A Database for Progressive Technology Research

www.igi-global.com

Publishing Academic Excellence
at the Pace of Technology Since 1988

InfoSci®-Journals

The leading electronic collection of 145 full-text, peer-reviewed journals that focus on specialized topics in over 200 disciplines relating to the utilization and management of information technology as applied to business, education, healthcare, medicine, engineering, public administration, and social science.

Collection Features:

- Contains over 7,500 full-text articles available in PDF
- Includes more than 225,000 reference citations for further research
- Updated continuously as new IGI Global journal issues go to press
- Journals are indexed in highly influential indices including SciVerse SCOPUS, Thomson Reuters, ACM Digital Library, and Compendex
- Electronic versions of all documents available before print release
- Complimentary, downloadable MARC records
- Offers institutions unlimited simultaneous access and liberal DRM
- Priced at a fraction of the combined print value
- All content digitally preserved with the CLOCKSS Archive

Platform Features:

- Advanced XML-powered, full-text search engine with increased search speed and ranked results
- Multi-lingual user interface
- The ability to search by content type and product type
- The ability to sort by relevance, title, and copyright year
- In addition to RefWorks and EasyBib citation export, this premier platform also offers ALA-, MLA-, and Chicago-style formatting
- COUNTER compliant reports and statistics
- Persistent URLs
- Offers liberal DRM and no maintenance fees with perpetual purchase
- Supports SRU industry interoperability standards

YBP LIBRARY SERVICES

BUILDING COLLECTIONS THROUGH PROFILED CONTENT ACQUISITION

In the continually evolving world of information dissemination, YBP is uniquely positioned to meet today's library, consortia and patron demands. Through partnerships with leading research publishers and content aggregators, YBP offers the most extensive choice of acquisition, collection development and technical services.

Experience. Innovation. Partnership.

COLLECTION MANAGEMENT IS A BIG JOB.

sustainablecollections.com

SUSTAINABLE COLLECTION SERVICES (SCS) provides tools and services to manage the drawdown of low-use print book collections. Our custom reports combine local and external data, including WorldCat® holdings, to support informed and efficient decision-making. SCS enables each library to define rules that protect essential titles, while assuring that withdrawn content remains accessible to users. SCS turns a big weeding project into a manageable, cost-effective way to reclaim valuable library space.

Contact us to learn how we can support your weeding, storage, or shared print project.

Palgrave Macmillan announces a new imprint: **Palgrave Pivot**

Launching globally in Autumn 2012 and publishing across the Humanities and Social Sciences, **Palgrave Pivot** liberates scholarship from the straitjacket of traditional formats and business models. It offers authors the flexibility of publishing at lengths between the journal article and the conventional monograph. The new imprint will be available as digital collections for libraries, including via Palgrave Connect, individual ebooks for personal use, and as digitally-produced print editions. **Palgrave Pivot** will emphasize speed of delivery as well as innovation. The imprint undertakes to publish within 3 months of acceptance after full peer review.

"As scholarly publishing evolves in the digital world, Palgrave Pivot allows us to deliver quality new research rapidly. Palgrave Pivot is a market-changing initiative for the Humanities and Social Sciences and presents our communities with an alternative publishing model. We are proud to be at the forefront of development in the digital space."

Samantha Burrige, Executive Director at Palgrave Macmillan

"This is a bold innovation. Whereas publishing these days is too often belatedly reactive rather than proactive, Palgrave Macmillan has created an exciting new form to occupy the middle ground between a journal article and a monograph that will have significant impact on future work in the Humanities and Social Sciences."

Eric Rasmussen, Chair, Department of English, University of Nevada

"Insight in context: That's the promise of this new format",
Garett Jones, Department of Economics, George Mason University

"Palgrave Pivot meets a need for timely research in the digital world. The humanities and social sciences have been left behind in the immediacy of published research and Palgrave Pivot should be a great innovation to meet the needs of 21st century students and researchers in these fields. As we know, 'speed' and 'innovation' are key in the current world of scholarly research."

Jane Fitzpatrick, Acquisitions Librarian, CUNY Graduate Center

Biologically-Inspired Computing for the Arts: Scientific Data through Graphics

Anna Ursyn, University of Northern Colorado, USA

This publication comprises a collection of authors' individual approaches to the relationship between nature, science, and art created with the use of computers. Themes discussed in the book relate to the use of visual language in communication about biologically-inspired scientific data, visual literacy in science, and the application of a practitioner's approach. This comprehensive reference will assist programmers, scientists, engineers, and computer science students in creating and effectively communicating their projects using science-related knowledge.

Two Influential Journals from the Publisher of **Science**

Science
**Translational
Medicine**

Science Translational Medicine publishes papers that identify and fill the scientific knowledge gaps at the junction of basic research and medical application in order to accelerate the translation of scientific knowledge into new ways of preventing, diagnosing, and treating human disease. The journal follows the same high publishing standards of *Science*.

ScienceTranslationalMedicine.org

Science Signaling

Science Signaling publishes research and commentary pertaining to cell biology. Papers selected provide improved understanding of the effects of cell chemistry on biological systems and advance new biological signal transduction concepts. *Science Signaling* ranks among the top 25 percent of all journals publishing Cell Biology research.

Continuations and Standing Orders

Preface

Continuations and standing orders represent a frustrating and time-consuming area of book acquisitions. Efficient management of continuations requires a staff knowledgeable in all aspects of standing order procedures, with prompt and accurate service being essential.

Midwest Library Service has been providing continuation and standing order programs to libraries for over three decades with the same commitment to high quality as our firm order service: prompt delivery, accurate invoicing, immediate reporting, convenient communications, and personal Library Service Representatives. Our reputation for excellence is well established and we invite you to place your continuations list with us.

Scope

Our Continuation & Standing Order Service encompasses most series and continuations from U.S. publishers. Our services do **not** include supplying magazines, journals, or loose-leaf updating services.

Procedure

Our Continuation & Standing Order Service incorporates both automated systems and personal surveillance. Instead of relying on the filing and ordering systems of the publishers, we place orders for specific volumes as books are due to be published. If the next item in a series is not received when scheduled, we initiate a new order for the same item. This procedure helps avoid potentially missed volumes and eliminates any dependence upon the publishers' fulfillment systems. If in-house information is not available on future volumes to be published, we call the publisher for future projections and publication schedules. This information is then used to update our new title records.

Advantages

1. Because of our method of ordering specific volumes, we are in regular communication with the publishers.
2. Our status reports are prompt and accurate and should eliminate library claims.
3. Specific claims from an individual library resulting in an updated status report will generate new status reports to all libraries ordering the same series.
4. We do not drop ship.

Quality service depends on good communications between the library and the jobber. Your personal Library Service Representative and our convenient communications provide easy access to us regarding your continuation orders. We invite you to try our service by sending us your next list of standing order titles.
