## OUR MISSION

The Yawkey Foundations are committed to continuing the legacy of Tom and Jean Yawkey by making significant and positive impacts on the quality of life of children, families and the underserved in the areas which the Yawkeys called home, New England and Georgetown County, South Carolina.

**Pictured on Cover:** Liz Martineau, CEO, President and Clinical Director of Nashoba Learning Group, works with a student in their Bedford, Massachusetts, school.

## LESSONS IN LEADERSHIP

## TOM AND JEAN YAWKEY AND THE YAWKEY FOUNDATIONS

Tom Yawkey was born in Detroit, Michigan, and was raised and educated in New York and Connecticut. A cum laude graduate of Yale University with a degree in engineering, he oversaw the management of the Yawkey family assets as well as land in Georgetown, South Carolina, that his uncle purchased in 1914. Tom purchased the Boston Red Sox in 1933 and married Jean R. Hollander in 1944.

Though best known for their longtime ownership of the Boston Red Sox, to those who knew them best, Tom and Jean Yawkey were private and generous people who gave freely of their time and money to people and organizations in need. They often helped individuals directly with private gifts to support medical costs, college tuition and other expenses. The Yawkeys' commitment to philanthropy extended to many organizations throughout New England and Georgetown County, South Carolina. They were particularly interested in supporting organizations that encouraged educational opportunities, improved health care, enhanced human service programs, provided youth and amateur athletic opportunities, celebrated arts and cultural endeavors, and valued conservation efforts.

Without pretense or an interest in public praise, Tom and Jean Yawkey looked to have a direct impact on people's lives through gifts to worthy organizations, large and small. In the early 1950s, Tom Yawkey quietly began supporting the cancer research of Dr. Sidney Farber, a physician at Children's Hospital Boston, and in 1953 decided to make Dr. Farber's Jimmy Fund the official charity of the Boston Red Sox. Additionally, the Yawkeys participated in the founding of Tara Hall Home for Boys and Georgetown Memorial Hospital in Georgetown, South Carolina. They were also

actively involved in the National Baseball Hall of Fame and Museum, scholarship programs for young people, food and shelter programs for disadvantaged families, and youth baseball programs. One of Tom Yawkey's greatest legacies, however, was his donation of 20,000 acres of land in Georgetown, South Carolina, to the South Carolina Department of Natural Resources. Now known as the Tom Yawkey Wildlife Center, the area is widely considered among the greatest natural conservation grants in United States history.

With his last will and testament, Tom Yawkey established the Yawkey Foundation in 1976. Jean Yawkey established the second Foundation in 1982. With thoughtful planning, the Yawkeys ensured that their commitment to those in need would continue after their lifetimes. This great legacy has given the Trustees of the Yawkey Foundations the opportunity to honor Tom and Jean Yawkey's dedication to the community. Since 2002, the Trustees of the Yawkey Foundations have awarded more than \$270 million to a broad range of organizations. The Foundations' Trustees look forward to continuing in the Yawkey tradition by having a positive impact on the lives of children, families and the underserved.

## MESSAGE FROM THE CHAIRMAN AND PRESIDENT

Over the past year, we at the Yawkey Foundations have been impressed by the hard work and dedication all of our grantees have shown to those in need in our communities. Despite the economic downturn, many of our grantees have found ways to become more efficient, to collaborate and to work creatively to accomplish their goals. We applaud these efforts. Our Board of Trustees has responded to the new set of economic challenges many of our grantees now face by maintaining their commitment to programmatic support. In 2010, the Foundations granted nearly \$24 million to 250 organizations in education, health care, human services, youth and amateur athletics, arts and culture, and conservation and wildlife.

We have observed that the organizations that have thrived in this time of uncertainty share the common element of strong leadership. Rather than pulling back when challenged, strong leaders move forward to seize opportunities while rededicating themselves to their mission. This Grants Report celebrates five of our grantees that have excelled during the economic downturn with the help of strong and innovative leadership. It is our hope that their stories will inspire and encourage other nonprofits to think strategically and creatively in order to best serve their constituents.

Investment in leadership is nothing new to the Yawkey Foundations. In the 1950s, Tom and Jean Yawkey began supporting the vision and leadership of Dr. Sydney Farber, a physician at Children's Hospital Boston. Dr. Farber's vision transformed pediatric cancer treatment in Boston and throughout the world. Today, the Dana-Farber Cancer Institute carries on Dr. Farber's legacy and is at the cutting edge of cancer treatment and research. The Yawkey Foundations are proud of their long association with the Dana-Farber Cancer Institute and congratulate the hospital on the recent opening of the Yawkey Center for Cancer Care, funded in part by a \$30 million grant from the Foundations.

The grantees highlighted in this report demonstrate the achievements of individuals and institutions that constantly strive for excellence, innovation and collaboration in their work:

- Children's Hospital Boston has been serving the needs of its pediatric patients' families for many years. The Hospital's deep understanding of patient-family needs and the desire to increase the amount of affordable housing available to Children's families led to the recent opening of the **Yawkey Family Inn at Children's Hospital**. With support from the Yawkey Foundations combined with the thoughtful acquisition of the Family Inn in Brookline and guidance from the next generation of civic leaders, the Yawkey Family Inn now provides overnight accommodations for many patient families who travel to Boston for the expert medical care found at Children's Hospital Boston.
- **Benjamin Franklin Institute of Technology**, located in Boston's South End, is a private, two-year technical college. Funded by a bequest in Benjamin Franklin's will of 1790, and matched with funds by industrialist Andrew Carnegie, the College opened its doors in 1908. Benjamin Franklin Institute of Technology has a long tradition of preparing students for viable careers, while educating them for technical, higher education degrees. Over the last few years, the College has added many new and exciting programs, facilities and work opportunities for its students. Through innovative leadership and strong collaborations with area businesses and colleges, Benjamin Franklin's enrollment has more than doubled since 2004.
- Founded in 1972 by Richard and Mary Williams, **Youth Enrichment Services (YES)** in Boston, Massachusetts, has provided outdoor educational programming to underserved youth for over three decades. The Williams family dedicated their lives to YES and built a well-respected organization that impacts the lives of thousands of children. After Richard's passing and her movement toward retirement, Mary began working with the YES Board to build staff and governance capacity while setting a clear strategy for the future. With the guidance and support of both

Mary and the YES Board, the organization smoothly transitioned into new leadership. YES has been able to successfully preserve its uniqueness while building on past successes and adding new programs.

- When the founders of **Nashoba Learning Group** in Bedford, Massachusetts, first introduced themselves to the Yawkey Foundations in 2005, they were outgrowing the church basement where they began educating two students in 2003. With a clear vision for serving children with autism, a sound business plan and an unflinching commitment to assemble resources and expertise, their idea for a school quickly became a reality. Nashoba Learning Group now provides a high quality education and life-skills training to 90 students and is poised for future growth.
- Like many small towns across the United States, Georgetown, South Carolina, is struggling with rising unemployment as a result of the loss of local area businesses. Working from their modest location in former school classrooms, **Friendship Place** is meeting the emergency daily needs of the poor and disadvantaged of Georgetown. Friendship Place's leadership is also taking a longer, more strategic view toward tackling the underlying problems in their community by working in collaboration with other local nonprofits to provide efficient and effective services to the poor.

We thank each of our highlighted grantees for sharing their stories with us and for their hard work and dedication to those they serve. It is our belief that by continuing to invest in leadership and collaboration that we will see greater success for all of the nonprofit organizations that we serve.

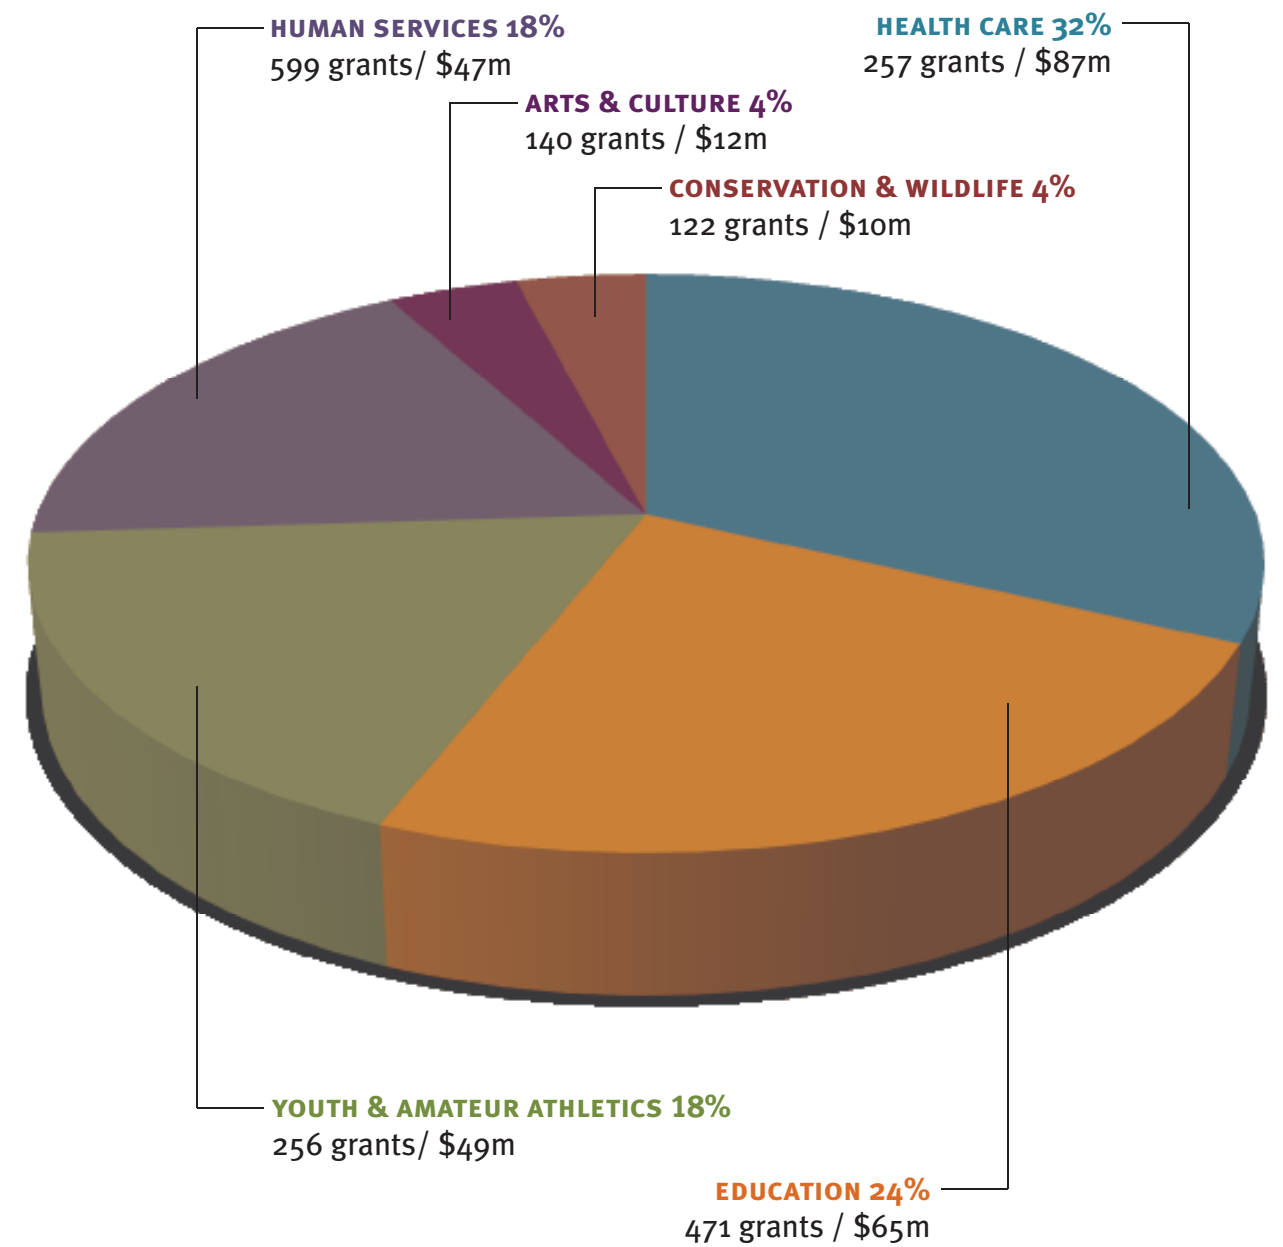

John L. Harrington  
Chairman and Trustee

James P. Healey  
President and Trustee

**YAWKEY FOUNDATIONS I & II**  
GRANTS AWARDED FROM JULY 1, 2002 – DECEMBER 31, 2010

**1,845 GRANTS / \$270 MILLION**

## YAWKEY FAMILY INN AT CHILDREN'S HOSPITAL BOSTON

### *Finding a creative way to respond to unique needs*

A stately Victorian home just blocks from Children's Hospital Boston, the Yawkey Family Inn is a warm and welcoming home-away-from-home for hospital patients and their families. Since opening in June 2009, the Yawkey Family Inn has doubled the amount of affordable patient-family housing for Children's Hospital Boston and has served more than 1,000 families and patients from 45 states and 37 countries. The average length of stay is five days, but many families stay a month or more, depending on the needs of their child. With 22 bedrooms, shared bathrooms, a fully equipped kitchen and beautiful common areas, the Yawkey Family Inn provides a refuge for families during their greatest time of need.

The success of the Yawkey Family Inn today would not have been possible without the leadership of Children's Hospital Boston CEO, Dr. James Mandell, and a group of young, entrepreneurial volunteers dubbed, "The Next Generation Developers Task Force." With an acute understanding of pediatric patient-family needs and the demand for affordable, temporary housing for those families, Dr. Mandell firmly believed that the Hospital needed to expand its housing supply to help more families access the Hospital's care for their children. Children's Hospital Boston challenged The Next Generation Developers Task Force to raise the money needed to purchase and renovate a home that would enable the Hospital to expand its housing.

**“The Inn provides a place where families going through similar experiences can find a caring community.”**

– Dr. James Mandell, Children’s Hospital Boston CEO

“The Inn provides a place where families going through similar experiences can find a caring community,” explains Dr. Mandell. “Families are an integral part of the caregiving team and having a stable environment to call home is important.”

Children’s Hospital Boston, with the help of The Next Generation Developers Task Force, began a campaign to fund the acquisition and renovation of a new patient-family housing facility located on Kent Street in Brookline. Nearby, on Sewell Avenue, the nearly 30-year-old Family Inn was exploring its future as an independently-operated non-profit organization. Founded in 1986 in honor of young transplant survivor Jamie Fiske, with the generous support of Jean Yawkey, the Family Inn was considering ways in which it might align more closely with a local medical institution. The result was The Family Inn’s decision to donate its facility to Children’s Hospital Boston. In honor of the original Family Inn and a \$3 million gift to the project from the Yawkey Foundations, Children’s Hospital Boston named its new patient housing facility The Yawkey Family Inn.

Today, it is clear that the leadership shown by the Hospital, The Next Generation Developers Task Force and others has made a difference in the lives of families staying at the Inn.

At least once a month since 2009, Nancy and her 18-year-old son, Nathan, have stayed at The Yawkey

Family Inn while Nathan undergoes dialysis as a result of a debilitating kidney disease. Driving from Albany, New York, the family always arrives at the Inn the night before Nathan’s treatment and gets an early start the next morning in order for him to receive dialysis and visit the nine different specialists he sees at the Hospital.

“When a crisis comes up that local doctors can’t handle, we have to run to Boston,” says Nancy. “Knowing that we have a place to stay immediately takes away the stress of figuring out that piece of the puzzle.”

As medical expenses pile up, Nancy is grateful for the affordability and convenience of the Inn, but also appreciates that the Inn is a place where her son can feel comfortable about his illness and can meet other kids who are undergoing similar treatments.

“It’s hard enough being a teenager, but it’s really hard being different. At the Inn, I know Nathan always feels comfortable.”

## BENJAMIN FRANKLIN INSTITUTE OF TECHNOLOGY

### *Leading a turnaround through innovation and collaboration*

In 2004, Stephen Lozen, an entrepreneur with a technology background, was hired to oversee the closing of Benjamin Franklin Institute of Technology, a two-year technical college in Boston's South End. The 102-year-old school, named for its tradesman benefactor, offers two and four-year programs in automotive technology, computer engineering and medical electronics engineering, among others. In 2004, the school desperately needed infrastructure upgrades, increased enrollment and financial stability to continue operating. To many, recovery seemed impossible, but Lozen knew what he had to do.

“After my first four hours at the school, I realized that without the College, underserved students interested in a technical career would have nowhere to go,” says Lozen.

The next morning, Lozen began developing a business plan to save the College. Lozen's strategy: create technical training programs that are needed for today's economy, but are not provided by other local colleges.

Moving quickly to broaden curriculum, increase applications and engage local business partners, Lozen and his team launched a certificate program in pharmaceutical technology in partnership with CVS Pharmacy. Next, the College began the only opticianary degree program in Massachusetts by partnering with the Opticians Association of Massachusetts. This past fall, the College began offering an ophthalmic assisting certificate in partnership with Tufts Medical Center. Through a grant from

Through action from the Board, faculty and staff, we've worked together to revitalize, reform and redirect the College." – Stephen Lozen

the National Science Foundation, the College is the first in New England to offer a degree in automotive technology for alternative fuel vehicle technicians.

"Through action from the Board, faculty and staff, we've worked together to revitalize, reform and redirect the College. I take great pride that we've enabled our students to succeed," says Lozen.

Benjamin Franklin Institute of Technology prides itself on its high-quality educational programs and diverse student body. The College demonstrates how a supportive environment with early-access college programs and tuition-free remedial support for freshmen contribute to an exceptional retention and graduation rate. For example, more than 50 percent of its students graduate in three years (three times the state average and double the national average for two-year colleges) and 95 percent of students gain employment in their field or go on to attend a four-year college after graduation.

These impressive statistics caught the attention of the Yawkey Foundations. Since 2006, the Foundations have been supporting the College's 'Third Semester Program' with grants totaling \$250,000. These grants have provided tuition support for students who need to complete additional coursework over the summer in order to stay on track and graduate within two years. The 'Third Semester Program,' supported by the Yawkey Foundations and other loyal funders, has raised the student retention rate to 95 percent.

Recent Benjamin Franklin Institute of Technology graduate and Boston resident, Alix Vilme, began attending the College in high school as part of its early access to college program. Coming from a family of carpenters, Alix was interested in construction but unsure of how to take his passion to the next level. At Benjamin Franklin, he enrolled in engineering and architecture classes and became immediately hooked. Alix is now in his second semester at Wentworth Institute of Technology. The 21-year-old is excelling alongside his peers, bolstered by the training and confidence he gained at Benjamin Franklin.

"Some kids aren't ready for college, but after attending Ben Franklin Institute of Technology, I knew what to expect," says Alix. "College is nothing to be scared of—it's just about getting your feet wet and jumping in."

## *Transitioning to new leadership*

When founding leaders run a successful organization for many years, the departure of those leaders can be daunting. However, with thoughtful planning, new leaders can develop opportunities for growth and renewal. Such was the case for Youth Enrichment Services (YES), a Boston-based youth development organization that offers robust outdoor recreational programming to city youth.

YES was founded in 1972 by Richard Williams who created the organization to offer urban youth the chance to experience the excitement and wonder of the natural world. Today, YES serves more than 1,500 young people—90 percent of whom are from low to moderate-income families. In the winter, YES provides ski and snowboard trips to nearby mountains. Throughout the year, YES runs biking, hiking, overnight camping trips, and other outdoor adventure programs at state parks across New England.

In 2002, Williams passed away and his wife, Mary Williams, took the helm at YES. After five years of continuing to achieve her husband's vision, Mary announced plans to retire. Suddenly, the future of the organization became unclear. Would YES go on without its original leadership? Together, Mary, the Board of Directors and YES staff decided the organization had to continue, but would need to adapt. As a result, the Board began a strategic planning process to stabilize the organization and identify a new qualified leader to continue the Williams' legacy.

“Before deciding what changes needed to be made, my first step was to understand and respect the history of the agency and its role in the community.”

– Bryan Van Dorpe, Executive Director

After a comprehensive search, Bryan Van Dorpe was selected as the new Executive Director. For YES, Van Dorpe had the right combination of management skills and experience working with young people. Current Board President, Richard Ward, a longtime YES volunteer and Board Member, credits Van Dorpe’s calm demeanor and innovative ideas as just a few of the reasons he has succeeded in bringing the organization through a leadership transition and a major recession.

“It was a little daunting replacing a founder who had been with the organization for 40 years,” notes Van Dorpe. “Before deciding what changes needed to be made, my first step was to understand and respect the history of the agency and its role in the community.”

“YES is well known for skiing and snowboarding, but we are really impacting the lives of these kids in a much deeper way,” says Van Dorpe, who has helped YES broaden its role from a youth services model to a youth development model, adding track and field, and expanding the peer-mentoring and job training programs.

Chief Operating Officer Will Morales, who attended YES ski trips as a child, agrees with Van Dorpe’s view of expanding the organization’s role as a community partner.

“YES brokers the resources to prepare these kids for what life is really about,” explains Morales, who has dedicated his career to helping young people. “When we go out on these trips, we put kids together who do not see eye to eye, but once the bus gets out of the city, they relax and see themselves as equals.”

Twelve-year-old Zoe Petty of Roxbury has been involved with YES since she was eight. For the past two years she has been a member of the GOAL (Girls Outdoor Adventure Leaders) Program. Her father, Patrick Petty, is proud of what his daughter has accomplished through YES programs and is impressed by how seriously she is taking her new volunteer job working in the ski shop at the YES Boston headquarters.

“YES is a very safe place and I am always myself here,” says Zoe. “I have tried so many new things with YES. Doing new activities outside of the city is something different, and different is good.”

It is because of the skill, ability and dedication of YES leadership that the Yawkey Foundation is honored to continue its support of YES. The Yawkey Foundation has worked with YES since 2002, contributing \$600,000 to the organization’s programs and mission.

## NASHOBA LEARNING GROUP

### *Creating a strategic business plan and developing resources*

Just ten years ago, Liz Martineau, Nan Leonard and Maureen Vibert were corporate executives, leading their firms and clients toward great success. Today, these three women are employing the same leadership skills, but in a slightly different setting: the Nashoba Learning Group (NLG), a state-of-the-art, non-profit educational institution for children with autism.

Located in a 40,000-square-foot building on a forest-lined business park in Bedford, Massachusetts, NLG provides a year round, one-on-one program for autistic and developmentally disabled children ages three to 22. Using an individualized educational approach that challenges students across a range of social and academic areas, NLG serves more than 80 students and has a waiting list of more than 200.

Widespread interest in the school comes as no surprise to Martineau and Leonard, each of whom has a son with autism. Martineau and Leonard left their corporate jobs to pursue advanced degrees in behavioral education, hoping to gain a better understanding of autism and how they could help their children learn. Martineau and her husband, John McClellan, started the school in 2003 after having difficulty finding the right environment for their child. Shortly thereafter, they recruited Leonard, who was having the same difficulty, to serve on the Board.

**“I believe our success is due to marrying tight financial control with a great quality education. Every decision we make should optimize quality for our students.”**

– Liz Martineau, CEO, President and Clinical Director

Before opening the doors, Martineau recruited Vibert and her husband, Steve, to provide more executive leadership. They opened NLG in a church basement with only two students. Word spread quickly about the program and, within two years, NLG was filled to capacity in that facility with 28 students.

Realizing that there were many more children with autism who needed help, this team, with Martineau as CEO, President and Clinical Director; Maureen Vibert as Clerk and Executive Director; Steve Vibert as Director of Information Technology; and Leonard, McClellan, Lynn Brennan, Bob Forlenza, and Tom Moloney as active board members, created a business plan and execution strategy that had the potential for tremendous success.

NLG first visited the Yawkey Foundations in 2005 and presented a thoughtful and thorough plan outlining how they could best serve children with autism. Since that time, the Foundations have invested \$150,000 toward NLG’s growth and development. In 2007, NLG purchased its current facility and fully renovated it to meet the increased needs of the program. The result of NLG’s hard work is a financially sound organization that provides high quality education and services to children and families with autism.

“I believe our success is due to marrying tight financial control with a great quality education,” says Martineau. “Every decision we make should optimize quality for our students.”

“We work hard to establish an atmosphere of excellence and empower our staff to create change,” explains Maureen Vibert. “If they can fix or make something better, we welcome them to do it.”

Bridging the gap between school and home is another hallmark of NLG.

“We educate parents about the achievement possibilities for their child, which are frequently very different than the prognosis the parents were given,” notes Martineau. “We want to know what’s working and what’s not—if their child can’t function at home, then nothing we do here matters.”

Since Dan and Laura O’Donnell’s 10-year-old son, Daniel, started at NLG two years ago, the couple has been amazed by the rapid progress he has made.

“Daniel is now doing so many things independently that we never imagined were possible. He takes such pride in his work and our quality of life has improved as a family. This school has changed him and us. It’s enabled us to see who he is capable of becoming.”

## FRIENDSHIP PLACE

### *Leading a community collaboration to meet basic needs*

Four years ago, a 54-year old man named Warren was sitting in his truck in the parking lot of the Wal-Mart in Georgetown, South Carolina. Homeless, down to his last \$20, and still suffering from the effects of a recent heart attack, Warren was planning on giving up. At that very moment, Friendship Place Executive Director Charlie Ball pulled up alongside him and asked if he needed help.

“I don’t consider myself a religious person,” says Warren. “But meeting Charlie at that moment was the biggest religious experience I have ever had.”

After listening and talking to Warren about his problems, Ball proceeded to do what Friendship Place does every day—provide people in need with hope and connect them with services to get back on their feet. Established more than ten years ago, Friendship Place now provides underserved residents with 500–600 meals a week, as well as shelter and other social services.

Ball, who served as an infantry officer in the U.S. Army before moving to Georgetown and becoming Friendship Place’s only full-time employee, began by asking Warren to help set tables for Friendship Place’s hot meal program. The free weekday lunch is prepared and served by a part-time chef and local volunteers for more than 100 guests each day.

“The demands are great and resources are limited, but unlike larger towns, we have the luxury of getting to know people, which helps knock down many of the barriers and issues around poverty.” – Charlie Ball, Executive Director

Friendship Place soon connected Warren to a Department of Labor program through which he found a job at a local library. Ball also facilitated Warren's search for affordable housing by connecting him with the local housing authority and arranged for the electricity to be turned on in Warren's new apartment. Through a partnership with the Smith Medical Clinic on Pawleys Island, Ball directed Warren to a low-cost healthcare program that would address his heart condition.

“Charlie never talked down to me, and always spoke to me man-to-man—he made me feel like I belonged,” explains Warren, who now works as a horticulturist at a local nursery.

During the past decade, many of the manufacturing and farming businesses that fueled Georgetown's (pop. 8,950) economy have disappeared. As a result, social services are in high demand.

“We're not Charleston,” explains Ball. “We couldn't just duplicate what they do there and make it fit here. We had to figure out what Georgetown needed.”

Tom and Jean Yawkey and the Yawkey Foundations have a long association with Georgetown. After inheriting land along Georgetown's shoreline, Tom Yawkey dedicated a considerable amount of his time and resources to this small community. Though the Yawkeys' largest donation to Georgetown remains the 20,000 acre Tom Yawkey Wildlife Center, they were deeply committed to the people in the community as seen by their support of the first hospital in Georgetown and the founding of a residential home and school for at-risk boys.

The community spirit that Tom and Jean Yawkey embraced in Georgetown is still present today. A number of organizations in Georgetown have found unique ways to work together to best serve those in need. In many ways, Ball's strength as a leader is his ability to bridge the local government with educational, health and religious organizations. As a result, Friendship Place clients, like Warren, are able to find long-term, sustainable solutions to poverty and other crises.

In order to fulfill Friendship Place's mission of “providing a hand up for people to meet their basic needs,” Ball has launched a number of innovative programs, including scholarships and a job training program that helps the unemployed and under-employed attain full-time employment as certified nurses' aides. By providing books, tuition, uniforms, individualized tutoring, and medical equipment, Friendship Place supports these students as they pass their state certification exams and find jobs.

“There is a creative aspect here,” explains Ball. “The demands are great and resources are limited, but unlike larger towns, we have the luxury of getting to know people, which helps knock down many of the barriers and issues around poverty.”

Friendship Place's work combined with Ball's efforts across the community, embodies the spirit of Tom and Jean Yawkey in Georgetown. The Foundations have been honored to support Friendship Place since 2003 with grants totaling nearly \$100,000.

*Developing  
leadership initiatives  
to create impact*

**In 2010 the Yawkey Foundations:**

- Celebrated the completion of the **Yawkey Center for Cancer Care at Dana-Farber Cancer Institute**, funded in part by a \$30 million grant from the Yawkey Foundations.
- Redesigned and relaunched its **Yawkey Scholars Program** to provide additional support and opportunities to young people in the Program. Over the past five years, the Yawkey Scholars Program has provided nearly \$4.3 million in tuition support to more than 100 Scholars as they pursue higher education.
- Continued to work with **Horry-Georgetown Technical College's Forestry Management Program** in Georgetown, South Carolina, to support the development of educational programs and hands-on field experience at the Tom Yawkey Wildlife Center. Since 2006, grants to this program total nearly \$1 million.
- Completed its \$500,000 multi-year grant to **Little League Baseball** as part of a collaborative effort with researchers from the University of North Carolina to analyze and identify risk factors related to injuries from pitching in Little League and during early teenage years.
- Continued to support its **Immigrant and Adult Basic Education Initiative** to prepare disadvantaged immigrants and adults for non-sectarian career advancement or further higher education through ESOL and basic education programs. Since 2002, commitments to this Initiative have exceeded \$1 million.

**YAWKEY FOUNDATION I GRANTS**  
**JANUARY 1 – DECEMBER 31, 2010**

Archdiocese of Boston - Boston, MA	\$ 10,000	Health and human service programs
Association of Small Foundations - Washington, D.C.	\$ 2,500	National grantmakers organization
Baseball Assistance Team - New York, NY	\$ 25,000	Human service programs
Bethany Health Care Center - Framingham, MA	\$ 5,000	Health care programs
Boston College - Chestnut Hill, MA	\$ 5,000	Scholarship programs
Boston Health Care for the Homeless Program - Boston, MA	\$ 25,000	Special initiative to support local costs associated with response to the earthquake in Haiti
Boston Home - Dorchester, MA	\$ 50,000	Renovation project at facility offering specialized care to individuals with Multiple Sclerosis
Boy Scouts of America Coastal Carolina Council - Charleston, SC	\$ 10,000	Scouting program
Boys & Girls Club of Greater New Bedford - New Bedford, MA	\$ 25,000	Summer camp program for disadvantaged children
Campaign for Catholic Schools - Boston, MA	\$ 25,000	Yawkey Teaching Excellence Award for teachers at Pope John Paul II Academy
Catholic Charities - Boston, MA	\$ 25,000	Human service programs
Catholic Charities - Fall River, MA	\$ 5,000	Human service programs
Children's Hospital of Southwest Florida - Fort Myers, FL	\$ 50,000	Health care services for disadvantaged children
College Board - New York, NY	\$ 10,000	Capacity building for program assisting first generation college students
Conservation Management Institute - Blacksburg, VA	\$ 6,793	Capacity building for the Tom Yawkey Wildlife Center
Cranberry Hospice - Plymouth, MA	\$ 25,000	Quality of life and comfort programs for children
Dana-Farber Cancer Institute - Boston, MA	\$ 155,000	Cancer research
Downey Side - Springfield, MA and New York, NY	\$ 25,000	Adoption program for older children
Eaglebrook School - Deerfield, MA	\$ 50,000	Scholarship program for disadvantaged students
Fessenden School - West Newton, MA	\$ 5,000	Scholarship program for disadvantaged students
Friendship Place - Georgetown, SC	\$ 37,500	Meals and human service programs for disadvantaged residents of Georgetown
Georgetown Presbyterian Hispanic Education Program - Georgetown, SC	\$ 12,500	After-school and adult education programs for disadvantaged residents of Georgetown
Grants Managers Network - Washington, D.C.	\$ 1,500	National grantmakers organization
Helping Hands of Georgetown - Georgetown, SC	\$ 12,500	Food and human service programs
Horry-Georgetown Technical College - Georgetown, SC	\$ 150,000	Allied healthcare scholarship program for disadvantaged students from Georgetown
Horry-Georgetown Technical College - Georgetown, SC	\$ 180,800	Forestry and wildlife management program
Lowcountry Open Land Trust - Charleston, SC	\$ 30,000	Land conservation programs
Lowcountry Preparatory School - Pawleys Island, SC	\$ 25,000	Scholarship program for disadvantaged students
Melmark New England - Andover, MA	\$ 10,000	Programs for children with autism and other special needs
National Leadership Roundtable - Washington, D.C.	\$ 50,000	Research study on Boston's Catholic school system

**YAWKEY FOUNDATION I GRANTS**  
**JANUARY 1 – DECEMBER 31, 2010**

Nature Conservancy of South Carolina - Columbia, SC	\$ 35,000	Land conservation programs
Neurofibromatosis of New England - Boston, MA	\$ 25,000	Outreach, support and services for patients with neurofibromatosis and their families
New England Baptist Hospital - Boston, MA	\$ 5,000	Health care services for the disadvantaged
New England Collegiate Baseball League - Danbury, CT	\$ 25,000	Young men's summer baseball league
New England Wildlife Center - Weymouth, MA	\$ 25,000	Environmental education programs
Newton Country Day School - Newton, MA	\$ 5,000	Scholarship program for disadvantaged students
