

BRIEF NOTE**NEW RECORDS OF OHIO SHORE FLIES (DIPTERA: EPHYDRIDAE)¹**

B. A. STEINLY and D. L. DEONIER, Dept. of Zoology, Miami University, Oxford, OH 45056

OHIO J. SCI. 80(1): 41, 1980

The Ephydriidae are a large family of higher Diptera distantly related to the vinegar gnat *Drosophila melanogaster*. Most shore flies are aquatic in their immature stages and semi-aquatic as adults. Previous studies and records of the Ephydriidae in Ohio include Wirth (1965), Deonier (1971, 1972), Scheiring and Foote (1970, 1973), Regensburg (1976), and Deonier and Regensburg (1978). Scheiring and Foote (1973) collected 68 ephydrid species in 10 different types of habitat in 13 counties of northeastern Ohio. Regensburg (1976) conducted a systematic and ecological survey of ephydrid fauna at 33 southern Ohio localities. This study produced a total of 9,000 specimens from 12 habitat types, which included 66 species. In 1978, Deonier and Regensburg reported 12 new ephydrid species collected in Ohio.

The final phase of a statewide Ohio Biological Survey project was concluded in 1977 involving a systematic and ecological survey of the ephydrid fauna from 42 northern Ohio localities. Twenty-three counties were studied and 13,940 specimens were collected. A total of 643 northern Ohio specimens located in the Kent State University and Ohio State University Insect Collections were examined and catalogued. A total of 102 species from 13 habitat types were identified in northern Ohio. These habitat types, with the number of species in parentheses, include: periphytose stream rocks (8), grass shore (34), sand shore (49), freshet seep (15), sedge meadow (50), floating algal mat (8), stagnant woodland pool (15), limnic wrack (24),

mud shore (47), floating vegetation (27), marsh reeds (17), salt pool (18), and terrestrial shoreline vegetation (21).

The northern Ohio survey specimens have been deposited in the Miami University Insect Collection. Specimens designated KSU and OSU are housed at the Kent State University, and Ohio State University Insect Collections, respectively. The following species constitute new records for Ohio:

Ditrichophora lenis Cresson. Lorain Co.: Beaver Ck, nr. Amherst, Sewage Treatment Plant, 41°24.7'N, 82°1.39'W (VIII-24-1977, B. A. Steinly), sand shore, 1 specimen; (VI-30-1977, B. A. Steinly), sand shore, 1 specimen. Mercer Co.: Grand L. St. Marys S. P., Grand L. St. Marys, 40°32.8'N, 84°27.9'W (V-26-1977, B. A. Steinly), sedge meadow, 1 specimen.

Hyadina pruinosa (Cresson). Stark Co.: Berlin Reservoir, 40°58.9'N, 81°6.0'W (VIII-7-1976, B. A. Steinly), sedge meadow, 1 specimen.

Lytogaster gravida (Loew). Fulton Co.: Wauseon (VIII-25-1902) (OSU), habitat unknown, 1 specimen.

Notiphila sp. A. Portage Co.: 1.0 mile east of Kent (VII-31-1969, J. Scheiring) (KSU), habitat unknown, 1 specimen.

Notiphila sp. B. Carroll Co.: Specht Marsh (VI-21-1964, E. J. Allen) (KSU), habitat unknown, 1 specimen.

Notiphila bella Loew. Portage Co.: 3.0 miles east of Kent (VI-22-1970), R. Maibauer) (KSU), known from sedge meadow, 6 specimens: (VI-30-1970) (KSU), 1 specimen; (VI-24-1970) (KSU), 3 specimens: (VIII-17-1970) (KSU), 1 specimen; (VI-25-1970) (KSU), 2 speci-

¹Manuscript received 14 December 1978 (#78-75).

mens; (VI-27-1970) (KSU), 1 specimen. *Notiphila sicca* Cresson. Columbiana Co.: Beaver Ck. S. P., Little Beaver Ck., 40°43.8'N, 80°36.5'W (VII-7-1976, B. A. Steinly), sand shore, 1 specimen. Fulton Co.: Harrison L. S. P., Harrison L., 41°38.7'N, 82°22.4'W (VIII-21-1977, B. A. Steinly), grass shore, 1 specimen. Lake Co.: Mentor Marsh over bog, 41°43.7'N, 81°19.3'W (VI-16-1976, D. L. Deonier), mud shore, 1 specimen. Stark Co.: Berlin Reservoir, 40°58.9'N, 81°6.0'W (VII-7-1976, B. A. Steinly), grass shore, 1 specimen.

Notiphila solita Walker. Erie Co.: Sandusky, (VI-30-1914) (OSU), habitat unknown, 1 specimen. Fulton Co.: Wauseon, (VIII-25-1902) (OSU), 1 specimen. Portage Co.: 6.0 miles south of Kent (IX-9-1968, J. Scheiring) (KSU), 1 specimen; 4.5 miles east of Kent (VI-12-1968, W. Eastin) (KSU), 1 specimen; 4.5 miles northwest of Kent (VIII-13-1969, J. Scheiring) (KSU), 2 specimens; (VII-30-1969, J. Scheiring) (KSU), 1 specimen. Mogadore Reservoir (VIII-7-1967, J. Scheiring) (KSU), 1 specimen; (VII-28-1969, J. Scheiring) (KSU), 1 specimen. Wayne Co.: 0.5 miles south of Rittman (IX-18-1969, J. Scheiring) (KSU), 2 specimens; (IX-9-1969, B. A. Foote) (KSU), 3 specimens.

Psilopa compta (Meigen). Portage Co.: 4.5 miles east of Kent (V-10-1967, K. Valley) (KSU), 1 specimen. Wayne Co.: Rittman Salt Works, Chippewa Ck., 40°58.1'N, 81°46.4'W (VII-17-1976, B. A. Steinly), salt pool, 1 specimen.

Psilopa olga Cresson. Lorain Co.: Beaver Ck. nr. Amherst, Sewage Treatment Plant, 41°24.7'N, 82°13.9'W (VIII-22-1976, B. A. Steinly), limnic wrack, 70 specimens; (VI-30-1977, B. A. Steinly), grass shore, 2 specimens, sand shore, 1 specimen; (VIII-24-1977, B. A. Steinly), stagnant pool, 13 specimens, sand shore, 1 specimen, mud bank, 7 specimens. Portage Co.: Jennings Woods, 3 miles east of Ravenna (V-4-1969, B. A. Foote) (KSU), 3 specimens; (V-3-1969, B. A. Foote) (KSU), 1 specimen. Wayne Co.: Rittman Salt Works, Chippewa Ck., 40°58.1'N, 81°46.4'W (VII-17-1976, B. A. Steinly), salt pools, 8 specimens; (VI-

30-1977, B. A. Steinly), salt pools, 87 specimens; 0.5 miles south of Rittman (IX-28-1975, B. A. Foote) (KSU), 1 specimen.

Rhysophora robusta Cresson. Geauga Co.: Punderson S. P., Punderson L., 41°27.6'N, 81°12.9'W (IX-12-1976, B. A. Steinly), mud shore, 2 specimens.

Scatophila sp. A. Knox Co.: Pasture nr. Jelloway, 40°33.1'N, 82°16.9'W (VI-30-1976, J. T. Regensburg and B. A. Steinly), sedge meadow, 1 specimen.

Scatophila exilis Cresson. Wayne Co.: Rittman Salt Works, Chippewa Ck., 40°58.1'N, 81°46.4'W (VI-30-1977, B. A. Steinly), mud shore, 2 specimens.

Scatophila viradella Sturtevant and Wheeler. Lorain Co.: Beaver Ck. nr. Amherst, Sewage Treatment Plant, 41°24.7'N, 82°13.9'W (VI-30-1977), B. A. Steinly), sand shore, 1 specimen. Beaver Ck. on West Martin St., Amherst, 41°24.2'N, 82°14.0'W (VI-29-1977), B. A. Steinly), mud shore, 1 specimen.

Acknowledgments. This work was supported in part by a grant from Ohio Biological Survey. We wish to thank Richard E. Winkler, Office Manager of the Rittman Plant of Morton Salt Company for permission to collect at the salt pools.
