Arthur M. Sackler COLLOQUIA OF THE NATIONAL ACADEMY OF SCIENCES

Tapestry of Life: Lateral Transfers of Heritable Elements

Organizers: Siv Andersson, Jonathan Eisen, Claire Fraser, and Jeffrey Gordon Co-Chairs: Claire Fraser and Jeffrey Gordon Beckman Center, Irvine, California December 12-13, 2005

Final Program and Presentations

Meeting Overview

The Sackler Colloquium *The Tapestry of Life: Lateral Transfers of Heritable Elements* was held on December 12-13, 2005. What Darwin saw as a tree of life descending in a linear fashion, is now more accurately seen as a tapestry of life, an anastomosing network, with important lateral transfers of heritable elements among parallel lines of descent. These transfers range in complexity from small insertion sequences, to whole genes, gene islands, and portions of whole genomes which may be combined in symbiogenesis. The colloquium brought together researchers, empirical and theoretical, working at all levels on genomics, comparative genomics, and metagenomics to dentify common and differentiating features of lateral gene transfer and to examine their implications for science and for human concerns.

THE TAPESTRY OF LIFE: LATERAL TRANSFERS OF HERITABLE ELEMENTS

December 12-13, 2005 Beckman Center of the National Academies, Irvine, California

Organized by Siv Andersson, Jonathan Eisen, Claire Fraser, and Jeffrey Gordon Co-Chairs: Claire Fraser and Jeffrey Gordon

FINAL PROGRAM

Sunday, December	11		
6:00-8:00pm	Registration and Welcome Reception, Hyatt Regency Newport Beach		
Monday, Decembe	r 12		
7:15am & 7:45am	Buses leave Hyatt Regency Newport Beach for Beckman Center		
7:15am	oster setup in Huntington Room		
7:30am	Registration and Buffet Breakfast, Dining Room		
8:45am	Greetings, Jeffrey Gordon (Washington University of Medicine) Introductory comments about purpose/goals of meeting		
Session I: Mechani	isms and Experimental Studies of LGT		
Chair:	Abigail Salyers (University of Illinois)		
9:00am	Forest Rohwer (Scripps), Global Phage Diversity and the Movement Genes		
9:30am	Penny Chisholm (MIT), Prochlorococcus Diversity: How to Dominate Oceans with 2000 Genes		
10:00am	Abigail Salyers (University of Illinois), LGT in the Human Colon: How Much and How Important?		
10:30am	Break		
11:00am	Marlene Belfort (Wadsworth Center, NYS Department of Health), Molecular Machinery for Lateral Transfer of Introns		
11:32am	Poster Abstract Presentation: Michael Miller (Stanford University), Natural Transformation as a Source of Diversity Among Vibrio Cholerae Isolates		
12:00pm-1:00pm	Buffet Lunch, Dining Room		

	Jeffrey Lawrence (University of Pittsburgh)
Chair:	Seniey Edwence (University of Pittabulgh)
1:15pm	Jeffrey Lawrence (University of Pittsburgh), Measuring Non-Random
16	LGT Among Bacterial Lineages
1:45pm	Herve Philippe (University of Montreal), Are Horizontal Gene Transfers
167	the Most Disturbing Limitation for Inferring Prokaryotic Phylogeny?
2:15pm	Christos Ouzounis (European Bioinformatics Institute), Genome
	Conservation and the Net of Life
0.45	
2:45pm	Break
3:15pm	James Lake (UCLA), The Ring of Life and the Origin of Eukaryotes
3.13pm	James Lake (OCLA), The Ring of Life and the Origin of Eukaryotes
3:45pm	Poster Abstract Presentation: Kaiyuan Shi (University of Connecticut),
0.40pm	Parametric Bootstrap Analyses of Bacterial 16SrRNA Mosaicism
	a anothe bootshap intrajets of basicitat room and modeledant
4:15pm-5:15pm	Panel discussion featuring speakers from Sessions I and II
16 (ANA)	25. M
5:30pm	Poster Session in Huntington Room
7:00pm	Dinner in Atrium
1000000000	
8:00pm	Buses leave Beckman Center for Hyatt Regency Newport Beach

. . . .

11:00am	Poster Abstract Presentation: Nicola Patron (University of British Columbia), Intracellular Gene Transfer in Endosymbiotic Genome Integration	
11:30am-12:30pm	Buffet Lunch, Dining Room	
Session IV: Evolution	nary Implications of LGT	
Chair	Jonathan Eisen (The Institute for Genomic Research)	
12:45pm	Jonathan Eisen (The Institute for Genomic Research), Environmental Genomics and LGT: Can we Identify Organisms through their DNA if all Organisms are Chimeras?	
1:15pm	Sandra Baldauf (University of York), Inferring Eukaryotic Divergences	
1:45pm	Patrick Forterre (University of Paris), How to Recover the History of the Archaeal Domain, despite Lateral Gene Transfer?	
2:15pm	Ford Doolittle (Dalhousie University), "Web of Life"	
2:45pm	Poster Abstract Presentation: M. Virginia Sanchez Puerta (University of Maryland-College Park), The Plastid Genome of the Haptophyte Emiliania Huxleyi and the Evolution of the Cholorphyll C Containing Plastids	
3:15pm	Break	
Wrap-Up: Impact, Ap	plications, Future Challenges	
3:45pm	Claire Fraser (The Institute for Genomic Research), Comparative	
	Microbial Genomics: Insights into Evolution and Organismal Diversity	
4:15pm	Panel Discussion of major future intellectual/disciplinary/technical challenges for the field featuring speakers from Sessions III and IV	
5:15pm	Buses leave Beckman Center for Hyatt Regency Newport Beach and Orange County Airport
