

Mission

The Indiana Council for Economic Education (ICEE), a center in the Department of Agricultural Economics, was founded in 1954 with a mission to prepare students to become active citizens and productive members of our economy by providing them with the ability to make sound economic decisions.

ICEE is part of a state and national network of university centers for economic education. We help K-12 teachers and youth educators teach economics and personal finance by providing **engaging workshops** and **resource materials** aligned to academic standards.
