# CENSUS SNAPSHOT 

## (ix) the <br> Williams INSTITUTE

## UNITED STATES

Adam P. Romero, Public Policy Fellow Amanda K. Baumle, Public Policy Fellow M.V. Lee Badgett, Research Director Gary J. Gates, Senior Policy Fellow

## Same-sex couple households

 per 1,000 householdsNone present: 0
Low: 0.01-2.99

Using data from the U.S. Census Bureau, this report provides demographic and economic information about same-sex couples and same-sex couples raising children in the U.S. We compare same-sex "unmarried partners," which the Census Bureau defines as an unmarried couple who "shares living quarters and has a close personal relationship," to different-sex married couples in the U.S. ${ }^{1}$

In many ways, the almost 777,000 same-sex couples living in the U.S. are similar to married couples. According to Census 2000, they live in every county in every state, are racially and ethnically diverse, have
 partners who depend upon each other financially, and actively participate in the U.S. economy. Census data also show that $20 \%$ of same-sex couples in the U.S. are raising children. However, same-sex parents have fewer economic resources to provide for their families than do their married counterparts: they have lower household incomes, on average, and lower rates of home ownership.

## SAME-SEX COUPLES AND THE LGBT

 POPULATI ON I N THE U.S.- In 2000, there were 594,391 same-sex couples living in the U.S. ${ }^{2}$
- By 2005, the number of same-sex couples increased by more than $20 \%$ to $776,943 .{ }^{3}$ This increase likely reflects same-sex couples' growing willingness to disclose their partnerships on government surveys.
- In 2005, there were an estimated 8.8 million gay, lesbian, and bisexual people (single and coupled) living in the U.S. ${ }^{4}$

## I NDI VI DUALS I N SAME-SEX COUPLES ARE DEMOGRAPHI CALLY AND GEOGRAPHI CALLY DIVERSE

- There are more male same-sex couples (51\%) than female same-sex couples (49\%) in the U.S. ${ }^{5}$
- Individuals in same-sex couples are, on average, 40 years old, and significantly younger than married individuals (48 years old) in the U.S.
- Same-sex couples live in every state in the U.S. and constitute $1.0 \%$ of coupled households and $0.6 \%$ of all households in the country. California reported the most same-sex couples with 92,138 couples, followed by New York with 46,490 couples, Texas with 42,912 couples, Florida with 41,048 couples, and Illinois with 22,887 couples. Washington, D.C. reported the highest proportion of same-sex couples per total households ( $1.48 \%$ ), followed by Vermont ( $0.80 \%$ ), California (0.80\%), Washington (0.70\%), Massachusetts ( $0.70 \%$ ), and Oregon ( $0.67 \%$ ). ${ }^{6}$
- Same-sex couples are slightly more racially and ethnically diverse than their married counterparts: $24 \%$ of same-sex and $22 \%$ married couples are nonwhite.

## PEOPLE IN SAME-SEX COUPLES ARE ACTI VELY ENGAGED IN THE U.S. ECONOMY

- Individuals in same-sex couples in the U.S. are significantly more likely to be employed than are married individuals: 78\% of individuals in samesex couples are employed, compared to $65 \%$ of married individuals.
- Contrary to a popular stereotype, the annual earnings of men in same-sex couples are significantly lower than those of married men. On average, men in same-sex couples in the U.S. earn $\$ 43,117$ each year, significantly less than $\$ 49,777$ for married men. The median income of men in same-sex couples in the U.S. is $\$ 32,500$, or $15 \%$ less than that of married men $(\$ 38,000)$.
- Women in same-sex couples in the U.S. earn an average of $\$ 34,979$ per year (with a median of $\$ 28,600$ ), more than married women, whose earnings average $\$ 26,245$ (with a median of $\$ 21,000$ ). Women in same-sex couples earn, on average, less than married men and men in samesex couples in the U.S.

- Individuals in same-sex couples in the U.S. are more likely to work in the private sector: $74 \%$ of individuals in same-sex couples work in the private sector, compared to $71 \%$ of married individuals; $16 \%$ of individuals in same-sex and married couples work in the public sector; and $11 \%$ of individuals in same-sex couples are self-employed, compared to $12 \%$ of married individuals.
- Individuals in same-sex couples are more likely to have a college degree: $40 \%$ of individuals in samesex couples and $27 \%$ of married individuals have earned a college degree.
- Despite the military's historic policies of excluding gay men and lesbians from service, individuals in same-sex couples have served in the military: 10\% of individuals in same-sex couples are veterans, compared to $16 \%$ of married individuals.

## SAME-SEX PARTNERS IN THE U.S. DEPEND UPON ONE ANOTHER IN WAYS THAT ARE SI MI LAR TO MARRIED COUPLES

- Couples in which one partner does not work or earns significantly less than the other partner may indicate financial interdependence. Almost one in
four same-sex couples (23\%) have only one wage earner, compared to almost one in three (31\%) married couples.
- A similar percentage of same-sex (28\%) and married (29\%) couples in the U.S. have at least one partner who is disabled.
- $7 \%$ of same-sex couples have at least one partner over the age of 65 , compared to $19 \%$ of married couples.

## SAME-SEX HOUSEHOLDS I N THE U.S. HAVE SI MI LAR ECONOMI C RESOURCES TO MARRIED HOUSEHOLDS

- The median income of same-sex coupled households in the U.S. is $\$ 63,600$, more than that of married couples ( $\$ 57,500$ ). The average household income of same-sex couples is $\$ 80,610$, more than $\$ 73,655$ for married couples.

- Same-sex couples are significantly less likely than married couples to own their homes: $60 \%$ of samesex couples in the U.S. own their home, compared to $81 \%$ of married couples.

SAME-SEX COUPLES ARE RAI SI NG CHI LDREN IN THE U.S., YET WITH FAR FEWER ECONOMIC RESOURCES THAN MARRI ED PARENTS

- $20 \%$ of same-sex couples in the U.S. are raising children under the age of 18 .
- As of 2005, an estimated 270,313 of the U.S.'s children are living in households headed by samesex couples. ${ }^{7}$
- In the U.S., married and same-sex couples with children under 18 in the home have, on average, 2 children.
- An estimated 65,500 of the U.S.'s adopted children live with a lesbian or gay parent. ${ }^{8}$
- Same-sex parents in the U.S. have fewer financial resources to support their children than married parents. The median household income of samesex couples with children is $\$ 46,200$, or $23 \%$ lower than that of married parents $(\$ 59,600)$. The average household income of same-sex couples with children is $\$ 59,270$, significantly less than $\$ 74,777$ for married parents.
- While $51 \%$ of same-sex couples with children own their home, a much larger percentage of married parents (77\%) own their home.

Household (With Children) Incomes

## CONCLUSI ON

Census data provide valuable information about gay and lesbian couples in the U.S. While in many respects the U.S.'S same-sex couples look like married couples, those with children have significantly fewer economic resources than married couples to provide for their families and significantly lower rates of home ownership.

## About the Authors

Adam P. Romero is Public Policy Fellow at the Williams Institute, UCLA School of Law. J.D. Yale Law School; A.B., summa cum laude, Cornell University. His current research examines the significance of family in society and law, especially as relevant to disabled adults without family.

Amanda K. Baumle is Public Policy Fellow at the Williams Institute, UCLA School of Law as well as Assistant Professor of Sociology at the University of Houston. Ph.D Texas A\&M; J.D. University of Texas. She specializes in demography, social inequality, and the sociology of law.
M.V. Lee Badgett is Research Director at The Williams Institute, UCLA School of Law, and Director of the Center for Public Policy and Administration at the University of Massachusetts Amherst, where she is also on the faculty of the Department of Economics. She studies family policy and employment discrimination related to sexual orientation.

Gary J. Gates is Senior Research Fellow at The Williams Institute, UCLA School of Law. He studies the demographic and economic characteristics of the lesbian and gay population.
${ }^{1}$ Unless otherwise noted, we calculate the demographic characteristics from the Census 2000 Public Use Microdata Sample ( $5 \%$ file) available from the U.S. Census Bureau. For a detailed discussion of the Census 2000 methodology used in this report, see Census Snapshot: Methods Note, available at http://www.law.ucla.edu/williamsinstitute/ publications/MethodologicalDetailsForCensusSnapshots.pdf. In estimating numbers of same-sex couples and children raised by same-sex couples, however, we use the total number of same-sex couples from 2005 and the proportion of couples with children from 2000 in order to provide a more up-to-date estimate.
${ }^{2}$ Tavia Simmons \& Martin O'Connell, U.S. Department of Commerce, U.S. Census Bureau, Married-Couple and Unmarried-Partner Households, Census 2000 Special Reports, CENSR-5, p. 4, tab. 2 (Feb. 2003).
${ }^{3}$ Gary J. Gates, The Williams Institute, Same-sex Couples and the Gay, Lesbian, Bisexual Population: New Estimates from the American Community Survey, p. 11, apx. 1, available at http://www.law.ucla.edu/williamsinstitute/publicat ions/SameSexCouplesandGLBpopACS.pdf. Sample sizes for individual states in 2005 are not sufficiently large for the analyses presented in this report, we therefore use data from Census 2000 where samples are on average five times larger than 2005.
