trading of the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable Federal securities laws.

The Exchange's current trading surveillance focuses on detecting securities trading outside their normal patterns. When such situations are detected, surveillance analysis follows and investigations are opened, where appropriate, to review the behavior of all relevant parties for all relevant trading violations.

The Exchange may obtain information via the Intermarket Surveillance Group ("ISG") from other exchanges that are members of ISG or with which the Exchange has entered [sic] a comprehensive surveillance sharing agreement.¹⁹ In addition, the Exchange could obtain information from the U.S. exchanges on which the securities held by the Fund are listed and traded.

In addition, the Exchange also has a general policy prohibiting the distribution of material, non-public information by its employees.

Information Bulletin

Prior to the commencement of trading, the Exchange will inform its Equity Trading Permit ("ETP") Holders in an Information Bulletin ("Bulletin") of the special characteristics and risks associated with trading the Shares. Specifically, the Bulletin will discuss the following: (1) The procedures for purchases and redemptions of Shares in Creation Unit aggregations (and that Shares are not individually redeemable); (2) NYSE Arca Equities Rule 9.2(a), which imposes a duty of due diligence on its ETP Holders to learn the essential facts relating to every customer prior to trading the Shares; (3) the risks involved in trading the Shares during the Opening and Late Trading Sessions when an updated Portfolio Indicative

Value will not be calculated or publicly disseminated; (4) how information regarding the Portfolio Indicative Value is disseminated; (5) the requirement that ETP Holders deliver a prospectus to investors purchasing newly issued Shares prior to or concurrently with the confirmation of a transaction; and (6) trading information.

In addition, the Bulletin will reference that the Fund is subject to various fees and expenses described in the Registration Statement. The Bulletin will discuss any exemptive, no-action, and interpretive relief granted by the Commission from any rules under the Exchange Act. The Bulletin will also disclose that the NAV for the Shares will be calculated after 4 p.m. Eastern Time each trading day.

2. Statutory Basis

The basis under the Exchange Act for this proposed rule change is the requirement under Section 6(b)(5)²⁰ that an exchange have rules that are designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to, and perfect the mechanism of a free and open market and, in general, to protect investors and the public interest.

The Exchange believes that the proposed rule change is designed to prevent fraudulent and manipulative acts and practices in that the Shares will be listed and traded on the Exchange pursuant to the initial and continued listing criteria in NYSE Arca Equities Rule 8.600. The Exchange has in place surveillance procedures that are adequate to properly monitor trading in the Shares in all trading sessions and to deter and detect violations of Exchange rules and applicable Federal securities laws. The Exchange may obtain information via ISG from other exchanges that are members of ISG or with which the Exchange has entered into a comprehensive surveillance sharing agreement. The Fund will achieve its investment objective primarily by investing in the broad U.S. equity market as represented by the Russell 3000® Index, the components of which are listed and traded on U.S. exchange markets. The Fund will not purchase illiquid securities. In addition, the Fund will not invest in non-U.S.-registered equity securities, loan participation agreements and Rule 144A securities. Further, the Fund will not invest in options, futures or swaps. The Fund's investments will be consistent with the Fund's investment objective

¹⁸ See NYSE Arca Equities Rule 7.12, Commentary .04.

¹⁹ For a list of the current members of ISG, see <http://www.isgportal.org>. The Exchange notes that not all components of the Disclosed Portfolio for the Fund may trade on markets that are members of ISG or with which the Exchange has in place a comprehensive surveillance sharing agreement.

²⁰ 15 U.S.C. 78f(b)(5).

and will not be used to enhance leverage.

The proposed rule change is designed to promote just and equitable principles of trade and to protect investors and the public interest in that the Exchange will obtain a representation from the issuer of the Shares that the NAV per Share will be calculated daily and that the NAV and the Disclosed Portfolio will be made available to all market participants at the same time. In addition, a large amount of information is publicly available regarding the Fund and the Shares, thereby promoting market transparency. The Fund's portfolio holdings will be disclosed on its Web site daily after the close of trading on the Exchange and prior to the opening of trading on the Exchange the following day. Moreover, the Portfolio Indicative Value will be disseminated by one or more major market data vendors at least every 15 seconds during the Exchange's Core Trading Session. On each business day, before commencement of trading in Shares in the Core Trading Session on the Exchange, the Fund will disclose on its Web site the Disclosed Portfolio that will form the basis for the Fund's calculation of NAV at the end of the business day. Information regarding market price and trading volume of the Shares is and will be continually available on a real-time basis throughout the day on brokers' computer screens and other electronic services, and quotation and last sale information will be available via the CTA high-speed line. The Web site for the Fund will include a form of the prospectus for the Fund and additional data relating to NAV and other applicable quantitative information. Moreover, prior to the commencement of trading, the Exchange will inform its ETP Holders in an Information Bulletin of the special characteristics and risks associated with trading the Shares. Trading in Shares of the Fund will be halted if the circuit breaker parameters in NYSE Arca Equities Rule 7.12 have been reached or because of market conditions or for reasons that, in the view of the Exchange, make trading in the Shares inadvisable, and trading in the Shares will be subject to NYSE Arca Equities Rule 8.600(d)(2)(D), which sets forth circumstances under which Shares of the Fund may be halted. In addition, as noted above, investors will have ready access to information regarding the Fund's holdings, the Portfolio Indicative Value, the Disclosed Portfolio, and quotation and last sale information for the Shares.

The proposed rule change is designed to perfect the mechanism of a free and

open market and, in general, to protect investors and the public interest in that it will facilitate the listing and trading of an additional type of actively-managed exchange-traded product that will enhance competition among market participants, to the benefit of investors and the marketplace. As noted above, the Exchange has in place surveillance procedures relating to trading in the Shares and may obtain information via ISG from other exchanges that are members of ISG or with which the Exchange has entered into a comprehensive surveillance sharing agreement. In addition, as noted above, investors will have ready access to information regarding the Fund's holdings, the Portfolio Indicative Value, the Disclosed Portfolio, and quotation and last sale information for the Shares.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

(A) by order approve or disapprove the proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to rule-comments@sec.gov. Please include File Number SR-NYSEArca-2011-51 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-NYSEArca-2011-51. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Section, 100 F Street, NE., Washington, DC 20549-1090, on official business days between 10 a.m. and 3 p.m. Copies of the filing will also be available for inspection and copying at the NYSE's principal office and on its Internet Web site at <http://www.nyse.com>. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSEArca-2011-51 and should be submitted on or before September 8, 2011.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.²¹

Elizabeth M. Murphy,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-65115; File No. SR-CHX-2011-22]

Self-Regulatory Organizations; Chicago Stock Exchange, Inc.; Notice of Filing of Proposed Rule Change To Amend Article 20, Rule 10, Governing Clearly Erroneous Executions

August 11, 2011.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4² thereunder, notice is hereby given that on August 10, 2011, the Chicago Stock Exchange, Inc. (“CHX” or the “Exchange”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I and II below, which Items have been prepared by the CHX. CHX has filed this proposal pursuant to Exchange Act Rule 19b-4(f)(6)³ which is effective upon filing with the Commission.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

CHX proposes to amend Article 20, Rule 10, governing clearly erroneous executions, so that the rule will continue to operate in the same manner after changes to the single stock trading pause process are effective. The text of this proposed rule change is available on the Exchange’s Web site at (<http://www.chx.com>) and in the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the CHX included statements concerning the purpose of and basis for the proposed rule changes and discussed any comments it received regarding the proposal. The text of these statements may be examined at the places specified in Item IV below. The CHX has prepared summaries, set forth in sections A, B and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

Background

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ 17 CFR 240.19b-4(f)(6).

The Exchanges⁴ and FINRA, in consultation with the Commission, have made changes to their respective rules in a concerted effort to strengthen the markets after the severe market disruption that occurred on May 6, 2010. One such effort by the Exchanges and FINRA was to adopt a uniform trading pause process during periods of extraordinary market volatility as a pilot in S&P 500 Index stocks (“Pause Pilot”),⁵ approved by the Commission on June 10, 2010.⁶ On September 10, 2010, the Commission approved the Exchanges’ and FINRA’s proposals to add the securities included in the Russell 1000 Index and specified ETPs to the Pause Pilot.⁷ On September 10, 2010, the Commission also approved changes proposed by the Exchanges to amend certain of their respective rules to set forth clearer standards and curtail their discretion with respect to breaking erroneous trades.⁸ The changes, among other things, provided uniform treatment of clearly erroneous execution reviews in the event of transactions that result in the issuance of an individual stock trading pause pursuant to the

⁴ For purposes of this filing, the term “Exchanges” refers collectively to BATS Exchange, Inc., BATS Y-Exchange, Inc., NASDAQ OMX BX, Inc., Chicago Board Options Exchange, Inc., Chicago Stock Exchange, Inc., EDGA Exchange, Inc., EDGX Exchange, Inc., International Securities Exchange LLC, The NASDAQ Stock Market LLC, New York Stock Exchange LLC, NYSE Amex LLC, NYSE Arca, Inc., National Stock Exchange, Inc., and NASDAX [sic] OMX PHLX LLC.

⁵ Rule 4120(a)(11). The pauses under Rule 4120(a)(11) occur when a security’s price moves by the applicable percentage within a five minute period between 9:45 a.m. and 3:35 p.m., or in the case of an early scheduled close, 25 minutes before the close of trading. Such pauses last for five minutes. At the conclusion of the pause period, the security is opened pursuant to the Halt Cross process under Rule 4753.

⁸ Securities Exchange Act Release No. 62886 (September 16, 2010), 75 FR 56613 (September 16, 2010) (File Nos. SR-BATS-2010-016; SR-BX-2010-040; SR-CBOE-2010-056; SR-CHX-2010-13; SR-EDGA-2010-03; SR-EDGX-2010-03; SR-ISE-2010-62; SR-NASDAQ-2010-076; SR-NSX-2010-07; SR-NYSE-2010-47; SR-NYSEAmex-2010-60; and SR-NYSEArca-2010-58).

Pause Pilot on the listing market and those that occur up to the time the trading pause message is received by the other markets from the single plan processor responsible for consolidation and dissemination of information for the security (“Latency Trades”).

As part of the changes to the clearly erroneous process under Article 20, Rule 10, CHX replaced existing Rule 10(c)(4) with all new text to provide clarity in the clearly erroneous process when a Pause Pilot trading pause is triggered. Pursuant to Rule 10(c)(4), Latency Trades will be broken by the exchange if they exceed the applicable percentage from the Reference Price, as noted in the table found under Rule 10(c)(1).⁹ The Reference Price, for purposes of Rule 10(c)(4), is the price that triggered a trading pause pursuant to the Pause Pilot (the “Trading Pause Trigger Price”). As such, Latency Trades that occur on CHX would be broken by the exchange pursuant to Rule 10(c)(4) if the transaction occurred at either three, five or ten percent above the Trading Pause Trigger Price.¹⁰

On June 23, 2011, the Commission approved a joint proposal to expand the respective Pause Pilot rules of the Exchanges and FINRA to include all remaining NMS stocks (“Phase III Securities”).¹¹ The new pilot rules, which will be implemented on August 8, 2011, not only expand the application of the Pause Pilot, but also apply larger percentage moves that trigger a pause to the Phase III Securities. CHX amended its Pause Pilot rule, Rule 2(e), by adding three new subparagraphs to address the treatment of the Phase III Securities. The rule applicable to the original Pause Pilot securities was placed in new Rule 2(e)(i). The rules applicable to the Phase III Securities were placed in new Rules 2(e)(ii) and (iii). A pause under Rule 2(e)(ii) is triggered by a 30 percent price move within a five minute period in a Phase III Security that had a closing price on the previous trading day of \$1 or more. A pause under Rule 2(e)(iii) is triggered by a 50 percent price move within a five minute period in a Phase

⁹ Pursuant to Rule 10(c)(1), a security with a Reference Price of greater than zero and up to an including \$25 is subject to a 10% threshold; a security with a Reference Price of greater than \$25 and up to and including \$50 is subject to a 5% threshold; and a security with a Reference Price of greater than \$50 is subject to a 3% threshold.

¹⁰ Rule 10(c)(4).

¹¹ Securities Exchange Act Release No. 64735 (June 23, 2011), 76 FR 38243 (June 29, 2011) (File Nos. SR-BATS-2011-016; SR-BYX-2011-011; SR-BX-2011-025; SR-CBOE-2011-049; SR-CHX-2011-09; SR-EDGA-2011-15; SR-EDGX-2011-14; SR-FINRA-2011-023; SR-ISE-2011-028; SR-NASDAQ-2011-067; SR-NYSE-2011-21; SR-NYSEAmex-2011-32; SR-NYSEArca-2011-26; SR-NSX-2011-06; SR-Phlx-2011-64).

III Security that had a closing price on the previous trading day of less than \$1. If no prior day closing price is available, the last sale reported to the Consolidated Tape on the previous trading day is used.

The Issue

The recently-approved changes to the Pause Pilot will have the unintended effect of removing the Phase III Securities from the normal clearly erroneous process and potentially result in unfair outcomes in the face of severe volatility in such securities. Phase III Securities are currently subject to the clearly erroneous process under Rules 10(c)(1)–(3), which apply to all securities except the current Pause Pilot securities subject to a pause. For purposes of transactions in securities not involving Pause Pilot securities, or transactions involving Pause Pilot securities that occur when there is not a pause pursuant to the Pause Pilot, the Reference Price is the consolidated last sale price immediately prior to the execution(s) under review, subject to certain exceptions.¹² As noted above, the Trading Pause Trigger Price is used as the Reference Price when a Pause Pilot pause is in effect. As a consequence, under the current rules a Latency Trade is subject to the clearly erroneous thresholds based on the Trading Pause Trigger Price, which represents a ten percent or greater move in the transacted price of the security in a five minute period.

Under the new Pause Pilot rules, a Latency Trade in a Phase III Security occurs only after either a 30 or 50 percent (or greater) move in the transacted price of the security in a five minute period. As a result, a member firm that trades in a Phase III Security that triggers a clearly erroneous threshold of three, five or ten percent from the Reference Price, yet falls below the Pause Pilot trigger of either 30 or 50 percent, would be able to avail themselves of a clearly erroneous review. A similarly situated member firm that transacts in the same security as a Latency Trade at a price equal to or greater than the Phase III Security thresholds, yet less than the clearly erroneous thresholds under Rule 10(c)(1), would not be able to avail themselves of the clearly erroneous process. Another member firm that transacts in the same security as a Latency Trade that exceeds three, five or ten percent from the Trading Pause Trigger Price would automatically receive clearly erroneous relief. CHX believes that this would be an inequitable result and an arbitrary

application of the clearly erroneous process. Specifically, CHX believes that, since the 30 and 50 percent triggers of the Pause Pilot are substantially greater than the 10 percent threshold of the original Pause Pilot, the Phase III Securities should remain under the current clearly erroneous process of Rules 10(c)(1)–(3).

Applying the clearly erroneous process under Rules 10(c)(1)–(3) to the Phase III Securities would allow CHX to review all transactions that exceed the normal clearly erroneous thresholds and Reference Price, and, importantly, avoid arbitrary selection of “winners” and “losers” in the face of severe volatile moves in a security of 30 or 50 percent over a five minute period. For example, A member firm that trades in a security subject to Rule 2(e)(ii) or (iii) that triggers a clearly erroneous threshold of three, five or ten percent, yet falls below the Pause Pilot trigger threshold trading at 29 percent from the prior day’s closing price, would be potentially entitled to a clearly erroneous break pursuant Rule 10(c)(1). Should trading in that same stock trigger a trading pause at a price of 30 or 50 percent greater than the prior day’s close, the member firm would not be entitled to a clearly erroneous trade break unless that trade exceeded three, five or ten percent beyond the price that triggered the pause. This scenario causes an inequity among a group of member firms that have transactions in the Phase III Securities falling between the three, five and ten percent thresholds from the Reference Price under the normal Rule 10(c)(1) clearly erroneous process and the Pause Pilot clearly erroneous triggers of three, five or ten percent away from the Trading Pause Trigger Price. Such member firms would not be provided relief under the clearly erroneous rules merely due to the imposition of a Pause Pilot halt, notwithstanding that other member firms with transactions that occur at the same rolling five minute percentage difference. CHX believes a better outcome is to afford all members transacting in Phase III Securities the opportunity of having such trades reviewed.

Summary

The expansion of the Pause Pilot to the Phase III Securities will have the unintended consequence of setting the point at which a clearly erroneous transaction occurs once a Pause Pilot pause is initiated far beyond the triggers applied prior to the expansion, which will, in turn, prevent certain market participants from availing themselves of the clearly erroneous rules, notwithstanding that other similarly

situated participants are able to do so. CHX believes that this would be an arbitrary application of the clearly erroneous process in a manner that is unfair and not consistent with the spirit and purpose of the rule. Accordingly, CHX is proposing to amend Rules 10(c)(1)–(4) to specify that Rule 10(c)(4) applies only to the current securities of Pause Pilot, as found under Rule 2(e)(i).¹³

2. Statutory Basis

The statutory basis for the proposed rule change is Section 6(b)(5) of the Securities Exchange Act of 1934 (the “Act”),¹⁴ which requires the rules of an exchange to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest. The proposed rule change also is designed to support the principles of Section 11A(a)(1)¹⁵ of the Act in that it seeks to assure fair competition among brokers and dealers and among exchange markets. CHX believes that the proposed rule meets these requirements in that it promotes transparency and uniformity across markets concerning decisions to break erroneous trades, yet also ensures fair application of the process so that similarly situated member firms are provided the same opportunity of a clearly erroneous review. CHX notes that the changes proposed herein will in no way interfere with the operation of the Pause Pilot process, as amended.

B. Self-Regulatory Organization’s Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization’s Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become

¹³ CHX notes that the Exchanges are filing similar proposals to make the changes proposed herein.

¹⁴ 15 U.S.C. 78f(b)(5).

¹⁵ 15 U.S.C. 78k–L(a)(1).

¹² *Id.*

operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, has become effective pursuant to Section 19(b)(3)(A) of the Act¹⁶ and Rule 19b-4(f)(6)(iii) thereunder.¹⁷ The Exchange has asked the Commission to waive the 30-day operative delay so that the proposal may become operative immediately upon filing. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest because such waiver will allow the clearly erroneous rules to continue to operate as they did prior to the effectiveness of the Pause Pilot expansion to Phase III Securities so that similarly situated member firms are provided the same opportunity of a clearly erroneous review. Accordingly, the Commission waives the 30-day operative delay requirement and designates the proposed rule change as operative upon filing with the Commission.¹⁸

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to rule-comments@sec.gov. Please include File Number SR-CHX-2011-22 on the subject line.

¹⁶ 15 U.S.C. 78s(b)(3)(A).

¹⁷ 17 CFR 240.19b-4(f)(6)(iii). In addition, Rule 19b-4(f)(6)(iii) requires that a self-regulatory organization submit to the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission is waiving the five day written notice requirement in this case. Therefore, the Commission notes that the Exchange has satisfied this requirement.

¹⁸ For purposes only of waiving the 30-day operative delay, the Commission has considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549-1090.

All submissions should refer to File Number SR-CHX-2011-22. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room, 100 F Street, NE., Washington, DC 20549, on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make publicly available. All submissions should refer to File Number SR-CHX-2011-22 and should be submitted on or before September 8, 2011.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

Elizabeth M. Murphy,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-65127; File No. SR-NYSE-2011-20]

Self-Regulatory Organizations; New York Stock Exchange LLC; Order Granting Approval of Proposed Rule Change To Add New Section 907.00 to the Listed Company Manual that Sets Forth Certain Complimentary Products and Services That Are Offered to Currently and Newly Listed Issuers

August 12, 2011.

I. Introduction

On May 5, 2011, the New York Stock Exchange LLC ("NYSE" or "Exchange") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to amend the Listed Company Manual ("Manual") setting forth certain complimentary products and services offered to currently and newly listed issuers. The proposed rule change was published in the **Federal Register** on May 23, 2011.³ The Commission received seventeen comments from 14 commenters on the proposal.⁴ NYSE submitted a letter in response to the comments.⁵ On July 5, 2011, the Commission extended the time period

in which to either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to disapprove the proposed rule change, to August 21, 2011.⁶ This order grants approval of the proposed rule change.

II. Description of the Proposal

In its filing, NYSE is proposing to amend the Manual by adding a new Section 907.00 that sets forth a practice of offering certain complimentary products and services to currently and newly listed issuers. NYSE offers the complimentary products and services as described below to respond to competitive pressures in the market for listings to attract new listings and retain existing listings.⁷ These products and services are developed or delivered by NYSE or by a third-party for use by NYSE listed companies. Some of these products are commercially available by such third-party vendors. According to NYSE, all listed issuers receive the same complimentary products and services through the NYSE Market Access Center, while certain tiers of listed issuers receive additional products and services. As discussed in more detail below, the additional services an issuer receives is based, for currently listed issuers, on total shares of common stock or American Depositary Receipts ("ADRs") issued and outstanding and, for newly listed issuers, on total global market value based on a public offering price.

A. NYSE Market Access Center

NYSE developed a market information analytics platform that is available for free to all NYSE listed issuers, called the NYSE Market Access Center. In the rule filing, NYSE states that the NYSE's Market Access Center was created to "provide issuers with better market insight and information across all exchange and trading venues."⁸ The NYSE Market Access Center includes products and services that were either a) developed by NYSE using proprietary data and/or intellectual property or b) built by a third-party expressly for NYSE-listed companies. According to NYSE, within this platform, all issuers have access to

dated June 27, 2011 ("NYSE Response Letter"). NYSE's Response Letter is in response to those comments submitted prior to June 27, 2011. See note 4, *supra* for a list of those letters.

⁶ See Securities Exchange Act Release No. 64809 (July 5, 2011), 76 FR 40758 (July 11, 2011).

⁷ See e-mail from Theodore Lazo, General Counsel, NYSE to Sharon Lawson, Senior Special Counsel, Division of Trading and Markets and Arisa Tinaves, Special Counsel, Division of Trading and Markets on August 2, 2011.

⁸ See Notice, *supra* note 3.

tools and information related to market intelligence, education, investor outreach, media visibility, corporate governance, and advocacy initiatives.⁹ Additionally, the NYSE Market Access Center provides all issuers with access to discounted products and services from the same third-party vendors. All issuers listed on the Exchange have access to the NYSE Market Access Center on the same basis. At the time of its filing with the Commission, NYSE noted that the products and services currently available through the NYSE Market Access Center have a commercial value of approximately \$50,000 annually.¹⁰

B. Tiered Products and Services Offered to Certain Companies

In addition to the NYSE Market Access Center, NYSE offers products and services to certain currently listed and newly listed issuers on a tiered basis. Currently listed issuers are categorized into two tiers, Tier One and Tier Two. Under NYSE's proposal, Tier One issuers are U.S. issuers that have 270 million or more total shares of common stock issued and outstanding in all share classes, including and in addition to Treasury shares, and Foreign Private Issuers that have 270 million or more in ADRs issued and outstanding, each calculated annually as of December 31 of the preceding year.¹¹ Tier Two issuers are categorized as those U.S. issuers that have 160 million to 269,999,999 total shares of common stock issued and outstanding in all share classes, including and in addition to Treasury shares, and Foreign Private Issuers that have 160 million to 269,999,999 in ADRs issued and outstanding, each calculated annually as of December 31 of the preceding year.¹² In addition to the NYSE Market Access Center products and services, Tier One issuers receive market surveillance products and services, which NYSE states have a commercial value of \$45,000 annually, and web-hosting products and services, which NYSE states have a commercial value of approximately \$12,000 to \$16,000 annually. Tier Two issuers can choose to receive either web-hosting products and services at the values noted above, or market analytics products and

⁹ In the Notice, the Exchange provided examples of the products and services offered by the NYSE Market Access Center and noted that a description of all offerings is available on the Exchange's Web site. See Notice, *supra* note 3.

¹⁰ See *supra* note 7.

¹¹ All share classes issued include, for example, where a company has two classes of common stock, such as Class A and Class B common shares.

¹² See Notice, *supra* note 3.

services, with a commercial value according to NYSE of \$20,000 annually.

Newly listed issuers similarly are categorized into two tiers, Tier A and Tier B.¹³ Tier A includes issuers with a global market value of \$400 million or more based on the public offering price. Tier B includes issuers with a global market value of less than \$400 million based on the public offering price. In addition to the NYSE Market Access Center products and services, Tier A issuers receive either market surveillance products and services for a period of 12 calendar months from the date of listing or market analytics products and services for a period of 24 calendar months from the date of listing, at the issuer's election. The commercial value for these services is the same as those described above for Tier One or Tier Two issuers. Additionally, Tier A companies receive web-hosting, the value of which is noted above, and news distribution products and services, with a commercial value of \$10,000 annually, for a period of 24 calendar months from the date of listing. Tier B companies receive web-hosting and news distribution products and services for a period of 24 calendar months from the date of listing. At the expiration of the 24-month period, Tier A or Tier B issuers that meet the qualifications of Tier One or Tier Two based on total shares or total ADRs issued and outstanding receive either Tier One or Tier Two products and services.¹⁴

III. Summary of Comments and NYSE Response to Comments

Fourteen commenters raised objections to the proposal.¹⁵ Generally, commenters expressed concern that the NYSE's practice of offering complimentary services harms competing suppliers of those services or adversely affects competition in affected markets.¹⁶ Specifically, several commenters expressed concern about

¹³ "Newly listed issuers" means U.S. issuers conducting an initial public offering ("IPO"), issuers emerging from bankruptcy, spinoffs (where a company lists new shares in the absence of a public offering), and carve-outs (where a company carves out a business line or division, which then conducts a separate IPO). Newly listed issuers do not include issuers that transfer their listings from another national securities exchange; rather, transferring issuers are eligible for the services available to currently listed issuers. See proposed Rule 907.00 in the Manual.

¹⁴ The Exchange provided a description of all products and services offered to the Tiers. See Notice, *supra* note 3.

¹⁵ See *supra* note 4.

¹⁶ See Rafferty Letter, Allen Letter, Rivel Letter, Falkner Letter, MZ Letter, Fairir Letter, PrecisionIR Letter, SNL Letter, and IR Web Reporting Letter. See also, Issuer Advisory Letter (stating that the proposed rule change restricts competition for listings).

adverse effects arising from the “strategic partnership” with Thomson-Reuters and Ipreo. The concern is that offering complimentary services disadvantages smaller businesses providing investor relations services.¹⁷ One commenter noted that the NYSE’s complimentary offering of these services makes it “too difficult to compete” with Thomson-Reuters and Ipreo.”¹⁸ Commenters also believed that the proposal, by endorsing certain vendors, would discourage new vendors from entering markets for vendor services or stifling innovation.¹⁹

Commenters believed that the proposal would require issuers to use the specific vendor offered by NYSE or create the impression that listed companies must use the preferred vendor.²⁰ Additionally, three commenters believed that although issuers are not required to use the services and providers offered by NYSE, providers of competing products are still disadvantaged because they would have to convince issuers to pay for a similar service that the issuers are able to receive for no cost from the Exchange.²¹ However, one vendor who commented stated that in the last several months, its service has replaced an NYSE complimentary service, specifically web-hosting, for a number of NYSE issuers.²² Additionally, another commenter stated that numerous issuers have continued to use their existing preferred service providers at an additional cost to the issuers, instead of taking advantage of the complimentary products and services provided by NYSE.²³

Four commenters suggested that instead of offering complimentary products and services of certain vendors, NYSE should instead offer issuers a subsidy or credit, which would allow them to use any service

¹⁷ See Allen Letter, Falkner Letter, Fairir Letter, and Rivel Letter. See also, Anonymous Letter (noting that there are already obstacles for smaller businesses).

¹⁸ See Fairir Letter (arguing that NYSE is trying to justify its high listing cost).

¹⁹ See GLX Letter, MZ Letter, Fairir Letter, PrecisionIR Letter, IR Web Reporting Letter, and Q4 Letter. See also, Falkner Letter (noting the smaller providers provide innovative and often times better value).

²⁰ See Rafferty Letter, Rivel Letter, Fairir Letter, PrecisionIR Letter, and IR Web Reporting Letter. See also, SNL Letter (noting that the proposal could reasonably be viewed as an endorsement by the NYSE and Commission of specific vendors) and IR Web Reporting Letter 2 (noting that issuers may conclude that certain vendors will enable issuers to comply with the Exchange’s listing requirement given the NYSE’s endorsement).

²² See Q4 Letter.

²³ See Issuer Advisory Letter.

provider.²⁴ One commenter argued that such credit would benefit the Exchange by allowing it to continue to provide such products and services to issuers, but through a vendor of the issuers’ own choosing.²⁵ This commenter believed that such an approach would ultimately benefit competition by leveling the playing field and allowing all vendors, both large and small to compete.²⁶

Another commenter recommended disapproving the proposed rule change and having the exchanges consider free listings or alternatively, having the Commission require increased disclosure regarding listing benefit packages provided to issuers, which would address transparency concerns.²⁷ Additionally, the commenter suggested that the Commission appoint an independent task force comprised of issuers to recommend a model that would permit the exchanges to provide services while not limiting value-added service offerings.²⁸ The commenter argued that NYSE’s proposal would result in the equivalent of a maximum service cap and that the Commission’s approval of the proposal will be used by the Exchange as a justification for limiting their service offerings.²⁹

One commenter noted that the proposal is not clear on the fee arrangements between the Exchange and the product and service vendors and questioned whether issuers pay for services over and above the services provided by NYSE and if the vendors share revenues with the Exchange or if the services are competitively priced.³⁰ The commenter also asked if NYSE receives payment from its preferred providers.³¹

Lastly, this commenter raised the issue of whether a for-profit exchange should be in the investor relations services business at all.³² According to the commenter, there is a conflict of interest between the exchange’s role as a service provider or endorser of service providers and its role as a self-regulatory organization that sets and enforces disclosure requirements for its listed companies.³³

²⁴ See MZ Letter, Fairir Letter, IR Web Reporting Letter, Q4 Letter, and IR Web Reporting Letter 2. See also, Issuer Advisory Letter (noting that the NYSE’s proposal restricts issuers by forcing them to select from a narrow list of providers).

²⁵ See MZ Letter. See also, IR Web Reporting Letter (noting that a subsidy or credit would serve the NYSE’s objective of attracting listings).

³³ *Id.*

In the NYSE Response Letter, NYSE responded to the issues raised by the commenters.³⁴ The NYSE Response Letter clarified that no issuer is forced or required to utilize the complimentary products or services as a condition of listing and consequently, can continue to use alternative products and services of their choice.³⁵

Further, the Exchange represented that it provides the third-party products and services to listed companies through non-exclusive arrangements with vendors. Accordingly, the Exchange is willing to consider entering into such arrangements with other third-party vendors that provide “high-quality” products and services. NYSE further stated that it does not endorse, nor require the use of, any particular vendor or any particular products and services.³⁶

In response to the NYSE Response Letter, one commenter questioned the Exchange’s willingness to enter into arrangements with other third-party vendors, stating that upon performing its own research, the commenter was unable to “find any information provided by NYSE outlining the process that vendors must follow to have their services added or reviewed.”³⁷ Further, the commenter questioned whether the Exchange’s current vendor that offers web-hosting and wire services is of “high quality”, asserting that the vendor lacked distribution to a popular website for investors to which all of its competitors provide distribution services.³⁸

Finally, in response to the conflict of interest issue that was raised, the Exchange disagreed that there is any conflict of interest with respect to its offerings of products and services because such product and services are offered on a complimentary basis and the arrangements with the vendors are non-exclusive. NYSE also reiterated that issuers are not required to accept or use the products or services to satisfy their obligations under the Exchange’s listing standards.³⁹

IV. Discussion and Commission’s Findings

The Commission has carefully reviewed the proposed rule change and finds that it is consistent with the requirements of Section 6 of the Act.⁴⁰

³⁴ See *supra* note 5.

³⁵ See NYSE Response Letter.

³⁶ *Id.*

³⁷ See IR Web Reporting Letter 2.

³⁸ *Id.*

³⁹ See NYSE Response Letter.

⁴⁰ 15 U.S.C. 78f. In approving this proposed rule change, the Commission has considered the

Specifically, the Commission finds that the proposal is consistent with Sections 6(b)(4),⁴¹ 6(b)(5),⁴² and 6(b)(8)⁴³ in that the proposal is designed to provide for the equitable allocation of reasonable dues, fees, and other charges among exchange members and issuers and other persons using its facilities and among other things, that the Exchange's rule is designed to promote just and equitable principles of trade, and is not designed to permit unfair discrimination between issuers, and that the rules of the Exchange do not impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

The Commission believes that the proposed rule change, which would permit the NYSE to provide complimentary products and services to all listed companies and additional products and services to certain companies based on (i) total shares or total ADRs issued and outstanding for currently listed issuers or (ii) global market value based on a public offering price for newly listed issuers, is appropriate and consistent with the Act. The Commission also believes that by describing in the Manual the products and services available to issuers and the values of the products and services, the Exchange is adding greater transparency to its rules and the fees applicable to issuers.

The Commission notes that the NYSE has represented that the various tiers are designed so that qualifying issuers with increased trading volumes and market activity have enhanced access to products and services that the listed companies would use in the absence of the complimentary services arrangement. The NYSE has further represented that all issuers receive some level of free services and that the requirements to qualify for a higher level of free services and products are transparent and set forth clearly in the language being adopted in new Section 907.00 of the Manual. This language also includes the commercial value of the free services in each tier. While not all issuers receive the same level of services, NYSE has stated that trading volume and market activity are related to the level of services that the listed companies would use in the absence of the complimentary services arrangements.⁴⁴ Further, the criteria for satisfying the tiers are the same for all

proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

⁴¹ 15 U.S.C. 78f(b)(4).

⁴² 15 U.S.C. 78f(b)(5).

⁴³ 15 U.S.C. 78f(b)(8).

⁴⁴ See Notice, *supra* note 3.

issuers. Accordingly, based on the factors noted above, the Commission believes that the proposed rule changes to the Manual are consistent with the requirements of the Act and, in particular, that the products and services and their commercial value are equitably allocated among issuers consistent with Section 6(b)(4) of the Act, and the rule does not unfairly discriminate between issuers consistent with Section 6(b)(5) of the Act.

The NYSE Response Letter clarified and responded to many of the questions and concerns raised by commenters. Specifically, NYSE represented that issuers are not forced or required to utilize the complimentary products and services as a condition of listing. Furthermore, the third-party products and services are provided through non-exclusive arrangements with vendors and the Exchange does not expressly endorse any particular vendor or any product or services provided by any particular vendor. In fact, one vendor noted that it has replaced the NYSE's complimentary web-hosting vendor with its web system for a number of NYSE listed issuers.⁴⁵ Another commenter stated that issuers use other service providers despite incurring additional costs.⁴⁶

The Commission recognizes, however, that the proposed rule change may affect the purchase decisions of some listed issuers. The effect of offering the services of some vendors on a complimentary basis is to provide issuers with the services of those vendors at a price that is lower in relative terms than what other vendors charge. A reduction in a vendor's relative price will generally cause some issuers to substitute their business toward that vendor. Accordingly, the Commission believes that the NYSE's offering of selected vendors' products and services on a complimentary basis will, by lowering their relative price, likely cause some listed issuers to substitute their business away from other vendors and toward the selected vendors. The Commission believes, however, that the impact of this substitution would be mitigated for the reasons discussed below.

The Commission believes that the NYSE is responding to competitive pressures in the market for listing in making this proposal. Specifically, the NYSE is offering complimentary products and services to attract new listings, retain currently-listed issuers, and respond to competitive pressures.⁴⁷

⁴⁵ See Q4 Letter.

⁴⁶ See Issuer Advisory Letter.

⁴⁷ See *supra* note 7.

The Commission understands that the NYSE faces competition in the market for listing services, and that it competes in part by improving the quality of the services that it offers listed companies. By offering products and services on a complimentary basis and ensuring that it is offering the services most valued by its listed issuers, the NYSE will improve the quality of the services that listed companies receive. Accordingly, the Commission believes that NYSE's proposal reflects the current competitive environment for exchange listings among national securities exchanges, and is appropriate and consistent with Section 6(b)(8) in furtherance of the purposes of the Act.⁴⁸

The Commission also recognizes that to ensure quality to its listed issuers, the NYSE represented that it selects only vendors with the capacity to service all their eligible listed companies without sacrificing quality.⁴⁹ Thus, some small service vendors may be placed at a disadvantage. Nonetheless, the Commission does not believe that the proposal harms the market for the complimentary products and services in a way that constitutes an inappropriate burden on competition or an inequitable allocation of fees, or fails to promote just and equitable principles of trade, in a manner inconsistent with the Act. As noted above, issuers are not forced or required to utilize the complimentary products and services and some issuers have selected competing products and services. The NYSE's consideration of quality and the needs of its listed issuers in selecting the vendors and its willingness to change vendors is consistent with competition for vendor services. The Commission also understands that the NYSE selected its current service providers substantially based on the service providers that many NYSE listed issuers were using at the time of the selection.⁵⁰ The approval of the rule proposal, will, however, help ensure that individual issuers are not given specially negotiated packages for products and services to list or remain

⁴⁸ 15 U.S.C. 78f(b)(8).

⁴⁹ See e-mail from Theodore Lazo, General Counsel, NYSE Regulation to Sharon Lawson, Senior Special Counsel, Division of Trading and Markets on August 5, 2011. Edwards, Assistant Director and Cindy Alexander, Assistant Chief Economist, Division of Risk, Strategy, and Financial Information, Commission.

⁵⁰ *Id.*

listed which would raise unfair discrimination issues under the Act.

While some commenters have argued that the Commission's approval of the NYSE's proposal will mean the Commission has implicitly approved the particular service providers NYSE currently uses, the Commission disagrees. The Commission, in approving the Exchange's proposal, is not endorsing, specifically or implicitly, any party with which the NYSE has chosen to do business.

The Commission has carefully considered the comment letters. Although some of the alternative proposals by the commenters might also satisfy the standards under Sections 6(b) and 19(b) of the Act⁵¹ depending on the facts and circumstances, those proposals are not before us, and the Commission believes that the NYSE's proposal is consistent with these standards and, therefore, should be approved. Other commenters raised certain issues beyond the scope of the Commission's review of this rule proposal, such as the fee arrangements between the NYSE and the providers of the services described in this order. The Commission has carefully considered these comments but believes that the proposal before the Commission satisfies the requirements for approval under Sections 6(b) and 19(b) of the Act⁵² for the reasons discussed above.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,⁵³ that the proposed rule change (SR-NYSE-2011-20) be, and it hereby is, approved.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁵⁴

Elizabeth M. Murphy,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-65125; File No. SR-NASDAQ-2011-105]

Self-Regulatory Organizations; The NASDAQ Stock Market LLC; Notice of Filing of Proposed Rule Change To Establish an Acceptable Trade Range for Quotes and Orders Entered on the NASDAQ Options Market

August 12, 2011.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on August 2, 2011, The NASDAQ Stock Market LLC ("NASDAQ") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by NASDAQ. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

NASDAQ proposes to establish an Acceptable Trade Range for quotes and orders entered on the NASDAQ Options Market ("NOM"). Similar mechanisms are used successfully on other exchanges to protect investors and members by limiting volatility and obvious errors.

The text of the proposed rule change is available at <http://NASDAQ.cchwallstreet.com/>, at NASDAQ's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, NASDAQ included statements concerning the purpose of and basis for

the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. NASDAQ has prepared summaries, set forth in Sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Background. In the current high-speed electronic market environment, various trading centers grapple with issues associated with thinly traded securities such as price dislocations, wide quotes, and erroneous executions that can result in trade cancellations. Though these situations are not overly prevalent, they can produce confusion and frustration among market participants. As a custodian and operator of several U.S. exchanges, NASDAQ believes that it is always prudent and appropriate to consider system enhancements that will preclude potential future issues with or unforeseen gaps in the existing structure of its trading systems.

Accordingly, NASDAQ is proposing to adopt a mechanism that will prevent the NOM trading system ("System") from experiencing dramatic price swings. This circumstance can exist if, for example, a market order or aggressively priced limit order is entered that is larger than the total volume of contracts quoted at the top-of-book across all U.S. options exchanges. Currently, without any protections in place, this could result in options executing at prices that have little or no relation to the theoretical price of the option.

For example, in a thinly traded option:

Away Exchange Quotes:

Exchange	Bid size	Bid price	Offer price	Offer size
PHLX	10	\$1.00	\$1.05	10
NYSE Arca	10	1.00	1.05	10
NYSE Amex	10	1.00	1.10	10
BOX	10	1.00	1.15	10

NOM Price Levels:

Exchange	Bid size	Bid price	Offer price	Offer size
NOM	10	\$1.00	\$1.05	10

⁵¹ 15 U.S.C. 78f(b) and 15 U.S.C. 78s(b).

⁵² *Id.*

⁵³ 15 U.S.C. 78s(b)(2).

⁵⁴ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

Exchange	Bid size	Bid price	Offer price	Offer size
NOM	1.10	10
NOM	1.40	10
NOM	5.00	10

If NOM receives a routable market order to buy 80 contracts, the System will respond as described below:

- 10 contracts will be executed at \$1.05 against NOM
- 10 contracts will be executed at \$1.05 against PHLX
- 10 contracts will be executed at \$1.05 against NYSE Arca.
- 10 contracts will be executed at \$1.10 against NOM
- 10 contracts will be executed at \$1.10 against NYSE AMEX
- 10 contracts will be executed at \$1.15 against BOX

After these executions, there are no other known valid away exchange quotes. The NBBO is therefore comprised of the remaining interest on the NOM book, specifically 10 contracts at \$1.40 and 10 contracts at \$5.00. In the absence of an Acceptable Trade Range mechanism, the order would execute against the remaining interest at \$1.40 and \$5.00, resulting in potential harm to investors.

To bolster the normal resilience and market behavior that persistently produces robust reference prices, NOM is proposing to create a level of protection that prevents the market from moving beyond set thresholds. The thresholds consist of a reference price plus (minus) set dollar amounts based on the nature of the option and the premium of the option. The exchange is not introducing a new concept. In fact, The NASDAQ Stock Market, NASDAQ OMX PSX, and NASDAQ OMX BX all place a limit on the prices at which market orders will be allowed to execute.³

System Operation. The proposed Acceptable Trade Range would work as follows: Prior to executing orders received by the exchange, an Acceptable Trade Range is calculated to determine the range of prices at which orders may be executed. When an order is initially received, the threshold is calculated by adding (for buy orders) or subtracting

³ NASDAQ believes that the proposed Acceptable Trade Range mechanism is superior to the market collar orders currently used in equity markets because the Acceptable Trade Range will apply to all orders rather than just unpriced orders. Additionally, rather than immediately cancelling the order, the market would continue to work the order for execution. See NASDAQ Stock Market rule 4751(f)(13), NASDAQ OMX BX 4751(f)(10), and NASDAQ OMX PSX 3301(f)(9).

(for sell orders) a value,⁴ as discussed below, to the National Best Offer for buy orders or the National Best Bid for sell orders to determine the range of prices that are valid for execution. A buy (sell) order will be allowed to execute up (down) to and including the maximum (minimum) price within the Acceptable Trade Range. The Acceptable Trade Range threshold becomes the reference price for the next Acceptable Trade Range calculation. If an order cannot be completely executed within the Acceptable Trade Range, and the limit price of the order is greater (for buy orders) or less (for sell orders) than the Acceptable Trade Range threshold, the unexecuted portion of the original order will be posted at the Acceptable Trade Range threshold. The order will remain posted for a brief period, not to exceed one second, to allow the market to refresh and to determine whether or not more liquidity will become available (on NOM or any other exchange if the order is designated as routable) within the posted price of the order before moving on to a new Threshold Price. The Acceptable Trade Range threshold, at which the order is posted, then becomes the new reference price⁵ and a new threshold is calculated. Once the brief pause has expired, if the order has not been fully executed, it will be allowed to execute up to and including the new Acceptable Trade Range Threshold Price.

During the brief pause, NOM will display the Acceptable Trade Range Threshold Price on one side of the market and the best available price on the opposite side of the market using a “non-firm” indicator.⁶ This allows the order setting the Acceptable Trade Range Threshold Price to retain price/time priority in the NOM book and also prevents any later-entered order from accessing liquidity ahead of it. If NOM

⁴ The value that is to be added to the reference price will be set by the exchange and posted on the exchange Web site: <http://www.nasdaqtrader.com>.

⁵ If a new NBB is received that is greater than a buy order posted at the Acceptable Trade Range threshold, or a new NBO is received that is lower than a sell order posted at the Acceptable Trade Range threshold, the new NBB (for buy orders) or NBO (for sell orders) will be the new reference price.

⁶ Non-firm quote indication values are described on page 18 of the specifications disseminated by the Options Price Regulatory Authority. See http://www.opradata.com/specs/participant_interface_specification.pdf.

were to display trading interest available on the opposite side of the market, that trading interest would be automatically accessible to later-entered orders during the period when the order triggering the Acceptable Trade Range is paused. Following the Posting Period, the Exchange will return to a normal trading state and disseminate its best bid and offer.

NASDAQ believes that disseminating a non-firm quotation message as described above is consistent with its obligations under the SEC Quote Rule.⁷ The fact that NASDAQ is experiencing volatility that is strong enough to trigger the Acceptable Trade Range mechanism qualifies as an unusual market condition. NASDAQ expects such situations to be rare, and as described below it will set the parameters of the mechanism at levels that will ensure that it is triggered quite infrequently. In addition, the Acceptable Trade Range mechanism will cause the market to pause for no more than one second, a briefer pause than occurs in other markets that are experiencing and attempting to dampen volatility.⁸ Importantly, the brief pause only occurs after the Exchange has already executed transactions—potentially at multiple price levels—rather than pausing before executing any transactions in the hopes of attracting initial liquidity.

Importantly, the Acceptable Trade Range is neutral with respect to away markets. The order may route to other destinations to access liquidity priced within the Acceptable Trade Range provided the order is designated as routable. If the order still remains unexecuted, this process will repeat until the order is executed, cancelled, or posted at its limit price. If after an order is routed to the full size of an away exchange and additional size remains available, the remaining contracts will be posted on NOM at a price that

⁷ 17 CFR 242.602.

⁸ For example, the NASDAQ Acceptable Trade Range mechanism will pause for a briefer period than the Liquidity Replenishment Point or “LRP” employed by the New York Stock Exchange. The LRP resembles the Acceptable Trade Range in that it also is designed to dampen volatility under similar circumstances, it pauses the market in the affected security, and it disseminates to the network processor a non-firm quote condition during the resulting pause. See NYSE Rules 1000(a)(iv) and 60(e)(ii). Unlike the Acceptable Trade Range mechanism, the LRP can exceed one second in duration.

assumes the away market has executed the routed order. This practice of routing and then posting is consistent with the national market system plan governing trading and routing of options

orders and the NOM policies and procedures that implement that plan.⁹

For example, assume that the Acceptable Trade Range is set for \$0.05

and the following quotations are posted in all markets:

Away Exchange Quotes:

Exchange	Bid size	Bid price	Offer price	Offer size
ISE	10	\$0.75	\$0.90	10
AMEX	10	0.75	0.92	10
PHLX	10	0.75	0.94	10

NOM Price Levels:

Exchange	Bid size	Bid price	Offer price	Offer size
NOM	10	\$0.75	\$0.90	10
NOM	0.95	10
NOM	0.97	10
NOM	1.00	20

NOM receives a routable order to buy 70 contracts at \$1.10. The Acceptable Trade Range is \$0.05 and the reference price is the National Best Offer—\$0.90. The Acceptable Trade Range threshold is then \$0.90 + \$0.05 = \$0.95. The order is allowed to execute up to and including \$0.95. The System then pauses for a brief period not to exceed one second to allow the market (including other exchanges) to refresh and to determine whether additional liquidity will become available within the order's posted price. If additional liquidity becomes available on NOM or any away market, that liquidity will be accessed and executed.

- 10 contracts will be executed at \$0.90 against NOM
- 10 contracts will be executed at \$0.90 against ISE
- 10 contracts will be executed at \$0.92 against AMEX
- 10 contracts will be executed at \$0.94 against PHLX
- 10 contracts will be executed at \$0.95 against NOM
- Then, after executing at multiple price levels, the order is posted at \$0.95 for a brief period not to exceed one second to determine whether additional liquidity will become available.
- A new Acceptable Trade Range Threshold Price of \$1.00 is determined

(new reference price of \$0.95 + \$0.05 = \$1.00)

- If, during the brief pause not to exceed 1 second, no liquidity becomes available within the order's posted price of \$0.95, the System will then execute 10 contracts at \$0.97, and 10 contracts at \$1.00¹⁰

Similarly, if a new order is received when a previous order has reached the Acceptable Trade Range threshold, the Threshold Price will be used as the reference price for the new Acceptable Trade Range threshold. Both orders would then be allowed to execute up (down) to the new Threshold Price.

For example:
Away Exchange Quotes:

Exchange	Bid size	Bid price	Offer price	Offer size
ISE	10	\$0.75	\$0.90	10
AMEX	10	\$0.75	\$0.92	10
PHLX	10	\$0.75	\$0.94	10

NOM Price Levels:

Exchange	Bid size	Bid price	Offer price	Offer size
NOM	10	\$0.75	\$0.90	10
NOM	\$0.95	10
NOM	\$1.05	20

• NOM receives a routable order to buy 60 contracts at \$1.10. The Acceptable Trade Range is \$0.05 and the reference price is the National Best

Offer—\$0.90. The Acceptable Trade Range threshold is then \$0.90 + \$0.05 = \$0.95. The order is allowed to execute up to and including \$0.95.

- 10 contracts will be executed at \$0.90 against NOM
- 10 contracts will be executed at \$0.90 against ISE

⁹ See Options Order Protection and Locked/Crossed Markets Plan; Securities Exchange Act Release No. 60405 (July 30, 2009), 74 FR 39362 (August 6, 2009); NOM Rules Chapter VI, Section 7(b)(3)(C). Section 5(b)(v) of the Plan provides an exception from trade through prevention when: “[t]he transaction that constituted the Trade-

Through was effected by a Participant that simultaneously routed an Intermarket Sweep Order to execute against the full displayed size of any Protected Quotation that was traded through;” [sic]

¹⁰ The brief pause described above will not disadvantage customers seeking the best price in

any market. For example, if in the example above an NYSE ARCA quote of \$0.75 x \$0.96 with size of 10 x 10 is received, a routable order would first route to NYSE ARCA at \$0.96, then execute against NOM at \$0.97.

- 10 contracts will be executed at \$0.92 against AMEX
- 10 contracts will be executed at \$0.94 against PHLX
- 10 contracts will be executed at \$0.95 against NOM
- Then, after executing at multiple price levels, the order is posted at \$0.95 for a brief period not to exceed one second to determine whether additional liquidity will become available.
- A new Acceptable Trade Range Threshold Price of \$1.00 is determined (new reference price of \$0.95 + \$0.05 = \$1.00)
- If, during the brief period not to exceed one second, a second order is received to buy 10 contracts at \$1.25, the two orders would then post at the new Acceptable Trade Range Threshold price of \$1.00 for a brief period not to exceed one second to determine whether additional liquidity will become available.
- A new Acceptable Trade Range threshold of \$1.05 will be calculated.
- If no additional liquidity becomes available within the posted price of the orders (\$1.00) during the brief period not to exceed one, the orders would execute 10 contracts each against the order on the NOM book at \$1.05

Setting Acceptable Range Values. The options class premium will be the dominant factor in determining the Acceptable Trade Range. Generally, options with lower premiums tend to be more liquid and have tighter bid/ask spreads; options with higher premiums have wider spreads and less liquidity. Accordingly, a table consisting of several steps based on the premium of the option will be used to determine how far the market for a given option will be allowed to move. This table or tables would be listed on the NASDAQTrader.com Web site and any periodic updates to the table would be announced via an Options Trader Alert.

For example, looking at some SPY January 2011 Call options on December 27th of 2010:

Bid/Offer of SPY Jan 126 Call (at or near-the-money): \$1.78 × \$1.79 (several hundred contracts on bid and offer)

Bid/Offer of SPY Jan 80 Call (deep in-the-money): \$45.61 × \$45.87 (20 contracts on each side)

The deep in-the-money calls (Jan 80 calls) have a wider spread (\$45.87–\$45.61 = \$0.26) compared to a spread of \$0.01 for the at-the-money calls (Jan 126 calls). Therefore, it is appropriate to have different thresholds for the two options. For instance, it may make sense to have a \$0.05 threshold for the at-the-money strikes (Premium < \$2) and a \$0.50 threshold for the deep in-the-money strikes (Premium > \$10).

To consider another example, the January 2011 CSCO put options on December 27th of 2010:

Bid/Offer of CSCO 20 Jan Put (at or near-the-money): \$0.11 × \$0.12 (300×550)

Bid/Offer of CSCO 35 Jan Put (deep in-the-money): \$14.35 × \$15.20 (48×18)

Even though CSCO has a much lower share price than SPY, and is a different type of security (it is a common stock of a technology company whereas SPY is an ETF based on the S&P 500 Index), the pattern is the same. The option with the lower premium has a very narrow spread of \$0.01 with significant size displayed whereas the higher premium option has a wide spread (\$0.85) and less size displayed.

The Acceptable Trade Range settings will be tied to the option premium. However, other factors will be considered when determining the exact settings. For example, Acceptable Ranges may change if market-wide volatility is as high as it was during the financial crisis in 2008 and 2009, or if overall liquidity is low based on historical trends. These different market conditions may present the need to adjust the threshold amounts from time to time to ensure a well-functioning market. Without adjustments, the market may become too constrained or conversely, prone to wide price swings. As stated above, the Exchange would publish the Acceptable Trade Range table or tables on the NASDAQTrader.com Web site. The Exchange does not foresee updating the table(s) often or intraday. The Exchange will provide sufficient advanced notice of changes to the Acceptable Trade Range table to its membership via Options Trader Alerts.

The Acceptable Trade Range settings would generally be the same across all options traded on NOM, although NASDAQ proposes to maintain flexibility to set them separately based on characteristics of the underlying security. For instance, Google is a stock with a high share price (\$602.38 closing price on December 27th). Google options therefore may require special settings due to the risk involved in actively quoting options on such a high-priced stock. Option spreads on Google are wider and the size available at the best bid and offer is smaller. Google could potentially need a wider threshold setting compared to other lower-priced stocks. There are other options that fit into this category (e.g. AAPL) which makes it necessary to have threshold settings that have flexibility based on the underlying security. Additionally, it is generally observed that options subject to the

Penny Pilot program quote with tighter spreads than options not subject to the Penny Pilot. Currently, NASDAQ expects to set Acceptable Trade Ranges for three categories of options: Standard Penny Pilot, Special Penny Pilot (IWM, QQQQ, SPY), and Non-Penny Pilot.¹¹

2. Statutory Basis

NASDAQ believes the proposed rule change is consistent with the provisions of Section 6 of the Act,¹² in general and with Section 6(b)(5) of the Act,¹³ in particular, which requires that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, promote just and equitable principles of trade, foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest. The proposed rule change is consistent with these requirements in that it will reduce the negative impacts of sudden, unanticipated volatility in individual NOM options, and serve to preserve an orderly market in a transparent and uniform manner, enhance the price-discovery process, increase overall market confidence, and promote fair and orderly markets and the protection of investors.

B. Self-Regulatory Organization's Statement on Burden on Competition

NASDAQ does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act, as amended.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and

¹¹ NASDAQ notes that the Acceptable Range Test in place at NASDAQ OMX PHLX—PHLX Rule 1082(a)(ii)(B)(3)(f)—currently provides for this flexibility.

¹² 15 U.S.C. 78f.

¹³ 15 U.S.C. 78f(b)(5).

publishes its reasons for so finding or (ii) as to which the self-regulatory organization consents, the Commission will:

- (A) By order approve or disapprove the proposed rule change, or
- (B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's Internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an e-mail to rule-comments@sec.gov. Please include File Number SR-NASDAQ-2011-105 on the subject line.

Paper Comments

- Send paper comments in triplicate to Elizabeth M. Murphy, Secretary, Securities and Exchange Commission, 100 F Street, NE., Washington, DC 20549-1090.
- All submissions should refer to File Number SR-NASDAQ-2011-105. This file number should be included on the subject line if e-mail is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's Internet Web site (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for Web site viewing and printing in the Commission's Public Reference Room on official business days between the hours of 10 a.m. and 3 p.m. Copies of such filing also will be available for inspection and copying at the principal office of NASDAQ. All comments received will be posted without change; the Commission does not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File

Number SR-NASDAQ-2011-105 and should be submitted on or before September 8, 2011.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁴

Elizabeth M. Murphy,
Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-65132]

Order Temporarily Exempting the Floor Broker Operations of Broker-Dealers With Market Access That Handle Orders on a Manual Basis From the Automated Controls Requirement of Rule 15c3-5(c)(1)(ii) and Rule 15c3-5(c)(2) Under the Securities Exchange Act of 1934

August 15, 2011.

I. Introduction

Pursuant to Rule 15c3-5(f) under the Securities Exchange Act of 1934 ("Exchange Act"),¹ the Securities and Exchange Commission ("Commission"), by order, may exempt from the provisions of Rule 15c3-5 ("Rule"), either unconditionally or on specified terms and conditions, any broker or dealer, if the Commission determines that such exemption is necessary or appropriate in the public interest, and is consistent with the protection of investors.² As discussed below, the Commission temporarily is exempting the floor broker operations of broker-dealers with market access that handle orders on a manual basis ("Floor Brokers") from the automated controls requirement of Rules 15c3-5(c)(1)(ii)³ and (c)(2)⁴ until November 30, 2011.⁵

II. Background

On November 3, 2010, the Commission adopted Rule 15c3-5 under

the Exchange Act.⁶ Among other things, Rule 15c3-5 requires each broker-dealer with access to trading securities⁷ directly on an exchange or ATS, including a broker-dealer providing sponsored or direct market access to customers or other persons, and each broker-dealer operator of an ATS that provides access to trading securities directly on its ATS to a person other than a broker-dealer, to establish, document, and maintain a system of risk management controls and supervisory procedures that, among other things, is reasonably designed to (1) Systematically limit the financial exposure of the broker-dealer that could arise as a result of market access,⁸ and (2) ensure compliance with all regulatory requirements that are applicable in connection with market access.⁹ The required financial risk management controls and supervisory procedures must be reasonably designed to prevent the entry of orders that exceed appropriate pre-set credit or capital thresholds,¹⁰ or that appear to be erroneous.¹¹ The regulatory risk management controls and supervisory procedures must also be reasonably designed to prevent the entry of orders unless there has been compliance with all regulatory requirements that must be satisfied on a pre-order entry basis,¹² prevent the entry of orders that the broker-dealers or customer is restricted from trading,¹³ restrict market access technology and systems to authorized persons,¹⁴ and assure appropriate surveillance personnel receive immediate post-trade execution reports.¹⁵

The Commission has received a request from NYSE Amex LLC ("NYSE Amex"), NYSE Arca, Inc. ("NYSE Arca"), and New York Stock Exchange LLC ("NYSE") (collectively, "NYSE Euronext") to extend the compliance date for the automated controls requirement pursuant to Rules 15c3-5(c)(1)(ii) and (c)(2) for Floor Brokers until November 30, 2011.¹⁶ Specifically,

⁶ See Exchange Act Release No. 63241 (Nov. 3, 2010), 75 FR 69792 (Nov. 15, 2010) ("Rule 15c3-5 Adopting Release").

⁷ Rule 15c3-5 applies to trading in all securities on an exchange or ATS. *Id.* at 69765.

⁸ See 17 CFR 240.15c3-5(c)(1).

⁹ See 17 CFR 240.15c3-5(c)(2).

¹⁰ See 17 CFR 240.15c3-5(c)(1)(i).

¹¹ See 17 CFR 240.15c3-5(c)(1)(ii).

¹² See 17 CFR 240.15c3-5(c)(2)(i).

¹³ See 17 CFR 240.15c3-5(c)(2)(ii).

¹⁴ See 17 CFR 240.15c3-5(c)(2)(iii).

¹⁵ See 17 CFR 240.15c3-5(c)(2)(iv).

¹⁶ See letter from Janet McGinness, Senior Vice President—Legal and Corporate Secretary, NYSE Euronext, on behalf of NYSE Amex, NYSE Arca, and NYSE, to Elizabeth Murphy, Secretary,

NYSE Euronext indicated that more time is needed to complete the implementation of the automated controls required pursuant to Rules 15c3-5(c)(1)(ii) and (c)(2) for orders handled on a manual basis because the floor broker operations of broker-dealers with market access historically have used manual systematic controls for their risk management and regulatory purposes with respect to manual orders, and they will need additional time to complete the development and implementation of automated controls for such manual orders.¹⁷ NYSE Euronext explained that certain Floor Brokers initially believed that their existing combination of automated and manual controls would be sufficient for compliance with Rule 15c3-5,¹⁸ and only recently became aware that the required pre-trade controls under the Rule must be systemic and automated for compliance purposes.¹⁹ NYSE Euronext also explained that additional time would provide the NYSE Euronext with an opportunity to update Floor Broker-related systems and thereby facilitate compliance with the Rule by Floor Brokers.²⁰

III. Discussion

The Commission is temporarily exempting Floor Brokers from the automated controls requirement of Rules 15c3-5(c)(1)(ii)²¹ and (c)(2)²² until November 30, 2011. The Commission believes that providing additional time for such Floor Brokers to complete the development and implementation of automated controls pursuant to Rules 15c3-5(c)(1)(ii) and (c)(2) for orders handled on a manual basis, where manual systematic controls historically were used for risk management and regulatory purposes, is reasonable. In addition, the Commission believes that temporarily exempting Floor Brokers from the automated controls requirement of Rules 15c3-5(c)(1)(ii) and (c)(2) until November 30, 2011, should facilitate the orderly and meaningful implementation of the required automated risk management controls for those Floor Brokers that need more time to be in compliance with the Rule.

For the foregoing reasons, the Commission finds that granting the foregoing temporary exemption is necessary and appropriate in the public

Commission, dated June 29, 2011 (“NYSE Euronext Letter”).

interest, and is consistent with the protection of investors.

IV. Conclusion

It Is Hereby Ordered, pursuant to Rule 15c3-5(f),²³ that the floor broker operations of broker-dealers with market access that handle orders on a manual basis are temporarily exempted from the automated controls requirement of Rules 15c3-5(c)(1)(ii)²⁴ and (c)(2)²⁵ until November 30, 2011.

By the Commission.

Elizabeth M. Murphy,
Secretary.

BILLING CODE 8011-01-P

DEPARTMENT OF STATE

[Public Notice 7557]

Culturally Significant Objects Imported for Exhibition Determinations: “Wonder of the Age: Master Painters of India, 1100–1900”

SUMMARY: Notice is hereby given of the following determinations: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985; 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978, the Foreign Affairs Reform and Restructuring Act of 1998 (112 Stat. 2681, *et seq.*; 22 U.S.C. 6501 note, *et seq.*), Delegation of Authority No. 234 of October 1, 1999, and Delegation of Authority No. 236-3 of August 28, 2000 (and, as appropriate, Delegation of Authority No. 257 of April 15, 2003), I hereby determine that the objects to be included in the exhibition “Wonder of the Age: Master Painters of India, 1100–1900,” imported from abroad for temporary exhibition within the United States, are of cultural significance. The objects are imported pursuant to loan agreements with the foreign owners or custodians. I also determine that the exhibition or display of the exhibit objects at the Metropolitan Museum of Art, New York, New York, from on or about September 28, 2011, until on or about January 8, 2012, and at possible additional exhibitions or venues yet to be determined, is in the national interest. I have ordered that Public Notice of these Determinations be published in the **Federal Register**.

FOR FURTHER INFORMATION CONTACT: For further information, including a list of the exhibit objects, contact Paul W. Manning, Attorney-Adviser, Office of the Legal Adviser, U.S. Department of

State (*telephone*: 202-632-6469). The mailing address is U.S. Department of State, SA-5, L/DPD, Fifth Floor (Suite 5H03), Washington, DC 20522-0505.

Dated: August 11, 2011.

J. Adam Ereli,

Principal Deputy Assistant Secretary, Bureau of Educational and Cultural Affairs, Department of State.

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Notice of Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits Filed Under Subpart B (Formerly Subpart Q) During the Week Ending July 30, 2011

The following Applications for Certificates of Public Convenience and Necessity and Foreign Air Carrier Permits were filed under subpart B (formerly subpart Q) of the Department of Transportation’s Procedural Regulations (See 14 CFR 301.201 *et seq.*). The due date for Answers, Conforming Applications, or Motions to Modify Scope are set forth below for each application. Following the Answer period DOT may process the application by expedited procedures. Such procedures may consist of the adoption of a show-cause order, a tentative order, or in appropriate cases a final order without further proceedings.

Docket Number: DOT-OST-2011-0143.

Date Filed: July 29, 2011.

Due Date for Answers, Conforming Applications, or Motion to Modify Scope: August 19, 2011.

Description: Application of TwinAir Calypso Limited, Inc. requesting authority to conduct scheduled passenger operations as a commuter air carrier.

Renee V. Wright,

Program Manager, Docket Operations, Federal Register Liaison.

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****Office of Commercial Space Transportation (AST); Notice of Availability of the Finding of No Significant Impact (FONSI) for the Federal Aviation Administration (FAA)/AST To Issue, Renew, or Modify Launch Operator Licenses for Atlas V Launch Vehicles Covered Under the Evolved Expendable Launch Vehicle (EELV) Program From Space Launch Complex-3 East (SLC-3E) at Vandenberg Air Force Base (VAFB), California**

AGENCY: Federal Aviation Administration, Department of Transportation.

ACTION: Notice of Availability of the FONSI.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA) of 1969, 42 United States Code 4321-4347 (as amended), Council on Environmental Quality (CEQ) NEPA implementing regulations (40 Code of Federal Regulations [CFR] Parts 1500-1508), and FAA Order 1050.1E, Change 1, the FAA is announcing the availability of a FONSI for the FAA/AST action to issue, renew, or modify Launch Operator Licenses for Atlas V launch operations from SLC-3E at VAFB. The FONSI is based on the analysis and findings of the 2003 United States Air Force (USAF) Final Environmental Assessment for the Atlas V System at SLC-3E (2003 EA).

In 1998, the USAF issued the 1998 Final Environmental Impact Statement for the EELV Program (1998 EIS) to evaluate the potential environmental impacts of the development, deployment, and operation of EELV systems (later known as the Atlas V and Delta IV launch vehicle families). In 2000, the USAF prepared the Supplemental Environmental Impact Statement for the EELV Program (2000 SEIS) to evaluate the potential environmental impacts of adding up to five solid-propellant strap-on rocket motors to the Atlas V launch vehicle and larger solid-propellant strap-on rocket motors on the Delta IV vehicle. The FAA participated as a cooperating agency in preparation of both the 1998 FEIS and 2000 SEIS.

In 2003, changes in USAF programs resulted in a need for SLC-3E at VAFB to be used for Atlas V launches rather than SLC-3W as originally planned, and therefore the USAF prepared the 2003 EA. The EA supplemented and updated the previous NEPA evaluation of

implementing the Atlas V program as analyzed in the 1998 FEIS and 2000 SEIS. The 2003 EA analyzed the environmental impacts associated with the proposed action of modifying existing facilities and roadways and launching the Atlas V up to four times annually from SLC-3E at VAFB. The 2003 EA tiered its analyses from the 1998 FEIS and 2000 SEIS, and therefore both documents were incorporated by reference into the 2003 EA. The FAA did not participate as a cooperating agency with the USAF in preparation of the 2003 EA. Under the FAA's Proposed Action as stated in the FONSI, FAA/AST could issue, renew, or modify Launch Operator Licenses for Atlas V launch operations from SLC-3E at VAFB. A Launch Operator License would authorize launches of Atlas V vehicles over the five-year term of the license.

In accordance with the requirements of FAA Order 1050.1E, Change 1, paragraph 410, the FAA has independently evaluated the information contained in the 2003 EA and has verified the continued validity of the analysis contained in the EA. The FAA has determined that the discussion of Atlas V launch operations in the 2003 EA sufficiently addresses the concerns of the FAA and complies with FAA requirements for implementing NEPA as stated in FAA Order 1050.1E, Change 1. The FAA has determined that there is no new information or analysis that would require preparation of a new or supplemental EA or EIS according to the CEQ Regulations (40 CFR 1502.9(c)(1)). Therefore, the FAA issued the FONSI concurring with the analysis of impacts and findings in the 2003 EA and formally adopts the launch operations discussion in the EA in compliance with the requirements of 40 CFR 1506.3 to support the issuance, renewal, or modification of Launch Operator Licenses for Atlas V launch operations from SLC-3E at VAFB. The 2003 EA is incorporated by reference and is summarized as necessary in the FONSI.

The FAA has posted the FONSI on the Internet at http://www.faa.gov/about/office_org/headquarters_offices/ast/.

FOR FURTHER INFORMATION CONTACT: Mr. Daniel A. Czelusniak, Environmental Program Lead, Office of Commercial Space Transportation, Federal Aviation Administration, 800 Independence Ave., SW., Room 325, Washington, DC 20591, telephone (202) 267-5924; E-mail Daniel.Czelusniak@faa.gov.

Issued in Washington, DC, on August 12, 2011.

Michael McElligott,

Manager, Space Transportation Development Division.

[FR Doc. 2011-21048 Filed 8-17-11; 8:45 am]

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****Office of Commercial Space Transportation (AST); Notice of Availability of the Record of Decision (ROD) for the Federal Aviation Administration (FAA)/AST To Issue, Renew, or Modify Launch Operator Licenses for Launch Vehicles Covered Under the Evolved Expendable Launch Vehicle (EELV) Program, Which Include Atlas V and Delta IV Vehicles, From Cape Canaveral Air Force Station (CCAFS), Florida and Vandenberg Air Force Base (VAFB), California**

AGENCY: Federal Aviation Administration, DOT.

ACTIONS: Notice of Availability.

SUMMARY: In accordance with the National Environmental Policy Act (NEPA) of 1969, 42 United States Code U.S.C. 4321-4347 (as amended), Council on Environmental Quality (CEQ) NEPA implementing regulations (40 Code of Federal Regulations [CFR] parts 1500-1508), and FAA Order 1050.1E, Change 1, the FAA is announcing the availability of its ROD for the FAA/AST to issue, renew, or modify launch operator licenses for launch vehicles covered under the EELV Program from CCAFS and VAFB. The ROD was prepared to document FAA/AST's decision to issue, renew, or modify launch operator licenses for launch vehicles covered under the EELV Program from CCAFS and VAFB.

The FAA participated as a cooperating agency with the U.S. Air Force (USAF) in the preparation of the 1998 Final Environmental Impact Statement for the EELV Program (1998 FEIS) and the 2000 Supplemental Environmental Impact Statement for the EELV Program (2000 SEIS). The 1998 FEIS preferred alternative analyzed a maximum of 30 combined FAA/AST-licensed launches and non-FAA/AST-licensed launches of Atlas V and Delta IV in one year from VAFB and CCAFS, combined. The 2000 SEIS analyzed the environmental impacts of up to five solid-propellant strap-on rocket motors (SRMs) on the Atlas V medium lift vehicle and larger SRMs on the Delta IV vehicle. In addition, the 2000 SEIS considered a maximum of 33 combined

FAA/AST-licensed launches and non-FAA/AST licensed launches of Atlas V and Delta IV occurring in one year from VAFB and CCAFS, combined. The USAF issued RODs based on the findings of the 1998 FEIS and the 2000 SEIS.

In 2003, changes in USAF programs resulted in a need for SLC-3E at VAFB to be used for Atlas V launches rather than SLC-3W as originally planned. In 2003, the USAF prepared a Final Environmental Assessment for the Atlas V System at SLC-3E (2003 EA). The EA supplemented and updated the previous NEPA evaluation of implementing the Atlas V program as analyzed in the 1998 FEIS and 2000 SEIS. The 2003 EA analyzed the environmental impacts associated with the proposed action of modifying existing facilities and roadways and launching the Atlas V up to four times annually from SLC-3E at VAFB. The FAA did not participate as a cooperating agency with the USAF in preparation of the 2003 EA, but has independently evaluated the information contained in the 2003 EA and has verified the continued validity of the analysis contained in the document. The FAA has therefore, adopted the 2003 EA and issued a Finding of No Significant Impact. The analysis from the 2003 EA and the FAA's findings on that analysis are incorporated by reference in the ROD, and therefore references from the 1998 FEIS and 2000 SEIS to SLC-3W at VAFB have been revised to read "SLC-3E" throughout the ROD.

Under the FAA's Proposed Action, FAA/AST could issue, renew, or modify launch operator licenses for Atlas V and Delta IV operations at CCAFS and VAFB. The 1998 FEIS and 2000 SEIS analyzed the full potential scope of the operations that could be covered under a launch operator license for Atlas V and Delta IV at CCAFS and VAFB. The FAA's Proposed Action has been identified as the Preferred Alternative.

Under the No Action Alternative, the FAA would not issue, renew, or modify launch operator licenses for Atlas V or Delta IV expendable launch vehicles at CCAFS and VAFB. Without a license, there could not be any FAA/AST-licensed commercial launches of Atlas V or Delta IV vehicles from CCAFS or VAFB; however, non-FAA/AST licensed or government launches of these vehicles could continue from both locations. The ROD addresses the potential environmental impacts of the FAA's Proposed Action and the FAA's No Action Alternative.

In accordance with the requirements of FAA Order 1050.1E, Change 1, paragraph 515, the FAA has

independently evaluated the information contained in the 1998 FEIS and 2000 SEIS and has verified the continued validity of the analysis contained in both documents. Through this re-evaluation, the FAA has determined that the 1998 FEIS and 2000 SEIS sufficiently address the concerns of the FAA and comply with FAA requirements for implementing NEPA as stated in FAA Order 1050.1E, Change 1. The FAA has also determined that there is no new information or analysis that would require preparation of a new or supplemental EIS according to the CEQ Regulations (40 CFR 1502.9(c)(1)). The FAA is therefore adopting the 1998 FEIS and 2000 SEIS, and is using these documents to support its decision as stated in the ROD. The FAA has posted the ROD on the FAA Office of Commercial Space Transportation Web site at http://www.faa.gov/about/office_org/headquarters_offices/ast/.

Additional Information: Under the Proposed Action, the FAA/AST could issue, renew, or modify launch operator licenses for Atlas V and Delta IV operations at CCAFS and VAFB. The 1998 FEIS and 2000 SEIS analyzed the full potential scope of the operations that could be covered under a launch operator license for Atlas V and Delta IV at CCAFS and VAFB. The 1998 FEIS analyzed the operation of both medium and heavy lift expendable, orbital "concept vehicles" (later known as the Atlas V and Delta IV families of vehicles) from CCAFS and VAFB. Delta IV launches would occur from Space Launch Complex-37 (SLC-37) at CCAFS and from SLC-6 at VAFB; the Atlas V launches would occur from SLC-41 at CCAFS and from SLC-3E at VAFB. Under the preferred alternative in the 1998 FEIS, a maximum of 30 combined FAA/AST-licensed launches and non-FAA/AST licensed launches of Atlas V and Delta IV would occur in one year from VAFB and CCAFS, combined. Under the No Action Alternative, the USAF would not proceed with the development and deployment of the EELV program, and Atlas IIA, Delta II, and Titan IVB launch vehicles would continue to be used to support space launches to meet the requirements of the government.

Under the Proposed Action in the 2000 SEIS, up to five solid-propellant strap-on rocket motors (SRMs) would be added to the Atlas V medium lift vehicle and larger SRMs would be used on the Delta IV vehicle. The Atlas V vehicle would launch from SLC-41 at CCAFS and SLC-3E at VAFB, and the Delta IV vehicle would launch from SLC-37 at CCAFS and SLC-6 at VAFB. While use of SRM-assisted vehicles was

considered in the 1998 FEIS, the 2000 SEIS considered a higher proportion of vehicles using SRM-assisted vehicles than the 1998 FEIS. Under the Proposed Action in the 2000 SEIS, a maximum of 33 combined FAA/AST-licensed launches and non-FAA/AST licensed launches of Atlas V and Delta IV would occur in one year from VAFB and CCAFS, combined. Under the No Action Alternative, the EELV program would continue, except that SRMs would not be added to the Atlas V launch vehicles and smaller SRMs would be used on Delta IV launch vehicles.

The FAA has determined the analysis of impacts presented in the 1998 FEIS and 2000 SEIS represents the best available information regarding the potential impacts associated with the FAA's regulatory responsibilities described in the ROD. The 1998 FEIS and 2000 SEIS are therefore incorporated by reference and summarized as necessary in the ROD.

Resource areas were considered to provide a context for understanding and assessing the potential environmental effects of the FAA's Proposed Action, with attention focused on key issues. The resource areas considered in the ROD include air quality; biological resources; cultural resources; geology and soils; land use and section 4(f) resources; noise; physical resources (Water Resources [Surface Water, Ground Water, Floodplains], Hazardous Materials, Pollution Prevention, and Solid Waste); and socioeconomic, environmental justice, and children's environmental health and safety. Potential cumulative impacts of the Proposed Action are also addressed in the ROD.

FOR FURTHER INFORMATION CONTACT: Mr. Daniel A. Czelusniak, Environmental Program Lead, Office of Commercial Space Transportation, Federal Aviation Administration, 800 Independence Ave., SW., Suite 325, Washington, DC 20591, by e-mail at Daniel.Czelusniak@faa.gov or by phone at (202) 267-5924.

Issued in Washington, DC, on August 12, 2011.

Michael McElligott,
Manager, Space Transportation Development Division.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****Commercial Space Transportation Advisory Committee—Open Meeting**

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Commercial Space Transportation Advisory Committee open meeting.

SUMMARY: Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463, 5 U.S.C. App. 2), notice is hereby given of a meeting of the Commercial Space Transportation Advisory Committee (COMSTAC). The meeting will take place on Thursday, October 13, 2011, from 8 a.m. to 5 p.m., and Friday, October 14, 2011, from 8 a.m. to 4:30 p.m., at the National Housing Center, 1201 15th Street NW., Washington, DC, 20005. This will be the 54th meeting of the COMSTAC.

The proposed agenda for October 13 features meetings of the working groups as follows:

- Export Controls (8 a.m.–10 p.m.)
- Space Transportation Operations (10 a.m.–12 a.m.)
- Reusable Launch Vehicles (1 p.m.–3 p.m.)
- Risk Management (3 p.m.–5 p.m.)

The proposed agenda for October 14 features:

- Speakers relevant to the commercial space transportation industry, including invitees from the U.S. Department of State and Department of Defense;
- Invited speaker from the FAA NextGen Office;
- Reports and recommendations from the working groups.

Interested members of the public may submit relevant written statements for the COMSTAC members to consider under the advisory process. Statements may concern the issues and agenda items mentioned above and/or additional issues that may be relevant for the U.S. commercial space transportation industry. Interested parties wishing to submit written statements should contact Susan Lender, DFO, (the Contact Person listed below) in writing (mail or e-mail) by October 5, 2011, so that the information can be made available to COMSTAC members for their review and consideration before the October 13 and 14, 2011 meetings. Written statements should be supplied in the following formats: One hard copy with original signature and/or one electronic copy via e-mail.

Subject to approval, a portion of the October 14th meeting will be closed to the public (starting at approximately 3 p.m.).

An agenda will be posted on the FAA Web site at <http://www.faa.gov/go/ast>. For specific information concerning the times and locations of the COMSTAC working group meetings, contact the Contact Person listed below.

Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should inform the Contact Person listed below in advance of the meeting.

FOR FURTHER INFORMATION CONTACT: Susan Lender (AST-5), Office of Commercial Space Transportation (AST), 800 Independence Avenue SW., Room 331, Washington, DC 20591, telephone (202) 267-8029; E-mail susan.lender@faa.gov. Complete information regarding COMSTAC is available on the FAA Web site at: http://www.faa.gov/about/office_org/headquarters_offices/ast/advisory_committee/.

Issued in Washington, DC, August 11, 2011.

George C. Nield,

Associate Administrator for Commercial Space Transportation.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****Notice of Release From Quitclaim Deed and Federal Grant Assurance Obligations for Phoenix-Mesa Gateway Airport, Mesa, AZ**

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of Request to Release Airport Land.

SUMMARY: The Federal Aviation Administration (FAA) proposes to rule and invites public comment on the application for a release of approximately 1,727 square feet of airport property at Phoenix-Mesa Gateway, Mesa, Arizona, from all conditions contained in the Quitclaim Deed and Grant Assurances since the parcel of land is not needed for airport purposes. The property will be sold for its fair market value and the proceeds deposited in the airport account. The reuse of the land for a roadway improvement project by the State of Arizona represents a compatible land use that will not interfere with the

airport or its operation, thereby protecting the interests of civil aviation.

DATES: Comments must be received on or before September 19, 2011.

FOR FURTHER INFORMATION CONTACT: Comments on the request may be mailed or delivered to the FAA at the following address: Tony Garcia, Airports Compliance Program Manager, Federal Aviation Administration, Airports Division, **Federal Register** Comment, 15000 Aviation Blvd., Lawndale, CA 90261. In addition, one copy of the comment submitted to the FAA must be mailed or delivered to Mr. Walter Fix, Phoenix-Gateway Airport Authority, 5835 S. Sossaman Road, Mesa, Arizona 85212, *Telephone:* (480) 988-7709.

SUPPLEMENTARY INFORMATION: In accordance with the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (AIR 21), Public Law 10-181 (Apr. 5, 2000; 114 Stat. 61), this notice must be published in the **Federal Register** 30 days before the Secretary may waive any condition imposed on a federally obligated airport by surplus property conveyance deeds or grant agreements.

The following is a brief overview of the request:

Phoenix-Mesa Gateway Authority, Mesa, Arizona requested a release from the conditions contained in the Quitclaim Deed and Grant Assurance obligations for approximately 1,727 square feet of airport land. The property is located on the east side of the airport in the vicinity of Ellsworth Road. The land is presently unused and undeveloped. The land is needed for the construction of State Route 24, Gateway Freeway, which will encroach into airport property. The Phoenix-Mesa Gateway Airport Authority has agreed to the sale of the small parcel to the State of Arizona since the property is not needed for airport purposes. The conveyance will not impede future development of the airport, while SR-24 will improve access to the east side of the airport. The sale price will be based on its appraised market value and the sale proceeds will be deposited in the airport account and used for airport purposes. The use of the property as a public roadway represents a compatible use that will not interfere with airport operations. The airport will be properly compensated, thereby serving the interests of civil aviation.

Issued in Hawthorne, California, on August 10, 2011.

Brian Armstrong,

Manager, Safety and Standards, Airports Division, Western-Pacific Region.

[FR Doc. 2011-21085 Filed 8-17-11; 8:45 am]

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Aviation Administration****Notice of Release of an Easement Restriction at Phoenix-Mesa Gateway Airport, Mesa, AZ**

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of Request to Release Airport Land.

SUMMARY: The Federal Aviation Administration (FAA) proposes to rule and invites public comment on the application for a release of a U.S. Air Force easement restriction covering 52.6 acres of property abutting Phoenix-Mesa Gateway, Mesa, Arizona, from all conditions contained in a grant of an easement, since the easement is not needed for civilian airport purposes. In exchange for the easement, the airport will receive 19 acres of land and a new aviation easement. Reuse of the land under the easement will remain compatible and not interfere with the airport or its operation. The interest of civil aviation is properly served by the release.

DATES: Comments must be received on or before September 19, 2011.

FOR FURTHER INFORMATION CONTACT:

Comments on the request may be mailed or delivered to the FAA at the following address: Tony Garcia, Airports Compliance Program Manager, Federal Aviation Administration, Airports Division, **Federal Register** Comment, 15000 Aviation Blvd., Lawndale, CA 90261. In addition, one copy of the comment submitted to the FAA must be mailed or delivered to Mr. Walter Fix, Phoenix-Gateway Airport Authority, 5835 S. Sossaman Road, Mesa, Arizona 85212, Telephone: (480) 988-7709.

SUPPLEMENTARY INFORMATION: In accordance with the Wendell H. Ford Aviation Investment and Reform Act for the 21st Century (AIR 21), Public Law 10-181 (Apr. 5, 2000; 114 Stat. 61), this notice must be published in the **Federal Register** 30 days before the Secretary may waive any condition imposed on a federally obligated airport by surplus property conveyance deeds or grant agreements.

The following is a brief overview of the request:

Phoenix-Mesa Gateway Airport Authority, Mesa, Arizona requested a release of an easement that was obtained from the U.S. Air Force via an Assignment of Easement on April 14, 1998. The easement covers approximately 52.6 acres of private property. It extends eastward from the airport boundary and is located east of

Ellsworth Road and north of Pecos Road. Use of the private property east of the airport is restricted by the easement. Relinquishment of the easement will not harm the airport because it is being replaced with a standard aviation easement. The new easement will provide the airport with a continued right for aircraft to fly in the airspace above the private property. It will also prevent interference with airport operations and the erection of obstructions that pose a hazard to aircraft. As compensation, the private land owner will convey 17.53 acres of land at no cost to the Airport Authority that will serve an airport purpose. The land will allow the airport to have a complete runway protection zone for runway end 30R on airport property. Presently, a portion of the RPZ extends beyond the airport boundary to the private property located east of Ellsworth Road. The Airport Authority has agreed to the exchange because the restrictive easement is not needed and will be replaced with an aviation easement. The airport will be additionally compensated with a donation of land that has an immediate airport purpose. The use of the property under the new easement will continue to be used compatibly with the airport and not cause interference with airport operations. The exchange is equitable and the donation of land to the airport clearly serves the interests of civil aviation.

Issued in Hawthorne, California, on August 10, 2011.

Brian Armstrong,

Manager, Safety and Standards, Airports Division, Western-Pacific Region.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION**Federal Highway Administration****Notice of Final Federal Agency Actions on Proposed Highway in Utah**

AGENCY: Federal Highway Administration (FHWA), USDOT.

ACTION: Notice of Limitation on Claims for Judicial Review of Actions by FHWA.

SUMMARY: This notice announces actions taken by the FHWA that are final within the meaning of 23 U.S.C. 39(l)(1). The actions relate to a proposed highway project, Tooele Midvalley Highway, from I-80 to State Route 36 Tooele County, State of Utah. Those actions grant licenses, permits, and approvals for the project.

DATES: By this notice, the FHWA is advising the public of final agency actions subject to 23 U.S.C. 139(l)(1). A claim seeking judicial review of the Federal agency actions that are covered by this notice will be barred unless the claim is filed on or before February 14, 2012. If the Federal law that authorizes judicial review of a claim provides a time period of less than 180 days for filing such claim, then that shorter time period still applies.

FOR FURTHER INFORMATION CONTACT: For FHWA: Mr. Edward Woolford, Environmental Manager, Federal Highway Administration, 2520 West 4700 South, Suite 9A, Salt Lake City, Utah 84118-1880; Telephone: (801) 955-3524; e-mail:

Edward.Woolford@dot.gov. The FHWA Utah Division Office's normal business hours are 7:30 a.m. to 4:30 p.m. (Mountain Time). For the Utah Department of Transportation (UDOT): Mr. Matt Zundel, 2010 South 2760 West, Salt Lake City, UT 84104; Telephone: (801) 887-3421; e-mail: *mzundel@utah.gov.* The UDOT's normal business hours are Monday through Thursday, 7:30 a.m. to 5:30 p.m. (M. Time).

SUPPLEMENTARY INFORMATION: On Friday, January 14, 2011, the FHWA published the Notice of Availability in the **Federal Register** in Volume 76, No. 10, page 2680, for the following highway project in the State of Utah: Tooele County Midvalley Highway Project, To Address Traffic Congestion on UT-36 and at the I-80 Lake Point interchange through the Year 2030. The proposed action includes capacity improvements to the north-south transportation system in the Tooele Valley that provide additional north-south transportation capacity, reduce anticipated congestion on SR-36, and reduce anticipated congestion at the Lake Point interchange with I-80. The actions by the Federal agencies, and the laws under which such actions were taken, are described in the Final Environmental Impact Statement (FEIS) for the project, approved on January 3, 2011, and in the FHWA Record of Decision (ROD) issued on July 27, 2011, and in other documents in the FHWA project files. The FEIS, ROD, and other project records are available by contacting the FHWA or the UDOT at the addresses provided above. The FHWA FEIS and ROD can be viewed and downloaded from the project Web site at <http://www.midvalleyhighway.com> or viewed at public libraries in the project area. This notice applies to all Federal agencies' final actions taken after the issuance date of the FHWA **Federal**

Register notice described above. The laws under which actions were taken include, but are not limited to:

1. *General*: National Environmental Policy Act (NEPA) [42 U.S.C. 4321–4351]; Federal-Aid Highway Act [23 U.S.C. 109 and 23 U.S.C. 128].
2. *Air*: Clean Air Act [42 U.S.C. 7401–7671(q)].
3. *Land*: Section 4(f) of the Department of Transportation Act of 1966 [49 U.S.C. 303].
4. *Wildlife*: Endangered Species Act [16 U.S.C. 1531–1544 and Section 1536]; Migratory Bird Treaty Act [16 U.S.C. 703–712].
5. *Historic and Cultural Resources*: Section 106 of the National Historic Preservation Act of 1966, as amended [16 U.S.C. 470(f) *et seq.*].
6. *Social and Economic*: Civil Rights Act of 1964 [42 U.S.C. 2000(d)–2000(d)(1)]; Farmland Protection Policy Act (FPPA) [7 U.S.C. 4201–4209].
7. *Executive Orders*: E.O. 11990, Protection of Wetlands; E.O. 11988, Floodplain Management; E.O. 12898, Federal Actions to Address Environmental Justice in Minority Populations and Low Income Populations; E.O. 13175, Consultation and Coordination With Indian Tribal Governments; E.O. 13112, Invasive Species.

(Catalog of Federal Domestic Assistance Program Number 20.205, Highway Planning and Construction. The regulations implementing Executive Order 12372 regarding intergovernmental consultation on Federal programs and activities apply to this program.)

Authority: 23 U.S.C. 139(l)(1).

Issued on: August 10, 2011.

James Christian,

Division Administrator, Salt Lake City.

[FR Doc. 2011–21018 Filed 8–17–11; 8:45 am]

BILLING CODE 4910-RY-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2011–0067]

Petition for Waiver of Compliance

In accordance with Part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated June 29, 2011, Penn Valley Railroad LLC has petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR Section 223.15. FRA assigned the petition Docket Number FRA–2011–0067.

Penn Valley Railroad LLC is requesting consideration of a waiver from 49 CFR § 223.15, Safety Glazing Standards, in regard to Coach PRR 1776. The coach is equipped with a type of automotive safety glass and is serviced and maintained by Penn Valley Railroad LLC. There have not been any injuries on this coach due to broken glass. Penn Valley Railroad LLC is requesting the glazing waiver because of the extremely high cost to replace the glazing and the low risk to safety of continuing to operate with the current safety glass.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at <http://www.regulations.gov> and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue, SE., W12–140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Web site*: <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- *Fax*: 202–493–2251.
- *Mail*: Docket Operations Facility, U.S. Department of Transportation, 1200 New Jersey Avenue, SE., W12–140, Washington, DC 20590.
- *Hand Delivery*: 1200 New Jersey Avenue, SE., Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Communications received by October 3, 2011 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable.

Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, *etc.*). You may review DOT's complete Privacy Act

Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477–78) or at <http://www.dot.gov/privacy.html>.

Issued in Washington, DC, on August 12, 2011.

Robert C. Lauby,

Deputy Associate Administrator for Regulatory and Legislative Operations.

BILLING CODE 4910–06–P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA–2010–0034]

Petition for Waiver of Compliance

In accordance with part 211 of Title 49 Code of Federal Regulations (CFR), this document provides the public notice that by a document dated July 15, 2011, Port Authority Trans-Hudson Corporation (PATH) has petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 236. FRA has previously assigned all PATH Positive Train Control (PTC)-related documentation Docket Number FRA–2010–0034, and is adding this waiver request to that docket.

PATH seeks a waiver from compliance with PTC system requirements found at 49 CFR Section 236.1006, *Equipping locomotives operating in PTC territory*. Specifically, this petition is made in connection with the implementation of PATH's Automatic Train Control (ATC) project and the plan to use unequipped PA–4 cars as maintenance-of-way (MOW) work equipment. PATH is currently in the process of implementing an ATC system using communications-based train control (CBTC) technology throughout the PATH rail network, as described in the Positive Train Control Implementation and Development Plans previously submitted for FRA approval. As part of that program, PATH will be equipping all A-cars (cab control cars) of the new PA–5 fleet with onboard ATC equipment. By December 31, 2015, PATH's passenger carrying fleet will consist of only multiple-unit train consists made of PA–5 cars, and as such, PATH's operation will be in compliance with the new PTC rule. An important element of the new ATC system implementation at PATH will be the incorporation of a track-circuit-based Secondary Train Detection System (STDS) incorporating wayside signals and automatic train stops (trip stops). The STDS will provide for safe

operation of both PA-5 trains with failed ATC equipment, and MOW work equipment that will not be fitted with onboard ATC equipment.

It is PATH's intention to retire the existing PA-4 fleet from passenger service, but to retain some of these PA-4 cars to function as MOW work equipment. PATH will modify the interiors of some of these vehicles so that they are configured to transport tools and equipment. The PA-4 work vehicles would retain their trip cock equipment, and as such, the STDS would provide enforced braking for these vehicles at stop (red) signals. Further, since the PA-4 cars reliably shunt track circuits, they will be continuously detected by both the STDS and the CBTC system, thereby preventing train-to-train collisions.

PATH's justification for relief is that the proposed use of non-equipped PA-4 vehicles for MOW work equipment does not introduce any new or different safety hazards to the existing operation, and provides additional safety elements not available for other types of MOW equipment. The installation of the ATC and/or CBTC systems and the STDS by December 31, 2015, in conjunction with well-established operating rules and procedures, will in fact provide enhanced safety for such operations.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at <http://www.regulations.gov> and in person at the U.S. Department of Transportation's (DOT) Docket Operations Facility, 1200 New Jersey Avenue, SE., W12-140, Washington, DC 20590. The Docket Operations Facility is open from 9 a.m. to 5 p.m., Monday through Friday, except Federal holidays.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested party desires an opportunity for oral comment, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Web site:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.
- *Fax:* 202-493-2251.
- *Mail:* Docket Operations Facility, U.S. Department of Transportation, 1200

New Jersey Avenue, SE., W12-140, Washington, DC 20590.

- *Hand Delivery:* 1200 New Jersey Avenue, SE., Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Communications received by October 3, 2011 will be considered by FRA before final action is taken. Comments received after that date will be considered as far as practicable.

Anyone is able to search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, *etc.*). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70; Pages 19477-78) or at <http://www.dot.gov/privacy.html>.

Issued in Washington, DC, on August 12, 2011.

BILLING CODE 4910-06-P

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD-2011-0104]

Requested Administrative Waiver of the Coastwise Trade Laws

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Invitation for public comments on a requested administrative waiver of the Coastwise Trade Laws for the vessel CATATONIC.

SUMMARY: As authorized by 46 U.S.C. 12121, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below. The complete application is given in DOT docket MARAD-2011-0104 at <http://www.regulations.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of

the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

DATES: Submit comments on or before September 19, 2011.

ADDRESSES: Comments should refer to docket number MARAD-2011-0104. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue, SE., Washington, DC 20590. You may also send comments electronically via the Internet at <http://www.regulations.gov>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: Joann Spittle, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue, SE., Room W21-203, Washington, DC 20590. Telephone 202-366-5979, E-mail Joann.Spittle@dot.gov.

SUPPLEMENTARY INFORMATION: As described by the applicant the intended service of the vessel CATATONIC is:

Intended Commercial Use of Vessel: "Take passengers on half-day or all day sails off Waikiki. Boat will also anchor off Waikiki Beach for snorkeling and swimming. Vessel will depart and arrive back to Kewalo Basin Harbor, which is a commercial boat harbor. We are aiming at taking out family groups and groups of friends."

Geographic Region: "Hawaii."

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD–2011–0109]

Requested Administrative Waiver of the Coastwise Trade Laws

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Invitation for public comments on a requested administrative waiver of the Coastwise Trade Laws for the vessel SENSEI.

SUMMARY: As authorized by 46 U.S.C. 12121, the Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirement of the coastwise laws under certain circumstances. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below. The complete application is given in DOT docket MARAD–2011–0109 at <http://www.regulations.gov>. Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the docket number of this notice and the vessel name in order for MARAD to properly consider the comments. Comments should also state the commenter's interest in the waiver application, and address the waiver criteria given in § 388.4 of MARAD's regulations at 46 CFR part 388.

DATES: Submit comments on or before September 19, 2011.

ADDRESSES: Comments should refer to docket number MARAD–2011–0109. Written comments may be submitted by hand or by mail to the Docket Clerk, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue, SE.,

Washington, DC 20590. You may also send comments electronically via the Internet at <http://www.regulations.gov>. All comments will become part of this docket and will be available for inspection and copying at the above address between 10 a.m. and 5 p.m., E.T., Monday through Friday, except federal holidays. An electronic version of this document and all documents entered into this docket is available on the World Wide Web at <http://www.regulations.gov>.

BILLING CODE 4910-81-P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA-2011-0081; Notice 1]

BMW of North America, LLC, a subsidiary of BMW AG, Receipt of Petition for Decision of Inconsequential Noncompliance

AGENCY: National Highway Traffic Safety Administration, DOT.

ACTION: Receipt of Petition for Inconsequential Noncompliance.

SUMMARY: BMW of North America, LLC,¹ a subsidiary of BMW AG,² (collectively referred to as "BMW") has determined that certain model year 2011 Mini Cooper Clubman and Mini Cooper S Clubman model passenger cars manufactured between February 8, 2011 and May 11, 2011, do not fully comply with paragraph S5.2.1 of Federal Motor Vehicle Safety Standard (FMVSS) No. 101, *Controls and Displays* and paragraphs S5.5.2 and S5.5.5 of FMVSS No. 135, *Light Vehicle Brake Systems*. BMW has filed an appropriate report pursuant to 49 CFR part 573, *Defect and Noncompliance Responsibility and Reports* (dated May 25, 2011).

Pursuant to 49 U.S.C. 30118(d) and 30120(h) (see implementing rule at 49 CFR part 556), BMW has petitioned for an exemption from the notification and remedy requirements of 49 U.S.C. Chapter 301 on the basis that this noncompliance is inconsequential to motor vehicle safety.

This notice of receipt of BMW's petition is published under 49 U.S.C. 30118 and 30120 and does not represent any agency decision or other exercise of judgment concerning the merits of the petition.

Affected are approximately 75 model year 2011 Mini Cooper Clubman and Mini Cooper S Clubman model passenger cars that were manufactured between February 8, 2011 and May 11, 2011.

NHTSA notes that the statutory provisions (49 U.S.C. 30118(d) and 30120(h)) that permit manufacturers to file petitions for a determination of inconsequentiality allow NHTSA to exempt manufacturers only from the duties found in sections 30118 and 30120, respectively, to notify owners, purchasers, and dealers of a defect or noncompliance and to remedy the defect or noncompliance. Therefore, these provisions only apply to the 75³ model year 2011 Mini Cooper Clubman and Mini Cooper S Clubman model passenger cars that BMW no longer

¹ BMW of North America, LLC is a U.S. company that manufactures and imports motor vehicles.

² BMW AG, is a German company that manufactures motor vehicles.

³ BMW's petition, which was filed under 49 CFR Part 556, requests an agency decision to exempt BMW as a vehicle manufacturer from the notification and recall responsibilities of 49 CFR Part 573 for 75 of the affected vehicles. However, the agency cannot relieve vehicle distributors and dealers of the prohibitions on the sale, offer for sale, introduction or delivery for introduction into interstate commerce of the noncompliant vehicles under their control after BMW notified them that the subject noncompliance existed. Those vehicles must be brought into conformance, exported, or destroyed.

controlled at the time it determined that the noncompliance existed.

Paragraph S5.2.1 of FMVSS No. 101 requires in pertinent part:

S5.2.1 Except for the Low Tire Pressure Telltale, each control, telltale and indicator that is listed in column 1 of Table 1 or Table 2 must be identified by the symbol specified for it in column 2 or the word or abbreviation specified for it in column 3 of Table 1 or Table 2. If a symbol is used, each symbol provided pursuant to this paragraph must be substantially similar in form to the symbol as it appears in Table 1 or Table 2. If a symbol is used, each symbol provided pursuant to this paragraph must have the proportional dimensional characteristics of the symbol as it appears in Table 1 or Table 2.

Paragraphs S5.5.2 and S5.5.5 of FMVSS No. 135 requires in pertinent part:

S5.5.2. Function check. (a) All indicators shall be activated as a check function by either: (1) Automatic activation when the ignition (start) switch is turned to the "on" ("run") position when the engine is not running, or when the ignition ("start") switch is in a position between "on" ("run") and "start" that is designated by the manufacturer as a check position, or (2) A single manual action by the driver, such as momentary activation of a test button or switch mounted on the instrument panel in front of and in clear view of the driver, or, in the case of an indicator for application of the parking brake, by applying the parking brake when the ignition is in the "on" ("run") position. (b) In the case of a vehicle that has an interlock device that prevents the engine from being started under one or more conditions, check functions meeting the requirements of S5.5.2(a) need not be operational under any condition in which the engine cannot be started. (c) The manufacturer shall explain the brake check function test procedure in the owner's manual.

S5.5.5. Labeling. (a) Each visual indicator shall display a word or words in accordance with the requirements of Standard No. 101 (49 CFR 571.101) and this section, which shall be legible to the driver under all daytime and nighttime conditions when activated. Unless otherwise specified, the words shall have letters not less than 3.2 mm (1/8 inch) high and the letters and background shall be of contrasting colors, one of which is red. Words or symbols in addition to those required by Standard No. 101 and this section may be provided for purposes of clarity.

(b) Vehicles manufactured with a split service brake system may use a common brake warning indicator to indicate two or more of the functions described in S5.5.1(a) through S5.5.1(g). If a common indicator is used, it shall display the word "Brake."

BMW explained that the noncompliance is that the telltales used for Brake Warning, Park Brake Warning and Antilock Braking System (ABS) failure warnings are displayed using International Organization for Standardization (ISO) symbols instead

of the telltale symbols required by FMVSS Nos. 101 and 135.

BMW stated its belief that although the instrument cluster telltale symbols are displayed using ISO symbols the noncompliance is inconsequential to motor vehicle safety for the following reasons:

(1) If a problem is encountered in which a brake system warning or malfunction indicator symbol is displayed, it is believed that the driver will be able to understand the warning symbol and take any necessary actions required.

(2) The instrument cluster is mounted behind the steering wheel in direct sight of the driver, making any warning symbol or indicator visible.

(3) There is a "message center" within the tachometer which is also used to inform the driver that a problem exists and can be used to better clarify why the warning symbol is illuminated.

(4) Due to similarities between the symbols required by FMVSS Nos. 101 and 135 and ISO symbols, eventually the driver will come to associate the wheel depiction symbol with the brake system.

(5) In such an event where the driver is unable to identify the warning symbol the driver would be able to consult the owner's manual which depicts as well as explains each of the warning/malfunction indicator symbols.

(6) BMW has received no customer complaints regarding the issue of non-compliant telltales.

BMW also explains NHTSA has previously granted similar petitions.

In summation, BMW believes that the described noncompliance of its vehicles is inconsequential to motor vehicle safety, and that its petition, to exempt it from providing recall notification of noncompliance as required by 49 U.S.C. 30118 and remedying the recall noncompliance as required by 49 U.S.C. 30120 should be granted.

Comments: Interested persons are invited to submit written data, views, and arguments on this petition. Comments must refer to the docket and notice number cited at the beginning of this notice and be submitted by any of the following methods:

a. By mail addressed to: U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue, SE., Washington, DC 20590.

b. By hand delivery to U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue, SE., Washington, DC 20590. The Docket Section is open

on weekdays from 10 a.m. to 5 p.m. except Federal Holidays.

c. Electronically: by logging onto the Federal Docket Management System (FDMS) Web site at <http://www.regulations.gov/>. Follow the online instructions for submitting comments. Comments may also be faxed to 1-202-493-2251.

Comments must be written in the English language, and be no greater than 15 pages in length, although there is no limit to the length of necessary attachments to the comments. If comments are submitted in hard copy form, please ensure that two copies are provided. If you wish to receive confirmation that your comments were received, please enclose a stamped, self-addressed postcard with the comments. Note that all comments received will be posted without change to http://www.regulations.gov, including any personal information provided.

Documents submitted to a docket may be viewed by anyone at the address and times given above. The documents may also be viewed on the Internet at <http://www.regulations.gov> by following the online instructions for accessing the dockets. DOT's complete Privacy Act Statement is available for review in the **Federal Register** published on April 11, 2000, (65 FR 19477-78).

The petition, supporting materials, and all comments received before the close of business on the closing date indicated below will be filed and will be considered. All comments and supporting materials received after the closing date will also be filed and will be considered to the extent possible. When the petition is granted or denied, notice of the decision will be published in the **Federal Register** pursuant to the authority indicated below.

DATES: Comment closing date: September 19, 2011.

Authority: (49 U.S.C. 30118, 30120: delegations of authority at CFR 1.50 and 501.8)

Issued on: August 12, 2011.

Claude H. Harris,
Director, Office of Vehicle Safety Compliance.

BILLING CODE 4910-59-P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Docket No. AB 55 (Sub-No. 708X)]

CSX Transportation, Inc.— Abandonment Exemption—in Beaver County, PA

CSX Transportation, Inc. (CSXT) has filed a verified notice of exemption under 49 CFR pt. 1152 subpart F—*Exempt Abandonments* to abandon an approximately 2.39-mile rail line on its Northern Region, Pittsburgh Subdivision, between milepost PLK 0.0 and milepost PLK 2.39, in Koppel, Beaver County, Pa. The line traverses United States Postal Service Zip Code 16136 and includes no stations.

CSXT has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) no overhead traffic has operated on the line so none needs to be rerouted over other lines; (3) no formal complaint filed by a user of rail service on the line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Surface Transportation Board (Board) or with any U.S. District Court or has been decided in favor of complainant within the 2-year period; and (4) the requirements at 49 CFR 1105.7(c) (environmental report), 49 CFR 1105.11 (transmittal letter), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the abandonment shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

Provided no formal expression of intent to file an offer of financial assistance (OFA) has been received, this exemption will be effective on September 17, 2011, unless stayed pending reconsideration. Petitions to stay that do not involve environmental issues,¹ formal expressions of intent to

¹ The Board will grant a stay if an informed decision on environmental issues (whether raised by a party or by the Board's Office of Environmental Analysis (OEA) in its independent investigation) cannot be made before the exemption's effective date. See *Exemption of Out-of-Serv. Rail Lines*, 5 I.C.C.2d 377 (1989). Any request for a stay should be filed as soon as possible so that the Board may

file an OFA under 49 CFR 1152.27(c)(2),² and trail use/rail banking requests under 49 CFR 1152.29 must be filed by August 29, 2011. Petitions to reopen or requests for public use conditions under 49 CFR 1152.28 must be filed by September 7, 2011,³ with the Surface Transportation Board, 395 E Street, SW., Washington, DC 20423-0001.

A copy of any petition filed with the Board should be sent to CSXT's representative: Louis E. Gitomer, Law Offices of Louis E. Gitomer, LLC, 600 Baltimore Ave., Suite 301, Towson, MD 21204.

If the verified notice contains false or misleading information, the exemption is void *ab initio*.

CSXT has filed environmental and historic reports that address the effects, if any, of the abandonment on the environment and historic resources. OEA will issue an environmental assessment (EA) by August 23, 2011. Interested persons may obtain a copy of the EA by writing to OEA (Room 1100, Surface Transportation Board, Washington, DC 20423-0001) or by calling OEA at (202) 245-0305. Assistance for the hearing impaired is available through the Federal Information Relay Service at 1-800-877-8339. Comments on environmental and historic preservation matters must be filed within 15 days after the EA becomes available to the public.

Environmental, historic preservation, public use, or trail use/rail banking conditions will be imposed, where appropriate, in a subsequent decision.

Pursuant to the provisions of 49 CFR 1152.29(e)(2), CSXT shall file a notice of consummation with the Board to signify that it has exercised the authority granted and fully abandoned the line. If consummation has not been effected by CSXT's filing of a notice of consummation by August 18, 2012, and there are no legal or regulatory barriers to consummation, the authority to abandon will automatically expire.

Board decisions and notices are available on our Web site at <http://www.stb.dot.gov>.

Decided: August 12, 2011.

take appropriate action before the exemption's effective date.

² Each OFA must be accompanied by the filing fee, which is currently set at \$1,500. See 49 CFR 1002.2(f)(25).

³ CSXT notes that it does not believe that the line is appropriate for other public purposes but may be subject to reversionary interests.

By the Board.

Rachel D. Campbell,

Director, Office of Proceedings.

Jeffrey Herzig,

Clearance Clerk.

BILLING CODE 4915-01-P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Docket No. AB 55 (Sub-No. 711X)]

CSX Transportation, Inc.— Abandonment Exemption—In Oswego County, NY

CSX Transportation, Inc. (CSXT) filed a verified notice of exemption under 49 CFR pt. 1152 subpart F—*Exempt Abandonments* to abandon 2 formerly connected rail lines in CSXT's Northern Region, Albany Division, Fulton Subdivision. The lines are described as follows: (1) 6,814 feet between milepost QMF 25.67, adjacent to County Road 57, and the end of the track between Ontario and Erie Streets; and (2) 5,938 feet between milepost QMF 22.8 and the end of the track at Division Street, in Fulton, Oswego County, NY. The line traverses United States Postal Service Zip Code 13069.

CSXT has certified that: (1) No local traffic has moved over the line for at least 2 years; (2) there is no overhead traffic on the line to be rerouted; (3) no formal complaint filed by a user of rail service on the line (or by a state or local government entity acting on behalf of such user) regarding cessation of service over the line either is pending with the Surface Transportation Board (Board) or with any U.S. District Court or has been decided in favor of complainant within the 2-year period; and (4) the requirements at 49 CFR 1105.7(c) (environmental report), 49 CFR 1105.11 (transmittal letter), 49 CFR 1105.12 (newspaper publication), and 49 CFR 1152.50(d)(1) (notice to governmental agencies) have been met.

As a condition to this exemption, any employee adversely affected by the abandonment shall be protected under *Oregon Short Line Railroad—Abandonment Portion Goshen Branch Between Firth & Ammon, in Bingham & Bonneville Counties, Idaho*, 360 I.C.C. 91 (1979). To address whether this condition adequately protects affected employees, a petition for partial revocation under 49 U.S.C. 10502(d) must be filed.

BILLING CODE 4915-01-P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[Docket No. FD 35537]

Genesee & Wyoming Inc.; Acquisition of Control Exemption; Arizona Eastern Railway Company

Genesee & Wyoming Inc. (GWI), a noncarrier, has filed a verified notice of exemption to acquire control of Arizona Eastern Railway Company (AZER), a Class III rail carrier. GWI intends to consummate the transaction on September 1, 2011, the effective date of the exemption (30 days after the exemption was filed).

GWI directly or indirectly controls one Class II rail carrier, Buffalo & Pittsburgh Railroad, Inc., and 57 Class III rail carriers operating in 23 states. For a complete list of these Class III carriers, and the states within which they operate, see GWI's notice of exemption filed on August 2, 2011. The notice is available on the Board's Web site at "<http://www.stb.dot.gov>."

AZER currently owns and operates approximately 200 route miles of rail line between Bowie and Miami, Ariz. and between Lordsburg, N.M. and Clifton, Ariz. AZER is a wholly owned subsidiary of Permian Basin Railways, Inc. (Permian Basin), which in turn is a wholly owned subsidiary of Iowa Pacific Holdings, LLC, a noncarrier holding company. As a result of the proposed transaction, GWI will obtain control of AZER through the purchase of all of AZER's stock from Permian Basin.¹

Applicants represent that: (1) The rail lines to be acquired by GWI do not connect with any other railroad in the corporate family;² (2) the transaction is

¹ GWI states that if it acquires the stock prior to the September 1, 2011 effective date of the exemption, it would place the stock into an irrevocable, independent voting trust pursuant to 49 CFR 1013, pending the effectiveness of the exemption. GWI states that it would notify the Board of any such occurrence and would submit a copy of the agreement governing the voting trust for AZER's stock.

² AZER's lines are located in Arizona and New Mexico. GWI's carriers do not currently operate in the states of Arizona or New Mexico.

not part of a series of anticipated transactions that would connect AZER's rail lines with any other railroad in the GWI corporate family; and (3) the transaction does not involve a Class I rail carrier. Therefore, the transaction is exempt from the prior approval requirements of 49 U.S.C. 11323. See 49 CFR 1180.2(d)(2).³

Under 49 U.S.C. 10502(g), the Board may not use its exemption authority to relieve a rail carrier of its statutory obligation to protect the interests of its employees. Because the transaction involves the control of at least one Class II and one or more Class III rail carriers, the transaction is subject to the labor protection requirements of 49 U.S.C. 11326(b).

If the verified notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the effectiveness of the exemption. Stay petitions must be filed no later than August 25, 2011 (at least 7 days before the exemption becomes effective).

An original and 10 copies of all pleadings, referring to Docket No. FD 35537, must be filed with the Surface Transportation Board, 395 E Street, SW., Washington, DC 20423-0001. In addition, one copy of each pleading must be served on Thomas J. Litwiler, Fletcher & Sippel LLC, 29 North Wacker Drive, Suite 920, Chicago, IL 60606.

Board decisions and notices are available on our Web site at "<http://www.stb.dot.gov>."

Decided: August 12, 2011.

By the Board, Rachel D. Campbell, Director, Office of Proceedings.

Jeffrey Herzig,
Clearance Clerk.

BILLING CODE 4915-01-P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

August 15, 2011.

The Department of the Treasury will submit the following public information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1995,

³ A redacted Stock Purchase Agreement was filed with the notice of exemption. The Applicants concurrently filed a motion for protective order pursuant to 49 CFR 1104.14(b) to allow the filing under seal of the unredacted Stock Purchase Agreement. That motion will be addressed in a separate decision.

Public Law 104-13 on or after the date of publication of this notice. A copy of the submissions may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding these information collections should be addressed to the OMB reviewer listed and to the Treasury PRA Clearance Officer, Department of the Treasury, 1750 Pennsylvania Avenue, NW., Suite 11010, Washington, DC 20220.

DATES: Written comments should be received on or before September 19, 2011 to be assured of consideration.

Alcohol and Tobacco Tax and Trade Bureau (TTB)

OMB Number: 1513-0018.

Type of Review: Revision of a currently approved collection.

Title: Application for Basic Permit under the Federal Alcohol Administration Act.

Form: TTB F 5100.24.

Abstract: TTB 5100.24 will be completed by persons intending to engage in a business involving beverage alcohol operations at a distilled spirits plant, bonded winery, or wholesaling/importing business. The information collected allows TTB to identify the applicant and the location of the business, and to determine whether the applicant qualifies for a permit.

Respondents: Private Sector; Businesses or other for-profits.

Estimated Total Burden Hours: 5,656.

OMB Number: 1513-0019.

Type of Review: Extension without change of a currently approved collection.

Title: Application for Amended Basic Permit under the Federal Alcohol Administration Act.

Forms: TTB F 5100.18.

Abstract: TTB F 5100.18 is completed by permittees who change their operations in a manner that requires a new permit or receive a new notice. The information allows TTB to identify the permittee, the changes to the permit or business, and to determine whether the applicant still qualifies for a basic permit.

Respondents: Private Sector; Businesses or other for-profits.

Estimated Total Burden Hours: 600.

OMB Number: 1513-0023.

Type of Review: Revision of a currently approved collection.

Title: Environmental Information; and Supplemental Information on Water Quality Consideration under 33 U.S.C. 1341(a).

Forms: TTB F 5000.28 and 5000.30.

Abstract: TTB F 5000.29 is used to determine whether an activity will have a significant effect on the environment

and to determine if a formal environmental impact statement or an environmental permit is necessary for a proposed operation. TTB F 5000.30 is used to make a determination as to whether a certification or waiver by the applicable State water quality agency is required under section 21 of the Federal Water Pollution Control Act (33 U.S.C. 1341(a)). Manufacturers that discharge a solid or liquid effluent into navigable waters submit this form.

Respondents: Private Sector: Businesses or other for-profits.

Estimated Total Burden Hours: 3,900.

OMB Number: 1513-0054.

Type of Review: Extension without change of a currently approved collection.

Title: Offer in Compromise of liability incurred under the provisions of Title 26 U.S.C. enforced and administered by TTB; Collection Information Statement (CIS) for Individuals; CIS for Businesses.

Forms: TTB F 5600.17, 5600.18, and 5640.1.

Abstract: TTB F 5640.1 is used by persons who wish to compromise criminal and/or civil penalties for violations of the IRC. If accepted, the offer in compromise is a settlement between the government and the party in violation in lieu of legal proceedings or prosecution. If the party is unable to pay the offer in full, TTB F 5600.17 and 5600.18 are used to gather financial information to develop an installment agreement to allow the party to pay without incurring a financial hardship.

Respondents: Private Sector: Businesses or other for-profits; Individuals and households.

Estimated Total Burden Hours: 140.

OMB Number: 1513-0073.

Type of Review: Extension without change of a currently approved collection.

Title: Manufacturers of Nonbeverage Products—Records to Support Claims for Drawback, TTB REC 5530/2.

Abstract: Records required to be maintained by manufacturers of nonbeverage products are used to prevent diversion of drawback spirits to beverage use. The records are necessary to maintain accountability over these spirits. The records make it possible to trace spirits using audit techniques, thus enabling TTB officers to verify the amount of spirits used in nonbeverage products and subsequently claimed as eligible for drawback of tax. The record retention requirement for this information collection is 3 years.

Respondents: Private Sector: Businesses or other for-profits.

Estimated Total Burden Hours: 10,521.

OMB Number: 1513-0075.

Type of Review: Extension without change of a currently approved collection.

Title: Proprietors or Claimants Exporting Liquors, TTB REC 5900/1.

Abstract: Distilled spirits, wine, and beer may be exported from bonded premises without payment of excise taxes, or, they may be exported if their taxes have been paid and the exporters may claim drawback of the taxes paid. The recordkeeping requirement makes it possible to trace movement of distilled spirits, wine, and beer, thus enabling TTB officers to verify the amount of these liquors eligible for exportation without payment of tax or exportation subject to drawback.

Respondents: Private Sector: Businesses or other for-profits.

Estimated Total Burden Hours: 7,200.

Clearance Officer: Gerald Isenberg, Alcohol and Tobacco Tax and Trade Bureau, Room 200 East, 1310 G Street, NW., Washington, DC 20005; (202) 453-2165.

OMB Reviewer: Shagufta Ahmed, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503; (202) 395-7873.

Dawn D. Wolfgang,

Treasury PRA Clearance Officer.

BILLING CODE 4810-31-P

DEPARTMENT OF THE TREASURY

Submission for OMB Review; Comment Request

August 15, 2011.

The Department of the Treasury will submit the following public information collection requirements to OMB for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104-13 on or after the date of publication of this notice. A copy of the submissions may be obtained by calling the Treasury Bureau Clearance Officer listed. Comments regarding these information collections should be addressed to the OMB reviewer listed and to the Treasury PRA Clearance Officer, Department of the Treasury, 1750 Pennsylvania Avenue, NW., Suite 11010, Washington, DC 20220.

DATES: Written comments should be received on or before September 19, 2011 to be assured of consideration.

Bureau of the Public Debt (BPD)

OMB Number: 1535-0059.

Type of Review: Extension without change of a currently approved collection.

Title: Special Form of Assignment for U.S. Registered Definitive Securities and U.S. Bearer Securities for Conversion to BECCS or CUBES.

Form: PD F 1832 E.

Abstract: Used to certify assignments of U.S. registered definitive securities.

Affected Public: Individuals or Households.

Estimated Total Burden Hours: 1,250.

OMB Number: 1535-0113.

Type of Review: Extension without change of a currently approved collection.

Title: Disclaimer and Consent with Respect to United States Savings Bond/Notes.

Form: PD F 1849 E.

Abstract: Used to obtain a disclaimer and consent as the result of an error in registration or otherwise the payment, refund of the purchase price, or reissue as requested by one person would appear to affect the right, title or interest of some other person.

Affected Public: Individuals or Households.

Estimated Total Burden Hours: 700.

Bureau Clearance Officer: Bruce Sharp, Bureau of the Public Debt, 200 Third Street, Parkersburg, West Virginia 26106; (304) 480-8112.

OMB Reviewer: Shagufta Ahmed, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503; (202) 395-7873.

BILLING CODE 4810-39-P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Department of the Treasury, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Public Law 104-13 (44 U.S.C. 3506(c)(2)(A)). The IRS is soliciting comments concerning information collection requirements related to the obligation of material advisors to prepare and maintain lists with respect to reportable transactions.

DATES: Written comments should be received on or before October 17, 2011 to be assured of consideration.

ADDRESSES: Direct all written comments to Yvette B. Lawrence, Internal Revenue Service, room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the regulation should be directed to Joel Goldberger, at (202) 927-9368, or at Internal Revenue Service, room 6129, 1111 Constitution Avenue, NW., Washington, DC 20224, or through the Internet at Joel.P.Goldberger@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: AJCA Modifications to the Section 6112 Regulations.

OMB Number: 1545-1686.

Regulation Project Number: (T.D. 9352).

Abstract: This document contains final regulations under section 6112 of the Internal Revenue Code that provide the rules relating to the obligation of material advisors to prepare and maintain lists with respect to reportable transactions. These regulations affect

material advisors responsible for keeping lists under section 6112.

Current Actions: There is no change to this existing regulation.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations, individuals or households.

Estimated Number of Respondents: 500.

Estimated Time per Respondent: 100 hours.

Estimated Total Annual Burden Hours: 50,000.

The following paragraph applies to all of the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record.

Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: August 1, 2011.

Yvette B. Lawrence,

IRS Reports Clearance Officer.

Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and FY 2012 Rates; Hospitals' FTE Resident Caps for Graduate Medical Education Payment

AGENCY: Centers for Medicare and Medicaid Services (CMS), HHS.

ACTION: Final rules.

SUMMARY: We are revising the Medicare hospital inpatient prospective payment systems (IPPS) for operating and capital-related costs of acute care hospitals to implement changes arising from our continuing experience with these systems and to implement certain statutory provisions contained in the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (collectively known as the Affordable Care Act) and other legislation. We also are setting forth the update to the rate-of-increase limits for certain hospitals excluded from the IPPS that are paid on a reasonable cost basis subject to these limits.

We are updating the payment policy and the annual payment rates for the Medicare prospective payment system (PPS) for inpatient hospital services provided by long-term care hospitals (LTCHs) and implementing certain statutory changes made by the Affordable Care Act. In addition, we are finalizing an interim final rule with comment period that implements section 203 of the Medicare and Medicaid Extenders Act of 2010 relating to the treatment of teaching hospitals that are members of the same Medicare graduate medical education affiliated groups for the purpose of determining possible full-time equivalent (FTE) resident cap reductions.

DATES: *Effective dates:* These final rules are effective on October 1, 2011, except for the provisions of § 412.230(d)(5), which are effective September 1, 2011. Effective July 29, 2011, the interim rule published March 14, 2011, at 76 FR 13515, is confirmed as final without change.

Applicability dates: The update to the rate-of-increase limits for certain

hospitals excluded from the IPPS that are paid on a reasonable cost basis subject to these limits is applicable beginning on or after October 1, 2011. The payment policy and the annual payment rates for inpatient hospital services provided by IPPS hospitals and by long-term care hospitals (LTCHs) and for implementing certain statutory changes made by the Affordable Care Act and other legislation are applicable to discharges occurring on or after October 1, 2011 unless otherwise specified in this final rule.

SUPPLEMENTARY INFORMATION:

Electronic Access

This **Federal Register** document is also available from the **Federal Register** online database through *GPO Access*, a service of the U.S. Government Printing Office. Free public access is available on a Wide Area Information Server (WAIS)

through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web, (the Superintendent of Documents' home Web page address is <http://www.gpoaccess.gov/>), by using local WAIS client software, or by telnet to swais.access.gpo.gov, then log in as guest (no password required). Dial-in users should use communications software and modem to call (202) 512-1661; type swais, then log in as guest (no password required).

Tables Available Only Through the Internet on the CMS Web Site

In the past, a majority of the tables referred to throughout this preamble and in the Addendum to this final rule were published in the **Federal Register** as part of the annual proposed and final rules. However, beginning in FY 2012, some of the IPPS tables and LTCH PPS tables will no longer be published as part of the annual IPPS and LTCH PPS proposed and final rules. Instead, these tables will be available only through the Internet. The IPPS tables for this final rule are available only through the Internet on the CMS Web site at: http://www.cms.hhs.gov/AcuteInpatientPPS/01_overview.asp. Click on the link on the left side of the screen titled, "FY 2012 IPPS Final Rule Home Page" or "Acute Inpatient—Files for Download." The LTCH PPS tables for this FY 2012 final rule are available only through the Internet on the CMS Web site at: <http://www.cms.gov/LongTermCareHospitalPPS/LTCHPPSRN/list.asp> under the list item for Regulation Number CMS-1518-F. For complete details on the availability of the tables referenced in this final rule, we refer readers to section VI. of the Addendum to this final rule.

Readers who experience any problems accessing any of the tables that are posted on the CMS Web sites identified above should contact Nisha Bhat at (410) 786-4487.

I. Background

A. Summary

1. Acute Care Hospital Inpatient Prospective Payment System (IPPS)

Section 1886(d) of the Social Security Act (the Act) sets forth a system of payment for the operating costs of acute care hospital inpatient stays under Medicare Part A (Hospital Insurance) based on prospectively set rates. Section 1886(g) of the Act requires the Secretary to pay for the capital-related costs of hospital inpatient stays under a prospective payment system (PPS). Under these PPSs, Medicare payment for hospital inpatient operating and capital-related costs is made at predetermined, specific rates for each hospital discharge. Discharges are classified according to a list of diagnosis-related groups (DRGs).

The base payment rate is comprised of a standardized amount that is divided

into a labor-related share and a nonlabor-related share. The labor-related share is adjusted by the wage index applicable to the area where the hospital is located. If the hospital is located in Alaska or Hawaii, the nonlabor-related share is adjusted by a cost-of-living adjustment factor. This base payment rate is multiplied by the DRG relative weight.

If the hospital treats a high percentage of certain low-income patients, it receives a percentage add-on payment applied to the DRG-adjusted base payment rate. This add-on payment, known as the disproportionate share hospital (DSH) adjustment, provides for a percentage increase in Medicare payments to hospitals that qualify under either of two statutory formulas designed to identify hospitals that serve a disproportionate share of low-income patients. For qualifying hospitals, the amount of this adjustment varies based on the outcome of the statutory calculations.

If the hospital is an approved teaching hospital, it receives a percentage add-on payment for each case paid under the IPPS, known as the indirect medical education (IME) adjustment. This percentage varies, depending on the ratio of residents to beds.

Additional payments may be made for cases that involve new technologies or medical services that have been approved for special add-on payments. To qualify, a new technology or medical service must demonstrate that it is a substantial clinical improvement over technologies or services otherwise available, and that, absent an add-on payment, it would be inadequately paid under the regular DRG payment.

The costs incurred by the hospital for a case are evaluated to determine whether the hospital is eligible for an additional payment as an outlier case. This additional payment is designed to protect the hospital from large financial losses due to unusually expensive cases. Any eligible outlier payment is added to the DRG-adjusted base payment rate, plus any DSH, IME, and new technology or medical service add-on adjustments.

Although payments to most hospitals under the IPPS are made on the basis of the standardized amounts, some categories of hospitals are paid in whole or in part based on their hospital-specific rate, which is determined from their costs in a base year. For example, sole community hospitals (SCHs) receive the higher of a hospital-specific rate based on their costs in a base year (the highest of FY 1982, FY 1987, FY 1996, or FY 2006) or the IPPS Federal rate based on the standardized amount. Through and including FY 2006, a

Medicare-dependent, small rural hospital (MDH) received the higher of the Federal rate or the Federal rate plus 50 percent of the amount by which the Federal rate is exceeded by the higher of its FY 1982 or FY 1987 hospital-specific rate. As discussed below, for discharges occurring on or after October 1, 2007, but before October 1, 2012, an MDH will receive the higher of the Federal rate or the Federal rate plus 75 percent of the amount by which the Federal rate is exceeded by the highest of its FY 1982, FY 1987, or FY 2002 hospital-specific rate. SCHs are the sole source of care in their areas, and MDHs are a major source of care for Medicare beneficiaries in their areas. Specifically, section 1886(d)(5)(D)(iii) of the Act defines an SCH as a hospital that is located more than 35 road miles from another hospital or that, by reason of factors such as isolated location, weather conditions, travel conditions, or absence of other like hospitals (as determined by the Secretary), is the sole source of hospital inpatient services reasonably available to Medicare beneficiaries. In addition, certain rural hospitals previously designated by the Secretary as essential access community hospitals are considered SCHs. Section 1886(d)(5)(G)(iv) of the Act defines an MDH as a hospital that is located in a rural area, has not more than 100 beds, is not an SCH, and has a high percentage of Medicare discharges (not less than 60 percent of its inpatient days or discharges in its cost reporting year beginning in FY 1987 or in two of its three most recently settled Medicare cost reporting years). Both of these categories of hospitals are afforded this special payment protection in order to maintain access to services for beneficiaries.

Section 1886(g) of the Act requires the Secretary to pay for the capital-related costs of inpatient hospital services "in accordance with a prospective payment system established by the Secretary." The basic methodology for determining capital prospective payments is set forth in our regulations at 42 CFR 412.308 and 412.312. Under the capital IPPS, payments are adjusted by the same DRG for the case as they are under the operating IPPS. Capital IPPS payments are also adjusted for IME and DSH, similar to the adjustments made under the operating IPPS. In addition, hospitals may receive outlier payments for those cases that have unusually high costs.

The existing regulations governing payments to hospitals under the IPPS are located in 42 CFR Part 412, Subparts A through M.

2. Hospitals and Hospital Units Excluded From the IPPS

Under section 1886(d)(1)(B) of the Act, as amended, certain hospitals and hospital units are excluded from the IPPS. These hospitals and units are: Rehabilitation hospitals and units; long-term care hospitals (LTCHs); psychiatric hospitals and units; children's hospitals; and cancer hospitals. Religious nonmedical health care institutions (RNHCIs) are also excluded from the IPPS. Various sections of the Balanced Budget Act of 1997 (BBA, Public Law 105-33), the Medicare, Medicaid and SCHIP [State Children's Health Insurance Program] Balanced Budget Refinement Act of 1999 (BBRA, Pub. L. 106-113), and the Medicare, Medicaid, and SCHIP Benefits Improvement and Protection Act of 2000 (BIPA, Pub. L. 106-554) provide for the implementation of PPSs for rehabilitation hospitals and units (referred to as inpatient rehabilitation facilities (IRFs)), LTCHs, and psychiatric hospitals and units (referred to as inpatient psychiatric facilities (IPFs)). (We note that the annual updates to the LTCH PPS are now included as part of the IPPS annual update document. Updates to the IRF PPS and IPF PPS are issued as separate documents.) Children's hospitals, cancer hospitals, and RNHCIs continue to be paid solely under a reasonable cost-based system subject to a rate-of-increase ceiling on inpatient operating costs per discharge.

The existing regulations governing payments to excluded hospitals and hospital units are located in 42 CFR Parts 412 and 413.

3. Long-Term Care Hospital Prospective Payment System (LTCH PPS)

The Medicare prospective payment system (PPS) for LTCHs applies to hospitals described in section 1886(d)(1)(B)(iv) effective for cost reporting periods beginning on or after October 1, 2002. The LTCH PPS was established under the authority of sections 123(a) and (c) of Public Law 106-113 and section 307(b)(1) of Public Law 106-554 (as codified under section 1886(m)(1) of the Act). During the 5-year (optional) transition period, a LTCH's payment under the PPS was based on an increasing proportion of the LTCH Federal rate with a corresponding decreasing proportion based on reasonable cost principles. Effective for cost reporting periods beginning on or after October 1, 2006, all LTCHs are paid 100 percent of the Federal rate. The existing regulations governing payment under the LTCH PPS are located in 42 CFR Part 412, Subpart O. Beginning

October 1, 2009, we issue the annual updates to the LTCH PPS in the same documents that update the IPPS (73 FR 26797 through 26798).

4. Critical Access Hospitals (CAHs)

Under sections 1814(l), 1820, and 1834(g) of the Act, payments are made to critical access hospitals (CAHs) (that is, rural hospitals or facilities that meet certain statutory requirements) for inpatient and outpatient services are generally based on 101 percent of reasonable cost. Reasonable cost is determined under the provisions of section 1861(v)(1)(A) of the Act and existing regulations under 42 CFR Parts 413 and 415.

5. Payments for Graduate Medical Education (GME)

Under section 1886(a)(4) of the Act, costs of approved educational activities are excluded from the operating costs of inpatient hospital services. Hospitals with approved graduate medical education (GME) programs are paid for the direct costs of GME in accordance with section 1886(h) of the Act. The amount of payment for direct GME costs for a cost reporting period is based on the hospital's number of residents in that period and the hospital's costs per resident in a base year. The existing regulations governing payments to the various types of hospitals are located in 42 CFR Part 413.

B. Provisions of the Patient Protection and Affordable Care Act (Pub. L. 111-148) and the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111-152) Applicable to FY 2012

The Patient Protection and Affordable Care Act (Pub. L. 111-148), enacted on March 23, 2010, and the Health Care and Education Reconciliation Act of 2010 (Pub. L. 111-152), enacted on March 30, 2010, made a number of changes that affect the IPPS and the LTCH PPS. (Pub. L. 111-148 and Pub. L. 111-152 are collectively referred to as the "Affordable Care Act.") A number of the provisions of the Affordable Care Act affect the updates to the IPPS and the LTCH PPS and providers and suppliers. The provisions of the Affordable Care Act that were applicable to the IPPS and the LTCH PPS for FYs 2010 and 2011 were implemented in the following documents:

On June 2, 2010, we issued in the **Federal Register** a notice (75 FR 31118) that contained the final wage indices, hospital reclassifications, payment rates, impacts, and other related tables, effective for the FY 2010 IPPS and the FY 2010 LTCH PPS, which were

required by or directly resulted from implementation of provisions of the Affordable Care Act.

On August 16, 2010, we issued in the **Federal Register** a final rule (75 FR 50042) that implemented provisions of the Affordable Care Act applicable to the IPPS and LTCH/PPS for FY 2011.

In this final rule, we are implementing the following provisions (or portions of the following provisions) of the Affordable Care Act that are applicable to the IPPS and LTCH PPS for FY 2012:

- Section 3001 of Public Law 111-148, which provides for establishment of a hospital value-based purchasing program and applicable measures for value-based incentive payments with respect to discharges occurring during FY 2013.
- Section 3004 of Public Law 111-148, which provides for the submission of quality data for LTCHs beginning in FY 2013 in order to receive the full annual update to the payment rates beginning with FY 2014 and the establishment of quality data measures by FY 2012 for the FY 2014 payment determination.

- Section 3025 of Public Law 111-148, which provides for a hospital readmissions reduction program and related quality data reporting measures.
- Section 3124 of Public Law 111-148, which provides for extension of the Medicare-dependent, small rural hospital (MDH) program through FY 2012.

- Section 3401 of Public Law 111-148, which provides for the incorporation of productivity improvements into the market basket updates for IPPS hospitals and LTCHs.

In addition, we are continuing in FY 2012 to implement the following provisions, which were initiated in FY 2011:

- Section 10324 of Public Law 111-148, which provided for a wage adjustment for hospitals located in frontier States.
- Sections 3401 and 10319 of Public Law 111-148 and section 1105 of Public Law 111-152, which revise certain market basket update percentages for IPPS and LTCH PPS payment rates for FY 2012.

- Sections 3125 and 10314 of Public Law 111-148, which provide for temporary percentage increases in payment adjustments to low-volume hospitals for discharges occurring in FY 2012.

- Section 1109 of Public Law 111-152, which provides for additional payments in FY 2012 for qualifying hospitals in the lowest quartile of per capita Medicare spending.

- Section 5503 of Public Law 111-148, as amended by Public Law 111-152 and section 203 of Public Law 111-309, which provides for the reduction in FTE resident caps for direct GME under Medicare for certain hospitals, and to authorize the "redistribution" of the estimated number of FTE resident slots to other qualified hospitals. In addition, section 5503 requires the application of these provisions to IME in the same manner as the FTE resident caps for direct GME.

C. Issuance of a Notice of Proposed Rulemaking

The May 5, 2011 **Federal Register** (76 FR 25788) included the proposed rule that set forth proposed changes to the Medicare IPPS for operating costs and for capital-related costs of acute care hospitals in FY 2012. We also set forth proposed changes relating to payments for IME costs and payments to certain hospitals that continue to be excluded from the IPPS and paid on a reasonable cost basis. In addition, we set forth proposed changes to the payment rates, factors, and other payment rate policies under the LTCH PPS for FY 2012.

Below is a summary of the major changes that we proposed to make:

1. Proposed Changes to MS-DRG Classifications and Recalibrations of Relative Weights

In section II. of the preamble of the proposed rule, we included—

- Proposed changes to MS-DRG classifications based on our yearly review.
- Proposed application of the documentation and coding adjustment for FY 2012 resulting from implementation of the MS-DRG system.
- A discussion of the Research Triangle Institute, International (RTI) reports and recommendations relating to charge compression.
- Proposed recalibrations of the MS-DRG relative weights.
- Proposed changes to hospital-acquired conditions (HACs) and a listing and discussion of HACs, including infections, that would be subject to the statutorily required quality adjustment in MS-DRG payments for FY 2012.

We discussed the FY 2012 status of new technologies approved for add-on payments for FY 2011 and presented our evaluation and analysis of the FY 2012 applicants for add-on payments for high-cost new medical services and technologies (including public input, as directed by Public Law 108-173, obtained in a town hall meeting).

2. Proposed Changes to the Hospital Wage Index for Acute Care Hospitals

In section III. of the preamble to the proposed rule, we proposed revisions to the wage index for acute care hospitals and the annual update of the wage data. Specific issues addressed included the following:

- The proposed FY 2012 wage index update using wage data from cost reporting periods beginning in FY 2008.
- Analysis and implementation of the proposed FY 2012 occupational mix adjustment to the wage index for acute care hospitals, including discussion of the 2010 occupational mix survey.
- A proposal to change the reporting requirements for pension costs for the Medicare wage index.
- Proposed revisions to the wage index for acute care hospitals based on hospital redesignations and reclassifications.
- The proposed adjustment to the wage index for acute care hospitals for FY 2012 based on commuting patterns of hospital employees who reside in a county and work in a different area with a higher wage index.
- The timetable for reviewing and verifying the wage data used to compute the proposed FY 2012 hospital wage index.
- Determination of the labor-related share for the proposed FY 2012 wage index.

3. Other Decisions and Proposed Changes to the IPPS for Operating Costs and GME Costs

In section IV. of the preamble of the proposed rule, we discussed a number of the provisions of the regulations in 42 CFR Parts 412, 413, and 476, including the following:

- The reporting of hospital quality data under the Hospital Inpatient Quality Reporting (IQR) Program as a condition for receiving the full annual payment update increase.
- The proposed implementation of the Hospital Value-Based Purchasing Program measures.
- The proposed establishment of hospital readmission measures for reporting of hospital quality data.
- The proposed updated national and regional case-mix values and discharges for purposes of determining RRC status.
- The statutorily required IME adjustment factor for FY 2012.
- Proposed payment adjustment for low-volume hospitals.
- Proposal for counting hospice days in the formula for determining the payment adjustment for disproportionate share hospitals.
- Proposal for making additional payments for qualifying hospitals with

lowest per enrollee Medicare spending for FY 2012.

- Proposal to clarify ESRD add-on payment requirements based on cost report requirements.
- Proposal relating to changes to the reporting requirements for pension costs for Medicare cost-finding purposes.
- Proposal to implement statutory change to the hospital payment update, including incorporation of a productivity adjustment.
- Discussion of the Rural Community Hospital Demonstration Program and a proposal for making a budget neutrality adjustment for the demonstration program.
- Discussion of August 2010 interim final rule with comment period and further proposed changes relating to the 3-day payment window for payments for services provided to outpatients who are later admitted as inpatients.

4. Proposed FY 2012 Policy Governing the IPPS for Capital-Related Costs

In section V. of the preamble to the proposed rule, we discussed the proposed payment policy requirements for capital-related costs and capital payments to hospitals for FY 2012 and the proposed MS-DRG documentation and coding adjustment for FY 2012.

5. Proposed Changes to the Payment Rates for Certain Excluded Hospitals: Rate-of-Increase Percentages

In section VI. of the preamble of the proposed rule, we discussed proposed changes to payments to certain excluded hospitals. In addition, we discussed proposed changes relating to payment for TEFRA services furnished under arrangements and payment for ambulance services furnished by CAH-owned and operated entities.

6. Proposed Changes to the LTCH PPS

In section VII. of the preamble of the proposed rule, we set forth proposed changes to the payment rates, factors, and other payment rate policies under the LTCH PPS for FY 2012, including the annual update of the MS-LTC-DRG classifications and relative weights for use under the LTCH PPS for FY 2012 and the proposed rebasing and revising of the market basket for LTCHs. In addition, we set forth proposals for implementing the quality data reporting program for LTCHs. We also proposed to clarify two policies regarding the calculation of the average length of stay requirement for LTCHs, and proposed a policy to address a LTCH moratorium issue.

7. Determining Proposed Prospective Payment Operating and Capital Rates and Rate-of-Increase Limits for Acute Care Hospitals

In the Addendum to the proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2012 prospective payment rates for operating costs and capital-related costs for acute care hospitals. We also proposed to establish the threshold amounts for outlier cases. In addition, we addressed the proposed update factors for determining the rate-of-increase limits for cost reporting periods beginning in FY 2012 for certain hospitals excluded from the IPPS.

8. Determining Proposed Prospective Payment Rates for LTCHs

In the Addendum to the proposed rule, we set forth proposed changes to the amounts and factors for determining the proposed FY 2012 prospective standard Federal rate. We also proposed to establish the proposed adjustments for wage levels, the labor-related share, the cost-of-living adjustment, and high-cost outliers, including the fixed-loss amount, and the LTCH cost-to-charge ratios (CCRs) under the LTCH PPS.

9. Impact Analysis

In Appendix A of the proposed rule, we set forth an analysis of the impact that the proposed changes would have on affected acute care hospitals and LTCHs.

10. Recommendation of Update Factors for Operating Cost Rates of Payment for Hospital Inpatient Services

In Appendix B of the proposed rule, as required by sections 1886(e)(4) and (e)(5) of the Act, we provided our recommendations of the appropriate percentage changes for FY 2012 for the following:

- A single average standardized amount for all areas for hospital inpatient services paid under the IPPS for operating costs of acute care hospitals (and hospital-specific rates applicable to SCHs and MDHs).
- Target rate-of-increase limits to the allowable operating costs of hospital inpatient services furnished by certain hospitals excluded from the IPPS.
- The standard Federal rate for hospital inpatient services furnished by LTCHs.

11. Discussion of Medicare Payment Advisory Commission Recommendations

Under section 1805(b) of the Act, MedPAC is required to submit a report to Congress, no later than March 1 of each year, in which MedPAC reviews

and makes recommendations on Medicare payment policies. MedPAC's March 2011 recommendations concerning hospital inpatient payment policies address the update factor for hospital inpatient operating costs and capital-related costs under the IPPS, for hospitals and distinct part hospital units excluded from the IPPS. We addressed these recommendations in Appendix B of the proposed rule. For further information relating specifically to the MedPAC March 2011 report or to obtain a copy of the report, contact MedPAC at (202) 220-3700 or visit MedPAC's Web site at: <http://www.medpac.gov>.

D. Public Comments Received in Response to the FY 2012 IPPS/LTCH PPS Proposed Rule

We received approximately 385 timely pieces of correspondence containing multiple comments on the FY 2012 IPPS/LTCH PPS proposed rule. We note that some of these public comments were outside of the scope of the proposed rule. These out-of-scope public comments are not addressed with policy responses in this final rule. Summaries of the public comments that are within the scope of the proposed rule and our responses to those comments are set forth in the various sections of this final rule under the appropriate heading.

E. Finalization of Interim Final Rule With Comment Period on Revisions to the Reductions and Increases to Hospitals' FTE Resident Caps for Graduate Medical Education Payment Purposes

On March 14, 2011, we issued in the **Federal Register** (76 FR 13515) an interim final rule with comment period to implement section 203 of the Medicare and Medicaid Extenders Act of 2010 (MMEA), Public Law 111-309, relating to the treatment of teaching hospitals that are members of the same Medicare graduate medical education (GME) affiliated groups for the purpose of determining possible full-time equivalent (FTE) resident cap reductions. We received nine timely pieces of correspondence in response to this interim final rule with comment period. In section IV.R. of this document, we are summarizing and responding to these public comments and are finalizing the policies contained in the interim final rule with comment period without modification.

II. Changes to Medicare Severity Diagnosis-Related Group (MS-DRG) Classifications and Relative Weights

A. Background

Section 1886(d) of the Act specifies that the Secretary shall establish a classification system (referred to as DRGs) for inpatient discharges and adjust payments under the IPPS based on appropriate weighting factors assigned to each DRG. Therefore, under the IPPS, Medicare pays for inpatient hospital services on a rate per discharge basis that varies according to the DRG to which a beneficiary's stay is assigned. The formula used to calculate payment for a specific case multiplies an individual hospital's payment rate per case by the weight of the DRG to which the case is assigned. Each DRG weight represents the average resources required to care for cases in that particular DRG, relative to the average resources used to treat cases in all DRGs.

Congress recognized that it would be necessary to recalculate the DRG relative weights periodically to account for changes in resource consumption. Accordingly, section 1886(d)(4)(C) of the Act requires that the Secretary adjust the DRG classifications and relative weights at least annually. These adjustments are made to reflect changes in treatment patterns, technology, and any other factors that may change the relative use of hospital resources.

B. MS-DRG Reclassifications

1. General

As discussed in the preamble to the FY 2008 IPPS final rule with comment period (72 FR 47138), we focused our efforts in FY 2008 on making significant reforms to the IPPS consistent with the recommendations made by MedPAC in its "Report to the Congress, Physician-Owned Specialty Hospitals" in March 2005. MedPAC recommended that the Secretary refine the entire DRG system by taking severity of illness into account and applying hospital-specific relative value (HSRV) weights to DRGs.¹ We began this reform process by adopting cost-based weights over a 3-year transition period beginning in FY 2007 and making interim changes to the DRG system for FY 2007 by creating 20 new CMS DRGs and modifying 32 other DRGs across 13 different clinical areas involving nearly 1.7 million cases. As described in more detail below, these refinements were intermediate steps towards comprehensive reform of both

the relative weights and the DRG system as we undertook further study. For FY 2008, we adopted 745 new Medicare Severity DRGs (MS-DRGs) to replace the CMS DRGs. We refer readers to section II.D. of the FY 2008 IPPS final rule with comment period for a full detailed discussion of how the MS-DRG system, based on severity levels of illness, was established (72 FR 47141).

Currently, cases are classified into MS-DRGs for payment under the IPPS based on the following information reported by the hospital: The principal diagnosis, up to eight additional diagnoses, and up to six procedures performed during the stay. (We refer readers to section II.G.11.c. of this final rule for a discussion of our efforts to increase our internal systems capacity to process diagnosis and procedures on hospital claims to 25 diagnosis codes and 25 procedure codes prior to the use of the International Classification of Diseases, 10th Revision, Clinical Modification (ICD-10-CM) for diagnosis coding and the International Classification of Diseases, 10th Revision, Procedure Coding System (ICD-10 PCS) for inpatient hospital procedure coding, effective October 1, 2013.) In a small number of MS-DRGs, classification is also based on the age, sex, and discharge status of the patient. The diagnosis and procedure information is reported by the hospital using codes from the International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM) prior to October 1, 2013. We refer readers to section II.G.11.b. of this final rule for a reference to the replacement of ICD-9-CM, Volumes 1 and 2, including the Official ICD-9-CM Guidelines for Coding and Reporting, Volume 3, with the ICD-10-CM and ICD-10-PCS, including the Official ICD-10-CM and ICD-10-PCS Guidelines for Coding and Reporting, effective October 1, 2013 (FY 2014).

The process of developing the MS-DRGs was begun by dividing all possible principal diagnoses into mutually exclusive principal diagnosis areas, referred to as Major Diagnostic Categories (MDCs). The MDCs were formulated by physician panels to ensure that the DRGs would be clinically coherent. The diagnoses in each MDC correspond to a single organ system or etiology and, in general, are associated with a particular medical specialty. Thus, in order to maintain the requirement of clinical coherence, no final MS-DRG could contain patients in different MDCs. For example, MDC 6 is Diseases and Disorders of the Digestive System. This approach is used because clinical care is generally organized in

¹ Medicare Payment Advisory Commission: *Report to the Congress, Physician-Owned Specialty Hospitals*, March 2005, page viii.

accordance with the organ system affected. However, some MDCs are not constructed on this basis because they

involve multiple organ systems (for example, MDC 22 (Burns)). For FY 2012, cases will be assigned to one of 751 MS-

DRGs in 25 MDCs. The table below lists the 25 MDCs.

MAJOR DIAGNOSTIC CATEGORIES
[MDCs]

1	Diseases and Disorders of the Nervous System.
2	Diseases and Disorders of the Eye.
3	Diseases and Disorders of the Ear, Nose, Mouth, and Throat.
4	Diseases and Disorders of the Respiratory System.
5	Diseases and Disorders of the Circulatory System.
6	Diseases and Disorders of the Digestive System.
7	Diseases and Disorders of the Hepatobiliary System and Pancreas.
8	Diseases and Disorders of the Musculoskeletal System and Connective Tissue.
9	Diseases and Disorders of the Skin, Subcutaneous Tissue and Breast.
10	Endocrine, Nutritional and Metabolic Diseases and Disorders.
11	Diseases and Disorders of the Kidney and Urinary Tract.
12	Diseases and Disorders of the Male Reproductive System.
13	Diseases and Disorders of the Female Reproductive System.
14	Pregnancy, Childbirth, and the Puerperium.
15	Newborns and Other Neonates with Conditions Originating in the Perinatal Period.
16	Diseases and Disorders of the Blood and Blood Forming Organs and Immunological Disorders.
17	Myeloproliferative Diseases and Disorders and Poorly Differentiated Neoplasms.
18	Infectious and Parasitic Diseases (Systemic or Unspecified Sites).
19	Mental Diseases and Disorders.
20	Alcohol/Drug Use and Alcohol/Drug Induced Organic Mental Disorders.
21	Injuries, Poisonings, and Toxic Effects of Drugs.
22	Burns.
23	Factors Influencing Health Status and Other Contacts with Health Services.
24	Multiple Significant Trauma.
25	Human Immunodeficiency Virus Infections.

In general, cases are assigned to an MDC based on the patient's principal diagnosis before assignment to an MS-DRG. However, under the most recent version of the Medicare GROUPER (Version 28.0), there are 13 MS-DRGs to

which cases are directly assigned on the basis of ICD-9-CM procedure codes. These MS-DRGs are for heart transplant or implant of heart assist systems; liver and/or intestinal transplants; bone marrow transplants; lung transplants;

simultaneous pancreas/kidney transplants; pancreas transplants; and tracheostomies. Cases are assigned to these MS-DRGs before they are classified to an MDC. The table below lists the 13 current pre-MDCs.

PRE-MAJOR DIAGNOSTIC CATEGORIES
[Pre-MDCs]

MS-DRG 001	Heart Transplant or Implant of Heart Assist System with MCC.
MS-DRG 002	Heart Transplant or Implant of Heart Assist System without MCC.
MS-DRG 003	ECMO or Tracheostomy with Mechanical Ventilation 96+ Hours or Principal Diagnosis Except for Face, Mouth, and Neck Diagnosis with Major O.R.
MS-DRG 004	Tracheostomy with Mechanical Ventilation 96+ Hours or Principal Diagnosis Except for Face, Mouth, and Neck Diagnosis with Major O.R.
MS-DRG 005	Liver Transplant with MCC or Intestinal Transplant.
MS-DRG 006	Liver Transplant without MCC.
MS-DRG 007	Lung Transplant.
MS-DRG 008	Simultaneous Pancreas/Kidney Transplant.
MS-DRG 009	Bone Marrow Transplant.
MS-DRG 010	Pancreas Transplant.
MS-DRG 011	Tracheostomy for Face, Mouth, and Neck Diagnoses with MCC.
MS-DRG 012	Tracheostomy for Face, Mouth, and Neck Diagnoses with CC.
MS-DRG 013	Tracheostomy for Face, Mouth, and Neck Diagnoses without CC/MCC.

Once the MDCs were defined, each MDC was evaluated to identify those additional patient characteristics that would have a consistent effect on hospital resource consumption. Because the presence of a surgical procedure that required the use of the operating room would have a significant effect on the type of hospital resources used by a patient, most MDCs were initially

divided into surgical DRGs and medical DRGs. Surgical DRGs are based on a hierarchy that orders operating room (O.R.) procedures or groups of O.R. procedures by resource intensity. Medical DRGs generally are differentiated on the basis of diagnosis and age (0 to 17 years of age or greater than 17 years of age). Some surgical and medical DRGs are further differentiated

based on the presence or absence of a complication or comorbidity (CC) or a major complication or comorbidity (MCC).

Generally, nonsurgical procedures and minor surgical procedures that are not usually performed in an operating room are not treated as O.R. procedures. However, there are a few non-O.R. procedures that do affect MS-DRG

assignment for certain principal diagnoses. An example is extracorporeal shock wave lithotripsy for patients with a principal diagnosis of urinary stones. Lithotripsy procedures are not routinely performed in an operating room. Therefore, lithotripsy codes are not classified as O.R. procedures. However, our clinical advisors believe that patients with urinary stones who undergo extracorporeal shock wave lithotripsy should be considered similar to other patients who undergo O.R. procedures. Therefore, we treat this group of patients similar to patients undergoing O.R. procedures.

Once the medical and surgical classes for an MDC were formed, each diagnosis class was evaluated to determine if complications or comorbidities would consistently affect hospital resource consumption. Each diagnosis was categorized into one of three severity levels. These three levels include a major complication or comorbidity (MCC), a complication or comorbidity (CC), or a non-CC. Physician panels classified each diagnosis code based on a highly iterative process involving a combination of statistical results from test data as well as clinical judgment. As stated earlier, we refer readers to section II.D. of the FY 2008 IPPS final rule with comment period for a full detailed discussion of how the MS-DRG system was established based on severity levels of illness (72 FR 47141).

A patient's diagnosis, procedure, discharge status, and demographic information is entered into the Medicare claims processing systems and subjected to a series of automated screens called the Medicare Code Editor (MCE). The MCE screens are designed to identify cases that require further review before classification into an MS-DRG.

After patient information is screened through the MCE and further development of the claim is conducted, the cases are classified into the appropriate MS-DRG by the Medicare GROUPER software program. The GROUPER program was developed as a means of classifying each case into an MS-DRG on the basis of the diagnosis and procedure codes and, for a limited number of MS-DRGs, demographic information (that is, sex, age, and discharge status).

After cases are screened through the MCE and assigned to an MS-DRG by the GROUPER, the PRICER software calculates a base MS-DRG payment. The PRICER calculates the payment for each case covered by the IPPS based on the MS-DRG relative weight and additional factors associated with each hospital, such as IME and DSH payment adjustments. These additional factors

increase the payment amount to hospitals above the base MS-DRG payment.

The records for all Medicare hospital inpatient discharges are maintained in the Medicare Provider Analysis and Review (MedPAR) file. The data in this file are used to evaluate possible MS-DRG classification changes and to recalibrate the MS-DRG weights. However, in the FY 2000 IPPS final rule (64 FR 41499 and 41500), we discussed a process for considering non-MedPAR data in the recalibration process. We stated that for use of non-MedPAR data to be feasible for purposes of DRG recalibration and reclassification, the data must, among other things: (1) Be independently verified; (2) reflect a complete set of cases (or a representative sample of cases); and (3) enable us to calculate appropriate DRG relative weights and ensure that cases are classified to the "correct" DRG, and to one DRG only, in the recalibration process. Further, in order for us to consider using particular non-MedPAR data, we must have sufficient time to evaluate and test the data. The time necessary to do so depend upon the nature and quality of the non-MedPAR data submitted. Generally, however, a significant sample of the non-MedPAR data should be submitted by mid-October for consideration in conjunction with the next year's proposed rule. This date allows us time to test the data and make a preliminary assessment as to the feasibility of using the data. Subsequently, a complete non-MedPAR database should be submitted by early December for consideration in conjunction with the next year's proposed rule.

As we indicated above, for FY 2008, we made significant improvements in the DRG system to recognize severity of illness and resource usage by adopting MS-DRGs that were reflected in the FY 2008 GROUPER, Version 25.0, and were effective for discharges occurring on or after October 1, 2007. Our MS-DRG analysis for the FY 2012 proposed rule was based on data from the September 2010 update of the FY 2010 MedPAR file, which contained hospital bills received through September 30, 2010, for discharges occurring through September 30, 2010. For this FY 2012 final rule, our MS-DRG analysis is based on data from the March 2011 update of the FY 2010 MedPAR file, which contained hospital bills received through March 31, 2011, for discharges occurring through September 30, 2010.

2. Yearly Review for Making MS-DRG Changes

Many of the changes to the MS-DRG classifications we make annually are the result of specific issues brought to our attention by interested parties. We encourage individuals with comments about MS-DRG classifications to submit these comments no later than early December of each year so they can be carefully considered for possible inclusion in the annual proposed rule and, if included, may be subjected to public review and comment. Therefore, similar to the timetable for interested parties to submit non-MedPAR data for consideration in the MS-DRG recalibration process, comments about MS-DRG classification issues should be submitted no later than early December in order to be considered and possibly included in the next annual proposed rule updating the IPPS.

The actual process of forming the MS-DRGs was, and will likely continue to be, highly iterative, involving a combination of statistical results from test data combined with clinical judgment. In the FY 2008 IPPS final rule (72 FR 47140 through 47189), we described in detail the process we used to develop the MS-DRGs that we adopted for FY 2008. In addition, in deciding whether to make further modification to the MS-DRGs for particular circumstances brought to our attention, we considered whether the resource consumption and clinical characteristics of the patients with a given set of conditions are significantly different than the remaining patients in the MS-DRG. We evaluated patient care costs using average charges and lengths of stay as proxies for costs and relied on the judgment of our medical advisors to decide whether patients are clinically distinct or similar to other patients in the MS-DRG. In evaluating resource costs, we considered both the absolute and percentage differences in average charges between the cases we selected for review and the remainder of cases in the MS-DRG. We also considered variation in charges within these groups; that is, whether observed average differences were consistent across patients or attributable to cases that were extreme in terms of charges or length of stay, or both. Further, we considered the number of patients who will have a given set of characteristics and generally preferred not to create a new MS-DRG unless it would include a substantial number of cases.

C. Adoption of the MS-DRGs in FY 2008

In the FY 2006, FY 2007, and FY 2008 IPPS final rules, we discussed a number

of recommendations made by MedPAC regarding revisions to the DRG system used under the IPPS (70 FR 47473 through 47482; 71 FR 47881 through 47939; and 72 FR 47140 through 47189). As we noted in the FY 2006 IPPS final rule, we had insufficient time to complete a thorough evaluation of these recommendations for full implementation in FY 2006. However, we did adopt severity-weighted cardiac DRGs in FY 2006 to address public comments on this issue and the specific concerns of MedPAC regarding cardiac surgery DRGs. We also indicated that we planned to further consider all of MedPAC's recommendations and thoroughly analyze options and their impacts on the various types of hospitals in the FY 2007 IPPS proposed rule.

For FY 2007, we began this process. In the FY 2007 IPPS proposed rule, we proposed to adopt Consolidated Severity DRGs (CS DRGs) for FY 2008 (if not earlier). Based on public comments received on the FY 2007 IPPS proposed rule, we decided not to adopt the CS DRGs. In the FY 2007 IPPS final rule (71 FR 47906 through 47912), we discussed several concerns raised by public commenters regarding the proposal to adopt CS DRGs. We acknowledged the many public comments suggesting the logic of Medicare's DRG system should continue to remain in the public domain as it has since the inception of the PPS. We also acknowledged concerns about the impact on hospitals and software vendors of moving to a proprietary system. Several commenters suggested that CMS refine the existing DRG classification system to preserve the many policy decisions that were made over the last 20 years and were already incorporated into the DRG system, such as complexity of services and new device technologies. Consistent with the concerns expressed in the public comments, this option had the advantage of using the existing DRGs as a starting point (which was already familiar to the public) and retained the benefit of many DRG decisions that were made in recent years. We stated our belief that the suggested approach of incorporating severity measures into the existing DRG system was a viable option that would be evaluated.

Therefore, we decided to make interim changes to the existing DRGs for FY 2007 by creating 20 new DRGs involving 13 different clinical areas that would significantly improve the CMS DRG system's recognition of severity of illness. We also modified 32 DRGs to better capture differences in severity. The new and revised DRGs were selected from 40 existing CMS DRGs

that contained 1,666,476 cases and represented a number of body systems. In creating these 20 new DRGs, we deleted 8 existing DRGs and modified 32 existing DRGs. We indicated that these interim steps for FY 2007 were being taken as a prelude to more comprehensive changes to better account for severity in the DRG system by FY 2008.

In the FY 2007 IPPS final rule (71 FR 47898), we indicated our intent to pursue further DRG reform through two initiatives. First, we announced that we were in the process of engaging a contractor to assist us with evaluating alternative DRG systems that were raised as potential alternatives to the CMS DRGs in the public comments. Second, we indicated our intent to review over 13,000 ICD-9-CM diagnosis codes as part of making further refinements to the current CMS DRGs to better recognize severity of illness based on the work that CMS (then HCFA) did in the mid-1990's in connection with adopting severity DRGs. We describe below the progress we have made on these two initiatives and our actions for FYs 2008, 2009, 2010, and 2011, and our proposed and final actions for FY 2012 based on our continued analysis of reform of the DRG system. We note that the adoption of the MS-DRGs to better recognize severity of illness has implications for the outlier threshold, the application of the postacute care transfer policy, the measurement of real case-mix versus apparent case-mix, and the IME and DSH payment adjustments. We discuss these implications for FY 2012 in other sections of this preamble and in the Addendum to this final rule.

In the FY 2007 IPPS proposed rule, we discussed MedPAC's recommendations to move to a cost-based HSRV weighting methodology using HSRVs beginning with the FY 2007 IPPS proposed rule for determining the DRG relative weights. Although we proposed to adopt the HSRV weighting methodology for FY 2007, we decided not to adopt the proposed methodology in the final rule after considering the public comments we received on the proposal. Instead, in the FY 2007 IPPS final rule, we adopted a cost-based weighting methodology without the HSRV portion of the proposed methodology. The cost-based weights were adopted over a 3-year transition period in $\frac{1}{3}$ increments between FY 2007 and FY 2009. In addition, in the FY 2007 IPPS final rule, we indicated our intent to further study the HSRV-based methodology as well as other issues brought to our attention related to the cost-based weighting methodology adopted in the FY 2007

final rule. There was significant concern in the public comments that our cost-based weighting methodology does not adequately account for charge compression—the practice of applying a higher percentage charge markup over costs to lower cost items and services and a lower percentage charge markup over costs to higher cost items and services. Further, public commenters expressed concern about potential inconsistencies between how costs and charges are reported on the Medicare cost reports and charges on the Medicare claims. In the FY 2007 IPPS final rule, we used costs and charges from the cost reports to determine departmental level cost-to-charge ratios (CCRs) which we then applied to charges on the Medicare claims to determine the cost-based weights. The commenters were concerned about potential distortions to the cost-based weights that would result from inconsistent reporting between the cost reports and the Medicare claims. After publication of the FY 2007 IPPS final rule, we entered into a contract with RTI International (RTI) to study both charge compression and the extent, if any, to which our methodology for calculating DRG relative weights is affected by inconsistencies between how hospitals report costs and charges on the cost reports and how hospitals report charges on individual claims. Further, as part of its study of alternative DRG systems, the RAND Corporation analyzed the HSRV cost-weighting methodology. We refer readers to section II.E. of the preamble of this final rule for a discussion of the issue of charge compression and the cost-weighting methodology for FY 2012.

We believe that revisions to the DRG system to better recognize severity of illness and changes to the relative weights based on costs rather than charges are improving the accuracy of the payment rates in the IPPS. We agree with MedPAC that these refinements should be pursued. Although we continue to caution that any prospective payment system based on grouping cases will always present some opportunities for providers to specialize in cases they believe have higher margins, we believe that the changes we have adopted and the continuing reforms we are proposing to make in this proposed rule for FY 2012 will improve payment accuracy and reduce financial incentives to create specialty hospitals.

We refer readers to section II.D. of the FY 2008 IPPS final rule with comment period for a full discussion of how the MS-DRG system was established based

on severity levels of illness (72 FR 47141).

D. FY 2012 MS-DRG Documentation and Coding Adjustment, Including the Applicability to the Hospital-Specific Rates and the Puerto Rico-Specific Standardized Amount

1. Background on the Prospective MS-DRG Documentation and Coding Adjustments for FY 2008 and FY 2009 Authorized by Public Law 110-90

As we discussed earlier in this preamble, we adopted the MS-DRG patient classification system for the IPPS, effective October 1, 2007, to better recognize severity of illness in Medicare payment rates for acute care hospitals. The adoption of the MS-DRG system resulted in the expansion of the number of DRGs from 538 in FY 2007 to 745 in FY 2008. (Currently, there are 751 MS-DRGs, which include 4 additional MS-DRGs that we are adopting for FY 2012.) By increasing the number of MS-DRGs and more fully taking into account patient severity of illness in Medicare payment rates for acute care hospitals, MS-DRGs encourage hospitals to improve their documentation and coding of patient diagnoses.

In the FY 2008 IPPS final rule with comment period (72 FR 47175 through 47186), we indicated that the adoption of the MS-DRGs had the potential to lead to increases in aggregate payments without a corresponding increase in actual patient severity of illness due to the incentives for additional documentation and coding. In that final rule with comment period, we exercised our authority under section 1886(d)(3)(A)(vi) of the Act, which authorizes us to maintain budget neutrality by adjusting the national standardized amount, to eliminate the estimated effect of changes in coding or classification that do not reflect real changes in case-mix. Our actuaries estimated that maintaining budget neutrality required an adjustment of -4.8 percent to the national standardized amount. We provided for phasing in this -4.8 percent adjustment over 3 years. Specifically, we established prospective documentation and coding adjustments of -1.2 percent for FY 2008, -1.8 percent for FY 2009, and -1.8 percent for FY 2010.

On September 29, 2007, Congress enacted the TMA [Transitional Medical Assistance], Abstinence Education, and QI [Qualifying Individuals] Programs Extension Act of 2007, Public Law 110-90. Section 7(a) of Public Law 110-90 reduced the documentation and coding adjustment made as a result of the MS-DRG system that we adopted in the FY

2008 IPPS final rule with comment period to -0.6 percent for FY 2008 and -0.9 percent for FY 2009. Section 7(a) of Public Law 110-90 did not adjust the FY 2010 -1.8 percent documentation and coding adjustment promulgated in the FY 2008 IPPS final rule with comment period. To comply with section 7(a) of Public Law 110-90, we promulgated a final rule on November 27, 2007 (72 FR 66886) that modified the IPPS documentation and coding adjustment for FY 2008 to -0.6 percent, and revised the FY 2008 payment rates, factors, and thresholds accordingly. These revisions were effective on October 1, 2007.

For FY 2009, section 7(a) of Public Law 110-90 required a documentation and coding adjustment of -0.9 percent instead of the -1.8 percent adjustment established in the FY 2008 IPPS final rule with comment period. As discussed in the FY 2009 IPPS final rule (73 FR 48447) and required by statute, we applied a documentation and coding adjustment of -0.9 percent to the FY 2009 IPPS national standardized amount. The documentation and coding adjustments established in the FY 2008 IPPS final rule with comment period, as amended by Public Law 110-90, are cumulative. As a result, the -0.9 percent documentation and coding adjustment for FY 2009 was in addition to the -0.6 percent adjustment for FY 2008, yielding a combined effect of -1.5 percent.

2. Prospective Adjustment to the Average Standardized Amounts Required by Section 7(b)(1)(A) of Public Law 110-90

Section 7(b)(1)(A) of Public Law 110-90 requires that, if the Secretary determines that implementation of the MS-DRG system resulted in changes in documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 or FY 2009 that are different than the prospective documentation and coding adjustments applied under section 7(a) of Public Law 110-90, the Secretary shall make an appropriate adjustment under section 1886(d)(3)(A)(vi) of the Act. Section 1886(d)(3)(A)(vi) of the Act authorizes adjustments to the average standardized amounts for subsequent fiscal years in order to eliminate the effect of such coding or classification changes. These adjustments are intended to ensure that future annual aggregate IPPS payments are the same as the payments that otherwise would have been made had the prospective adjustments for documentation and coding applied in FY 2008 and FY 2009

reflected the change that occurred in those years.

3. Recoupment or Repayment Adjustments in FYs 2010 Through 2012 Required by Public Law 110-90

If, based on a retroactive evaluation of claims data, the Secretary determines that implementation of the MS-DRG system resulted in changes in documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 or FY 2009 that are different from the prospective documentation and coding adjustments applied under section 7(a) of Public Law 110-90, section 7(b)(1)(B) of Public Law 110-90 requires the Secretary to make an additional adjustment to the standardized amounts under section 1886(d) of the Act. This adjustment must offset the estimated increase or decrease in aggregate payments for FYs 2008 and 2009 (including interest) resulting from the difference between the estimated actual documentation and coding effect and the documentation and coding adjustment applied under section 7(a) of Public Law 110-90. This adjustment is in addition to making an appropriate adjustment to the standardized amounts under section 1886(d)(3)(A)(vi) of the Act as required by section 7(b)(1)(A) of Public Law 110-90. That is, these adjustments are intended to recoup (or repay, in the case of underpayments) spending in excess of (or less than) spending that would have occurred had the prospective adjustments for changes in documentation and coding applied in FY 2008 and FY 2009 precisely matched the changes that occurred in those years. Public Law 110-90 requires that the Secretary make these recoupment or repayment adjustments for discharges occurring during FYs 2010, 2011, and 2012.

4. Retrospective Evaluation of FY 2008 and FY 2009 Claims Data

In order to implement the requirements of section 7 of Public Law 110-90, we indicated in the FY 2009 IPPS final rule (73 FR 48450) that we planned a thorough retrospective evaluation of our claims data. We stated that the results of this evaluation would be used by our actuaries to determine any necessary payment adjustments to the standardized amounts under section 1886(d) of the Act to ensure the budget neutrality of the MS-DRGs implementation for FY 2008 and FY 2009, as required by law. In the FY 2009 IPPS proposed rule (73 FR 23541 through 23542), we described our preliminary plan for a retrospective analysis of inpatient hospital claims

data and invited public input on our proposed methodology.

In that proposed rule, we indicated that we intended to measure and corroborate the extent of the overall national average changes in case-mix for FY 2008 and FY 2009. We expected that the two largest parts of this overall national average change would be attributable to underlying changes in actual patient severity of illness and to documentation and coding improvements under the MS-DRG system. In order to separate the two effects, we planned to isolate the effect of shifts in cases *among* base DRGs from the effect of shifts in the types of cases *within* base DRGs.

The MS-DRGs divide the base DRGs into three severity levels (with MCC, with CC, and without CC); the previously used CMS DRGs had only two severity levels (with CC and without CC). Under the CMS DRG system, the majority of hospital discharges had a secondary diagnosis which was on the CC list, which led to the higher severity level. The MS-DRGs significantly changed the code lists of what was classified as an MCC or a CC. Many codes that were previously classified as a CC are no longer included on the MS-DRG CC list because the data and clinical review showed these conditions did not lead to a significant increase in resource use. The addition of a new level of high severity conditions, the MCC list, also provided a new incentive to code more precisely in order to increase the severity level. We anticipated that hospitals would examine the MS-DRG MCC and CC code lists and then work with physicians and coders on documentation and coding practices so that coders could appropriately assign codes from the highest possible severity level. We note that there have been numerous seminars and training sessions on this particular coding issue. The topic of improving documentation practices in order to code conditions on the MCC list was also discussed extensively by participants at the March 11–12, 2009 ICD–9–CM Coordination and Maintenance Committee meeting. Participants discussed their hospitals' efforts to encourage physicians to provide more precise documentation so that coders could appropriately assign codes that would lead to a higher severity level. Because we expected most of the documentation and coding changes under the MS-DRG system would occur in the secondary diagnoses, we believed that the shifts among base DRGs were less likely to be the result of the MS-DRG system and the shifts within base DRGs were more

likely to be the result of the MS-DRG system. We also anticipated evaluating data to identify the specific MS-DRGs and diagnoses that contributed significantly to the documentation and coding payment effect and to quantify their impact. This step entailed analysis of the secondary diagnoses driving the shifts in severity within specific base DRGs.

In the FY 2009 IPPS proposed rule, we solicited public comments on the analysis plans described above, as well as suggestions on other possible approaches for performing a retrospective analysis to identify the amount of case-mix changes that occurred in FY 2008 and FY 2009 that did not reflect real increases in patient severity of illness.

A few commenters, including MedPAC, expressed support for the analytic approach described in the FY 2009 IPPS proposed rule. A number of other commenters expressed concerns about certain aspects of the approach and/or suggested alternate analyses or study designs. In addition, one commenter recommended that any determination or retrospective evaluation by the actuaries of the impact of the MS-DRGs on case-mix be open to public scrutiny prior to the implementation of the payment adjustments beginning in FY 2010.

We took these comments into consideration as we developed our proposed analysis plan, and in the FY 2010 IPPS/R Y 2010 LTCH PPS proposed rule (74 FR 24092 through 24101), we solicited public comment on our methodology and analysis. For the FY 2010 IPPS/R Y 2010 LTCH PPS proposed rule, we performed a retrospective evaluation of the FY 2008 data for claims paid through December 2008. Based on this evaluation, our actuaries determined that implementation of the MS-DRG system resulted in a 2.5 percent change due to documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008. In the FY 2010 IPPS/R Y 2010 LTCH PPS final rule, we updated this analysis with FY 2008 data for claims paid through March 2009, and we noted that the estimates for all IPPS remained essentially the same to those in the proposed rule (42 FR 43770, 43775). Also, in the FY 2010 IPPS/R Y 2010 LTCH PPS final rule (74 FR 43768 through 43772), we responded to comments on our methodology for the retrospective evaluation of FY 2008 claims data. We refer readers to that final rule for a detailed description of our analysis and prior responses to comments.

In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50057 through 50068), we performed the same analysis for FY 2009 claims data using the same methodology as we did for FY 2008 claims. We note that, in the FY 2011 IPPS/LTCH PPS proposed rule, we performed this analysis using FY 2009 claims paid through December 2009. In the FY 2011 IPPS/LTCH PPS final rule, we updated the analysis with FY 2009 claims paid through March 2010, as we discussed in the proposed rule. We note that, for all IPPS hospitals, other than those in Puerto Rico, the estimates were unchanged from those in the proposed rule. We refer readers to the FY 2011 IPPS/LTCH PPS final rule (75 FR 50057 through 50068) for a detailed description of our analysis and prior responses to comments. The results of the analysis for the FY 2011 proposed and final rules provided additional support for our conclusion that the proposed 5.4 percent estimate accurately reflected the FY 2009 increases in documentation and coding under the MS-DRG system.

As in prior years, the FY 2008 and FY 2009 MedPAR files are available to the public to allow independent analysis of the FY 2008 and FY 2009 documentation and coding effect. Interested individuals may still order these files through the Web site at: <http://www.cms.hhs.gov/LimitedDataSets/> by clicking on MedPAR Limited Data Set (LDS)-Hospital (National). This Web page describes the file and provides directions and further detailed instructions for how to order.

Persons placing an order must send the following: A Letter of Request, the LDS Data Use Agreement and Research Protocol (refer to the Web site for further instructions), the LDS Form, and a check for \$3,655 to:

Mailing address if using the U.S. Postal Service: Centers for Medicare & Medicaid Services, RDDC Account, Accounting Division, P.O. Box 7520, Baltimore, MD 21207–0520.

Mailing address if using express mail: Centers for Medicare & Medicaid Services, OFM/Division of Accounting—RDDC, 7500 Security Boulevard, C3–07–11, Baltimore, MD 21244–1850.

5. Prospective Adjustment for FY 2010 and Subsequent Years Authorized by Section 7(b)(1)(A) of Public Law 110–90 and Section 1886(d)(3)(vi) of the Act

Based on our evaluation of FY 2008 Medicare claims data that were most current at the time of the FY 2010 IPPS/R Y 2010 LTCH PPS proposed rule, the estimated 2.5 percent change in FY 2008 case-mix due to changes in

documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 exceeded the -0.6 percent prospective documentation and coding adjustment applied under section 7(a) of Public Law 110-90 by 1.9 percentage points. In the FY 2010 IPPS/R Y 2010 LTCH PPS proposed rule (74 FR 24096), we solicited public comment on our proposal to make a -1.9 percent prospective adjustment to the standardized amounts under section 1886(d) of the Act to address the effects of documentation and coding changes unrelated to changes in real case-mix in FY 2008. In the FY 2010 IPPS/R Y 2010 LTCH PPS final rule, in response to public comments, we indicated that we fully understood that our proposed adjustment of -1.9 percent would reduce the increase in payments that affected hospitals would have received in FY 2009 in the absence of the adjustment, and we determined that it would be appropriate to postpone adopting documentation and coding adjustments as authorized under section 7(a) of Public Law 110-90 and section 1886(d)(3)(A)(vi) of the Act until a full analysis of case-mix changes could be completed. We refer readers to the FY 2010 IPPS/LTCH PPS final rule (74 FR 43767 through 43777) for a detailed description of our proposal, responses to comments, and finalized policy.

After analysis of the FY 2009 claims data for the FY 2011 IPPS/LTCH PPS final rule (75 FR 50057 through 50073), we found a total prospective documentation and coding effect of 1.054. After accounting for the -0.6 percent and the -0.9 percent documentation and coding adjustments in FYs 2008 and 2009, we found a remaining documentation and coding effect of 3.9 percent. As we have discussed, an additional cumulative adjustment of -3.9 percent would be necessary to meet the requirements of section 7(b)(1)(A) of Public Law 110-90 to make an adjustment to the average standardized amounts in order to eliminate the full effect of the documentation and coding changes on future payments. Unlike section 7(b)(1)(B) of Public Law 110-90, section 7(b)(1)(A) does not specify when we must apply the prospective adjustment, but merely requires us to make an "appropriate" adjustment. Therefore, as we stated in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50061), we believe we have some discretion as to the manner in which we apply the prospective adjustment of -3.9 percent. We indicated that applying the full prospective adjustment of -3.9 percent

for FY 2011, in combination with the proposed recoupment adjustment of -2.9 percent in FY 2011 (discussed below) would require an aggregate adjustment of -6.8 percent. As we discuss elsewhere in this section II.D., and more extensively in the FY 2011 IPPS/LTCH PPS final rule, it has been our practice to moderate payment adjustments when necessary to mitigate the effects of significant downward adjustments on hospitals, to avoid what could be widespread, disruptive effects of such adjustments on hospitals. As we also discuss below in this section II.D., we are required to implement the remaining adjustment in section 7(b)(1)(B) of Public Law 110-90 no later than the FY 2012 rulemaking period, and accordingly, in the FY 2011 IPPS/LTCH PPS proposed rule, we proposed a recoupment adjustment under section 7(b)(1)(B) of -2.9 percent for FY 2011 (75 FR 23870 and 23871). Therefore, we stated that we believed it was appropriate to not implement any or all of the -3.9 percent prospective adjustment in FY 2011. Accordingly, we did not propose a prospective adjustment under section 7(b)(1)(A) of Public Law 110-90 for FY 2011 (75 FR 23868 through 23870) for FY 2011. We note that, as a result, payments in FY 2011 (and in each future year until we implement the requisite adjustment) would be 3.9 percent higher than they would have been if we had implemented an adjustment under section 7(b)(1)(A) of Public Law 110-90. Our actuaries estimate that this 3.9 percentage point increase will result in an aggregate payment of approximately \$4 billion. We also noted that payments in FY 2010 were also expected to be 3.9 percent higher than they would have been if we had implemented an adjustment under section 7(b)(1)(A) of Public Law 110-90, which our actuaries estimated increased aggregate payments by approximately \$4 billion in FY 2010.

In the FY 2012 IPPS/LTCH PPS proposed rule (76 FR 25803 and 25804), we indicated that because further delay of this prospective adjustment will result in a continued accrual of unrecoverable overpayments, it was imperative that we proposed a prospective adjustment for FY 2012, while recognizing CMS' continued desire to mitigate the effects of any significant downward adjustments to hospitals. Therefore, we proposed a -3.15 percent prospective adjustment to the standardized amount to partially eliminate the full effect of the documentation and coding changes on future payments. Due to the offsetting nature of the remaining recoupment

adjustment under section 7(b)(1)(B) of Public Law 110-90 (described below in section II.D.6. of this preamble), and after considering other payment adjustments to FY 2012 rates proposed elsewhere within the proposed rule, we indicated that we believe the proposed -3.15 percent adjustment would allow for a significant reduction in potential unrecoverable overpayments, yet would maintain a comparable adjustment level between FY 2011 and FY 2012, reflecting the applicable percentage increase with a documentation and coding adjustment. We stated that we recognize that an additional adjustment of -0.75 (3.9 minus 3.15) percent would be required in future rule making to complete the necessary -3.9 adjustment to meet CMS' statutory requirement under section 7(b)(1)(A) of Public Law 110-90. In the proposed rule, we indicated that we were not at that time proposing a timeline to implement the remainder of this prospective adjustment.

6. Recoupment or Repayment Adjustment for FY 2010 Authorized by Section 7(b)(1)(B) of Public Law 110-90

As discussed in section II.D.1. of this preamble, section 7(b)(1)(B) of Public Law 110-90 requires the Secretary to make an adjustment to the standardized amounts under section 1886(d) of the Act to offset the estimated increase or decrease in aggregate payments for FY 2008 and FY 2009 (including interest) resulting from the difference between the estimated actual documentation and coding effect and the documentation and coding adjustments applied under section 7(a) of Public Law 110-90. This determination must be based on a retrospective evaluation of claims data.

In the FY 2010 IPPS/R Y 2010 LTCH PPS final rule with comment period (74 FR 43773), we estimated a 2.5 percent change due to documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008, exceeding the -0.6 percent prospective documentation and coding adjustment applied under section 7(a) of Public Law 110-90 by 1.9 percentage points. We stated that our actuaries had estimated that this 1.9 percentage point increase resulted in an increase in aggregate payments of approximately \$2.2 billion in FY 2008. We did not propose to make an adjustment to the FY 2010 average standardized amounts to offset, in whole or in part, the estimated increase in aggregate payments for discharges occurring in FY 2008, but stated in the proposed rule that we intended to address this issue in future rulemaking. In the FY 2010 IPPS/R Y 2010 LTCH PPS

final rule (74 FR 43774), we stated that because we would not receive all FY 2009 claims data prior to publication of the final rule, we would address any increase or decrease in FY 2009 payments in future rulemaking for FY 2011 and 2012 after we performed a retrospective evaluation of the FY 2009 claims data. In response to public comments in FY 2010, we indicated that we recognized that any adjustment to account for the documentation and coding effect observed in the FY 2008 and FY 2009 claims data may result in significant future payment reductions for providers. However, we indicated that we are required under section 7(b)(1)(B) of Public Law 110–90 to recover the difference of actual documentation and coding effect in FY 2008 and FY 2009 that is greater than the prior adjustments. We agreed with the commenters who requested that CMS delay any adjustment and, for the reasons stated above, indicated that we expected to address this issue in the FY 2011 rulemaking. We refer readers to the FY 2010 IPPS/R Y 2010 LTCH PPS final rule (74 FR 43767 through 43777) for a detailed description of our proposal, responses to comments, and finalized policy.

As we indicated in the FY 2011 IPPS/LTCH PPS final rule, the change due to documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 and FY 2009 exceeded the –0.6 and –0.9 percent prospective documentation and coding adjustments applied under section 7(a) of Public Law 110–90 for those 2 years, respectively, by 1.9 percentage points in FY 2008 and 3.9 percentage points in FY 2009. In total, this change exceeded the cumulative prospective adjustments by 5.8 (1.9 plus 3.9) percentage points. Our actuaries estimated that this 5.8 percentage point increase resulted in an increase in aggregate payments of approximately \$6.9 billion. In the FY 2011 IPPS/LTCH PPS final rule, we noted that there may be a need to actuarially adjust the recoupment adjustment to accurately reflect accumulated interest. Therefore, we determined that an aggregate adjustment of –5.8 percent in FYs 2011 and 2012, subject to actuarial adjustment to reflect accumulated interest, would be necessary in order to meet the requirements of section 7(b)(1)(B) of Public Law 110–90 to adjust the standardized amounts for discharges occurring in FYs 2010, 2011, and/or 2012 to offset the estimated amount of the increase in aggregate payments (including interest) in FYs 2008 and

2009. In the FY 2011 IPPS/LTCH PPS proposed rule (75 FR 23871), we stated that we intended to take into account the need to reflect accumulated interest in proposing a recoupment adjustment under section 7(b)(1)(B) of Public Law 110–90 for FY 2012.

It is often our practice to phase in rate adjustments over more than one year in order to moderate the effect on rates in any one year. Therefore, consistent with the policies that we have adopted in many similar cases, in the FY 2011 IPPS/LTCH PPS proposed rule, we proposed to make an adjustment to the standardized amount of –2.9 percent, representing approximately half of the aggregate adjustment required under section 7(b)(1)(B) of Public Law 110–90, for FY 2011. An adjustment of this magnitude would allow us to moderate the effects on hospitals in one year while simultaneously making it possible to implement the entire adjustment within the timeframe required under section 7(b)(1)(B) of Public Law 110–90 (that is, no later than FY 2012).

Unlike the permanent prospective adjustment to the standardized amounts under section 7(b)(1)(A) of Public Law 110–90 described earlier, the recoupment adjustment to the standardized amounts under section 7(b)(1)(B) of Public Law 110–90 is not cumulative, and, therefore, would be removed for subsequent fiscal years once we have completely offset the increase in aggregate payments for discharges for FY 2008 and FY 2009 expenditures. In keeping with our practice of moderating payment adjustments when necessary, we stated that we anticipated that the proposal of phasing in the recoupment adjustment will have an additional, and significant, moderating effect on implementing the requirements of section 7(b)(1)(B) of Public Law 110–90 for FY 2012.

In the FY 2011 IPPS/LTCH PPS proposed rule, we sought public comment on our proposal to offset part of the total 5.8 percent increase in aggregate payments (including interest) for discharges occurring in FY 2008 and FY 2009 resulting from the adoption of the MS–DRGs in FY 2011, noting that this proposal would result in a –2.9 percent adjustment to the standardized amount. We received numerous comments on our proposal, especially from national and regional hospital associations, hospital systems, and individual hospitals. MedPAC also commented on our proposal. We refer readers to the FY 2011 IPPS/LTCH PPS final rule with comment period (75 FR 50055 through 50073) for a detailed description of our analysis and prior

responses to comments, and finalized policy.

In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50062 through 50068), we finalized the proposed adjustment to the standardized amount of –2.9 percent, which represented approximately half of the aggregate recoupment adjustment required under section 7(b)(1)(B) of Public Law 110–90, for FY 2011. We were persuaded by both the MedPAC's analysis, and our own review of the methodologies recommended by various commenters, that the methodology we employed to determine the required recoupment adjustment was sound. Since the statute required that we implement the entire recoupment adjustment no later than FY 2012, we have sought, as we commonly do, to moderate the potential impact on hospitals by phasing in the required adjustment over more than one year. As we stated in prior rulemaking, a major advantage of making the –2.9 percent adjustment to the standardized amount in FY 2011 was that, because the required recoupment adjustment is not cumulative, we anticipated removing the FY 2011 –2.9 percent adjustment from the rates (in other words, making a positive 2.9 percent adjustment to the rates) in FY 2012, at the same time that the law required us to apply the remaining approximately –2.9 percent adjustment required by section 7(b)(1)(B) of Public Law 110–90. These two steps in FY 2012, restoring the FY 2011 –2.9 percent adjustment and then applying the remaining adjustment of approximately –2.9 percent, would effectively cancel each other out. The result of these two steps would be an aggregate adjustment of approximately 0.0 percent. While we stated in the FY 2011 IPPS/LTCH PPS final rule the need to potentially adjust the remaining –2.9 percent estimate to account for accumulated interest, our actuaries have determined that there has been no significant interest accumulation and that no additional adjustment will be required. Therefore, for FY 2012, pursuant to the timeframes set forth by section 7(b)(1)(B) of Public Law 110–90, and consistent with the discussion in the FY 2011 IPPS/LTCH PPS final rule, we proposed to complete the recoupment adjustment by implementing the remaining –2.9 percent adjustment, in addition to removing the effect of the –2.9 percent adjustment to the standardized amount finalized for FY 2011. Because these adjustments will, in effect, balance out, there will be no year-to-year change in the standardized amount due to this recoupment adjustment. As this

adjustment will complete the required recoupment for overpayments due to documentation and coding effects on discharges occurring in FYs 2008 and 2009, we anticipate removing the effect of this adjustment by adding 2.9 percent to the standardized amount in FY 2013. We continue to believe that this is a reasonable and fair approach that satisfies the requirements of the statute while substantially moderating the financial impact on hospitals.

Comment: One commenter, MedPAC, reiterated its general support for the methodology used by our actuaries to estimate the magnitude of documentation and coding effect on IPPS payments due to the adoption of the MS-DRG system. In its letter, MedPAC explained that the methodology used by our actuaries “is akin to comparing two sets of payments: What payments actually were in fiscal year 2009 under the 2009 MS-DRGs and relative weights; and what payments would have been in 2009 if MS-DRGs had not been adopted and CMS had continued to use the prior (2007) CMS DRGs and weights.” MedPAC noted that by taking the difference between these two sets of payments, the methodology is designed to capture “the new GROUPER’s interaction with how hospitals changed their documentation and coding. After the adoption of MS-DRGs in 2008, hospitals switched from recording general descriptions of patients’ chronic conditions—which no longer affect payments under MS-DRGs—to recording the specific acute manifestations of patients’ chronic conditions, which trigger higher payments under MS-DRGs. However, the same changes in diagnosis documentation and coding have little or no effect on the CMI measured using the 2007 CMS-DRGs and weights. This is because in that version of the GROUPER, both acute manifestations of chronic conditions and general descriptions of chronic conditions trigger higher payments. In contrast, when hospitals had little incentive to change documentation and coding—in 2007, for example—the two CMIs are approximately equal.”

Consistent with its comments in prior years, MedPAC’s comment noted that its analysis of Medicare hospital inpatient claims for 2007–2009 yielded similar estimates of the documentation and coding effect. MedPAC concluded that “CMS would need to reduce IPPS payments temporarily by 5.8 percent to recover overpayments that occurred in 2008 and 2009. CMS also expected that overpayments equal to 3.9 percent of annual IPPS payments would continue through 2010, 2011, and future years

until CMS makes a prospective offsetting adjustment (–3.9 percent) to the IPPS payments rates.”

MedPAC’s comment described potential circumstances in which the methodology used both by our actuaries and MedPAC could overestimate the documentation and coding effect, noting that these possible circumstances “could cause only a small change in the estimated effect of documentation changes.”

MedPAC stated, “In response to the new MS-DRGs, hospitals had an incentive to report diagnoses that count as CCs in the new system. MedPAC’s argument is that hospitals may also have stopped reporting diagnoses that counted as CCs in the old system, but do not count in the new one.” In short, MedPAC argued that the disappearance of the general chronic condition codes could have caused the CMIs based on the old FY 2007 GROUPER and weights to be understated in FYs 2008 and 2009. Thus, because CMIs based on the 2007 GROUPER and weights are the denominators of the documentation change estimates, understatement would bias the estimates upward. However, understatement would occur only to the extent that hospitals, when coding: (1) Did not replace such general chronic condition codes with corresponding acute manifestation codes and (2) the patient had no other secondary diagnosis code that qualified as a CC in the old GROUPER and are now CCs or MCCs under the MS-DRGs.

MedPAC’s analysis concluded that the maximum possible effect of this potential overestimation is 0.36 percent, and “that total overpayments due to documentation changes in 2008 and 2009 may have ranged from 5.1 to 5.8 percent of IPPS payments (\$6.0 to \$6.9 billion).”

MedPAC recommended that CMS slow the pace of the payment adjustments so that hospitals would receive a net 1 percent update in FY 2012, as it recommend in its March 2011 Report to Congress. Furthermore, MedPAC stated that legislation should be enacted to require the Secretary of Health and Human Services to adjust payments further to recover all overpayments that have occurred or will occur in FYs 2010, 2011, and 2012 because the prospective adjustment was not completed. MedPAC asserted that:

“To allow payments to increase due to documentation and coding changes would undermine Congressional policy on updates. If Congress wants more money to flow into the hospital sector, a higher update is the appropriate mechanism, not cumulative changes in documentation and coding. Indeed,

allowing those changes to increase hospital payments through the back door could eventually discourage needed refinements to the case-mix system in a tight budget era. In other words, if more money inevitably leaks into the system every time case-mix is refined, then there may be pressure to stop refining. That would lead to inequities for both providers and patients.”

Response: We appreciate MedPAC’s analysis and continued support of the methodology used to determine the documentation and coding effect, and we agree that this methodology appropriately isolates the documentation and coding effect from real case-mix. With the exception of the possible overstatement described above, we note that MedPAC’s analysis yielded results similar to CMS’ determination of the documentation and coding effect. Based on our evaluation of FY 2008 and FY 2009 claims, we continue to believe that \$6.9 billion dollars in overpayments were made during the period of FY 2008 and 2009. We estimate that a recoupment adjustment totaling 5.8 percent is necessary to recover these overpayments, and that operating IPPS rates are currently overstated by 3.9 percent. We also note that section 7(b)(1)(B) of the TMA requires the agency to recover these overpayments by FY 2012 and that section 7(b)(1)(A) of the TMA requires the agency to adjust rates to ensure that aggregate payments do not continue to be overstated.

With regard to MedPAC’s analysis regarding the possible overestimate of the documentation and coding effect, we note that MedPAC characterized the potential effect as “small” and provided no corroborating analysis or specific examples of when this scenario may have occurred. We consulted with our medical coding experts and were unable to identify specific examples to support MedPAC’s hypothesis. We note that MedPAC stated in its comment letter that the potential for overestimation exists only to the extent that “hospitals (1) did not replace such general chronic condition codes with corresponding acute manifestation codes and (2) the patient had no other secondary diagnosis code that qualified as a CC in the old grouper.” We reviewed coding changes that occurred during the transition to MS-DRGs and were able to identify codes that would result in a CC prior to MS-DRGs but would not result in a CC in the MS-DRG system. However, we were unable to identify an instance where this would necessarily result in a lower MS-DRG assignment because more specific codes were

developed to support the more refined MS-DRG system and we would expect hospitals to use the more specific codes. For instance, congestive heart failure was a CC under CMS DRGs, but is not a CC under MS-DRGs. Under MS-DRGs, we started requiring more specific information on the type of heart failure in order to count this as a CC or MCC. Generally, under the MS-DRG system, the “unspecified” codes in a category no longer result in CCs.

We did not receive any other public comments regarding MedPAC’s statements that we may have overestimated the effect of the documentation and coding by considering cases grouped under the MS-DRG system as having a higher severity due to being coded without appropriate CCs under the pre-MS-DRG system.

At this time, we believe it would not be appropriate to revise our estimates based solely on MedPAC’s analysis without knowing of any specific examples of the scenario described above. Without this information, we cannot determine whether there was a sufficient volume of cases to cause a potential documentation and coding overestimate. However, we welcome specific examples from the public to possibly inform future rulemaking.

We acknowledge MedPAC’s recommendation to provide hospitals with a net 1 percent update. As noted above, the comment restates MedPAC’s recommendation from its March 2011 Report to Congress. We address this issue below in our response to comments by the provider community that expressed concern regarding the impact of various payment adjustments on hospitals.

We also acknowledge MedPAC’s request that additional statutory authority be granted to the Secretary of Health and Human Services to recover overpayments made during subsequent fiscal years.

Lastly, we agree with MedPAC that it is important to continue refining the methodology of how case mix is measured to ensure payment accuracy. We note that in this final rule we discuss potential refinements to the MS-DRG relative weight system, and CMS’ active engagement in implementing the ICD-10 system. These discussions illustrate the efforts the agency is undertaking to improve the ability to measure case mix precisely and to pay hospitals for inpatient services more accurately.

Comment: Most commenters, including national hospital associations, continued to acknowledge that there were documentation and coding

increases in FY 2008 and FY 2009 that were in excess of the statutory 0.6 percent and 0.9 percent adjustments specified in section 7(a) of the TMA. However, as in prior rulemakings on this issue, most commenters again questioned the methodology employed by MedPAC and our actuaries to determine the magnitude of the excess.

We also received Congressional correspondence from numerous members of Congress stating that hospitals had expressed concerns regarding the CMS Actuary’s methodology and requesting that CMS ensure that its methodology accurately reflects changes in patient severity prior to finalizing adjustments for documentation and coding in response to hospitals’ concerns. Specifically, the correspondence suggested that CMS could consider alternative methodologies for estimating the effect of documentation and coding, including trend-based analysis and chart abstraction.

Several commenters stated that historical case mix trend is inconsistent with our estimate of the effect of the FY 2008 and FY 2009 documentation and coding changes due to the implementation of the MS-DRGs. One commenter stated “Our analysis, which used multiple years of patient claims, clearly shows that a significant portion of the change CMS found is actually the continuation of historical trends, rather than the effect of documentation and coding changes due to implementation of MS-DRGs. This analysis found a cumulative documentation and coding effect of 3.6 percent for FYs 2008 and 2009, as opposed to the 5.4 percent that CMS found.”

Several commenters submitted a historical case-mix trend analysis last year, which showed a documentation and coding effect of 2.3 percent. An analysis submitted by the same commenters this year showed a cumulative documentation and coding increase through FY 2009 of 3.6 percent. The commenters revised their analysis to respond to CMS comments made in last year’s rule. Specifically, the national hospital associations stated that, “This year we make several modifications to that trend-based analysis to respond to CMS’ critiques as enumerated in the FY 2011 inpatient PPS final rule. Given that we have addressed the agency’s concerns, we are hopeful that it will give our methodology fresh consideration.” One hospital association also pointed out that CMS included an assumption regarding real case-mix growth in the adjustment for “changes in case-mix” in the capital update framework at

§ 412.308(c)(1)(ii) and suggested that the estimate made by our actuaries regarding documentation and coding be reduced by this assumption in order to maintain consistency with the capital update framework.

Commenters also examined the methodology used by our actuaries and MedPAC using index number theory. As stated by these commenters, “the relative case weights in a given grouper are like relative prices in a price index calculation (in fact they are relative prices for the different MS-DRGs) and the quantities of discharges in various MS-DRGs are like the quantities of goods in the price index calculation.” Commenters claimed that, based on index number theory, the methodology employed by MedPAC and our actuaries can only provide upper and lower bounds of the combined effect of documentation and coding and real case-mix change. MedPAC, however, indicated that knowledge of the 2007 MS-DRG GROUPEL, the new MS-DRG GROUPEL, historical documentation of patients’ diagnoses, and the changes CMS made when it created the MS-DRGs can be used to narrow the range of the potential documentation and coding effect as described above, although they noted that these “could cause only a small change in the estimated effect of documentation changes.”

As in past years, several commenters indicated that CMS should use medical records data to distinguish documentation and coding changes from real case-mix changes. MedPAC disagreed with the commenters’ rationale that the use of medical records data could determine the effect of both documentation and coding, and stated the following: “Gold-standard coders, however, only see the diagnoses written in the record and therefore are not able to distinguish changes in documentation from real changes in patients’ diagnoses. This method of recoding existing documentation only works in situations where hospitals have no incentive to change documentation. That is clearly not the case with the transition to MS-DRGs.”

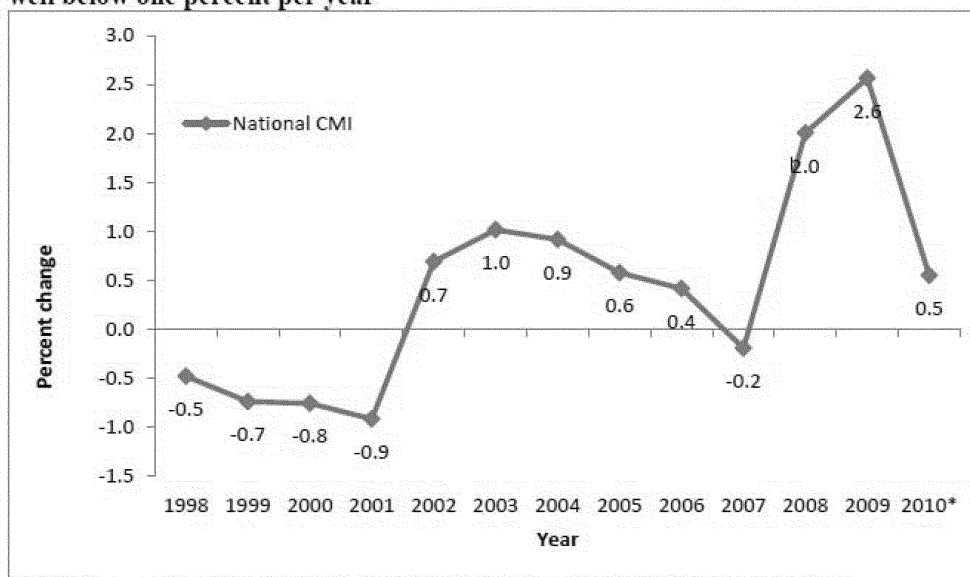

Response: We disagree that the new analysis presented by the national hospital associations has addressed our concerns with the use of a trend analysis to determine the documentation and coding increase when a more direct measurement of the relevant increase can be obtained using our proposed methodology. In last year’s rule, we expressed several concerns with regard to the use of a trend analysis, stating, “We believe that the determination of an appropriate

historical trend is less straightforward than our methodology, which, as described above, simply removes real case-mix growth from the calculation” (75 FR 50066). While we pointed out certain analytical flaws in the trend analysis used last year (for a full discussion, we refer readers to the FY 2011 IPPS/LTCH PPS final rule (75 FR

50065 through 50066)), we did not state the correction of those flaws would yield a better documentation and coding estimate than the direct estimate obtained under our proposed methodology. In fact, we noted that “changes in case-mix do not necessarily follow a consistent pattern over time.” MedPAC provided analysis in its

comment letter which supported CMS’ position. MedPAC’s analysis demonstrated that CMI growth was modest at best, never exceeding plus or minus 1 percent the decade prior to the introduction of MS-DRGs, and in some years was negative.

Figure 1: Before implementation of MS-DRGs, the change in reported case mix was usually well below one percent per year

Note: * indicates preliminary data from the proposed rule MedPAR file for fiscal year 2010.

Source: MedPAC analysis of IPPS hospital inpatient claims in the final rule MedPAR files for fiscal years 1997-2009 and the proposed rule MedPAR file for fiscal year 2010, from CMS. CMIs are based on the DRG grouper, relative weights, and transfer policies in effect for each fiscal year. Claims for hospitals designated as critical access hospitals as of 12/31/2010 were excluded from the CMIs for all years.

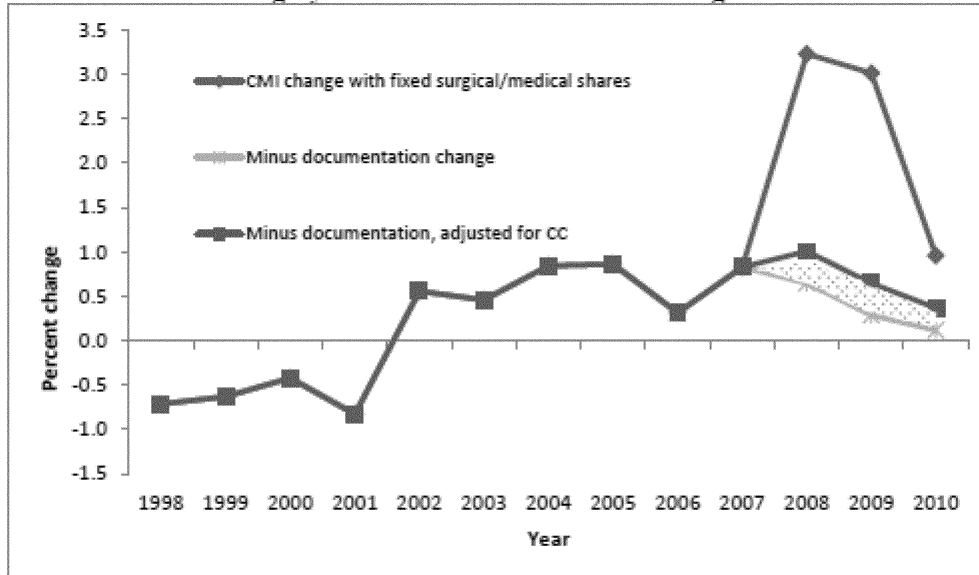

The national hospital associations’ most significant response to our critique of their previous analysis in the FY 2011 IPPS/LTCH PPS final rule was to expand the time period upon which its trend analysis is based to include years where there were sustained negative changes in actual CMI. This raised their estimate of documentation and coding from 2.3 percent to 3.6 percent. We believe that this increase demonstrates the variability in the estimates that can be obtained using trend analyses. We also stated in last year’s final rule that “despite our position that our methodology more directly measures the relevant increase, we did examine

the alternative approach favored by commenters for calculating the documentation and classification increase. As a general statement, the approach of examining historical trends to estimate what case-mix would have been in the absence of the adoption of the MS-DRGs should not necessarily yield significantly different results from the analysis done by our actuaries and the MedPAC, if an appropriate historical trend can be determined.”

We reiterate our concerns with the use of historical trends to determine documentation and coding this year, and we do not believe that the modifications to the commenters’

analysis address all of these concerns. In particular, we agree with MedPAC that “absent changes in documentation and coding and the shift away from inpatient surgeries, real changes in the CMI in 2008 through 2010 would be completely consistent with historical CMI changes since 2001.” In performing its analysis, MedPAC adjusted for changes in the share of cases with surgery, share of cases with CCs, and the estimated effects of changes in documentation and coding. MedPAC summarized the results of its analysis in the following graph.

Figure 2: Annual changes in the CMI look quite ordinary after we adjust for changes in the share of cases with surgery and the estimated effects of changes in documentation and coding

Source: MedPAC analysis of IPPS hospital inpatient claims in the final rule MedPAR files for fiscal years 1997-2009 and the proposed rule MedPAR file for fiscal year 2010, from CMS. CMIs are based on the DRG grouper, relative weights, and transfer policies in effect for each fiscal year. Trends are based on CMIs calculated with fixed medical/surgical shares of 70.5 and 29.5 percent (the averages for the whole period). Percent changes for the other two series reflect the documentation change and CC adjustments described earlier for each year 2008-2010.

In summary, with respect to trend analysis, we continue to believe that the determination of an appropriate historical trend is less straightforward than our proposed methodology, which simply removes real case-mix growth from the calculation. In addition, the estimates obtained using our proposed methodology are consistent with the historical case-mix growth, as demonstrated by MedPAC.

We also disagree with commenters who stated that the methodology employed by MedPAC and our actuaries can only provide upper and lower bounds of the combined effect of documentation and coding and real case-mix change and cannot separate documentation and coding effects from real case-mix change. While MedPAC recognized that the potential for a range of estimates may exist, MedPAC disagreed with the conclusion that index number theory, as described above, should be used to determine this range. MedPAC stated that “in this instance at least, the estimated range between the lower and upper bounds based on this approach is so wide that the estimates are useless for policy making.” We agree with MedPAC that the wide range resulting from an index number theory approach renders such an approach useless in this context.

In response to commenters’ support for using hospital records to distinguish documentation and coding effect from real case-mix changes, we agree with

MedPAC’s rationale that such an analysis would fail to capture changes in documentation. MedPAC stated: “In our view, this approach does not work. The reason is that hospitals had an incentive to persuade attending physicians to be more specific in describing patients’ acute manifestations of chronic conditions in their medical records. Some hospitals hired documentation specialists with the goal of changing physicians’ medical record documentation, not simply to do a better job of coding what they wrote in the record (Hahey 2008). Gold-standard coders, however, only see the diagnoses written in the record and therefore are not able to distinguish changes in documentation from real changes in patients’ diagnoses. This method of recoding existing documentation only works in situations where hospitals have no incentive to change documentation. That is clearly not the case with the transition to MS-DRGs. Thus, a very important part of the effect of changes in documentation and coding cannot be detected by the proposed method.”

We also note that as one part of our initial documentation and coding analysis, we attempted to examine coding changes based on hospital chart data from the Medicare Clinical Data Abstraction Center (CDAC). However, as we described in the FY 2010 IPPS/LTCH PPS final rule, it was not possible to perform this analysis due to aberrant

CDAC data. We stated, “While we attempted to use the CDAC data to distinguish real increase in case-mix growth from documentation and coding in the overall case-mix number, we found aberrant data and significant variation across the FY 1999–FY 2007 analysis period. It was not possible to distinguish changes in documentation and coding from changes in real case-mix in the CDAC data. Therefore, we concluded that the CDAC data would not support analysis of real case-mix growth that could be used in our retrospective evaluation of the FY 2008 claims data.” (74 FR 43769)

Finally, we disagree with the commenters’ suggestion that the assumptions in the capital update framework should be applied in our actuaries’ estimate of documentation and coding, because the capital update framework is intended for projection purposes and would be inappropriate to use as a proxy for historical trends.

After careful consideration of all of the public comments we received, including alternatives suggested by commenters, we remain confident in the accuracy of our methodology and its appropriateness in determining the required adjustment amounts.

Comment: Numerous commenters expressed concern regarding the potentially severe negative fiscal impact that would be experienced by providers if the proposed documentation and coding improvement adjustment were to

be implemented. As noted above, MedPAC recommended that CMS reduce its proposed – 3.15 percent adjustment to be consistent with a net update factor of +1.0 percent, as it recommended in its March 2011 Report to Congress.

As noted previously, we also received Congressional correspondence from numerous members of Congress that requested CMS to reconsider what would be an appropriate adjustment to hospital payments and also requested that CMS reexamine its methodology. This correspondence noted that hospitals would experience payment reductions if the proposed rule were finalized without modification and further stated that hospitals needed “adequate Medicare reimbursement to ensure that patients and communities receive the care they need.”

Response: We recognize the concerns regarding possible financial disruption that may be caused by the proposed documentation and coding improvement payment adjustment. We note, however, that these payment adjustments are necessary to correct past overpayments due solely to documentation and coding improvements. We have already delayed implementation of the required prospective adjustment amount, and we proposed only a portion of the remaining required adjustment to allow hospitals time to adjust to future payment differences and to moderate the effect of this adjustment in any given year. We are required under section 7(b)(1)(B) of the TMA to

complete the remaining one-time – 2.9 percent recoupment adjustment for FY 2008 and FY 2009 overpayments in FY 2012, and we believe the impact of completing this adjustment to be reasonable considering it will be completely offset by removing the FY 2011 recoupment adjustment by placing a +2.9 percent adjustment back to the standardized amount. In FY 2013, a positive +2.9 percent adjustment will be made, completing the recoupment process.

In the proposed rule, we stated it was imperative that CMS make a significant prospective adjustment amount in FY 2012 to prevent the accumulation of unrecoverable overpayments. As stated in previous responses to comments, we remain confident in the accuracy of the overall methodology and its appropriateness in determining the required adjustment amount. However, after consideration of the public comments, and in keeping with our longstanding policy to mitigate, when possible, the effects of significant downward adjustments on hospitals, we are finalizing a prospective adjustment of – 2.0 percent, which is a reduction from our proposed adjustment of – 3.15 percent. We note that this adjustment will result in a total update of +1.0 percent, in accordance with MedPAC’s recommendation in its March 2011 Report to Congress for hospitals that report quality data consistent with the requirements of the Hospital IQR Program. Specifically, as discussed elsewhere in this final rule, the applicable percentage increase for FY

2012 is +1.9 percent (based on a market basket of +3.0 percent, a multifactor productivity adjustment of – 1.0 percentage point, and a statutory adjustment of – 0.1 percentage point in accordance with section 3401 of the Affordable Care Act). When combined with the +1.1 adjustment in light of *Cape Cod v. Sebelius*, 630 F.3d 203 (D.C. Cir. 2011) discussed elsewhere in this final rule, the applicable percentage increase of +1.9 percent and this proposed prospective adjustment of – 2.0 percent results in a net total update of +1.0 percent, prior to additional adjustments for budget neutrality and other policy adjustments. We believe that this level of adjustment will help to minimize year to year volatility in payment rates due to the required documentation and coding adjustment. As we stated in the proposed rule, our analysis found that a prospective adjustment of – 3.9 percent continues to be necessary. Because we are making a – 2.0 percent prospective adjustment for FY 2012, a remaining prospective of adjustment of – 1.9 percent will be necessary. While we are not at this time stating when we will make the remaining required – 1.9 percent prospective adjustment, we consider it feasible to make all or most of the adjustment in FY 2013, when a +2.9 percent adjustment will be factored into rates to offset the one-time FY 2012 recoupment adjustment.

The table below summarizes the adjustments for FY 2012 for documentation and coding for IPPS hospitals.

FY 2012 MS-DRG DOCUMENTATION AND CODING ADJUSTMENT

	Required prospective adjustment for FYs 2008–2009	Remaining required recoupment adjustment for FYs 2008–2009	Total remaining adjustment	Prospective adjustment for FY 2012	Recoupment adjustment to FY 2012 payments	Remaining prospective adjustment
Level of Adjustments	– 3.9%	– 2.9%	– 6.8%	– 2.0%	– 2.9%	– 1.9%

7. Background on the Application of the Documentation and Coding Adjustment to the Hospital-Specific Rates

Under section 1886(d)(5)(D)(i) of the Act, SCHs are paid based on whichever of the following rates yields the greatest aggregate payment: The Federal rate; the updated hospital-specific rate based on FY 1982 costs per discharge; the updated hospital-specific rate based on FY 1987 costs per discharge; the updated hospital-specific rate based on FY 1996 costs per discharge; or the updated hospital-specific rate based on FY 2006 costs per discharge. Under

section 1886(d)(5)(G) of the Act, MDHs are paid based on the Federal national rate or, if higher, the Federal national rate plus 75 percent of the difference between the Federal national rate and the updated hospital-specific rate based on the greatest of the FY 1982, FY 1987, or FY 2002 costs per discharge. In the FY 2008 IPPS final rule with comment period (72 FR 47152 through 47188), we established a policy of applying the documentation and coding adjustment to the hospital-specific rates. In that final rule with comment period, we indicated that because SCHs and MDHs

use the same DRG system as all other hospitals, we believe they should be equally subject to the budget neutrality adjustment that we are applying for adoption of the MS-DRGs to all other hospitals. In establishing this policy, we relied on section 1886(d)(3)(A)(vi) of the Act, which provides us with the authority to adjust “the standardized amount” to eliminate the effect of changes in coding or classification that do not reflect real change in case-mix.

However, in the final rule that appeared in the **Federal Register** on November 27, 2007 (72 FR 66886), we

rescinded the application of the documentation and coding adjustment to the hospital-specific rates retroactive to October 1, 2007. In that final rule, we indicated that, while we still believe it would be appropriate to apply the documentation and coding adjustment to the hospital-specific rates, upon further review, we decided that the application of the documentation and coding adjustment to the hospital-specific rates is not consistent with the plain meaning of section 1886(d)(3)(A)(vi) of the Act, which only mentions adjusting “the standardized amount” under section 1886(d) of the Act and does not mention adjusting the hospital-specific rates.

In the FY 2009 IPPS proposed rule (73 FR 23540), we indicated that we continued to have concerns about this issue. Because hospitals paid based on the hospital-specific rate use the same MS-DRG system as other hospitals, we believe they have the potential to realize increased payments from documentation and coding changes that do not reflect real increases in patient severity of illness. In section 1886(d)(3)(A)(vi) of the Act, Congress stipulated that hospitals paid based on the standardized amount should not receive additional payments based on the effect of documentation and coding changes that do not reflect real changes in case-mix. Similarly, we believe that hospitals paid based on the hospital-specific rates should not have the potential to realize increased payments due to documentation and coding changes that do not reflect real increases in patient severity of illness. While we continue to believe that section 1886(d)(3)(A)(vi) of the Act does not provide explicit authority for application of the documentation and coding adjustment to the hospital-specific rates, we believe that we have the authority to apply the documentation and coding adjustment to the hospital-specific rates using our special exceptions and adjustment authority under section 1886(d)(5)(I)(i) of the Act. The special exceptions and adjustment provision authorizes us to provide “for such other exceptions and adjustments to [IPPS] payment amounts * * * as the Secretary deems appropriate.” In the FY 2009 IPPS final rule (73 FR 48448 through 48449), we indicated that, for the FY 2010 rulemaking, we planned to examine our FY 2008 claims data for hospitals paid based on the hospital-specific rate. We further indicated that if we found evidence of significant increases in case-mix for patients treated in these hospitals that do not reflect real changes

in case-mix, we would consider proposing application of the documentation and coding adjustments to the FY 2010 hospital-specific rates under our authority in section 1886(d)(5)(I)(i) of the Act.

In response to public comments received on the FY 2009 IPPS proposed rule, we stated in the FY 2009 IPPS final rule that we would consider whether such a proposal was warranted for FY 2010. To gather information to evaluate these considerations, we indicated that we planned to perform analyses on FY 2008 claims data to examine whether there has been a significant increase in case-mix for hospitals paid based on the hospital-specific rate. If we found that application of the documentation and coding adjustment to the hospital-specific rates for FY 2010 was warranted, we indicated that we would propose to make such an adjustment in the FY 2010 IPPS/RY 2010 LTCH PPS proposed rule.

8. Documentation and Coding Adjustment to the Hospital-Specific Rates for FY 2011 and Subsequent Fiscal Years

In the FY 2010 IPPS/RY 2010 LTCH PPS proposed rule and final rule (74 FR 24098 through 24100 and 74 FR 43775 through 43776, respectively), we discussed our retrospective evaluation of the FY 2008 claims data for SCHs and MDHs using the same methodology described earlier for other IPPS hospitals. We found that, independently for both SCHs and MDHs, the change due to documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 slightly exceeded the proposed 2.5 percent result discussed earlier for other IPPS hospitals, but did not significantly differ from that result. We refer readers to those rules for a more complete discussion.

Therefore, consistent with our statements in prior IPPS rules, we proposed to use our authority under section 1886(d)(5)(I)(i) of the Act to prospectively adjust the hospital-specific rates by the proposed –2.5 percent in FY 2010 to account for our estimated documentation and coding effect in FY 2008 that does not reflect real changes in case-mix. We proposed to leave this adjustment in place for subsequent fiscal years in order to ensure that changes in documentation and coding resulting from the adoption of the MS-DRGs do not lead to an increase in aggregate payments for SCHs and MDHs not reflective of an increase in real case-mix. The proposed –2.5 percent adjustment to the hospital-specific rates exceeded the –1.9 percent

adjustment to the national standardized amount under section 7(b)(1)(A) of Public Law 110–90 because, unlike the national standardized rates, the FY 2008 hospital-specific rates were not previously reduced in order to account for anticipated changes in documentation and coding that do not reflect real changes in case-mix resulting from the adoption of the MS-DRGs.

In the FY 2010 IPPS/RY 2010 LTCH PPS proposed rule (74 FR 24100), we solicited public comment on this proposal. Consistent with our approach for IPPS hospitals discussed earlier, in the FY 2010 IPPS/RY 2010 LTCH PPS final rule, we also delayed adoption of a documentation and coding adjustment to the hospital-specific rate until FY 2011. We refer readers to the FY 2010 IPPS/RY 2010 LTCH PPS final rule for a more detailed discussion of our proposal, responses to comments, and finalized policy.

As we have noted previously, because SCHs and MDHs use the same MS-DRG system as all other IPPS hospitals, we believe they have the potential to realize increased payments from documentation and coding changes that do not reflect real increases in patient severity of illness. Therefore, we believe they should be equally subject to a prospective budget neutrality adjustment that we are applying for adoption of the MS-DRGs to all other hospitals. We believe the documentation and coding estimates for all subsection (d) hospitals should be the same. While the findings for the documentation and coding effect for all IPPS hospitals are similar to the effect for SCHs and slightly different to the effect for MDHs, we continue to believe that this is the appropriate policy so as to neither advantage or disadvantage different types of providers. As we discuss in section II.D.4. of this preamble, our best estimate, based on the most recently available data, is that a cumulative adjustment of –5.4 percent is required to eliminate the full effect of the documentation and coding changes on future payments to SCHs and MDHs. Unlike the case of standardized amounts paid to IPPS hospitals, prior to FY 2011, we had not made any previous adjustments to the hospital-specific rates paid to SCHs and MDHs to account for documentation and coding changes. Therefore, the entire –5.4 percent recoupment adjustment needed to be made, as opposed to a –3.9 percent remaining adjustment for IPPS hospitals.

In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50068 through 50071), we made an adjustment to the standardized

amount for IPPS hospitals of – 2.9 percent under section 7(b)(1)(B) of Public Law 110–90, for FY 2011. As we noted in the FY 2011 IPPS/LTCH PPS final rule, in determining the level and pace of adjustments to account for such documentation and coding changes, we believe that it is important to maintain, as much as possible, both consistency and equity among these classes of hospitals. Therefore, we finalized a prospective adjustment of – 2.9 percent to the hospital-specific rates paid to SCHs and MDHs. We refer readers to the FY 2011 IPPS/LTCH PPS final rule for a more detailed discussion of our proposal, responses to comments, and finalized policy.

As discussed earlier in this section II.D., in the FY 2012 IPPS/LTCH PPS proposed rule, we proposed a net – 3.15 percent documentation and coding adjustment for IPPS hospitals in FY 2012 (– 3.15 percent prospective adjustment plus a – 2.9 percent recoupment adjustment in FY 2012, offset by the removal of the – 2.9 percent recoupment adjustment for FY 2010). The proposed IPPS adjustment exceeded the remaining – 2.5 percent documentation and coding adjustment for hospitals receiving a hospital-specific rate (that is, the entire – 5.4 percent adjustment, minus the – 2.9 percent adjustment finalized for FY 2011). As we indicated in the FY 2011 IPPS/LTCH PPS proposed rule and final rule, we are continuing, as much as possible, consistent with section 7(b)(1) of Public Law 110–90 and section 1886(d)(5)(I)(i) of the Act, to take such consistency and equity into account in developing future proposals for implementing documentation and coding adjustments. We believe that any adjustment to the hospital-specific rate due to documentation and coding effect should be as similar as possible to adjustments to the IPPS rate. Accordingly, we proposed a – 2.5 percent payment adjustment to the hospital-specific rate. We believe that proposing the entire remaining prospective adjustment of – 2.5 percent would allow CMS to maintain, to the extent possible, similarity and consistency in payment rates for different IPPS hospitals paid using the MS–DRG. As discussed below, we took a similar approach in finalizing an adjustment to the Puerto-Rico specific rate in FY 2011.

Comment: Numerous commenters requested that CMS rescind its proposed documentation and coding adjustment for SCHs and MDHs and questioned CMS' statutory authority to apply this adjustment to providers receiving a hospital-specific rate. The commenters

argued that because section 1886(d)(3)(A)(vi) of the Act only authorizes application of a documentation and coding adjustment to the standardized amount, Congress' specific instruction as to the applicability of this type of adjustment makes it impermissible for CMS to apply the adjustment to the hospital-specific rates. Furthermore, commenters contend that, due to their critical role in isolated communities, any negative documentation and coding adjustment to SCHs and MDHs would endanger their ability to provide the type of care that Congress specifically sought to protect by establishing their special Medicare payment systems.

Response: We continue to disagree with the commenters that the Secretary's broad authority to make exceptions and adjustment to payment amounts under section 1886(d)(3)(A)(vi) of the Act cannot be applied in this instance. We have discussed the basis for applying such an adjustment in prior rules (in the FY 2009 proposed rule (73 FR 23540), the FY 2009 IPPS final rule (73 FR 48448), and the FY 2010 IPPS/R Y 2010 LTCH PPS proposed rule (74 FR 24098)) and do not agree that the language in section 1886(d)(3)(A)(vi) of the Act limits our authority under section 1886(d)(5)(I)(i) of the Act to make such an adjustment. We recognize that SCHs and MDHs are entitled, through legislation, to receive the hospital-specific rate in order to compensate for their unique service requirements in the provider community. Similar to our approach with IPPS hospitals, we are implementing a phase-in of the documentation and coding adjustment over an appropriate period, beginning in FY 2011. We will continue to separately analyze SCH and MDH claims data to ensure that any future adjustment is appropriate for these provider types.

Comment: MedPAC responded to our request for comments regarding the level of adjustment for special categories of hospitals, such as hospitals paid under the hospital-specific payment rate, by pointing out hospitals have the same financial incentives for documentation and coding improvements and the same ability to benefit from the resulting change in case-mix, and by recommending that "all IPPS hospitals should be treated the same." At the same time, MedPAC also stated that "delaying prevention of overpayments * * * creates a problem because overpayments will continue to accumulate in 2010 and later years until the effect of documentation and coding improvement is fully offset in the payment rates." In setting forward its

multi-year recommendation to CMS for complying with the requirements of section 7 of Public Law 110–90, MedPAC emphasized "minimizing the accumulation of overpayments."

Response: We appreciate MedPAC's comments and agree that it is appropriate to conclude that hospitals paid under the hospital-specific rate have experienced a 5.4-percent increase documentation and coding in FYs 2008 and 2009, insofar as these hospitals had the same financial incentives to improve documentation and coding in those years as other IPPS hospitals. We further agree with MedPAC that it is appropriate to focus on minimizing the accumulation of overpayments, and we interpret this to mean that MedPAC recommends that CMS move forward as quickly as possible with prospective adjustments at an appropriate level. We appreciate MedPAC's guidance that "all hospitals be treated the same," and stress the importance of consistent treatment of various classes of similarly situated hospitals in our payment policy determinations.

We continue to believe that any adjustment to the hospital-specific rate due to documentation and coding effect should be as similar as possible to adjustments to the standardized amount. Accordingly, because we are finalizing a prospective adjustment to the standardized amount of – 2.0 percent for FY 2012, we are also finalizing a prospective adjustment to the hospital-specific rate of – 2.0 percent for FY 2012, instead of our proposed adjustment of – 2.5 percent. Making this level of adjustment allows CMS to maintain, for FY 2012, consistency in payment rates for different IPPS hospitals paid using the MS–DRG. Because this – 2.0 percent adjustment no longer reflects the entire remaining requirement adjustment amount of – 2.5 percent, an additional – 0.5 percent adjustment to the hospital-specific payment rates will be required in future rulemaking.

9. Application of the Documentation and Coding Adjustment to the Puerto Rico-Specific Standardized Amount

a. Background

Puerto Rico hospitals are paid based on 75 percent of the national standardized amount and 25 percent of the Puerto Rico-specific standardized amount. As noted previously, the documentation and coding adjustment we adopted in the FY 2008 IPPS final rule with comment period relied upon our authority under section 1886(d)(3)(A)(vi) of the Act, which provides the Secretary the authority to

adjust “the standardized amounts computed under this paragraph” to eliminate the effect of changes in coding or classification that do not reflect real changes in case-mix. Section 1886(d)(3)(A)(vi) of the Act applies to the national standardized amounts computed under section 1886(d)(3) of the Act, but does not apply to the Puerto Rico-specific standardized amount computed under section 1886(d)(9)(C) of the Act. In calculating the FY 2008 payment rates, we made an inadvertent error and applied the FY 2008 – 0.6 percent documentation and coding adjustment to the Puerto Rico-specific standardized amount, relying on our authority under section 1886(d)(3)(A)(vi) of the Act. However, section 1886(d)(3)(A)(vi) of the Act authorizes application of a documentation and coding adjustment to the national standardized amount and does not apply to the Puerto Rico specific standardized amount. In the FY 2009 IPPS final rule (73 FR 48449), we corrected this inadvertent error by removing the – 0.6 percent documentation and coding adjustment from the FY 2008 Puerto Rico-specific rates (that is, we made a positive 0.6 percent adjustment, increasing the Puerto Rico-specific rates).

While section 1886(d)(3)(A)(vi) of the Act is not applicable to the Puerto Rico-specific standardized amount, we believe that we have the authority to apply the documentation and coding adjustment to the Puerto Rico-specific standardized amount using our special exceptions and adjustment authority under section 1886(d)(5)(I)(i) of the Act. Similar to SCHs and MDHs that are paid based on the hospital-specific rate, we believe that Puerto Rico hospitals that are paid based on the Puerto Rico-specific standardized amount should not have the potential to realize increased payments due to documentation and coding changes that do not reflect real increases in patient severity of illness. Consistent with the approach described for SCHs and MDHs, in the FY 2009 IPPS final rule (73 FR 48449), we indicated that we planned to examine our FY 2008 claims data for hospitals in Puerto Rico. We indicated in the FY 2009 IPPS proposed rule (73 FR 23541) that if we found evidence of significant increases in case-mix for patients treated in these hospitals, we would consider proposing to apply documentation and coding adjustments to the FY 2010 Puerto Rico-specific standardized amount under our authority in section 1886(d)(5)(I)(i) of the Act.

b. Documentation and Coding Adjustment to the Puerto Rico-Specific Standardized Amount

For the FY 2010 IPPS/RV 2010 LTCH PPS proposed rule, we performed a retrospective evaluation of the FY 2008 claims data for Puerto Rico hospitals using the same methodology described earlier for IPPS hospitals paid under the national standardized amounts under section 1886(d) of the Act. We found that, for Puerto Rico hospitals, the increase in payments for discharges occurring during FY 2008 due to documentation and coding that did not reflect real changes in case-mix for discharges occurring during FY 2008 was approximately 1.1 percent. However, as we noted earlier for IPPS hospitals and hospitals receiving hospital-specific rates, if the estimated documentation and coding effect determined based on a full analysis of FY 2009 claims data was more or less than our then current estimates, it would change, possibly lessen, the anticipated cumulative adjustments that we had estimated we would have to make for the FY 2008 and FY 2009 combined adjustment. Therefore, we believed that it would be more prudent to delay implementation of the documentation and coding adjustment to allow for a more complete analysis of FY 2009 claims data for Puerto Rico hospitals.

In the FY 2010 IPPS/RV 2010 LTCH PPS final rule (74 FR 43777), we indicated that, given these documentation and coding increases, consistent with our statements in prior IPPS rules, we would use our authority under section 1886(d)(5)(I)(i) of the Act to adjust the Puerto Rico-specific rate and solicited public comment on the proposed – 1.1 percent prospective adjustment. However, in parallel to our decision to postpone adjustments to the Federal standardized amount, we also indicated that we were adopting a similar policy for the Puerto Rico-specific rate for FY 2010 and would consider the phase-in of this adjustment over an appropriate time period through future rulemaking. We noted that, as with the hospital-specific rates, the Puerto Rico-specific standardized amount had not previously been adjusted based on estimated changes in documentation and coding associated with the adoption of the MS–DRGs.

Consistent with our approach for IPPS hospitals for FY 2010, we indicated that we would address in the FY 2011 rulemaking cycle any change in FY 2009 case-mix due to documentation and coding that did not reflect real changes

in case-mix for discharges occurring during FY 2009.

As we have noted above, similar to SCHs and MDHs, hospitals in Puerto Rico use the same MS–DRG system as all other hospitals and we believe they have the potential to realize increased payments from documentation and coding changes that do not reflect real increases in patient severity of illness. Therefore, we believe they should be equally subject to the prospective budget neutrality adjustment that we intend to apply to prospective payment rates for IPPS hospitals, including SCHs and MDHs, in order to eliminate the full effect of the documentation and coding changes associated with implementation of the MS–DRG system.

As discussed in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50071 through 50073), using the same methodology we applied to estimate documentation and coding changes under IPPS for non-Puerto Rico hospitals, our best estimate, based on the then most recently available data (FY 2009 claims paid through March 2010), was that, for documentation and coding that occurred over FY 2008 and FY 2009, a cumulative adjustment of – 2.6 percent was required to eliminate the full effect of the documentation and coding changes on future payments from the Puerto Rico-specific rate. As we stated above, we believe it important to maintain both consistency and equity among all hospitals paid on the basis of the same MS–DRG system. At the same time, however, we recognize that the estimated cumulative impact on aggregate payment rates resulting from implementation of the MS–DRG system was smaller for Puerto Rico hospitals as compared to IPPS hospitals and SCHs and MDHs. Therefore, in the FY 2011 IPPS/LTCH PPS proposed rule (75 FR 23876), we proposed an adjustment to eliminate the full effect of the documentation and coding changes on the portion of future payments to Puerto Rico hospitals based on the Puerto Rico-specific rate. We stated that we believed that a full prospective adjustment was the most appropriate means to take into full account the effect of documentation and coding changes on payments, while maintaining equity as much as possible between hospitals paid on the basis of different prospective rates. We noted that our updated data analysis in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50072 through 50073) showed that this adjustment would be – 2.6 percent. The previous estimate in the proposed rule was a – 2.4 percent adjustment.

One reason we proposed the full prospective adjustment for the Puerto Rico-specific rate in FY 2011 was to

maintain equity as much as possible in the documentation and coding adjustments applied to various hospital rates in FY 2011. Because our proposal was to make an adjustment that represents the full adjustment that is warranted for the Puerto Rico-specific rate, we indicated that we did not anticipate proposing any additional adjustments to this rate for documentation and coding effects.

Therefore, because the Puerto Rico-specific rate received a full prospective adjustment of -2.6 percent in FY 2011, we proposed no further adjustment in the proposed rule for FY 2012.

E. Refinement of the MS-DRG Relative Weight Calculation

1. Background

In the FY 2009 IPPS final rule (73 FR 48450), we continued to implement significant revisions to Medicare's inpatient hospital rates by completing our 3-year transition from charge-based relative weights to cost-based relative weights. Beginning in FY 2007, we implemented relative weights based on cost report data instead of based on charge information. We had initially proposed to develop cost-based relative weights using the hospital-specific relative value cost center (HSRVcc) methodology as recommended by MedPAC. However, after considering concerns expressed in the public comments we received on the proposal, we modified MedPAC's methodology to exclude the hospital-specific relative weight feature. Instead, we developed national CCRs based on distinct hospital departments and engaged a contractor to evaluate the HSRVcc methodology for future consideration. To mitigate payment instability due to the adoption of cost-based relative weights, we decided to transition cost-based weights over 3 years by blending them with charge-based weights beginning in FY 2007. (We refer readers to the FY 2007 IPPS final rule for details on the HSRVcc methodology and the 3-year transition blend from charge-based relative weights to cost-based relative weights (71 FR 47882 through 47898).)

In FY 2008, we adopted severity-based MS-DRGs, which increased the number of DRGs from 538 to 745. Many commenters raised concerns as to how the transition from charge-based weights to cost-based weights would continue with the introduction of new MS-DRGs. We decided to implement a 2-year transition for the MS-DRGs to coincide with the remainder of the transition to cost-based relative weights. In FY 2008, 50 percent of the relative weight for each DRG was based on the CMS DRG

relative weight and 50 percent was based on the MS-DRG relative weight.

In FY 2009, the third and final year of the transition from charge-based weights to cost-based weights, we calculated the MS-DRG relative weights based on 100 percent of hospital costs. We refer readers to the FY 2007 IPPS final rule (71 FR 47882) for a more detailed discussion of our final policy for calculating the cost-based DRG relative weights and to the FY 2008 IPPS final rule with comment period (72 FR 47199) for information on how we blended relative weights based on the CMS DRGs and MS-DRGs.

2. Summary of the RTI Study of Charge Compression and CCR Refinement

As we transitioned to cost-based relative weights, some public commenters raised concerns about potential bias in the weights due to "charge compression," which is the practice of applying a higher percentage charge markup over costs to lower cost items and services, and a lower percentage charge markup over costs to higher cost items and services. As a result, the cost-based weights would undervalue high-cost items and overvalue low-cost items if a single CCR is applied to items of widely varying costs in the same cost center. To address this concern, in August 2006, we awarded a contract to RTI to study the effects of charge compression in calculating the relative weights and to consider methods to reduce the variation in the CCRs across services within cost centers. RTI issued an interim draft report in January 2007 with its findings on charge compression (which was posted on the CMS Web site at: <http://www.cms.hhs.gov/reports/downloads/Dalton.pdf>). In that report, RTI found that a number of factors contribute to charge compression and affect the accuracy of the relative weights. RTI's findings demonstrated that charge compression exists in several CCRs, most notably in the Medical Supplies and Equipment CCR.

In its interim draft report, RTI offered a number of recommendations to mitigate the effects of charge compression, including estimating regression-based CCRs to disaggregate the Medical Supplies Charged to Patients, Drugs Charged to Patients, and Radiology cost centers, and adding new cost centers to the Medicare cost report, such as adding a "Devices, Implants and Prosthetics" line under "Medical Supplies Charged to Patients" and a "CT Scanning and MRI" subscripted line under "Radiology-Diagnostics". Despite receiving public comments in support of the regression-based CCRs as

a means to immediately resolve the problem of charge compression, particularly within the Medical Supplies and Equipment CCR, we did not adopt RTI's recommendation to create additional regression-based CCRs. (For more details on RTI's findings and recommendations, we refer readers to the FY 2009 IPPS final rule (73 FR 48452).) RTI subsequently expanded its analysis of charge compression beyond inpatient services to include a reassessment of the regression-based CCR models using both outpatient and inpatient charge data. This interim report was made available in April 2008 during the public comment period on the FY 2009 IPPS proposed rule and can be found on RTI's Web site at: http://www.rti.org/reports/cms/HHSM-500-2005-00291/PDF/Refining_Cost_to_Charge_Ratios_200804.pdf. The IPPS-specific chapters, which were separately displayed in the April 2008 interim report, as well as the more recent OPSS chapters, were included in the July 3, 2008 RTI final report entitled, "Refining Cost-to-Charge Ratios for Calculating APC [Ambulatory Payment Classification] and DRG Relative Payment Weights," that became available at the time of the development of the FY 2009 IPPS final rule. The RTI final report can be found on RTI's Web site at: http://www.rti.org/reports/cms/HHSM-500-2005-00291/PDF/Refining_Cost_to_Charge_Ratios_200807_Final.pdf.

RTI's final report found that, under the IPPS and the OPSS, accounting improvements to the cost reporting data reduce some of the sources of aggregation bias without having to use regression-based adjustments. In general, with respect to the regression-based adjustments, RTI confirmed the findings of its March 2007 report that regression models are a valid approach for diagnosing potential aggregation bias within selected services for the IPPS and found that regression models are equally valid for setting payments under the OPSS.

RTI also noted that cost-based weights are only one component of a final prospective payment rate. There are other rate adjustments (wage index, IME, and DSH) to payments derived from the revised cost-based weights, and the cumulative effect of these components may not improve the ability of final payment to reflect resource cost. RTI endorsed short-term regression-based adjustments, but also concluded that more refined and accurate accounting data are the preferred long-term solution to mitigate charge compression and related bias in hospital cost-based weights. For a more detailed

summary of RTI's findings, recommendations, and public comments we received on the report, we refer readers to the FY 2009 IPPS final rule (73 FR 48452 through 48453).

3. Summary of Policy Changes Made in FY 2011

In the FY 2009 IPPS/LTCH PPS final rule (73 FR 48458 through 48467), in response to the RTI's recommendations concerning cost report refinements, and because of RAND's finding that regression-based adjustments to the CCRs do not significantly improve payment accuracy, we discussed our decision to pursue changes to the cost report to split the cost center for Medical Supplies Charged to Patients into one line for "Medical Supplies Charged to Patients" and another line for "Implantable Devices Charged to Patients." (We refer readers to the Web site: http://www.rand.org/pubs/working_papers/WR560/, and the FY 2009 IPPS/LTCH PPS final rule for details on the RAND report (73 FR 48453 through 48457).) We acknowledged, as RTI had found, that charge compression occurs in several cost centers that exist on the Medicare cost report. However, as we stated in the FY 2009 IPPS/LTCH PPS final rule, we focused on the CCR for Medical Supplies and Equipment because RTI found that the largest impact on the MS-DRG relative weights could result from correcting charge compression for devices and implants. In determining what should be reported in these respective cost centers, we adopted the commenters' recommendation that hospitals should use revenue codes established by AHA's National Uniform Billing Committee to determine what should be reported in the "Medical Supplies Charged to Patients" and the "Implantable Devices Charged to Patients" cost centers. Accordingly, a new subscripted line 55.30 for "Implantable Devices Charged to Patients" was created in July 2009 as part of CMS' Transmittal 20 update to the existing cost report Form CMS-2552-96. This new subscripted cost center has been available for use for cost reporting periods beginning on or after May 1, 2009.

In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50075 through 50080), we finalized our proposal to create standard cost centers for CT scans, MRI, and cardiac catheterization, and to require that hospitals report the costs and charges for these services under new cost centers on the revised Medicare cost report Form CMS 2552-10. As we discussed in the FY 2009 IPPS/LTCH PPS and CY 2009 OPPS/ASC proposed

and final rules, RTI found that the costs and charges of CT scans, MRI, and cardiac catheterization differ significantly from the costs and charges of other services included in the standard associated cost center. RTI also concluded that both the IPPS and OPPS relative weights would better estimate the costs of those services if CMS were to add standard cost centers for CT scans, MRI, and cardiac catheterization in order for hospitals to report separately the costs and charges for those services and in order for CMS to calculate unique CCRs to estimate the cost from charges on claims data. (We refer readers to the FY 2011 IPPS/LTCH PPS final rule (75 FR 50075 through 50080) for a more detailed discussion on the reasons for the creation of standard cost centers for CT scans, MRI, and cardiac catheterization.) The new standard cost centers for MRI, CT scans, and cardiac catheterization are effective for cost report periods beginning on or after May 1, 2010, on the revised cost report Form CMS-2552-10. CMS issued the new hospital cost report Form CMS-2552-10 on December 30, 2010. The new cost report form can be accessed at the CMS Web site at: <https://www.cms.gov/Manuals/PBM/itemdetail.asp?filterType=none&filterByDID=-99&sortByDID=1&sortOrder=ascending&itemID=CMS021935&intNumPerPage=10>. Once at this Web site, users should double click on "Chapter 40."

4. Discussion for FY 2012

In the FY 2009 IPPS/LTCH PPS final rule (73 FR 48468), we stated that, due to what is typically a 3-year lag between the reporting of cost report data and the availability for use in ratesetting, we anticipated that we might be able to use data from the new "Implantable Devices Charged to Patients" cost center to develop a CCR for Implantable Devices Charged to Patients in the FY 2012 or FY 2013 IPPS rulemaking cycle. Specifically, we stated, "Because there is approximately a 3-year lag between the availability of cost report data for IPPS and OPPS rate-setting purposes in a given fiscal year, we may be able to derive two distinct CCRs, one for medical supplies and one for devices, for use in calculating the FY 2012 or FY 2013 IPPS relative weights and the CY 2012 or CY 2013 OPPS relative weights" (73 FR 48468). However, as noted in the FY 2010 IPPS/LTCH PPS final rule (74 FR 43782), due to delays in the issuance of the revised cost report CMS 2552-10, a new CCR for Implantable Devices Charged to Patients may not be available until FY 2013. Similarly, when we finalized the decision in the FY 2011

IPPS/LTCH PPS final rule to add new cost centers for MRI, CT scans, and cardiac catheterization, we explained that data from any new cost centers that may be created will not be available until at least 3 years after they are first used (75 FR 50077). That is, in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50077), we stated that the data from the standard cost centers for MRI, CT scans, and cardiac catheterization respectively, would not even be available for possible use in calculating the relative weights earlier than 3 years after Form CMS-2552-10 becomes available. We further stated that, at that time, we would analyze the data and determine if it is appropriate to use those data to create distinct CCRs from these cost centers for use in the relative weights for the respective payment systems. We also reassured public commenters that there was no need for immediate concern regarding possible negative payment impacts on MRI and CT scans under the IPPS and the OPPS because the cost report data that would be used for the calculation of the relative weights were at least 3 years from being available. We stated that we will first thoroughly analyze and run impacts on the data and provide the public with the opportunity to comment before distinct CCRs for MRI and CT scans would be finalized for use in the calculation of the relative weights. We also urged all hospitals to properly report their costs and charges for MRI, CT scans, and all other services so that, in several years' time, we will have reliable data from all hospitals on which to base a decision as to whether to incorporate additional CCRs into the relative weight calculation (75 FR 50077).

Accordingly, in preparation for the FY 2012 IPPS/LTCH PPS proposed rule, we assessed the availability of data in the "Implantable Devices Charged to Patients" cost center. In order to develop a robust analysis regarding the use of cost data from the "Implantable Devices Charged to Patients" cost center, it was necessary to have a critical mass of cost reports filed with data in this cost center. The cost center for "Implantable Devices Charged to Patients" is effective for cost reporting periods beginning on or after May 1, 2009. While developing the FY 2012 IPPS/LTCH PPS proposed rule, we checked the availability of FY 2009 cost reports in the December 31, 2010 quarter ending update of HCRIS, which was the latest upload of FY 2009 cost report data that we could use for the proposed rule. We determined that there were only 437 hospitals (out of approximately 3,500 IPPS hospitals)

that completed the “Implantable Devices Charged to Patients” cost center. We did not believe that this was a sufficient amount of data from which to generate a meaningful analysis in this particular situation. Therefore, we did not propose to use data from the “Implantable Devices Charged to Patients” cost center to create a distinct CCR for Implantable Devices Charged to Patients for use in calculating the MS-DRG relative weights for FY 2012. We indicated that we would reassess the availability of data for the “Implantable Devices Charged to Patients” cost center, and the “MRI, CT Scans, and Cardiac Catheterization” cost centers, for the FY 2013 IPPS rulemaking cycle and, if appropriate, we would propose to create a distinct CCR at that time.

Comment: Commenters requested that CMS reconsider its position to not use the data from the implantable device cost center to calculate the MS-DRG relative weights for FY 2012. The commenter noted that during the development of the proposed rule, CMS found that only 437 hospitals out of approximately 3,500 IPPS hospitals reported data in the “Implantable Devices Charged to Patients” cost center of the Medicare hospital cost report based on the December 2010 update of FY 2009 HCRIS. One commenter found, while reviewing the March 2011 update of FY 2009 HCRIS, that there are approximately 800 hospitals that are reporting cost information in the implantable medical device cost center.

Another commenter stated that, based on the December 2010 update of FY 2009 HCRIS, 804 hospitals reported data on either line 55 (Medical Supplies Charged to Patients) or line 55.30 (Implantable Devices Charged to Patients), and in the March 2011 update of FY 2009 HCRIS, approximately 1,600 hospitals were reporting data on either of those lines. As such, the commenters believed there is now a sufficient amount of data to use the implantable device CCR to calculate the relative weights and improve accuracy of the payment rates. Commenters also noted that if we do not use the implantable device cost center to calculate the FY 2012 relative weights, there will be enough data to develop an implantable device CCR for FY 2013.

One commenter suggested that CMS adopt regression-based CCRs to calculate the FY 2012 MS-DRG relative weights because CMS does not yet have sufficient cost report data to develop the implantable device CCR. This would allow CMS to address charge compression immediately and improve payment accuracy for medical devices and implantables.

Response: In the FY 2012 IPPS/LTCH PPS proposed rule, we indicated that we did not have sufficient cost report data to develop the kind of robust analysis that we assured the public we would provide prior to implementing a new CCR for implantable medical devices. Therefore, we stated that we will reassess the availability of data for FY 2013. We have reviewed the availability of FY 2009 cost reports in the March 31, 2011 quarter ending update of HCRIS, which is the latest upload of FY 2009 cost report data that we currently have available. We have determined that, for cost reporting periods beginning on or after May 1, 2009, the effective date of line 55.30 (Implantable Devices Charged to Patients), there are 961 hospitals (out of approximately 3,500 IPPS hospitals) that have completed the “Implantable Devices Charged to Patients” cost center. This represents an increase of 524 compared to the 437 entries that we found when developing the FY 2012 proposed rule. Regardless of the number of hospitals currently reporting data in the “Implantable Devices Charged to Patients” cost center, the data that were available at the time we were developing our proposed policies for FY 2012 were insufficient, and we believe it would be inappropriate to finalize a specific CCR for implantable devices charged to patients for FY 2012 without an opportunity for the public to review and comment on our analysis. Rather, we believe that it is appropriate to wait until FY 2013, when we hope to be able to provide a proper impact analysis of the addition of a CCR for implantable devices charged to patients in the relative weights calculation. Accordingly, we are not implementing a regression-based CCR for implantable devices at this time. Therefore, we are not implementing any new CCRs for use in the relative weights calculation for FY 2012.

Comment: Commenters urged CMS to increase education efforts to encourage faster hospital adoption of the use of the implantable medical device cost center. Commenters noted that, at the time of the development of the FY 2012 IPPS/LTCH PPS proposed rule, only 437 hospitals had completed the implantable device cost center, and this demonstrated that CMS needs to undertake additional outreach to hospitals to ensure that they appropriately complete the Medicare hospital cost report.

Response: We agree that it is important that hospitals understand how to accurately report data in the “Implantable Devices Charged to Patients” cost center, and we have worked to add more clarity to the cost

report instructions. However, we do believe that the December 31, 2010 update of HCRIS reflected relatively few entries for this cost center because the corresponding cost center line was only available for use for cost reporting periods beginning on or after May 1, 2009. This effective date was somewhat awkward in terms of timing and would not have applied to a large number of hospitals whose data would not be evident to CMS until the March 31, 2011 update to HCRIS.

Comment: Commenters suggested that CMS monitor the accuracy of the data reported in the implantable device cost center on the Medicare hospital cost report. Commenters urged CMS to impress the importance upon the Medicare Administrative Contractors (MACs) of establishing a mechanism to audit the implantable device cost center to ensure that the costs and charges are appropriately reported. One commenter suggested that CMS require MACs to require hospitals to explain why they had not reported in the implantable device cost center. In addition, the commenters suggested that CMS reissue instructions, similar to Transmittal 321, dated February 28, 2009, to the MACs with recommendations that MACs develop an audit program for line 55 (Medical Supplies Charged to Patients) and line 55.30 (Implantable Devices Charged to Patients). Commenters noted that potential audit mechanisms include identifying the presence of revenue codes 274, 275, 276 and 624 reported on the PS&R used to settle the cost report, and comparing the CCR based on line 55.30 to the CCR based on line 55. In addition, one commenter suggested that the cost reporting software be modified to create a level 1 error in the case where no data is reported on line 55.30 (Implantable Devices Charged to Patients) to compel hospitals to report that information.

Response: We agree with the commenters that the cost reporting lines, whether they are for Implantable Devices Charged to Patients, MRI, CT scans, cardiac catheterization, or any others, should be subject to greater audit scrutiny from the Medicare contractors. The new Medicare cost report form CMS-2552-10, on line 121 of Worksheet S-2, Part I, asks “Did this facility incur and report costs for implantable devices charged to a patient? Enter in column 1 “Y” for yes or “N” for no.” All hospital types, including non-IPPS hospitals, CAHs, and Maryland inpatient short-term acute hospitals, are required to properly report their costs and charges, and if the answer to this question is Y for any type of hospital, then line 72, column 26, of

Worksheet B, Part I must be greater than 0, with an accurate amount that reflects the hospital's costs for implantable devices charged to patients. In addition, we note that a Level 1 edit on the CMS-2552-10 form already exists that ensures that line 72, column 26, of Worksheet B, Part I (Implantable Devices Charged to Patients on Worksheet A of the CMS-2552-10 form) is greater than 0 if Worksheet S-2, Part I, line 121 is "Y". The edit is also set up for the reverse scenario; that is, if there is an amount on Worksheet B, Part I, line 72, column 26, then the response on Worksheet S-2, Part I, line 121 must be "Y."

Comment: Some commenters supported not making major refinements to the calculation of MS-DRG relative weights. Commenters valued the consistency, transparency, and predictability of the calculation of the MS-DRG relative weights.

Response: We appreciate the commenters' support for our proposal of not making major refinements to the MS-DRG relative weights in the absence of sufficient data from which to create new CCRs. We also value consistency, transparency, and predictability in the calculation of the MS-DRG relative weights.

Comment: One commenter supported our decision to create standard cost centers for CT, MRI, and cardiac catheterization for hospitals to report their costs and charges on the Medicare hospital cost report. In addition, the commenter supported urgently adopting the use of the CT, MRI, and cardiac catheterization cost centers in calculating the MS-DRG relative weights.

Response: We appreciate the commenter's support. As we stated in the proposed rule, we will reassess the availability of data for the "Implantable Devices Charged to Patients" cost center, and the "MRI, CT Scans, and Cardiac Catheterization" cost centers, for the FY 2013 IPPS rulemaking cycle, and, if appropriate, we will propose to create distinct CCRs for these cost centers at that time.

Comment: One commenter noted that allogeneic stem cell acquisition charges are reported using revenue code 0819 for "Other Organ Acquisition." However, the commenter added, this revenue code is not part of the 15 national cost center CCRs used in the calculation of the MS-DRG relative weights. In addition, the commenter stated, the Medicare hospital cost report does not specifically identify a cost center for bone marrow acquisition costs. The commenter requested direction on capturing these acquisition

costs and how those costs and charges are accounted for in the MS-DRG relative weight calculation.

Response: We appreciate this comment, but note that it is not within the scope of the issues discussed in the FY 2012 IPPS/LTCH PPS proposed rule regarding the calculation of the MS-DRG relative weights. However, we also note that allogeneic bone marrow transplant charges are included in the 15 CCRs, specifically as part of the Blood and Blood Products CCR and that CCR's associated cost centers on the cost report.

Comment: One commenter stated that CMS should specifically exclude sleeve gastrectomy charges derived from the Medicare claims data and sleeve gastrectomy costs from the Medicare hospital cost report data from the MS-DRG weight recalibrations. The commenter noted that CMS excludes Medicare claims for services that are non-covered for Medicare beneficiaries from the MS-DRG relative weight calculation and, therefore, sleeve gastrectomy charges should be excluded. In addition, the commenter recommended that CMS remind providers that Medicare cost reports should exclude charges and costs associated with the sleeve gastrectomy procedure, as it is a noncovered service.

Response: We appreciate this comment, but note that it is not within the scope of the issues discussed in the FY 2012 IPPS/LTCH PPS proposed rule regarding the calculation of the MS-DRG relative weights. We will take this issue into consideration for future rulemaking.

Comment: One commenter suggested that CMS evaluate the MedPAR claims database to ensure that it is not using Medicare managed care claims data to calculate the MS-DRG relative weights, as CMS has proposed to only use fee-for-service claims to calculate the MS-DRG relative weights.

Response: We appreciate this comment, but note that it is not within the scope of the issues discussed in the FY 2012 IPPS/LTCH PPS proposed rule regarding the calculation of the MS-DRG relative weights. However, we note that it is already our policy to exclude managed care claims from the MS-DRG relative weights calculation.

After consideration of the public comments received, we are not implementing any new CCRs for use in the relative weights calculation for FY 2012.

F. Preventable Hospital-Acquired Conditions (HACs), Including Infections

1. Background

a. Statutory Authority

Section 1886(d)(4)(D) of the Act addresses certain hospital-acquired conditions (HACs), including infections. Section 1886(d)(4)(D) of the Act specifies that, by October 1, 2007, the Secretary was required to select, in consultation with the Centers for Disease Control and Prevention (CDC), at least two conditions that: (a) are high cost, high volume, or both; (b) are assigned to a higher paying MS-DRG when present as a secondary diagnosis (that is, conditions under the MS-DRG system that are CCs or MCCs); and (c) could reasonably have been prevented through the application of evidence-based guidelines. Section 1886(d)(4)(D) of the Act also specifies that the list of conditions may be revised, again in consultation with CDC, from time to time as long as the list contains at least two conditions.

Section 1886(d)(4)(D)(iii) of the Act requires that hospitals, effective with discharges occurring on or after October 1, 2007, submit information on Medicare claims specifying whether diagnoses were present on admission (POA). Section 1886(d)(4)(D)(i) of the Act specifies that, effective for discharges occurring on or after October 1, 2008, Medicare no longer assigns an inpatient hospital discharge to a higher paying MS-DRG if a selected condition is not POA. Thus, if a selected condition that was not POA manifests during the hospital stay, it is considered a HAC and the case is paid as though the secondary diagnosis was not present. However, even if a HAC manifests during the hospital stay, if any nonselected CC/MCC appears on the claim, the claim will be paid at the higher MS-DRG rate. Under the HAC payment policy, all CCs/MCCs on the claim must be HACs in order to generate a lower MS-DRG payment. In addition, Medicare continues to assign a discharge to a higher paying MS-DRG if a selected condition is POA.

The POA indicator reporting requirement and the HAC payment provision apply to IPPS hospitals only. Non-IPPS hospitals, including CAHs, LTCHs, IRFs, IPFs, cancer hospitals, children's hospitals, hospitals in Maryland operating under waivers, rural health clinics, federally qualified health centers, RNHCIs, and Department of Veterans Affairs/Department of Defense hospitals, are exempt from POA reporting and the HAC payment provision. Throughout this section, the

term “hospital” refers to an IPPS hospital.

The HAC provision found in section 1886(d)(4)(D) of the Act is part of an array of Medicare tools that we are using to promote increased quality and efficiency of care. Those tools include measuring performance, using payment incentives, publicly reporting performance results, applying national and local coverage policy decisions, enforcing conditions of participation, and providing direct support for providers through Quality Improvement Organization (QIO) activities. The application of these tools, such as this HAC provision, is transforming Medicare from a passive payer to an active purchaser of higher value health care services. We are applying these strategies for inpatient hospital care and across the continuum of care for Medicare beneficiaries.

This effort is highly compatible with the underlying purposes as well as existing structural features of Medicare’s IPPS. Under the IPPS, hospitals are encouraged to treat patients efficiently because they receive the same DRG payment for stays that vary in length and in the services provided, which gives hospitals an incentive to avoid unnecessary costs in the delivery of care. In some cases, conditions acquired in the hospital do not generate higher payments than the hospital would otherwise receive for cases without these conditions. To this extent, the IPPS encourages hospitals to avoid complications.

However, the treatment of certain conditions can generate higher Medicare payments in two ways. First, if a hospital incurs exceptionally high costs treating a patient, the hospital stay may generate an outlier payment. Because the outlier payment methodology requires that hospitals experience large

losses on outlier cases before outlier payments are made, hospitals have an incentive to prevent outliers. Second, under the MS–DRG system that took effect in FY 2008 and that has been refined through rulemaking in subsequent years, certain conditions can generate higher payments even if the outlier payment requirements are not met. Under the MS–DRG system, there are currently 259 sets of MS–DRGs that are split into 2 or 3 subgroups based on the presence or absence of a CC or an MCC. The presence of a CC or an MCC generally results in a higher payment. However, since we implemented the HAC provisions, if a secondary diagnosis acquired during a hospital stay is a HAC and no other CCs or MCCs are present, the hospital receives a payment under the MS–DRGs as if the HACs were not present. (We refer readers to section II.D. of the FY 2008 IPPS final rule with comment period for a discussion of DRG reforms (72 FR 47141).)

b. HAC Selection

Beginning in FY 2007, we have set forth proposals, and solicited and responded to public comments, to implement section 1886(d)(4)(D) of the Act through the IPPS annual rulemaking process. For specific policies addressed in each rulemaking cycle, we direct readers to the following publications: The FY 2007 IPPS proposed rule (71 FR 24100) and final rule (71 FR 48051 through 48053); the FY 2008 IPPS proposed rule (72 FR 24716 through 24726) and final rule with comment period (72 FR 47200 through 47218); the FY 2009 IPPS proposed rule (73 FR 23547) and final rule (73 FR 48471); the FY 2010 IPPS/RV 2010 LTCH PPS proposed rule (74 FR 24106) and final rule (74 FR 43782); and the FY 2011 IPPS/LTCH PPS proposed rule (75 FR

23880) and final rule (75 FR 50080). A complete list of the 10 current categories of HACs is included in section II.F.2. of this preamble.

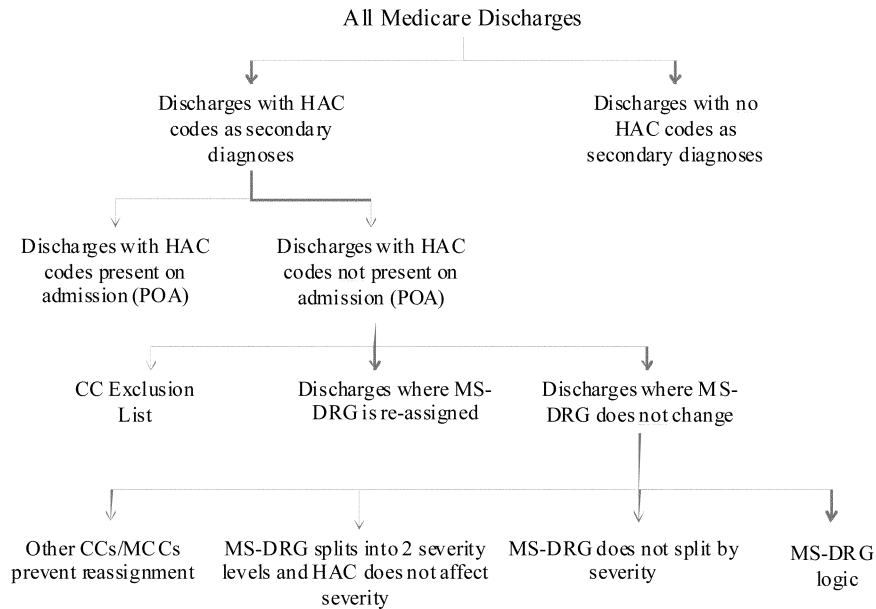

In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50080 through 50101), we did not add any categories of additional HACs or make any changes to policies already established under the authority of section 1886(d)(4)(D) of the Act.

c. Collaborative Process

In establishing the HAC payment policy under section 1886(d)(4)(D) of the Act, our experts have worked closely with public health and infectious disease professionals from across the Department of Health and Human Services, including CDC, the Agency for Healthcare Research and Quality (AHRQ), and the Office of Public Health and Science (OPHS), to identify the candidate preventable HACs, review comments, and select HACs. CMS and CDC also have collaborated on the process for hospitals to submit a POA indicator for each diagnosis listed on IPPS hospital Medicare claims and on the payment implications of the various POA reporting options. In addition, as discussed below, we have used rulemaking and Listening Sessions to obtain public input.

d. Application of HAC Payment Policy to MS–DRG Classifications

As described above, in certain cases, application of the HAC payment policy provisions can result in MS–DRG reassignment to a lower paying MS–DRG. The following diagram portrays the logic of the HAC payment policy provision as adopted in the FY 2008 IPPS final rule with comment period (72 FR 47200) and in the FY 2009 IPPS final rule (73 FR 48471):

e. Public Input Regarding Selected and Potential Candidate HACs

In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50080 through 50101), we did not add or remove categories of HACs, nor did we make any changes to previously established policies. However, we continue to encourage public dialogue about refinement of the HAC list.

Given the timeliness of the HAC discussion, particularly when considered within the context of recent legislative health care reform initiatives, we remain eager to engage in an ongoing public dialogue about the various aspects of this policy. We plan to continue to include updates and findings from the Research Triangle Institute, International (RTI) evaluation on CMS' Hospital-Acquired Conditions and Present on Admission Indicator Web site available at: <http://www.cms.hhs.gov/HospitalAcqCond/>.

f. POA Indicator Reporting

Collection of POA indicator data is necessary to identify which conditions

were acquired during hospitalization for the HAC payment provision as well as for broader public health uses of Medicare data. In the FY 2011 IPPS/LTCH PPS proposed rule (75 FR 23381) (and as noted in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50081)), we listed the instructions and change requests that were issued to IPPS hospitals and also to non-IPPS hospitals regarding the submission of POA indicator data for all diagnosis codes on Medicare claims and the processing of non-PPS claims. We also indicated that specific instructions on how to select the correct POA indicator for each diagnosis code were included in the *ICD-9-CM Official Guidelines for Coding and Reporting*, available on the CDC Web site at: <http://www.cdc.gov/nchs/data/icd9/icdguide10.pdf>. We reiterate that additional information regarding POA indicator reporting and application of the POA reporting options is available on the CMS Web site at: <http://www.cms.gov/HospitalAcqCond/>.

In preparation for the transition to the ICD-10-CM/PCS code set effective

October 1, 2013, further information regarding the use of the POA indicator with the ICD-10-CM/PCS classification as it pertains to the HAC policy will be discussed in future rulemaking. In the meantime, we encourage readers to review the educational materials and draft code sets currently available for ICD-10-CM/PCS at the CMS Web site at: <http://www.cms.gov/ICD10/>. In addition, the draft ICD-10-CM/PCS coding guidelines can be viewed at the CDC Web site at: <http://www.cdc.gov/nchs/data/icd9/10cmguidelines2011>.

Historically, we have not provided coding advice. Rather, we collaborate with the American Hospital Association (AHA) through the *Coding Clinic for ICD-9-CM*. We will continue to collaborate with the AHA to promote the *Coding Clinic for ICD-9-CM* as the source for coding advice about the POA indicator.

As discussed in previous IPPS proposed and final rules, there are five POA indicator reporting options, as defined by the *ICD-9-CM Official Guidelines for Coding and Reporting*:

Indicator	Descriptor
Y	Indicates that the condition was present on admission.
W	Affirms that the hospital has determined that, based on data and clinical judgment, it is not possible to document when the onset of the condition occurred.
N	Indicates that the condition was not present on admission.
U	Indicates that the documentation is insufficient to determine if the condition was present at the time of admission.
1	Signifies exemption from POA reporting. CMS established this code as a workaround to blank reporting on the electronic 4010A1. A list of exempt ICD-9-CM diagnosis codes is available in the <i>ICD-9-CM Official Guidelines for Coding and Reporting</i> .

In the FY 2009 IPPS final rule (73 FR 48486 through 48487), we adopted final

payment policies to: (1) pay the CC/MCC MS-DRGs for those HACs coded

with "Y" and "W" indicators; and (2) not pay the CC/MCC MS-DRGs for those

HACs coded with “N” and “U” indicators.

Beginning on or after January 1, 2011, hospitals are required to begin reporting POA indicators using the 5010 electronic transmittal standards format. The 5010 format removes the need to report a POA indicator of “1” for codes that are exempt from POA reporting. However, for claims that continue to be submitted using the 4010 electronic transmittal standards format, the POA indicator of “1” is still necessary because of reporting restrictions from the use of the 4010 electronic transmittal standards format.

Hospitals that began reporting with the 5010 format on and after January 1, 2011, can no longer report a POA indicator of “1” for POA exempt codes. The POA field should instead be left blank for codes exempt from POA reporting. We have issued CMS instructions on this reporting change as a One-Time Notification, Pub. No. 100–20, Transmittal No. 756, Change Request 7024, effective on August 13, 2010. These instructions, entitled “5010 Implementation-Changes to Present on Admission (POA) Indicator ‘1’ and the K3 Segment,” can be located at the following link on the CMS Web site: http://www.cms.gov/manuals/downloads/Pub100_20.pdf.

We are continuing our efforts to clarify instructions regarding use of the POA indicator. As discussed in the FY 2011 IPPS/LTCH PPS final rule (75 FR 50088), we received public comments in response to the FY 2011 IPPS/LTCH PPS proposed rule that expressed concern about the accuracy of reporting of POA indicators for HACs related to intracranial injury with loss of consciousness. The codes for loss of consciousness are listed in the Falls and Trauma HAC category, within the “Intracranial Injury” subcategory. Because loss of consciousness is a component of intracranial injuries rather than a separate condition, we agreed that the POA guidelines that instructed coders to assign an “N” indicator if any part of the combination code was not present on admission did not apply to the loss of consciousness codes. As a member of the Editorial Advisory Board for the *Coding Clinic for ICD–9–CM*, we worked with the American Hospital Association (AHA), American Health Information Management Association (AHIMA), and CDC to provide additional clarification on how these conditions should be reported. Additional guidance on how these cases should be reported can be found in AHA’s *Coding Clinic for ICD–9–CM*, 2nd Quarter 2010, “Frequently Asked POA Questions” section. That

publication clarified the POA reporting for patients in whom a single code captures the fact that the patient was admitted as a result of a head injury and then subsequently lost consciousness after the admission. For these cases, we clarified that the POA indicator assigned should be “Y,” indicating that the head injury and resulting loss of consciousness occurred prior to (and was present on) admission.

We expect that this clarification will lead to greater consistency and accuracy in POA indicator reporting for these conditions. We look forward to continuing our efforts as part of the AHA’s Editorial Advisory Board for *Coding Clinic for ICD–9–CM* to provide guidance on accuracy of coding and the reporting of POA indicators. Hospitals look to this publication to provide detailed guidance on ICD–9–CM coding and POA reporting. We encourage hospitals to send any other questions about ICD–9–CM codes or POA indicator selection to the AHA so that the Editorial Advisory Board can continue its role of providing instruction on the accurate selection and reporting of both ICD–9–CM codes and POA indicators.

2. Additions and Revisions to the HAC Policy for FY 2012

a. Contrast-Induced Acute Kidney Injury

In the FY 2012 IPPS/LTCH PPS proposed rule (76 FR 25813 and 25814), we discussed our analysis for a proposed new condition as a possible candidate for selection for FY 2012 under section 1886(d)(4)(D) of the Act. As described in more detail in section II.F.1.a. of this preamble, each HAC must be: (1) High cost, high volume, or both; (2) assigned to a higher paying MS–DRG when present as a secondary diagnosis (that is, conditions under the MS–DRG system that are CCs or MCCs); and (3) could reasonably have been prevented through the application of evidence-based guidelines. We also discussed other considerations relating to the selection of a HAC, including any administrative or operational issues associated with a proposed condition. For example, the condition may only be able to be identified by multiple codes, thereby requiring the development of special GROUPER logic to also exclude similar or related ICD–9–CM codes from being classified as a CC or an MCC. Similarly, a condition acquired during a hospital stay may arise from another condition that the patient had prior to admission, making it difficult to determine whether the condition was reasonably preventable. We invited public comment on clinical, coding, and

prevention issues on our proposal to add contrast-induced acute kidney injury as a condition subject to the HAC payment provision for FY 2012 (for discharges occurring on or after October 1, 2011).

Contrast-induced acute kidney injury is a significant complication of the use of iodinated contrast media and accounts for a large number of cases of hospital-acquired acute kidney injury cases. A published study has shown that renal failure associated with contrast administration is correlated with up to 11 percent of cases of renal failure that occur in hospitals (Nash, K., Hafeez, A., *et al*: “Hospital-Acquired Renal Insufficiency,” *American Journal on Kidney Disease*, 2002, Vol. 39, No. 5, pp. 930–936). Patients who experience acute kidney injury have an increased risk of in-hospital mortality even after adjustments for disease comorbidities (McCullough, J.: “Contrast-Induced Acute Kidney Injury,” *Journal of the American College of Cardiology*, 2008, Vol. 51, No. 15, pp. 1419–1428). Data suggest that the risk for mortality extends beyond the period of hospitalization, resulting in 1-year and 5-year mortality rates significantly higher than those patients who have not developed acute kidney injury. In addition, contrast-induced acute kidney injury is associated with an increased incidence of myocardial infarction, bleeding requiring transfusion, and prolonged hospital stays (McCullough, J.: *American Journal of Medicine*, 1997, Vol. 103, pp. 368–375). We note that “acute kidney injury” is a new terminology endorsed by the National Kidney Foundation to replace “acute renal failure.”

There is not a unique code that identifies kidney injury. However, kidney injury can be identified as a subset of discharges with ICD–9–CM diagnosis code 584.9 (Acute kidney failure, unspecified). As we discussed in the FY 2012 IPPS/LTCH PPS proposed rule, our clinical advisors believe that diagnosis code 584.9, in combination with the associated procedure codes listed below, can accurately identify contrast-induced acute kidney injury:

- 88.40 (Arteriography using contrast material, unspecified site)
- 88.41 (Arteriography of cerebral arteries)
- 88.42 (Aortography)
- 88.43 (Arteriography of pulmonary arteries)
- 88.44 (Arteriography of other intrathoracic vessels)
- 88.45 (Arteriography of renal arteries)
- 88.46 (Arteriography of placenta)
- 88.47 (Arteriography of other intra-abdominal arteries)

- 88.48 (Arteriography of femoral and other lower extremity arteries)
- 88.49 (Arteriography of other specified sites)
- 88.50 (Angiocardiology, not otherwise specified)
- 88.51 (Angiocardiology of venae cavae)
- 88.52 (Angiocardiology of right heart structures)
- 88.53 (Angiocardiology of left heart structures)
- 88.54 (Combined right and left heart angiocardiology)
- 88.55 (Coronary arteriography using a single catheter)
- 88.56 (Coronary arteriography using two catheters)
- 88.57 (Other and unspecified coronary arteriography)
- 88.58 (Negative-contrast cardiac roentgenography)
- 88.59 (Intra-operative coronary fluorescence vascular angiography)
- 88.60 (Phlebography using contrast material, unspecified site)
- 88.61 (Phlebography of veins of head and neck using contrast material)
- 88.62 (Phlebography of pulmonary veins using contrast material)
- 88.63 (Phlebography of other intrathoracic veins using contrast material)
- 88.64 (Phlebography of the portal venous system using contrast material)
- 88.65 (Phlebography of other intra-abdominal veins using contrast material)
- 88.66 (Phlebography of femoral and other lower extremity veins using contrast material)
- 88.67 (Phlebography of other specified sites using contrast material)
- 87.71 (C.A.T. of kidney)
- 87.72 (Other nephrotomogram)
- 87.73 (Intravenous pyelogram)
- 87.74 (Retrograde pyelogram)
- 87.75 (Percutaneous pyelogram)

We proposed to identify contrast-induced acute kidney injury with diagnosis code 584.9 in combination with one or more of the above associated procedure codes.

We also considered identifying contrast-induced acute kidney injury through the use of external injury codes, or E-codes. Code E947.8 (Other drugs and medicinal substances) has an inclusion term "Contrast media used for diagnostic x-ray procedures" to identify the use of contrast. However, as we noted in the proposed rule, we do not currently require the reporting of E-codes for the HAC payment provisions under the IPPS. Therefore, we were unable to rely on the identification of contrast-induced acute kidney injury

through E-codes on Medicare IPPS HACs claims.

Section 1886(d)(4)(D) of the Act requires that a HAC be a condition that is "high cost, high volume, or both." In FY 2009, there were 38,324 inpatient discharges coded with acute renal failure as specified by ICD-9-CM diagnosis code 584.9 reported as not present on admission (POA status = N) when reported with one of the above procedure codes submitted through Medicare claims. The cases had an average charge of \$29,122 for the entire hospital stay. Studies suggest the additional average cost per day for a patient who has acquired contrast-induced acute kidney injury is \$2,654. Other data report patients stays increases by 3.75 days once they have acquired the diagnosis (Subramanian, S.: "Economic Burden of Contrast-Induced Nephropathy: Implications for Prevention Strategies," *Journal of Medical Economics*, 2007, Vol. 10, pp. 119-134).

There are widely recognized guidelines for the prevention of acute kidney injury that address the prevention of contrast-induced acute kidney injury, and we believe the condition is reasonably preventable. One of these guidelines can be found at: <http://www.renal.org/Clinical/GuidelinesSection/AcuteKidneyInjury.aspx>.

The condition of contrast-induced acute kidney injury as specified in our proposal is a CC under the MS-DRGs.

We indicated in the proposed rule that we had not identified any additional administrative or operational difficulties with proposing this condition as a HAC. We invited public comment on whether contrast-induced acute kidney injury meets the requirements set forth under section 1886(d)(4)(D) of the Act, as well as other coding and prevention issues associated with our proposal to add this injury as a condition subject to the HAC payment provision for FY 2012 (for discharges occurring on or after October 1, 2011). We also indicated that we were particularly interested in receiving comments on the degree to which contrast-induced acute kidney injury is reasonably preventable through the application of evidence-based guidelines.

Comment: One commenter supported CMS' proposal to add contrast-induced acute kidney injury as a HAC under section 1886(d)(4)(D) of the Act. The commenter applauded the inclusion of contrast-induced acute kidney injury to the HAC policy for FY 2012, and encouraged CMS to continue to expand and refine the HACs and categories.

Response: We appreciate the commenter's support.

Comment: Many commenters discussed their concerns regarding the specificity and sensitivity of the ICD-9-CM codes proposed to identify the proposed new contrast-induced acute kidney injury HAC. The commenters believed that these codes would not solely capture contrast-induced acute kidney injury and would capture other conditions as well. The commenters expressed concern about the specificity of the current ICD-9-CM code 584.9 in reliably identifying cases of acute kidney injury that occurred due to a specific diagnosis instead of acute kidney injury that is believed to occur secondary to being correlated with exposure to contrast. The commenter stated that, for example, a patient admitted to a hospital could experience drug-induced kidney injury that has resolved; later during that hospital stay, the patient has a subsequent angiographic procedure. Under our proposed methodology, the commenter added, this patient would be erroneously identified as having contrast-induced acute kidney injury.

Some commenters suggested that CMS use E-codes, which identify injuries, while others did not support the use of E-codes because they are not consistently coded for Medicare billing purposes. Commenters further noted that the list of ICD-9-CM procedure codes proposed to assist in identifying the use of contrast as the reason for the acute kidney injury occurring are often not reported on hospital claims. The commenters explained that most of the codes do not represent procedures affecting payment, are not required, and, therefore, are not reported.

Other commenters recommended waiting to finalize this proposed candidate condition until the ICD-10 code set is implemented. The commenters suggested that a unique code to identify and describe contrast-induced acute kidney injury could be proposed in ICD-10, and this would eliminate the coding limitations that currently exist for this condition in ICD-9-CM.

Response: We acknowledge the commenters' concerns regarding the current ICD-9-CM coding issues surrounding contrast-induced acute kidney injury, and that our proposal could inadvertently include claims for beneficiaries who experience acute kidney injury that may not be contrast-induced. We note that, as discussed in the FY 2008 IPPS final rule with comment period (72 FR 47216), under 42 CFR 412.60(d), a hospital has 60 days after the date of the notice of the initial

assignment of a discharge to a DRG to request a review of that assignment. The hospital may submit additional information as a part of its request. A hospital that believes a discharge was assigned to the incorrect DRG as a result of application of the payment adjustment for HACs may request review of the DRG assignment by its fiscal intermediary or MAC. However, we also recognize that it is important to be as precise as possible in specifying which codes to use to identify a HAC, and that a lack of precision could increase hospitals' administrative burden in pursuing these appeals.

In addition, we recognize that E-codes do capture injuries and could offer more precision in identifying contrast-induced acute kidney injury than our proposal. We also agree with the commenters who pointed out that E-codes are currently not required for Medicare billing purposes and, therefore, are inconsistently reported on claims. We note further that because these codes are not required for Medicare IPPS payment purposes, MS-DRG assignments do not currently take E-codes into account.

We also appreciate the comments that pointed out that the procedure codes identified in our proposal are often not reported. We note that commenters asserted that these codes were not reported because they did not affect payment. We are concerned that the potential for reduced payment would create a further disincentive to include these procedure codes on Medicare claims. As we stated earlier, we recognize that it is important to be as precise as possible in the interest of payment accuracy in specifying which codes to use to identify a HAC.

We also agree that ICD-10 will offer a greater degree of specificity. Currently, no code exists within ICD-10 that would exclusively capture contrast-induced acute kidney injury. We note that, as discussed in the FY 2012 IPPS/LTCH proposed rule (76 FR 25843), and in section II.G.13.b. of this final rule, a partial code freeze was discussed at multiple meetings of the ICD-9-CM Coordination and Maintenance Committee, and public comment was actively solicited. At the September 15-16, 2010 meeting, an announcement was made that the ICD-9-CM Coordination and Maintenance Committee will implement a partial freeze of the ICD-9-CM and ICD-10 (ICD-10-CM and ICD-10-PCS) codes prior to the implementation of ICD-10 on October 1, 2013. There was considerable support for this partial freeze. The partial freeze will be implemented as follows:

- The last regular, annual updates to both ICD-9-CM and ICD-10 code sets will be made on October 1, 2011.

- On October 1, 2012, there will be only limited code updates to both the ICD-9-CM and ICD-10 code sets to capture new technologies and diseases as required by section 503(a) of Public Law 108-173.

- On October 1, 2013, there will be only limited code updates to ICD-10 code sets to capture new technologies and diagnoses as required by section 503(a) of Public Law 108-173. There will be no updates to ICD-9-CM, as it will no longer be used for reporting.

- On October 1, 2014, regular updates to ICD-10 will begin.

The ICD-9-CM Coordination and Maintenance Committee will continue to meet twice a year during the partial freeze. At these meetings, the public will be asked to comment on whether or not requests for new diagnosis or procedure codes should be created based on the criteria of the need to capture a new technology or disease. Any code requests that do not meet the criteria will be evaluated for implementation within ICD-10 on and after October 1, 2014, once the partial freeze has ended.

In summary, we agree with the commenters' recommendations regarding coding and are deferring decision making regarding the inclusion of contrast-induced acute kidney injury as a HAC until such a time when improved coding is available.

Comment: Several commenters submitted comments pertaining to the sufficiency or strength of the evidence-based guidelines in terms of providing information or direction that would lead to the prevention of contrast-induced acute kidney injury 100 percent of the time. The commenters stated that evidence-based guidelines are based on varying levels of evidence, from expert consensus based on opinion (the "weakest" level) to expert consensus based on data produced in randomized controlled trials (the "strongest" level). According to the commenters, in many cases, the guidelines do not address all patient populations. Commenters also stated that current evidence-based guidelines for decreasing the incidence of contrast-induced acute kidney injury are limited. The commenters also noted that new guidelines addressing the topic of contrast-induced acute kidney injury are being published in late summer of 2011 by an international organization, Kidney Disease Improving Global Outcomes (KDIGO), after a multiyear development process. They noted that CMS should take these guidelines into

consideration when they become available.

Response: We acknowledge that different types of evidence-based guidelines exist. However, we believe that the inclusion of contrast-induced acute kidney injury in the current evidence-based guidelines for Acute Kidney Injury supports the inclusion of contrast-induced acute kidney injury as a condition on the HAC list. We agree that any new evidence-based guidelines for contrast-induced acute kidney injury should be considered when they become available.

Comment: A few commenters expressed concern about the proposal potentially creating an incentive for practitioners to avoid necessary contrast use in patients with high risk of acute kidney disease.

Response: We acknowledge and are sensitive to the theoretical possibility of patient access to care being restricted. We are unaware of significant data supporting this assertion, but we will continue to monitor the situation for potential unintended consequences with regard to this concern.

Comment: Some commenters recommended that CMS not reduce payment for this condition, but to instead develop a quality measure that would track it. The commenters noted that such a measure could track whether the appropriate evidence-based steps to prevent contrast-induced acute kidney injury have been performed and documented.

Response: We appreciate the commenters' recommendation. We note that we did not propose to develop a quality measure for contrast-induced acute kidney injury in the proposed rule. Thus, we consider this comment to be outside of the scope of the provisions discussed in the proposed rule. However, this subject area represents an area of continued interest and opportunity for the agency, and we will take this recommendation into consideration during the development of future rulemaking.

In conclusion, after consideration of the public comments we received, we are deferring the decision making on the addition of contrast-induced acute kidney injury as a HAC until future rulemaking, and such a time when improved coding is available for the reasons described above. We note that the reduction of contrast-induced acute kidney injury represents an area of continued interest for the agency, and we believe that substantial opportunity exists for hospitals to improve quality in this area.

b. Additional New Diagnosis Codes for Existing HACs

As we discussed in the FY 2012 IPPS/LTCH PPS proposed rule (76 FR 25814), as changes to diagnosis codes and new diagnosis codes are proposed and finalized for the list of CCs and MCCs, we modify the list of selected HACs to reflect these changes. We included in Table 6A of the proposed rule (which was made available via the Internet) the five new ICD-9-CM diagnosis codes that we proposed to add to three of the current HAC categories. We proposed to add two new codes for the Falls and Trauma HAC category, two new codes for the Surgical Site Infection (SSI) Following Certain Bariatric Procedures HAC category, and one new code for the Deep Vein Thrombosis and Pulmonary

Embolism (DVT/PE) Following Certain Orthopedic Procedures HAC category. The two new diagnosis codes that we proposed to add to the Falls and Trauma HAC category were code 808.44 (Multiple closed pelvic fractures without disruption of pelvic circle) and code 808.54 (Multiple open pelvic fractures without disruption of pelvic circle). These codes fall within the range of the fracture code subcategory (800 through 829). The two new diagnosis codes that we proposed to add to the Surgical Site Infection (SSI) Following Certain Bariatric Procedures HAC category were code 539.01 (Infection due to gastric band procedure) and code 539.81 (Infection due to other bariatric procedure). We stated our belief that these diagnosis codes are appropriate for inclusion in the existing category

when reported as a secondary diagnosis with the specified principal diagnosis code of morbid obesity (code 278.01) and one of the designated bariatric procedure codes (code 44.38, 44.39, or 44.95). Lastly, the one new diagnosis code that we proposed to add to the Deep Vein Thrombosis and Pulmonary Embolism (DVT/PE) Following Certain Orthopedic Procedures HAC category was code 415.13 (Saddle embolus of pulmonary artery). Diagnosis code 415.13 would be applicable when reported along with one of the following procedures codes describing certain orthopedic procedures: 00.85 through 00.87, 81.51, 81.52, or 81.54. Shown in the table below are these five new diagnosis codes with their corresponding descriptions and their proposed CC/MCC designations.

ICD-9-CM code	Code descriptor	Proposed CC/MCC designation
539.01	Infection due to gastric band procedure	CC
539.81	Infection due to other bariatric procedure	CC
415.13	Saddle embolus of pulmonary artery	MCC
808.44	Multiple closed pelvic fractures without disruption of pelvic circle	CC
808.54	Multiple open pelvic fractures without disruption of pelvic circle	MCC

We invited public comments on the proposed adoption of these five new ICD-9-CM diagnosis codes as CC/MCCs that are listed above, which, if finalized, would be added to the current Falls and Trauma HAC category, Surgical Site Infection (SSI) Following Certain Bariatric Procedures HAC category and Deep Vein Thrombosis and Pulmonary Embolism (DVT/PE) Following Certain Orthopedic Procedures HAC category and would be subject to the HAC payment provision for FY 2012.

Comment: Several commenters supported CMS' proposal to adopt the five new ICD-9-CM diagnosis codes with their proposed CC/MCC designations for addition to the current Falls and Trauma HAC category, Surgical Site Infection (SSI) Following Certain Bariatric Procedures HAC category, and Deep Vein Thrombosis and Pulmonary Embolism (DVT/PE) Following Certain Orthopedic Procedures HAC category and to subject them to the HAC payment provision for FY 2012.

Response: We appreciate the commenters' support.

Comment: One commenter expressed concern regarding the appropriateness of adding ICD-9-CM diagnosis code 415.13 as a condition that, when reported along with the designated procedure codes describing certain orthopedic procedures (00.85 through

00.87, 81.51, 81.52, or 81.54) in the Deep Vein Thrombosis and Pulmonary Embolism (DVT/PE) Following Certain Orthopedic Procedures HAC category, be subject to the HAC payment provision. The commenter stated that HAC selection should be based on conditions considered to be reasonably preventable with adherence to evidence-based practice guidelines. The commenter further believed that a saddle embolus of the pulmonary artery, when reported with the cited orthopedic procedure codes, is not a condition that is "reasonably preventable" and that patients undergoing total knee replacement and total hip replacement in the Medicare population are at the highest risk for developing a DVT/PE.

The commenter also stated that the current structure of the MS-DRG system does not specifically risk-adjust for these conditions in the MS-DRGs related to primary total hip replacement (code 81.51) or primary total knee replacement (code 81.54). The commenter believed that risk adjustment is an indispensable component of an equitable HAC policy. The commenter suggested that CMS account for the patient-specific risk factors that affect preventability and reported that many hospitalized patients have comorbidities and other patient characteristics that put them at an increased risk of complications. The

commenter suggested that CMS take these factors into account in creating a policy that is reasonable and equitable, in order to minimize incentives for limiting access for patients who are at higher risk for complications.

This same commenter also expressed support of CMS' efforts to encourage the adoption of evidence-based treatment guidelines that could improve the quality of care for patients. However, while the commenter noted that evidence-based guidelines can reduce events, the commenter asserted that CMS selected one of the patient populations at highest risk for DVT/PE, diverging from the concept of "reasonably preventable."

Response: We appreciate the commenter's detailed comments on the proposal to add diagnosis code 415.13 as a condition that, when reported along with the designated procedure codes described above, is subject to the HAC payment provision. In the FY 2008 IPPS final rule with comment period (72 FR 47200 through 47218), we discussed the evidence based guidelines regarding DVT/PE and agreed with commenters that this is reasonably preventable. In the FY 2009 IPPS final rule (73 FR 48481), we addressed commenters' concerns regarding the preventability of DVT/PE and noted that the statute does not require that a condition be "always preventable" in order to qualify as an

HAC, but rather that it be “reasonably preventable,” which necessarily implies something less than 100 percent.

With regard to the commenter’s assertion that risk adjustment is an indispensable component of an equitable HAC policy, we refer readers to the FY 2009 IPPS final rule and the FY 2010 IPPS/RV 2010 LTCH PPS final rule. In the FY 2009 IPPS final rule (73 FR 48487 through 48488), we discussed risk adjustment of payments related to HACs. We addressed this issue again in the FY 2010 IPPS/RV 2010 LTCH PPS final rule (74 FR 43785), where we noted that a risk adjustment methodology may lead to greater precision of HAC payment determinations. As part of the RTI evaluation of the HAC-POA program, the concept of risk adjustment continues to be an important area of interest and study for the agency. We will consider the results of RTI’s evaluation when it is complete and, if appropriate, make a proposal and solicit public comment in future rulemaking.

After consideration of the public comments we received, we are finalizing the adoption of the five new ICD-9-CM diagnosis codes described above as CC/MCCs to be added to their respective HAC categories as proposed. Therefore, effective October 1, 2011 (FY 2012), procedure codes 808.44 and 808.54 describing multiple pelvic fractures will be added to the Falls and Trauma HAC category, procedure codes 539.01 and 539.81 describing infections related to gastric procedures will be added to the Surgical Site Infection (SSI) Following Certain Bariatric Procedures HAC category, and procedure code 415.13 describing a type of pulmonary embolus will be added to the Deep Vein Thrombosis and Pulmonary Embolism (DVT/PE) Following Certain Orthopedic Procedures HAC category. All of these conditions will be subject to the HAC payment provision for FY 2012.

c. Revision to HAC Subcategory Title

After publication of the FY 2011 IPPS/LTCH PPS final rule, we received a comment stating that the subcategory title “Electric Shock” that is included in the Falls and Trauma HAC category was misleading. The commenter stated that this subcategory title did not accurately describe the CC/MCC ICD-9-CM diagnoses codes (991 through 994) contained within this subcategory. The commenter requested that CMS develop a new title that would more accurately describe this group of codes.

In the FY 2012 IPPS/LTCH PPS proposed rule (76 FR 25814), we stated that we agreed with the commenter that the HAC subcategory title “Electric Shock” is potentially misleading because the codes included within these ranges contain a variety of injuries, including the following:

- Category 991 (Effects of Reduced Temperature)
- Category 992 (Effects of Heat and Light)
- Category 993 (Effects of Air Pressure)
- Category 994 (Effects of Other External Causes)

We proposed to change the title of this HAC subcategory from “Electric Shock” to “Other Injuries” because it includes a variety of injury codes. The subcategory will continue to include the codes within the 991 through 994 code ranges appearing on the CC/MCC list. We did not propose any changes to the list of codes in this subcategory; we simply proposed to rename the subcategory title. We invited public comments on the proposed title change to the HAC subcategory from “Electric Shock” to “Other Injuries” for FY 2012.

Comment: Several commenters supported CMS’ proposal to change the title of this HAC subcategory from “Electric Shock” to “Other Injuries” because it includes a variety of injury codes. The commenters stated that this title change would better describe the conditions included in the range of codes.

Response: We appreciate the commenters’ support.

After consideration of the public comments we received, we are finalizing our proposal to change the title of the HAC subcategory from “Electric Shock” to “Other Injuries.” The subcategory will continue to include the codes within the 991 through 994 code ranges appearing on the CC/MCC list. In addition, we are not making any changes to the list of codes in this subcategory; the subcategory title will simply be renamed effective FY 2012.

d. Conclusion

In the FY 2012 IPPS/LTCH PPS proposed rule, we listed the current HAC categories and the ICD-9-CM codes that identify the conditions and have been finalized through FY 2011. For FY 2012, we proposed that these conditions continue to be subject to the HAC payment provision, along with the creation of a new HAC category for contrast-induced acute kidney injury. (We note that, as discussed in section II.F.2.a. of the preamble of the proposed rule and this final rule, we are not adopting our proposal to add a new HAC category for contrast-induced acute kidney injury for FY 2012.) In addition, we proposed to add five new ICD-9-CM diagnosis codes and to revise the title of the “Electric Shock” subcategory in the Falls and Trauma HAC category.

Comment: Several commenters supported maintaining the current HAC categories and the ICD-9-CM codes that identify those conditions. These commenters agreed that the conditions should continue to be subject to the HAC payment provision for FY 2012.

Response: We appreciate the commenters’ support.

After consideration of the public comments we received, we are adopting the following list of HAC categories and the ICD-9-CM codes that identify the conditions that have been finalized through FY 2011 and that we are finalizing in this final rule for FY 2012.

HAC	CC/MCC (ICD-9-CM Code)
Foreign Object Retained After Surgery	998.4 (CC) 998.7 (CC)
Air Embolism	999.1 (MCC)
Blood Incompatibility	999.60 (CC) 999.61 (CC) 999.62 (CC) 999.63 (CC) 999.69 (CC)
Pressure Ulcer Stages III & IV	707.23 (MCC) 707.24 (MCC)
Falls and Trauma:	Codes within these ranges on the CC/MCC list:
—Fracture	800–829
—Dislocation	830–839

HAC	CC/MCC (ICD-9-CM Code)
—Intracranial Injury	850–854
—Crushing Injury	925–929
—Burn	940–949
—Other Injuries	991–994
Catheter-Associated Urinary Tract Infection (UTI)	996.64 (CC) Also excludes the following from acting as a CC/MCC: 112.2 (CC) 590.10 (CC) 590.11 (MCC) 590.2 (MCC) 590.3 (CC) 590.80 (CC) 590.81 (CC) 595.0 (CC) 597.0 (CC) 599.0 (CC)
Vascular Catheter-Associated Infection	999.31 (CC)
Manifestations of Poor Glycemic Control	250.10–250.13 (MCC) 250.20–250.23 (MCC) 251.0 (CC) 249.10–249.11 (MCC) 249.20–249.21 (MCC)

Surgical Site Infections

Surgical Site Infection, Mediastinitis, Following Coronary Artery Bypass Graft (CABG).	519.2 (MCC) And one of the following procedure codes: 36.10–36.19
Surgical Site Infection Following Certain Orthopedic Procedures	996.67 (CC) 998.59 (CC) And one of the following procedure codes: 81.01–81.08, 81.23–81.24, 81.31–81.38, 81.83, 81.85
Surgical Site Infection Following Bariatric Surgery for Obesity	<i>Principal Diagnosis</i> —278.01 539.01 (CC) 539.81 (CC) 998.59 (CC) And one of the following procedure codes: 44.38, 44.39, or 44.95
Deep Vein Thrombosis and Pulmonary Embolism Following Certain Orthopedic Procedures.	415.11 (MCC) 415.13 (MCC) 415.19 (MCC) 453.40–453.42 (CC) And one of the following procedure codes: 00.85–00.87, 81.51–81.52, or 81.54

We refer readers to section II.F.6. of the FY 2008 IPPS final rule with comment period (72 FR 47202 through 47218) and to section II.F.7. of the FY 2009 IPPS final rule (73 FR 48474 through 48486) for detailed analyses supporting the selection of each of the HACs selected through FY 2012.

3. RTI Program Evaluation Summary
a. Background

On September 30, 2009, a contract was awarded to Research Triangle Institute, International (RTI) to evaluate the impact of the Hospital-Acquired Condition-Present on Admission (HAC-POA) provisions on the changes in the incidence of selected conditions, effects on Medicare payments, impacts on coding accuracy, unintended consequences, and infection and event rates. This is an intra-agency project with funding and technical support coming from CMS, OPHS, AHRQ, and

CDC. The evaluation will also examine the implementation of the program and evaluate additional conditions for future selection.

RTI's evaluation of the HAC-POA provisions is divided into several parts. In the FY 2011 IPPS/LTCH PPS final rule (50085 through 50101), we summarized the analyses by RTI that had been completed at that time. These RTI analyses of POA indicator reporting, frequencies and net savings associated with current HACs, and frequencies of previously considered candidate HACs reflected MedPAR claims from October 2008 through September 2009.

b. FY 2009 Data Analysis

As we describe in section II.F.1.f. of this preamble, we have provided instructions to IPPS hospitals and non-IPPS hospitals regarding the submission of POA indicator data for all diagnosis codes on Medicare claims and the

processing of non-PPS claims (75 FR 23381) and note that specific instructions on how to select the correct POA indicator for each diagnosis code were included in the *ICD-9-CM Official Guidelines for Coding and Reporting*, available on the CDC Web site at: <http://www.cdc.gov/nchs/data/icd9/icdguide10.pdf>. After publication of the FY 2011 IPPS/LTCH PPS final rule, we identified a discrepancy between the claims data that hospitals submitted and the CMS data file used to calculate the HAC measures. Specifically, this error led to incorrect HAC assignments in cases where a hospital reported an external cause of injury (E-code). Since then, we have corrected this error in the data file.

As a result, the RTI analysis of the HAC-POA program that was conducted using FY 2009 claims data was updated using the corrected data file. The corrected data do not appear to have a

material impact on our previous findings for FY 2009. Revised data tables were made publicly available on the CMS Web site at http://www.cms.gov/HospitalAcqCond/01_Overview.asp and the RTI Web site at <http://www.rti.org/reports/cms/> after publication of the FY 2012 IPPS/LTCH PPS proposed rule.

c. FY 2010 Data Analysis

RTI's analysis of the FY 2010 MedPAR data file for the HAC-POA program evaluation was prepared for publication in the FY 2012 IPPS/LTCH PPS proposed rule. We indicated in the proposed rule that we would provide the results from the study on the CMS Web site at http://www.cms.gov/HospitalAcqCond/01_Overview.asp and on the RTI Web site at <http://www.rti.org/reports/cms/> when it became available. We also stated that we

anticipated that the examination of FY 2010 MedPAR data would be completed soon after publication of the proposed rule. We invited public comment on RTI's analysis of the FY 2010 MedPAR data for the HAC-POA program.

Since publication of the FY 2012 IPPS/LTCH proposed rule, we determined that it would be beneficial to the public if we provided a summary of the results of RTI's HAC-POA program evaluation of the FY 2010 MedPAR data in this FY 2012 IPPS/LTCH final rule, in addition to making these results available on both the CMS and RTI Web sites mentioned above. Below we present a summary of these results.

d. FY 2010 RTI Analysis on POA Indicator Reporting of Current HACs.

To better understand the impact of HACs on the Medicare program, it is

necessary to first examine the incidence of POA indicator reporting across all eligible Medicare discharges. As mentioned previously, only IPPS hospitals are required to submit POA indicator data for all diagnosis codes on Medicare claims. Therefore, all non-IPPS hospitals were excluded, as well as providers in waiver States (Maryland) and territories other than Puerto Rico.

Using MedPAR claims data from October 2009 through September 2010, RTI found a total of approximately 74.38 million secondary diagnoses across approximately 10.2 million discharges. As shown in Chart A below, the majority of all secondary diagnoses (80.94 percent) were reported with a POA indicator of "Y," meaning the condition was POA.

CHART A—POA CODE DISTRIBUTION ACROSS ALL SECONDARY DIAGNOSES

	Number	Percentage
Total Discharges in Final File		10,189,168
Total Number of Secondary Diagnoses Across Total Discharges	74,382,681	100.00
POA Indicator Description:		
Y Condition present on admission	60,206,593	80.94
W Status cannot be clinically determined	13,145	0.02
N Condition not present on admission	5,001,138	6.72
U Documentation not adequate to determine if condition was present on admission	2,223,318	2.99
1 Exempted ICD-9-CM code	6,938,487	9.33

Source: RTI Analysis of MedPAR IPPS Claims, October 2009 through September 2010.

Following the initial analysis of POA indicator reporting for all secondary diagnoses, RTI then evaluated POA indicator reporting for specific HAC-associated secondary diagnoses. The term "HAC-associated secondary diagnosis" refers to those diagnoses that are on the selected HAC list and were reported as a secondary diagnosis. Chart B below shows a summary of the HAC categories with the frequency in which each HAC was reported as a secondary diagnosis and the corresponding POA indicators assigned on the claims. It is important to note that, because more than one HAC-associated diagnosis code can be reported per discharge (that is,

on a single claim), the frequency of HAC-associated diagnosis codes may be more than the actual number of discharges that have a HAC-associated diagnosis code reported as a secondary diagnosis. Below we discuss the frequency of each HAC-associated diagnosis code and the POA indicators assigned to those claims.

RTI analyzed the frequency of each reported HAC-associated secondary diagnosis (across all approximately 10.2 million discharges) and the POA indicator assigned to the claim. Chart B below shows that the most frequently reported conditions were in the Falls and Trauma HAC category, with a total of 189,231 HAC-associated diagnosis

codes being reported for that HAC category. Of these 189,231 diagnoses, 5,762 reported a POA indicator of "N" and 326 reported a POA indicator of "U" for not POA. Similarly, 183,048 diagnoses reported a POA indicator of "Y" for POA and 95 diagnoses reported a POA indicator of "W." The lowest frequency appears in the Surgical Site Infection (SSI) Following Bariatric Surgery for Obesity HAC category with only 18 HAC-associated secondary diagnosis codes (and procedure codes) reported, where 17 diagnoses were reported with a POA indicator of "N" and 1 diagnosis was reported with a POA indicator of "Y."

CHART B—POA STATUS OF CURRENT HACs: OCTOBER 2009 THROUGH SEPTEMBER 2010

Selected HAC	Frequency as a secondary diagnosis	Treated as hospital acquired conditions				Not treated as Hospital acquired conditions			
		POA = N		POA = U		POA = Y		POA = W	
		Number	Percent	Number	Percent	Number	Percent	Number	Percent
1. Foreign Object Retained After Surgery (CC)	565	278	49.2	1	0.2	286	50.6	0	0.0
2. Air Embolism (MCC)	42	29	69.0	0	0.0	13	31.0	0	0.0
3. Blood Incompatibility (CC)	35	12	34.3	0	0.0	23	65.7	0	0.0
4. Pressure Ulcer Stages III & IV (MCC)	120,582	1,407	1.2	81	0.1	119,065	98.7	29	0.0

CHART B—POA STATUS OF CURRENT HACs: OCTOBER 2009 THROUGH SEPTEMBER 2010—Continued

Selected HAC	Frequency as a secondary diagnosis	Treated as hospital acquired conditions				Not treated as Hospital acquired conditions			
		POA = N		POA = U		POA = Y		POA = W	
		Number	Percent	Number	Percent	Number	Percent	Number	Percent
5. Falls and Trauma (MCC & CC)	189,231	5,762	3.0	326	0.2	183,048	96.7	95	0.1
6. Catheter-Associated UTI (CC)	18,247	3,877	21.2	24	0.1	14,319	78.5	27	0.1
7. Vascular Catheter-Associated Infection (CC)	10,066	4,346	43.2	25	0.2	5,673	56.4	22	0.2
8. Poor Glycemic Control (MCC)	16,468	565	3.4	14	0.1	15,888	96.5	1	0.0
9A. Surgical Site Infection Mediastinitis CABG (CC)	40	36	90.0	0	0.0	4	10.0	0	0.0
9B. Surgical Site Infection Following Certain Orthopedic Procedures (CC)	365	220	60.3	1	0.3	144	39.5	0	0.0
9C. Surgical Site Infection Following Bariatric Surgery for Obesity (CC)	18	17	94.4	0	0.0	1	5.6	0	0.0
10. Pulmonary Embolism & DVT Orthopedic (MCC)	3,820	3,132	82.0	16	0.4	648	17.0	24	0.6
Total*	359,479	19,681	5.5	488	0.1	339,112	94.3	198	0.1

As described in section II.F.1.f. of this preamble, in the FY 2009 IPPS final rule (73 FR 48486 through 48487), we adopted final payment policies to: (1) Pay the CC/MCC MS-DRGs for those HACs coded with “Y” and “W” indicators; and (2) not pay the CC/MCC MS-DRGs for those HACs coded with “N” and “U” indicators. We also discussed the comments we received urging CMS to consider changing the policy and to pay for those HACs assigned a POA indicator of “U” (documentation is insufficient to determine if the condition was present at the time of admission). We stated we would monitor the extent to which and under what circumstances the “U” POA reporting option is used. In the FY 2010 IPPS/R Y 2010 LTCH PPS final rule (74 FR 43784 and 43785), we also discussed and responded to comments regarding HACs coded with the “U” indicator. As shown in Chart B above, RTI’s analysis provides data on a total of 488 HAC-associated secondary diagnoses reported with a POA indicator of “U.” These 488 diagnoses represented 2.4 percent of the 20,169 diagnoses that were considered not POA (that is, POA indicator of “N” or “U”). Approximately 3 of the 10 conditions reported no diagnoses with POA indicators of “U”: Air embolism, Blood Incompatibility, and two of the three surgical site infections (Mediastinitis after CABG and SSI after bariatric surgery for obesity). For the two most frequently occurring conditions, the Falls and Trauma HAC category and Stage III and/or IV Pressure Ulcers, diagnoses with a POA indicator of “U” represented a small proportion of diagnoses that were considered not POA (that is, POA indicator of “N” or “U”). For the Falls and Trauma HAC category, 5.7 percent of diagnoses (326 cases) considered not POA were reported with a POA indicator of “U.” For Stage III and/or IV Pressure Ulcers, 5.4 percent of

diagnoses (81 cases) considered not POA were reported with a POA indicator of “U.” These two categories also represented the conditions where diagnoses with a POA indicator of “U” were the highest proportion of diagnoses considered not POA. We consider the range of 0 to 5.7 percent to indicate that “U” is not used with great frequency for these 10 conditions. In the proposed rule, we stated that we did not contemplate a proposal to change our policy under which CMS does not pay at the higher CC/MCC amount when a selected HAC diagnosis code is reported with a POA indicator of “U.” The data analysis described above continues to support our policy.

We encourage readers to further review the RTI detailed report which demonstrates the frequency of each individual HAC-associated diagnosis code within the HAC categories. As an example, we note that in the Foreign Object Retained After Surgery HAC category, there are two unique ICD-9-CM diagnosis codes used to identify that condition: diagnosis code 998.4 (Foreign body accidentally left during a procedure) and diagnosis code 998.7 (Acute reaction to foreign substance accidentally left during a procedure). In the detailed RTI report, readers can view that diagnosis code 998.4 was reported 547 times and diagnosis code 998.7 was reported 18 times, across all MS-DRGs, for a total of 565 times. The RTI detailed report is available at the following Web site: <http://www.rti.org/reports/cms/>.

e. FY 2010 RTI Analysis of Frequency of Discharges and POA Indicator Reporting for Current HACs

RTI further analyzed the effect of the HAC provision by studying the frequency with which a HAC-associated diagnosis was reported as a secondary diagnosis with a POA indicator of “N” or “U” and, of that number, how many

resulted in MS-DRG reassignment. In Chart C below, Column A shows the number of discharges for each HAC category where the HAC-associated diagnosis was reported as a secondary diagnosis. Column B shows the percent of discharges reporting a HAC-associated diagnosis code relative to the total discharges “at risk” in each HAC category. For HAC categories 1 through 8, both medical and surgical MS-DRGs are included in the total discharges “at risk” so this equates to 10,189,168 discharges. The remaining HAC categories are defined by the combination of diagnosis and procedure codes; therefore, only the surgical MS-DRGs that include the designated procedure codes are included in the total discharges “at risk.” For HAC 9a, the total discharges “at risk” equates to 97,341. For HAC 9b, the total discharges “at risk” equates to 118,815 and for HAC 9c, the total discharges “at risk” equates to 15,698. Lastly, for HAC 10, the total discharges “at risk” equates to 440,571.

Column C shows the number of discharges for each HAC reported with a POA indicator of “N” or “U.” For example, there were 42 discharges that reported Air Embolism as a secondary diagnosis. The chart shows that, of these 42 reported discharges, 29 discharges (69.05 percent) had a POA indicator of “N” or “U” and was identified as a HAC discharge. The HAC policy applied to these 29 discharges, and they could, therefore, have had an MS-DRG reassignment. Column E shows the number of discharges where an actual MS-DRG reassignment occurred. For the Air Embolism HAC, Column E shows that the number of discharges that resulted in actual MS-DRG reassignments is 15 (51.72 percent of the 29 discharges with a POA indicator of “N” or “U”). Thus, while there were 29 discharges (69.05 percent of the original

42 that had air embolism reported as a secondary diagnosis) with an air embolism reported with a POA indicator of “N” or “U” identified as a HAC discharge that could have caused MS–DRG reassignment, 15 discharges (51.72 percent) experienced MS–DRG reassignments. There are a number of reasons why a selected HAC reported with a POA indicator of “N” or “U” will not result in MS–DRG reassignment. These reasons were illustrated with the diagram in section II.F.1.c. of this preamble and will be discussed in further detail in section II.F.3.e. of this preamble.

Chart C below also shows that, of the 317,644 discharges with a HAC-associated diagnosis as a secondary diagnosis, 3,587 discharges ultimately resulted in MS–DRG reassignment. As we discuss below, there were 15 claims that resulted in MS–DRG reassignment where 2 HACs were reported on the same admission. The four HAC categories that had the most discharges resulting in MS–DRG reassignment were: (1) Falls and Trauma; (2) Pulmonary Embolism and DVT Orthopedic (Orthopedic PE/DVT); (3) Pressure Ulcer Stages III & IV; and (4) Catheter-Associated Urinary Tract Infection (UTI).

Codes falling under the Falls and Trauma HAC category were the most frequently reported secondary diagnoses with 154,371 discharges. Of these 154,371 discharges, 5,454 (3.53 percent) were coded as not POA and identified as HAC discharges. This category also contained the greatest number of discharges that resulted in an MS–DRG reassignment. Of the 5,454 discharges within this HAC category that were not POA, 1,672 (30.66 percent) resulted in an MS–DRG reassignment.

Of the 317,644 total discharges reporting HAC-associated diagnoses as a secondary diagnosis, 3,494 discharges were coded with a secondary diagnosis of PE/DVT Orthopedic. Of these 3,494 discharges, 2,876 (82.31 percent) were coded as not POA and identified as HAC discharges. This category

contained the second greatest number of discharges resulting in an MS–DRG reassignment. Of the 2,876 discharges in this HAC category that were not POA, 1,206 discharges (41.93 percent) resulted in an MS–DRG reassignment.

The Pressure Ulcer Stages III & IV category had the second most frequently coded secondary diagnoses, with 114,138 discharges. Of these discharges, 1,444 (1.27 percent) were coded as not POA and identified as HAC discharges. This category contained the third greatest number of discharges resulting in an MS–DRG reassignment. Of the 1,444 discharges in this HAC category that were not POA, 292 discharges (20.22 percent) resulted in an MS–DRG reassignment.

The Catheter-Associated UTI category had the third most frequently coded secondary diagnoses, with 18,247 discharges. Of these discharges, 3,885 (21.29 percent) were coded as not POA and identified as HAC discharges. This category contained the fourth greatest number of discharges resulting in an MS–DRG reassignment. Of the 3,885 discharges in this HAC category that were not POA, 223 discharges (5.74 percent) resulted in a MS–DRG reassignment.

The remaining 6 HAC categories only had 194 discharges that ultimately resulted in MS–DRG reassignment. We note that, even in cases where a large number of HAC-associated secondary diagnoses were coded as not POA, this finding did not necessarily translate into a large number of discharges that resulted in MS–DRG reassignment. For example, only 22 of the 4,366 Vascular Catheter-Associated Infection secondary diagnoses that were coded as not POA and identified as HAC discharges resulted in a MS–DRG reassignment.

There were a total of 364 discharges with a HAC-associated secondary diagnosis reporting a POA indicator of “N” or “U” that were excluded from acting as a HAC discharge (subject to MS–DRG reassignment) due to the CC Exclusion List logic within the GROUPER. The CC Exclusion List

identifies secondary diagnosis codes designated as a CC or MCC that are disregarded by the GROUPER logic when reported with certain principal diagnoses. For example, a claim with the principal diagnosis code of 250.83 (Diabetes with other specified manifestations, type 1 [juvenile type], uncontrolled) and a secondary diagnosis code of 250.13 (Diabetes with ketoacidosis, type 1, [juvenile type], uncontrolled) with a POA indicator of “N” would result in the HAC-associated secondary diagnosis code 250.13 being ignored as a CC. According to the CC Exclusion List, code 250.13 is excluded from acting as a CC when code 250.83 is the principal diagnosis. As a result, the HAC logic would not be applicable to that case. For a detailed discussion on the CC Exclusion List, we refer readers to section II.G.9. of this preamble.

Discharges where the HAC logic was not applicable due to the CC Exclusion List occurred among the following 6 HAC categories: Pressure Ulcer Stages III and IV (29 cases); Falls and Trauma (263 cases); Catheter-Associated UTI (16 cases); Vascular Catheter-Associated Infection (5 cases); Manifestations of Poor Glycemic Control (50 cases); and Surgical Site Infection Following Certain Orthopedic Procedures (1 case). Further information regarding the specific number of cases that were excluded for each HAC-associated secondary diagnosis code within each of the above mentioned HAC categories is also available in the RTI detailed report, which can be found at: <http://www.rti.org/reports/cms/>.

In summary, Chart C below demonstrates that there were a total of 317,644 discharges with a reported HAC-associated secondary diagnosis. Of the total 317,644 discharges, 6.0 percent, or 19,143 discharges, were HACs reported with a POA indicator of “N” or “U” that were identified as a HAC discharge. Approximately 18.7 percent, or 3,587 discharges, of these 19,143 discharges resulted in MS–DRG reassignments.

CHART C—DISCHARGE FREQUENCIES OF CURRENT CMS HACs OCTOBER 2009 THROUGH SEPTEMBER 2010

Selected HAC category	Discharges with this condition as secondary diagnosis		Discharges identified as a HAC		Discharges that change MS–DRG due to HAC	
	Number (column a)	Percent ² (column b)	Number (column c)	Percent ³ (column d)	Number (column e)	Percent ⁴ (column f)

10. Pulmonary Embolism & DVT Orthopedic	3,494	0.79	2,876	82.31	1,206	41.93
Total ¹	317,644	19,143	3,587

¹ Discharges can appear in more than one row. The total figure is not adjusted for the 94 discharges with more than one HAC that appear as secondary diagnoses (15 of these resulted in MS-DRG reassignment).
² Percent computed relative to total discharges “at risk” for this HAC. For HACs 1–8, this is 10,189,168. For HAC 9a, this is 97,341. For HAC 9b, this is 118,815. For HAC 9c, this is 15,698. For HAC 10, this is 440,571.
³ Percent computed relative to discharges with condition as a secondary diagnosis.
⁴ Percent computed relative to discharges with this HAC (Column C).
 Source: RTI Analysis of MedPAR IPPS Claims, October 2009 through September 2010.

An extremely small number of discharges had multiple HACs reported during the same stay. In reviewing the approximately 10.2 million claims, RTI found approximately 94 cases in which 2 HACs were reported on the same discharge. Chart D below summarizes these cases. Thirty-two of the cases with 2 HACs involved Pressure Ulcer Stages III & IV, and 31 cases involved Falls or Trauma. Other multiple HAC cases included 27 Catheter-Associated UTI

cases, 3 Vascular Catheter-Associated Infection cases and 1 Foreign Object Retained After Surgery case. There were eight cases in which a Falls and Trauma HAC was reported together with a Pressure Ulcer Stages III & IV HAC. Some of these cases with multiple HACs reported had both HAC codes ignored in the MS-DRG assignment. Of these 66 claims, 49 did not receive higher payments based on the presence of these reported HACs, and we describe

these claims in section II.F.3.f.(2) of this preamble. Depending on the MS-DRG to which the cases were originally assigned, ignoring the HAC codes would have led to a MS-DRG reassignment if there were no other MCCs or CCs reported, if the MS-DRG was subdivided into severity levels, and if the case were not already in the lowest severity level prior to ignoring the HAC codes.

CHART D—CLAIMS WITH MORE THAN ONE HAC SECONDARY DIAGNOSIS OCTOBER 2009 THROUGH SEPTEMBER 2010

8. Poor Glycemic Control—MCC	1	2	1
9B. Surgical Site Infection Following Certain Orthopedic Procedures—CC	1	2
10. Pulmonary Embolism & DVT Orthopedic—MCC	3	11	6
Total	1	32	31	27	3

f. RTI Analysis of Circumstances When Application of HAC Provisions Would Not Result in MS-DRG Reassignment for Current HACs

As discussed in section II.F.1. and illustrated in the diagram in section II.F.1.c. of this preamble, there are

instances when the MS-DRG assignment does not change even when there is a HAC as a secondary diagnosis (meaning a HAC-associated secondary diagnosis has a POA indicator of either “N” or “U.”) In analyzing our claims data, RTI identified four main reasons

why a MS-DRG assignment would not change despite the presence of a HAC. Those four reasons are described below and are shown in Chart E below. Column A shows the frequency of discharges that included a HAC-associated secondary diagnosis. Column

B shows the frequency of discharges where the HAC-associated secondary diagnosis was coded as not POA and, therefore, identified as a HAC discharge. Column C shows the frequency of discharges in which the HAC-associated secondary diagnosis coded as not POA resulted in a change in MS-DRG. Columns D, E, F, and G show the frequency of discharges in which the HAC-associated secondary diagnosis coded as not POA did not result in a change in MS-DRG assignment. Columns D, E, F, and G are explained in more detail below.

(1) Other MCCs/CCs Prevent Reassignment

Column D (Other MCC/CCs that Prevent Reassignment) in Chart E below indicates the number of cases reporting a HAC (cases with HAC-associated diagnosis codes with a POA of "N" or "U") that did not have a MS-DRG reassignment because of the presence of other secondary diagnoses on the MCC or CC list. A claim that is coded with a HAC-associated secondary diagnoses and a POA status of either "N" or "U" may have other secondary diagnoses that are classified as an MCC or a CC. In such cases, the presence of these other MCC and CC diagnoses will still lead to the assignment of a higher severity level, despite the fact that the GROPER software is disregarding the ICD-9-CM code that identifies the selected HAC in making the MS-DRG assignment for that claim. For example, there were 156 cases in which the ICD-9-CM codes for the Foreign Object Retained After Surgery HAC category were present, but the presence of other secondary diagnoses that were MCCs or CCs resulted in no change to the MS-DRG assignment. Chart E shows that a total of 11,818 cases with HACs did not have a change in the MS-DRG assignment because of the presence of other reported MCCs and CCs. This represents approximately 76 percent of the 15,556 cases with HACs that did not have a change in MS-DRG assignment.

(2) Two Severity Levels Where HAC Does Not Impact MS-DRG Assignment

Column E (Number of MS-DRGs with Two Severity Levels Where HAC Does Not Impact MS-DRG Assignment) shows the frequency with which discharges with a HAC (cases with HAC-associated diagnosis codes with a POA of "N" or "U") did not result in an MS-DRG change because the MS-DRG is subdivided solely by the presence or absence of an MCC. A claim with a HAC and a POA indicator of either "N" or "U" may be assigned to an MS-DRG that is subdivided solely by the

presence or absence of an MCC. In such cases, removing a HAC ICD-9-CM CC code will not lead to further changes in the MS-DRG assignment. Examples of these MS-DRG subdivisions are shown in the footnotes to the chart and include the following examples:

- MS-DRGs 100 and 101 (Seizures with or without MCC, respectively)
- MS-DRGs 102 and 103 (Headaches with or without MCC, respectively)

The codes that fall under the HAC category of Foreign Object Retained After Surgery are CCs. If this case were assigned to a MS-DRG with an MCC subdivision such as MS-DRGs 100 and 101, the presence of the HAC code would not affect the MS-DRG severity level assignment. In other words, if the Foreign Object Retained After Surgery code were the only secondary diagnosis reported, then the case would be assigned to MS-DRG 101 (Seizure without MCC). If the POA indicator was "N," the HAC Foreign Object Retained After Surgery code would be ignored in the MS-DRG assignment logic. Despite the fact that the code was ignored, the case would still be assigned to the same, lower severity level MS-DRG. Therefore, there would be no impact on the MS-DRG assignment.

Column E in Chart E below shows that there were 2,282 cases where the HAC code was reported with an "N" or "U" and the MS-DRG assignment did not change because the case was already assigned to the lowest severity level. This represents approximately 15 percent of the 15,556 cases with HACs that did not have a change in MS-DRG assignment.

(3) No Severity Levels

Column F (Number of MS-DRGs with No Severity Levels) shows the frequency with which discharges with an HAC (cases with HAC-associated diagnosis codes with a POA of "N" or "U") did not result in an MS-DRG change because the MS-DRG that the case was assigned to is not subdivided by severity levels. For instance, MS-DRG 311 (Angina Pectoris) has no severity level subdivisions; this MS-DRG is not split based on the presence of an MCC or a CC. If a patient assigned to this MS-DRG develops a secondary diagnosis such as a Stage III pressure ulcer after admission, the condition would be considered a HAC. The code for the Stage III pressure ulcer would be ignored in the MS-DRG assignment because the condition developed after the admission (the POA indicator was "N"). Despite the fact that the ICD-9-CM code for the HAC Stage III pressure ulcer was ignored, the MS-DRG

assignment would not change. The case would still be assigned to MS-DRG 311. Chart E below shows that 1,449 cases reporting a HAC (cases with HAC-associated diagnosis codes with a POA of "N" or "U") did not undergo a change in the MS-DRG assignment based on the fact that the case was assigned to a MS-DRG that had no severity subdivisions (that is, the MS-DRG is not subdivided based on the presence or absence of an MCC or a CC, rendering the presence of the HAC irrelevant for payment purposes). This represents approximately 9 percent of the 15,556 cases with HACs that did not have a change in MS-DRG assignment.

(4) MS-DRG Logic

Column G (MS-DRG Logic Issues) shows the frequency with which a HAC (cases with HAC-associated diagnosis codes with a POA of "N" or "U") did not result in an MS-DRG change because of MS-DRG assignment logic. There were seven discharges where the HAC criteria were met and the HAC logic was applied. However, due to the structure of the MS-DRG logic, these cases did not result in MS-DRG reassignment. These cases may appear similar to those discharges where the MS-DRG is subdivided into two severity levels by the presence or absence of an MCC and did not result in MS-DRG reassignment. However, these discharges differ slightly in that the MS-DRG logic also considers specific procedures that were reported on the claim. In other words, for certain MS-DRGs, a procedure may be considered the equivalent of an MCC or a CC. The presence of the procedure code dictates the MS-DRG assignment despite the presence of the HAC-associated secondary diagnosis code with a POA indicator of "N" or "U."

For example, a claim with the principal diagnosis code of 441.1 (Thoracic aneurysm, ruptured) with HAC-associated secondary diagnosis code of 996.64 (Infection and inflammatory reaction due to indwelling urinary catheter) and non-HAC secondary diagnosis code 599.0 (Urinary tract infection, site not specified), having POA indicators of "Y," "N," and "N," respectively, and procedure code 39.73 (Endovascular implantation of graft in thoracic aorta) currently results in an assignment to MS-DRG 237 (Major Cardiovascular Procedures with MCC or Thoracic Aortic Aneurysm Repair). In this case, the thoracic aortic aneurysm repair is what dictated the MS-DRG assignment, and the presence of the HAC-associated secondary diagnosis code, 996.64, did not affect the MS-DRG assignment. Other examples of MS-

DRGs that are subdivided in this same manner are as follows:

- MS-DRG 029 (Spinal procedures with CC or Spinal Neurostimulators)
- MS-DRG 129 (Major Head & Neck Procedures with CC/MCC or Major Device)
- MS-DRG 246 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent with MCC or 4+ Vessels/Stents)

Column G in the chart below shows that three of the seven cases that did not result in MS-DRG reassignment due to the MS-DRG logic were in the Falls and Trauma HAC category, two cases were in the Catheter Associated UTI HAC category and two cases were in the Vascular Catheter-Associated Infection HAC Category.

In conclusion, a total of 15,556 cases (11,818 + 2,282 + 1,449 + 7) did not have

a change in MS-DRG assignment, regardless of the presence of a HAC. The reasons described above explain why only 3,587 cases had a change in MS-DRG assignment despite the fact that there were 19,143 HACs (cases with HAC-associated diagnosis codes with a POA of “N” or “U”).

CHART E—REASONS HAC DID NOT CHANGE MS-DRG ASSIGNMENT OCTOBER 2009 THROUGH SEPTEMBER 2010

Selected HAC category	Number of discharges with this condition as secondary diagnosis (Column A)	Number of discharges identified as a HAC (Column B)	Number of HAC discharges that change MS-DRG due to HAC (Column C)	HAC discharges that do not change MS-DRG			
				Number of other MCCs/CCs that prevent reassignment (Column D)	Number of MS-DRGs with two severity levels where HAC does not affect MS-DRG assignment* (Column E)	Number of MS-DRGs with no severity levels (Column F)	Other MS-DRG logic issues** (Column G)
1. Foreign Object Retained After Surgery—CC	563	278	44	156	67	11	0
2. Air Embolism—MCC	42	29	15	14	0	0	0

g. RTI Analysis of Coding Changes for HAC-Associated Secondary Diagnoses for Current HACs

In addition to studying claims from October 2009 through September 2010, RTI evaluated claims data from 3 years prior to determine if there were significant changes in the number of discharges with a HAC-associated code being reported as a secondary diagnosis. To provide consistency with the FY 2010 data studied, RTI examined claims using discharge dates from October 2006 through September 2007 (for FY 2007), October 2007 through September 2008 (for FY 2008), October 2008 through September 2009 (FY 2009) and compared these data to the FY 2010 data.

We refer readers to the RTI detailed report for further information regarding all the conditions in each fiscal year (FY 2007 through FY 2010) as described above at the Web site: <http://www.rti.org/reports/cms/>.

h. RTI Analysis of Estimated Net Savings for Current HACs

RTI determined estimates of the net savings generated by the HAC payment policy based on MedPAR claims for FY 2010, from October 2009 through September 2010.

(1) Net Savings Estimation Methodology

The payment impact of a HAC is the difference between the IPPS payment amount under the initially assigned MS-DRG and the amount under the reassigned MS-DRG. The amount for the reassigned MS-DRG appears on the MedPAR files. To calculate this payment impact, RTI modeled the IPPS payments for each MS-DRG following the same approach that we use to model the impact of IPPS annual rule changes. Specifically, RTI replicated the payment computations carried out in the IPPS PRICER program using payment factors for IPPS providers as identified in various CMS downloaded files. The files used are as follows:

- Version 27 of the Medicare Severity GROUPER software (applicable to discharges between October 1, 2009 and September 30, 2010). IPPS MedPAR claims were run through this file to obtain needed HAC-POA output variables.

- The FY 2010 MS-DRG payment weight file. This file includes the weights, geometric mean length of stay (GLOS), and the postacute transfer payment indicators.

- CMS standardized operating and capital rates. Tables 1A through 1C, as downloaded from the Web site at: <http://www.cms.hhs.gov/>

AcuteInpatientPPS/IPPS2010, include the full update and reduced update amounts, as well as the information needed to compute the blended amount for providers located in Puerto Rico.

- The IPPS impact file for FY 2010, as downloaded from the Web site at: <http://www.cms.hhs.gov/AcuteInpatientPPS/IPPS2010/>. This file includes the wage index and geographic adjustment factors plus the provider type variable to identify providers qualifying for alternative hospital-specific amounts and their respective hospital-specific payment rates.

- The IPPS impact file for FY 2011, as downloaded from the Web site at: <http://www.cms.hhs.gov/AcuteInpatientPPS/11FR/>. This file includes indirect medical education (IME) and disproportionate share (DSH) percent adjustments as well as the operating and capital CCRs that were in effect as of March 2010.

- CMS historical provider-specific files (PSFs). These files include the indicator to identify providers subject to the full or reduced standardized rates and the applicable operating and capital CCRs. A SAS version was downloaded from the Web site at: http://www.cms.hhs.gov/ProspMedicareFeeSvcPmtGen/04_psf_SAS.asp. There were 50 providers with discharges in the final HAC analysis file that did not appear in the FY 2010 impact file, of which 11 also did not appear in the FY 2011 impact file. For these providers, we identified the geographic CBSA from the historical PSF and assigned the wage index using values from Tables 4A and 4C as downloaded from the Web site at: <http://www.cms.hhs.gov/AcuteInpatientPPS/IPPS2010/>. For providers in the FY 2011 file but not the FY 2010 file, we used IME and DSH rates from FY 2011. The 11 providers in neither impact file were identified as non-IME and non-DSH providers in the historical PSF file.

The steps for estimating the HAC payment impact are as follows:

Step 1: Re-run the Medicare Severity GROUPER on all records in the analysis file. This is needed to obtain information on actual HAC-related MS-DRG reassignments in the file, and to identify the CCs and MCCs that contribute to each MS-DRG assignment.

Step 2: Model the base payment and outlier amounts associated with the initial MS-DRG if the HAC were excluded using the computations laid out in the CMS file "Outlier Example FY 2007 new.xls," as downloaded from the Web site at: http://www.cms.hhs.gov/AcuteInpatientPPS/04_outlier.asp#TopOfPage, and

modified to accommodate FY 2010 factors. RTI's first round of computations treated all claims as though paid under standard IPPS rules without adjusting for short-stay transfers or hospital-specific payment amounts.

Step 3: Model the base payment and outlier amounts associated with the final MS-DRG where the HAC was excluded using the computations laid out in the CMS file "Outlier Example FY 2007 new.xls," as downloaded from the Web site at: http://www.cms.hhs.gov/AcuteInpatientPPS/04_outlier.asp#TopOfPage and modified to accommodate FY 2010 factors. RTI's first round of computations treated all claims as though paid under standard IPPS rules without adjusting for short-stay transfers or hospital-specific payment amounts.

Step 4: Compute MS-DRG base savings as the difference between the nonoutlier payments for the initial and final MS-DRGs. Compute outlier amounts as the difference in outlier amounts due under the initial and final reassigned MS-DRG. Compute net savings due to HAC reassignment as the sum of base savings plus outlier amounts.

Step 5: Adjust the model to incorporate short-stay transfer payment adjustments.

Step 6: Adjust the model to incorporate hospital-specific payments for qualifying rural providers receiving the hospital-specific payment rates.

It is important to mention that using the methods described above, the MS-DRG and outlier payments amounts that are modeled for the final assigned MS-DRG do not always match the MS-DRG price and outlier amounts that appear in the MedPAR record. There are several reasons for this. Some discrepancies are caused by using single wage index, IME, and DSH factors for the full period covered by the discharges, when, in practice, these payment factors can be adjusted for individual providers during the course of the fiscal year. In addition, RTI's approach disregards any Part A coinsurance amounts owed by individual beneficiaries with greater than 60 covered days in a spell of illness. Five percent of all HAC discharges showed at least some Part A coinsurance amount due from the beneficiary, although less than 2 percent of reassigned discharges (55 cases in the analysis file) showed Part A coinsurance amounts due. Any Part A coinsurance payments would reduce the actual savings incurred by the Medicare program.

There are also a number of less common special IPPS payment situations that are not factored into

RTI's modeling. These could include new technology add-on payments, payments for blood clotting factors, reductions for replacement medical devices, adjustments to the capital rate for new providers, and adjustments to the capital rate for certain classes of providers who are subject to a minimum payment level relative to capital cost.

(2) Net Savings Estimate

Chart F below summarizes the estimated net savings of current HACs based on MedPAR claims from October

2009 through 2010, based on the methodology described above. Column A shows the number of discharges where a MS-DRG reassignment for each HAC category occurred. For example, there were 15 discharges with an air embolism that resulted in an actual MS-DRG reassignment. Column B shows the total net savings caused by MS-DRG reassignments for each HAC category. Continuing with the example of air embolism, the chart shows that the 15 discharges with an MS-DRG

reassignment resulted in a total net savings of \$118,785. Column C shows the net savings per discharge for each HAC category. For the Air Embolism HAC category, the net savings per discharge is \$7,919. Because a single discharge can have more than one HAC, discharges can appear in more than one row. The total net savings shown in the last line of Column B is adjusted to avoid duplicate counting and is therefore less than the sum of the net savings from the lines above.

CHART F—ESTIMATED NET SAVINGS OF CURRENT HACs OCTOBER 2009 THROUGH SEPTEMBER 2010

Selected HAC	Number of discharges that change MS-DRG due to HAC	Net savings (in dollars)	Net savings per discharge (in dollars)
	(Column A)	(Column B)	(Column C)
1. Foreign Object Retained After Surgery	44	\$159,841	\$3,633
2. Air Embolism	15	118,785	7,919
3. Blood Incompatibility	0	0	0
4. Pressure Ulcer Stages III & IV	292	1,795,456	6,149
5. Falls and Trauma:			
a. Fracture	1,439	8,119,308	5,642
b. Dislocation	4	13,244	3,311
c. Intracranial Injury	234	1,127,066	4,817
d. Crushing Injury	1	7,826	7,826
e. Burn	6	15,594	2,599
f. Shock	0	0	0
Less: Discharges with Multiple Falls & Trauma ¹	-12	-82,330	-6,861
5. Falls and Trauma: Unduplicated Total	1,672	9,200,708	5,503
6. Catheter-Associated UTI	223	696,662	3,124
7. Vascular Catheter-Associated Infection	22	77,690	3,531
8. Poor Glycemic Control	107	604,308	5,648
9a. SSI Mediastinitis CABG	4	32,392	8,098
9b. SSI Orthopedic	2	15,044	7,522
9c. SSI Bariatric	0	0	0
10. Pulmonary Embolism & DVT Orthopedic	1,206	8,826,912	7,319
Total	3,587	21,527,798	6,002
Less: Discharges with Multiple HACs ²	-15	-77,703	-5,180
Unduplicated Total	3,572	21,450,095	6,005

¹ Discharges can have more than one Falls and Trauma HAC and therefore appear in more than one row.

² Discharges can have more than one HAC and therefore appear in more than one row.
Source: RTI Analysis of MedPAR IPPS Claims, October 2009 through September 2010.

As shown in Chart F above, the unduplicated total net savings calculated for the 12-month period from October 2009 through September 2010 was approximately \$21.5 million. The three HACs with the largest number of discharges resulting in MS-DRG reassignment, Falls and Trauma, Orthopedic PE/DVT, and Pressure Ulcer Stages III & IV, generated approximately \$19.83 million of net savings for the 12-month period. Estimated net savings for the 12-month period associated with the Falls and Trauma category were approximately \$9.20 million. Estimated net savings associated with Orthopedic PE/DVT for the 12-month period were

approximately \$8.83 million. Estimated net savings for the 12-month period associated with Pressure Ulcer Stages III & IV were approximately \$1.80 million.

The mean net savings per discharge calculated for the 12-month period from October 2009 through September 2010 was approximately \$6,005. The HAC categories of Air Embolism; SSI, Mediastinitis, Following Coronary Artery Bypass Graft (CABG); and SSI Following Certain Orthopedic Procedures had the highest net savings per discharge, but represented a small proportion of total net savings because the number of discharges that resulted in MS-DRG reassignment for these

HACs was low. With the exception of Blood Incompatibility and SSI Following Bariatric Surgery for Obesity, where no savings occurred because no discharges resulted in MS-DRG reassignment, Catheter-Associated UTI had the lowest net savings per discharge.

We refer readers to the RTI detailed report available at the Web site: <http://www.rti.org/reports/cms/>.

As mentioned previously, an extremely small number of cases in the 12-month period of FY 2010 analyzed by RTI had multiple HACs during the same stay. In reviewing approximately 10.2 million claims, RTI found

approximately 94 cases where 2 HACs were reported on the same admission as noted in section II.F.3.g.(2) of this preamble. Of these approximately 94 claims, 15 resulted in MS-DRG

reassignment. Chart G below summarizes these cases. There were 15 cases that had 2 HACs not POA that resulted in an MS-DRG reassignment. Of these, four discharges involved

Pressure Ulcer Stages III & IV, four discharges involved Falls and Trauma, and seven discharges involved Vascular Catheter-Associated Infection.

CHART G—CLAIMS WITH MORE THAN ONE HAC SECONDARY DIAGNOSIS WHERE MS-DRG REASSIGNMENT OCCURRED OCTOBER 2009 THROUGH SEPTEMBER 2010

Selected HAC	4. Pressure Ulcer Stages III & IV—MCC	5. Falls and Trauma—MCC & CC	7. Vascular Catheter-Associated Infection—CC
5. Falls and Trauma—MCC & CC	2
6. Catheter-Associated Urinary Tract Infection (UTI)—CC	1	2	6
7. Vascular Catheter-Associated Infection—CC	1	2
9B. Surgical Site Infection Following Certain Orthopedic Procedures—CC	1
Total	4	4	7

As we discuss in section II.F.1.b. of this preamble, implementation of this policy is the part of an array of Medicare VBP tools that we are using to promote increased quality and efficiency of care. We point out that a decrease over time in the number of discharges where these conditions are not POA is a desired consequence. We recognize that estimated net savings would likely decline as the number of such discharges decline. However, we believe that the sentinel effect resulting from CMS identifying these conditions is critical. (We refer readers to section IV.A. of this preamble for a discussion of the inclusion of the incidence of these conditions in the Hospital IQR Program.) It is our intention to continue to monitor trends associated with the frequency of these HACs and the estimated net payment impact through RTI's program evaluation and possibly beyond.

i. Previously Considered Candidate HACs—RTI Analysis of Frequency of Discharges and POA Indicator Reporting

RTI evaluated the frequency of conditions previously considered, but not adopted as HACs in prior rulemaking, that were reported as secondary diagnoses (across all approximately 10.2 million discharges), as well as the POA indicator assignments for these conditions. Chart H below indicates that the four previously considered candidate conditions most frequently reported as a secondary diagnosis were: (1) Clostridium Difficile-Associated Disease (CDAD), which demonstrated the highest frequency, with a total of 90,243 secondary diagnoses codes being reported for that condition, of which 29,306 reported a POA indicator of "N"; (2) Methicillin-Resistant Staphylococcus aureus, with a total of 72,313 secondary diagnoses codes being reported for that condition, with 2,165 of those reporting a POA indicator of "N"; and (3) Staphylococcus aureus Septicemia, with a total of 24,327 secondary diagnoses

codes being reported for that condition, with 5,490 of those reporting a POA indicator of "N"; and (4) Iatrogenic Pneumothorax, with a total of 22,506 secondary diagnoses codes being reported for that condition, with 19,581 of those reporting a POA indicator of "N." As these four conditions had the most significant impact for reporting a POA indicator of "N," it is reasonable to believe that these same three conditions would have the greatest number of potential MS-DRG reassignments. The frequency of discharges for the previously considered HACs that could lead to potential changes in MS-DRG assignment is discussed in the next section. We take this opportunity to remind readers that because more than one previously considered HAC diagnosis code can be reported per discharge (on a single claim) that the frequency of these diagnosis codes may be more than the actual number of discharges with a previously considered candidate condition reported as a secondary diagnosis.

CHART H—POA STATUS OF PREVIOUSLY CONSIDERED "CANDIDATE" HAC CONDITIONS—OCTOBER 2009 THROUGH SEPTEMBER 2010

Previously considered HAC condition	Frequency as a secondary diagnosis	Not Present on Admission				Present on Admission			
		POA = N		POA = U		POA = Y		POA = W	
		Number	Percent	Number	Percent	Number	Percent	Number	Percent
1. Clostridium Difficile-Associated Disease (CDAD)	90,243	29,306	32.47	416	0.46	60,397	66.93	124	0.14
2. Delirium	757	190	25.10	567	74.90	0	0.00
3. Legionnaire's Disease	426	27	6.34	2	0.47	397	93.19	0	0.00
4. Staphylococcus aureus Septicemia	24,327	5,490	22.57	65	0.27	18,738	77.03	34	0.14
5. Methicillin-Resistant Staphylococcus aureus	72,313	2,165	2.99	124	0.17	70,008	96.81	16	0.02
6. Iatrogenic Pneumothorax	22,506	19,581	87.00	15	0.07	2,907	12.92	3	0.01
7. Ventilator-Associated Pneumonia	4,278	3,159	73.84	5	0.12	1,110	25.95	4	0.09

In Chart I below, Column A shows the number of discharges for each previously considered candidate HAC category when the condition was

reported as a secondary diagnosis. For example, there were 90,243 discharges that reported CDAD as a secondary diagnosis. Previously considered

candidate HACs reported with a POA indicator of "N" or "U" may cause MS-DRG reassignment (which would result in reduced payment to the facility).

Column C shows the discharges for each previously considered candidate HAC reported with a POA indicator of “N” or “U.” Continuing with the example of CDAD, Chart I shows that, of the 90,243 discharges, 29,722 discharges (32.94 percent) had a POA indicator of “N” or “U.” Therefore, there were a total of 29,722 discharges that could potentially have had an MS–DRG reassignment. Column E shows the number of discharges where an actual MS–DRG reassignment could have occurred; the

number of discharges with CDAD that could have resulted in actual MS–DRG reassignments is 830 (2.79 percent). Thus, while there were 29,722 discharges with CDAD reported with a POA indicator of “N” or “U” that could potentially have had an MS–DRG reassignment, the result was 830 (2.79 percent) potential MS–DRG reassignments. As discussed above, there are a number of reasons why a condition reported with a POA indicator

of “N” or “U” would not result in a MS–DRG reassignment.

In summary, Chart I below demonstrates there were a total of 214,785 discharges with a previously considered candidate HACs reported as a secondary diagnosis. Of those 60,538 discharges were reported with a POA indicator of “N” or “U.” The total number of discharges that could have resulted in MS–DRG reassignments is 3,768.

CHART I—PREVIOUSLY CONSIDERED “CANDIDATE” HAC DISCHARGE FREQUENCIES—OCTOBER 2009 THROUGH SEPTEMBER 2010

Previously considered HAC condition	Discharges with this condition as secondary diagnosis ²		Discharges with this condition not present on Admission (POA = “N” or “U”) ³		Cases that could change MS–DRG due to previously considered candidate HAC ⁴	
	Number (Column A)	Percent (Column B)	Number (Column C)	Percent (Column D)	Number (Column E)	Percent (Column F)
1. Clostridium Difficile-Associated Disease (CDAD)	90,243	0.89	29,722	32.94	830	2.79
2. Delirium	757	0.01	190	25.10	14	7.37
3. Legionnaire’s Disease	426	0.00	29	6.81	3	10.34
4. Staphylococcus aureus Septicemia	24,288	0.24	5,549	22.85	97	0.02
5. Methicillin-Resistant Staphylococcus aureus	72,287	0.71	2,288	3.17	0	0.00
6. Iatrogenic Pneumothorax	22,506	0.22	19,596	87.07	2,821	14.40
7. Ventilator-Associated Pneumonia	4,278	0.04	3,164	73.96	3	0.09
Total¹	214,785	60,538	3,768

¹ Discharges can appear in more than one row.

² Percent computed relative to total cases “at risk,” which is 10,189,168 for all candidate conditions.

³ Percent computed relative to discharges with condition as a secondary diagnosis.

⁴ Percent computed relative to discharges with condition as a secondary diagnosis and identified as a previously considered HAC (that is, coded as not present on admission).

j. Current and Previously Considered Candidate HACs—RTI Report on Evidence-Based Guidelines

The RTI program evaluation includes an annual report that provides references for all evidence-based guidelines available for each of the selected and previously considered candidate HACs that provide recommendations for the prevention of the corresponding conditions. Guidelines were primarily identified using the AHRQ National Guidelines Clearing House (NGCH) and the CDC, along with relevant professional societies. Guidelines published in the United States were used, if available. In the absence of U.S. guidelines for a specific condition, international guidelines were included.

Evidence-based guidelines that included specific recommendations for the prevention of the condition were identified for each of the 10 selected conditions. In addition, evidence-based guidelines were also found for the previously considered candidate conditions.

RTI prepared the annual report to summarize its findings regarding evidence-based guidelines, which can be found on the Web site at: <http://www.rti.org/reports/cms>.

k. Final Policy Regarding Current HACs and Previously Considered Candidate HACs

We believe that the RTI analysis summarized above does not provide additional information that would require us to change our previous determinations regarding either current HACs (as described in section II.F.2. of this preamble) or previously considered candidate HACs in the FY 2008 IPPS final rule with comment period (72 FR 47200 through 47218), the FY 2009 IPPS final rule (73 FR 48471 through 48491), and the FY 2010 IPPS/RV 2010 LTCH final rule (74 FR 43782 through 43785). We note that we are finalizing revisions to the Falls and Trauma HAC category, Surgical Site Infection Following Certain Bariatric procedures and DVT/PE Following Certain Orthopedic Procedures HAC categories as discussed in section II.F.2. of this preamble. (We also note that, as discussed in section

II.F.3.b. of this preamble, we are not contemplating changing our current policy regarding the treatment of the “U” POA indicator.) However, we continue to encourage public dialogue about refinements to the HAC list.

We refer readers to section II.F.6. of the FY 2008 IPPS final rule with comment period (72 FR 47202 through 47218) and to section II.F.7. of the FY 2009 IPPS final rule (73 FR 48474 through 48491) for detailed discussion supporting our determination regarding each of these conditions.

G. Changes to Specific MS–DRG Classifications

In the FY 2012 IPPS/LTCH PPS proposed rule (76 FR 25816), we invited public comment on each of the MS–DRG classification proposed changes described below, as well as our proposals to maintain certain existing MS–DRG classifications, which are also discussed below. In some cases, we proposed changes to the MS–DRG classifications based on our analysis of claims data. In other cases, we proposed to maintain the existing MS–DRG classification based on our analysis of

claims data. Below, we summarize the public comments that we received, if any, on our proposals, present our responses, and state our final policies.

1. Pre-Major Diagnostic Categories (Pre-MDCs)

a. Noninvasive Mechanical Ventilation

We received a request from the National Association for Medical Direction of Respiratory Care (NAMDRC) which suggested that we create a new MS-DRG for patients with certain respiratory conditions who receive noninvasive mechanical ventilation (NIV). The requestor stated that patients who receive NIV are almost always placed within an intensive care unit (ICU) or an emergency department and use the resources available in those areas. The requestor recommended that this new MS-DRG recognize current practice and allow for appropriate reimbursement for the technical complexity and monitoring required for NIV as a form of acute life support. According to the requestor, NIV has evolved to become first-line supportive therapy for several forms of acute respiratory failure. Lastly, the requestor recommended that the new MS-DRG identify NIV usage of approximately 6 to 12 hours to account for the “legitimate but very short term use of this therapy.”

Historically, the concept of mechanical ventilation for critically ill patients included establishment of an artificial airway, invasively, through endotracheal intubation or a tracheostomy. According to the requestor, a significant portion of these patients can now be treated through *noninvasive* mechanical ventilation with the use of a face or nasal mask. In the ICD-9-CM classification system, NIV is described by procedure code 93.90 (Noninvasive mechanical ventilation), while invasive mechanical ventilation is described by procedure codes 96.70 (Continuous invasive mechanical ventilation of unspecified

duration), 96.71 (Continuous invasive mechanical ventilation for less than 96 consecutive hours), and 96.72 (Continuous invasive mechanical ventilation for 96 consecutive hours or more). The requestor submitted external data to illustrate trends in NIV use over the past decade. These data were derived from a survey conducted during 2002–2003 of several hospitals located in Massachusetts and Rhode Island. The requestor believed that these data indicate patients with exacerbation of chronic obstructive pulmonary disease (COPD), acute pulmonary edema, or worsening congestive heart failure are successfully managed with NIV.

For the FY 2012 IPPS/LTCH PPS proposed rule, we analyzed FY 2010 MedPAR claims data that are representative of the respiratory conditions the requestor identified when reported with NIV. We found 14 MS-DRGs reporting procedure code 93.90 using the above specifications. The MS-DRGs are as follows:

Pre-MDC MS-DRGs:

- MS-DRG 003 (ECMO or Tracheostomy with Mechanical Ventilation 96+ Hrs or PDX Except Face, Mouth & Neck with Major O.R.)
- MS-DRG 004 (Tracheostomy with Mechanical Ventilation 96+ Hrs or PDX Except Face, Mouth & Neck without Major O.R.)
- MS-DRGs:
- MS-DRG 189 (Pulmonary Edema & Respiratory Failure)
- MS-DRG 190 (Chronic Obstructive Pulmonary Disease with MCC)
- MS-DRG 191 (Chronic Obstructive Pulmonary Disease with CC)
- MS-DRG 192 (Chronic Obstructive Pulmonary Disease without CC/MCC)
- MS-DRG 204 (Respiratory Signs & Symptoms)
- MS-DRG 207 (Respiratory System Diagnosis with Ventilator Support 96+ Hours)

- MS-DRG 208 (Respiratory System Diagnosis with Ventilator Support <96 Hours)
- MS-DRG 222 (Cardiac Defibrillator Implant with Cardiac Catheterization with AMI/HF/Shock with MCC)
- MS-DRG 223 (Cardiac Defibrillator Implant with Cardiac Catheterization with AMI/HF/Shock without MCC)
- MS-DRG 291 (Heart Failure & Shock with MCC)
- MS-DRG 292 (Heart Failure & Shock with CC)
- MS-DRG 293 (Heart Failure & Shock without CC/MCC)

As shown in the list above and in the chart below, the MS-DRGs identified also include those that describe invasive mechanical ventilation. The ICD-9-CM coding convention instructs the reporting of both types of mechanical ventilation when patients are admitted on noninvasive mechanical ventilation that subsequently requires invasive mechanical ventilation therapy.

The data demonstrate that, in certain MS-DRGs, for example, MS-DRGs 003, 004, and 222 that the cases with NIV primarily have shorter lengths of stay and lower average costs compared to all the cases in those MS-DRGs. Alternatively, the data for MS-DRGs 189, 190, 191, and 192 demonstrate that the cases with NIV have an increased length of stay and higher average costs, but a relatively low volume compared to all the cases in those MS-DRGs. Combining the current surgical and medical MS-DRGs into a single, new MS-DRG would include noninvasive mechanical ventilation cases with a wide range of costs for several indications with varying levels of severity. The average costs for these cases range from a low of \$5,794 in MS-DRG 293 to a high of \$95,940 in MS-DRG 003. In the proposed rule, we indicated that we believe the cases are more appropriately assigned and reimbursed in the MS-DRGs to which they are currently assigned.

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 003—All cases	18,223	34.7	\$103,492
MS-DRG 003—Cases with code 93.90 without code 96.70, 96.71, or 96.72	58	33.3	95,940
MS-DRG 004—All cases	19,599	25.79	63,022
MS-DRG 004—Cases with code 93.90 without code 96.70, 96.71, or 96.72	170	25.43	58,500
MS-DRG 189—All cases	87,668	5.36	8,317
MS-DRG 189—Cases with code 93.90 without code 96.70, 96.71, or 96.72	22,023	6.07	10,383
MS-DRG 190—All cases	130,731	5.30	7,140
MS-DRG 190—Cases with code 93.90 without code 96.70, 96.71 or 96.72	8,450	6.78	11,207
MS-DRG 191—All cases	135,851	4.49	6,236
MS-DRG 191—Cases with code 93.90 without code 96.70, 96.71 or 96.72	4,563	5.41	8,819
MS-DRG 192—All cases	115,153	3.52	4,621
MS-DRG 192—Cases with code 93.90 without code 96.70, 96.71 or 96.72	2,334	4.25	6,803
MS-DRG 204—All cases	21,049	2.61	4,310
MS-DRG 204—Cases with code 93.90 without code 96.70, 96.71 or 96.72	265	4.17	7,591
MS-DRG 207—All cases	32,752	14.61	32,897

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 207—Cases with code 93.90 without code 96.70, 96.71 or 96.72	0	0	0
MS-DRG 208—All cases	67,724	6.98	14,742
MS-DRG 208—Cases with code 93.90 without code 96.70, 96.71 or 96.72	0	0	0
MS-DRG 222—All cases	2,279	11.98	57,478
MS-DRG 222—Cases with code 93.90 without code 96.70, 96.71 or 96.72	52	11.79	55,011
MS-DRG 223—All cases	3,230	6.17	41,754
MS-DRG 223—Cases with code 93.90 without code 96.70, 96.71 or 96.72	19	11.05	47,064
MS-DRG 291—All cases	170,399	6.05	9,585
MS-DRG 291—Cases with code 93.90 without code 96.70, 96.71 or 96.72	14,274	6.95	12,320
MS-DRG 292—All cases	220,031	4.72	6,584
MS-DRG 292—Cases with code 93.90 without code 96.70, 96.71 or 96.72	5,171	5.58	9,180
MS-DRG 293—All cases	98,134	3.20	4,410
MS-DRG 293—Cases with code 93.90 without code 96.70, 96.71 or 96.72	1,381	3.43	5,794

As mentioned in the requestor's comments, and our clinical advisors agree, NIV encompasses a broad range of interventions and utilizes periods of time that range from a few hours to a few days of continuous chronic use. Resource requirements are vastly different for the various intended indications. For example, as also noted by the requestor, respiratory failure can have many forms. Our clinical advisors provided three subsets of patients as an example: Those that are given oxygen support, those that are given pressure (rate) support, and those that are intubated. There is overlap between the three subsets in that a patient may require one, two, or all three types of therapy and there are multiple options for any given patient. Our clinical advisors stated that these various subsets of patients can require significantly different resources. Lastly, respiratory failure reflects the severity of the diagnosis (it is a complication) while NIV is a therapeutic option. Unlike a major surgical intervention where the intervention creates morbidity, NIV merely reflects the severity of the underlying respiratory failure.

The requestor further noted in its comments that a significant number of patients who receive NIV fail this therapy and must be intubated and subsequently placed on a ventilator. However, those patients who require both noninvasive and invasive mechanical ventilation are already accounted for in the invasive mechanical ventilation MS-DRGs. Similar to patients with respiratory failure, patients with heart failure and shock have a comparable severity of illness where each condition reflects the severity of the diagnosis (it is a complication). Therefore, the cost is already reflected in the high resource expenditure estimates for MS-DRGs 222, 223, 291, 292, and 293, as are all other severity-correlated resource costs.

In conclusion, we indicated in the proposed rule that we believe that the data do not support the creation of a single MS-DRG to identify NIV cases. As stated previously, the average costs for the NIV cases range from a low of \$5,794 in MS-DRG 293 to a high of \$95,940 in MS-DRG 003. If created, this single MS-DRG would include patients with a wide range in average costs. We believe the cases are more appropriately captured in their current MS-DRGs. In addition to the clinical points raised by our clinical advisors and outlined above, the volume and length of stay data for cases where NIV was reported with the specified respiratory conditions further support their present MS-DRG assignments. Therefore, we did not propose to create a new MS-DRG for patients receiving NIV. We invited public comment on our proposal not to create a new MS-DRG for patients receiving NIV for FY 2012.

Comment: Several commenters agreed with CMS' proposal to not create a new MS-DRG for patients receiving NIV for FY 2012. One commenter did not have a position on whether or not a new MS-DRG should be created for patients receiving noninvasive mechanical ventilation. However, the commenter was concerned that reported hospital data may be incomplete. The commenter indicated that procedure code 93.90 (Noninvasive mechanical ventilation) is most likely underreported or not reported consistently because it is not required for reporting purposes. Another commenter stated that the data analysis performed on patients receiving NIV appeared to be supported by the current MS-DRG assignment. Therefore, the commenter agreed with the proposal not to create a new MS-DRG. This commenter also urged CMS to consider the Uniform Hospital Discharge Data Set (UHDDS) definition of a "reportable condition" in future analyses. This commenter noted that the UHDDS requires all significant procedures to be

reported and that Medicare requires the reporting of any procedure that affects payment, whether or not it meets the definition of significant procedure. This commenter further noted that procedure code 93.90 is not considered significant by the UHDDS definition nor does it affect payment.

Response: We appreciate the commenters' support of our proposal to not create a new MS-DRG for patients receiving NIV for FY 2012. We agree with the commenters that procedure code 93.90 is likely not reported consistently and, therefore, the data included in evaluating the request may be incomplete. We encourage complete and accurate reporting of ICD-9-CM codes on each admission. As discussed in section II.G.13.b. of this final rule, we have expanded our ability to accept and process up to 25 diagnosis codes and 25 procedure codes with the implementation of 5010. We agree with the commenters who state that the current data do not support a new MS-DRG for patients receiving NIV.

We also agree with the commenter that NIV (procedure code 93.90) is not considered to be a significant procedure under UHDDS definitions and does not affect payment under Medicare policy. UHDDS definitions are used by hospitals to report inpatient data elements in a standardized manner. For further information regarding UHDDS data elements and their definitions, we refer readers to the July 31, 1985 **Federal Register** (50 FR 31038 through 31040) and the Internet Web site at: <http://www.ncvhs.hhs.gov/ncvhsr1.htm>.

Comment: The organization that submitted the original request to create a new MS-DRG for NIV expressed appreciation to CMS for considering their request and for providing data that was unavailable to them at the time they submitted their original request. The commenter also acknowledged the potential for underreporting of NIV (procedure code 93.90). However, the commenter specifically asked to further

refine their original request based on the data that were displayed in the FY 2012 IPPS/LTCH PPS proposed rule (76 FR 25818). The commenter suggested that CMS now limit consideration of a new MS-DRG for NIV to only the data that were displayed for 4 of the 14 MS-DRGs analyzed in response to their original request. The commenter asked CMS to now only focus on the data that was provided for the following MS-DRGs:

- MS-DRG 189 (Pulmonary Edema & Respiratory Failure)
- MS-DRG 190 (Chronic Obstructive Pulmonary Disease with MCC)
- MS-DRG 191 (Chronic Obstructive Pulmonary Disease with CC)
 - MS-DRG 192 (Chronic Obstructive Pulmonary Disease without CC/MCC)

The commenter recommended that CMS utilize respiratory failure, pulmonary edema, and chronic obstructive pulmonary disease as diagnoses that, when present with NIV, define the structure of a new NIV MS-DRG.

Response: We acknowledge the commenter's request that we now consider a refined request that focuses on only 4 of the 14 MS-DRGs originally analyzed. However, due to time constraints, we were unable to conduct the necessary analysis for evaluation. We would need to perform a new and separate analysis with exact specifications that were not provided by the commenter in their modified request before we could make a final determination. For example, there are numerous ICD-9-CM codes that describe respiratory failure, pulmonary edema, and chronic obstructive pulmonary disease. The commenter did not specify the exact codes they believe would warrant this modified MS-DRG when reported with procedure code 93.90 (NIV) for us to conduct a thorough analysis in time to include our evaluation in this final rule.

Therefore, after consideration of public comments we received, we are finalizing our proposal to not create a new MS-DRG for NIV for FY 2012.

b. Debridement With Mechanical Ventilation Greater Than 96 Hours With Major Operating Room (O.R.) Procedure

We received a comment concerning the use of excisional debridement in cases with complications that lead to the need for extended mechanical ventilation. The commenter stated that patients undergoing procedures such as excisional debridement may also develop extensive complications such as respiratory failure and sepsis. The commenter indicated that these patients

tend to use significant resources. The commenter stated that these cases are currently assigned to MS-DRG 207 (Respiratory System Diagnosis with Ventilator Support 96+ Hours) or MS-DRG 870 (Septicemia with or Severe Sepsis with Mechanical Ventilation 96+ Hours). The commenter expressed a concern that the operating room (OR) procedure of the excisional debridement was not fully recognized through either of these two medical MS-DRGs. The commenter requested that a new MS-DRG be created that would include mechanical ventilation of greater than 96 hours with the presence of an additional major OR procedure.

We agree that patients with long-term mechanical ventilation greater than 96 hours and a major OR procedure utilize extensive resources. However, we point out that these patient cases are not currently assigned to MS-DRG 207 or MS-DRG 870 as the commenter stated. Many of these long-term mechanical ventilation patient cases are instead assigned to MS-DRG 003 (ECMO or Tracheostomy with Mechanical Ventilation 96+ Hours or PDX, Excluding Face, Mouth & Neck with Major Operating Room Procedure). Cases that require mechanical ventilation for greater than 96 hours, that have a tracheostomy performed, and that have a procedure on the major O.R. list (including excisional debridement) are assigned to MS-DRG 003. We specifically created MS-DRG 003 to capture these complicated patients on long-term mechanical ventilation who also have a major O.R. procedure. Therefore, in the FY 2012 IPPS/LTCH PPS proposed rule, we did not propose to create a second MS-DRG to capture these patients. We welcomed public comments on our proposal not to create a new MS-DRG for these patients for FY 2012.

Comment: Several commenters supported our proposal not to create a second MS-DRG to capture patients with mechanical ventilation of greater than 96 hours with the presence of an additional major OR procedure. One commenter stated that the limited data and documentation from the requestor for the creation of a second MS-DRG prohibited them from evaluating the need for this new MS-DRG.

Response: We agree with the commenters that CMS should not create a second MS-DRG to capture patients with mechanical ventilation of greater than 96 hours with the presence of an additional major OR procedure. MS-DRG 003 (ECMO or Tracheostomy with Mechanical Ventilation 96+ Hours or PDX, Excluding Face, Mouth & Neck

with major Operating Room Procedure) appropriately captures these patients.

After consideration of the public comments we received, we are not creating a new MS-DRG to capture patients on mechanical ventilation of greater than 96 hours who also have an additional major OR procedure for FY 2012.

c. Autologous Bone Marrow Transplant

In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50101), effective October 1, 2011, we deleted MS-DRG 009 (Bone Marrow Transplant) and created two new MS-DRGs: MS-DRG 014 (Allogeneic Bone Marrow Transplant) and MS-DRG 015 (Autologous Bone Marrow Transplant). We created new MS-DRGs 014 and 015 because of differences in costs associated with these procedures. During the comment period for the FY 2011 IPPS/LTCH PPS proposed rule, two commenters who supported the proposed reclassification of the bone marrow transplant MS-DRGs requested further refinement to account for severity of illness. At that time, we did not subdivide MS-DRG 014 and MS-DRG 015 based on severity of illness because they did not meet our criteria for subdivision (75 FR 50102).

As we outlined in our FY 2008 IPPS/LTCH PPS final rule with comment period (72 FR 47169), in designating an MS-DRG as one that would be subdivided into subgroups based on the presence of a CC or an MCC, we developed a set of criteria to facilitate our decision-making process. The original criteria were based on average charges; we now use average costs (FY 2007 IPPS final rule, 71 FR 47882). In order to warrant creation of a CC or an MCC subgroup within a base MS-DRG, the subgroup must meet all of the following five criteria:

- A reduction in variance of cost of at least 3 percent.
- At least 5 percent of the patients in the MS-DRG fall within the CC or MCC subgroup.
- At least 500 cases are in the CC or MCC subgroup.
- There is at least a 20-percent difference in average cost between subgroups.
- There is a \$2,000 difference in average cost between subgroups.

For the FY 2012 IPPS/LTCH PPS proposed rule, we examined FY 2010 MedPAR claims data for these newly created MS-DRGs, and based on these criteria, we identified MS-DRG 015 as a possible MS-DRG that would require further subdivision. MS-DRG 014 was not identified, as this MS-DRG did not meet the criteria stated above for possible subdivision. Autologous bone

marrow transplantation utilizes the patient's own bone marrow or stem cells in the treatment of certain cancers and bone marrow diseases. These procedures restore stem cells that have been destroyed either by chemotherapy and/or radiation treatment.

In our analysis, we found 1,338 total cases assigned to MS-DRG 015 with

average costs of approximately \$38,608 and an average length of stay of approximately 18.8 days. There were 1,092 cases that had a secondary diagnosis code reported on the claim that was designated as a CC or an MCC with average costs of approximately \$40,974 and an average length of stay of

approximately 19.7 days. There were 246 cases without a secondary diagnosis code reported on the claim that had a CC or an MCC designation with average cost of approximately \$28,105 and an average length of stay of approximately 14.6 days. The following table illustrates our findings:

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 015—All cases	1,338	18.8	\$38,608
MS-DRG 015—Cases with MCC/CC	1,092	19.7	40,974
MS-DRG 015—Cases without MCC/CC	246	14.6	28,105

We found that the cases reported with a secondary diagnosis code of a CC or an MCC were more costly and had a longer average length of stay than both the overall cases assigned to MS-DRG 015 and the cases without a CC or an MCC. The cases without a CC or an MCC were less costly and had a shorter average length of stay than both the cases with a CC or an MCC and the overall cases assigned to that MS-DRG. Based on our analysis, all five criteria for a subgroup division were met, thereby supporting a 2-level severity split for MS-DRG 015. Therefore, for FY 2012, we proposed to delete MS-DRG 015 and create two new MS-DRGs:

- Proposed MS-DRG 016 (Autologous Bone Marrow Transplant with MCC/CC); and
- Proposed MS-DRG 017 (Autologous Bone Marrow Transplant without MCC/CC).

We invited public comment on our proposal to delete MS-DRG 015 and create two new MS-DRGs 016 and 017 for autologous bone marrow transplant for FY 2012.

Comment: Several commenters supported our proposed changes for a 2-level severity split for autologous bone marrow transplant cases. One commenter stated that it appreciated CMS' further refinement to account for severity of illness as it reflects current experience with transplant eligible patients who present with a range of comorbidities and other complicating factors.

Response: We appreciate the support of the commenters.

Comment: One commenter disagrees with our proposed refinement of MS-DRG 014 to account for severity of illness. The commenter contended that the recipient patient population for both autologous and allogeneic transplants is similar and that recognition of the variation in the patient population for both is warranted. The commenter

requested a re-review of the cost variances for MS-DRG 014 because allogeneic transplant patients are often treated for similar comorbidities as autologous transplant patients prior to transplant and during post transplant care.

Response: As we outlined in the proposed rule (76 FR 25819), to warrant creation of a CC or MCC subgroup within a base MS-DRG, the subgroup must meet all of the five criteria. MS-DRG 014 did not meet the criteria for possible subdivision because at least 500 cases were not in the CC or MCC subgroup.

After consideration of the public comments we received, we are finalizing our proposal to delete MS-DRG 015 and to create two new MS-DRGs: MS-DRG 016 (Autologous Bone Marrow Transplant with CC/MCC); and MS-DRG 017 (Autologous Bone Marrow Transplant without CC/MCC). We note that we have amended the final titles of new MS-DRGs 015 and 016 to place "CC" before "MCC."

2. MDC 1 (Diseases and Disorders of the Nervous System): Rechargeable Dual Array Deep Brain Stimulation System

We received a public comment in response to the FY 2011 IPPS/LTCH PPS proposed rule regarding the MS-DRG assignment for rechargeable dual array deep brain neurostimulators. In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50128), we indicated that we considered this comment outside of the scope of the proposed rule as we did not propose any changes for these procedures for FY 2011. However, we addressed this issue in the FY 2012 IPPS/LTCH PPS proposed rule.

Deep brain stimulation is a surgical treatment that involves the implantation of a neurostimulator, used in the treatment of essential tremor, Parkinson's disease, dystonia, and chronic pain. The commenter

recommended that CMS assign the combination of procedure codes representing rechargeable systems for deep brain stimulation therapy, procedure code 02.93 (Implantation or replacement of intracranial neurostimulator lead(s)) and procedure code 86.98 (Insertion or replacement of dual array rechargeable neurostimulator pulse generator) to MS-DRG 023 (Craniotomy with Major Device Implant/Acute Complex CNS PDX with MCC or Chemo Implant) and MS-DRG 024 (Craniotomy with Major Device Implant/Acute Complex CNS PDX without MCC).

The commenter stated that this recommendation would allow all full system dual array deep brain stimulation cases to be appropriately grouped to the same MS-DRGs. Currently, procedure codes 02.93 and 86.98 are assigned to MS-DRG 025 (Craniotomy and Endovascular Intracranial Procedures with MCC), MS-DRG 026 (Craniotomy and Endovascular Intracranial Procedures with CC), and MS-DRG 027 (Craniotomy and Endovascular Intracranial Procedures without CC/MCC), while the procedure codes for the nonrechargeable dual array systems, procedure codes 02.93 and 86.95 (Insertion or replacement of dual array neurostimulator pulse generator, not specified as rechargeable), are already assigned to MS-DRGs 023 and 024. The commenter stated that the procedures to implant the rechargeable and nonrechargeable dual array systems are similar clinically as well as comparable in resource utilization.

For the FY 2012 IPPS/LTCH PPS proposed rule, we analyzed FY 2010 MedPAR data and found a total of 16 full system rechargeable dual array deep brain stimulation systems reported with procedure codes 02.93 and 86.98 assigned to MS-DRGs 025 through 027. We found one case assigned to MS-DRG 025 and one case assigned to MS-DRG

026. The majority of the cases, 14, were assigned to MS-DRG 027, with average costs of approximately \$23,870 and an average length of stay of approximately 2.2 days. We found that the deep brain stimulation cases assigned to MS-DRG 027 had higher average costs than the overall cases assigned to MS-DRG 027 of approximately \$14,200. However, the average length of stay was shorter for these cases than the overall length of stay for MS-DRG 027 cases of approximately 3.7 days.

We also examined the data for the nonrechargeable dual array systems to assess the commenter's assumption that both the rechargeable and nonrechargeable dual array systems are similar in resource use. We found 155

total nonrechargeable dual array systems (procedure codes 02.93 and 86.95) assigned to MS-DRGs 023 and 024. There were 5 cases assigned to MS-DRG 023, with average costs of approximately \$36,159 and an average length of stay of approximately 10 days. We found that the majority of the cases, 150, were assigned to MS-DRG 024, with average costs of approximately \$25,855 and an average length of stay of approximately 2.2 days. We believe that these data support the commenter's statement that, for the majority of these cases, the resource use is similar for both systems.

For comparison purposes, if we proposed the changes that the commenter suggested, those deep brain

stimulation cases currently assigned to MS-DRG 027 and the one case assigned to MS-DRG 026 (with average costs of approximately \$27, 836) would be reassigned to MS-DRG 024. The average costs of approximately \$23,870 of these deep brain stimulation cases assigned to MS-DRG 027 are similar to the overall average costs of approximately \$23,249 for MS-DRG 024. The one case assigned to MS-DRG 025 (with average costs of approximately \$29,361) would be reassigned to MS-DRG 023 (with average costs of approximately \$34,168). The following table illustrates our findings:

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 023—All cases	4,238	11.8	\$34,168
MS-DRG 023—Cases with codes 02.93 and 86.95	5	10.0	36,159
MS-DRG 024—All cases	1,592	7.6	23, 249
MS-DRG 024—Cases with codes 02.93 and 86.95	150	2.2	25,855
MS-DRG 025—All cases	11,505	11.0	29,524
MS-DRG 025—Cases with codes 02.93 and 86.98	1	2.0	29, 361
MS-DRG 026—All cases	9,782	7.0	19,125
MS-DRG 026—Cases with codes 02.93 and 86.98	1	3.0	27,836
MS-DRG 027—All cases	10,936	3.7	14,200
MS-DRG 027—Cases with codes 02.93 and 86.98	14	2.2	23,870

Based on our findings, in the proposed rule, we indicated that we believe that the data support reassigning the combination of procedure codes representing rechargeable systems for deep brain stimulation therapy, code 02.93 and code 86.98, to MS-DRGs 023 and 024. Our clinical advisors support this reassignment. Therefore, we proposed to assign rechargeable dual array systems for deep brain stimulation cases identified by reporting both procedure codes 02.93 and 86.98 to MS-DRGs 023 and 024 for FY 2012. We invited public comment on our proposal to assign these cases to MS-DRG 023 and 024 for FY 2012.

Comment: Several commenters supported our proposal to reassign rechargeable dual array deep brain stimulation cases.

Response: We appreciate the support of the commenters. As stated above, we believe that the assignment of these cases to MS-DRG 023 and 024 is appropriate.

After consideration of public comments we received, we are adopting as final our proposal to assign rechargeable dual array systems for deep brain stimulation cases identified by reporting both procedure codes 02.93 and 86.98 to MS-DRGs 023 and 024 for FY 2012.

3. MDC 3 (Diseases and Disorders of the Ear, Nose, Mouth, and Throat): Skull Based Surgeries

We received a request from a commenter recommending that CMS reclassify skull-based surgical procedures that are currently assigned to MS-DRGs 135 and 136 (Sinus and Mastoid Procedures with CC/MCC and without CC/MCC, respectively) and reassign them to MS-DRGs 025, 026, and 027 (Craniotomy and Endovascular Intracranial Procedures with MCC, with CC, and without CC/MCC, respectively). The commenter stated that the current MS-DRG assignment does not reflect the resource utilization and technical complexity of these difficult procedures when performed for anterior skull base tumors.

Skull (or cranial) based surgery is performed for a variety of serious medical conditions including esthesioneuroblastomas, which are rare, malignant tumors that arise from the epithelium overlying the olfactory bulb; sinonasal melanomas, which are malignant melanomas that may develop in the mucosa of the nose and sinuses; and sinonasal undifferentiated carcinomas, which are rapidly growing malignant tumors arising in the nasal cavity and/or sinuses. These types of

conditions are generally identified by the following ICD-9-CM diagnosis codes:

- 160.0 (Malignant neoplasm of nasal cavities)
- 160.1 (Malignant neoplasm of auditory tube, middle ear, and mastoid air cells)
- 160.2 (Malignant neoplasm of maxillary sinus)
- 160.3 (Malignant neoplasm of ethmoidal sinus)
- 160.4 (Malignant neoplasm of frontal sinus)
- 160.5 (Malignant neoplasm of sphenoidal sinus)
- 160.8 (Malignant neoplasm of other accessory sinuses)
- 160.9 (Malignant neoplasm of accessory sinus, unspecified)
- 210.7 (Benign neoplasm of nasopharynx)
- 212.0 (Benign neoplasm of nasal cavities, middle ear, and accessory sinuses)

According to the commenter, procedure code 22.63 (Ethmoidectomy) describes the type of surgery being performed for these patients and is currently assigned to MS-DRGs 135 and 136.

For the FY 2012 IPPS/LTCH PPS proposed rule, using the FY 2010 MedPAR file, we examined data on

cases identified by procedure code 22.63 when reported with one of the above listed diagnosis codes in MS-DRGs 135 and 136. We found a total of 402 cases in MS-DRG 135 with an average length of stay of 6.30 days and average costs of \$12,869. We found only 23 cases in MS-DRG 135 identified by procedure code 22.63 with one of the diagnosis codes listed above with an

average length of stay of 3.96 days and average costs of \$10,510. In MS-DRG 136, there were a total of 320 cases with an average length of stay of 2.36 days and average costs of \$6,683. We found only 27 cases in MS-DRG 136 identified by procedure code 22.63 with one of the diagnosis codes listed above with an average length of stay of 2.04 days and average costs of \$6,844. As shown in the

table below, the cases reporting procedure code 22.63 in MS-DRGs 135 and 136 have a lower volume, a shorter length of stay, and primarily lower average costs compared to all cases in MS-DRGs 135 and 136. As we indicated in the proposed rule, the data demonstrated that these cases are appropriately assigned to their current MS-DRG classifications.

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 135—All cases	402	6.30	\$12,869
MS-DRG 135—Cases with procedure code 22.63 and diagnosis code 160.0 through 160.9 or 210.7 or 212.0	23	3.96	10,510
MS-DRG 136—All cases	320	2.36	6,683
MS-DRG 136—Cases with procedure code 22.63 and diagnosis code 160.0 through 160.9 or 210.7 or 212.0	27	2.04	6,844

We also analyzed claims data for MS-DRGs 25 through 27. We determined that if the cases identified by procedure

code 22.63 were to be reassigned to MS-DRGs 25–27, they would be significantly overpaid. As shown in the

table below, we found that the average costs for these MS-DRGs range from \$14,200 to \$29,524.

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 025—All cases	11,505	10.95	\$29,524
MS-DRG 026—All cases	9,782	7.00	19,125
MS-DRG 027—All cases	10,936	3.71	14,200

In summary, we indicated in the proposed rule that the data did not support moving cases with procedure code 22.63 when reported with one of the previously listed diagnosis codes from MS-DRGs 135 and 136 to MS-DRGs 25, 26 and 27. We invited public comment on our proposal not to make any MS-DRG modifications for these codes for FY 2012.

Comment: Several commenters supported our proposal to not make any revisions to reclassify skull-based surgical procedures that are currently assigned to MS-DRGs 135 and 136 and reassign them to MS-DRGs 025, 026, and 027.

Response: We appreciate the commenters' support.

After consideration of the public comment we received, we are finalizing our proposal to not make any modifications for skull-based surgeries for FY 2012.

4. MDC 5 (Diseases and Disorders of the Circulatory System)

a. Percutaneous Mitral Valve Repair With Implant

Procedure code 35.97 (Percutaneous mitral valve repair with implant) was created for use beginning October 1, 2010 (FY 2011) after the concept of a percutaneous valve repair was

presented and approved at the February 2010 ICD-9-CM Coordination and Maintenance Committee Meeting. Procedure code 35.97 was created at that time to describe the MitraClip™ device and any other percutaneous mitral valve repair devices currently on the market. This procedure code is assigned to the following MS-DRGs: 231 and 232 (Coronary Bypass with PTCA with MCC and without MCC, respectively); 246 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent with MCC or 4+ Vessels/Stents); 247 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent without MCC); 248 (Percutaneous Cardiovascular Procedure with Non-Drug-Eluting Stent with MCC or 4+ Vessels/Stents); 249 (Percutaneous Cardiovascular Procedure with Non-Drug-Eluting Stent without MCC); 250 (Percutaneous Cardiovascular Procedure without Coronary Artery Stent or AMI with MCC); and 251 (Percutaneous Cardiovascular Procedure without Coronary Artery Stent or AMI without MCC).

According to the Food and Drug Administration's (FDA's) terms of the clinical trial for MitraClip™, the device is to be implanted in patients without any additional surgeries performed. Therefore, based on these terms, we

believe that the most likely MS-DRG assignments would be MS-DRGs 250 and 251, as described above. However, because procedure code 35.97 has only been in use since October 1, 2010, there are no claims data in the most recent MedPAR update file with which to evaluate any alternative MS-DRG assignments. Therefore, we did not propose to make any MS-DRG changes for procedure code 35.97 for FY 2012. We proposed to keep procedure code 35.97 in its current MS-DRG assignments. We invited public comment on this proposal.

Comment: Several commenters addressed our proposal. One commenter supported our proposal not to make any MS-DRG changes in the current assignment of procedure code 35.97, but also recommended that CMS review the MS-DRG assignment for FY 2013 when more claims data become available. In addition, one commenter indicated that it “* * * has no objections to CMS’ proposed changes to the MS-DRG classifications and the Medicare Code Editor, which seem reasonable, given the data and information provided.”

Response: We appreciate the commenters' support and suggestion.

After consideration of the public comments we received, we are adopting as final without modification our

proposal to keep procedure code 35.97 (Percutaneous mitral valve repair with implant) in its current MS-DRG assignments of 231 and 232 (Coronary Bypass with PTCA with MCC and without MCC, respectively); 246 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent with MCC or 4+ Vessels/Stents); 247 (Percutaneous Cardiovascular Procedure with Drug-Eluting Stent without MCC); 248 (Percutaneous Cardiovascular Procedure with Non-Drug-Eluting Stent with MCC or 4+ Vessels/Stents); 249 (Percutaneous Cardiovascular Procedure with Non-Drug-Eluting Stent without MCC); 250 (Percutaneous Cardiovascular Procedure without Coronary Artery Stent or AMI with MCC); and 251 (Percutaneous Cardiovascular Procedure without Coronary Artery Stent or AMI without MCC).

In addition, we plan to conduct a review of the MedPAR data for code 35.97 in our next annual IPPS update cycle (that is, for FY 2013) to determine if the MS-DRG assignments as listed

above are the most appropriate MS-DRGs for this procedure.

b. Aneurysm Repair Procedure Codes

Thoracic aorta defects, such as aneurysm, dissection, or injury, are uncommon but serious conditions that may arise from a disease or an accident. Some patients can be medically managed but most are treated with surgery. Often these defects result in death if they are not diagnosed and treated promptly. Currently, there are two techniques used for repair of aortic defects; both are O.R. procedures performed in an inpatient hospital setting. These two procedures are described by ICD-9-CM procedure codes 38.45 (Resection of vessel with replacement, thoracic vessel) and 39.73 (Endovascular implantation of graft in thoracic aorta). Both procedure codes 38.45 and 39.73 are currently assigned to MS-DRGs 237 (Major Cardiovascular Procedures with MCC or Thoracic Aortic Aneurysm Repair) and 238

(Major Cardiovascular Procedures without MCC).

We received a request that we consider the reassignment of procedure codes 38.45 and 39.73 within the MS-DRG structure by removing the procedure codes from MS-DRGs 237 and 238 and adding them to a more clinically coherent set of MS-DRGs reflecting higher resource consumption. The requestors believed that, based on their analysis of MedPAR claims data of MS-DRGs 237 and 238, the resource utilization of both the endovascular and open repairs of the abdominal and thoracic aortas are higher than the overall average resource utilization for the MS-DRGs to which these procedures are currently assigned. The requestors also believed that an unusually high number of cases probably fall into cost outlier status.

For the FY 2012 IPPS/LTCH PPS proposed rule, we reviewed the MedPAR claims data for these two procedure codes. Our findings are shown in the following two tables.

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 237—All cases	20,680	10.03	\$34,268
MS-DRG 237—Cases with procedure code 39.73	1,851	7.73	41,033
MS-DRG 237—Cases without procedure code 39.73	18,829	10.26	33,603
MS-DRG 238—All cases	35,705	4.08	20,597
MS-DRG 238—Cases with procedure code 39.73	0	0	0
MS-DRG 238—Cases without procedure code 39.73	35,705	4.08	20,597

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 237—All cases	20,680	10.03	\$34,268
MS-DRG 237—Cases with procedure code 38.45	448	13.29	51,953
MS-DRG 237—Cases without procedure code 38.45	20,234	9.96	33,878
MS-DRG 238—All cases	35,705	4.08	20,597
MS-DRG 238—Cases with procedure code 38.45	466	7.29	30,219
MS-DRG 238—Cases without procedure code 38.45	35,239	4.03	20,465

Our findings of the analysis of the cases with procedure code 39.73 showed that the average costs are substantially higher than those costs for the cases overall in both MS-DRGs 237 and 238. We found that the average length of stay for the 1,851 cases identified in MS-DRG 237 is somewhat lower at 7.73 days than the average length of stay of 10.26 days in cases not containing procedure code 39.73.

Our findings of the analysis of the cases with procedure code 38.45 showed that both the average costs and the average length of stay are considerably higher than the average costs and the average length of stay for those cases without procedure code 38.45.

In addition, we reviewed the cases in which both procedure codes 38.45 and 39.73 were documented during the same

admission. As can be seen in the charts below, we found 22 cases in which both procedure codes 38.45 and 39.73 were reported. Therefore, the sum of the values in the next two charts below will differ from the charts above because the cases containing both procedure codes have been removed and the data have been reworked.

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 237—All cases	20,680	10.03	\$34,268
MS-DRG 237—Cases with procedure code 39.73 and without procedure code 38.45	1,829	7.68	40,862
MS-DRG 237—Cases with procedure code 38.45 and without procedure code 39.73	424	13.36	51,783
MS-DRG 238—All cases	35,705	4.08	20,597

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 238—Cases with procedure code 39.73 and without procedure code 38.45	0	0	0
MS-DRG 238—Cases with procedure code 38.45 and without procedure code 39.73	466	7.29	30,219

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 237—All cases	20,680	10.03	\$34,268
MS-DRG 237—Cases with procedure code 38.45 and with procedure code 39.73	22	11.86	55,243
MS-DRG 237—Cases without procedure code 38.45 or procedure code 39.73	18,405	10.19	33,184
MS-DRG 238—All cases	35,705	4.08	20,597
MS-DRG 238—Cases with procedure code 38.45 and with procedure code 39.73	0	0	0
MS-DRG 238—Cases without procedure code 38.45 or procedure code 39.73	35,239	4.03	20,465

We found in our analysis of the claims data for cases with both procedure codes 38.45 and 39.73 that the average costs are substantially higher than those costs for the cases overall in MS-DRG 237. In addition, we found that the average length of stay for the 22 cases with both procedure codes 38.45 and 39.73 is higher at 11.86 days than the average length of stay of 10.03 days for all cases in MS-DRG 237.

Our analysis of the claims data for the procedure codes in MDC 5 showed that

procedure code 38.45 is also assigned to MS-DRGs 228 (Other Cardiothoracic Procedures with MCC), 229 (Other Cardiothoracic Procedures with CC), and 230 (Other Cardiothoracic Procedures without CC/MCC) when it occurs in combination with procedure code 38.44 (Resection of vessel with replacement, aorta, abdominal). Procedure code 39.73 is not assigned to MS-DRGs 228 through 230, and review of the data showed that there were no

cases that had been reported in these MS-DRGs.

The table below shows our findings of the average costs and the average length of stay for procedure code 38.45 reported in combination with procedure code 38.44 in MS-DRGs 228 through 230 and the average costs and the average length of stay in all cases in MS-DRGs 228 through 230 when both procedure codes 38.45 and 38.44 are not assigned.

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 228—All cases	2,084	13.79	\$49,488
MS-DRG 228—Cases with procedure code 38.45 and procedure code 38.44	276	15.18	56,246
MS-DRG 228—Cases without procedure code 38.45 and without procedure code 38.44	1,808	13.58	48,456
MS-DRG 229—All cases	2,354	8.31	31,148
MS-DRG 229—Cases with procedure code 38.45 and procedure code 38.44	157	10.68	37,723
MS-DRG 229—Cases without procedure code 38.45 and without procedure code 38.44	2,197	8.14	30,678
MS-DRG 230—All cases	628	5.45	24,236
MS-DRG 230—Cases with procedure code 38.45 and procedure code 38.44	34	7.18	27,054
MS-DRG 230—Cases without procedure code 38.45 and without procedure code 38.44	594	5.35	24,075

Our findings show that both the average length of stay and average costs are higher in those cases containing procedure code 38.45 than those cases without this procedure code in MS-DRGs 228 through 230.

We then analyzed the 1,851 cases containing procedure code 39.73 in MS-

DRGs 237 and 238 and the 912 cases containing procedure code 38.45 in MS-DRGs 237 and 238 to determine if they would meet the established criteria for a 3-way severity of illness split. This criterion is described in section III.G.1.c. of this preamble. The chart below shows our findings, with MS-DRG 237 acting

as a severity of illness proxy for all cases, as there were no cases in MS-DRG 238. In the chart, the extensions “-1,” “-2,” and “-3” correspond to severity levels, with “-1” representing cases with MCC, “-2” representing cases with CC, and “-3” representing cases without CC/MCC.

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 237-1—All cases	20,680	10.03	\$34,268
MS-DRG 237-1—Cases with procedure code 39.73	637	12.14	57,834
MS-DRG 237-1—Cases with procedure code 38.45	446	13.29	51,954
MS-DRG 237-2—All cases	17,356	5.73	22,083
MS-DRG 237-2—Cases with procedure code 39.73	659	6.89	38,673
MS-DRG 237-2—Cases with procedure code 38.45	353	8.14	31,480
MS-DRG 237-3—All cases	18,349	2.52	19,183
MS-DRG 237-3—Cases with procedure code 39.73	555	3.65	27,993
MS-DRG 237-3—Cases with procedure code 38.45	113	6.30	26,280

Our next step was to analyze the claims data for the cases in the clinically coherent MS-DRGs to which we proposed to move these cases. These six MS-DRGs are: 216 (Cardiac Valve & Other Major Cardiothoracic Procedures with Cardiac Catheterization with MCC); 217 (Cardiac Valve & Other Major Cardiothoracic Procedures with Cardiac Catheterization with CC); 218 (Cardiac Valve & Other Major Cardiothoracic Procedures with Cardiac Catheterization without CC/MCC); 219 (Cardiac Valve &

Other Major Cardiothoracic Procedures without Cardiac Catheterization with MCC), 220 (Cardiac Valve & Other Major Cardiothoracic Procedures without Cardiac Catheterization with CC); and 221 (Cardiac Valve & Other Major Cardiothoracic Procedures without Cardiac Catheterization without CC/MCC). For the sake of the grouping algorithm, procedure codes 39.73 and 38.45 must also be added to MS-DRGs 216 through 219. However, if these codes are documented in cases in which

a cardiac catheterization occurs, they will be “trumped” by those catheterizations. Therefore, when we reviewed the data in order to make length of stay and cost comparisons, we only used the three MS-DRGs to which procedure codes 39.73 and 38.45 would appear without cardiac catheterization; that is MS-DRGs 219, 220, and 221. Our findings describing these three MS-DRGs are displayed in the following chart:

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 219	12,805	12.76	\$51,399
MS-DRG 220	15,988	7.65	34,270
MS-DRG 221	4,043	5.90	28,974

Our evaluation of the severity levels in the cases containing procedure codes 39.73 and 38.45 using the proxy MS-DRGs 237-1, 237-2, and 237-3 compared to the claims data in the table above with MS-DRGs 219 through 221 demonstrates that the cases are similar in resource consumption. In addition, the cases are clinically coherent.

We indicated in the proposed rule that, by moving procedure code 38.45 to MS-DRGs 216 through 221, we did not believe that there is a need for combination codes 38.45 plus 38.44 to be specifically assigned to MS-DRGs 228, 229, and 230. Because MS-DRGs 216 through 221 are higher in the surgical hierarchy for MDC 5 than MS-DRGs 228 through 230, the result of the proposal would be that either procedure code 38.45 by itself or in combination with procedure code 38.44 will always be assigned to MS-DRGs 216 through 221. We indicated that when reported alone, under this policy, procedure code 38.44 would continue to be assigned to MS-DRGs 237 and 238, as it has been in the past.

Therefore, for FY 2012, we proposed to remove procedure codes 38.45 and 39.73 from MS-DRGs 237 and 238 and to add these codes to MS-DRGs 216, 217, 218, 219, 220, and 221 based on our findings of similar resource consumption and clinical coherence. To conform to this proposed change, we also proposed to revise the title of MS-DRG 237 (Major Cardiovascular Procedures with MCC or Thoracic Aortic Aneurysm Repair) by removing the terms “or Thoracic Aortic Aneurysm Repair.” Therefore, the new proposed title of MS-DRG 237 was “Major Cardiovascular Procedures with MCC.” We invited public comment on these proposals.

Comment: Several commenters supported the proposed changes.

Response: We appreciate the commenters’ support.

Therefore, as we proposed, we are adopting our proposed changes as final. In summary, we are removing procedure codes 38.45 and 39.73 from MS-DRGs 237 and 238 and adding these two codes to the following six MS-DRGs: 216; 217; 218; 219; 220; and 221. In addition, we are revising the title of MS-DRG 237 to read “Major Cardiovascular Procedures with MCC.” The title of MS-DRG 238 (Major Cardiovascular Procedures without MCC) will remain the same.

5. MDC 8 (Diseases and Disorders of the Musculoskeletal System and Connective Tissue)

a. Artificial Discs

In response to the FY 2011 IPPS/LTCH PPS proposed rule, we received a public comment that was outside of the scope of any proposal in that proposed rule. The commenter urged CMS to reassign procedure code 84.62 (Insertion of total spinal disc prosthesis, cervical) from MS-DRG 490 (Back and Neck Procedures Except Spinal Fusion with CC/MCC or Disc Device/ Neurostimulator) into MS-DRGs 471 through 473 (Cervical Spinal Fusion with MCC, with CC, and without CC/MCC, respectively). In addition, the commenter requested that CMS reassign procedure code 84.65 (Insertion of total spinal disc prosthesis, lumbosacral) from MS-DRG 490 (Back and Neck Procedures Except Spinal Fusion with CC/MCC or Disc Device/ Neurostimulator) to MS-DRGs 459 and 460 (Spinal Fusion Except Cervical with MCC and without MCC, respectively). However, the commenter also provided an alternative option to reassigning the

procedure codes to different MS-DRGs. The commenter suggested the creation of a new, separate MS-DRG for the two artificial disc procedures if reassignment to the fusion MS-DRGs was not feasible.

We refer the reader to the FY 2008 IPPS proposed rule and final rule with comment period (72 FR 24731 through 24735 and 47226 through 47232) for discussion on the comprehensive evaluation of all the spinal DRGs in the development of the MS-DRG classification system. The modifications made to the spinal DRGs for FY 2008 recognized the similar utilization of resources, differences in levels of severity, and the complexity of the services being performed on patients undergoing the various types of spinal procedures.

For the FY 2012 IPPS/LTCH PPS proposed rule, we analyzed FY 2010 MedPAR claims data for procedure codes 84.62 and 84.65 in MS-DRG 490 and compared those results to the claims data for MS-DRGs 459, 460, 471, 472, and 473. We found a total of 19,840 cases in MS-DRG 490 with an average length of stay of 4.24 days and average costs of \$11,940. As displayed in the chart below, we found 97 cases reporting procedure code 84.62, with an average length of stay of 1.80 days and average costs of \$13,194 in MS-DRG 490. We also found 35 cases reporting procedure code 84.65, with an average length of stay of 2.91 days and average costs of \$20,753. While average costs for the artificial disc cases were slightly higher (\$1,254 for procedure code 84.62 and \$8,813 for procedure code 84.65) compared to the average cost for all cases in MS-DRG 490, the artificial disc cases were of extremely low volume and reflected shorter lengths of stay

compared to all the cases in MS-DRG 490.

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 459—All cases	3,650	8.92	\$40,218
MS-DRG 460—All cases	60,865	3.75	25,268
MS-DRG 471—All cases	2,686	8.92	29,837
MS-DRG 472—All cases	8,586	3.78	18,494
MS-DRG 473—All cases	24,323	1.80	13,775
MS-DRG 490—All cases	19,840	4.24	11,940
MS-DRG 490—Cases with code 84.62	97	1.80	13,194
MS-DRG 490—Cases with code 84.65	35	2.91	20,753

We recognized the disparity in average costs for cases reporting the insertion of a cervical or lumbar artificial disc in MS-DRG 490 compared to all the cases in that MS-DRG. However, we did not believe this supports reassignment of procedure codes 84.62 and 84.65 to the MS-DRGs for spinal fusion as the commenter requested. Even with the disparity in costs, clinically, the insertion of an artificial disc is not a spinal fusion. Therefore, reassignment of the artificial disc cases to the fusion MS-DRGs would be clinically inappropriate. In addition, for certain Medicare populations, the insertion of an artificial disc is considered a noncovered procedure.

As stated earlier, the commenter also provided an alternative option to reassigning procedure codes 84.62 and 84.65. The commenter suggested the creation of a new, separate MS-DRG for the two artificial disc procedures if reassignment to the fusion MS-DRGs was not feasible. In our evaluation of the claims data and as shown above in the data chart, the artificial disc cases are of extremely low volume; therefore, we do not believe the findings warrant the creation of a separate MS-DRG.

We invited public comment on our proposal not to reassign procedure code 84.62 from MS-DRG 490 to MS-DRGs 471 through 473 and procedure code 84.65 from MS-DRG 490 to MS-DRGs 459 and 460. We also invited public comment on our proposal not to create a new, separate MS-DRG for artificial disc procedures (codes 84.62 and 84.65) for FY 2012.

Comment: Several commenters supported our proposal not to create a new MS-DRG for artificial disc procedures, as well as not to reassign the procedure codes for insertion of a cervical or lumbar artificial disc (codes 84.62 and 84.65) to the fusion MS-DRGs (459 and 460 and 471 through 473). One commenter agreed with our statement that the insertion of an artificial disc is not the same as a fusion and should not

be included in the fusion MS-DRGs. Another commenter agreed that reassignment of the artificial discs to the fusion MS-DRGs does not appear to be a clinically appropriate classification despite comparative costs. This commenter believed that limitations in the data, such as the low volume of cases, may be due to artificial discs being a noncovered procedure for certain Medicare populations and recommended revisiting our analysis for a new separate MS-DRG if the coverage policy is revised in the future.

Response: We appreciate the commenters' support for our proposals. We also acknowledge the commenters recommendation to conduct further analysis for total disc replacement procedures should the coverage policy pertaining to certain Medicare populations be modified in the future.

Comment: One commenter expressed appreciation to CMS for reviewing the current MS-DRG assignment for total disc replacement (TDR) procedures involving the cervical and lumbar areas. However, the commenter disagreed with the proposed rule analysis, stating it was limited to only the MedPAR database. The commenter believed that information from two publicly available databases, the Healthcare Cost and Utilization Project (HCUP) database and the California Patient Discharge database, support modifications to the TDR procedures. According to the commenter, "CMS' current MS-DRG assignment and resulting reimbursement at thirty to fifty percent (30-50%) of fusion procedures is well below the average eighty-eight percent (88%) ratio of TDR to fusion charges observed in the two additional databases analyzed."

The commenter acknowledged that procedure code 84.62 and procedure code 84.65 are currently assigned to MS-DRG 490, regardless of whether or not the patient has a CC or MCC. The commenter also acknowledged the evaluation of the spinal procedure MS-DRGs in the FY 2008 IPPS proposed and

final rules (72 FR 24731 through 24735 and 47226 through 47232), respectively. However, according to the commenter, the MS-DRG assignment for TDR procedures requires a more recent and thorough evaluation.

The commenter provided a comparison of how TDR procedures differ from other procedures assigned to MS-DRG 490. The commenter also stated that TDR procedures are more complex than other procedures in the MS-DRG. For example, the commenter noted that MS-DRG 490 includes procedure codes 84.58 and 84.59, representing spinal disc devices such as the X-Stop, Coflex, Dynesys, and M-Brace which do not involve removal of a disc. The commenter also noted that procedure code 80.51 (Excision of intervertebral disc), which comprises only one aspect of the total surgery required for TDR, is assigned to the same MS-DRG. The commenter further noted that because the two procedures are in the same MS-DRG, the hospital payment is the same for both procedures.

In addition, the commenter included a comparison of TDR cases and fusion cases, noting that there appeared to be greater similarity in resource use between fusion and TDR procedures than between TDR and other procedures in MS-DRG 490. The commenter reported that TDR is an alternative treatment option to spinal fusion and that patients receiving TDR have the same diagnosis as those receiving spinal fusion. In terms of similarity, the commenter stated that during both a TDR and spinal fusion surgery, the affected disc is removed, allowing normal disc height to be restored by the use of an implant. In spinal fusion, stability of the spinal segment is accomplished by the use of an implant and instrumentation such as plates, rods or screws and use of bone graft promotes osseous fusion of the vertebrae. For TDR procedures, an implant that allows motion is inserted into the disc space. According to the

commenter, these factors demonstrate clinical homogeneity and resource utilization for both TDR and spinal fusion.

The commenter did not dispute our findings that TDR procedures have shorter lengths of stay and are higher in costs compared to other procedures within MS-DRG 490. The commenter also acknowledged that TDR procedures are low volume and represent a fraction of all the procedures assigned to the MS-DRG.

Response: We appreciate and acknowledge the commenter's provision of data related to the HCUP database and the California Patient Discharge database. However, we point out that the commenter failed to identify the data related to each specified type of artificial disc replacement procedure in its analysis. We do not consider the data to be reliable for purposes of determining MS-DRG reclassifications in the form provided, as the data do not identify the number of cases, average length of stay, or average costs associated with a cervical versus a lumbar disc replacement. Further, in its own submitted comments, the commenter notes that the data provided were based on charges, not costs. In addition, as stated in the FY 2012 IPPS proposed rule (76 FR 25800), in order for us to consider using particular non-MedPAR data, we must have sufficient time to evaluate and test the data. This allows us time to test the data and make a preliminary assessment as to the feasibility of using the data. We evaluate patient care costs using average charges and lengths of stay as proxies for costs and rely on the judgment of our medical advisors to decide whether patients are clinically distinct or similar to other patients in the MS-DRG. We also consider variations and whether observed average differences are consistent across patients or attributable to cases that were extreme in terms of charges, length of stay, or both. Lastly, we consider the number of patients who will have a given set of characteristics and generally prefer not to create a new MS-DRG unless it would include a substantial number of cases.

In response to the commenter's comparison of how TDR procedures differ from other procedures in MS-DRG 490, we point out that procedure code 84.58 (Implantation of interspinous process decompression device), which previously identified the

X-Stop device, was deleted effective October 1, 2007 (FY 2008). In addition, the other spinal disc devices that were noted by the commenter (Coflex, Dynesys, and M-Brace) were reassigned from procedure code 84.59 (Insertion of other spinal devices) to unique codes that were created in response to industry requests to describe a newer category of devices identified as motion preserving technologies. This new procedure code category, 84.8 (Insertion, replacement and revision of posterior spinal motion preservation device(s)), also became effective as of October 1, 2007 (FY 2008). As discussed above, the commenter recommended that CMS conduct a more recent and thorough evaluation of the spinal procedures in MS-DRG 490. However, in its own submitted comments, the commenter referred to outdated, deleted codes for its comparison to TDR.

With regard to clinical homogeneity and resource utilization, spinal fusion, TDR and a subset of the motion preserving technologies utilizing implant devices that allow motion in the spinal column were discussed extensively as noted above in the FY 2008 IPPS proposed rule and final rule with comment period (72 FR 24731 through 24735 and 47226 through 47232), respectively.

We will continue to evaluate the MS-DRGs on an annual basis and to respond to requests for code reassignments and MS-DRG reclassifications. We performed an analysis of the cervical and lumbar artificial disc replacement procedures in comparison to the fusion MS-DRGs in response to the commenter's request, as described above. Our data did not support reassignment of the artificial disc replacement codes, nor did our clinical advisors agree that these procedures are clinically coherent to be grouped in the same MS-DRGs. In addition, the data did not support the creation of a new, separate MS-DRG for total disc replacement procedures.

As mentioned previously, we performed a comprehensive analysis of all the spinal DRGs in our FY 2008 rulemaking process and we recognized the costs of procedures involving insertion of a disc device. As a result, we modified MS-DRG 490 (the higher severity level) to include those procedures with disc devices. The data analysis conducted at that time supported that modification.

We will continue to monitor the resource utilization of procedure codes 84.62 and 84.65 to determine if future MS-DRG reassignments are warranted.

After consideration of the public comments we received, we are finalizing our proposal to not create a new, separate MS-DRG for cervical or lumbar total disc replacement procedures and to not reassign procedure code 84.62 from MS-DRG 490 to MS-DRGs 471 through 473 and procedure code 84.65 from MS-DRG 490 to MS-DRGs 459 and 460 for FY 2012.

b. Major Joint Replacement or Reattachment of Lower Extremities

We received a request to add an additional severity level for MS-DRG 469 (Major Joint Replacement or Reattachment of Lower Extremity with MCC) and MS-DRG 470 Major Joint Replacement or Reattachment of Lower Extremity without MCC). For the FY 2012 IPPS/LTCH PPS proposed rule, we examined FY 2010 MedPAR claims data to determine if we could subdivide the base MS-DRG into three severity levels: with MCC, with CC, and without CC/MCC. We applied the criteria used in the development of the MS-DRGs included in the FY 2008 IPPS final rule with comment period (72 FR 47169). We refer readers to this final rule with comment period for a complete description of these criteria. As discussed earlier, the original criteria were based on average charges. However, subsequent to the FY 2007 IPPS final rule (71 FR 47882), we now use average costs. The five criteria using costs are listed below. In order to warrant creation of a CC or an MCC subgroup within a base MS-DRG, the subgroup must meet all of the following five criteria:

- A reduction in variance of costs of at least 3 percent.
- At least 5 percent of the patients in the MS-DRG fall within the CC or MCC subgroup.
- At least 500 cases are in the CC or MCC subgroup.
- There is at least a 20-percent difference in average costs between subgroups.
- There is a \$2,000 difference in average costs between subgroups

The following table shows our determination of the number of cases and average costs by MCC, CC, and non-CC levels.

MS-DRGs 469 and 470	Number of cases	Average length of stay	Average costs
Cases with MCC	25,717	7.72	\$21,016

MS-DRGs 469 and 470	Number of cases	Average length of stay	Average costs
Cases with CC	179,116	3.99	14,233
Cases without CC/MCC	220,739	3.21	13,250
Total	425,572	3.8	14,133

We determined that these cases do not meet our five criteria for adding a new severity level. The cases failed to meet criterion four (requiring at least a 20-percent difference in average costs between subgroups) and criterion five (requiring a \$2,000 difference in average costs between subgroups). Therefore, we did not propose the addition of a new severity level for the base MS-DRG. Instead, we proposed to maintain the two existing severity levels for MS-DRGs 469 and 470. We welcomed public comments on our proposal not to add an additional severity level to MS-DRGs 469 and 470.

Comment: Several commenters supported our proposal to maintain the two existing severity levels for MS-DRGs 469 and 470 and not to add a third severity level. The commenters stated that the proposal seemed reasonable, given the data and information provided.

One commenter opposed our proposal. The commenter acknowledged the five criteria used to evaluate the establishment of a new severity level and the fact that this set of MS-DRGs did not meet the criterion requiring at least a 20-percent difference in average costs between subgroups or the criterion requiring a \$2,000 difference in average costs between subgroups. However, the commenter stated that the large number of “with CC” cases that are currently classified in the “without CC/MCC” group places an unfair burden on providers who treat these patients and presents a distorted picture of the actual severity level of cases assigned to those providers. The commenter believed that adding an additional severity level to MS-DRGs 469 and 470 would better identify those conditions that lead to higher severity of illness and resource use relative to the average Medicare patient.

Another commenter opposed our proposal of maintaining the current two severity levels. The commenter stated that while the data appear to show that there is not a significant average cost difference between cases without CC/MCC compared to cases with CC, the commenter believed the data are biased. The commenter believed that diagnoses that do not affect DRG assignment are less likely to be reported on claims. The

commenter speculated that it was reasonable to assume that, for cases assigned to these MS-DRGs, complications and comorbidities are underreported, as hospitals know that coding complications and comorbidities do not result in higher reimbursement. The commenter stated that a more reasonable approach would be to establish a third severity level for major joint replacement, with the intent of analyzing the data over the next 2 years to determine whether this was an appropriate MS-DRG modification. The commenter stated that the fact that “Revision of a Hip or Knee Replacement” has three levels strongly suggests that three levels would be appropriate for major joint replacement also.

Response: We agree with the commenters’ statements that the data analysis shows that two of the five established criteria for creating a new severity level were not met. The cases failed to meet criterion two requiring at least a 20-percent difference in average costs between subgroups and criterion five requiring a \$2,000 difference in average costs between subgroups. The criteria were developed to evaluate the need for severity levels across all MS-DRGs. We applied the criteria used in the development of the MS-DRGs included in the FY 2008 IPPS final rule with comment period (72 FR 47169). We refer readers to that final rule with comment period for a complete description of these criteria. As discussed earlier, the original criteria were based on average charges. However, subsequent to the FY 2007 IPPS final rule (71 FR 47882), we now use average costs. We believe it is important to apply these criteria consistently as requests are evaluated to create new severity levels. The cases in MS-DRGs 469 and 470 failed to meet the five criteria for adding a new severity level. We agree with the commenters who supported our proposal to maintain the two existing severity levels for MS-DRGs 469 and 470 and not creating a third severity level.

We disagree with the commenters who stated that CMS should ignore the criteria and add the additional severity level. One commenter suggested that we

could retroactively review this new severity level by examining claims data 2 years after the update is made. We believe it is inappropriate to make an exception to the severity level criteria based on an assumption that hospitals may be under reporting secondary diagnoses that are on the CC list for certain types of cases. We encourage hospitals to code and report accurately. We will continue to review data to determine if additional severity levels are needed for specific MS-DRGs based on our published criteria. We do not believe it is appropriate to make exceptions for certain MS-DRGs.

After consideration of the public comments we received, as we proposed, we are maintaining MS-DRGs 469 and 470 with the current two severity levels for FY 2012.

c. Combined Anterior/Posterior Spinal Fusion

A manufacturer requested that CMS reassign spinal fusion cases utilizing the AxiaLIF technology from MS-DRGs 459 and 460 (Spinal Fusion Except Cervical with MCC and without MCC, respectively) to MS-DRGs 453, 454, and 455 (Combined Anterior/Posterior Spinal Fusion with MCC, with CC, and without CC/MCC, respectively). The commenter stated that an anterior lumbar interbody spinal fusion performed with a lateral approach, the extreme lateral interbody fusion (XLIF®), with posterior spinal fixation, can report two codes resulting in assignment to the combined fusion MS-DRGs. The commenter also stated that the AxiaLIF technology, which is also utilized in an anterior lumbar interbody spinal fusion and uses a pre-sacral approach, can only report one code, resulting in assignment to the single fusion MS-DRGs. The commenter expressed concern that the payment incentives are not properly aligned for the recently available minimally invasive spinal fusion technologies. The commenter compared the XLIF® to the AxiaLIF and urged CMS to consider the AxiaLIF technology similar to the XLIF® for purposes of MS-DRG assignment.

Spinal fusion is a surgical procedure that joins two or more vertebrae by the use of bone graft (or bone graft substitute), with the goal of maintaining

alignment, providing stability, decreasing pain, and restoring the function of the spinal nerves. Routinely, a spinal fusion also utilizes internal fixation devices (instrumentation) to assist in stabilizing the spine. These fixation devices may include pedicle screws, cages, rods, or plates. Effective October 1, 2010, ICD-9-CM procedure code 81.06 (Lumbar and lumbosacral fusion of the anterior column, anterior technique) describes the XLIF® procedure, and code 81.08 (Lumbar and lumbosacral fusion of the anterior column, posterior technique) describes the AxiaLIF technology.

The spinal fusion codes and their corresponding MS-DRG assignment include the use of bone graft and internal fixation. The requestor's comment regarding the assignment of one procedure code for one technology versus assigning two procedure codes for another technology indicates that the commenter may not fully understand the MS-DRG GROUPER logic for spinal

fusions. For example, if an anterior lumbar interbody fusion is performed and posterior spinal fixation (or instrumentation) is also utilized, this requires one code and results in a single fusion MS-DRG assignment. However, if a posterior spinal fusion (procedure code 81.07 (Lumbar and lumbosacral fusion of the posterior column, posterior technique) was performed in addition to an anterior fusion, for example, the XLIF® procedure (procedure code 81.06), that scenario would necessitate the assignment of both codes, resulting in assignment to the combined spinal fusion MS-DRGs (453, 454, or 455). MS-DRGs 453, 454, and 455 were created to capture patients who have both an anterior and posterior fusion. We believe the requestor may have confused the terms "fixation" and "fusion" for MS-DRG assignment in its request.

For the FY 2012 IPPS/LTCH PPS proposed rule, we analyzed the FY 2010 MedPAR data to evaluate claims

reporting procedure codes 81.06, 81.07, and 81.08 in MS-DRGs 456 through 458 (Spinal Fusion Except Cervical with Spinal Curvature/Malignancy/Infection or 9+ Fusions with MCC, with CC and without CC/MCC, respectively) and MS-DRGs 459 and 460. We found a total of 1,115 cases in MS-DRG 456, with an average length of stay of 13.14 days and average costs of \$63,856. We found 278 cases reporting procedure code 81.08, with an average length of stay of 12.04 days and average costs of \$56,585. Similar results can be seen for procedure code 81.08 in the remaining MS-DRGs as shown in the chart below in terms of volume, length of stay, and average cost. Clearly, the data demonstrate that the AxiaLIF technology (procedure code 81.08) is appropriately assigned to its current MS-DRG assignments, as is the XLIF® procedure (procedure code 81.06).

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 456—All cases	1,115	13.14	\$63,856
MS-DRG 456—Cases with code 81.06	54	14.37	52,392
MS-DRG 456—Cases with code 81.07	22	12.32	46,828
MS-DRG 456—Cases with code 81.08	278	12.04	56,585
MS-DRG 457—All cases	3,079	6.74	41,500
MS-DRG 457—Cases with code 81.06	119	6.42	36,468
MS-DRG 457—Cases with code 81.07	98	6.49	36,532
MS-DRG 457—Cases with code 81.08	1,194	5.73	35,272
MS-DRG 458—All cases	1,389	3.91	32,946
MS-DRG 458—Cases with code 81.06	115	3.49	29,089
MS-DRG 458—Cases with code 81.07	76	3.16	30,551
MS-DRG 458—Cases with code 81.08	827	3.60	30,570
MS-DRG 459—All cases	3,650	8.92	40,218
MS-DRG 459—Cases with code 81.06	164	9.12	40,150
MS-DRG 459—Cases with code 81.07	165	8.65	37,970
MS-DRG 459—Cases with code 81.08	2,468	8.25	38,010
MS-DRG 460—All cases	60,865	3.75	25,268
MS-DRG 460—Cases with code 81.06	2,681	3.27	26,464
MS-DRG 460—Cases with code 81.07	3,709	3.67	23,334
MS-DRG 460—Cases with code 81.08	46,565	3.66	24,571

We also analyzed data for combinations of the spinal fusion codes that result in assignment to MS-DRGs 453, 454, and 455. We evaluated the following combinations:

- 81.06 (Lumbar and lumbosacral fusion of the anterior column, anterior technique) and 81.07 (Lumbar and lumbosacral fusion of the posterior column, posterior technique).
- 81.06 (Lumbar and lumbosacral fusion of the anterior column, anterior technique) and 81.08 (Lumbar and lumbosacral fusion of the anterior column, posterior technique).

We further analyzed data with the following combination of spinal fusion

codes in MS-DRGs 456, 457, and 458 and MS-DRGs 459 and 460:

- 81.07 (Lumbar and lumbosacral fusion of the posterior column, posterior technique) and 81.08 (Lumbar and lumbosacral fusion of the anterior column, posterior technique).

The chart below shows the results of the data analysis for the combination of procedure codes listed above where an anterior and posterior spinal fusion was performed in the same episode of care. There were a total of 1,190 cases in MS-DRG 453, with an average length of stay of 13.08 days and average costs of \$71,693. The cases reporting the combination of procedure codes 81.06 and 81.08 in this same MS-DRG totaled

431, with an average length of stay of 11.59 days and average costs of \$69,859. Results for the procedure code combination (81.06 and 81.08) in MS-DRGs 454 and 455 with regard to volume of cases, length of stay, and average costs data also support that these spinal fusion procedure code combinations are appropriately placed in their current MS-DRG assignments. Likewise, for MS-DRGs 456, 457, and 458, the data support that the spinal fusion procedure code combinations of 81.07 and 81.08 are appropriately placed in their current MS-DRG assignments. There were a total of 1,115 cases in MS-DRG 456 with an average length of stay of 13.14 days and average

costs of \$68,856. The cases reporting the combination of procedure codes 81.07 and 81.08 in this same MS-DRG totaled 54, with an average length of stay of 14.37 days and average costs of \$52,392. Results for the procedure code

combination (81.07 and 81.08) in MS-DRGs 457 and 458 with regard to volume of cases and average length of stay were lower compared to all the cases in those two MS-DRGs. While the data show higher average costs for the

procedure code combination of 81.07 and 81.08 in MS-DRGs 457 and 458, as stated previously, the volume was extremely low.

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 453—All cases	1,190	13.08	\$71,693
MS-DRG 453—Cases with codes 81.06 and 81.07	8	14.00	109,089
MS-DRG 453—Cases with codes 81.06 and 81.08	431	11.59	69,859
MS-DRG 454—All cases	3,052	6.38	48,311
MS-DRG 454—Cases with codes 81.06 and 81.07	47	6.83	60,743
MS-DRG 454—Cases with codes 81.06 and 81.08	1,825	5.71	47,144
MS-DRG 455—All cases	2,747	3.63	37,378
MS-DRG 455—Cases with codes 81.06 and 81.07	40	4.28	47,794
MS-DRG 455—Cases with codes 81.06 and 81.08	2,053	3.43	37,793
MS-DRG 456—All cases	1,115	13.14	63,856
MS-DRG 456—Cases with codes 81.07 and 81.08	54	14.37	52,392
MS-DRG 457—All cases	3,079	6.74	41,500
MS-DRG 457—Cases with codes 81.07 and 81.08	29	5.97	60,820
MS-DRG 458—All cases	1,389	3.91	32,946
MS-DRG 458—Cases with code 81.07 and 81.08	23	3.22	51,942

As the focus of the analysis was to evaluate procedure code 81.08 in comparison to procedure code 81.06, we believe the AxiaLIF technology (procedure code 81.08) is grouped appropriately in its current MS-DRG assignments, as is the XLIF® procedure (procedure code 81.06). The volume, length of stay, and cost data analyzed demonstrate that the complexity of services and resources utilized for each of these technologies are properly accounted for in their respective MS-DRG assignments. Therefore, the data did not support making changes for procedure code 81.08. As a result, we did not propose to reassign cases reporting this procedure code to the combined fusion MS-DRGs. We invited public comment on our proposal to not reassign procedure code 81.08 from MS-DRGs 456 through 460 to MS-DRGs 453 through 455 for FY 2012.

Comment: Several commenters supported our proposal to not reassign procedure code 81.08 to MS-DRGs 453 through 455.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to not reassign

procedure code 81.08 to MS-DRGs 453 through 455.

6. MDC 9 (Diseases and Disorders of the Skin, Subcutaneous Tissue, and Breast): Excisional Debridement of Wound, Infection, or Burn

We received a request that we remove procedure code 86.22 (Excisional debridement of wound, infection, or burn) from the list of codes considered to be O.R. procedures. The commenter stated that many inpatient excisional debridements are performed in a patient's room instead of in an operating room. The commenter believed that the original assignment of procedure code 86.22 to the O.R. list served to help reflect the resource intensity required by a patient with wounds and ulcers that required an excisional debridement. The commenter stated that, by doing so, the code served as a proxy for severity of illness in the original CMS DRGs prior to the implementation of MS-DRGs in FY 2008. The commenter stated that the creation of the most serious pressure ulcer codes for stage 3 and stage 4 pressure ulcers (codes 707.23 and 707.24) allows these conditions to be classified as MCCs. Therefore, the commenter stated that the need to use procedure code 86.22 to capture severity

of illness was no longer needed. The commenter also stated that procedure code 86.22 is a non-O.R. code under the APR-DRGs and does not affect the DRG assignment. The commenter requested that procedure code 86.22 be changed from an O.R. procedure code to a non-O.R. procedure code.

As the commenter stated, excisional debridements are currently captured in procedure code 86.22. Procedure code 88.22 is classified as an O.R. procedure in the current MS-DRGs and, therefore, leads to a surgical MS-DRG assignment. We examined MedPAR claims data on all excisional debridement cases and found that these debridement cases use appreciably fewer resources than other cases in their current surgical DRGs. However, for the proposed rule, we determined that if we were to classify debridement cases as non-O.R. cases and assign them to medical DRGs, we would significantly underpay these cases. The following chart shows differences in average costs for all excisional debridement cases compared to other cases within their current MS-DRG and compared to medical DRGs to which the patients would be assigned if the procedure were reclassified as a non-O.R. procedure.

Procedure code	All cases with no other OR procedure	Average cost (A)	Average costs in surgical DRGs to which the patients are assigned (B)	Average costs in medical DRGs to which the patients would be assigned (C)
86.22	32,152	\$12,427	\$17,332	\$8,070

The chart illustrates that when debridement is the only O.R. procedure, it is assigned to MS-DRGs that have an average cost that is approximately \$5,000 more than the actual cost of the debridement (\$12,427 versus \$17,332). Conversely, if the debridement is made a non-O.R. code, it would, on average, be assigned to MS-DRGs that have an average cost that is approximately \$4,000 less than the actual cost of the debridement (\$8,070 versus \$12,427). Therefore, we believe it would be inappropriate to propose to classify

these procedures as a non-O.R. procedure.

For the proposed rule, we explored alternative approaches to classifying procedure code 86.22 as a non-O.R. procedure. We evaluated the possibility of removing excisional debridements from their current MS-DRG assignments within the following skin-related MS-DRGs, where they are combined with skin grafts, and creating a new set of debridement MS-DRGs. The current MS-DRGs that combine skin grafts and debridements into the same MS-DRGs are as follows:

- MS-DRGs 573 through 575 (Skin Graft &/or Debridement for Skin Ulcer or Cellulitis with MCC, with CC, and without CC/MCC, respectively).
- MS-DRGs 576 through 578 (Skin Graft &/or Debridement Except for Skin Ulcer or Cellulitis with MCC, with CC, and without CC/MCC, respectively).

We analyzed MedPAR claims data on the severity level of graft cases without any debridements in these six MS-DRGs. Our findings are shown in the chart below.

SKIN GRAFTS WITHOUT DEBRIDEMENTS

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRGs 573-575—Cases with severity level of MCC	751	14.56	\$23,975
MS-DRGs 573-575—Cases with severity level of CC	1,720	10.16	14,869
MS-DRGs 573-575—Cases with severity level of without CC/MCC	540	5.36	8,469
MS-DRGs 576-578—Cases with severity level of MCC	335	10.28	22,996
MS-DRGs 576-578—Cases with severity level of CC	1,482	5.28	11,299
MS-DRGs 576-578—Cases with severity level of without CC/MCC	1,849	3.01	6,986

We compared these data to a proposed new set of skin-related MS-DRGs that would include only

debridements. The results of the findings of the severity levels of debridements without skin grafts in

these six MS-DRGs are shown in the chart below.

DEBRIDEMENTS WITHOUT SKIN GRAFTS

MS-DRG	Number of cases	Average length of stay	Average costs
MS-DRG 573-575—Cases with severity level of MCC	3,177	11.73	\$18,381
MS-DRG 573-575—Cases with severity level of CC	6,649	7.67	10,730
MS-DRG 573-575—Cases with severity level of without CC/MCC	2,555	4.94	6,372
MS-DRG 576-578—Cases with severity level of MCC	271	11.59	19,429
MS-DRG 576-578—Cases with severity level of CC	638	7.61	11,913
MS-DRG 576-578—Cases with severity level of without CC/MCC	285	4.45	6,928

Our findings indicate that the graft procedure cases have higher average costs than the excisional debridement cases. The average costs for the excisional debridement cases in MS-

DRGs 573 through 575 compared to the debridement cases in MS-DRGs 576 through 578 are very similar. We believe that the data support creating a single set of skin-related excisional

debridement MS-DRGs composed of cases previously captured in MS-DRGs 573 through 575 as well as MS-DRGs 576 through 578. The following chart illustrates those combined average costs.

EXCISIONAL DEBRIDEMENTS FROM MS-DRGS 573 THROUGH 578 SPLIT ON SEVERITY LEVEL

MS-DRGs 573-578	Number of cases	Average length of stay	Average costs
Combined Excisional Debridement Cases with Severity Level of MCC	3,448	11.71	\$18,463
Combined Excisional Debridement Cases with Severity Level of CC	7,287	7.76	10,833
Combined Excisional Debridement Cases with Severity Level of without CC/MCC	2,840	4.89	6,428

As we stated in the proposed rule, we believe that the data support separating skin graft procedures from excisional debridements by creating a new set of MS-DRGs. This would result in more accurate payment for both skin grafts

and debridement. Therefore, we proposed to remove excisional debridements (procedure code 86.22) from their current MS-DRG assignments within MS-DRGs 573 through 578 for skin grafts and assign them to new

excisional debridement MS-DRGs. We proposed to maintain MS-DRGs 573 through 578 for skin grafts. The following list describes the proposed new and revised MS-DRG titles:

Proposed new MS-DRGs based on procedure code 86.22:

- Proposed MS-DRG 570 (Skin Debridement with MCC)
- Proposed MS-DRG 571 (Skin debridement with CC)
- Proposed MS-DRG 572 (Skin Debridement without CC/MCC)

Proposed Revised MS-DRGs based on codes currently assigned to MS-DRGs 573 through 578, excluding procedure code 86.22:

- Proposed revised MS-DRG 573 (Skin Graft for Skin Ulcer or Cellulitis with MCC)
- Proposed revised MS-DRG 574 (Skin Graft for Skin Ulcer or Cellulitis with CC)
- Proposed revised MS-DRG 575 (Skin Graft for Skin Ulcer or Cellulitis without CC/MCC)
- Proposed revised MS-DRG 576 (Skin Graft Except for Skin Ulcer or Cellulitis with MCC)
- Proposed revised MS-DRG 577 (Skin Graft except for Skin Ulcer or Cellulitis with CC)
- Proposed revised MS-DRG 578 (Skin Graft Except for Skin Ulcer or Cellulitis without CC/MCC)

In the proposed rule, we invited public comments on our proposal for FY 2012 to create three new debridement MS-DRGs 570, 571, and 572 for skin debridement and to revise MS-DRGs 573 through 578 to include skin grafts only, as indicated above.

Comment: Several commenters supported our proposal to create three new debridement MS-DRGs, MS-DRGs 570, 571, and 572 for skin debridement and to revise MS-DRGs 573 through 578 to include skin grafts only, as described above. One commenter stated that the proposal seemed reasonable, given the data and the information provided. Another commenter who supported this MS-DRG modification expressed appreciation for the change because the relative weights better reflect resource intensive cases with the proposed new and revised MS-DRGs 570 through 578.

One commenter supported our recommendation not to remove the code for excisional debridement from the O.R. list. However, the commenter opposed removing excisional debridements (procedure code 86.22) from their current MS-DRG assignments within MS-DRGs 573 through 578 for skin grafts and assigning them to new excisional debridement MS-DRGs and maintaining MS-DRGs 573 through 578 for skin grafts. The commenter stated that excisional debridement is not exclusively a bedside procedure. Rather, the commenter noted, it can be performed in or out of the operation

room, based on the judgment of the surgeon. The commenter stated that, in many instances, this procedure cannot be performed at the bedside due to variables such as patient anxiety, the size of the wound, bleeding risk, among others. The commenter stated that removing excisional debridements from their current MS-DRG assignments could harm many hospitals that perform procedures such as split thickness skin grafts for extensive wound or burns. The commenter recommended that, instead of removing excisional debridements from the current MS-DRG assignments, CMS create a separate ICD-9-CM code for debridement that is performed in the operating room due to anesthesia, equipment, or monitoring requirements.

Another commenter opposed the creation of separate debridement and skin graft MS-DRGs out of concern that this would create significant confusion among hospital coders. The commenter stated that skin grafts and skin debridements are often performed on the same patient. The commenter stated that the current descriptions of MS-DRGs 573 through 575 (Skin Graft and/or Debridement for Skin Ulcer or Cellulitis with MCC, with CC, and without CC/MCC, respectively) and MS-DRGs 576 through 578 (Skin Graft and/or Debridement Except for Skin Ulcer or Cellulitis with MCC, with CC, and without CC/MCC, respectively) appropriately describe the interrelationship between skin grafts and debridement. The commenter expressed concern that de-linking this relationship would lead to confusion for coders.

Response: We agree with the commenters that data support the creation of three new debridement MS-DRGs 570, 571, and 572 for skin debridement and the revision of MS-DRGs 573 through 578 to include skin grafts only.

We disagree with the commenter who recommends that, instead of creating separate MS-DRGs for skin debridements and skin grafts, CMS pursue the creation of a new skin debridement code that would be limited to those procedures performed in an operating room setting. ICD-9-CM codes are not currently subdivided based on the location of the procedure such as in an operating room, endoscopy room, catheterization room, treatment room, or patient room. ICD-9-CM codes are assigned based on the procedure performed, not the location in which the procedure was performed. Furthermore, we have just begun a period of a partial freeze of both ICD-9-CM and ICD-10 codes. This partial freeze is discussed in section II.G.13.b.

of this preamble. We do not believe it is appropriate to postpone refinements to the MS-DRGs until a code update could be made and data on cases reported with the new code could be evaluated. We believe the current data support this proposed modification. However, as stated earlier, ICD-9-CM codes do not indicate the setting in which a procedure is performed. Therefore, it is unlikely that such a code would be created even if we were not in a period of a code freeze.

We also disagree with the commenter who stated that creating separate MS-DRGs for skin debridements and skin grafts will create confusion for coders. We believe that coders clearly understand the difference between skin debridements and skin grafts. If both are performed, then coders code and report both procedures. The fact that the MS-DRGs would be modified would not affect the way in which coders assign codes for skin debridements and skin grafts. We also note that organizations representing coders, including the American Health Information Management Association, supported this proposed MS-DRG modification. These organizations did not express concerns about any possible confusion for coders.

After consideration of the public comments we received, we are finalizing our proposal to create the following new and revised MS-DRGs:

New MS-DRGs based on procedure code 86.22:

- MS-DRG 570 (Skin Debridement with MCC)
- MS-DRG 571 (Skin debridement with CC)
- MS-DRG 572 (Skin Debridement without CC/MCC)

Revised MS-DRGs based on codes currently assigned to MS-DRGs 573 through 578, excluding procedure code 86.22:

- Revised MS-DRG 573 (Skin Graft for Skin Ulcer or Cellulitis with MCC)
- Revised MS-DRG 574 (Skin Graft for Skin Ulcer or Cellulitis with CC)
- Revised MS-DRG 575 (Skin Graft for Skin Ulcer or Cellulitis without CC/MCC)
- Revised MS-DRG 576 (Skin Graft Except for Skin Ulcer or Cellulitis with MCC)
- Revised MS-DRG 577 (Skin Graft except for Skin Ulcer or Cellulitis with CC)
- Revised MS-DRG 578 (Skin Graft Except for Skin Ulcer or Cellulitis without CC/MCC)

7. MDC 10 (Endocrine, Nutritional, and Metabolic Diseases and Disorders)

a. Nutritional and Metabolic Diseases: Update of MS-DRG Titles

We received a request to revise the MS-DRG titles for MS-DRGs 640 through 642 to more clearly capture the cases that are currently assigned to these MS-DRGs. The current titles for these MS-DRGs are: MS-DRGs 640 (Nutritional & Miscellaneous Metabolic Disorders with MCC); MS-DRG 641 (Nutritional & Miscellaneous Metabolic Disorders without MCC); and MS-DRG 642 (Inborn Errors of Metabolism). The requestor suggested that we change the titles to: MS-DRG 640 (Miscellaneous Disorders of Nutrition, Metabolism, and Fluids and Electrolytes with MCC); MS-DRG 641 (Miscellaneous Disorders of Nutrition, Metabolism, and Fluids and Electrolytes without MCC); and MS-DRG 642 (Inborn and Other Disorders of Metabolism).

Our clinical advisors supported these suggested changes to the titles, as the suggested changes would provide a better description of the diagnoses assigned to MS-DRGs 640, 641, and 642. Therefore, in the FY 2012 IPPS/LTCH PPS proposed rule, we proposed to revise the MS-DRG titles for MS-DRGs 640, 641, and 642 as the requestor suggested. We invited public comment on our proposal to change the MS-DRG titles for MS-DRGs 640, 641, and 642 for FY 2012.

Comment: Several commenters supported our proposed changes to the titles of MS-DRGs 640 through 642 to better reflect the cases that are assigned to these MS-DRGs.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are finalizing our proposal to change the titles for MS-DRGs 640 through 642. The final titles are as follows:

- MS-DRG 640 (Miscellaneous Disorders of Nutrition, Metabolism, and Fluids and Electrolytes with MCC)
- MS-DRG 641 (Miscellaneous Disorders of Nutrition, Metabolism, and Fluids and Electrolytes without MCC)
- MS-DRG 642 (Inborn and Other Disorders of Metabolism).

b. Sleeve Gastrectomy Procedure for Morbid Obesity

Sleeve gastrectomy is a 70 percent to 80 percent greater curvature gastrectomy (sleeve resection of the stomach) with continuity of the gastric lesser curve being maintained while simultaneously reducing stomach volume. It may be the

first step in a two-stage procedure when performing Roux-en-Y Gastric Bypass (RYGBP). Sleeve gastrectomy, whether open or laparoscopic, is currently coded using ICD-9-CM procedure code 43.89 (Other total gastrectomy). Procedure code 43.89 is currently assigned to several MS-DRGs. However, the code is not assigned to MS-DRG 619, 620, or 621 (O.R. Procedures for Obesity with MCC, with CC, and without CC/MCC, respectively).

We received a request for CMS to review MDC 10 (Endocrine, Nutritional, and Metabolic Diseases and Disorders) for consistency. Specifically, the requestor questioned why diagnosis code 278.01 (Morbid obesity), when paired on a claim with procedure code 43.89, would be assigned to MS-DRG 981, 982, or 983 (Extensive O.R. Procedure Unrelated to Principal Diagnosis with MCC, with CC, or without CC/MCC, respectively) instead of MS-DRG 619, 620, or 621.

Upon review for the FY 2012 IPPS/LTCH PPS proposed rule, we determined that diagnosis code 278.01 is assigned to MDC 10. However, procedure code 43.89 is not assigned to any MS-DRG set in this MDC. Therefore, the cases are assigned to MS-DRGs 981 through 983, reflecting procedures not related to the principal diagnosis. This was an inadvertent oversight on CMS' part when the MS-DRGs were created. Therefore, we proposed to add a procedure code or codes identifying sleeve gastrectomy to MS-DRGs 619 through 621 for FY 2012.

Currently, sleeve gastrectomy is identified in the ICD-9-CM procedure code Index as follows: Gastrectomy (partial) (subtotal) NEC 43.89. At procedure code 43.89 in the ICD-9-CM procedure code Tabular, an inclusion note identifies this code as including sleeve resection of the stomach.

In our proposal to add a procedure code or codes to MS-DRGs 619 through 621, we pointed out that there is an NCD that has precluded coverage of sleeve gastrectomy when performed either open or laparoscopically. This decision may be found in the Medicare National Coverage Determination Manual, Section 100.1, Nationally Noncovered Indications for Bariatric Surgery for Treatment of Morbid Obesity, effective on February 12, 2009. This manual is available on the CMS Web site through a link at: http://www.cms.gov/manuals/downloads/mcd103c1_Part2.pdf. This manual entry affirms that treatment for obesity via use of the open or laparoscopic sleeve gastrectomy is determined to be noncovered for Medicare beneficiaries.

Noncoverage of these cases is determined by our Medicare contractors, the fiscal intermediary or A-B/MAC, because of the nature of procedure code 43.89, which is a code that identifies several gastrectomy procedures. To identify a code in the MCE that describes many procedures would inappropriately restrict other procedures which are also described by that code, but which are covered. We received a request to create specific codes uniquely identifying both laparoscopic sleeve gastrectomy and the open procedure, vertical sleeve gastrectomy. We addressed this request at the ICD-9-CM Coordination and Maintenance Committee meeting held on March 9, 2011.

We had stated that should a code or codes be created as a result of this request, we would then be able to add this code or codes to the MCE as a conforming noncoverage edit when combined with diagnosis code 278.01. The background information discussing sleeve gastrectomy coding can be accessed on the CMS Web site at: http://www.cms.gov/ICD9ProviderDiagnosticCodes/03_meetings.asp#TopOfPage. A summary of the meeting can be found on CMS' Web site for the ICD-9-CM Coordination and Maintenance Committee at: http://www.cms.gov/ICD9ProviderDiagnosticCodes/03_meetings.asp#TopOfPage by scrolling down to the .pdf zip files containing the meeting agenda and handouts.

Therefore, for FY 2012, we proposed to add a procedure code or codes identifying sleeve gastrectomy to MS-DRGs 619 through 621. However, we also indicated that we intended to add any code or codes created at the ICD-9-CM Coordination and Maintenance Committee on March 9, 2011, to the MCE because sleeve gastrectomy, whether open or laparoscopic, is not covered for Medicare beneficiaries. The code or codes would appear in the "Noncovered Procedures" edit of the MCE. As the timing of the development of the proposed rule and the date of the March 2011 meeting of the ICD-9-CM Coordination and Maintenance Committee overlapped, we could not determine if additional sleeve gastrectomy codes would be created, to what code number or numbers they would be assigned, or how the narrative describing them would read. However, we indicated that should a code or codes be created, we proposed that they would simultaneously be placed in both MS-DRGs 619 through 621 and the MCE. This decision may seem to be counterintuitive, but CMS realizes that

our MS-DRGs and the Medicare GROUPER program are used for other beneficiaries and by other insurance plans rather than strictly for Medicare beneficiaries. Any new code or codes created as a result of the ICD-9-CM Coordination and Maintenance Committee meeting are included in Table 6B (which is listed in section VI. of the Addendum to this final rule and available via the Internet at http://www.cms.gov/ICD9ProviderDiagnosticCodes/04_addendum.asp#TopOfPage); we indicated that we did not have a mechanism to make the codes from the March 9, 2011 meeting available in the proposed rule prior to the final rule's publication.

As a result of the March 9, 2011 ICD-9-CM Coordination and Maintenance Committee Meeting, one code was created: Procedure code 43.82 (Laparoscopic vertical (sleeve) gastrectomy). To address open gastrectomies, the title of existing code 43.89 was revised to read "Open and other partial gastrectomy". Both codes can be found in Table 6B (New Procedure Codes) and Table 6F (Revised Procedure Code Titles), which are listed in the Addendum to this final rule and available via the Internet on the CMS Web site.

Comment: Several commenters addressed both the creation of a code or codes for laparoscopic or open sleeve gastrectomy discussed above and the proposed changes to the MCE. Several commenters indicated that they had no objections to the proposed changes to the MS-DRG classifications and the MCE, stating that the proposed changes seemed reasonable, given the data and information provided. One commenter specifically requested that CMS finalize its proposal to add new procedure code 43.82 to the MCE as a noncovered procedure.

Response: We appreciate the commenters' support of our proposal.

Comment: One commenter stated that they understood that procedure code 43.89 was inadvertently omitted from MS-DRGs 619, 620, and 621 when the MS-DRGs were created and supported the addition of this code to these MS-DRGs. In addition, this commenter stated that because procedure code 43.89 is not specific to open sleeve gastrectomy, it cannot be incorporated as a "noncovered procedure" in the MCE.

Response: We appreciate the commenter's support for this proposal and agree that procedure code 43.89 includes several gastrectomy procedures. Therefore, to identify a code describing many procedures in an MCE

edit would inappropriately restrict other procedures included in that code that are covered.

After consideration of the public comments we received, we are adopting as final our proposal to assign both the new procedure code 43.82 (Laparoscopic vertical (sleeve) gastrectomy) and the existing procedure code 43.89 (Other total gastrectomy) to MS-DRGs 619, 620, and 621 (O.R. Procedures for Obesity with MCC, with CC, and without CC/MCC, respectively). In addition, we are adding procedure code 43.82 to the "Noncovered Procedures" edit of the MCE because laparoscopic sleeve gastrectomy is not covered for Medicare beneficiaries. Because procedure code 43.89 includes several gastrectomy procedures, its inclusion in the MCE would be inappropriate. Therefore, it will not be placed on the MCE.

8. MDC 15 (Newborns and Other Neonates With Conditions Originating in the Perinatal Period): Discharge Status Code 66 (Discharged/Transferred to Critical Assess Hospital (CAH))

In the FY 2011 IPPS/LTCH PPS final rule (75 FR 50236), we finalized our transfer policy regarding transfer of patients from an acute care hospital to a CAH. In that final rule, we stated that hospitals are required to use patient discharge status code 66 on the IPPS claims to identify transfers to CAHs.

With this new requirement, a discharge from an IPPS hospital to a CAH equates to a transfer status. However, discharge status code 66 is currently not included in the MS-DRG GROUPER logic for MS-DRG 789 (Neonate, Died or Transferred to Another Acute Care Facility). Therefore, in the FY 2012 IPPS/LTCH PPS proposed rule, we proposed to add discharge status code 66 to the MS-DRG GROUPER logic for MS-DRG 789. We invited public comment on our proposal to add discharge status code 66 to the MS-DRG GROUPER logic for MS-DRG 789 for FY 2012.

Comment: Several commenters supported our proposal to add discharge status code 66 to the MS-DRG GROUPER logic for MS-DRG 789.

Response: We appreciate the support of the commenters.

After consideration of the public comments we received, we are finalizing our proposal to add discharge status code 66 (Discharged/Transferred to Critical Assess Hospital (CAH)) to the MS-DRG GROUPER logic for MS-DRG 789.

9. Medicare Code Editor (MCE) Changes

As explained under section II.B.1. of the preamble of this final rule, the Medicare Code Editor (MCE) is a software program that detects and reports errors in the coding of Medicare claims data. Patient diagnoses, procedure(s), and demographic information are entered into the Medicare claims processing systems and are subjected to a series of automated screens. The MCE screens are designed to identify cases that require further review before classification into an MS-DRG. In this final rule, we discuss our intention to make the following change to the MCE edits.

In section II.G.7.b. of this preamble, we discuss that the current ICD-9-CM procedure code for sleeve gastrectomy (43.89 (Other partial gastrectomy, other)) is a noncovered code when performed for resection of the stomach in patients with morbid obesity. We also discuss that noncoverage for Medicare beneficiaries of cases containing procedure code 43.89 is determined by the fiscal intermediaries or A-B/MACs because of the nature of procedure code 43.89. This code is imprecise and identifies several other gastrectomy procedures in addition to sleeve resection. Therefore, to limit coverage by identifying a code that describes many procedures through the use of the MCE would inappropriately restrict other procedures that are covered by Medicare. In that section, we also state that we received a request to create specific procedure codes identifying both laparoscopic sleeve gastrectomy and open vertical sleeve gastrectomy. As we stated above, we addressed this request at the ICD-9-CM Coordination and Maintenance Committee meeting held on March 9, 2011. In the FY 2012 IPPS/LTCH PPS proposed rule (FR 76 25833 and 25834), we indicated that if a code or codes should be created as a result of this request, we would then be able to add these codes to the MCE as a conforming noncoverage edit when combined with diagnosis code 278.01 (Morbid obesity).

As the timing of development of the proposed rule and the scheduling of the ICD-9-CM Coordination and Maintenance Committee meeting on March 9, 2011 overlapped, it was not possible to determine what those codes might be, or even if they would be created for FY 2012. However, we indicated in the proposed rule that should a code or codes be created, we proposed that any code or codes for laparoscopic or open sleeve resection of the stomach would be added to the MCE as a noncovered procedure or

procedures, in combination with diagnosis code 278.01. The background information discussing sleeve gastrectomy coding can be accessed on the CMS Web site at: http://www.cms.gov/ICD9ProviderDiagnosticCodes/03_meetings.asp#TopOfPage. New codes describing sleeve gastrectomy are included in Table 6B (which is listed in section VI. of the Addendum to this final rule and are also available via the Internet at http://www.cms.gov/ICD9ProviderDiagnosticCodes/04_addendum.asp#TopOfPage). In the proposed rule, we indicated that we did not have a mechanism to make the codes available prior to the final rule's publication, and invited public comments on this proposal.

As a result of the March 9, 2011 ICD-9-CM Coordination and Maintenance Committee Meeting, one code was created: procedure code 43.82 (Laparoscopic vertical (sleeve) gastrectomy). To address open gastrectomies, the title of existing procedure code 43.89 was revised to read "Open and other partial gastrectomy". Both codes can be found in Tables 6B and 6F, which are listed in the Addendum to this final rule and available via the Internet.

Comment: Several commenters indicated that they had no objections to the proposed changes to the MS-DRG classifications and the MCE, stating that the proposed changes seemed reasonable, given the data and information provided. One commenter specifically requested that CMS finalize its proposal to add new procedure code 43.82 to the MCE as a noncovered procedure.

Response: We appreciate the commenters' support of our proposals.

Comment: Several commenters stated that because procedure code 43.89 is not specific to open sleeve gastrectomy it cannot be incorporated as a "noncovered procedure" in the MCE.

Response: We agree that procedure code 43.89 includes several gastrectomy procedures, and to identify this code describing many procedures in an MCE edit would be inappropriately restricting other procedures that are covered.

Comment: One commenter recognized that procedure codes discussed at the ICD-9-CM Coordination and Maintenance Committee Meeting of March 9, 2011 could not logistically be included in the IPPS proposed rule. The commenter urged CMS to apply current logic to code revisions that were discussed at the March 2011 ICD-9-CM Coordination and Maintenance Committee meeting, but which could

not be finalized in time to include them in the proposed rule.

Response: We appreciate that the public understands some of the timing constraints under which we must operate. We assure the public that the same logic considerations regarding code assignment to predecessor MS-DRGs as well as O.R. determinations are applied to newly created codes from the March 2011 ICD-9-CM Coordination and Maintenance Committee Meeting as were applied to the codes created as a result of the September 15, 2010 ICD-9-CM Coordination and Maintenance Committee Meeting.

After consideration of the public comments we received, we are adopting as final our proposal to add procedure code 43.82 to the "Noncovered Procedures" edit of the MCE, given that laparoscopic sleeve gastrectomy is not covered for Medicare beneficiaries. Because procedure code 43.89 includes several gastrectomy procedures, its inclusion in the MCE would be inappropriate. Therefore, we are not placing it on the MCE.

10. Surgical Hierarchies

Some inpatient stays entail multiple surgical procedures, each one of which, occurring by itself, could result in assignment of the case to a different MS-DRG within the MDC to which the principal diagnosis is assigned. Therefore, it is necessary to have a decision rule within the GROUPER by which these cases are assigned to a single MS-DRG. The surgical hierarchy, an ordering of surgical classes from most resource-intensive to least resource-intensive, performs that function. Application of this hierarchy ensures that cases involving multiple surgical procedures are assigned to the MS-DRG associated with the most resource-intensive surgical class.

Because the relative resource intensity of surgical classes can shift as a function of MS-DRG reclassification and recalibrations, we reviewed the surgical hierarchy of each MDC, as we have for previous reclassifications and recalibrations, to determine if the ordering of classes coincides with the intensity of resource utilization.

A surgical class can be composed of one or more MS-DRGs. For example, in MDC 11, the surgical class "kidney transplant" consists of a single MS-DRG (MS-DRG 652) and the class "major bladder procedures" consists of three MS-DRGs (MS-DRGs 653, 654, and 655). Consequently, in many cases, the surgical hierarchy has an impact on more than one MS-DRG. The methodology for determining the most resource-intensive surgical class

involves weighting the average resources for each MS-DRG by frequency to determine the weighted average resources for each surgical class. For example, assume surgical class A includes MS-DRGs 1 and 2 and surgical class B includes MS-DRGs 3, 4, and 5. Assume also that the average costs of MS-DRG 1 is higher than that of MS-DRG 3, but the average costs of MS-DRGs 4 and 5 are higher than the average costs of MS-DRG 2. To determine whether surgical class A should be higher or lower than surgical class B in the surgical hierarchy, we would weigh the average costs of each MS-DRG in the class by frequency (that is, by the number of cases in the MS-DRG) to determine average resource consumption for the surgical class. The surgical classes would then be ordered from the class with the highest average resource utilization to that with the lowest, with the exception of "other O.R. procedures" as discussed below.

This methodology may occasionally result in assignment of a case involving multiple procedures to the lower-weighted MS-DRG (in the highest, most resource-intensive surgical class) of the available alternatives. However, given that the logic underlying the surgical hierarchy provides that the GROUPER search for the procedure in the most resource-intensive surgical class, in cases involving multiple procedures, this result is sometimes unavoidable.

We note that, notwithstanding the foregoing discussion, there are a few instances when a surgical class with a lower average cost is ordered above a surgical class with a higher average cost. For example, the "other O.R. procedures" surgical class is uniformly ordered last in the surgical hierarchy of each MDC in which it occurs, regardless of the fact that the average costs for the MS-DRG or MS-DRGs in that surgical class may be higher than those for other surgical classes in the MDC. The "other O.R. procedures" class is a group of procedures that are only infrequently related to the diagnoses in the MDC, but are still occasionally performed on patients in the MDC with these diagnoses. Therefore, assignment to these surgical classes should only occur if no other surgical class more closely related to the diagnoses in the MDC is appropriate.

A second example occurs when the difference between the average costs for two surgical classes is very small. We have found that small differences generally do not warrant reordering of the hierarchy because, as a result of reassigning cases on the basis of the hierarchy change, the average costs are likely to shift such that the higher-

ordered surgical class has a lower average costs than the class ordered below it.

As we proposed, based on the changes that we are make for FY 2012, as discussed in sections II.G.1. and 6. of this preamble, we are revising the surgical hierarchy for Pre-MDCs and MDC 9 (Diseases and Disorders of the Skin, Subcutaneous Tissue, and Breast) as follows:

In Pre-MDCs, we are reordering new MS-DRG 016 (Autologous Bone Marrow Transplant with CC/MCC) and new MS-DRG 017 (Autologous Bone Marrow Transplant without CC/MCC) above MS-DRG 010 (Pancreas Transplant).

In MDC 9, we are reordering—

- MS-DRG 578 (Skin Graft Except for Skin Ulcer or Cellulitis without CC/MCC) above new MS-DRG 570 (Skin Debridement with MCC);
- New MS-DRG 570 above new MS-DRG 571 (Skin Debridement with CC);
- New MS-DRG 571 above new MS-DRG 572 (Skin Debridement without CC/MCC); and
- New MS-DRG 572 above MS-DRG 579 (Other Skin, Subcutaneous Tissue, and Breast Procedures with MCC).

Comment: Commenters generally supported our proposals.

Response: Based on these public comments and our review of the proposed revisions using the March 2011 update of the FY 2010 MedPAR file and the revised GROUPER software, we found that the revisions are still supported by the data. Therefore, we have incorporated the proposed revisions to the surgical hierarchy as final for FY 2012.

11. Complications or Comorbidity (CC) Exclusions List

a. Background

As indicated earlier in the preamble of this final rule, under the IPPS MS-DRG classification system, we have developed a standard list of diagnoses that are considered CCs. Historically, we developed this list using physician panels that classified each diagnosis code based on whether the diagnosis, when present as a secondary condition, would be considered a substantial complication or comorbidity. A substantial complication or comorbidity was defined as a condition that, because of its presence with a specific principal diagnosis, would cause an increase in the length of stay by at least 1 day in at least 75 percent of the patients. We refer readers to section II.D.2. and 3. of the preamble of the FY 2008 IPPS final rule with comment period for a discussion of the refinement of CCs in relation to the MS-DRGs we adopted for FY 2008 (72 FR 47121 through 47152).

b. CC Exclusions List for FY 2012

In the September 1, 1987 final notice (52 FR 33143) concerning changes to the DRG classification system, we modified the GROUPER logic so that certain diagnoses included on the standard list of CCs would not be considered valid CCs in combination with a particular principal diagnosis. We created the CC Exclusions List for the following reasons: (1) To preclude coding of CCs for closely related conditions; (2) to preclude duplicative or inconsistent coding from being treated as CCs; and (3) to ensure that cases are appropriately classified between the complicated and uncomplicated DRGs in a pair. As we indicated above, we developed a list of diagnoses, using physician panels, to include those diagnoses that, when present as a secondary condition, would be considered a substantial complication or comorbidity. In previous years, we have made changes to the list of CCs, either by adding new CCs or deleting CCs already on the list.

In the May 19, 1987 proposed notice (52 FR 18877) and the September 1, 1987 final notice (52 FR 33154), we explained that the excluded secondary diagnoses were established using the following five principles:

- Chronic and acute manifestations of the same condition should not be considered CCs for one another.
- Specific and nonspecific (that is, not otherwise specified (NOS)) diagnosis codes for the same condition should not be considered CCs for one another.
- Codes for the same condition that cannot coexist, such as partial/total, unilateral/bilateral, obstructed/unobstructed, and benign/malignant, should not be considered CCs for one another.
- Codes for the same condition in anatomically proximal sites should not be considered CCs for one another.
- Closely related conditions should not be considered CCs for one another.

The creation of the CC Exclusions List was a major project involving hundreds of codes. We have continued to review the remaining CCs to identify additional exclusions and to remove diagnoses from the master list that have been shown not to meet the definition of a CC.²

² See the FY 1989 final rule (53 FR 38485, September 30, 1988), for the revision made for the discharges occurring in FY 1989; the FY 1990 final rule (54 FR 36552, September 1, 1989), for the FY 1990 revision; the FY 1991 final rule (55 FR 36126, September 4, 1990), for the FY 1991 revision; the FY 1992 final rule (56 FR 43209, August 30, 1991), for the FY 1992 revision; the FY 1993 final rule (57 FR 39753, September 1, 1992), for the FY 1993 revision; the FY 1994 final rule (58 FR 46278,

(1) Limited Revisions Based on Changes to the ICD-9-CM Diagnosis Codes

For FY 2012, we proposed to make limited revisions to the CC Exclusions List to take into account the changes made in the ICD-9-CM diagnosis coding system effective October 1, 2011. (We refer readers to section II.G.13. of the preamble of this final rule for a discussion of ICD-9-CM changes.) We proposed to make these changes in accordance with the principles established when we created the CC Exclusions List in 1987. In addition, we indicated on the CC Exclusions List some changes as a result of updates to the ICD-9-CM codes to reflect the exclusion of codes from being MCCs under the MS-DRG system that we adopted in FY 2008.

CMS encourages input from our stakeholders concerning the annual IPPS updates when that input is made available to us by December of the year prior to the next annual proposed rule update. For example, to be considered for any updates or changes in FY 2012, comments and suggestions should have been submitted by early December 2010. The following comments were submitted in a timely manner and, therefore, are being discussed in this section.

(A) Pressure Ulcer Diagnosis Codes

We received a comment recommending that CMS remove diagnosis codes 707.23 (Pressure ulcer, stage III) and 707.24 (Pressure ulcer, stage IV) from the CC Exclusion List when reported as a secondary diagnosis code with a principal diagnosis code for the pressure ulcer site: Diagnosis code 707.00 (Pressure ulcer, unspecified); diagnosis code 707.01 (Pressure ulcer,

September 1, 1993), for the FY 1994 revisions; the FY 1995 final rule (59 FR 45334, September 1, 1994), for the FY 1995 revisions; the FY 1996 final rule (60 FR 45782, September 1, 1995), for the FY 1996 revisions; the FY 1997 final rule (61 FR 46171, August 30, 1996), for the FY 1997 revisions; the FY 1998 final rule (62 FR 45966, August 29, 1997) for the FY 1998 revisions; the FY 1999 final rule (63 FR 40954, July 31, 1998), for the FY 1999 revisions; the FY 2001 final rule (65 FR 47064, August 1, 2000), for the FY 2001 revisions; the FY 2002 final rule (66 FR 39851, August 1, 2001), for the FY 2002 revisions; the FY 2003 final rule (67 FR 49998, August 1, 2002), for the FY 2003 revisions; the FY 2004 final rule (68 FR 45364, August 1, 2003), for the FY 2004 revisions; the FY 2005 final rule (69 FR 49848, August 11, 2004), for the FY 2005 revisions; the FY 2006 final rule (70 FR 47640, August 12, 2005), for the FY 2006 revisions; the FY 2007 final rule (71 FR 47870) for the FY 2007 revisions; the FY 2008 final rule (72 FR 47130) for the FY 2008 revisions, the FY 2009 final rule (73 FR 48510), the FY 2010 final rule (74 FR 43799); and the FY 2011 final rule (75 FR 50114). In the FY 2000 final rule (64 FR 41490, July 30, 1999, we did not modify the CC Exclusions List because we did not make any changes to the ICD-9-CM codes for FY 2000.

elbow); diagnosis code 707.02 (Pressure ulcer, upper back); diagnosis code 707.03 (Pressure ulcer, lower back); diagnosis code 707.04 (Pressure ulcer, hip); diagnosis code 707.05 (Pressure ulcer, buttock); diagnosis code 707.06 (Pressure ulcer, ankle); diagnosis code 707.07 (Pressure ulcer, heel); or diagnosis code 707.09 (Pressure ulcer, other site). Currently, when a patient is admitted with a pressure ulcer, the CC Exclusion List prevents a pressure ulcer stage diagnosis code from being designated as an MCC when reported as a secondary diagnosis. The commenter disagreed with this approach and contended that a patient admitted for treatment of a stage III or stage IV pressure ulcer likely requires resources that would qualify the case as a diagnosis with an MCC or, at a minimum, as a CC.

Our clinical advisors agreed with the commenter. Therefore, in the FY 2012 IPPS/LTCH PPS proposed rule, we proposed to remove diagnosis codes 707.23 and 707.24 from the CC Exclusion List when a principal diagnosis code of one of codes 707.00 through 707.09 is reported. Under this proposal, diagnosis code 707.23 or diagnosis code 707.24 would be an MCC when reported as a secondary diagnosis code with a principal diagnosis code of one of codes 707.00 through 707.09.

Comment: Several commenters supported the proposed removal of diagnosis codes 707.23 and 707.24 from the CC Exclusion list when a principal diagnosis code of one of the codes 707.00 through 707.09 is reported.

Response: We appreciate the support of the commenters. As stated above, we believe this proposed change has merit.

After consideration of the public comments we received, we are adopting as final our proposal to remove diagnosis codes 707.23 (Pressure ulcer stage III) and 707.24 (Pressure ulcer stage IV) from the CC Exclusion List when reported as a secondary diagnosis code with a principal diagnosis code for the pressure ulcer site: diagnosis code 707.00 (Pressure ulcer, unspecified); diagnosis code 707.01 (Pressure ulcer, elbow); diagnosis code 707.02 (Pressure ulcer, upper back); diagnosis code 707.03 (Pressure ulcer, lower back); diagnosis code 707.04 (Pressure ulcer, hip); diagnosis code 707.05 (Pressure ulcer, buttock); diagnosis code 707.06 (Pressure ulcer, ankle); diagnosis code 707.07 (Pressure ulcer, heel); or diagnosis code 707.09 (Pressure ulcer, other site).

(B) End-Stage Renal Disease Diagnosis Code

We received a suggestion from a commenter that diagnosis code 585.6 (End-stage renal disease) be added to the CC Exclusion List when reported with a principal diagnosis code of 403.90 (Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified) or diagnosis code 403.91 (Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage V or end-stage renal disease). Currently, diagnosis code 585.6 is designated as an MCC.

According to the commenter, diagnosis codes 585.6 and 403.91 are essentially the same diagnosis but coding guidelines require the reporting of two codes to identify the stage of chronic kidney disease when associated with hypertensive chronic kidney disease. The commenter suggested that there is no need for diagnosis code 585.6 to be designated as an MCC when reported with a principal diagnosis of hypertensive chronic kidney disease, stage V or end-stage renal disease. The commenter also pointed out that, while coding guidelines would preclude diagnosis codes 403.90 and 585.6 from being reported together, the MS-DRG GROUPER allows diagnosis code 585.6 to act as an MCC when reported as a secondary diagnosis with principal diagnosis code 403.90.

As discussed in the proposed rule, in response to the first issue, our clinical advisors disagree with the commenter. Diagnosis code 403.91 includes chronic kidney disease stage V or end-stage renal disease. These are two separate conditions (or stages) that are identified by two unique codes. Diagnosis code 585.5 identifies stage V chronic kidney disease and is classified as a CC. Diagnosis code 585.6 identifies end-stage renal disease, is classified as an MCC, and describes patients who require chronic dialysis. The patients diagnosed with stage V chronic kidney disease are a different population who require different resources than those patients who are diagnosed with end-stage renal disease. Therefore, in the FY 2012 IPPS/LTCH PPS proposed rule, we did not propose to add diagnosis code 585.6 to the CC Exclusion List when reported with a principal diagnosis of code 403.91.

On the second issue raised by the commenter, our clinical advisors agreed. Diagnosis code 403.90 identifies patients with chronic kidney disease, stages I through IV or unspecified, and diagnosis code 585.6 identifies end-stage renal disease. Our clinical advisors

indicate that the reporting of diagnosis code 585.6 should not be designated as an MCC in this case. We agreed with the commenter that diagnosis codes 403.90 and 585.6 should not be reported together as instructed by the Coding Guidelines. Only a code from the 585.1 through 585.4 range (stages I through IV, or unspecified) should be reported with diagnosis code 403.90. Diagnosis code 585.6 is the exclusive code that uniquely identifies end-stage renal disease and should only be reported with diagnosis code 403.91. Therefore, in the FY 2012 IPPS/LTCH PPS proposed rule, we proposed to add diagnosis code 585.6 to the CC Exclusion List when reported with a principal diagnosis code of 403.90.

Comment: Several commenters supported our proposal to add diagnosis code 585.6 to the CC Exclusion List when reported with a principal diagnosis code of 403.90.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are adopting as final our proposal to add diagnosis code 585.6 (End stage renal disease) to the CC Exclusion List when reported with a principal diagnosis code of 403.90 (Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage I through stage IV, or unspecified).

(C) Hypertensive Chronic Kidney Disease With Chronic Kidney Disease Stage V or End-Stage Renal Disease Code

We received a comment recommending the addition of diagnosis code 403.91 (Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage V or end-stage renal disease) to the CC Exclusion List when reported as a secondary diagnosis code with principal diagnosis code 585.6 (End stage renal disease). The commenter stated that it would be unlikely that diagnosis code 403.91 would be reported as a secondary diagnosis code with diagnosis code 585.6 as the principal diagnosis code due to sequencing rules for end-stage renal disease with hypertension. Currently, diagnosis code 403.91 is designated as a CC.

Our clinical advisors agreed with the commenter. Therefore, in the FY 2012 IPPS/LTCH PPS proposed rule, we proposed to add diagnosis code 403.91 to the CC Exclusion List when reported as a secondary diagnosis code with principal diagnosis code 585.6.

Comment: Several commenters supported our proposal to add diagnosis code 403.91 to the CC Exclusion List

when reported as a secondary diagnosis code with principal diagnosis code 585.6.

Response: We appreciate the commenters' support.

After consideration of the public comments we received, we are adopting as final our proposal to add diagnosis code 403.91 (Hypertensive chronic kidney disease, unspecified, with chronic kidney disease stage V or end stage renal disease) to the CC Exclusion List when reported as a secondary diagnosis code with principal diagnosis code 585.6 (End stage renal disease).

(2) Suggested Changes to Severity Levels for Encephalopathy

We received a request that we consider changing the following diagnosis codes from an MCC to a CC:

- 348.30 (Encephalopathy NOS)
- 348.31 (Metabolic encephalopathy)
- 348.39 (Encephalopathy NEC)
- 349.82 (Toxic encephalopathy)
- 572.2 (Hepatic encephalopathy)

For the FY 2012 IPPS/LTCH PPS proposed rule, we analyzed the claims data for the diagnosis codes mentioned above related to encephalopathy. We used the same approach we used in initially creating the MS-DRGs and classifying secondary diagnosis codes as

non-CCs, CCs, or MCCs. A detailed discussion of the process and criteria we used in this process is described in the FY 2008 IPPS final rule (72 FR 47158 through 47161). We refer the readers to this discussion for complete information on our approach to developing the non-CC, CC, and MCC lists. Each diagnosis for which Medicare data were available was evaluated to determine its impact on resource use and to determine the most appropriate CC subclass (non-CC, CC, or MCC) assignment. In order to make this determination, the average cost for each subset of cases was compared to the expected cost for cases in that subset. The following format was used to evaluate each diagnosis:

Code	Diagnosis	Cnt1	C1	Cnt2	C2	Cnt3	C3
------	-----------	------	----	------	----	------	----

Count (Cnt) is the number of patients in each subset. C1, C2, and C3 are a measure of the impact on resource use of patients in each of the subsets. The C1, C2, and C3 values are a measure of the ratio of average costs for patients with these conditions to the expected average cost across all cases. The C1 value reflects a patient with no other secondary diagnosis or with all other secondary diagnoses that are non-CCs.

The C2 value reflects a patient with at least one other secondary diagnosis that is a CC but none that is a MCC. The C3 value reflects a patient with at least one other secondary diagnosis that is a MCC. A value close to 1.0 in the C1 field would suggest that the diagnosis code produces the same expected value as a non-CC. A value close to 2.0 suggests the condition is more like a CC than a non-CC but not as significant in

resource usage as an MCC. A value close to 3.0 suggests the condition is expected to consume resources more similar to an MCC than a CC or non-CC. For additional details on this analysis, we refer readers to the FY 2008 IPPS final rule (72 FR 47158 through 47161).

The following chart shows the analysis for each of the encephalopathy diagnosis codes that are currently classified as MCCs.

Code	Diagnosis description	CC level	Cnt 1	Cnt 1 impact	Cnt 2	Cnt 2 impact	Cnt 3	Cnt 3 impact
34830	Encephalopathy NOS	MCC	10,082	2.1206	39,042	2.7774	60,381	3.3702
34831	Metabolic encephalopathy	MCC	6,389	2.0580	29,651	2.6952	49,343	3.4011
34839	Encephalopathy NEC	MCC	4,004	2.1118	15,003	2.7355	19,732	3.3708
34982	Toxic encephalopathy	MCC	4,333	2.3158	18,126	3.0023	26,009	3.5714
5722	Hepatic encephalopathy	MCC	1,375	1.5448	9,885	2.5054	12,421	3.4435

We ran the following data as described in FY 2008 IPPS final rule (72 FR 47158 through 47161). The C1 value reflects a patient with no other secondary diagnosis or with all other secondary diagnoses that are non-CCs. The C2 value reflects a patient with at least one other secondary diagnosis that is a CC but none that is a MCC. The C3 value reflects a patient with at least one other secondary diagnosis that is a MCC.

The chart above shows that the C1 findings ranged from a low of 1.5448 to a high of 2.3158. As stated earlier, a C1 value close to 2.0 suggests the condition is more like a CC than a non-CC but not as significant in resource usage as an MCC. The C1 findings suggest that these codes are more like a CC than a MCC. However, the C2 findings ranged from a low of 2.5054 to a high of 3.0023. Values close to 3.0 suggests the condition is more similar to an MCC than a CC or non-CC. The C2 findings support

maintaining the encephalopathy codes as an MCC level. The data are clearly mixed between the C1 and C2 findings, and does not consistently support a change in the severity level. Our clinical advisers recommended that these encephalopathy codes remain at an MCC level because these patients with encephalopathy typically utilize significant resources and are at a higher severity level. Based on the clinical analysis and the lack of consistent claims data support for the severity level change, we indicated in the proposed rule that we believe that the encephalopathy codes should remain on the MCC list. Therefore, we proposed to retain the following encephalopathy codes on the MCC list:

- 348.30 (Encephalopathy NOS)
- 348.31 (Metabolic encephalopathy)
- 348.39 (Encephalopathy NEC)
- 349.82 (Toxic encephalopathy)
- 572.2 (Hepatic encephalopathy)

We invited public comment on our proposal not to change the severity level classification for these codes.

Comment: Several commenters supported our proposal not to change the MCC severity level classification for the encephalopathy codes listed above. The commenters agreed with our findings that the data were mixed between the C1 and C2 findings for these codes, which are currently on the MCC list, and that clinical evaluation of these conditions supports maintaining them on the MCC list.

Response: We appreciate the commenters' support. As stated above, our data showed mixed findings for C1 and C2 with C1 findings supporting a change to CC, but C2 findings supporting maintaining the codes on the MCC list. Our clinical advisers' evaluation of encephalopathy patients supports our proposal to maintain these encephalopathy codes on the MCC list.

After consideration of the public comments we received, as we proposed, we are keeping the following encephalopathy codes on the MCC list.

- 348.30 (Encephalopathy NOS) MCC
- 348.31 (Metabolic encephalopathy) MCC
- 348.39 (Encephalopathy NEC) MCC
- 349.82 (Toxic encephalopathy) MCC
- 572.2 (Hepatic encephalopathy) MCC

(3) Suggested Changes to Severity Levels for Mechanical Complication and Infection Due to Device-Related Codes

We received a request to change the severity classification from CCs to MCCs for the following diagnosis codes:

- 996.01 (Mechanical of cardiac device, implant and graft due to cardiac pacemaker (electrode)).
- 996.04 (Mechanical complication of cardiac device, implant, and graft due to automatic implantable cardiac defibrillator).

• 996.61 (Infection and inflammatory reaction due to internal prosthetic device, implant, and graft due to cardiac device, implant, and graft).

Currently, all three diagnosis codes are classified as a CC. For the FY 2012 IPPS/LTCH PPS proposed rule, we analyzed claims data using the methodology described previously in this section for these diagnosis codes. The following chart shows our findings:

Code	Diagnosis description	CC Level	Cnt 1	Cnt 1 Impact	Cnt 2	Cnt 2 Impact	Cnt 3	Cnt 3 Impact
99601	Malfunc cardiac pacemaker	CC	1,296	1.6723	1,920	2.4332	1,333	3.1134
99604	Mch cmp autm mplnt dfbrl	CC	419	1.7041	1,032	2.5190	660	3.1508
99661	React-cardiac dev/graft	CC	149	1.9922	633	2.8134	1,253	3.5036

We reviewed the findings from these data. The C1 findings ranged from a low of 1.6723 to a high of 1.9922. As stated earlier, a value close to 2.0 in the C1 field suggests that the condition is more like a CC than a non-CC but not as significant in resource usage as an MCC. The C1 findings clearly support the current classification of these three codes on the CC list and the C2 findings supports this classification. Our clinical advisors agree that the data findings and their own clinical evaluation of the severity level of these conditions support the classification of these three codes on the CC list. Therefore, we proposed that these codes remain on the CC list. We invited public comment on this proposal.

Comment: Several commenters supported our proposal to maintain the mechanical complication and infection due to device-related codes mentioned above on the CC list. The commenters agreed that the data as well as our clinical advisors' evaluation support the current classification.

Several commenters opposed our proposal to keep the mechanical complication and infection due to device-related codes on the CC list. In support of their position, the commenters cited our decision to keep the encephalopathy codes on the MCC list. They pointed out that the encephalopathy codes had C1 findings of a low of 1.5448 to a high of 2.3158 and C2 findings of a low of 2.5054 to a

high of 3.0023, yet they were maintained on the MCC list. The commenters believed that the same logic should be applied to the mechanical complication and infection due to device-related codes which had C1 findings of a low of 1.6723 to a high of 1.9922 and C2 findings of a low of 2.4332 to a high of 2.8134. One commenter also offered data from the Healthcare Utilization Project (HCUP) database which showed 2008 national statistics of average costs for patients admitted with one of these codes as a principal diagnosis. This commenter stated that these data showed average costs as follows:

2008 NATIONAL STATISTICS—PRINCIPAL DIAGNOSIS ONLY RANKED BY COSTS, DESCENDING ORDER: MEDICARE ONLY

ICD-9-CM Principal diagnosis code	Total number of discharges	Length of stay (LOS) (mean)	Charges \$ (mean)	Costs \$ (mean)
996.61—React-Cardiac Dev/Graft	8,944	10.7	95,251	26,893
996.04—Mch Comp Aut, Mplnt Dfbri	8,095	3.2	59,924	16,891
996.01—Malfunc Cardiac Pacemake	8,664	2.8	37,056	11,044
427.5—Cardiac Arrest	4,781	3.6	35,499	10,908
349.82—Toxic Encephalopathy	6,835	6.5	37,913	10,765
428.23—Ac On Chr Syst Hrt Fail	75,511	5.8	33,732	10,689
428.1—Left Heart Failure	2,261	5.1	26,777	10,252
348.39—Encephalopathy Nec	4,880	6.3	32,124	9,609
428.31—Ac Diastolic Hrt Failure	37,216	5.5	30,167	9,298
348.30—Encephalopathy Nos	11,057	5.9	31,933	9,232
572.2—Hepatic encephalopathy	20,154	5.4	28,056	8,580

The commenter stated that these data support changing these codes to the MCC list since the costs associated with these admissions were higher than admissions for encephalopathy.

Response: We agree with the commenters who supported maintaining the current CC severity level for the mechanical complication and infection

due to device related codes. As discussed above the C1 and C2 findings as well as the advice of our clinical advisors supports this recommendation.

We disagree with the commenters who made comparisons to our proposals for the encephalopathy codes. The encephalopathy codes had C1 findings of a low of 1.5448 to a high of 2.3158

and C2 findings of a low of 2.5054 to a high of 3.0023. The encephalopathy codes C1 findings supported a change to a CC level. The C2 findings of a high of 3.0023 support the current MCC assignment for those codes.

The mechanical complication and infection due to device-related codes had C1 findings of a low of 1.6723 and

a high of 1.9922, which are more like a CC than a non-CC but not as significant in resource usage as an MCC. The C2 findings of a low of 2.4332 and a high of 2.8134 are also supportive of a CC classification because, while one was a high of 2.8134, the other was only 2.4332. Only one of the codes had a finding that approached 3.0 and neither exceeded 3.0. Furthermore, our clinical advisors' evaluation of data on patients with encephalopathy as a secondary diagnosis indicates that these patients are at a higher severity level. Our clinical advisors did not believe that patients who have one of the mechanical complication and infection due to device-related codes as a secondary diagnoses would require resources justifying the MCC severity level.

We point out that the data that the commenter shared focused on patients admitted for either a mechanical complication or infection due to device-related code or for encephalopathy. In other words, these conditions were the principal diagnosis in this data. These cases did not report the codes as secondary diagnoses. Our clinical criteria are based on these conditions being reported as a secondary diagnosis and the effect that has on all types of admissions. A detailed discussion of the process and criteria we used in this process is described in the FY 2008 IPPS final rule with comment period (72 FR 47158 through 47161). It may well make a difference in the overall costs of the admission if a patient were admitted for these types of complications and required a pacemaker insertion during the stay. Clearly, the encephalopathy cases would not have had a device inserted. Therefore, it is not possible to

determine the effect of the impact of these conditions as a secondary diagnosis based on these data because the additional costs of a device is included. Our approach isolates the effect of the individual code on all types of admissions when it is reported as a secondary diagnosis. It also looks at whether this code is the only CC or MCC reported (C1 cases), reported with another CC diagnosis (C2 cases), or reported with another MCC diagnosis (C3). We cannot determine what, if any, secondary diagnoses were present for the cases shown in the HCUP data shown above.

We believe our consistent approach to evaluating the effect of a secondary diagnosis is more appropriate than looking at average costs when the condition is reported as a principal diagnosis in establishing the severity level of these codes. Modifying the approach by also looking at the principal diagnosis would significantly modify our current approach that focuses solely on evaluating the impact of secondary diagnoses on increasing the severity of the overall admission. We also note that our clinical advisors' evaluation of these cases, who advised that the codes should remain on the CC lists, supports the findings of the data and maintaining the codes on the CC list.

After consideration of the public comments we received, as we proposed, we are maintain the mechanical complication and infection due to device-related codes listed below on the CC list for FY 2012.

- 996.01 (Mechanical of cardiac device, implant and graft due to cardiac pacemaker (electrode))—CC
- 996.04 (Mechanical complication of cardiac device, implant, and graft due to

automatic implantable cardiac defibrillator)—CC

- 996.61 (Infection and inflammatory reaction due to internal prosthetic device, implant, and graft due to cardiac device, implant, and graft)—CC

Tables 6G and 6H, Additions to and Deletions from the CC Exclusion List, respectively, which are effective for discharges occurring on or after October 1, 2011, are not being published in the Addendum to this final rule because of the length of the two tables. Instead, we are making them available through the Internet on the CMS Web site at: <http://www.cms.hhs.gov/AcuteInpatientPPS>. Each of these principal diagnoses for which there is a CC exclusion is shown in Tables 6G and 6H, which are listed in section VI. of the Addendum to this final rule (and available via the Internet) with an asterisk, and the conditions that will not count as a CC, are provided in an indented column immediately following the affected principal diagnosis.

A complete updated MCC, CC, and Non-CC Exclusions List is also available through the Internet on the CMS Web site at: <http://www.cms.hhs.gov/AcuteInpatientPPS>. Beginning with discharges on or after October 1, 2011, the indented diagnoses will not be recognized by the GROUPER as valid CCs for the asterisked principal diagnosis.

To assist readers in identifying the changes to the MCC and CC lists that occurred as a result of updates to the ICD-9-CM codes, as described in Tables 6A, 6C, and 6E, which are listed in section VI. of the Addendum to this final rule and available via the Internet, we are providing the following summaries of those MCC and CC changes for FY 2012.

SUMMARY OF ADDITIONS TO THE MS-DRG MCC LIST—TABLE 6I.1

Code	Description
284.11	Antineoplastic chemotherapy induced pancytopenia.
284.12	Other drug-induced pancytopenia.
348.82	Brain death.
415.13	Saddle embolus of pulmonary artery.
444.01	Saddle embolus of abdominal aorta.
488.81	Influenza due to identified novel influenza A virus with pneumonia.
516.4	Lymphangioliomyomatosis.
516.61	Neuroendocrine cell hyperplasia of infancy.
516.62	Pulmonary interstitial glycogenosis.
516.63	Surfactant mutations of the lung.
516.64	Alveolar capillary dysplasia with vein misalignment.
516.69	Other interstitial lung diseases of childhood.
518.51	Acute respiratory failure following trauma and surgery.
518.52	Other pulmonary insufficiency, not elsewhere classified, following trauma and surgery.
518.53	Acute and chronic respiratory failure following trauma and surgery.
747.31	Pulmonary artery coarctation and atresia.
747.32	Pulmonary arteriovenous malformation.
747.39	Other anomalies of pulmonary artery and pulmonary circulation.
808.54	Multiple open pelvic fractures without disruption of pelvic circle.
998.01	Postoperative shock, cardiogenic.

SUMMARY OF ADDITIONS TO THE MS-DRG MCC LIST—TABLE 6I.1—Continued

Code	Description
998.02	Postoperative shock, septic.
998.09	Postoperative shock, other.

SUMMARY OF DELETIONS FROM THE MS-DRG MCC LIST—TABLE 6I.2

Code	Description
518.5	Pulmonary insufficiency following trauma and surgery.
747.3	Anomalies of pulmonary artery.

SUMMARY OF ADDITIONS TO THE MS-DRG CC LIST—TABLE 6J.1

Code	Description
284.19	Other pancytopenia.
286.52	Acquired hemophilia.
286.53	Antiphospholipid antibody with hemorrhagic disorder.
