200 Words describing your work:

This sculpture is one of a series of three sculptures and three paintings, all of which focused on different childhood phobias I had. This particular piece has to deal with a fear of heights, specifically in relation to the use of ladders. The series was made as a way to explore my past in order to better understand my current self. I am interested in how people's personal histories shape who they are and specifically how their fears can hold them back.
