# Report on the Expenditure of Lottery Funds Fiscal Year 1999

## Introduction

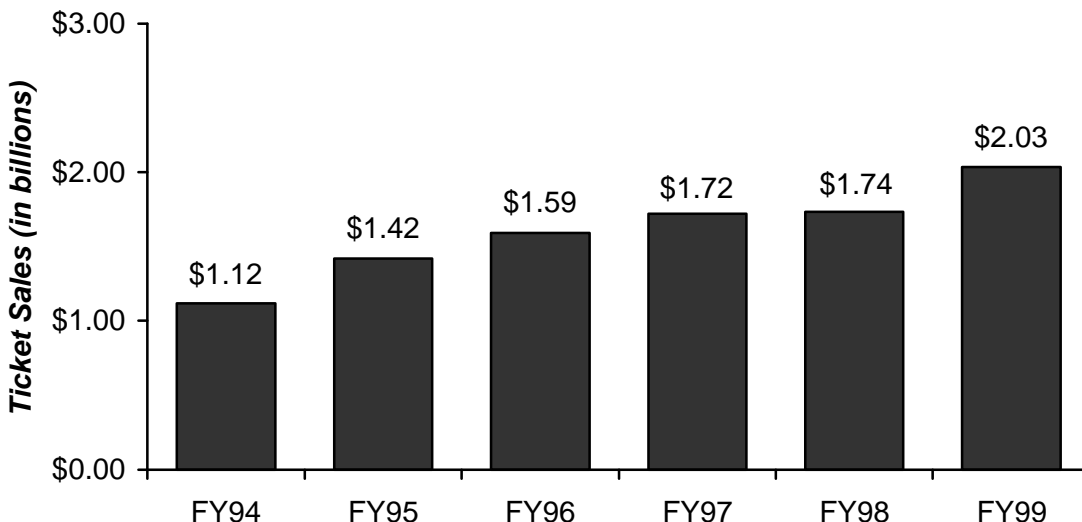

### The Georgia Lottery for Education

The Georgia Lottery for Education had its beginnings in 1991, when the Georgia General Assembly proposed a constitutional amendment to allow a state-run lottery, in response to a request by former Governor Zell Miller. The legislation outlining how lottery proceeds would be spent and how the lottery would be operated was passed by the 1992 session of the General Assembly. This legislation created the Georgia Lottery Corporation to oversee the operation of the lottery. In November 1992, the proposed constitutional amendment was placed on a general election ballot. Over half (52%) of Georgia voters approved the amendment. Seven months later, the first lottery ticket was sold on June 29, 1993.

The Georgia Lottery for Education Act specifies how the lottery proceeds may be spent. Georgia law states that "as nearly as practical, for each fiscal year, net proceeds shall equal at least 35 percent of the lottery proceeds." That is, over one-third of lottery proceeds are considered net proceeds; the other 65% is spent on prizes, retailers, instant and on-line vendors, administration and advertising. The net proceeds are to be used "to support improvements and enhancements for educational purposes and programs." Also included in the Act is a provision that lottery receipts must be used to supplement, not supplant, state funding for education. The Governor and the General Assembly allocate the net proceeds from the lottery each fiscal year.

The Georgia Lottery for Education has raised more than \$3 billion for education over the last six years. Since its inception, the lottery has had increasing ticket sales each year, from \$1.119 billion in fiscal year 1994 to \$2.034 billion in fiscal year 1999. Total lottery ticket sales have reached more than \$9.6 billion in six years of operation. Figure 1 shows how total lottery ticket sales have continued to increase in each subsequent fiscal year. According to the Georgia Lottery Corporation, "the Georgia Lottery is one of only two lotteries in the nation to boast increased sales every year in its first six years of existence."

**Figure 1. Total Lottery Ticket Sales by Fiscal Year**

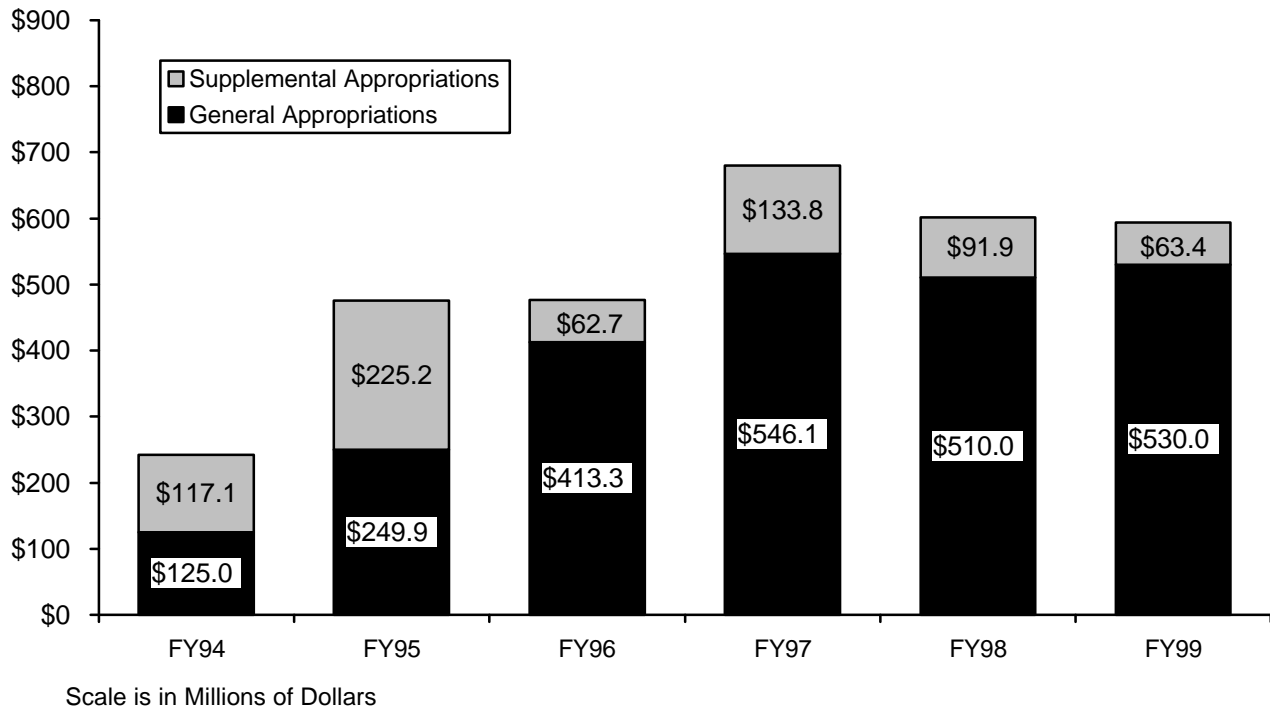

## 1 - Report on the Expenditure of Lottery Funds

Increasing ticket sales create greater net proceeds. Each year, the legislature appropriates these increasing net lottery proceeds to education. Figure 2 shows lottery appropriations by fiscal year, illustrating the lottery funds dedicated to education programs and purposes. The supplemental appropriation shows that each year lottery proceeds have exceeded the original amount appropriated in the general budget.

**Figure 2. Lottery Appropriations by Fiscal Year**

### Lottery Appropriations by Program

Georgia Code (O.C.G.A. 50-27) specifies that lottery receipts be used for “educational purposes and programs” only, defined as: (1) tuition grants and scholarships, (2) construction of educational facilities, (3) technology for educational facilities, and (4) prekindergarten for four year-olds. During the six years that the Georgia Lottery for Education has been in existence, the largest share of the net lottery proceeds have been allocated to the prekindergarten program. Yet, the funds have been divided roughly equally between the spending categories over time. Table 1 shows how lottery proceeds over the past six fiscal years have been distributed among these programs.<sup>1</sup>

<sup>1</sup> Appropriations in the *Technology* and *Construction* categories in Tables 1 and 2 and in Figure 3 differ slightly in this report than in previous Council reports on lottery expenditures. A small proportion of funds appropriated for construction purposes were combined with technology funds in previous reports. Data reported here reflect the separation of these funds into the appropriate construction and technology categories.

## 2 - Report on the Expenditure of Lottery Funds

**Table 1. Total Lottery Appropriations for Fiscal Years 1994-1999 by Program**

	<b>Total Appropriation</b>	<b>Percent of Total</b>
Scholarships	\$874,982,422	29%
Prekindergarten	\$928,531,837	30%
Technology	\$637,624,853	21%
Construction	\$627,617,944	20%
<b>TOTAL</b>	<b>\$3,068,757,056</b>	<b>100%</b>

Each year spending priorities have shifted among the categories, as illustrated in Table 2 and Figure 3, both of which show the distribution of net lottery proceeds to programs by fiscal year. In fiscal year 1999, scholarships and grants (\$219 million) and prekindergarten (\$216 million) were the largest spending categories. This emphasis has changed since the lottery began contributing funds to

**Table 2. Lottery Appropriations by Program**

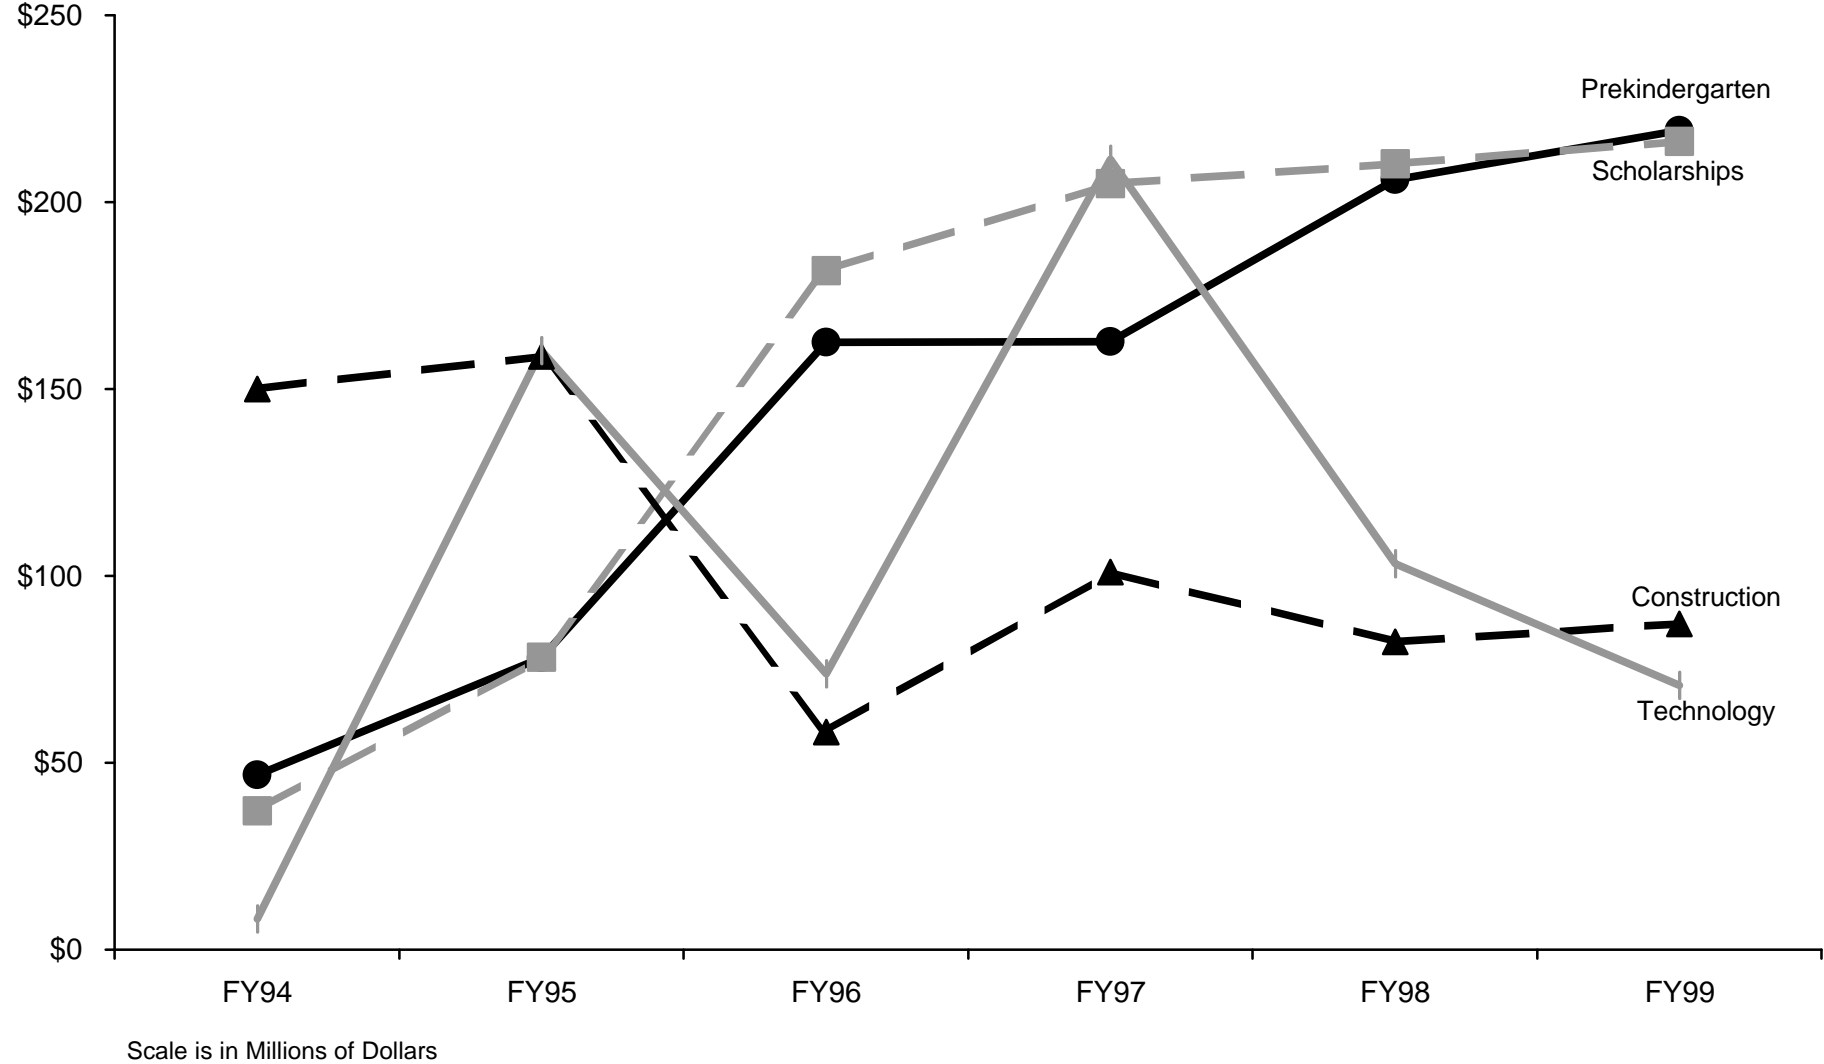

<b>Funding Class</b>	<b>FY94</b>	<b>FY95</b>	<b>FY96</b>	<b>FY97</b>	<b>FY98</b>	<b>FY99</b>
Scholarships	\$ 46,699,010	\$ 78,001,941	\$162,440,172	\$162,628,161	\$205,995,380	\$219,217,758
Pre-k	\$ 37,100,000	\$ 78,215,000	\$181,626,245	\$204,982,285	\$210,279,348	\$216,328,959
Technology	\$150,061,478	\$158,777,589	\$ 58,215,253	\$100,990,768	\$ 82,381,689	\$ 87,198,076
Construction	\$ 8,156,512	\$160,236,607	\$ 73,801,071	\$211,468,234	\$103,266,973	\$ 70,688,547
<b>TOTAL</b>	<b>\$242,017,000</b>	<b>\$475,231,137</b>	<b>\$476,082,741</b>	<b>\$680,069,448</b>	<b>\$601,923,390</b>	<b>\$593,433,340</b>

education in Georgia. In the first two years of lottery appropriations, fiscal years 1994 and 1995, technology represented the area of highest expenditures. In fiscal year 1996, appropriations for the prekindergarten program became highest among the four categories, and in fiscal year 1997, construction was the category with the highest expenditure amount. Since that time, spending in the categories of prekindergarten and scholarships has surpassed that of technology and construction.

The sections of the report following Figure 3 will describe lottery expenditures for the four lottery program areas:

- HOPE and Other Scholarship Programs
- The Prekindergarten Program
- Technology Programs
- Construction.

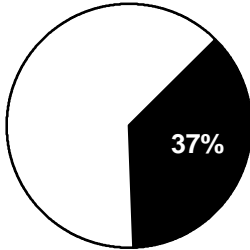

Figure 3. Lottery Appropriations for Fiscal Years 1994-1999 by Program

## Helping Outstanding Pupils Educationally (HOPE) and Other Scholarship Programs

### Scholarship Programs as a Percentage of the FY99 Lottery Budget

### The Helping Outstanding Pupils Educationally (HOPE) Scholarship Program

The Helping Outstanding Pupils Educationally (HOPE) Scholarship program was created to encourage academic achievement, to assist Georgia students with the expenses of post-secondary education, and to keep the highest-achieving students in the state. The HOPE scholarship program provides financial assistance to Georgia students who meet eligibility requirements, including enrollment in a degree, diploma, or certificate program at a Georgia public or private college, university, or technical institute. The program has four primary components:

1. **The Technical Institution Component** provides every Georgian with the opportunity to work toward a certificate or diploma at any public technical institution in Georgia tuition-free.
2. **The Public College Scholarship Component** provides every Georgia high school student who graduates in 1993 or later with a “B” average the opportunity to attend a Georgia public college or university tuition-free.
3. **The Private College Tuition Equalization Grant and Scholarship Component** includes both the Tuition Equalization Grant and the Private College Scholarship. The Tuition Equalization Grant provides Georgia high school graduates attending a Georgia private college or university with \$1,500 per year toward their education costs. The grant is being phased out and will be replaced with the Private College Scholarship. This scholarship provides \$3,000 per year toward private college tuition to Georgia high school graduates with a “B” average.
4. **The GED Component.** Georgia residents who earn an equivalency diploma receive a \$500 GED voucher that can be applied to the costs of post-secondary education.

The Council for School Performance has published several studies documenting the impact of the HOPE scholarship on students prior to graduating from high school and after enrollment in higher education. The initial phase of a multi-year study found that Georgia’s high-achieving students expect to attend college, regardless of their families’ ability to afford it (see the Council report, *HOPE Longitudinal Study: First Year Results*). The second year of the same study showed that student and parent behavior and their knowledge of the HOPE Scholarship vary significantly, depending on their expectations for education after high school (see *HOPE Longitudinal Study: Second Year Results*). Another study examines responses to HOPE and found increasing numbers of high school students earning a 3.0 or better in high school, and no evidence of increasing grade inflation or course-avoidance in high school. The study also reveals that high-achieving students are staying in Georgia for college and that the percentage of minority students enrolling in state institutions has not changed dramatically since the inception of the HOPE Scholarship (see the Council report, *An Evaluation of Georgia’s HOPE Scholarship Program: Effects of HOPE on Grade Inflation, Academic Performance and College Enrollment*).

## 6 - Report on the Expenditure of Lottery Fund

Tables 3-7, respectively, provide greater detail about the technical institution component, the public college scholarship component, the private college tuition equalization component, the private college scholarship component, and the GED component of the Scholarship program. Each of these components has specific eligibility requirements and other guidelines. The tables outline the eligibility requirements and guidelines for each component and show any variations in requirements since the inception of HOPE.

Through a HOPE grant, Georgia residents enrolling in a certificate or diploma program at any public technical institute may receive financial assistance regardless of grade point average. The technical institution component of HOPE expanded in FY95 to provide for mandatory fees in addition to tuition costs. In the same year, students were also given a voucher to defray the cost of books and other necessary supplies. Table 3 outlines the requirements for the public technical institution component of the HOPE program.

**Table 3. The Technical Institution Component**

	FY94	FY95-FY99
<b>Eligibility for Certificate or Diploma Program</b>	Any Georgia resident accepted into a certificate or diploma program at a public technical institute	Any Georgia resident accepted into a certificate or diploma program at a public technical institute
<b>Eligibility for Degree Program</b>	Same as Public College Component (see Table 5)	Same as Public College Component (see Table 5)
<b>Award</b>	Tuition	Tuition, Mandatory Fees, and Book Allowance

Students enrolling in degree programs at a public technical institute may receive HOPE assistance in the form of the public college component of the HOPE Scholarship which has different eligibility requirements than the program for students enrolling in certificate or diploma programs. Students in degree programs at technical institutes must meet minimum requirements for grade point average in high school and college, while those in diploma or certificate programs are exempt from these requirements. Georgia high school students who graduated in 1993 or later with a 3.0 average in the college preparatory curriculum or a 3.2 average in other curricula in high school and enter a degree program at a public technical institute may attend tuition-free with HOPE. Their HOPE awards will also provide for mandatory fees and a book allowance. Beginning in the 1997-98 school year, degree-seeking students at technical institutes who earn a 3.0 grade point average in their freshman year have been eligible for HOPE grants during their sophomore year. The grant covers tuition and mandatory fees and provides a book allowance.

An exploratory study by the Council for School Performance found that the HOPE technical institute component seems to benefit its recipients, the technical institutes, and the communities they serve (Audretsch, McWilliams, and Melkers, 1998). Although the preliminary nature of this report prevents more conclusive results about this grant program, students, technical institute administrators, and employers had mostly positive remarks about the program.

The public college component of the HOPE scholarship program is the most widely known of the HOPE programs. These HOPE Scholarships provide every Georgia high school student graduating in 1993 or later with a "B" or higher average with the opportunity to attend a Georgia public college or university tuition-free. Students must maintain a "B" or better average to continue receiving the HOPE scholarship until graduation. Changes to the eligibility requirements have allowed older students and students not earning a "B" average in high school to also reap the benefits of HOPE.

These changes are described below. Table 4 describes the requirements and benefits of the public college HOPE Scholarship program.

**Table 4. The Public College Scholarship Component**

	<b>FY94</b>	<b>FY95</b>	<b>FY96-FY99</b>
<b>Eligibility</b>	Georgia resident  Graduated from high school in 1993 or later with a 3.0 GPA (freshmen and sophomores only)  3.0 GPA in college	Georgia resident  Graduated from high school in 1993 or later with a 3.0 GPA (college freshmen, sophomores, juniors, and seniors)  3.0 GPA in college	Georgia resident  Graduated from high school in 1993 or later with a 3.0 GPA OR Graduated before 1993 and earned a 3.0 after 90 hours of college study.  3.0 GPA in college  One chance to re-enter HOPE if scholarship is lost due to low grades
<b>Household Income Cap</b>	\$66,000	\$100,000	None
<b>Award</b>	Tuition	Tuition, Mandatory Fees, and Book Allowance	Tuition, Mandatory Fees, and Book Allowance
<b>Additional Programs</b>	N/A	Survivors of Deceased Public Safety Officers Scholarship	Survivors of Deceased Public Safety Officers Scholarship  Teacher Promise Loan Program  HOPE Teacher Scholarships

The public college scholarship component of the HOPE program has greatly expanded its eligibility requirements since its inception in fiscal year 1994. In that year, the scholarship targeted low- to middle-income, high-achieving students attending public college and universities; only students with household income levels below \$66,000 could receive the HOPE scholarship. Originally, scholarships were available for students' freshman and sophomore years only. In fiscal year 1995, the household income restriction was raised to \$100,000 and funds for mandatory fees and a book allowance were added to the award. Furthermore, HOPE funding was extended to cover four years of tuition, instead of only two years, for those juniors and seniors meeting the program's requirements.

In the 1995-1996 school year, the HOPE program changed in two more significant ways: (1) the family income restriction was removed altogether, and (2) students already enrolled in public colleges or returning to public colleges were granted a second chance to receive the HOPE scholarship. With the "second chance" provision, students losing the scholarship after their freshman year because of poor grades can regain the HOPE award for their junior year if they earn a "B" or better average by the end of their sophomore year.

The 1996-1997 eligibility requirements did not change from the previous year, but were expanded once again in the 1997-1998 school year. Students in public college or returning to public college can now become eligible for HOPE if they earn a "B" or higher average after 45 quarter hours or 30 semester hours. Georgia residents graduating from ineligible high schools in 1997 or later (including

## 8 - Report on the Expenditure of Lottery Fund

students who were home-schooled in high school) cannot receive a HOPE award upon high school graduation, but now may be awarded HOPE retroactively, if they receive a "B" or higher average at the end of their freshman year.

The HOPE program requirements will change once again with the 2000-2001 academic year, and high schools have already been alerted about these future changes. Beginning with the high school class of 2000, only core curriculum subjects will be used in calculating the minimum "B" average required to receive the HOPE scholarship, rather than using all courses taken in high school to calculate grade point average.

For students attending private colleges in Georgia, the HOPE program offers the private tuition equalization grant and the private college scholarship and both components are funded through the Georgia Lottery for Education. Since the beginning of the HOPE program, the private college tuition equalization grant component of HOPE has supplemented the Georgia Tuition Equalization Grant of \$1,000, which is received by all Georgia residents attending eligible private colleges and is funded by state appropriations, not the lottery. The private tuition equalization grant component of HOPE provided assistance to Georgia students regardless of grade point average. In fiscal year 1997, the private college HOPE Scholarship was created to benefit students earning a "B" average or higher and enrolling in private colleges in Georgia.

Through fiscal year 1999, the state has continued to offer the HOPE tuition equalization grant to students who received this grant before fiscal year 1997, but will no longer do so in fiscal year 2000. As of that time, private college students may receive HOPE awards through the private college scholarship program only. Table 5 outlines the requirements of the private college tuition equalization grant, which ended as of fiscal year 1999. Table 6 describes the private college scholarship component of HOPE.

**Table 5. The Private College Tuition Equalization Component**

	FY94	FY95	FY96	FY97-FY99
<b>Eligibility</b>	Georgia high school graduate	Georgia high school graduate	Georgia high school graduate	Georgia high school graduates who received the HOPE grant in the previous year
<b>Award</b>	\$500 Tuition Grant Supplement for full-time freshmen and sophomores	\$1,000 Tuition Grant Supplement for all full-time students	\$1,500 Tuition Grant Supplement for all full-time students	\$1,500 Tuition Grant Supplement for all full-time students

**Table 6. The Private College Scholarship Component**

	<b>FY97-99</b>
<b>Eligibility</b>	<p>Georgia resident</p> <p>Graduated from high school in 1996 or later with a 3.0 GPA.</p> <p>3.0 GPA in college</p> <p>One chance to re-enter HOPE if scholarship is lost due to low grades.</p> <p>Previous recipients may also be eligible.</p>
<b>Award</b>	\$3,000 per school year
<b>Additional Programs</b>	<p>Georgia Military College Scholarship</p> <p>Teacher Promise Loan Program</p> <p>HOPE Teacher Scholarships</p>

In the 1996-1997 school year, the first students received the HOPE scholarship at private colleges. To be eligible for this scholarship, students must meet the same requirements as the HOPE scholarship recipients in public colleges. All students must earn a “B” or higher grade point average in high school, and to continue to receive the award, they must earn a “B” or better GPA in college. As with the public college scholarship component of HOPE, high school students graduating in the year 2000 or after must earn a “B” or better average in their core academic classes.

Georgia residents who pass the GED examination receive a \$500 voucher that may be used for education-related purposes. These purposes include tuition, books, supplies, and other expenses related to the furtherance of the resident’s post-secondary education. The requirements and benefits of this program have not changed since the inception of HOPE in fiscal year 1994. Table 7 details the GED component of the HOPE scholarship program.

**Table 7. The GED Component**

	<b>FY94-FY99</b>
<b>Eligibility</b>	Any Georgia resident who passes the GED examination
<b>Award</b>	\$500 voucher

**Other HOPE Programs**

Five programs have been added to the HOPE scholarship since its inception. These programs are more narrowly focused than the HOPE scholarship components detailed above.

**The HOPE Teacher Scholarship Program** assists teachers obtaining advanced degrees in teaching areas with a shortage of prospective teachers. The program provides forgivable loans (\$2,500 is forgiven for each year they teach in a Georgia public school, for up to four years). In fiscal year 1999, 593 new recipients benefited from the HOPE teacher scholarship, at a total cost of \$3.2 million. Overall, 2,037 teachers received the Scholarship in fiscal year 1999, for a total cost of \$3.9 million, which includes monies carried over from the previous fiscal year. The post-secondary institutions with the largest number of recipients in this program included the State University of West Georgia, Georgia State University, and the University of Georgia.

## 10 - Report on the Expenditure of Lottery Fund

**The HOPE Promise Teacher Scholarship Program** aims to attract high-achieving students to the profession of teaching by offering financial assistance to college juniors with a GPA of 3.6 in exchange for a few years of teaching in Georgia's public schools. The program provides forgivable annual loans of \$3,000 (\$1,500 is forgiven for each year they teach in a Georgia public school). In fiscal year 1999, 324 prospective teachers benefited from this scholarship, amounting to \$893,351. In the same year, the legislature appropriated \$1.1 million to this program. The post-secondary institutions with the largest number of recipients of this award included the University of Georgia, Georgia Southern University, the State University of West Georgia, and Berry College.

**The Georgia Military College Scholarship Program** assists Georgia Military College students with low interest loans. In fiscal year 1999, 64 students received low interest loans, which are forgivable with military service. Loans to these 64 students amounted to \$587,537, and the General Assembly appropriated \$771,210 for this purpose.

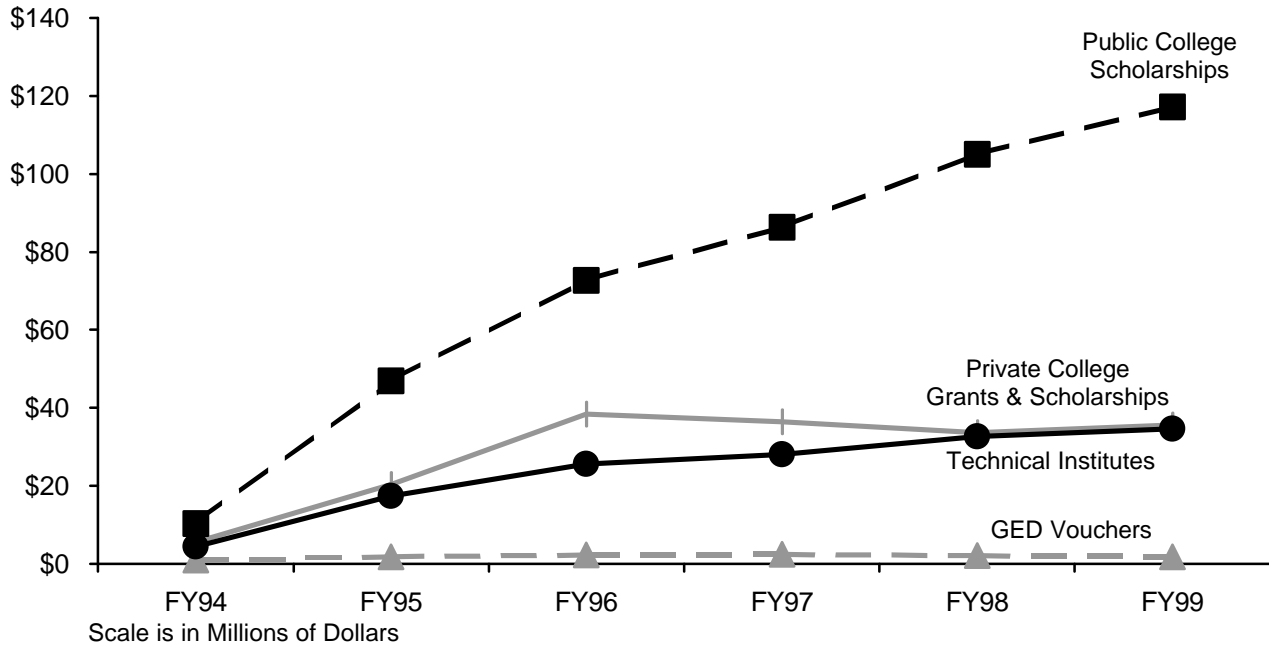

**The Public Safety Memorial Grant Program** is also known as the Law Enforcement Personnel Dependents Scholarship Program. This program provides funds for the cost of attendance at a Georgia public technical institute, college, or university to any child whose parent was employed as a public safety officer and was killed or permanently disabled in the line of duty. Thirty-two students received this scholarship in fiscal year 1999, at a cost of \$200,249. In the same year, \$220,530 was appropriated to this scholarship program. The post-secondary institutions with the largest number of recipients were Georgia Southern University, Georgia Sate University, and the University of Georgia.

**The Scholarship for Engineering Education** provides forgivable loans to Georgia residents in engineering programs at private accredited universities, based on the number of years that they work in an engineering-related field in the state after graduation. In fiscal year 1999, 154 students—all attending Mercer University--received this scholarship for a total cost of \$430,500. In the same year, \$523,500 was allocated to this program.

### Lottery Expenditures and Recipients in the HOPE Scholarship Program

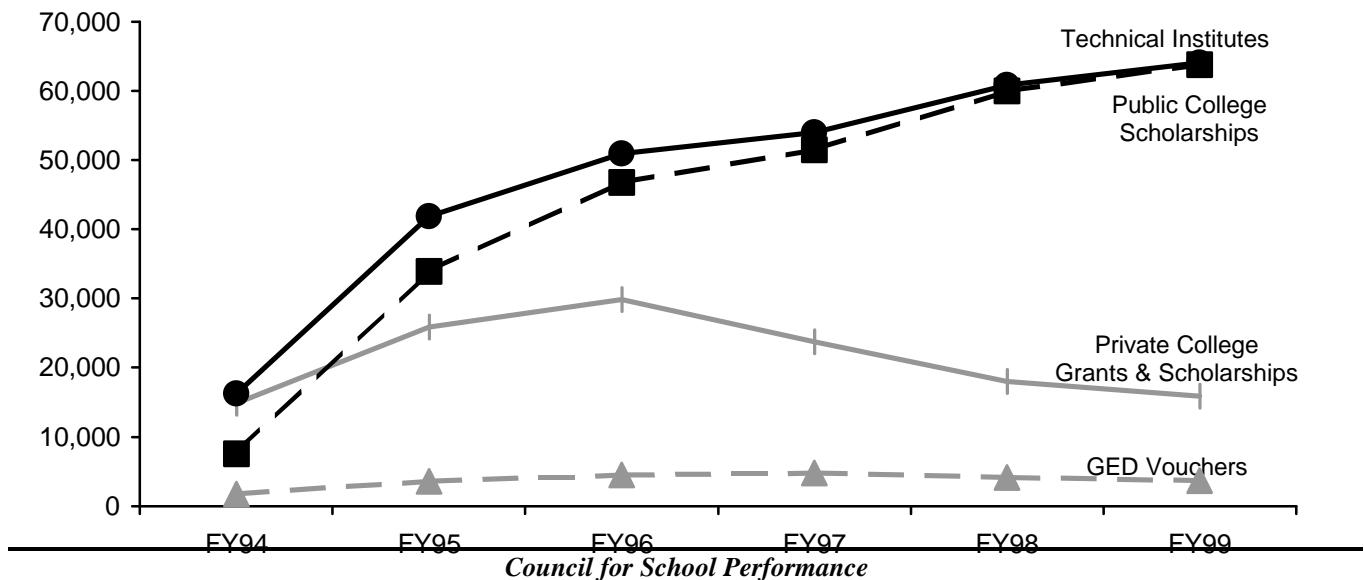

Since the beginning of the HOPE Scholarship program, expenditures and the number of recipients have changed dramatically for the four main program components: (1) technical institute grants, (2) public college scholarships, (3) private college grants and scholarships, and (4) GED vouchers. Two of the components, public college scholarships and technical institute grants, have experienced consistent growth in both recipients and expenditures since the inception of HOPE. Expenditures and recipients for the GED component of HOPE have remained fairly stable over the past six years. The private college component, however, experienced a drop in expenditures and recipients in fiscal years 1997 and 1998, which most likely resulted from instituting a minimum grade point average in the program's eligibility requirements. In fiscal year 1999, the number of private college recipients dropped again, although expenditures on HOPE awards rose slightly. Figures 4 and 5 illustrate the changes in expenditures and recipients for the four main components of the HOPE scholarship program

**Figure 4. HOPE Expenditures by Component, Fiscal Years 1994–1999**

Growth in the HOPE program overall stems from many different sources. Alterations in scholarship and grant awards and changes in eligibility requirements have certainly contributed to increases in award recipients and expenditures. Expenditures in the technical institution component of HOPE have risen as the program has expanded to provide for mandatory fees and a book allowance, in addition to tuition. The number of recipients and the dollars dedicated to public college scholarships have increased as the eligibility requirements have changed, including the removal of any family income restriction, the institution of the “second chance” provision, and the opening of the program to non-traditional students. Although the effect is difficult to quantify, some of the increase in HOPE Scholarships undoubtedly results from students electing to attend college in Georgia, rather than out-of-state.

**Figure 5. Students Participating in HOPE Programs, Fiscal Years 1994-1999**

## 12 - Report on the Expenditure of Lottery Fund

### HOPE Recipients by Institution Type

Tables 8-17 show HOPE recipients and expenditures by institution type for fiscal years 1996-1999.

### **Post-Secondary Options Program**

The Post-Secondary Options (PSO) Program, while not a HOPE scholarship program, is a scholarship program for high school students funded through the Georgia Lottery for Education. It allows high school students to take courses at colleges, universities, and technical institutes, and earn college or technical institute credit while fulfilling high school graduation requirements. The program pays tuition at the college, university or technical institute for high school students participating in the program. In earlier years, the program paid for tuition at public post-secondary institutions only. However, beginning in fiscal year 1996, the program was expanded to allow students to participate in the program at private colleges if they live beyond a reasonable commuting distance from public colleges.

Participating students must meet the joint enrollment requirements of their local school system and those of the post-secondary institution. In some cases the PSO program also contributes to the cost of transportation to and from the college or technical school. In fiscal year 1999, \$4,064,736 was appropriated to the post-secondary options program. Table 17 shows expenditures for the PSO program by institution for fiscal year 1999. *(For more information about the PSO program, see the Council report, An Evaluation of Georgia's Post-Secondary Options/Joint Enrollment Programs, 1998.)*

## Prekindergarten for Four-Year Olds

### Pre-K Programs as a Percentage of the FY99 Lottery Budget

In 1993, the Georgia Prekindergarten Program was established to provide educational experiences for Georgia's four-year-olds in preparation for kindergarten. This statewide, voluntary prekindergarten program reaches a higher proportion of four-year-olds than any similar program in the nation. The program operates on the regular school system calendar for the length of a typical school day and is free for participants.

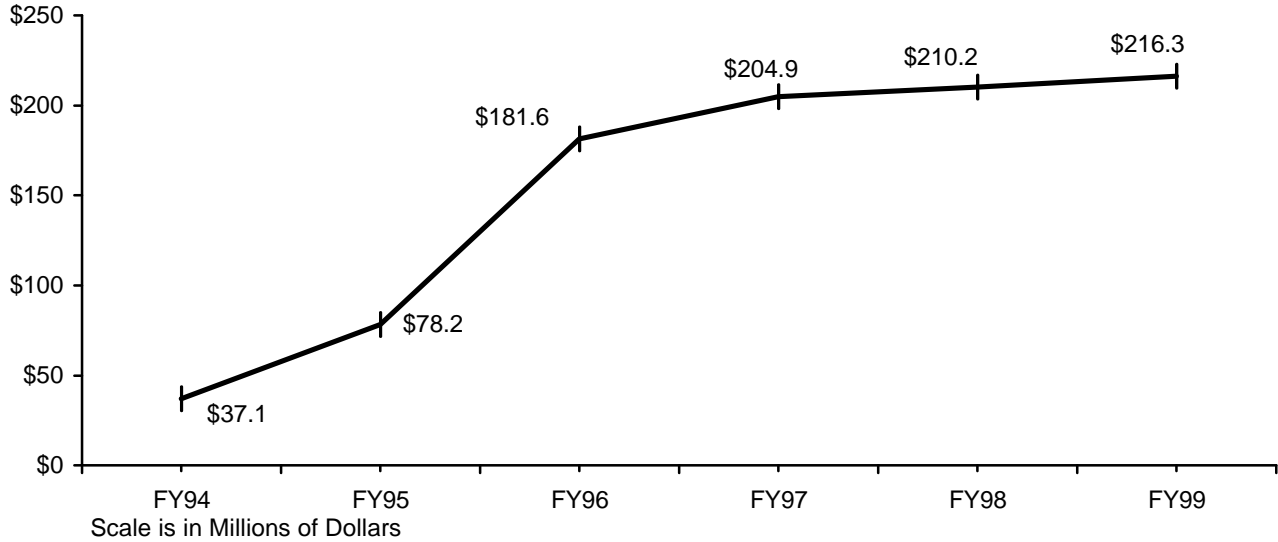

Recent evaluations have shown the effectiveness and quality of the program. A Council for School Performance study found that, overall, Pre-K classes had adequate materials and supplies, were led by well-trained teachers who are knowledgeable of developmentally appropriate practice, and provided a variety of experiences for the state's four year-olds (Byron and Henry, 1998). Findings from the first year of a multi-year study of prekindergarten participants found that most classrooms were fully equipped, providing many diverse experiences for children. In addition, most teachers were very satisfied with their students, and parents were overwhelmingly pleased with the program (Basile, Henderson, and Henry, 1997). The second year of this study revealed that the majority of kindergarten teachers believe their students are more prepared for school in seven out of eight skill areas, as a result of the prekindergarten program (Henderson, Basile, and Henry, 1999). (For more information on the program's impact, see the Council for School Performance and Applied Research Center reports, *Quality of Georgia's Pre-Kindergarten Program: 1997-98 School Year*, *Quality and Effectiveness of Pre-Kindergarten Programs in Georgia: Parental Perspectives*, and *Prekindergarten Longitudinal Study: 1997-98 School Year Annual Report*.)

The program continues to grow after six years of operation, having served more than 60,000 four-year-olds in fiscal year 1999. While the program was founded to serve "at-risk" four-year-olds, it now aims to serve all four-year-olds in Georgia. Figures 6 and 7 show the growth in allocations to the prekindergarten program and the number of children served over time.

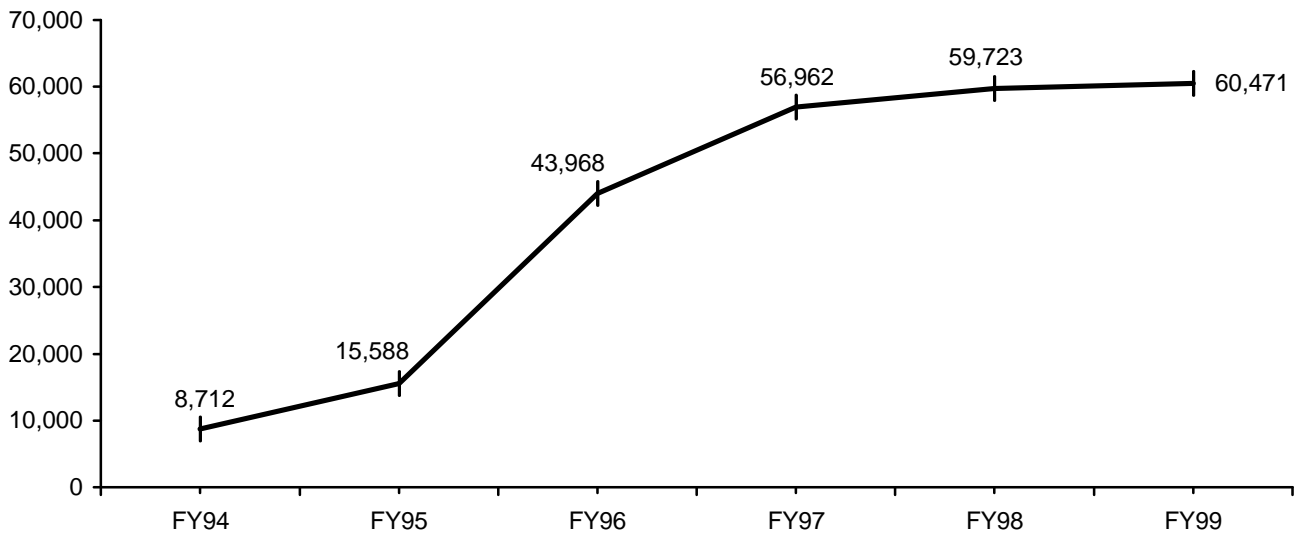

## 22 - Report on the Expenditure of Lottery Fund

**Figure 6. Allocations for Prekindergarten by Year**

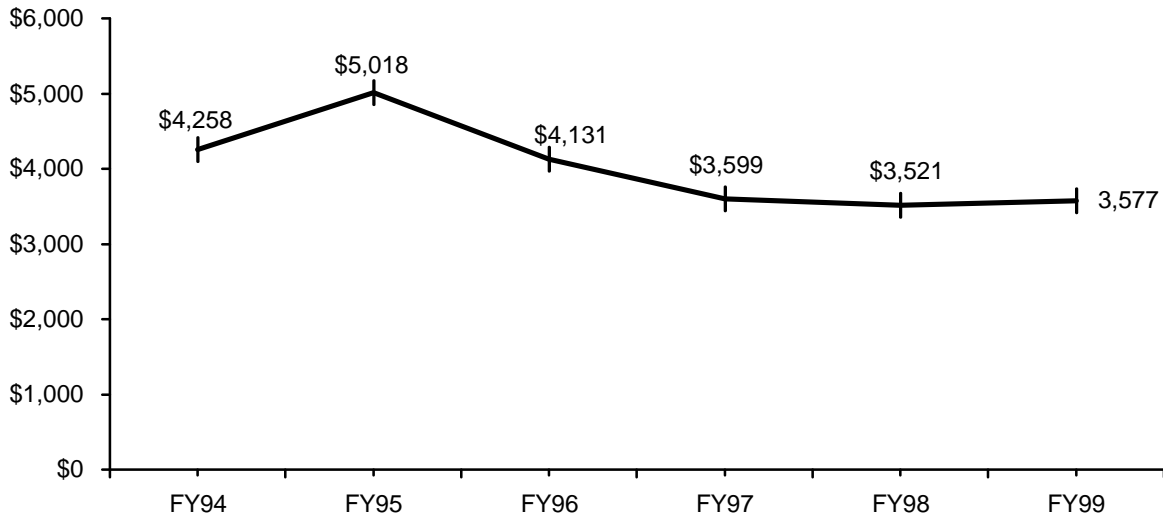

**Figure 7. Children Served by Prekindergarten by Year**

In the six years that the prekindergarten program has operated, the expenditure per child has fluctuated somewhat, but appears to be leveling off in fiscal year 1999.<sup>2</sup> Although per child expenditures rose by a very small amount from 1998, they remain below 1994 levels. The overall decline in per child expenditures since fiscal year 1995 might reflect economies of scale—as more children are served, the cost of serving each child decreases. For example, as more programs are in operation, the expenses dedicated to start-up costs decline, contributing to lower per child expenditures. Figure 8 shows how the cost per child has changed from year to year.

<sup>2</sup> The figures for children served and for per child expenditures in FY98 differ slightly from that reported in the FY98 Lottery Report. The data shown here reflect final rosters submitted to the Office of School Readiness for the corresponding fiscal year.

**Figure 8. Prekindergarten Program Per Child Expenditures By Year**

Prekindergarten programs are located in many different settings, including schools, YMCAs, child care centers, churches, and other organizations. School systems, other government agencies, private not-for-profit agencies, and private for-profit agencies are eligible for funding. Table 18 and the Appendix show expenditures by sponsoring program.

## Technology Programs

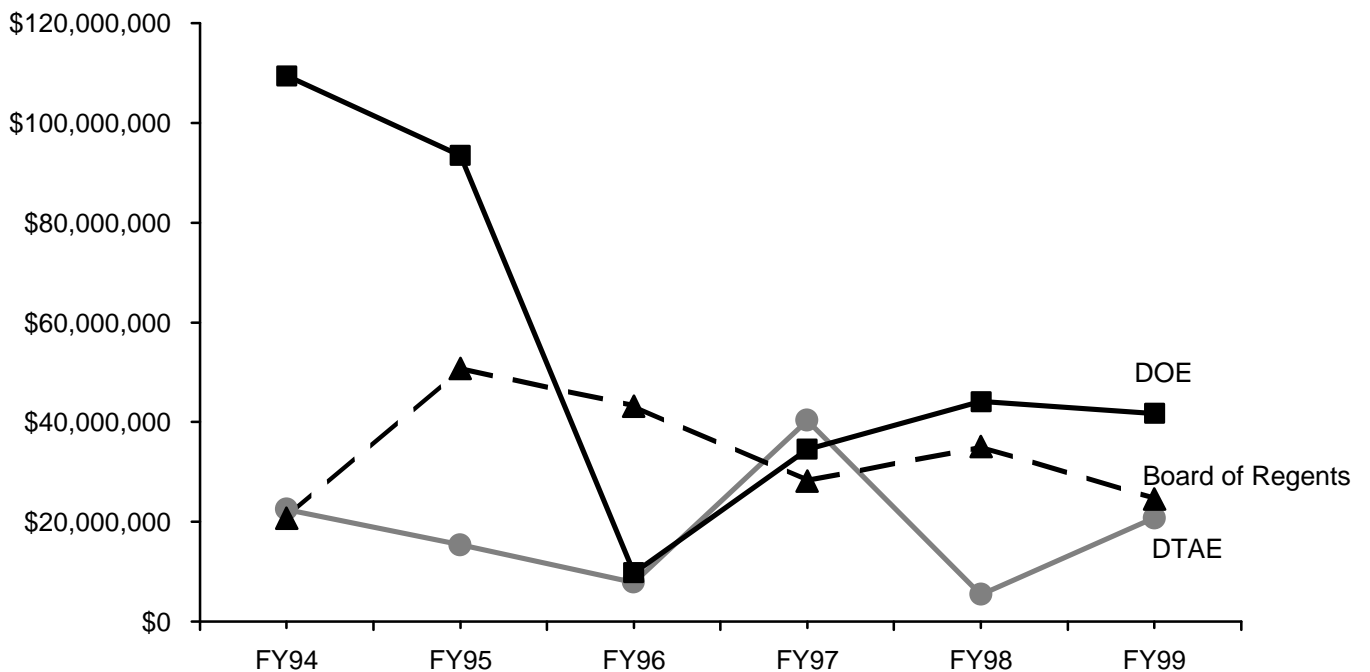

### Technology Programs as a Percentage of the FY99 Lottery Budget

The Georgia Lottery for Education provides funds to purchase technological equipment for Georgia public schools, public colleges and universities, and other educational institutions, to repair and maintain this technological equipment, and to train teachers, professors, and other personnel in the use of technology. In the first year of the lottery, the largest percentage of net lottery proceeds went to technology – more than prekindergarten, scholarships, and construction. That percentage remained high in fiscal year 1995, but has fallen considerably since that time. In fiscal year 1999, technology was allocated a larger share of lottery funds than construction, but much less than the prekindergarten program and the HOPE scholarship program.

Technology funds have been allocated to four agencies in the past: the Professional Standards Commission, the Department of Technical and Adult Education (DTAE), the Board of Regents, and the Department of Education (DOE). Figure 9 shows the pattern of allocation to each agency for technological purposes.

**Figure 9. Technology Funding by Agency**

## 28 - Report on the Expenditure of Lottery Fund

In the first two years of lottery funding, the vast majority of technology funds flowed through the Department of Education. In fiscal year 1996, technology funding for all agencies dropped considerably. The following year, the Department of Education and the Department of Technical and Adult Education, experienced a rise in their level of funding over the previous year. The level of funds has continued to fluctuate since that time. In fiscal year 1999, the Department of Education received almost twice as high an allocation as DTAE and BOR, although both of the latter agencies were appropriated more than \$20 million. The Professional Standards Commission, which received lottery funds to strengthen technology training in colleges of education, was funded in fiscal year 1995 only.

The following section details how lottery funds for technology were allocated to the Department of Education, the Board of Regents, and the Department of Technical and Adult Education in fiscal year 1999.

### Department of Education Technology Programs

The Department of Education received technology funds in fiscal year 1999 for various programs. Table 20 shows how much money was appropriated to each program.

**Table 20. Department of Education Technology Programs, FY99**

Computers in the Classroom	\$ 26,787,000
Financial and Management Equipment	\$ 9,006,730
Applied Technology Labs	\$ 3,300,000
Assistive Technology Grants	\$ 2,000,000
Education Technology Centers	\$ 660,000
<b>TOTAL</b>	<b>\$41,753,730</b>

Almost \$27 million in lottery funds was appropriated in fiscal year 1999 to purchase technology hardware and software for K-12 schools. Table 21 details how these funds were distributed to school systems in fiscal year 1999.

In addition to the Computers in the Classroom funding, lottery monies are also allocated to local school systems through the Applied Technology Lab program. As the state of Georgia transforms its industrial arts program to a technology education program, local K-12 systems are renovating their vocational education laboratories for technology modules. The local systems construct the laboratories themselves, and then apply to use lottery funds to purchase the equipment necessary to supply these laboratories with state-of-the-art technology modules that introduce students to the variety of industrial uses for technology. In fiscal year 1999, \$3.3 million was allocated to this program. Table 22 details the distribution of these funds to school systems.

**Table 22. Applied Technology Labs, FY99**

In addition to purchasing technological equipment, the Department of Education also uses lottery funds to train school administrators and teachers to utilize that equipment. Educational technology centers throughout the state provide this necessary training. In fiscal year 1999, thirteen education technology centers were awarded lottery funds for this purpose. Table 24 shows the distribution of these funds to the centers, which include colleges and universities, regional education service agencies (RESAs), and the Fort Discovery National Science Center in Augusta.

**Table 24. Education Technology Centers, FY99**

<b>Technology Centers</b>	<b>\$ Amount</b>
Albany State College	\$ 56,500

Valdosta State College	\$ 56,500
<b>TOTAL</b>	<b>\$ 660,000</b>

In addition to the programs mentioned, the Department of Education was allocated more than \$9 million for financial and management equipment in fiscal year 1999. This equipment will be used to implement a system for financial accounting and analysis and a system to track student information.

**Board of Regents Technology**

The Board of Regents has received lottery funds for various technology programs over the last six years. Table 25 details how these lottery funds were allocated for the last three years, fiscal year 1996 to fiscal year 1999. The majority of funding has gone to the Regents Trust Fund, which provides funding for technological equipment that is too expensive to be purchased from a single year's budget.

† Formerly DeKalb College

In fiscal year 1999, the Board of Regents received close to \$7.5 million for special funding initiatives. The special funding initiatives were Connecting Teachers and Technology, Connecting Students and Services, the GALILEO Statewide Library, Internet Connectivity, the P-16 Initiative, and PREP-it-up. Tables 30-37 show how this money was disbursed to each of the following Board of Regents institutions.

Waycross College	\$ 53,000
<b>TOTAL</b>	<b>\$905,000</b>

† Formerly DeKalb College

In addition, \$1,568,000 was appropriated to the Office of Information and Instructional Technology (OIIT) for Connecting Teachers and Technology. Another \$527,000, the full amount allotted to this funding category, went to OIIT for Connecting Students and Services. The full amount for the following funding categories was also allocated to OIIT: \$1,939,000 for GALILEO (statewide library), \$2,219,000 for Internet Connectivity, and \$42,000 for the P-16 Initiative.

The remaining Special Funding Initiative for fiscal year 1999 is the Post-secondary Readiness Enrichment Program (PREP), an academic and outreach project of P-16 for at-risk middle schoolers. The program is operated in public middle schools, and is run by a collaboration of University System of Georgia institutions and technical institutes. The following table shows how funds were allocated to University System of Georgia institutions in fiscal year 1999.

† Formerly DeKalb College

**Department of Technical and Adult Education Technology**

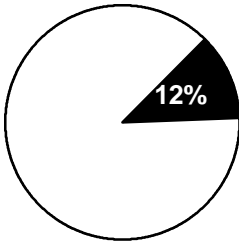

In the first three years of lottery funding, the amount allocated to the Department of Technical and Adult Education decreased each year. In fiscal year 1997, DTAE received more technology funding than in the three previous years. In fiscal year 1998, technology funding dropped to an all-time low of \$5.4 million, but then jumped back to more than \$20 million in 1999, all of which was allocated to Equipment for Technical Institutes to replace obsolete equipment. Table 38 shows how this money was distributed to the technical institutes across the state.

**Table 38. Technology Funds for Replacement of Obsolete Equipment, Fiscal Year 1999**

<b>TOTAL</b>	<b>\$26,809,346</b>

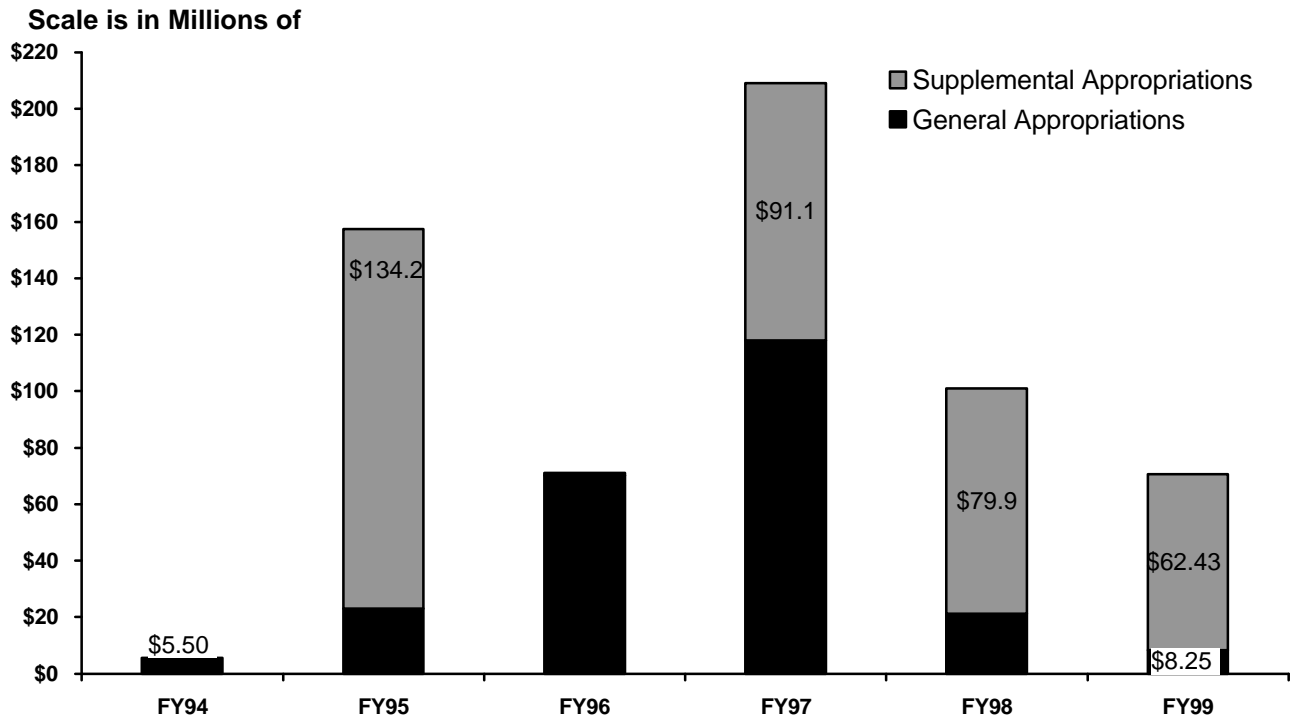

### Construction Programs

#### Construction Programs as a Percentage of the FY99 Lottery Budget

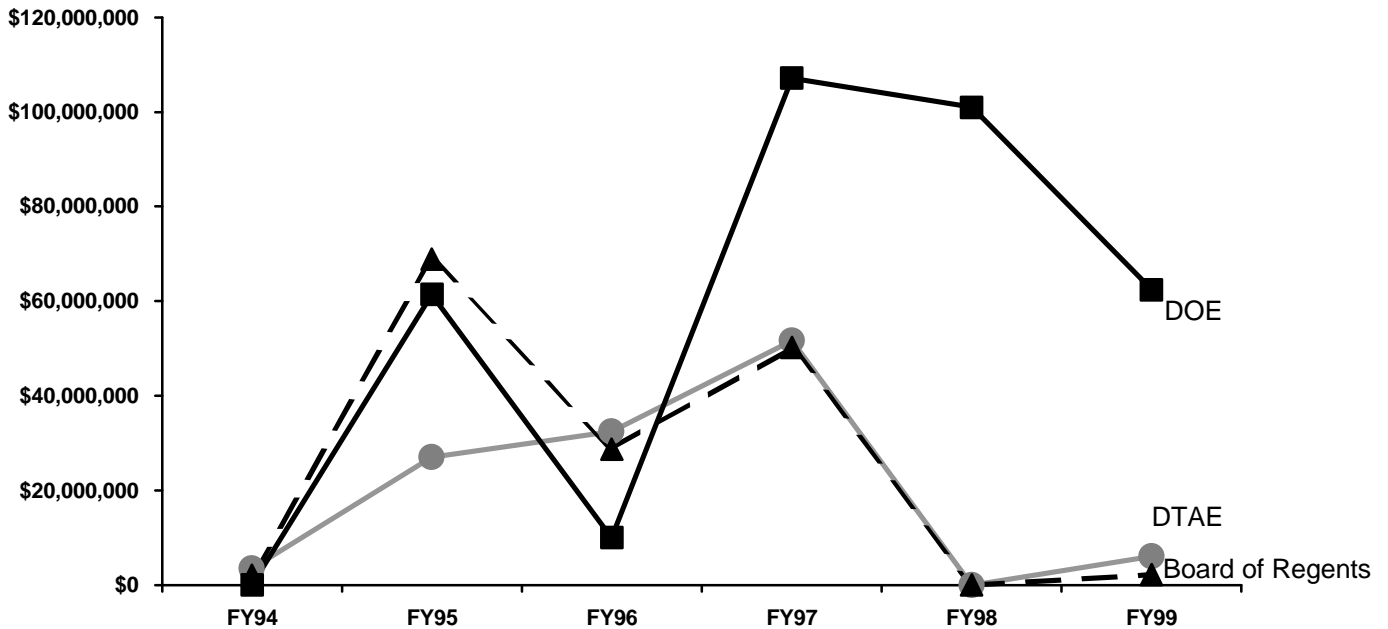

As Figure 10 illustrates, the amount allocated to construction has waxed and waned from year to year. While fiscal year 1997 saw the largest allocation, with over \$209 million, in fiscal year 1999, construction expenditures fell to \$70.7 million.

**Figure 10. Construction Allocations by Fiscal Year**

Typically, lottery funding for construction projects has been distributed among three different state agencies, the Board of Regents, the Department of Technical and Adult Education (DTAE), and the Department of Education. For fiscal years 1994 to 1997, the amounts going to the Department of Education and the Board of Regents for construction projects have matched the rise and fall in overall construction allocations. However, during this same period, the Department of Technical and Adult Education has had a steady increase in the amount of money for construction. In fiscal year 1998, only the Department of Education received lottery funds for construction. In fiscal year 1999, all three agencies were allocated lottery funds for construction, but the Department of Education received far more than the other agencies. Figure 11 shows lottery-funded construction allocations for each fiscal year.

Figure 11. Construction Allocations by Agency by Fiscal Year

**Department of Education Construction Allocations**

In fiscal year 1999, the Department of Education received \$62,438,547 for capital outlay projects. This funding was distributed to public school systems for construction projects. Table 39 details how this money was distributed to school systems across the state.

**Table 39. Capital Outlay Projects, FY99**

School Systems	\$ Amount

## 42 - Report on the Expenditure of Lottery Fund

In addition, \$1.5 million was allocated in fiscal year 1999 to the Fort Discovery National Science Center in Augusta.

### Board of Regents Construction Allocations

In fiscal year 1999, close to 15% of the Equipment, Technology and Construction Trust Fund was dedicated to construction expenditures within the Board of Regents. Of the \$15 million allocated to this fund, \$2,250,000 went to construction projects.

### Department of Technical and Adult Education Construction Allocations

In fiscal year 1999, \$6 million of lottery funds was appropriated to the Department of Technical and Adult Education (DTAE) for repairs and renovations of technical institutes. Lottery monies were not allocated to this cause in fiscal year 1998, but almost \$5.3 million was spent for repairs and renovations in fiscal year 1997. Table 40 details how the funds were distributed to technical institutes in fiscal year 1999.

**Table 40. Repairs and Renovations, Fiscal Year 1999**

North Georgia Technical Institute	\$3,600,000
South Georgia Technical Institute	\$2,400,000
<b>TOTAL</b>	<b>\$6,000,000</b>
