# Introduction

## Purpose

Deemed a national treasure by the United States Congress, jazz is a unique American art form, and its musicians, the keepers and producers of this treasure, are recognized the world over as America's cultural ambassadors. Yet, artists who make a living as jazz musicians face numerous challenges. Despite high-profile projects and activities, such as Jazz at Lincoln Center's *Essentially Ellington* high school band competition, the Monterey and other jazz festivals, or the *Jazz* documentary by Ken Burns, jazz music does not reach as vast an audience as other music forms, making it challenging to maintain and continue this treasure.

Recognizing the importance of jazz and its artists, the National Endowment for the Arts (NEA) in 2000 commissioned a study of jazz musicians in four U.S. metropolitan areas—Detroit, New Orleans, New York, and San Francisco. The statistical information gathered in the study, will be used to help devise strategic ways to further the work of jazz artists. These four cities were chosen for their geographic diversity and their historical and current relationships with jazz. The NEA had two purposes:

- To understand the environment for jazz in each of the study cities by documenting both the jazz artists and their resources and support systems.
- To develop a detailed needs assessment from jazz artists themselves by collecting data documenting their professional lives and most pressing needs.

This study provided an opportunity to examine the working lives of jazz musicians in a systematic way and to produce quantitative and qualitative information about the jazz community, the professional lives of jazz musicians, and jazz's place in the music industry.

Jazz musician and educator Dr. Billy Taylor formed and chaired an advisory board to guide the project as it developed. The study also created a focus group of artists, managers, and educators, and numerous jazz practitioners generously gave their time to help advise this project. The study was conducted in two parts: a survey of musicians belonging to the American Federation of Musicians

(AFM) and a Respondent-Driven Sampling (RDS) survey of jazz musicians. This volume focuses on the AFM survey of jazz musicians in four cities. The results of the RDS survey can be found in Volume III. Both it and the Executive Summary, Volume I, include results from three cities—New Orleans, New York and San Francisco.

This study aims to support the continuing growth and development of jazz and the musicians who create it. Jazz musicians as a group, however, do not constitute an easy subject for formal study. Indeed, for decades it has been difficult simply to define the word "jazz" itself. "It cannot safely be categorized as folk, popular or art music," states the *New Grove Dictionary of Jazz*, "though it shares aspects of all three." This study relied on the musicians themselves to indicate that they played jazz music.

To study jazz musicians, it is important to understand the idiosyncratic nature of the music. As A.B. Spellman indicated in his introduction to the NEA publication, American Jazz Masters Fellowships 1982-2002, jazz was "built on the discipline of collective improvisation...which allowed for maximum expression of the individual within the context of the group." The group, however, is often an ever-changing one. Unlike classical music, with orchestral members staying together for decades, or even rock, where more often than not musicians make their music as a group, jazz musicians often look for jams or gigs as individuals rather than as part of a group. Indeed, a jazz group like the Modern Jazz Quartet is remarkable for its longevity as much as its music.

Working as an individual musician can be more trying financially, in many ways, than working as a group. This seems especially true in a musical form that, while critically acclaimed as a national treasure, does not sell many tickets or CDs. In fact, jazz accounts for only four percent of annual recording sales in the United States. It can be even more difficult for emerging jazz artists to make a living with their music; reissues of classic jazz recordings have consistently outsold all but the most popular contemporary jazz artists. Even that amount is somewhat inflated by the inclusion of pop artists in the jazz category.

Institutional support for jazz exists but is small. A few state and regional arts agencies and some nonprofit foundations offer grants to individual musicians, but often at low amounts; in this study, of the musicians who received grants, more than 90 percent received \$5,000 or less. The Lila Wallace-Readers Digest Fund and the Doris Duke Charitable Foundation have shored up institutions and endowments of jazz presenters, created networks in the jazz community, and provided venues for jazz performance. The National Endowment for the Arts has assisted these organizations with some of their programs—such as the joint program with the Doris Duke Charitable Foundation called JazzNet, which furthers jazz creation, presentation, and education with 14 regional jazz presenters. This program ended in 1996, when Congress prohibited awarding direct grants to individual artists, except for creative writing and honorary awards in the folk and traditional arts and jazz. The honorary award in jazz, the American Jazz Masters Fellowship, specifically sponsors jazz musicians who are established and have achieved mastery of their art. Emerging artists have little access to such support.

The data obtained through this study are crucial to a better understanding of the environment in

which jazz musicians operate. By presenting a clearer picture of the working life of the jazz artist, this study will help the NEA develop and fund programs that address the concerns and challenges jazz musicians face in creating and playing their music.

## Survey Background and Method

In an occupational sense, jazz musicians are difficult to identify. While national-based surveys such as the Current Population Survey, conducted by the U.S. Census Bureau, are used to estimate the labor force by occupation, the occupation categories are not detailed enough to distinguish jazz musicians from the larger classification of arts, design, entertainment, and media occupations, or even from the more specific category of musicians and composers. In addition, the national-based surveys do not cover detailed questions or subjects germane to the study of jazz musicians.

Given these shortcomings, the National Endowment for the Arts and the Research Center for Arts and Culture partnered with the American Federation of Musicians, AFM Local 802, the David and Lucile Packard Foundation, the Grammy Foundation, the American Federation of Musicians, the New Orleans Jazz & Heritage Foundation, and

## **Findings**

- → The top instruments played by jazz musicians are piano/keyboard, trumpet and drums.
- → 58.4 percent of the respondents earned their major income as musicians in the last 12 months and 53 percent earned all their income from their music. On average, 43.9 percent of this income came from work as a jazz musician. For Detroit, only 35.3 percent came from jazz work and in New Orleans, 57 percent.
- → 36.3 percent have a college degree and another 28.7 percent have a graduate degree.
- → 64.7 percent think they should be paid for people downloading their music on the Internet.
- → 74.9 percent received music-related training in the city or region where they now reside. This is highest in Detroit (80.3 percent).
- → 89 percent have health coverage; this is highest in Detroit at 92.1 percent. Only 18 percent obtained it from the musicians union, only 7.8 percent in Detroit.
- → 63.1 percent have life insurance, a high of 80.3 percent in Detroit and a low of 52.3 percent in San Francisco.
- → 77.3 percent have a retirement plan; 82.3 percent of San Francisco musicians have such a plan.
- → 61.0 percent earned \$40,000 or less as a musician in 2001. 7 percent earned over \$100,000.
- → 31.7 percent played over sixteen jobs a month and 40.7 percent play with more than four different groups.
- → 84.1 percent are male; 71.9 percent are white.

the Nathan Cummings Foundation to study and report findings on jazz musicians. Since a national-based survey was beyond the means of the NEA and its partners, the study was restricted to four metropolitan areas¹: Detroit, New Orleans, New York and San Francisco.

We selected a random sample of approximately 15 percent of the membership of each local of the American Federation of Musicians in each of the metropolitan areas under study. Since the union does not distinguish between jazz and non-jazz musicians, both types of members participated in the survey. After sending an advance letter telling musicians about the survey, we administered a 68-question telephone questionnaire on a total of 2,500 musicians and received a 78.5 percent response (1,963).

The union locals gave full participation to this project: Detroit (local 5), New Orleans (local 174-496), New York (local 802), and San Francisco (local 6). There is a long history of union involvement with jazz musicians, not all of it easy. While union participation in all professions is declining, the musicians' locals are contemplating methods for their own survival. This is sometimes complicated by the fact that union musicians in one city can join another union local (New York, for example) with a higher established minimum wage and then quit their original local.

#### Characteristics

Some characteristics of the larger jazz community made the isolation of four cities particularly important since they represent different geographic sections of the country, histories for jazz musicians, levels of resources for jazz musicians, racial and ethnic balances, and social and economic environments. By studying jazz artists in such diverse locations, we hope to represent more accurately the range of-situations for U.S. jazz musicians.

- The diversity in styles of jazz musicians often play to different audiences, venues, and media with different levels of exposure
- Commercial (record companies and recordings, venues, radio, television and technology in jazz vs. non-commercial

- support systems (foundations, corporations, government) as well as the impact of tourism, festivals and heritage
- The mobility of jazz musicians who tour, both nationally and internationally
- The tendency of jazz musicians to play in many different performance groups
- Four very different social and economic environments with very different responsibilities and resources of union locals, jazz-related foundations, and community organizations

#### **Organization of Report**

The report is organized in four sections, presenting findings on demographics, income and employment-related information, other issues including professionalism, copyright, health and welfare protection, musical styles and future goals of jazz musicians, and a summary and conclusions. Appendices include definitions and contexts for each metro area studied, the distribution of responses by metro area, the advance letter, the response by metro area, an explanation of the method used to estimate the number of jazz musicians and a directory of resources for jazz musicians in each metro area.

Since the union does not distinguish between jazz and non-jazz musicians, both were included in the survey. The charts in this report show the aggregate results of all four cities combined, plus each city's results, separated into jazz and non-jazz musicians.

Jazz artists exist in a kind of no-man's land where earning a living from jazz is almost impossible, and where even individual support such as the American Jazz Master Fellowship awards from the National Endowment for the Arts are not enough to offset the hand-to-mouth existence of many jazz musicians. Neither has jazz been the recipient of significant philanthropic giving, although major initiatives by the Lila Wallace-Readers Digest Fund and the Doris Duke Charitable Foundation are happy exceptions. These programs have shored up institutions and endowments of jazz presenters, created networks in the jazz community, and provided money for more venues, performances and jazz compositions.

<sup>&</sup>lt;sup>1</sup> See Appendix A for definitions and background descriptions of the metropolitan areas used and Appendix B for a context of each of the cities.

# Chapter I. Demographics\*

## Age, Gender, Marital Status

Eighty-four percent of jazz musicians are male and 16 percent are female; 53 percent of non-jazz musicians are male and 47 percent are female. The mean age for jazz musicians is 53; the median is 50. For non-jazz musicians the mean age is 50 and the median 47. These ages are somewhat older than those for other union performers we have studied. Almost three quarters of the respondents are white (72 percent jazz and 85 percent non-jazz), 18 percent jazz and 5 percent non-jazz are African-American and about 2 percent jazz and 1 percent non-jazz are Hispanic or Latino.

The age range for jazz musicians was from 16 to 92; the age of non-jazz musicians ranged from 23-90.

It is also interesting to note that almost half the respondents (46 percent jazz and 50 percent non-jazz) claim only themselves as dependents with another 29 percent jazz and 26 percent non-jazz claiming two dependents.

Twenty percent of jazz and 23 percent non-jazz musicians are single; 62 percent (jazz) and 60 percent (non-jazz) are married.

Eighty-four percent of the jazz musicians who are members of the American Federation of Musicians are male, 72 percent are white, and their networks consist primarily of other white jazz musicians, followed by African-American jazz artists.

#### Education

Twenty-three percent of jazz and 12 percent of non-jazz respondents have some college; 36 percent of jazz and 37 percent of non-jazz musicians have a college degree and an additional 29 percent of jazz and 43 percent of non-jazz musicians have a graduate degree. In 1997 in the Research Center's Information on Artists study, union actors in ten U.S. cities were among the artists studied. Of the AEA actors who responded:

- >18 percent had some college
- >45 percent had a college degree
- >29 percent had a graduate degree.

#### Please indicate your highest level of formal education

|   | Number  | 346   | 49          | 90    | 8           | 62         | 6           | 147   | 21          | 47          | 14          |

<sup>\*</sup> The confidence level for this survey is 95 percent with a 5 percent margin of error. Figures do not necessarily add up to 100 percent due to multiple answers and don't know/refused. In the New Orleans metro area, the majority of respondents resided in Orleans Parish; in Detroit in Wayne and Oakland Counties; in San Francisco, San Francisco and Alameda counties, followed by San Mateo, Contra Costa and San Mateo Counties; and in the New York Metro area, New York County (includes Manhattan) and Kings County (includes Brooklyn). (See Appendix).

| college degree                                    | Percent | 36.3% | 37.4% | 27.9% | 34.1% | 33.1% | 33.3% | 39.0% | 39.3% | 42.2% | 37.8% |

While the number of union musicians that have college degrees is about 10 percent lower than for union actors, 28.7 percent of union jazz musicians, like union actors, and 43.2 percent of union non-jazz musicians have graduate degrees.

Twenty-six percent of both kinds of musicians had conservatory or professional school training which did not grant a degree and 79 percent of jazz

and 78 percent of non-jazz musicians studied with private teachers.

#### Did you receive technical or professional training in the arts?

# Chapter II. Employment and Income-Related Findings

# **Employment**

Fifty-eight percent of the jazz musician respondents earned their major income in the last 12 months as musicians, 12 percent in non-music related occupations and another 10 percent as music teachers and 1 percent as jazz teachers. Fifty-seven percent of the non-jazz musicians earned their major income in the last 12 months as musicians, 11 percent in non-music related occupations, 12 percent as music teachers.

Just over half of the union musicians earned their major income in the last 12 months as musicians. Forty-three percent of jazz and 48 percent of non-jazz musicians are employed full-time in the music business. And no one is unemployed.

Forty-three percent of jazz and 48 percent of non-jazz musicians are employed full-time in the

music business; 36 percent jazz) and 23 percent (non-jazz) respectively are employed as full-time freelancers in the music business and 22 percent (jazz) and 28 percent (non-jazz) as part-time freelancers in the music business. No one is unemployed and 14 percent (jazz) and 9 percent (non-jazz) are retired.

Thirty-two percent of jazz and 20 percent of non-jazz respondents play more than 16 different musical jobs per month.

#### Income

The extremes of income from music are evident. As noted above, 58 percent of jazz respondents and 57 percent of non-jazz respondents earned their major income in the last 12 months as musicians, with New York (68 percent) being the highest for jazz musicians, and New York (63 percent) and San Francisco (62 percent) ranking the highest for non-jazz musicians.

#### From which occupation did you earn your major income in the last 12 months?

Thirty percent of jazz and 34 percent of non-jazz musicians earned over \$40,000 from their work as musicians in 2000. Incomes were highest in New York (43 percent of jazz and 47 percent of non-jazz) with 12 percent of New York jazz and non-jazz musicians earning over \$100,000. Twenty-two

percent of jazz and 26 percent of non-jazz musicians earned \$7,000 or less as musicians in 2000. Twenty-two percent of the jazz and 19 percent of the non-jazz respondents earned between \$20,001 and \$40,000 as total income from work as a musician in 2000.

I am going to read a list of income ranges. Please let me know when I get to the category that describes your total income from work as a musician from all sources for 2000 before taxes.

For almost half of the jazz musicians income (44 percent) came from work as jazz musicians, in other words, not playing weddings, bar mitzvahs and all the other musical jobs jazz musicians do to survive.

For 85 percent, these earnings covered music-related costs. For three-quarters of all musicians,

costs of music-related supplies, equipment, capital improvements, publicity and marketing, travel and cartage, recording and management costs, and instrument insurance are less than \$2,500. Thirty-four percent spend \$500-2,500 annually and another 14 percent spend \$2,500-5,000 annually on their instruments.

#### Did this money cover your music-related costs in 2000?

Almost half (49 percent) the jazz and over half (52 percent) of non-jazz musicians earned over \$40,000 total gross income as individuals from all sources including their work as musicians in 2000,

with 11 percent (jazz) and 12 percent (non-jazz) earning over \$100,000. Six and 10 percent of jazz and non-jazz musicians, respectively, earned under \$12,000 as individuals from all sources in 2000.

The mean total household gross income in 2000 before taxes for jazz musicians is \$63,496; the median is \$70,000. For non-jazz musicians the mean is \$70,493 and the median is \$70,000.

The mean total income as an individual from *all* sources including work as a musician in 2000 before taxes for jazz musicians is \$49,847; the median is \$50,000. For non-jazz musicians the mean is \$50,894 and the median is \$50,000.

The mean income as an individual from work *as a musician* in 2000 before taxes for jazz musicians is \$33,486; the median is \$30,000. For non-jazz musicians the mean is \$36,516 and the median is \$30,000.

I am going to read a list of income ranges. Please let me know when I get to the category that describes your total income as an individual from all sources in 2000 before taxes, including your work as a musician.

# Music-Related Grants and Fellowships

Only 17 percent of jazz and 2 percent of non-jazz musicians applied for a grant as a jazz or aspiring musician; the highest percentage of applicants came from New York with 25 percent of jazz respondents.

Of 268 respondents, 36 percent or 97 jazz artists received grants from the NEA; 8 percent (3) of non-jazz artists did. Fourteen percent of both kinds of musicians received foundation grants and 12 percent (3) of jazz and 8 percent (3) of non-jazz respondents received state agency grants in 2000.

#### Have you applied for a grant or fellowship as a jazz or aspiring musician?

Of the 16 percent who received grants or fellowships (it would appear that not all who received grants applied for them), 93 percent received between \$0 and \$5,000. This range was the

same for over 85 percent of those who received music royalties or residuals, public assistance (welfare) and/or unemployment benefits in the year 2000.

#### How much did you receive in 2000 before taxes in each of the following areas?

| •                         |         |       |             |       |             |       | O           |       |             |            |             |

Sixty-three percent of those who play or sing jazz music consider themselves professional jazz musicians. This is highest in New Orleans (73 percent) and New York (64 percent) and lowest in

Detroit and San Francisco (57 percent). In our 1997 Information on Artists study, 96 percent of the Actors' Equity Association (AEA) union member respondents considered themselves professionals.

#### Do you consider yourself a professional jazz musician?

Initially, we separated the data for those jazz musicians who said they considered themselves professionals and those who said they did not, even though in our own definition we considered union membership a sign of professional status. There was no significant difference between the two data sets, so we combined them for analytical purposes.

### Retirement, Health Coverage

For routine health care 55 percent of the musicians surveyed go to private physicians, 45 percent of jazz and 48 percent of non-jazz musicians go to an HMO, and 12 percent (jazz) and 8 percent (non-jazz) receive routine health care from a hospital outpatient department. Roughly one-third of all respondents have received injuries from occupational hazards in their music-related work (for example, carpal tunnel syndrome, hearing problems, etc.).

#### Where do you go to obtain routine health care?

Eighty-nine percent of jazz musicians and 93 percent of non-jazz musician respondents have some health or medical coverage: 43 percent of the jazz and 41 percent of the non-jazz musicians from an HMO, 18 percent of jazz and 25 percent of non-jazz respondents from a PPO, 19 percent of jazz and 16 percent non-jazz musicians from a personal policy through a private insurance company (some

respondents have more than one type of coverage).

Nine percent have disability coverage for loss of income; 11 percent have some other group insurance policy and 13 percent have some other kind of health insurance. These include: Medicare, the military, national health care from other countries. (American Association of Retured Persons).

Thirty-seven percent of the jazz musicians obtained their health coverage themselves, as did 30 percent of the non-jazz musicians. Fourteen percent obtained it through their mates. Thirty-six percent of the jazz musicians and 44 percent of the non-jazz musicians, obtained this coverage through their employers.

Only 18 percent of jazz and 14 percent of nonjazz musicians obtained health coverage through their musicians' union. For jazz musicians this ranged from a low of 4 percent in New Orleans to a high of 29 percent in New York. For non-jazz musicians this ranged from a low of 1 percent in Detroit, to a high of 27 percent in New York. In the 1997 RCAC Study of Actor's Equity Association members, forty-three percent of our 1997 AEA actors obtained their health coverage through unions.

The chart below represents the answers to the questions, "Who pays for this insurance and what percentage do they pay?" Please note that there is

obviously a combination of payment sources, so figures add up to much more than 100%.

| WHO PAYS                       |        |          |        | PERCENTAGE<br>THEY PAY |

This chart tells us that half of the jazz and close to half of the non-jazz musicians pay for their health insurance mostly themselves with a third getting payments from their employers. Fewer than 7

percent receive payment for health insurance by the musicians' union. For this small percentage, the union covers at least 62 percent of the cost.

By contrast, 18 percent of the union actors in the

RCAC's 1997 study received some payment for health insurance from the Actors' Equity Association (AEA).

A September 2001 report by the Urban Institute (http://www.urbaninstitute.org/), "Workers Without Health Insurance: Who Are They and How Can Policy Reach Them?, reports that, of the 16 million uninsured workers in the United States, those most likely to lack health insurance include workers in small firms, low-wage earners, part-time workers and those employed for a short-tenure. Many musicians fit into these categories. Access to health insurance is easier for whites through their spouses and workers in large firms more likely to offer and

enroll them in employer-sponsored health insurance. Since jazz musicians report working many gigs with many different groups, it is likely they are denied such access.

Sixty-three percent of jazz and 60 percent of non-jazz respondents have life insurance, much higher than the 1997 AEA actors (38 percent). Sixty-nine percent of jazz and 61 percent of non-jazz musicians obtained it themselves; for 22 percent (jazz) and 30 percent (non-jazz) life insurance was obtained through employers and 17 percent of jazz and 16 percent of non-jazz musicians, obtained it through their musicians' union.

#### Do you have life insurance?

Seventy-seven percent of jazz and 79 percent of non-jazz musicians have at least one retirement plan (67% of the actors in the 1997 AEA study had this). 53 percent (jazz) and 50 percent (non-jazz) obtained it themselves; 36 percent (jazz) and 33 percent (non-

jazz) obtained this through the musicians' union. For 44 percent (jazz) and 51 percent (non-jazz) their employer pays, and for 23 percent (jazz) and 20 percent (non-jazz) the musicians' union pays.

# Recognition

For 35 percent of jazz and 37 percent of nonjazz musicians, their first professional recognition was their first paid job. Over a quarter of the respondents chose to fill in the blank for "other" to this question and responses varied from "I passed an audition" to high school and community recognition, festivals, writing a song for a major artist, scholarships, recommendations from teachers, joining the musicians' union, to "just playing." These respondents feel generally that their talent has been recognized locally (93 percent jazz; 90 percent non-jazz), nationally (58 percent jazz, 44 percent non-jazz), and internationally (51 percent jazz, 35 percent non-jazz).

#### Through what venue did your first professional recognition occur?

# Copyright and Airplay

Just over half (55 percent) of the jazz musician respondents and only 24 percent of the non-jazz respondents hold copyright in some artistic work of

their own creation (compositions, books, etc). Sixty percent have recorded their own work (40 percent of the non-jazz), 75 percent (jazz) and 73 (percent) non-jazz musicians have had their works recorded by a professional company.

#### Do you hold a copyright in some artistic work of your own creation?

For 81 percent of jazz and 72 percent of nonjazz musicians, their music has received airplay. Almost no one paid to get airplay and 31 percent (jazz) and 24 percent (non-jazz) musicians had help from a promotional person. The musicians' comments offered us insight into this, explaining many different routes to airplay including:

- radio stations featuring local artists, some of which contact the artists
  - college radio stations
  - work with orchestras, chamber music groups
- playing on different artists' records, in movies, commercials, theater companies
  - record companies, advertising agencies
  - live performance broadcasts

# Migration and Touring

As in all other studies of the Research Center, artists seem to have a greater allegiance to their home sites – 73 percent of jazz and 63 percent of non-jazz responding musicians have lived in the

county or parish of their current residence for more than 10 years. With an even higher response than the RCAC's other studies, 75 percent of the jazz and 66 percent of the non-jazz respondents (compared to 62 percent in our other studies) received musicrelated training in the area or region.

#### For how many years have you lived in the county or parish of your current residence?

|                    |         | Total |             | Detroit |             | New<br>Orleans |             | New   | York        | Sa<br>Franc | an<br>cisco |

Musicians are famous for touring, and these respondents are no exception. Almost a quarter (25 percent jazz and 16 percent non-jazz) worked or

performed away from their main residences over 30 times in the previous 12 months.

#### Approximately how many times during the last 12 months did you work or perform away from home?

# Jazz Styles and Instruments

While all kinds of instruments are played, 16 percent of the jazz musicians play piano/keyboard and 11 percent play trumpet; 23 percent of the non-jazz musicians play violin and 11 percent play

piano/keyboard.

On average, jazz respondents spend 2.7 hours a day practicing their music; non-jazz musicians spend 2.5 hours a day; the median for both is 2 hours a day and the mode (the number that appears most often) is 1 hour a day.

#### What is your primary instrument?

Thirty-eight percent (jazz) and 28 percent (non-jazz) spend over 40 hours a week on music or music-related activities, including performing, looking for work, and marketing; in New York this reaches 50 percent for jazz musicians. Sixty-nine percent (jazz) and 63 percent (non-Jazz) spend over

20 hours a week on this.

Jazz musicians play in many styles and our respondents are no exception. The ones mentioned most frequently are contemporary, swing, traditional, mainstream, Latin and rhythm and blues.

Over a third of jazz musicians spend over 40 hours per week on music-related activities; in New York this is as high as 50 percent.

# Future Goals and Qualities Needed for a Career in Jazz

Musicians were asked about the three most important qualities needed to pursue a career in jazz. While talent (23 percent) was the most important quality for being a jazz musician, over 67 percent of the respondents chose the 'Other' category. Although the responses musicians gave in

the 'Other' category for questions about both qualities and goals were much like the choices presented to them in the questionnaire, clearly this was a question where they did not wish to be placed in pre-determined categories. Some of their responses were: creativity, drive, musicality, faith, confidence, punctuality, appearance, dedication, versatility, overall good attitude.

In your opinion, what are the three most important qualities someone needs to pursue a career in jazz?

While reaching a higher level of artistic expression/achievement (11 percent) was the most important goal for the next five years, 62 percent of the jazz musicians chose 'Other.' Comments here included getting out of music, creating a gold

record, making more money, appearing in world premieres by international orchestras, obtaining local, national, international recognition, making a cd, to "Wow, no one ever asked me this before."

#### What are your three most important goals for the next five years as a musician?

# **Chapter IV. Summary and Conclusions**

Over half the union jazz musicians earned their livelihoods in the last 12 months as musicians. Over three-quarters of them are white males. While in New York and San Francisco, the white and black proportions of jazz musicians tend to be similar to each other in numbers, in New Orleans where 60.8 percent of the area's population over age 18 was white, 66.5 percent of the AFM jazz musicians were white. Of all the jazz musicians surveyed, 29 percent have graduate degrees, and 78.9 percent study with private teachers. Seventy-three percent have lived in the county or parish of their residence for 10 or more years, and 74.9 percent received training there. Eighty-nine percent of these musicians obtained health insurance, only 18 percent of them through the union and the union pays for 7 percent; only 17.2 percent obtained life insurance through their musicians' union and the union pays for 13 percent. Thirty-six percent obtained retirement plans through the musicians' union and for 22.6 percent the union pays for their plans.

The American Federation of Musicians, like all protective collective bargaining agencies, seeks to protect its members and ensure them adequate compensation for their work. The major income of 57 percent of the jazz musicians we surveyed was from their music; for 53 percent, all of their income came from work as a musician. No one, in fact, is unemployed. Grants and fellowships play a minor role, with 82 percent of the jazz musicians never having received either.

While 100 percent of the respondents play or sing jazz music, only 63.3 percent of them consider themselves professional jazz musicians. This is highest in New Orleans where 73 percent consider themselves professionals and where 76.3 percent played jazz for money during the last 12 months. The usual corollary between professionalism and income, or between professionalism and union membership, does not seem applicable here.

There are a number of areas of ambivalence from the jazz musicians we surveyed, some of which are similar to all performing arts unions, especially the issue of supply and demand and pay scale.

Jazz musicians who play non-union don't have the union as an advocate for a higher pay scale, but many cannot get enough work being union members, so multiple non-union jobs at a lower scale may yield them more money. On the one hand, musicians advocate the union stepping in to stop low-paying jobs; on the other; they worry that, as a result of union intervention, electronic media will replace live musicians. And 64 percent think they

should be paid for people downloading their music off the Internet.

While the union has both hard and soft referral systems for jazz musicians, in some cities bookings are hard to come by and an artist on a normal career trajectory may saturate his market fairly quickly. In some cities like San Francisco, the local union acts as a booking agent, trying to find actual work for the musicians. In New Orleans, where the black musicians' local and the white musicians' local combined, the locals used to own clubs on Bourbon Street, but the costs of doing this became exorbitant. Available work depends partly on the critical mass of musicians, and also by the attitude towards those musicians' local growth. There is also a feeling that a musician coming to New Orleans, for example, takes three years to break in, then is able to secure premium jobs and after about seven years, the market is saturated, and he gets replaced by younger, emerging musicians. And many musicians are required to travel—24.1 percent performed away from home over thirty times in the preceding year. Especially in New York, musicians say they lose money performing there, and make more on the road. More economically viable gigs could help this situation. Time and again, musicians, even those who thought the music itself was thriving, complained of fewer and fewer places to play. They also wanted more inviting performance spaces, in contrast to bars, clubs, and basements. Expansion of venues to community centers, hospitals and other public venues and more attention by the media

would get the word out.

In some cities, the union has been weakened by the fact that musicians can belong to more than one local and can, for example, go to New York where a higher union minimum has been established, and then quit their original union local. In New York, too, the union had a profound effect on the development of jazz. Intimately tied up with the licensing of jazz clubs, the union often found itself caught between being a champion of freedom of expression, minimum wage and royalty payments and the more pragmatic aims of developing legitimate venues to play in.

But jazz musicians in this study are highly educated, with 73.1 percent living in the same county for over ten years, much higher than the general population, and 79 percent having studied with private teachers. In this primarily white, primarily male union membership, 89 percent have health care, 61 percent of those through an HMO or a PPO. In this population, 31.9 percent have suffered injuries from occupational hazards in music-related work. While there are a number of performing arts medicine clinics around the U.S. (and one that specifically targets jazz musicians in Louisiana) frequently musicians do not like to admit health problems received on the job for fear of the effect on future employment. There are some emergency relief agencies like Music Cares and the Musicians Emergency Fund that offer financial support to musicians who have fallen prey to illness. These agencies have proven themselves to be invaluable to a number of artists who have used their services to

weather emergency conditions and more are needed.

Only 18 percent obtained health and medical coverage through the union and the union pays for only 7 percent of the health coverage. This compares negatively with our 1997 figures for Actors' Equity Association, where the union paid for 18 percent of the actors' coverage. A much larger percent of the musicians have life insurance (63.1 percent) and retirement plans (77.3 percent), with 13 and 22.6 percent, respectively, paid by the union.

Even with the challenges described above, 93.4 percent of jazz musicians feel their talent has been recognized locally, and over half feel that it has been recognized nationally and internationally. A majority of respondents, 84.8 percent, are satisfied or very satisfied with their careers. Some artists do not think of their work on a career track; careers, in fact, are a fairly modern phenomenon—in the 1930s and '40s people just played music. Some feel they've been "kept out of the market" and overlooked for younger talent. Additionally, trepidation at using computers and other tools of the trade disadvantages older musicians. Programs in music schools teaching jazz musicians about the business side of their career would help them survive tough competition.

The most important quality identified for pursuit of that career is talent. Future goals for the next five years include reaching a higher level of artistic achievement and making a living from jazz, and answers ranged from seeking more recognition to making a gold record to wanting to be heard by the public, the jazz community, and the union.

# Appendix B. Metropolitan Areas Context

In order to implement policies and programs from the data gathered on jazz musicians, it is important to understand the context in which these musicians live. This section presents some brief background of venues, distribution mechanisms, education, supporters and funders, and media outlets in each metro area. An additional section provides actual resources in each location where jazz musicians can go for assistance.\*

There are literally hundreds of jazz related venues that showcase this music all over the United States. Festivals, nightclubs, community centers, churches and national performing arts organizations all offer musicians the opportunity to be heard. Long a key part of the lore and personal experience of every jazz musician, young or old, is the mentoring of master to apprentice and the oral transmission of musical artistry and knowledge formally and informally, through these venues and through inventions of their own. Resilience is key. The description that follows only touches on the fabric of the geographic locations that produces, displays, advertises, sells and supports these musicians. It does not pretend to illuminate the deep and substantial history of the players or the places.

While jazz exists largely in the profit sector, within the past decade there have been two major grantmaking initiatives devoted to jazz that have had major national significance: The Lila Wallace-Reader's Digest \$24 million National Jazz Network and the \$6.7 million Doris Duke Charitable Foundation jazz initiative. The National Jazz Network and affiliated programs was launched in 1990 after a year long study of jazz in the United States conducted by the New England Foundation for the Arts and, the now defunct National Jazz Service Organization. The study resulted in the funding of jazz presenters and programming administered by regional arts agencies, the Smithsonian's traveling jazz exhibitions, and jazz programming at National Public Radio. The programs continued until 1998 when the foundation decided to move away from discipline specific funding.

Associations that work to track the progress of the jazz form are dominated nationally by the

International Association of Jazz Education (IAJE), The National Association of Recording Arts and Sciences (NARAS), The Recording Industry Association of America (RIAA), Broadcast Music, Inc. (BMI), and the American Society of Composers, Authors and Publishers (ASCAP).

There are a number of organizations that endeavor to meet the less ostensible needs of the national jazz community. These include The American Federation of Jazz Societies (AFJS), which acts as a kind of watchdog organization. It monitors Washington legislation and current societal trends that affect the jazz community.

National media coverage for jazz is spearheaded by the following organizations: National Public Radio (NPR), Public Broadcasting Service, Inc., Americans for the Arts, and Black Entertainment Television (BET). National Public Radio is arguably the key national provider of jazz programming. Among the jazz oriented programs produced by NPR are Jazz Profiles hosted by Nancy Wilson, JazzSet with Dee Dee Bridgewater and Marian McPartland's Piano Jazz.

#### Detroit

Though the Detroit jazz scene has seen a sharp decline in popularity since the 1970s, many members of the jazz community compare today's offering of venues to that of the 1950s. Instead of large scale concerts in many different venues, only a few major venues remain and the majority of jazz is performed by small groups in restaurants and small clubs. Few clubs are able to obtain big name performers, therefore most headliners appear at the Ford-Detroit Festival or at Detroit Symphony Orchestra Hall. Ann Arbor is home to a few highquality jazz venues but there is not enough of a demand to support multiple site performances on one evening. While there has been hardship, the Detroit metro area fortunately boasts a number of venues that still draw a good crowd and keep the area jazz scene alive. Among these venues are the above-mentioned Ford-Detroit Jazz Festival, Detroit Symphony Orchestra Hall, University Music Society, SereNegeti Ballroom, Baker's Keyboard Lounge and

Bomac's Lounge.

The Ford-Detroit Jazz Festival, produced by Music Hall Detroit, is the largest free jazz festival in the country. Formerly known as the Ford-Montreux Jazz Festival, it is held every Labor Day weekend, the festival attracts around 750,000 people a year. The festival typically features 20 nationally recognized headliners and places a great deal of emphasis on local artists as well. Along with area professional musicians, the festival includes performances by high school and college groups.

The SereNgeti Ballroom holds concerts produced by the presenting organization, the Jazznetwork. The concerts generally feature big headliners but a local big band takes the stage once a month and educational workshops are held every Thursday night. Baker's Keyboard Lounge has been in operation since 1934. It has hosted jazz giants such as Miles Davis, John Coltrane and Cab Calloway, and now features both local and nationally known artists. The venue is not unionized so both union and non-union artists perform there and both verbal and written contracts are used.

Jazz specialty stores are scarce in the Detroit area and the large chains that carry jazz selections such as Sam Goody, Borders Books and Music and Detroit area chain Harmony House do not offer a large stock. The independent record store Street Corner Music is a major player in the area jazz scene due to its efforts at promoting local and national recording artists.

The only record labels that deal exclusively with jazz are labels that musicians themselves have formed for the sole purpose of recording their work. AACE is owned by drummer Francisco Mora, Jazz Workshop was started by University of Michigan professor Donald Walden and saxophonist Wendel Harrison operates Wenha. School Kids, a label affiliated with the record store of the same name, went bankrupt and thus ended the only operating non-musician owned label in the Detroit area.

There are a number of formal jazz education programs in the Detroit metropolitan area. Wayne State University, Eastern Michigan University, Oakland University, the University of Michigan, the Jazz Network Foundation Education Programs, the Education Department of Detroit Symphony Orchestra and the Southeastern Michigan Jazz Association all offer jazz related programs.

Additionally, the Detroit School District Jazz Education Program oversees jazz programs in 10 area high schools.

Wayne State University has a separate jazz division within its Department of Music. The University of Michigan School of Music houses the Department of Jazz and Improvisational Studies and offers Bachelor of Fine Arts degrees in Jazz, and Contemporary Improvisation and Jazz Studies. The Education Department at the Detroit Symphony Orchestra sponsors the Ameritech Jazz Youth Initiative, a program that provides instructional classes, jam sessions and lectures with legendary jazz artists for students and local musicians.

Most of the current mentors in Detroit are musicians in their 60s, most of them the direct successors of the original architects of the area jazz scene. Marcus Belgrave, who serves on the faculty of Wayne State University, is regularly cited as an integral member of the Detroit area jazz community. Belgrave has repeatedly leveraged his national contacts to bring out of town artists to area venues. Donald Walden has also established himself as an important source of mentoring through his dual role as University of Michigan Jazz Studies professor and record label owner. Musician and educator James Tatum plays a similar role by spearheading the James Tatum Foundation for the Arts, a foundation dedicated to the development of young musicians. Other important figures include pianists Harold McKinney and Dr. Teddy Harris, and drummer Roy Brooks.

The Ford Motor Company Fund is extremely active in area philanthropy with a great portion of its giving earmarked for the arts, culture and education. In its effort to communicate the importance of jazz music, Ford sponsors the Ford-Detroit Jazz Festival, the largest free admission jazz festival in the United States.

Detroit Jazz Online links to the web pages of local musicians, and has an online CD store, and jazz-related articles. The feature most helpful to local musicians, however, is the "Need a Musician" musician request center, which helps area artists find work in the local region.

The major jazz oriented publications in the region are the SEMJA Update, JAM Newsletter, Jazz Quarterly, and the jazz calendar and listings of the Detroit Metro Times.

The two major jazz oriented radio programs in the Detroit metro area are WDET FM 101.9 and WEMU FM 89.1. WDET FM 101.9 is the local NPR affiliate of Wayne State University.

The Jazz Alliance of Michigan was created to provide for the growth of Michigan's jazz community. The Alliance's website contains a list of media resources for jazz, including publications, radio and newspapers, links to recording studios, sound equipment/engineers, venues for jazz, and links to musicians.

#### **New Orleans**

New Orleans is known for its music festivals and the Jazz & Heritage Festival is the grandest of the choices the city has to offer. The New Orleans community recognizes the many benefits of this popular event and the business community joins ranks with the public sector to ensure the festival's success. Jazz specific nightclubs aren't as plentiful as one would expect in the New Orleans area. Of the four major sites, Snug Harbor is the most respected and well received. Ellis Marsalis regularly performs at Snug Harbor with new talent from the area jazz community. The other area mainstays are the Funky Butt, Sweet Lorraine's and Tipitina's, which has gravitated toward presenting more R&B oriented acts at its three locations. Other venues that present jazz acts are the New Orleans Convention Center, the Mahalia Jackson Theater for the Performing Arts, the Masonic Temple Theater, Theater 13, Orpheum Theatre, the Sandbar and the local universities.

There are currently over 200 record labels operating in the city of New Orleans. Of those labels, only a handful are considered true players in the jazz market. The best known of these labels are All for One Records (AFO), Basin Street Records, Louisiana Red Hot Records, and STR Digital Records, all of which are independents.

The New Orleans metropolitan area is home to over 100 record stores with the largest of these stores coming in clusters. Barnes and Noble and Borders Books and Records are both located in unincorporated Jefferson Parish, an area 15 minutes outside of New Orleans, while Tower Records and Virgin Megastore stand within blocks of each other in the French Quarter.

Many of the post-secondary institutions in the New Orleans metropolitan area have developed solid reputations for their music departments. The University of New Orleans, Southern University, Loyola University and Tulane University all have music education programs that have distinguished themselves in some manner. The Jazz Studies Division within the Department of Music at The University of New Orleans is led by legendary jazz mentor Ellis Marsalis and is widely considered to be one of the best university jazz programs in the country. Similarly, Southern University's Division of Visual and Performing Arts is the professional home of reed master Alvin Batiste who has mentored many of today's leading jazz artists. Loyola University's jazz program is considered a close second to that of the University of New Orleans. Loyola has an esteemed music business program that is directed in part by STR record label chief, Sanford Hinderlie and features Dr. Scott Fredrickson, the recent appointee of the Conrad N. Hilton Eminent Scholar in Music Industry Studies award. Although Tulane University offers a jazz studies program through its Department of Music at Newcomb College, the school has received its greatest acclaim from the jazz community for its music library and archive. The William Ransom Hogan Jazz Archive is curated by music historian and musician Dr. Bruce B. Raeburn. The archive contains material as diverse as transcribed oral histories, historical manuscripts and sheet music, and local union 174-496 records. The archive attracts roughly 2,200 users a year and is primarily funded through a "Friends of the Hogan Jazz Archive" membership fund.

The New Orleans Center for the Creative Arts is a New Orleans area performing arts high school with a jazz division developed by Ellis Marsalis.

New Orleans has a healthy tradition of mentoring that traces back to Louis Armstrong's work in developing young jazz artists. Today's mentors include Ellis Marsalis, patriarch of the world famous Marsalis dynasty, Doc Pullian, Alvin Batiste, the late Danny Barker and Jerry Brock. Aside from the Marsalis dynasty, other family dynasties include the Batistes and the Jordans.

The New Orleans' jazz community receives a good deal of financial support due in large part to a concentrated effort on the part of local and national

agencies to preserve the romanticized history of the port city. Local agencies include the Louisiana Music Commission, the New Orleans Jazz Centennial, and the New Orleans Jazz & Heritage Foundation.

The state and national agencies that work to support the New Orleans area jazz community are the Preservation Resource Center of New Orleans, the New Orleans Jazz National Resource Park, and the Louisiana Division of the Arts. New Orleans talent agencies and work referral agencies are Jazz Film & Video, the Louisiana Department of Labor/Louisiana Job Service and Summer Stage. Union Local 174-496 supports New Orleans area musicians with a number of services including legal assistance and health care.

Jazz and other forms of local music are commonly used for the purpose of tourism in New Orleans. The national tourism commercial for New Orleans, "Come Join the Parade," features a relative of the New Orleans based group The Neville Brothers seated at a bar while jazz is playing. In addition, there are 10 advertising agencies in the area that specialize in music.

The two top major jazz and jazz-related music stations in the area are WWOZ 90.7 FM and WWNO 89.9 FM. WWOZ 90.7 is a listener supported and volunteer-operated station that reaches the entire New Orleans metro area and beyond. The station offers award winning programming that includes jazz, blues, Cajun, zydeco, gospel, Brazilian and Caribbean music on its play list. In addition to the awards the station has garnered, WWOZ 90.7 was named "Best Medium Market Jazz Station of the Year" by the Gavin Report, the major radio-industry programming magazine.

Since jazz and other local music traditions are integral to the image of New Orleans, it is of the first priority that the city is able to cultivate an audience for its musicians. However, with tourism being the biggest crutch for an ailing economy, much of the city's audience development efforts are not centered on area residents or concerned with fostering new generations of local musicians. There are still storied mentors and institutions that carry on local

traditions and keep the New Orleans jazz legacy alive but, for many, jazz is tied to a nostalgia for a day long past.

#### New York\*

The New York metro area, and its other four boroughs and tri-state (New York-New Jersey-Connecticut) region, has the greatest concentration of premiere jazz venues in the United States. It also has a plethora of lower echelon venues, which may present jazz irregularly, but remain significant to the larger picture of potential employment for musicians who identify themselves with "jazz." New York City's venues range from Jazz at Lincoln Center, the world's leading not-for-profit institutional producer of jazz concerts, dances, lectures, films, multi-arts collaborations and educational initiatives, to historic commercial nightclubs such as the Village Vanguard. There are innumerable larger and smaller, better and lesserknown, established or fleeting, jazz-dedicated or jazz-tolerant stages.

Jazz at Lincoln Center presented 450 jazzoriented events in the 2000-2001 season alone, and plans to expand programming further upon moving into an innovative multi-use building under construction at Columbus Circle, scheduled for completion by the end of 2003. Led by artistic director Wynton Marsalis, Jazz at Lincoln Center promotes a canon founded on the work of such artists as Louis Armstrong and Duke Ellington, concentrating as well on early New Orleans jazz, black swing traditions of the 1930s and '40s, bebop and post-bop modernism, and Latin jazz; it also presents a variety of traditional and modern jazz sub-genres. Jazz at Lincoln Center often features artists challenging jazz conventions in smaller settings and/or auxiliary events.

Carnegie Hall, unlike Jazz at Lincoln Center, is not a jazz producer-presenter, although it may be New York City's most famous concert facility. The concert hall's staff has worked in conjunction with Fleet Bank to produce the Neighborhood Concert series, has held jazz workshops for teachers and the facility has hosted jazz concerts initiated by

<sup>\*</sup>This section of this report was prepared with the help of the four city coordinators and project coordinator Phillip Harvey. In New York, contributors include Howard Mandel (primary author), Martin Mueller. Bethany Ryker, James Browne, Wendy Oxenhorn, Reverend Dale Lind, Natasha Jackson and Jeff Levinson.

independent, outside producers. George Wein is the most prominent among these producers, active internationally though based in New York City. His Festival Productions is responsible for the annual JVC Jazz Festival, Saratoga Jazz Festival, Verizon Jazz Festival, and the Newport Jazz Festival (which he founded in 1954); Festival Productions also produces the Carnegie Hall Jazz Orchestra, led by trumpeter Jon Faddis, which presented four evening-long programs at Carnegie Hall during 2000-2001.

Jazzmobile, Inc., founded in 1964 by Dr. Billy Taylor to "provide arts education programs of the highest quality via workshops, master classes, lecture demonstrations, arts enrichment programs, outdoor summer mobile concerts, special indoor concerts and special projects," is a not-for-profit organization without a performance home base, estimating outreach to over 250,000 people in and around New York City's boroughs, with approximately 600 artists participating annually. Jazz at Flushing Town Hall, in Flushing, Queens, is a relatively new not-for-profit institution presenting high quality mainstream jazz in an active schedule of events at an outer-borough (non-Manhattan) cultural center. 651 Arts is a notfor-profit organization staging jazz events on an occasional basis at Brooklyn Academy of Music and BAM's Majestic Theater. Henry Street Settlement is a smaller yet well-established not-for-profit jazz performance and education center on Manhattan's lower east side. New Jersey Performing Arts Center (Newark) is a newly built major concert hall, hosting a regular season of jazz and world-music performances. John Harms Center is another New Jersey concert venue that serves as a rental for outside producers presenting some jazz.

Other not-for-profit arts institutions presenting jazz on various regular schedules include the Jazz Gallery, the Kitchen Center for Music, Video and Dance, Aaron Davis Hall at City College of New York, the Studio Museum of Harlem, the Guggenheim Museum, the Tillis Center on the C.W. Post campus of Long Island University.

Not-for-profit jazz festivals and series in New York City parks and public spaces include the Vision Festival (two weeks of concerts curated by a volunteer artist-musician-choreographer board); the Charlie Parker Jazz Festival (two afternoon-long free bebop concerts, in Harlem and East Village Manhattan public parks); the City-produced Central Park Summerstage series; the free Brooklyn Prospect Park Bandshell series; free Lincoln Center Out of Doors concerts and Midsummer's Night Swing (plaza dancing, some tickets sold); and the Music Under New York program in the subways, administered by the Metropolitan Transportation Authority.

Profit-oriented or privately-subsidized festivals include the Verizon Music Festival, J&R Music World Jazz Festival, the Caramoor Jazz Festival (Westchester County), the Cape May Jazz Festival, the New Jersey Jazz Society festival (mostly traditional jazz) in Stanhope, NJ, the Blues Cruise (concerts on boats on the Hudson River), and Mark Morganelli's series of jazz concerts — usually promoted under the banner JazzForum Arts — mostly in suburban New York City and surrounding towns.

Saint Peter's Church has been recognized by the Lutheran Synod of New York since 1956 for its jazz ministry, including presentation of jazz in a spiritual setting. St. Peters helped found International Women in Jazz, a 200-member organization presenting monthly concerts and occasional workshops.

Of New York City's famed nightclub scene: The Blue Note opened in New York in 1981 and has franchise outlets in Japan. The Village Vanguard was established in 1935 by Max Gordon, late husband of current owner Lorraine Gordon, and has been renowned for booking jazz giants since the 1950s. The Knitting Factory has presented jazz amid a range of cutting edge ("downtown") music for more than a decade, currently at a bustling three-stage and multi-media performance/recording facility with multiple bars (it also has a restaurant-performance center branch in Los Angeles). Iridium and Birdland are major midtown Manhattan jazz clubs, with week-long schedules presenting first rank jazz musicians.

The Musician's Union Local 802 is a source of information on some aspects of venue-related activities. An important distinction exists between venues that offer "steady" as opposed to "occasional" employment for jazz musicians. Corporate functions such as noontime summer plaza concerts, and uncounted "club dates," private parties, weddings, performances in hospitals, retirement centers, parks,

libraries, community centers and churches also serve to employ jazz-identified musicians.

New York City (specifically, Manhattan) is the site of major offices for all five of the world's major recording companies (Japan's Sony, Germany's BMG, France's Universal Music Group, America's Warner Bros., the UK's Capitol/EMI), and the city has a number of subsidiary labels that specialize in signing jazz musicians. The creative and receptive energy of the community of musicians and listeners most deeply involved with jazz has also given rise, out of vague necessity, to at least a dozen smaller, independent record labels. There are uncounted artist-owned and operated labels, too. New York City is also a longtime center of music businesses including but not limited to music publishing, artists' services (such as licensing organizations ASCAP and BMI), copyist work, record retailers, instrument repair shops and retailers.

An incredible concentration of institutions of higher education and status as the jazz capital of the world make New York City the mecca for those seeking an education in jazz. The New School University employs 72 jazz artists as educators/mentors in a bachelor's degree model intended to pass down oral and playing traditions to students, preparing them for the technical, artistic and professional demands of a performance career in jazz. The program's part-time faculty are unionized through Local 802, American Federation of Musicians, a unique and unprecedented example of collective rights organizing on behalf of musicians in education.

The Manhattan School of Music offers a jazz curriculum that focuses on the students as performers, composers and educators in the present day jazz market. The Juilliard School, in conjunction with Jazz at Lincoln Center, has established an Artist Diploma jazz education program that will feature a broad jazz and classical music-based curriculum.

Young artists are also supported through the important work of the major cultural institutions that specialize in the preservation of jazz. Jazz at Lincoln Center is a leader in presenting numerous programs for young people, including the Essentially Ellington High School Jazz Band Competition and Festival, and in creating a Jazz for Young People Curriculum, which will be distributed nationally. The New Jersey Performing Arts Center also

supports young people's jazz programs, including Jazz For Teens, an annual 10-week seminar for musicians and singers learning jazz.

Several professional firms offer an array of support services to jazz musicians but it should be noted that most professional support services represent an overhead cost to jazz musicians, and the majority of them do not employ a professional support staff.

The New York State Council on the Arts (NYSCA) is one of the best-funded of all states arts agencies and has given both direct and indirect support to jazz-related projects. Recent recipients include Jazzmobile, Jazz at Lincoln Center, Sixteen as One, Inc. (Vanguard Jazz Orchestra) and the 92nd Street YMHA, among others.

However, in comparison with the situation 10 years ago, there are at present few fellowships awarded directly to jazz musicians — either from NYSCA, the New York Foundation for the Arts (NYFA), Meet the Composer, the Rockefeller Foundation, the Lila Wallace/Readers Digest Foundation or the National Endowment for the Arts (NEA). An important fellowship program available to jazz musicians directly in 2000-2001 was a one-time award of financial assistance and career development consultation from the Doris Duke Foundation to some two dozen musicians, administered by Chamber Music America.

Lack of public and/or private funding has not stopped musicians themselves from banding together to improve their prospects and raise their profiles in a crowded, competitive market, or address urgent, immediate needs. The Musicians Union (Local 802) has both MAP - Musician's Assistance Program, for union members in dire emergencies and MPTF, the Music Performer's Trust Fund, which matches 50/50 funds from qualified (mostly social service) organizations hiring jazz musicians. The Association for the Advancement of Creative Musicians (AACM) is a not-for-profit musicians' organization of approximately 200 members, founded in Chicago in 1964, with an active New York City chapter since the mid-1980s. Art Attack!, a Website run by Margaret Davis, provides a breadth of information about work, housing, insurance, food and other necessities to anyone who finds it online. The Jazz Foundation of America, run from offices at the Musicians' Union Local 802, is a private not-forprofit providing emergency care, including housing, health and dental care and career counseling to musicians in crisis.

WBGO-FM is the area's lone 24-hour radio station featuring straight-ahead jazz programming, though there is also extensive jazz broadcasting on WKCR-FM (Columbia University), WFMU-FM (Jersey City, NJ), WHRT (Hartford, CT) and National Public Radio broadcasts heard on WNYC-FM and AM (NYC), among other affiliates. There is also CD101.9-FM, a popular, commercially supported 24-hour "jazz lite" station.

#### San Francisco

In addition to the nationally recognized SF Jazz presenting organization, the San Francisco area is home to a plethora of venues for jazz. These outlets run the gamut from restaurants and festivals to street fairs and churches. Yoshi's, a nationally known jazz venue, pulls double duty as a highly regarded Japanese restaurant and sushi bar and soundstage for local and big-name jazz musicians.

The Monterey Jazz Festival is one of the largest jazz-based festivals in existence. It features over 600 artists who perform at seven different venues across the Bay Area. Programming for the festival is characterized by a variety of jazz styles and idioms from local and internationally well known artists

The Church of St. John Coltrane is an African Orthodox Church that incorporates jazz into its Sunday worship services and recognizes saxophone legend John Coltrane as a saint. The church features a five-piece house band that sets the liturgy to selections from Coltrane's musical canon.

The Kuumba Jazz Center is a non-profit presenting organization that has been hosting weekly jazz performances for 25 years. It operates its own venue and offers big name performers on Monday nights and local musicians on Friday nights. In addition, the center operates music workshops and a camp for young people and rents its space to other community cultural organizations.

The San Francisco Bay Area is home to a variety of small and independent record labels, several of which specialize in jazz. Of the independent labels that deal primarily with the jazz idiom, Noir Records and Concord Records are the most active. In addition to ubiquitous retail giants Tower Records,

Virgin Megastore and Borders Books and Music, the San Francisco area is home to a number of jazz specialty stores. Many of these specialty stores sell new and classic releases as well as collectible vinyl. A few work with major distributors and some carry the work of local artists on a consignment basis. Of the independent specialty stores, Berigan's, The Jazz Quarter, and the SF Jazz store are the most prominent. Berigan's deals mainly with record companies that buy from major distributors and then sell to small record stores. The store is a strong supporter of local artists. Charles Hamilton directs the highly regarded Berkeley High School Jazz Program, which has established itself as a valuable resource for the continuation of the jazz legacy.

At the university level, San Francisco State University boasts a strong reputation for attracting up-and-coming musicians. The JazzSchool is a community school that was founded by its current director, Susan Muscarella. Course offerings are intended for students of all ages, levels of expertise and instrument preference. There are also a number of individuals who are regarded as important resources for the jazz community. These mentors include Professor Bill Bell, John Handy, Earl Watkins, Ed Kelly, E.W. Wainwright, Khalil, Yancey Taylor, Jules Broussard, Eddie Marshall and Harley White.

Some of the major funders who are active in the San Francisco area are the California Arts Council, See's Candy, the Infiniti Division of Nissan North America, Tower Records and the San Francisco Traditional Jazz Foundation. Another important support entity for the jazz community in Northern California is The David and Lucile Packard Foundation. Created in 1964 by David Packard and Lucile Salter Packard, the Foundation supports performing and visual arts institutions along with its many other philanthropic concerns.

Due in large part to its proximity to Silicon Valley, San Francisco features musicians who are unusually savvy in regard to the creation and maintenance of jazz-related Web sites and online publications. Eighty-five percent of local musicians, including students in jazz studies programs, have personal Web sites. Additionally, nearly every jazz-oriented venue and festival has a Web site. In addition to the online publication Jazzwest.com, Jazz Now and the Palo Alto Jazz Alliance Newsletter are

area-based publications that cater to a jazz audience. Radio station KCSM FM 91.1 is the major jazz radio station in the San Francisco metropolitan area, having received this designation due to the fact that it is the only station that has a 24-hour jazz format. Other stations that feature jazz in their playlists include KPFA, KUSF, KKSF, and KBLX. KKSF and KBLX concentrate on appealing to the contemporary jazz market. The nationally broadcast

cable television channel BET-on-Jazz is available to viewers in the Bay Area as well.

SF Jazz presents a film series entitled Jazz on Film during the San Francisco Jazz Festival and the SF Jazz spring season. The series features archival footage of legendary performers, concerts and events that have contributed to the development of the music.

# **Appendix C. Distribution of Responses to the American Federation of Musicians Survey**

NOTE: In the charts below, numbers are listed as valid percent (or the percent of people answering the question) and frequency (sometimes called the count, or the actual number of people who answered the question). The mean is the average; the median is the number where 50 percent are above and 50 percent are below; the mode is the figure that appears most often.

#### Do you ever play or sing jazz music?

# Appendix D. Union Survey Letter

NATIONAL ENDOWMENT FOR THE ARTS

The Nancy Hanks Center 1100 Pennsylvania Avenue NW Washington DC 20506-0001 202/682-5400

#### Dear Colleague,

Please accept this letter as an official note of gratitude for your participation in the first in-depth study of jazz artists. Without your gracious support, we would never have been able to complete the study or meet our goal of enhancing the argument for increasing support for jazz music and the artists who create it.

The study validated many previously held assumptions about the problems jazz musicians face. Chief among these findings were the high incidence of jazz musicians who do not own the copyright to at least one of their musical creations and the woefully low income the majority of jazz artists receive for their work. Because of your involvement and generosity, we now have statistical information that funders can use to help create new grant programs for artists, and public school arts educators can incorporate into their ongoing efforts to reinstate arts into the curriculum.

The executive summary, which provides a detailed synopsis of the study's findings, is included in this package. It is our sincere hope that you will find that it reflects the hard work that has been put into its completion and has been worth the time, energy and resources you have contributed.

Thank you again for all you have done to help see this project through and if you have questions or concerns please feel free to contact us.

Sincerely,

A.B. Spellman, Deputy Chairman Wayne Brown, Director of Music and Opera Tom Bradshaw, Director of Research National Endowment for the Arts Joan Jeffri
Research Director,
Jazz Study

# Appendix F.

Using the Capture –Recapture Method to Estimate the Number of Jazz Musicians\*

The capture-recapture method is used to estimate the number of jazz artists by comparing the overlap between the union and RDS-identified jazz artists. Specifically, in order to calculate the universe of jazz musicians in each city, the number of jazz artists identified in the union study (capture) is divided by the proportion of jazz artists who are determined to be union members based on the RDS survey results (recapture). The steps taken to estimate the number of jazz musicians in each metro area are described below:

#### New York

#### Capture:

The proportion of New York area musician union members who identified themselves as jazz musicians (in response to the union member survey) is .701 (415/592).

The number of musician union members in the New York metropolitan area, according to union records, is 10,499.

Therefore, the estimated number of union jazz musicians is  $7,360 (10,499 \times .701)$ .

#### Recapture:

The proportion of all New York jazz musicians who are union members is estimated based on the RDS sample using the following formula for Pa, the proportion of union members:

Pa = (Sba \* Nb)/(Sba \* Nb + Sab \* Na)

Na is the mean network size of union members = 298.2

Nb is the mean network size of nonunion members = 175.2

Sab is the proportion of nonunion members recruited by union members = .512

Sba is the proportion of union members recruited by nonunion members = .252

Which yields P a= .22301

Therefore, based on the estimate of both the number of New York union jazz musicians (7,360) and the estimate of the portion of all New York jazz musicians who are union members (.223), the size of the New York jazz musician universe is estimated using the following formula:

7,360/.223 = 33,003

#### San Francisco

#### Capture:

The proportion of San Francisco area musician union members who identified themselves as jazz musicians (in response to the union member survey) is .681.

The number of musician union members in the San Francisco metropolitan area, according to union records is 2,217.

Therefore, the estimated number of union jazz musicians is 1,509 (2,217 x .681).

#### Recapture:

The proportion of all San Francisco jazz musicians who are union members is estimated based on the RDS sample using the following formula for Pa, the proportion of union members:

Pa = (Sba \* Nb)/(Sba \* Nb + Sab \* Na)

Pa = .0806

Therefore, based on the estimate of both the number of San Francisco union jazz musicians (1,509) and the estimate of the portion of all San Francisco jazz musicians who are union members (.0806), the size of the San Francisco jazz musician universe is estimated using the following formula:

1,509/.0806 = 18,733

#### **New Orleans**

#### Capture:

The proportion of New Orleans area musician union members who identified themselves as jazz musicians (in response to the union member survey) is .873.

The number of musician union members in the New Orleans metropolitan area, according to union records, is 1,014.

Therefore, the estimated number of union jazz musicians is 885 (1,014 x .873).

#### Recapture:

The proportion of all New Orleans jazz musicians who are union members is estimated based on the RDS sample as .514. \*

Therefore, based on the estimate of both the number of New Orleans union jazz musicians (885) and the estimate of the portion of all New Orleans jazz musicians who are union members (.514), the size of the New Orleans jazz musician universe is estimated using the following formula:

885/.514 =1,723

\* The number of documented referrals in New Orleans was too small for a meaningful analysis of referral patterns. Therefore, it was not possible to use the equation to compute the proportion of union members in New Orleans (i.e., no data for the terms Sab and Sba). Therefore, the proportion of union members in the RDS sample (i.e., .514) was used instead.

<sup>\*</sup>Detroit did not have enough responses in the RDS survey to do this calculation.
