

Economic Stimulus & Recovery Special Report, Number 4

March 3, 2009

American Recovery & Reinvestment Act of 2009: Sources of Information About Federal Stimulus Funds

Nonprofits interested in applying for grants for federal funds – whether directly to federal agencies or to state and local governments that received federal funds – must remain vigilant in these fast-paced times to remain informed. For instance, the Montana Legislature is set to hold its first hearing for public input on March 3, and Idaho’s Governor has directed that proposals for how to use the stimulus funding are due by noon on March 4.

This Special Report identifies key resources for the latest information at the state and federal levels.

National/Federal Information

1. *Federal Websites*

Initially, the best sources will be the new www.recovery.gov website and, for grant information, the established federal website, www.grants.gov. Eventually, the websites of the various federal agencies overseeing particular funds should have quality information as well.

2. *Federal Elected Officials’ Websites*

U.S. Senators and Members of Congress have started posting information about how money will be dispensed in their home states and congressional districts.

3. *National Newspapers & E-Newsletters*

In addition to visiting the website of the National Council of Nonprofits and subscribing to our free Policy News (www.councilofnonprofits.org/policynewssubscribe), consider subscribing to nonprofit newspapers and e-newsletters, several of which are free. One that seems to be on the cutting edge right now is the *Cohen Report on the Intersection of Nonprofits, Politics, and Public Policy*, written by Rick Cohen, who for years led the nonprofit National Committee for Responsive Philanthropy. His column (available free via email) has been focusing on the “*First Hundred Days – Nonprofit Style*” and includes insights about the stimulus bill. To subscribe, go to: <http://www.nonprofitquarterly.org/cohenreport/>.

State Level Information

1. *State Nonprofit Associations*

Nonprofits that are members of their state nonprofit associations can turn to those special groups for additional information pertaining to your state. For a listing of the state nonprofit associations, the National Council of Nonprofits has a user-friendly map and listing on its website, at <http://www.councilofnonprofits.org/salocator>.

2. *State Government Websites*

States are beginning to post information about how they will handle stimulus funds. The federal website lists the states that have posted official “State Recovery Sites.” <http://www.recovery.gov/?q=content/state-recovery-page>

State Government Recovery Websites

The following chart presents stimulus-related information posted on state government websites as of the morning of March 2, 2009.

How to Use This Chart

- *Direct:*
 - Go to your state and see if it has an official website. If not, then visit your Governor's website to see if additional information has been posted since this list was compiled.
 - Link to the other information in this list because it may provide additional resources for you.
 - If you have received grants through your state (or local) government before, then check with your normal grantmaking agency to see if it has additional information.
 - If you have not received grants through your state (or local) government before, then think about the natural places through which funds would flow. For instance, nonprofits providing services to young children should be thinking in terms of their state departments of education, or economic security, or health, and need not be checking with their state departments of transportation or water quality.
- *Comparative:*
 - If your state does post information, then compare that with what other states are doing with similar funds. One of the beauties of the American system of federalism is that each state has room to do things differently. As a citizen, you have the ability to see what is being done in a neighboring state – or even across the country – and then suggest that the best ideas be used in your state. This stimulus approach has never been used before on such a massive scale or fast-moving basis, so you can play an important role in scanning what is happening elsewhere and importing sound ideas to your home state.
 - If your state does not post information, then:
 - Review this chart to see what other similar information is available in different states, both generally and regarding your anticipated grant area (for example, to see how other states are handling stimulus funds for young children);
 - Contact your Governor's Office to find out if such information has been posted – and if not, then ask when such information will be made available; and
 - If you are not satisfied with the response, then consider contacting your local media to see if they can find out why your state is not posting information that is becoming readily available in other states. (As of March 2, only 10 states had official sites posted, so please do not be impatient, but neither should you be left in the dark much longer about how your state is responding.)
