Energy Concerns Fall, Deficit Concerns Rise

PUBLIC'S PRIORITIES FOR 2010: ECONOMY, JOBS, TERRORISM

As Barack Obama begins his second year in office, the public's priorities for the president and Congress remain much as they were one year ago. Strengthening the nation's economy and improving the job situation continue to top the list. And, in the wake of the failed Christmas Day terrorist attack on a Detroit-bound airliner, defending the country from future terrorist attacks also remains a top priority.

At the same time, the public has shifted the emphasis it assigns to two major policy issues: dealing with the nation's energy problem and reducing the budget deficit. About half (49%) say that dealing with the nation's energy problem should be a top priority, down from 60% a year ago. At the same time, there has been a modest rise in the percentage saying that reducing the budget deficit should be a top priority, from 53% to 60%.

Other policy priorities show little change from a year ago. For example, despite the ongoing debate over health care reform, about as many now call reducing health care costs a top priority (57%) as did so in early 2009 (59%). In fact, the percentage rating health care costs a top priority is lower now than it was in both 2008 (69%) and 2007 (68%).

In addition, the percentage placing top priority on providing health insurance to the uninsured stands at 49%. That is little changed from a year ago and off its high of 61% in January 2001. Notably, there is now a wider partisan gap in opinion about this issue than for any of the other 20 issues in the survey: fully 75% of Democrats rate providing health insurance to the uninsured as a top priority compared with just 26% of Republicans.

More than six-in-ten Americans say securing the Social Security system (66%) and securing the Medicare system (63%) should be top priorities for Obama and Congress. About as many (65%) say that improving the educational system should be a top policy priority. For all three items, public evaluations are not significantly different than they were one year ago.

In the wake of the financial crisis, the public does not place increased financial regulation among its top policy priorities. Fewer than half (45%) say stricter regulation of financial institutions should be a top priority for the president and Congress.

Q30a-w.

Budget Deficit and Energy

The priority given to reducing the budget deficit has risen seven points over the last year; in early 2009, 53% of the public called deficit reduction a top priority compared with 60% in the current survey. Both Republicans (+10 points) and Democrats (+8 points) have become more likely to say this is a top priority.

Emphasis on the budget deficit has increased since 2002, when it reached a low ebb following several years of budget surpluses (from 1998 to 2001 the question was worded “paying off the national debt”). Currently, the priority given to reducing the budget deficit is not significantly higher than it was in 2008 (58% top priority) or 1997 (60% top priority) and it lags slightly behind the high of 65% in December 1994.

In the past two years, there has been no difference between the priority Republicans and Democrats place on reducing the budget deficit. In the current survey, a single point separates Republicans (61% top priority) from Democrats (60% top priority). In 2009, partisans were equally close in their views. This is a dramatic change from much of the previous decade. Throughout the Bush administration, Democrats expressed far more concern than Republicans over the deficit. The opposite was true in 1997, when Bill Clinton was in office. At that time significantly more Republicans than Democrats said reducing the budget deficit should be a top priority.

Partisan Views of the Budget Deficit				
<i>% rating deficit 'top priority'</i>	<u>Rep</u>	<u>Dem</u>	<u>Ind</u>	<i>R-D diff</i>
	%	%	%	
Jan 2010	61	60	60	+1
Jan 2009	51	52	57	-1
Jan 2008	52	64	57	-12
Jan 2007	42	57	53	-15
Jan 2006	45	62	56	-17
Jan 2005	48	64	54	-16
Jan 2004	44	57	55	-13
Jan 2003	38	48	33	-10
Jan 2002	27	41	38	-14
Jan 1997	66	54	62	+12

Q30bF1.

Six-in-ten independents say this should be a top priority, matching the views of Republicans and Democrats. Independents' concern over the budget deficit has been stable over the past three years.

While concern over the budget deficit has gone up, the percentage giving priority to dealing with the nation's energy problem has declined significantly – and this decline has taken place among Republicans, Democrats and independents alike. In the current survey, 49% rate energy a top priority, down 11 points from 60% in 2009. In the late 2000s, about six-in-ten consistently gave top priority to dealing with the nation's energy problem. The current number is more in line with views from the early years of that decade, when the percentage that said dealing with the nation's energy problem should be a top priority ranged from the low-to-mid 40s.

Global Warming and the Environment

Dealing with global warming ranks at the bottom of the public's list of priorities; just 28% consider this a top priority, the lowest measure for any issue tested in the survey. Since 2007, when the item was first included on the priorities list, dealing with global warming has consistently ranked at or near the bottom. Even so, the percentage that now says addressing global warming should be a top priority has fallen 10 points from 2007, when 38% considered it a top priority. Such a low ranking is driven in part by indifference among Republicans: just 11% consider global warming a top priority, compared with 43% of Democrats and 25% of independents.

Protecting the environment fares somewhat better than dealing with global warming on the public's list of priorities, though it still falls on the lower half of the list overall. Some 44% say that protecting the environment should be a top priority for Obama and Congress, little changed from 2009.

Jobs, Economy and Terrorism Defense

Strengthening the nation's economy, improving the job situation and defending the country from future terrorist attacks are far-and-away the top three policy priorities for the public. No other item comes within 14 points. Last year, both the economy and jobs edged ahead of defending the nation against terrorism as top priorities. In 2008, the economy and terrorism defense were virtually tied atop the priority list, while somewhat fewer people expressed concern over jobs. In 2006 and 2007, the public was more concerned about terrorism than it was about economic issues.

Improving the job situation has moved to the top of the list only recently. For much of the past decade, the percent of the public calling the job situation a top priority fluctuated in the 60s and trailed the economy. It spiked to 82% in 2009 and stands at 81% in the current survey.

There are no major differences in how Republicans, Democrats and independents prioritize strengthening the economy. Democrats are somewhat more likely than Republicans and independents to rate improving the job situation as a top priority. And Republicans are slightly more inclined than Democrats and independents to give top priority to defending the country from future terrorist attacks. Nonetheless, at least 75% of all groups give top priority to these issues, and partisan differences are generally modest when compared to differences over other policy priorities.

Economic Issues, Terrorism Defense Dominate Across Political Groups

Democrat	80
Independent	76

Q30aF1/IF1/s.

Dueling Partisan Agendas

Despite general partisan agreement on the importance of improving the job situation, strengthening the economy and protecting the country, large differences exist between Republicans and Democrats on other leading issues.

Republicans and Democrats take starkly different positions on the importance of providing health insurance to the uninsured; 75% of Democrats call this a top priority compared with 26% of Republicans. The 49-point gap in opinion is the largest for any of the 21 issues tested. Health insurance also was the most political divisive issue a year ago, though the gap was smaller at 38 points. In the current survey, 41% of independents call providing health insurance to the uninsured a top priority.

Democrats also are far more likely than Republicans to put a top priority on dealing with global warming, the problems of poor and needy people, protecting the environment, reducing health care costs and improving the educational system. In each case, Democrats are at least 20 points more likely than Republicans to consider each of these issues top priorities.

Republicans, by contrast, place more emphasis than do Democrats on strengthening the military, dealing with illegal immigration, and reducing the influence of lobbyists and special interests in Washington. Here again, the gaps in opinion are relatively large, with Republicans being about 20 points more likely than Democrats to call each of these issues top priorities.

<i>Percent considering each as a "top priority"</i>	<u>Rep</u> %	<u>Dem</u> %	<u>Ind</u> %	<i>R-D diff</i>

Dealing with illegal immigration	49	30	42	+19
Strengthening the military	64	44	47	+20

Q30a-w.

The gap between Republicans and Democrats on reducing the influence of lobbyists and special interest groups in Washington has widened this year; 45% of Republicans say this should be a top priority compared with 27% of Democrats. In 2009, Republicans (37%) were somewhat more likely than Democrats (30%) to call reducing the influence of lobbyists and special interests a top priority. And in 2007, the partisan balance was reversed with more Democrats (44%) calling this a top priority than Republicans (28%).

Reducing Clout of Special Interests Now a Bigger Priority for Republicans than Democrats				
<i>% saying reducing influence of special interests is "top priority"</i>	Jan <u>2007</u>	Jan <u>2008</u>	Jan <u>2009</u>	Jan <u>2010</u>
	%	%	%	%

<i>Issue ranking among policy priorities</i>	21/22	18/21	18/20	19/21
Q30vF2.				

Reducing the budget deficit and reducing federal income taxes for the middle class are two points of partisan agreement. Almost the same percentage of Republicans and Democrats call these issues top priorities.

State of the Union Address

With Obama's State of the Union address set for Jan. 27, 39% say that this year's address will be more important than past years' addresses, while 45% think it will be about as important as previous State of the Union addresses. Just 9% say it will be less important. At 39%, the public assigns greater importance to Obama's address than they did to the last three State of the Union speeches given by former President George W. Bush. Nonetheless, fewer see Obama's upcoming address as more important than said that about Bush's State of the Union addresses in 2002 and 2003.

In January 2002, 54% said that Bush's State of the Union was more important than in previous years. Opinion was similar a year later in January 2003. The percentage saying that

Obama's State of the Union address is more important than in previous years is much greater than it was for former President Clinton's speeches in 1999 and 2000.

About half of Democrats (54%) say that Obama's State of the Union address will be more important than speeches in past years. Republicans and independents are less inclined to take this view: 30% of Republicans and 32% of independents say it will be more important, while pluralities of both groups say it will be about as important as past addresses (49% of independents say this, as do 47% of Republicans).

Q4F1. Figures may not add to 100% because of rounding.

ABOUT THE SURVEY

Results for this survey are based on telephone interviews conducted under the direction of Princeton Survey Research Associates International among a national sample of 1,504 adults living in the continental United States, 18 years of age or older, from January 6-10, 2010 (1,000 respondents were interviewed on a landline telephone, and 504 were interviewed on a cell phone, including 201 who had no landline telephone). Both the landline and cell phone samples were provided by Survey Sampling International. Interviews were conducted in English and Spanish. For detailed information about our survey methodology, see <http://people-press.org/methodology/>.

The combined landline and cell phone sample are weighted using an iterative technique that matches gender, age, education, race/ethnicity, region, and population density to parameters from the March 2009 Census Bureau's Current Population Survey. The sample is also weighted to match current patterns of telephone status and relative usage of landline and cell phones (for those with both), based on extrapolations from the 2009 National Health Interview Survey. The weighting procedure also accounts for the fact that respondents with both landline and cell phones have a greater probability of being included in the combined sample and adjusts for household size within the landline sample. Sampling errors and statistical tests of significance take into account the effect of weighting.

The following table shows the error attributable to sampling that would be expected at the 95% level of confidence for different groups in the survey:

Group	Sample Size	Plus or minus...
Total sample	1,504	3.0 percentage points
Form 1	764	4.5 percentage points
Form 2	740	4.5 percentage points
Republicans	359	6.5 percentage points
Democrats	484	5.5 percentage points
Independents	605	5.0 percentage points

In addition to sampling error, one should bear in mind that question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

ABOUT THE CENTER

The Pew Research Center for the People & the Press is an independent opinion research group that studies attitudes toward the press, politics and public policy issues. We are sponsored by The Pew Charitable Trusts and are one of seven projects that make up the Pew Research Center, a nonpartisan "fact tank" that provides information on the issues, attitudes and trends shaping America and the world.

The Center's purpose is to serve as a forum for ideas on the media and public policy through public opinion research. In this role it serves as an important information resource for political leaders, journalists, scholars, and public interest organizations. All of our current survey results are made available free of charge.

All of the Center's research and reports are collaborative products based on the input and analysis of the entire Center staff consisting of:

Andrew Kohut, Director
Scott Keeter, Director of Survey Research
Carroll Doherty and Michael Dimock, Associate Directors
Michael Remez, Senior Writer
Robert Suls, Shawn Neidorf, Leah Christian, Jocelyn Kiley and Alec Tyson, Research Associates
Jacob Poushter, Research Assistant
