BOTANICA / Jesús Izco... [et al.]. -- 1ª ed., 3ª reimpresión

1. BOTANICA 2. TAXONOMIA 3. NOMENCLATURA I. IZCO, Jesús II. BARRENO, E.

Q-5-198

CHAUX, Claude

Productions legumieres : Tome 1. Generalites / Claude Chaux, Claude Foury

(Agriculture d'aujourd'hui. Sciences, techniques, applications, ISSN 0982-2518)

1. HORTICULTURA 2. PLANTAS FORRAJERAS 3. LEGUMINOSAS 4. HORTALIZAS

Q-6-2982.3

TIETENBERG, Tom

The International yearbook of environmental and resource economics 2002/2003 : A survey of current issues / Edited by Tom Tietenberg and Henk Folmer

(New horizons in environmental economics)

1. MEMORIAS 2. ECONOMIA AMBIENTAL 3. RECURSOS NATURALES 4. DESARROLLO ECONOMICO Y SOCIAL I. FOLMER, Henk II. TITULO III. SERIE

Q-6-3334

COTO MILLAN, Pablo

Essays on microeconomics and industrial organisation / Pablo Coto-Millán, editor

(Contributions to economics, ISSN 1431-1933)

1. ANALISIS ECONOMICO 2. ANALISIS MICROECONOMICO 3. TEORIAS ECONOMICAS 4. ORGANIZACION INDUSTRIAL I. TITULO II. SERIE

Q-6-3335

BERGH, J.C.J.M. van den

Handbook of environmental and resource economics / Edited by Jeroen C.J.M. van den Bergh

1. POLITICA AMBIENTAL 2. ECONOMIA AMBIENTAL 3. RECURSOS NATURALES 4. MANUALES I. TITULO

Q-6-3336

Foro Agrario

La biotecnología vegetal en el futuro de la agricultura y la alimentación / : Foro Agrario

Jornada de estudio organizada por Foro Agrario y celebrada en el Palacio de Zurbano de Madrid el día 25 de septiembre de 2002

1. ECONOMIA AGRICOLA 2. PRODUCCION VEGETAL 3. SECTOR AGROINDUSTRIAL 4. INGENIERIA GENETICA 5. BIOTECNOLOGIA VEGETAL 6. CONGRESOS I. Jornada de estudio "La biotecnología vegetal en el futuro de la agricultura y la alimentación" (2002. Madrid) II. TITULO

Q-6-3337

OATES, Wallace E.

The RFF reader in environmental and resource management / edited by Wallace E. Oates

1. POLITICA AMBIENTAL 2. ECONOMIA AMBIENTAL 3. SITUACION ECONOMICA 4. MEDIO AMBIENTE I. TITULO

Q-7-326

GONTARD, Nathalie

Les emballages actifs / Nathalie Gontard, coordonnatrice

1. ALIMENTACION 2. ALIMENTACION HUMANA 3. EMPAQUETADO 4. INNOVACION 5. MATERIALES DE EMPAQUE 6. SEGURIDAD ALIMENTARIA I. TITULO

Q-7-327

MULTON, J.L.

L'emballage des denrees alimentaires de grande consommation / coordonnateurs J.L. Multon, G. Bureau. -- 2ª edition, revue et augmentee

(Collection sciences & techniques agroalimentaires)

1. ALIMENTACION 2. ALIMENTACION HUMANA 3. EMPAQUETADO 4. INNOVACION 5. MATERIALES DE EMPAQUE 6. SEGURIDAD ALIMENTARIA

R-3-285

JOHNSON, Evert W.

Forest sampling desk reference / Evert W. Johnson

1. BOSQUES 2. SILVICULTURA 3. ANALISIS ESTADISTICO 4. MUESTREO 5. MANUALES

R-5-406.2

MELGAREJO MORENO, Pablo

Tratado de fruticultura para zonas áridas y semiáridas : Volumen II. Algarrobo, granado y jinjolero / Pablo Melgarejo Moreno, domingo M. Salazar Hernández

1. FRUTICULTURA 2. CULTIVO 3. CERATONIA SILIQUA 4. PUNICA GRANATUM 5. ZIZIPHUS 6. ZONA ARIDA 7. ZONA SEMIARIDA I. TITULO

R-5-412

GUIA de las frutas cultivadas : Identificación y cultivo / [Textos, Javier Navarro]

1. FRUTICULTURA 2. ARBOLES FRUTALES 3. FRUTAS 4. IDENTIFICACION 5. VARIETADES 6. NOMENCLATURA 7. CULTIVO I. NAVARRO, Javier

R-5-413

Cogullada, Escuela Agraria

Situación y perspectivas agronómicas del cultivo de frutos secos en el área mediterránea : [curso] 25 de marzo de 2003 / Cogullada, Escuela Agraria

1. FRUTICULTURA 2. FRUTOS SECOS 3. CULTIVO 4. CORYLUS AVELLANA 5. PRUNUS AMYGDALUS 6. JUGLANS REGIA 7. CERATONIA SILIQUA 8. PISTACIA 9. CURSOS DE ESPECIALIZACION I. TITULO

U-3-418

CLEMENTS, Michael P.

Forecasting economic time series / Michael P. Clements and David F. Hendry

1. ECONOMETRIA 2. TECNICAS DE PREDICCION 3. SERIES CRONOLOGICAS I. TITULO

U-3-419

GHYSELS, Eric

The econometric analysis of seasonal time series / Eric Ghysels, Denise R. Osborn (Themes in modern econometrics)

1. ECONOMETRIA 2. SERIES CRONOLOGICAS I. TITULO II. SERIE

U-3-420

BALTAGI, Badi H.

Econometrics / Badi H. Baltagi. -- 3ª edición

1. ECONOMETRIA 2. MODELOS ECONOMETRICOS I. TITULO

U-3-421

JOHN, J.A.

Cyclic and computer generated designs / J.A. John and E.R. Williams. -- 2ª edición (Monographs on statistics and applied probability ; 38)

1. ANALISIS ESTADISTICOS 2. APLICACIONES DEL ORDENADOR 3. DISEÑO

U-3-422

TIMM, Neil H.

Applied multivariate analysis / Neil H. Timm (Springer texts in statistics)

1. ANALISIS ESTADISTICO I. TITULO II. SERIE

U-3-423

BRIN, Michael

Introduction to dynamical systems / Michael Brin and Garrett Stuck

1. ANALISIS ESTADISTICO 2. MATEMATICAS I. TITULO

U-3-424

LUDERER, Bernd

Mathematical formulas for economists / Bernd Luderer, Volker Nollau, Klaus Vettters

1. MATEMATICAS 2. ANALISIS ECONOMICO I. TITULO

U-3-425

WOLFRAM, Stephen

The mathematica book / Stephen Wolfram. -- 4ª edición

1. MATEMATICAS 2. APLICACIONES DEL ORDENADOR 3. PROGRAMAS DE ORDENADOR I. TITULO

U-3-426

LIAO, Tim Futing

Interpreting probability models : Logit, probit and other generalized linear models / Tim Futing Liao (Sage University Paper. Quantitative applications in the social sciences ; 101)

1. MODELOS MATEMATICOS 2. ANALISIS ESTADISTICO 3. METODOS ECONOMETRICOS 4. ECONOMETRIA I. TITULO II. SERIE

U-3-427

JOHANSEN, Soren

Likelihood - based inference in cointegrated vector autoregressive models / Soren Johansen (Advanced texts in econometrics)

1. MODELOS ECONOMETRICOS 2. ANALISIS ESTADISTICO 3. ECONOMETRIA

U-3-428

SANCHEZ, David A.

Ordinary differential equations : A brief eclectic tour / David A. Sánchez

1. MATEMATICAS 2. MODELOS MATEMATICOS I. TITULO

U-3-429

BALTAGI, Badi H.

Econometric analysis of panel data / Badi H. Baltagi. -- 2nd ed

1. ECONOMETRIA 2. ANALISIS ECONOMICO I. TITULO

U-3-430

MADDALA, G.S.

Unit roots, cointegration and structural change / G.S. Maddala, In-Moo Kim. -- 1nd ed., reprinted (Themes in modern econometrics)

1. ECONOMETRIA 2. MODELOS ECONOMETRICOS I. TITULO II. SERIE

U-3-431

COST - benefit analysis : Concepts and practice / Anthony E. Boardman... [et al.]. -- 2nd. ed

1. ANALISIS ECONOMICO 2. ANALISIS DE COSTOS Y BENEFICIOS I. BOARDMAN, Anthony E.

U-3-432

PAGAN, Adrián

Nonparametric econometrics / Adrian Pagan, Aman Ullah

(Themes in modern econometrics)

1. ECONOMETRIA 2. ANALISIS ESTADISTICO I. TITULO II. SERIE

U-3-433

WOOLDRIDGE, Jeffrey M.

Econometric analysis of cross section and panel data / : Jeffrey M. Wooldridge

1. ECONOMETRIA 2. ANALISIS ESTADISTICO I. TITULO

U-3-434

LEE, Myoung-jae

Panel data econometrics : Methods - of - moments and limited dependent variables / Myoung-jae Lee

1. ECONOMETRIA 2. MODELOS ECONOMETRICOS I. TITULO

X-3-275.182D

MARTINEZ MARTINEZ, Yolanda

Análisis económico y ambiental de la contaminación por nitratos en el regadío : : Tesis doctoral /
Yolanda Martínez Martínez, [director, José Albiac Murillo]

Tesis doctoral Univ. Zaragoza

1. ECONOMIA AMBIENTAL 2. ANALISIS ECONOMICO 3. POLUCION 4. CONTROL DE LA
CONTAMINACION 5. CONTAMINANTES 6. REGADIO 7. TESIS I. ALBIAC, José II. TITULO

X-3-678

La INVESTIGACION agraria en España : Informe / Agroconsulting Internacional S.A.

Trabajo realizado para Agroconsulting Internacional por el grupo de expertos dirigidos por José
Lostao Camón y del que forman parte Casimiro Herruzo, Luis Miguel Albisu, Pedro Urbano y Ramon Rivas

1. INVESTIGACION 2. POLITICA DE INVESTIGACION 3. ESPAÑA I. LOSTAO CAMON, José
II. HERRUZO, Casimiro III. ALBISU, Luis Miguel IV. URBANO TERRON, Pedro V. RIVAS, Ramón VI.
Agroconsulting Internacional S.A.

X-5-585

FERRER MAYAYO, Luis Miguel

Atlas de patología ovina / Luis Miguel Ferrer, José A. García de Jalón, Marcelo de las Heras

1. ZOOTECNIA 2. MEDICINA VETERINARIA 3. GANADO OVINO 4. PATOLOGIA

AGRICULTURE D'AUJOURD'HUI

LIKELIHOOD-BASED INFERENCE IN COINTEGRATED VECTOR AUTOREGRESSIVE MODELS

SØREN JOHANSEN

OXFORD
UNIVERSITY PRESS

Contents

PART I

THE STATISTICAL ANALYSIS OF COINTEGRATION

1	Introduction	3
1.1	<i>The vector autoregressive model</i>	4
1.2	<i>Building statistical models</i>	5
1.3	<i>Illustrative examples</i>	7
1.4	<i>An outline of the contents</i>	8
1.5	<i>Some further problems</i>	10
2	The Vector Autoregressive Model	11
2.1	<i>The vector autoregressive process</i>	11
2.2	<i>The statistical analysis of the VAR</i>	17
2.3	<i>Misspecification tests</i>	20
2.4	<i>The illustrative examples</i>	23
3	Basic Definitions and Concepts	34
3.1	<i>Cointegration and common trends</i>	34
3.2	<i>Exercises</i>	42
4	Cointegration and Representation of Integrated Variables	45
4.1	<i>From AR to MA representation for $I(1)$ variables</i>	45
4.2	<i>From MA to AR representation for $I(1)$ variables</i>	55
4.3	<i>The MA representation of $I(2)$ variables</i>	57
4.4	<i>Exercises</i>	62
5	The $I(1)$ Models and their Interpretation	70
5.1	<i>The $I(1)$ models for cointegration</i>	70
5.2	<i>The parametrization of the $I(1)$ model</i>	71
5.3	<i>Hypotheses on the long-run coefficients β</i>	72
5.4	<i>Hypotheses on the adjustment coefficients α</i>	77
5.5	<i>The structural error correction model</i>	78
5.6	<i>General hypotheses</i>	79
5.7	<i>Models for deterministic terms</i>	80

5.8	<i>Intervention and seasonal dummies</i>	84
5.9	<i>Exercises</i>	85
6	The Statistical Analysis of $I(1)$ Models	89
6.1	<i>Likelihood analysis of $H(r)$</i>	89
6.2	<i>Models for the deterministic terms</i>	95
6.3	<i>Determination of cointegrating rank</i>	98
6.4	<i>Exercises</i>	100
7	Hypothesis Testing for the Long-Run Coefficients β	104
7.1	<i>Degrees of freedom</i>	104
7.2	<i>Linear restrictions on β</i>	106
7.3	<i>Illustrative examples</i>	112
7.4	<i>Exercises</i>	120
8	Partial Systems and Hypotheses on α	121
8.1	<i>Partial systems</i>	121
8.2	<i>Test of restrictions on α</i>	124
8.3	<i>The duality between β and α_{\perp}</i>	128
8.4	<i>Exercises</i>	131
9	The $I(2)$ Model and a Test for $I(2)$	132
9.1	<i>A statistical model for $I(2)$</i>	132
9.2	<i>A misspecification test for the presence of $I(2)$</i>	134
9.3	<i>A test for $I(2)$ in the Australian data</i>	137

PART II

THE PROBABILITY ANALYSIS OF COINTEGRATION

10	Probability Properties of $I(1)$ Processes	141
10.1	<i>Finite sample results</i>	141
10.2	<i>Asymptotic results</i>	143
10.3	<i>Exercises</i>	149
11	The Asymptotic Distribution of the Test for Cointegrating Rank	151
11.1	<i>Testing $\Pi = 0$ in the basic model</i>	151
11.2	<i>The limit distribution of the test for cointegrating rank</i>	156
11.3	<i>Asymptotic properties of the test for $I(2)$</i>	163
11.4	<i>Exercises</i>	164

12	Determination of Cointegrating Rank	167
12.1	<i>Model without constant term</i>	168
12.2	<i>Model with a constant term</i>	170
12.3	<i>Models with a linear term</i>	175
12.4	<i>Exercises</i>	176
13	Asymptotic Properties of the Estimators	177
13.1	<i>The mixed Gaussian distribution</i>	177
13.2	<i>A convenient normalization of β</i>	179
13.3	<i>Consistency of the estimators</i>	180
13.4	<i>Asymptotic distribution of $\hat{\beta}$ and $\hat{\alpha}$</i>	181
13.5	<i>More asymptotic distributions</i>	187
13.6	<i>Likelihood ratio test for hypotheses on the long-run coefficients β</i>	192
13.7	<i>Exercises</i>	196
14	The Power Function of the Test for Cointegrating Rank under Local Alternatives	201
14.1	<i>Local alternatives</i>	201
14.2	<i>Properties of the process under local alternatives</i>	202
14.3	<i>The local power of the trace test</i>	206
14.4	<i>Exercises</i>	209
15	Simulations and Tables	211
15.1	<i>Simulation of the limit distributions</i>	211
15.2	<i>Simulations of the power function</i>	212
15.3	<i>Tables</i>	214

PART III

APPENDICES

A	Some Mathematical Results	219
A.1	<i>Eigenvalues and eigenvectors</i>	219
A.2	<i>The binomial formula for matrices</i>	228
A.3	<i>The multivariate Gaussian distribution</i>	233
A.4	<i>Principal components and canonical correlations</i>	237
B	Weak Convergence of Probability Measures on R^p and $C[0,1]$	239
B.1	<i>Weak convergence on R^p</i>	239

B.2	<i>Weak convergence on $C[0, 1]$</i>	241
B.3	<i>Construction of measures on $C[0, 1]$</i>	244
B.4	<i>Tightness and Prohorov's theorem</i>	245
B.5	<i>Construction of Brownian motion</i>	247
B.6	<i>Stochastic integrals with respect to Brownian motion</i>	248
B.7	<i>Some useful results for linear processes</i>	250
	References	255
	Subject Index	261
	Author Index	266

Econometric Analysis of
Panel Data

Second edition

Badi H. Baltagi

JOHN WILEY & SONS, LTD

Chichester • New York • Weinheim • Brisbane • Singapore • Toronto

Contents

Preface	ix
1 Introduction	1
1.1 Panel Data: Some Examples	1
1.2 Why Should We Use Panel Data? Their Benefits and Limitations	5
Note	9
2 The One-way Error Component Regression Model	11
2.1 Introduction	11
2.2 The Fixed Effects Model	12
2.3 The Random Effects Model	15
2.4 Maximum Likelihood Estimation	20
2.5 Prediction	22
2.6 Examples	23
2.7 Selected Applications	26
2.8 Computational Note	27
Notes	27
Problems	27
3 The Two-way Error Component Regression Model	31
3.1 Introduction	31
3.2 The Fixed Effects Model	31
3.3 The Random Effects Model	33
3.4 Maximum Likelihood Estimation	39

3.5	Prediction	41
3.6	Examples	42
3.7	Selected Applications	44
	Notes	45
	Problems	45
4	Test of Hypotheses with Panel Data	51
4.1	Tests for Poolability of the Data	51
4.2	Tests for Individual and Time Effects	58
4.3	Hausman's Specification Test	65
4.4	Further Reading	72
	Notes	73
	Problems	73
5	Heteroskedasticity and Serial Correlation in the Error Component Model	77
5.1	Heteroskedasticity	77
5.2	Serial Correlation	81
	Notes	102
	Problems	102
6	Seemingly Unrelated Regressions with Error Components	105
6.1	The One-way Model	105
6.2	The Two-way Model	107
6.3	Applications and Extensions	108
	Problems	109
7	Simultaneous Equations with Error Components	111
7.1	Single Equation Estimation	111
7.2	System Estimation	115
7.3	Endogenous Effects	118
7.4	Empirical Illustration	122
7.5	Extensions	124
	Notes	125
	Problems	126

8	Dynamic Panel Data Models	129
8.1	Introduction	129
8.2	The Arellano and Bond Study	131
8.3	The Arellano and Bover Study	137
8.4	The Ahn and Schmidt Study	140
8.5	The Blundell and Bond Study	142
8.6	The Keane and Runkle Study	144
8.7	Recent Developments	146
8.8	Empirical Illustration	150
8.9	Further Reading	153
	Notes	155
	Problems	156
9	Unbalanced Panel Data Models	159
9.1	Introduction	159
9.2	The Unbalanced One-way Error Component Model	159
9.3	The Unbalanced Two-way Error Component Model	168
9.4	Testing for Individual and Time Effects Using Unbalanced Panel Data	171
9.5	The Unbalanced Nested Error Component Model	175
	Notes	178
	Problems	179
10	Special Topics	183
10.1	Measurement Error and Panel Data	183
10.2	Rotating Panels	187
10.3	Pseudo-panels	189
10.4	Alternative Methods of Pooling Time Series of Cross-section Data	193
10.5	Spatial Panels	195
10.6	Short-run vs Long-run Estimates in Pooled Models	197
10.7	Heterogeneous Panels	198
	Notes	202
	Problems	202

11 Limited Dependent Variables and Panel Data	205
11.1 Fixed and Random Logit and Probit Models	206
11.2 Fixed and Random Tobit Models	212
11.3 Simulation Estimation of Limited Dependent Variable Models with Panel Data	214
11.4 State Dependence and Heterogeneity	215
11.5 Selection Bias in Panel Data	219
11.6 Empirical Applications	225
11.7 Further Reading	226
Notes	228
Problems	229
12 Nonstationary Panels	233
12.1 Introduction	233
12.2 Panel Unit Root Tests	235
12.3 Spurious Regression in Panel Data	243
12.4 Panel Cointegration Tests	247
12.5 Estimation and Inference in Panel Cointegration Models	252
12.6 Further Reading	254
Notes	254
Problems	255
References	257
Index	285

PANEL DATA ECONOMETRICS

METHODS-OF-MOMENTS AND LIMITED DEPENDENT VARIABLES

Myoung-jae Lee

ACADEMIC PRESS

An Elsevier Science Imprint

San Diego San Francisco New York Boston London Sydney Tokyo

CONTENTS

PREFACE xi

1

INTRODUCTION TO PANEL DATA ISSUES

1.1	Introduction	1
1.2	Extra Time Dimension	2
1.3	Temporal Moment Conditions	4
1.4	Time-Varying Parameters	6
1.5	The Unit-Specific Term and Its Removal by Differencing	8
1.6	Other Ways to Remove Unit-Specific Term	9
1.7	Dynamic Features and Restrictions on Parameters	11
1.8	Error Term Structure	13

2

METHODS-OF-MOMENTS FOR PANEL LINEAR MODELS

2.1	Introduction	15
2.2	Review of Cross-Section IVE and GMM	18
2.3	Panel Linear Model	22

2.4	Moment Conditions and Panel IVE and GMM	25
2.4.1	Four Moment Conditions	25
2.4.2	Panel LSE, IVE and GMM	27
2.4.3	Setting Up Instrument Matrices	29
2.5	IVE with Differenced Regressors	30
2.5.1	Classifying Regressors and Instrument Matrix	31
2.5.2	Linear Projection and Purifying Regressors	33
2.5.3	An Empirical Example on Wage	35
2.6	IVE with Differenced Errors	36
2.6.1	Within-Group Estimator	36
2.6.2	An Empirical Example on Crime and Punishment	39
2.6.3	Between-Group Estimator	41
2.7	An Empirical Example on Production Function	43

3

TOPICS FOR PANEL LINEAR MODELS

3.1	Introduction	49
3.2	Wave-by-Wave Estimation and Time-Varying Parameters	50
3.2.1	Wave-by-Wave Estimation	51
3.2.2	Minimum Distance Estimation (MDE)	52
3.2.3	Wage Example and Time-Varying Parameters	55
3.3	Minimum Distance Estimation for Related-Effect	57
3.4	Dynamic Models	61
3.5	Spatial Dependence and Its Tests Using Panel Data	65
3.6	Efficiency Gain, Wald-Type Tests, Panel VAR, and Long-Run and Short-Run Effects	69
3.6.1	Efficiency Gain for Endogenous Regressors	69
3.6.2	Wald-Type Specification Tests	73
3.6.3	Quasi-Differencing and Panel Vector-Autoregression (VAR)	75
3.6.4	Pool or Not and Long-Run versus Short-Run Effects	77

4

PANEL DATA ESTIMATORS
FOR BINARY RESPONSES

4.1	Introduction	81
4.2	Conditional Logit for $T = 2$	83
4.2.1	Cross-section Logit and Panel Conditional Logit	84
4.2.2	Remarks and an Empirical Example on Health Care Demand	87
4.2.3	Review of Kernel Nonparametric Estimation	89

4.3	Conditional Logit for $T \geq 3$	92
4.3.1	Genuine Conditional Logit for $T \geq 3$	93
4.3.2	MDE with Conditional Logits for $T = 3$	94
4.3.3	SUM-Type Approach and Remarks	95
4.3.4	Lagged Response as a Regressor	96
4.4	Panel Probit	99
4.4.1	Panel Probit with MDE	99
4.4.2	Panel Probit with Nonlinear GMM	103
4.4.3	Panel Probit with Predeterminedness	104
4.5	Root- Nh Consistent Estimators	105
4.6	A Root- N Consistent Estimator	110
4.7	An Empirical Example for Panel Probit and Conditional Logit	114

5

PANEL DATA ESTIMATORS FOR LIMITED RESPONSES

5.1	Introduction	119
5.2	Review of Cross-Section Nonlinear IVE and GMM	120
5.3	Nearly Parametric Methods for Count Response	124
5.3.1	Poisson and Negative Binomial	125
5.3.2	Conditional Poisson and Conditional Negative Binomial	128
5.3.3	An Empirical Example on Health Care Demand	131
5.4	Moment-Based Estimators for Count Responses	132
5.4.1	GMM without Additive Lagged Response	133
5.4.2	GMM with Additive Lagged Response	135
5.4.3	Quasi-Conditional MLE	138
5.5	Root- N Consistent Estimator for Censored Response	140
5.6	Conditional Logit for Multinomial Responses	143
5.7	An Empirical Example for Count Response	148

6

PANEL DATA AND SAMPLE SELECTION MODELS

6.1	Introduction	153
6.2	Cross-Section Sample Selection Models and Two Estimators	155
6.2.1	Three Sample Selection Models	155
6.2.2	Heckman's Two-Stage Estimator	157
6.2.3	A Semiparametric Estimator	159
6.2.4	An Empirical Example on Wage	162
6.3	Panel Sample Selection Models and Heckman's Two-Stage Analogs	163

6.3.1	Three Panel Sample Selection Models	164
6.3.2	Two Censored-Selection Estimators	165
6.3.3	A Binary-Selection Estimator	167
6.3.4	An Empirical Example on Wage for Binary-Selection	169
6.4	Two First-Difference Estimators for Censored Selection	171
6.5	A Root- Nh Consistent Estimator for Binary Selection	175
6.6	LSE on Trimmed and Differenced Panel due to Attrition	178

Preámbulo	XI
Prólogo	XIII
Contenido	XVII
Introducción	1
1. Identificación del Sistema de Investigación Agraria	1
2. El marco orgánico general de la Investigación Agraria	4
2.1. La política de investigación en la Unión Europea	5
2.1.1. El espacio europeo de investigación	6
2.1.2. Los Programas Marco	8
2.1.3. La investigación agraria en la política común de I+D ...	11
2.1.4. Reflexión final	11
2.2. El marco orgánico nacional	13
2.2.1. El sistema nacional de Ciencia y Tecnología CTE	14
2.2.2. Los Planes Nacionales de Investigación	20
2.2.3. La investigación agraria en el sistema nacional CTE ..	24
2.2.4. Reflexión final	25
3. Indicadores básicos del Sistema Español de Investigación Agraria	
SEIA	26
3.1. Recursos financieros	27
3.2. Recursos humanos	28
3.3. Recursos totales	29
3.4. Resultados científicos	29
3.5. Resultados tecnológicos	30
Primera parte: El sistema español de Investigación Agraria	
1. La Estructura del Sistema Investigador	33
1.1. Qué es la estructura	33
1.2. Estructura de los subsistemas	35
1.2.1. La estructura del subsistema IAP	35
1.2.2. La estructura del subsistema IAU	60
1.2.3. La estructura del subsistema IAPE	67

2. Los recursos de la Investigación Agraria en España	85
2.1. Criterios de análisis	85
2.2. Los recursos en el subsistema IAP	87
2.2.1. El Instituto Nacional de Investigación y Tecnología Agraria y Alimentaria	87
2.2.2. El CSIC	92
2.2.3. Las Comunidades Autónomas	98
2.2.4. Los recursos del subsistema IAU	105
2.2.5. Los recursos del subsistema IAPE	109
2.2.6. El presupuesto integrado de la Investigación Agraria ..	112
3. Los objetivos y los resultados	115
3.1. Significación	115
3.1.1. Los objetivos	115
3.1.2. Los resultados	116
3.2. Los objetivos y resultados de los subsistemas	117
3.2.1. Investigación Pública	117
3.2.2. Investigación Universitaria	120
3.2.3. Investigación Privada	123
3.3. Reflexión final	128

Segunda parte: **Sistemas referentes de Investigación Agraria**

4. Justificación	131
4.1. La razón del estudio comparado	131
4.2. El ámbito internacional	132
5. Los sistemas de Investigación Agraria en Europa y Estados Unidos ...	135
5.1. Alemania	135
5.2. Francia	138
5.3. Holanda	140
5.4. Irlanda	143
5.5. Reino Unido	144
5.6. Estados Unidos de América	146
6. Las lecciones del estudio comparado	151
6.1. Los componentes del sistema según los países de referencia	151
6.1.1. Estructura	151

6.1.2.	Recursos	153
6.1.3.	Objetivos	156
6.2.	Las tendencias mundiales en la conducción de la Investigación Agraria	157

Tercera parte: Un modelo para la Investigación Agraria en España

7.	Justificación. La singularidad de la Investigación Agraria	163
7.1.	¿Porqué un modelo de IAE?	163
7.2.	La singularidad de la Investigación Agraria	164
7.3.	Reflexiones derivadas	165
7.4.	Aclaraciones metodológicas	165
8.	Los requisitos de la función investigadora	167
8.1.	Pensamiento, ciencia, investigación	167
8.2.	La unidad de la ciencia y la intercomunicación	168
8.3.	El papel social de la función investigadora	172
8.4.	La investigación y las ciencias complejas de síntesis. El caso de la Agronomía	174
8.5.	Una precisión terminológica. La investigación finalista	178
8.6.	El circuito I+D+I en la Investigación Agraria	181
8.7.	El investigador. Libertad y responsabilidad	183
8.8.	Sistema y método	184
9.	Los requerimientos (exigencias) del sector agrario	187
9.1.	Lo agrario como foco de interés o materia de Investigación	187
9.2.	Qué cosa sea el Hecho Agrario	189
9.3.	El ámbito de actuación liminar del sistema de investigación agraria	191
9.4.	La ruralidad en el actual contexto socio económico	194
9.4.1.	La problemática explotación-empresa agraria	195
9.4.2.	Los agronegocios	196
9.4.3.	La población rural	196
9.5.	Las grandes áreas de la Investigación Agraria	197
9.6.	La participación del sector	200
9.7.	El papel relevante de las Administraciones Públicas	202
9.8.	La fijación de objetivos	204
9.9.	Los límites del sistema	205

10. Las propiedades del modelo	209
10.1. El camino	209
10.2. Las propiedades	210
10.2.1. Relativas a la esencia del modelo	210
10.2.2. Relativas a la construcción del modelo	213
10.3. El sistema actual ante el modelo	217
10.4. La opinión de los agentes	220
11. Directrices y recomendaciones	225
11.1. Qué se pretende	225
11.2. Directrices de orientación	226
11.3. Recomendaciones	232
Epílogo	235
Apéndice	237
A.1. Siglas y acrónimos	239
A.2. Bibliografía de referencia	241

The RFF Reader

IN ENVIRONMENTAL AND RESOURCE MANAGEMENT

EDITED BY WALLACE E. OATES

University of Maryland
and

Resources for the Future

RESOURCES FOR THE FUTURE • WASHINGTON, DC

Contents

Foreword	ix
Paul R. Portney	
Preface	xi
Wallace E. Oates	
An Economic Perspective on Environmental and Resource Management: An Introduction	xiii
Wallace E. Oates	
Part 1. Science and Environmental Policy	
1. What the Science Says: How We Use It and Abuse It To Make Health and Environmental Policy	3
James Wilson and J.W. Anderson	
2. Using Science Soundly: The Yucca Mountain Standard	7
Robert W. Fri	
Part 2. Benefit-Cost Analysis	
3. Economics Clarifies Choices about Managing Risk	15
A. Myrick Freeman III and Paul R. Portney	
4. Does Environmental Policy Conflict with Economic Growth?	21
David Gordiner and Paul R. Portney	
5. Health-Based Environmental Standards: Balancing Costs with Benefits	27
Paul R. Portney and Winston Harrington	
6. Discounting the Future: Economics and Ethics	35
Timothy J. Brennan	
7. When Is a Life Too Costly To Save? The Evidence from Environmental Regulations	43
George L. Van Houtven and Maureen L. Crapper	

8. *Assessing Damages from the Valdez Oil Spill* 51
A. Myrick Freeman III and Raymond J. Kopp
9. *The Faustian Bargain* 55
Allen V. Kneese

Part 3. Environmental Regulation

10. *Taxing Pollution: An Idea Whose Time Has Come?* 63
Wallace E. Oates
11. *Regulatory Reform in Air Pollution Control* 69
Tom Tietenberg
12. *Trading Emissions To Clean the Air: Exchanges Few but Savings Many* 75
Dallas Burtraw
13. *Shifting Gears: New Directions for Cars and Clean Air* 81
Winston Harrington and Margaret A. Walls
14. *Will Speeding the Retirement of Old Cars Improve Air Quality?* ... 89
Anna Alberini, David Edelstein, and Virginia D. McConnell
15. *A Voluntary Approach to Environmental Regulation: The 33/50 Program* 97
Seema Arora and Timothy N. Cason
16. *Cleaning Up Superfund* 105
Paul R. Portney and Katherine N. Probst
17. *Reducing Carbon Emissions: Interactions with the Tax System Raise the Cost* 111
Ian W.H. Parry

Part 4. Environmental Federalism

18. *Thinking about Environmental Federalism* 119
Wallace E. Oates
19. *Environmental Federalism* 123
Robert M. Schwab

Part 5. Resource Management

20. *Environmental Values and Water Use* 131
Kenneth D. Frederick

21. **Water as a Source of International Conflict**137
Kenneth D. Frederick
22. **Marketing Water: The Obstacles and the Impetus**143
Kenneth D. Frederick
23. **Ecosystem Management: An Uncharted Path for Public Forests** ..149
Roger A. Sedjo
24. **The Global Environmental Effects of Local Logging Cutbacks**155
Roger A. Sedjo
25. **Twenty Years after the Energy Crisis: What Lessons Were Learned?**161
Douglas R. Bahi and Joel Darmstadter
- Part 6. Biodiversity**
26. **Preserving Biodiversity as a Resource**171
Roger A. Sedjo
27. **Biodiversity Prospecting: Shopping the Wilds Is Not the Key to Conservation**177
R. David Simpson
28. **Contracts for Transferring Rights to Indigenous Genetic Resources**183
R. David Simpson and Roger A. Sedjo
- Part 7. Environmental Justice**
29. **Unpopular Neighbors: Are Dumps and Landfills Sited Equitably?**191
Vicki Been
30. **Measuring Environmental Equity with Geographical Information Systems**197
Theodore S. Glickman
31. **Protest, Property Rights, and Hazardous Waste**205
Robert Cameron Mitchell and Richard T. Carson
- Part 8. Global Climate Change**
32. **A "Crash Course" in Climate Policy**213
J.W. Anderson

33. **Climate Change and Its Consequences**225
Michael A. Toman, John Firor, and Joel Darmstadter
34. **Adapting to Climate Change**231
Pierre R. Crosson and Norman J. Rosenberg
35. **A Framework for Climate Change Policy**237
Michael A. Toman
36. **Global Trade in Greenhouse Gas Control: Market Merits and Critics' Concerns**243
Jonathan Baert Wiener

Part 9. Sustainable Development

37. **The Difficulty in Defining Sustainability**251
Michael A. Toman
38. **Sustainable Agriculture**257
Pierre R. Crosson
39. **An Almost Practical Step toward Sustainability**263
Robert Salow

Part 10. Environmental Problems in Developing and Transitional Countries

40. **Environmental Policies, Economic Restructuring, and Institutional Development in the Former Soviet Union**275
Michael A. Toman and R. David Simpson
41. **The Allocation of Environmental Liabilities in Central and Eastern Europe**281
James Boyd
42. **Cost-Effective Control of Water Pollution in Central and Eastern Europe**289
Charles M. Paulsen
43. **Chongqing: A Case Study of Environmental Management during a Period of Rapid Industrial Development**295
Walter O. Spafford Jr.
- Index299

**TRATADO DE FRUTICULTURA
PARA ZONAS ÁRIDAS Y SEMIÁRIDAS

Índice

CAPÍTULO I. ALGARROBO

1. Introducción	19
2. Situación del cultivo del algarrobo	22
3. Referencias históricas	26
4. Origen y sistemática	30
4.1. Origen del cultivo	30
4.2. Taxonomía y sistemática botánica	31
5. Morfología y fisiología	33
5.1. Morfología	33
5.1.1. Raíz	33
5.1.2. Tronco	34
5.1.3. Ramas, brotes y yemas	34
5.1.4. Hojas	36
5.1.5. Inflorescencias y flores	37
5.1.6. Fruto: algarroba o garrofa	40
5.1.7. Semilla: garrofín	42
5.2. Fisiología	43
5.2.1. Reposo invernal y crecimientos	43
5.2.2. Floración, polinización, fecundación y cuajado	44
5.2.2.1. Floración	44
5.2.2.2. Polinización	45
5.2.2.3. Fecundación	46
5.2.2.4. Cuajado	46
5.2.3. Evolución del fruto y su maduración	46
5.3. Fenología del algarrobo	47
6. Importancia del cultivo en España	48
7. Ecología básica del algarrobo	57
7.1. Exigencias	57
7.2. Ciclo biológico del algarrobo	58
7.3. Requerimientos ecológicos básicos	59
8. Cultivo y manejo del algarrobo	62
8.1. Diseño de plantación	62
8.2. Preparación del suelo	64
8.3. Abonado de fondo	65
8.4. Plantación del algarrobo	66
8.5. Podas del algarrobo	67
8.6. Fertilización y riego	72

8.7. Técnicas de mantenimiento del suelo	75
8.8. Uso de fitoreguladores	76
8.9. Recolección	76
9. Multiplicación y viverismo del algarrobo	78
9.1. Técnicas de reproducción y multiplicación	78
9.2. Mejora genética del algarrobo	85
10. Materiales vegetales. Caracterización y tipificación	86
10.1. Normas de caracterización	86
10.2. Normas de calidad	87
11. Estructura varietal	89
11.1. Clasificaciones y estructura varietal de las variedades	89
11.2. Descripción básica de algunas variedades importantes	96
11.3. Resumen de algunas características pomométricas	120
12. Principales plagas y enfermedades del algarrobo	123
12.1. Clasificación básica de las principales enfermedades y plagas	123
12.2. Descripción básica de las principales enfermedades fúngicas y bacterianas	125
12.3. Descripción básica de las principales plagas	131
13. Adversidades, fisiopatías y alteraciones no parasitarias en algarrobo	137
14. Usos y aplicaciones de la algarroba y del algarrobo	137
15. Caracterización del algarrobo	153
15.1. Descriptores de la especie	162

CAPÍTULO II. GRANADO

1. Introducción	167
2. Referencias históricas	170
3. Origen y sistemática	171
4. Morfología, fenología y fisiología	173
4.1. Morfología	173
4.1.1. Raíz	174
4.1.2. Tronco	174
4.1.3. Ramos	174
4.1.4. Yemas	175
4.1.5. Hojas	176
4.1.6. Flores	178
4.1.6.1. Pétalos	182
4.1.6.2. Sépalos	183
4.1.6.3. Estambres	183
4.1.6.4. Pistilo	184
4.1.6.5. Carpelos	184

4.1.6.6. Clasificación de la flor del granado	187
4.1.6.7. Anomalfías en las flores	189
4.1.7. Frutos	190
4.2. Fenología	194
4.2.1. Introducción	194
4.2.2. Estados fenológicos	195
4.3. Fisiología	199
4.3.1. Crecimiento	199
4.3.2. Floración y fructificación	201
4.3.2.1. Antesis	204
4.3.2.2. Dehiscencia	205
4.3.2.3. Criterio de plena floración	205
4.3.3. Otros aspectos de interés en la fisiología del granado	207
5. Importancia del cultivo en España	210
5.1. Introducción	210
5.2. Evolución del cultivo en España	210
5.3. Evolución de la producción y de la comercialización española	213
5.3.1. Características del sector exportador	214
5.4. Tendencias y conclusiones	217
6. Características generales de las principales zonas de cultivo en España	218
6.1. Ecología del granado	218
6.2. Estructura socioeconómica de las zonas de cultivo	221
6.2.1. Estructura socioeconómica de Elche (Alicante)	222
6.2.2. Estructura socioeconómica de Albufera (Alicante)	223
6.3. Suelos de las principales zonas de cultivo	224
6.3.1. El suelo en el campo de Elche	224
6.3.2. El suelo en el campo de Albufera	225
6.4. El clima en las principales zonas de cultivo	225
6.4.1. El clima de Elche	225
6.4.2. El clima de Albufera	227
7. El material vegetal	228
7.1. Introducción	228
7.2. Patrones	229
7.3. Variedades españolas de granado	233
7.3.1. Características comunes de los grupos varietales establecidos	239
7.3.2. Clasificación de las variedades por su interés agronómico comercial	239
7.3.3. Descripción de algunas variedades	240
7.3.3.1. Ejemplo de ficha varietal: clon ME15	243
7.3.3.2. Descripción de otras variedades en su zona de origen: VAI, PTO8* y BAI**	245
7.3.4. Algunas características diferenciales entre los grupos varietales	246

7.3.5. Características organolépticas de otras variedades consideradas muy recomendables (VMR)	247
7.4. Variedades extranjeras de granado	247
7.5. Propagación	249
7.5.1. Propagación por semilla	249
7.5.2. Multiplicación asexual	250
7.5.2.1. Propagación por estaquilla leñosa	250
7.5.2.1.1. Introducción	250
7.5.2.1.2. Preparación de las estaquillas y ensayos	251
7.5.2.2. Propagación de estaquillas herbáceas y ensayos	259
7.5.2.3. Estudio de la propagación comercial de granado mediante estaquillado leñoso y herbáceo	264
7.5.2.4. Propagación por pollizos	267
7.5.2.5. Injerto	267
8. Necesidades de agua en el cultivo del granado	268
9. Necesidades de elementos fertilizantes	270
9.1. Análisis foliar	274
10. Estudios básicos para la tipificación pomológica de granado	276
10.1. Parámetros estudiados	276
11. Plantación del granado	280
11.1. Preparación del terreno	280
11.2. Abonado de fondo	280
11.3. Marco de plantación	281
11.4. Plantación	281
11.5. Riego de plantación	285
12. Cultivo del granado	285
12.1. Labores de cultivo	285
12.2. Aclareo de frutos	286
13. Conducción o poda del granado	287
13.1. Poda de formación	288
13.2. Poda de producción	289
13.3. Poda de rejuvenecimiento	291
14. Plagas, enfermedades, malas hierbas, fisiopatías y otros	292
14.1. Plagas	292
14.1.1. Pulgones	293
14.1.2. Cotonet	295
14.1.3. Barreneta	296
14.1.4. Barrenillo	296
14.1.5. Barrena del granado	297
14.1.6. Cochinilla de la tizne	299
14.1.7. Caparreta blanca	301

14.1.8. Mosca de las frutas	301
14.1.9. Ácaro rojo del granado	301
14.1.10. Eriófido del enrollado de las hojas	303
14.1.11. Nematodos	304
14.1.12. Caracoles	304
14.1.13. Ratas	304
14.2. Enfermedades	304
14.2.1. Corazón negro	305
14.2.2. Escaldado del tronco	305
14.2.3. Manchas necróticas	307
14.2.4. Bacterias	308
14.3. Malas hierbas	308
14.4. Fisiopatías y otros accidentes	309
14.4.1. Agrietado	309
14.4.2. Albardado	312
14.4.3. Rozaduras de frutos o rameo	315
14.4.4. Granizo, pedrisco y otros	316
14.4.5. Salinidad y clorosis férrica	317
14.5. Fitotoxicidades y productos recomendados	317
15. Recolección	318
15.1. Sistemas de compraventa del producto	319
15.2. Época de recolección	319
15.3. Método de recolección	319
15.4. Rendimiento	321
16. Proceso de manipulación	323
16.1. Descripción del proceso de manipulación	324
16.2. Conservación frigorífica	326
16.3. Alteraciones durante la conservación	328
16.3.1. Enfermedades fúngicas	328
16.3.2. Alteraciones fisiológicas	328
17. Norma de calidad para granadas	329
17.1. Norma de calidad. Orden de 8 de Octubre de 1981 por la que se dicta la norma de calidad para el comercio exterior de granadas	329
17.2. Disposiciones complementarias a la norma de calidad: Resolución de 8 de Octubre de 1981, de la Dirección General de la Exportación, por la que se dictan disposiciones complementarias a la norma de calidad para el comercio exterior de granadas	333
18. Industrialización, usos y productos derivados	335
18.1. Composición química de los frutos e interés de la corteza	335
18.1.1. Antocianos	338
18.1.2. Azúcares	342

18.1.3. Ácidos orgánicos	343
18.1.4. Sólidos solubles, pH y acidez valorable	344
18.1.5. Ácidos grasos	345
18.1.6. Características físicas y químicas de 2 variedades españolas de granada	347
18.2. Interés de la corteza	348
18.3. Aplicaciones alimentarias	349
18.4. Aplicaciones dietéticas y terapéuticas	352
18.5. Aplicaciones industriales	359
18.6. Otras aplicaciones	361
19. Descriptores de la especie	361

CAPÍTULO III. JINJOLERO

1. Introducción	367
2. Referencias históricas	368
3. Origen y sistemática	369
4. Morfología, fenología y fisiología	371
4.1. Morfología	371

Guía
de las frutas
cultivadas

Identificación y cultivo

NOMBRE CIENTÍFICO: Los nombres científicos varían con excesiva frecuencia, aumentando el número de sinónimos y creando una nomenclatura confusa. Por ello para cada especie se ha indicado el nombre técnico aprobado de forma más reciente, seguido de otros nombres alternativos muy empleados pero algo desfasados.

NOMBRE CASTELLANO: Cuando existen, he seleccionado los más comunes y extendidos, citándose tanto los nombres conocidos en España como aquellos procedentes de Hispanoamérica u otras zonas castellanohablantes. Dado el carácter internacional de esta obra he creído conveniente obviar los nombres en otras lenguas ibéricas (catalán, gallego, vasco, valenciano...).

ESPECIES PRÓXIMAS: Puesto que de cada especie tratada suelen existir otras especies próximas del mismo género o de otro género próximo, y dado la limitada extensión de este libro, en este apartado se citan únicamente aquellas que tienen mayor importancia.

DISTRIBUCIÓN: En este apartado se indica tanto el origen de la especie en cuestión como su distribución mundial actual, y si su cultivo está muy extendido los principales países productores de dicha fruta.

DESCRIPCIÓN: He intentado dar una descripción completa pero muy resumida de las características botánicas de la especie vegetal y de sus frutos, destacando principalmente el porte, las hojas, flores, frutos y sistema radicular.

FLORACIÓN Y MADURACIÓN: Se indica el período de apertura de las flores y de la plena maduración de sus frutos. Se debe tener en cuenta que estos periodos son orientativos, al estar influenciados por zonas de cultivo, condiciones edafológicas, climáticas, de cultivo ...

CLIMA: Además de señalar el clima natural de su zona de origen, se indican las distintas condiciones climáticas bajo las que se puede cultivar cada especie.

SUELO: Al igual que las condiciones climáticas se describen las distintas condiciones edafológicas en las que puede vegetar cada planta.

CULTIVO: Se indican los principales cuidados de cultivo que requiere cada planta, con especial interés en aspectos tales como plantación, sistema de cultivo, riego y abonado, poda, plagas y enfermedades ...

VARIEDADES: Puesto que es prácticamente imposible recopilar todas las variedades (cultivares) que se cultivan en todo el mundo de cada especie, he seleccionado las más cultivadas y/o las más importantes en España.

MULTIPLICACIÓN: Pequeña descripción de los distintos métodos de propagación utilizados para cada especie, tanto sexuales como asexuales. En este apartado se describen también los principales patrones que se emplean en la agricultura para cada especie.

UTILIZACIÓN Y COMPOSICIÓN: Para tener un conocimiento completo de cada especie, he creído conveniente agregar este apartado en el que se indican tanto las principales aplicaciones que para el hombre tiene cada planta, como las distintas formas de consumo que se hace de sus frutos, indicando finalmente la composición fundamental de los frutos desde un punto de vista dietético y alimentario.

2.6.1	Unbiasedness	43
2.6.2	Consistency	43
2.6.3	Asymptotic Normality	48
2.6.4	Bibliographical Summary (Approximate and Asymptotic Results)	48
2.7	Choices of Window Width and Kernel; Further Discussion	49
2.7.1	Choice of h	49
2.7.2	Choice of Higher Order Kernels	54
2.7.3	Choice of h for Density Derivatives	56
2.8	Multivariate Density Estimation	57
2.9	Testing Hypotheses about Densities	60
2.9.1	Comparison with a Known Density Function	61
2.9.2	Testing for Symmetry	67
2.9.3	Comparison of Unknown Densities	68
2.9.4	Testing for Independence	69
2.10	Examples	71
2.10.1	Density of Stock Market Returns	71
2.10.2	Estimating the Dickey-Fuller Density	74
3	Conditional Moment Estimation	78
3.1	Introduction	78
3.2	Estimating Conditional Moments by Kernel Methods	79
3.2.1	Parametric Estimation	80
3.2.2	Nonparametric Estimation: A "Local" Regression Approach	81
3.2.3	Kernel-Based Estimation: A Formal Derivation	83
3.2.4	A General Nonparametric Estimator of $m(x)$	84
3.2.5	Unifying Nonparametric Estimators	86
3.2.6	Estimation of Higher Order Conditional Moments	95
3.3	Finite-Sample Properties	95
3.3.1	Approximate Results: Stochastic x	96
3.3.2	The Local Linear Regression Estimator	104
3.3.3	Combining Parametric and Nonparametric Estimators	106
3.4	Asymptotic Properties	108
3.4.1	Asymptotic Properties of the Kernel Estimator with Independent Observations	108
3.4.2	Asymptotic Properties of the Kernel Estimator with Dependent Observations	115
3.5	Bibliographical Summary (Asymptotic Results)	116

3.6	Implementing the Kernel Estimator	118
3.6.1	Choice of Window Width	118
3.7	Robust Nonparametric Estimation of Moments	122
3.8	Estimating Conditional Moments by Series Methods	123
3.9	Asymptotic Properties of Series Estimators with Independent Observations	126
3.10	Asymptotic Properties of Series Estimators with Dependent Observations	133
3.11	Implementing the Estimator	133
3.12	Imposing Structure on the Conditional Moments	137
3.12.1	Generalized Additive Models	137
3.12.2	Projection Pursuit Regression	139
3.12.3	Neural Networks	140
3.13	Measuring the Affinity of Parametric and Nonparametric Models	141
3.14	Examples	150
3.14.1	A Model of Strike Duration	150
3.14.2	Earnings-Age Profiles	152
3.14.3	Review of Applied Work on Nonparametric Regression	157
4	Nonparametric Estimation of Derivatives	160
4.1	Introduction	160
4.2	The Model and Partial Derivative Formulae	161
4.3	Estimation	164
4.3.1	Estimation of Partial Derivatives by Kernel Methods	164
4.3.2	Estimation of Partial Derivatives by Series Methods	167
4.3.3	Estimation of Average Derivatives	167
4.3.4	Local Linear Derivative Estimators	170
4.3.5	Pointwise Versus Average Derivatives	172
4.4	Restricted Estimation and Hypothesis Testing	173
4.4.1	Imposing Linear Equality Restriction on Partial Derivatives	174
4.4.2	Imposing Linear Inequality Restrictions	175
4.4.3	Hypothesis Testing	176
4.5	Asymptotic Properties of Partial Derivative Estimators	177
4.5.1	Asymptotic Properties of Kernel-Based Estimators	178
4.5.2	Series-Based Estimators	182
4.5.3	Higher Order Derivatives	182
4.5.4	Local Linear Estimators	183

7.7	Some Specification Tests for Discrete Choice Models	297
7.8	Applications	299
8	Semiparametric Estimation of Selectivity Models	300
8.1	Introduction	300
8.2	Some Parametric Estimators	301
8.3	Some Sequential Semiparametric Estimators	304
8.3.1	Cosslett's Dummy Variable Method	306
8.3.2	Powell's Kernel Estimator	306
8.3.3	Newey's Series Estimator	308
8.3.4	Newey's GMM Estimator	310
8.4	Maximum Likelihood-Type Estimators	310
8.4.1	Gallant and Nychka's Estimator	310
8.4.2	Newey's Estimator	311
8.5	Estimation of the Intercept in Selection Models	315
8.6	Applications of the Estimators	315
8.7	Conclusions	316
9	Semiparametric Estimation of Censored Regression Models	317
9.1	Introduction	317
9.2	Some Parametric Estimators	319
9.3	Semiparametric Efficiency Bounds for the Censored Regression Model	322
9.4	The Kaplan-Meier Estimator of the Distribution Function of a Censored Random Variable	324
9.5	Semiparametric Density-Based Estimators	326
9.5.1	The Semiparametric Generalized Least Squares Estimator (SGLS)	327
9.5.2	Estimators Replacing Part of the Sample	328
9.5.3	Maximum Likelihood Type Estimators	329
9.6	Semiparametric Nondensity-Based Estimators	329
9.6.1	Powell's Censored Least Absolute Deviation (CLAD) Estimator	330
9.6.2	Powell's (1986a) Censored Quantile Estimators	333
9.6.3	Powell's Symmetrically Censored Least Squares Estimators	333
9.6.4	Newey's Efficient Estimator under Conditional Symmetry	336
9.7	Comparative Studies of the Estimators	337
10	Retrospect and Prospect	339

4.7	Implementing the Derivative Estimators	189
4.8	Illustrative Examples	190
4.8.1	A Monte Carlo Experiment with a Production Function	190
4.8.2	Earnings–Age Relationship	192
4.8.3	Review of Applied Work	194
5	Semiparametric Estimation of Single-Equation Models	196
5.1	Introduction	196
5.2	Semiparametric Estimation of the Linear Part of a Regression Model	198
5.2.1	General Results	198
5.2.2	Diagnostic Tests after Nonparametric Regression	208
5.2.3	Semiparametric Estimation of Some Macro Models	210
5.2.4	The Asymptotic Covariance Matrix of SP Estimators without Asymptotic Independence	212
5.3	Efficient Estimation of Semiparametric Models in the Presence of Heteroskedasticity of Unknown Form	214
5.4	Conditions for Adaptive Estimation	217
5.5	Efficient Estimation of Regression Parameters with Unknown Error Density	225
5.5.1	Efficient Estimation by Likelihood Approximation	225
5.5.2	Efficient Estimation by Kernel-Based Score Approximation	227
5.5.3	Efficient Estimation by Moment-Based Score Approximation	230
5.6	Estimation of Scale Parameters	234
5.7	Optimal Diagnostic Tests in Linear Models	234
5.8	Adaptive Estimation with Dependent Observations	235
5.9	<i>M</i> -Estimators	237
5.9.1	Estimation	237
5.9.2	Diagnostic Tests with <i>M</i> -Estimators	242
5.9.3	Sequential <i>M</i> -Estimators	243
5.10	The Semiparametric Efficiency Bound for Moment-Based Estimators	245
5.10.1	Approximating the SP Efficiency Bound by a Conditional Moment Estimator	246
5.11	Applications	248
5.11.1	Semiparametric Estimation of a Heteroskedastic Model	248

5.11.2	Adaptive Estimation of a Model of House Prices	250
5.11.3	Review of Other Applications	251
6	Semiparametric and Nonparametric Estimation of Simultaneous Equation Models	254
6.1	Introduction	254
6.2	Single-Equation Estimators	255
6.2.1	Parametric Estimation	256
6.2.2	Rilstone's Semiparametric Two-Stage Least Squares Estimator	258
6.3	Systems Estimation	260
6.3.1	A Parametric Estimator	260
6.3.2	The SP3SLS Estimator	261
6.3.3	Newey's Estimator	262
6.3.4	Newey's Efficient Distribution-Free Estimators	264
6.4	Finite-Sample Properties	267
6.5	Nonparametric Estimation	269
6.5.1	Identification	269
6.5.2	Nonparametric Two-Stage Least Squares (2SLS) Estimation	270
7	Semiparametric Estimation of Discrete Choice Models	272
7.1	Introduction	272
7.2	Parametric Estimation of Binary Discrete Choice Models	273
7.3	Semiparametric Efficiency Bounds for Binary Discrete Choice Models	275
7.4	Semiparametric Estimation of Binary Discrete Choice Models	279
7.4.1	Ichimura's Estimator	280
7.4.2	Klein and Spady's Estimator	283
7.4.3	The SNP Maximum Likelihood Estimator	285
7.4.4	Local Maximum Likelihood Estimation	286
7.5	Alternative Consistent SP Estimators	286
7.5.1	Manski's Maximum Score Estimator	286
7.5.2	Horowitz's Smoothed Maximum Score Estimator	287
7.5.3	Han's Maximum Rank Correlation Estimator	291
7.5.4	Cosslett's Approximate MLE	292
7.5.5	An Iterative Least Squares Estimator	293
7.5.6	Derivative-Based Estimators	294
7.5.7	Models with Discrete Explanatory Variables	295
7.6	Multinomial Discrete Choice Models	296

Econometric Analysis of Cross Section and Panel Data

I INTRODUCTION AND BACKGROUND	1
1 Introduction	3
1.1 Causal Relationships and Ceteris Paribus Analysis	3
1.2 The Stochastic Setting and Asymptotic Analysis	4
1.2.1 Data Structures	4
1.2.2 Asymptotic Analysis	7
1.3 Some Examples	7
1.4 Why Not Fixed Explanatory Variables?	9
2 Conditional Expectations and Related Concepts in Econometrics	13
2.1 The Role of Conditional Expectations in Econometrics	13
2.2 Features of Conditional Expectations	14
2.2.1 Definition and Examples	14
2.2.2 Partial Effects, Elasticities, and Semielasticities	15
2.2.3 The Error Form of Models of Conditional Expectations	18
2.2.4 Some Properties of Conditional Expectations	19
2.2.5 Average Partial Effects	22
2.3 Linear Projections	24
Problems	27
Appendix 2A	29
2.A.1 Properties of Conditional Expectations	29
2.A.2 Properties of Conditional Variances	31
2.A.3 Properties of Linear Projections	32
3 Basic Asymptotic Theory	35
3.1 Convergence of Deterministic Sequences	35
3.2 Convergence in Probability and Bounded in Probability	36
3.3 Convergence in Distribution	38
3.4 Limit Theorems for Random Samples	39
3.5 Limiting Behavior of Estimators and Test Statistics	40
3.5.1 Asymptotic Properties of Estimators	40
3.5.2 Asymptotic Properties of Test Statistics	43
Problems	45

II	LINEAR MODELS	47
4	The Single-Equation Linear Model and OLS Estimation	49
4.1	Overview of the Single-Equation Linear Model	49
4.2	Asymptotic Properties of OLS	51
4.2.1	Consistency	52
4.2.2	Asymptotic Inference Using OLS	54
4.2.3	Heteroskedasticity-Robust Inference	55
4.2.4	Lagrange Multiplier (Score) Tests	58
4.3	OLS Solutions to the Omitted Variables Problem	61
4.3.1	OLS Ignoring the Omitted Variables	61
4.3.2	The Proxy Variable-OLS Solution	63
4.3.3	Models with Interactions in Unobservables	67
4.4	Properties of OLS under Measurement Error	70
4.4.1	Measurement Error in the Dependent Variable	71
4.4.2	Measurement Error in an Explanatory Variable	73
	Problems	76
5	Instrumental Variables Estimation of Single-Equation Linear Models	83
5.1	Instrumental Variables and Two-Stage Least Squares	83
5.1.1	Motivation for Instrumental Variables Estimation	83
5.1.2	Multiple Instruments: Two-Stage Least Squares	90
5.2	General Treatment of 2SLS	92
5.2.1	Consistency	92
5.2.2	Asymptotic Normality of 2SLS	94
5.2.3	Asymptotic Efficiency of 2SLS	96
5.2.4	Hypothesis Testing with 2SLS	97
5.2.5	Heteroskedasticity-Robust Inference for 2SLS	100
5.2.6	Potential Pitfalls with 2SLS	101
5.3	IV Solutions to the Omitted Variables and Measurement Error	105
	Problems	105
5.3.1	Leaving the Omitted Factors in the Error Term	105
5.3.2	Solutions Using Indicators of the Unobservables	105
	Problems	107
6	Additional Single-Equation Topics	115
6.1	Estimation with Generated Regressors and Instruments	115

6.1.1	OLS with Generated Regressors	115
6.1.2	2SLS with Generated Instruments	116
6.1.3	Generated Instruments and Regressors	117
6.2	Some Specification Tests	118
6.2.1	Testing for Endogeneity	118
6.2.2	Testing Overidentifying Restrictions	122
6.2.3	Testing Functional Form	124
6.2.4	Testing for Heteroskedasticity	125
6.3	Single-Equation Methods under Other Sampling Schemes	128
6.3.1	Pooled Cross Sections over Time	128
6.3.2	Geographically Stratified Samples	132
6.3.3	Spatial Dependence	134
6.3.4	Cluster Samples	134
	Problems	135
	Appendix 6A	139
7	Estimating Systems of Equations by OLS and GLS	143
7.1	Introduction	143
7.2	Some Examples	143
7.3	System OLS Estimation of a Multivariate Linear System	147
7.3.1	Preliminaries	147
7.3.2	Asymptotic Properties of System OLS	148
7.3.3	Testing Multiple Hypotheses	153
7.4	Consistency and Asymptotic Normality of Generalized Least Squares	153
7.4.1	Consistency	153
7.4.2	Asymptotic Normality	156
7.5	Feasible GLS	157
7.5.1	Asymptotic Properties	157
7.5.2	Asymptotic Variance of FGLS under a Standard Assumption	160
7.6	Testing Using FGLS	162
7.7	Seemingly Unrelated Regressions, Revisited	163
7.7.1	Comparison between OLS and FGLS for SUR Systems	164
7.7.2	Systems with Cross Equation Restrictions	167
7.7.3	Singular Variance Matrices in SUR Systems	167

7.8	The Linear Panel Data Model, Revisited	169
7.8.1	Assumptions for Pooled OLS	170
7.8.2	Dynamic Completeness	173
7.8.3	A Note on Time Series Persistence	175
7.8.4	Robust Asymptotic Variance Matrix	175
7.8.5	Testing for Serial Correlation and Heteroskedasticity after Pooled OLS	176
7.8.6	Feasible GLS Estimation under Strict Exogeneity Problems	178
8	System Estimation by Instrumental Variables	183
8.1	Introduction and Examples	183
8.2	A General Linear System of Equations	186
8.3	Generalized Method of Moments Estimation	188
8.3.1	A General Weighting Matrix	188
8.3.2	The System 2SLS Estimator	191
8.3.3	The Optimal Weighting Matrix	192
8.3.4	The Three-Stage Least Squares Estimator	194
8.3.5	Comparison between GMM 3SLS and Traditional 3SLS	196
8.4	Some Considerations When Choosing an Estimator	198
8.5	Testing Using GMM	199
8.5.1	Testing Classical Hypotheses	199
8.5.2	Testing Overidentification Restrictions	201
8.6	More Efficient Estimation and Optimal Instruments Problems	202
9	Simultaneous Equations Models	209
9.1	The Scope of Simultaneous Equations Models	209
9.2	Identification in a Linear System	211
9.2.1	Exclusion Restrictions and Reduced Forms	211
9.2.2	General Linear Restrictions and Structural Equations	215
9.2.3	Unidentified, Just Identified, and Overidentified Equations	220
9.3	Estimation after Identification	221
9.3.1	The Robustness-Efficiency Trade-off	221
9.3.2	When Are 2SLS and 3SLS Equivalent?	224
9.3.3	Estimating the Reduced Form Parameters	224
9.4	Additional Topics in Linear SEMs	225

9.4.1	Using Cross Equation Restrictions to Achieve Identification	225
9.4.2	Using Covariance Restrictions to Achieve Identification	227

ANÁLISIS ECONÓMICO Y AMBIENTAL DE LA
CONTAMINACIÓN POR NITRATOS EN EL REGADÍO

Tesis doctoral

Yolanda Martínez Martínez

ÍNDICE

CAPÍTULO 1: INTRODUCCIÓN.....	1
1.1 Importancia del trabajo.....	3
1.2 Objetivos de la tesis.....	5
1.3 Metodología.....	6
CAPÍTULO 2: LA CONTAMINACIÓN DIFUSA EN LA AGRICULTURA.....	9
2.1 Introducción.....	9
2.2 La contaminación difusa en Europa.....	10
2.3 Efectos negativos de la contaminación difusa.....	17
2.3.1 Efectos de la salinidad de suelos y aguas.....	17
2.3.2 Efectos de pesticidas y herbicidas.....	18
2.3.3 Efectos de la contaminación por nitratos.....	19
2.4 El ciclo del nitrógeno en el suelo: factores que favorecen el lixiviado.....	22
2.5 Normativa dirigida a la regulación de la contaminación por nitratos.....	26
2.6 Beneficios del control de la contaminación.....	29
CAPÍTULO 3: MODELOS TEÓRICOS SOBRE EL CONTROL DE LA CONTAMINACIÓN.....	33
3.1 Introducción.....	33
3.2 Análisis económico de las externalidades.....	34
3.2.1 El equilibrio en la producción	34
3.2.2 La contaminación como un fallo del mercado	36
3.4 Objetivos en el control de la contaminación	41
3.4.1 Análisis estático de la contaminación por flujo.....	43
3.4.2 Análisis del estado estacionario del stock de contaminante.....	44
3.4.3 Análisis de la contaminación en contexto dinámico.....	47

3.5 Instrumentos para el control de la contaminación.....	50
3.5.1 Incentivos económicos.....	51
<u>Impuestos y subvenciones</u>	52
<u>Creación de mercados</u>	56
3.5.2 Instrumentos institucionales.....	58
3.5.3 Instrumentos de mando y control.....	64
3.6 Alternativas en el control de la contaminación difusa.....	65
CAPÍTULO 4: ESTUDIOS EMPÍRICOS SOBRE LA CONTAMINACIÓN DIFUSA.....	69
4.1 Introducción.....	69
4.2 Estudios empíricos parciales.....	72
4.2.1 Estudios a escala explotación.....	72
4.2.2 Estudios a escala regional.....	75
4.3 Estudios empíricos agregados	81
CAPÍTULO 5: METODOLOGÍA Y FUENTE DE LOS DATOS	89
5.1 Introducción.....	89
5.2 Metodología de la investigación.....	90
5.2.1 La teoría del control óptimo y su aplicación al control de la contaminación de origen difuso.....	91
5.2.2 Simulación agronómica.....	99
<u>Modelos de simulación agronómica</u>	99
<u>El modelo biofísico EPIC</u>	100
Funcionamiento del simulador.....	101
Aplicaciones del modelo.....	103
Ventajas y limitaciones del paquete EPIC.....	104
<u>Validación del simulador EPIC</u>	106
Encuestas.....	106
Experimentos de campo.....	108

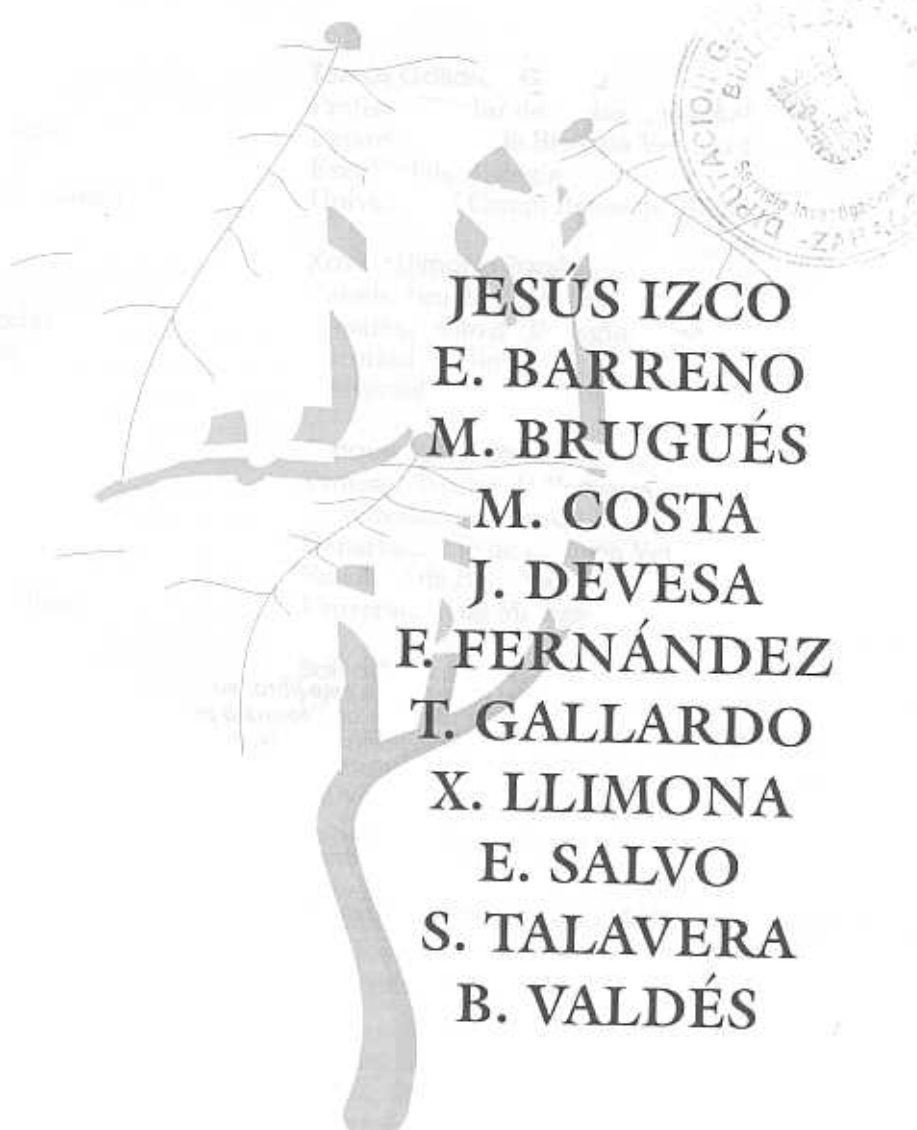

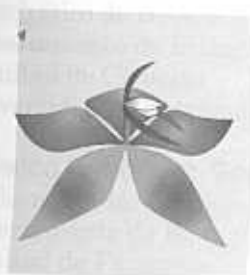

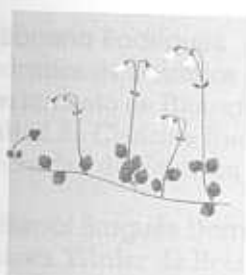

5.3 Descripción de los datos utilizados.....	113
5.3.1 Parámetros del simulador.....	113
5.3.2 Descripción de la zona de estudio.....	115
5.3.2.1 Clima y tipo de suelos.....	119
5.3.2.2 Cultivos, manejo y tipo de riego.....	122
5.3.3 Datos sobre costes.....	123
5.3.4 Precios y pagos directos de la PAC.....	123
5.4 Descripción del modelo bioeconómico.....	126
5.4.1 Modelo para un único cultivo.....	126
5.4.2 Modelo para todos los cultivos de la zona de estudio.....	129
5.4.3 Funciones de respuesta de los cultivos.....	132
5.4.4 Funciones de contaminación.....	139
5.4.5 Función de balance de nitrógeno en el suelo.....	142
5.4.6 Agregación y calibración del modelo.....	144
5.4.7 Validación del modelo económico.....	147
CAPÍTULO 6: ANÁLISIS DE LOS RESULTADOS.....	149
6.1 Introducción.....	149
6.2 Resultados del modelo económico con un cultivo.....	150
6.2.1 Escenario base.....	151
6.2.2 Escenario 1: Aumento en el precio del agua de riego.....	155
6.2.3 Escenario 2: Aumento en el precio del fertilizante nitrogenado.....	159
6.2.4 Escenario 3: Límites cuantitativos a la aplicación de nitrógeno.....	163
6.2.5 Escenario 4: Impuesto sobre las emisiones contaminantes.....	171
6.3 Resultados del modelo económico con seis cultivos.....	179
6.3.1 Escenario base.....	179
6.3.2 Escenario 1: Aumento en el precio del agua de riego.....	181
6.3.3 Escenario 2: Aumento en el precio del fertilizante nitrogenado.....	181
6.3.4 Escenario 3: Límites cuantitativos a la aplicación de nitrógeno.....	183
6.3.5 Escenario 4: Impuesto sobre las emisiones contaminantes.....	185

6.4 Evaluación de resultados.....	189
<u>Efectos del modelo para un cultivo</u>	189
<u>Efectos del modelo con seis cultivos</u>	190
CAPÍTULO 7: RESUMEN Y CONCLUSIONES	193
7.1 Resumen.....	193
7.2 Conclusiones.....	201
7.3 Futuras líneas de investigación.....	202

Contenido

Capítulo 1. TAXONOMIA VEGETAL (<i>Salvador Talavera</i>)	1
Categorías taxonómicas. 1	
Categorías supraespecíficas. 5	
Las clasificaciones. 8	
Capítulo 2. NOMENCLATURA DE PLANTAS Y DE COMUNIDADES VEGETALES (<i>Jesús Izco</i>)	23
Nombres vulgares y nombres científicos. 23	
La nomenclatura y los códigos. 24	
Los rangos y sus nombres. 30	
Nombres de grupos especiales. 33	
Los tipos y la tipificación. 34	
Los autores de los nombres. 36	
Estabilidad y cambio de los nombres. 39	
El filtro nomenclatural. 40	
Nuevas perspectivas. 44	
Capítulo 3. CARACTERES TAXONOMICOS: Morfología y anatomía de órganos vegetativos (<i>Jesús Izco con la colaboración de Eva Barreno</i>)	47
Morfología y anatomía de los órganos vegetativos. 49	
Consideraciones sobre los reinos. 52	
Niveles de organización morfológica. 53	
Protófitos. 54	
Talófitos. 57	
Cormófitos. 62	
Tejidos. 63	
Meristemas. 63	
Tejidos adultos. 64	
Epidermis. 65	
El tallo. 72	
La hoja. 79	
La raíz. 89	
Capítulo 4. CARACTERES TAXONOMICOS: Sexualidad, morfología, anatomía de aparatos reproductores y reproducción (<i>Jesús Izco</i>)	93
Reproducción asexual. 93	
Sexualidad. 98	
Reproducción sexual. 100	
Talófitos. 102	
Briófitos. 103	

Pteridófitos.	104
Fanerógamas o espermatófitas.	105
El receptáculo floral.	109
Periantio.	110
Androceo.	112
Gineceo.	116
Semilla.	125
Frutos e infrutescencias.	128
Fórmulas y diagramas florales.	132
Capítulo 5. CARACTERES TAXONOMICOS: Citología y citogenética (Benito Valdés)	133
Introducción.	133
Cariótipo.	133
Número cromosómico.	135
Tamaño de los cromosomas.	141
Morfología de los cromosomas.	142
Asimetría del cariótipo.	149
Utilidad taxonómica de los datos coriológicos.	151
Fuentes de información cromosómica.	153
Capítulo 6. CARACTERES TAXONOMICOS: Composición química (Jesús Izco)	155
Características generales.	155
Micromoléculas.	158
Macromoléculas.	167
Capítulo 7. CARACTERES TAXONOMICOS: Ecología (Jesús Izco)	173
Introducción.	173
Factores abióticos.	174
Factores bióticos.	177
Factores cenóticos.	190
Capítulo 8. ALGAS (Tomás Gallardo)	193
Introducción.	193
Los procariontes.	195
Las algas eucariotas.	197
Anatomía y reproducción de las algas.	201
Ecología y distribución de las algas.	206
Aplicaciones de las algas.	209
Clasificación.	210
Capítulo 9. HONGOS (Xavier Llimona)	241
Introducción.	241
Los hongos ameboides: el tipo de organización mixomicete.	242
Los hongos lisotróficos: el tipo de organización de los hongos filamentosos.	248
Los pseudohongos.	250
Los hongos verdaderos.	255
Grupos primitivos.	262
Ascomicetes.	268
Basidiomicetes.	282
Deuteromicetes.	299
Ecología de los hongos.	301

Capítulo 10. HONGOS SIMBIONTES: Líquenes, micoficobiosis y micorrizas (<i>Eva Barreno</i>)	309
La simbiosis. 309	
Líquenes. 310	
Micoficobiosis. 335	
Micorrizas. 335	
Capítulo 11. BRIOFITOS (<i>Montserrat Brugués</i>)	341
Introducción. 341	
Clase Hepáticas. 344	
Clase Antocerotas. 347	
Clase Musgos. 348	
Ecología. 351	
Capítulo 12. HELECHOS (<i>Enrique Salvo</i>)	353
Introducción. 353	
El ciclo biológico. 354	
Subdivisión <i>Lycophytina</i> . 359	
Subdivisión <i>Equisetophytina</i> . 364	
Subdivisión <i>Psilophytina</i> . 366	
Subdivisión <i>Filicophytina</i> . 368	
Capítulo 13. PLANTAS CON SEMILLAS (<i>Juan Antonio Devesa Alcaraz</i>)	379
Los espermatófitos. 379	
División <i>Pinophyta</i> (Gimnospermas s. l.). 381	
División <i>Magnoliophyta</i> (Angiospermas). 406	
Clase <i>Magnoliopsida</i> (Dicotiledóneas). 408	
Clase <i>Liliopsida</i> (Monocotiledóneas). 541	
Capítulo 14. JARDINES BOTANICOS (<i>Jesús Izco</i>)	581
Los jardines botánicos, de ayer a hoy. 581	
La investigación. 584	
La docencia. 585	
La conservación. 585	
La educación ambiental. 589	
El herbario. 590	
La lista de semillas (<i>index seminum</i>). 597	
Los bancos de germoplasma. 599	
La cooperación asociativa. 603	
Bancos de datos y sistemas informáticos. 604	
Capítulo 15. BIOCLIMATOLOGIA (<i>Federico Fernández-González</i>) ..	607
Introducción. 607	
Los factores del clima. 614	
Los elementos del clima y sus efectos sobre las plantas. 622	
Clasificaciones bioclimáticas. 652	
Capítulo 16. BIOGEOGRAFIA (<i>Manuel Costa</i>)	683
Introducción. 683	
Concepto e historia. 683	
Áreas de distribución. 684	

xiv CONTENIDO

Los endemismos. 689
Expansión y regresión de las áreas. 694
Representación gráfica de las áreas. Cartografía. 696
Barreras y factores biogeográficos. 697
Tipología biogeográfica. 700
Los reinos biogeográficos de la Tierra. 701

INDICE 743

The International Yearbook of Environmental and Resource Economics 2002/2003

A Survey of Current Issues

Edited by

Tom Tietenberg

Mitchell Family Professor of Economics, Colby College, USA

Henk Folmer

*Professor of General Economics, Wageningen University,
The Netherlands and Professor of Environmental Economics,
Tilburg University, The Netherlands*

NEW HORIZONS IN ENVIRONMENTAL ECONOMICS

Edward Elgar

Cheltenham, UK • Northampton, MA, USA

Contents

<i>List of figures</i>	vi
<i>List of panels</i>	vii
<i>List of tables</i>	viii
<i>List of contributors</i>	ix
<i>Preface</i>	x
<i>Editorial board</i>	xi
1 Climate change policy: models, controversies and strategies <i>Carlo Carraro</i>	I
2 Computable general equilibrium models in environmental and resource economics <i>Klaus Conrad</i>	66
3 The use of hedonic property value techniques for policy and litigation <i>Raymond B. Palmquist and V. Kerry Smith</i>	115
4 Progress and problems in the economics of sustainability <i>John C.V. Pezzey and Michael A. Toman</i>	165
5 Valuing the health effects of pollution <i>Anna Alberini and Alan Krupnick</i>	233
6 The economics of carbon sequestration in agricultural soils <i>John M. Antle and Bruce A. McCarl</i>	278
7 Tradable permits for air quality and climate change <i>David Harrison, Jr</i>	311
8 From environmental ethics to environmental public philosophy: ethicists and economists, 1973–future <i>Bryan Norton and Ben A. Minteer</i>	373
<i>Index</i>	409

PART I INTRODUCTION

1 An overview of environmental and resource economics <i>Jeroen C.J.M. van den Bergh</i>	3
2 A short history of environmental and resource economics <i>Thomas D. Crocker</i>	32

PART II ECONOMICS OF NATURAL RESOURCES

3 Optimal extraction of non-renewable resources <i>Cees Withagen</i>	49
4 Imperfect competition in natural resource markets <i>Cees Withagen and Aart de Zeeuw</i>	59
5 Economics of mining taxation <i>Philip A. Neher</i>	68
6 International trade and natural resources <i>Ngo Van Long</i>	75
7 Indicators of natural resource scarcity: a review and synthesis <i>Cutler J. Cleveland and David I. Stern</i>	89
8 Renewable resources: fisheries <i>Colin W. Clark</i>	109
9 Renewable resources: forestry <i>Thomas Aronsson and Karl-Gustaf Löfgren</i>	122
10 The economics of water use <i>David Zilberman and Leslie Lipper</i>	141
11 Agriculture and the environment <i>James S. Shortle and David G. Abler</i>	159
12 The economics of energy <i>Jan Willem Velthuisen and Ernst Worrell</i>	177

PART III ECONOMICS OF ENVIRONMENTAL POLICY

13	Externalities <i>Erik T. Verhoef</i>	197
14	Endogenous environmental risk <i>Thomas D. Crocker and Jason F. Shogren</i>	215
15	Standards versus taxes in pollution control <i>Gloria E. Helfand</i>	223
16	Imperfect markets, technological innovation and environmental policy instruments <i>Carlo Carraro</i>	235
17	Environmental policy and transactions costs <i>Kerry Krutilla</i>	249
18	Tradable permits in economic theory <i>Paul Koutstaal</i>	265
19	Lessons from using transferable permits to control air pollution in the United States <i>Tom Tietenberg</i>	275
20	The double dividend of an environmental tax reform <i>Ruud A. de Mooij</i>	293
21	Practical considerations and comparison of instruments of environmental policy <i>Clifford S. Russell and Philip T. Powell</i>	307
22	Public economics and environmental policy <i>Stef Proost</i>	329
23	Explaining instrument choice in environmental policies <i>Frank J. Dietz and Herman R.J. Vollebergh</i>	339
24	Equity in environmental policy with an application to global warming <i>Adam Rose and Snorre Kverndokk</i>	352
25	Distributional issues: an overview <i>Joan Martinez-Alier and Martin O'Connor</i>	380

PART IV INTERNATIONAL ASPECTS OF ENVIRONMENTAL ECONOMICS AND POLICY

26	Environmental policy in open economies <i>Michael Rauscher</i>	395
27	Partial equilibrium models of trade and the environment <i>Kerry Krutilla</i>	404
28	General models of environmental policy and foreign trade <i>Karl W. Steininger</i>	416

29	Strategic environmental policy and foreign trade <i>Alistair M. Ulph</i>	433
30	Environment, international trade and development <i>Harmen Verbruggen</i>	449
31	Environmental conflict, bargaining and cooperation <i>Carlo Carraro</i>	461
32	Transboundary environmental problems <i>Michael Hoel</i>	472
33	Economic analysis of global environmental issues: global warming, stratospheric ozone and biodiversity <i>David Pearce</i>	488
34	Tax instruments for curbing CO ₂ emissions <i>Stephen Smith</i>	505

PART V SPACE IN ENVIRONMENTAL ECONOMICS

35	Environment and regional economics <i>Peter Nijkamp</i>	525
36	Non-point source pollution control <i>Anastasios Xepapadeas</i>	539
37	Land use and environmental quality <i>William B. Meyer</i>	551
38	Urban sustainability <i>David Banister</i>	560
39	Location choice, environmental quality and public policy <i>James R. Markusen</i>	569
40	Transport and the environment <i>Kenneth J. Button and Piet Rietveld</i>	581

PART VI ENVIRONMENTAL MACROECONOMICS

41	Environment in macroeconomic modelling <i>Ekko C. van Ierland</i>	593
42	Endogenous growth theory and the environment <i>Sjak Smulders</i>	610
43	A pro-growth perspective <i>Wilfred Beckerman</i>	622
44	Steady-state economics: avoiding uneconomic growth <i>Herman E. Daly</i>	635
45	An assessment of the growth debate <i>Jeroen C.J.M. van den Bergh and Ruud A. de Mooij</i>	643

- | | | |
|----|---|-----|
| 46 | The environmental Kuznets curve hypothesis
<i>Sander M. de Bruyn and Roebijn J. Heintz</i> | 656 |
| 47 | Growth-oriented economic policies and their environmental impacts
<i>Mohan Munasinghe</i> | 678 |
| 48 | The biophysical basis of environmental sustainability
<i>Robert Goodland</i> | 709 |
| 49 | Indicators of sustainable development
<i>Onno J. Kuik and Alison J. Gilbert</i> | 722 |
| 50 | Development, poverty and environment
<i>Edward B. Barbier</i> | 731 |

PART VII ECONOMIC VALUATION AND EVALUATION

- | | | |
|----|---|-----|
| 51 | Theory of economic valuation of environmental goods and services
<i>Per-Olov Johansson</i> | 747 |
| 52 | Recreation demand models for environmental valuation
<i>Catherine L. Kling and John R. Crooker</i> | 755 |
| 53 | Hedonic models
<i>Raymond B. Palmquist</i> | 765 |
| 54 | Contingent valuation
<i>Bengt Kriström</i> | 777 |
| 55 | Meta-analysis, economic valuation and environmental economics
<i>Jeroen C.J.M. van den Bergh and Kenneth J. Button</i> | 796 |
| 56 | Valuation and ethics in environmental economics
<i>Russell K. Blamey and Mick S. Common</i> | 809 |
| 57 | Cost-benefit analysis of environmental policy and management
<i>Nick Hanley</i> | 824 |
| 58 | Multi-criteria methods for quantitative, qualitative and fuzzy evaluation problems
<i>Ron Janssen and Giuseppe Munda</i> | 837 |

PART VIII INTERDISCIPLINARY ISSUES

- | | | |
|----|---|-----|
| 59 | Physical principles and environmental economic analysis
<i>Matthias Ruth</i> | 855 |
| 60 | Materials, economics and the environment
<i>Robert U. Ayres</i> | 867 |

61	Ecological principles and environmental economic analysis <i>Carl Folke</i>	895
62	Industrial metabolism and the grand nutrient cycles <i>Robert U. Ayres</i>	912
63	Indicators of economic and ecological health <i>Bruce Hannon</i>	946
64	EMERGY, value, ecology and economics <i>Robert A. Herendeen</i>	954
65	Evolution, environment and economics <i>John M. Gowdy</i>	965
66	Ethical perspectives and environmental policy analysis <i>Harold Glasser</i>	981
67	Environmental and ecological economics perspectives <i>R. Kerry Turner</i>	1001

PART IX METHODS AND MODELS IN ENVIRONMENTAL AND RESOURCE ECONOMICS

68	Input-output analysis, technology and the environment <i>Faye Duchin and Albert E. Steenge</i>	1037
69	Computable general equilibrium models for environmental economics and policy analysis <i>Klaus Conrad</i>	1060
70	Game theory in environmental policy analysis <i>Henk Folmer and Aart de Zeeuw</i>	1089
71	Optimal control theory in environmental economics <i>Talitha Feenstra, Herman Cesar and Peter Kort</i>	1099
72	Economic models of sustainable development <i>Jeroen C.J.M. van den Bergh and Marjan W. Hofkes</i>	1108
73	Energy-economy-environment models <i>Sylvie Faucheux and François Levarlet</i>	1123
74	Decomposition methodology in energy demand and environmental analysis <i>Beng Wah Ang</i>	1146
75	Input-output structural decomposition analysis of energy and the environment <i>Adam Rose</i>	1164
76	Experiments in environmental economics <i>Jason F. Shogren and Terrance M. Hurley</i>	1180
77	Natural resource accounting <i>Salah El Serafy</i>	1191

PART X PROSPECTS

78	Impacts of economic theories on environmental economics <i>Domenico Siniscalco</i>	1209
79	Integration and communication between environmental economics and other disciplines <i>John L.R. Proops</i>	1230
	<i>Name index</i>	1243
	<i>Subject index</i>	1265

PARTIE I

LES FONCTIONS DE L'EMBALLAGE

Introduction

J.-P. POTHET

XXIV

1. Les emballages et conditionnements alimentaires, auxiliaires technologiques de la conservation des denrées

J.-L. MULTON

- 1 Conservation des aliments _____ 6
- Qu'est-ce que la conservation d'un aliment ? • Les mécanismes d'altération des qualités de l'aliment
- 2 La fonction « conservation » dévolue à l'emballage _____ 13
- Innocuité et inertie de l'emballage • Rôle de protection passive de l'emballage • Rôle de protection active de l'emballage (emballages dits « actifs », « fonctionnels », ou « intelligents »)
- Références bibliographiques _____ 23

2. La fonction économique de l'emballage

T. BORGHESE

- 1 L'emballage, véhicule d'une information loyale _____ 28
- Une information compréhensible par le consommateur • Une information sincère
- 2 L'emballage, véhicule d'une information exhaustive _____ 30
- Le décret du 7 décembre 1984 • L'indication du prix
- 3 L'emballage, véhicule d'une information qualitative _____ 35
- Les signes de qualité • Aliment et santé

3. Fonctions marketing de l'emballage

F. SAUVAGE

- 1 Les fonctions marketing de l'emballage pour le consommateur _____ 41
- La fonction « repérage » • La fonction « identification » • La fonction « information » • La fonction « séduction » • La fonction « service »
- 2 Les fonctions de l'emballage pour le distributeur _____ 45
- Position du problème • Les différents types d'emballages • La fonction « protection » de l'emballage pour le distributeur • La fonction « manutention » • La fonction « valorisation »

3 Méthodologie pour la création d'un emballage en intégrant ses fonctions marketing	50
• Les différents moyens à notre disposition • Le cahier des charges de l'emballage en terme marketing • Les tests marketing sur les emballages • Conclusion	
Références bibliographiques	57

4. Emballage-conditionnement et microbiologie

G. BUREAU

1 Principes généraux	60
• Microflore associée aux aliments • Rôle du conditionnement	
2 Qualité microbienne des emballages alimentaires souples	61
3 Porosité aux micro-organismes des emballages souples	62
4 Propriétés et activités microbiennes, exemples des produits réfrigérés conditionnés à l'abri de l'air	63
5 Conditionnement actif	66
• Stabilisants encapsulés • Migration et stabilisation	
6 Emballages plastiques biodégradables	68
Références bibliographiques	69

5. Évaluation de la migration des matériaux plastiques au contact des aliments par des méthodes alternatives

A. FEIGENBAUM

1 Introduction	72
• Un nouveau contexte législatif • Le contexte industriel	
2 Migrants potentiels et leurs méthodes analytiques	75
• Complémentarité des méthodes courantes • Monomètres et migrants potentiels volatils ($M < 150 \text{ g.mol}^{-1}$) • Migrants potentiels non volatils ($M > 150 \text{ g.mol}^{-1}$)	
3 Méthodes alternatives d'évaluation de la migration	80
• Méthode alternative du laboratoire officiel des Pays-Bas	
• Méthode alternative « des classes fonctionnelles », développée par l'Inra et l'Urca	
4 Méthodes alternatives par prédiction de la migration	87
• Notion de migration surévaluée $M_{F,s}^*$ • h , coefficient de convection à l'interface • $M_{F,s}$: migration à l'état stationnaire (au temps infini) • D_p : coefficient de diffusion du migrant potentiel dans le polymère • Influence de la pénétration des matières grasses	
• Surévaluation de la migration à l'aide de la migration à l'équilibre	
5 Migration globale	92
6 Les milieux simulateurs d'aliments gras	93
• Simulateur gras officiel • Simulateurs gras non volatils	
• Méthodes alternatives : transfert de masse dans des solvants	
• Simulateurs aqueux • Tests à haute température • Cas de matériaux multicouches, de barrières fonctionnelles et plastiques recyclés	
7 Conclusion	99
Références bibliographiques	101

PARTIE II

RISQUES LIÉS AUX CONTAMINATIONS POSSIBLES DE L'ALIMENT PAR L'EMBALLAGE

6. Qualité des emballages : migration

F. LOX

B. PASCAT

1 Introduction, définitions	108
2 Le phénomène de la migration	109
<ul style="list-style-type: none"> • Classe 1 : les matériaux où la migration est nulle ou tout au moins négligeable • Classe 2 : les matériaux où un certain degré de migration est toujours présent, indépendamment du produit emballé • Classe 3 : les matériaux où la migration dépend des produits (liquides) avec lesquels ils ont été mis en contact 	
3 Principes des tests de migration et réglementation	121

7. Risques organoleptiques pour l'aliment liés aux migrations

F. DEPLEDT

1 Les risques, leurs conséquences et leur maîtrise	131
<ul style="list-style-type: none"> • Les obligations réglementaires • L'obligation de résultats • L'analyse des risques 	
2 Causes des risques	135
<ul style="list-style-type: none"> • L'aliment et ses propriétés organoleptiques • Les produits alimentaires • Le choix des emballages • Fonctions du conditionnement • Les modifications des propriétés organoleptiques 	
3 Évaluation des risques organoleptiques	138
<ul style="list-style-type: none"> • Connaissances pratique et documentaire • Connaissances expérimentales des origines du risque organoleptique • Connaissance à l'aide d'appareils • Importance du facteur temps de contact entre aliment et matériau 	
4 Méthodologie de l'examen sensoriel des emballages	142
<ul style="list-style-type: none"> • Perception des propriétés organoleptiques • Les étapes de l'analyse sensorielle • Propriétés perçues par la vue • Propriétés perçues par le toucher et l'audition • Propriétés olfactogustatives perçues par le système nasal et la cavité buccale 	
5 Préparation des échantillons pour l'analyse sensorielle	147
<ul style="list-style-type: none"> • Les échantillons • Lieux des essais • Épreuves sur l'emballage brut • Épreuves sur le produit emballé • Examen sensoriel • Conclusion 	

Références bibliographiques	152
-----------------------------	-----

8. Risques toxicologiques

P. FRITSCH

1 Principe des études toxicologiques	157
<ul style="list-style-type: none"> • Études toxicologiques <i>in vivo</i> • Tests à court terme de mutagenèse 	
2 Évaluation toxicologique et sécurité des matériaux au contact	160
<ul style="list-style-type: none"> • Protocole toxicologique simplifié • Protocole toxicologique variable selon l'intensité des migrations spécifiques 	
3 Risque de toxicité des matériaux au contact	163
<ul style="list-style-type: none"> • Matériaux classiques • Matières plastiques et élastomères • Conclusion 	
Références bibliographiques	171

PARTIE III

ASPECTS NORMATIFS, RÉGLEMENTAIRES
ET DE CONSOMMATION9. *Législation
communautaire
et spécificité française*L. ROSSI
B. MOTISI1 La législation communautaire concernant
les matériaux et objets destinés à entrer
en contact avec les denrées alimentaires _____ 176

- Harmonisation des législations nationales • Directives applicables à tous les matériaux et objets • Directives applicables à une catégorie de matériaux et objets • Directive concernant les pellicules de cellulose régénérée • Directive concernant les objets céramiques • Directive concernant les matières plastiques • Directives concernant des substances isolées • Actions d'autres institutions liées aux directives communautaires • Conclusions

2 Spécificité de la réglementation française _____ 192

- Les bases de cette réglementation • Arrêtés d'application • Autres textes relatifs aux matériaux et objets pour contact alimentaire • Conclusion

Références bibliographiques _____ 201

10. *La responsabilité
juridique
dans l'industrie
agroalimentaire*

J. BOTREL

1 Le domaine réglementaire, procédure,
réparations et sanctions _____ 204

- Définition • Bases juridiques • Responsables • Procédure • Actions entre les diverses parties • Réparations et sanctions

2 La jurisprudence _____ 213

- Validité des dispositions réglementaires et codes d'usage • Définition du responsable

3 Méthodes de prévention et d'assurance _____ 224

- Le contrôle de qualité • L'exonération de responsabilité • L'audit technique • L'assurance juridique préventive • Les assurances responsabilité civile et perte d'activité

Références bibliographiques _____ 228

11. *Normalisation
des emballages*N. NORMAND
A. GALPIN

1 Enjeux de la normalisation _____ 230

- Généralités • Les nouveaux enjeux de la normalisation et de la réglementation : deux entités complémentaires avec la « nouvelle approche »

2 Évolution de la normalisation dans le secteur
de l'emballage _____ 232

- Activités de normalisation dans le secteur de l'emballage • Exemple de complémentarité entre réglementation et normalisation

3 Contenu de la normalisation _____ 235

- Normalisation applicable à l'ensemble des emballages • Normalisation des emballages pour le secteur de l'agroalimentaire

4 Interface emballage/produit _____ 239

- Matériau d'emballage et hygiène des produits • La contrainte environnementale de l'emballage et l'hygiène des produits : une nécessaire compatibilité • Analyse sensorielle • Conclusion

12. Le point de vue des consommateurs

F. DEPLEDT

1 Les comportements des consommateurs	245
• Droits et besoins • L'observation des attitudes de comportement permet cependant de distinguer plusieurs catégories plus ou moins nettes ou sélectives	
2 Attentes et désirs	249
3 Préoccupations et exigences	250
4 Compréhension et satisfaction	251
• Conclusion • Publications consultées	
Références bibliographiques	259

PARTIE IV

LE RÉCIPIENT ET SA FERMETURE : CARACTÉRISTIQUES PHYSICOCHIMIQUES DES MATÉRIAUX D'EMBALLAGE ET LEUR ÉVOLUTION RÉCENTE

13. Interactions physicochimiques entre matériaux d'emballage métallique et constituants alimentaires. Corrosion et protection

M. APLINCOURT

P. MARSAL

J.-C. PRUDHOMME

1 Rappels théoriques	261
• Généralités • Courbes intensité-potential • Influence des dépolarisants anodiques et cathodiques	
2 Méthodes électrochimiques d'étude de la corrosion	271
• Cinétique électrochimique et système de corrosion • Méthodes électrochimiques d'étude de la corrosion • Aspect statistique	
3 Étude de quelques facteurs principaux de corrosion des emballages en fer-blanc nu	275
• Action des dépolarisants ou accélérateurs de corrosion • Action de la température • Action des produits phytosanitaires • Influence du format de la boîte sur le désétamage des boîtes en fer-blanc nu	
4 Utilisation des revêtements organiques dans la protection et la décoration des emballages métalliques	281
• Rôle et nécessité des revêtements organiques • Choix des vernis et quelques utilisations spécifiques • Problèmes de migration et de corrosion liés à l'emploi des vernis	
Références bibliographiques	291

14. Le verre d'emballage

R. HUGEL

G. PAJEAN

1 Caractéristiques de la fabrication du verre d'emballage	291
• Domaine composition matières premières-fusion • Domaines de fabrication • Traitements de surface • Choix-contrôle-qualité • Suremballage des articles	
2 Les qualités intrinsèques de l'emballage verre	301
• Nomenclature • Qualités des emballages en verre	

3	Résistance mécanique du verre	310
	• Propriétés théoriques du verre • Résistance réelle des articles en verre	
4	Propriétés thermiques	312
	• Dilatation thermique et chaleur massique • Transfert de chaleur • Résistance thermique des articles en verre	
5	Propriétés optiques	314
	• Transmission dans le visible • Transmission dans l'ultraviolet • Transmission dans l'infrarouge • Contrôle des propriétés optiques des verres	
6	Inertie chimique	317
7	La fermeture	319
	• Fermetures des bouteilles et flacons • Fermetures pour larges ouvertures • Conclusion et perspectives	
	Références bibliographiques	324

15. La boîte métallique pour conserves

Y. PELLETIER

1	Réglementation et normalisation	326
	• Aptitude au contact alimentaire • Capacité et dimensions-normalisation	
2	Les matériaux métalliques	328
	• Matériaux à base d'acier (fer blanc, fer chromé...) • Les alliages d'aluminium	
3	Les vernis de protection de l'emballage métallique	331
	• Domaine d'utilisation et fonctions essentielles • Composition des vernis • Procédés d'application et cuisson • Propriétés des revêtements • Les principaux types de vernis et leur utilisation • Revêtements par film plastique	
4	Technologies de fabrication de l'emballage	335
	• Techniques de fabrication 2 pièces (acier et aluminium) • Techniques de fabrication 3 pièces (matériaux à base d'acier uniquement) • Sertissage des fonds et couvercles	
5	Adaptation et évolution	339
	• Adaptation au contenu-protection • Résistance mécanique des emballages pour conserves appertisées • Les attentes de la distribution et des consommateurs • Recyclage des boîtes métalliques • Conclusion	
	Références bibliographiques	345

16. Les barquettes métalliques et plastiques stérilisables

P. SIRBAT

J. PETITDEMANGE

1	Introduction	348
	• La notion de barquette • La notion d'emballage stérilisable	
2	Les barquettes métalliques	348
	• Matériaux • Fabrication • Fermeture	
3	Les barquettes plastiques	351
	• Différenciation métal/plastique • Choix des matériaux • Réalisation des barquettes • La fermeture	
4	Utilisation des barquettes	355
	• La stérilisation • Durabilité	
5	Évolution : les tendances	357
	Références bibliographiques	359

**17. Emballages
métalliques légers
pour produits
alimentaires
non appertisés**

A. KLENIEWSKI

1 Introduction	362
2 Produits liquides non-appertisés	368
• Huiles alimentaires • Sirops • Pulpes de fruits	
3 Produits pâteux et semi-pâteux	373
• Butter oil et corps gras allégés • Ovoproduits	
4 Poudres et particules	376
• Lait en poudre • Le café • Les chocolats et boissons chocola- tées • Le thé	
5 Aérosols	384
• Définition du conditionnement • aérosols •	
6 Produits divers bonbons et biscuits	390
Références bibliographiques	393

**18. Les boîtes
embouties-réembouties
et embouties-étrirées**

J.-P. VACHER

1 Qu'est-ce qu'une boîte 2 pièces ?	396
2 Les avantages des boîtes 2 pièces	396
3 L'emboutissage, simple et multiple	397
• L'emboutissage simple • L'emboutissage multiple	
4 L'emboutissage-étrirage ou DWI	399
• Historique • Les principaux formats de boîtes • La construc- tion d'une boîte DWI • Le procédé de fabrication	
5 DWI-consève, PWI, DTR ?	404
• Le DWI-consève • Le • PWI • (partial wall ironing) • Le • DTR • (draw and thin redrax)	
Références bibliographiques	407

19. Les films plastiques

J.-P. DE LEIRIS

1 Introduction	410
2 Contraintes créées par le produit à conditionner	410
• Perméabilité • Facteurs ayant une influence sur la perméabilité • Transfert et conservation des produits alimentaires	
3 Contraintes créées par la technologie	420
• La température • La pression • Influence de la technologie sur le choix du matériau d'emballage	
4 Choix d'un film d'emballage	422
5 Conclusion	423
Références bibliographiques	425

**20. Les emballages
rigides en matière
plastique pour
les denrées
agroalimentaires**

F. GERARDI

J.-J. COUCHOUD

1 Introduction	428
2 Le marché de l'emballage rigide alimentaire en quelques chiffres	429
3 Les matériaux et leurs applications	43
• Le choix des matériaux • Les matériaux dits barrière • Les matériaux de structure et leurs associations	
4 Les procédés de transformation	44

21. Encre et vernis

F. BOURELLE

- 1 **Qualités requises des vernis et des encres utilisables dans l'emballage alimentaire** _____ 4
- Les contraintes légales • Les vernis extérieurs ou de surface
 - Les encres • Les vernis intérieurs
- 2 **Les pigments et colorants** _____ 4
- Les pigments • Les colorants organiques
- 3 **Les liants** _____ 4
- Les modes de séchage • Liants à base d'huiles siccatives
 - Liants à base d'oxydopolymérisation • Liants appliqués sous forme de prépolymères • Liants en solution ou dispersion
- 4 **Les solvants** _____ 45
- Caractéristiques principales des solvants • Prévision de la solubilité • Évaporation des solvants • Rétention de solvants
 - Les solvants résiduels • Conclusion
- Références bibliographiques _____ 46

22. Colles et adhésifs

G. KERN

- 1 **Introduction** _____ 462
- 2 **Mécanisme du collage** _____ 462
- Formation du joint • Les théories de l'adhésion
- 3 **Définitions** _____ 464
- 4 **Les principales colles utilisées dans le domaine de l'emballage** _____ 466
- Les colles en solution dans l'eau • Les colles synthétiques en dispersion dans l'eau • Les colles thermofusibles • Les colles réactives à base de polyuréthane
- 5 **Les critères techniques de choix** _____ 468
- Nature des matériaux à coller et de leur état de surface • La machine et son environnement • La nature du produit emballé
 - Conditions de stockage et de mise en service (surgelés, emballages sous vide...) • Le recyclage ultérieur de l'emballage

23. Les films et enrobages comestibles

S. GUILBERT

B. CUQ

- 1 **Introduction** _____ 472
- 2 **La formulation des films et enrobages comestibles** _____ 477
- Les polysides • Les protéines • Les cires, les lipides et dérivés
 - Les films et enrobages composites • Deux exemples particuliers
- 3 **Les procédés de fabrication et les techniques d'application des films et enrobages comestibles** _____ 491
- La « voie humide » : la coacervation d'une solution ou d'une dispersion filmogène • La « voie sèche » : application des propriétés thermoplastiques des matériaux filmogènes
- 4 **Les additifs** _____ 496
- Les agents plastifiants et les agents facilitant l'application
 - Les agents de pontage
- 5 **Les propriétés, les fonctions et les applications des films et enrobages comestibles** _____ 498
- Les propriétés mécaniques • Les propriétés barrières des films et enrobages comestibles • Influence de la température et de la teneur en eau
- 6 **Conclusion** _____ 516
- Références bibliographiques _____ 517

24. Les matériaux cellulosiques

Y. COUTURIER

1 Les matériaux cellulosiques au service de l'emballage alimentaire	532
2 Le bois	534
• Les emballages légers • Les caisses • Les palettes de manutention • Les caisses-palettes • Quelques essais des emballages bois parallélépipédiques pour fruits et légumes	
3 Le papier	536
• Préparation des pâtes à papier • Fabrication du papier • Quelques traitements complémentaires du papier	
4 Le carton plat	541
• Principales compositions des cartons • Transformation du carton plat • Les cartons complexes	
5 Le carton ondulé	546
• Présentation générale • Nature des constituants du carton ondulé • Fabrication du carton ondulé (onduleuse) • Transformations du carton ondulé • Classification des emballages en carton ondulé	
6 Quelques essais relatifs aux papiers et cartons	551
• Propriétés physiques générales • Propriétés de résistance à la flexion ou à la compression • Ayant trait à son aspect • Propriétés de perméance ou d'absorption	
Références bibliographiques	554

PARTIE V

LA MISE EN ŒUVRE DE L'EMBALLAGE DES PRODUITS ALIMENTAIRES FINIS

25. Les machines d'emballage conditionnement

J.-L. BOISSEAU

1 Profil économique de l'industrie des biens d'équipements destinés aux opérations d'emballage conditionnement	558
• Classification des diverses fonctions caractérisant la mécanisation • Le marché mondial de la machine d'emballage en 1996 • L'évolution du marché • L'évolution des techniques	
2 Détail des diverses fonctions « logistique »	565
• Fonctions de préparation du produit ou de l'emballage directement liées au conditionnement • Fonction primaire de conditionnement du produit • Fonctions spécifiques annexes du conditionnement afférentes au contenant déjà rempli • Fonction secondaire d'emballage de présentation marketing • Fonctions tertiaires d'emballage de protection • Fonctions de manutention	
3 Résumé de l'offre machines pour chacune des opérations d'emballage conditionnement	578

26. L'emballage aseptique

J.-P. RANNO

D. LEMAIRE

- 1 Pourquoi conditionner aseptiquement ? _____ 580
 • Améliorer le produit « frais » • Augmenter la durée de conservation • Améliorer les conditions organoleptiques d'un produit de conserve • Réduire les coûts
- 2 Définition d'un conditionnement aseptique _____ 582
 • La contamination des emballages • La protection de l'ambiance de conditionnement • Régimes laminaires et turbulents • Salle blanche
- 3 Deux méthodes de conditionnement aseptique _____ 588
- 4 Conditionnement aseptique intégré _____ 589
 • Composition • Fonctionnement
- 5 Conditionnement aseptique non-intégré (provoqué) _____ 591
 • Emballages de type bouteilles • Emballage de type pot ou gobelet
- 6 Méthode de stérilisation du matériel _____ 595
- 7 Tendances et perspectives _____ 596

27. Le conditionnement aseptique en continu des liquides alimentaires en complexe de papier, polyéthylène et aluminium

F. MUTHWILL

J.-F. BERGER

M. LECOQ

- 1 Historique du développement d'un emballage complexe multicouche à base de papier, polyéthylène et aluminium _____ 598
- 2 Constitution et fabrication du matériau d'emballage _____ 599
 • Structure et constituants • Laminage, impression et découpage
- 3 Caractéristiques exigées d'un procédé de conditionnement aseptique des liquides _____ 601
 • Emballages vides occupant un volume minimal • Emballage le plus léger possible • Emballage le moins encombrant possible • Emballage gerbable • Matériau de conditionnement facilement stérilisable • Matériau protégeant le produit vis-à-vis des agents extérieurs • Prix aussi bas que possible • Pollution la plus faible possible • Mise en œuvre par des machines de haute fiabilité • Mise en œuvre dans un environnement industriel
- 4 Le conditionnement aseptique en continu _____ 604
 • La stérilisation de l'aliment • La stérilisation du matériau d'emballage • Le remplissage
- 5 Charge sur l'environnement _____ 607
 • Composition de l'emballage Tetra Brik Aseptic • Recyclage • Pollution atmosphérique
- 6 Produits conditionnés en emballages Tetra Pak _____ 611
 • Laits • Produits laitiers • Produits infantiles • Fruits et légumes • Autres boissons • Eau • Boissons alcoolisées • Soupes et sauces • Repas • Huiles végétales • Glaces • Produits diététiques • Desserts
- 7 Conclusion _____ 614

**28. Traitement
et emballage
conditionnement -
préservation
des aliments
conditionnés
en emballage souple**

G. BUREAU

1 Introduction	616
2 Ionisation appliquée aux aliments	617
• Rappel sur les types de rayonnements utilisables • Ionisation des produits alimentaires	
3 Ionisation et traitements combinés	621
• Principe • Exemples sur les viandes et produits carnés • Exemples sur les végétaux préemballés	
4 Effets de l'ionisation sur les matériaux d'emballage	624
• Effets généraux sur les polymères d'emballage • Effets spécifiques sur la perméabilité des matériaux d'emballage • Effets spécifiques sur les phénomènes de migration ou relations contenant contenu • Remarques : choix des matériaux au traitement ionisant	
Références bibliographiques	633

**29. Emballage
sous atmosphère
modifiée**

E. DRULHE

1 Guide des bons usages de l'atmosphère modifiée	636
• Choix de la matière première et hygiène de travail • Film d'emballage adapté • Machine de conditionnement adaptée	
2 Choix des gaz, leurs rôles	640
• L'azote • Le dioxyde de carbone • L'oxygène	
3 Les applications	644
• Les produits secs • Les produits à humidité intermédiaire • Les produits à forte humidité • Les produits végétaux crus	
4 Conclusion	654
Références bibliographiques	655

**30. Technologie
de l'embouteillage
des boissons**

P. ROBICHON

J. ROY

J.-P. SAVINA

1 Introduction	658
2 L'emballage et le conditionnement des boissons	658
3 Les segments du marché des boissons	662
• Les bières • Les vins • Les vins effervescents • Les boissons rafraichissantes sans alcool (BRSA) • Les autres segments	
4 Les matériaux pour le conditionnement des boissons : leur perspective d'évolution	666
• Le verre • Le métal • Les plastiques • Les matériaux complexes	
5 Les techniques de conditionnement des boissons	672
• Préparation des emballages préexistants • Le remplissage • La fermeture du récipient • Le conditionnement des liquides biologiquement sensibles	
Références bibliographiques	688
Annexes	688

**31. Technologie
de l'emballage
sous film**

Ch. BEHRA

J. GUERIN

1 Machines à suremballer	688
• Pushing upward • Pushing downward • Pushing through • Pushing in	
2 Machines à former, remplir et fermer les sachets (« Form, fill and seal » ou FFS)	692
• Les sachets • Les matériaux • Les machines	

3 Machines de thermoformage	697
• Les matériaux • Les machines	
4 Applications type dans le secteur alimentaire	700

32. Nettoyage et désinfection des emballages réutilisables

R. SOUVERAIN

1 Les emballages réutilisables	704
• Définition des emballages réutilisables • Interdiction du réemploi de certains emballages • Cas où l'emploi d'emballages neufs est obligatoire • Cas où l'emploi d'emballages neufs est inévitable • Réemploi intempestif d'emballages par le consommateur • Exemples de recours aux emballages réutilisables	
2 Nettoyage et désinfection	708
• Énumération des substances autorisées • Obligation d'une homologation pour toute spécialité destinée à la désinfection	
• Conditions d'obtention de l'homologation pour un désinfectant	
• Conduite des opérations de nettoyage et de désinfection • Nettoyage • Désinfection • Opérations finales rinçage et contrôles • Désinfection par fumigants des sacs et matériels • Désinfection des emballages par rayonnements ionisants	

33. Les emballages de transport

J. BOULANGER

H. MARCEL

1 Généralités	716
2 Les emballages	716
• Les emballages en carton ondulé • Les fardeaux • Les emballages en bois • Les caisses plastiques • Performances des emballages	
3 Les unités de charges, charges palettisées et palettes caisses	725
• Les palettes - caisses carton • Les palettes - caisses métalliques • Les charges palettisées	
4 Conclusion	731
Références bibliographiques	732

34. Palettisation-manutention-stockage des emballages pleins développés vers les robots et les ateliers flexibles de conditionnement

J. THIBAUT

1 Préambule	734
2 Terminologie	735
3 La palette et sa paletée	737
• La palette • La paletée • Les dimensions • Calcul des schémas de palettisation	
4 Technologie	744
• Technologie des palettiseurs • Technologie des dépalettiseurs • Dépileurs-empileurs de palettes nues • Données techniques pour l'exploitation	
5 Logistique en palettisation stockage	756
• Logistique de stockage dans un centre de production ou dans un centre de distribution • Logistique en palettisation : où faut-il implanter les postes de palettisation ? • Logistique en palettisation : comment palettiser les bords de ligne pour les rendre plus flexibles • Logistique en palettisation : comment les robots peuvent conduire aux ateliers flexibles de conditionnement ?	
6 Conclusion	776

PARTIE VI

QUELQUES EXEMPLES SIGNIFICATIFS DE SECTEURS ALIMENTAIRES OÙ L'EMBALLAGE EST EN ÉVOLUTION RAPIDE

35. Propriétés générales des emballages pour produits réfrigérés, congelés et surgelés

A. GAC

1	Rappel des fonctions des emballages	781
2	La perte de masse des produits réfrigérés	783
3	Le givrage dans les paquets de produits congelés	787
4	Les indicateurs et intégrateurs de température	790
5	Les transferts thermiques	791
	• Préréfrigération et congélation • Réchauffage, remise en température et cuisson	
6	La commercialisation des denrées périssables	794
	• Interface entre chambre froide et engin de transport • Livraison aux magasins de vente au détail • L'exposition et la vente dans les magasins de vente au détail • Conclusions	
	Références bibliographiques	804

36. Viandes et produits carnés

R. ROSSET

G. POUMEYROL

1	Introduction	806
2	Emballages et conditionnements utilisés pour la viande : généralités	806
3	Conditionnement sous vide	807
	• Réduction de la quantité d'oxygène disponible • Origine de l'inhibition microbienne • Influence de l'absence d'oxygène sur la couleur de la viande • Cas particuliers des viandes à pH élevé (viandes dites DFD) • Applications techniques	
4	Conditionnement sous atmosphère modifiée	817
	• Action sur la couleur • Microbiologie • Choix de la composition de l'atmosphère de conservation	
5	Conclusion	821
	Références bibliographiques	822

37. Conditionnement des produits laitiers

J. GOURSAUD

N. MENU

S. TRABELSI

1	Conditionnement des laits de consommation	826
	• Production des laits de consommation • Cas des laits pasteurisés • Cas des laits stérilisés	
2	Conditionnement des laits fermentés	836
	• Production des laits fermentés • Définition et propriétés des laits fermentés et yaourts • Techniques permettant d'assurer la conservabilité • Décors des flancs • Regroupement des unités • Étiquetage (décrets du 10 juillet 1963 et du 7 décembre 1984) • Ligne de conditionnement • Contrôle qualité du produit conditionné • État actuel du conditionnement des laits fermentés	
3	Conditionnement des fromages	844
	• Production fromagère • Conditionnement à la fromagerie • Emballage du fromage • Étiquetage (décrets du 7 décembre 1984, du 30 décembre 1988 et arrêté du 7 décembre 1984) • Conclusion	

4 Conditionnement du beurre	85
• Production du beurre • Emballage du beurre	
Références bibliographiques	85

38. Biscuits, pâtisseries industrielles et autres AHI

K. BENOUALID

1 Introduction	856
2 Caractéristiques essentielles des produits de cuisson céréaliers	856
• Les produits de cuisson secs • Les produits de cuisson céréaliers humides	
3 Contraintes imposées à l'emballage des produits de cuisson céréaliers	860
• Contrainte • produit alimentaire • • Contrainte d'utilisation • Protection mécanique • Protection physicochimique	
4 Traitements associés à l'emballage pour améliorer la conservation des produits	862
• Traitements thermiques • Conditionnement sous atmosphère modifiée • Autres traitements	
5 Les matériaux	865
Références bibliographiques	868

39. Emballage pour cuisson sous vide

J. GUERIN

La cuisson sous vide des plats cuisinés	870
---	-----

40. Le conditionnement en brasserie

G. CUVELLIER

1 La ligne d'embouteillage	874
• La bière • Le groupe d'embouteillage • L'approvisionnement en bouteilles	
2 Le lavage des bouteilles	879
• Généralités • La laveuse • Conclusion	
3 Soutirage - Bouchage	886
• Introduction • Échanges gazeux et soutirage bouteille • Soutirage boîte • Soutirage fût • Bouchage	
4 Pasteurisation	894
• Flash - Pasteurisation • Pasteurisation tunnel	
5 Habillage	897
• L'étiquette • La colle • La machine	
6 Suremballage	899
7 Conception et gestion d'un atelier d'embouteillage	901
• Convoyage et lubrification • Régulation • Maîtrise de la qualité • Bruit et hygiène • Conclusion	
Références bibliographiques	907

**41. L'emballage
des végétaux vivants
emballages
physiologiques
atmosphère
auto-régulée**

P. VAROQUAUX

1 Introduction	910
2 La respiration des tissus végétaux	911
• Importance de la respiration • Mesure de l'intensité respiratoire	
• Comment réduire l'intensité respiratoire sans basculer vers le métabolisme anaérobie	
3 La conservation sous atmosphère modifiée, rôle du film de conditionnement	922
• Modèle n° 1 • Modèle n° 2 • Utilisation des modèles : l'am rationnée	
4 Conclusion	936
• Symboles utilisés	
Références bibliographiques	939

PARTIE VII

MÉTHODES DE CONTRÔLE INDUSTRIEL

**42. Contrôle
des emballages avant
leur utilisation
et méthodes d'essais**

P. MULLOT

P. CAMUS

1 Introduction	946
2 Emballages en verre	947
3 Emballages métalliques	947
• Vernis intérieur • Boîte • Aluminium ménager	
4 Emballages en carton	948
5 Emballages et matériaux à base de matière plastique	949
• Contrôle de la matière première • Propriétés mécaniques • Propriétés optiques • Propriétés barrière • Caractéristiques d'inertie	
6 Conclusion	954
Annexes	955

**43. Les essais
sur emballages
de transport
les contraintes
des circuits
de distribution
et leur simulation
en laboratoire d'essais**

J. APPERT

1 Introduction	960
2 Quoi emballer ?	961
3 Pourquoi emballer ?	961
• Contraintes mécaniques • Contraintes climatiques • Notion de circuit logistique	
4 Comment emballer ?	968
5 Les essais de stimulation de l'environnement mécanique et climatique du circuit de distribution	968
• But des essais • Reproduction des contraintes • Méthodes d'essais • Programmes d'essais	
6 Conclusions	971
Annexes	972

**44. Les éléments
du cahier des charges
d'un emballage -
l'assurance qualité -
l'analyse fonctionnelle**

PH. PROVOST

- 1 Principes et objectifs d'un cahier des charges _____ 976
 2 Utilisations des spécifications _____ 976
- La spécification : outil de développement • La spécification et le fournisseur d'emballages • La spécification : outil juridique
 - La spécification : outil de contrôle qualité • La spécification : outil de gestion des emballages
- 3 La construction des spécifications _____ 979
- Construction de l'analyse fonctionnelle • Rédaction des spécifications • Objet et rédaction de la liste des matériaux agréés
- 4 La mise en œuvre des spécifications _____ 985
- La mise en place des spécifications • L'utilisation pour le contrôle qualité

**45. Le rapport
qualité/prix
de l'emballage
et son incidence
sur la qualité
du produit fini**

J. BOULANGER

- 1 Introduction _____ 988
 2 Définition d'un emballage de qualité _____ 988
 3 Définition du coût _____ 992
 4 Les éléments de la qualité des emballages _____ 992
- La qualité de l'emballage vis-à-vis du produit • La qualité de l'emballage vis-à-vis de lui-même • La qualité de l'emballage face à la mise en œuvre • La qualité de l'emballage vis-à-vis du circuit logistique • La qualité de l'emballage vis-à-vis de l'information • La qualité de l'emballage face à l'utilisation • La qualité de l'emballage vis-à-vis de son élimination
- 5 Les éléments du coût liés à l'emballage _____ 995
- Le coût de l'emballage • Le coût de mise en œuvre • Exemple montrant la nécessité d'une analyse de coût détaillée • Le coût logistique • Le coût d'élimination de l'emballage • Le coût des avaries et des retours
- 6 Comment obtenir un bon rapport qualité/coût _____ 998
- Connaissance de l'ensemble du circuit et de ses contraintes • Définition d'un programme d'essais • Application du programme d'essais • Application des résultats obtenus • Études de modifications • Réalisation des programmes d'essais • Examen du rapport qualité/coût
- 7 Conclusion _____ 1000

**46. La pratique
quotidienne
des problèmes
d'emballage
dans une entreprise
agroalimentaire ;
gestion des stocks**

D. BERNAILLE

B. LEVESQUE

M. REBIERE

RÉVISÉ PAR M. BOADAS

- 1 Choix d'un emballage + validation du choix _____ 1003
- Contraintes marketing et commerciales • Contraintes produits
 - Contraintes de production • Contraintes logistiques
- 2 Pratique quotidienne en usine _____ 1007
- Conditions d'entreposage des matériaux • Le contrôle • L'utilisation • La distribution au consommateur • Conclusion

PARTIE VIII

PERCÉES TECHNOLOGIQUES RÉCENTES

**47. Emballage
et environnement :
le contexte**

R. HUGEL

1 La réduction ou la diminution des emballages à la source	1018
2 La réutilisation des emballages	1020
3 Le recyclage des matériaux d'emballages	1021
4 L'incinération avec récupération d'énergie ou valorisation énergétique	1022
5 Le compostage et la biodégradation	1023
6 La mise en décharge contrôlée	1024
7 L'emballage optimisé	1025
Références bibliographiques	1027

**48. Emballage
et environnement :
aspects législatifs
et réglementaires**

J.-L. PRUDHOMME

1 Lois du 15 juillet 1975 et du 19 juillet 1976 modifiées par la loi du 13 juillet 1992	1030
• Loi n° 75-633 du 15 juillet 1975 • Loi n° 76-663 du 19 juillet 1976 • Loi n° 92-646 du 13 juillet 1992	
2 Directive européenne relative aux emballages et aux déchets d'emballages 94/62 / CE du 20 décembre 1994 (DG XI)	1035
Références bibliographiques	1037

**49. Recyclages
et valorisations
des matériaux
d'emballages**

D. AUFALVRE

F. BOURELLE

Y. COUTURIER

R. HUGEL

1 Le recyclage du verre d'emballage	1040
• Le cycle du verre • Les opérations de traitement et la qualité du verre recyclé	
2 Le recyclage des emballages en acier	1046
• Le marché des aciers pour emballage (APE) • L'acier recyclable à l'infini • La récupération et le traitement des APE dans les déchets ménagers • Le recyclage des aciers pour emballage	
3 Recyclage des papiers et des cartons	1049
• Importance du recyclage dans la production des papiers et des cartons • L'optimisation des procédés de recyclage • Récupération d'emballages multimatériaux, exemple des boîtes boisson	
4 La valorisation et le recyclage des emballages plastiques usagés	1054
• Comment diminuer l'impact des emballages plastiques sur l'environnement ? • Le recyclage matière • La valorisation énergétique • La valorisation matière première ou recyclage chimique	
Références bibliographiques	1061

FOREST SAMPLING DESK REFERENCE

Evert W. Johnson

CRC Press

Boca Raton London New York Washington, D.C.

Table of Contents

Chapter 1 Introduction to Sampling

1.1	Introduction	1
1.2	Some Basic Concepts and Terminology	1
1.3	Reasons Sampling May Be Preferred over Complete Enumeration	3
1.4	Some Further Terminology	4

Chapter 2 Accuracy and Precision of Data

2.1	Accuracy of Data	7
2.2	Precision	7
2.3	Accuracy and Precision with Discrete Variables	7
2.4	Accuracy and Precision with Continuous Variables	8
2.5	Significant Figures	9
2.6	Rounding Off	10
2.7	Computations Using Approximate Numbers	10

Chapter 3 Data Arrangement

3.1	Introduction	13
3.2	Methods of Arrangement	13
3.3	Rules Controlling Frequency Distributions	15
3.3.1	Number of Classes	15
3.3.2	Class Width or Interval	15
3.3.3	Class Midpoints	16
3.3.4	Class Limits	17
3.4	Cumulative Frequency Distributions	19
3.5	Relative Frequency Distributions	20
3.6	Graphical Presentations of Frequency Distributions	20
3.7	Descriptive Terms Used for Frequency Distributions	24

Chapter 4 Symbology

4.1	Introduction	29
4.2	Identification of Variables	29
4.3	Subscripting	29
4.4	Summation Symbology	30
4.5	Distinguishing between Populations and Sample Values	32

Chapter 5 Averages

5.1	Introduction	33
5.2	Assessing Averages	33
5.3	The Arithmetic Mean	33
5.3.1	Ungrouped Data	34
5.3.2	Grouped Data	35
5.3.3	Weighted Mean	38
5.3.4	Characteristics of the Arithmetic Mean — The Concept of Least Squares	40

5.3.5	Errors and Residuals.....	42
5.3.6	Further Characteristics of the Arithmetic Mean.....	42
5.4	The Median.....	44
5.4.1	Ungrouped Data.....	44
5.4.2	Grouped Data.....	45
5.4.3	Characteristics of the Median.....	47
5.4.4	Fractiles.....	48
5.5	The Mode.....	48
5.5.1	Determination of the Mode.....	48
5.5.2	Multimodality.....	48
5.5.3	Characteristics of the Mode.....	49
5.6	The Geometric Mean.....	49
5.6.1	Ungrouped Data.....	49
5.6.2	Grouped Data.....	51
5.6.3	Use of the Geometric Mean.....	51
5.6.4	Characteristics of the Geometric Mean.....	52
5.7	The Harmonic Mean.....	52
5.7.1	Ungrouped Data.....	53
5.7.2	Grouped Data.....	54
5.7.3	Use of the Harmonic Mean.....	54
5.7.4	Characteristics of the Harmonic Mean.....	55
5.8	The Quadratic Mean.....	56
5.8.1	Ungrouped Data.....	56
5.8.2	Grouped Data.....	56
5.8.3	Use of the Quadratic Mean.....	57
5.8.4	Characteristics of the Quadratic Mean.....	57

Chapter 6 Measures of Dispersion

6.1	Introduction.....	59
6.2	The Range.....	59
6.3	The Interquartile and Semi-Interquartile Ranges.....	60
6.4	The Average Deviation.....	61
6.5	The Variance.....	63
6.6	The Standard Deviation.....	67
6.7	The Coefficient of Variation.....	68

Chapter 7 Probability

7.1	Some Basic Concepts and Terms.....	69
7.2	Relative Frequency.....	71
7.3	Empirical Probability.....	75
7.4	Classical Probability.....	76
7.5	Probability of Alternative Events.....	80
7.6	Probability of Multiple Events.....	81
7.6.1	Sampling with and without Replacement.....	82
7.6.2	Probability in the Case of Independent Events.....	84
7.6.3	Dependent Events and Conditional Probability.....	86
7.6.4	Bayesian Probability.....	91
7.6.5	Hypergeometric Probability.....	92
7.7	Objective and Subjective Probabilities.....	93

Chapter 8 Probability Distributions

8.1	Random Variables	97
8.2	Probability Distributions	99
8.3	Probability Distribution and Empirical Relative Frequency Distributions	102
8.4	Discrete Probability Distributions	103
8.5	Continuous Probability Distributions	104
8.6	Cumulative Probability Distributions	106
8.7	The Mean of a Random Variable	109
8.8	The Function of a Random Variable	111
8.9	The Mean of a Function of a Random Variable	115
8.10	Expectation	117
8.11	The Variance of a Random Variable	117
8.12	Moments, Skewness, and Kurtosis	120
8.13	Moment-Generating Functions	124

Chapter 9 Multidimensional Probability Distributions

9.1	Multidimensional Random Variables	129
9.2	Joint Probability Distributions	131
9.3	Marginal Probabilities	132
9.4	Conditional Probabilities	135
9.5	Joint Probability Distribution Functions	137
9.6	Functions of Multidimensional Random Variables	142
9.6.1	The pdf of a Sum	147
9.6.2	The pdf of a Product	150
9.6.3	The pdf of a Quotient	151
9.7	Expectation of Functions of Multidimensional Random Variables	152
9.8	Correlation	163
9.9	Variances of Functions of Multidimensional Random Variables	165
9.10	The Regression of the Mean	170

Chapter 10 Discrete Probability Distributions

10.1	Introduction	175
10.2	The Rectangular Probability Distribution ($D:M, y_A, y_B$)	175
10.3	The Binomial Probability Distribution ($B:n, p$)	178
10.4	The Hypergeometric Probability Distribution ($H:N, N_1, n$)	187
10.5	The Poisson Probability Distribution ($p:\lambda$)	192
10.6	The Geometric Probability Distribution ($G:p$)	200
10.7	The Negative Binomial and Pascal Probability Distributions ($NB:m, p$ and $C:m, p$)	203
10.8	The Multinomial Probability Distribution ($M:p_1, p_2, \dots$)	213

Chapter 11 Continuous Probability Distributions

11.1	The Rectangular Probability Distribution ($R:y_A, y_B$)	215
11.2	The Normal Probability Distribution ($N:\mu, \sigma$)	216
11.3	The Gamma Probability Distribution ($\Gamma:r, a$)	232
11.4	The Exponential Probability Distribution ($E:a$)	239
11.5	The Chi-Square Probability Distribution ($\chi^2:k$)	241
11.6	The Beta Probability Distribution ($\beta:r_1, r_2$)	244
11.7	The Bivariate Normal Probability Distribution ($N:\mu_1, \sigma_1, N_2:\mu_2, \sigma_2$)	250
11.8	The Weibull Probability Distribution ($W:x, a, y_0$)	254

Chapter 12 Sampling Theory

12.1 Introduction.....	261
12.2 Sampling Design.....	261
12.3 Sampling, Sampling Units, and Sampling Frames.....	261
12.4 Random Sampling and Random Numbers.....	262
12.5 Sampling Frames and Infinite Populations.....	264
12.6 The Sample Size and the Sampling Fraction.....	265
12.7 Sampling Distributions.....	265
12.8 Standard Errors.....	268
12.9 Bias.....	268
12.10 Precision.....	269
12.11 Sampling Distribution of Means.....	269
12.12 Sampling Distribution of Variances.....	276
12.13 Sampling Distribution of Standard Deviations.....	285
12.14 Sampling Distribution of Proportions.....	290
12.15 Sampling Distribution of Covariances.....	294
12.16 Sampling Distribution of Differences.....	299

Chapter 13 Estimation of Parameters

13.1 Introduction.....	309
13.2 Estimators and Estimates.....	309
13.3 Point Estimates.....	310
13.4 Criteria for Judging Estimators of Parameters.....	310
13.5 Laws of Large Numbers.....	311
13.6 Maximum Likelihood Estimators.....	312
13.7 Interval Estimates.....	317
13.8 Confidence Interval Estimates of Population Parameters Using the Normal Distribution.....	318
13.9 Confidence Interval Estimates of Population Means Using Student's t Distribution.....	320
13.10 Chebyshev's Theorem.....	328
13.11 Confidence Interval Estimates of Population Proportions.....	330
13.11.1 True Confidence Intervals in the Case of the Binomial Distribution.....	331
13.11.2 True Confidence Intervals in the Case of the Hypergeometric Distribution.....	334
13.11.3 Confidence Intervals Based on the Normal Distribution.....	336
13.11.4 Confidence Limits Based on the Use of the F Distribution.....	340
13.11.5 Confidence Limits in the Case of the Poisson Distribution.....	344
13.11.6 Confidence Intervals from Published Curves and Tables.....	347
13.12 Confidence Interval Estimates of Population Variances and Standard Deviations.....	348
13.13 One-Sided Confidence Intervals.....	353
13.14 Sampling Errors, Allowable Errors, and Needed Sample Size.....	354

Chapter 14 Fundamentals of Hypothesis Testing

14.1 Introduction.....	361
14.2 Statistical Hypotheses.....	361
14.3 Type I and Type II Errors.....	362
14.4 Statistical Significance.....	363
14.5 Homogeneity Tests.....	363
14.6 One- and Two-Tailed Tests.....	365
14.7 More on Type I and Type II Errors.....	365

14.8	The Power of the Test.....	368
14.9	Decision Rules.....	368
14.10	Test Procedures.....	369
14.11	Homogeneity Test Using a Sample Mean.....	370
14.12	Test of a Difference (Unpaired).....	374
14.13	Test of a Difference (Paired).....	378
14.14	The Linear Additive Model.....	384
14.15	The F Distribution.....	387
14.16	Testing for Homogeneity of Variance Using F	399
14.17	Bartlett's Test for Homogeneity of Variance.....	400
14.18	Testing for Goodness of Fit Using χ^2	402
14.19	Testing for Normality.....	405
14.20	The Analysis of Variance.....	410
14.21	Transformations.....	419
14.22	Multiple Comparisons.....	420
14.22.1	The Least Significant Difference.....	420
14.22.2	The Studentized Range.....	422

Chapter 15 Regression and Correlation

15.1	Introduction.....	429
15.2	Theory of Regression.....	429
15.2.1	The Variables.....	430
15.2.2	Coordinate Systems.....	430
15.2.3	Two-Variable Regression.....	430
15.2.4	Multiple Variable Regression.....	432
15.3	Fitting a Regression.....	437
15.3.1	The Controlling Criteria.....	437
15.3.2	Manual or Freehand Fitting.....	438
15.3.3	Modeling.....	440
15.3.4	Developing a Model.....	444
15.3.5	Logarithmic Transformations of Nonlinear Models.....	452
15.3.6	The MATCHACURVE Procedure.....	453
15.3.7	Least Squares Fitting.....	456
15.3.8	Fitting a Two-Dimensional Model.....	458
15.3.9	Fitting a Multidimensional Model.....	465
15.3.10	Weighted Regression.....	469
15.3.11	Conditioned Regression.....	477
15.4	Dummy Variables.....	479
15.5	Variance about the Regression.....	480
15.6	Confidence Intervals for Regression Estimates.....	486
15.7	Correlation.....	496
15.8	Hypothesis Testing in Regression Operations.....	504
15.9	Stepwise Variable Selection.....	512

Chapter 16 Stratified Random Sampling

16.1	Introduction.....	521
16.2	The Stratification Process.....	521
16.3	The Stratified Population.....	526
16.4	Estimation of the Parameters.....	530
16.5	Allocation of the Sample.....	537

16.5.1	Total Sample Size	538
16.5.2	Equal Allocation	539
16.5.3	Proportional Allocation	542
16.5.4	Value Allocation	546
16.5.5	Optimum Allocation	548
16.5.6	Neyman Allocation	554
16.6	Comparison of the Methods of Allocation	558
16.7	Stratification and the Estimation of Proportions	564
16.8	Effectiveness of Stratification	574
16.9	Stratum Sizes	575
16.10	Miscellany	576

Chapter 17 Cluster Sampling

17.1	Introduction	579
17.2	Types of Cluster Sampling	580
17.3	Cluster Configuration	580
17.4	Population Parameters	581
17.4.1	Cluster Parameters	581
17.4.2	Overall Parameters	583
17.5	Estimation of the Parameters	584
17.5.1	Cluster Statistics	584
17.5.2	Overall Statistics	586
17.5.3	The Variance of the Overall Total	588
17.5.4	The Variance of the Overall Mean	594
17.6	The Intraclass Correlation Coefficient	598
17.7	Overlapping and Interlocking of Clusters	602
17.8	Examples	613
17.8.1	Two-Stage Sampling When $1 < m < M$, $1 < n_i < N_i$, and N_i Is Constant	613
17.8.2	Simple Cluster Sampling When $1 < m < M$ (Example I)	619
17.8.3	Two-Stage Sampling When $m = M$ and $1 < n_i < N_i$	622
17.8.4	Two-Stage Sampling When $m = M$ and $n_i = 1$	627
17.8.5	Simple Cluster Sampling When $m = 1$	629
17.8.6	Simple Cluster Sampling When $1 < m < M$ (Example II)	632
17.8.7	Two-Stage Sampling When $m = M = 1$ and $1 < n_i < N_i$	635
17.8.8	Two-Stage Sampling When $1 < m < M$, $1 < n_i < N_i$, and N_i Is Not Constant	636
17.9	Variance Functions	638
17.10	Cost Functions	651
17.11	Efficiency of Cluster Sampling	655
17.11.1	Two-Stage Cluster Sampling	655
17.11.2	Simple Cluster Sampling	658
17.12	Sample Size Determination	659
17.12.1	Two-Stage Cluster Sampling	660
17.12.2	Simple Cluster Sampling	663
17.13	Optimum Cluster Size	666
17.14	Cluster Sampling for Proportions	669
17.14.1	Using Two-Stage Cluster Sampling, When $1 < m < M$ and $1 < n_i < N_i$	670
17.14.2	Using Simple Cluster Sampling, When $1 < m < M$ and $n_i = a = N_i = A$	676
17.15	Three-Stage Sampling	680
17.15.1	The Parameters	681
17.15.2	Estimation of the Parameters	682

17.15.3 Variance of the Overall Mean.....	683
17.15.4 Example of Three-Stage Sampling.....	685
17.15.5 Sample Sizes	690
17.16 Stratified Cluster Sampling.....	696
17.16.1 The Parameters and Their Estimation	696
17.16.2 Example of Stratified Cluster Sampling Using Subsampling.....	697
17.16.3 Example of Stratified Cluster Sampling without Subsampling	703
17.16.4 Sample Size.....	705

Chapter 18 Systematic Sampling

18.1 Introduction	707
18.2 Approaches to Systematic Sampling	707
18.3 Element Spacing and Sampling Intensity.....	707
18.4 Cluster Sampling Frames.....	711
18.4.1 Under Approach 1.....	711
18.4.2 Under Approach 2.....	712
18.5 Random and Arbitrary Starts	712
18.6 Representativeness of the Sample	714
18.7 Population Types.....	714
18.7.1 Random Populations	714
18.7.2 Ordered Populations.....	714
18.7.3 Periodic Populations	715
18.7.4 Uniform Populations.....	717
18.7.5 Stratified Populations.....	718
18.7.6 Autocorrelated Populations.....	718
18.8 Population Parameters.....	720
18.9 Variance of the Overall Total and Mean	720
18.9.1 Under Approach 1.....	720
18.9.2 Under Approach 2.....	726
18.9.3 Effect of a Linear Trend	732
18.9.4 Effect of a Curvilinear Trend.....	737
18.9.5 Removing Trend Effects Using Regression	737
18.9.6 Removing Trend Effects without Using Regression.....	740
18.9.7 Effect of a Naturally Stratified Population.....	743
18.9.8 Effects of Periodicity	744
18.9.9 Effect of Autocorrelation	745
18.10 Estimation of the Parameters.....	746
18.10.1 Under Approach 1.....	746
18.10.2 Under Approach 2.....	748
18.11 Approximations of the Variance of the Overall Mean.....	750
18.11.1 Use of Multiple Random Starts.....	750
18.11.2 Using Random Sampling Formulae	750
18.11.3 Grouping Pairs of Clusters	754
18.11.4 Method of Successive Differences	755
18.11.5 Method of Balanced Differences.....	757

Chapter 19 Ratio Estimation

19.1 Introduction	761
19.2 Estimating R	762
19.3 Bias of r	765

19.3.1	Ratio of Means.....	765
19.3.2	Mean of Ratios.....	770
19.3.3	Unbiased Ratio-Type Estimators.....	773
19.4	Approximations of the Ratio Estimators.....	775
19.4.1	Ratio of Means.....	775
19.4.2	Mean of Ratios.....	777
19.5	Using a Ratio to Estimate a Population Total and Mean.....	778
19.5.1	Ratio of Means.....	778
19.5.2	Mean of Ratios.....	780
19.5.3	Unbiased Ratio-Type Estimators.....	781
19.6	Variance of the Ratio Estimates.....	781
19.6.1	Ratio of Means.....	781
19.6.2	Mean of Ratios.....	785
19.6.3	Unbiased Ratio-Type Estimators.....	788
19.7	Sample size.....	788
19.7.1	Ratio of Means.....	788
19.7.2	Mean of Ratios.....	792
19.8	Efficiency of Ratio Estimators.....	793
19.8.1	Ratio of Means.....	793
19.8.2	Mean of Ratios.....	795
19.8.3	The Hartley-Ross Unbiased Ratio Estimator.....	796
19.9	Ratio Estimation and Stratified Sampling.....	797
19.9.1	The Combined Ratio Estimate.....	800
19.9.2	The Separate Ratios Estimate.....	802
19.9.3	Allocation of the Sample.....	804
19.9.4	Discussion.....	806
19.10	Ratio Estimation and Cluster Sampling.....	809
19.11	Comments.....	

Chapter 20 Double Sampling

20.1	Introduction.....	811
20.2	Using Regression.....	812
20.2.1	Estimating μ_y	812
20.2.2	The Variance of the Estimate.....	815
20.2.3	Estimating the Variance of the Estimate.....	821
20.2.4	Example.....	823
20.2.5	Relative Precision.....	826
20.2.6	Sample Size.....	826
20.2.6.1	Using a Budget Constraint.....	830
20.2.6.2	Using an Allowable Sampling Error Constraint.....	833
20.2.7	Relative Efficiency.....	835
20.3	Using Ratio Estimators.....	835
20.3.1	Estimating μ_y	835
20.3.2	The Variance of the Estimate.....	838
20.3.2.1	The Approximate Variance When Subsampling Is Used.....	843
20.3.2.2	The Approximate Variance When Subsampling Is Not Used.....	844
20.3.3	Estimating the Variance of the Estimate.....	844
20.3.4	Sample Size.....	844

Chapter 21 Sampling with Unequal Probabilities

21.1	Introduction	847
21.2	Mathematical Rationale	847
21.3	Sampling with Probability Proportional to Size (PPS)	856
21.3.1	List Sampling	856
21.3.2	Angle-Count Sampling	858
21.3.2.1	Point Sampling	858
21.3.2.2	Tree-Centered Plots	859
21.3.2.3	Probabilities	860
21.3.2.4	Horizontal Point Sampling	863
21.3.2.5	Instrumentation	869
21.3.2.6	The Critical Angle	869
21.3.2.7	Sloper	870
21.3.2.8	Vertical Point Sampling	872
21.3.2.9	Line Sampling	874
21.3.2.10	Statistical Properties	876
21.3.2.11	Compensating for Sloper and Borderline Trees	885
21.3.2.12	Volume Estimation	888
21.3.2.13	Estimating the Number of Trees	892
21.3.2.14	Estimating the Total Amount of dbh	894
21.3.2.15	Estimating the Mean dbh	895
21.3.2.16	Estimating the Mean Volume per Tree	896
21.3.2.17	Example of the Computations Associated with Horizontal Point Sampling	896
21.3.2.18	Remarks	900
21.4	3P Sampling	900
21.4.1	The Context	901
21.4.2	An Equal Probability Solution	901
21.4.3	Adjusted 3P Sampling	904
21.4.4	The Bias in Adjusted 3P Sampling	906
21.4.5	Expected Sample Size	914
21.4.6	Probability of $n = 0$	916
21.4.7	Variance of the Adjusted 3P Estimate	917
21.4.8	Control of the Probability of Selection	919
21.4.9	Unadjusted 3P Sampling	920
21.4.10	Variance of the Unadjusted 3P Sample	923
21.4.11	Interpenetrating Samples	926
21.4.12	Using Random Numbers	926
21.4.13	Use of Dendrometers	926
21.4.14	Supporting Computer Programs	926
21.4.15	Units of Measure	928
21.4.16	Grosenbaugh's Symbology	928
21.4.17	Remarks	928
Appendix	931
References	963
Index	971

Econometrics

Third Edition

With 48 Figures
and 41 Tables

Springer

Table of Contents

Preface	VII
Table of Contents	XI
Part I	1
1 What is Econometrics?	3
1.1 Introduction	3
1.2 A Brief History	5
1.3 Critiques of Econometrics	7
1.4 Looking Ahead	8
Notes	10
References	10
2 Basic Statistical Concepts	13
2.1 Introduction	13
2.2 Methods of Estimation	13
2.3 Properties of Estimators	16
2.4 Hypothesis Testing	21
2.5 Confidence Intervals	31
2.6 Descriptive Statistics	32
Notes	36
Problems	37
References	41
Appendix	44
3 Simple Linear Regression	51
3.1 Introduction	51
3.2 Least Squares Estimation and the Classical Assumptions	52
3.3 Statistical Properties of Least Squares	57
3.4 Estimation of σ^2	59
3.5 Maximum Likelihood Estimation	59
3.6 A Measure of Fit	61
3.7 Prediction	62
3.8 Residual Analysis	64
3.9 Numerical Example	66
3.10 Empirical Example	67
Problems	70
References	75
Appendix	75

4	Multiple Regression Analysis	77
4.1	Introduction	77
4.2	Least Squares Estimation	77
4.3	Residual Interpretation of Multiple Regression Estimates	79
4.4	Overspecification and Underspecification of the Regression Equation	80
4.5	R-Squared versus R-Bar-Squared	82
4.6	Testing Linear Restrictions	82
4.7	Dummy Variables	85
	Note	90
	Problems	90
	References	95
	Appendix	97
5	Violations of the Classical Assumptions	99
5.1	Introduction	99
5.2	The Zero Mean Assumption	99
5.3	Stochastic Explanatory Variables	100
5.4	Normality of the Disturbances	102
5.5	Heteroskedasticity	103
5.6	Autocorrelation	115
	Notes	125
	Problems	126
	References	132
6	Distributed Lags and Dynamic Models	137
6.1	Introduction	137
6.2	Infinite Distributed Lag	143
6.2.1	Adaptive Expectations Model (AEM)	144
6.2.2	Partial Adjustment Model (PAM)	145
6.3	Estimation and Testing of Dynamic Models with Serial Correlation	145
6.3.1	A Lagged Dependent Variable Model with AR(1) Disturbances	147
6.3.2	A Lagged Dependent Variable Model with MA(1) Disturbances	149
6.4	Autoregressive Distributed Lag	149
	Note	150
	Problems	151
	References	153
Part II		155
7	The General Linear Model: The Basics	157
7.1	Introduction	157
7.2	Least Squares Estimation	157

7.3	Partitioned Regression and the Frisch-Waugh-Lovell Theorem	161
7.4	Maximum Likelihood Estimation	162
7.5	Prediction	165
7.6	Confidence Intervals and Test of Hypotheses	166
7.7	Joint Confidence Intervals and Test of Hypotheses	167
7.8	Restricted MLE and Restricted Least Squares	168
7.9	Likelihood Ratio, Wald and Lagrange Multiplier Tests	169
	Notes	174
	Problems	175
	References	180
	Appendix	181
8	Regression Diagnostics and Specification Tests	187
8.1	Influential Observations	187
8.2	Recursive Residuals	197
8.3	Specification Tests	204
8.4	Nonlinear Least Squares and the Gauss-Newton Regression	215
8.5	Testing Linear versus Log-Linear Functional Form	224
	Notes	226
	Problems	226
	References	230
9	Generalized Least Squares	235
9.1	Introduction	235
9.2	Generalized Least Squares	235
9.3	Special Forms of Ω	237
9.4	Maximum Likelihood Estimation	238
9.5	Test of Hypotheses	239
9.6	Prediction	239
9.7	Unknown Ω	240
9.8	The W, LR and LM Statistics Revisited	240
9.9	Spatial Error Correlation	242
	Note	244
	Problems	244
	References	249
10	Seemingly Unrelated Regressions	253
10.1	Introduction	253
10.2	Feasible GLS Estimation	255
10.3	Testing Diagonality of the Variance-Covariance Matrix	258
10.4	Seemingly Unrelated Regressions with Unequal Observations	259
10.5	Empirical Example	260
	Problems	262

References	266
11 Simultaneous Equations Model	269
11.1 Introduction	269
11.1.1 Simultaneous Bias	269
11.1.2 The Identification Problem	272
11.2 Single Equation Estimation: Two-Stage Least Squares	275
11.3 System Estimation: Three-Stage Least Squares	281
11.4 The Identification Problem Revisited: The Rank Condition of Identification	282
11.5 Test for Over-Identification Restrictions	287
11.6 Hausman's Specification Test	289
11.7 Empirical Example	292
Note	293
Problems	293
References	303
12 Pooling Time-Series of Cross-Section Data	307
12.1 Introduction	307
12.2 The Error Components Procedure	307
12.2.1 The Fixed Effects Model	308
12.2.2 The Random Effects Model	311
12.2.3 Maximum Likelihood Estimation	314
12.2.4 Prediction	315
12.2.5 Empirical Example	316
12.2.6 Testing in a Pooled Model	318
12.3 Time-Wise Autocorrelated and Cross-Sectionally Heteroskedastic Procedures	323
12.4 A Comparison of the Two Procedures	324
Problems	325
References	328
13 Limited Dependent Variables	331
13.1 Introduction	331
13.2 The Linear Probability Model	331
13.3 Functional Form: Logit and Probit	332
13.4 Grouped Data	334
13.5 Individual Data: Probit and Logit	335
13.6 The Binary Response Model Regression	337
13.7 Asymptotic Variances for Predictions and Marginal Effects	339
13.8 Goodness of Fit Measures	340
13.9 Empirical Example	340
13.10 Multinomial Choice Models	343
13.10.1 Ordered Response Models	343
13.10.2 Unordered Response Models	344

13.11 The Censored Regression Model	346
13.12 The Truncated Regression Model	349
13.13 Sample Selectivity	350
Notes	352
Problems	352
References	356
Appendix	358
14 Time-Series Analysis	361
14.1 Introduction	361
14.2 Stationarity	361
14.3 The Box and Jenkins Method	363
14.4 Vector Autoregression	366
14.5 Unit Roots	367
14.6 Trend Stationary versus Difference Stationary	371
14.7 Cointegration	373
14.8 Autoregressive Conditional Heteroskedasticity	375
Note	378
Problems	379
References	382
Appendix	387
List of Figures	393

Mathematical Formulas for Economists

With 58 Figures and 6 Tables

Springer

Contents

Mathematical Symbols and Constants	1
Notations and symbols	1
Mathematical constants	2
Sets and Propositions	3
Notion of a set	3
Relations between sets	3
Operations with sets	4
Rules for operations with sets	5
Product sets and mappings	6
Propositional calculus	7
Number Systems and their Arithmetic	9
Natural, integer, rational, and real numbers	9
Calculation with real numbers	10
Absolute values	11
Factorial and binomial coefficients	12
Equations	13
Inequalities	14
Finite sums	15
Powers and roots	15
Logarithms	16
Complex numbers	17
Combinatorial Analysis	19
Permutations	19
Arrangements	19
Combinations	20
Sequences and Series	21
Sequences of numbers	21
Sequences of functions	22
Infinite series	23
Function and power series	25
Taylor series	27
Fourier series	29

Mathematics of Finance	31
Simple interest	31
Compound interest	33
Annuities	36
Dynamic annuities	38
Amortization calculus	39
Price calculus	41
Investment analysis	42
Depreciations	43
Numerical methods for the determination of zeros	44
Functions of one Independent Variable	45
Basic notions	45
Linear functions	47
Quadratic functions	47
Polynomials	48
Fractional rational functions, partial fraction decomposition	49
Exponential functions	50
Logarithmic functions	51
Trigonometric functions	52
Inverse trigonometric functions	54
Hyperbolic functions	55
Area-hyperbolic functions	55
Some economic functions	56
Differential Calculus for Functions of one Variable	59
Limit of a function	59
Continuity	60
Differentiation	61
Economic interpretation of the first derivative	64
Rates of change and elasticities	66
Mean value theorems	68
Higher derivatives and Taylor expansion	68
Description of function features by means of derivatives	70
Investigation of economic functions, profit maximization	73
Integral Calculus for Functions of one Variable	77
Indefinite integral	77
Definite integral	78
Tables of indefinite integrals	79
Improper integrals	86
Parameter integrals	86
Economic applications of integral calculus	87

Differential Equations	89
First-order differential equations	89
Linear differential equations of n -th order	90
First-order linear systems with constant coefficients	93
Difference Equations	95
First-order linear difference equations	95
Economic models	96
Linear second-order difference equations	97
Economic models	99
Linear difference equations of n -th order with constant coefficients	100
Differential Calculus for Functions of Several Variables	101
Basic notions	101
Point sets of the space \mathbb{R}^n	101
Limit and continuity	102
Differentiation of functions of several variables	103
Total differential	106
Unconstrained extreme value problems	107
Constrained extreme value problems	108
Least squares method	110
Propagation of errors	111
Economic applications	112

<i>Preface</i>		xvii
<i>Part I Introduction and basic concepts</i>		1
1	Introduction	3
	References	6
2	Basic concepts	8
2.1	Stochastic processes	8
2.2	Some commonly used stationary models	11
2.3	Box-Jenkins methods	17
2.4	Integrated variables and cointegration	20
2.5	Spurious regression	28
2.6	Deterministic trend and stochastic trend	29
2.7	Detrending methods	32
2.8	VAR, ECM, and ADL	34
2.9	Unit root tests	37
2.10	Cointegration tests and ECM	39
2.11	Summary	41
	References	42
<i>Part II Unit roots and cointegration</i>		45
3	Unit roots	47
3.1	Introduction	47
3.2	Unit roots and Wiener processes	49
3.3	Unit root tests without a deterministic trend	60
3.4	DF test with a linear deterministic trend	65

3.5	Specification of deterministic trends	72
3.6	Unit root tests for a wide class of errors	74
3.7	Sargan-Bhargava and Bhargava tests	82
3.8	Variance ratio tests	86
3.9	Tests for TSP versus DSP	87
3.10	Forecasting from TS versus DS models	89
3.11	Summary and conclusions	92
	References	92
4	Issues in unit root testing	98
4.1	Introduction	98
4.2	Size distortion and low power of unit root tests	100
4.3	Solutions to the problems of size and power	103
4.4	Problem of overdifferencing: MA roots	116
4.5	Tests with stationarity as null	120
4.6	Confirmatory analysis	126
4.7	Frequency of observations and power of unit root tests	129
4.8	Other types of nonstationarity	131
4.9	Panel data unit root tests	133
4.10	Uncertain unit roots and the pre-testing problem	139
4.11	Other unit root tests	140
4.12	Median-unbiased estimation	141
4.13	Summary and conclusions	145
	References	146
5	Estimation of cointegrated systems	155
5.1	Introduction	155
5.2	A general CI system	155
5.3	A two-variable model: Engle-Granger methods	156
5.4	A triangular system	160
5.5	System estimation methods	165
5.6	The identification problem	173
5.7	Finite sample evidence	175
5.8	Forecasting in cointegrated systems	184
5.9	Miscellaneous other problems	187
5.10	Summary and conclusions	191
	References	191
6	Tests for cointegration	198
6.1	Introduction	198
6.2	Single equation methods: residual-based tests	198

6.3	Single equation methods: ECM tests	203
6.4	Tests with cointegration as null	205
6.5	Multiple equation methods	211
6.6	Cointegration tests based on LCCA	222
6.7	Other tests for cointegration	226
6.8	Miscellaneous other problems	228
6.9	Of what use are cointegration tests?	233
6.10	Conclusions	241
	References	242
7	Econometric modeling with integrated regressors	249
7.1	I(1) regressors not cointegrated	249
7.2	I(1) regressors cointegrated	250
7.3	Unbalanced equations	251
7.4	Lagged dependent variables: the ARDL model	252
7.5	Uncertain unit roots	254
7.6	Uncertain unit roots and cointegration	256
7.7	Summary and conclusions	258
	References	258
<i>Part III Extensions of the basic model</i>		261
8	The Bayesian analysis of stochastic trends	263
8.1	Introduction to Bayesian inference	264
8.2	The posterior distribution of an autoregressive parameter	266
8.3	Bayesian inference on the Nelson–Plosser data	268
8.4	The debate on the appropriate prior	271
8.5	Classical tests versus Bayesian tests	277
8.6	Priors and time units of measurement	277
8.7	On testing point null hypotheses	278
8.8	Further comments on prior distributions	284
8.9	Bayesian inference on cointegrated systems	287
8.10	Bayesian long-run prediction	290
8.11	Conclusion	291
	References	292
9	Fractional unit roots and fractional cointegration	296
9.1	Some definitions	296
9.2	Unit root tests against fractional alternatives	298
9.3	Estimation of ARFIMA models	300
9.4	Estimation of fractionally cointegrated models	302

9.5	Empirical relevance of fractional unit roots	303
9.6	Summary and conclusions	305
	References	306
10	Small sample inference: bootstrap methods	309
10.1	Introduction	309
10.2	A review of the bootstrap approach	309
10.3	The AR(1) model	322
10.4	Bootstrapping unit root tests	325
10.5	The moving block bootstrap and extensions	328
10.6	Issues in bootstrapping cointegrating regressions	332
10.7	Miscellaneous other applications	335
10.8	Conclusions	336
	References	336
11	Cointegrated systems with I(2) variables	342
11.1	Determination of the order of differencing	342
11.2	Cointegration analysis with I(2) and I(1) variables	348
11.3	Empirical applications	355
11.4	Summary and conclusions	358
	References	359
12	Seasonal unit roots and seasonal cointegration	362
12.1	Effect of seasonal adjustment	364
12.2	Seasonal integration	365
12.3	Tests for seasonal unit roots	366
12.4	The unobserved component model	371
12.5	Seasonal cointegration	375
12.6	Estimation of seasonally cointegrated systems	376
12.7	Empirical evidence	378
12.8	Periodic autoregression and periodic integration	379
12.9	Periodic cointegration and seasonal cointegration	381
12.10	Time aggregation and systematic sampling	381
12.11	Conclusion	382
	References	383

CONTENTS

Preface xv

PART I OVERVIEW

CHAPTER 1	Introduction to Cost-Benefit Analysis	1
	Individual versus Social Costs and Benefits	1
	The Purpose and Uses of CBA	2
	The Demand for CBA	5
	The Cost of CBA	6
	Readers of This Book	6
	The Basic Steps of CBA: Coquihalla Highway Example	7
	Bureaucratic and Political "Lenses"	17
	Conclusion	21
CHAPTER 2	Conceptual Foundations of Cost-Benefit Analysis	25
	CBA as a Framework for Measuring Efficiency	25
	Using CBA for Decision Making	29
	Fundamental Issues Related to Willingness-to-Pay	32
	Concerns about the Role of CBA in the Political Process	38
	Limitations of CBA: Other Analytical Approaches	39
	Conclusion	45

PART II FUNDAMENTALS OF CBA

CHAPTER 3	Basic Microeconomic Foundations of Cost-Benefit Analysis	49
	Demand Schedules	49
	Supply Schedules	53
	Social Surplus and Allocative Efficiency	56
	Conclusion	59
	Appendix 3A Consumer Surplus and Willingness-to-Pay	59

CHAPTER 4	Valuing Benefits and Costs in Primary Markets	67
	Actually Used versus Conceptually Correct Measures of Benefits and Costs	69
	Valuing Outcomes: Willingness-to-Pay	70
	Valuing Inputs: Opportunity Costs	86
	Project Effects on Government Revenues	97
	Conclusion	98
CHAPTER 5	Valuing Benefits and Costs in Secondary Markets	103
	Valuing Benefits and Costs in Efficient Secondary Markets	103
	Valuing Benefits and Costs in Distorted Secondary Markets	111
	Secondary Market Effects from the Perspective of Local Communities	114
	Conclusion	115
CHAPTER 6	Discounting Future Benefits and Costs	120
	Basics of Discounting	121
	Compounding and Discounting over Multiple Years	123
	Timing of Benefits and Costs	129
	Long-Lived Projects and Terminal Values	130
	Comparing Projects with Different Time Frames	133
	Real versus Nominal Dollars	135
	Relative Price Changes	140
	Sensitivity Analysis in Discounting	141
	Conclusion	143
	Appendix 6A Shortcut Methods for Calculating the Present Value of Annuities and Perpetuities	143
	Appendix 6B Discounting with Multiple Compounding in Each Period	148
CHAPTER 7	Dealing with Uncertainty: Expected Value, Sensitivity Analysis, and the Value of Information	156
	Expected Value Analysis	156
	Sensitivity Analysis	166
	Information and Quasi-Option Value	176
	Conclusion	184
	Appendix 7A Doing Monte Carlo Sensitivity Analysis with a Simple Spreadsheet	185
CHAPTER 8	Option Price and Option Value	192
	<i>Ex Ante</i> Willingness-to-Pay: Option Price	193
	Determining the Bias in Expected Surplus: Signing Option Value	203
	Rationales for Expected Surplus as a Practical Benefit Measure	205

	Conclusion	208	
	Appendix 8A Signing Option Value	208	
CHAPTER 9	Existence Value	213	
	Active and Passive Use Value	213	
	The Measurement of Existence Value	217	
	Conclusion	220	
	Appendix 9A Expenditure Functions and the Partitioning of Benefits	220	
CHAPTER 10	The Social Discount Rate	227	
	Does the Choice of Discount Rate Matter?	229	
	The Theory behind the Appropriate Social Discount Rate Method in Perfect Markets	230	
	Alternative Social Discount Rate Methods in the Absence of Perfect Markets	236	
	The Social Discount Rate in Actual Practice	249	
	Conclusion	250	
	Appendix 10A Adjusting the Social Discount Rate for Systematic Risk	251	
	Appendix 10B Social Discounting Based on the Real Growth Rate	254	
	Appendix 10C Computing Changes in Investment and Consumption When the Project Is Financed by Funds Raised through Issuing Bonds	257	
PART III VALUATION OF IMPACTS			
CHAPTER 11	Valuing Impacts from Observed Behavior: Demonstrations	266	
	Why Conduct Demonstration Projects?	267	
	Alternative Evaluation Designs	268	
	CBAs of Demonstration Projects	272	
	CBAs of Employment and Training Demonstrations: An Introduction	273	
	The CBA Framework in the Education and Training Context	274	
	Conceptual Issues in Conducting CBAs of Education and Training Demonstrations	276	
	Choosing Prediction Parameters	287	
	A Case Study: CBAs of Welfare-to-Work Demonstrations	289	
	Sensitivity of the Work/Welfare Findings to Alternative Assumptions	294	
	Conclusion	300	
CHAPTER 12	Valuing Impacts from Observed Behavior: Direct Estimation of Demand Curves	305	
	Project Revenues as the Measure of (Gross) Benefits	306	
	Direct Estimation of the Demand Curve	306	

	Estimating the Marginal Excess Tax Burden (METB)	320
	Conclusion	321
	Appendix 12A An Introduction to Multiple Regression Analysis	322
CHAPTER 13	Valuing Impacts from Observed Behavior: Other Revealed Preference Methods	329
	Market Analogy Method	330
	Intermediate Good Method	336
	Asset Valuation Method	338
	Hedonic Price Method	339
	Travel Cost Method	344
	Defensive Expenditures Method	352
	Conclusion	354
CHAPTER 14	Valuing Impacts through Surveys: Contingent Valuation	358
	The Role of Contingent Valuation	358
	Overview of Contingent Valuation Methods	359
	Payment Vehicle	363
	General Survey Issues	364
	Criticisms of Contingent Valuation	368
	Contingent Valuation Problems	368
	How Accurate Is Contingent Valuation?	380
	Heuristics for the Design and Use of CV Surveys	382
	Conclusion	383
CHAPTER 15	Shadow Prices from Secondary Sources	391
	The Value of Life	392
	The Cost of Injuries	396
	The Cost of Crime	399
	The Value of Time	401
	The Value of Recreational Benefits	402
	Existence Value of Species	404
	Benefits of Water Quality Improvements	405
	The Cost of Noise	407
	The Cost of Air Pollution	407
	The Cost of Taxation: Marginal Excess Tax Burden	409
	Transferring and Adjusting Plug-In Values	410
	Conclusion	412
CHAPTER 16	Shadow Prices: Applications to Developing Countries	417
	The LMST Methodology	418
	Illustrations of the LMST Method in Practice	419

Shadow Pricing When Goods Are in Fixed Supply	425
The Shadow Price of Labor	426
Additional Topics	430
Is the LMST Method Actually Used for Project Evaluation?	433
Conclusion	433

PART IV RELATED METHODS AND ACCURACY

CHAPTER 17 Cost-Effectiveness Analysis and Cost-Utility Analysis	437
Cost-Effectiveness Analysis	438
Cost-Utility Analysis	444
Cost-Effectiveness Analysis in Pharmacoeconomics	449
The Use of League Tables	452
Conclusion: When Is CEA Close to CBA?	452
CHAPTER 18 Distributionally Weighted Cost-Benefit Analysis	456
Distributional Justifications for Income Transfer Programs	457
The Case for Treating Low- and High-Income Groups Differently in CBA	458
Distributional Weights	461
Determining Distributional Weights	462
Politically Determined Weights	463
A Pragmatic Approach to Weighting	464
Conclusion	469
CHAPTER 19 How Accurate Is CBA?	473
Sources of Errors in CBA Studies	474
The Distribution of Net Benefits over Time	476
Summary of the CBAs of the Coquihalla Highway	478
Analysis of the Differences among the CBAs	480
Conclusions Arising from the Comparisons	485
A Selected Cost-Benefit Analysis Bibliography	489
Name Index	511
Subject Index	517

Atlas de Patología Ovina

Luis Miguel Ferrer

José A. García de Jalón

Marcelo De las Heras

SERVET

índice

Índice	13
Cordero lactante	18
Cordero de cebo y animales de reposición	74
Ovino adulto	146
Índice alfabético	300
Índice de lesiones más frecuentes en matadero	308
Lecturas recomendadas	311

Cordero lactante	
Patología del cordero neonato	20
Corderos prematuros	20
Hipotermia y anemia	21
Secuelas del parto y traumatismos	25
Patología del aparato digestivo	28
Colibacilosis endotóxica (síndrome de la boca mojada)	28
Colibacilosis diarreica	30
Colibacilosis septicémica	33
Enterotoxemia hemorrágica	37
Disentería del cordero	39
Criptosporidiosis (Diarrea por <i>Cryptosporidium parvum</i>)	43
Onfalitis y abscesos	46
Necrobacilosis	49
Poliartritis	52
Patología del aparato respiratorio	54
Pasterelosis septicémica	54
Pasterelosis neumónica	56
Aspergilosis pulmonar	58
Otras lesiones respiratorias	59
Patología del sistema nervioso	60
Hipomielogénesis congénita. Temblor congénito. (Enfermedad de la frontera. <i>Border disease</i>).	60
Ataxia enzoótica	64
Tétanos	65
Encefalomiелitis purulentas (bacterianas)	66
Enfermedad de Aujeszky	68
Patología ocular	69
Miscelánea	70
Procesos de transición: Lactación-cebo	72

Cordero de cebo y animales de reposición

Patología del aparato digestivo	76
Cavidad oral	76
Alteraciones ruminales	80
Enterotoxemia por <i>Clostridium perfringens</i> tipo D (forma clásica)	84
Enterotoxemia por <i>Clostridium perfringens</i> tipo A (Ictérica)	86
Colibacilosis septicémica	88
Coccidiosis	91
Ileítis terminal	96
Patología del hígado. Cisticercosis visceral	98
Otros hallazgos en el hígado y vías biliares	102
Otras lesiones y alteraciones abdominales	105
Patología del aparato respiratorio	106
Septicemia por <i>Pasteurella (Mannheimia)</i>	106
Neumonía por <i>Pasteurella (Mannheimia)</i>	109
Neumonía atípica	111
Neumonías parasitarias	114
Aparato circulatorio y sistema hematopoyético	116
Linfadenitis caseosa o pseudotuberculosis	120
Abscesos por <i>Staphylococcus</i>	121
Sistema nervioso	122
Necrosis de la corteza cerebral (Poliencefalomalacia nutricional)	122
Cenurosis	124
Tétanos	126
Meningoencefalitis bacterianas	127
Meningoencefalitis enzoótica (<i>Louping ill</i>)	128
Lesiones oculares	129
Aparato locomotor	130
Enfermedad del músculo blanco	130
Intoxicación por monensina	133
Otras miositis	135
Poliartritis	136
Aparato urinario	138
Urolitiasis	138
Otras lesiones renales	143

**Ovino adulto**

Patología del aparato digestivo	148
Cavidad oral	148
Lengua azul	154
Esófago	156
Alteraciones ruminales	157
Reticulo	160
Abomaso	161
Enterotoxemia	164
Paratuberculosis	166
Enteritis parasitarias	168
Otros procesos intestinales	171
Hígado	172
Peritoneo y cavidad abdominal	181
Patología del aparato respiratorio	184
Fosas nasales	184
Adenocarcinoma nasal enzoótico (Tumor intranasal enzoótico)	187
Pasterelosis	188
Neumonías caseosas y necróticas	190
Maedi	194
Neumonías verminosas	196
Adenocarcinoma pulmonar ovino	198
Patología del aparato circulatorio y del sistema hematopoyético	200
Corazón	200
Sistema hematopoyético	202
Patología del sistema nervioso	204
Enfermedad del prurigo lumbar o tembladera (scrapie)	204
Enfermedad de Aujeszky (pseudorrabia)	208
Visna	210
Meningitis bacterianas	211
Tétanos	211
Listeriosis	212
Otras parálisis faciales	213

Cenurosis	214
Sarcocistiosis	218
Otras lesiones nerviosas	219
Patología ocular	220
Patología del aparato locomotor	224
Traumatismos	224
Artritis	226
Alteraciones musculares	228
Alteraciones podales	229
Patología del aparato urinario	236
Patología de la piel y del tejido subcutáneo	242
Patología del aparato genital masculino	258
Alteraciones del epidídimo, testículo y escroto	258
Alteraciones del pene y uretra	262
Patología de la glándula mamaria	264
Mamitis	264
Patología del aparato reproductor de la hembra	270
Abortos	270
Metritis	276
Patología del parto y del periparto	277
Malformaciones, monstruos y enfermedades fetales	282
Defectos craneofaciales	282
Defectos del tracto gastrointestinal	286
Defectos del sistema cardiovascular	286
Defectos del sistema nervioso central	287
Defectos del raquis	288
Defectos musculares	291
Defectos cutáneos	292
Defectos del aparato reproductor	293
Defectos del aparato urinario	294
Monstruos simples	295
Monstruos compuestos	296
Enfermedades fetales	297

Sommaire

CARACTÉRISTIQUES DES PRODUCTIONS LÉGUMIÈRES

Chapitre 1	
INTRODUCTION À LA NOTION DE LÉGUME	3
Chapitre 2	
PRODUCTION ET ÉCHANGES	10
2.1. Physionomie de la production mondiale	11
2.2. Production de la CEE	13
2.3. Production française	15
2.4. Échanges dans les pays de la CEE	19
2.5. Échanges concernant la France	21
2.6. Environnement européen de la France	31
2.7. Conclusion	34
Chapitre 3	
TYPOLOGIE DES PRODUCTIONS LÉGUMIÈRES	35
3.1. Les différents types de production	36
3.2. Cultures de plein air	38
3.3. Cultures abritées	47
3.4. Autres critères de distinction	53
Chapitre 4	
UNITÉS GÉOGRAPHIQUES DE PRODUCTION	54
4.1. Les bassins de production	54
4.2. Les terroirs	71
Chapitre 5	
MISE EN MARCHÉ ET DISTRIBUTION DES LÉGUMES FRAIS	81
5.1. Définition des fonctions et des opérateurs	81
5.2. La distribution et ses circuits	86
5.3. Évolution des relations entre opérateurs	89
5.4. Conclusion	93
Chapitre 6	
QUELQUES ASPECTS DES COÛTS ET DES PRIX	95
6.1. Coûts de production	95
6.2. Prix à la production	102
6.3. Marges, effets de la concurrence au sein de la CEE	105
6.4. Prix à la consommation, coût de la distribution	106
Chapitre 7	
CONSOMMATION	109
7.1. Aspects alimentaires et nutritifs	109
7.2. Régimes alimentaires et évolution de la consommation	116
7.3. Quelques facteurs d'évolution de la consommation	121
7.4. Conclusions	124

Chapitre 8	
PRINCIPAUX DÉBOUCHÉS INDUSTRIELS DES LÉGUMES	126
8.1. Aspects généraux	127
8.2. Procédés et produits	127
8.3. Structures de production	129
8.4. Production des conserves dans la CEE (Tabl. 8.4)	130
8.5. Production française de conserves appertisées	131
8.6. Production de légumes pour la conserve	134
8.7. Légumes de quatrième gamme	138

2ème partie MAÎTRISE DES FACTEURS DE PRODUCTION

Chapitre 1	
INTERVENTION SUR LES COMPOSANTES DU CLIMAT	147
1.1. Introduction	148
1.2. Dispositifs de protection contre les facteurs adverses (brise-vent, ombrage, lutte antigrêle, lutte antigel)	149
1.3. Optimisation des facteurs d'ambiance - l'effet de serre	162
1.4. Bâches à plat	176
1.5. Petits tunnels ou chenilles	195
1.6. Serres maraichères : conception, construction	208
1.7. Serre : maîtrise du climat	224
Chapitre 2	
INTERVENTION SUR LA FERTILITÉ DU SOL OU DU SUBSTRAT	265
2.1. Sol et production légumière	266
2.2. Corrections foncières	269
2.3. Fertilisation agrophysique	271
2.4. Fertilisation agrochimique	294
2.5. Cas des cultures hors sol	331
Bibliographie	333
Chapitre 3	
MAÎTRISE DE L'ALIMENTATION HYDRIQUE	337
3.1. Relations sol-plante-atmosphère	339
3.2. Principaux systèmes d'irrigation	349
3.3. Pilotage des irrigations	366
Chapitre 4	
INTERVENTION PLURIFACTORIELLE	
LE PAILLAGE DU SOL	381
4.1. Évolution de la notion de paillage	382
4.2. Nature des films utilisés en paillage	382
4.3. Effets du paillage plastique	384
4.4. Mise en œuvre des films de paillage	390
4.5. Choix de la formule de paillage	394
4.6. Coût du paillage	394
Bibliographie	395

3ème partie ÉTABLISSEMENT DES CULTURES

Chapitre 1	
ASSOLEMENTS ET ROTATIONS	399
1.1. Définitions	399
1.2. Justification des rotations	400
1.3. Programmation des rotations	401
1.4. Stratégies adoptées	402
Chapitre 2	
CHOIX DU MODE D'ÉTABLISSEMENT DES CULTURES	404
2.1. Recours à la plantation	405
2.2. Recours au semis en place	408
2.3. Conclusions	409
Chapitre 3	
QUALITÉ ET TRAITEMENT DES SEMENCES	410
3.1. Critères de qualité des semences	411
3.2. Traitement et conditionnement des semences	419
Chapitre 4	
MISE EN CULTURE PAR SEMIS EN PLACE	444
4.1. Les étapes de la levée au champ	445
4.2. Conditions pratiques de la germination	446
4.3. Le milieu de germination : système graine-sol	449
4.4. Modalités du semis en place	455
Chapitre 5	
MISE EN CULTURE PAR PLANTATION	471
5.1. Obtention du plant	472
5.2. Plantation	484
Bibliographie	

4ème partie PROTECTION PHYTOSANITAIRE DES CULTURES LÉGUMIÈRES

Chapitre 1	
ASPECTS GÉNÉRAUX	499
Chapitre 2	
LUTTE CONTRE LES MAUVAISES HERBES	502
2.1. Situation générale	504
2.2. Mesures préventives	504
2.3. Interventions préalables à la mise en culture	505
2.4. Méthodes de lutte directe	506
Bibliographie « Herbicides »	515
Chapitre 3	
LUTTE CONTRE LES MALADIES ET RAVAGEURS	516
3.1. Interventions sur le sol	518
3.2. Interventions aux différentes phases de la culture dans une optique de protection intégrée	528
Bibliographie	543

Pablo Coto-Millán (Editor)

Essays on Microeconomics and Industrial Organisation

With 19 Figures and 36 Tables

Physica-Verlag

A Springer-Verlag Company

Table of Contents

Introduction	1
PART I. Demand	3
1 Modeling Seasonal Integrated Time Series: the Spanish Industrial Production Index J. L. Gallego-Gómez	5
1.1 Seasonal Time Series Models	5
1.2 Forecasting	9
1.3 Unobservable Components	11
1.4 Empirical Analysis	12
References	17
2 Passenger's Choice of Air Transport under Road Competition: the Use of Cointegration Techniques J. Baños-Pino, P. Coto-Millán, V. Inglada-López de Sabando	19
2.1 Introduction	19
2.2 The Model	21
2.3 The Data	22
2.4 Marshallian or Non Compensated Demands of Interurban Passenger Transport: Air and Road Transport	23
2.4.1 Air Transport Demand	23
2.4.2 Road Transport Demand	25
2.5 Conclusions	27
References	27
3 Introduction of an Innovative Product: the High Speed Train (AVE) V. Inglada-López de Sabando, P. Coto-Millán	29
3.1 AVE: Characterisation	29
3.2 Qualitative Analysis	31

3.3	The Concept of Generalised Cost	33
3.4	Comparison Among Different Competing Products	35
3.5	Induction and Substitution Effects	38
3.5.1	Induction Effect	38
3.5.2	Substitution Effect	39
3.5.3	The Demand for the New Product	39
3.6	Impact on Demand	40
	References	40
PART II. Production and Costs (Supply)		41
4	Technical and Allocative Inefficiency in Spanish Public Hospitals	
	C. García-Prieto	43
4.1	The Model	44
4.2	Definition of Variables and Functional Specification	48
4.2.1	Outputs	49
4.2.2	Input Prices	49
4.2.3	Fixed Input	50
4.2.4	Functional Form	50
4.3	Estimation and Results	51
4.4	Conclusions	54
	References	55
5	Technical Efficiency of Road Haulage Firms	
	J. Baños-Pino, P. Coto-Millán, A. Rodríguez-Álvarez, V. Inglada-López de Sabando	57
5.1	Introduction	57
5.2	Efficiency	58
5.3	Classification of Efficiency Frontiers	60
5.4	A Theoretical Application to Goods Haulage Companies on Spanish Roads Using Panel Data	62
	References and Further Reading	70
6	Technological Innovation and Employment: Intersectoral Appraisals of Structural Change in the Service Economy	
	D. Díaz-Fuentes	71
6.1	Introduction	71
6.2	Extent of Structural Change in Service Employment	74
6.3	Innovation and Employment Trends in Structural Change	76
6.4	Embodied Technology and Technology Diffusion in Services	78
6.5	Compositional Structural Change in Employment (Final and Intermediate Demand for Services)	82

6.6	Conclusions	84
	References	85
PART III. Market and Industrial Structure		89
7	The Measurement of Intra-industry Trade and Specialisation: a Review	
	G. Carrera-Gómez	91
7.1	Measures of Intra-industry Trade and Specialisation	91
7.1.1	Intra-industry Trade Indices	92
7.1.2	Intra-industry Specialisation Indices	99
7.1.3	Comparison of Measures	102
7.1.4	Later Developments	105
7.2	Trade Imbalance Adjustment	108
7.2.1	Grubel and Lloyd (1975)	108
7.2.2	Aquino (1978)	110
7.2.3	Balassa (1979)	113
7.2.4	Loertscher and Wolter (1980)	114
7.2.5	Bergstrand (1983)	114
7.2.6	Comments and Conclusions	115
7.3	Categorical Aggregation	117
7.3.1	Definition of the Problem	117
7.3.2	Categorical Aggregation Tests	118
7.3.3	Critics and Conclusions	119
7.4	Summary and Conclusions	120
	References	122
8	The Determinants of Intra-industry Trade in Spanish Manufacturing Sectors: a Cross-section Analysis	
	G. Carrera-Gómez	125
8.1	Spanish Intra-industry Trade Measurement	126
8.2	Analysis of the Determinants of Intra-industry Trade in Spain	127
8.2.1	Hypotheses	127
8.2.2	Data, Variables and Econometric Model	129
8.2.3	Results	131
8.3	Summary and Conclusions	133
	References	133
9	Economic Integration, Vertical and Horizontal Intra-industry Trade and Structural Adjustment: the Spanish Experience	
	G. Carrera-Gómez	135
9.1	Data and Methodology	136
9.2	Results	139

9.3 Summary and Conclusions	144
References	144
PART IV. Failures of Market and Industrial Regulation	147
10 Structure, Functioning and Regulation of the Spanish Electricity Sector. The Legal Framework and the New Proposals for Reform	
F. J. Ramos-Real, E. Martínez-Budría, S. Jara-Díaz	149
10.1 Introduction	149
10.2 Structure, Functioning and Regulation of the Spanish Electricity Sector between 1983-1996	150
10.2.1 The Reform Process and the Basic Principles Regulating the System's Operation (1983-1996)	152
10.2.2 Unified Management and Central Planning	153
10.2.3 The Rates and Financial Return Policy of the Legal and Stable Framework (MLE)	154
10.3 Regulation Reform in the Spanish Electricity Sector from 1997	161
10.4 Conclusions	165
References	166
11 Effects of a Reduction of Standard Working Hours on Labour Market Performance	
C. Pérez-Domínguez	167
11.1 Effects on Employment	168
11.1.1 The Basic Model	168
11.1.2 The Role of Fixed Labour Costs	169
11.1.3 Effort Effect and Organisational Effect	171
11.2 Effects on Labour Market Participation	174
11.2.1 Labour Market Participation with Compulsory Working Hours	174
11.2.2 Effects of a Reduction of the Working Hours on Aggregate Labour Supply	176
11.3 Effects on the Unemployment Rate	177
11.3.1 The Basic Case	177
11.3.2 Effects on the Unemployment Rate under a More General Model	179
11.4 Conclusions	180
References	181
12 Dynamic Adjustments in a Two-Sector Model	
F. Galera, P. Coto-Millán	183
12.1 The Formal Model	183
12.2 Basic Results	185

12.3 Conclusions	187
Annex	187
Basic References	190
Other References	190

Table des matières

Préface (Ted Labuza)	V
Avant-propos (Nathalie Gontard)	XV

Chapitre 1

Panorama des emballages alimentaires actifs (Nathalie Gontard) —	1
1. Caractéristiques d'un emballage actif	2
2. Histoire et développement	4
3. Les différentes catégories actuellement disponibles sur le marché mondial ..	5
3.1. Les « interactifs »	6
3.2. Les « indicateurs »	9
3.3. Les « préparateurs »	10
4. L'emballage actif à l'écoute de l'aliment	11
5. L'emballage actif à usage domestique	13
6. Principes physiques et chimiques mis en jeu dans les emballages actifs	14
6.1. Propriétés intrinsèques des matériaux d'emballages	15
6.2. Mise en œuvre d'effets physiques grâce à des structures particulières plus ou moins complexes	15
6.3. Inclusion d'éléments actifs dans l'emballage	16
6.3.1. Structures mises en œuvre	16
6.3.2. Utilisation d'ab(d)sorbants	17
6.3.3. Mise en œuvre de réactifs d'oxydations organiques et inorganiques	19
6.3.4. Mise en œuvre d'antioxydants	20
6.3.5. Utilisation de composés acidobasiques	20
6.3.6. Mise en œuvre de réactifs hydrolytiques	20
6.3.7. Catalyse enzymatique	21
6.3.8. Mise en œuvre de réactifs divers	22
7. Les aspects réglementaires et sécuritaires	22
7.1. Les emballages actifs et la réglementation concernant les matériaux au contact des denrées alimentaires	23

7.2. Les emballages actifs et la gestion de l'environnement	26
Références bibliographiques	27

Chapitre 2

Les emballages absorbeurs d'oxygène (Edmond Roussel) ————— 31

1. Rôle de l'absorbeur d'oxygène	32
2. Choix du type de l'absorbeur d'oxygène	33
3. Choix de la taille de l'absorbeur d'oxygène	34
4. Exemple de calcul du volume d'oxygène à absorber	34
5. Choix de la taille et du nombre d'absorbeurs ATCO à mettre en œuvre	35
6. Mise en œuvre de l'absorbeur	35
7. Pourquoi utiliser des absorbeurs d'oxygène ?	36
8. Quelques exemples d'application	36
8.1. Viennoiseries et pâtisseries	37
8.2. Charcuteries	38
8.3. Produits traiteur	39
8.4. Viandes	39
8.5. Fromages	40
9. Absorbeurs d'oxygène et consommateurs	41
10. Bilan économique	42
Références bibliographiques	42

Chapitre 3

Activités antimicrobiennes des films d'emballages (Bernard Cuq et Andreas Redl) ————— 43

1. Activité antimicrobienne d'un emballage par son action sur la présence de gaz, vapeur ou solutés	45
1.1. Emballages sous atmosphères modifiées	45
1.2. Systèmes « absorbeurs d'oxygène »	46
1.3. Relargueur de dioxyde de carbone	48
1.4. Relargueur d'éthanol	48
1.5. Libération d'agents antimicrobiens	49
1.5.1. À partir de matériaux synthétiques	49
1.5.2. À partir de matériaux « naturels »	51
2. Activité antimicrobienne d'un emballage par contact direct avec l'aliment	56
2.1. Emballages contenant des ions métalliques fixés	57
2.2. Emballages contenant des enzymes	58
2.3. Emballages naturellement antimicrobiens	59
Références bibliographiques	60

Chapitre 4

Conception de films d'emballage à perméabilité contrôlée (Yves Germain) ————— 65

1. Perméabilité des polymères	66
1.1. Mécanismes de solubilité-diffusion	66
1.2. Perméabilité de polymères usuels	68

1.3.	Facteurs influençant la perméabilité des polymères	69
1.3.1.	Structure du polymère	69
1.3.2.	Effet de la température	70
1.3.3.	Effet de l'humidité	71
1.4.	Perméabilité sélective	71
2.	Films multicouches	73
2.1.	Perméabilité d'un multicouche	73
2.2.	Synergie lorsque plusieurs substances migrent simultanément	74
2.2.1.	Migration simultanée d'eau et de gaz	74
2.2.2.	Cas des arômes	75
2.3.	Effets transitoires	75
2.3.1.	Effet de l'humidité dans les multicouches contenant un polymère sensible à l'eau	75
2.3.2.	Importance du temps de conditionnement avant mesure	78
2.4.	Exemples d'utilisation	79
2.4.1.	Les films	79
2.4.2.	Feuilles thermoformables	80
2.4.3.	Corps creux	80
3.	Alliages de polymères	81
3.1.	Réalisation des alliages	81
3.2.	Perméabilité des alliages	82
3.2.1.	Règle de combinaison des perméabilités	82
3.2.2.	Contrôle de la microstructure	84
3.3.	Exemples	84
3.3.1.	Alliages de polymères hydrophobes et hydrophiles	84
3.3.2.	Alliages polyamide/polyoléfine : famille des Orgalloy®	86
4.	Conclusions	87
	Références bibliographiques	88

Chapitre 5

Les films à perméabilité aux gaz ajustable : application aux fruits et légumes (Patrick Varoquaux)	89
1. La respiration des tissus végétaux	90
1.1. Effet de la température sur la respiration	90
1.2. Effet des gaz de l'air	93
1.3. Les atmosphères optimales de conservation	94
2. L'atmosphère modifiée	96
2.1. Les films microperforés	98
2.2. Les films hydrophiles	100
3. Conclusion	105
Références bibliographiques	107

Chapitre 6

Interactions arômes-emballages : rétention d'arômes par des films et des enrobages comestibles <i>(Frédéric Debeaufort, Jesús-Alberto Quezada-Gallo et Andrée Voilley)</i>	109
1. Interactions entre composés d'arôme et emballages plastiques	109
2. Conséquences des interactions sur la qualité du produit alimentaire	110

3. Films et enrobages comestibles : la solution ?	111
4. Méthodes de détermination des performances barrières aux arômes des films et enrobages comestibles	116
5. Facteurs influençant les performances barrières aux arômes des emballages comestibles	118
5.1. Facteurs relatifs au polymère	119
5.2. Facteurs relatifs au perméant	121
5.3. Influence des facteurs externes	122
6. Conclusion	123
Références bibliographiques	123

Chapitre 7

Le polypropylène en tant que matériau d'emballage actif pour la sorption d'arômes d'une solution modèle de jus d'orange (<i>Violette Ducruet, Régis Lebossé et Alexandre Feigenbaum</i>)	127
1. Matériels et méthodes	128
2. Résultats	129
2.1. Réactivité des composés aromatiques en absence de contact avec les films de PP	130
2.2. Comportement des composés aromatiques en présence du PP-Ref	132
2.3. Comportement des composés aromatiques en présence des PP-Nucl et PP-Sil	134
3. Discussion et conclusions	135
Références bibliographiques	136

Chapitre 8

Maîtrise des transferts d'eau grâce aux emballages hydrosensibles : application à la conservation des fromages (<i>Stéphane Desobry</i>)	139
1. Aspects théoriques	140
1.1. Approche globale des transferts d'eau	141
1.2. Approche fickienne	141
2. Mesure de la perte d'eau d'un fromage emballé	142
3. Méthode de prévision de la perte d'eau d'un fromage emballé	144
3.1. Transfert dans l'air	144
3.2. Transferts d'eau dans le fromage	145
4. Phase d'hydratation de l'emballage	148
5. Hydratation de l'emballage et diffusivité des gaz	152
6. Films d'enrobage comestibles à base de protéines de lait et hydratation	155
7. Conclusion	155
Références bibliographiques	157

Chapitre 9

Les nouvelles applications des valves pour les produits frais. Les films de dégazage (<i>Didier Guillon</i>)	159
1. Les valves dans le domaine de la cuisson	159
1.1. Position du problème	159

1.2. Les différents types de valve. Notion de valve « intelligente »	160
1.2.1. Les valves thermofusibles ou valves « température »	160
1.2.2. Les valves « pression »	167
2. Les films de dégazage	175
3. Application à l'analyse de la valeur produit/process	175
4. Conclusion et perspectives	176
Références bibliographiques	177

Chapitre 10

L'emballage comme élément de couplage entre le four micro-onde et l'aliment (Michèle Audhuy-Peaudecerf)

179

1. Les ondes électromagnétiques et leurs interactions avec les aliments et les matériaux d'emballage	180
1.1. Spectre électromagnétique	180
1.2. Propagation d'une onde électromagnétique	181
1.3. Propriétés électromagnétiques des matériaux	181
1.3.1. Matériaux conducteurs	182
1.3.2. Matériaux diélectriques	182
1.3.3. Matériaux magnétiques	185
1.4. Étude qualitative des puissances transmises au produit alimentaire en fonction du matériau d'emballage	185
1.5. Répartition des champs électromagnétiques dans l'aliment	189
1.5.1. Affaiblissement des champs E et H pénétrant dans un milieu dissipatif	189
1.5.2. Régime d'ondes stationnaires produit par l'ensemble des réflexions provoquées par les parois de l'applicateur ainsi qu'à la périphérie du produit chauffé et de son emballage	190
2. Le four micro-onde	192
2.1. Description générale du four	192
2.2. Répartition des champs dans la cavité	194
2.3. Couplage entre le produit alimentaire et le générateur	196
3. Propriétés du chauffage micro-onde	197
3.1. Comparaison entre la « thermique micro-onde » et la « thermique classique »	198
3.1.1. Rapidité de l'élévation des températures	198
3.1.2. Transferts thermiques et migration de l'eau	198
3.2. Couplage entre les champs électromagnétiques et les champs thermiques dans le produit chauffé	199
3.2.1. Effets de l'hétérogénéité des champs électromagnétiques sur la répartition des températures	199
3.2.2. Emballage thermique et ses conséquences sur la décongélation d'un produit	200
4. Le rôle de l'emballage dans la gestion du chauffage	201
4.1. Les objectifs poursuivis dans l'élaboration d'un emballage	202
4.1.1. Homogénéité du traitement	202
4.1.2. Traitement sélectif	202

4.1.3.	Effets de toastage	202
4.1.4.	Rôle d'adaptateur électromagnétique	203
4.2.	Les matériaux d'emballage	203
4.2.1.	Matériaux diélectriques	203
4.2.2.	Matériaux métalliques	203
4.2.3.	Matériaux convecteurs d'énergie	204
4.3.	Les différentes fonctions de l'emballage	204
4.3.1.	Les fonctions thermiques de l'emballage	204
4.3.2.	Les fonctions électromagnétiques de l'emballage	208
5.	Conclusion : quelle approche faut-il adopter pour concevoir un emballage micro-onde ?	216
	Références bibliographiques	218

Chapitre 11

Ethylene absorbents (*Ichiji Yamashita*) ————— 219

1.	Ethylene as senescence hormone	219
2.	Prevention of ethylene accumulation in MAP	219
3.	Ethylene absorbents	220
3.1.	Base materials	220
3.2.	Commercial absorbents	222
3.3.	High-performance materials	222
4.	Effect of ethylene absorbents on the quality of commodities in the MAP	225
4.1.	Fruit	225
4.2.	Vegetable	226

Chapitre 12

Active Packaging in charged films (*Michael Rooney*) ————— 229

1.	Oxygen scavenging films	230
1.1.	Plastics packaging as media for oxygen scavenging	230
1.2.	Brief history of oxygen scavenging films	231
1.3.	Chemical barrier to oxygen permeation	232
2.	Moisture absorbent films	233
2.1.	Liquid water control	233
2.2.	Humidity buffering	234
3.	Removal of food components	235
4.	Release of food additives	237
4.1.	Release of antioxidants	237
4.2.	Antimicrobial plastics	237
5.	Conclusion	239
	References	239

Contents

List of figures	xiii
List of tables	xiv
Preface	xvii
Common acronyms	xxi
1 An introduction to forecasting	1
1.1 Background	1
1.2 Structure of the book	3
1.3 A history of the theory of economic forecasting	6
1.4 A framework for forecasting	10
1.5 Alternative forecasting methods	12
1.5.1 Guessing	12
1.5.2 Extrapolation	12
1.5.3 Leading indicators	13
1.5.4 Surveys	14
1.5.5 Time-series models	15
1.5.6 Econometric systems	16
1.6 An artificial-data example	18
1.6.1 The DGP	18
1.6.2 The data	20
1.6.3 System estimation	23
2 First principles	33
2.1 Introduction	33
2.2 Unpredictability	35
2.3 Informativeness	37
2.4 Moments	38
2.5 Forecastability	39
2.5.1 Horizon	39
2.6 Implications	40
2.7 The mechanics of forecasting	41
2.7.1 Forecasting with ARIMA models	41
2.7.2 The conditional mean is the minimum MSFE	44

2.8	Forecasting in a multivariate framework	46
2.9	Causal information in economic forecasting	47
2.9.1	Constant mechanism	47
2.9.2	Non-constant mechanism	49
2.10	Overview	51
3	Evaluating forecast accuracy	52
3.1	Introduction	52
3.2	Comparing outcomes and predictions	54
3.2.1	Cost functions and MSFEs	54
3.2.2	Forecast rationality	56
3.2.3	Fixed-event forecasts	59
3.2.4	MSFE decompositions and derived measures	63
3.3	Rival forecasts	65
3.4	MSFEs	66
3.4.1	General and context-specific loss functions	66
3.4.2	MSFE-based measures	67
3.5	Lack of invariance of MSFE-based measures	68
3.5.1	Comparisons using MSFEs for scalar multi-step dynamic forecasts	69
3.5.2	Dynamic systems	71
3.5.3	Non-invariance of the multi-step MSFE matrix in systems	72
3.5.4	Invariance of certain MSFE-based measures	72
3.6	An invariant measure of forecast accuracy	73
3.7	Predictive likelihood	76
3.7.1	Measuring predictability	77
3.8	Overview	78
4	Forecasting in univariate processes	79
4.1	Introduction	79
4.2	Stationary stochastic processes	80
4.3	Stationarity	82
4.3.1	1-step ahead forecasts	82
4.3.2	When are forecasts informative?	84
4.3.3	<i>h</i> -step ahead forecasts	85
4.4	Stochastic non-stationarity	87
4.4.1	1-step ahead forecasts	87
4.4.2	<i>h</i> -step ahead forecasts	88
4.5	Deterministic non-stationarity	90
4.6	Fractionally integrated processes	92
4.7	Forecasting with non-linear models	93
4.7.1	Calculating multi-step forecasts	94
4.7.2	SETAR and MS-AR models	96
4.7.3	Non-linear data generating mechanisms	99
4.8	Forecasting with ARCH errors	100

4.9	Second-moment dependence and asymmetric loss	102
4.10	Overview	104
4.11	Appendix: Approximating powers of estimates	105
5	Monte Carlo techniques	107
5.1	Introduction	107
5.2	Basic Monte Carlo theory	108
5.3	Control variates for second-moment measures	111
5.4	Antithetic variates: single-equation forecast biases	113
5.5	Overview	118
6	Forecasting in cointegrated systems	119
6.1	Introduction	119
6.2	Systems for non-stationary variables	120
6.2.1	Forecasting based on the VMA representation	121
6.2.2	Forecasting based on the VAR	123
6.3	Linear transformations of the AR representation	125
6.4	Asymptotic variance formulae	127
6.4.1	Correctly specified econometric model	127
6.4.2	Incorrectly specified DV model	129
6.5	Forecast biases in systems	133
6.5.1	Fixed start-up	134
6.5.2	Stationary initial conditions	135
6.5.3	Invariance of MSFEs to constant terms in the DGP	137
6.6	Small-sample estimation issues	138
6.7	The Monte Carlo experimental design	140
6.8	Simulation results	142
6.9	An empirical illustration	147
6.10	Overview	148
6.11	Appendix: Algebraic derivation	151
7	Forecasting with large-scale macroeconomic models	157
7.1	Introduction	157
7.2	The economic system and forecasting models	158
7.3	A taxonomy of forecast errors	163
7.3.1	Open systems	166
7.4	Sources of forecast uncertainty	168
7.4.1	Parameter change	168
7.4.2	Model mis-specification	171
7.4.3	Estimation uncertainty	172
7.4.4	Variable uncertainty	173
7.4.5	Error accumulation	175
7.5	Large-scale model evaluation techniques	175
7.6	Overview	178

8	A theory of intercept corrections: beyond mechanistic forecasts	180
8.1	Introduction	180
8.2	Intercept corrections in non-linear equations	185
8.3	Measurement errors and data revisions	188
	8.3.1 Measurement errors	188
	8.3.2 Data revisions	191
8.4	Conditional and unconditional predictors	192
8.5	Setting the forecast back on track	195
8.6	Structural change during the forecast period	197
8.7	Model mis-specification	203
8.8	Overview	204
8.9	Appendix: Estimating the forecast origin	204
9	Forecasting using leading indicators	207
9.1	Introduction	207
9.2	Current UK CLIs	209
9.3	Analysis of CLIs	211
	9.3.1 Integration and cointegration	212
	9.3.2 Co-breaking	213
9.4	A constant-parameter framework for index analysis	214
	9.4.1 Activity index	215
	9.4.2 Leading index	216
	9.4.3 Selecting a CLI	219
9.5	An empirical analysis of the UK LLI	220
9.6	Adding CLIs to macroeconomic models	222
9.7	The role of the UK LLI in a small monetary model	223
9.8	Overview	226
10	Combining forecasts	227
10.1	Introduction	227
10.2	The combination of forecasts	228
	10.2.1 The regression method	229
	10.2.2 The variance-covariance approach	229
	10.2.3 Serial correlation in the combining equation	231
10.3	Forecast encompassing	232
	10.3.1 Encompassing	233
	10.3.2 Forecast encompassing and conditional efficiency	233
	10.3.3 Invariance of forecast encompassing tests	235
	10.3.4 Forecast encompassing, MSFE and GFESM	235
	10.3.5 An example of pooling	236
10.4	Combining conditional and unconditional forecasts	238
	10.4.1 Numerical analysis of the gains from combination	239
10.5	Pooling of models differentially susceptible to breaks	241
10.6	Overview	242

11 Multi-step estimation	243
11.1 Introduction	243
11.2 Estimation and evaluation criteria	246
11.3 A partial taxonomy of forecast errors	247
11.4 An analytical example	250
11.4.1 1-step minimization for levels	250
11.4.2 2-step minimization for levels	251
11.4.3 1-step minimization for differences	252
11.4.4 2-step minimization for differences	252
11.5 Finite-sample behaviour under correct specification	253
11.6 A Monte Carlo study of multi-step forecasting	255
11.6.1 Analysis of results	257
11.7 Unit roots and neglected moving-average errors	262
11.7.1 A Monte Carlo study of the estimators	265
11.8 Overview	268
11.9 Appendix: Finite-sample bias	269
11.10 Appendix: Limiting distributions of estimators	270
12 Parsimony	280
12.1 Introduction	280
12.2 Selecting variables for forecasting in static models	283
12.3 1-step forecasts in dynamic models	287
12.4 h -step ahead forecasts	293
12.4.1 OLS, 'no-change' and 'zero' forecasts	293
12.4.2 Monte Carlo illustration	295
12.4.3 MSFE calculations on differences of y_t	297
12.5 Vector processes	299
12.6 Collinearity in forecasting	303
12.7 Simplification in model selection	306
12.8 Overview	311
13 Testing forecast accuracy	312
13.1 Introduction	312
13.2 Testing for predictive failure	313
13.2.1 Box-Tiao test: scalar case with multiple forecast periods	314
13.2.2 Box-Tiao test: a single horizon for a vector process	316
13.2.3 Box-Tiao test: multiple horizons for a vector process	317
13.3 Tests of comparative forecast accuracy	320
13.3.1 Encompassing tests	321
13.3.2 Variance-based tests	322
13.4 Overview	324
13.5 Appendix: Multi-step forecast-error variances	325
13.5.1 Variances of non-linear vector functions	326
13.5.2 1-step forecast-error variance formulae	327
13.5.3 Multi-step forecast-error variance formulae	328

THE ECONOMETRIC ANALYSIS OF SEASONAL TIME SERIES

ERIC GHYSELS
DENISE R. OSBORN

CAMBRIDGE
UNIVERSITY PRESS

Contents

<i>Foreword by Thomas J. Sargent</i>	<i>page</i> xiii
<i>Preface</i>	xv
<i>List of Symbols and Notations</i>	xix
1 Introduction to Seasonal Processes	1
1.1 Some Illustrative Seasonal Economic Time Series	1
1.2 Seasonality in the Mean	4
1.2.1 Deterministic Seasonality	4
1.2.2 Linear Stationary Seasonal Processes	7
1.2.3 Nonstationary Unit Root Processes	10
1.2.4 Unobserved Component Models	12
1.3 Periodic Processes	12
1.4 Seasonality in Higher Moments	15
1.4.1 Stochastic Seasonal Unit Roots	16
1.4.2 Seasonal GARCH	16
1.4.3 Periodic GARCH	17
2 Deterministic Seasonality	19
2.1 Introduction	19
2.2 Representations of Deterministic Seasonality	20
2.2.1 The Dummy Variable Representation	20
2.2.2 The Trigonometric Representation	21
2.3 Stochastic and Deterministic Seasonality	24
2.3.1 Stochastic Seasonal Processes	24
2.3.2 The Seasonal Random Walk	26
2.3.3 Deterministic Seasonality versus Seasonal Unit Roots	28
2.3.4 Unobserved Components Approaches	29
2.4 Testing Deterministic Seasonality	30
2.4.1 The Canova-Hansen Test	31

2.4.2	The Caner Test	36
2.4.3	The Tam-Reinsel Test	37
2.4.4	Some Comments	39
3	Seasonal Unit Root Processes	42
3.1	Introduction	42
3.2	Properties of Seasonal Unit Root Processes	43
3.2.1	The Seasonal Random Walk with Constant Drift	43
3.2.2	The Seasonal Random Walk with Seasonally Varying Drift	45
3.2.3	More General Stochastic Processes	45
3.2.4	Transformations and Seasonal Unit Roots	47
3.2.5	Asymptotic Distributions	50
3.3	Testing Seasonal Integration	52
3.3.1	Dickey-Hasza-Fuller Test	52
3.3.2	Testing a Unit Root of -1	54
3.3.3	Testing Complex Unit Roots	56
3.3.4	HEGY Test	60
3.3.5	The Kunst Test	64
3.3.6	The Osborn-Chui-Smith-Birchenhall Test	66
3.3.7	Multiple Tests and Levels of Significance	68
3.4	Extensions	70
3.4.1	Additional Dynamics	70
3.4.2	Deterministic Components	71
3.4.3	Structural Change in the Deterministic Components	72
3.4.4	Near Seasonal Integration	74
3.4.5	Higher Order Nonstationarity	75
3.5	Monte Carlo Studies	76
3.5.1	Comparisons of Test Procedures	77
3.5.2	Augmentation, Prewhitening, and Structural Breaks	79
3.6	Seasonal Cointegration between Variables	80
3.6.1	A Single Equation Approach	81
3.6.2	The Vector Approach	84
3.6.3	Seasonal Intercepts and Seasonal Cointegration	88
3.7	Some Remarks on Empirical Results	90
4	Seasonal Adjustment Programs	93
4.1	Introduction	93
4.2	Decompositions	93

Contents	xi
4.3 The X-11 Program	95
4.3.1 The Linear X-11 Filter	95
4.3.2 On Potential Sources of Nonlinearity	100
4.4 The X-12 Seasonal Adjustment Program	106
4.4.1 RegARIMA Modeling in X-12-ARIMA	107
4.4.2 X-12 Diagnostics	108
4.5 The TRAMO/SEATS Programs	108
4.5.1 Unobserved Component ARIMA Models and Seasonal Adjustment	109
4.5.2 Model-Based Approach versus X-12	112
4.6 Seasonal Adjustment and Other Data Transformations	115
5 Estimation and Hypothesis Testing with Unfiltered and Filtered Data	121
5.1 Introduction	121
5.2 Linear Regression with Misspecified Seasonal Nonstationarity	122
5.3 The Classical Linear Regression Model and Filtering	124
5.4 Filtering of ARIMA Models	126
5.4.1 Filtering of Unit Root Processes	128
5.4.2 Filtering Stationary ARMA Processes	129
5.5 Finite Sample Approximations of Filtering Effects	131
5.6 Filtering and Cointegration	134
5.7 Bias Trade-Offs and Approximation Errors	136
6 Periodic Processes	139
6.1 Introduction	139
6.2 Some Simple Periodic Processes	140
6.2.1 Periodic Heteroskedasticity	141
6.2.2 Periodic MA(1) Process	142
6.2.3 Periodic AR(1) Process	143
6.3 Representations and Properties of Periodic Processes	144
6.3.1 The VAR Representation	144
6.3.2 Properties of Stationary PAR Processes	146
6.3.3 The Constant Parameter Representation of a PAR Process	148
6.4 Nonstationary Univariate PAR Processes	152
6.4.1 Types of Integration in a PAR Process	153
6.4.2 The Role of Intercept and Trend Terms	155
6.4.3 Testing for Seasonal Integration in a PAR Process	157

6.4.4	Cointegration Approaches to Testing Seasonal Integration	160
6.4.5	Testing Periodic and Nonperiodic Integration	164
6.4.6	Extensions: Augmentation and Deterministic Components	166
6.5	Periodic Cointegration	168
6.5.1	Some Issues in Periodic Cointegration	168
6.5.2	Vector Approaches to Periodic Cointegration	171
6.5.3	Nonperiodic, Periodic, and Seasonal Cointegration	174
6.5.4	The Boswijk–Franses Test for Periodic Cointegration	176
6.5.5	Generalizations	179
6.6	Some Comments on Empirical and Monte Carlo Analyses	180
7	Some Nonlinear Seasonal Models	182
7.1	Introduction	182
7.2	Stochastic Seasonal Unit Roots	183
7.3	Seasonal ARCH Models	185
7.3.1	The Class of Models	185
7.3.2	The Effects of Filtering on ARCH Models	188
7.4	Periodic GARCH Models	194
7.5	Periodic Markov Switching Models	198
	<i>Epilogue</i>	203
	<i>Bibliography</i>	207
	<i>Subject Index</i>	223
	<i>Author Index</i>	225

Cyclic and Computer Generated Designs

Contents

Preface	xi
1 Block designs	1
1.1 Introduction	1
1.2 Balanced incomplete block designs	4
1.3 Intra-block model	7
1.4 Least squares analysis	10
1.5 Estimability	14
1.6 Analysis of variance	15
1.7 Intra-block analysis of a balanced incomplete block design	19
1.8 Connectedness	21
1.9 Orthogonality	25
2 Efficiency factors	27
2.1 Introduction	27
2.2 Pairwise efficiency factors	28
2.3 Canonical efficiency factors	28
2.4 Optimality criteria	31
2.5 Simple counting rules for producing near-optimal designs	34
2.6 Efficiency factors for unequally replicated designs	37
2.7 Duality	39
2.8 Upper bounds for the average efficiency factor	41
3 Cyclic designs	47
3.1 Introduction	47
3.2 Cyclic designs	48
3.3 Efficiency factors of cyclic designs	50
3.4 Construction of efficient designs	52

3.5	n -Cyclic designs	55
3.6	Generalized cyclic designs	59
4	Resolvable block designs	63
4.1	Introduction	63
4.2	Square lattice designs	64
4.3	Rectangular lattice designs	66
4.4	α -Designs	68
4.5	Choice of α -design	71
4.6	Latinized block designs	72
4.7	Two-replicate designs	77
4.8	Paired comparison designs	80
4.9	Unequal block sizes	80
4.10	Upper bounds for the average efficiency factor	81
5	Row-column designs	87
5.1	Introduction	87
5.2	Model and information matrix	88
5.3	Canonical efficiency factors	89
5.4	Orthogonality and connectedness	90
5.5	Upper bounds for the average efficiency factor	92
5.6	Latin square designs	94
5.7	Row-orthogonal designs	95
5.8	Non-orthogonal row-column designs	98
5.9	Nested row-column designs	102
6	Resolvable row-column designs	107
6.1	Introduction	107
6.2	Lattice square designs	108
6.3	Construction using α -designs	112
6.4	Interchange algorithms	114
6.5	Latinized row-column designs	118
6.6	Two-replicate row-column designs	123
6.7	Upper bounds for the average efficiency factor	125
7	Recovery of inter-block information	131
7.1	Introduction	131
7.2	Orthogonal block structure	131
7.3	Error covariance structure	136
7.4	Generalized least squares analysis	138
7.5	Estimation of stratum variances	139
7.6	Block designs	141

7.7	Resolvable designs with unequal block sizes	149
7.8	Neighbour analysis of field trials	151
8	Factorial experiments: single and fractional replication	155
8.1	Introduction	155
8.2	Treatment structure	160
8.3	Complete block designs	163
8.4	Identifying components of interaction	165
8.5	Construction of single replicate designs	168
8.6	Analysis of single replicate designs	170
8.7	Determining the confounding scheme	171
8.8	Choice of generators	178
8.9	2 ⁿ experiments	180
8.10	Fractional replication	182
8.11	Other designs	187
9	Factorial experiments: multiple replication	189
9.1	Introduction	189
9.2	Balanced incomplete blocks	191
9.3	Group divisible designs	192
9.4	Factorial structure	197
9.5	Balance	200
9.6	<i>n</i> -Cyclic designs	201
9.7	Other designs	216
9.8	Row-column designs	217
A	Some matrix results	223
A.1	Notation	223
A.2	Trace and rank	224
A.3	Eigenvalues and eigenvectors	224
A.4	Idempotent matrices	225
A.5	Generalized inverses	226
A.6	Kronecker products	228
A.7	Circulant matrices	228
A.8	Block circulant matrices	232

Applied Convex Optimization
A Practical Approach
Second Edition

Preface	vii
Acknowledgments	ix
List of Tables	xix
List of Figures	xxiii
1 Introduction	1
1.1 Overview	1
1.2 Multivariate Models and Methods	1
1.3 Scope of the Book	3
2 Vectors and Matrices	7
2.1 Introduction	7
2.2 Vectors, Vector Spaces, and Vector Subspaces	7
a. Vectors	7
b. Vector Spaces	8
c. Vector Subspaces	9
2.3 Bases, Vector Norms, and the Algebra of Vector Spaces	12
a. Bases	13
b. Lengths, Distances, and Angles	13
c. Gram-Schmidt Orthogonalization Process	15
d. Orthogonal Spaces	17
e. Vector Inequalities, Vector Norms, and Statistical Distance	21

2.4	Basic Matrix Operations	25
	a. Equality, Addition, and Multiplication of Matrices	26
	b. Matrix Transposition	28
	c. Some Special Matrices	29
	d. Trace and the Euclidean Matrix Norm	30
	e. Kronecker and Hadamard Products	32
	f. Direct Sums	35
	g. The Vec(\cdot) and Vech(\cdot) Operators	35
2.5	Rank, Inverse, and Determinant	41
	a. Rank and Inverse	41
	b. Generalized Inverses	47
	c. Determinants	50
2.6	Systems of Equations, Transformations, and Quadratic Forms	55
	a. Systems of Equations	55
	b. Linear Transformations	61
	c. Projection Transformations	63
	d. Eigenvalues and Eigenvectors	67
	e. Matrix Norms	71
	f. Quadratic Forms and Extrema	72
	g. Generalized Projectors	73
2.7	Limits and Asymptotics	76
3	Multivariate Distributions and the Linear Model	79
3.1	Introduction	79
3.2	Random Vectors and Matrices	79
3.3	The Multivariate Normal (MVN) Distribution	84
	a. Properties of the Multivariate Normal Distribution	86
	b. Estimating μ and Σ	88
	c. The Matrix Normal Distribution	90
3.4	The Chi-Square and Wishart Distributions	93
	a. Chi-Square Distribution	93
	b. The Wishart Distribution	96
3.5	Other Multivariate Distributions	99
	a. The Univariate t and F Distributions	99
	b. Hotelling's T^2 Distribution	99
	c. The Beta Distribution	101
	d. Multivariate t , F , and χ^2 Distributions	104
3.6	The General Linear Model	106
	a. Regression, ANOVA, and ANCOVA Models	107
	b. Multivariate Regression, MANOVA, and MANCOVA Models	110
	c. The Seemingly Unrelated Regression (SUR) Model	114
	d. The General MANOVA Model (GMANOVA)	115
3.7	Evaluating Normality	118
* 3.8	Tests of Covariance Matrices	133
	a. Tests of Covariance Matrices	133

	b. Equality of Covariance Matrices	133
	c. Testing for a Specific Covariance Matrix	137
	d. Testing for Compound Symmetry	138
	e. Tests of Sphericity	139
	f. Tests of Independence	143
	g. Tests for Linear Structure	145
3.9	Tests of Location	149
	a. Two-Sample Case, $\Sigma_1 = \Sigma_2 = \Sigma$	149
	b. Two-Sample Case, $\Sigma_1 \neq \Sigma_2$	156
	c. Two-Sample Case, Nonnormality	160
	d. Profile Analysis, One Group	160
	e. Profile Analysis, Two Groups	165
	f. Profile Analysis, $\Sigma_1 \neq \Sigma_2$	175
3.10	Univariate Profile Analysis	181
	a. Univariate One-Group Profile Analysis	182
	b. Univariate Two-Group Profile Analysis	182
3.11	Power Calculations	182
4	Multivariate Regression Models	185
4.1	Introduction	185
4.2	Multivariate Regression	186
	a. Multiple Linear Regression	186
	b. Multivariate Regression Estimation and Testing Hypotheses	187
	c. Multivariate Influence Measures	193
	d. Measures of Association, Variable Selection and Lack-of-Fit Tests	197
	e. Simultaneous Confidence Sets for a New Observation \mathbf{y}_{new} and the Elements of \mathbf{B}	204
	f. Random X Matrix and Model Validation: Mean Squared Error of Prediction in Multivariate Regression	206
	g. Exogeneity in Regression	211
4.3	Multivariate Regression Example	212
4.4	One-Way MANOVA and MANCOVA	218
	a. One-Way MANOVA	218
	b. One-Way MANCOVA	225
	c. Simultaneous Test Procedures (STP) for One-Way MANOVA / MANCOVA	230
4.5	One-Way MANOVA/MANCOVA Examples	234
	a. MANOVA (Example 4.5.1)	234
	b. MANCOVA (Example 4.5.2)	239
4.6	MANOVA/MANCOVA with Unequal Σ_i or Nonnormal Data	245
4.7	One-Way MANOVA with Unequal Σ_j Example	246
4.8	Two-Way MANOVA/MANCOVA	246
	a. Two-Way MANOVA with Interaction	246
	b. Additive Two-Way MANOVA	252
	c. Two-Way MANCOVA	256

	d. Tests of Nonadditivity	256
4.9	Two-Way MANOVA/MANCOVA Example	257
	a. Two-Way MANOVA (Example 4.9.1)	257
	b. Two-Way MANCOVA (Example 4.9.2)	261
4.10	Nonorthogonal Two-Way MANOVA Designs	264
	a. Nonorthogonal Two-Way MANOVA Designs with and Without Empty Cells, and Interaction	265
	b. Additive Two-Way MANOVA Designs With Empty Cells	268
4.11	Unbalance, Nonorthogonal Designs Example	270
4.12	Higher Ordered Fixed Effect, Nested and Other Designs	273
4.13	Complex Design Examples	276
	a. Nested Design (Example 4.13.1)	276
	b. Latin Square Design (Example 4.13.2)	279
4.14	Repeated Measurement Designs	282
	a. One-Way Repeated Measures Design	282
	b. Extended Linear Hypotheses	286
4.15	Repeated Measurements and Extended Linear Hypotheses Example	294
	a. Repeated Measures (Example 4.15.1)	294
	b. Extended Linear Hypotheses (Example 4.15.2)	298
4.16	Robustness and Power Analysis for MR Models	301
4.17	Power Calculations—Power.sas	304
4.18	Testing for Mean Differences with Unequal Covariance Matrices	307
5	Seemingly Unrelated Regression Models	311
5.1	Introduction	311
5.2	The SUR Model	312
	a. Estimation and Hypothesis Testing	312
	b. Prediction	314
5.3	Seemingly Unrelated Regression Example	316
5.4	The CGMANOVA Model	318
5.5	CGMANOVA Example	319
5.6	The GMANOVA Model	320
	a. Overview	320
	b. Estimation and Hypothesis Testing	321
	c. Test of Fit	324
	d. Subsets of Covariates	324
	e. GMANOVA vs SUR	326
	f. Missing Data	326
5.7	GMANOVA Example	327
	a. One Group Design (Example 5.7.1)	328
	b. Two Group Design (Example 5.7.2)	330
5.8	Tests of Nonadditivity	333
5.9	Testing for Nonadditivity Example	335
5.10	Lack of Fit Test	337
5.11	Sum of Profile Designs	338

5.12	The Multivariate SUR (MSUR) Model	339
5.13	Sum of Profile Example	341
5.14	Testing Model Specification in SUR Models	344
5.15	Miscellanea	348
6	Multivariate Random and Mixed Models	351
6.1	Introduction	351
6.2	Random Coefficient Regression Models	352
a.	Model Specification	352
b.	Estimating the Parameters	353
c.	Hypothesis Testing	355
6.3	Univariate General Linear Mixed Models	357
a.	Model Specification	357
b.	Covariance Structures and Model Fit	359
c.	Model Checking	361
d.	Balanced Variance Component Experimental Design Models	366
e.	Multilevel Hierarchical Models	367
f.	Prediction	368
6.4	Mixed Model Examples	369
a.	Random Coefficient Regression (Example 6.4.1)	371
b.	Generalized Randomized Block Design (Example 6.4.2)	376
c.	Repeated Measurements (Example 6.4.3)	380
d.	HLM Model (Example 6.4.4)	381
6.5	Mixed Multivariate Models	385
a.	Model Specification	386
b.	Hypothesis Testing	388
c.	Evaluating Expected Mean Square	391
d.	Estimating the Mean	392
e.	Repeated Measurements Model	392
6.6	Balanced Mixed Multivariate Models Examples	394
a.	Two-way Mixed MANOVA	395
b.	Multivariate Split-Plot Design	395
6.7	Double Multivariate Model (DMM)	400
6.8	Double Multivariate Model Examples	403
a.	Double Multivariate MANOVA (Example 6.8.1)	404
b.	Split-Plot Design (Example 6.8.2)	407
6.9	Multivariate Hierarchical Linear Models	415
6.10	Tests of Means with Unequal Covariance Matrices	417
7	Discriminant and Classification Analysis	419
7.1	Introduction	419
7.2	Two Group Discrimination and Classification	420
a.	Fisher's Linear Discriminant Function	421
b.	Testing Discriminant Function Coefficients	422
c.	Classification Rules	424

	d. Evaluating Classification Rules	427
7.3	Two Group Discriminant Analysis Example	429
	a. Egyptian Skull Data (Example 7.3.1)	429
	b. Brain Size (Example 7.3.2)	432
7.4	Multiple Group Discrimination and Classification	434
	a. Fisher's Linear Discriminant Function	434
	b. Testing Discriminant Functions for Significance	435
	c. Variable Selection	437
	d. Classification Rules	438
	e. Logistic Discrimination and Other Topics	439
7.5	Multiple Group Discriminant Analysis Example	440
8	Principal Component, Canonical Correlation, and Exploratory Factor Analysis	445
8.1	Introduction	445
8.2	Principal Component Analysis	445
	a. Population Model for PCA	446
	b. Number of Components and Component Structure	449
	c. Principal Components with Covariates	453
	d. Sample PCA	455
	e. Plotting Components	458
	f. Additional Comments	458
	g. Outlier Detection	458
8.3	Principal Component Analysis Examples	460
	a. Test Battery (Example 8.3.1)	460
	b. Semantic Differential Ratings (Example 8.3.2)	461
	c. Performance Assessment Program (Example 8.3.3)	465
8.4	Statistical Tests in Principal Component Analysis	468
	a. Tests Using the Covariance Matrix	468
	b. Tests Using a Correlation Matrix	472
8.5	Regression on Principal Components	474
	a. GMANOVA Model	475
	b. The PCA Model	475
8.6	Multivariate Regression on Principal Components Example	476
8.7	Canonical Correlation Analysis	477
	a. Population Model for CCA	477
	b. Sample CCA	482
	c. Tests of Significance	483
	d. Association and Redundancy	485
	e. Partial, Part and Bipartial Canonical Correlation	487
	f. Predictive Validity in Multivariate Regression using CCA	490
	g. Variable Selection and Generalized Constrained CCA	491
8.8	Canonical Correlation Analysis Examples	492
	a. Rohwer CCA (Example 8.8.1)	492
	b. Partial and Part CCA (Example 8.8.2)	494

8.9	Exploratory Factor Analysis	496
a.	Population Model for EFA	497
b.	Estimating Model Parameters	502
c.	Determining Model Fit	506
d.	Factor Rotation	507
e.	Estimating Factor Scores	509
f.	Additional Comments	510
8.10	Exploratory Factor Analysis Examples	511
a.	Performance Assessment Program (PAP—Example 8.10.1)	511
b.	Di Vesta and Walls (Example 8.10.2)	512
c.	Shin (Example 8.10.3)	512
9	Cluster Analysis and Multidimensional Scaling	515
9.1	Introduction	515
9.2	Proximity Measures	516
a.	Dissimilarity Measures	516
b.	Similarity Measures	519
c.	Clustering Variables	522
9.3	Cluster Analysis	522
a.	Agglomerative Hierarchical Clustering Methods	523
b.	Nonhierarchical Clustering Methods	530
c.	Number of Clusters	531
d.	Additional Comments	533
9.4	Cluster Analysis Examples	533
a.	Protein Consumption (Example 9.4.1)	534
b.	Nonhierarchical Method (Example 9.4.2)	536
c.	Teacher Perception (Example 9.4.3)	538
d.	Cedar Project (Example 9.4.4)	541
9.5	Multidimensional Scaling	541
a.	Classical Metric Scaling	542
b.	Nonmetric Scaling	544
c.	Additional Comments	547
9.6	Multidimensional Scaling Examples	548
a.	Classical Metric Scaling (Example 9.6.1)	549
b.	Teacher Perception (Example 9.6.2)	550
c.	Nation (Example 9.6.3)	553
10	Structural Equation Models	557
10.1	Introduction	557
10.2	Path Diagrams, Basic Notation, and the General Approach	558
10.3	Confirmatory Factor Analysis	567
10.4	Confirmatory Factor Analysis Examples	575
a.	Performance Assessment 3-Factor Model (Example 10.4.1)	575
b.	Performance Assessment 5-Factor Model (Example 10.4.2)	578
10.5	Path Analysis	580

10.6	Path Analysis Examples	586
a.	Community Structure and Industrial Conflict (Example 10.6.1)	586
b.	Nonrecursive Model (Example 10.6.2)	590
10.7	Structural Equations with Manifest and Latent Variables	594
10.8	Structural Equations with Manifest and Latent Variables Example	595
10.9	Longitudinal Analysis with Latent Variables	600
10.10	Exogeneity in Structural Equation Models	604

Introduction to Dynamical Systems

MICHAEL BRIN

University of Maryland

GARRETT STUCK

University of Maryland

 **CAMBRIDGE**
UNIVERSITY PRESS

Contents

Introduction	<i>page</i> xi
1 Examples and Basic Concepts	1
1.1 The Notion of a Dynamical System	1
1.2 Circle Rotations	3
1.3 Expanding Endomorphisms of the Circle	5
1.4 Shifts and Subshifts	7
1.5 Quadratic Maps	9
1.6 The Gauss Transformation	11
1.7 Hyperbolic Toral Automorphisms	13
1.8 The Horseshoe	15
1.9 The Solenoid	17
1.10 Flows and Differential Equations	19
1.11 Suspension and Cross-Section	21
1.12 Chaos and Lyapunov Exponents	23
1.13 Attractors	25
2 Topological Dynamics	28
2.1 Limit Sets and Recurrence	28
2.2 Topological Transitivity	31
2.3 Topological Mixing	33
2.4 Expansiveness	35
2.5 Topological Entropy	36
2.6 Topological Entropy for Some Examples	41
2.7 Equicontinuity, Distality, and Proximality	45
2.8 Applications of Topological Recurrence to Ramsey Theory	48

3	Symbolic Dynamics	54
3.1	Subshifts and Codes	55
3.2	Subshifts of Finite Type	56
3.3	The Perron–Frobenius Theorem	57
3.4	Topological Entropy and the Zeta Function of an SFT	60
3.5	Strong Shift Equivalence and Shift Equivalence	62
3.6	Substitutions	64
3.7	Sofic Shifts	66
3.8	Data Storage	67
4	Ergodic Theory	69
4.1	Measure-Theory Preliminaries	69
4.2	Recurrence	71
4.3	Ergodicity and Mixing	73
4.4	Examples	77
4.5	Ergodic Theorems	80
4.6	Invariant Measures for Continuous Maps	85
4.7	Unique Ergodicity and Weyl’s Theorem	87
4.8	The Gauss Transformation Revisited	90
4.9	Discrete Spectrum	94
4.10	Weak Mixing	97
4.11	Applications of Measure-Theoretic Recurrence to Number Theory	101
4.12	Internet Search	103
5	Hyperbolic Dynamics	106
5.1	Expanding Endomorphisms Revisited	107
5.2	Hyperbolic Sets	108
5.3	ϵ -Orbits	110
5.4	Invariant Cones	114
5.5	Stability of Hyperbolic Sets	117
5.6	Stable and Unstable Manifolds	118
5.7	Inclination Lemma	122
5.8	Horseshoes and Transverse Homoclinic Points	124
5.9	Local Product Structure and Locally Maximal Hyperbolic Sets	128
5.10	Anosov Diffeomorphisms	130
5.11	Axiom A and Structural Stability	133
5.12	Markov Partitions	134
5.13	Appendix: Differentiable Manifolds	137

6	Ergodicity of Anosov Diffeomorphisms	141
6.1	Hölder Continuity of the Stable and Unstable Distributions	141
6.2	Absolute Continuity of the Stable and Unstable Foliations	144
6.3	Proof of Ergodicity	151
7	Low-Dimensional Dynamics	153
7.1	Circle Homeomorphisms	153
7.2	Circle Diffeomorphisms	160
7.3	The Sharkovsky Theorem	162
7.4	Combinatorial Theory of Piecewise-Monotone Mappings	170
7.5	The Schwarzian Derivative	178
7.6	Real Quadratic Maps	181
7.7	Bifurcations of Periodic Points	183
7.8	The Feigenbaum Phenomenon	189
8	Complex Dynamics	191
8.1	Complex Analysis on the Riemann Sphere	191
8.2	Examples	194
8.3	Normal Families	197
8.4	Periodic Points	198
8.5	The Julia Set	200
8.6	The Mandelbrot Set	205
9	Measure-Theoretic Entropy	208
9.1	Entropy of a Partition	208
9.2	Conditional Entropy	211
9.3	Entropy of a Measure-Preserving Transformation	213
9.4	Examples of Entropy Calculation	218
9.5	Variational Principle	221
	<i>Bibliography</i>	225
	<i>Index</i>	231

Outline Table of Contents

A Tour of <i>Mathematica</i>	1	Part 3. Advanced Mathematics in <i>Mathematica</i>	
Part 1. A Practical Introduction to <i>Mathematica</i>		3.1 Numbers	714
1.0 Running <i>Mathematica</i>	26	3.2 Mathematical Functions	736
1.1 Numerical Calculations	29	3.3 Algebraic Manipulation	789
1.2 Building Up Calculations	38	3.4 Manipulating Equations	811
1.3 Using the <i>Mathematica</i> System	44	3.5 Calculus	830
1.4 Algebraic Calculations	62	3.6 Series, Limits and Residues	860
1.5 Symbolic Mathematics	78	3.7 Linear Algebra	871
1.6 Numerical Mathematics	100	3.8 Numerical Operations on Data	893
1.7 Functions and Programs	108	3.9 Numerical Operations on Functions	909
1.8 Lists	113	3.10 Mathematical and Other Notation	939
1.9 Graphics and Sound	133	Formula Gallery	969
1.10 Input and Output in Notebooks	178	Graphics Gallery	979
1.11 Files and External Operations	208	Appendix. <i>Mathematica</i> Reference Guide	
1.12 Special Topic: The Internals of <i>Mathematica</i>	220	A.1 Basic Objects	1000
Part 2. Principles of <i>Mathematica</i>		A.2 Input Syntax	1005
2.1 Expressions	232	A.3 Some General Notations and Conventions	1027
2.2 Functional Operations	242	A.4 Evaluation	1034
2.3 Patterns	261	A.5 Patterns and Transformation Rules	1038
2.4 Transformation Rules and Definitions	285	A.6 Files and Streams	1043
2.5 Evaluation of Expressions	310	A.7 <i>Mathematica</i> Sessions	1045
2.6 Modularity and the Naming of Things	363	A.8 Installation and Organization of System Files	1050
2.7 Strings and Characters	391	A.9 Some Notes on Internal Implementation	1059
2.8 Textual Input and Output	409	A.10 Listing of Major Built-in <i>Mathematica</i> Objects	1065
2.9 The Structure of Graphics and Sound	472	A.11 Listing of C Functions in the <i>MathLink</i> Library	1317
2.10 Manipulating Notebooks	558	A.12 Listing of Named Characters	1328
2.11 Files and Streams	613	A.13 Incompatible Changes since <i>Mathematica</i> Version 1	1378
2.12 <i>MathLink</i> and External Program Communication	647	Index	1381
2.13 Global Aspects of <i>Mathematica</i> Sessions	692

1.6 Numerical Mathematics	100
▪ Basic Operations ▪ Numerical Sums, Products and Integrals ▪ Numerical Equation Solving ▪ Numerical Differential Equations ▪ Numerical Optimization ▪ Manipulating Numerical Data - ▪ Statistics Packages	
1.7 Functions and Programs	108
▪ Defining Functions ▪ Functions as Procedures ▪ Repetitive Operations ▪ Transformation Rules for Functions	
1.8 Lists	113
▪ Collecting Objects Together ▪ Making Tables of Values - ▪ Vectors and Matrices - ▪ Getting Pieces of Lists ▪ Testing and Searching List Elements - ▪ Adding, Removing and Modifying List Elements ▪ Combining Lists ▪ Advanced Topic: Lists as Sets ▪ Rearranging Lists - ▪ Grouping Together Elements of Lists - ▪ Advanced Topic: Alignment and Padding in the Partitioning of Lists ▪ Mathematical Operations on Lists - ▪ Advanced Topic: Rearranging Nested Lists - ▪ Advanced Topic: Combinatorial Operations	
1.9 Graphics and Sound	133
▪ Basic Plotting ▪ Special Topic: How Graphics Are Output ▪ Options ▪ Redrawing and Combining Plots ▪ Advanced Topic: Manipulating Options ▪ Contour and Density Plots ▪ Three-Dimensional Surface Plots ▪ Converting between Types of Graphics ▪ Plotting Lists of Data ▪ Parametric Plots ▪ Some Special Plots ▪ Special Topic: Animated Graphics ▪ Sound	
1.10 Input and Output in Notebooks	178
+ ▪ Entering Greek Letters + ▪ Entering Two-Dimensional Input - ▪ Editing and Evaluating Two-Dimensional Expressions - ▪ Entering Formulas - ▪ Entering Tables and Matrices + ▪ Subscripts, Bars and Other Modifiers + ▪ Special Topic: Non-English Characters and Keyboards - ▪ Other Mathematical Notation + ▪ Forms of Input and Output - ▪ Mixing Text and Formulas + ▪ Displaying and Printing <i>Mathematica</i> Notebooks - ▪ Creating Your Own Palettes - ▪ Setting Up Hyperlinks - ▪ Automatic Numbering + ▪ Exposition in <i>Mathematica</i> Notebooks	
1.11 Files and External Operations	208
▪ Reading and Writing <i>Mathematica</i> Files ▪ Advanced Topic: Finding and Manipulating Files - ▪ Importing and Exporting Data ▪ Exporting Graphics and Sounds - ▪ Exporting Formulas from Notebooks - ▪ Generating TeX + ▪ Converting Notebooks to HTML ▪ Generating C and Fortran Expressions ▪ Splicing <i>Mathematica</i> Output into External Files ▪ Running External Programs ▪ <i>MathLink</i>	
1.12 Special Topic: The Internals of <i>Mathematica</i>	220
- ▪ Why You Do Not Usually Need to Know about Internals + ▪ Basic Internal Architecture + ▪ The Algorithms of <i>Mathematica</i> - ▪ The Software Engineering of <i>Mathematica</i> + ▪ Testing and Verification	

Part 2. Principles of *Mathematica*

2.1 Expressions	232
▪ Everything Is an Expression ▪ The Meaning of Expressions ▪ Special Ways to Input Expressions ▪ Parts of Expressions ▪ Manipulating Expressions like Lists ▪ Expressions as Trees ▪ Levels in Expressions	
2.2 Functional Operations	242
▪ Function Names as Expressions - ▪ Applying Functions Repeatedly - ▪ Applying Functions to Lists and Other Expressions ▪ Applying Functions to Parts of Expressions ▪ Pure Functions ▪ Building Lists from Functions ▪ Selecting Parts of Expressions with Functions ▪ Expressions with Heads That Are Not Symbols ▪ Advanced Topic: Working with Operators - ▪ Structural Operations - ▪ Sequences	

2.3	Patterns.....	261
	▪ Introduction -▪ Finding Expressions That Match a Pattern ▪ Naming Pieces of Patterns ▪ Specifying Types of Expression in Patterns ▪ Putting Constraints on Patterns ▪ Patterns Involving Alternatives ▪ Flat and Orderless Functions ▪ Functions with Variable Numbers of Arguments ▪ Optional and Default Arguments ▪ Setting Up Functions with Optional Arguments ▪ Repeated Patterns -▪ Verbatim Patterns ▪ Patterns for Some Common Types of Expression ▪ An Example: Defining Your Own Integration Function	
2.4	Transformation Rules and Definitions.....	285
	-▪ Applying Transformation Rules ▪ Manipulating Sets of Transformation Rules ▪ Making Definitions ▪ Special Forms of Assignment ▪ Making Definitions for Indexed Objects ▪ Making Definitions for Functions ▪ The Ordering of Definitions ▪ Immediate and Delayed Definitions ▪ Functions That Remember Values They Have Found ▪ Associating Definitions with Different Symbols ▪ Defining Numerical Values ▪ Modifying Built-in Functions ▪ Advanced Topic: Manipulating Value Lists	
2.5	Evaluation of Expressions.....	310
	▪ Principles of Evaluation ▪ Reducing Expressions to Their Standard Form -▪ Attributes ▪ The Standard Evaluation Procedure -▪ Non-Standard Evaluation -▪ Evaluation in Patterns, Rules and Definitions ▪ Evaluation in Iteration Functions ▪ Conditionals -▪ Loops and Control Structures ▪ Tracing Evaluation ▪ Advanced Topic: The Evaluation Stack ▪ Advanced Topic: Controlling Infinite Evaluation ▪ Advanced Topic: Interrupts and Aborts -▪ Compiling <i>Mathematica</i> Expressions -▪ Advanced Topic: Manipulating Compiled Code	
2.6	Modularity and the Naming of Things.....	363
	▪ Modules and Local Variables ▪ Local Constants ▪ How Modules Work ▪ Advanced Topic: Variables in Pure Functions and Rules ▪ Dummy Variables in Mathematics ▪ Blocks and Local Values ▪ Blocks Compared with Modules ▪ Contexts ▪ Contexts and Packages ▪ Setting Up <i>Mathematica</i> Packages ▪ Automatic Loading of Packages -▪ Manipulating Symbols and Contexts by Name ▪ Advanced Topic: Intercepting the Creation of New Symbols	
2.7	Strings and Characters.....	391
	▪ Properties of Strings -▪ Operations on Strings ▪ String Patterns ▪ Characters in Strings -▪ Special Characters -▪ Advanced Topic: Newlines and Tabs in Strings -▪ Advanced Topic: Character Codes -▪ Advanced Topic: Raw Character Encodings	
2.8	Textual Input and Output.....	409
	-▪ Forms of Input and Output -▪ How Input and Output Work -▪ The Representation of Textual Forms ▪ The Interpretation of Textual Forms ▪ Short and Shallow Output ▪ String-Oriented Output Formats ▪ Output Formats for Numbers ▪ Tables and Matrices -▪ Styles and Fonts in Output -▪ Representing Textual Forms by Boxes -▪ Adjusting Details of Formatting -▪ String Representation of Boxes -▪ Converting between Strings, Boxes and Expressions -▪ The Syntax of the <i>Mathematica</i> Language -▪ Operators without Built-in Meanings -▪ Defining Output Formats -▪ Advanced Topic: Low-Level Input and Output Rules ▪ Generating Unstructured Output -▪ Generating Styled Output in Notebooks ▪ Requesting Input ▪ Messages ▪ International Messages ▪ Documentation Constructs	
2.9	The Structure of Graphics and Sound.....	472
	▪ The Structure of Graphics ▪ Two-Dimensional Graphics Elements ▪ Graphics Directives and Options -▪ Coordinate Systems for Two-Dimensional Graphics ▪ Labeling Two-Dimensional Graphics ▪ Making Plots within Plots -▪ Density and Contour Plots -▪ Three-Dimensional Graphics Primitives ▪ Three-Dimensional Graphics Directives ▪ Coordinate Systems for Three-Dimensional Graphics ▪ Plotting Three-Dimensional Surfaces -▪ Lighting and Surface Properties ▪ Labeling Three-Dimensional Graphics ▪ Advanced Topic: Low-Level Graphics Rendering -▪ Formats for Text in Graphics -▪ Graphics Primitives for Text ▪ Advanced Topic: Color Output ▪ The Representation of Sound -▪ Exporting Graphics and Sounds -▪ Importing Graphics and Sounds	

2.10 Manipulating Notebooks.....	558
<ul style="list-style-type: none"> + Cells as <i>Mathematica</i> Expressions + Notebooks as <i>Mathematica</i> Expressions + Manipulating Notebooks from the Kernel + Manipulating the Front End from the Kernel + Advanced Topic: Executing Notebook Commands Directly in the Front End + Button Boxes and Active Elements in Notebooks + Advanced Topic: The Structure of Cells + Styles and the Inheritance of Option Settings + Options for Cells + Text and Font Options + Advanced Topic: Options for Expression Input and Output + Options for Graphics Cells + Options for Notebooks + Advanced Topic: Global Options for the Front End 	
2.11 Files and Streams.....	613
<ul style="list-style-type: none"> Reading and Writing <i>Mathematica</i> Files + External Programs + Advanced Topic: Streams and Low-Level Input and Output + Naming and Finding Files + Files for Packages + Manipulating Files and Directories + Importing and Exporting Files + Reading Textual Data + Searching Files + Searching and Reading Strings 	
2.12 MathLink and External Program Communication.....	647
<ul style="list-style-type: none"> + How <i>MathLink</i> Is Used + Installing Existing <i>MathLink</i>-Compatible Programs + Setting Up External Functions to Be Called from <i>Mathematica</i> + Handling Lists, Arrays and Other Expressions + Special Topic: Portability of <i>MathLink</i> Programs + Using <i>MathLink</i> to Communicate between <i>Mathematica</i> Sessions + Calling Subsidiary <i>Mathematica</i> Processes + Special Topic: Communication with <i>Mathematica</i> Front Ends + Two-Way Communication with External Programs + Special Topic: Running Programs on Remote Computers + Special Topic: Running External Programs under a Debugger + Manipulating Expressions in External Programs + Advanced Topic: Error and Interrupt Handling + Running <i>Mathematica</i> from Within an External Program 	
2.13 Global Aspects of <i>Mathematica</i> Sessions.....	692
<ul style="list-style-type: none"> + The Main Loop + Dialogs + Date and Time Functions + Memory Management + Advanced Topic: Global System Information + Advanced Topic: Customizing Your <i>Mathematica</i> Configuration 	
Part 3. Advanced Mathematics in <i>Mathematica</i>	
3.1 Numbers.....	714
<ul style="list-style-type: none"> + Types of Numbers + Numeric Quantities + Converting between Different Forms of Numbers + Numerical Precision + Arbitrary-Precision Numbers + Machine-Precision Numbers + Advanced Topic: Interval Arithmetic + Advanced Topic: Indeterminate and Infinite Results + Advanced Topic: Controlling Numerical Evaluation 	
3.2 Mathematical Functions.....	736
<ul style="list-style-type: none"> + Naming Conventions + Numerical Functions + Pseudorandom Numbers + Integer and Number-Theoretical Functions + Combinatorial Functions + Elementary Transcendental Functions + Functions That Do Not Have Unique Values + Mathematical Constants + Orthogonal Polynomials + Special Functions + Elliptic Integrals and Elliptic Functions + Mathieu and Related Functions + Working with Special Functions + Statistical Distributions and Related Functions 	
3.3 Algebraic Manipulation.....	789
<ul style="list-style-type: none"> + Structural Operations on Polynomials + Finding the Structure of a Polynomial + Structural Operations on Rational Expressions + Algebraic Operations on Polynomials + Polynomials Modulo Primes + Advanced Topic: Polynomials over Algebraic Number Fields + Trigonometric Expressions + Expressions Involving Complex Variables + Simplification + Using Assumptions 	
3.4 Manipulating Equations.....	811
<ul style="list-style-type: none"> + The Representation of Equations and Solutions + Equations in One Variable + Advanced Topic: Algebraic Numbers + Simultaneous Equations + Equations Involving Functions + Getting Full Solutions + Advanced Topic: Existence of 	

	Solutions ■ Eliminating Variables -■ Solving Equations with Subsidiary Conditions ■ Advanced Topic: Solving Logical Combinations of Equations ■ Advanced Topic: Equations Modulo Integers	
3.5	Calculus.....	830
	■ Differentiation ■ Total Derivatives ■ Derivatives of Unknown Functions ■ Advanced Topic: The Representation of Derivatives ■ Defining Derivatives ■ Indefinite Integrals -■ Integrals That Can and Cannot Be Done -■ Definite Integrals ■ Manipulating Integrals in Symbolic Form -■ Differential Equations +■ Integral Transforms and Related Operations +■ Generalized Functions and Related Objects	
3.6	Series, Limits and Residues.....	860
	■ Making Power Series Expansions ■ Advanced Topic: The Representation of Power Series ■ Operations on Power Series -■ Advanced Topic: Composition and Inversion of Power Series -■ Converting Power Series to Normal Expressions ■ Solving Equations Involving Power Series +■ Summation of Series ■ Finding Limits ■ Residues	
3.7	Linear Algebra.....	871
	■ Constructing Matrices -■ Getting Pieces of Matrices ■ Scalars, Vectors and Matrices ■ Operations on Scalars, Vectors and Matrices -■ Multiplying Vectors and Matrices ■ Matrix Inversion -■ Basic Matrix Operations -■ Solving Linear Systems ■ Eigenvalues and Eigenvectors -■ Advanced Topic: Matrix Decompositions -■ Advanced Topic: Tensors	
3.8	Numerical Operations on Data.....	893
	■ Curve Fitting -■ Approximate Functions and Interpolation -■ Fourier Transforms -■ Convolutions and Correlations	
3.9	Numerical Operations on Functions.....	909
	■ Numerical Mathematics in <i>Mathematica</i> ■ The Uncertainties of Numerical Mathematics -■ Numerical Integration ■ Numerical Evaluation of Sums and Products ■ Numerical Solution of Polynomial Equations ■ Numerical Root Finding -■ Numerical Solution of Differential Equations ■ Numerical Minimization ■ Linear Programming -■ Advanced Topic: Functions with Sensitive Dependence on Their Input	
3.10	Mathematical and Other Notation.....	939
	+■ Special Characters +■ Names of Symbols and Mathematical Objects -■ Letters and Letter-like Forms +■ Operators -■ Structural Elements and Keyboard Characters	
	Formula Gallery.....	969
	Graphics Gallery.....	979
Appendix A. <i>Mathematica</i> Reference Guide		
A.1	Basic Objects.....	1000
	■ Expressions ■ Symbols ■ Contexts ■ Atomic Objects ■ Numbers -■ Character Strings	
A.2	Input Syntax.....	1005
	-■ Entering Characters +■ Types of Input Syntax -■ Character Strings -■ Symbol Names and Contexts -■ Numbers -■ Bracketed Objects -■ Operator Input Forms +■ Two-Dimensional Input Forms +■ Input of Boxes -■ The Extent of Input Expressions -■ Special Input +■ Front End Files	

A.3 Some General Notations and Conventions.....	1027
▪ Function Names ▪ Function Arguments ▪ Options ▪ Part Numbering -▪ Sequence Specifications ▪ Level Specifications ▪ Iterators ▪ Scoping Constructs -▪ Ordering of Expressions -▪ Mathematical Functions -▪ Mathematical Constants ▪ Protection ▪ String Patterns	
A.4 Evaluation.....	1034
-▪ The Standard Evaluation Sequence ▪ Non-Standard Argument Evaluation ▪ Overriding Non-Standard Argument Evaluation -▪ Preventing Evaluation ▪ Global Control of Evaluation ▪ Aborts	
A.5 Patterns and Transformation Rules.....	1038
-▪ Patterns ▪ Assignments ▪ Types of Values ▪ Clearing and Removing Objects ▪ Transformation Rules	
A.6 Files and Streams.....	1043
-▪ File Names -▪ Streams	
A.7 Mathematica Sessions.....	1045
-▪ Command-Line Options and Environment Variables ▪ Initialization ▪ The Main Loop ▪ Messages ▪ Termination -▪ Network License Management	
A.8 Installation and Organization of System Files.....	1050
-▪ Running and Installing <i>Mathematica</i> -▪ Overall Organization of the CD-ROM -▪ Running the Executable Pro- grams -▪ The Installation Process -▪ File Organization after Installation -▪ Configuration Files -▪ Documentation Files -▪ Add-ons	
A.9 Some Notes on Internal Implementation.....	1059
-▪ Introduction -▪ Data Structures and Memory Management -▪ Basic System Features -▪ Numerical and Related Functions -▪ Algebra and Calculus -▪ Output and Interfacing	
A.10 Listing of Major Built-in Mathematica Objects.....	1065
-▪ Introduction -▪ Conventions in This Listing -▪ Listing	
A.11 Listing of C Functions in the MathLink Library.....	1317
-▪ Introduction -▪ Listing	
A.12 Listing of Named Characters.....	1328
-▪ Introduction -▪ Listing	
A.13 Incompatible Changes since Mathematica Version 1.....	1378
-▪ Incompatible Changes between Version 1 and Version 2 -▪ Incompatible Changes between Version 2 and Version 3 -▪ Incompatible Changes between Version 3 and Version 4	
Index.....	1381
