Feb 2015

Federal Prison System Shows Dramatic Long-Term Growth

Policy decisions contribute to steep rise in inmate population and costs

Overview

From 1980 to 2013, the number of offenders incarcerated in federal prisons increased from approximately 24,000 to more than 215,000, making the federal system the largest in the nation.¹ Policy choices contributed significantly to this expansion as lawmakers added criminal laws to the books, lengthened sentences, and abolished parole.² To accommodate the growing inmate population, the number of federal prisons nearly tripled, driving a surge in corrections spending.³ Taxpayers spent almost as much on federal prisons in 2013—\$6.7 billion—as they spent to fund the entire U.S. Department of Justice in 1980, after adjusting for inflation.⁴ Despite these expenditures, recent data show that a third of all offenders who leave federal prisons under community supervision return to custody for violating the terms of their release.⁵

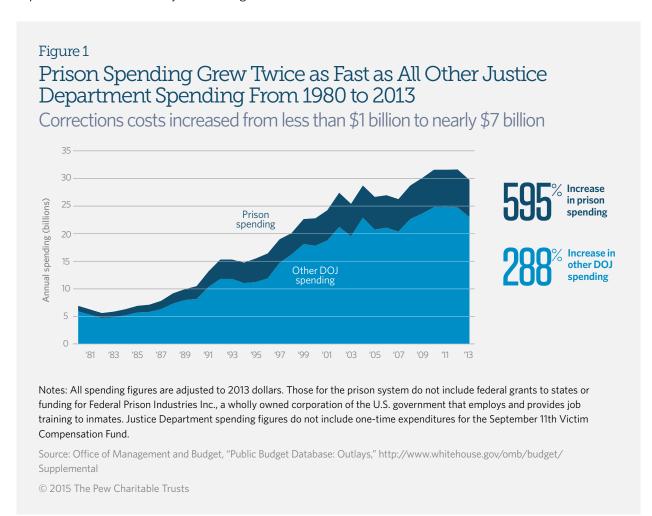

Table 1

Prison Expansion by the Numbers

Sharp increase in number of inmates and facilities fueled spending growth

	1980	2013
Prison population	24,363	215,866
Imprisonment rate per 100,000 U.S. residents	11	68
Number of prisons	43	119
Annual prison spending (adjusted for inflation)	\$0.97 billion	\$6.7 billion
Share of Justice Department funds spent on prisons	14%	23%
Estimated number of federal crimes in statute	3,000	5,000
Drug offenders as share of total sentenced prison population	25%	51%
Average time served in prison (in months)	15.9	40.1

Notes: The federal prison population peaked at 217,815 inmates in 2012. The federal imprisonment rate peaked at 69 inmates per 100,000 U.S. residents, also in 2012. The proportion of drug offenders as a share of the total sentenced prison population peaked at 61 percent in 1994. Prison system expenditure figures do not include federal grants to states or funding for Federal Prison Industries Inc., a wholly owned corporation of the U.S. government that employs and provides job training to inmates. Justice Department spending figures do not include one-time expenditures for the September 11th Victim Compensation Fund. The number of federal crimes in statute is an approximation that does not include regulatory offenses, such as environmental infractions.
