

IFE Final Optics and Chamber Dynamics Modeling and Experiments

Final Technical Report

Award no. DE-FG02-99ER54547

F. Najmabadi and M. S. Tillack

11 January 2006

Our OFES-sponsored research on IFE technology originally focused on studies of grazing-incidence metal mirrors (GIMM's). After the addition of GIMM research to the High Average Power Laser (HAPL) program, our OFES-sponsored research evolved to include laser propagation studies, surface material evolution in IFE wetted-wall chambers, and magnetic intervention. In 2003, the OFES IFE Technology program was terminated. We continued to expend resources on a no-cost extension in order to complete student research projects in an orderly way and to help us explore new research directions. Those explorations led to funding in the field of extreme ultraviolet lithography, which shares many issues in common with inertial fusion chambers, and the field of radiative properties of laser-produced plasma.

Our research from 1999 through 2006 led to numerous journal articles and conference publications. Our progress can be best described through these publications, which are listed below. Consistent with the phases of research listed above, the publications are broken into the following categories:

- A. IFE final optics
- B. Laser propagation physics in IFE chambers
- C. Aerosol generation and transport in IFE chambers
- D. Charged particle transport and magnetic diversion
- E. Radiative properties of laser-produced plasma
- F. EUV lithography
- G. General publications on IFE

A. IFE final optics

M. S. Tillack, S. A. Payne, N. M. Ghoniem, M. R. Zaghloul and J. F. Latkowski, "Damage threats and response of final optics for laser-fusion power plants," *Inertial Fusion Science and Applications 2001*, Kyoto Japan, Sept. 2001, 717-721.

T. K. Mau, M. S. Tillack, and M. R. Zaghloul, "Modeling of Mirror Surface Damage Effects on Beam Propagation in a Laser-Driven IFE Power Plant," *Proc. 19th IEEE/NPSS SOFE*, Atlantic City NJ, Oct. 2-5, 2001.

M. R. Zaghloul, M. S. Tillack, and T. K. Mau, "Sensitivity of Metal Mirrors to Laser-Induced Damage Under Long-Term Exposure at Shallow Angle of Incidence," *Proc. 19th IEEE/NPSS SOFE*, Atlantic City NJ, Oct. 2-5, 2001.

M. S. Tillack, J. Pulsifer and K. Sequoia, "UV Laser-Induced Damage to Grazing Incidence Metal Mirrors," *Inertial Fusion Science and Applications 2003*, Monterey CA, Sept. 2003 (pp. 810-814).

K. L. Sequoia, M. S. Tillack, T. Albert, M. Wolford and J. D. Sethian, "Grazing Incidence Metal Mirror Mid-Scale Optics Research Plan," UCSD-ENG-111, May 28, 2004.
