Under our proposal, once a supplier's contract is terminated for breach of contract under the DMEPOS CBP, the contract supplier is no longer a DMEPOS CBP contract supplier for any DMEPOS CBP product category for which it was awarded a contract. This termination applies to all areas and product categories because there is only one contract that encompasses all CBAs and product categories for which the supplier was awarded a contract. We would not make payment and would reject claims for DMEPOS competitive bid items and services furnished by a supplier whose contract has been terminated after the effective date of the termination for the remainder of the contract period.

We recognize that a supplier's termination would impact beneficiaries within the CBA. Therefore, we proposed that terminated suppliers must notify all

beneficiaries within the CBA who are receiving rented competitively bid items of the termination of their contract status so that the beneficiaries can make arrangements to receive equipment and suppliers through other contract suppliers. After we have made our final determination and sent notification to the supplier, the supplier must notify beneficiaries within 5 days of receipt of the contract supplier's final notice of termination. This notice must inform beneficiaries that they will have to select a new contract supplier to furnish their DMEPOS items in order for Medicare to pay for these items. For beneficiary protection, we also proposed that contract suppliers who fail to give proper notification to beneficiaries may be prevented from participating in future rounds of DMEPOS CBP. We also proposed that rental items may not be picked up from the beneficiary's home until after the last day of the rental month for which the supplier has already received payment. We proposed both of these policies to protect the beneficiary and to ensure that suppliers do not pick up equipment from a beneficiary for a time period for which they have already been paid to provide the service.

Comment: A commenter supported CMS's appeals process for contract suppliers whose competitive bidding contract was terminated due to breach of contract. The commenter stated that "including an appeals process under DMEPOS CBP protects contract providers from arbitrary or mistaken decisions by CMS or its contractors and preserves the continuity of care for the beneficiaries they are serving."

Response: We agree that the appeals process does provide protection for contract suppliers and preserves continuity of care for the beneficiaries they serve.

Comment: A commenter who was concerned with the timeline required for communication between terminated suppliers and beneficiaries. The commenter suggested that CMS lengthen the period of time to afford providers ample opportunity to develop, mail and disseminate this critical information.

Response: We agree and have increased the period of time from 5 to 15 days of receipt of contract suppliers' final notice of termination. We believe that 15 days would be a good balance to ensure the beneficiaries receive information timely and suppliers will have enough time to notify the beneficiaries. Therefore, a contract supplier, whose contract was terminated, has 15 days from the receipt of the final notice of termination to notify each beneficiary currently renting a competitive bid item. This change will not impact any other of the timeframes or provisions described in this regulation. We also proposed that rental items may not be picked up from the beneficiary's home until after the last day of the rental month for which the supplier has already received payment. We proposed both of these policies to protect the beneficiary and to ensure that suppliers do not pick up equipment from a beneficiary for a time period for which they have already been paid to provide the service.

Comment: A commenter opposed the proposed appeals process because they believed, "the proposed process is biased and burdened with inherent CMS conflict of interests that disadvantage suppliers." This commenter recommended CMS adopt the appeals process used for DMEPOS claims which includes a hearing by an administrative law judge (ALJ) and the Departmental Appeals Board (DAB) or the process used under government contracting and FAR requirements." In addition, the commenter questioned whether the termination occurs at the supplier number level or the product category level. The commenter has questioned if a supplier has contracts for more than one of the product categories, and is determined to be in breach of contract in one category, does the termination apply to just that one product or to all? The commenter also stated that the process should include an appeal to a federal court.

Response: We disagree with this comment and feel that our process does provide for an independent and unbiased review by the CBIC hearing officer who was not involved in the original recommendation. It is not in the best interest of the program to terminate contracts if the supplier has not breached their contract; therefore, this action will not be taken lightly. This process allows CMS contractor's hearing officers to conduct an independent review of the issues. Only after considering the HO's recommendation will CMS make a final determination regarding these issues. We believe this process provides suppliers with ample opportunities to have their positions reviewed and considered. Therefore, we are not including review by the ALJ or the DAB. Our process provides for different levels of review of breach of contract, one at the recommendation level, one at the CBIC hearing officer level, and one at the CMS Administrator level. We believe this process does provide for an extensive review by allowing for reconsideration before a contract is actually terminated, which may include the use of a corrective action plan. As stated in the final regulation, these contracts are not procurement contracts are not subject to the FAR requirements; therefore, the FAR is not applicable. The rule does not address federal court review that might otherwise exist. As we stated in the proposed rule § 414.423(k)(4) CMS's decisions regarding contract terminations are final and binding. In response to the question regarding the scope of the termination, if a supplier is terminated due to a breach of contract all locations associated with that contract will be terminated, regardless of the competitive bid product category they provide. In addition, we have added clarifying language to § 414.423(l)(1).

After consideration of the public comments we received, we are revising the time for the supplier to notify the beneficiary once the supplier has been notified of their contract termination. Therefore, we have revised § 414.423(l)(2)(i) of the regulation to state that the supplier whose contract was terminated must notify the beneficiary within 15 days of receipt of the final notice of termination. In addition, we are clarifying the regulation language by adding language to § 414.423(l)(1) to state that "all locations of the contract supplier" may no longer furnish competitive bid items to beneficiaries within a CBA and be reimbursed by Medicare for these items after the effective date of the termination.

2. Changes to Payment Rules for Oxygen and Oxygen Equipment

a. Background

The general Medicare payment rules for DME are set forth in section 1834(a) of the Act and 42 CFR part 414, subpart D of our regulations. Section 1834(a)(1) of the Act and § 414.210(a) of our regulations establish the Medicare payment for a DME item as equal to 80 percent of either the lower of the actual charge or the fee schedule amount for the item. The beneficiary coinsurance is equal to 20 percent of either the lower of the actual charge or the fee schedule amount for the item once the deductible is met.

The specific payment rules for oxygen and oxygen equipment under the existing fee schedules are set forth in section 1834(a)(5) of the Act and § 414.226 of our regulations. Suppliers are paid a monthly payment amount for furnishing medically necessary oxygen contents (for both stationary and portable) and stationary oxygen equipment described under the class

described in § 414.226(c)(1)(i). Equipment in the stationary class includes stationary oxygen concentrators, which concentrate oxygen from room air; stationary liquid oxygen systems, which use oxygen stored as a very cold liquid in cylinders and tanks; and gaseous oxygen systems, which administer compressed oxygen directly from cylinders.

A monthly add-on payment is also made to suppliers furnishing medically necessary portable oxygen equipment falling under one of two classes described in § 414.226(c)(1)(ii) and (iii). Equipment in these classes includes traditional portable equipment, that is, portable liquid oxygen systems and portable gaseous oxygen systems, and oxygen generating portable equipment (OGPE), that is, portable oxygen concentrators and oxygen transfilling equipment used to fill portable tanks or cylinders in the home. Both the liquid and gaseous oxygen systems (for stationary and traditional portable systems) require on-going delivery of oxygen contents.

Section 1834(a)(5)(F) of the Act, as amended by section 144(b) of MIPPA, limits the monthly rental payments to suppliers for oxygen equipment to 36 months of continuous use, although monthly payments for furnishing gaseous or liquid oxygen contents continue after the 36-month equipment rental cap is reached for gaseous or liquid systems. In the CY 2009 PFS final rule with comment period (73 FR 69875 through 69876), we discussed section 144(b) of MIPPA and included a detailed discussion of how section 5101(b) of the DRA previously required suppliers to transfer title to oxygen equipment to the beneficiary at the end of the 36-month rental period. Section 144(b) of the MIPPA repealed this requirement to transfer title to the oxygen equipment to the beneficiary and allows suppliers to retain title to the oxygen equipment after 36 monthly rental payments are made for the equipment.

Section 414.210 establishes the requirements for the replacement of DME, including oxygen equipment. Section 414.210(f)(1) states that if an item of DME, which includes oxygen equipment, has been in continuous use by the patient for the equipment's reasonable useful lifetime or if the original equipment is lost, stolen, or irreparably damaged, the patient may elect to obtain a new piece of equipment. In such circumstances, § 414.420(f)(2) authorizes payment for the new oxygen equipment in accordance with § 414.226(a). Section 414.210(f)(1) states that the reasonable useful lifetime for DME, which includes oxygen equipment, is determined through program instructions. In the absence of CMS program instructions, the carrier may determine the reasonable useful lifetime for equipment, but in no case can it be less than 5 years. Computation is based on when the equipment is delivered to the beneficiary, not the age of the equipment. If the beneficiary elects to obtain new oxygen equipment after the reasonable useful lifetime, the payment is made for a new 36-month rental period in accordance with § 414.226(a).

We proposed to revise the payment rule for oxygen and oxygen equipment at § 414.226(g)(1) to address situations where beneficiaries relocate outside the service area of a supplier during the 36-month rental payment cap period for the oxygen equipment.

Beneficiaries are experiencing great difficulties in finding suppliers willing to furnish oxygen equipment in situations where only a few months are left in the 36-month rental payment period at the time they relocate. For example, if a beneficiary is in the 30th rental month, the new supplier would be entitled to only 6 months of rental payments and then would have to continue to furnish the oxygen and oxygen equipment during any period of medical need for the remainder of the reasonable useful lifetime of the equipment. This creates a financial disincentive for oxygen suppliers to furnish oxygen and oxygen equipment to beneficiaries in these situations.

The proposed changes to the payment rules for oxygen and oxygen equipment would apply to oxygen and oxygen equipment furnished under Part B and would also apply to oxygen and oxygen equipment furnished under programs implemented in accordance with section 1847(a) of the Act.

b. Furnishing Oxygen Equipment After the 36-Month Rental Period (Cap)

In the CY 2010 PFS final rule with comment period (74 FR 61887 through 61890), we finalized § 414.226(g)(1) which, in accordance with section 1834(a)(5)(F)(ii)(I) of the Act, requires the supplier that furnishes oxygen equipment during the 36-month rental period to continue furnishing the oxygen equipment after the 36-month rental period. The supplier is required to continue to furnish the equipment during any period of medical need for the remainder of the reasonable useful lifetime of the equipment. As we noted when finalizing this rule, section 1834(a)(5)(F)(ii)(I) does not provide any exceptions to this requirement. If the beneficiary relocates outside the supplier's normal service area at some time after the 36-month rental period but before the end of the reasonable useful lifetime of the equipment, the supplier must make arrangements for the beneficiary to continue receiving the equipment at his or her new place of residence. This responsibility for furnishing the equipment does not transfer to another supplier.

We revised § 414.226(f) to conform our regulations to this new MIPPA requirement. We deleted the transfer of ownership requirement and added the new requirement that the supplier must continue furnishing the oxygen equipment after the 36-month rental period during any period of medical need for the remainder of the reasonable useful lifetime of the equipment. It is important to note that § 414.226(g)(1)(ii) does not apply this same requirement in situations where the beneficiary relocates outside of the supplier's normal service area during the 36-month rental period.

c. Furnishing Oxygen Equipment During the 36-Month Rental Period (CAP)

Section § 414.226(g)(1) contains the requirement that the supplier that furnishes oxygen and oxygen equipment for the first month of the 36th month of the rental cap period must continue to furnish the equipment for the entire 36-month period of continuous use, with limited exceptions. One exception at § 414.226(g)(1)(ii) applies when a beneficiary permanently relocates his or her residence during the 36-month rental period outside of the current supplier's normal service area. This exception was proposed in the "Home Health Prospective Payment System Rate Update for Calendar Year 2007 and Deficit Reduction Act of 2005 Changes to Medicare Payment for Oxygen Equipment and Capped Rental Durable Medical Equipment; Proposed Rule" published in the August 3, 2006 **Federal Register** (71 FR 44094) and was intended to reduce the burden on the supplier in these situations. This approach is also consistent with the regulations addressing capped rental items described in § 414.229. We addressed this issue in the context of other capped rental DME, not including oxygen and oxygen equipment, in the July 10, 1995 **Federal Register** (60 FR 35494) in response to comments. The discussion states that since the implementation of the capped rental payment methodology on January 1, 1989, we received no reports of beneficiaries having difficulty obtaining access to capped rental DME after relocating outside the supplier's service area. Since enactment of the capped

rental DME payment category in section 4062 of the Omnibus Budget Reconciliation Act of 1987 (OBRA '87) (Pub. L. 100–203), representatives of the DME industry indicated that suppliers would be able to accommodate beneficiaries in these situations, and this has proven to be true for capped rental items. In fact, we have found this to be the case to this day.

For this reason, we believed that beneficiaries would not encounter problems obtaining access to oxygen and oxygen equipment in similar situations, that is, following the 36-month cap imposed by section 144(b) of MIPPA. However, since the changes to the payment rules for oxygen and oxygen equipment mandated by the DRA became effective in 2006 and the 36-month rental cap imposed by MIPPA was reached for the first time in January 2009, we have received many reports of beneficiaries relocating prior to the end of the 36-month rental payment cap period and having difficulty finding an oxygen supplier in the new location. We have learned that many suppliers are unwilling to provide services in situations where there are a few number of months left in the 36-month rental payment period.

We do not believe that beneficiaries have encountered similar issues following the 36-month rental cap, which most likely is the result of different statutory requirements for these two periods (that is, during and after the 36-month rental period). Section 1834(a)(5)(F)(ii) of the Act requires the supplier that furnishes the oxygen equipment during the 36-month rental payment period to continue furnishing the equipment after the 36-month rental payment period. Consistent with this requirement, we established regulations at § 414.226(f)(1) that require the supplier to furnish the equipment or make arrangements for furnishing the equipment in situations where the beneficiary relocates outside the supplier's normal service area. Since no such requirement currently applies in situations where the beneficiary relocates prior to the end of the 36-month rental payment period, and in fact current regulations at § 414.226(g)(1)(ii) absolve the supplier of the obligation to continue furnishing oxygen equipment in these situations, beneficiaries are experiencing difficulties finding suppliers of oxygen equipment in their new locations that are willing to accommodate them. As noted above, we have not seen this problem in the capped rental DME context. The requirement at § 414.226(g)(1) to furnish oxygen equipment for the entire 36-month rental cap period was established in the course of implementing section 5101(b) of the DRA in order to safeguard the beneficiary from situations where suppliers might discontinue service and pick up oxygen equipment prior to the end of the 36-month rental cap in order to avoid losing title to the equipment. As mentioned earlier, the transfer of title of oxygen and oxygen equipment after the 36th paid rental month was repealed. The exception to this rule at § 414.226(g)(1)(ii) was established based on our experience that suppliers of capped rental DME have accommodated beneficiaries in these situations, which, unfortunately, has not been our experience in the context of oxygen equipment.

In order to address this vulnerability facing beneficiaries as a result of regulations currently in effect, we proposed to revise the exception at § 414.226(g)(1)(ii) to apply only to situations where the beneficiary relocates before the 18th paid rental month to an area that is outside the normal service area of the supplier that initially furnished the equipment. We proposed to revise the regulation to require the supplier that furnishes the oxygen equipment and receives payment for month 18 or later to either furnish the equipment for the remainder of the 36-month rental payment period or, in the case where the beneficiary has relocated outside the service area of the supplier, make arrangements for furnishing the oxygen equipment with another supplier for the remainder of the 36-month rental payment period. The supplier that is required to furnish the equipment on the basis of this requirement must also furnish the equipment after the 36-month rental payment period in accordance with the requirements of section 1834(a)(5)(F)(ii) and § 414.226(f).

The proposed revision would mean that a supplier does not have to continue to furnish the oxygen equipment if the beneficiary relocates outside the normal service area before the 18th paid rental month during a period of continuous use. Under the current rule, a supplier does not have to furnish the oxygen equipment if the beneficiary relocated before the 36th paid rental month during a period of continuous use. The current rule was established based on the long term, demonstrated ability of suppliers of capped rental DME to accommodate beneficiaries in situations where they relocate near the end of a capped rental payment period.

Comment: We received a total of 8 comments on our proposal to require oxygen suppliers to continue to furnish medically necessary oxygen equipment for the remainder of the reasonable useful lifetime of the equipment to beneficiaries who relocate on or after the 18th rental month. All the comments were opposed to the proposed requirement. Some of the commenters questioned whether the statute gives us the authority to establish this requirement before the 36th month rental payment. Others objected to the financial and coordination-of-benefits burden they believe that this requirement would cause for suppliers. Other objections were that the proposed requirement did not consider the effect on beneficiaries who relocate on a temporary basis during winter months ("snow birds"), or the access problems that it might cause in rural areas. Recommended alternatives included starting the rental period over at the time of relocation or keeping the current policy that only requires suppliers to continue furnishing oxygen equipment to beneficiaries who relocate outside of their service area if 36 rental amounts have already been paid.

Response: In addition to considering the comments on the proposed rule, we analyzed complaint data from beneficiaries from January 2009 to September 2010 which is data collected by the regional offices. In the limited situations where beneficiaries receiving oxygen equipment for less than 36 months relocated during this time and initially had trouble locating an oxygen supplier in their new location, CMS caseworkers in the CMS Regional Offices and the Office of the Medicare Beneficiary Ombudsman were able to locate suppliers to serve each and every beneficiary, usually within a matter of days. This means that, although supply arrangements and/or access to oxygen and oxygen equipment in these situations may have been briefly delayed, suppliers stepped forward to provide access to oxygen and oxygen equipment in these situations. Based on this information and certain comments received, we have decided not to finalize this proposed revision at this time. If in the future, beneficiaries' access to oxygen equipment becomes a problem following the relocation of beneficiaries, we may consider this proposal or similar proposals.

H. Provider and Supplier Enrollment Issue: Air Ambulance Provision

The National Transportation Safety Board (NTSB) is an independent Federal agency charged by the Congress with investigating transportation accidents, determining their probable cause, and making recommendations to prevent

similar accidents from occurring. Based on information derived from testimony provided at the NTSB public hearing and investigations into recent helicopter air ambulance accidents, the NTSB made several specific recommendations to the Secretary on September 24, 2009.

Specifically, the NTSB recommended that the Secretary develop minimum safety accreditation standards for helicopter air ambulance operators that augment the operating standards of 14 CFR 135 by including for all flights with medical personnel on board: (a) Scenario-based pilot training; (b) implementation of preflight risk evaluation programs; and (c) the installation of FAA-approved terrain awareness warning systems, night vision imaging systems, flight data recording systems for monitoring and autopilots if a second pilot is not used.

In response to the NTSB concerns, the Secretary noted that the recommendations to CMS were similar to those being made to the Federal Aviation Administration (FAA). While we have expertise to regulate health and safety requirements that suppliers and providers of healthcare should meet, we do not have the expertise to determine aircraft safety requirements. The Secretary stated that, "we believe the FAA should determine the minimum level of safety that HEMS operators should meet and CMS should adopt regulations that require any HEMS operator that enrolls in Medicare to meet those requirements." The Secretary also added that, "while we do not believe CMS should augment FAA regulations, we do believe that CMS' regulations should ensure that only those HEMS operators that maintain the minimum level of requirements established by the FAA through its regulations are enrolled or maintain enrollment in the Medicare program." The FAA proposed Federal regulations to address the NTSB's concerns in their October 12, 2010 proposed rule (75 FR 62640) entitled "Air Ambulance and Commercial Helicopter Operations, Part 91 Helicopter Operations, and Part 135 Aircraft Operations; Safety Initiatives and Miscellaneous Amendments."

In the April 21, 2006 **Federal Register**, we published the "Requirements for Providers and Suppliers to Establish and Maintain Medicare Enrollment" final rule. This final rule implemented section 1866(j)(1)(A) of the Act. In this final rule, we required that all providers and suppliers (other than physicians or practitioners who have elected to "opt-out" of the Medicare program) must complete an enrollment form and submit specific information to CMS in order to obtain Medicare billing privileges. Section 424.515 required that ambulance service providers continue to resubmit enrollment information in accordance with § 410.41(c)(2), which states, "Upon a carrier's request, complete and return the ambulance supplier form designated by CMS and provide the Medicare carrier with documentation of compliance with emergency vehicle and staff licensure and certification requirements in accordance with State and local laws." This final rule also established § 424.510(d)(2)(iii) which states, "Submission of all documentation, including all applicable Federal and State licensure and regulatory requirements that apply to the specific provider or supplier type related to providing health care services, required by CMS under this or other statutory or regulatory authority, or under the Paperwork Reduction Act of 1995, to establish the provider or supplier's eligibility to furnish Medicare covered items or services to beneficiaries in the Medicare program."

While the Airline Deregulation Act (Pub. L. 95–504) preempts a State, political subdivision of a State, or political authority of at least two States from enacting or enforcing a law, regulation, or other provision having the force and effect of law related to a price, route, or service of an air carrier that may provide air transportation, air ambulances remain subject to Federal laws and regulations. In accordance with § 424.516(a)(2), providers and suppliers must adhere to all Federal regulations and State laws and regulations, as required, based on the type of services or supplies the provider or supplier type will furnish and bill Medicare.

In § 424.510(d)(iii), we proposed to clarify that ambulance suppliers and other providers and suppliers include documentation regarding all applicable Federal and State certifications. Accordingly we proposed to revise § 424.510(d)(iii) from "Submission of all documentation, including all applicable Federal and State licenses and regulatory requirements that apply to the specific provider or supplier type that relate to providing health care service, required by CMS under this or other statutory or regulatory authority, or under the Paperwork Reduction Act of 1995, to establish the provider or supplier's eligibility to furnish Medicare covered items or services to beneficiaries in the Medicare program," to "Submission of all documentation, including all applicable Federal and State licenses, certifications (including, but not limited to FAA certifications), and regulatory requirements that apply to the specific provider or supplier type that relate to providing health care service, required by CMS under this or other statutory or regulatory authority, or under the Paperwork Reduction Act of 1995, to establish the provider or supplier's eligibility to furnish Medicare covered items or services to beneficiaries in the Medicare program." When revoked or suspended, we are requiring that the specific pilot certifications (for example, instrumentation and medical), and the airworthiness certifications be reported. We proposed to add new paragraph (e)(3) to clarify that Medicare enrolled providers and suppliers must report a revocation or suspension of a Federal or State license or certification, including but not limited to FAA certifications. The certifications, when revoked, that need to be reported are the specific pilot certifications, such as instrument and medical certified; as well as airworthiness certificates. This revision will clarify that fixed-wing ambulance operators and helicopter air ambulance operators are responsible for notifying the designated Medicare contractor for their State when FAA revokes or suspends any license or certification. Moreover, fixed-wing ambulance operators and helicopter air ambulance operators must maintain all requirements as specified in 14 CFR parts 91, 119, and 135.

We stated our belief that requiring fixed wing ambulance and helicopter air ambulance operators to notify their Medicare contractor of a suspension or revocation of a license or certification will ensure that any action taken by the FAA or other regulating authority will have a direct link to the operator's ability to maintain their Medicare enrollment. We also stated that such a policy will help improve aircraft safety for operators that are enrolled in Medicare and providing services to Medicare beneficiaries. We believe that allowing providers and suppliers to self-report licensure or certification revocations and suspensions within a 30 day period via the Medicare enrollment application (such as, the Internet-based Provider Enrollment Chain and Ownership System (PECOS) or the paper CMS–855) promotes compliance with the Medicare reporting requirements found in § 424.516. In addition, by reporting a licensure or certification revocation or suspension within 30 days, the provider or supplier avoids the Medicare contractor bringing an action to revoke its Medicare billing privileges and establishing a Medicare enrollment bar, see § 424.535(c). Thus,

by complying with the reporting responsibilities found in § 424.516 and voluntarily terminating from the Medicare program, the air ambulance supplier can submit an initial application to enroll in the Medicare program as soon as the licensure or certification revocation or suspension action is resolved with the applicable licensing or certification organization. If the supplier does not self-report a licensure, certification revocation or a suspension action, then the supplier's enrollment in the Medicare program will be automatically revoked for a period of one to three years.

In § 424.502, we proposed to define the term, "voluntary termination" as it is currently used in the Medicare program and throughout this regulation in the context of the provider enrollment requirements: We proposed that the term, "voluntary termination" means an air ambulance supplier that submits written confirmation to CMS of its decision to discontinue enrollment in the Medicare program.

Furthermore, we stated our belief that an air ambulance supplier can make the decision to voluntarily terminate their business relationship with the Medicare program at any time, including when the provider or supplier makes the decision that they will no longer furnish services to Medicare beneficiaries. In those situations, where an air ambulance supplier does not meet their reporting responsibilities and notify the Medicare program of a Federal or State licensure or certification revocation or suspension within 30 days of the reportable event, we believe that it is appropriate that CMS or the Medicare contractor revoke the supplier's Medicare billing privileges using § 424.535(a)(1). We believe that this change will clarify that CMS or our Medicare contractor may revoke Medicare billing privileges when these types of suppliers do not report a revocation or suspension of a Federal or State license or certification.

Comment: Several comments received agreed with CMS' enrollment requirements and believe the FAA has the appropriate resources to develop, monitor, and enforce aviation or aviation safety related standards. The commenters believe that the sole authority of the FAA to regulate matters of aviation safety assures continuity in regulations and further believe any change to the authority would have serious consequences for safe operations since CMS lacks the expertise and resources to develop and enforce such standards.

Response: We agree with the commenters; and therefore, are finalizing the proposal without modification.

Comment: Several commenters believe CMS missed an opportunity through this proposed rule to improve system safety for Medicare beneficiaries through an accreditation process.

Response: Currently, we do not have the statutory authority to establish an accreditation program for fixed-wing air ambulance operators and air ambulance operators.

Comment: Several commenters noted that the preamble language might cause confusion as stated, "fixed-wing air ambulance operators and HEMS operators must maintain all requirements as specified in 14 CFR part 135."

Response: We are clarifying that all fixed-wing air ambulance operators and helicopter air ambulance operators must adhere to all applicable FAA regulations as specified in 14 CFR parts 91, 119 and 135 or risk having their Medicare enrollment revoked or suspended.

I. Technical Corrections

1. Physical Therapy, Occupational Therapy and Speech-Language Pathology

We proposed to revise § 409.23(c) by making a minor technical correction to remove an extraneous cross-reference which was initially proposed in the CY 2008 PFS proposed rule (72 FR 38122, 72 FR 38193, and 72 FR 38221). This cross-reference refers the reader to "paragraph (c)(1)(ii) of this section," a paragraph also proposed in the CY 2008 PFS proposed rule, but never finalized. In the CY 2008 PFS final rule with comment period, we inadvertently neglected to remove the associated cross-reference from the regulations text. Therefore, we proposed to rectify that oversight by making an appropriate correction in the regulations text, along with other minor formatting revisions by making the following changes:

- To make a minor clarification to the section heading and introductory text of § 409.23 (along with a conforming revision to the corresponding regulations text at § 409.20(a)(3)) by revising the existing phrase "speech therapy" to read "speech-language pathology services," so that it more accurately reflects the currently used terminology for this type of therapeutic treatment.
- To make a minor wording change in the provision at § 409.17(d) (which is incorporated by reference in § 409.23(c)(2)), in order to clarify that the former provision's reference to "hospital" policies and procedures can alternatively refer, depending on the particular context, to SNF policies and procedures.

We did not receive public comment on this proposal; and therefore, are finalizing this proposal without modification.

2. Scope of Benefits

Currently, § 410.3(b)(2) states that the specific rules on payment are set forth in subpart E of part 410. However, the specific payment rules are actually listed in subpart I of part 410. Therefore, we proposed correct this referencing error by making a technical correction to § 410.3(b)(2).

We did not receive public comment on this proposal; and therefore, are finalizing this proposal without modification.

J. Physician Self-Referral Prohibition: Annual Update to the List of CPT/HCPCS Codes

1. General

Section 1877 of the Act prohibits a physician from referring a Medicare beneficiary for certain designated health services (DHS) to an entity with which the physician (or a member of the physician's immediate family) has a financial relationship, unless an exception applies. Section 1877 of the Act also prohibits the DHS entity from submitting claims to Medicare or billing the beneficiary or any other entity for Medicare DHS that are furnished as a result of a prohibited referral.

Section 1877(h)(6) of the Act and § 411.351 of our regulations specify that the following services are DHS:

- Clinical laboratory services.
- Physical therapy services.
- Occupational therapy services.
- Outpatient speech-language pathology services.
- Radiology services.
- Radiation therapy services and supplies.
- Durable medical equipment and supplies.
- Parenteral and enteral nutrients, equipment, and supplies.
- Prosthetics, orthotics, and prosthetic devices and supplies.
- Home health services.
- Outpatient prescription drugs.
- Inpatient and outpatient hospital services.

2. Annual Update to the Code List

a. Background

In § 411.351, we specify that the entire scope of four DHS categories is defined in a list of CPT/HCPCS codes (the Code List), which is updated annually to account for changes in the most recent CPT and HCPCS

publications. The DHS categories defined and updated in this manner are:

- Clinical laboratory services.
- Physical therapy, occupational therapy, and outpatient speech-language pathology services.
- Radiology and certain other imaging services.
- Radiation therapy services and supplies.

The Code List also identifies those items and services that may qualify for either of the following two exceptions to the physician self-referral prohibition:

- Dialysis-related drugs furnished in or by an ESRD facility (§ 411.355(g)).
- Preventive screening tests, immunizations, or vaccines (§ 411.355(h)).

The Code List was last updated in Addendum I of the CY 2010 PFS final rule with comment period (74 FR 62177 through 62188) and revised in a subsequent correction notice (75 FR 26350).

b. Response to Comments

We received no public comments relating to the Code List that became effective January 1, 2010.

c. Revisions Effective for 2011

The updated, comprehensive Code List effective January 1, 2011 appears as Addendum J in this final rule with comment period and is available on our Web site at *http://www.cms.gov/PhysicianSelfReferral/40_List_of_Codes.asp#TopOfPage.* Additions and deletions to the Code List conform the Code List to the most recent publications of CPT and HCPCS and to changes in Medicare coverage policy and payment status.

Tables 98 and 99 identify the additions and deletions, respectively, to the comprehensive Code List that became effective January 1, 2010. Tables 98 and 99 also identify the additions and deletions to the list of codes used to identify the items and services that may qualify for the exception in § 411.355(g) (regarding dialysis-related outpatient prescription drugs furnished in or by an ESRD facility) and in § 411.355(h) (regarding preventive screening tests, immunizations, and vaccines).

In Table 98, we specify additions that reflect new CPT and HCPCS codes that become effective January 1, 2011, or that became effective since our last update. We also include additions that reflect changes in Medicare coverage policy or payment status that become effective January l, 2011, or that became effective since our last update.

Table 99 reflects the deletions necessary to conform the Code List to the most recent publications of the CPT and HCPCS and to changes in Medicare coverage policy and payment status. In addition, we are deleting CPT codes 94667 and 94668 (Chest wall manipulation) from the category of "physical therapy, occupational therapy, and outpatient speech-language pathology services" because these services are not generally considered to be physical therapy services. Also, we are deleting CPT code 77014 (CT scan for therapy guide) from the category "radiology and certain other imaging services." This service is always integral to the performance of, and performed during, a non-radiological medical procedure. Therefore, under § 411.351, this service is excluded from the definition of "radiology and certain other imaging services."

Lastly, we are deleting the drugs currently listed as qualifying for the exception for "EPO and other dialysis-related drugs" furnished in or by an ESRD facility. Beginning January 1, 2011, EPO and other dialysis-related drugs furnished by an ESRD facility (except drugs for which there are no injectable equivalents or other forms of administration) will be paid under the ESRD PPS promulgated in the final rule published on August 12, 2010 in the **Federal Register** (75 FR 49030). Drugs for which there are no injectable equivalents or other forms of administration will be payable under the ESRD PPS beginning January 1, 2014. The definition of DHS at § 411.351 excludes services that are reimbursed by Medicare as part of a composite rate (unless the services are specifically identified as DHS and are themselves payable through a composite rate, such as home health and inpatient and outpatient hospital services). Accordingly, EPO and other dialysis-related outpatient prescription drugs furnished by an ESRD facility (except drugs for which there are no injectable equivalents or other forms of administration) will not be DHS beginning January 1, 2011. When dialysis-related drugs for which there are no injectable equivalents or other forms of administration are bundled into the ESRD PPS beginning January 1, 2014, and furnished by an ESRD facility, they will no longer meet the definition of DHS and, therefore, will not be subject to the physician self-referral prohibition. In the meantime, those drugs remain DHS. If we determine that any of those drugs may qualify for the exception for dialysis-related drugs at 411.355(g), we will announce them through the annual update to the Code List that appears in the PFS final rule.

We will consider comments regarding the codes listed in Tables 98 and 99. Comments will be considered if we receive them by the date specified in the **DATES** section of this final rule with comment period. We will not consider any comment that advocates a substantive change to any of the DHS defined in § 411.351.

TABLE 98 ADDITIONS TO THE PHYSICIAN SELF-REFERRAL LIST OF CPT [1]/HCPCS CODES

CLINICAL LABORATORY SERVICES	
0058T	Cryopreservation ovary tiss.
0059T	Cryopreservation oocyte.
G0432	EIA HIV–1/HIV–2 screen.
G0433	ELISA HIV–1/HIV–2 screen.
G0434	Drug screen multi drug class.
G0435	Oral HIV–1/HIV–2 screen.
PHYSICAL THERAPY, OCCUPATIONAL THERAPY, AND OUTPATIENT SPEECH-LANGUAGE PATHOLOGY SERVICES	
95992	Canalith repositioning proc.
RADIOLOGY AND CERTAIN OTHER IMAGING SERVICES	
72159	Mr angio spine w/o&w/dye.
73225	Mr angio upr extr w/o&w/dye.
74176	Ct angio abd & pelvis.
74177	Ct angio abd&pelv w/contrast.
74178	Ct angio abd & pelv 1+ regns.
76881	Us xtr non-vasc complete.
76882	Us xtr non-vasc lmtd.
92132	Cmptr ophth dx img ant segmt.
92133	Cmptr ophth img optic nerve.
92134	Cptr ophth dx img post segmt.
92227	Remote dx retinal imaging.
92228	Remote retinal imaging mgmt.
RADIATION THERAPY SERVICES AND SUPPLIES	
49327	Lap ins device for rt.
49412	Ins device for rt guide open.
57156	Ins vag brachytx device.
A4650	Implant radiation dosimeter.
DRUGS USED BY PATIENTS UNDERGOING DIALYSIS	
[No additions]	
PREVENTIVE SCREENING TESTS, IMMUNIZATIONS AND VACCINES	
90662	Flu vacc prsv free inc antig.
90670	Pneumococcal vacc 13 val im.
G0432	EIA HIV–1/HIV–2 screen.
G0433	ELISA HIV–1/HIV–2 screen.
G0435	Oral HIV–1/HIV–2 screen.

VIII. Waiver of Proposed Rulemaking and Delay in Effective Date

We ordinarily publish a notice of proposed rulemaking in the **Federal Register** and invite public comment on the proposed rule. The notice of proposed rulemaking includes a reference to the legal authority under which the rule is proposed, and the terms and substance of the proposed rule or a description of the subjects and issues involved. This procedure can be waived, however, if an agency finds good cause that a notice-and-comment procedure is impracticable, unnecessary, or contrary to the public interest and incorporates a statement of the finding and its reasons in the rule issued.

We utilize HCPCS codes for Medicare payment purposes. The HCPCS is a national drug coding system comprised of Level I (CPT) codes and Level II (HCPCS National Codes) that are intended to provide uniformity to coding procedures, services, and supplies across all types of medical providers and suppliers. Level I (CPT) codes are copyrighted by the AMA and consist of several categories, including Category I codes which are 5-digit numeric codes, and Category III codes which are temporary codes to track emerging technology, services, and procedures.

The AMA issues an annual update of the CPT code set each Fall, with January 1 as the effective date for implementing the updated CPT codes. The HCPCS, including both Level I and Level II codes, is similarly updated annually on a CY basis. Annual coding changes are not available to the public until the Fall immediately preceding the annual January update of the PFS. Because of the timing of the release of these new codes, it is impracticable for us to provide prior notice and solicit comment on these codes and the RVUs assigned to them in advance of publication of the final rule that implements the PFS. Yet, it is imperative that these coding changes be accounted for and recognized timely under the PFS for payment because services represented by these codes will be provided to Medicare beneficiaries by physicians during the CY in which they become effective. Moreover, regulations implementing HIPAA (42 CFR parts 160 and 162) require that the HCPCS be used to report health care services, including services paid under the PFS. We also assign interim RVUs to any new codes based on a review of the AMA RUC recommendations for valuing these services. By reviewing these AMA RUC recommendations for the new codes, we are able to assign RVUs to services based on input from the medical community and to establish payment for them, on an interim basis, that corresponds to the relative resources associated with furnishing the services. We are also able to determine, on an interim final basis, whether the codes will be subject other payment policies. If we did not assign RVUs to new codes on an interim basis, the alternative would be to either not pay for these services during the initial CY or have each Medicare contractor establish a payment rate for these new codes. We believe both of these alternatives are contrary to the public interest, particularly since the AMA RUC process allows for an assessment of the valuation of these services by the medical community prior to our establishing payment for these codes on an interim basis. Therefore, we believe it would be contrary to the public interest to delay establishment of fee schedule payment amounts for these codes.

For the reasons outlined above in this section, we find good cause to waive the notice of proposed rulemaking for the interim RVUs for selected procedure codes identified in Addendum C and to establish RVUs for these codes on an interim final basis. We are providing a 60-day public comment period.

Section II.C. of this final rule with comment period discusses the identification and review of potentially misvalued codes by the AMA RUC, as well as our review and decisions regarding the AMA RUC recommendations. Similar to the AMA RUC recommendations for new and revised codes discussed above, due to the timing of the AMA RUC recommendations for the potentially misvalued codes, it was impracticable for CMS to solicit public comment regarding specific proposals for revision prior to this final rule with comment period. We believe it is in the public interest to implement the revised RVUs for the codes that were identified as misvalued, and that have been reviewed and re-evaluated by the AMA RUC, on an interim final basis for CY 2011. The revisions of RVUs for these codes will establish a more appropriate payment that better corresponds to the relative resources associated with furnishing these services. A delay in implementing revised values for these misvalued codes would not only perpetuate the known misvaluation for these services, it would also perpetuate a distortion in the payment for other services under the PFS. Implementing the changes now allows for a more equitable distribution of payments across all PFS services. We believe a delay in implementation of these revisions would be contrary to the public interest, particularly since the AMA RUC process allows for an assessment of the valuation of these services by the medical community prior to the AMA RUC's recommendation to CMS. For the reasons described above, we find good cause to waive notice and comment procedures with respect to the misvalued codes identified in Tables 53, 54, and 55, and to revise RVUs for these codes on an interim final basis. We are

providing a 60-day public comment period.

Furthermore, in this final rule with comment period, we are making a technical revision to § 410.64 (Additional Preventive Services) to conform with section 1861(ddd)(1), as amended by section 4104 of the ACA. We are revising § 410.64(a) by removing the words "not otherwise described in this subpart" and adding the words "not described in subparagraphs (1) or (3) of § 410.2 of this subpart" in their place. This change reflects section 1861(ddd)(1) of the Act (as amended by section 4104(a)(2) of the ACA). While this change was not discussed in the CY 2011 PFS proposed rule (74 FR 40129), we are making this change pursuant to the "good cause" exception to APA notice and comment rulemaking. Under the good cause exception, public participation procedures are not required "when the agency for good cause finds (and incorporates the finding and a brief statement of reasons therefore in the rules issued) that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest" (5 U.S.C. 553(b)). Section 410.64(a) previously reflected section 1861(ddd)(1) of the Act, which was subsequently amended. The revision to the regulations merely incorporates the new statutory language for consistency, and is not an interpretation or clarification. Therefore, we believe it is appropriate to waive advanced notice and public comment on this change for good cause, due to the technical nature of the revision to the regulations.

We ordinarily provide a 60-day delay in the effective date of the provisions of a rule in accordance with the Administrative Procedure Act (APA) (5 U.S.C. 553(d)), which requires a 30-day delayed effective date, and the Congressional Review Act (5 U.S.C. 801(a)(3)), which requires a 60-day delayed effective date for major rules. However, we can waive the delay in the effective date if the Secretary finds, for good cause, that the delay is impracticable, unnecessary, or contrary to the public interest, and incorporates a statement of the finding and the reasons in the rule issued (5 U.S.C. 553(d)(3); 5 U.S.C. 808(2)).

IX. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995, we are required to provide 30-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. In order to fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires that we solicit comment on the following issues:

- The need for the information collection and its usefulness in carrying out the proper functions of our agency.
- The accuracy of our estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

We are soliciting public comment on each of these issues for the following sections of this document that contain information collection requirements (ICRs):

A. ICRs Regarding Diagnostic X-ray Tests, Diagnostic Laboratory Tests, and Other Diagnostic Tests: Conditions (§ 410.32)

Section 410.32(d)(2)(i) requires the physician or qualified nonphysician practitioner (as defined in § 410.32(a)(2)) who orders the service must maintain documentation of medical necessity in the beneficiary's medical record. In addition, both the medical record and the laboratory requisition (or order) would be required to be signed by the physician or qualified nonphysician practitioner (as defined in § 410.32(a)(2)) who orders the service. The burden associated with these requirements would be the time and effort necessary for a physician or qualified nonphysician practitioner to sign the medical record or laboratory requisition (or order). There is also a recordkeeping requirement associated with maintaining the documentation of medical necessity in the beneficiary medical record. While these recordkeeping and reporting requirements are subject to the PRA, we believe the associated burden is exempt from the PRA in accordance with 5 CFR 1320.3(b)(2). We believe that the time, effort, and financial resources necessary to comply with the aforementioned information collection requirements is incurred by persons in the normal course of their activities and therefore considered to be usual and customary business practices.

B. ICRs Regarding General Exceptions to the Referral Prohibition Related to Both Ownership/Investment and Compensation (§ 411.355)

Section 411.355(b)(7)(i) states that with respect to magnetic resonance imaging, computed tomography, and positron emission tomography, the referring physician must provide written notice to the patient at the time of the referral that the patient may receive the same services from a person other than one described in § 411.355(b)(1). The written notice must include a list of other suppliers (as defined in § 400.202 of this title) that provide the services for which the individual is being referred. In response to public comments received, we are finalizing this provision to require that the list must include a minimum of 5 suppliers within a 25-mile radius of the referring physician's office location at the time of the referral, rather than the proposed 10 suppliers. The notice should be written in a manner sufficient to be reasonably understood by all patients and should include for each supplier on the list, at a minimum, the supplier's name, address, and telephone number.

This rule finalizes section 411.355(b)(7)(ii) to state that if the referring physician makes a referral within an area with fewer than 5 other suppliers within the 25-mile radius of the physician's office location at the time of the referral, the physician shall list all of the other suppliers of the imaging service that are present within a 25-mile radius of the referring physician's office location. Provision of the written list of alternate suppliers will not be required if no other suppliers provide the services for which the individual is being referred within the 25-mile radius. These physicians must still disclose to the patient that the patient may receive these services from a person other than one described in § 411.355(b)(1) in a manner sufficient to reasonably be understood by all patients.

The burden associated with the requirements contained in this section would be the time and effort necessary for a physician to develop a standard disclosure. There would also be burden associated with the time and effort necessary for a physician to provide the disclosure to the patient. Based upon public comments received, we have removed the requirement that a physician must obtain the patient's signature on the disclosure and maintain a copy of this document in the medical record. Physicians must retain adequate assurance that the information was shared with the patient so that this information can be verified.

Our estimate that it would take 1 hour for a physician's office to develop a standard disclosure remains the same in this final rule with comment to account for physicians drafting the disclosure notice and listing the 5 alternate

suppliers. Our estimate that 71,000 physicians will be required to comply with these requirements remains unchanged from the proposed rule. The total burden associated with the development of the standard disclosure remains 71,000 hours at a cost of $1,042,280. Although the physician no longer must have the patient sign the disclosure and enter it into the medical record, we have not changed the estimate that it will take each physician 1 minute to provide the disclosure to the patient. Each provider will make approximately 106 disclosures. The total estimated annual burden for this requirement remains 125,433 hours at a cost of $10,536,400.

C. ICRs Regarding Appeals Process for Termination of Competitive Bidding Contract (§ 414.423)

Section 414.423(c)(1)(i) states that CMS has the option to allow a DMEPOS supplier to provide a written CAP to remedy the deficiencies identified in the notice, when CMS determines that the delay in the termination date caused by allowing a CAP will not cause harm to beneficiaries. As stated in § 414.423(c)(2)(i) a CAP must be submitted within 30 calendar days from the date on the notification letter. If the supplier decides not to submit a CAP the supplier may within 30 days of the date on the termination letter request a hearing by a CBIC hearing officer.

The burden associated with this requirement is the time and effort necessary for a supplier that has received a termination notice to develop and submit a CAP. We estimate that 10 suppliers will need to comply with this requirement annually. Similarly, we estimate that it will take a supplier an average of 3 hours to develop a CAP. The total estimated annual burden associated with this requirement is 30 hours at a cost of $2,250.

Section 414.423(e)(2) requires that if CMS accepts the CAP, including supplier's designated timeframe for its completion, the supplier must provide a follow-up report within 5 days after the supplier has fully implemented the CAP that verifies that all of the deficiencies identified in the CAP have been corrected in accordance with the timeframes accepted by CMS. The burden associated with this requirement is the time and effort necessary for a supplier to develop and submit a follow-up report. While this requirement is subject to the PRA, we believe the associated burden is exempt under 5 CFR 1320.3(h)(6). In accordance with 5 CFR 1320.3(h)(6), a request for facts or opinions addressed to a single person is not defined as information collection requirements and is therefore exempt from the PRA.

Section 414.423(f)(1) states that a supplier who has received a notice that CMS considers them in breach of contract or that their CAP is not acceptable has the right to request a hearing before a CBIC HO who was not involved with the original determination. Section 414.423(f)(2) further specifies that a supplier who wishes to appeal the termination notice must submit a written request to the CBIC. The request for a hearing must be received by the CBIC within 30 calendar days from the date of the notice to terminate.

The burden associated with this section is the time and effort necessary for a supplier to develop and submit a written request for a hearing by a CBIC Hearing Officer. We estimate that it will take a supplier 8 hours to develop and submit a request for a hearing. We believe 5 suppliers will be subject to this requirement on an annual basis. The total estimated annual burden associated with developing and submitting a written request for a hearing by a CBIC Hearing Officer is 40 hours at a cost of $3,000.

Section 414.423 requires a contract supplier whose contract has been terminated to notify all beneficiaries who are receiving rented competitive bid items or competitive bid items received on a recurring basis, of the termination of their contract. The notice to the beneficiary from the supplier whose contract was terminated must be provided within 5 days of receipt of the notice of termination. The notification to the beneficiaries must inform the beneficiaries that they are going to have to select a new contract supplier for these items.

The burden associated with this section is the time and effort necessary for a supplier to develop and distribute notification of its termination to all beneficiaries receiving rented competitive bid items or competitive bid items received on a recurring basis. We estimate that it will take a supplier 3 hours to develop and distribute a notice announcing its termination to all of its beneficiaries receiving rented competitive bid items or competitive bid items received on a recurring basis. We believe 2 suppliers will be subject to this requirement on an annual basis. The total estimated annual burden associated with this requirement is 6 hours at a cost of $450.

D. ICRs Regarding Additional Provider and Supplier Requirements for Enrolling and Maintaining Active Enrollment Status in the Medicare Program (§ 424.516)

Section 424.516(e)(2) would require a provider or supplier to report a revocation or suspension to the applicable Medicare contractor within 30 days of any revocation or suspension of a Federal or State license or certification. Similarly, proposed § 424.516(e)(2) states that within 30 days of a voluntary withdrawal or involuntary termination from the Medicare program, the provider or supplier must report a voluntary withdrawal or involuntary termination to the applicable Medicare contractor. The burden associated with the requirements in § 424.516(e)(2) and (3) is the time and effort necessary for a provider or supplier to report the required information to the applicable Medicare contractor. While these requirements are subject to the PRA, each submission will be evaluated on a case-by-case basis.

TABLE 100—ESTIMATED ANNUAL RECORDKEEPING AND REPORTING BURDEN

Regulation section(s)	OMB control No.	Respondents	Responses	Burden per response (hours)	Total annual burden (hours)	Hourly labor cost of reporting (in $)	Total labor cost of reporting (in $)	Total capital/ maintenance costs (in $)	Total cost (in $)
§ 411.355	0938–New	71,000	71,000	1	71,000	14.68	1,042,280	0	1,042,280
		71,000	7,454,760	0.0167	125,433	83.79	*10,536,400	0	10,536,400
§ 414.423	0938–New	10	10	3	30	75.00	2,250	0	2,250
		5	5	8	40	75.00	3000	0	3000
		2	2	3	6	75.00	450	0	450

TABLE 100—ESTIMATED ANNUAL RECORDKEEPING AND REPORTING BURDEN—Continued

Regulation section(s)	OMB control No.	Respondents	Responses	Burden per response (hours)	Total annual burden (hours)	Hourly labor cost of reporting (in $)	Total labor cost of reporting (in $)	Total capital/ maintenance costs (in $)	Total cost (in $)
Total		71,017	7,525,777		196,509				11,584,380

* The annual cost burden for this provision was calculated by taking 106 disclosures per year per physician x $1.40 per disclosure = $148.40 a year per physician x 71,000 physicians = $10,536,400.

E. Additional Information Collection Requirements

This final rule with comment period imposes collection of information requirements as outlined in the regulation text and specified above. However, this final rule with comment period also makes reference to several associated information collections that are not discussed in the regulation text contained in this document. The following is a discussion of these information collections, some of which have already received OMB approval.

1. Part B Drug Payment

The discussion of average sales price (ASP) issues in section VII.A.1 of this final rule with comment period does not contain any new information collection requirements with respect to payment for Medicare Part B drugs and biologicals under the ASP methodology. Drug manufacturers are required to submit ASP data to us on a quarterly basis. The ASP reporting requirements are set forth in section 1927(b) of the Act. The burden associated with this requirement is the time and effort required by manufacturers of Medicare Part B drugs and biologicals to calculate, record, and submit the required data to CMS. While the burden associated with this requirement is subject to the PRA, it is currently approved under OMB control number 0938–0921 with a June 31, 2012, expiration date.

2. The Physician Quality Reporting System (Formerly the Physician Quality Reporting Initiative (PQRI))

Section VII.F.1. of this final rule with comment period discusses the background of the Physician Quality Reporting System, provides information about the measures and reporting mechanisms that will be available to eligible professionals and group practices who choose to participate in the 2011 Physician Quality Reporting System, and the criteria for satisfactory reporting in 2011.

With respect to satisfactory submission of data on quality measures by eligible professionals, eligible professionals include physicians, other practitioners as described in section 1842(b)(18)(c) of the Act, physical and occupational therapists, qualified speech-language pathologists, and qualified audiologists. Eligible professionals may choose whether to participate and, to the extent they satisfactorily submit data on quality measures for covered professional services, they can qualify to receive an incentive payment. To qualify to receive an incentive payment for 2011, the eligible professional (or group practice) must meet one of the criteria for satisfactory reporting described in section VII.F.1.e. or VII.F.1.f. of this final rule with comment period (or section VII.F.1.g. for group practices).

Because this is a voluntary program, it is difficult to accurately estimate how many eligible professionals will opt to participate in the Physician Quality Reporting System in CY 2011. Information from the "Physician Quality Reporting System 2007 Reporting Experience Report," which is available on the Physician Quality Reporting System section of the CMS Web site at *http://www.cms.hhs.gov/pqri,* indicates that nearly 110,000 unique TIN/NPI combinations attempted to submit Physician Quality Reporting System quality measures data via claims for the 2007 Physician Quality Reporting System. Therefore, for purposes of conducting a burden analysis for the 2011 Physician Quality Reporting System, we will assume that all eligible professionals who attempted to participate in the 2007 Physician Quality Reporting System will also attempt to participate in the 2011 Physician Quality Reporting System. Furthermore, we believe that the burden for eligible professionals who are participating in the Physician Quality Reporting System for the first time in 2011 will be considerably higher than the burden for eligible professionals who have participated in the Physician Quality Reporting System in prior years.

For individual eligible professionals, the burden associated with the requirements of this reporting initiative is the time and effort associated with eligible professionals identifying applicable Physician Quality Reporting System quality measures for which they can report the necessary information, collecting the necessary information, and reporting the information needed to report the eligible professional's or group practice's measures. We believe it is difficult to accurately quantify the burden because eligible professionals may have different processes for integrating the Physician Quality Reporting System into their practice's work flows. Moreover, the time needed for an eligible professional to review the quality measures and other information, select measures applicable to his or her patients and the services he or she furnishes to them, and incorporate the use of quality data codes into the office work flows is expected to vary along with the number of measures that are potentially applicable to a given professional's practice. Since eligible professionals are generally required to report on at least 3 measures to earn a Physician Quality Reporting System incentive, we will assume that each eligible professional who attempts to submit Physician Quality Reporting System quality measures data is attempting to earn a Physician Quality Reporting System incentive payment and reports on an average of 3 measures for this burden analysis.

Because we anticipate even greater participation in the 2011 Physician Quality Reporting System than in previous years, including participation by eligible professionals who are participating in the Physician Quality Reporting System for the first time in 2011, we will assign 5 hours as the amount of time needed for eligible professionals to review the 2011 Physician Quality Reporting System Measures List, review the various reporting options, select the most appropriate reporting option, identify the applicable measures or measures groups for which they can report the necessary information, review the measure specifications for the selected measures or measures groups, and incorporate reporting of the selected measures or measures groups into the office work flows. This estimate is based on our assumption that an eligible professional will need up to 2 hours to review the 2011 Physician Quality Reporting System Measures List, review the reporting options, and select a reporting option and measures on which

to report and 3 hours to review the measure specifications for up to 3 selected measures or up to 1 selected measures group and to develop a mechanism for incorporating reporting of the selected measures or measures group into the office work flows.

Information from the PVRP, which was a predecessor to the Physician Quality Reporting System, indicated an average labor cost of $50 per hour. To account for salary increases over time, we will use an average practice labor cost of $58 per hour in our estimates based on an assumption of an average annual increase of approximately 3 percent. Thus, we estimate the cost for an eligible professional associated with preparing to report Physician Quality Reporting System quality measures would be approximately $290 per eligible professional ($58 per hour x 5 hours).

We continue to expect the ongoing costs associated with Physician Quality Reporting System participation to decline based on an eligible professional's familiarity with and understanding of the Physician Quality Reporting System, experience with participating in the Physician Quality Reporting System, and increased efforts by CMS and stakeholders to disseminate useful educational resources and best practices.

We believe the burden associated with actually reporting the Physician Quality Reporting System quality measures will vary depending on the reporting mechanism selected by the eligible professional. For claims-based reporting, eligible professionals must gather the required information, select the appropriate QDCs, and include the appropriate QDCs on the claims they submit for payment. The Physician Quality Reporting System will collect QDCs as additional (optional) line items on the existing HIPAA transaction 837–P and/or CMS Form 1500 (OCN: 0938–0999). We do not anticipate any new forms and no modifications to the existing transaction or form. We also do not anticipate changes to the 837–P or CMS Form 1500 for CY 2011.

Based on our experience with the PVRP, we continue to estimate that the time needed to perform all the steps necessary to report each measure (that is, reporting the relevant quality data code(s) for a measure) on claims ranges from 15 seconds (0.25 minutes) to over 12 minutes for complicated cases and/or measures, with the median time being 1.75 minutes. At an average labor cost of $58 per hour per practice, the cost associated with this burden ranges from $0.24 in labor to about $11.60 in labor time for more complicated cases and/or measures, with the cost for the median practice being $1.69.

The total estimated annual burden for this requirement will also vary along with the volume of claims on which quality data is reported. In previous years, when we required reporting on 80 percent of eligible cases for claims-based reporting, we found that on average, the median number of reporting instances for each of the Physician Quality Reporting System measures was 9. Since we proposed to reduce the required reporting rate by over one-third to 50 percent, then for purposes of this burden analysis we will assume that an eligible professional will need to report each selected measure for 6 reporting instances. The actual number of cases on which an eligible professional would be required to report quality measures data will vary, however, with the eligible professional's patient population and the types of measures on which the eligible professional chooses to report (each measure's specifications includes a required reporting frequency).

Based on the assumptions discussed above, we estimate the total annual reporting burden per eligible professional associated with claims-based reporting to range from 4.5 minutes (0.25 minutes per measure × 3 measures × 6 cases per measure) to 180 minutes (12 minutes per measure × 3 measures × 6 cases per measure), with the burden to the median practice being 31.5 minutes (1.75 minutes per measure × 3 measures × 6 cases). We estimate the total annual reporting cost per eligible professional associated with claims-based reporting to range from $4.32 ($0.24 per measure × 3 measures × 6 cases per measure) to $208.80 ($11.60 per measure × 3 measures × 6 cases per measure), with the cost to the median practice being $30.42 per eligible professional ($1.69 per measure × 3 measures × 6 cases per measure).

For registry-based reporting, there would be no additional time burden for eligible professionals to report data to a registry as eligible professionals opting for registry-based reporting would more than likely already be reporting data to the registry for other purposes and the registry would merely be re-packaging the data for use in the Physician Quality Reporting System. Little, if any, additional data would need to be reported to the registry for purposes of participation in the 2011 Physician Quality Reporting System. However, eligible professionals would need to authorize or instruct the registry to submit quality measures results and numerator and denominator data on quality measures to CMS on their behalf. We estimate that the time and effort associated with this would be approximately 5 minutes per eligible professional.

Registries interested in submitting quality measures results and numerator and denominator data on quality measures to CMS on their participants' behalf in 2011 will need to complete a self-nomination process in order to be considered "qualified" to submit on behalf of eligible professionals unless the registry was qualified to submit on behalf of eligible professionals for prior years and did so successfully. We estimate that the self-nomination process for qualifying additional registries to submit on behalf of eligible professionals for the 2011 Physician Quality Reporting System involves approximately 1 hour per registry to draft the letter of intent for self-nomination. It is estimated that each self-nominated entity will also spend 2 hours for the interview with CMS officials and 2 hours calculating numerators, denominators, and measure results for each measure the registry wishes to report using a CMS-provided measure flow. However, the time it takes to complete the measure flow could vary depending on the registry's experience and the number and type of measures for which the registry wishes to submit on behalf of eligible professionals. Additionally, part of the self-nomination process involves the completion of an XML submission by the registry, which is estimated to take approximately 5 hours, but may vary depending on the registry's experience. We estimate that the registry staff involved in the registry self-nomination process have an average labor cost of $50 per hour. Therefore, assuming the total burden hours per registry associated with the registry self-nomination process is 10 hours, we estimate the total cost to a registry associated with the registry self-nomination process to be approximately $500 ($50 per hour × 10 hours per registry).

The burden associated with the registry-based reporting requirements of this voluntary reporting initiative is the time and effort associated with the registry calculating quality measures results from the data submitted to the registry by its participants and submitting the quality measures results and numerator and denominator data on quality measures to CMS on behalf of their participants. The time needed for a registry to review the quality measures and other information, calculate the measures results, and submit the measures results and numerator and denominator data on the quality

measures on their participants' behalf is expected to vary along with the number of eligible professionals reporting data to the registry and the number of applicable measures. However, we believe that registries already perform many of these activities for their participants. The number of measures that the registry intends to report to CMS and how similar the registry's measures are to CMS' Physician Quality Reporting System measures will determine the time burden to the registry.

For EHR-based reporting, the eligible professional must have access to a CMS-specified identity management system, such as IACS, which we believe takes less than 1 hour to obtain. Once an eligible professional has an account for this CMS-specified identity management system, he or she must extract the necessary clinical data from his or her EHR, and submit the necessary data to the CMS-designated clinical data warehouse. With respect to our requirement for an eligible professional to submit a test file, we believe that doing so would take less than 1 hour. With respect to submitting the actual 2011 data file in 2012, we believe that this would take an eligible professional no more than 2 hours, depending on the number of patients on which the eligible professional is submitting. We believe that once the EHR is programmed by the vendor to allow data submission to CMS, the burden to the eligible professional associated with submission of data on Physician Quality Reporting System quality measures should be minimal. Because this manner of reporting quality data to CMS was new to the Physician Quality Reporting System for 2010 and no EHR data submissions have taken place yet, it is difficult to estimate how many eligible professionals will opt to participate in the Physician Quality Reporting System through the EHR mechanism in CY 2011.

An EHR vendor interested in having their product(s) be used by eligible professionals to submit Physician Quality Reporting System quality measures data to CMS was required to complete a self-nomination process in order for the vendor's product(s) to be considered "qualified" for 2011. It is difficult to accurately quantify the burden associated with the EHR self-nomination process as there is variation regarding the technical capabilities and experience among vendors. For purposes of this burden analysis, however, we estimate that the time required for an EHR vendor to complete the self-nomination process will be similar to the time required for registries to self-nominate, that is approximately 10 hours at $50 per hour for a total of $500 per EHR vendor ($50 per hour × 10 hours per EHR vendor).

The burden associated with the EHR vendor programming its EHR product(s) to extract the clinical data that the eligible professional needs to submit to CMS for purposes of reporting 2010 Physician Quality Reporting System quality measures will be dependent on the EHR vendor's familiarity with the Physician Quality Reporting System, the vendor's system capabilities, as well as the vendor's programming capabilities. Some vendors already have these necessary capabilities and for such vendors, we estimate the total burden hours to be 40 hours at a rate of $50 per hour for a total burden estimate of $2,000 ($50 per hour × 40 hours per vendor). However, given the variability in the capabilities of the vendors, those vendors with minimal experience would have a burden of approximately 200 hours at $50 per hour, for a total estimate of $10,000 per vendor ($50 per hour × 200 hours per EHR vendor).

With respect to the process for group practices to be treated as satisfactorily submitting quality measures data under the 2011 Physician Quality Reporting System discussed in section VII.F.1. of this final rule with comment, group practices interested in participating in the 2011 Physician Quality Reporting System through one of the group practice reporting options (GPRO I or GPRO II) will need to complete a self-nomination process similar to the self-nomination process required of registries and EHR vendors. Therefore, assuming 2 hours for a group practice to decide whether to participate as a group or individually, approximately 2 hours per group practice to draft the letter of intent for self-nomination, gather the requested information, and provide this requested information, and an additional 2 hours undergoing the vetting process with CMS officials, we estimate a total of 6 hours associated with the self-nomination process. Assuming that the group practice staff involved in the group practice self-nomination process have the same average practice labor cost as the average practice labor cost estimates we used for individual eligible professionals of $58 per hour, we estimate the total cost to a group practice associated with the group practice self-nomination process to be approximately $348 ($58 per hour × 6 hours per group practice).

The burden associated with the group practice reporting requirements of this voluntary reporting initiative is the time and effort associated with the group practice submitting the quality measures data. For practices participating under the GPRO I process, this would be the time associated with the physician group completing the data collection tool. The information collection components of this data collection tool have been reviewed by OMB and are currently approved under OMB control number 0938–0941, with an expiration date of December 31, 2011, for use in the Physician Group Practice, Medicare Care Management Performance (MCMP), and EHR demonstrations. Based on burden estimates for the PGP demonstration, which uses the same data submission methods, we estimate the burden associated with a physician group completing the data collection tool would be approximately 79 hours per physician group. Based on an average labor cost of $58 per physician group, we estimate the cost of data submission per physician group associated with participating in the Physician Quality Reporting System GPRO I would be $4,582 ($58 per hour × 79 hours per group practice).

For group practices participating under the GPRO II process, the burden associated with submitting the Physician Quality Reporting System quality measures data would be the time associated with the group practice submitting the required data to CMS via claims or a registry. We would expect that data submission under GPRO II would take no more time than the time it would take an individual eligible professional to submit via claims or registry. We believe it would be appropriate to multiply the appropriate burden estimates for each reporting mechanism for individual eligible professionals by the number of eligible professionals in a group to obtain the burden estimates for data submission under GPRO II. For example, based on our estimate of 15.75 minutes per eligible professional under claims-based reporting, we would expect that a 2-person group would have a burden of 31.50 minutes for claims-based submission under GPRO II.

Eligible professionals who wish to qualify for the additional 0.5 percent incentive payment authorized under section 1848(m)(7) of the Act ("Additional Incentive Payments") for 2011 will need to more frequently than is required to qualify for or maintain board certification status participate in a qualified Maintenance of Certification Program for 2011 and successfully complete a qualified Maintenance of Certification Program practice assessment for 2011. We believe that a majority of the eligible professionals who would attempt to qualify for this

additional 0.5 percent incentive payment would be those who are already enrolled and participating in a Maintenance of Certification Board. The amount of time that it would take for the eligible professional to participate in the Maintenance of Certification Program more frequently than is required to qualify for or maintain board certification status would vary based on what each individual board determines constitutes "more frequently." The amount of time needed to complete a qualified Maintenance of Certification Program practice assessment is expected to be spread out over time since a quality improvement component is often required. Information from an informal poll of a few ABMS member boards indicates that the time an individual eligible professional spends to complete the practice assessment component of the Maintenance of Certification ranges from 8 to 12 hours.

We invited comments on this burden analysis, including the underlying assumptions used in developing our burden estimates and received no comments.

3. Electronic Prescribing (eRx) Incentive Program

We believe it is difficult to accurately estimate how many eligible professionals will opt to participate in the eRx Incentive Program in CY 2011. Information from the 2009 eRx Incentive Program indicates that nearly 90,000 eligible professionals participated in the first year of the program. We believe, however, that the number of participants will increase in light of the payment adjustment that will start in 2012. Therefore, for purposes of conducting a burden analysis for the 2011 eRx Incentive Program, we will assume that as many eligible professionals who attempted to participate in the 2007 Physician Quality Reporting System will attempt to participate in the 2011 eRx Incentive Program. As such, we can estimate that nearly 110,000 unique TIN/NPI combinations will participate in the 2011 eRx Incentive Program (see the "PQRI 2007 Reporting Experience Report," which is available on the Physician Quality Reporting System section of the CMS Web site at *http://www.cms.hhs.gov/pqri*).

Section VII.F.2 of this final rule with comment discusses the background of the eRx Incentive Program. Section VII.F.2.b.(2) of this final rule with comment provides information on how eligible professionals and group practices can qualify to be considered a successful electronic prescriber in 2011 in order to earn an incentive payment. For 2011, eligible professionals and group practices may choose whether to participate and, to the extent they meet— (1) certain thresholds with respect to the volume of covered professional services furnished; and (2) the criteria to be considered a successful electronic prescriber described in section VII.F.2.b.(2) of this final rule with comment, they can qualify to receive an incentive payment for 2011 and/or avoid being subject to the payment adjustment that goes into effect in 2012.

For the 2011 eRx Incentive Program, as discussed in section VII.F.2. of this final rule with comment, each eligible professional will need to report the G-code indicating that at least one prescription generated during an encounter was electronically submitted at least 25 instances during the reporting period. We expect the ongoing costs associated with participation in the eRx Incentive Program to decline based on an eligible professional's familiarity with and understanding of the eRx Incentive Program, experience with participating in the eRx Incentive Program, and increased efforts by CMS and stakeholders to disseminate useful educational resources and best practices.

Similar to the Physician Quality Reporting System, one factor in the burden to individual eligible professionals is the time and effort associated with individual eligible professionals reviewing the electronic prescribing measure to determine whether it is applicable to them, reviewing the available reporting options (for purposes of the 2011 incentive, this measure will be reportable through claims-based reporting, registry-based reporting, or through EHRs) and selecting one, gathering the required information, and incorporating reporting of the measure into their office work flows. Since the eRx Incentive Program consists of only 1 measure to report, we estimate 2 hours as the amount of time needed for individual eligible professionals to prepare for participation in the eRx Incentive Program. At an average cost of approximately $58 per hour per practice, we estimate the total preparation costs to individual eligible professionals to be approximately $116 (2 hours × $58 per hour).

Another factor that influences the burden to eligible professionals is how they choose to report the electronic prescribing measure. For eligible professionals who choose to do so via claims, we estimate that the burden associated with the requirements of this incentive program is the time and effort associated with gathering the required information, selecting the appropriate quality data codes (QDCs), and including the appropriate QDCs on the claims they submit for payment. For claims-based reporting, the QDCs will be collected as additional (optional) line items on the existing HIPAA transaction 837–P and/or CMS Form 1500. We do not anticipate any new forms and no modifications to the existing transaction or form. We also do not anticipate changes to the 837–P or CMS Form 1500 for CY 201.

Based on the information from the PVRP described above for the amount of time it takes a median practice to report one measure one time on claims (1.75 minutes) and our requirement that eligible professionals to report the measure 25 times for purposes of the incentive payment, we estimate the burden associated with claims-based data submission to be 43.75 minutes (1.75 minutes per case × 1 measure × 25 cases per measure). This equates to a cost of approximately $42.29 (1.75 minutes per case × 1 measure × 25 cases per measure × $58 per hour) per individual eligible professional. For purposes of the 2012 eRx payment adjustment, where an eligible professional is required to report the measure only 10 times, we estimate the burden associated with claims-based submission to be 17.5 minutes (1.75 minutes per case × 1 measure × 10 cases per measure). This equates to a cost of approximately $16.92 (1.75 minutes per case × 1 measure × 10 cases per measure × $58 per hour) per individual eligible professional.

Because registry-based reporting of the electronic prescribing measure to CMS was added to the eRx Incentive Program for 2010 and eligible professionals are not required to indicate to us how they plan to report the electronic prescribing measure each year, it is difficult to accurately estimate how many eligible professionals will opt to participate in the eRx Incentive Program through the registry-based reporting mechanism in CY 2011. We do not anticipate, however, any additional burden for eligible professionals to report data to a registry as eligible professionals opting for registry-based reporting would more than likely already be reporting data to the registry for other purposes. Little, if any, additional data would need to be reported to the registry for purposes of participation in the 2011 eRx Incentive Program. However, eligible professionals would need to authorize or instruct the registry to submit quality measures results and numerator and denominator data on the electronic

prescribing measure to CMS on their behalf. We estimate that the time and effort associated with this would be approximately 5 minutes for each eligible professional that wishes to authorize or instruct the registry to submit quality measures results and numerator and denominator data on the electronic prescribing measure to CMS on their behalf.

Based on our decision to consider only registries qualified to submit Physician Quality Reporting System quality measures results and numerator and denominator data on quality measures to CMS on their participants' behalf for the 2011 Physician Quality Reporting System to be qualified to submit results and numerator and denominator data on the electronic prescribing measure for the 2011 eRx Incentive Program, there would be no need for a registry to undergo a separate self-nomination process for the eRx Incentive Program and therefore, no additional burden associated with the registry self-nomination process.

There would also be a burden to the registry associated with the registry calculating results for the electronic prescribing measure from the data submitted to the registry by its participants and submitting the quality measures results and numerator and denominator data on the electronic prescribing quality measure to CMS on behalf of their participants. The time needed for a registry to review the electronic prescribing measure and other information, calculate the measure's results, and submit the measure's results and numerator and denominator data on the measure on their participants behalf is expected to vary along with the number of eligible professionals reporting data to whom the measure applies. However, we believe that registries already perform many of these activities for their participants. Since the eRx Incentive Program consists of only one measure, we believe that the burden associated with the registry reporting the measure's results and numerator and denominator to CMS on behalf of their participants would be minimal.

For EHR-based reporting, the eligible professional must extract the necessary clinical data from his or her EHR and submit the necessary data to the CMS-designated clinical data warehouse. Because this manner of reporting quality data to CMS was first added to the eRx Incentive Program in 2010 and eligible professionals are not required to indicate to us how they intend to report the electronic prescribing measure, it is difficult to estimate how many eligible professionals will opt to participate in the eRx Incentive Program through the EHR-based reporting mechanism in CY 2011. We believe that once an eligible professional's EHR is programmed by the vendor to allow data submission to CMS, the burden to the eligible professional associated with submission of data on the electronic prescribing measure should be minimal.

Since we are considering only EHR products qualified for the 2010 Physician Quality Reporting System to be qualified for the 2011 eRx Incentive Program, there will be no need for EHR vendors to undergo a separate self-nomination process for the 2011 eRx Incentive Program and therefore, no additional burden associated with the self-nomination process.

There will also be a burden to the EHR vendor associated with the EHR vendor programming its EHR product(s) to extract the clinical data that the eligible professional needs to submit to CMS for purposes of reporting the proposed 2011 electronic prescribing measure. The time needed for an EHR vendor to review the measure and other information and program each qualified EHR product to enable eligible professionals to submit data on the measure to the CMS-designated clinical data warehouse will be dependent on the EHR vendor's familiarity with the electronic prescribing measure, the vendor's system capabilities, as well as the vendor's programming capabilities. Since only EHR products qualified for the 2011 Physician Quality Reporting System will be qualified for the 2011 eRx Incentive Program and the eRx Incentive Program consists of only one measure, we believe that any burden associated with the EHR vendor to program its product(s) to enable eligible professionals to submit data on the electronic prescribing measure to the CMS-designated clinical data warehouse would be minimal.

Finally, with respect to the process for group practices to be treated as successful electronic prescribers under the 2011 eRx Incentive Program discussed in section VII.F.2. of this final rule with comment, group practices will have the same options as individual eligible professionals in terms of the form and manner for reporting the electronic prescribing measure (that is, group practices would have the option of reporting the measure through claims, a qualified registry, or a qualified EHR product). There are only 2 differences between the requirements for an individual eligible professional and a group practice: (1) The fact that a group practice will have to self-nominate; and (2) the number of times that a group practice will be required to report the electronic prescribing measure.

We do not anticipate any additional burden associated with the group practice self-nomination practice since we are limiting the group practices to those selected to participate in the 2011 Physician Quality Reporting System GPRO I or Physician Quality Reporting System GPRO II. The practice only will need to indicate their desire to participate in the eRx GPRO at the same time they self-nominate for either Physician Quality Reporting System GPRO I or Physician Quality Reporting System GPRO II and indicate how they intend to report the electronic prescribing measure.

In terms of the burden to group practices associated with submission of the electronic prescribing measure, we believe that this would be similar to the burden to individual eligible professionals for submitting the electronic prescribing measure. In fact, overall, there could be less burden associated with a practice participating as a group rather than as individual eligible professionals because the total number of reporting instances required by the group could be less than the total number of reporting instances that would be required if each member of the group separately reported the electronic prescribing measure. Thus, we believe that the burden to a group practice associated with reporting the electronic prescribing measure could range from almost no burden (for groups who choose to do so through a qualified EHR or registry) to 72.92 hours (1.75 minutes per measure $\times$ 1 measure $\times$ 2500 cases per measure) for a GPRO I group who chooses to report the electronic prescribing measures through claims submission. Consequently, the total estimated cost per group practice to report the electronic prescribing measure could be as high as $4,225 ($1.69 per measure $\times$ 1 measure $\times$ 2500 cases per measure).

As with individual eligible professionals, we believe that group practices that choose to participate in the 2011 eRx GPRO through registry-based reporting of the electronic prescribing measure would more than likely already be reporting data to the registry. Little, if any, additional data would need to be reported to the registry for purposes of participation in the 2011 eRx Incentive Program beyond authorizing or instructing the registry to submit quality measures results and numerator and denominator data on the electronic prescribing measure to CMS on their behalf. We estimate that the time and effort associated with this would be approximately 5 minutes for

each group practice that wishes to authorize or instruct the registry to submit quality measures results and numerator and denominator data on the electronic prescribing measure to CMS on their behalf.

For group practices that choose to participate in the 2011 eRx Incentive Program through EHR-based reporting of the electronic prescribing measure, once the EHR is programmed by the vendor to allow data submission to CMS, the burden to the group practice associated with submission of data on the electronic prescribing measure should be minimal.

We invited comments on this burden analysis, including the underlying assumptions used in developing our burden estimates and received none.

X. Response to Comments

Because of the large number of public comments we normally receive on **Federal Register** documents, we are not able to acknowledge or respond to them individually. We will consider all comments we receive by the date and time specified in the **DATES** section of this preamble, and, when we proceed with a subsequent document, we will respond to the comments in the preamble to that document.

XI. Regulatory Impact Analysis

We have examined the impacts of this rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), and the Congressional Review Act (5 U.S.C. 804(2)).

Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year). We estimate, as discussed below in this section, that the PFS provisions included in this final rule with comment period will redistribute more than $100 million in 1 year. Therefore, we estimate that this rulemaking is "economically significant" as measured by the $100 million threshold, and hence also a major rule under the Congressional Review Act. Accordingly, we have prepared a Regulatory Impact Analysis that to the best of our ability presents the costs and benefits of the rulemaking.

The RFA requires agencies to analyze options for regulatory relief of small businesses, if a rule has a significant impact on a substantial number of small entities. For purposes of the RFA, we estimate that most hospitals and most other providers are small entities as that term is used in the RFA (including small businesses, nonprofit organizations, and small governmental jurisdictions). The great majority of hospitals and most other health care providers and suppliers are small entities, either by being nonprofit organizations or by meeting the SBA definition of a small business (having revenues of less than $34.5 million in any 1 year) (for details see the SBA's Web site at *http://sba.gov/idc/groups/public/documents/sba_homepage/serv_sstd_tablepdf.pdf* (refer to the 620000 series). Individuals and States are not included in the definition of a small entity. The RFA requires that we analyze regulatory options for small businesses and other entities. We prepare a regulatory flexibility analysis unless we certify that a rule would not have a significant economic impact on a substantial number of small entities. The analysis must include a justification concerning the reason action is being taken, the kinds and number of small entities the rule affects, and an explanation of any meaningful options that achieve the objectives with less significant adverse economic impact on the small entities.

For purposes of the RFA, physicians, NPPs, and suppliers including IDTFs are considered small businesses if they generate revenues of $10 million or less based on SBA size standards. Approximately 95 percent of physicians are considered to be small entities. There are over 1 million physicians, other practitioners, and medical suppliers that receive Medicare payment under the PFS.

For purposes of the RFA approximately 85 percent of suppliers of DMEPOS are considered small businesses according to the SBA size standards. Our most recent claims information includes 47,000 entities billing Medicare for DMEPOS each year. Total annual estimated Medicare expenditures for DMEPOS suppliers are approximately $10.1 billion in CY 2009, for which $8.1 billion was fee-for-service (FFS) and $2 billion was for managed care.

For purposes of the RFA, approximately 80 percent of clinical diagnostic laboratories are considered small businesses according to the SBA size standards.

Ambulance providers and suppliers for purposes of the RFA are also considered to be small entities.

In addition, most ESRD facilities are considered small entities for purposes of the RFA, either based on nonprofit status or by having revenues of $34.5 million or less in any year. We note that a considerable number of ESRD facilities are owned and operated by large dialysis organizations (LDOs) or regional chains, which would have total revenues more than $34.5 million in any year if revenues from all locations are combined. However, the claims data we use to estimate payments for this RFA and RIA does not identify which dialysis facilities are parts of an LDO, regional chain, or other type of ownership. Each individual dialysis facility has its own provider number and bills Medicare using this number. Therefore, we consider each ESRD facility to be a small entity for purposes of the RFA. We consider a substantial number of entities to be significantly affected if the final rule with comment period has an annual average impact on small entities of 3 to 5 percent or more. The majority of ESRD facilities will experience impacts of approximately 2 percent of total revenues. There are 976 nonprofit ESRD facilities with a combined increase of 2.1 percent in overall payments relative to current overall payments. We note that although the overall effect of the wage index changes is budget neutral, there are increases and decreases based on the location of individual facilities. The analysis and discussion provided in this section and elsewhere in this final rule with comment period complies with the RFA requirements.

Because we acknowledge that many of the affected entities are small entities, the analysis discussed throughout the preamble of this final rule with comment period constitutes our regulatory flexibility analysis for the remaining provisions and addresses comments received on these issues.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis, if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. Any such regulatory impact analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a metropolitan statistical area and has fewer than 100 beds. We do not believe this final rule with comment period has impact on

significant operations of a substantial number of small rural hospitals because most dialysis facilities are freestanding. While there are 180 rural hospital-based dialysis facilities, we do not know how many of them are based at hospitals with fewer than 100 beds. However, overall, the 180 rural hospital-based dialysis facilities will experience an estimated 2.1 percent increase in payments. As a result, this rule will not have a significant impact on small rural hospitals. Therefore, the Secretary has determined that this final rule with comment period will not have a significant impact on the operations of a substantial number of small rural hospitals.

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2010, that threshold is approximately $135 million. This final rule with comment period will not mandate any requirements for State, local, or tribal governments in the aggregate, or by the private sector, of $135 million. Medicare beneficiaries are considered to be part of the private sector and as a result a more detailed discussion is presented on the Impact of Beneficiaries in section XI.G. of this regulatory impact analysis.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. We have examined this final rule with comment period in accordance with Executive Order 13132 and have determined that this regulation would not have any substantial direct effect on State or local governments, preempt States, or otherwise have a Federalism implication.

We have prepared the following analysis, which together with the information provided in the rest of this preamble, meets all assessment requirements. The analysis explains the rationale for and purposes of this final rule with comment period; details the costs and benefits of the rule; analyzes alternatives; and presents the measures we will use to minimize the burden on small entities. As indicated elsewhere in this rule, we are implementing a variety of changes to our regulations, payments, or payment policies to ensure that our payment systems reflect changes in medical practice and the relative value of services. We provide information for each of the policy changes in the relevant sections of this final rule with comment period. We are unaware of any relevant Federal rules that duplicate, overlap, or conflict with this final rule with comment period. The relevant sections of this rule contain a description of significant alternatives if applicable.

A. RVU Impacts

1. Resource-Based Work, PE, and Malpractice RVUs

Section 1848(c)(2)(B)(ii)(II) of the Act requires that increases or decreases in RVUs may not cause the amount of expenditures for the year to differ by more than $20 million from what expenditures would have been in the absence of these changes. If this threshold is exceeded, we make adjustments to preserve budget neutrality.

Our estimates of changes in Medicare revenues for PFS services compare payment rates for CY 2010 with final payment rates for CY 2011 using CY 2009 Medicare utilization for all years. To the extent that there are year-to-year changes in the volume and mix of services provided by physicians, the actual impact on total Medicare revenues will be different than those shown in Table 101. The payment impacts reflect averages for each specialty based on Medicare utilization. The payment impact for an individual physician would be different from the average, based on the mix of services the physician furnishes. The average change in total revenues would be less than the impact displayed here because physicians furnish services to both Medicare and non-Medicare patients and specialties may receive substantial Medicare revenues for services that are not paid under the PFS. For instance, independent laboratories receive approximately 85 percent of their Medicare revenues from clinical laboratory services that are not paid under the PFS.

Table 101 shows only the payment impact on PFS services. We note that these impacts do not include the effect of the December 2010 and January 2011 conversion factor changes under current law. The following is an explanation of the information represented in Table 101:

- *Column A (Specialty):* The Medicare specialty code as reflected in our physician/supplier enrollment files.
- *Column B (Allowed Charges):* The aggregate estimated PFS allowed charges for the specialty based on CY 2009 utilization and CY 2010 rates. That is, allowed charges are the PFS amounts for covered services and include coinsurance and deductibles (which are the financial responsibility of the beneficiary). These amounts have been summed across all services furnished by physicians, practitioners, and suppliers within a specialty to arrive at the total allowed charges for the specialty.
- *Column C (Impact of Work and Malpractice (MP) RVU Changes):* This column shows the estimated CY 2011 impact on total allowed charges of the changes in the work and malpractice RVUs, including the impact of changes due to new, revised, and potentially misvalued codes.
- *Column D (Impact of PE RVU and Multiple Procedure Payment Reduction Changes—Full):* This column shows the estimated CY 2011 impact on total allowed charges of the changes in the PE RVUs if there were no remaining transition to the full use of the new PPIS data. This column also includes the impact of the various MPPR and imaging equipment utilization polices, and the impact of changes due to new, revised, and potentially misvalued codes.
- *Column E (Impact of PE RVU and Multiple Procedure Payment Reduction Changes—Tran):* This column shows the estimated CY 2011 impact on total allowed charges of the changes in the PE RVUs under the second year of the 4-year transition to the full use of the new PPIS data. This column also includes the impact of the various MPPR and imaging equipment utilization policies, and the impact of changes due to new, revised, and potentially misvalued codes.
- *Column F (Impact of MEI Rebasing):* This column shows the estimated CY 2011 impact on total allowed charges of the CY 2011 rescaling of the RVUs so that the proportions of total payments based on the work, PE, and malpractice RVUs match the proportions in the final revised and rebased MEI for CY 2011.
- *Column G (Combined Impact—Full):* This column shows the estimated CY 2011 combined impact on total allowed charges of all the changes in the previous columns if there were no remaining transition to the new PE RVUs using the PPIS data.
- *Column H (Combined Impact—Tran):* This column shows the estimated CY 2011 combined impact on total allowed charges of all the changes in the previous columns under the second year of the 4-year transition to the new PE RVUs using the PPIS data.

BILLING CODE 4120–01–C

2. CY 2011 PFS Impact Discussion

a. Changes in RVUs

The most widespread specialty impacts of the RVU changes are generally related to several factors. First, as discussed in section II.A.2. of this final rule with comment period, we are currently implementing the second year of the 4-year transition to new PE RVUs using the new PPIS data that were adopted in the CY 2010 PFS final rule with comment period (74 FR 61751). The impacts of using the new PPIS data are generally consistent with the impacts discussed in the CY 2010 PFS final rule with comment period (74 FR 61983 through 61984).

The second general factor contributing to the CY 2011 impacts shown in Table 101 is the CY 2011 rescaling of the RVUs so that in the aggregate they match the work, PE, and malpractice proportions in the revised and rebased MEI for CY 2011. That is, as discussed in section II.E.5. of this final rule with comment period, the revised and rebased MEI has a greater proportion attributable to malpractice and PE and, correspondingly, a lesser proportion attributable to work. Specialties that have a high proportion of total RVUs attributable to work, such as anesthesiology, are estimated to experience a decrease in aggregate payments as a result of this rescaling, while specialties that have a high proportion attributable to PE, such as radiation oncology, are estimated to experience an increase in aggregate payments. Malpractice generally represents a small proportion of total payments and the rescaling of the malpractice RVUs is not the primary driver of the specialty impacts. As discussed in section II.E.7. of this final rule with comment period, the rescaling of the RVUs to match the rebased MEI is budget neutral overall.

Finally, another significant factor contributing to the impacts shown in Table 101 (but on a specialty-specific rather than widespread level) is the final policies regarding new, revised, and potentially revised codes resulting from our CY 2011 acceptance of 70 percent of the AMA RUC work RVU recommendations and the majority of the direct PE input recommendations. We have incorporated alternative RVUs and direct PE inputs for some codes in accordance with our recommended policies. We note that some specialties, such as radiation oncology, ophthalmology, and IDTFs that commonly furnish potentially misvalued codes that have been examined by the AMA RUC and newly

valued for CY 2011, experience decreases in aggregate payment as a result of these changes.

Table 101 also includes the impacts resulting from our regulatory change to expand the current 50 percent MPPR policy to therapy services, but at an MPPR rate of 25 percent on the PE component payment for therapy services. Under the PFS, we estimate that this change would primarily reduce payments to the specialties of physical therapy and occupational therapy. In order to maintain budget neutrality, we redistributed the PFS savings back into other services paid under the PFS by increasing all PE RVUs by approximately 0.5 percent.

Because providers in settings outside of the PFS, such as outpatient hospital departments, are also paid using the PFS payment rates and policies for physical therapy services, we estimated that this will reduce (not redistribute) payments in those settings for therapy services by approximately 7 percent in CY 2011.

In addition, Table 101 includes the impacts resulting from the regulatory change to the scope of the current contiguous body area MPPR policy for imaging services from contiguous body areas to include noncontiguous body areas. We estimate that this change would primarily reduce payments to the specialties of IDTF and radiology. In order to maintain budget neutrality, we redistributed these savings back into other services paid under the PFS by increasing all PE RVUs by approximately 0.1 percent.

Table 101 also reflects the impacts resulting from certain ACA provisions, including reductions in payment under section 3135 of the ACA which amends section 1848(b)(4) of the Act to increase the equipment utilization rate assumption for expensive diagnostic imaging equipment, and, effective July 1, 2010, to increase the level of the MPPR for contiguous body areas from 25 percent to 50 percent. The expansion of the MPPR policy is further discussed in section II.C.4. of this final rule with comment period, while the discussions of the provisions of section 3135 of the ACA are found in sections VI.M. and II.A.3.a. of this final rule with comment period. As required by sections 1848(c)(2)(B)(v)(V) and (VI) of the Act (as added by sections 3135(a) and (b) of the ACA), these changes are not budget neutral and result in program savings.

We note that in section XI.D of this final rule with comment period, we provide discussions of the budget impacts of individual ACA provisions not elsewhere discussed in this section. Additionally, while column H in Table 101 illustrates the estimated combined CY 2011 impact on total allowed charges by specialty of all the final RVU and MPPR changes and the MEI rebasing, including several ACA provisions that directly affect the determination of PFS payments as discussed previously, we note that other ACA provisions discussed in section XI.D. of this final rule with comment period could also result in additional impacts on individual practitioners or specialties, depending on their practice patterns. Since the effects of a number of the ACA provisions are dependent on the practice patterns of practitioners, we would expect these impacts to be non-uniform among specialties. For example, as discussed further in section XI.D.19 of this final rule with comment period, section 1833(x) of the Act (as added by section 5501(a) of the ACA) provides for a 10 percent incentive payment for primary care services furnished by primary care practitioners. Accordingly, potentially eligible primary care specialties designated under the statute (including family practice and geriatric medicine), are expected to experience an estimated aggregate increase in payment of between 4 and 9 percent, which includes the estimated impacts under the PFS displayed in column H of Table 101 and the new primary care incentive payments. We note that in general the payment impact for an individual physician may be different from the average, based on the mix of services the physician furnishes and his or her eligibility for the primary care incentive payment program.

b. Combined Impact

Column H of Table 101 displays the estimated CY 2011 combined impact on total allowed charges by specialty of all the final RVU and MPPR changes. These impacts range from an increase of 6 percent for portable x-ray suppliers to a decrease of 15 percent for diagnostic testing facilities. There is generally a slightly positive net effect of our final policies on primary care specialties, such as family practice, internal medicine, and geriatrics. Again, these impacts are estimated prior to the application of the negative CY 2011 CF update applicable under the current statute.

Comment: One commenter requested that the specialty impact table incorporate the impact of payment changes for other Medicare Part B services that are not paid under the PFS.

Response: The purpose of Table 101 is to isolate the impacts by specialty for services paid under the PFS. To the extent that changes in payment for other Part B services are adopted in this final rule with comment period and have significant impacts upon providers, those impacts are discussed elsewhere in this section.

Table 102 shows the estimated impact on total payments for selected high-volume procedures of all of the changes discussed previously, including the effect of the CY 2011 negative PFS CF update. We selected these procedures because they are the most commonly furnished by a broad spectrum of physician specialties. There are separate columns that show the change in the facility rates and the nonfacility rates. For an explanation of facility and nonfacility PE, we refer readers to Addendum A of this final rule with comment period.

[1] Payments based upon corrected CY 2010 conversion factor of $28.3868 under the statute as of October 30, 2009 that would be in effect on December 31, 2010 under current law.
[2]Payments based upon the CY 2011 conversion factor of $25.5217.
[3]New code for CY 2011. No CY 2010 payment rate is provided as the code did not exist in CY 2010. Prior coding has been completely revised for this service.

BILLING CODE 4120–01–C

B. Geographic Practice Cost Indices (GPCIs)

As discussed in section II.D. of this final rule with comment period, we are required to update the GPCI values at least every 3 years and phase in the adjustment over 2 years (if there has not been an adjustment in the past year). For CY 2011, we are finalizing new GPCIs for each Medicare locality. The updated GPCIs reflect the first year of the 2-year phase-in. The new GPCIs rely upon the 2010 HUD data for determining the relative cost differences in the office rent component of the PE GPCIs, as well as the 2006 through 2007 professional malpractice premium data for determining the malpractice GPCIs. The 2006 through 2008 Bureau of Labor and Statistics (BLS) Occupational Employment Statistics (OES) data were used as a replacement for 2000 Census data for determining the physician work GPCIs and the employee compensation component of the PE GPCIs. However, as discussed in section II.D. of this final rule with comment period, we are continuing to use the current cost share weights for determining the PE GPCI values and locality GAFs.

Additionally, the updated GPCIs reflect several provisions required by changes included in the ACA. Section 1848(e)(1)(H) of the Act (as added by section 3102(b) of the ACA) specifies that for CYs 2010 and 2011, the employee wage and rent portions of the PE GPCIs reflect only one-half of the relative cost differences for each locality compared to the national average and includes a "hold harmless" provision for any PFS locality that would receive a reduction to its PE GPCI resulting from the limited recognition of cost differences. Section 1848(e)(1)(E) of the Act (as amended by section 3102(a) of the ACA) extends the 1.000 work GPCI floor only through December 31, 2010. Therefore, the CY 2011 GPCIs reflect the sunset of the 1.000 work GPCI floor. Section 1848(e)(1)(G) of the Act (as amended by section 134(b) of the MIPPA) established a permanent 1.500 work GPCI floor in Alaska, beginning January 1, 2009 and, therefore, the 1.500 work GPCI floor in Alaska will remain in place for CY 2011. Moreover, section 1848(e)(1)(I) of the Act (as added by section 10324(c) of the ACA) establishes a 1.000 PE GPCI floor for services furnished in frontier states effective January 1, 2011. We estimate the combined impact of these provisions on a fiscal year cash basis to be $580 million for FY 2011.

As required by the statute, the updated GPCIs would be phased in over a 2-year period. Addendum D to this final rule with comment period shows the estimated effects of the revised GPCIs on locality GAFs for the transitional year (CY 2011) by State and Medicare locality. The GAFs reflect the use of updated underlying GPCI data and the ACA provisions. The GAFs are a weighted composite of each area's work, PE, and malpractice GPCIs using the national GPCI cost share weights. While we do not actually use the GAFs in computing the PFS payment for a specific service, they are useful in comparing the estimated overall costs and payments for different localities. The actual effect on payment for any specific service would deviate from the estimated payment based on the GAF to the extent that the proportions of work, PE, and malpractice expense RVUs for the specific service differ from those of the GAF. The most significant changes would occur in 12 payment localities, where the GAF increases or decreases by more than 2 percent. The cumulative effects of all of the GPCI revisions, including the updated underlying GPCI data and provisions of the ACA, are reflected in the CY 2012 GPCI values that are displayed in Addendum E to this final rule with comment period.

C. Rebasing and Revising of the MEI

As discussed in section II.E.5. of this final rule with comment period, we finalized the rebasing and revision of the MEI for the CY 2011 PFS. Using the new 2006 MEI weights in place of the 2000 weights and implementing the revisions to the MEI results in a slightly higher projected MEI increase for CY 2011 than would have been the case without the rebasing and revision of the MEI. The MEI update for CY 2011 is 0.4 percent under the 2006-based MEI, while the MEI update for CY 2011 would have been 0.3 percent under the 2000-based MEI. After CY 2011, the 2006-based MEI updates are forecasted to be either the same or slightly lower (0.1 to 0.2 percentage point) than the forecasted 2000-based MEI updates.

D. The Affordable Care Act Provisions

1. Section 3002: Improvements to the Physician Quality Reporting System

For the impact of this provision see section XI.E.6. of this final rule with comment period.

2. Sections 3003 and 3007: Improvements to the Physician Feedback Program and Value-Based Payment Under the Physician Fee Schedule

As discussed in section VI.B. of this final rule with comment period, these provisions: (1) continue the confidential feedback program and requires the Secretary, beginning in 2012, to provide reports that compare patterns of resource use of individual physicians to other physicians; and (2) require the Secretary to apply a separate, budget-neutral, value-based payment modifier to the payment calculation for PFS services furnished by certain practitioners beginning in CY 2015. There is no budgetary impact associated with these provisions for CY 2011.

3. Section 3102: Extension of the Work Geographic Index Floor and Revisions to the Practice Expense Geographic Adjustment under the Medicare Physician Fee Schedule, and Protections for Frontier States as Amended by Section 10324

For the impact of this provision see section XI.B. of this final rule with comment period.

4. Section 3103: Extension of Exceptions Process for Medicare Therapy Caps

This provision extends the exceptions process for therapy caps through December 31, 2010. Therapy caps are discussed in detail in section III.A.1. of this final rule with comment period. We estimate the impact on a fiscal year cash basis to be $1.16 billion for FY 2011.

5. Section 3104: Extension of Payment for Technical Component of Certain Physician Pathology Services

As discussed in section VI.E. of this final rule with comment period, this provision continues payment to independent laboratories for the TC of physician pathology services for fee-for-service Medicare beneficiaries who are inpatients or outpatients of a covered hospital through CY 2010. We estimate the impact on a fiscal year cash basis to be $80 million for FY 2011.

6. Sections 3105 and 10311: Extension of Ambulance Add-Ons

As discussed in section VI.F. of this final rule with comment period, these provisions require the extension of certain add-on payments for ground ambulance services, and the extension of certain rural area designations for purposes of air ambulance payment. As further discussed in section VI.F. of this final rule with comment period, we are amending the Medicare program regulations to conform the regulations to these provisions of the ACA. These statutory provisions are essentially prescriptive and do not allow for discretionary alternatives on the part of the Secretary.

As discussed in the July 1, 2004 interim final rule (69 FR 40288), in

determining the super-rural bonus amount under section 1834(l)(12) of Act, we followed the statutory guidance of using the data from the Comptroller General (GAO) of the U.S. We obtained the same data as the data that were used in the GAO's September 2003 Report titled "Ambulance Services: Medicare Payments Can Be Better Targeted to Trips in Less Densely Populated Rural Areas" (GAO report number GAO–03–986) and used the same general methodology in a regression analysis as was used in that report. The result was that the average cost per trip in the lowest quartile of rural county populations was 22.6 percent higher than the average cost per trip in the highest quartile. As required by section 1834(l)(12) of the Act, this percent increase is applied to the base rate for ground ambulance transports that originate in qualified rural areas, which were identified using the methodology set forth in the statute. Payments for ambulance services under Medicare are determined by the point of pick-up (by zip code area) where the beneficiary is loaded on board the ambulance. We determined that ground ambulance transports originating in 7,842 zip code areas (which were determined to be in "qualified rural areas") out of 42,879 zip code areas, according to the July 2010 zip code file, will realize increased base rate payments under this provision. However, the number and level of services that might occur in these areas for CY 2011 is unknown at this time. While many elements may factor into the final impact of sections 3105(a) through (c) and 10311(a) through (c) of the ACA, we estimate the impact of all these provisions to be $10 million for FY 2011.

7. Section 3107: Extension of Physician Fee Schedule Mental Health Add-On

As discussed in section VI.G. of this final rule with comment period, this provision extends application of the five percent increase in Medicare payment for specified mental health services only through CY 2010. We estimate the impact on a fiscal year cash basis to be $20 million for FY 2011.

8. Section 3108: Permitting Physician Assistants to Order Post-Hospital Extended Care Services

As discussed in section VI.H. of this final rule with comment period, this provision adds PAs to the list of practitioners (that is, physicians, nurse practitioners (NPs), and clinical nurse specialists) that can perform the required initial certification and periodic recertifications under section 1814(a)(2)(B) of the Act with respect to the SNF level of care. There is no budgetary impact associated with this provision.

9. Section 3111: Payment for Bone Density Tests

As discussed in section VI.I. of this final rule with comment period, this provision requires payment for dual-energy x-ray absorptiometry (DXA) services furnished during CYs 2010 and 2011 at 70 percent of the Medicare rate paid in CY 2006, with the applicable geographic adjustment for CY 2011. We estimate the impact on a fiscal year cash basis to be $60 million for FY 2011.

10. Section 3114: Improved Access for Certified Nurse-Midwife Services

As discussed in section VI.J. of this final rule with comment period, this provision increased the amount of Medicare payment made under the PFS for certified nurse-midwife (CNM) services. There is no significant budgetary impact associated with this provision.

11. Section 3122: Extension of Medicare Reasonable Costs Payments for Certain Clinical Diagnostic Laboratory Tests Furnished to Hospital Patients in Certain Rural Areas

As discussed in section VI.K. of this final rule with comment period, this provision reinstitutes reasonable cost payment for clinical diagnostic laboratory tests performed by hospitals with fewer than 50 beds that are located in qualified rural areas as part of their outpatient services for cost reporting periods beginning on or after July 1, 2010 through June 30, 2011. For some hospitals with cost reports that begin as late as June 30, 2011, this reinstitution of reasonable cost payment could affect services performed as late as June 29, 2012, because this is the date those cost reports will close.

12. Section 3134: Misvalued Codes Under the PFS

As discussed in section II.C. of this final rule with comment period, section 1848 (c)(2)(K) of the Act (as added by section 3134 of the ACA) requires the Secretary to periodically review and identify potentially misvalued codes and make appropriate adjustments to the relative values of those services identified as being potentially misvalued. The impacts of our CY 2011 policy changes under this provision are included in the discussion of RVU impacts in section XI.A. of this final rule and summarized by specialty in Table Q1 of this final rule with comment period.

13. Section 3135: Modification of Equipment Utilization Factor for Advanced Imaging Services

As discussed in section VI.M. of this final rule with comment period, for services furnished on or after July 1, 2010, section 1848(b)(4)(D) of the Act (as added by section 3135(b) of the ACA) adjusts the technical component MPPR for multiple imaging studies provided in a single imaging session on contiguous body parts within families of codes from 25 percent to 50 percent as of July 1, 2010. For services furnished on or after January 1, 2011, section 1848(b)(4)(C) of the Act (as added by section 3135(a) of the ACA) increases the equipment utilization rate to 75 percent for expensive diagnostic imaging equipment, changing the CY 2011 utilization rate adopted in the CY 2010 PFS final rule with comment period to the 75 percent rate. We estimate the impact on a fiscal year cash basis to be savings to the Medicare program of $160 million for FY 2011.

14. Section 3136: Revisions in Payments for Power Wheelchairs

As discussed in section VI.N. of this final rule with comment period, this provision requires the Secretary to revise the capped rental fee schedule amounts for all power wheelchairs effective for power wheelchairs furnished on or after January 1, 2011. Under the monthly capped rental payment structure, the fee schedule will pay 15 percent (instead of 10 percent) of the purchase price for the first 3 months and 6 percent (instead of 7.5 percent) for the remaining rental months not to exceed 13 months. In addition, the lump sum (up front) purchase payment will be eliminated for standard power-driven wheelchairs. For complex rehabilitative power-driven wheelchairs, the provision permits payment to be made on a lump sum purchase method or a monthly rental method. These changes are prescriptive in the statute and do not allow for alternatives.

We expect the changes mandated by section 3136 of the ACA as a whole to achieve program savings as a result of total payments per standard power wheelchair being less than 100 percent of the purchase fee schedule amount. This decrease in expenditures is expected for two reasons. Primarily, the provision will eliminate the lump sum payment method for standard power-driven wheelchairs and instead payment will be made under the monthly rental method resulting in lower aggregate payments because many beneficiaries who use standard power wheelchairs do not use them for as long

as 13 months. In addition, we note that currently a significantly lower volume of power-driven wheelchairs are paid under the monthly payment method. The payment impact of increasing monthly rental payments in the initial 3 months will be offset both by the savings achieved from eliminating the lump sum payment method for standard power-driven wheelchairs and by decreasing payments for the remaining months of rental from 7.5 percent to 6 percent of the purchase price for all power-driven wheelchairs. We compared the estimates of current payments for power-driven wheelchairs to estimates of payments resulting from the changes required by section 3136 of the ACA which showed an estimated payment impact of a decrease in expenditures of approximately $780 million over a 5-year period. The FY 2011 cash savings was $120 million.

15. Section 3139: Payment for Biosimilar Biological Products

In Section VI.O. of this rule we discussed the provisions of the ACA that establish the definition of biosimilar, and reference biological product as well as the payment methodology for these products under Section 1847A of the Act. We noted that while these provisions are effective July 1, 2010, per statute, we do not expect to make payment for biosimilar products until after such products are approved by the FDA. We do not expect this provision to have any impact on spending.

16. Section 3401: Revisions of Certain Market Basket Updates and Incorporation of Productivity Adjustments

As discussed in section VI.P. of this final rule with comment period, section 3401 of the ACA amends section 1881(b)(14)(F) of the Act so that in CY 2011, there is a full ESRD market basket update to the composite rate component of the blended payment amount under the new ESRD PPS. This provision is estimated to be a cost to the Medicare program of $40 million (does not include coinsurance).

Section 3401 of the ACA also incorporates a productivity adjustment into the update factors for certain payment systems. Specifically, section 3401 requires that in CY 2011 (and in subsequent years), update factors under the ASC payment system, the AFS, the CLFS, and the DMEPOS fee schedules be adjusted by the productivity adjustment. We estimate the impact to be savings to the Medicare program of $20 million, $30 million, $50 million, and $60 million for the ASC payment system, the AFS, the CLFS, and the DMEPOS fee schedules respectively, for FY 2011.

17. Section 4103: Medicare Coverage of Annual Wellness Visit Providing a Personalized Prevention Plan

As discussed in section VI.Q. of this final rule with comment period, for services furnished on or after January 1, 2011, section 1861(s)(2)(FF) of the Act (as added by section 4103 of the ACA) provides Medicare coverage, with no coinsurance or deductible, for an annual wellness visit. The annual wellness visit entails the creation of a personalized prevention plan for an individual that ultimately will include a health risk assessment and also includes other elements, such as updating the family history, identifying providers that regularly provide medical care to the individual, body mass index measurement, development of a screening service schedule, and identification of risk factors. We estimate the impact on a fiscal year cash basis to be $110 million for FY 2011.

18. Section 4104: Removal of Barriers to Preventive Services in Medicare

As discussed in section VI.R. of this final rule with comment period, for services furnished on or after January 1, 2011, sections 1833(a)(1) and 1833(b) of the Act (as amended by section 4104 of the ACA) waive the deductible and coinsurance requirements for most preventive services, and waive the deductible for colorectal cancer screening tests that are reported with other codes. Services to which no coinsurance or deductible would be applied are the annual wellness visit, the initial preventive physical examination, and any covered preventive service if it is recommended with a grade of A or B by the United States Preventive Services Task Force. We estimate that this new benefit will result in an increase in Medicare payments. We estimate the impact on a fiscal year cash basis to be $110 million for FY 2011.

19. Section 5501: Expanding Access to Primary Care Services and General Surgery Services

As discussed in section VI.S. of this final rule with comment period, for services furnished on or after January 1, 2011 and before January 1, 2016, sections 1833(x) and (y) of the Act (as added by section 5501 of the ACA) provides for a 10 percent incentive payment applied to primary care services furnished by primary care practitioners, as well as a 10 percent incentive payment for major surgical procedures furnished by general surgeons practicing in geographic health professional shortage areas. Under the final CY 2011 policies, we estimate the impact on a fiscal year cash basis to be $240 million for section 1833(x) of the Act and $10 million for section 1833(y) of the Act for FY 2011.

20. Section 6003: Disclosure Requirements for In-office Ancillary Services Exception to the Prohibition of Physician Self-referral for Certain Imaging Services

In section VI.T of this final rule with comment period, we discuss our revisions to § 411.355(b)(2) to include a new disclosure requirement created by section 6003 of the ACA and related to the in-office ancillary services exception to the physician self-referral prohibition. We are finalizing this provision with some modification, including reducing the number of required suppliers on the disclosure from 10 to 5 and removing the requirement that a record of the signed disclosure notification be maintained as a part of the patient's medical record. Physicians are now able to document the disclosure without the patient's signature.

Comment: Two commenters disagreed with the estimated impact in the proposed rule related to section 6003 of the ACA. The commenter noted that requiring physicians to list 10 suppliers is excessive and places an unnecessary administrative burden on the referring physicians. The commenters also expressed concern that it will take longer to create and maintain the disclosure notice than we proposed. The commenters did not provide alternative values for calculating the impact of this provision.

Response: We have addressed the commenters' concerns regarding the administrative burden related to this new disclosure requirement in the final rule by reducing the number of suppliers that must be listed from 10 to 5. In addition, we have removed the requirement that the disclosure notice be signed by the patient and a copy of this maintained in the medical record. We believe that our previous economic estimates are appropriate taking into account the public comments received in response to the estimated values included in the proposed rule and the changes that have been finalized in this rule.

We believe that the provisions in section VI.T. of this final rule with comment period will have a minor economic impact on the affected physicians who self-refer for advanced imaging services under the in-office

ancillary services exception. We did not receive any public comments addressing the estimated number of physicians impacted by this provision. The burden associated for these physicians remains de minimis as we have reduced the number of suppliers to be listed and have reduced the requirements for effective disclosure by eliminating the patient signature maintained as part of the medical record. We still believe physicians will incur a one-time cost associated with developing the disclosure notice.

21. Section 6404: Maximum Period for Submission of Medicare Claims Reduced to Not More Than 12 Months

As discussed in section VI.U. of this final rule with comment period, section 6404 of the ACA reduces the maximum time period for filing Medicare claims to no more than 12 months after the date of service. Under the new law, claims for services furnished on or after January 1, 2010, must be filed within 1 calendar year after the date of service. In addition, section 6404 of the ACA provides that claims for services furnished before January 1, 2010, must be filed no later than December 31, 2010. Section 6404 of the ACA also permits the Secretary to make certain exceptions to the 1-year filing deadline. This final rule with comment period would create three new exceptions to the 1-year filing deadline.

The budgetary impact related to this provision is significant as future payment of claims for services incurred will now be made at an earlier date, relative to the 12-month submission expiration. This is reflected by the Part A and Part B payment amounts of $60 and $50 million for FY 2011. However, for purposes of the RIA, the economic impact of this provision is non-economically significant, as to the interest lost on money now required to pay claims prior to the 12-month submission expiration is minimal.

Providers and suppliers have established billing practices for the submission of claims for payment to the Medicare program. Although this final rule with comment period would require providers and suppliers to submit Medicare FFS claims within 12 months from the date of service, we believe providers and suppliers would easily revise their billing practices on a one-time basis, and suffer no economic impact. In fact, analysis of Medicare claims data shows that more than 99 percent of Part A and Part B claims are filed in 12 months or less. Lastly, providers, suppliers, or the small number of beneficiaries that occasionally submit claims may benefit from the availability of the three new exceptions to the timely filing rule. However, we believe the impact on program costs would be negligible.

We did not receive any comments on the RIA for this provision.

22. Section 6410 of Patient Accountability and Affordable Care Act and Section 154 of MIPPA: Adjustments to the Metropolitan Statistical Areas (MSA) for Medicare Durable Medical Equipment, Prosthetics, Orthotics, and Supplies Competitive Acquisition Program

For the impact of this provision see section XI.E.7.c. of this final rule with comment period.

23. Section 10501(i)(3): Collection of HCPCS Data for the Development and Implementation of a Prospective Payment System for the Medicare FQHC Program

As discussed in section VI.W. of this final rule with comment period, section 10501(i)(3) of the ACA establishes a process by which we will collect claims level data, using HCPCS codes, from FQHCs. This data will be used to determine the time, scope, and intensity of services provided by FQHCs in anticipation of the establishment of a prospective payment system to be implemented beginning in 2014. We further noted that the proposed new data collection effort would be for informational and data gathering purposes only, and would not be utilized to determine Medicare payment to the FQHC. Because this provision does not affect payment to FQHCs, there is no impact.

E. Other Provisions of the Final Rule

1. Part B Drug Payment: ASP Issues

Application of our policies for "Carry Over ASP" and "Partial Quarter ASP Data," as discussed in section VII.A. of this final rule with comment period, are dependent on the status and quality of quarterly manufacturer data submissions, so we cannot quantify associated savings.

Furthermore, we do not expect that our policy for determining the payment amount for drugs and biologicals that include intentional overfill, as discussed in section VII.A of this final rule with comment period, will impact payments made by the Medicare program.

Finally, as discussed in section VII.A of this final rule with comment period, we are not finalizing our price substitution policy at this time and as a result there is no impact to the program as no changes to policy are being made.

2. Ambulance Fee Schedule: Policy for Reporting Units When Billing for Ambulance Fractional Mileage

As discussed in section VII.B. of this final rule with comment period, we are implementing fractional mileage billing for all providers and suppliers of ambulance services. Effective for dates of service on and after January 1, 2011, ambulance providers and suppliers (except for providers eligible to bill on the Form UB–04) will be required to report mileage rounded up to the nearest tenth of a mile, rather than the nearest whole mile, on all claims for mileage totaling up to 100 covered miles, and we will pay based on that amount. Implementation of the fractional mileage billing policy will be delayed until August 1, 2011 for ambulance providers submitting claims on the Form UB–04, unless updates to allow billing fractional units on the Form UB–04 are not completed by July 2011. In that case, implementation of the fractional mileage billing policy is delayed for ambulance providers eligible to bill on the Form UB–04 until January 1, 2012.

By requiring that providers and suppliers round up to the nearest tenth of a mile rather than the nearest whole mile, providers and suppliers will be submitting claims for anywhere between 0.1 and 0.9 of a mile less per claim and Medicare will pay based on that amount. In our analysis (using 2008 claim data) for the proposed rule, we indicated that Medicare could potentially save at least $45 million per year in payments for base mileage billed by suppliers, and perhaps as much as $80 million per year when considering other types of ambulance mileage payments such as those for rural mileage and those made to institutional providers. Further analysis has revealed that, once adjusted for other factors such as premium offsets and MA savings, the potential annual savings totals approximately $30 million for supplier-billed base mileage alone. We continue to anticipate that the total savings will likely increase when considering other ambulance mileage payments such as for rural mileage, institutional provider payments, etc. However, we were not able to further analyze the potential additional savings using available data. Although implementation of the fractional mileage billing policy for institutional providers billing on paper claims is delayed in the final rule with comment period, the volume of institutional paper billers is insignificant—less than 1 percent of all institutional billers submits claims on the Form UB–04—and therefore, will

not significantly impact any potential savings.

3. Chiropractic Services Demonstration

As discussed in section VII.D. of this final rule with comment period, we are continuing the recoupment of the $50 million in expenditures from this demonstration in order to satisfy the budget neutrality requirement in section 651(f)(1)(b) of the MMA. We initiated this recoupment in CY 2010 and this will be the second year. As discussed in the CY 2010 PFS final rule with comment period, we finalized a policy to recoup $10 million each year through adjustments to the PFS for all chiropractors in CYs 2010 through 2014. To implement this required budget neutrality adjustment, we are recouping $10 million in CY 2011 by reducing the payment amount under the PFS for the chiropractic CPT codes (that is, CPT codes 98940, 98941, and 98942) by approximately 2 percent.

4. Renal Dialysis Services Furnished by ESRD Facilities

The ESRD related provisions are discussed in sections VI.P.1. and VII.E. of this final rule with comment period. To understand the impact of the changes affecting payments to different categories of ESRD facilities, it is necessary to compare estimated payments under the current year (CY 2010 payments) to estimated payments under the revisions to the composite rate payment system (CY 2011 payments) as discussed in section VII.E. of this final rule with comment period. To estimate the impact among various classes of ESRD facilities, it is imperative that the estimates of current payments and estimates of proposed payments contain similar inputs. Therefore, we simulated payments only for those ESRD facilities for which we are able to calculate both current CY 2010 payments and proposed CY 2011 payments.

Also, as explained in the ESRD PPS final rule (74 FR 49162 through 49164), section 1881(b)(14)(E)(i) of the Act requires a 4-year transition (phase-in) from the current composite payment system to the ESRD PPS, and section 1881(b)(14)(E)(ii) allows ESRD facilities to make a one-time election to be excluded from the transition. As of January 1, 2011, ESRD facilities that elect to go through the transition would be paid a blended amount that will consist of 75 percent of the basic case-mix adjusted composite payment system and the remaining 25 percent would be based on the ESRD PPS payment. Therefore, these final rates listed in the impact table (Table Q3) reflect only the composite rate portion of the blended payment amounts for facilities going through the first year of the 4-year transition under the new ESRD PPS.

ESRD providers were grouped into the categories based on characteristics provided in the Online Survey and Certification and Reporting (OSCAR) file and the most recent cost report data from the Healthcare Cost Report Information System (HCRIS). We also used the June 2010 update of CY 2009 National Claims History file as a basis for Medicare dialysis treatments and separately billable drugs and biologicals. Since the December 2009 update of the CY 2009 National Claims History File is incomplete, we updated the data. The description of the updates for the separately billable drugs is described in section VII.E. of this final rule with comment period. To update the treatment counts we used the ratio of the June 2009 to the December 2008 updates of the CY 2008 National Claims History File figure for treatments. This was an increase of 12.4 percent. Due to data limitations, we are unable to estimate current and proposed payments for 32 of the 5431 ESRD facilities that bill for ESRD dialysis treatments.

Table 103 shows the impact of this year's changes to CY 2011 payments to hospital-based and independent ESRD facilities. The first column of Table 103 identifies the type of ESRD provider, the second column indicates the number of ESRD facilities for each type, and the third column indicates the number of dialysis treatments. The fourth column shows the effect of all changes to the ESRD wage index for CY 2011 as it affects the composite rate payments to ESRD facilities. The fourth column compares aggregate ESRD wage-adjusted composite rate payments in CY 2011 to aggregate ESRD wage-adjusted composite rate payments in CY 2010. In CY 2010, ESRD facilities receive 100 percent of the CBSA wage-adjusted composite rate. The overall effect to all ESRD providers in aggregate is zero because the CY 2011 ESRD wage index has been multiplied by a budget neutrality adjustment factor to comply with the statutory requirement that any wage index revisions be done in a manner that results in the same aggregate amount of expenditures as would have been made without any changes in the wage index. The fifth column shows the effect of changes to the ESRD wage index in CY 2011 and the effect of section 3401(h) of the ACA, which amends section 1881(b)(14)(F) of the Act to revise the ESRD market basket increase factor. Effective January 1, 2011, there is a full ESRD bundled market basket update to the composite rate component of the blended payment amount under the payment system. We apply an ESRD market basket increase factor of 2.5 percent for those facilities electing to go through the ESRD PPS transition. The sixth column shows the overall effect of the changes in composite rate payments to ESRD providers, including the drug add-on. The overall effect is measured as the difference between the CY 2011 payment with all changes in this rule and current CY 2010 payment. This payment amount is computed by multiplying the wage-adjusted composite rate with the drug add-on for each provider times the number of dialysis treatments from the CY 2009 claims. The CY 2011 payment is the composite rate for each provider (with the 14.7 percent drug add-on) times dialysis treatments from CY 2009 claims. The CY 2010 current payment is the composite rate for each provider (with the current 15.0 percent drug add-on) times dialysis treatments from CY 2009 claims.

The overall impact to ESRD providers in aggregate is 2.2 percent as shown in Table 103. Most ESRD facilities will see an increase in payments as a result of the ACA provision. While section 3401(h) of the ACA modifies the ESRD bundled market basket, which we will be a 2.5 percent increase to the ESRD composite rate portion of the blended payment amount, this 2.5 percent increase does not apply to the drug add-on to the composite rate. For this reason, the impact of all changes in this final rule with comment period is a 2.2 percent increase for all ESRD providers. Overall, payments to ineligible professional independent ESRD facilities will increase by 2.2 percent and payments to hospital-based ESRD facilities will increase by 2.1 percent.

TABLE 103—IMPACT OF CY 2011 CHANGES IN PAYMENTS TO HOSPITAL-BASED AND INDEPENDENT ESRD FACILITIES

[Percent change in composite rate payments to ESRD facilities]

1	2	3	4	5	6
	Number of facilities	Number of dialysis treatments (in millions)	Effect of changes in wage index [1] (percent)	Effect of changes in wage index and of afford-able Care Act provision [2] (percent)	Overall effect of wage index affordable Care Act & Drug Add-on [3] (percent)
All Providers:	5,399	38.6	0.0	2.5	2.2
Independent	4,821	34.9	0.0	2.5	2.2
Hospital Based	578	3.7	−0.1	2.4	2.1
By Facility Size:					
Less than 5000 treatments	2105	5.9	0.1	2.5	2.3
5000 to 9999 treatments	2,049	14.8	0.1	2.6	2.3
Greater than 9999 treatments	1,245	17.9	−0.1	2.4	2.2
Type of Ownership:

Mountain	323	1.8	0.2	2.7	2.4
Pacific	619	5.0	0.1	2.6	2.4
Puerto Rico & Virgin Islands	39	0.4	−2.4	0.0	−0.2

Notes: Payments have been adjusted to reflect budget neutrality.
2010 includes the MIPPA 1% increase and site neutral rates.
2010 & 2011 are 100 percent new CBSA wage adjusted composite rate.

[1] This column shows the overall effect of wage index changes on ESRD providers. Composite rate payments are computed using the final CY 2011 wage indexes which are compared to composite rate payments using the current CY 2010 wage indexes.

[2] This column shows the effect of the changes in the Wage Indexes and the ACA provision which includes an ESRD Bundled Market Basket (2.5 percent) increase to the composite rate. This provision is effective January 1, 2011.

[3] This column shows the percent change between CY 2011 and CY 2010 composite rate payments to ESRD facilities. The CY 2011 payments include the CY 2011 wage adjusted composite rate, a 2.5% increase due to the ACA, effective January 1, 2011, and the drug add-on of 14.7%. The CY 2010 payments include the CY 2010 wage adjusted composite rate, a 1% increase and site neutral rates effective January 1, 2009 and the drug add-on of 15.0%. This column shows the effect of wage index, ACA, and drug add-on changes. While the ACA provision includes a 2.5% increase to the composite rate, this increase does not apply to the drug add-on to the composite rate. For this reason, the impact of all changes in this final rule with comment period is a 2.2% increase for all ESRD providers.

5. Section 131(b) of the MIPPA: Physician Payment, Efficiency, and Quality Improvements—Physician Quality Reporting System

As discussed in section VII.F.1 of this final rule with comment period, we are finalizing several different reporting options for eligible professionals who wish to participate in the 2011 Physician Quality Reporting System. Although there may be some cost incurred in the Physician Quality Reporting System and their associated code sets, and for expanding an existing clinical data warehouse to accommodate registry-based reporting and EHR-based reporting for the Physician Quality Reporting System, we do not anticipate a significant cost impact on the Medicare program.

Participation in the CY 2011 Physician Quality Reporting System by individual eligible professionals is voluntary and individual eligible professionals and group practices may have different processes for integrating the Physician Quality Reporting System into their practice's work flows. Given this variability and the multiple reporting options that we provide, it is difficult to accurately estimate the impact of the Physician Quality Reporting System on providers. Furthermore, we believe that costs for eligible professionals who are participating in the Physician Quality Reporting System for the first time in 2011 will be considerably higher than the cost for eligible professionals who participated in Physician Quality Reporting System in prior years. In addition, for many eligible professionals, the cost of participating in the Physician Quality Reporting System is offset by the incentive payment received.

With respect to the potential incentive payment that will be made for the 2011 Physician Quality Reporting System, we estimate this amount to be approximately $100 million. This estimate is derived from looking at our 2008 incentive payment of more than $95 million and then accounting for the fact that the 2008 incentive payment was 1.5 percent of an eligible professional's total estimated Medicare Part B PFS allowed charges for all covered professional services furnished during the 2008 reporting period. For 2011, the incentive payment is 1.0 percent of an eligible professional's total estimated Medicare Part B PFS allowed charges for all covered professional services furnished during the 2011 reporting period. Although we expect

that the lower incentive payment amount for 2011 would reduce the total outlay by approximately one-third, we also expect more eligible professionals to participate in the 2011 Physician Quality Reporting System as there are more methods of data submission and additional alternative reporting periods and that some eligible professionals would qualify for the additional 0.5 percent incentive authorized under section 1848(m)(7) of the Act ("Additional Incentive Payment").

One factor that influences the cost to individual eligible professionals is the time and effort associated with individual eligible professionals identifying applicable Physician Quality Reporting System quality measures and reviewing and selecting a reporting option. This burden will vary with each individual eligible professional by the number of applicable measures, the eligible professional's familiarity, and understanding of the Physician Quality Reporting System I, experience with Physician Quality Reporting System participation, and the method(s) selected by the eligible professional for reporting of the measures, and incorporating the reporting of the measures into the office work flows. Information obtained from the Physician Voluntary Reporting Program (PVRP), which was a predecessor to the Physician Quality Reporting System and was the first step for the reporting of physician quality of care through certain quality metrics, indicated an average labor cost per practice of approximately $50 per hour. To account for salary increases over time, we will use an average practice labor cost of $58 per hour for our estimates, based on an assumption of an average annual increase of approximately 3 percent. Therefore, assuming that it takes an individual eligible professional approximately 5 hours to review the PQRI quality measures, review the various reporting options, select the most appropriate reporting option, identify the applicable measures for which they can report the necessary information, and incorporate reporting of the selected measures into their office work flows, we estimate that the cost to eligible professionals associated with preparing to report Physician Quality Reporting System quality measures would be approximately $290 per individual eligible professional ($58 per hour × 5 hours).

Another factor that influences the cost to individual eligible professionals is how they choose to report the Physician Quality Reporting System measures (that is, whether they select the claims-based, registry-based or EHR-based reporting mechanism). For claims-based reporting, estimates from the PVRP indicate the time needed to perform all the steps necessary to report quality data codes (QDCs) for 1 measure on a claim ranges from 15 seconds (0.25 minutes) to 12 minutes for complicated cases or measures. In previous years, when we required reporting on 80 percent of eligible cases for claims-based reporting, we found that on average, the median number of reporting instances for each of the PQRI measures was 9. Since we reduced the required reporting rate by over one-third to 50 percent, then for purposes of this impact analysis we will assume that an eligible professional will need to report each selected measure for 6 reporting instances, or 6 cases. Assuming that an eligible professional, on average, will report 3 measures and that an eligible professional reports on an average of 6 reporting instances per measure, we estimate that the cost to an individual eligible professional associated with claims-based reporting of Physician Quality Reporting System measures would range from approximately $4.35 (0.25 minutes per reporting instance × 6 reporting instances per measure × 3 measures × $58 per hour) to $208.80 (12 minutes per reporting instance × 6 reporting instances per measure × 3 measures × $58 per hour). If an eligible professional satisfactorily reports, these costs will more than likely be negated by the incentive earned. For the 2007 PQRI, which had a 1.5 percent incentive for a 6-month reporting period, the mean incentive amount was close to $700 for an individual eligible professional and the median incentive payment amount was over $300.

For registry-based reporting, individual eligible professionals must generally incur a cost to submit data to registries. Estimated fees for using a qualified registry range from no charge, or a nominal charge, for an individual eligible professional to use a registry to several thousand dollars, with a majority of registries charging fees ranging from $500 to $1,000. However, our impact analysis is limited to the incremental costs associated with Physician Quality Reporting System reporting, which we believe are minimal. Many eligible professionals who select registry-based reporting were already utilizing the registry for other purposes and would not need to report additional data to the registry specifically for Physician Quality Reporting System. The registries also often provide the eligible professional services above and beyond what is required for Physician Quality Reporting System.

For EHR-based reporting, an individual eligible professional generally will incur a cost associated with purchasing an EHR product. Although we do not believe that the majority of eligible professionals would purchase an EHR solely for the purpose of participating in Physician Quality Reporting System, cost estimates for EHR adoption by eligible professionals from the EHR Incentive Program final rule (75 FR 44549) show that an individual eligible professional who chooses to do so would have to spend anywhere from $25,000 to $54,000 to purchase and implement an EHR and up to $18,000 annually for ongoing maintenance.

Although we believe that the majority of eligible professionals attempting to qualify for the additional 0.5 percent incentive payment authorized by section 1848(m)(7) of the Act would be those who are already required by their Boards to participate in a Maintenance of Certification Program, individual eligible professionals who wish to qualify for the additional 0.5 percent incentive payment and are not currently participating in a Maintenance of Certification Program would also have to incur a cost for participating in a Maintenance of Certification Program. The manner in which fees are charged for participating in a Maintenance of Certification Program vary by specialty. Some Boards charge a single fee for participation in the full cycle of Maintenance of Certification Program. Such fees appear to range anywhere from over $1,100 to nearly $1,800 per cycle. Some Boards have annual fees that are paid by their diplomates. On average, ABMS diplomates pay approximately $200.00 per year for participating in Maintenance of Certification Program. Some Boards have an additional fee for the Maintenance of Certification Program Part III secure examination, but most Boards do not have additional charges for participation in the Part IV practice/quality improvement activities.

With respect to the process for group practices to be treated as satisfactorily submitting quality measures data for the CY 2011 Physician Quality Reporting System discussed in section VII.F.1 of this final rule with comment period, group practices interested in participating in the CY 2011 Physician Quality Reporting System through the group practice reporting option (GPRO) I or GPRO II may also incur a cost. However, for groups that satisfactorily report for 2011 Physician Quality Reporting System, we believe these

costs would be completely offset by the incentive payment earned since the group practice would be eligible for an incentive payment equal to 1 percent of the entire group's total estimated Medicare Part B PFS allowed charges for covered professional services furnished during the reporting period.

One factor in the cost to group practices would be the costs associated with the self-nomination process. Similar to our estimates for staff involved with the claims-based reporting option for individual eligible professionals, we also estimate that the group practice staff involved in the group practice self-nomination process has an average labor cost of $58 per hour. Therefore, assuming 2 hours for a group practice to decide whether to participate individually or as a group and 4 hours for the self-nomination process, we estimate the total cost to a group practice associated with the group practice self-nomination process to be approximately $348 ($58 per hour × 6 hours per group practice).

For groups participating under the GPRO I process, another factor in the cost to the group would be the time and effort associated with the group practice completing and submitting the proposed data collection tool. The information collection components of this data collection tool have been reviewed by OMB and are currently approved under OMB control number 0938–0941, with an expiration date of December 31, 2011. Based on the Physician Group Practice (PGP) demonstration's estimate that it takes approximately 79 hours for a group practice to complete the data collection tool, which uses the same data submission methods as those we have finalized, we estimate the cost associated with a physician group completing the data collection tool would be approximately $4,582 ($58 per hour × 79 hours per group practice).

For group practices participating under the GPRO II process, the costs associated with submitting the Physician Quality Reporting System quality measures data will be the time associated with the group practice submitting the required data to CMS via claims or, if applicable, a registry. The costs for a group practice reporting to a registry is similar to the costs associated with registry reporting for an individual eligible professional, as the process is the same with the exception that more patients and more measures must be reported in GPRO II compared to an individual eligible professional. For similar reasons, the costs for a group practice reporting via claims should also be similar to the costs associated with claims-based reporting for an individual eligible professional. Overall, there is significantly less burden associated with a group practice participating in Physician Quality Reporting System via GPRO II than doing so as individual eligible professionals. Participation in GPRO II requires the group practice as a whole to report a fewer number of measures on a fewer number of people since eligible professionals within a group who share patients will not be required to separately report measures for those shared patients. Therefore, assuming that an average group practice will spend 20 hours for data submission, we estimate the cost of data submission under GPRO II would be approximately $1,160 (20 hours for data submission × $58 per hour). Smaller groups may need less time for data submission as they would be required to report fewer measures and presumably have a smaller patient population while larger groups may need more time for data submission since they would be required to report more measures and presumably have a larger patient population.

In addition to costs incurred by eligible professionals and group practices, registries and EHR vendors may also incur some costs related to the Physician Quality Reporting System. Registries interested in becoming "qualified" to submit on behalf of individual eligible professionals would also have to incur a cost associated with the vetting process and with calculating quality measures results from the data submitted to the registry by its participants and submitting the quality measures results and numerator and denominator data on quality measures to CMS on behalf of their participants. We estimate the registry self-nomination process will cost approximately $500 per registry ($50 per hour × 10 hours per registry). This cost estimate includes the cost of submitting the self-nomination letter to CMS and completing the CMS vetting process. Our estimate of $50 per hour average labor cost for registries is based on the assumption that registry staff include IT professionals whose average hourly rates range from $36 to $84 per hour depending on experience, with an average rate of nearly $50 per hour for a mid-level programmer. Because we are finalizing new requirements for 2011, the 2010 qualified registries will incur similar costs associated with the self-nomination process. We do not believe that there are any additional costs for registries associated with a registry calculating quality measures results from the data submitted to the registry by its participants and submitting the quality measures results and numerator and denominator data on quality measures to CMS on behalf of their participants. We believe that the majority of registries already perform these functions for their participants.

An EHR vendor interested in having its product(s) be used by individual eligible professionals to submit Physician Quality Reporting System measures to CMS for 2012 will have to complete a vetting process during 2011 and program its EHR product(s) to extract the clinical data that the eligible professional needs to submit to CMS for purposes of reporting 2012 quality measures in 2013 as well. We specified that previously qualified vendors will need to only update their electronic measure specifications and data transmission schema during 2011 to incorporate any new EHR measures to maintain their qualification for the 2012 Physician Quality Reporting System. Therefore, for EHR vendors that were not previously qualified, the cost associated with completing the self-nomination process, including the vetting process with CMS officials, is estimated to be $500 ($50 per hour × 10 hours per EHR vendor). Our estimate of a $50 per hour average labor cost for EHR vendors is based on the assumption that vendor staff include IT professionals whose average hourly rates range from $36 to $84 per hour depending on experience, with an average rate of nearly $50 per hour for a mid-level programmer. We believe that the cost associated with the time and effort needed for an EHR vendor to review the quality measures and other information and program the EHR product to enable individual eligible professionals to submit Physician Quality Reporting System quality measures data to the CMS-designated clinical warehouse will be dependent on the EHR vendor's familiarity with the Physician Quality Reporting System, the vendor's system's capabilities, as well as the vendor's programming capabilities. Some vendors already have the necessary capabilities and for such vendors, we estimate the total cost to be approximately $2,000 ($50 per hour × 40 hours per vendor). However, given the variability in the capabilities of the vendors, we believe an estimate for those vendors with minimal experience would be approximately $10,000 per vendor ($50 per hour × 200 hours per EHR vendor).

6. Section 132 of the MIPPA: Incentives for Electronic Prescribing (eRx)—The eRx Incentive Program

Section VII.F.2. of this final rule with comment period describes the 2011

Electronic Prescribing (eRx) Incentive Program. To be considered a successful electronic prescriber in CY 2011, an individual eligible professional will need to meet the requirements described in section VII.F.2. of this final rule with comment period.

We estimate that the cost impact of the eRx Incentive Program on the Medicare program would be the cost incurred for maintaining the electronic prescribing measure and its associated code set, and for maintaining the existing clinical data warehouse to accommodate registry-based reporting and EHR-based reporting for the electronic prescribing measure. However, we do not believe that this provision has a significant cost impact on the Medicare program since much of this infrastructure has already been established for the Physician Quality Reporting System program.

Individual eligible professionals and group practices may have different processes for integrating the eRx Incentive Program into their practices' work flows. Given this variability and the multiple reporting options that we provide, it is difficult to accurately estimate the impact of the eRx Incentive Program on providers. Furthermore, we believe that costs for eligible professionals who are participating in the eRx Incentive Program for the first time in 2011 will be considerably higher than the cost for eligible professionals who participated in the eRx Incentive Program in prior years. In addition, for many eligible professionals (especially those who participated in the eRx Incentive Program in prior years), the cost of participating in the eRx Incentive Program for 2011 will be offset by the incentive payment received. As a result of the payment adjustment that begins in 2012, the cost of not participating in the eRx Incentive Program for 2011 could be higher than the cost of participating in the form of reduced Medicare payments.

For the 2009 eRx Incentive Program, approximately $148 million in total incentives were paid to eligible professionals with a median incentive amount of about $1,600. We estimate that the total incentive payments for the 2011 eRx Incentive Program (which will be paid in 2012) will be similar. We anticipate that despite a decrease in the incentive payment amount from 2 percent in 2010 to 1 percent of total estimated Medicare Part B allowed charges for covered professional services in 2011, more eligible professionals (and groups) will choose to participate in the 2011 eRx Incentive Program to avoid a prospective 1 percent payment penalty in 2012 for not demonstrating that they are successful electronic prescribers. Any eligible professional who wishes to participate in the eRx Incentive Program must have a qualified electronic prescribing system in order to participate. Therefore, a one-time potential cost to some individual eligible professionals would be the cost of purchasing and using an eRx system, which varies by the commercial software package selected, the level at which the professional currently employs information technology in his or her practice and the training needed. One study indicated that a midrange complete electronic medical record with electronic prescribing functionality costs $2,500 per license with an annual fee of $90 per license for quarterly updates of the drug database after setup costs while standalone prescribing, messaging, and problem list system may cost $1,200 per physician per year after setup costs. Hardware costs and setup fees substantially add to the final cost of any software package. (Corley, S.T. (2003). "Electronic prescribing: A review of costs and benefits." Topics in Health Information Management 24(1):29–38.). These are the estimates that we intend to use for our impact analysis.

Similar to the Physician Quality Reporting System, one factor in the cost to individual eligible professionals is the time and effort associated with individual eligible professionals reviewing the electronic prescribing measure to determine whether it is applicable to them, reviewing the available reporting options and selecting one, gathering the required information, and incorporating reporting of the measure into their office work flows. Since the eRx Incentive Program consists of only 1 quality measure, we estimate 2 hours as the amount of time needed for individual eligible professionals to prepare for participation in the eRx Incentive Program. Information obtained from the PVRP, which was a predecessor to the Physician Quality Reporting System and was the first step for the reporting of physician quality of care through certain quality metrics, indicated an average labor cost per practice of approximately $50 per hour. To account for salary increases over time, we will use an average practice labor cost of $58 per hour for our estimates, based on an assumption of an average annual increase of approximately 3 percent. At an average cost of approximately $58 per hour, we estimate the total preparation costs to individual eligible professionals to be approximately $116 ($58 per hour × 2 hours).

Another factor that influences the cost to individual eligible professionals is how they choose to report the electronic prescribing measure (that is, whether they select the claims-based, registry-based or EHR-based reporting mechanism). For claims-based reporting, there would be a cost associated with reporting the appropriate QDC on the claims an individual eligible professional submits for payment. Based on the information from the PVRP described above for the amount of time it takes a median practice to report one measure one time (1.75 minutes) and the requirement to report 25 electronic prescribing events during 2011, we estimate the annual estimated cost per individual eligible professional to report the electronic prescribing measure via claims-submission to be $42.29 (1.75 minutes per case × 1 measure × 25 cases per measure × $58 per hour). We believe that for most successful electronic prescribers who earn an incentive, these costs would be negated by the incentive payment received given that the median incentive for eligible professionals who qualified for a 2009 eRx incentive was around $1,600.

For eligible professionals who select the registry-based reporting mechanism, we do not anticipate any additional cost for individual eligible professionals to report data to a registry, as individual eligible professionals opting for registry-based reporting are more than likely already reporting data to the registry. Little, if any, additional data would need to be reported to the registry for purposes of participation in the CY 2011 eRx Incentive Program. Individual eligible professionals using registries for Physician Quality Reporting System will likely experience minimal, if any, increased costs charged by the registry to report this 1 additional measure.

For EHR-based reporting, the eligible professional must extract the necessary clinical data from his or her EHR, and submit the necessary data to the CMS-designated clinical data warehouse. Once the EHR is programmed by the vendor to allow data submission to CMS, the cost to the individual eligible professional associated with the time and effort to submit data on the electronic prescribing measure should be minimal.

With respect to the process for group practices to be treated as successful electronic prescribers under the CY 2011 eRx Incentive Program discussed in section VII.F.2 of this final rule with comment period, group practices have the same option as individual eligible professionals in terms of the form and manner for reporting the eRx measure (that is, group practices have the option of reporting the measure through claims,

a qualified registry, or a qualified EHR product). There are only 2 differences between the requirements for an individual eligible professional and a group practice: (1) The fact that a group practice would have to self-nominate; and (2) the number of times a group practice would be required to report the eRx measure. Overall, there could be less cost associated with a practice participating in the eRx Incentive Program as a group rather than the individual members of the group separately participating. We do not believe that there are any additional costs associated with the group practice self-nomination process since we are limiting the group practices to those selected to participate in the 2011 Physician Quality Reporting System GPRO I or Physician Quality Reporting System GPRO II. The practices only will need to indicate their desire to participate in the eRx GPRO at the time they self-nominate for either Physician Quality Reporting System GPRO I or Physician Quality Reporting System GPRO II.

The costs for a group practice reporting to an EHR or registry should be similar to the costs associated with registry and EHR reporting for an individual eligible professional, as the process is the same with the exception that more electronic prescribing events must be reported by the group. For similar reasons, the costs for a group practice reporting via claims should also be similar to the costs associated with claims-based reporting for an individual eligible professional. Therefore, we estimate that the costs for group practices who are selected to participate in the CY 2011 eRx Incentive Program as a group would range from $126.88 (1.75 minutes per case × 1 measure × 75 cases per measure × $58 per hour) for the smallest groups participating under GPRO II to $4,229.17 (1.75 minutes per case × 2,500 cases per measure × $58 per hour) for the groups participating under GPRO I.

We believe that the costs to individual eligible professionals and group practices associated with avoiding the eRx payment adjustment that goes into effect in 2012 would be similar to the costs of an eligible professional or group practice reporting the electronic prescribing measure for purposes of the 2011 eRx incentive. Specifically, we believe that the cost of reporting the eRx measure in one instance for purposes of the payment adjustment is identical to the cost of reporting the eRx measure for one instance on claims for purposes of the incentive payment. The only difference would be in the total costs for an individual eligible professional. Group practices are required to report the eRx measure for the same number of eRx events for both the 2011 incentive and the 2012 payment adjustment. Individual eligible professionals, however, are required to report the eRx measure only for 10 eRx events for purposes of the 2012 payment adjustment as opposed to 25 eRx events for purposes of the 2011 incentive.

Based on our decision to consider only registries qualified to submit quality measures results and numerator and denominator data on quality measures to CMS on their participants' behalf for the 2011 Physician Quality Reporting System to be qualified to submit results and numerator and denominator data on the eRx measure for the CY 2011 eRx Incentive Program, we do not estimate any cost to the registry associated with becoming a registry qualified to submit the eRx measure for CY 2011.

The cost for the registry would be the time and effort associated with the registry calculating results for the eRx measure from the data submitted to the registry by its participants and submitting the quality measures results and numerator and denominator data on the eRx quality measure to CMS on behalf of their participants. We believe such costs will be minimal as registries would already be required to perform these activities for the Physician Quality Reporting System.

Likewise, based on our decision to consider only EHR products qualified for the CY 2011 Physician Quality Reporting System to be qualified to submit results and numerator and denominator data on the electronic prescribing measure for the CY 2011 eRx Incentive Program, there would be no need for EHR vendors to undergo a separate self-nomination process for the eRx Incentive Program. Therefore, there will be no additional cost associated with the self-nomination process.

The cost to the EHR vendor associated with the EHR-based reporting requirements of this reporting initiative is the time and effort associated with the EHR vendor programming its EHR product(s) to extract the clinical data that the individual eligible professional needs to submit to CMS for reporting the CY 2011 eRx measure. Since we determined that only EHR products qualified for the 2011 Physician Quality Reporting System will be qualified for the CY 2011 eRx Incentive Program, and the eRx Incentive Program consists of only one measure, we believe that any burden associated with the EHR vendor to program its product(s) to enable individual eligible professionals to submit data on the eRx measure to the CMS-designated clinical data warehouse will be minimal.

7. Durable Medical Equipment-Related Issues

a. Off-the-Shelf (OTS) Orthotics Exemption

In section VII.G. of this final rule with comment period, we are expanding the exemptions from the CBP for certain OTS orthotics to physicians, other practitioners (as defined by the Secretary), or by hospitals if furnished to their own patients as part of their professional service.

The exemption is a self-implementing mandate required by section 154(d) of MIPPA, which added section 1847(a)(7) of the Act. Section 1847(a)(7)(A) of the Act expanded the exemptions from the CBP for certain OTS orthotics to physicians, other practitioners (as defined by the Secretary), or hospitals if furnished to their own patients as part of their professional service. Section 1847(a)(7)(B) of the Act, as added by section 154(d) of MIPPA, also expanded the exemption from CBP for certain DME items (crutches, canes, walkers, folding manual wheelchairs, blood glucose monitors, and infusion pumps) when furnished by hospitals to the hospital's own patients during an admission or on the date of discharge.

We believe this exemption will have a negligible impact on physicians, other practitioners, and hospitals. The exemption allows physicians, other practitioners, and hospitals to continue to provide these items to their own patients without submitting a bid and becoming a contract supplier. This exemption also allows continued access to these items for beneficiaries when these items are furnished by physicians, other practitioners, and hospitals to their own patients.

b. Changes to Payment for Oxygen Equipment

We are not finalizing our proposal pertaining to oxygen and oxygen equipment; and therefore, the impact analysis associated with this proposal is not being finalized.

c. Diabetic Testing Supplies

We are establishing requirements for conducting a national competition for furnishing diabetic testing supplies on a mail order basis. Specifically this final rule with comment period will establish 3 requirements: A new definition for what constitutes mail order; a rule that requires contract suppliers to provide at a minimum 50 percent of all of the different types of diabetic testing products on the market by brand and model name; and a prohibition against

influencing and incentivizing beneficiaries to switch their brand of monitor and testing supplies.

Currently, based on claims data from FY 2009, over 62 percent of beneficiaries receive their replacement diabetic testing supplies from mail order suppliers. The new mail order definition will not impact these beneficiaries because they can continue to obtain their items through mail order. The remaining 38 percent of beneficiaries may continue to obtain these items from a local pharmacy. We do not expect this rule to have any adverse effects on beneficiaries because the new definition of mail order item is reflective of the way that beneficiaries currently get their diabetic testing supplies. However, we believe that by clarifying this definition, we will protect beneficiaries from paying higher co-payment amounts and we anticipate program savings that would have been eroded by suppliers circumventing our definition to continue to provide items, even if not awarded a contract under competitive bidding and to obtain the higher fee schedule payment amount. This definition is also consistent with the way that suppliers currently do business by either providing items through mail order or at a local storefront. For these reasons we believe this new definition will have minimal impact.

Also, we considered the option to not bifurcate bidding based on delivery method and to bid for diabetic testing supplies regardless of how the items were obtained. We rejected this approach because it would force companies with different business models to compete against each other, by requiring local pharmacies to compete with national mail order suppliers in order to win a contract to be able to furnish diabetic testing supplies.

In order to implement a national mail order competition for diabetic supplies, we are also implementing the special "50 percent rule" mandated by MIPPA. This final rule with comment period requires a bidder to demonstrate that its bid covers types of diabetic testing strip products that, in the aggregate and taking into account volume for the different products, cover 50 percent (or such higher percentage as the Secretary may specify) of all such types of products. The 50 percent threshold would ensure that beneficiaries have access to mail order delivery of the top-selling diabetic test strip products from every contract supplier. We plan to use the information that bidding suppliers provide on their bidding Form B where suppliers list the products they plan to furnish. We believe this requirement will have a minimal impact on suppliers because most suppliers currently provide a wide range of the brands and models in order to gain market share. The statute states that suppliers are required to carry at least 50 percent of all brands on the market. However, the Secretary can establish suppliers to carry a higher percentage of brands. We have adopted the 50 percent criteria because we believe this is reflective of what suppliers are currently doing and ensures appropriate access for beneficiaries.

In addition to the 50 percent rule we are establishing an anti-switching requirement. This provision would prevent contract suppliers from influencing or incentivizing beneficiaries by persuading, pressuring, or advising them to switch from their current brand to a brand provided by the supplier. We believe this requirement will protect the beneficiary and physician choice of glucose monitoring systems. The decision concerning the type of monitor and testing supplies that a beneficiary chooses should not be made by the supplier but rather by the beneficiary and their physician. We believe that this provision will have a minimal impact on suppliers because suppliers currently offer a variety of products and generally do not require beneficiaries to switch from the brands they are familiar with and customarily use.

d. Metropolitan Statistical Areas

In section VII.V. of this final rule with comment period, we implement section 6410 of the ACA regarding adjustments to the DMEPOS CBP. We believe that the provisions pertaining to subdividing metropolitan statistical areas (MSAs) with populations of at least 8,000,000 for the purpose of establishing competitive bidding areas (CBAs) under Round 2 of the DMEPOS CBP will have a positive impact on most suppliers, particularly small suppliers. The authority provided by section 1847(a)(1)(D)(ii)(II) of the Act will be used to create CBAs that are smaller than the highly and densely populated MSAs of: Chicago-Naperville-Joliet, IL–IN–WI; Los Angeles-Long Beach-Santa Ana, CA; and New York-Northern New Jersey-Long Island, NY–NJ–PA. This results in more manageable service areas for suppliers to navigate when furnishing items. More importantly, it ensures more timely delivery of items and services to beneficiaries located throughout each of the MSAs. It also benefits small suppliers because they will have smaller geographic areas to cover as contract suppliers than the large MSAs, which in some cases, might prevent them from being considered for participation under the program. The larger suppliers will still have the opportunity to bid in all of the CBAs within each MSA. We expect that subdividing the large MSAs of Chicago, Los Angeles, and New York would not have a negative impact on program savings, as long as each CBA is large enough to be attractive to suppliers for bidding purposes.

Table 104 considers FY cash impact on the entire Medicare program, including Medicare Advantage for FYs 2011 thru 2015, of the provisions of this final rule with comment period related to the establishment of CBAs during Round 2 and prior to calendar year 2015. The FY–CY distinction is an important one when comparing savings. For example, the savings for the DMEPOS CBP will be for 9 months of FY 2013, but for 12 months of CY 2013. Table 104 considers the impact on program expenditures, and does not include beneficiary coinsurance. Finally, the estimates in Table 104 incorporate spillover effects from the competitive acquisition program onto the Medicare Advantage program. The expectation is that the 21 additional MSAs added to the DMEPOS CBP would lower prices for DME products in FFS and would lead to lower prices in the Medicare Advantage market. The table below considers FY cash impact of the above provisions on the entire Medicare program, including Medicare Advantage for the FY.

TABLE 104—IMPACT OF ADDING 21 MSAS TO ROUND 2 OF THE MEDICARE DMEPOS COMPETITIVE BIDDING PROGRAM

FY	Cost (in $ millions)
2011	0
2012	0
2013	−40
2014	−70
2015	−110

Subdividing the large MSAs of Chicago, Los Angeles, and New York is considered to have little to no fiscal impact. The exceptions to the DMEPOS CBP involving rural areas, MSAs with populations less than 250,000, and low population density areas in selected MSAs before 2015 are considered to have little to no impact because the baseline never considered these areas as subject to competitive bidding prices.

8. Air Ambulance

In section VII.H. of this final rule with comment period, we present our provision regarding air ambulance and provider and supplier enrollment. We note that this provision is an administrative initiative that may result in Medicare program savings but at this time those savings are inestimable. We believe the probable costs providers or suppliers will incur as a result of this rule to be negligible.

F. Alternatives Considered

This final rule with comment period contains a range of policies, including some provisions related to specific MIPPA and ACA provisions. The preceding preamble provides descriptions of the statutory provisions that are addressed, identifies those policies when discretion has been exercised, presents rationale for our final policies and, where relevant, alternatives that were considered.

G. Impact on Beneficiaries

There are a number of changes in this final rule with comment period that would have an effect on beneficiaries. In general, we believe that many of the proposed changes, including the refinements of the PQRI with its focus on measuring, submitting, and analyzing quality data, the expansion of the list of Medicare-approved telehealth services, the incentive payments for primary care services furnished by primary care practitioners in any location and major surgical procedures furnished by general surgeons in HPSAs, the waiver of beneficiary cost-sharing for most preventive services, and the annual wellness visit provisions, will have a positive impact and improve the quality and value of care provided to Medicare beneficiaries.

The regulatory provisions may affect beneficiary liability in some cases. For example, the waiver of the deductible and coinsurance for the annual wellness visit, the IPPE, and preventive services with a grade of A or B from the USPSTF would reduce beneficiary liability for these services. Most changes in aggregate beneficiary liability due to a particular provision would be a function of the coinsurance (20 percent if applicable for the particular provision after the beneficiary has met the deductible). To illustrate this point, as shown in Table 102, the CY 2010 national payment amount in the nonfacility setting for CPT code 99203 (Office/outpatient visit, new) is $76.93 which means that in CY 2010 a beneficiary would be responsible for 20 percent of this amount, or $15.39. Based on this final rule with comment period, the CY 2011 national payment amount in the nonfacility setting for CPT code 99203, as shown in Table 102, is $77.59, which means that, in CY 2011, the beneficiary coinsurance for this service would be $15.52

Additionally, beneficiary liability would also be impacted by the effect of the aggregate cost (savings) of the provisions on the standard calculation of the Medicare Part B premium rate (generally 25 percent of the provision's cost or savings).

Most policies discussed in this final rule with comment period that impact payment rates, such as the expansion of the MPPR to therapy services and the increased discount on the TC of multiple imaging procedures from 25 percent to 50 percent, would similarly impact beneficiaries' coinsurance.

H. Accounting Statement

As required by OMB Circular A–4 (available at *http://www.whitehouse.gov/omb/circulars/a004/a-4.pdf*), in Table 105, we have prepared an accounting statement showing the estimated expenditures associated with this final rule with comment period. This estimate includes the estimated FY 2011 cash benefit impact associated with certain ACA and MIPPA provisions, and the CY 2011 incurred benefit impact associated with the estimated CY 2011 PFS conversion factor update based on the Mid-Session Review of the FY 2011 President's Budget baseline.

TABLE 105—ACCOUNTING STATEMENT: CLASSIFICATION OF ESTIMATED EXPENDITURES

Category	Transfers
CY 2011 Annualized Monetized Transfers.	Estimated decrease in expenditures of $17.6 billion for PFS conversion factor update.
From Whom To Whom?	Federal Government to physicians, other practitioners and providers and suppliers who receive payment under Medicare.
FY 2011 Annualized Monetized Transfers.	Estimated increase in expenditures of $1.97 billion for Affordable Care Act provisions.
From Whom To Whom?	Federal Government to providers.

In accordance with the provisions of Executive Order 12866, this final rule with comment period was reviewed by the Office of Management and Budget.

List of Subjects

42 CFR Part 405

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Medical devices, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 409

Health facilities, Medicare.

42 CFR Part 410

Health facilities, Health professions, Kidney diseases, Laboratories, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

42 CFR Part 411

Kidney diseases, Medicare, Physician Referral, Reporting and recordkeeping requirements.

42 CFR Part 413

Health facilities, Kidney diseases, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 414

Administrative practice and procedure, Health facilities, Health professions, Kidney diseases, Medicare, Reporting and recordkeeping.

42 CFR Part 415

Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

42 CFR Part 424

Emergency medical services, Health facilities, Health professions, Medicare, Reporting and recordkeeping requirements.

■ For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services amends 42 CFR chapter IV as set forth below:

PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

■ 1. The authority for part 405 continues to read as follows:

Authority: Secs. 1102, 1861, 1862(a), 1871, 1874, 1881, and 1886(k) of the Social Security Act (42 U.S.C. 1302, 1395x, 1395y(a), 1395hh, 1395kk, 1395rr and 1395ww(k)), and sec. 353 of the Public Health Service Act (42 U.S.C. 263a).

Subpart X—Rural Health Clinic and Federally Qualified Health Center Services

■ 2. A new § 405.2449 is added to read as follows

§ 405.2449 Preventive services.

For services furnished on or after January 1, 2011, preventive services covered under the Medicare Federally qualified health center benefit are those preventive services defined in section 1861(ddd)(3) of the Act, and § 410.2 of this chapter. Specifically, these include the following:

(a) The specific services currently listed in section 1861(ww)(2) of the Act, with the explicit exclusion of electrocardiograms.

(b) The Initial Preventive Physical Examination (IPPE) (as specified by section 1861(ww)(1) of the Act as added by section 611 of the Medicare Prescription Drug, Improvement and Modernization Act of 2003 (Pub. L. 108–173) and § 410.16 of this chapter); and

(c) The Personalized Prevention Plan Services (PPPS), also known as the "Annual Wellness Visit" (as specified by section 1861(hhh) of the Act as added by section 4103 of the Affordable Care Act (Pub. L. 111–148) and § 410.15 of this chapter).

■ 3. Section 405.2470 is amended by adding a new paragraph (d) to read as follows:

§ 405.2470 Reports and maintenance of records.

* * * * *

(d) *Collection of additional claims data.* Beginning January 1, 2011, a Medicare FQHC must report on its Medicare claims such information as the Secretary determines is needed to develop and implement a prospective payment system for FQHCs including, but not limited to all pertinent HCPCS (Healthcare Common Procedure Coding System) code(s) corresponding to the service(s) provided for each Medicare FQHC visit (as defined in § 405.2463).

PART 409—HOSPITAL INSURANCE BENEFITS

■ 4. The authority citation for part 409 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

Subpart B—Inpatient Hospital Services and Inpatient Critical Access Hospital Services

§ 409.17 [Amended]

■ 5. Amend § 409.17(d) by removing the phrase "hospital policies and procedures." and adding in its place the phrase "the provider's policies and procedures.".

Subpart C—Posthospital SNF Care

■ 6. Section 409.20 is amended by revising paragraph (a)(3) to read as follows:

§ 409.20 Coverage of services.

(a) * * *

(3) Physical therapy, occupational therapy, and speech-language pathology services.

* * * * *

■ 7. Section 409.23 is revised to read as follows:

§ 409.23 Physical therapy, occupational therapy, and speech-language pathology services.

Medicare pays for physical therapy, occupational therapy, or speech-language pathology services as posthospital SNF care if they are furnished—

(a) By (or under arrangements made by) the facility and billed by (or through) the facility;

(b) By qualified physical therapists, physical therapist assistants, occupational therapists, occupational therapy assistants, or speech-language pathologists as defined in part 484 of this chapter; and

(c) In accordance with a plan that meets the requirements of § 409.17(b) through (d) of this part.

PART 410—SUPPLEMENTARY MEDICAL INSURANCE (SMI) BENEFITS

■ 8. The authority citation for part 410 continues to read as follows:

Authority: Secs. 1102, 1834, 1871, and 1893 of the Social Security Act (42 U.S.C. 1302, 1395m, 1395hh, and 1395ddd).

Subpart A—General Provisions

■ 9. Section 410.2 is amended by adding the definition of "Preventive services" in alphabetical order to read as follows:

§ 410.2 Definitions.

* * * * *

Preventive services means all of the following:

(1) The specific services listed in section 1861(ww)(2) of the Act, with the explicit exclusion of electrocardiograms;

(2) The Initial Preventive Physical Examination (IPPE) (as specified by section 1861(ww)(1) of the Act); and

(3) Annual Wellness Visit (AWV), providing Personalized Prevention Plan Services (PPPS) (as specified by section 1861(hhh)(1) of the Act).

§ 410.3 [Amended]

■ 10. Amend § 410.3(b)(2) by removing the reference "subpart E" and adding in its place the reference "subpart I."

Subpart B—Medical and Other Health Services

■ 11. Section 410.15 is added to read as follows:

§ 410.15 Annual wellness visits providing Personalized Prevention Plan Services: Conditions for and limitations on coverage.

(a) *Definitions.* For purposes of this section—

Detection of any cognitive impairment means assessment of an individual's cognitive function by direct observation, with due consideration of information obtained by way of patient report, concerns raised by family members, friends, caretakers or others.

Eligible beneficiary means an individual who is no longer within 12 months after the effective date of his or her first Medicare Part B coverage period and who has not received either an initial preventive physical examination or an annual wellness visit providing a personalized prevention plan within the past 12 months.

Establishment of, or an update to the individual's medical and family history means, at minimum, the collection and documentation of the following:

(i) Past medical and surgical history, including experiences with illnesses, hospital stays, operations, allergies, injuries and treatments.

(ii) Use or exposure to medications and supplements, including calcium and vitamins.

(iii) Medical events in the beneficiary's parents and any siblings and children, including diseases that may be hereditary or place the individual at increased risk.

First annual wellness visit providing personalized prevention plan services means the following services furnished to an eligible beneficiary by a health professional as those terms are defined in this section:

(i) Establishment of an individual's medical and family history.

(ii) Establishment of a list of current providers and suppliers that are regularly involved in providing medical care to the individual.

(iii) Measurement of an individual's height, weight, body-mass index (or waist circumference, if appropriate), blood pressure, and other routine measurements as deemed appropriate, based on the beneficiary's medical and family history.

(iv) Detection of any cognitive impairment that the individual may have, as that term is defined in this section.

(v) Review of the individual's potential (risk factors) for depression, including current or past experiences with depression or other mood disorders, based on the use of an appropriate screening instrument for persons without a current diagnosis of depression, which the health professional may select from various available standardized screening tests designed for this purpose and recognized by national medical professional organizations.

(vi) Review of the individual's functional ability and level of safety, based on direct observation or the use of appropriate screening questions or a screening questionnaire, which the health professional as defined in this section may select from various available screening questions or standardized questionnaires designed for this purpose and recognized by national professional medical organizations.

(vii) Establishment of the following:

(A) A written screening schedule for the individual such as a checklist for the next 5 to 10 years, as appropriate, based on recommendations of the United States Preventive Services Task Force and the Advisory Committee on Immunization Practices, and the individual's health status, screening history, and age-appropriate preventive services covered by Medicare.

(B) A list of risk factors and conditions for which primary, secondary or tertiary interventions are recommended or are underway for the individual, including any mental health conditions or any such risk factors or conditions that have been identified through an initial preventive physical examination (as described under § 410.16 of this subpart), and a list of treatment options and their associated risks and benefits.

(viii) Furnishing of personalized health advice to the individual and a referral, as appropriate, to health education or preventive counseling services or programs aimed at reducing identified risk factors and improving self management, or community-based lifestyle interventions to reduce health risks and promote self-management and wellness, including weight loss, physical activity, smoking cessation, fall prevention, and nutrition.

(ix) Voluntary advance care planning (as defined in this section) upon agreement with the individual.

(x) Any other element determined appropriate through the national coverage determination process.

Health professional means—

(i) A physician who is a doctor of medicine or osteopathy (as defined in section 1861(r)(1) of the Act); or

(ii) A physician assistant, nurse practitioner, or clinical nurse specialist (as defined in section 1861(aa)(5) of the Act); or

(iii) A medical professional (including a health educator, a registered dietitian, or nutrition professional, or other licensed practitioner) or a team of such medical professionals, working under the direct supervision (as defined in § 410.32(b)(3)(ii)) of a physician as defined in paragraph (i) of this definition.

Review of the individual's functional ability and level of safety means, at minimum, assessment of the following topics:

(i) Hearing impairment.

(ii) Ability to successfully perform activities of daily living.

(iii) Fall risk.

(iv) Home safety.

Subsequent annual wellness visit providing personalized prevention plan services means the following services furnished to an eligible beneficiary by a health professional as those terms are defined in this section:

(i) An update of the individual's medical and family history.

(ii) An update of the list of current providers and suppliers that are regularly involved in providing medical care to the individual as that list was developed for the first annual wellness visit providing personalized prevention plan services.

(iii) Measurement of an individual's weight (or waist circumference), blood pressure and other routine measurements as deemed appropriate, based on the individual's medical and family history.

(iv) Detection of any cognitive impairment that the individual may have, as that term is defined in this section.

(v) An update to the following:

(A) The written screening schedule for the individual as that schedule is defined in paragraph (a) of this section for the first annual wellness visit providing personalized prevention plan services.

(B) The list of risk factors and conditions for which primary, secondary or tertiary interventions are recommended or are underway for the individual as that list was developed at the first annual wellness visit providing personalized prevention plan services.

(vi) Furnishing of personalized health advice to the individual and a referral, as appropriate, to health education or preventive counseling services or programs as that advice and related services are defined in paragraph (a) of this section.

(vii) Voluntary advance care planning (as defined in paragraph (a) of this section) upon agreement with the individual.

(viii) Any other element determined appropriate through the national coverage determination process.

Voluntary advance care planning means, for purposes of this section, verbal or written information regarding the following areas:

(i) An individual's ability to prepare an advance directive in the case where an injury or illness causes the individual to be unable to make health care decisions.

(ii) Whether or not the physician is willing to follow the individual's wishes as expressed in an advance directive.

(b) *Conditions for coverage of annual wellness visits providing personalized prevention plan services.* Medicare Part B pays for first and subsequent annual wellness visits providing personalized prevention plan services that are furnished to an eligible beneficiary, as described in this section, if they are furnished by a health professional, as defined in this section.

(c) *Limitations on coverage of an annual wellness visit providing personalized prevention plan services.* Payment may not be made for either a first or a subsequent annual wellness visit providing personalized prevention plan services that is performed for an individual who is—

(1) Not an eligible beneficiary as described in this section.

(2) An eligible beneficiary as described in this section and who has had either an initial preventive physical examination as specified in § 410.16 of this subpart or either a first or a subsequent annual wellness visit providing personalized prevention plan services performed within the past 12 months.

(d) *Effective date.* Coverage for an annual wellness visit providing personalized prevention plan services is

effective for services furnished on or after January 1, 2011.

■ 12. Section 410.32 is amended by adding paragraph (b)(2)(vii) to read as follows:

§ 410.32 Diagnostic x-ray tests, diagnostic laboratory tests, and other diagnostic tests: Conditions.

* * * * *

(b) * * *

(2) * * *

(vii) Diagnostic tests performed by a certified nurse-midwife authorized to perform the tests under applicable State laws.

* * * * *

■ 13. Section 410.64 is amended by revising paragraph (a) introductory text to read as follows:

§ 410.64 Additional Preventive Services

(a) Medicare Part B pays for additional preventive services not described in paragraph (1) or (3) of the definition of "preventive services" under § 410.2, that identify medical conditions or risk factors for individuals if the Secretary determines through the national coverage determination process (as defined in section 1869(f)(1)(B) of the Act) that these services are all of the following:

* * * * *

■ 14. Section 410.78 is amended by revising paragraph (b) introductory text to read as follows:

§ 410.78 Telehealth services.

* * * * *

(b) *General rule.* Medicare Part B pays for office or other outpatient visits, subsequent hospital care services (with the limitation of one telehealth visit every 3 days), subsequent nursing facility care services (not including the Federally-mandated periodic visits under § 483.40(c) and with the limitation of one telehealth visit every 30 days), professional consultations, psychiatric diagnostic interview examination, neurobehavioral status exam, individual psychotherapy, pharmacologic management, end-stage renal disease-related services included in the monthly capitation payment (except for one "hands on" visit per month to examine the access site), individual and group medical nutrition therapy services, individual and group kidney disease education services, individual and group diabetes self-management (DSMT) training services (except for one hour of in-person services to be furnished in the year following the initial DSMT service to ensure effective injection training), and individual and group health and behavior assessment and intervention services furnished by an interactive telecommunications system if the following conditions are met:

* * * * *

Subpart I—Payment for SMI Benefits

■ 15. Section 410.150 is amended by adding paragraph (b)(20) to read as follows:

§ 410.150 To whom payment is made.

* * * * *

(b) * * *

(20) To a certified nurse-midwife for professional services furnished by the certified nurse-midwife in all settings and for services and supplies furnished incident to those services. Payment is made only if no facility or other provider charges or is paid any amount for the furnishing of the professional services of the certified nurse-midwife.

■ 16. Section 410.152 is amended by revising paragraph (l) to read as follows:

§ 410.152 Amount of payment.

* * * * *

(l) *Amount of payment: Preventive services.* Medicare Part B pays 100 percent of the Medicare payment amount established under the applicable payment methodology for the service setting for providers and suppliers for the following preventive services:

(1) Pneumococcal (as specified in paragraph (h) of this section), influenza, and hepatitis B vaccine and administration.

(2) Screening mammography.

(3) Screening pap tests and screening pelvic exam.

(4) Prostate cancer screening tests (excluding digital rectal examinations).

(5) Colorectal cancer screening tests (excluding barium enemas).

(6) Bone mass measurement.

(7) Medical nutrition therapy (MNT) services.

(8) Cardiovascular screening blood tests.

(9) Diabetes screening tests.

(10) Ultrasound screening for abdominal aortic aneurysm (AAA).

(11) Additional preventive services identified for coverage through the national coverage determination (NCD) process.

(12) Initial Preventive Physical Examination (IPPE).

(13) Annual Wellness Visit (AWV), providing Personalized Prevention Plan Services (PPPS).

■ 16. Section 410.160 is amended by—

■ A. Revising paragraph (b)(2).

■ B. Adding paragraphs (b)(10) through (13).

The revisions and additions read as follows:

§ 410.160 Part B annual deductible.

* * * * *

(b) * * *

(2) Pneumococcal, influenza, and hepatitis b vaccines and their administration.

* * * * *

(10) Bone mass measurement.

(11) Medical nutrition therapy (MNT) services.

(12) Annual Wellness Visit (AWV), providing Personalized Prevention Plan Services (PPPS).

(13) Additional preventive services identified for coverage through the national coverage determination (NCD) process.

* * * * *

PART 411—EXCLUSIONS FROM MEDICARE AND LIMITATIONS ON MEDICARE PAYMENT

■ 17. The authority citation for part 411 continues to read as follows:

Authority: Secs. 1102, 1860D–1 through 1860D–42, 1871, and 1877 of the Social Security Act (42 U.S.C. 1302, 1395w-101 through 1395w-152, 1395hh, and 1395nn).

Subpart A—General Exclusions and Exclusion of Particular Services

■ 18. Section 411.15 is amended by—

■ A. Revising paragraph (a)(1).

■ B. Adding new paragraph (k)(16).

The revision and addition read as follows:

§ 411.15 Particular services excluded from coverage.

* * * * *

(a) * * *

(1) Examinations performed for a purpose other than treatment or diagnosis of a specific illness, symptoms, complaint, or injury, except for screening mammography, colorectal cancer screening tests, screening pelvic exams, prostate cancer screening tests, glaucoma screening exams, ultrasound screening for abdominal aortic aneurysms (AAA), cardiovascular disease screening tests, diabetes screening tests, a screening electrocardiogram, initial preventive physical examinations that meet the criteria specified in paragraphs (k)(6) through (k)(15) of this section, additional preventive services that meet the criteria in § 410.64 of this chapter, or annual wellness visits providing personalized prevention plan services.

* * * * *

(k) * * *

(16) In the case of an annual wellness visit providing a personalized

prevention plan, subject to the conditions and limitations specified in § 410.15 of this subpart.

* * * * *

Subpart J—Financial Relationships Between Physicians and Entities Furnishing Designated Health Services

■ 19. Section 411.355 is amended by adding paragraph (b)(7) to read as follows:

§ 411.355 General exceptions to the referral prohibition related to both ownership/investment and compensation.

* * * * *

(b) * * *

(7) *Disclosure requirement for certain imaging services.*

(i) With respect to magnetic resonance imaging, computed tomography, and positron emission tomography services identified as "radiology and certain other imaging services" on the List of CPT/HCPCS Codes, the referring physician must provide written notice to the patient at the time of the referral that the patient may receive the same services from a person other than one described in paragraph (b)(1) of this section. Except as set forth in paragraph (b)(7)(ii) of this section, the written notice must include a list of at least 5 other suppliers (as defined in § 400.202 of this chapter) that provide the services for which the individual is being referred and which are located within a 25-mile radius of the referring physician's office location at the time of the referral. The notice should be written in a manner sufficient to be reasonably understood by all patients and should include for each supplier on the list, at a minimum, the supplier's name, address, and telephone number.

(ii) If there are fewer than 5 other suppliers located within a 25-mile radius of the physician's office location at the time of the referral, the physician must list all of the other suppliers of the imaging service that are present within a 25-mile radius of the referring physician's office location. Provision of the written list of alternate suppliers will not be required if no other suppliers provide the services for which the individual is being referred within the 25-mile radius.

* * * * *

PART 413—PRINCIPLES OF REASONABLE COST REIMBURSEMENT; PAYMENT FOR END–STAGE RENAL DISEASE SERVICES; OPTIONAL PROSPECTIVELY DETERMINED PAYMENT RATES FOR SKILLED NURSING FACILITIES

■ 20. The authority citation for part 413 continues to read as follows:

Authority: Secs. 1102, 1812(d), 1814(b), 1815, 1833(a), (i), and (n), 1861(v), 1871, 1881, 1883, and 1886 of the Social Security Act (42 U.S.C. 1302, 1395d(d), 1395f(b), 1395g, 1395l(a), (i), and (n), 1395x(v), 1395hh, 1395rr, 1395tt, and 1395ww); and sec. 124 of Public Law 106–133 (113 Stat. 1501A–332).

Subpart E—Payments to Providers

■ 21. Section 413.70 is amended by adding a sentence at the end of paragraph (b)(3)(ii)(B) to read as follows:

§ 413.70 Payment for services of a CAH.

* * * * *

(b) * * *

(3) * * *

(ii) * * *

(B) * * * Effective for primary care services furnished by primary care practitioners (as defined in § 414.80(a)) and major surgical procedures furnished by general surgeons in health professional shortage areas (as defined in § 414.2) furnished on or after January 1, 2011 and before January 1, 2016, incentive payments specified under § 414.80 and § 414.67(b), respectively, of this title must not be included in determining payment made under this paragraph.

* * * * *

PART 414—PAYMENT FOR PART B MEDICAL AND OTHER HEALTH SERVICES

■ 22. The authority citation for part 414 continues to read as follows:

Authority: Secs. 1102, 1871, and 1881(b)(l) of the Social Security Act (42 U.S.C. 1302, 1395hh, and 1395rr(b)(l)).

Subpart A—General Provisions

■ 23. Section 414.2 is amended by adding the definitions of "Health Professional Shortage Area" and "Major surgical procedure" in alphabetical order to read as follows:

§ 414.2 Definitions.

* * * * *

Health Professional Shortage Area (HPSA) means an area designated under section 332(a)(1)(A) of the Public Health Service Act as identified by the Secretary prior to the beginning of such year.

Major surgical procedure means a surgical procedure for which a 10-day or 90-day global period is used for payment under the physician fee schedule and section 1848(b) of the Act.

* * * * *

■ 24. Section 414.26 is amended by—

■ A. Redesignating paragraph (c) as paragraph (d).

■ B. Adding a new paragraph (c).

The addition reads as follows:

§ 414.26 Determining the GAF.

* * * * *

(c) *Adjusting the practice expense index to account for the Frontier State floor.*

(1) *General criteria.* Effective on or after January 1, 2011, CMS will adjust the practice expense index for physicians' services furnished in qualifying States to recognize the practice expense index floor established for Frontier States. A qualifying State must meet the following criteria:

(i) At least 50 percent of counties located within the State have a population density less than 6 persons per square mile.

(ii) The State does not receive a non-labor related share adjustment determined by the Secretary to take into account the unique circumstances of hospitals located in Alaska and Hawaii.

(2) *Amount of adjustment.* The practice expense value applied for physicians' services furnished in a qualifying State will be not less than 1.00.

(3) *Process for determining adjustment.* (i) CMS will use the most recent population estimate data published by the U.S. Census Bureau to determine county definitions and population density. This analysis will be periodically revised, such as for updates to the decennial census data.

(ii) CMS will publish annually a listing of qualifying Frontier States receiving a practice expense index floor attributable to this provision.

* * * * *

Subpart B—Physicians and Other Practitioners

■ 25. Section 414.54 is revised to read as follows:

§ 414.54 Payment for certified nurse-midwives' services.

(a) For services furnished after December 31, 1991, allowed amounts under the fee schedule established under section 1833(a)(1)(K) of the Act for the payment of certified nurse-midwife services may not exceed 65

percent of the physician fee schedule amount for the service.

(b) For certified nurse-midwife services furnished on or after January 1, 2011, allowed amounts may not exceed 100 percent of the physician fee schedule amount that would be paid to a physician for the services.

■ 26. Section 414.65 is amended by revising paragraph (a)(1) introductory text to read as follows:

§ 414.65 Payment for telehealth services.

(a) * * *

(1) The Medicare payment amount for office or other outpatient visits, subsequent hospital care services (with the limitation of one telehealth subsequent hospital care service every 3 days), subsequent nursing facility care services (not including the Federally-mandated periodic visits under § 483.40(c) and with the limitation of one telehealth nursing facility care service every 30 days), professional consultations, psychiatric diagnostic interview examination, neurobehavioral status exam, individual psychotherapy, pharmacologic management, end-stage renal disease-related services included in the monthly capitation payment (except for one "hands on" visit per month to examine the access site), individual and group medical nutrition therapy services, individual and group kidney disease education services, individual and group diabetes self-management training (DSMT) services (except for 1 hour of in-person DSMT services to be furnished in the year following the initial DSMT service to ensure effective injection training), and individual and group health and behavior assessment and intervention furnished via an interactive telecommunications system is equal to the current fee schedule amount applicable for the service of the physician or practitioner.

* * * * *

■ 27. Section 414.67 is revised to read as follows:

§ 414.67 Incentive payments for services furnished in Health Professional Shortage Areas.

(a) *Health Professional Shortage Area (HPSA) physician bonus program.* A HPSA physician incentive payment will be made subject to the following:

(1) HPSA bonuses are payable for services furnished by physicians as defined in section 1861(r) of the Act in areas designated as of December 31 of the prior year as geographic primary medical care HPSAs as defined in section 332(a)(1)(A) of the Public Health Service Act.

(2) HPSA bonuses are payable for services furnished by psychiatrists in areas designated as of December 31 of the prior year as geographic mental health HPSAs if the services are not already eligible for the bonus based on being in a geographic primary care HPSA.

(3) Physicians eligible for the HPSA physician bonus are entitled to a 10 percent incentive payment above the amount paid for their professional services under the physician fee schedule.

(4) Physicians furnishing services in areas that are designated as geographic HPSAs prior to the beginning of the year but not included on the published list of zip codes for which automated HPSA bonus payments are made must use the AQ modifier to receive the HPSA physician bonus payment.

(b) *HPSA surgical incentive payment program.* A HPSA surgical incentive payment will be made subject to the following:

(1) A major surgical procedure as defined in § 414.2 of this part is furnished by a general surgeon on or after January 1, 2011 and before January 1, 2016 in an area recognized for the HPSA physician bonus program under paragraph (a)(1) of this section.

(2) Payment will be made on a quarterly basis in an amount equal to 10 percent of the Part B payment amount for major surgical procedures furnished as described in paragraph (b)(1) of this section, in addition to the amount the physician would otherwise be paid.

(3) Physicians furnishing services in areas that are designated as geographic HPSAs eligible for the HPSA physician bonus program under paragraph (a)(1) of this section prior to the beginning of the year but not included on the published list of zip codes for which automated HPSA surgical incentive payments are made should report HCPCS modifier -AQ to receive the HPSA surgical incentive payment.

(4) The payment described in paragraph (b)(2) of this section is made to the surgeon or, where the surgeon has reassigned his or her benefits to a critical access hospital (CAH) paid under the optional method, to the CAH based on an institutional claim.

■ 28. Section 414.80 is added to read as follows:

§ 414.80 Incentive payment for primary care services.

(a) *Definitions.* As defined in this section—

Eligible primary care practitioner means one of the following:

(i) A physician (as defined in section 1861(r)(1) of the Act) who meets all of the following criteria:

(A) Enrolled in Medicare with a primary specialty designation of 08-family practice, 11-internal medicine, 37-pediatrics, or 38-geriatrics.

(B) At least 60 percent of the physician's allowed charges under the physician fee schedule (excluding hospital inpatient care and emergency department visits) during a reference period specified by the Secretary are for primary care services.

(ii) A nurse practitioner, clinical nurse specialist, or physician assistant (as defined in section 1861(aa)(5) of the Act) who meets all of the following criteria:

(A) Enrolled in Medicare with a primary specialty designation of 50-nurse practitioner, 89-certified clinical nurse, or 97-physician assistant.

(B) At least 60 percent of the practitioner's allowed charges under the physician fee schedule (excluding hospital inpatient care and emergency department visits) during a reference period specified by the Secretary are for primary care services.

Primary care services means—

(i) New and established patient office or other outpatient evaluation and management (E/M) visits;

(ii) Initial, subsequent, discharge, and other nursing facility E/M services;

(iii) New and established patient domiciliary, rest home (for example, boarding home), or custodial care E/M services;

(iv) Domiciliary, rest home (for example, assisted living facility), or home care plan oversight services; and

(v) New and established patient home E/M visits.

(b) *Payment.*

(1) For primary care services furnished by an eligible primary care practitioner on or after January 1, 2011 and before January 1, 2016, payment is made on a quarterly basis in an amount equal to 10 percent of the payment amount for the primary care services under Part B, in addition to the amount the primary care practitioner would otherwise be paid for the primary care services under Part B.

(2) The payment described in paragraph (b)(1) of this section is made to the eligible primary care practitioner or, where the physician has reassigned his or her benefits to a critical access hospital (CAH) paid under the optional method, to the CAH based on an institutional claim.

■ 29. A new § 414.90 is added to read as follows:

§ 414.90 Physician Quality Reporting System.

(a) *Basis and scope.* This section implements the following provisions of the Act:

(1) 1848(a)—Payment Based on Fee Schedule.

(2) 1848(k)—Quality Reporting System.

(3) 1848(m)—Incentive Payments for Quality Reporting.

(b) *Definitions.* As used in this section, unless otherwise indicated—

Covered professional services means services for which payment is made under, or is based on, the Medicare physician fee schedule as provided under section 1848(k)(3) of the Act and which are furnished by an eligible professional.

Eligible professional means any of the following:

(i) A physician.

(ii) A practitioner described in section 1842(b)(18)(C) of the Act.

(iii) A physical or occupational therapist or a qualified speech-language pathologist.

(iv) A qualified audiologist (as defined in section 1861(ll)(3)(B) of the Act).

Group practice means a single Taxpayer Identification Number (TIN) with two or more eligible professionals, as identified by their individual National Provider Identifier (NPI), who have reassigned their Medicare billing rights to the TIN.

Maintenance of Certification Program means a continuous assessment program, such as qualified American Board of Medical Specialties Maintenance of Certification Program or an equivalent program (as determined by the Secretary), that advances quality and the lifelong learning and self-assessment of board certified specialty physicians by focusing on the competencies of patient care, medical knowledge, practice-based learning, interpersonal and communication skills, and professionalism. Such a program must include the following:

(i) The program requires the physician to maintain a valid unrestricted license in the United States.

(ii) The program requires a physician to participate in educational and self-assessment programs that require an assessment of what was learned.

(iii) The program requires a physician to demonstrate, through a formalized secure examination, that the physician has the fundamental diagnostic skills, medical knowledge, and clinical judgment to provide quality care in their respective specialty.

(iv) The program requires successful completion of a qualified maintenance of certification program practice assessment.

Maintenance of Certification Program Practice Assessment means an assessment of a physician's practice that—

(i) Includes an initial assessment of an eligible professional's practice that is designed to demonstrate the physician's use of evidence-based medicine;

(ii) Includes a survey of patient experience with care; and

(iii) Requires a physician to implement a quality improvement intervention to address a practice weakness identified in the initial assessment under paragraph (h) of this section and then to remeasure to assess performance improvement after such intervention.

Measures group means a subset of four or more Physician Quality Reporting System measures that have a particular clinical condition or focus in common. The denominator definition and coding of the measures group identifies the condition or focus that is shared across the measures within a particular measures group.

Physician Quality Reporting System means the physician reporting system under section 1848(k) of the Act for the reporting by eligible professionals of data on quality measures and the incentive payment associated with this physician reporting system.

Performance rate means the percentage of a defined population who receives a particular process of care or achieve a particular outcome for a particular quality measure.

Reporting rate means the percentage of patients that the eligible professional indicated a quality action was or was not performed divided by the total number of patients in the denominator of the measure.

Qualified registry means a medical registry or a maintenance of certification program operated by a specialty body of the American Board of Medical Specialties that, with respect to a particular program year, has self-nominated and successfully completed a vetting process (as specified by CMS) to demonstrate its compliance with the Physician Quality Reporting System qualification requirements specified by CMS for that program year. The registry may act as a data submission vendor, which has the requisite legal authority to provide Physician Quality Reporting System data (as specified by CMS) on behalf of an eligible professional to CMS.

Qualified electronic health record product means an electronic health record vendor's product and version that, with respect to a particular program year, has self-nominated and successfully completed a vetting process (as specified by CMS) to demonstrate the product's compliance with the Physician Quality Reporting System qualification requirements specified by CMS for a program year. The requirements and process for an electronic health record product to be qualified for the purpose of the Physician Quality Reporting System is separate from the standards, implementation specifications, and certification criteria established for the EHR Incentive Program specified in part 495.

(c) *Incentive payments.* With respect to covered professional services furnished during a reporting period by an eligible professional, if —

(1) There are any quality measures that have been established under the Physician Quality Reporting System that are applicable to any such services furnished by such professional (or in the case of a group practice under paragraph (g) of this section, such group practice) for such reporting period; and

(2) The eligible professional (or in the case of a group practice under paragraph (g) of this section, the group practice) satisfactorily submits (as determined under paragraph (f) of this section for eligible professionals and paragraph (g) of this section for group practices) to the Secretary data on such quality measures in accordance with the Physician Quality Reporting System for such reporting period, in addition to the amount otherwise paid under section 1848 of the Act, there also must be paid to the eligible professional (or to an employer or facility in the cases described in section 1842(b)(6)(A) of the Act or, in the case of a group practice) under paragraph (g) of this section, to the group practice, from the Federal Supplementary Medical Insurance Trust Fund established under section 1841 of the Act an amount equal to the applicable quality percent (as specified in paragraph (c)(3) of this section) of the eligible professional's (or, in the case of a group practice under paragraph (g) of this section, the group practice's) total estimated allowed charges for all covered professional services furnished by the eligible professional (or, in the case of a group practice under paragraph (g) of this section, by the group practice) during the applicable reporting period. For purposes of this paragraph,

(i) The eligible professional's (or, in the case of a group practice under paragraph (g) of this section, the group practice's) total estimated allowed charges for covered professional services furnished during a reporting period are determined based on claims

processed in the National Claims History (NCH) no later than 2 months after the end of the applicable reporting period;

(ii) In the case of an eligible professional who furnishes covered professional services in more than one practice, incentive payments are separately determined for each practice based on claims submitted for the eligible professional for each practice;

(iii) Incentive payments earned by an eligible professional (or in the case of a group practice under paragraph (g) of this section, by a group practice) for a particular program year will be paid as a single consolidated payment to the TIN holder of record.

(3) *Applicable quality percent.* The applicable quality percent is as follows:

(i) For 2011, 1.0 percent; and

(ii) For 2012, 2013, and 2014, 0.5 percent;

(d) *Additional incentive payment.* (1) Through 2014, if an eligible professional meets the requirements described in paragraph (d)(2) of this section, the applicable percent for such year, as described in paragraphs (c)(3)(i) and (ii) of this section, must be increased by 0.5 percentage points.

(2) In order to qualify for the additional incentive payment described in paragraph (d)(1) of this section, an eligible professional must meet the following requirements:

(i) The eligible professional must—

(A) Satisfactorily submit data on quality measures for purposes of this section for a year; and

(B) Have such data submitted on their behalf through a Maintenance of Certification program (as defined in paragraph (b) of this section) that meets:

(*1*) The criteria for a registry (as specified by CMS); or

(*2*) An alternative form and manner determined appropriate by the Secretary.

(ii) The eligible professional, more frequently than is required to qualify for or maintain board certification status—

(A) Participates in a maintenance of certification program (as defined in paragraph (b) of this section) for a year; and

(B) Successfully completes a qualified maintenance of certification program practice assessment (as defined in paragraph (b) of this section) for such year.

(iii) A Maintenance of Certification Program submits to the Secretary, on behalf of the eligible professional, information—

(A) In a form and manner specified by the Secretary, that the eligible professional has successfully met the requirements of paragraph (d)(2)(ii) of this section, which may be in the form of a structural measure);

(B) If requested by the Secretary, on the survey of patient experience with care (as described in paragraph (b) of this section); and

(C) As the Secretary may require, on the methods, measures, and data used under the Maintenance of Certification Program and the qualified Maintenance of Certification Program practice assessment.

(e) *Use of consensus-based quality measures.* For each program year, CMS will publish the final list of measures and the final detailed measure specifications for all quality measures selected for inclusion in the Physician Quality Reporting System quality measure set for a given program year on a CMS Web site by no later than December 31 of the prior year.

(1) *General rule.* Subject to paragraph (e)(2) of this section, for purposes of reporting data on quality measures for covered professional services furnished during a year, subject to paragraph (f) of this section, the quality measures specified under this paragraph must be such measures selected by the Secretary from measures that have been endorsed by the entity with a contract with the Secretary under section 1890(a) of the Act.

(2) *Exception.* In the case of a specified area or medical topic determined appropriate by the Secretary for which a feasible and practical measure has not been endorsed by the entity with a contract under section 1890(a) of the Act, the Secretary may specify a measure that is not so endorsed as long as due consideration is given to measures that have been endorsed or adopted by a consensus organization identified by the Secretary, such as the AQA alliance.

(3) *Opportunity to provide input on measures.* For each quality measure adopted by the Secretary under this paragraph, the Secretary ensures that eligible professionals have the opportunity to provide input during the development, endorsement, or selection of quality measures applicable to services they furnish.

(f) *Requirements for individual eligible professionals to qualify to receive an incentive payment.* In order to qualify to earn a Physician Quality Reporting System incentive payment for a particular program year, an individual eligible professional, as identified by a unique TIN/NPI combination, must meet the criteria for satisfactory reporting specified by CMS for such year by reporting on either individual Physician Quality Reporting System quality measures or Physician Quality Reporting System measures groups identified by CMS during a reporting period specified in paragraph (f)(1) of this section and using one of the reporting mechanisms specified in paragraph (f)(2) of this section. Although an eligible professional may attempt to qualify for the Physician Quality Reporting System incentive payment by reporting on both individual Physician Quality Reporting System quality measures and measures groups, using more than one reporting mechanism (as specified in paragraph (f)(2) of this section), or reporting for more than one reporting period, he or she will receive only one Physician Quality Reporting System incentive payment per TIN/NPI combination for a program year.

(1) *Reporting periods.* For purposes of this paragraph, the reporting period with respect to program year 2011 is—

(i) The 12-month period from January 1 through December 31 of such program year; or

(ii) The 6-month period from July 1 through December 31 of such program year.

(2) *Exceptions.* In program year 2011, the 6-month reporting period is not available for EHR-based reporting of individual Physician Quality Reporting System quality measures or for reporting by group practices under the process described in paragraph (g) of this section.

(3) *Reporting mechanisms.* For program year 2011, an eligible professional who wishes to participate in the Physician Quality Reporting System must report information on the individual Physician Quality Reporting System quality measures or Physician Quality Reporting System measures groups identified by CMS in the following manner:

(i) Reporting the individual Physician Quality Reporting System quality measures or Physician Quality Reporting System measures groups to CMS, by no later than 2 months after the end of the applicable reporting period, on the eligible professional's Medicare Part B claims for covered professional services furnished during the applicable reporting period.

(ii) Reporting the individual Physician Quality Reporting System quality measures or Physician Quality Reporting System measures groups to a qualified registry (as specified in paragraph (b) of this section) in the form and manner and by the deadline specified by the qualified registry selected by the eligible professional. The selected registry will submit information, as required by CMS, for covered professional services furnished

by the eligible professional during the applicable reporting period to CMS on the eligible professional's behalf; or

(iii) Reporting the individual Physician Quality Reporting System quality measures to CMS by extracting clinical data using a secure data submission method, as required by CMS, from a qualified EHR product (as defined in paragraph (b) of this section) by the deadline specified by CMS for covered professional services furnished by the eligible professional during the applicable reporting period. Prior to actual data submission for a given program year and by a date specified by CMS, the eligible professional must submit a test file containing real or dummy clinical quality data extracted from the qualified EHR product selected by the eligible professional using a secure data submission method, as required by CMS.

(g) *Requirements for group practices to qualify to receive an incentive payment.* A group practice (as defined in paragraph (b) of this section) will be treated as satisfactorily submitting data on quality measures under Physician Quality Reporting System for covered professional services for a reporting period, if, in lieu of reporting Physician Quality Reporting System measures, the group practice—

(1) Meets the participation requirements specified by CMS for the Physician Quality Reporting System group practice reporting option or is a group practice of any size (including solo practitioners) or comprised of multiple TINs participating in a Medicare approved demonstration project that is deemed to be participating in the Physician Quality Reporting System group practice reporting option;

(2) Is selected by CMS to participate in the Physician Quality Reporting System group practice reporting option;

(3) Reports measures specified by CMS in the form and manner, and at a time specified by CMS; and

(4) Meets other requirements for satisfactory reporting specified by CMS.

(5) No double payments. Payments to a group practice under this paragraph must be in lieu of the payments that would otherwise be made under the Physician Quality Reporting System to eligible professionals in the group practice for meeting the criteria for satisfactory reporting for individual eligible professionals.

(i) If an eligible professional, as identified by an individual NPI, has reassigned his or her Medicare billing rights to a TIN selected to participate in the Physician Quality Reporting System group practice reporting option for a program year, then for that program year the eligible professional must participate in the Physician Quality Reporting System via the group practice reporting option. For any program year in which the TIN is selected to participate in the Physician Quality Reporting System group practice reporting option, the eligible professional cannot individually qualify for a Physician Quality Reporting System incentive payment by meeting the requirements specified in paragraph (f) of this section.

(ii) If, for the program year, the eligible professional participates in the Physician Quality Reporting System under another TIN that is not selected to participate in the Physician Quality Reporting System group practice reporting option for that program year, then the eligible professional may individually qualify for a Physician Quality Reporting System incentive by meeting the requirements specified in paragraph (f) of this section under that TIN.

(h) *Limitations on review.* Except as specified in paragraph (i) of this section, there is no administrative or judicial review under section 1869 or 1879 of the Act, or otherwise of—

(1) The determination of measures applicable to services furnished by eligible professionals under the Physician Quality Reporting System;

(2) The determination of the payment limitation; and

(3) The determination of any Physician Quality Reporting System incentive payment and the Physician Quality Reporting System payment adjustment.

(i) *Informal review.* Eligible professionals (or in the case of reporting under paragraph (g) of this section, group practices) may seek an informal review of the determination that an eligible professional (or in the case of reporting under paragraph (g) of this section, group practices) did not satisfactorily submit data on quality measures under the Physician Quality Reporting System.

(1) To request an informal review, an eligible professional (or in the case of reporting under paragraph (g) of this section, group practices) must submit a request to CMS within 90 days of the release of the feedback reports. The request must be submitted in writing or via e-mail and summarize the concern(s) and reasons for requesting an informal review and may also include information to assist in the review.

(2) CMS will provide a written response within 60 days of the receipt of the original request.

(i) All decisions based on the informal review will be final.

(ii) There will be no further review or appeal.

(j) *Public reporting of an eligible professional's or group practice's Physician Quality Reporting System data.* For each program year, CMS will post on a public Web site, in an easily understandable format, a list of the names of eligible professionals (or in the case of reporting under paragraph (g) of this section, group practices) who satisfactorily submitted Physician Quality Reporting System quality measures.

■ 30. A new § 414.92 is added to read as follows:

§ 414.92 Electronic Prescribing Incentive Program.

(a) *Basis and scope.* This section implements the following provisions of the Act:

(1) Section 1848(a)—Payment Based on Fee Schedule.

(2) Section 1848(m)—Incentive Payments for Quality Reporting.

(b) *Definitions.* As used in this section, unless otherwise indicated—

Covered professional services means services for which payment is made under, or is based on, the Medicare physician fee schedule which are furnished by an eligible professional.

Electronic Prescribing Incentive Program means the incentive payment program established under section 1848(m) of the Act for the adoption and use of electronic prescribing technology by eligible professionals.

Eligible professional means any of the following healthcare professionals who have prescribing authority:

(i) A physician.

(ii) A practitioner described in section 1842(b)(18)(C) of the Act.

(iii) A physical or occupational therapist or a qualified speech-language pathologist.

(iv) A qualified audiologist (as defined in section 1861(ll)(3)(B) of the Act).

Group practice means a group practice that is—

(i) Defined at § 414.90(b), that is participating in the Physician Quality Reporting System; or

(ii) (A) In a Medicare approved demonstration project that is deemed to be participating in the Physician Quality Reporting System group practice reporting option; and

(B) Has indicated its desire to participate in the electronic prescribing group practice option.

Qualified electronic health record product means an electronic health record product and version that, with

respect to a particular program year, is designated by CMS as a qualified electronic health record product for the purpose of the Physician Quality Reporting System (as described in § 414.90) and the product's vendor has indicated a desire to have the product qualified for purposes of the product's users to submit information related to the electronic prescribing measure.

Qualified registry means a medical registry or a Maintenance of Certification Program operated by a specialty body of the American Board of Medical Specialties that, with respect to a particular program year, is designated by CMS as a qualified registry for the purpose of the Physician Quality Reporting System (as described in § 414.90) and that has indicated its desire to be qualified to submit the electronic prescribing measure on behalf of eligible professionals for the purposes of the Electronic Prescribing Incentive Program.

(c) *Incentive payments and payment adjustments.* (1) *Incentive payments.* Subject to paragraph (c)(3) of this section, with respect to covered professional services furnished during a reporting period by an eligible professional, if the eligible professional is a successful electronic prescriber for such reporting period, in addition to the amount otherwise paid under section 1848 of the Act, there also must be paid to the eligible professional (or to an employer or facility in the cases described in section 1842(b)(6)(A) of the Act) or, in the case of a group practice under paragraph (e) of this section, to the group practice, from the Federal Supplementary Medical Insurance Trust Fund established under section 1841 of the Act an amount equal to the applicable electronic prescribing percent (as specified in paragraph (c)(1)(ii) of this section) of the eligible professional's (or, in the case of a group practice under paragraph (e) of this section, the group practice's) total estimated allowed charges for all covered professional services furnished by the eligible professional (or, in the case of a group practice under paragraph (e) of this section, by the group practice) during the applicable reporting period.

(i) For purposes of paragraph (c)(1) of this section,

(A) The eligible professional's (or, in the case of a group practice under paragraph (e) of this section, the group practice's) total estimated allowed charges for covered professional services furnished during a reporting period are determined based on claims processed in the National Claims History (NCH) no later than 2 months after the end of the applicable reporting period;

(B) In the case of an eligible professional who furnishes covered professional services in more than one practice, incentive payments are separately determined for each practice based on claims submitted for the eligible professional for each practice;

(C) Incentive payments earned by an eligible professional (or in the case of a group practice under paragraph (e) of this section, by a group practice) for a particular program year will be paid as a single consolidated payment to the TIN holder of record.

(ii) *Applicable electronic prescribing percent.* The applicable electronic prescribing percent is as follows:

(A) For the 2011 and 2012 program years, 1.0 percent.

(B) For the 2013 program year, 0.5 percent.

(iii) *Limitation with respect to electronic health record (EHR) incentive payments.* The provisions of this paragraph do not apply to an eligible professional (or, in the case of a group practice under paragraph (e) of this section, a group practice) if, for the electronic health record reporting period the eligible professional (or group practice) receives an incentive payment under section 1848(o)(1)(A) of the Act with respect to a certified electronic health record technology (as defined in section 1848(o)(4) of the Act) that has the capability of electronic prescribing.

(2) *Incentive payment adjustment.* Subject to paragraphs (c)(1)(ii) and (c)(3) of this section, with respect to covered professional services furnished by an eligible professional during 2012, 2013, or 2014, if the eligible professional (or in the case of a group practice under paragraph (e) of this section, the group practice) is not a successful electronic prescriber (as specified by CMS for purposes of the payment adjustment) for an applicable reporting period (as specified by CMS) the fee schedule amount for such services furnished by such professional (or group practice) during the program year (including the fee schedule amount for purposes of determining a payment based on such amount) is equal to the applicable percent (as specified in paragraph (c)(2)(i) of this section) of the fee schedule amount that would otherwise apply to such services under section 1848 of the Act.

(i) *Applicable percent.* The applicable percent is as follows:

(A) For 2012, 99 percent;

(B) For 2013, 98.5 percent; and

(C) For 2014, 98 percent.

(ii) *Significant hardship exception.* CMS may, on a case-by-case basis, exempt an eligible professional (or in the case of a group practice under paragraph (e) of this section, a group practice) from the application of the payment adjustment under paragraph (c)(2) of this section if, CMS determines, subject to annual renewal, that compliance with the requirement for being a successful electronic prescriber would result in a significant hardship.

(3) *Limitation with respect to electronic prescribing quality measures.* The provisions of paragraphs (c)(1) and (c)(2) of this section do not apply to an eligible professional (or, in the case of a group practice under paragraph (e) of this section, a group practice) if for the reporting period the allowed charges under section 1848 of the Act for all covered professional services furnished by the eligible professional (or group, as applicable) for the codes to which the electronic prescribing measure applies are less than 10 percent of the total of the allowed charges under section 1848 of the Act for all such covered professional services furnished by the eligible professional (or the group practice, as applicable).

(d) *Requirements for individual eligible professionals to qualify to receive an incentive payment.* In order to be considered a successful electronic prescriber and qualify to earn an electronic prescribing incentive payment (subject to paragraph (c)(3) of this section), an individual eligible professional, as identified by a unique TIN/NPI combination, must meet the criteria for successful electronic prescriber under section 1848(m)(3)(B) of the Act and as specified by CMS during the reporting period specified in paragraph (d)(1) of this section and using one of the reporting mechanisms specified in paragraph (d)(2) of this section. Although an eligible professional may attempt to qualify for the electronic prescribing incentive payment using more than one reporting mechanism (as specified in paragraph (d)(2) of this section), the eligible professional will receive only one electronic prescribing incentive payment per TIN/NPI combination for a program year.

(1) *Reporting period.* For purposes of this paragraph in 2011, the reporting period with respect to a program year is the entire calendar year.

(2) *Reporting mechanisms.* For program year 2011, an eligible professional who wishes to participate in the Electronic Prescribing Incentive Program must report information on the electronic prescribing measure identified by CMS to—

(i) CMS, by no later than 2 months after the end of the applicable reporting period, on the eligible professional's Medicare Part B claims for covered professional services furnished by the eligible professional during the reporting period specified in paragraph (d)(1) of this section;

(ii) A qualified registry (as defined in paragraph (b) of this section) in the form and manner and by the deadline specified by the qualified registry selected by the eligible professional. The selected qualified registry will submit information, as required by CMS, for covered professional services furnished by the eligible professional during the reporting period specified in paragraph (d)(1) of this section to CMS on the eligible professional's behalf; or

(iii) CMS by extracting clinical data using a secure data submission method, as required by CMS, from a qualified electronic health record product (as defined in paragraph (b) of this section) by the deadline specified by CMS for covered professional services furnished by the eligible professional during the reporting period specified in paragraph (d)(1) of this section. Prior to actual data submission for a given program year and by a date specified by CMS, the eligible professional must submit a test file containing real or dummy clinical quality data extracted from the qualified electronic health record product selected by the eligible professional using a secure data submission method, as required by CMS.

(e) *Requirements for group practices to qualify to receive an incentive payment.* (1) A group practice (as defined in paragraph (b) of this section) will be treated as a successful electronic prescriber for covered professional services for a reporting period if the group practice meets the criteria for successful electronic prescriber specified by CMS in the form and manner and at the time specified by CMS.

(2) *No double payments.* Payments to a group practice under this paragraph must be in lieu of the payments that would otherwise be made under the Electronic Prescribing Incentive Program to eligible professionals in the group practice for being a successful electronic prescriber.

(i) If an eligible professional, as identified by an individual NPI, has reassigned his or her Medicare billing rights to a TIN selected to participate in the electronic prescribing group practice reporting option for a program year, then for that program year the eligible professional must participate in the Electronic Prescribing Incentive Program via the group practice reporting option. For any program year in which the TIN is selected to participate in the Electronic Prescribing Incentive Program group practice reporting option, the eligible professional cannot individually qualify for an electronic prescribing incentive payment by meeting the requirements specified in paragraph (d) of this section.

(ii) If, for the program year, the eligible professional participates in the Electronic Prescribing Incentive Program under another TIN that is not selected to participate in the Electronic Prescribing Incentive Program group practice reporting option for that program year, then the eligible professional may individually qualify for an electronic prescribing incentive by meeting the requirements specified in paragraph (d) of this section under that TIN.

(f) *Public reporting of an eligible professional's or group practice's Electronic Prescribing Incentive Program data.* For each program year, CMS will post on a public Web site, in an easily understandable format, a list of the names of eligible professionals (or in the case of reporting under paragraph (e) of this section, group practices) who are successful electronic prescribers.

Subpart D—Payment for Durable Medical Equipment and Prosthetic and Orthotic Devices

■ 31. Section 414.202 is amended by adding the definition of "Complex rehabilitative power-driven wheelchair.

§ 414.202 Definitions.

* * * * *

Complex rehabilitative power-driven wheelchair means a power-driven wheelchair that is classified as—

(1) Group 2 power wheelchair with power options that can accommodate rehabilitative features (for example, tilt in space); or

(2) Group 3 power wheelchair.

* * * * *

■ 32. Section 414.229 is amended by—

■ A. Revising paragraphs (a)(3), (d)(1), and (h).

■ B. Adding paragraphs (a)(4), (a)(5), and (b)(3).

The revisions and additions read as follows:

§ 414.229 Other durable medical equipment-capped rental items.

(a) * * *

(3) For power-driven wheelchairs furnished on or after January 1, 2006 through December 31, 2010, payment is made in accordance with the rules set forth in paragraphs (f) or (h) of this section.

(4) For power-driven wheelchairs that are not classified as complex rehabilitative power-driven wheelchairs, furnished on or after January 1, 2011, payment is made in accordance with the rules set forth in paragraph (f) of this section.

(5) For power-driven wheelchairs classified as complex rehabilitative power-driven wheelchairs, furnished on or after January 1, 2011, payment is made in accordance with the rules set forth in paragraphs (f) or (h) of this section.

(b) * * *

(3) For power-driven wheelchairs furnished on or after January 1, 2011, the monthly fee schedule amount for rental equipment equals 15 percent of the purchase price recognized as determined under paragraph (c) of this section for each of the first 3 months and 6 percent of the purchase price for each of the remaining months.

* * * * *

(d) * * *

(1) Suppliers must offer beneficiaries the option of purchasing power-driven wheelchairs at the time the supplier first furnishes the item. On or after January 1, 2011, this option is available only for complex rehabilitative power-driven wheelchairs. Payment must be on a lump-sum fee schedule purchase basis if the beneficiary chooses the purchase option. The purchase fee is the amount established in paragraph (c) of this section.

* * * * *

(h) *Purchase of power-driven wheelchairs furnished on or after January 1, 2006.* (1) Suppliers must offer beneficiaries the option to purchase power-driven wheelchairs at the time the equipment is initially furnished.

(2) Payment is made on a lump-sum purchase basis if the beneficiary chooses this option.

(3) On or after January 1, 2011, this option is available only for complex rehabilitative power-driven wheelchairs.

Subpart F—Competitive Bidding for Certain Durable Medical Equipment, Prosthetics, Orthotics, and Supplies (DMEPOS)

■ 33. Section 414.402 is amended by adding the definitions of "Affected party," "Breach of contract," "Corrective action plan (CAP)," "Hearing officer," "Mail order item," "National mail order DMEPOS competitive bidding program," "Non-mail order item" and "Parties to the hearing" in alphabetical order to read as follows:

§ 414.402 Definitions.

Affected party means a contract supplier that has been notified that their DMEPOS CBP contract will be terminated for a breach of contract.

* * * * *

Breach of contract means any deviation from contract requirements, including a failure to comply with a governmental agency or licensing organization requirements, constitutes a breach of contract.

* * * * *

Corrective action plan (CAP) means a contract supplier's written document with supporting information that describes the actions the contract supplier will take within a specified timeframe to remedy a breach of contract.

* * * * *

Hearing officer (HO) means an individual, who was not involved with the CBIC recommendation to terminate a DMEPOS Competitive Bidding Program contract, who is designated by CMS to review and make an unbiased and independent recommendation when there is an appeal of CMS's initial determination to terminate a DMEPOS Competitive Bidding Program contract.

* * * * *

Mail order item means any item (for example, diabetic testing supplies) shipped or delivered to the beneficiary's home, regardless of the method of delivery.

* * * * *

National mail order DMEPOS competitive bidding program means a program whereby contracts are awarded to suppliers for the furnishing of mail order items across the nation.

* * * * *

Non-mail order item means any item (for example, diabetic testing supplies) that a beneficiary or caregiver picks up in person at a local pharmacy or supplier storefront.

Parties to the hearing means the DMEPOS contract supplier and CMS.

* * * * *

■ 34. Section 414.404 is amended by revising paragraph (b)(1)(i) to read as follows:

§ 414.404 Scope and applicability.

* * * * *

(b) * * *

(1) * * *

(i) The items furnished are limited to crutches, canes, walkers, folding manual wheelchairs, blood glucose monitors, and infusion pumps that are DME, and off-the-shelf (OTS) orthotics.

* * * * *

■ 35. Section 414.408 is amended by—

■ A. Revising paragraph (f)(1).

■ B. Redesignating paragraph (h)(2) through (h)(7) as paragraphs (h)(3) through (h)(8), respectively.

■ C. Adding new paragraph (h)(2).

■ D. In newly designated paragraphs (h)(3)(i) and (ii), remove the phrase "(h)(2)" and insert in its place the phrase "(h)(3)."

The revision and addition reads as follows:

§ 414.408 Payment rules.

* * * * *

(f) * * *

(1) The single payment amounts for new purchased durable medical equipment, including power wheelchairs that are purchased when the equipment is initially furnished and enteral nutrition equipment are calculated based on the bids submitted and accepted for these items. For contracts entered into beginning on or after January 1, 2011, payment on a lump sum purchase basis is only available for power wheelchairs classified as complex rehabilitative power wheelchairs.

* * * * *

(h) * * *

(2) For contracts entered into beginning on or after January 1, 2011, the monthly fee schedule amount for rental of power wheelchairs equals 15 percent of the single payment amounts calculated for new durable medical equipment under paragraph (f)(1) of this section for each of the first 3 months, and 6 percent of the single payment amounts calculated for these items for each of the remaining months 4 through 13.

* * * * *

■ 36. Section 414.410 is amended as follows:

■ A. Revising paragraphs (a)(2) and (a)(3).

■ B. Adding a new paragraph (a)(4).

The revisions and addition read as follows:

§ 414.410 Phase-in implementation of competitive bidding programs.

(a) * * *

(2) In CY 2011, in an additional 91 MSAs (the additional 70 MSAs selected by CMS as of June 1, 2008, and the next 21 largest MSAs by total population based on 2009 population estimates, and not already phased in as of June 1, 2008). CMS may subdivide any of the 91 MSAs with a population of greater than 8,000,000 into separate CBAs, thereby resulting in more than 91 CBAs.

(3) After CY 2011, additional CBAs (or, in the case of national mail order for items and services, after CY 2010).

(4) For competitions (other than for national mail order items and services) after CY 2011 and prior to CY 2015, the following areas are excluded:

(i) Rural areas.

(ii) MSAs not selected under paragraphs (a)(1) or (a)(2) of this section with a population of less than 250,000.

(iii) An area with low population density within an MSA not selected under paragraphs (a)(1) or (a)(2) of this section.

* * * * *

■ 37. Section 414.411 is added to read as follows:

§ 414.411 Special rule in case of competitions for diabetic testing strips conducted on or after January 1, 2011.

(a) *National mail order competitions.* A supplier must demonstrate that their bid submitted as part of a national mail order competition for diabetic testing strips covers the furnishing of a sufficient number of different types of diabetic testing strip products that, in the aggregate, and taking into account volume for the different products, includes at least 50 percent of all the different types of products on the market. A type of diabetic testing strip means a specific brand and model of testing strips.

(b) *Other competitions.* CMS may apply this special rule to non-mail order or local competitions for diabetic testing strips.

■ 38. Section 414.422 is amended by adding paragraph (e)(3) to read as follows:

§ 414.422 Term of contracts.

* * * * *

(e) * * *

(3) Contract suppliers for diabetic testing supplies must furnish the brand of diabetic testing supplies that work with the home blood glucose monitor selected by the beneficiary. The contract supplier is prohibited from influencing or incentivizing the beneficiary by persuading, pressuring, or advising them to switch from their current brand or for new beneficiaries from their preferred brand of glucose monitor and testing supplies. The contract supplier may not furnish information about alternative brands to the beneficiary unless the beneficiary requests such information.

* * * * *

■ 39. Section 414.423 is added to read as follows:

§ 414.423 Appeals Process for Termination of Competitive Bidding Contract.

This section implements an appeals process for suppliers that CMS has determined are in breach of their

Medicare DMEPOS Competitive Bidding Program contracts and where CMS has taken action to terminate the supplier's contract. Except as specified in this regulation termination decisions made under this section are final and binding.

(a) *Terminations for breach of contract.* CMS may terminate a supplier's DMEPOS Competitive Bidding Program contract when it determines that the supplier has violated any of the terms of its contract.

(b) *Notice of termination.*

(1) *CMS notification.* If CMS determines a supplier to be in breach of its contract either in part or in whole, it will notify the Medicare DMEPOS supplier of the termination by certified mail.

(2) *Content of the notice.* The CMS notice will include the following:

(i) The reasons for the termination.

(ii) The right to request a hearing by a CBIC Hearing Officer, and depending on the nature of the breach, the supplier may also be allowed to submit a CAP in lieu of requesting a hearing by a CBIC Hearing Officer, as specified in paragraph (c)(1)(i) of this section.

(iii) The address to which the written request for a hearing must be mailed.

(iv) The address to which the CAP must be mailed, if applicable.

(v) Penalties that will accompany the termination, such as not being eligible to bid in future rounds of competitive bidding.

(vi) The effective date of termination is 45 days from the date of the notification letter unless a timely hearing request has been filed or a corrective action plan (CAP) has been submitted within 30 days of the date on the notification letter.

(c) *Corrective action plan (CAP).* (1) *Option for corrective action plan (CAP).*

(i) CMS has the option to allow a DMEPOS supplier to provide a written corrective action plan (CAP) to remedy the deficiencies identified in the notice, when CMS determines that the delay in the termination date caused by allowing a CAP will not cause harm to beneficiaries, for example, we would not allow a CAP if the supplier has been excluded from any Federal program, debarred by a Federal agency, or convicted of a healthcare-related crime.

(ii) If a supplier chooses not to submit a CAP or if CMS determines that a supplier's CAP is insufficient, the supplier may request a hearing on the termination.

(2) *Submission of a CAP.* (i) A corrective action plan must be submitted within 30 days from the date on the notification letter. If the supplier decides not to submit a corrective action plan the supplier may within 30 days of the date on the termination letter request a hearing by a CBIC hearing officer.

(ii) Suppliers will only have the opportunity to submit a CAP when they are first notified that they have been determined to be in breach of contract. If the CAP is not acceptable or properly implemented, suppliers will receive a subsequent termination notice.

(d) *The purpose of the corrective action plan.* (1) For the supplier to eliminate all of the deficiencies that were identified in the notice to terminate its contract to avoid contract termination.

(2) To identify the timeframes by which the supplier will implement each of the components of the CAP.

(e) *Review of the CAP.* (1) The CBIC will review the CAP. Suppliers may only revise their CAP one-time during the review process based on the deficiencies identified by the CBIC. The CBIC will submit a recommendation to CMS concerning whether the CAP includes the steps necessary to remedy the contract deficiencies as identified in the notice of termination.

(2) If CMS accepts the CAP, including supplier's designated timeframe for its completion; the supplier must provide a follow-up report within 5 days after the supplier has fully implemented the CAP that verifies that all of the deficiencies identified in the CAP have been corrected in accordance with the timeframes accepted by CMS.

(3) If the supplier does not implement an acceptable CAP the supplier will receive a subsequent notice that their contract will be terminated within 45 days of the date on that notice.

(f) *Right to request a hearing by the CBIC hearing officer (HO).* (1) A supplier who has received a notice that CMS considers the supplier in breach of contract or that the supplier's CAP is not acceptable has the right to request a hearing before an HO who was not involved with the original determination.

(2) A supplier who wishes to appeal the termination notice must submit a written request to the CBIC. The request for a hearing must be received by the CBIC within 30 days from the date of the notice to terminate.

(3) A request for hearing must be in writing and submitted by an authorized official of the supplier.

(4) The appeals process for the Medicare DMEPOS Competitive Bidding Program is not to be used in place of other existing appeals processes that apply to other parts of the Medicare.

(5) If the supplier is given the opportunity to submit a CAP and a CAP is not submitted and the supplier fails to timely request a hearing, this will result in the termination of the supplier's DMEPOS Competitive Bidding Program contract effective 45 days from the date on the notice to terminate received by the supplier.

(g) *The CBIC Hearing Officer schedules and conducts the hearing.* (1) Within 30 days from the receipt of the supplier's timely request for a hearing the hearing officer will contact the parties to schedule the hearing.

(2) The hearing may be held in person or by telephone at the supplier's request.

(3) The scheduling notice to the parties must indicate the time and place for the hearing and must be sent to the supplier 30 days before the date of the hearing.

(4) The HO may, on his or her own motion, or at the request of a party, change the time and place for the hearing, but must give the parties to the hearing 30 days notice of the change.

(5) The HO's scheduling notice must provide the parties to the hearing and the CBIC the following information:

(i) Description of the hearing procedure.

(ii) The general and specific issues to be resolved.

(iii) The supplier has the burden to prove it is not in violation of the contract.

(iv) The opportunity for parties to the hearing to submit additional evidence to support their positions, if requested by the HO.

(v) All evidence submitted, both from the supplier and CMS, in preparation for the hearing with all affected parties within 15 days prior to the scheduled date of the hearing.

(h) *Burden of proof.* (1) The burden of proof is on the Competitive Bidding Program contract supplier to demonstrate to the HO with convincing evidence that it has not breached its contract or that termination is not appropriate.

(2) The supplier's supporting evidence must be submitted with its request for a hearing.

(3) If the Medicare DMEPOS supplier fails to submit this evidence at the time of its submission, the Medicare DMEPOS supplier is precluded from introducing new evidence later during the hearing process, unless permitted by the hearing officer.

(4) CMS also has the opportunity to submit evidence to the HO within 10 days of receiving a notice announcing the hearing.

(5) The HO will share all evidence submitted by the supplier and/or CMS, with all parties to the hearing and the

CBIC within 15 days prior to the scheduled date of the hearing.

(i) *Role of the Hearing Officer.* The HO will conduct a thorough and independent review of the evidence including the information and documentation submitted for the hearing and other information that the HO considers pertinent for the hearing. The role of the HO includes, at a minimum, the following:

(1) Conducts the hearing and decides the order in which the evidence and the arguments of the parties are presented;

(2) Determines the rules on admissibility of the evidence;

(3) Examines the witnesses, in addition to the examinations conducted by CMS and the contract supplier;

(4) The CBIC may assist CMS in the appeals process including being present at the hearing, testifying as a witness, or performing other, related ministerial duties.

(5) Determines the rules for requesting documents and other evidence from other parties;

(6) Ensures a complete record of the hearing is made available to all parties to the hearing;

(7) Prepares a file of the record of the hearing which includes all evidence submitted as well as any relevant documents identified by the HO and considered as part of the hearing; and

(8) Complies with all applicable provisions of 42 USC Title 18 and related provisions of the Act, the applicable regulations issued by the Secretary, and manual instructions issued by CMS.

(j) *Hearing Officer recommendation.* (1) The HO will issue a written recommendation to CMS within 30 days of the close of the hearing unless an extension has been granted by CMS because the HO has demonstrated that an extension is needed due to the complexity of the matter or heavy workload.

(2) The recommendation will explain the basis and the rationale for the HO's recommendation.

(3) The hearing officer must include the record of the hearing, along with all evidence and documents produced during the hearing along with its recommendation.

(k) *CMS' final determination.* (1) CMS' review of the HO recommendation will not allow the supplier to submit new information.

(2) After reviewing the HO recommendation, CMS' decision will be made within 30 days from the date of receipt of the HO's recommendation.

(3) A CMS decision to terminate will indicate the effective date of the termination.

(4) This decision is final and binding.

(l) *Effect of contract termination.* A contract supplier whose contract has been terminated—

(1) All locations included in the contract can no longer furnish competitive bid items to beneficiaries within a CBA and the supplier cannot be reimbursed by Medicare for these items after the effective date of the termination.

(2) Must notify all beneficiaries who are receiving rented competitive bid items or competitive bid items received on a recurring basis, of the termination of their contract.

(i) The notice to the beneficiary from the supplier whose contract was terminated must be provided within 15 days of receipt of the final notice of termination.

(ii) The notification to the beneficiaries must inform the beneficiaries that they are going to have to select a new contract supplier to furnish these items in order for Medicare to pay these items.

(m) *Effective date of the contract termination.* (1) A supplier's DMEPOS CBP contract is terminated effective on the termination date specified in the notice to the supplier, unless the supplier timely requests a hearing with the HO or the supplier has submitted a CAP under paragraph (c) of this section.

(2) If a supplier requests an HO review of the CMS decision to terminate its contract, and CMS based upon the HO's recommendation terminates the supplier's contract, the effective date of the termination will be the date specified in the post-hearing notice to the supplier indicating CMS's final determination to terminate the contract.

(3) For violations of the terms of the supplier's DMEPOS CBP contract that may harm beneficiaries, such as a supplier providing an inferior product that causes harm to the beneficiary, no delays of the effective date of the termination will be allowed.

Subpart H —Fee Schedule for Ambulance Services

■ 39. Section 414.610 is amended as follows:

■ A. Revising paragraph (c)(1)(i).

■ B. Redesignating (c)(1)(ii) as (c)(1)(iii).

■ C. Adding a new paragraph (c)(1)(ii).

■ D. Revising paragraphs (c)(5)(ii), (f), and (h).

The revisions and addition read as follows:

§ 414.610 Basis of payments.

* * * * *

(c) * * *

(1) * * *

(i) For services furnished during the period July 1, 2004 through December 31, 2006, ambulance services originating in—

(A) Urban areas (both base rate and mileage) are paid based on a rate that is 1 percent higher than otherwise is applicable under this section; and

(B) Rural areas (both base rate and mileage) are paid based on a rate that is 2 percent higher than otherwise is applicable under this section.

(ii) For services furnished during the period July 1, 2008 through December 31, 2010, ambulance services originating in—

(A) Urban areas (both base rate and mileage) are paid based on a rate that is 2 percent higher than otherwise is applicable under this section;

(B) Rural areas (both base rate and mileage) are paid based on a rate that is 3 percent higher than otherwise is applicable under this section.

* * * * *

(5) * * *

(ii) For services furnished during the period July 1, 2004 through December 31, 2010, the payment amount for the ground ambulance base rate is increased by 22.6 percent where the point of pickup is in a rural area determined to be in the lowest 25 percent of rural population arrayed by population density. The amount of this increase is based on CMS's estimate of the ratio of the average cost per trip for the rural areas in the lowest quartile of population compared to the average cost per trip for the rural areas in the highest quartile of population. In making this estimate, CMS may use data provided by the GAO.

* * * * *

(f) *Updates.* The CF, the air ambulance base rates, and the mileage rates are updated annually by an inflation factor established by law. The inflation factor is based on the consumer price index for all urban consumers (CPI–U) (U.S. city average) for the 12-month period ending with June of the previous year and, for 2011 and each subsequent year, is reduced by the productivity adjustment described in section 1886(b)(3)(B)(xi)(II) of the Act.

* * * * *

(h) *Treatment of certain areas for payment for air ambulance services.* Any area that was designated as a rural area for purposes of making payments under the ambulance fee schedule for air ambulance services furnished on December 31, 2006, must be treated as a rural area for purposes of making payments under the ambulance fee schedule for air ambulance services

furnished during the period July 1, 2008 through December 31, 2010.

■ 40. Section 414.620 is revised to read as follows:

§ 414.620 Publication of the ambulance fee schedule.

(a) Changes in payment rates resulting from incorporation of the annual inflation factor and the productivity adjustment as described in § 414.610(f) will be announced by CMS by instruction and on the CMS Web site.

(b) CMS will follow applicable rulemaking procedures in publishing revisions to the fee schedule for ambulance services that result from any factors other than those described in § 414.610(f).

Subpart J—Submission of Manufacturer's Average Sales Price Data

■ 41. Section 414.804 is amended by—

■ A. Redesignating paragraph (a)(6) as (a)(7).

■ B. Adding new paragraph (a)(6).

■ C. Reserving paragraph (b).

■ The addition reads as follows:

§ 414.804 Basis of payment.

(a) * * *

(6) The manufacturer's average sales price must be calculated based on the amount of product in a vial or other container as conspicuously reflected on the FDA approved label as defined by section 201(k) of the Food, Drug, and Cosmetic Act.

(b) [Reserved]

Subpart K—Payment for Drugs and Biologicals Under Part B

■ 42. Section 414.902 is amended by adding the definitions of "Biosimilar biological product" and "Reference biological product" in alphabetical order to read as follows:

§ 414.902 Definitions.

* * * * *

Biosimilar biological product means a biological product approved under an abbreviated application for a license of a biological product that relies in part on data or information in an application for another biological product licensed under section 351 of the Public Health Service Act (PHSA) as defined at section 1847A(c)(6)(H) of the Act.

* * * * *

Reference biological product means the biological product licensed under such section 351 of the PHSA that is referred to in the application of the biosimilar biological product as defined at section 1847A(c)(6)(I) of the Act.

* * * * *

■ 43. Section 414.904 is amended by—

■ A. Adding paragraphs (a)(3), (i), and (j).

■ B. Revising paragraph (d)(3).

The revisions and additions read as follows:

§ 414.904 Average sales price as the basis for payment.

(a) * * *

(3) For purposes of this paragraph—

(i) CMS calculates an average sales price payment limit based on the amount of product included in a vial or other container as reflected on the FDA-approved label.

(ii) Additional product contained in the vial or other container does not represent a cost to providers and is not incorporated into the ASP payment limit.

(iii) No payment is made for amounts of product in excess of that reflected on the FDA-approved label.

* * * * *

(d) * * *

(3) *Widely available market price and average manufacturer price.* If the Inspector General finds that the average sales price exceeds the widely available market price or the average manufacturer price by 5 percent or more in CYs 2005 through 2011 the payment limit in the quarter following the transmittal of this information to the Secretary is the lesser of the widely available market price or 103 percent of the average manufacturer price.

* * * * *

(i) If manufacturer ASP data is not available prior to the publication deadline for quarterly payment limits and the unavailability of manufacturer ASP data significantly changes the quarterly payment limit for the billing code when compared to the prior quarter's billing code payment limit, the payment limit is calculated by carrying over the most recent available manufacturer ASP price from a previous quarter for an NDC in the billing code, adjusted by the weighted average of the change in the manufacturer ASPs for the NDCs that were reported for both the most recently available previous quarter and the current quarter.

(j) *Biosimilar biological products.* Effective July 1, 2010, the payment amount for a biosimilar biological drug product (as defined in § 414.902 of this subpart) is the sum of the average sales price of all NDCs assigned to the biosimilar biological product as determined under section 1847A(b)(6) of the Act and 6 percent of the amount determined under section 1847A(b)(4) of the Act for the reference drug product (as defined in § 414.902 of this subpart).

PART 415—SERVICES FURNISHED BY PHYSICIANS IN PROVIDERS, SUPERVISING PHYSICIANS IN TEACHING SETTINGS, AND RESIDENTS IN CERTAIN SETTINGS

■ 44. The authority citation for part 415 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

Subpart C—Part B Carrier Payments for Physician Services to Beneficiaries in Providers

■ 45. Section 415.130 is amended by revising paragraph (d) to read as follows:

§ 415.130 Conditions for payment: Physician pathology services.

* * * * *

(d) *Physician pathology services furnished by an independent laboratory.*

(1) The technical component of physician pathology services furnished by an independent laboratory to a hospital inpatient or outpatient on or before December 31, 2010, may be paid to the laboratory by the contractor under the physician fee schedule if the Medicare beneficiary is a patient of a covered hospital as defined in paragraph (a)(1) of this section.

(2) For services furnished after December 31, 2010, an independent laboratory may not bill the Medicare contractor for the technical component of physician pathology services furnished to a hospital inpatient or outpatient.

(3) For services furnished on or after January 1, 2008, the date of service policy in § 414.510 of this chapter applies to the TC of specimens for physician pathology services.

PART 424—CONDITIONS FOR MEDICARE PAYMENT

■ 46. The authority citation for part 424 continues to read as follows:

Authority: Secs. 1102 and 1871 of the Social Security Act (42 U.S.C. 1302 and 1395hh).

Subpart B—Certification and Plan of Treatment Requirements

■ 47. Section 424.20 is amended by revising paragraph (e)(2) to read as follows:

§ 424.20 Requirements for posthospital SNF care.

* * * * *

(e) * * *

(2) A physician extender (that is, a nurse practitioner, a clinical nurse

specialist, or a physician assistant as those terms are defined in section 1861(aa)(5) of the Act) who does not have a direct or indirect employment relationship with the facility but who is working in collaboration with a physician. For purposes of this section—

(i) *Collaboration.* (A) Collaboration means a process whereby a physician extender works with a doctor of medicine or osteopathy to deliver health care services.

(B) The services are delivered within the scope of the physician extender's professional expertise, with medical direction and appropriate supervision as provided for in guidelines jointly developed by the physician extender and the physician or other mechanisms defined by Federal regulations and the law of the State in which the services are performed.

(ii) *Types of employment relationships.* (A) *Direct employment relationship.* A direct employment relationship with the facility is one in which the physician extender meets the common law definition of the facility's "employee," as specified in § 404.1005, § 404.1007, and § 404.1009 of title 20 of the regulations. When a physician extender meets this definition with respect to an entity other than the facility itself, and that entity has an agreement with the facility for the provision of nursing services under § 409.21 of this subchapter, the facility is considered to have an indirect employment relationship with the physician extender.

(B) *Indirect employment relationship.* (*1*) When a physician extender meets the definition of a direct employment relationship in paragraph (e)(2)(ii)(A) of this section with respect to an entity other than the facility itself, and that entity has an agreement with the facility for the provision of nursing services under § 409.21 of this subchapter, the facility is considered to have an indirect employment relationship with the physician extender.

(*2*) An indirect employment relationship does not exist if the agreement between the entity and the facility involves only the performance of delegated physician tasks under § 483.40(e) of this chapter.

* * * * *

Subpart C—Claims for Payment

■ 48. Section 424.44 is amended by revising paragraphs (a), (b), and (e) to read as follows:

§ 424.44 Time limits for filing claims.

(a) *Time limits.* (1) Except as provided in paragraphs (b) and (e) of this section, for services furnished on or after January 1, 2010, the claim must be filed no later than the close of the period ending 1 calendar year after the date of service.

(2) Except as provided in paragraphs (b) and (e) of this section and except for services furnished during the last 3 months of 2009, for services furnished before January 1, 2010, the claim must be filed—

(i) On or before December 31 of the following year for services that were furnished during the first 9 months of a calendar year; and

(ii) On or before December 31st of the second following year for services that were furnished during the last 3 months of the calendar year.

(3) For services furnished during the last 3 months of CY 2009 all claims must be filed no later than December 31, 2010.

(b) *Exceptions to time limits.* Exceptions to the time limits for filing claims include the following:

(1) The time for filing a claim will be extended if CMS or one of its contractors determines that a failure to meet the deadline in paragraph (a) of this section was caused by error or misrepresentation of an employee, Medicare contractor (including Medicare Administrative Contractor, intermediary, or carrier), or agent of HHS that was performing Medicare functions and acting within the scope of its authority.

(2) The time for filing a claim will be extended if CMS or one of its contractors determines that a failure to meet the deadline in paragraph (a) of this section is caused by all of the following conditions:

(i) At the time the service was furnished the beneficiary was not entitled to Medicare.

(ii) The beneficiary subsequently received notification of Medicare entitlement effective retroactively to or before the date of the furnished service.

(3) The time for filing a claim will be extended if CMS or one of its contractors determines that a failure to meet the deadline in paragraph (a) of this section is caused by all of the following conditions:

(i) At the time the service was furnished the beneficiary was not entitled to Medicare.

(ii) The beneficiary subsequently received notification of Medicare entitlement effective retroactively to or before the date of the furnished service.

(iii) A State Medicaid agency recovered the Medicaid payment for the furnished service from a provider or supplier 6 months or more after the service was furnished.

(4) The time for filing a claim will be extended if CMS or one of its contractors determines that a failure to meet the deadline in paragraph (a) of this section is caused by all of the following conditions:

(i) At the time the service was furnished the beneficiary was enrolled in a Medicare Advantage plan or Program of All-inclusive Care for the Elderly (PACE) provider organization.

(ii) The beneficiary was subsequently disenrolled from the Medicare Advantage plan or Program of All-inclusive Care for the Elderly (PACE) provider organization effective retroactively to or before the date of the furnished service.

(iii) The Medicare Advantage plan or Program of All-inclusive Care for the Elderly (PACE) provider organization recovered its payment for the furnished service from a provider or supplier 6 months or more after the service was furnished.

(5) *Extension of time.* (i) If CMS or one of its contractors determines that a failure to meet the deadline specified in paragraph (a) of this section was caused by error or misrepresentation of an employee, Medicare contractor (including Medicare Administrative Contractor, intermediary, or carrier), or agent of HHS that was performing Medicare functions and acting within the scope of its authority, the time to file a claim will be extended through the last day of the sixth calendar month following the month in which either the beneficiary or the provider or supplier received notification that the error or misrepresentation referenced in paragraph (b)(1) of this section was corrected. No extension of time will be granted for paragraph (b)(1) when the request for that exception is made to CMS or one of its contractors more than 4 years after the date of service.

(ii) If CMS or one of its contractors determines that both of the conditions are met in paragraph (b)(2) of this section but that all of the conditions in paragraph (b)(3) are not satisfied, the time to file a claim will be extended through the last day of the sixth calendar month following the month in which either the beneficiary or the provider or supplier received notification of Medicare entitlement effective retroactively to or before the date of the furnished service.

(iii) If CMS or one of its contractors determines that all of the conditions are met in paragraph (b)(3) of this section, the time to file a claim will be extended through the last day of the sixth

calendar month following the month in which the State Medicaid agency recovered the Medicaid payment for the furnished service from the provider or supplier.

(iv) If CMS or one of its contractors determines that all of the conditions are met in paragraph (b)(4) of this section, the time to file a claim will be extended through the last day of the sixth calendar month following the month in which the Medicare Advantage plan or Program of All-inclusive Care for the Elderly (PACE) provider organization recovered its payment for the furnished service from the provider or supplier.

* * * * *

(e) As specified in § 424.520 and § 424.521 of this subpart, there are restrictions on the ability of the following newly-enrolled suppliers to submit claims for items or services furnished prior to the effective date of their Medicare billing privileges:

(1) Physician or nonphysician practitioner organizations.

(2) Physicians.

(3) Nonphysician practitioners.

(4) Independent diagnostic testing facilities.

* * * * *

Subpart P—Requirements for Establishing and Maintaining Medicare Billing Privileges

■ 49. Section 424.502 is amended by adding a definition of "Voluntary termination" to read as follows:

§ 424.502 Definitions.

* * * * *

Voluntary termination means that a provider or supplier, including an individual physician or nonphysician practitioner, submits written confirmation to CMS of its decision to discontinue enrollment in the Medicare program.

■ 50. Section 424.510 is amended by revising paragraph (d)(2)(iii) to read as follows:

§ 424.510 Requirements for enrolling in the Medicare program.

(d) * * *

(2) * * *

(iii) Submission of all documentation, including—

(A) All applicable Federal and State licenses, certifications including, but not limited to Federal Aviation Administration; and

(B) Documentation associated with regulatory and statutory requirements necessary to establish a provider's or supplier's eligibility to furnish Medicare covered items or services to beneficiaries in the Medicare program.

■ 51. Section 424.516 is amended by adding a new paragraph (e)(3) to read as follows:

§ 424.516 Additional provider and supplier requirements for enrolling and maintaining active enrollment status in the Medicare program.

(e) * * *

(3) Within 30 days of any revocation or suspension of a Federal or State license or certification including Federal Aviation Administration certifications, an air ambulance supplier must report a revocation or suspension of its license or certification to the applicable Medicare contractor. The following FAA certifications must be reported:

(i) Specific pilot certifications including but not limited to instrument and medical certifications.

(ii) Airworthiness certification.

* * * * *

Authority: Catalog of Federal Domestic Assistance Program No. 93.773, Medicare—Hospital Insurance; and Program No. 93.774, Medicare—Supplementary Medical Insurance Program.

Dated: October 26, 2010.

Donald M. Berwick,

Administrator, Centers for Medicare & Medicaid Services.

Approved: October 29, 2010.

Kathleen Sebelius,

Secretary, Department of Health and Human Services.

Addendum A: Explanation and Use of Addenda B and C

The Addenda on the following pages provide various data pertaining to the Medicare fee schedule for physicians' services furnished in CY 2011. Addendum B contains the RVUs for work, nonfacility PE, facility PE, and malpractice expense, and other information for all services included in the PFS. Addendum C contains the list of HCPCS codes that have interim work, PE, and/or malpractice expense RVUs for CY 2011 and are open for comment on this final rule with comment period.

(1) Addendum B, CY 2011 Relative Value Units and Related Information Used in Determining Medicare Payments

In previous years, we have listed many services in Addendum B that are not paid under the PFS. To avoid publishing as many pages of codes for these services, we are not including clinical laboratory codes or the alpha-numeric codes (Healthcare Common Procedure Coding System (HCPCS) codes not included in CPT) not paid under the PFS in Addendum B.

Addendum B contains the following information for each CPT code and alpha-numeric HCPCS code, except for: alpha-numeric codes beginning with B (enteral and parenteral therapy); E (durable medical equipment); K (temporary codes for nonphysicians' services or items); or L (orthotics); and codes for anesthesiology. Please also note the following:

- An "NA" in the "Nonfacility PE RVUs" column of Addendum B means that CMS has not developed a PE RVU in the nonfacility setting for the service because it is typically performed in the hospital (for example, an open heart surgery is generally performed in the hospital setting and not a physician's office). If there is an "NA" in the nonfacility PE RVU column, and the contractor determines that this service can be performed in the nonfacility setting, the service will be paid at the facility PE RVU rate.
- Services that have an "NA" in the "Facility PE RVUs" column of Addendum B are typically not paid under the PFS when provided in a facility setting. These services (which include "incident to" services and the technical portion of diagnostic tests) are generally paid under either the hospital outpatient prospective payment system or bundled into the hospital inpatient prospective payment system payment. In some cases, these services may be paid in a facility setting at the PFS rate (for example, therapy services), but there would be no payment made to the practitioner under the PFS in these situations.

1. *CPT/HCPCS code.* This is the CPT or alpha-numeric HCPCS number for the service. Alpha-numeric HCPCS codes are included at the end of this Addendum.

2. *Modifier.* A modifier is shown if there is a technical component (modifier TC) and a professional component (PC) (modifier-26) for the service. If there is a PC and a TC for the service, Addendum B contains three entries for the code. A code for: the global values (both professional and technical); modifier-26 (PC); and modifier TC. The global service is not designated by a modifier, and physicians must bill using the code without a modifier if the physician furnishes both the PC and the TC of the service. Modifier-53 is shown for a discontinued procedure, for example, a colonoscopy that is not completed. There will be RVUs for a code with this modifier.

3. *Status indicator.* This indicator shows whether the CPT/HCPCS code is included in the PFS and whether it is separately payable if the service is covered. An explanation of types of status indicators follows:

A = Active code. These codes are separately payable under the PFS if covered. There will be RVUs for codes with this status. The presence of an "A" indicator does not mean that Medicare has made a national coverage determination regarding the service. Contractors remain responsible for coverage decisions in the absence of a national Medicare policy.

B = Bundled code. Payments for covered services are always bundled into payment for other services not specified. If RVUs are shown, they are not used for Medicare payment. If these services are covered, payment for them is subsumed by the payment for the services to which they are incident (for example, a telephone call from a hospital nurse regarding care of a patient).

C = Contractors price the code. Contractors establish RVUs and payment amounts for these services, generally on an individual case basis following review of documentation, such as an operative report.

E = Excluded from the PFS by regulation. These codes are for items and services that

CMS chose to exclude from the PFS by regulation. No RVUs are shown, and no payment may be made under the PFS for these codes. Payment for them, when covered, continues under reasonable charge procedures.

I = Not valid for Medicare purposes. Medicare uses another code for the reporting of, and the payment for these services. (Codes not subject to a 90 day grace period.)

M = Measurement codes, used for reporting purposes only. There are no RVUs and no payment amounts for these codes. CMS uses them to aid with performance measurement. No separate payment is made. These codes should be billed with a zero (($0.00) charge and are denied) on the MPFSDB.

N = Non-covered service. These codes are noncovered services. Medicare payment may not be made for these codes. If RVUs are shown, they are not used for Medicare payment.

R = Restricted coverage. Special coverage instructions apply. If the service is covered and no RVUs are shown, it is contractor-priced.

T = There are RVUs for these services, but they are only paid if there are no other services payable under the PFS billed on the same date by the same provider. If any other services payable under the PFS are billed on the same date by the same provider, these services are bundled into the service(s) for which payment is made.

X = Statutory exclusion. These codes represent an item or service that is not within the statutory definition of "physicians' services" for PFS payment purposes. No RVUs are shown for these codes, and no payment may be made under the PFS, (for example, ambulance services and clinical diagnostic laboratory services.)

4. *Description of code.* This is the code's short descriptor, which is an abbreviated version of the narrative description of the code.

5. *Physician work RVUs.* These are the RVUs for the physician work in CY 2011.

6. *Fully implemented nonfacility PE RVUs.* These are the fully implemented resource-based PE RVUs for nonfacility settings.

7. *CY 2011 transitional nonfacility PE RVUs.* These are the CY 2011 resource-based PE RVUs for nonfacility settings.

8. *Fully implemented facility PE RVUs.* These are the fully implemented resource-based PE RVUs for facility settings.

9. *CY 2011 Transitional facility PE RVUs.* These are the CY 2011 resource-based PE RVUs for facility settings.

10. *Malpractice expense RVUs.* These are the RVUs for the malpractice expense for CY 2011.

Note: The BN reduction resulting from the chiropractic demonstration is not reflected in the RVUs for CPT codes 98940, 98941, and 98942. The required reduction will only be reflected in the files used for Medicare payment.

11. *Global period.* This indicator shows the number of days in the global period for the code (0, 10, or 90 days). An explanation of the alpha codes follows:

MMM = Code describes a service furnished in uncomplicated maternity cases, including ante partum care, delivery, and postpartum care. The usual global surgical concept does not apply. See the Physicians' Current Procedural Terminology for specific definitions.

XXX = The global concept does not apply.

YYY = The global period is to be set by the contractor (for example, unlisted surgery codes).

ZZZ = Code related to another service that is always included in the global period of the other service. (Note: Physician work and PE are associated with intra-service time and, in some instances, with the post-service time.)

(2) Addendum C, Codes with Interim RVUs

Addendum C, Codes with Interim RVUs, includes the columns and indicators described above for Addendum B, plus an additional column to indicate which component, or components, of each code's RVUs are interim final for CY 2011 and, therefore, open for public comment: work, PE, and/or malpractice expense. This column, headed "RVUs Open for Comment" and located between the columns for the "Description" and "Physician Work RVUs," displays the indicators below.

W = Physician work RVUs are interim for CY 2011 and open for comment.

PE = Nonfacility and facility PE RVUs are interim for CY 2011 and open for comment.

MP = Malpractice expense RVUs are interim for CY 2011 and open for comment.

* Indicates multiple contractors.
** GAF reflects a 1.5 work GPCI floor in Alaska established by the MIPPA.
*** 2011 GAF reflects a 1.0 PE GPCI floor for frontier states as required by the ACA.
[1] 2010 GAF equation: (0.52466*work GPCI)+(0.43669*PE GPCI)+(0.03865*MP GPCI).
2010 GAF contains a 1.0 work GPCI floor and reflects a limited recognition of cost differences for the rent and employee compensation components of the PE GPCI and hold harmless provision as required by the ACA.
[2] 2011 GAF equation: (0.52466*work GPCI)+(0.43669*PE GPCI)+(0.03865*MP GPCI).
2011 GAF does not contain a 1.0 work GPCI floor which expires December 31, 2010 as required by the ACA.
2011 GAF reflects a limited recognition of cost differences for the rent and employee compensation components of the PE GPCI, hold harmless provision and 1.0 PE GPCI floor for frontier States as required by the ACA.

[1] 2010 work GPCI reflects a 1.0 floor required by the ACA.
[2] 2010 and 2011 PE GPCI reflects a limited recognition of cost differences for the rent and employee compensation components and application of the hold harmless provision as required by ACA.
[3] 2011 and 2012 work GPCI does not reflect a 1.0 floor which expires December 31, 2010 as required by the ACA.
[4] 2012 PE GPCI does not reflect a limited recognition of cost differences for the rent and employee compensation components which expires December 31, 2011 as required by the ACA.
* Indicates multiple contractors.
** Work GPCI reflects a 1.5 floor in Alaska established by the MIPPA.
*** 2011 and 2012 PE GPCIs reflect a 1.0 floor for frontier states as required by the ACA.
**** 2011 GPCIs are the first year of the update transition, 2012 GPCIs are the fully implemented updated GPCIs.
2011 work GPCI transition: ½ the difference between 2010 (without 1.0 work GPCI floor) and 2012 work GPCI.
2011 PE GPCI transition (and hold harmless as required by the ACA): Greater of ½ the difference between 2010 PE GPCI and 2012 PE GPCI with limited recognition of cost differences for the rent and employee compensation components (as required by ACA) or ½ the difference between 2010 PE GPCI and 2012 PE GPCI without the limited recognition of cost differences for the rent and employee compensation components.
2011 MP GPCI transition: ½ the difference between 2010 MP GPCI and 2012 MP GPCI.

75573	Ct hrt w/3d image, congen
75574	Ct angio hrt w/3d image
75574	Ct angio hrt w/3d image
75635	Ct angio abdominal arteries
76604	Us exam, chest
76700	Us exam, abdom, complete
76705	Echo exam of abdomen
76770	Us exam abdo back wall, comp
76775	Us exam abdo back wall, lim
76776	Us exam k transpl w/doppler
76831	Echo exam, uterus
76856	Us exam, pelvic, complete
76857	Us exam, pelvic, limited
76870	Us exam, scrotum
77058	Mri, one breast
77059	Mri, both breasts

ADDENDUM G: CPT/HCPCS IMAGING CODES DEFINED BY SECTION 5102(b) OF THE DRA

CPT/HCPCS Code	Short Descriptor
70015	Contrast x-ray of brain
70030	X-ray eye for foreign body
70100	X-ray exam of jaw
70110	X-ray exam of jaw
70120	X-ray exam of mastoids
70130	X-ray exam of mastoids
70134	X-ray exam of middle ear
70140	X-ray exam of facial bones
70150	X-ray exam of facial bones
70160	X-ray exam of nasal bones
70170	X-ray exam of tear duct
70190	X-ray exam of eye sockets
70200	X-ray exam of eye sockets
70210	X-ray exam of sinuses
70220	X-ray exam of sinuses
70240	X-ray exam, pituitary saddle
70250	X-ray exam of skull
70260	X-ray exam of skull
70300	X-ray exam of teeth
70310	X-ray exam of teeth
70320	Full mouth x-ray of teeth
70328	X-ray exam of jaw joint
70330	X-ray exam of jaw joints
70332	X-ray exam of jaw joint
70336	Magnetic image, jaw joint
70350	X-ray head for orthodontia
70355	Panoramic x-ray of jaws
70360	X-ray exam of neck
70370	Throat x-ray & fluoroscopy
70371	Speech evaluation, complex
70373	Contrast x-ray of larynx
70380	X-ray exam of salivary gland
70390	X-ray exam of salivary duct
70450	Ct head/brain w/o dye
70460	Ct head/brain w/dye
70470	Ct head/brain w/o & w/dye
70480	Ct orbit/ear/fossa w/o dye
70481	Ct orbit/ear/fossa w/dye
70482	Ct orbit/ear/fossa w/o&w/dye
70486	Ct maxillofacial w/o dye
70487	Ct maxillofacial w/dye
70488	Ct maxillofacial w/o & w/dye
70490	Ct soft tissue neck w/o dye
70491	Ct soft tissue neck w/dye
70492	Ct sft tsue nck w/o & w/dye
70496	Ct angiography, head
70498	Ct angiography, neck
70540	Mri orbit/face/neck w/o dye
70542	Mri orbit/face/neck w/dye
70543	Mri orbt/fac/nck w/o & w/dye
70544	Mr angiography head w/o dye
70545	Mr angiography head w/dye
70546	Mr angiograph head w/o&w/dye
70547	Mr angiography neck w/o dye
70548	Mr angiography neck w/dye
70549	Mr angiograph neck w/o&w/dye
70551	Mri brain w/o dye
70552	Mri brain w/dye
70553	Mri brain w/o & w/dye
70557	Mri brain w/o dye
70558	Mri brain w/dye
70559	Mri brain w/o & w/dye
71010	Chest x-ray
71015	Chest x-ray
71020	Chest x-ray
71021	Chest x-ray
71022	Chest x-ray
71023	Chest x-ray and fluoroscopy
71030	Chest x-ray
71034	Chest x-ray and fluoroscopy
71035	Chest x-ray
71040	Contrast x-ray of bronchi
71060	Contrast x-ray of bronchi
71090	X-ray & pacemaker insertion

CPT/HCPCS Code	Short Descriptor
71100	X-ray exam of ribs
71101	X-ray exam of ribs/chest
71110	X-ray exam of ribs
71111	X-ray exam of ribs/chest
71120	X-ray exam of breastbone
71130	X-ray exam of breastbone
71250	Ct thorax w/o dye
71260	Ct thorax w/dye
71270	Ct thorax w/o & w/dye
71275	Ct angiography, chest
71550	Mri chest w/o dye
71551	Mri chest w/dye
71552	Mri chest w/o & w/dye
71555	Mri angio chest w or w/o dye
72010	X-ray exam of spine
72020	X-ray exam of spine
72040	X-ray exam of neck spine
72050	X-ray exam of neck spine
72052	X-ray exam of neck spine
72069	X-ray exam of trunk spine
72070	X-ray exam of thoracic spine
72072	X-ray exam of thoracic spine
72074	X-ray exam of thoracic spine
72080	X-ray exam of trunk spine
72090	X-ray exam of trunk spine
72100	X-ray exam of lower spine
72110	X-ray exam of lower spine
72114	X-ray exam of lower spine
72120	X-ray exam of lower spine
72125	Ct neck spine w/o dye
72126	Ct neck spine w/dye
72127	Ct neck spine w/o & w/dye
72128	Ct chest spine w/o dye
72129	Ct chest spine w/dye
72130	Ct chest spine w/o & w/dye
72131	Ct lumbar spine w/o dye
72132	Ct lumbar spine w/dye
72133	Ct lumbar spine w/o & w/dye

CPT/HCPCS Code	Short Descriptor
72141	Mri neck spine w/o dye
72142	Mri neck spine w/dye
72146	Mri chest spine w/o dye
72147	Mri chest spine w/dye
72148	Mri lumbar spine w/o dye
72149	Mri lumbar spine w/dye
72156	Mri neck spine w/o & w/dye
72157	Mri chest spine w/o & w/dye
72158	Mri lumbar spine w/o & w/dye
72159	Mr angio spine w/o&w/dye
72170	X-ray exam of pelvis
72190	X-ray exam of pelvis
72191	Ct angiograph pelv w/o&w/dye
72192	Ct pelvis w/o dye
72193	Ct pelvis w/dye
72194	Ct pelvis w/o & w/dye
72195	Mri pelvis w/o dye
72196	Mri pelvis w/dye
72197	Mri pelvis w/o & w/dye
72198	Mr angio pelvis w/o & w/dye
72200	X-ray exam sacroiliac joints
72202	X-ray exam sacroiliac joints
72220	X-ray exam of tailbone
72240	Contrast x-ray of neck spine
72255	Contrast x-ray, thorax spine
72265	Contrast x-ray, lower spine
72270	Contrast x-ray, spine
72275	Epidurography
72285	X-ray c/t spine disk
72291	Percut vertebroplasty fluor
72295	X-ray of lower spine disk
73000	X-ray exam of collar bone
73010	X-ray exam of shoulder blade
73020	X-ray exam of shoulder
73030	X-ray exam of shoulder
73040	Contrast x-ray of shoulder
73050	X-ray exam of shoulders
73060	X-ray exam of humerus

CPT/HCPCS Code	Short Descriptor
73070	X-ray exam of elbow
73080	X-ray exam of elbow
73085	Contrast x-ray of elbow
73090	X-ray exam of forearm
73092	X-ray exam of arm, infant
73100	X-ray exam of wrist
73110	X-ray exam of wrist
73115	Contrast x-ray of wrist
73120	X-ray exam of hand
73130	X-ray exam of hand
73140	X-ray exam of finger(s)
73200	Ct upper extremity w/o dye
73201	Ct upper extremity w/dye
73202	Ct uppr extremity w/o&w/dye
73206	Ct angio upr extrm w/o&w/dye
73218	Mri upper extremity w/o dye
73219	Mri upper extremity w/dye
73220	Mri uppr extremity w/o&w/dye
73221	Mri joint upr extrem w/o dye
73222	Mri joint upr extrem w/dye
73223	Mri joint upr extr w/o&w/dye
73225	Mr angio upr extr w/o&w/dye
73500	X-ray exam of hip
73510	X-ray exam of hip
73520	X-ray exam of hips
73525	Contrast x-ray of hip
73530	X-ray exam of hip
73540	X-ray exam of pelvis & hips
73542	X-ray exam, sacroiliac joint
73550	X-ray exam of thigh
73560	X-ray exam of knee, 1 or 2
73562	X-ray exam of knee, 3
73564	X-ray exam, knee, 4 or more
73565	X-ray exam of knees
73580	Contrast x-ray of knee joint
73590	X-ray exam of lower leg
73592	X-ray exam of leg, infant
73600	X-ray exam of ankle

CPT/HCPCS Code	Short Descriptor
73610	X-ray exam of ankle
73615	Contrast x-ray of ankle
73620	X-ray exam of foot
73630	X-ray exam of foot
73650	X-ray exam of heel
73660	X-ray exam of toe(s)
73700	Ct lower extremity w/o dye
73701	Ct lower extremity w/dye
73702	Ct lwr extremity w/o&w/dye
73706	Ct angio lwr extr w/o&w/dye
73718	Mri lower extremity w/o dye
73719	Mri lower extremity w/dye
73720	Mri lwr extremity w/o&w/dye
73721	Mri jnt of lwr extre w/o dye
73722	Mri joint of lwr extr w/dye
73723	Mri joint lwr extr w/o&w/dye
73725	Mr ang lwr ext w or w/o dye
74000	X-ray exam of abdomen
74010	X-ray exam of abdomen
74020	X-ray exam of abdomen
74022	X-ray exam series, abdomen
74150	Ct abdomen w/o dye
74160	Ct abdomen w/dye
74170	Ct abdomen w/o & w/dye
74175	Ct angio abdom w/o & w/dye
74176	Ct abd & pelvis w/o contrast
74177	Ct abdomen & pelvis w/ contrast
74178	Ct abd & pelv 1+ section/regns
74181	Mri abdomen w/o dye
74182	Mri abdomen w/dye
74183	Mri abdomen w/o & w/dye
74185	Mri angio, abdom w orw/o dye
74190	X-ray exam of peritoneum
74210	Contrst x-ray exam of throat
74220	Contrast x-ray, esophagus
74230	Cine/vid x-ray, throat/esoph
74235	Remove esophagus obstruction
74240	X-ray exam, upper gi tract

CPT/HCPCS Code	Short Descriptor
74241	X-ray exam, upper gi tract
74245	X-ray exam, upper gi tract
74246	Contrst x-ray uppr gi tract
74247	Contrst x-ray uppr gi tract
74249	Contrst x-ray uppr gi tract
74250	X-ray exam of small bowel
74251	X-ray exam of small bowel
74260	X-ray exam of small bowel
74261	Ct colonography, w/o dye
74262	Ct colonography, w/dye
74270	Contrast x-ray exam of colon
74280	Contrast x-ray exam of colon
74283	Contrast x-ray exam of colon
74290	Contrast x-ray, gallbladder
74291	Contrast x-rays, gallbladder
74300	X-ray bile ducts/pancreas
74301	X-rays at surgery add-on
74305	X-ray bile ducts/pancreas
74320	Contrast x-ray of bile ducts
74327	X-ray bile stone removal
74328	X-ray bile duct endoscopy
74329	X-ray for pancreas endoscopy
74330	X-ray bile/panc endoscopy
74340	X-ray guide for GI tube
74355	X-ray guide, intestinal tube
74360	X-ray guide, GI dilation
74363	X-ray, bile duct dilation
74400	Contrst x-ray, urinary tract
74410	Contrst x-ray, urinary tract
74415	Contrst x-ray, urinary tract
74420	Contrst x-ray, urinary tract
74425	Contrst x-ray, urinary tract
74430	Contrast x-ray, bladder
74440	X-ray, male genital tract
74445	X-ray exam of penis
74450	X-ray, urethra/bladder
74455	X-ray, urethra/bladder
74470	X-ray exam of kidney lesion

CPT/HCPCS Code	Short Descriptor
74475	X-ray control, cath insert
74480	X-ray control, cath insert
74485	X-ray guide, GU dilation
74710	X-ray measurement of pelvis
74740	X-ray, female genital tract
74742	X-ray, fallopian tube
74775	X-ray exam of perineum
75557	Cardiac MRI w/o contrast
75559	Cardiac MRI w/ stress imaging
75561	Cardiac MRI w/ & w/o contrast
75563	Cardiac MRI w/ stress imaging
75565	Card mri vel flw map add-on
75571	Ct hrt w/o dye w/ca test
75572	Ct hrt w/3d image
75573	Ct hrt w/3d image, congen
75574	Ct angio hrt w/3d image
75600	Contrast x-ray exam of aorta
75605	Contrast x-ray exam of aorta
75625	Contrast x-ray exam of aorta
75630	X-ray aorta, leg arteries
75635	Ct angio abdominal arteries
75650	Artery x-rays, head & neck
75658	Artery x-rays, arm
75660	Artery x-rays, head & neck
75662	Artery x-rays, head & neck
75665	Artery x-rays, head & neck
75671	Artery x-rays, head & neck
75676	Artery x-rays, neck
75680	Artery x-rays, neck
75685	Artery x-rays, spine
75705	Artery x-rays, spine
75710	Artery x-rays, arm/leg
75716	Artery x-rays, arms/legs
75722	Artery x-rays, kidney
75724	Artery x-rays, kidneys
75726	Artery x-rays, abdomen
75731	Artery x-rays, adrenal gland
75733	Artery x-rays, adrenals

CPT/HCPCS Code	Short Descriptor
75736	Artery x-rays, pelvis
75741	Artery x-rays, lung
75743	Artery x-rays, lungs
75746	Artery x-rays, lung
75756	Artery x-rays, chest
75774	Artery x-ray, each vessel
75791	Av dialysis shunt imaging
75801	Lymph vessel x-ray, arm/leg
75803	Lymph vessel x-ray, arms/legs
75805	Lymph vessel x-ray, trunk
75807	Lymph vessel x-ray, trunk
75809	Nonvascular shunt, x-ray
75810	Vein x-ray, spleen/liver
75820	Vein x-ray, arm/leg
75822	Vein x-ray, arms/legs
75825	Vein x-ray, trunk
75827	Vein x-ray, chest
75831	Vein x-ray, kidney
75833	Vein x-ray, kidneys
75840	Vein x-ray, adrenal gland
75842	Vein x-ray, adrenal glands
75860	Vein x-ray, neck
75870	Vein x-ray, skull
75872	Vein x-ray, skull
75880	Vein x-ray, eye socket
75885	Vein x-ray, liver
75887	Vein x-ray, liver
75889	Vein x-ray, liver
75891	Vein x-ray, liver
75893	Venous sampling by catheter
75894	X-rays, transcath therapy
75896	X-rays, transcath therapy
75898	Follow-up angiography
75900	Intravascular cath exchange
75901	Remove cva device obstruct
75902	Remove cva lumen obstruct
75940	X-ray placement, vein filter
75945	Intravascular us

CPT/HCPCS Code	Short Descriptor
75946	Intravascular us add-on
75953	Abdom aneurysm endovas rpr
75956	Xray, endovasc thor ao repr
75957	Xray, endovasc thor ao repr
75958	Xray, place prox ext thor ao
75959	Xray, place dist ext thor ao
75960	Transcath iv stent rs&i
75961	Retrieval, broken catheter
75962	Repair arterial blockage
75964	Repair artery blockage, each
75966	Repair arterial blockage
75968	Repair artery blockage, each
75970	Vascular biopsy
75978	Repair venous blockage
75980	Contrast xray exam bile duct
75982	Contrast xray exam bile duct
75984	Xray control catheter change
75989	Abscess drainage under x-ray
76000	Fluoroscope examination
76001	Fluoroscope exam, extensive
76010	X-ray, nose to rectum
76080	X-ray exam of fistula
76098	X-ray exam, breast specimen
76100	X-ray exam of body section
76101	Complex body section x-ray
76102	Complex body section x-rays
76120	Cine/video x-rays
76125	Cine/video x-rays add-on
76376	3d render w/o postprocess
76377	3d rendering w/postprocess
76380	CAT scan follow-up study
76496	Fluoroscopic procedure
76497	Ct procedure
76498	Mri procedure
76499	Radiographic procedure
76506	Echo exam of head
76510	Ophth us, b & quant a
76511	Ophth us, quant a only

CPT/HCPCS Code	Short Descriptor
76512	Ophth us, b w/non-quant a
76513	Echo exam of eye, water bath
76514	Echo exam of eye, thickness
76516	Echo exam of eye
76519	Echo exam of eye
76529	Echo exam of eye
76536	Us exam of head and neck
76604	Us exam, chest, b-scan
76645	Us exam, breast(s)
76700	Us exam, abdom, complete
76705	Echo exam of abdomen
76770	Us exam abdo back wall, comp
76775	Us exam abdo back wall, lim
76800	Us exam, spinal canal
76801	Ob us < 14 wks, single fetus
76802	Ob us < 14 wks, add'l fetus
76805	Ob us >/= 14 wks, sngl fetus
76810	Ob us >/= 14 wks, addl fetus
76811	Ob us, detailed, sngl fetus
76812	Ob us, detailed, addl fetus
76815	Ob us, limited, fetus(s)
76816	Ob us, follow-up, per fetus
76817	Transvaginal us, obstetric
76818	Fetal biophys profile w/nst
76819	Fetal biophys profil w/o nst
76820	Umbilical artery echo
76821	Middle cerebral artery echo
76825	Echo exam of fetal heart
76826	Echo exam of fetal heart
76827	Echo exam of fetal heart
76828	Echo exam of fetal heart
76830	Transvaginal us, non-ob
76831	Echo exam, uterus
76856	Us exam, pelvic, complete
76857	Us exam, pelvic, limited
76870	Us exam, scrotum
76872	Us, transrectal
76873	Echograp trans r, pros study

CPT/HCPCS Code	Short Descriptor
76881	Us xtr non-vasc complete
76882	Us xtr non-vasc lmtd
76885	Us exam infant hips, dynamic
76886	Us exam infant hips, static
76930	Echo guide, cardiocentesis
76932	Echo guide for heart biopsy
76936	Echo guide for artery repair
76937	Us guide, vascular access
76940	Us guide, tissue ablation
76941	Echo guide for transfusion
76942	Echo guide for biopsy
76945	Echo guide, villus sampling
76946	Echo guide for amniocentesis
76948	Echo guide, ova aspiration
76950	Echo guidance radiotherapy
76965	Echo guidance radiotherapy
76970	Ultrasound exam follow-up
76975	GI endoscopic ultrasound
76977	Us bone density measure
76998	Ultrasound guide intraoper
77001	Fluoroguide for vein device
77002	Needle localization by x-ray
77003	Fluoroguide for spine inject
77011	Ct scan for localization
77012	Ct scan for needle biopsy
77013	Ct guide for tissue ablation
77014	Ct scan for therapy guide
77021	Mr guidance for needle place
77022	Mri for tissue ablation
77031	Stereotactic breast biopsy
77032	X-ray of needle wire, breast
77053	X-ray of mammary duct
77054	X-ray of mammary ducts
77058	Magnetic image, breast
77059	Magnetic image, both breasts
77072	X-rays for bone age
77073	X-rays, bone evaluation
77074	X-rays, bone survey

CPT/HCPCS Code	Short Descriptor
77075	X-rays, bone survey
77076	X-rays, bone evaluation
77077	Joint survey, single view
77078	Ct bone density, axial
77079	Ct bone density, peripheral
77081	Dxa bone density/peripheral
77083	Radiographic absorptiometry
77084	Magnetic image, bone marrow
77417	Radiology port film(s)
77421	Stereoscopic x-ray guidance
78006	Thyroid imaging with uptake
78007	Thyroid image, mult uptakes
78010	Thyroid imaging
78011	Thyroid imaging with flow
78015	Thyroid met imaging
78016	Thyroid met imaging/studies
78018	Thyroid met imaging, body
78020	Thyroid met uptake
78070	Parathyroid nuclear imaging
78075	Adrenal nuclear imaging
78102	Bone marrow imaging, ltd
78103	Bone marrow imaging, mult
78104	Bone marrow imaging, body
78135	Red cell survival kinetics
78140	Red cell sequestration
78185	Spleen imaging
78190	Platelet survival, kinetics
78195	Lymph system imaging
78201	Liver imaging
78202	Liver imaging with flow
78205	Liver imaging (3D)
78206	Liver image (3d) with flow
78215	Liver and spleen imaging
78216	Liver & spleen image/flow
78220	Liver function study
78223	Hepatobiliary imaging
78230	Salivary gland imaging
78231	Serial salivary imaging

CPT/HCPCS Code	Short Descriptor
78232	Salivary gland function exam
78258	Esophageal motility study
78261	Gastric mucosa imaging
78262	Gastroesophageal reflux exam
78264	Gastric emptying study
78278	Acute GI blood loss imaging
78282	GI protein loss exam
78290	Meckel's divert exam
78291	Leveen/shunt patency exam
78300	Bone imaging, limited area
78305	Bone imaging, multiple areas
78306	Bone imaging, whole body
78315	Bone imaging, 3 phase
78320	Bone imaging (3D)
78428	Cardiac shunt imaging
78445	Vascular flow imaging
78451	Ht muscle image spect, sing
78452	Ht muscle image spect, mult
78453	Ht muscle image,planar,sing
78454	Ht musc image, planar, mult
78456	Acute venous thrombus image
78457	Venous thrombosis imaging
78458	Ven thrombosis images, bilat
78459	Heart muscle imaging (PET)
78466	Heart infarct image
78468	Heart infarct image (ef)
78469	Heart infarct image (3D)
78472	Gated heart, planar, single
78473	Gated heart, multiple
78481	Heart first pass, single
78483	Heart first pass, multiple
78491	Heart image (pet), single
78492	Heart image (pet), multiple
78494	Heart image, spect
78496	Heart first pass add-on
78580	Lung perfusion imaging
78584	Lung V/Q image single breath
78585	Lung V/Q imaging

CPT/HCPCS Code	Short Descriptor
78586	Aerosol lung image, single
78587	Aerosol lung image, multiple
78588	Perfusion lung image
78591	Vent image, 1 breath, 1 proj
78593	Vent image, 1 proj, gas
78594	Vent image, mult proj, gas
78596	Lung differential function
78600	Brain imaging, ltd static
78601	Brain imaging, ltd w/flow
78605	Brain imaging, complete
78606	Brain imaging, compl w/flow
78607	Brain imaging (3D)
78608	Brain imaging (PET)
78610	Brain flow imaging only
78630	Cerebrospinal fluid scan
78635	CSF ventriculography
78645	CSF shunt evaluation
78647	Cerebrospinal fluid scan
78650	CSF leakage imaging
78660	Nuclear exam of tear flow
78700	Kidney imaging, static
78701	Kidney imaging with flow
78707	Kidney flow/function image
78708	Kidney flow/function image
78709	Kidney flow/function image
78710	Kidney imaging (3D)
78730	Urinary bladder retention
78740	Ureteral reflux study
78761	Testicular imaging/flow
78800	Tumor imaging, limited area
78801	Tumor imaging, mult areas
78802	Tumor imaging, whole body
78803	Tumor imaging (3D)
78804	Tumor imaging, whole body
78805	Abscess imaging, ltd area
78806	Abscess imaging, whole body
78807	Nuclear localization/abscess
78811	Tumor imaging (pet), limited

CPT/HCPCS Code	Short Descriptor
78812	Tumor image (pet)/skul-thigh
78813	Tumor image (pet) full body
78814	Tumor image pet/ct, limited
78815	Tumorimage pet/ct skul-thigh
78816	Tumor image pet/ct full body
92132	Cmptr ophth dx img ant segmt
92133	Cmptr ophth dx img optic nerve
92134	Cptr ophth dx img post segmt
92227	remote dx retinal imaging
92228	remote dx retinal imaging mgmt
92235	Fluorscein angioscopy
92240	IDC green angiography
92250	Fundus photography
92285	External ocular photography
92286	Anterior segment photography
93303	Echo transthoracic
93304	Echo transthoracic
93306	Tte w/doppler, complete
93307	Echo exam of heart
93308	Echo exam of heart
93312	Echo transesophageal
93314	Echo transesophageal
93315	Echo transesophageal
93317	Echo transesophageal
93318	Echo transesophageal intraop
93320	Doppler echo exam, heart
93321	Doppler echo exam, heart
93325	Doppler color flow add-on
93350	Echo transthoracic
93351	Stress tte complete
93571	Heart flow reserve measure
93572	Heart flow reserve measure
93880	Extracranial study
93882	Extracranial study
93886	Intracranial study
93888	Intracranial study
93890	Tcd, vasoreactivity study
93892	Tcd, emboli detect w/o inj

CPT/HCPCS Code	Short Descriptor
93893	Tcd, emboli detect w/inj
93925	Lower extremity study
93926	Lower extremity study
93930	Upper extremity study
93931	Upper extremity study
93970	Extremity study
93971	Extremity study
93975	Vascular study
93976	Vascular study
93978	Vascular study
93979	Vascular study
93980	Penile vascular study
93981	Penile vascular study
93990	Doppler flow testing
0042T	Ct perfusion w/contrast, cbf
0080T	Endovasc aort repr rad s&i
0081T	Endovasc visc extnsn s&i
0174T	Cad cxr with interp
0175T	Cad cxr remote
G0120	Colon ca scrn; barium enema
G0130	Single energy x-ray study
G0288	Recon, CTA for surg plan
G0365	Vessel mapping hemo access

ADDENDUM H--CY 2011 "ALWAYS THERAPY" SERVICES SUBJECT TO THE MULTIPLE PROCEDURE PAYMENT REDUCTION*

CPT/HCPCS Code	Short Descriptor
92506	Speech/hearing evaluation
92507	Speech/hearing therapy
92508	Speech/hearing therapy
92526	Oral function therapy
92597	Oral speech device eval
92607	Ex for speech device rx, 1hr
92609	Use of speech device service
96125	Cognitive test by hc pro
97001	Pt evaluation
97002	Pt re-evaluation
97003	Ot evaluation
97004	Ot re-evaluation
97012	Mechanical traction therapy
97016	Vasopneumatic device therapy
97018	Paraffin bath therapy
97022	Whirlpool therapy
97024	Diathermy eg, microwave
97026	Infrared therapy
97028	Ultraviolet therapy
97032	Electrical stimulation
97033	Electric current therapy
97034	Contrast bath therapy
97035	Ultrasound therapy
97036	Hydrotherapy
97110	Therapeutic exercises
97112	Neuromuscular reeducation
97113	Aquatic therapy/exercises
97116	Gait training therapy
97124	Massage therapy
97140	Manual therapy
97150	Group therapeutic procedures
97530	Therapeutic activities
97533	Sensory integration
97535	Self care mngment training
97537	Community/work reintegration
97542	Wheelchair mngment training
97750	Physical performance test
97755	Assistive technology assess

CPT/HCPCS Code	Short Descriptor
97760	Orthotic mgmt and training
97761	Prosthetic training
97762	C/o for orthotic/prosth use
G0281	Elec stim unattend for press
G0283	Elec stim other than wound
G0329	Electromagntic tx for ulcers

*Excludes contractor-priced and bundled codes.

ADDENDUM I: [Reserved]

ADDENDUM J: LIST OF CPT[1]/HCPCS CODES USED TO DEFINE CERTAIN DESIGNATED HEALTH SERVICE CATEGORIES[2] UNDER SECTION 1877 OF THE SOCIAL SECURITY ACT EFFECTIVE JANUARY 1, 2011

CLINICAL LABORATORY SERVICES	
INCLUDE CPT codes for all clinical laboratory services in the 80000 series, except EXCLUDE CPT codes for the following blood component collection services:	
86890	Autologous blood process
86891	Autologous blood op salvage
86927	Plasma fresh frozen
86930	Frozen blood prep
86931	Frozen blood thaw
86932	Frozen blood freeze/thaw
86945	Blood product/irradiation
86950	Leukacyte transfusion
86960	Vol reduction of blood/prod
86965	Pooling blood platelets
86985	Split blood or products
INCLUDE the following CPT and HCPCS level 2 codes for other clinical laboratory services:	
0030T	Antiprothrombin antibody
0058T	Cryopreservation ovary tiss
0059T	Cryopreservation oocyte
0103T	Holotranscobalamin
0111T	RBC membranes fatty acids
36415	Routine venipuncture
78110	Plasma volume single
78111	Plasma volume multiple
78120	Red cell mass single
78121	Red cell mass multiple
78122	Blood volume
78130	Red cell survival study
78191	Platelet survival
78267	Breath tst attain/anal c-14
78268	Breath test analysis c-14
78270	Vit B-12 absorption exam
78271	Vit B-12 absrp exam int fac
78272	Vit B-12 absorp combined
78725	Kidney function study
G0027	Semen analysis
G0103	Psa screening
G0123	Screen cerv/vag thin layer
G0124	Screen c/v thin layer by MD
G0141	Scr c/v cyto,autosys and md
G0143	Scr c/v cyto,thinlayer,rescr
G0144	Scr c/v cyto,thinlayer,rescr
G0145	Scr c/v cyto,thinlayer,rescr
G0147	Scr c/v cyto, automated sys
G0148	Scr c/v cyto, autosys, rescr
G0306	CBC/diffwbc w/o platelet
G0307	CBC without platelet
G0328	Fecal blood scrn immunoassay
G0416	Sat biopsy prostate 1-20 spc
G0417	Sat biopsy prostate 21-40
G0418	Sat biopsy prostate 41-60
G0419	Sat biopsy prostate: >60
G0431	Drug screen single class
G0432	EIA HIV-1/HIV-2 screen
G0433	ELISA HIV-1/HIV-2 screen
G0434	Drug screen multi drug class
G0435	Oral HIV-1/HIV-2 screen
G9143	Warfarin respon genetic test
P2028	Cephalin floculation test
P2029	Congo red blood test
P2033	Blood thymol turbidity
P2038	Blood mucoprotein
P3000	Screen pap by tech w md supv
P3001	Screening pap smear by phys
P9612	Catheterize for urine spec
P9615	Urine specimen collect mult
Q0111	Wet mounts/ w preparations
Q0112	Potassium hydroxide preps
Q0113	Pinworm examinations
Q0114	Fern test
Q0115	Post-coital mucous exam
PHYSICAL THERAPY, OCCUPATIONAL THERAPY, AND OUTPATIENT SPEECH-LANGUAGE PATHOLOGY SERVICES	
INCLUDE the following CPT and HCPCS codes for physical therapy/occupational therapy/outpatient speech-language pathology services:	
0019T	Extracorp shock wv tx ms nos
0183T	Wound ultrasound
64550	Apply neurostimulator
90901	Biofeedback train any meth
90911	Biofeedback peri/uro/rectal
92506	Speech/hearing evaluation
92507	Speech/hearing therapy
92508	Speech/hearing therapy
92520	Laryngeal function studies
92526	Oral function therapy
92597	Oral speech device eval

92607	Ex for speech device rx 1hr
92608	Ex for speech device rx addl
92609	Use of speech device service
92610	Evaluate swallowing function
92611	Motion fluoroscopy/swallow
92612	Endoscopy swallow tst (fees)
92614	Laryngoscopic sensory test
92616	Fees w/laryngeal sense test
93797	Cardiac rehab
93798	Cardiac rehab/monitor
95831	Limb muscle testing manual
95832	Hand muscle testing manual
95833	Body muscle testing manual
95834	Body muscle testing manual
95851	Range of motion measurements
95852	Range of motion measurements
95992	Canalith repositioning proc
96000	Motion analysis video/3d
96001	Motion test w/ft press meas
96002	Dynamic surface emg
96003	Dynamic fine wire emg
96105	Assessment of aphasia
96110	Developmental test lim
96111	Developmental test extend
96125	Cognitive test by HC pro
97001	Pt evaluation
97002	Pt re-evaluation
97003	Ot evaluation
97004	Ot re-evaluation
97010	Hot or cold packs therapy
97012	Mechanical traction therapy
97016	Vasopneumatic device therapy
97018	Paraffin bath therapy
97022	Whirlpool therapy
97024	Diathermy eg microwave
97026	Infrared therapy
97028	Ultraviolet therapy
97032	Electrical stimulation
97033	Electric current therapy
97034	Contrast bath therapy
97035	Ultrasound therapy
97036	Hydrotherapy
97039	Physical therapy treatment
97110	Therapeutic exercises
97112	Neuromuscular reeducation
97113	Aquatic therapy/exercises
97116	Gait training therapy
97124	Massage therapy
97139	Physical medicine procedure
97140	Manual therapy
97150	Group therapeutic procedures
97530	Therapeutic activities
97532	Cognitive skills development
97533	Sensory integration
97535	Self care mngment training
97537	Community/work reintegration
97542	Wheelchair mngment training
97545	Work hardening
97546	Work hardening add-on
97597	RMVL devital tis 20cm/<
97598	RMVL devital tis addl 20 cm<
97602	Wound(s) care non-selective
97605	Neg press wound tx < 50 cm
97606	Neg press wound tx > 50 cm
97750	Physical performance test
97755	Assistive technology assess
97760	Orthotic mgmt and training
97761	Prosthetic training
97762	C/O for orthotic/prosth use
97799	Physical medicine procedure
G0281	Elec stim unattend for press
G0283	Elec stim other than wound
G0329	Electromagntic tx for ulcers
RADIOLOGY AND CERTAIN OTHER IMAGING SERVICES	
INCLUDE the following CPT and HCPCS codes:	
0042T	Ct perfusion w/contrast cbf
0159T	Cad breast mri
0174T	Cad cxr with interp
0175T	Cad cxr remote
51798	Us urine capacity measure
70100	X-ray exam of jaw
70110	X-ray exam of jaw
70120	X-ray exam of mastoids
70130	X-ray exam of mastoids
70134	X-ray exam of middle ear
70140	X-ray exam of facial bones
70150	X-ray exam of facial bones
70160	X-ray exam of nasal bones
70190	X-ray exam of eye sockets
70200	X-ray exam of eye sockets

70210	X-ray exam of sinuses
70220	X-ray exam of sinuses
70240	X-ray exam pituitary saddle
70250	X-ray exam of skull
70260	X-ray exam of skull
70300	X-ray exam of teeth
70310	X-ray exam of teeth
70320	Full mouth x-ray of teeth
70328	X-ray exam of jaw joint
70330	X-ray exam of jaw joints
70336	Magnetic image jaw joint
70350	X-ray head for orthodontia
70355	Panoramic x-ray of jaws
70360	X-ray exam of neck
70370	Throat x-ray & fluoroscopy
70371	Speech evaluation complex
70380	X-ray exam of salivary gland
70450	Ct head/brain w/o dye
70460	Ct head/brain w/dye
70470	Ct head/brain w/o & w/dye
70480	Ct orbit/ear/fossa w/o dye
70481	Ct orbit/ear/fossa w/dye
70482	Ct orbit/ear/fossa w/o&w/dye
70486	Ct maxillofacial w/o dye
70487	Ct maxillofacial w/dye
70488	Ct maxillofacial w/o & w/dye
70490	Ct soft tissue neck w/o dye
70491	Ct soft tissue neck w/dye
70492	Ct sft tsue nck w/o & w/dye
70496	Ct angiography head
70498	Ct angiography neck
70540	Mri orbit/face/neck w/o dye
70542	Mri orbit/face/neck w/dye
70543	Mri orbt/fac/nck w/o & w/dye
70544	Mr angiography head w/o dye
70545	Mr angiography head w/dye
70546	Mr angiograph head w/o & w/dye
70547	Mr angiography neck w/o dye
70548	Mr angiography neck w/dye
70549	Mr angiograph neck w/o & w/dye
70551	Mri brain w/o dye
70552	Mri brain w/dye
70553	Mri brain w/o & w/dye
70554	Fmri brain by tech
70555	Fmri brain by phys/psych

71010	Chest x-ray
71015	Chest x-ray
71020	Chest x-ray
71021	Chest x-ray
71022	Chest x-ray
71023	Chest x-ray and fluoroscopy
71030	Chest x-ray
71034	Chest x-ray and fluoroscopy
71035	Chest x-ray
71100	X-ray exam of ribs
71101	X-ray exam of ribs/chest
71110	X-ray exam of ribs
71111	X-ray exam of ribs/chest
71120	X-ray exam of breastbone
71130	X-ray exam of breastbone
71250	Ct thorax w/o dye
71260	Ct thorax w/dye
71270	Ct thorax w/o & w/dye
71275	Ct angiography chest
71550	Mri chest w/o dye
71551	Mri chest w/dye
71552	Mri chest w/o & w/dye
71555	Mri angio chest w or w/o dye
72010	X-ray exam of spine
72020	X-ray exam of spine
72040	X-ray exam of neck spine
72050	X-ray exam of neck spine
72052	X-ray exam of neck spine
72069	X-ray exam of trunk spine
72070	X-ray exam of thoracic spine
72072	X-ray exam of thoracic spine
72074	X-ray exam of thoracic spine
72080	X-ray exam of trunk spine
72090	X-ray exam of trunk spine
72100	X-ray exam of lower spine
72110	X-ray exam of lower spine
72114	X-ray exam of lower spine
72120	X-ray exam of lower spine
72125	Ct neck spine w/o dye
72126	Ct neck spine w/dye
72127	Ct neck spine w/o & w/dye
72128	Ct chest spine w/o dye
72129	Ct chest spine w/dye
72130	Ct chest spine w/o & w/dye
72131	Ct lumbar spine w/o dye

72132	Ct lumbar spine w/dye
72133	Ct lumbar spine w/o & w/dye
72141	Mri neck spine w/o dye
72142	Mri neck spine w/dye
72146	Mri chest spine w/o dye
72147	Mri chest spine w/dye
72148	Mri lumbar spine w/o dye
72149	Mri lumbar spine w/dye
72156	Mri neck spine w/o & w/dye
72157	Mri chest spine w/o & w/dye
72158	Mri lumbar spine w/o & w/dye
72159	Mr angio spine w/o & w/dye
72170	X-ray exam of pelvis
72190	X-ray exam of pelvis
72191	Ct angiograph pelv w/o & w/dye
72192	Ct pelvis w/o dye
72193	Ct pelvis w/dye
72194	Ct pelvis w/o & w/dye
72195	Mri pelvis w/o dye
72196	Mri pelvis w/dye
72197	Mri pelvis w/o & w/dye
72198	Mr angio pelvis w/o & w/dye
72200	X-ray exam sacroiliac joints
72202	X-ray exam sacroiliac joints
72220	X-ray exam of tailbone
73000	X-ray exam of collar bone
73010	X-ray exam of shoulder blade
73020	X-ray exam of shoulder
73030	X-ray exam of shoulder
73050	X-ray exam of shoulders
73060	X-ray exam of humerus
73070	X-ray exam of elbow
73080	X-ray exam of elbow
73090	X-ray exam of forearm
73092	X-ray exam of arm infant
73100	X-ray exam of wrist
73110	X-ray exam of wrist
73120	X-ray exam of hand
73130	X-ray exam of hand
73140	X-ray exam of finger(s)
73200	Ct upper extremity w/o dye
73201	Ct upper extremity w/dye
73202	Ct uppr extremity w/o & w/dye
73206	Ct angio upr extrm w/o & w/dye
73218	Mri upper extremity w/o dye
73219	Mri upper extremity w/dye
73220	Mri uppr extremity w/o & w/dye
73221	Mri joint upr extrem w/o dye
73222	Mri joint upr extrem w/dye
73223	Mri joint upr extr w/o & w/dye
73225	Mr angio upr extr w/o&w/dye
73500	X-ray exam of hip
73510	X-ray exam of hip
73520	X-ray exam of hips
73540	X-ray exam of pelvis & hips
73550	X-ray exam of thigh
73560	X-ray exam of knee 1 or 2
73562	X-ray exam of knee 3
73564	X-ray exam knee 4 or more
73565	X-ray exam of knees
73590	X-ray exam of lower leg
73592	X-ray exam of leg infant
73600	X-ray exam of ankle
73610	X-ray exam of ankle
73620	X-ray exam of foot
73630	X-ray exam of foot
73650	X-ray exam of heel
73660	X-ray exam of toe(s)
73700	Ct lower extremity w/o dye
73701	Ct lower extremity w/dye
73702	Ct lwr extremity w/o & w/dye
73706	Ct angio lwr extr w/o &w/dye
73718	Mri lower extremity w/o dye
73719	Mri lower extremity w/dye
73720	Mri lwr extremity w/o &w/dye
73721	Mri jnt of lwr extre w/o dye
73722	Mri joint of lwr extr w/dye
73723	Mri joint lwr extr w/o & w/dye
73725	Mr ang lwr ext w or w/o dye
74000	X-ray exam of abdomen
74010	X-ray exam of abdomen
74020	X-ray exam of abdomen
74022	X-ray exam series abdomen
74150	Ct abdomen w/o dye
74160	Ct abdomen w/dye
74170	Ct abdomen w/o & w/dye
74175	Ct angio abdom w/o & w/dye
74176	Ct angio abd & pelvis
74177	Ct angio abd&pelv w/contrast

Postal Service

Change in Rates and Classes of General Applicability for Competitive Products; Notice

POSTAL SERVICE

Change in Rates and Classes of General Applicability for Competitive Products

AGENCY: Postal Service.

ACTION: Notice of a change in rates of general applicability for competitive products.

SUMMARY: This notice sets forth changes in rates of general applicability for competitive products.

DATES: *Effective Date:* January 2, 2011.

FOR FURTHER INFORMATION CONTACT: Daniel J. Foucheaux, Jr., 202–268–2989.

SUPPLEMENTARY INFORMATION: On October 19, 2010, pursuant to their authority under 39 U.S.C. 3632, the Governors of the Postal Service established prices and classification changes for competitive products. The Governors' Decision and the record of proceedings in connection with such decision are reprinted below in accordance with section 3632(b)(2).

Neva R. Watson,

Attorney, Legislative.

Decision of the Governors of the United States Postal Service on Changes in Rates and Classes of General Applicability for Competitive Products (Governors' Decision No. 10–4)

October 19, 2010

Statement of Explanation and Justification

Pursuant to our authority under section 3632 of title 39, as amended by the Postal Accountability and Enhancement Act of 2006 ("PAEA"), we establish new prices of general applicability for the Postal Service's shipping services (competitive products), and such changes in classifications as are necessary to define the new prices. The changes are described generally below, with a detailed description of the changes in the attachment. The attachment includes the draft Mail Classification Schedule sections with changes in classification language in legislative format, and new prices displayed in the price charts.

As shown in the nonpublic annex being filed under seal herewith, the changes we establish should enable each competitive product to cover its attributable costs (39 U.S.C. 3633(a)(2)) and should result in competitive products as a whole complying with 39 U.S.C. 3633(a)(3), which, as implemented by 39 CFR 3015.7(c), requires competitive products to contribute a minimum of 5.5 percent to the Postal Service's institutional costs. Accordingly, no issue of subsidization of competitive products by market dominant products should arise (39 U.S.C. 3633(a)(1)). We therefore find that the new prices and classification changes are in accordance with 39 U.S.C. 3632–3633 and 39 CFR 3015.2.

I. Domestic Products

A. Express Mail

Overall, the Express Mail price change represents a 4.6 percent increase. The existing structure of zoned Retail, Commercial Base and Commercial Plus price categories is maintained.

Retail prices will increase an average of 5.0 percent. The price for the Retail Flat Rate Envelope, a significant portion of all Express Mail volume, will remain the same at $18.30.

The Commercial Base price category offers lower prices to customers who use online and other authorized postage payment methods. The Commercial Base prices will remain the same.

The Commercial Plus price category offers even lower prices to large-volume customers. The threshold for Commercial Plus customers will be reduced from 6,000 to 5,000 Express Mail pieces in the previous four quarters. Commercial Plus prices will decrease on average by 5.0 percent.

B. Priority Mail

Overall, Priority Mail prices will increase by 3.5 percent. In addition to the existing Retail, Commercial Base, and Commercial Plus price categories, new price categories for the Regional Rate Box and Critical Mail are being introduced.

Retail prices will increase an average of 3.9 percent. Flat Rate Box prices will be: Small, $5.20; Medium, $10.95; Large, $14.95; and Large APO/FPO/DPO, $12.95. A new Legal Size Flat Rate Envelope and Padded Flat Rate Envelope will be offered, both priced at $4.95 at retail.

The Commercial Base price category offers lower prices to customers using online and other authorized postage payment methods. The average price increase for Commercial Base will be 3.2 percent.

The Commercial Plus price category offers even lower prices to large-volume customers. The threshold for Commercial Plus customers will be reduced from 100,000 to 75,000 Priority Mail parcel pieces (cumulative letters, flats, parcels) in the previous calendar year. The threshold for Commercial Plus customers will be reduced from 100,000 to 5,000 Priority Mail letter-size and flat-size pieces in the previous calendar year. This includes all USPS-produced Priority Mail envelopes (letters and flats) and customer-supplied envelopes (Letters and Flats) with the exception of the Padded Flat Rate Envelope. Customers who ship more than 600 Priority Mail Open and Distribute containers annually will also qualify for Commercial Plus. The average price increase for Commercial Plus will be 2.0 percent.

C. Parcel Select

On average, prices for Parcel Select, the Postal Service's bulk ground shipping product, will increase 4.4 percent. For destination entered parcels, the average price increases are 8.0 percent for parcels entered at a destination delivery unit (DDU), 0.2 percent for parcels entered at a destination plant (DSCF) and 0.6 percent for parcels entered at a destination Network Distribution Center (DNDC). For nondestination-entered parcels, the average price increases are 9.8 percent for origin Network Distribution Center (ONDC) presort, 7.7 percent for Network Distribution Center (NDC) presort, and 7.6 percent for barcoded nonpresort.

D. Parcel Return Service

Parcel Return Service prices will have an overall price increase of 3.1 percent. Prices will increase 0.9 percent for parcels picked up at a return Network Distribution Center (RNDC) and 8.0 percent for parcels picked up at a return delivery unit (RDU).

E. Domestic Extra Services

Premium Forwarding Service prices will increase 5.0 percent. The weekly reshipment fee will increase to $14.75. On average, Address Enhancement Service prices will increase 5.0 percent. The 49 Post Office Box locations recently added to the competitive product list are designated under a new fee group, C1.

II. International Products

A. Expedited Services

International expedited services include Global Express Guaranteed (GXG) and Express Mail International (EMI). Overall, GXG prices will rise by 3.7 percent, and EMI will be subject to an overall 3.1 percent increase. Classification changes include the introduction of postage payment via permit indicia for GXG, the introduction of a legal-sized Express Mail International Flat Rate Envelope, seven new country groups for EMI, and the elimination of Express Mail Corporate Account published discounts, as well as

published discounts for users of Information-based Indicia (IBI) devices for both EMI and GXG. The elimination of the latter two services are necessary to create incentives for the use of electronic customs transmission. Return receipt service will also be eliminated as an option for EMI, as it is only available to a limited number of destinations. Finally, prices for EMI Flat Rate Envelopes would combine Mexico with the "All Other Countries" price tier.

B. Priority Mail International

The overall increase for Priority Mail International (PMI) will be 3.8 percent. The existing structure of PMI will remain the same. Classification changes include the introduction of several new flat rate options, seven new country price groups, and the elimination of published discounts for users of Information-based Indicia (IBI) devices.

C. International Priority Airmail and International Surface Air Lift

Published prices for the commercial international Shipping Services, which include International Priority Airmail (IPA) and International Surface Air Lift (ISAL), will have an overall increase of 4.4 percent, with IPA prices increasing by 3.3 percent, and ISAL prices increasing by 6.4 percent. Prices for IPA and ISAL M-Bags will remain the same.

D. Airmail M-Bags

The published prices for Airmail M-Bags will increase by 5.8 percent.

E. International Ancillary Services

Prices for paper money orders and EMI and PMI insurance will be increased. Classification changes include the elimination of the unique price tier for Canada when optional insurance is purchased for Priority Mail International parcels; previously, the fee for insurance to Canada was less. With this change, all insurance fees for Priority Mail International parcels will be the same.

Order

The changes in prices and classes set forth herein shall be effective at 12:01 a.m. on January 2, 2011. We direct the Secretary to have this decision published in the **Federal Register** in accordance with 39 U.S.C. 3632(b)(2). We also direct management to file with the Postal Regulatory Commission appropriate notice of these changes.

By The Governors.

Louis J. Giuliano,
Chairman.

PART B COMPETITIVE PRODUCTS

* * * * *

2001 Competitive Product Descriptions

The product descriptions provided in this document include information necessary for maintaining the competitive product list pursuant to the Postal Accountability and Enhancement Act of 2006 (Pub. L. 109–435). For specific standards relating to postal products and services, including preparation and mailing requirements, please refer to the latest versions of the Domestic Mail Manual and the International Mail Manual, which are published and maintained by the United States Postal Service.

2100 DOMESTIC PRODUCTS

2105 Express Mail

2105.1 Description

a. Express Mail service provides a high speed, high reliability service. It is available from designated acceptance locations to designated postal facilities for delivery to the recipient, or, optionally, pickup by the recipient. Drop-off, pick-up, and delivery times are specified by the Postal Service for particular locations and days of the week. Delivery is either overnight, on the second day, or on the second delivery day (the next delivery day following the second day), for particular locations and days of the week.

b. Any matter eligible for mailing may, at the option of the mailer, be mailed by Express Mail service.

c. Claims for refunds of postage for not meeting applicable standards must be filed within the period of time and under terms and conditions specified in the Domestic Mail Manual.

d. Express Mail pieces are sealed against postal inspection and shall not be opened except as authorized by law.

e. Express Mail pieces that are undeliverable-as-addressed are entitled to be forwarded or returned to the sender without additional charge.

f. Insurance, up to $100.00, is included in Express Mail postage. Additional insurance (Express Mail Insurance) is available for an additional charge, depending on the value and nature of the item sent by Express Mail service.

2105.2 Size and Weight Limitations

	Length	Height	Thickness	Weight
Minimum	Large enough to accommodate postage, address, and other required elements on the address side			None
Maximum	108 inches in combined length and girth			70 pounds
Flat Rate Envelopes	Nominal Sizes: *REGULAR:* 9.5 x 12.5 inches *LEGAL: 9.5 x 15.0 inches*			

2105.3 Minimum Volume Requirements

	Minimum volume requirements
Express Mail	None

2105.4 Price Categories

- Retail
  - Zone/Weight—Prices are based on weight and zone
  - Flat Rate Envelopes—Provided or approved by the Postal Service
- Commercial Base—Prices are available to customers who use specifically authorized postage payment methods. (Same definitions as Retail apply to price categories below.)
  - Zone/Weight

○ Flat Rate Envelope*s*

- Commercial Plus – Prices are available to customers who use specifically authorized postage payment methods and mail over 5,000 ~~6,000~~ pieces annually. (Same definitions as Retail apply to price categories below.)
  - Zone/Weight
  - Flat Rate Envelopes

2105.5 Optional Features

The following additional postal services may be available in conjunction with the product specified in this section:

- Pickup On Demand
- Ancillary Services (1505)
- ○ Address Correction Service (1505.1)
- ○ Collect On Delivery (1505.7)
- ○ Express Mail Insurance (1505.9)
- ○ Return Receipt (1505.13)

Add $12.50 for requesting Sunday or holiday delivery.

2110 Priority Mail

2110.1 Description

a. Priority Mail service provides expeditious handling and transportation.

b. Any matter eligible for mailing may, at the option of the mailer, be mailed by Priority Mail service for expeditious handling and transportation.

b. Matter containing personal information, partially or wholly handwritten or typewritten matter, or bills or statements of account must be mailed as Priority Mail pieces if they exceed the weight limit set by the Postal Service for First-Class Mail, unless mailed by Express Mail service, exempt under title 39, United States Code, or are otherwise exempted by the Postal Service.

c. Priority Mail pieces are sealed against postal inspection and shall not be opened except as authorized by law.

d. Priority Mail pieces that are undeliverable-as-addressed are entitled to be forwarded or returned to the sender without additional charge.

2110.2 Size and Weight Limitations

	Length	Height	Thickness	Weight
Minimum	Large enough to accommodate postage, address, and other required elements on the address side			None
Maximum	Commercial Plus Cubic: ½ cubic foot *Regional Rate Box A* *(outside dimensions):* *Top Loaded: 10–⅛ × 7– ⅛ × 5 inches* *Side Loaded: 13–1/16 × 11–1/16 2–½ inches* *Regional Rate Box B* *(outside dimensions):* *Top Loaded: 12–¼ × 10–½ × 5–½ inches* *Side Loaded: 16–¼ × 14–½ × 3 inches* All Other: 108 inches in combined length and girth			Commercial Plus Cubic: 20 pounds *Regional Rate Box A: 15 pounds* *Regional Rate Box B: 20 pounds* All Other: 70 pounds
Flat Rate Envelopes	Nominal Sizes: REGULAR: 9.5 × 12.5 inches PADDED: 10 × 13 inches *LEGAL: 9.5 × 15.0 inches*			
Flat Rate Boxes	Nominal Sizes: LARGE: 12.25 × 12.25 × 6.0 inches—approx. ½ cu. ft. MEDIUM: 11.875 × 3.375 × 13.625 inches or 11 × 8.5 × 5.5 inches —approx. ⅓ cu. ft. SMALL: 8.625 × 5.375 × 1.625 inches—approx. 1/20 cu. ft.			

2110.3 Minimum Volume Requirements

	Minimum volume requirements
Commercial Plus Cubic	50 lbs or 200 pieces
All Other Priority Mail	None

2110.4 Price Categories

The following price categories are available for the product specified in this section:

- Retail
  - Zone/Weight—Prices are based on weight and zone.
  - Flat Rate Boxes—Provided or approved by the Postal Service.
  - Flat Rate Envelopes—Provided or approved by the Postal Service
  - Balloon Rate—Applies to parcels in zones local through 4. weighing less than 20 pounds and measuring between 84 and 108 inches in combined length and girth.
  - Dimensional Weight—Applies to parcels in zones 5 through 8 that exceed one cubic foot.
- Commercial Base—Prices are available to customers who use specifically authorized postage payment methods. (Same definitions as retail apply to price categories below.)
  - Zone/Weight
  - Flat Rate Boxes
  - Flat Rate Envelopes
  - Balloon Rate
  - Dimensional Weight
  - *Regional Rate Boxes*
- Commercial Plus – Prices are available to customers who use specifically authorized postage payment methods and whose annual volume exceeds 75,000 ~~100,000~~ pieces or 600 open and distribute containers for parcels, or 5,000 letter-size and flat-size pieces excluding the Padded Flat Rate Envelope. (Same definitions as retail apply to price categories below.)
  - Zone/Weight
  - Flat Rate Boxes
  - Flat Rate Envelopes
  - Balloon Rate
  - Dimensional Weight
  - *Critical Mail—Prices are available to Commercial Plus customers who use specifically authorized postage payment methods and whose annual Priority Mail volume exceeds 5,000 pieces.*
  - *Regional Rate Boxes*
- Commercial Plus Cubic—Prices are available to customers who use specifically authorized postage payment methods and whose annual Priority Mail volume exceeds 250,000 pieces.
  - Zone/Cubic Volume

2110.5 Optional Features

The following additional postal services may be available in conjunction with the product specified in this section:

- Pickup On Demand
- Ancillary Services (1505)
  - Address Correction Service (1505.1)
  - Business Reply Mail (1505.3)
  - Certificate of Mailing (1505.6)
  - Collect On Delivery (1505.7)
  - Delivery Confirmation (1505.8)
  - Insurance (1505.9)
  - Merchandise Return (1505.10)
  - Registered Mail (1505.12)
  - Return Receipt (1505.13)
  - Return Receipt for Merchandise (1505.14)
  - Restricted Delivery (1505.15)
  - Signature Confirmation (1505.17)
  - Special Handling (1505.18)

Retail Balloon Rate

In Zones 1–4 (including local), parcels weighing less than 20 pounds but measuring more than 84 inches in combined length and girth (but not more than 108 inches) are charged the applicable price for a 20-pound parcel.

Retail Dimensional Weight

In Zones 5–8, parcels exceeding one cubic foot are priced at the actual weight or the dimensional weight, whichever is greater.

For box-shaped parcels, the dimensional weight (pounds) is calculated by multiplying the length (inches) times the width (inches) times the height (inches) of the parcel, and dividing by 194.

For irregular-shaped parcels (parcels not appearing box-shaped), the dimensional weight (pounds) is calculated by multiplying the length (inches) times the width (inches) times the height (inches) at the associated maximum cross-sections of the parcel, dividing by 194, and multiplying by an adjustment factor of 0.785.

Commercial Base Balloon Rate

In Zones 1–4 (including local), parcels weighing less than 20 pounds but measuring more than 84 inches in combined length and girth (but not more than 108 inches) are charged the applicable price for a 20-pound parcel.

Commercial Base Dimensional Weight

In Zones 5–8, parcels exceeding one cubic foot are priced at the actual weight or the dimensional weight, whichever is greater.

For box-shaped parcels, the dimensional weight (pounds) is calculated by multiplying the length (inches) times the width (inches) times the height (inches) of the parcel, and dividing by 194.

For irregular-shaped parcels (parcels not appearing box-shaped), the dimensional weight (pounds) is calculated by multiplying the length (inches) times the width (inches) times the height (inches) at the associated maximum cross-sections of the parcel, dividing by 194, and multiplying by an adjustment factor of 0.785.

2115 Parcel Select

2115.1 Description

a. Any mailable matter may be mailed as Parcel Select mail, except matter required to be mailed by First-Class Mail ~~services~~ or Priority Mail services; and publications required to be entered as Periodicals mail.

b. Parcel Select mail is not sealed against postal inspection. Mailing of matter as such constitutes consent by the mailer to postal inspection of the contents, regardless of the physical closure.

c. Undeliverable-as-addressed Parcel Select pieces will be forwarded on request of the addressee or forwarded or returned on request of the mailer, subject to the applicable Single-Piece Parcel Post price when forwarded or returned from one Post Office location to another. Pieces which combine Parcel Select matter with First-Class Mail or Standard Mail matter will be forwarded or returned if undeliverable-as-addressed, as specified in the Domestic Mail Manual.

d. An annual mailing permit fee is required for destination entered parcels to be paid at each office of mailing or office of verification by or for mailers of Parcel Select (1505.2). Payment of the fee allows the mailer to mail at any Parcel Select price.

e. *Attachments and Enclosures.* First-Class Mail or Standard Mail pieces may be attached to or enclosed in Parcel Select mail.

2115.2 Size and Weight Limitations

Parcel Select

	Length	Height	Thickness	Weight
Minimum	Large enough to accommodate postage, address, and other required elements on the address side			None
Maximum	130 inches in combined length and girth			70 pounds

Lightweight

	Length	Height	Thickness	Weight
Minimum	Large enough to accommodate postage, address, and other required elements on the address side			None
Maximum	108 inches in combined length and girth			< 16 ounces

2115.3 Minimum Volume Requirements

	Minimum volume requirements
Barcoded Nonpresort with PC Postage	None.
Barcoded Nonpresort—All Other Postage Payment Methods	50 pieces per mailing.

	Minimum volume requirements
Lightweight	200 pieces or 50 pounds per mailing.
All Other Parcel Select	50 pieces per mailing.

d. Balloon Rate

Pieces exceeding 84 inches in length and girth combined (but not more than 108 inches) and weighing less than 20 pounds are subject to the otherwise applicable price for a 20-pound parcel.

e. Oversized Price

Regardless of weight, any piece that measures more than 108 inches (but not more than 130 inches) in combined length plus girth must pay the oversized price.

f. Balloon Rate

Pieces exceeding 84 inches in length and girth combined (but not more than 108 inches) and weighing less than 20 pounds are subject to a price equal to that for a 20-pound parcel for the zone to which the parcel is addressed.

g. Oversized Price

Regardless of weight, any piece that measures more than 108 inches (but not more than 130 inches) in combined length plus girth must pay the oversized price.

2120 Parcel Return Service

2120.1 Description

a. Parcel Return Service mail consists of returned merchandise meeting preparation and entry requirements, which is retrieved in bulk at designated facilities, with postage paid by the addressee.

b. Any mailable matter may be mailed as Parcel Return Service mail, except matter required to be mailed by First-Class Mail or Priority Mail services; and publications required to be entered as Periodicals mail.

c. Parcel Return Service mail is not sealed against postal inspection. Mailing of matter as such constitutes consent by the mailer to postal inspection of the contents, regardless of the physical closure.

d. Undeliverable-as-addressed Parcel Return Service pieces will be forwarded on request of the addressee or forwarded or returned on request of the mailer, subject to the applicable Single-Piece Parcel Post price when forwarded or returned from one Post Office location to another. Pieces which combine Parcel Return Service matter with First-Class Mail or Standard Mail matter will be forwarded or returned if undeliverable-as-addressed, as specified in the Domestic Mail Manual.

e. Payment of an annual mailing permit fee and an account maintenance fee are required for Parcel Return Service (1505.2).

f. *Attachments and* Enclosures. First-Class Mail or Standard Mail pieces may be attached to or enclosed in Parcel Return Service mail. Additional postage may be required. Parcel Return Service mail may have limited written additions placed on the wrapper, on a tag or label attached to the outside of the parcel, or inside the parcel, either loose or attached to the article.

2120.2 Size and Weight Limitations

	Length	Height	Thickness	Weight
Minimum	Large enough to accommodate postage, address, and other required elements on the address side			None.
Maximum	130 inches in combined length and girth			70 pounds.

2120.3 Minimum Volume Requirements

	Minimum volume requirements
Parcel Return Service	None

2125 Premium Forwarding Service

2125.1 Description

a. Premium Forwarding Service provides residential delivery customers, and certain post office box customers, the option to receive substantially all mail addressed to a primary address instead at a temporary address by means of a weekly Priority Mail shipment. Parcels that are too large for the weekly shipment, mail pieces that require a scan upon delivery or arrive postage due at the office serving the customer's primary address, and certain Priority Mail pieces may be rerouted as specified in the Domestic Mail Manual. Rerouted Express Mail, First-Class Mail, and Priority Mail pieces incur no additional reshipping charges. Rerouted Standard Mail and Package Service pieces may be rerouted postage due.

b. Mail sent to a primary address for which an addressee has activated Premium Forwarding Service is not treated as undeliverable-as-addressed.

c. Premium Forwarding Service is available for a period of at least two weeks and not more than twelve months. Customers may not use Premium Forwarding Service simultaneously with temporary or permanent forwarding orders. Premium Forwarding Service is not available to customers whose primary address consists of a size three, four or five post office box, subject to exceptions allowed by the Postal Service, or a centralized delivery point.

2130 Post Office Box Service

2130.1 Description

a. Post Office Box service provides the customer with a locked receptacle for the receipt of mail during specified hour of access to the receptacle.

b. ~~Two box keys are available upon payment of a refundable deposit.~~ New customers typically receive two box keys. Additional keys, including replacement keys, will be provided upon payment of the key duplication or replacement fee. Changing the lock on a box is available upon request of the primary box customer and payment of the lock replacement fee. The lock replacement fee may also be charged as a late payment fee, regardless of whether the lock is changed.

c. Prorated prices are available for postal facilities primarily serving academic institutions or the students of such institutions.

d. The Postal Service may limit the number of post office boxes occupied by any one customer.

e. Post Office Box service is not available to a customer whose sole purpose for using the service is to obtain free forwarding or transfer of mail by filing change-of-address orders.

f. Post Office Box service in the following ZIP Code locations comprise the competitive product:

01730, 01844, 02081, 02112, 02447, 03835, 07002, 07306, 07410, 07624, 08812, 08904, 10021, 10308, 10536, 10920, 11104, 11216, 11361, 11423, 11702, 11937, 19102, 19407, 20001, 20726, 20918, 22101, 22206, 22301, 33427, 60615, 75371, 89009, 89116, 90013, 90266, 90408, 90734, 90803, 90853, 91322, 91404, 91407, 91408, 91609, 92514, 94070, 94507, 94701, 98109, and 99509.

2. Key deposit only applies to additional keys or replacement keys.

2135 Address Enhancement Service

2135.1 Description

Address Element Correction (AEC)

Address Element Correction (AEC) service identifies and corrects bad or incomplete addresses using enhanced computer logic.

Address Matching System Application Program Interface (AMS API)

The Address Matching System Application Program Interface (AMS API) is a core set of compiled address-matching software instructions that developers incorporate into their software so that address lists can be updated with address data from the following databases, which are integrated into the AMS–API: City State, ZIP + 4, Five-Digit ZIP, eLOT, DPV, and LACSLink.

For an additional fee, a developer may install the AMS–API on multiple computers for its own use. Additional fees are charged if the developer wants to resell its address-matching software.

Developers, for an additional fee, may obtain computer software instructions that permit the API to access the RDI data when licensed separately.[1] Additional fees are charged if the developer wants to resell RDI–API.

Topological Integrated Geographic Encoding and Referencing (TIGER/ZIP + 4®)

The Topological Integrated Geographic Encoding and Referencing (TIGER/ZIP + 4) service is a bridge file that allows mailers to access other information using the ZIP + 4 codes they already have associated with their addresses. This file offers demographers and market researchers a method to relate ZIP + 4 coded address lists to Census Bureau demographic data.

2200 INTERNATIONAL PRODUCTS

2205 Outbound International Expedited Services

2205.1 Description

Outbound International Expedited Services (Global Express Guaranteed and Express Mail International) provide expedited service to designated outbound international destinations according to requirements specified in the International Mail Manual.

Global Express Guaranteed

a. Global Express Guaranteed (GXG) service offers a postage-refund guarantee for date-certain delivery from select Post Offices to select foreign destinations.

b. Documents and general correspondence, including matter containing personal information, partially or wholly hand-written or typewritten matter, or bills or statements of account (non-dutiable items) and non-documents (all dutiable items including merchandise) may be shipped using Global Express Guaranteed service.

c. Document reconstruction and non-document insurance for loss or damage up to $100.00 per shipment are included at no additional charge. Additional insurance may be purchased for document and non-document shipments.

d. Only Global Express Guaranteed items that contain documents are sealed against inspection and shall not be opened except as authorized by law.

e. For selected destination countries, discounts for permit imprint accounts, online preparation and payment, or for use of an authorized PC postage vendor may apply. ~~or for qualifying customers who pay postage using information-based indicia (IBI) postage meters may apply.~~

Express Mail International

a. Express Mail International (EMI) offers transit times that can be longer than for Global Express Guaranteed. Express Mail International with guarantee service provides a postage-refund guarantee for date-certain delivery to a limited number of foreign destinations.

b. Any item not prohibited in international mail may be sent using Express Mail International, including matter containing personal information, partially or wholly hand-written or typewritten matter, or bills or statements of account.

c. Document reconstruction and merchandise insurance up to $100.00 is included in the price of postage. Additional merchandise insurance may be purchased at the time of mailing. Additional document reconstruction insurance may not be purchased.

d. Express Mail International is sealed against inspection and shall not be opened except as authorized by law.

e. For selected destination countries, discounts for ~~Express Mail Corporate Accounts,~~ permit imprint accounts, online preparation and payment, or for use of an authorized PC postage vendor may apply ~~or for qualifying customers who pay postage using information-based indicia (IBI) postage meters may apply~~.

2225 International Priority Airmail (IPA)

2225.1 Description

a. International Priority Airmail is a bulk international airmail service for mailing First-Class Mail International items.

b. International Priority Airmail may include matter containing personal information, partially or wholly hand-written and typewritten matter, bills, or statements of account.

c. International Priority Airmail is not a shipping option for Priority Mail International items, (whether ordinary or insured).

d. International Priority Airmail (except M–Bags) is sealed against inspection and shall not be opened except as authorized by law.

e. International Priority Airmail presorted mail and M–Bags are assigned to a specified price group based on the destination country. A price group may consist of one specific country or multiple countries. To determine the price group for a destination country, refer to the Country Price Group List for International Mail (4000).

2225.2 Size and Weight Limitations

a. Letters

	Length	Height	Thickness	Weight
Minimum	5.5 inches	3.5 inches	0.007 inch	none
Maximum	11.5 inches	6.125 inches	0.25 inch	3.5 ounces

b. Postcards

	Length	Height	Thickness	Weight
Minimum	5.5 inches	3.5 inches	0.007 inch	none
Maximum	6 inches	4.25 inches	0.016 inch	Not applicable

c. Large Envelopes (Flats)

	Length	Height	Thickness	Weight
Minimum[1]	11.5 inches	6.125 inches	0.25 inch	none
Maximum	15 inches	12 inches	0.75 inch	4 pounds

Notes

1. Only one minimum dimension must be ~~met~~ exceeded.

d. Packages (Small Packets)

	Length	Height	Thickness	Weight
Minimum	large enough to accommodate postage, address, and other required elements on the address side			none
Maximum	24 inches			4 pounds
	Length plus height plus thickness of 36 inches			

e. Rolls

	Length	Length plus twice the diameter	Weight
Minimum	4 inches	6.75 inches	none.
Maximum	36 inches	42 inches	4 pounds.

2225.3 Minimum Volume Requirements

To qualify, a minimum quantity of 50 pounds of mail is required which may include a combination of presort mail, worldwide nonpresort mail, or M-bag mail to achieve the 50 pound minimum.

2225.4 Price Categories

The following price categories are available for the product specified in this section:

- Presort Mail (Full Service and ISC Drop Shipment)
  - Price Groups 1–15
- Worldwide Nonpresort Mail (Full Service and ISC Drop Shipment)
  - Worldwide
- Price Groups 1–15

2225.5 Optional Features

~~The following additional postal services may be available in conjunction with the product specified in this section:~~

- ~~International Ancillary Services (2250)~~
  - ~~International Certificate of Mailing (2250.1)~~None available.

2225.6 Prices

International Priority Airmail

The price is determined by adding the applicable per-piece price to the applicable per-pound price. The per-piece price applies to each mailpiece regardless of weight. The per-pound price applies to the net weight (gross weight of the sack minus the tare weight of the sack) of the mail for the specific ~~rate~~ country price group.

2235 International Direct Sacks—M-Bags

2235.1 Description

a. International Direct Sacks—M-bags are direct sacks containing printed matter to a single addressee. Printed matter is defined as paper on which words, letters, characters, figures, images, or any combination thereof, not having the character of a bill or statement of account, or of actual or personal correspondence, have been reproduced by any process other than handwriting or typewriting.

b. M-Bags are available for both outbound and inbound international mail.

- Outbound International Direct Sacks—M-bags are direct sacks of printed matter of domestic origin mailed to a single foreign addressee.
- Inbound air and surface International Direct Sacks—M-bags are direct sacks of printed matter of foreign origin mailed to a single domestic addressee.

c. M-bags may include articles of merchandise related to the enclosed printed matter as specified in the International Mail Manual (outbound) or the Universal Postal Convention (inbound).

d. M-Bags are not sealed against inspection. Mailing of matter by such service constitutes consent by the mailer to postal inspection of the contents, regardless of the physical closure.

e. Most prices for international postage are segmented into Price Groups with multiple destination countries represented in each Price Group. To identify what price group a destination country is in, refer to Country Price Group List for International Mail (4000). The number of price groups that exist depends on the category of mail. A particular destination country may fall into different Price Groups for different categories of mail.

2235.2 Size and Weight Limitations

	Length	Height	Thickness	Weight
Minimum				none.

	Length	Height	Thickness	Weight
Maximum Outbound	No defined size limits as long as articles being sent can be enclosed in the mailbag as specified in the International Mail Manual.			66 pounds[1].
Maximum Inbound	No defined size limits as long as articles being sent can be enclosed in the mailbag as specified in the UPU Convention.			66 pounds[1].

Notes [1] Includes the tare weight of the sack.

2235.3 Minimum Volume Requirements

	Minimum volume requirements
Outbound	None.
Inbound	None.

2235.4 Price Categories

The following price categories are available for the product specified in this section:

Outbound International Direct Sacks—M-Bags Price Categories

- M-Bags
  - Price Groups 1–9

Inbound International Direct Sacks—M-Bags Price Categories

As established by the originating foreign country conforming to Universal Postal Convention requirements.

2235.5 Optional Features

The following additional postal services may be available in conjunction with the product specified in this section:

Optional Features for Outbound International Direct Sacks—M-Bags

- International Ancillary Services (2250)
  - International Certificate of Mailing (2250.1)

Optional Features for Inbound International Direct Sacks—M-Bags

- None

2235.6 Prices

Outbound International Direct Sacks—M-Bags

Up to 1,000 pieces (one certificate for total number)	6.50
Each additional 1,000 pieces or fraction	0.75
Duplicate copy	1.15

2250.2 *Outbound Competitive* **International Registered Mail**

2250.2.1 Description

a. Outbound Competitive International Registered Mail service provides additional protection and security in dispatch and conveyance in the United States for items mailed in a Priority Mail International Flat Rate Envelope ~~or~~ Small Flat Rate Box, DVD Flat Rate Box, or Large Video Flat Rate Box. In destination countries registered mail items are handled in accordance with the internal procedures of the destination country.

b. Registered items may weigh up to 4 pounds.

c. For each registered item a mailing receipt is issued by the office of mailing and a record of delivery is maintained at the office of destination.

d. Regardless of the declared value of a registered item, the maximum amount of indemnity payable for loss, damage, or ~~rifling~~ missing contents is limited to the amount set by the Universal Postal Union in Article RL 155.4 of the Letter Post Regulations.

e. *Outbound Competitive* International Registered Mail service is subject to both U.S. Postal Service requirements and the prohibitions and restrictions of the destination country.

2250.2.2 Prices

Per Piece	11.50

2250.3 International Return Receipt

2250.3.1 Description

Outbound International Return Receipt

a. Outbound International Return Receipt service provides evidence to the mailer that an article has been received at the delivery address. It must be purchased at the time of mailing. The return receipt, which is attached to the article mailed, is signed at the point of delivery and is returned to the sender.

b. Outbound International Return Receipt service is subject to availability in the destination country for registered Priority Mail International Flat Rate Envelopes, ~~and~~ Small Flat Rate Boxes, and insured Priority Mail International parcels.~~, and Express Mail International~~.

Inbound International Return Receipt

a. Inbound International Return Receipt service provides evidence to the mailer that an article has been received at the delivery address. A return receipt is signed at the point of delivery and is returned to the sender.

b. Inbound International return receipt service is available for insured parcels.

2250.3.2 Prices

Inbound International Return Receipt

No additional payment.

2250.4 International Restricted Delivery

2250.4.1 Description

a. International Restricted Delivery service limits who may receive an item as determined by the internal requirements of the destination country.

b. International Restricted Delivery service is available only at the time of mailing for registered Priority Mail International Flat-Rate Envelopes and Small Flat-Rate Boxes accompanied by a return receipt, subject to availability in the destination country.

2250.4.2 Prices

	($)
Per Piece	4.50

2250.5 International Insurance

2250.5.1 Description

Outbound International Insurance

a. Optional outbound insurance may be purchased to protect against loss, damage, or ~~rifling~~ missing contents for Priority Mail International parcels and Priority Mail International Large and Medium~~Regular~~ Flat Rate Boxes. When additional insurance is purchased for uninsured Priority Mail International parcels, it replaces the indemnity coverage.

b. Optional additional merchandise insurance may be purchased to protect against loss, damage, or ~~rifling~~ missing contents for Express Mail International.

c. Optional additional insurance may be purchased to protect against loss, damage, or missing contents for Global Express Guaranteed.

Inbound International Insurance

a. Inbound International Insurance is available for inbound air parcels from countries which offer the service on a reciprocal basis. Indemnity limits vary by country as specified in the International Mail Manual. The maximum insurance limit available to the United States is $5,000.00.

2250.5.2 Price Categories

The following price categories are available for the product specified in this section:

Outbound Price Categories

- Priority Mail International Insurance
  Available for Priority Mail International parcels and Priority Mail International Large and Medium~~Regular~~ Flat Rate Boxes.

- Express Mail International Merchandise Insurance Available for Express Mail International merchandise.

- Global Express Guaranteed Insurance Available for Global Express Guaranteed items that contain merchandise or documents.

CERTIFICATION OF GOVERNORS' VOTE IN THE GOVERNORS' DECISION NO. 10–4

I hereby certify that the Governors voted on adopting Governors' Decision No. 10–4, and that, consistent with 39 U.S.C. 3632(a), a majority of the Governors then holding office concurred in the Decision.

Dated: October 19, 2010.

Julie S. Moore, Secretary of the Board of Governors.

Department of Agriculture

Commodity Credit Corporation

7 CFR Part 1415
Grassland Reserve Program; Final Rule

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1415

RIN 0578–AA53

Grassland Reserve Program

AGENCY: Commodity Credit Corporation, Natural Resources Conservation Service, United States Department of Agriculture.

ACTION: Final rule.

SUMMARY: The Department of Agriculture (USDA), through the Commodity Credit Corporation (CCC) published in the **Federal Register** on January 21, 2009, an interim final rule for the Grassland Reserve Program (GRP) with a 60-day public comment period. On August 21, 2009, the CCC published an amendment to the interim final rule and reopened the public comment period for an additional 60 days. The CCC is publishing a final rule that incorporates the changes associated with passage of the Food, Conservation, and Energy Act of 2008 (2008 Act) and addresses the comments received during the public comment periods.

DATES: *Effective Date:* The rule is effective November 29, 2010.

FOR FURTHER INFORMATION CONTACT: Leslie Deavers, Team Leader, Easement Support Team, Easement Programs Division, Department of Agriculture, Natural Resources Conservation Service, 1400 Independence Avenue, SW., Room 6819 South Building, Washington, DC 20250; Telephone: (202) 720–0907; Fax: (202) 720–9689.

Persons with disabilities who require alternative means for communicating (Braille, large print, audiotape, *etc.*) should contact the USDA Target Center at (202) 720–2600 (voice and TDD).

SUPPLEMENTARY INFORMATION:

Regulatory Certifications

Executive Order 12866

The Office of Management and Budget (OMB) reviewed the January 21, 2009, interim final rule and determined that it was a significant regulatory action. Pursuant to Executive Order 12866, USDA conducted an economic analysis of the potential impacts associated with this program. OMB also determined that this final rule is a significant regulatory action. USDA evaluated the economic analysis and expanded it to include net present value analyses using OMB's recommended 3 percent and 7 percent discount rates. In addition, policy scenario three was dropped from the analysis because it was very similar to one of the other policy options.

The administrative record is available for public inspection at the Department of Agriculture, Natural Resources Conservation Service, 1400 Independence Avenue, SW., Room 6819 South Building, Washington, DC 20250. A summary of the economic analysis can be found at the end of the regulatory certifications of the preamble, and a copy of the analysis is available upon request from Leslie Deavers, Team Leader, Easement Support Team, Easement Programs Division, Department of Agriculture, Natural Resources Conservation Service, 1400 Independence Avenue, SW., Room 6819 South Building, Washington, DC 20250.

Regulatory Flexibility Act

The Regulatory Flexibility Act is not applicable to this final rule because USDA is not required by 5 U.S.C. 553, or by any other provision of law, to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

Environmental Analysis

In compliance with the National Environmental Policy Act (NEPA), a Programmatic Environmental Assessment (EA) was prepared in association with the interim final rule. The analysis determined there will not be a significant impact to the human environment and as a result, an Environmental Impact Statement was not required to be prepared (40 CFR 1508.13). For this final rule, the agency has determined that there are no new circumstances or significant new information that has a bearing on environmental effects which warrant supplementing the previous EA and Finding of No Significant Impact (FONSI). The proposed changes identified in this final rule are considered minor changes that should be implemented for the program. The majority of these changes are administrative or technical changes to the regulation.

Copies of the EA and FONSI may be obtained from Matt Harrington, National Environmental Coordinator, Ecological Sciences Division, Department of Agriculture, Natural Resources Conservation Service, 1400 Independence Avenue, SW., Room 6151 South Building, Washington, DC 20250. The EA and FONSI are also available at *http://www.nrcs.usda.gov/programs/Env_Assess/.*

Civil Rights Impact Analysis

USDA has determined through a Civil Rights Impact Analysis that this final rule discloses no disproportionately adverse impacts for minorities, women, or persons with disabilities. Outreach and communication strategies are in place to ensure all producers will be provided the same information to allow them to make informed compliance decisions regarding the use of their lands that will affect their participation in USDA programs. GRP applies to all persons equally regardless of their race, color, national origin, gender, sex, or disability status. Therefore, this final rule portends no adverse civil rights implications for women, minorities, and persons with disabilities.

Copies of the Civil Rights Impact Analysis are available from Leslie Deavers, Team Leader, Easement Support Team, Easement Programs Division, Department of Agriculture, Natural Resources Conservation Service, 1400 Independence Avenue, SW., Room 6819 South Building, Washington, DC 20250, or electronically at *http://www.nrcs.usda.gov/programs/GRP.*

Paperwork Reduction Act

Section 2904 of the 2008 Act (Pub. L. 110–245), requires that implementation of programs authorized under Title II of the Act be made without regard to the Paperwork Reduction Act of 1995 (Title 44, U.S.C. 3501 *et seq.*). Therefore, USDA is not reporting recordkeeping or estimated paperwork burden associated with this final rule.

Government Paperwork Elimination Act

USDA is committed to compliance with the Government Paperwork Elimination Act and the Freedom to E-File Act, which require government agencies, in general, to provide the public the option of submitting information or transacting business electronically to the maximum extent possible. To better accommodate public access, USDA has developed an online application and information system for public use.

Executive Order 12988

This final rule has been reviewed in accordance with Executive Order 12988, Civil Justice Reform. The rule is not retroactive and preempts State and local laws to the extent that such laws are inconsistent with this rule. Before an action may be brought in a Federal court of competent jurisdiction, the administrative appeal rights afforded persons at 7 CFR parts 11, 614, and 780 must be exhausted.

Federal Crop Insurance Reform and Department of Agriculture Reorganization Act of 1994

Pursuant to section 304 of the Federal Crop Insurance Reform Act of 1994 (Pub. L. 103–354), USDA classified this rule as non-major. Therefore, a risk analysis was not conducted.

Unfunded Mandates Reform Act of 1995

USDA assessed the effects of this final rule on State, local, and Tribal governments, and the public. This action does not compel the expenditure of $100 million or more in any one year (adjusted by inflation) by any State, local, or Tribal governments, or anyone in the private sector; therefore, a statement under section 202 of the Unfunded Mandates Reform Act of 1995 is not required.

Executive Order 13132

This final rule has been reviewed in accordance with the requirements of Executive Order 13132, Federalism. USDA has determined that this final rule conforms with the Federalism principles set forth in the Executive Order; would not impose any compliance costs on the States; and would not have substantial direct effects on the States, on the relationship between the Federal Government and the States, or on the distribution of power and responsibilities on the various levels of government. Therefore, USDA concludes that this final rule does not have Federalism implications.

Executive Order 13175

This final rule has been reviewed in accordance with the requirements of Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. USDA has assessed the impact of this final rule on Indian Tribal governments and concluded that this final rule will not negatively affect Indian Tribal governments or their communities. The rule neither imposes substantial direct compliance costs on Tribal governments nor preempts Tribal law. However, the Natural Resources Conservation Service (NRCS) plans to undertake a series of at least six regional Tribal consultation sessions before December 30, 2010, on the impact of USDA conservation programs and services on Tribal governments and their members to establish a baseline of consultation for future actions. Reports from these sessions will be made part of the USDA annual reporting on Tribal Consultation and Collaboration. USDA will respond in a timely and meaningful manner to all Tribal governments' requests for consultation.

Small Business Regulatory Enforcement Fairness Act of 1996

This final rule is not a major rule as defined by section 804 of the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA). This rule will not result in an annual effect on the economy of $100 million or more, a major increase in costs or prices, or significant adverse effects on competition, employment, investment, productivity, innovation, or the ability of United States based companies to compete in domestic and export markets. However, section 2904(c) of the 2008 Act requires that the Secretary use the authority in section 808(2) of Title 5, U.S.C., which allows an agency to forego SBREFA's usual congressional 60-day review delay of the effective date of a regulation if the agency finds that there is a good cause to do so. USDA hereby determines that it has good cause to do so to meet the congressional intent to have the conservation programs authorized or amended by Title II of the 2008 Act in effect as soon as possible. Accordingly, this rule is effective upon filing for public inspection by the Office of the Federal Register.

Section 2708 of the 2008 Act

Section 2708, "Compliance and Performance," of the 2008 Act added a paragraph to section 1244(g) of the Food Security Act of 1985, as amended entitled, "Administrative Requirements for Conservation Programs," which states the following:

(g) Compliance and performance.—For each conservation program under Subtitle D, the Secretary shall develop procedures—

(1) To monitor compliance with program requirements;

(2) To measure program performance;

(3) To demonstrate whether long-term conservation benefits of the program are being achieved;

(4) To track participation by crop and livestock type; and

(5) To coordinate activities described in this subsection with the national conservation program authorized under section 5 of the Soil and Water Resources Conservation Act of 1977 (16 U.S.C. 2004).

This new provision presents in one place the accountability requirements placed on the agency as it implements conservation programs and reports on program results. The requirements apply to all programs under Subtitle D, including the Wetlands Reserve Program, Conservation Security Program, Conservation Stewardship Program, Farm and Ranch Lands Protection Program, Grassland Reserve Program, Environmental Quality Incentives Program (including the Agricultural Water Enhancement Program), Wildlife Habitat Incentive Program, and the Chesapeake Bay Watershed initiative. These requirements are not directly incorporated into these regulations, which set out requirements for program participants. However, certain provisions within these regulations relate to elements of section 1244(g) of the Food Security Act of 1985, as amended and the agency's accountability responsibilities regarding program performance. NRCS is taking this opportunity to describe existing procedures that relate to meeting the requirements of section 1244(g) of the Food Security Act of 1985, as amended and agency expectations for improving its ability to report on each program's performance and achievement of long-term conservation benefits. Also included is reference to the sections of these regulations that apply to program participants and that relate to the agency accountability requirements as outlined in section 1244(g) of the Food Security Act of 1985, as amended.

Monitor compliance with program requirements. NRCS has established application procedures to ensure that participants and eligible entities meet eligibility requirements and follow-up procedures to ensure that participants and eligible entities are complying with the terms and conditions of their contractual arrangement with the government, and that the installed conservation measures are operating as intended. These and related program compliance evaluation policies will be set forth in agency guidance. The program requirements applicable to participants and eligible entities that relate to compliance are set forth in these regulations in § 1415.4 "Program requirements," § 1415.11 "Restoration agreements," and § 1415.17 "Cooperative agreements." These sections make clear the general program requirements, as well as participant and entity obligations.

Measure program performance. Pursuant to the requirements of the Government Performance and Results Act of 1993 (Pub. L. 103–62, Section 1116) and guidance provided by OMB Circular A–11, NRCS has established performance measures for its conservation programs. Program-funded conservation activity is captured through automated field-level business tools, and the information is available at *http://ias.sc.egov.usda.gov/PRSHOME/.* Program performance also is reported annually to Congress and the public through the annual performance budget, annual accomplishments report, and the

USDA Performance Accountability Report. Related performance measurement and reporting policies are set forth in agency guidance (GM_340_401 and GM_340_403) (*http://directives.sc.egov.usda.gov/*).

The conservation actions undertaken by participants are the basis for measuring program performance—specific actions are tracked and reported annually, while the effects of those actions relate to whether the long-term benefits of the program are being achieved. The program requirements applicable to participants that relate to undertaking conservation actions are set forth in these regulations in § 1415.4 "Program requirements," § 1415.11 "Restoration agreements," and § 1415.17 "Cooperative agreements." These sections make clear participant and eligible entity obligations for implementing, operating, and maintaining GRP-funded conservation improvements, which in aggregate result in the program performance that is reflected in agency performance reports.

Demonstrate whether long-term conservation benefits of the program are being achieved. Demonstrating the long-term natural resource benefits achieved through conservation programs is subject to the availability of needed data, the capacity and capability of modeling approaches, and the external influences that affect actual natural resource condition. While NRCS captures many measures of "output" data, such as acres of conservation practices, it is still in the process of developing methods to quantify the contribution of those outputs to environmental outcomes. NRCS currently uses a mix of approaches to evaluate whether long-term conservation benefits are being achieved through its programs. Since 1982, NRCS has reported on certain natural resource status and trends through the National Resources Inventory (NRI), which provides statistically reliable, nationally consistent land cover/use and related natural resource data. However, a connection between these data and specific conservation programs has been lacking. In the future, the interagency Conservation Effects Assessment Project (CEAP), which has been underway since 2003, will provide nationally consistent estimates of environmental effects resulting from conservation practices and systems applied. CEAP results will be used in conjunction with performance data gathered through agency field-level business tools to help produce estimates of environmental effects accomplished through agency programs, such as GRP. In 2006, a Blue Ribbon panel evaluation of CEAP strongly endorsed the project's purpose, but concluded "CEAP must change direction" to achieve its purposes. In response, CEAP has focused on priorities identified by the Panel and clarified that its purpose is to quantify the effects of conservation practices applied on the landscape. Information regarding CEAP, including reviews and current status, is available at (*http://www.nrcs.usda.gov/technical/NRI/ceap*).

Since 2004 and the initial establishment of long-term performance measures by program, NRCS has been estimating and reporting progress toward long-term program goals. Natural resource inventory and assessment and performance measurement and reporting policies are set forth in agency guidance (GM–290–400; GM–340–401; and GM–340–403) (*http://directives.sc.egov.usda.gov/*).

Demonstrating the long-term conservation benefits of conservation programs is an agency responsibility. Through CEAP, NRCS is in the process of evaluating how these long-term benefits can be achieved through the conservation practices and systems applied by participants under the program. The program requirements applicable to participants that relate to producing long-term conservation benefits are described previously under "measuring program performance."

Track participation by crop and livestock type. NRCS' automated field-level business tools capture participant, land, and operation information. This information is aggregated in the National Conservation Planning database and is used in a variety of program reports. Additional reports will be developed to provide more detailed information on program participation to meet congressional needs. These and related program management procedures supporting program implementation will be set forth in agency guidance.

The program requirements applicable to participants that relate to tracking participation by crop and livestock type are put forth in these regulations in § 1415.4 "Program Requirements," which makes clear program eligibility requirements, including the requirement to provide NRCS the information necessary to implement GRP.

Coordinate these actions with the national conservation program authorized under the Soil and Water Resources Conservation Act (RCA). The 2008 Act reauthorized and expanded on a number of elements of the RCA related to evaluating program performance and conservation benefits. Specifically, the 2008 Act added a provision stating, "Appraisal and inventory of resources, assessment and inventory of conservation needs, evaluation of the effects of conservation practices, and analyses of alternative approaches to existing conservation programs are basic to effective soil, water, and related natural resources conservation."

The program, performance, and natural resource and effects data described previously will serve as a foundation for the next RCA, which will also identify and fill, to the extent possible, data and information gaps. Policy and procedures related to the RCA are set forth in agency guidance (GM–290–400; CPM–440–525; and GM–130–402) (*http://directives.sc.egov.usda.gov/*).

The coordination of the previously described components with the RCA is an agency responsibility and is not reflected in these regulations. However, it is likely that results from the RCA process will result in modifications to the program and performance data collected, to the systems used to acquire data and information, and potentially to the program itself. Thus, as the Secretary proceeds to implement the RCA in accordance with the statute, the approaches and processes developed will improve existing program performance measurement and outcome reporting capability and provide the foundation for improved implementation of the program performance requirements of section 1244(g) of the Food Security Act of 1985, as amended.

Economic Analysis—Executive Summary

Pursuant to Executive Order 12866, Regulatory Planning and Review, NRCS has conducted a benefit-cost analysis of GRP as formulated for the final rule. This requirement provides decisionmakers with the opportunity to develop and implement a program that is beneficial, cost-effective, and that minimizes negative impacts to health, human safety, and the environment.

GRP is a voluntary program for landowners and operators to protect, restore, and enhance grassland, including rangeland, pastureland, shrubland, and certain other lands. The program emphasizes support for grazing operations, enhancement of plant and animal biodiversity, and protection of grassland and land containing shrubs and forbs under threat of conversion.

Methodology Employed in This Study

NRCS has been charged with implementing GRP as authorized and funded by Congress in "protecting and restoring eligible grasslands through

easement purchases and rental contracts with private landowners and operators." Given the scope of GRP, the analysis is national in scope and evaluates the potential costs and benefits under several scenarios. When possible, environmental, economic, and social costs and benefits were identified for the land user, the general public, and the government.

Given the current backlog of GRP applicants, full producer participation is expected up to the acreage constraint mandated in the 2008 Act. The main costs of agricultural land retention efforts include the restrictions on the activities landowners can pursue on the grazing land and Federal program costs that consist of initial costs for easement contracts and annual payments for rental contracts. It is assumed that easement costs and annual rental costs capture the future land use. These costs must then be compared to the benefits of preserving the land for grazing or forage production. Benefits include the maintenance (and possible improvement) of the flow of ecological goods and services emanating from its current use in agriculture, forage production, recreation, scenic views, and other non-use benefits such as knowing that grazing lands will be available for future generations.

Two baselines were considered in this analysis. Baseline One assumes that no changes were made to GRP, with both program features and acreage levels continued at pre-2008 levels. Baseline Two assumes that all program and acreage levels mandated in the 2008 Act are implemented. Against these baseline scenarios, two policy scenarios were examined. Policy scenario one assessed the benefits and costs of the expanded acreage targets in the 2008 Act without the program changes. Policy scenario two assessed the benefits and costs of the program changes mandated in the 2008 Act without expanded acreage targets (*i.e.,* use fiscal year (FY) 2007 acreage levels). The baselines and policy scenarios are shown in the table below.

SUMMARY OF GRP POLICY SCENARIOS

Baseline/Scenario	Description of baseline/scenario	Information for FY 2009–FY 2012
A. Baseline One	GRP policy remains unchanged and acreage will continue at FY 2007 acreage levels through FY 2009–FY 2012. That is, no action on the 2008 Act GRP changes.	Baseline of pre-2008 program.
B. Policy Scenario One	GRP policy remains unchanged, but acreage increases to reflect the 2008 Act acreage goal levels through FY 2009–FY 2012.	Outcomes given the 2008 Act GRP acreage goals using "Baseline one" program provisions (pre-2008 program).
C. Baseline Two	Full implementation of the 2008 Act GRP changes	Outcomes given full implementation of the 2008 Act.
D. Policy Scenario Two	Full implementation of the 2008 Act GRP changes, but funding/acreage goals set at FY 2007 acreage levels through FY 2009–FY 2012.	Outcomes given the 2008 Act GRP statutory provisions with previous acreage goals.

Analysis

The benefits and costs of the baseline and policy scenarios are shown in the following table. These results suggest that GRP creates positive net benefits. Given the estimates of benefits and costs which are described in the main text, the scenario that maximizes undiscounted net benefits is Baseline Two, implement all GRP program changes mandated in the 2008 Farm Act. The mandated allocation of 40 percent of contract funds to rental contracts and 60 percent to easements plus the elimination of the 30-year easements and 30-year contracts contributed to the estimated $424 million in undiscounted net benefits for Baseline Two. Although these two factors raised initial program costs, they generated a longer stream of undiscounted benefits over a longer time period. When discounting is applied, Baseline Two maximizes discounted net benefits at the 3 percent level. At higher discount rates such as 7 percent, net benefits decrease significantly for Baseline Two. The higher upfront costs of permanent easements offset the heavily discounted (7 percent) stream of future benefits.

COMPARISON OF NET BENEFITS FOR THE BASELINE AND POLICY SCENARIOS

Baseline/Scenario	Total acres	Net benefits (0% discount)	Net benefits (3% discount)	Net benefits (7% discount)
Baseline One [1]	541,900	$152,557,735	$65,396,686	$11,752,922
Policy Scenario One [2]	1,220,000	343,456,522	147,229,336	26,460,025
Baseline Two [3]	1,220,000	423,798,000	152,220,692	4,895,332
Policy Scenario Two [4]	542,000	186,282,400	67,373,841	2,630,771

[1] Do not implement GRP program changes mandated in the 2008 Act. Obligate new contracts using the FY 2007 program acres for FY 2009–FY 2012.

[2] Implement the new acreage goal of the 2008 Act, but do not implement any of the other required changes.

[3] Implement program changes mandated by the 2008 Act. These include dropping the 30-year easements and 30-year rental contracts and allocating 40 percent of the funding to rental contracts and 60 percent to permanent easements.

[4] Implement program changes (elimination of 30-year easements and rental contracts and 40–60 split between rental contracts and easements) mandated by the 2008 Act except for acres, which remain 542,000.

Conclusions

Substantial social, economic, and environmental benefits are associated with protecting grasslands in and around metropolitan and rural communities. These benefits include improved water quality, soil quality, soil conservation, plant and animal diversity, scenic vistas, community heritage, economies, and recreational activities. Although not all of these benefits were estimated in this analysis, both the previous GRP and the modified GRP in the 2008 Act yielded sufficient measureable benefits to offset

measurable costs. GRP, as currently implemented, maximized undiscounted net benefits as well as net benefits discounted at 3 percent. At the higher 7 percent discount rate, the front loading of costs of permanent easements at the beginning of the contracts overwhelmed the flow of discounted benefits over time. A more complete accounting of ecosystem goods and services would increase benefits over time, thus increasing net benefits for all the baseline and policy scenarios. Given this information, NRCS recommends Baseline Two, full implementation of GRP as specified in the 2008 Act.

Discussion of the Program

Healthy grasslands protect soil quality; prevent soil erosion, provide sustainable forage for livestock, forage, and cover for wildlife; improve water quality; and sequester carbon. GRP is a voluntary program to assist landowners and agricultural operators in restoring and protecting eligible grassland, land that contains forbs, or shrublands for which grazing is the predominant use through rental contracts and easements. The Farm Security and Rural Investment Act of 2002 (2002 Act), Pub. L. 107–171, authorized GRP by adding sections 1238N through 1238Q to the Food Security Act of 1985, as amended, 16 U.S.C. 3801 *et seq.;* and providing $254 million through FY 2007 to enroll no more than 2 million acres of restored or improved grassland, rangeland, shrubland, and pastureland. The program regulations are set forth at 7 CFR part 1415.

Section 2403 of the 2008 Act (Pub. L. 110–246) reauthorized GRP and made several amendments to the implementation of the program. The 2008 Act authorized the enrollment of an additional 1.22 million acres of eligible land from FY 2009 through FY 2012.

The Secretary of Agriculture delegated the authority to administer GRP on behalf of the CCC to the Chief, NRCS, who is a CCC Vice President and the Administrator, Farm Service Agency (FSA), who is the CCC Executive Vice President. NRCS has the lead responsibility on regulatory matters, technical issues, and easement administration, and FSA has the lead responsibility for rental contract administration and financial activities. The agencies consult on regulatory and policy matters pertaining to both rental contracts and easements. At the State level, the NRCS State Conservationist and the FSA State Executive Director determine how best to utilize the human resources of both agencies to deliver the program and implement national policies in an efficient manner given the general responsibilities of each agency.

On January 21, 2009, the CCC published an interim final rule in the **Federal Register** (74 FR 2317) to incorporate programmatic changes authorized by the 2008 Act. The CCC also incorporated improvements to program administration. The changes made by the interim final rule included:

(a) Identifying that the program's focus changed from protecting, conserving, and restoring grassland resources on private lands to assisting owners and operators of private and Tribal land in protecting grazing uses and related conservation values by restoring and conserving eligible land;

(b) Changing the term rental agreements to rental contracts;

(c) Adding new definitions, revising existing definitions for clarity and consistency with other USDA-administered programs, and removing definitions that were no longer relevant to GRP;

(d) Removing the 30-year rental agreement and 30-year easement enrollment options;

(e) Removing the minimum acreage enrollment requirement. Previously, applicants needed to submit 40 contiguous acres for enrollment to be eligible;

(f) Offering enrollment priority for land previously enrolled in the Conservation Reserve Program (CRP) providing certain conditions exist;

(g) Expanding land eligibility criteria to include land that has been historically dominated by grassland, forbs, or shrubland when it contains historical or archaeological resources, or when it would address issues raised by State, regional, and national conservation priorities;

(h) Allowing for the inclusion of permissible and prohibited activities under a rental contract or easement;

(i) Including a separate payment limitation for restoration agreements and rental contracts;

(j) Establishing the requirements for determining easement compensation;

(k) Requiring implementation of a GRP management plan;

(l) Adding the authority to enter into cooperative agreements with eligible entities to own, write, and enforce easements; and

(m) Establishing that the entity will provide a share of the purchase price at least equivalent to the amount provided by the CCC, when eligible entities are acquiring easements under cooperative agreements.

On August 21, 2009, the CCC published an amendment to the January 21, 2009, interim final rule (74 FR 42170) to clarify the nature of the contingent right of enforcement, expand its discussion regarding GRP policy for wind and solar power facilities, and remove the blanket prohibition upon wind power facilities for off-farm power generation. Additionally, the CCC sought public comment to these changes and additional public input on the January 21, 2009, interim final rule.

Registration and Reporting Requirements of the Federal Funding and Transparency Act of 2006

OMB recently published two regulations, 2 CFR part 25 and 2 CFR part 170, to assist agencies and recipients of Federal financial assistance comply with the Federal Funding Accountability and Transparency Act of 2006 (FFATA) (Pub. L. 109–282, as amended). Both regulations have implementation requirements beginning October 1, 2010.

The regulations at 2 CFR part 25 require, with some exceptions, recipients of Federal financial assistance to apply for and receive a Dun and Bradstreet Universal Numbering System (DUNS) number and register in the Central Contractor Registry (CCR). The regulations at 2 CFR part 170 establish new requirements for Federal financial assistance applicants, recipients, and sub recipients. The regulation provides standard wording that each agency must include in its awarding of financial assistance that requires recipients to report information about first-tier sub awards and executive compensation under those awards.

NRCS has determined that 2 CFR part 25 and 2 CFR part 170 apply to certain awards of financial assistance provided under GRP. Therefore, NRCS has incorporated, by reference, these registration and reporting requirements at § 1415.6 and will include the requisite provisions as part of the GRP contract.

Comments and CCC Responses

USDA received a total of 19 responses that included 148 comments in response to the two GRP public comment periods. USDA received 16 responses that included 129 comments during the January 21, 2009, interim final rule comment period and 3 responses that included 19 comments during the August 21, 2009, interim final rule amendment comment period.

In this preamble discussion, the comments have been organized in alphabetic order by topic. The topics include: Administration, administrative costs, allocation, compatible use, compensation, conservation and grazing plans, cooperative agreement,

definitions, easements or agreements (duration), easements or agreements (60/40 split), ecosystem credits, enrollment requirements, general, land eligibility, misrepresentation and violations, participant, program requirements, ranking, restoration agreements, and windmills. Additionally, USDA received comments that did not fit any of these topic areas.

Administration

Comment: One commenter supported the policy that allows State officials to identify State priorities for project selection (with input from the State Technical Committee) and the authority for States to develop ranking criteria. The commenter would also like provisions to allow local stakeholders to identify priorities for GRP funds.

Response: USDA appreciates the support for its policies and maintains decisionmaking responsibilities at the lowest level reasonable. Local stakeholders may provide GRP input on program priorities by participating in local working groups authorized by 7 CFR part 610. The local working groups provide input to the State Technical Committee, authorized by 7 CFR part 610, on a myriad of topics including potential program application ranking criteria. No changes were made to the final rule.

Comments: Section 1415.2(a)(3) provides that the NRCS Chief and FSA Administrator ensure that national, State, and local-level information regarding program implementation is made available to the public. Two commenters recommended USDA clarify in the final rule how the information will be made available to the public and identify whether there will be an opportunity for further public input. They recommended that USDA utilize public input through State Technical Committees for improving implementation of the program.

Response: Section 1415.2(a)(3) provides flexibility for the agency leaders to determine the appropriate approach and methods for ensuring the public is provided information regarding program implementation. State Technical Committee meetings are open to the public, and USDA provides opportunity for people to comment on program implementation at any time. The public can view the State Technical Committee standard operating procedures at *http://directives.sc.egov.usda.gov/*, or obtain a copy from their local NRCS office. No changes were made to the final rule.

Comments: One commenter recommended that USDA revise § 1415.2(b)(4) to require input from the State Technical Committee when developing program outreach materials, and that USDA revise § 1415.2(b)(6) by requiring input from the State Technical Committee when developing grazing management plans and restoration agreements. The commenter indicated that grazing management plans should improve biodiversity and requested that guidance be provided by the State Technical Committee on criteria that is needed and must be included in the grazing management plans to address the biodiversity component.

Response: The State Technical Committee is established to assist USDA by making recommendations relating to the implementation and technical aspects of natural resource conservation activities and programs. The State Technical Committee provides recommendations on a myriad of topics including, but not limited to, recommendations on:

(1) The criteria to be used in prioritizing program applications;

(2) The State-specific application criteria;

(3) Priority natural resource concerns in the State;

(4) Emerging natural resource concerns and program needs; and

(5) Conservation practice standards and specifications.

USDA agrees with the comment that reference to the State Technical Committee should be added to § 1415.2(b)(4). Therefore, paragraph (b)(4) has been revised to read as follows: "With advice from the State Technical Committee, developing program outreach materials at the State and local levels to help ensure landowners, operators, and tenants of eligible land are aware and informed that they may be eligible for the program."

USDA believes that the State Technical Committee provides guidance on GRP management plans by making recommendations on conservation practice standards and specifications. Biodiversity is addressed in the NRCS Field Office Technical Guide (FOTG) and through its conservation practice standards.

Administrative Costs

USDA received five comments from two respondents related to the administrative cost provisions in § 1415.11 Restoration agreements, and § 1415.17 Cooperative agreements. Section 1415.11 describes the applicability of restoration agreements and the terms of such agreements; and § 1415.17 describes the terms through which USDA will enter into an agreement with an eligible entity for such entity to write, hold, and enforce a GRP easement.

Comments: One commenter expressed that the policy in § 1415.17(c)(10) places undue financial burden on the potential cooperators, and the policy in § 1415.17(c)(13) places undue restrictions and unfair burdens that will make it difficult for cooperators to participate.

Further, § 1415.17(c)(13) expressly disallows GRP funds for expenditures for administrative costs such as appraisals, surveys, and title insurance that are authorized when the United States purchases a GRP easement directly from the landowner. The commenter contends it is appropriate for GRP funds to be used for these expenses on at least a cost-share basis when a qualified eligible entity is conducting this administrative function under a cooperative agreement.

Response: The GRP statute provides that eligible entities who enter into an agreement with USDA to acquire easements will assume the costs incurred in administering the easement. In the interim final rule, USDA explained that it patterned GRP after the Farm and Ranch Lands Protection Program (FRPP) where the partnering entity assumes responsibility for the majority of the administrative costs related to acquisition. This decision was intended to apply consistent policies to the extent allowable under the terms of each program's statute. Financial assistance funds are used in both GRP and FRPP to purchase a share of the conservation easement. USDA will use program funds to conduct an environmental database records search and appraisal reviews as it does with FRPP. No changes were made to the final rule.

Comments: Section 1415.11(k) includes provisions for restoration agreements when title for an easement acquired by USDA is transferred to an eligible entity. One commenter recommended revising policy that requires the entity be responsible for providing funding for the completion of the restoration agreement. The commenter recommended the entity only be responsible for the administration of the restoration agreement. The commenter contends that the policy limits USDA's ability to transfer easements to other entities capable of managing the easement. The commenter had a similar comment about the policy in § 1415.11(l) regarding easements held by eligible entities.

Response: USDA agrees that the provisions in paragraphs (k) and (l) of § 1415.11 may reduce the interest in

holding or acquiring GRP easements for some otherwise eligible entities. However, these provisions are required by the GRP statute (16 U.S.C. 3838q(c)1(C)). When the Secretary transfers easement title of ownership to an eligible entity to hold and enforce, in lieu of the Secretary, and when the Secretary enters into a cooperative agreement with an eligible entity for the entity to acquire easements, the eligible entity agrees to assume the costs incurred in administering and enforcing the easement, including the costs of restoration or rehabilitation of the land as specified by the owner and the eligible entity. No changes were made to the final rule.

Allocation

Comments: Seven commenters recommended USDA revise § 1415.2(a)(2) to require USDA to use State wildlife action plans in determining national allocation formulas or when establishing program priorities. The commenters also recommend that USDA coordinate with State fish and wildlife agencies as part of assessing natural resource concerns. Another commenter expressed that considering issues raised by State, regional, and national conservation priorities, as required in § 1415.5(b)(2)(iii), to inform local ranking priorities should also be used to inform the national allocation process. By incorporating fish and wildlife resource priorities for grasslands into the allocation process, USDA can help maximize the fish and wildlife benefits while emphasizing the support for grazing operations.

Response: USDA considered using State wildlife action plans in national allocation formulas. However, USDA concluded that the plans do not lend themselves to being used in a standardized formula process because of inconsistencies in the format of the plans across the country. USDA will consider using these plans in allocation formulas when a more consistent format is developed. State wildlife action plans can be used by State Technical Committees to assess natural resource concerns and determine project ranking at the State level. No changes were made to the final rule.

Comments: One commenter expressed that § 1415.2(a)(2), as written, did not provide sufficient assurance that the agency will use the national allocation process in a way that maximizes the conservation benefits that grazing operations can deliver.

Response: USDA developed an allocation process to consider the three priorities of the program as provided for in the 2008 Act at 16 U.S.C. 3838p(a)(2). The national allocation process considers the amount of range and pastureland and loss, number of livestock operations, Federally listed threatened and endangered species, and candidate species. Additional factors can be added at the State level for individual application ranking by State Technical Committees whose members include State fish and wildlife agencies. No changes were made to the final rule.

Compatible Use

Comments: Two commenters expressed concern related to a participating landowner's rights regarding hunting and fishing. They wanted these activities identified as reserved rights of the landowner. The commenters recommended USDA change this language as well as other compatible use language in this final rule.

Another commenter recommended rewording the definition of compatible use as follows: "Compatible use includes those activities, uses, or measures that do not interfere with the timely implementation or full effectiveness of conservation practices as described in the restoration plan."

Response: The term compatible use is not used in the GRP rule. The rule does provide the authority in § 1415.4(h)(6) to allow USDA to determine the manner, number, intensity, location, operation, and other features associated with an activity that will not adversely affect the grassland resources or related conservation values protected under an easement or rental contract.

However, USDA did clarify the easement deed and rental contracts, as well as § 1415.4(h)(6) regarding hunting and other reserved rights by including the following revised language: "This also includes undeveloped, passive, recreational uses such as hiking, camping, bird watching, hunting, and fishing as long as such uses, as determined by the grantee, do not impair the grazing uses and other conservation values."

Compensation

Comments: One commenter recommended NRCS eliminate the new requirement for market analysis and reinstate the use of an individual appraisal for determining value of a GRP easement. The commenter expressed an opinion that a market analysis will not accurately reflect the fair market value of a property. The main concern is that the broad brush approach will discourage landowners from applying for the program and ultimately protecting their land.

Response: The 2008 Act specifies that easement compensation will not exceed the fair market value of the land less the grazing value of the land encumbered by the easement. Further, either an appraisal or area-wide market analysis will be used as one method for determining easement compensation. USDA agrees with the commenter that an area-wide market analysis would not accurately reflect the fair market value of a property in areas where insufficient market data exists. In those cases, USDA will be using an appraisal; therefore, no changes were made to the final rule.

Comments: Another commenter expressed that it is not clear in the interim final rule how FSA will determine grazing value for rental contracts. The commenter would like the final rule to clarify that the NRCS Chief and FSA Administrator may allow flexibility to adjust rental rates to be competitive with other uses, such as pasture rental, to attract program participants.

Response: USDA agrees that if rental rates become too low, inadequate offers will be received to maximize the environmental benefits. Currently however, demand for rental contracts is high with more applicants than funding allows. Raising rental rates would reduce the acres enrolled. FSA determines GRP rental rates by using an administrative process which considers rates established for similar uses under other conservation programs. This process considers rates such as marginal pastureland rates and other rates used for CRP, as well as trying to ensure consistency between counties. With the current high demand for GRP rental contracts at the present rental rates, no changes were made to the final rule.

Conservation and Grazing Plans

Comments: One commenter recommended USDA revise § 1415.2(b)(6) to include "developing conservation plans" to the list of State Conservationist's responsibilities.

Response: The State Conservationist is responsible for all planning activities including conservation plans, when applicable. USDA agrees with the commenter that clarity is needed. USDA is using the term GRP management plan to include conservation plans and restoration plans in addition to any applicable grazing management systems. Therefore, USDA revised § 1415.2(b)(6) to read "Developing GRP management plans and restoration agreements, when applicable."

Cooperative Agreement

Comments: One commenter questioned how § 1415.12(a) will be

interpreted. The commenter recommended that USDA clarify that conservation easements may be amended if such amendments clearly preserve or benefit the conservation values of the property. Most easements include an amendment provision. The commenter expressed concern that a strict no amendment standard may have future adverse and unintended consequences as management practices change and knowledge of proper resource management advances.

Response: USDA agrees that § 1415.12(a) should be clarified. USDA understands the commenter's concerns and is aware that easement deeds typically include modification provisions if the modification serves the conservation purposes of the easement. USDA does not currently have legal authority to change the substantive terms of a GRP conservation easement once it has been recorded. Specifically, modifications that would result in acquisition or divestiture of additional property rights cannot be made. However, deed changes that do not result in the acquisition or divestiture of property rights may be made, such as technical changes or clarifications of deed text. As management practices change, the GRP management plan may be modified to address advances in resource management knowledge.

Comments: One commenter expressed that to the extent an eligible entity is holding and managing an easement, the eligible entity must be privy to the grazing plan in addition to USDA and the landowner. The eligible entity should also be privy and a party to any modifications of a grazing plan if it is holding the easement. The commenter believes this is what is meant under statutory reference to mutual agreement of the parties under section 12380(b)(6). Another commenter questioned whether it is the responsibility of the eligible entity or NRCS to develop these plans. If it is the role of NRCS, the commenter suggested the eligible entity should provide input into the plans if they are expected to monitor and enforce them.

Response: Section 1415.4(c) provides that all participants are required to implement a GRP management plan. USDA added, "NRCS will develop GRP management plans with eligible entities." This language ensures the partnering entity is fully aware of the GRP management plan requirements and is party to the development of these plans. No changes were made to the final rule.

Comments: One commenter stated that the GRP statute does not specify that a dedicated fund is required by an eligible entity for the purpose of easement management, monitoring, and enforcement. While the commenter agreed that it is appropriate and desirable for entities to have an adequate stewardship endowment fund to assure they can meet the perpetual management of conservation easements they hold and administer, they identified that conservation monitoring and management functions may be addressed separately from enforcement purposes in the organization's operational budget. In such cases, the various funding sources may not be considered dedicated. They recommend that USDA change the final rule to clarify the funds be a necessary requirement for eligible entities, but the fund need not be dedicated. The commenter also expressed that GRP should be set up and run in a similar manner to the FRPP, so that eligible third parties can certify for both programs.

Response: The GRP statute provides that the Secretary may approve an eligible entity if the Secretary determines the entity has the resources necessary to effectuate the purposes of its charter. The dedicated fund requirement established in the interim final rule provides USDA a level of assurance that the easement will be managed, monitored, and enforced for the duration of the easement. Unlike the FRPP statute, the GRP statute does not include a certification process. The dedicated fund requirement, however, provides USDA a means to evaluate if an eligible entity has sufficient resources to administer, manage, monitor, and defend a GRP conservation easement. NRCS will evaluate the funding structure of an entity's stewardship activities when making the determination of whether there is a dedicated fund. No changes were made to the final rule.

Comments: Six commenters expressed that USDA should include landowners' donations, when applicable, as part of the entity's share of the purchase. The commenters further expressed that it is important to note that eligible entities are providing a significant role in furthering the purpose of GRP by committing to perpetually monitoring and enforcing the terms of the easements and plans. Many States with considerable grassland resources do not have dedicated State resources for leveraging Federal funds. The commenters believe USDA's policy inhibits GRP participation in areas of the country where local conservation easement purchase funds are limited or nonexistent, and thus, the restriction places too great a financial burden on potential cooperating entities.

Response: USDA evaluated the policy related to landowner donations and entity purchase price. USDA agrees with the commenters and has revised the definition of purchase price to read: "Purchase price means the amount paid to acquire an easement under a cooperative agreement between NRCS and an eligible entity. It is the fair market value of the easement." This change allows landowner donations to count as part of the entity share.

Comments: USDA received a number of comments related to the Federal Government's interest in GRP easements. The GRP interim final rule amendment alleviated a number of concerns related to the easement acquisition process and whether Federal real property acquisition requirements apply. One commenter supported maintaining language in § 1415.17(e)(1) that the rights acquired by the United States are a vested property right and cannot be condemned or terminated by State or local government.

Response: USDA agrees with the comment about § 1415.17(e)(1). No changes were made to the final rule regarding the interest of the United States being a vested property right.

Definitions

Biodiversity

Comments: Eleven commenters requested USDA add a definition for the term biodiversity. They would like to add a definition for biodiversity to read: Biodiversity means the variety and variability among living organisms native to the local ecological sub-region and ecological complex. They also want the term biodiversity added to the Common Grazing Practices definition as follows: "Common Grazing Practices means * * * activities necessary to maintain and *improve the biodiversity and* viability of forage. * * *"

Response: USDA agrees with the commenters that including a definition for biological diversity improves understanding of the regulation. Therefore, USDA adds a definition for biological diversity to the final rule that reads as follows: "Biological diversity means the variety and variability among living organisms and the ecological complexes in which they live." USDA removed the definition for the term "plant and animal biodiversity" because this term is no longer needed.

Common grazing practices are allowable uses in a local area. Plant species composition is considered in the development of GRP management plans. Because specific grazing practices vary by region, they may or may not improve biodiversity. While GRP emphasizes

support of biodiversity, common grazing practices customary to the region are allowed. No change was made to the definition of common grazing practices in the final rule.

Conservation Plan

Comments: One commenter requested USDA expand the definition of conservation plan to reflect all grassland values. Specifically, the commenter requested the definition be amended as follows: "conservation plan means a record of the GRP participant's decisions and supporting information that will be developed *to address* resource concerns in addition to grazing land uses. The conservation plan *will describe the conservation values of the grassland or shrubland to be addressed and* will include. * * *"

Response: USDA agrees with the comment and added the definition of GRP management plan to include a conservation plan. The GRP management plan means the document developed by NRCS that describes the implementation of the grazing management system consistent with the prescribed grazing standard contained in the FOTG. The GRP management plan will include a description of the grazing management system, permissible and prohibited activities, any associated restoration plan or conservation plan if applicable, and a description of USDA's right of ingress and egress.

A conservation plan will be accepted as a GRP management plan and will describe the implementation and maintenance of grazing management and conservation practices directly related to eligibility criteria under which the land is enrolled.

Conservation Values

Comments: One commenter recommended USDA revise the definition of conservation values to mean those natural resource attributes that "*sustain and enhance* ecosystem functions and values of *grasslands and shrublands* including, but not limited to, *native plant and animal biodiversity,* habitat for *native* grassland and shrubland. * * *"

Response: The purpose of GRP is to assist owners and operators to protect grazing use and related conservation values. Improved range and pasture which protect grazing uses may or may not include native grasslands as a related conservation value. USDA did not restrict the definition of conservation value to only native plants and animals since the primary purpose of the program is to protect grazing uses. However, USDA agrees the definition can be improved. Therefore, the definition has been amended to read "Conservation values means those natural resource attributes that sustain and enhance ecosystem functions and values of the grassland area including, but not limited to, habitat for grassland and shrubland dependent plants and animals, native plant and animal biodiversity, soil erosion control, forage production, and air and water quality protection."

Enhancement

Comments: One commenter expressed that the definition of enhancement refers to the viability of grassland resources but fails to recognize grazing values. The definition only refers to wildlife habitat, which is just one purpose of the program. The commenter wants the definition of enhancement to recognize grazing values.

Response: USDA agrees with the comment and added grazing resources to the definition.

Grazing Management Plan

Comments: Several comments were received regarding the definition of grazing management plans. They expressed that the grazing management plan should always be associated with a conservation plan and recommended rewording the definition to reflect this. One specific concern is that grazing management plans will not address related conservation values; another concern is that the definition of grazing management plans does not accomplish the protection of related conservation values and is not consistent with the stated intent of the managers to ensure conservation purposes are met.

One commenter recommended specific amendatory language to read: "The grazing management plan will include a description of the grazing management system, permissible and prohibited activities, an associated conservation plan, any associated restoration plan, if applicable, and a description of USDA's right of ingress and egress." Other commenters also expressed that requiring participants and grantees to develop and follow two separate plans adds complexity and confusion. Section 1415.4(c) indicates participants may have to agree to and implement a grazing management plan and a conservation plan when a participant receives ranking points for resource concerns other than grazing resources. A more practicable approach would be to require the grazing management plan to incorporate specific conservation objectives if the application is accepted because of State priorities for local conservation needs. They want to stress that any management plan must be developed and agreed to by the grantor and grantee prior to the closing of the easement deed. Furthermore, especially for land in perpetual easements, it may be necessary to modify or restructure management plans as environmental conditions and grassland management knowledge and opportunities develop in the future.

Response: USDA agrees that the language in the interim final rule is confusing regarding when a grazing management plan is required and when a conservation plan is required. This final rule changes the definition of "grazing management plan" to a "GRP management plan" as the minimum planning requirement for GRP participation. A conservation plan is not required, but can be used as a GRP management plan for certain lands enrolled in the program. The prescribed grazing standard used for developing a GRP management plan does address related conservation values because it includes vegetation and forage management, water quality and quantity, riparian and watershed function, soil erosion and condition, wildlife, and prescribed fire.

USDA revised the language in § 1415.4(c) to read that all participants in GRP are required to implement a GRP management plan approved by NRCS. NRCS will develop GRP management plans with eligible entities. In cases where a participant receives ranking points on the basis of resource concerns other than grazing land concerns, all such resource concerns will be addressed in an applicable conservation plan.

Infrastructure

Comments: The interim final rule amendment discusses the footprint of the related infrastructure but does not include a definition. USDA received comments that suggested describing the infrastructure of power generation facilities to include transmission corridors and roads.

Response: USDA did not adopt the recommendation to add a definition for the term infrastructure. Specific infrastructure needs may vary from project-to-project and are difficult to define. Since USDA will conduct site-specific environmental analysis for proposed projects associated with renewable energy, the specific types of infrastructure will be addressed on a case-by-case basis.

Native

Comments: USDA received multiple comments recommending that GRP be restricted to native grassland systems.

Response: The GRP statute provides that the purpose of the program is to "assist owners and operators in protecting grazing uses and related conservation values. * * *" Native grasslands are included in program purposes, as are improved rangeland and pastureland for which grazing is the predominant use. Priority for native grasslands can be addressed through the ranking process. Native grasslands can be a priority at either the national, State, or regional level. No changes were made to the final rule.

Nesting Season

Comments: GRP participants are permitted to hay, mow, or harvest for seed production subject to appropriate restrictions, as determined by the State Conservationist, during the nesting season for birds in the local area that are in significant decline, or are conserved in accordance with Federal or State law. The interim final rule defined nesting season as the time of year that animals (birds and others) build or otherwise find a place of refuge for purposes of reproduction or dormancy. Commenters requested clarification of the intent of the term dormancy in the definition. USDA received a number of comments on the definition of nesting season including clarifying or removing the phrase "subject to appropriate restrictions;" insert "birds and other animals" in place of birds and others; and clarify "or dormancy."

Response: The GRP statute identifies birds in the local area that are in significant decline. For clarification, given the specificity in the statute, USDA revises the definition of nesting season to read "the time of year that grassland dependent birds in significant decline in the local area build nests or otherwise find a place of refuge for purposes of reproduction." NRCS identifies the bird species and nesting season in the GRP management plan.

Purchase Price

Comments: USDA received comments expressing that the rule goes beyond statutory authority to define the term purchase price in such a way as to require a cash match from the eligible entity, which the statute does not require. The commenters suggested that the eligible entity at least match the Secretary with a combination of cash and landowner donation.

Response: USDA has revised the definition of purchase price to read "Purchase price means the amount paid to acquire an easement under a cooperative agreement between NRCS and an eligible entity. It is the fair market value of the easement." This change allows landowner donations to count as part of the entity share.

Shrubland

Comments: One commenter recommended USDA remove the following words from the shrubland definition: "and generally produces several basal shoots instead of a single bole." The commenter explained there is a number of shrubland species that are single boled and such distinction is not necessary to include in this definition.

Response: USDA agrees with the comment and has changed the definition in the final rule.

Easements or Agreements (Duration)

Comments: One commenter disagreed with the removal of the 30-year rental agreement as an enrollment option. The commenter supports shorter-term easements and cost-share agreements over permanent easements.

Response: The removal of the 30-year agreement and easement options was the result of the 2008 Act, and therefore, USDA has no discretion to change it. No changes were made to the final rule.

Easements or Agreements (60/40 Split)

Comments: USDA received four comments on the statutory requirement that the Secretary will use, to the extent practicable, 40 percent of the funds for rental contracts and 60 percent of the funds for easements. The interim final rule provides that USDA will manage the program nationally to ensure that, to the extent practicable, "no more than 60 percent of the funds are used for the purchase of easements * * * and no more than 40 percent of the funds are used for rental contracts." The commenters recommended USDA drop the "no more than" language since it is not required in statute and is unnecessarily limiting.

Response: USDA agrees that the phrase "no more than" creates an inflexibility that was not established in statute. Further, it creates an impractical impediment to efficient program implementation. Therefore, USDA removed "no more than" in § 1415.8(j).

Ecosystem Credits

Comments: Three comments were received requesting § 1415.10(h) be revised to be consistent with the Healthy Forest Reserve Program (HFRP) regulation in 7 CFR part 625.

Response: The following revision was made to § 1415.10(h) to be consistent with HFRP:

USDA recognizes that environmental benefits will be achieved by implementing conservation practices and activities funded through GRP, and that ecosystem credits may be gained as a result of implementing activities compatible with the purposes of a GRP easement, rental contract, or associated restoration agreement. USDA asserts no direct or indirect interest in these credits except:

(1) In the event the participant sells or trades credits arising from GRP funded activities, USDA retains the authority to ensure that the requirements for GRP rental contracts, easements, or restoration agreements are met and maintained consistent with this part; and

(2) If activities required under an ecosystem credit agreement may affect land covered under a GRP rental contract, easement, or restoration agreement, participants are highly encouraged to request an assessment from USDA about the compatibility of the activity prior to entering into such agreements.

Enrollment Requirements

Comments: In addition to the requests to amend the definition of grazing management plan as explained above, USDA received requests to revise the second sentence of § 1415.9(e) to read "NRCS will proceed with the development of the *grazing and conservation management plans and the* restoration plan, if applicable." The commenters expressed that all grazing management plans should be part of a conservation plan which addresses related conservation values associated with the program purpose.

Response: Grazing management plans are usually a part of a conservation plan. The GRP management plan includes grazing, conservation, and restoration planning. No changes were made to the final rule.

Comments: One commenter expressed concern about policy related to crop acreage bases in § 1415.4(l). Paragraph (l) requires rental contract participants to suspend any existing cropland base and allotment history for the land under another program administered by the Secretary. The commenter expressed support for allowing producers to maintain their crop base history as long as the producer has met all contract obligations. However, the commenter recommends that if program payments are reduced or delayed for 90 days or longer, the producer should have the option to withdraw from the contract without penalty, and program crop bases would be restored to their prior level.

Response: GRP rental contracts are fully funded for all years under the

contract once it is approved and signed by the CCC. USDA does not foresee a situation where producer's payments could be delayed for 90 days; therefore, no changes were made to the final rule.

General

Comments: One commenter recommended that § 1415.4(h)(4) be revised to read: "Grazing related activities, such as fencing and livestock watering facilities, provided that such activities will not adversely affect the related conservation values, including habitat for grassland and shrubland dependent birds and other animals."

Response: All permitted activities listed under § 1415.4(h) must be consistent with the conservation easement deed or rental contract terms. Permitted activities, such as grazing related activities, must also follow the GRP management plan and be consistent with GRP purposes, including related conservation values and appropriate restrictions during the nesting season for birds in the local area that are in significant decline.

Comments: USDA received one comment on the provisions related to permitted activities in § 1415.4(h)(6) that describes limits on infrastructure development along existing right-of-ways. The commenter identified that the text appears to prohibit any development on future right-of-ways. It was suggested that USDA and the grantee should have the ability to use discretion for future right-of-ways, especially when it is determined to be in the public benefit and grassland resources and related conservation values will not be adversely impacted.

Response: USDA recognizes the difficulty related to developing agreements without complete foresight into the potential future needs for the enrolled property. However, USDA does not have the statutory authority to amend GRP conservation easements. Therefore, USDA cannot amend an easement to reflect future right-of-ways. No changes were made to the final rule.

Comments: One commenter supports the use of the grazing management plan as the primary plan for GRP participants. No matter which of these plans are used (conservation plans, restoration plans, and grazing management plans), the commenter believed that landowners operating under these plans or agreements should have assurance they will not be found in violation of the Endangered Species Act or other Federal or State environmental laws by implementing their requirements.

Response: USDA follows its National Planning and Procedures Handbook in the development of GRP management plans to ensure that conservation practices are identified in accordance with NRCS standards and specifications. While the GRP management plans identify the management activities the landowner will conduct on the easement area, including implementation of conservation practices, the identification of an activity in a plan does not bestow upon the activity immunity from other legal requirements that a landowner must follow when conducting activities on private land, nor do USDA approvals bind other Federal or State agencies in the implementation of their own regulations. A landowner remains responsible for ensuring the activities conducted on his or her farm or ranch operation are in compliance with the law, including obtaining any necessary permits or approvals by other governmental entities. No changes were made to the final rule.

Comments: One commenter recommended an increase in the percentage of incidental land allowed. The commenter expressed that limiting the amount of incidental land that may be included in the GRP easement to 10 percent will result in awkward configurations that may not be the best conservation outcome and may be difficult to steward.

Response: The regulation does not limit incidental land to a percentage. The interim final rule provided in § 1415.5(c) that incidental land may be considered for enrollment to allow for the efficient administration of an easement or rental contract. The rule did not specify a percentage. Since the regulation provides USDA the flexibility to make determinations about incidental land, no changes were made to the final rule.

Comments: One commenter strongly disagreed with the statement in the preamble (in the section entitled Summary of 2008 Act Changes) that the expansion of the statement of purposes was intended to change the program's focus from protecting, conserving, and restoring grassland resources on private lands. Both the 2002 Act and the 2008 Act referred to restoring and conserving eligible land. The commenters identified that no language in the statute or the Statement of Managers supports the interpretation the agency has apparently taken that the addition of the reference to grazing uses represents a significant shift that justifies a decreased focus in the rule on meeting the program's conservation purposes. The commenter expressed that it is important to make this point because the change in program purposes in the statute is cited in the preamble to the interim final rule as justification for a number of changes USDA has made to the final rule. For example, the change in purposes is cited to support the agency's decision to remove in § 1415.1(b), the statement that one of the objectives of GRP is to emphasize preservation of native and naturalized grasslands and shrublands. The preamble states that the change in program purposes means that the program is not limited to native and naturalized grasslands.

Response: The change in emphasis was made to implement the intent of Congress as indicated in the statutory changes made in the new Farm Bill. Specifically, the statute states that the purpose of GRP is to assist owners and operators in protecting grazing uses and related conservation values. The previous statute emphasized preservation of native and naturalized grasslands and shrublands. Native grasslands are included in program purposes in this statute, as are improved rangeland and pastureland for which grazing is the predominant use. Applications are evaluated and ranked to emphasize support for grazing operations, plant and animal biodiversity, and threat to conversion to uses other than grazing. Native grasses are considered during the ranking process, and native grasslands are considered as part of the biodiversity emphasis. No changes were made to the final rule.

Land Eligibility

Comments: Two commenters supported the policy that allows and gives priority to enrollment of expiring CRP lands and for continuing to recognize the value of native grasslands. One commenter that recommended priority to native grasslands also suggested that expiring CRP, that was not established to native grasslands but that supported lesser or greater prairie chickens, should be an exception to a priority of native grasslands.

Response: USDA appreciates the support for its policies and maintains decisionmaking responsibilities at the lowest level reasonable. Priority for expiring CRP is authorized in 16 U.S.C. 3838n(A). Determination of the high ecological value and threat of conversion to uses other than grazing of these lands is determined by the State Conservationist, with input from the State Technical Committee. Local stakeholders do have the opportunity in GRP to provide input on land eligibility by participating in local working groups

authorized under 7 CFR part 610. No changes were made to the final rule.

Comments: Three commenters recommended adding the word native in § 1415.5(b)(2)(i).

Response: The purpose of GRP is to assist owners and operators in protecting grazing uses and related conservation values, and USDA recognizes the value of conserving native grasslands. USDA does not want to limit land eligibility to only native grasslands because this would preclude acceptance of other significant habitats such as expiring CRP lands with non-native grasses supporting lesser or greater prairie chickens. No changes were made to the final rule.

Comments: Two commenters suggested USDA coordinate with U.S. Fish and Wildlife Service (USFWS) and State fish and wildlife agencies when assessing potential impact of third party mineral rights for a GRP easement under § 1415.5(e). Another commenter believes that § 1415.5(e) will make it possible to place a GRP easement on a property with a split estate.

Response: Gas, oil, earth, or other mineral rights exploration may have adverse affects on the conservation values the GRP is protecting. USDA reserves the right to deny funding when there are exceptions to clear title on a property offered for a GRP easement that may undermine the purposes for which the United States acquired the easement. As part of its due diligence to determine whether outstanding rights may impact the conservation values, USDA will require a mineral remoteness test for any property with severed mineral rights. Consultation with the USFWS and State fish and wildlife agencies would not determine the potential for extraction of resources; therefore, no changes were made to the final rule.

Comments: One commenter appreciated the recognition of State, regional, and national conservation priorities and the inclusion of incidental lands under § 1415.5.

Response: USDA agrees with the comment and appreciates support of its policies.

Comments: One commenter believes that § 1415.5(b)(1) will allow USDA to target large tracts of grassland in the West.

Response: Grasslands, land that contains forbs, or shrubland, for which grazing is the predominant use, are eligible for funding consideration. Lands located in areas historically dominated by grassland, forbs, or shrubland that is compatible with grazing uses and related conservation values are also eligible. USDA is not targeting any particular region of the country. No changes were made to the final rule.

Misrepresentation and Violations

Comments: One commentor requested that USDA revise § 1415.14(b)(2) and (3) to include provisions for NRCS or an easement holder representative to enter easement lands when there is an easement violation and to allow both NRCS and an easement holder, who acquires an easement in accordance with either § 1415.17 or § 1415.18, to monitor the easement for violations.

Response: Section 1415.14 includes provisions for when the United States remains the easement holder. Sections 1415.17 and 1415.18 include provisions for when someone other than the United States holds title to the deed. The GRP deed provides "Upon notification to the grantor, grantee, or grantee's agents may enter the property to inspect for violations including, but not limited to, assessing compliance with the GRP management plan. However, notification by the grantee prior to entry is not required when the grantee believes there may be a violation of the terms of this deed. If the grantee finds a violation, the grantee may at its discretion take appropriate legal action in law or equity. Upon discovery of a violation, the grantee will notify the grantor in writing of the violation. Except when an ongoing or imminent violation could, as determined by grantee, seriously impair the conservation values of the property, the grantee will give the grantor written notice of the violation and 30 days to correct it before filing any legal action."

Participant

Comments: Two commenters recommended adding the following phrase to § 1415.4(h)(6): " * * * when it is determined by NRCS, *in consultation with USFWS and State fish and wildlife agencies,* that granting such right-of-way. * * *"

Response: USDA recognizes the need to engage appropriate expertise when considering allowing infrastructure development. Each State Technical Committee includes USFWS and State and fish wildlife agencies. USDA will coordinate with those agencies when evaluating any allowable activities. No changes were made to the final rule.

Program Requirements

Comments: One commenter suggested removing any restrictions to haying, mowing, or harvesting for seed production, stating that there should not be any restrictions on GRP land due to nesting season. The commenter also suggested that restrictions during the nesting season may be considered as part of a grazing management plan only if it is in the interest of the landowner.

Response: These restrictions are required by section 1238O(d)(1)(B) of the Food Security Act of 1985, as amended. Haying, mowing, or harvesting for seed production were made permissible activities provided appropriate restrictions were in place to protect birds in the local area that are in significant decline or are conserved in accordance with Federal or State law. No changes were made to the final rule.

Comments: Several commenters suggested adding the words other animals after birds in the restriction to haying, mowing, or harvesting for seed production in § 1415(h)(2).

Response: Haying, mowing, or harvesting for seed production may impact habitat for grassland dependent bird species if done during the nesting season in some areas. USDA agrees that other animals may also be impacted in local areas. The State Conservationist has authority to determine these impacts based upon species concerns at the local level. No changes were made to the final rule.

Comments: Two commenters suggested adding "and related conservation values" in § 1415.4(i)(1) and § 1415.4(i)(2). One of the commenters also suggested that orchards be specifically prohibited.

Response: USDA agrees that consistent terms should be used in both § 1415.4(i)(1) and § 1415.4(i)(2) and so has added the phrase "and related conservation values" to both sections in the final rule. Because orchards include fruit trees, as well as other agricultural commodities such as nuts, USDA has revised § 1415.4(i)(1) to read: "The production of crops (other than hay), orchards, vineyards, or other agricultural commodity that is inconsistent with maintaining grazing land and related conservation values."

Ranking

Comments: Three commenters requested USDA insert in § 1415.8(i)(2) the words "with advice from the State Technical Committee" after USDA to ensure informed decisions regarding high ecological value and significant threats.

Response: USDA accepts the comment and has revised § 1415.8(i)(2) accordingly.

Comments: Section 1415.8(i)(4) provides that expired CRP land enrolled under the CRP priority will not exceed 10 percent of the total number of acres accepted for enrollment in GRP in any year. Three commenters requested

USDA insert national before enrollment so that the CRP 10 percent limitation is managed at a national level. Another commenter requested USDA limit use of the CRP priority enrollment to areas where there is little or no remnant native prairie available.

Response: Because the CRP enrollment is managed nationally, the suggested change was made to § 1415.8(i)(4). USDA supports decisionmaking at the lowest level reasonable and believes that States with expiring CRP acres in areas with little or no remnant native prairie will rank these applications appropriately.

Comments: USDA received multiple requests to give the highest priority to native grasslands.

Response: No changes were made to the final rule. The statutory language does not restrict GRP to native grassland systems. There are situations in which the native habitat has been destroyed and introduced species are utilized to protect soil resources. The insertion of the term native would create a barrier for participation in those situations. Additionally, the GRP management plan addresses plant composition and is written to accomplish grazing management objectives, including biodiversity.

Restoration Agreements

The interim final rule in § 1415.11(g) provides if the participant is receiving cost-share for the same conservation practice or activity from another conservation program, USDA will adjust the GRP cost-share rate proportionately so that the amount received by the participant does not exceed 100 percent of the costs of restoration. The participant cannot receive cost-share from more than one USDA cost-share program for the same conservation practice or activity on the same land.

Comments: Two commenters recommended changing another conservation program to another Federal source. USDA and the States need the ability to use other non-Federal funding sources and opportunities to facilitate implementation. Both commenters also expressed that the paragraph was confusing as written.

Response: To reduce confusion, NRCS separated § 1415.11(g) into two paragraphs, paragraphs (g) and (h), to read as follows:

"(g) If the participant is receiving cost-share for the same conservation practice or activity from another conservation program, USDA will adjust the GRP cost-share rate proportionately so that the amount received by the participant does not exceed 100 percent of the costs of restoration.

(h) The participant cannot receive cost-share from more than one USDA cost-share program for the same conservation practice or activity on the same land.

Regarding the cost-share limitation language, USDA believes that the Federal cost-share assistance contribution should not enable a participant to receive more than 100 percent of the cost of the practice, no matter what the source. No changes were made to the final rule.

Windmills

Comments: In response to USDA's specific request for public comment on its policy related to windmill placement, the following comments were received:

(a) The GRP statute does not specifically address wind turbines or renewable energy within context of GRP. It is not authorized. Based on soil disturbance and associated road infrastructure needed for maintenance, as well as potential power substations, wind turbines should not be allowed with GRP. Wind turbines are not consistent with the GRP purpose to protect grazing uses and related conservation values or priority to land that could provide habitat for animal or plant populations of significant ecological value.

(b) USDA should revise the preamble to read:

* * * USDA will follow the guidelines being developed by the USFWS on avoiding and minimizing wildlife impacts from wind turbines. Until the guidelines are published, USDA will assess potential wildlife impacts in coordination with USFWS and the appropriate State fish and wildlife agency before authorizing any wind power generation facilities (on-farm or off-farm) on GRP lands. USDA will authorize power generation facilities only when the footprint of the facility and related infrastructure would have a minimal impact on the nature of the grazing lands and other conservation values obtained through the contract or easement.

(c) One commenter was encouraged by open communication and coordination between USDA and interested stakeholders to develop a consistent process for determining impacts from wind and solar generation and related infrastructure to grassland and migratory wildlife and other natural resources. The commenter expressed support for USDA following USFWS guidelines to minimize wildlife impacts in landscapes where wind energy development is pursued. The commenter asked that USDA consider site-specific scale of energy generation facilities and impact on original intent and purpose of GRP.

(d) The siting of wind power generation facilities must be consistent with the voluntary program's goal of protecting grassland for which grazing is the predominant use. Clearly, wind power generation for any end-user is consistent with a voluntary grazing program. The final rule should acknowledge this. Requirements for an onsite evaluation to determine potential impacts from wind generation on threatened and endangered species or at-risk species, *etc.* should be removed. In addition § 1415.4(i)(3) also prohibits wind power generation and should be removed from the final rule. It should make no difference to USDA if the wind power is being generated for on-farm use or for sale to electrical generators.

(e) One commenter recommended that existing or future State or Federal regulatory siting documents be used for wind energy developments proposed on GRP easements to minimize adverse effects on biodiversity.

(f) Impact to wildlife and habitat from power generation facilities are often cumulative across the landscape. The commenter recommended analyses conducted on a case-by-case basis that includes larger, landscape consideration as part of the NEPA review. NRCS will still have to coordinate with USFWS and the appropriate State fish and wildlife agency in order to allow power generation facilities that do not adversely affect biodiversity.

(g) Multiple comments were received that NRCS should consult with USFWS until the guidelines for windmill sitings are finalized. Some recommended USDA revise § 1415.4(h)(5) to read: "In addition, USDA will follow the guidelines being developed by the USFWS on avoiding and minimizing wildlife impacts from wind turbines. USDA will authorize wind power facilities only when the footprint of the facility and related infrastructure would have a minimal impact on the nature of the grazing lands and other conservation values obtained through the contract or easement."

(h) Four commenters agreed with the language in the interim final rule that limits consideration for windmill placement to on-farm use only. Another commended USDA for limiting wind power development on GRP easements. Footprint and associated disturbance can have adverse effects on biological diversity, a purpose of the program.

(i) One commenter expressed that there may be instances for the marketing of excess electricity generation from smaller wind turbines and other renewable energy structures such as hydroelectric facilities and solar panels (designed for on-farm use) through net-metering or parallel electricity generation. USDA should consider

allowing such small-scale use on GRP lands and allowing landowners to utilize the various renewable energy sources that are available, as long as they do not adversely impact the conservation values.

Response: USDA will consider potential renewable energy on GRP lands when the scope and scale of the facility and associated infrastructure is consistent with protection of grazing uses and related conservation values. A site-specific analysis of the potential environmental effects will be conducted in consultation with the USFWS. USDA will not authorize any renewable energy generating facilities on GRP lands unless USDA determines, based on a site-specific NEPA environmental analysis conducted in coordination with USFWS and the appropriate State fish and wildlife agency, that there will be no adverse effect on threatened, endangered, or other at-risk species, migratory wildlife, or related natural resources, cultural resources, or the human environment or when the impacts of such facilities can be mitigated to a level of non-significance. Furthermore, USDA will only authorize power generation facilities after evaluating their site-specific and cumulative environmental effects, whether a reasonable alternative exists, whether there is a compelling public need, whether the purposes for which the easement was acquired can be maintained, and the degree to which the footprint of the facility and related infrastructure impacts the nature of the grazing lands and other conservation values obtained through the contract or easement. No changes were made to the final rule.

Other

Comments: Several comments were received regarding the content of the GRP conservation easement deed. One commenter recommended that USDA omit the language in the deed that prohibits any activity that breaks the surface of the soil. Another commenter suggested that USDA's easement template deed be modified, and urged USDA to consider submitting a draft GRP easement deed for public review and comment before sign-up begins.

Another commenter suggested that language be added to allow for periodic inspection upon appropriate notice to the landowner in § 1415.18(b). Another commenter suggested that requiring notices to be in writing and personally delivered or sent by certified return receipt would be over-burdensome and that electronic e-mail correspondence would be sufficient.

Response: With the changes made to GRP by section 2403 of the 2008 Act, the GRP deed was changed, and the prohibition against breaking the surface of the soil was removed. Other changes include the requirement that all GRP easements will be permanent or the maximum duration allowed under State law. The GRP template deed ensures legal requirements of the authorizing legislation are met and is reviewed by USDA attorneys for legal sufficiency. USDA may also accept conservation easements owned, written, and enforced by eligible entities through a cooperative agreement. All GRP deeds require notification to the landowner prior to entering the property. In § 1415.18(b), if USDA transfers title of ownership of an easement to an eligible entity, the terms and conditions of the deed remain in force, thus USDA or the eligible entity will be required to notify a landowner prior to entering a property. USDA has an established deed review process. No changes were made to the final rule.

Comments: One commenter questioned the need to require prior approval in writing for every instance of applying animal waste to property subject to a GRP easement.

Response: The required GRP management plan addresses application of animal waste and can be updated with changes to the grazing management system. A written approval is not required for each instance of applying animal waste or fertilizer. The GRP deed supports the program requirement of a written grazing management plan. No changes were made to the final rule.

Comments: One commenter points out that grasslands desirable for GRP participation are in remote areas where future public utility access may be unavoidable. The commenter supports the prohibition of development, but suggests that a total prohibition will invite unnecessary conflicts between public utility interests, neighbors, governments, and GRP participants. The commenter suggested language that ensures that any public utility access must be done in a manner that maintains the grassland and that other conservation values is sufficient to preserve the objectives of the program.

Response: USDA understands the commenter's concerns and is aware that easement deeds typically include modification provisions if the modification serves the conservation purposes of the easement. USDA does not currently have legal authority to change the substantive terms of a GRP conservation easement once it has been recorded. Specifically, modifications that would not result in acquisition or divestiture of additional property rights cannot be made. USDA will not knowingly enroll GRP easements in areas located along potential right-of-ways for infrastructure projects and will include adequate buffers on existing infrastructure to allow for inevitable expansion. Additionally, the current deed will allow for utility easements that service the needs of the landowner's operation.

Comments: One commenter says that controlling wildlife damage is a critical factor in maintaining the success of American agriculture and suggests language that recognizes the lawful ability of landowners to remove trees, brush, and wildlife that may be jeopardizing agricultural or livestock enterprises.

Response: USDA understands the rights of private landowners and utilizes conservation easements on a voluntary basis. GRP assists landowners and operators in protecting grazing uses and related conservation values. Protection of related conservation values, such as habitat for wildlife under GRP, may not be consistent with some landowner's desires. Consequently, USDA encourages landowners and operators to consider their decision to enroll in any conservation easement program carefully. No changes were made to the final rule.

Comments: One commenter requested clarification that the regulations require consultation with Indian Tribes when actions USDA funds off the reservation directly impact a treaty reserved resource of the Tribes.

Response: USDA will comply with section 106 of the National Historic Preservation Act and all applicable Federal laws, including treaties and executive orders. No changes were made to the final rule.

List of Subjects in 7 CFR Part 1415

Administrative practice and procedure, agriculture, soil conservation, grassland, grassland protection, grazing land protection.

■ For reasons stated above, the CCC revises part 1415 of Title 7 of the CFR to read as follows:

PART 1415—GRASSLANDS RESERVE PROGRAM

Sec.

Authority: 16 U.S.C. 3838n–3838q.

§ 1415.1 Purpose.

(a) The purpose of the Grassland Reserve Program (GRP) is to assist landowners and operators in protecting grazing uses and related conservation values by conserving and restoring grassland resources on eligible private lands through rental contracts, easements, and restoration agreements.

(b) GRP emphasizes:

(1) Supporting grazing operations;

(2) Maintaining and improving plant and animal biodiversity; and

(3) Protecting grasslands and shrublands from the threat of conversion to uses other than grazing.

§ 1415.2 Administration.

(a) The regulations in this part set forth policies, procedures, and requirements for program implementation of GRP, as administered by the Natural Resources Conservation Service (NRCS) and the Farm Service Agency (FSA). The regulations in this part are administered under the general supervision and direction of the NRCS Chief and the FSA Administrator. These two agency leaders:

(1) Concur in the establishment of program policy and direction, development of the national allocation formula, and development of broad national ranking criteria;

(2) Use a national allocation formula to provide GRP funds to NRCS State Conservationists and FSA State Executive Directors that emphasizes support for grazing operations, biodiversity of plants and animals, and grasslands under the greatest threat of conversion to uses other than grazing. The national allocation formula may also include additional factors related to improving program implementation, as determined by the NRCS Chief and the FSA Administrator. The allocation formula may be modified periodically to change the emphasis of any factor(s) in order to address a particular natural resource concern, such as the precipitous decline of a population of a grassland-dependent bird(s) or animal(s);

(3) Ensure the national, State, and local-level information regarding program implementation is made available to the public;

(4) Consult with USDA leaders at the State level and other Federal agencies with the appropriate expertise and information when evaluating program policies and direction; and

(5) Authorize NRCS State Conservationists and FSA State Executive Directors to determine how funds will be used and how the program will be implemented at the State level.

(b) At the State level, the NRCS State Conservationist and the FSA State Executive Director are jointly responsible for:

(1) Determining how funds will be used and how the program will be implemented at the State level to achieve the program purposes;

(2) Identifying State priorities for project selection based on input from the State Technical Committee;

(3) Identifying Department of Agriculture (USDA) employees at the field level responsible for implementing the program by considering the nature and extent of natural resource concerns throughout the State and the availability of human resources to assist with activities related to program enrollment;

(4) Developing, with advice from the State Technical Committee, program outreach materials at the State and local levels to help ensure landowners, operators, and tenants of eligible land are aware and informed that they may be eligible for the program;

(5) Approving conservation practices eligible for cost-share and cost-share rates;

(6) Developing GRP management plans and restoration agreements, when applicable;

(7) Administering and enforcing the terms of easements and rental contracts unless this responsibility is transferred to an eligible entity as provided in § 1415.17 and § 1415.18; and

(8) Developing, with advice from the State Technical Committee, criteria for ranking eligible land consistent with national criteria and program objectives and State priorities.

(c) The funds, facilities, and authorities of the Commodity Credit Corporation (CCC) are available to NRCS and FSA to implement GRP.

(d) Subject to funding availability, the program may be implemented in any of the 50 States, the District of Columbia, the Commonwealth of Puerto Rico, Guam, the Virgin Islands of the United States, American Samoa, and the Commonwealth of the Northern Mariana Islands.

(e) The NRCS Chief or the FSA Administrator may modify or waive a provision of this part if he or she deems the application of that provision to a particular limited situation to be inappropriate and inconsistent with the conservation purposes and sound administration of GRP. This authority cannot be further delegated. No provision of this part, which is required by law, may be waived.

(f) No delegation in this part to lower organizational levels will preclude the NRCS Chief or the FSA Administrator from determining any issue arising under this part or from reversing or modifying any determination arising from this part.

(g) The USDA Forest Service may hold GRP easements on properties adjacent to USDA Forest Service land, with the consent of the landowner.

(h) Program participation is voluntary.

(i) Applications for participation will be accepted on a continual basis at local USDA Service Centers. Eligible entities wishing to enter into a cooperative agreement under § 1415.17 in order to purchase, own, write, and hold easements may apply on a continuous basis to the NRCS State Conservationist. The NRCS State Conservationist and FSA State Executive Director will establish cut-off periods to rank and select applications for participation. These cut-off periods will be available in program outreach material provided by the local USDA Service Center. Once funding levels have been exhausted, unfunded eligible applications will remain on file until they are funded or the applicant chooses to be removed from consideration.

(j) The services of third parties as provided for in part 652 of this title may be used to provide technical services to participants.

§ 1415.3 Definitions.

Activity means an action other than a conservation practice that is included as a part of a GRP management or conservation plan that has the effect of alleviating problems or improving treatment of the resources, including ensuring proper management or maintenance of the functions and values restored, protected, or enhanced through an easement or rental contract.

Administrator means the Administrator of FSA or the person delegated authority to act for the Administrator.

Applicant means a person, legal entity, joint operator, or Indian Tribe who applies to participate in the program.

Chief means the Chief of NRCS or designee.

Biological diversity means the variety and variability among living organisms and the ecological complexes in which they live.

Commodity Credit Corporation is a government-owned and operated entity that was created to stabilize, support, and protect farm income and prices. The CCC is managed by a Board of Directors, subject to the general supervision and direction of the Secretary of Agriculture, who is an ex-officio director and chairperson of the Board. The CCC provides the funding for GRP, and FSA and NRCS administer GRP on its behalf.

Common grazing practices means those grazing practices, including those related to forage and seed production, common to the area of the subject ranching or farming operation. Included are routine management activities necessary to maintain the viability of forage or browse resources that are common to the locale of the subject ranching or farming operation.

Conservation district means any district or unit of State, Tribal, or local government formed under State, Tribal, or territorial law for the express purpose of developing and carrying out a local soil and water conservation program. Such district or unit of government may be referred to as a conservation district, soil conservation district, soil and water conservation district, resource conservation district, natural resource district, land conservation committee, or similar name.

Conservation plan means a record of the GRP participants' decisions and supporting information that will be developed to address resource concerns in addition to grazing land uses. The conservation plan will describe the implementation and maintenance of GRP management and conservation practices directly related to any additional land eligibility criteria under which the land is enrolled. Additional land eligibility criteria may include, but is not limited to, significant animal or plant habitat and historical or archeological resources.

Conservation practice means a specified treatment, such as a vegetative, structural, or land management practice, that is planned and applied according to NRCS Field Office Technical Guide (FOTG) standards and specifications.

Conservation values means those natural resource attributes that sustain and enhance ecosystem functions and values of the grassland area including, but not limited to, habitat for grassland and shrubland dependent plants and animals, native plant and animal biodiversity, soil erosion control, forage production, and air and water quality protection.

Cost-share payment means the payment made by USDA to a program participant or vendor to achieve the restoration, enhancement, and protection goals in accordance with the GRP restoration plan component of the restoration agreement.

Dedicated account means a dedicated fund of the eligible entity held in a separate account for the management, monitoring, and enforcement of conservation easements and that cannot be used for other purposes.

Easement means a conservation easement, which is an interest in land defined and delineated in a deed whereby the landowner conveys certain rights, title, and interests in a property to the United States, an eligible entity, or both for the purpose of protecting the grassland and other conservation values of the property. Under GRP, the property rights are conveyed by a conservation easement deed.

Easement area means the land encumbered by an easement.

Easement payment means the consideration paid to a landowner for an easement conveyed to the United States, an eligible entity, or both under GRP.

Eligible entity means, for the purposes of entering into a cooperative agreement under 16 U.S.C. 3838q(d), an agency of State or local government, an Indian Tribe, or a nongovernmental organization that has the relevant experience necessary, as appropriate for the application, to administer an easement on grassland, land that contains forbs, or shrubland; has a charter that describes a commitment to conserving ranchland, agricultural land, or grassland for grazing and conservation purposes; and has the resources necessary to effectuate the purposes of the charter.

Enhancement means to increase or improve the viability of grassland and grazing resources, including habitat for declining species of grassland dependent birds and animals.

Farm Service Agency is an agency of the Department of Agriculture.

FSA State Executive Director means the FSA employee authorized to implement GRP and direct and supervise FSA activities in a State, Caribbean Area, or the Pacific Islands Area.

Field Office Technical Guide means the official local NRCS source of resource information and interpretations of guidelines, criteria, and requirements for planning and applying conservation practices and conservation management systems. It contains detailed information on the conservation of soil, water, air, plant, and animal resources applicable to the local area for which it is prepared.

Fire pre-suppression means activities as outlined in a GRP management plan such as the establishment and maintenance of firebreaks and prescribed burning to prevent or limit the spread of fires.

Forb means any herbaceous plant other than those in the grass family.

Functions and values of grasslands and shrublands means ecosystem services provided, including domestic animal productivity, biological productivity, plant and animal richness and diversity, fish and wildlife habitat (including habitat for pollinators and native insects), water quality and quantity benefits, aesthetics, open space, and recreation.

Grantor means the landowner who is transferring land rights to the United States or an eligible entity, or both through an easement.

Grassland means land on which the vegetation is dominated by grasses, grass-like plants, shrubs, or forbs, including shrubland, land that contains forbs, pastureland, and rangeland, and improved pastureland and rangeland.

GRP management plan means the document developed by NRCS that describes the implementation of the grazing management system consistent with the prescribed grazing standard contained in the FOTG. The GRP management plan will include a description of the grazing management system, permissible and prohibited activities, any associated restoration plan or conservation plan, if applicable, and a description of USDA's right of ingress and egress.

Grazing value means the financial worth of the land as used for grazing or forage production. The term is used in the calculation of compensation for rental contracts and easements. For easements, this value is determined by NRCS through an appraisal process or a market survey process. For rental contracts, FSA determines the grazing value based upon an administrative process.

Historical and archeological resources mean resources that are:

(1) Listed in the National Register of Historic Places (established under the National Historic Preservation Act (NHPA), 16 U.S.C. 470, *et seq.*);

(2) Formally determined eligible for listing the National Register of Historic Places by the State Historic Preservation Officer (SHPO) or Tribal Historic Preservation Officer (THPO) and Keeper

of the National Register in accordance with section 106 or the NHPA);

(3) Formally listed in the State or Tribal Register of Historic Places of the SHPO (designated under section 101(b)(1)(B) of the NHPA) or the Tribal Register of Historic Places (designated under section 101(d)(1)(C) of the NHPA); or

(4) Included in the SPHO or THPO inventory with written justification as to why it meets National Register of Historic Places criteria.

Improved rangeland or pastureland means grazing land permanently producing naturalized forage species that receives varying degrees of periodic cultural treatment to enhance forage quality and yields and is primarily harvested by grazing animals.

Indian Tribe means any Indian Tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (43 U.S.C. 1601 *et seq.*) that is eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

Landowner means a person, legal entity, or Indian Tribe having legal ownership of land and those who may be buying eligible land under a purchase agreement. The term landowner may include all forms of collective ownership including joint tenants, tenants-in-common, and life tenants. The term landowner includes Indian Tribes. State governments, local governments, and nongovernmental organizations that qualify as eligible entities are not eligible as landowners.

Legal entity means an entity created under Federal or State law and that: (1) Owns land or an agricultural commodity, product, or livestock; or (2) produces an agricultural commodity, product, or livestock.

Maintenance means work performed to keep the applied conservation practice functioning for the intended purpose during its life span. Maintenance includes work to manage and prevent deterioration, repair damage, or replace the practice to its original condition if one or more components fail.

Native means a species that is indigenous and is a part of the original fauna or flora of the area.

Natural Resources Conservation Service is an agency of the Department of Agriculture.

NRCS State Conservationist means the NRCS employee authorized to implement GRP and direct and supervise NRCS activities in a State, Caribbean Area, or the Pacific Islands Area.

Naturalized means an introduced, desirable forage species that is ecologically adapted to the site and can perpetuate itself in the community without cultural treatment. The term naturalized does not include noxious weeds.

Nesting season means the time of year that grassland dependent birds in significant decline in the local area build nests or otherwise find a place of refuge for purposes of reproduction.

Nongovernmental organization means any organization that:

(1) Is organized for, and at all times since, the formation of the organization, and has been operated principally for one or more of the conservation purposes specified in clause (i), (ii), (iii), or (iv) of section 170(h)(4)(A) of the Internal Revenue Code of 1986;

(2) Is an organization described in section 501(c)(3) of that Code that is exempt from taxation under 501(a) of that Code; and

(3) Is described—

(i) In section 509(a)(1) or 509(a)(2) of that Code, or

(ii) Is described in section 509(a)(3) of that Code and is controlled by an organization described in section 509(a)(2) of that Code.

Participant means a person, legal entity, joint operation, or Indian Tribe who is accepted to participate in GRP through a rental contract or option agreement to purchase an easement.

Pastureland means grazing lands comprised of introduced or domesticated native forage species that are used primarily for the production of livestock. These lands receive periodic renovation and cultural treatments, such as tillage, aeration, fertilization, mowing, and weed control, and may be irrigated. This term does not include lands that are in rotation with crops.

Permanent easement means an easement that lasts in perpetuity or for the maximum duration allowed under the law of a State.

Private land means land that is not owned by a governmental entity and includes Tribal lands.

Purchase price means the amount paid to acquire an easement under a cooperative agreement between NRCS and an eligible entity. It is the fair market value of the easement.

Rangeland means a land cover or use category with a climax or potential plant cover composed principally of native grasses, grass-like plants, forbs, or shrubs suitable for grazing and browsing, and introduced forage species that are managed like rangeland. Rangeland includes lands re-vegetated naturally or artificially when routine management of that vegetation is accomplished mainly through manipulation of grazing. This term includes areas where introduced hardy and persistent grasses are planted and such practices as deferred grazing, burning, chaining, and rotational grazing are used with little or no chemicals or fertilizer being applied. Grasslands, savannas, many wetlands, some deserts, and tundra are considered to be rangeland. Certain communities of low forbs and shrubs, such as mesquite, chaparral, mountain shrub, and pinyon juniper are also included as rangeland.

Rental contract means the legal document that specifies the obligations and rights of a participant in GRP, including the annual rental payments to be provided to the participant for the length of the contract to maintain or restore grassland functions and values under GRP.

Restoration means implementing any conservation practice, system of practices, or activities to restore functions and values of grasslands and shrublands. The restoration may re-establish grassland functions and values on degraded land, or on land that has been converted to another use.

Restoration agreement means an agreement between the program participant and NRCS or eligible entity to carry out activities and conservation practices necessary to restore or improve the functions and values of that land. A restoration agreement will include a restoration plan.

Restoration plan is the portion of the restoration agreement that includes the schedule and conservation practices and activities to restore the functions and values of grasslands and shrublands, including protection of associated streams, ponds, and wetlands. The restoration plan incorporates the requirement that program participants will maintain GRP-funded conservation practices and activities for their expected lifespan as described in the plan.

Right of enforcement means a property interest in the easement the Chief may exercise on behalf of the United States under specific circumstances in order to enforce the terms of the conservation easement. The right of enforcement provides that the Chief has the right to inspect and enforce the easement if the eligible entity fails to uphold the easement or attempts to transfer the easement without first securing the consent of the Secretary.

Secretary means the Secretary of the Department of Agriculture.

Shrubland means land where the dominant plant species is shrubs, which are plants that are persistent, have woody stems, and a relatively low growth habit.

Significant decline means a decrease of a species population to such an extent that it merits conservation priority as determined by the State Conservationist, in consultation with the State Technical Committee.

State Technical Committee means a committee established by the Secretary in a State pursuant to 16 U.S.C. 3861.

Tribal land means:

(1) Land held in trust by the United States for individual Indians or Indian Tribes; or

(2) Land, the title to which is held by individual Indians or Indian Tribes subject to Federal restrictions against alienation or encumbrance; or

(3) Land which is subject to rights of use, occupancy, and benefit of certain Indian Tribes; or

(4) Land held in fee title by an Indian, Indian family, or Indian Tribe.

USDA means the Department of Agriculture and its agencies and offices, as applicable.

§ 1415.4 Program requirements.

(a) Except as provided for under § 1415.17, only landowners may submit applications for easements. For rental contracts, applicants must own or provide written evidence of control of the property for the duration of the rental contract.

(b) The easement or rental contract will require that the area be maintained in accordance with GRP goals and objectives for the term of the easement or rental contract, including the conservation, protection, enhancement, and if necessary, restoration of the grassland functions and values.

(c) All participants in GRP are required to implement a GRP management plan approved by NRCS. When an eligible entity holds the GRP easement, NRCS will develop GRP management plans with eligible entities. In cases where a participant receives ranking points on the basis of resource concerns other than grazing land concerns, all such resource concerns will be addressed in an applicable conservation plan.

(d) The easement or rental contract must grant USDA or its representatives a right of ingress and egress to the easement or rental contract area. For easements, this access is legally described by the conservation easement deed and the GRP management plan. Access to rental contract areas is identified in the GRP management plan.

(e) Easement participants are required to convey unencumbered title that is acceptable to the United States and provide consent or subordination agreements from each holder of a security or other interest in the land. The landowner must warrant that the easement granted the United States or eligible entity is superior to the rights of all others, except for exceptions to the title that are deemed acceptable by USDA.

(f) Landowners are required to use a standard GRP conservation easement deed developed by USDA or developed by an eligible entity and approved by USDA under § 1415.17 of this part. The easement grants development rights, title, and interest in the easement area in order to protect grassland and other conservation values.

(g) The program participant must comply with the terms of the easement or rental contract, and comply with all terms and conditions of the GRP management plan and any associated conservation plan or restoration agreement.

(h) Easements and rental contracts allow, consistent with their terms and the program purposes, the following activities as outlined in the GRP management plan:

(1) Common grazing practices, including maintenance and necessary conservation practices and activities (*e.g.,* prescribed grazing; upland wildlife habitat management; prescribed burning; fencing, watering, and feeding necessary for the raising of livestock; and related forage and seed production) on the land in a manner that is consistent with maintaining the viability of grassland, forb, and shrub species common to the locality;

(2) Haying, mowing, or harvesting for seed production subject to appropriate restrictions, as determined by the State Conservationist, during the nesting season for birds in the local area that are in significant decline, or are conserved in accordance with Federal or State law;

(3) Fire pre-suppression, rehabilitation, and construction of firebreaks;

(4) Grazing related activities, such as fencing and livestock watering facilities;

(5) Facilities for power generation through renewable sources of energy production provided the scope and scale of the footprint of the facility and associated infrastructure is consistent with program purposes as determined by USDA through analysis of the potential site-specific environmental effects; and

(6) Other activities that USDA determines the manner, number, intensity, location, operation, and other features associated with the activity will not adversely affect the grassland resources or related conservation values protected under an easement or rental contract. This includes infrastructure development along existing right-of-ways where the easement deed allows the landowner to grant right-of-ways when it is determined by NRCS that granting such right-of-ways are in the public interest, that grassland resources and related conservation values will not be adversely impacted, and the landowner agrees to a restoration plan for the disturbed area as developed by NRCS, but at no cost to NRCS. This also includes undeveloped, passive, recreational uses such as hiking, camping, bird watching, hunting, and fishing as long as such uses, as determined by the grantee, do not impair the grazing uses and other conservation values.

(i) Easement and rental contracts prohibit the following activities:

(1) The production of crops (other than hay), orchards, vineyards, or other agricultural commodity that is inconsistent with maintaining grazing land and related conservation values; and

(2) Except as permitted under a restoration plan, the conduct of any other activity that would be inconsistent with maintaining grazing uses and related conservation values protected under an easement or rental contract.

(j) Rental contracts may be terminated by USDA without penalty or refund if the original participant dies, is declared legally incompetent, or is otherwise unavailable during the contract period.

(k) Participants, with the agreement of USDA, may convert a rental contract to an easement, provided that funds are available and the project meets conditions established by USDA. Land cannot be enrolled in both a rental contract option and an easement enrollment option at the same time. The rental contract will be terminated prior to the date the easement is recorded in the local land records office.

(l) Rental contract participants are required to suspend any existing cropland base and allotment history for the land under another program administered by the Secretary.

(m) Easement participants are required to eliminate any existing cropland base and allotment history for the land under another program administered by the Secretary.

§ 1415.5 Land eligibility.

(a) GRP is available on privately owned lands, which include private and Tribal land. Publicly owned land is not eligible.

(b) Land is eligible for funding consideration if the State

Conservationist determines that the land is:

(1) Grassland, land that contains forbs or shrubland (including improved rangeland and pastureland) for which grazing is the predominant use; or

(2) Located in an area that has been historically dominated by grassland, forbs, or shrubland, and the State Conservationist, with advice from the State Technical Committee, determines that it is compatible with grazing uses and related conservation values, and

(i) Could provide habitat for animal or plant populations of significant ecological value if the land is retained in its current use or is restored to a natural condition,

(ii) Contains historical or archeological resources, or

(iii) Would address issues raised by State, regional, and national conservation priorities.

(c) Incidental lands, in conjunction with eligible land, may also be considered for enrollment to allow for the efficient administration of an easement or rental contract. Incidental lands may include relatively small areas that do not specifically meet the eligibility requirements, but as a part of the land unit, may contribute to grassland functions and values and related conservation values, or its inclusion may increase efficiencies in land surveying, easement management, and monitoring by reducing irregular boundaries.

(d) Land will not be enrolled if the functions and values of the grassland are already protected under an existing contract, easement, or deed restriction, or if the land already is in ownership by an entity whose purpose is to protect and conserve grassland and related conservation values. This land becomes eligible for enrollment in GRP if the existing contract, easement, or deed restriction expires or is terminated, and the grassland values and functions are no longer protected.

(e) Land on which gas, oil, earth, or other mineral rights exploration has been leased or is owned by someone other than the applicant may be offered for participation in the program. However, if an applicant submits an offer for an easement project, USDA will assess the potential impact that the third party rights may have upon the grassland resources. USDA reserves the right to deny funding for any application where there are exceptions to clear title on the property.

§ 1415.6 Participant eligibility.

To be eligible to participate in GRP, an applicant, except as otherwise described in § 1415.17:

(a) Must be a landowner for easement participation or be a landowner or have control of the eligible acreage being offered for rental contract participation;

(b) Agree to provide such information to USDA that is necessary or desirable to assist in its determination of eligibility for program benefits and for other program implementation purposes;

(c) Meet the Adjusted Gross Income requirements in 7 CFR part 1400 of this title, unless exempted under part 1400 of this title;

(d) Meet the conservation compliance requirements found in part 12 of this title; and

(e) Comply with applicable registration and reporting requirements of the Federal Funding Accountability and Transparency Act of 2006 (Pub. L. 109–282, as amended) and 3 CFR parts 25 and 170.

§ 1415.7 Application procedures.

(a) Applicants, except as otherwise described under § 1415.17, may submit an application through a USDA Service Center for participation in GRP. Applications may be submitted throughout the year.

(b) By filing an application for participation, the applicant consents to a USDA representative entering upon the land offered for enrollment for purposes of assessing the grassland functions and values and for other activities that are necessary for USDA to make an offer of enrollment. Generally, the applicant will be notified prior to a USDA representative entering upon their property.

(c) Applicants submit applications that identify the duration of the easement or rental contract for which they seek to enroll their land. Rental contracts may be for the duration of 10-years, 15-years, or 20-years; easements may be permanent in duration or for the maximum duration authorized by State law.

§ 1415.8 Establishing priority for enrollment of properties.

(a) USDA, at the national level, will provide to NRCS State Conservationists and FSA State Executive Directors, national guidelines for establishing State-specific ranking criteria for selection of applications for funding.

(b) NRCS State Conservationists and FSA State Executive Directors, with advice from State Technical Committees, establish criteria to evaluate and rank applications for easement and rental contract enrollment, including applications from eligible entities under § 1415.17, following the guidance established in paragraph (a) of this section.

(c) Ranking criteria will emphasize support for:

(1) Grazing operations;

(2) Protection of grassland, land that contains forbs, and shrubland at the greatest risk from the threat of conversion to uses other than grazing;

(3) Plant and animal biodiversity; and

(4) In ranking parcels offered by eligible entities, these additional criteria will also be considered—

(i) Leveraging of non-Federal funds, and

(ii) Entity contributions in excess of 50 percent of the purchase price, as defined in § 1415.3.

(d) When funding is available, NRCS State Conservationists and FSA State Executive Directors will periodically select for funding the highest ranked applications, including applications from entities under § 1415.17, based on applicant and land eligibility and the State-developed ranking criteria.

(e) NRCS State Conservationists and FSA State Executive Directors may establish separate ranking pools to address, for example, specific conservation issues raised by State, regional, and national conservation priorities.

(f) The NRCS State Conservationist and FSA State Executive Director, with advice from the State Technical Committee, may emphasize enrollment of unique grasslands or specific geographic areas of the State.

(g) The NRCS State Conservationist and the FSA State Executive Director, with advice from the State Technical Committee, will select applications for funding.

(h) If available funds are insufficient to accept the highest ranked application, and the applicant is not interested in reducing the acres offered to match available funding, the State Conservationist or State Executive Director may select a lower ranked application that can be fully funded.

(i) Land enrolled in a Conservation Reserve Program (CRP) contract that is within one year of the scheduled expiration date will receive a priority for enrollment. To receive this priority, the following criteria must be met:

(1) The land must be eligible as defined in § 1415.5;

(2) USDA, with advice from the State Technical Committee, must determine it is of high ecological value and under significant threat of conversion to uses other than grazing;

(3) The land must be offered for easement or 20-year rental contract enrollment;

(4) Expired CRP land enrolled under this priority will not exceed 10 percent of the total number of acres accepted for

national enrollment in GRP in any year; and

(5) This priority applies only up to 12 months before the scheduled expiration of the CRP contract.

(j) USDA will manage the program nationally to ensure that, to the extent practicable, 60 percent of funds are used for the purchase of easements, either directly or through cooperative agreements with eligible entities as set forth in § 1415.17 and 40 percent of funds are used for rental contracts.

§ 1415.9 Enrollment of easements and rental contracts.

(a) Based on the priority ranking, NRCS or FSA, as appropriate, will notify applicants in writing of their tentative acceptance into the program for either rental contract or conservation easement options. The letter notifies the applicant of the intent to continue the enrollment process unless otherwise notified by the applicant. Enrollment under cooperative agreements is described under § 1415.17.

(b) An offer of tentative acceptance into the program neither binds USDA to acquire an easement or enter into a rental contract, nor binds the applicant to convey an easement, enter into a rental contract, or agree to restoration activities.

(c) Offer of enrollment will be through either:

(1) An agreement to purchase an easement presented by NRCS to the applicant which will describe the easement, the easement terms and conditions, and other terms and conditions that may be required by NRCS; or

(2) A rental contract will be presented by FSA to the applicant which will describe the contract area, the contract terms and conditions, and other terms and conditions that may be required by FSA.

(d) For rental contracts, land will be considered to be enrolled in GRP once an FSA representative approves the GRP rental contract. FSA may withdraw the offer before approval of the contract due to lack of available funds or other reasons.

(e) For easements, after the option agreement to purchase an easement is executed by NRCS and the participant, the land will be considered enrolled in GRP. NRCS will proceed with the development of the GRP management plan, conservation or restoration plan if applicable, and various easement acquisition activities, which may include conducting a legal survey of the easement area, securing necessary subordination agreements, procuring title insurance, and conducting other activities necessary to record the easement or implement GRP.

(f) Prior to closing an easement, NRCS may withdraw the land from enrollment at any time due to lack of available funds, title concerns, or other reasons.

§ 1415.10 Compensation for easements and rental contracts acquired by the Secretary.

(a) The Chief will not pay more than the fair market value of the land, less the grazing value of the land encumbered by the easement.

(b) To determine this amount, the Chief will pay as compensation the lowest of:

(1) The fair market value of the land encumbered by the easement as determined by the Chief using—

(i) The Uniform Standards of Professional Appraisal Practice, or

(ii) An area-wide market analysis or market survey;

(2) The amount corresponding to a geographical cap, as determined by the State Conservationist, with advice from the State Technical Committee; or

(3) An offer made by the landowner.

(c) For 10-, 15-, and 20-year rental contracts, the participant will receive not more than 75 percent of the grazing value in an annual payment for the length of the contract, as determined by FSA. As provided by the regulations at part 1400 of this title, payments made under one or more rental contracts to a person or legal entity, directly or indirectly, may not exceed, in the aggregate, $50,000 per year.

(d) In order to provide for better uniformity among States, the NRCS Chief and FSA Administrator may review and adjust, as appropriate, State or other geographically based payment rates for rental contracts.

(e) Easement or rental contract payments received by a participant will be in addition to, and not affect, the total amount of payments that the participant is otherwise eligible to receive under other USDA programs.

(f) Easement payments will be made in a single payment to the landowner unless otherwise requested by the landowner.

(g) USDA may accept and use contributions of non-Federal funds to support the purposes of the program. These funds are available to USDA without further appropriation and until expended, to carry out the program.

(h) USDA recognizes that environmental benefits will be achieved by implementing conservation practices and activities funded through GRP, and that ecosystem credits may be gained as a result of implementing activities compatible with the purposes of a GRP easement, rental contract, or associated restoration agreement. USDA asserts no direct or indirect interest in these credits except:

(1) In the event the participant sells or trades credits arising from GRP funded activities, USDA retains the authority to ensure that the requirements for GRP rental contracts, easements, or restoration agreements are met and maintained consistent with this part; and

(2) If activities required under an ecosystem credit agreement may affect land covered under a GRP rental contract, easement, or restoration agreement, participants are required to obtain an assessment from USDA about the compatibility of the activity prior to entering into such agreements.

§ 1415.11 Restoration agreements.

(a) Restoration agreements are only authorized to be used in conjunction with easements and rental contracts. NRCS, in consultation with the program participant, determines if the grassland resources are adequate to meet the participant's objectives and the purposes of the program, or if a restoration agreement is needed. Such a determination is also subject to the availability of funding. USDA may condition participation in the program upon the execution of a restoration agreement depending on the condition of the grassland resources. When the functions and values of the grassland are determined adequate by NRCS, a restoration agreement is not required. However, if a restoration agreement is required, NRCS will set the terms of the restoration agreement. The restoration plan component of the restoration agreement identifies conservation practices and activities necessary to restore or improve the functions and values of the grassland to meet both USDA and the participant's objectives and purposes of the program. If the functions and values of the grassland decline while the land is subject to a GRP easement or rental contract through no fault of the participant, the participant may enter into a restoration agreement at that time to improve the functions and values with USDA approval and when funds are available.

(b) The NRCS State Conservationist, with advice from the State Technical Committee and in consultation with FSA, determines the conservation practices and activities and the cost-share percentages, not to exceed statutory limits available under GRP. A list of conservation practices and activities approved for cost-share assistance under GRP restoration plans is available to the public through the

local USDA Service Center. NRCS may work through the local conservation district with the program participant to determine the terms of the restoration plan. The conservation district may assist NRCS with determining eligible conservation practices and activities and approving restoration agreements.

(c) Only approved conservation practices and activities are eligible for cost-sharing. Payments under the GRP restoration agreements may be made to the participant of not more than 50 percent for the cost of carrying out the conservation practices or activities. As provided by the regulations at part 1400 of this chapter, payments made under one or more restoration agreements to a person or legal entity, directly or indirectly, may not exceed, in the aggregate, $50,000 per year.

(d) The participant is responsible for the operation and maintenance of conservation practices in accordance with the restoration agreement.

(e) All conservation practices must be implemented in accordance with the FOTG.

(f) Technical assistance is provided by NRCS, or an NRCS approved third party.

(g) If the participant is receiving cost-share for the same conservation practice or activity from another conservation program, USDA will adjust the GRP cost-share rate proportionately so that the amount received by the participant does not exceed 100 percent of the costs of restoration.

(h) The participant cannot receive cost-share from more than one USDA cost-share program for the same conservation practice or activity on the same land.

(i) Cost-share payments may be made only upon a determination by a qualified individual approved by the NRCS State Conservationist that an eligible restoration practice has been established in compliance with appropriate standards and specifications.

(j) Conservation practices and activities identified in the restoration plan may be implemented by the participant or other designee.

(k) Cost-share payments will not be made for conservation practices or activities implemented or initiated prior to the approval of a rental contract or easement acquisition unless a written waiver is granted by the NRCS State Conservationist or FSA State Executive Director, as appropriate, prior to installation of the practice.

(l) Upon transfer of an easement with a restoration agreement to an eligible entity as described in § 1415.18, the entity will be responsible for administration of the agreement and providing funds for payment of any costs associated with the completion of the restoration agreement. The eligible entity may, with participant consent, revise an existing restoration agreement or develop a new restoration agreement. Restoration plans must be consistent with the GRP management plan or any associated conservation plan as described in § 1415.4.

(m) Cooperating entities under § 1415.17 will be responsible for development, administration, and implementation costs of restoration plans.

§ 1415.12 Modifications to easements and rental contracts.

(a) After an easement has been recorded, no substantive modification will be made to the easement. Modifications that would not result in acquisition or divestiture of additional property rights may be made.

(b) State Conservationists may approve modifications for restoration agreements and GRP management plans or conservation plans where applicable, as long as the modifications do not affect the provisions of the easement and meet program objectives.

(c) USDA may approve modifications to rental contracts, including corresponding changes to conservation plans, GRP management plans, and restoration plans to facilitate the practical administration and management of the enrolled area so long as the modification will not adversely affect the grassland functions and values for which the land was enrolled.

§ 1415.13 Transfer of land.

(a) Any transfer of the property prior to an applicant's acceptance into the program will void the offer of enrollment, unless at the option of the State Conservationist or State Executive Director, as appropriate, an offer is extended to the new landowner and the new landowner agrees to the same easement or rental contract terms and conditions.

(b) After acreage is accepted in the program, for easements with multiple payments, any remaining easement payments will be made to the original participant unless NRCS receives an assignment of proceeds.

(c) Future annual rental payments will be made to the successor participant.

(d) The new landowner is responsible for complying with the terms of the recorded easement, and the contract successor is responsible for complying with the terms of the rental contract and for assuring completion of all activities and practices required by any associated restoration agreement. Eligible cost-share payments will be made to the new participant upon presentation that the successor assumed the costs of establishing the practices.

(e) With respect to any and all payments owed to participants, the United States bears no responsibility for any full payments or partial distributions of funds between the original participant and the participant's successor. In the event of a dispute or claim on the distribution of cost-share payments, USDA may withhold payments, without the accrual of interest, pending an agreement or adjudication on the rights to the funds.

(f) The rights granted to the United States in an easement will apply to any of its agents or assigns. All obligations of the participant under the GRP conservation easement deed also bind the participant's heirs, successors, agents, assigns, lessees, and any other person claiming under them.

(g) Rental contracts may be transferred to another landowner, operator, or tenant that acquires an interest in the land enrolled in GRP. The successor must be determined by FSA to be eligible to participate in GRP and must assume full responsibility under the contract. FSA may require a participant to refund all or a portion of any financial assistance awarded under GRP, plus interest, if the participant sells or loses control of the land under a GRP rental contract, and the new landowner, operator, or tenant is not eligible to participate in the program or declines to assume responsibility under the contract.

§ 1415.14 Misrepresentation and violations.

(a) The following provisions apply to violations of rental contracts:

(1) Rental contract violations, determinations, and appeals are handled in accordance with the terms of the rental contract;

(2) A participant who is determined to have erroneously represented any fact affecting a program determination made in accordance with this part may not be entitled to rental contract payments and must refund to CCC all payments, plus interest, in accordance with part 1403 of this title; and

(3) In the event of a violation of a rental contract, the participant will be given notice and an opportunity to voluntarily correct the violation within 30 days of the date of the notice, or such additional time as CCC may allow. Failure to correct the violation may result in termination of the rental contract.

(b) The following provisions apply to violations of easement deeds:

(1) Easement violations are handled under the terms of the easement deed;

(2) Upon notification of the participant, NRCS has the right to enter upon the easement area at any time to monitor compliance with the terms of the GRP conservation easement deed or remedy deficiencies or violations;

(3) When NRCS believes there may be a violation of the terms of the GRP conservation easement deed, NRCS may enter the property without prior notice; and

(4) The participant will be liable for any costs incurred by the United States as a result of the participant's negligence or failure to comply with the easement terms and conditions.

(c) USDA may require the participant to refund all or part of any payments received by the participant under the program contract or agreement.

(d) In addition to any and all legal and equitable remedies available to the United States under applicable law, USDA may withhold any easement payment, rental payment, or cost-share payments owing to the participant at any time there is a material breach of the easement covenants, rental contract, or any contract. Such withheld funds may be used to offset costs incurred by the United States in any remedial actions or retained as damages pursuant to court order or settlement agreement.

(e) Under a GRP conservation easement, the United States will be entitled to recover any and all administrative and legal costs, including attorney's fees or expenses, associated with any enforcement or remedial action.

§ 1415.15 Payments not subject to claims.

Any cost-share, rental, or easement payment or portion thereof due any person under this part will be allowed without regard to any claim or lien in favor of any creditor, except agencies of the United States Government.

§ 1415.16 Assignments.

(a) Any person entitled to any cash payment under this program may assign the right to receive such cash payments, in whole or in part.

(b) If a participant that is entitled to a payment dies, is declared legally incompetent, or is otherwise unable to receive the payment, or is succeeded by another person who renders or completes the required performance, such a participant may be eligible to receive payment in such a manner as USDA determines is fair and reasonable in light of all the circumstances.

§ 1415.17 Cooperative agreements.

(a) NRCS may enter into cooperative agreements which establish terms and conditions under which an eligible entity will use funds provided by NRCS to own, write, and enforce a grassland protection easement.

(b) To be eligible to receive GRP funding, an eligible entity must demonstrate:

(1) A commitment to long-term conservation of agricultural lands, ranch land, or grassland for grazing and conservation purposes;

(2) A capability to acquire, manage, and enforce easements;

(3) Sufficient number of staff dedicated to monitoring and easement stewardship;

(4) The availability of funds; and

(5) For nongovernmental organizations, the existence of a dedicated account and funds for the purposes of easement management, monitoring, and enforcement of each easement held by the eligible entity.

(c) NRCS enters into a cooperative agreement with those eligible entities selected for funding. Once a proposal is selected by the State Conservationist, the eligible entity must work with the appropriate State Conservationist to finalize and sign the cooperative agreement, incorporating all necessary GRP requirements. The cooperative agreement addresses:

(1) The interests in land to be acquired, including the form of the easement deeds to be used and terms and conditions;

(2) The management and enforcement of the interests acquired;

(3) The responsibilities of NRCS;

(4) The responsibilities of the eligible entity on lands acquired with the assistance of GRP;

(5) The parcels accepted by the State Conservationist, landowners' names, addresses, location map(s), and other relevant information in an a attachment to the cooperative agreement;

(6) The allowance of parcel substitution upon mutual agreement of the parties;

(7) The manner in which violations are addressed;

(8) The right of the Secretary to conduct periodic inspections to verify the eligible entity's enforcement of the easements;

(9) The manner in which the eligible entity will evaluate and report the use of funds to the Secretary;

(10) The eligible entity's agreement to assume the costs incurred in administering and enforcing the easement, including the costs of restoration and rehabilitation of the land as specified by the owner and eligible entity. The entity will also assume the responsibility for enforcing the GRP management plan or conservation plan, as applicable. The eligible entity must incorporate any required plan into the conservation easement deed by reference or otherwise;

(11) The source of funding. The eligible entity may include a charitable donation or qualified conservation contribution (as defined by section 170(h) of the Internal Revenue Code of 1986) from the landowner as part of the entity's share of the purchase price;

(12) The schedule of payments to an eligible entity, as agreed to by NRCS and the eligible entity;

(13) GRP funds may not be used for expenditures such as appraisals, surveys, title insurance, legal fees, costs of easement monitoring, and other related administrative and transaction costs incurred by the entity;

(14) NRCS may provide a share of the purchase price of an easement under the program. The eligible entity will be required to provide a share of the purchase price at least equivalent to that provided by NRCS. The Federal share will be no more than 50 percent of the purchase price, as defined in § 1415.3;

(15) The eligible entity's succession plan, which describes how its successors or assigns will hold, manage, and enforce the interests in land acquired in the event that the eligible entity is no longer able to fulfill its obligations under the cooperative agreement entered into with NRCS; and

(16) Other requirements deemed necessary by NRCS to protect the interests of the United States.

(d) Easements funded under the cooperative agreement option will be in perpetuity, except where State law prohibits a permanent easement, and will require that the easement area be maintained in accordance with GRP goals and objectives for the term of the easement.

(e) The entity may use its own terms and conditions in the conservation easement deed, but a conservation easement deed template used by the eligible entity will be submitted to the Chief within 30 days of the signing of the cooperative agreement. The conservation easement deed templates will be reviewed and approved by the Chief. NRCS reserves the right to require additional specific language or to remove language in the conservation easement deed to protect the interests of the United States.

(1) In order to protect the public investment, the conveyance document must contain a right of enforcement. NRCS will specify the terms for the right of enforcement clause to read as set

forth in the GRP cooperative agreement. This right is a vested property right and cannot be condemned or terminated by State or local government;

(2) The eligible entity will acquire, hold, manage, and enforce the easement. The eligible entity may have the option to enter into an agreement with governmental or private organizations to carry out easement stewardship responsibilities if approved by NRCS;

(3) Prior to closing, NRCS must sign an acceptance of the conservation easement, concurring with the terms of the conservation easement and accepting its interest in the conservation easement deed;

(4) All conservation easement deeds acquired with GRP funds must be recorded in the appropriate land records. Proof of recordation will be provided to NRCS by the eligible entity; and

(5) The conservation easement deed must include an indemnification clause requiring the participant (grantor) to indemnify and hold harmless the United States from any liability arising from or related to the property enrolled in GRP.

§ 1415.18 Easement transfer to eligible entities.

(a) NRCS may transfer title of ownership to an easement to an eligible entity to hold and enforce an easement if:

(1) The Chief determines that transfer will promote protection of grassland, land that contains forbs, or shrubland;

(2) The owner authorizes the eligible entity to hold and enforce the easement; and

(3) The eligible entity agrees to assume the costs incurred in administering and enforcing the easement, including the costs of restoration or rehabilitation of the land as specified by the owner and the eligible entity, and the entity assumes responsibility for enforcing the GRP management plan or conservation plan, as applicable, as approved by NRCS.

(b) NRCS has the right to conduct periodic inspections to verify the eligible entities enforcement of the easement, which includes the terms and requirements set forth in the GRP management plan and any associated restoration or conservation plan for any easements transferred pursuant to this section.

(c) An eligible entity that seeks to hold and enforce an easement will apply to the NRCS State Conservationist for approval.

(d) The Chief may approve an application if the eligible entity:

(1) Has relevant experience necessary, as appropriate for the application, to administer an easement on grassland, land that contains forbs, or shrublands;

(2) Has a charter that describes the commitment of the eligible entity to conserving ranch land, agricultural land, or grassland for grazing and conservation purposes;

(3) Possesses the human and financial resources necessary, as determined by the Chief, to effectuate the purposes of the charter;

(4) Has sufficient financial resources to carry out easement administrative and enforcement activities;

(5) Presents proof of a dedicated fund for enforcement as described in § 1415.17(b)(5), if the entity is a nongovernmental organization; and

(6) Presents documentation that the landowner has concurred in the transfer.

(e) The Chief or his or her successors and assigns, will retain a right of enforcement in any transferred GRP funded easement, which provides the Secretary the right to inspect the easement for violations and enforce the terms of this easement through any and all authorities available under Federal or State law, in the event that the eligible entity fails to enforce the terms of the easement, as determined by NRCS.

(f) Should an easement be transferred pursuant to this section, all warranties and indemnifications provided for in the deed will continue to apply to the United States. Upon transfer of the easement, the easement holder will be responsible for enforcement of the GRP management plan, as approved by NRCS, and implementation of any associated conservation or restoration plans and costs of such restoration as agreed to by the landowner and entity.

(g) Due to the Federal interest in the GRP easement, GRP-funded easements cannot be condemned.

§ 1415.19 Appeals.

(a) Applicants or participants may obtain a review of any administrative determination concerning eligibility for participation utilizing the administrative appeal regulations provided in parts 614 and 780 of this title.

(b) Before a person may seek judicial review of any administrative action concerning eligibility for program participation under this part, the person must exhaust all administrative appeal procedures set forth in paragraph (a) of this section, and for the purposes of judicial review, no decision will be a final agency action except a decision of the NRCS Chief or the FSA Administrator, as applicable, under these procedures.

(c) Any appraisals, market analysis, or supporting documentation that may be used by NRCS in determining property value are considered confidential information, and will only be disclosed as determined at the sole discretion of NRCS in accordance with applicable law.

(d) Enforcement actions undertaken by NRCS in furtherance of its Federally held property rights are under the jurisdiction of the Federal District Courts and are not subject to review under administrative appeal regulations.

§ 1415.20 Scheme or device.

(a) If it is determined by USDA that a participant has employed a scheme or device to defeat the purposes of this part, any part of any program payment otherwise due or paid to such participant during the applicable period may be withheld or be required to be refunded with interest thereon, as determined appropriate by USDA.

(b) A scheme or device includes, but is not limited to, coercion, fraud, misrepresentation, depriving any other person of payments for cost-share practices, rental contracts, or easements for the purpose of obtaining a payment to which a person would otherwise not be entitled.

(c) A participant who succeeds to the responsibilities under this part will report in writing to USDA any interest of any kind in enrolled land that is held by a predecessor or any lender. A failure of full disclosure will be considered a scheme or device under this section.

Signed this 15th day of November, 2010 in Washington, DC.

Dave White,

Vice President, Commodity Credit Corporation, and Chief, Natural Resources Conservation Service.

Jonathan W. Coppess,

Executive Vice President, Commodity Credit Corporation, and Administrator, Farm Service Agency.
