Foreword	v
In Memoriam	vi
Plenary Talks, General Sessions, and Session Chairs	x
Review Papers	1
On the Development of the Hot Strip, Hot Disc, and Pulse Hot Strip Methods for Measuring Thermal Transport Properties	3
<i>Silas E. Gustafsson</i>	
Heat Transfer Mechanisms in Porous Materials and Contemporary Problems in Thermophysical Properties Investigations: Analyses and Solutions	16
<i>E. Litovsky, V. Issoufov, and J. Kleiman</i>	
Composites and Granular Materials	23
Thermal Conductivity of Simulated Soils by the Needle Probe Method for Energy Foundation Applications	25
<i>J. E. Low, F. A. Loveridge, and W. Powrie</i>	
Characterization Work and Comparative Testing of Expanded Glass Granulate as a Round Robin Material for Thermal Conductivity at Higher Temperatures	31
<i>Roland Schreiner, and Ernst-G. Hencke</i>	
Metal Hydride Component Design (MHy-CoDe) Tool for the Selection of Hydrides in Thermal Systems	37
<i>Essene L. Waters, Timothée L. Pourpoint and Tyler G. Voskuilen</i>	
Microstructure and Thermal Conductivity Modeling of Granular Nanoplatelet Assemblies	44
<i>Ishan Srivastava, and Timothy S. Fisher</i>	
Insulation Materials	53
Bilateral National Metrology Institute Comparison of Guarded-Hot-Plate Apparatus	55
<i>Alain Koenen, Robert R. Zarr, and William F. Guthrie</i>	
Flexible Buffer Materials to Reduce Contact Resistance in Thermal Insulation Measurements	64
<i>R. E. Clarke, G. Rosengarten, and B. Shabani</i>	
Determination of the Thermal Resistance of Pipe Insulation Material from Thermal Conductivity of Flat Insulation Products	74
<i>Alain Koenen, and Damien M. Marquis</i>	
Comparative Testing of Thermal Conductivity for Thermal Insulation Products: The European Keymark Experience for More Than 50 Equipment at 25 Test Institutes	81
<i>Erik Rasmussen, Clark Stacey, Alain Koenen, and Eva-Lotta W. Kurkinen</i>	

Modeling	91
Role of Thermal Conductivity for Thermoelectrics with Finite Contacts <i>Yee Rui Koh, Kazuaki Yazawa, and Ali Shakouri</i>	93
Simulation and Analysis of an Integrated Device to Simultaneously Characterize Thermal and Thermoelectric Properties <i>C. Miers, and A. Marconnet</i>	99
Designing a Mechanically Robust Thermoelectric Module for High Temperature Application <i>Amirkoushyar Ziabari, Kazuaki Yazawa, and Ali Shakouri</i>	106
Steady Measurements	113
A New Facility for the Experimental Investigation on Nano Heat Transfer between Gas Molecules and Ceramic Surfaces <i>D. Bayer, U. Gross, R. Wulf, and K. Raed</i>	115
International Comparison of Guarded Hot Plate Facilities at Low Temperature on Mineral Wool Insulation Material <i>Alain Koenen, Clark Stacey, Erik Rasmussen, Roland Schreiner, and Grażyna Swotek</i>	123
Design of a Guarded Hot Plate for Measuring Thin Specimens of Polymer and Composite Materials <i>C. Stacey, M. J. Parfitt, A. J. Simpkin, and J. Wu</i>	129
Simulation and Optimization of an In-plane Thermal Conductivity Measurement Structure for Silicon Nanostructures <i>Y. Zeng, and A. Marconnet</i>	136
Provisional Assessment of Candidate High-Temperature Thermal Conductivity Reference Materials in the EMRP “Thermo” Project <i>J. Wu, R. Morrell, T. Fry, S. Gnaniyah, D. Gohil, A. Dawson, J. Hameury, A. Koenen, U. Hammerschmidt, E. Turzó-András, R. Strnad, and A. Blahut</i>	142
Transient Measurements	155
High-Temperature Thermal Properties Using Reflected Sample Generated Radiation <i>E. G. Wolff</i>	157
Sub-Millisecond Measurements of Thermal Conductivity and Thermal Diffusivity Using Micrometer-Sized Hot Strips <i>Mattias K. Gustavsson, Johan S. Gustavsson, Yi Ma, Åsa Haglund, Daniel Cederkrantz, and Silas E. Gustafsson</i>	161
