Archaeometry (2015)

Indiana Drones: UAV/UAS in Archaeology

- Several price points
 - ✓ ~\$500 = home-made UAV
 - ✓ \$1000 = 3DR Solo (+ a la cart accessories)
 - ✓ \$1300 = DJI Phantom 3 Pro
 - ✓ \$3000 = DJI Inspire
 - ✓ \$40,000 = Trimble UX5

Indiana Drones: UAV/UAS in Archaeology

- Common applications

- ✓ hi-res aerial photography of excavations (stills, video)
- ✓ site documentation and modeling
 - record hard-to-access sites (e.g., rock art)
 - surface site cataloging
 - remote sensing: LiDAR, thermal imaging, etc.
 - orthomosaics, 3D mapping of sites and landscapes
 - excavation units “structure-from-motion (SfM)”
 - DEM, contour map generation
 - morphometric, volumetric analysis
- ✓ site monitoring (e.g., looting, construction)
- ✓ outreach, education

Indiana Drones: UAV/UAS in Archaeology

- Common applications
 - ✓ field selfies

Analytical applications of drones

- Photogrammetry

- analysis using geospatial modeling and visualization of landscapes

- terrestrial: digital photos/laser scanning
- aerial: balloons/kite images
 - ✓ drones

- Software:

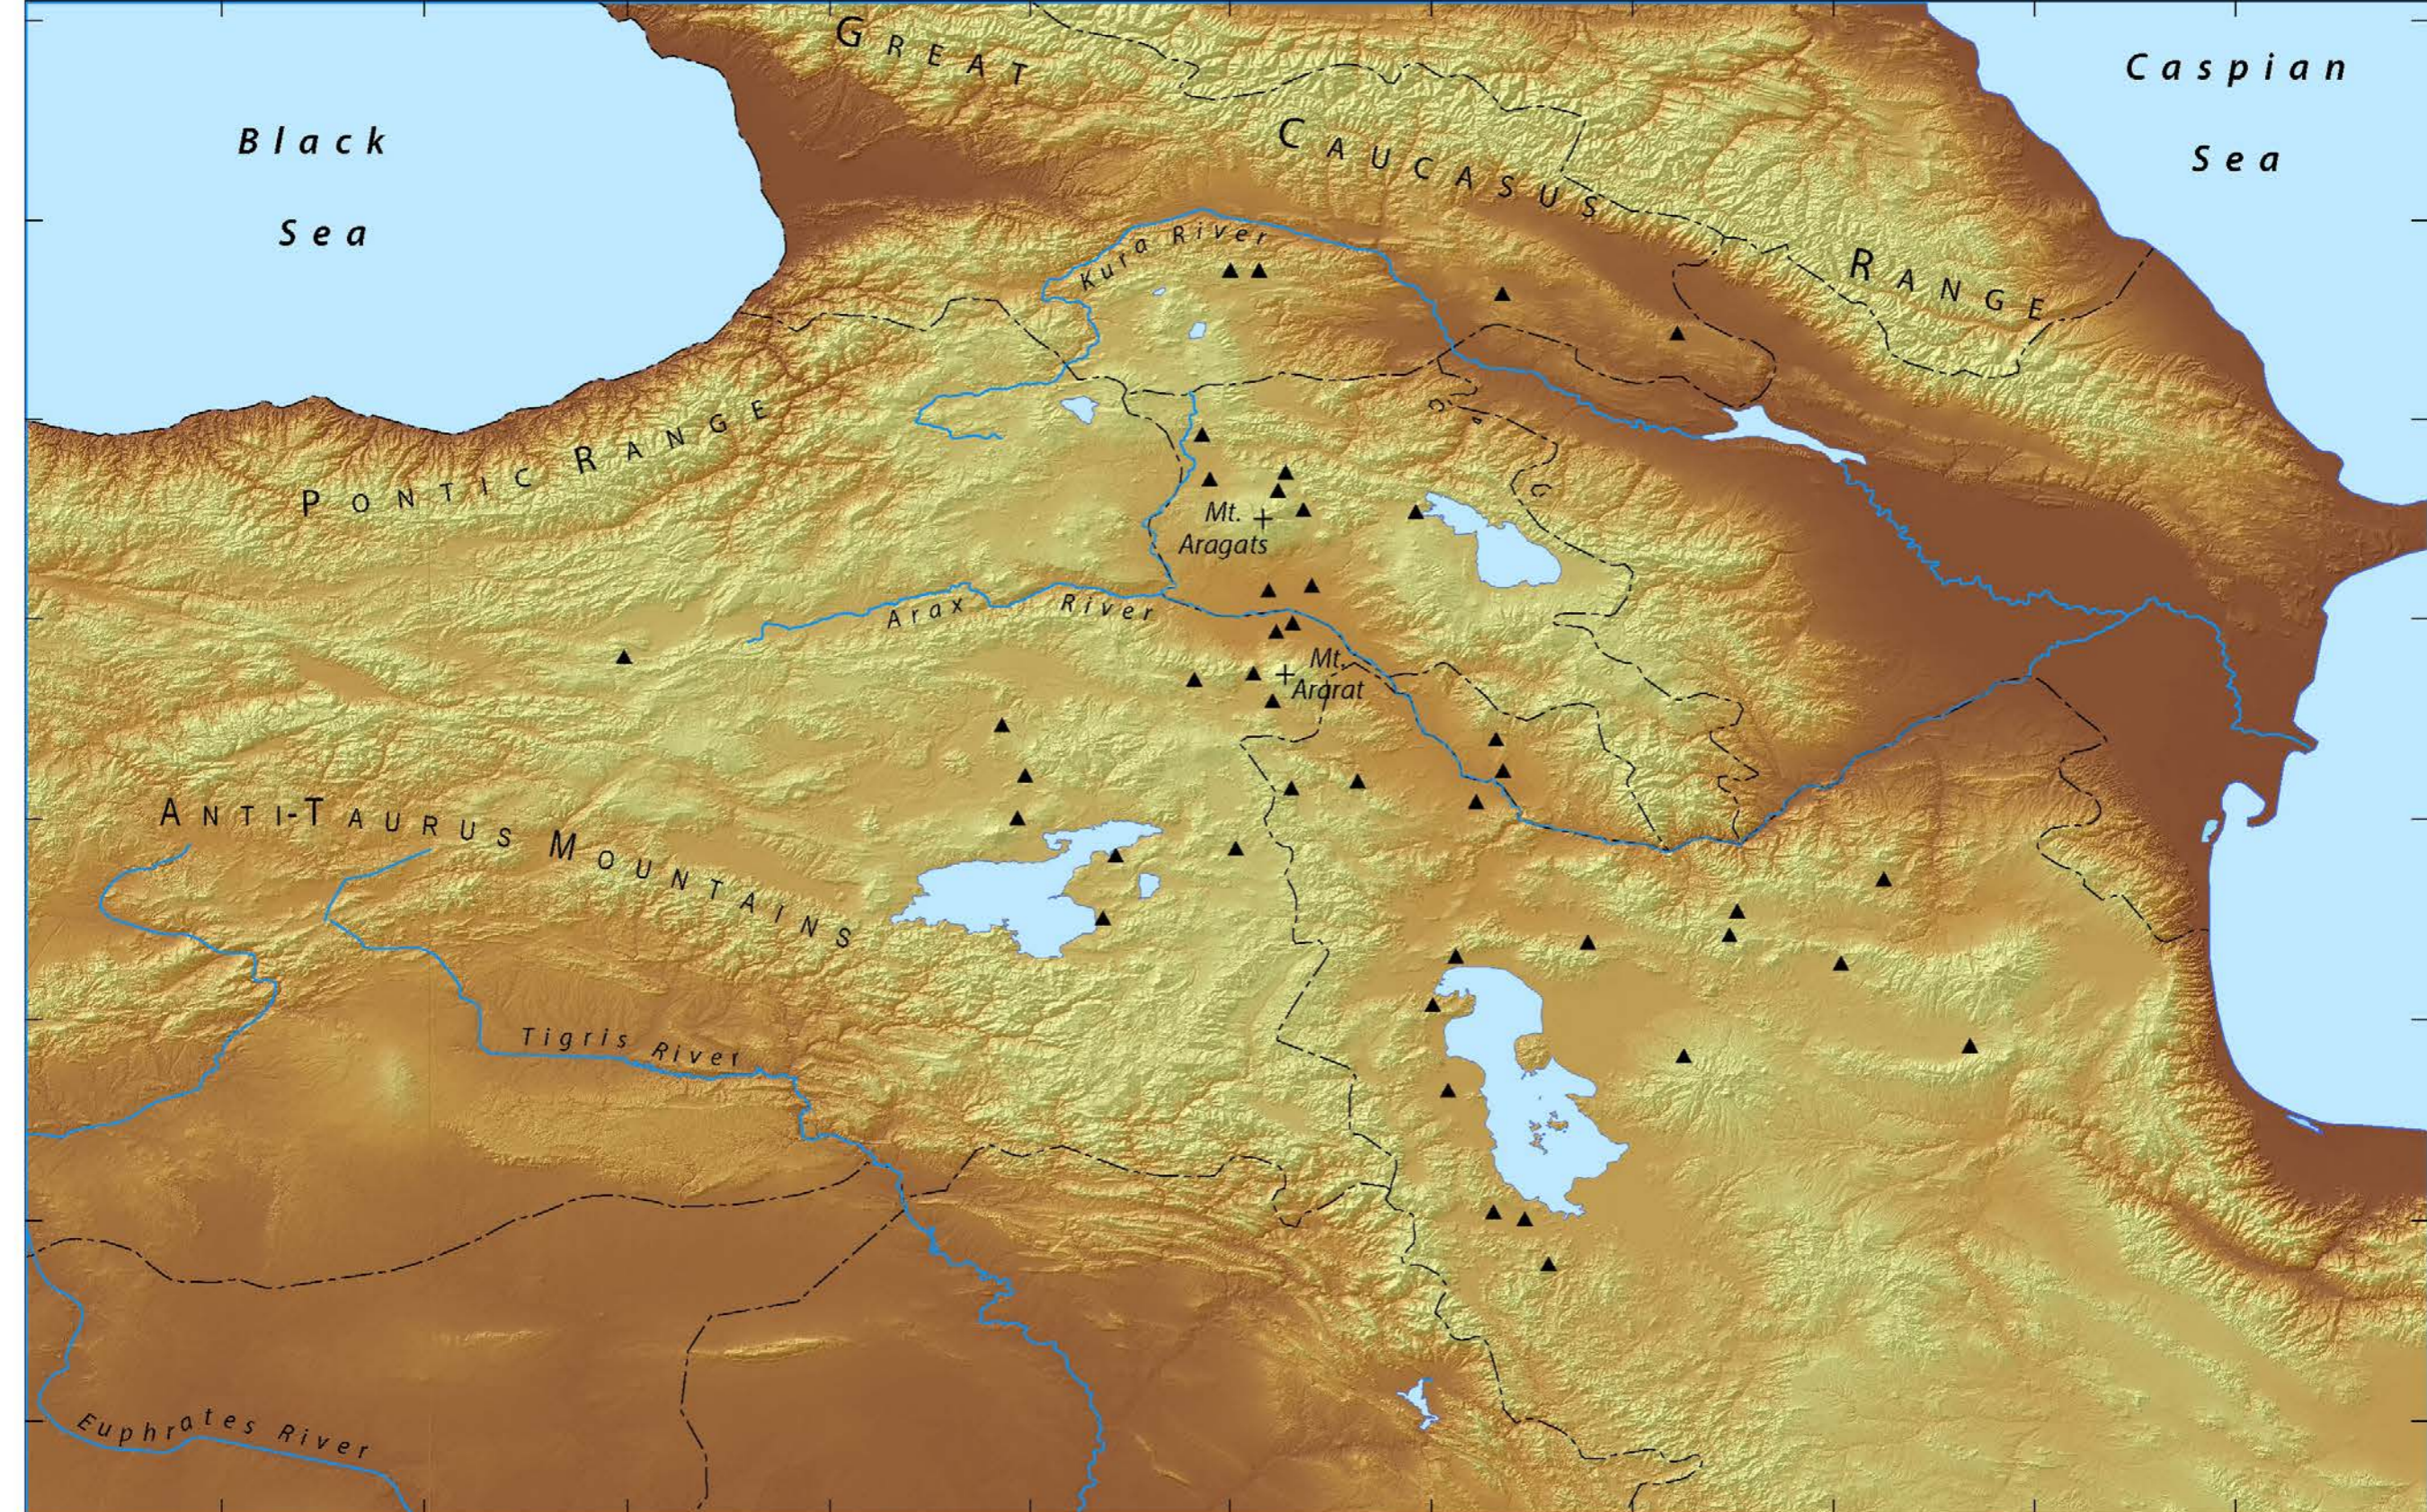

- ✓ AutoDesk 123D Catch (Free)

- ✓ PhotoModeler (\$1145)

- ✓ ERDAS Imagine LPS

- ✓ Agisoft PhotoScan Pro (\$550 edu.; \$3500 retail)

- ✓ Pix4Dmapper Pro (\$1990 edu.; \$8700 retail)

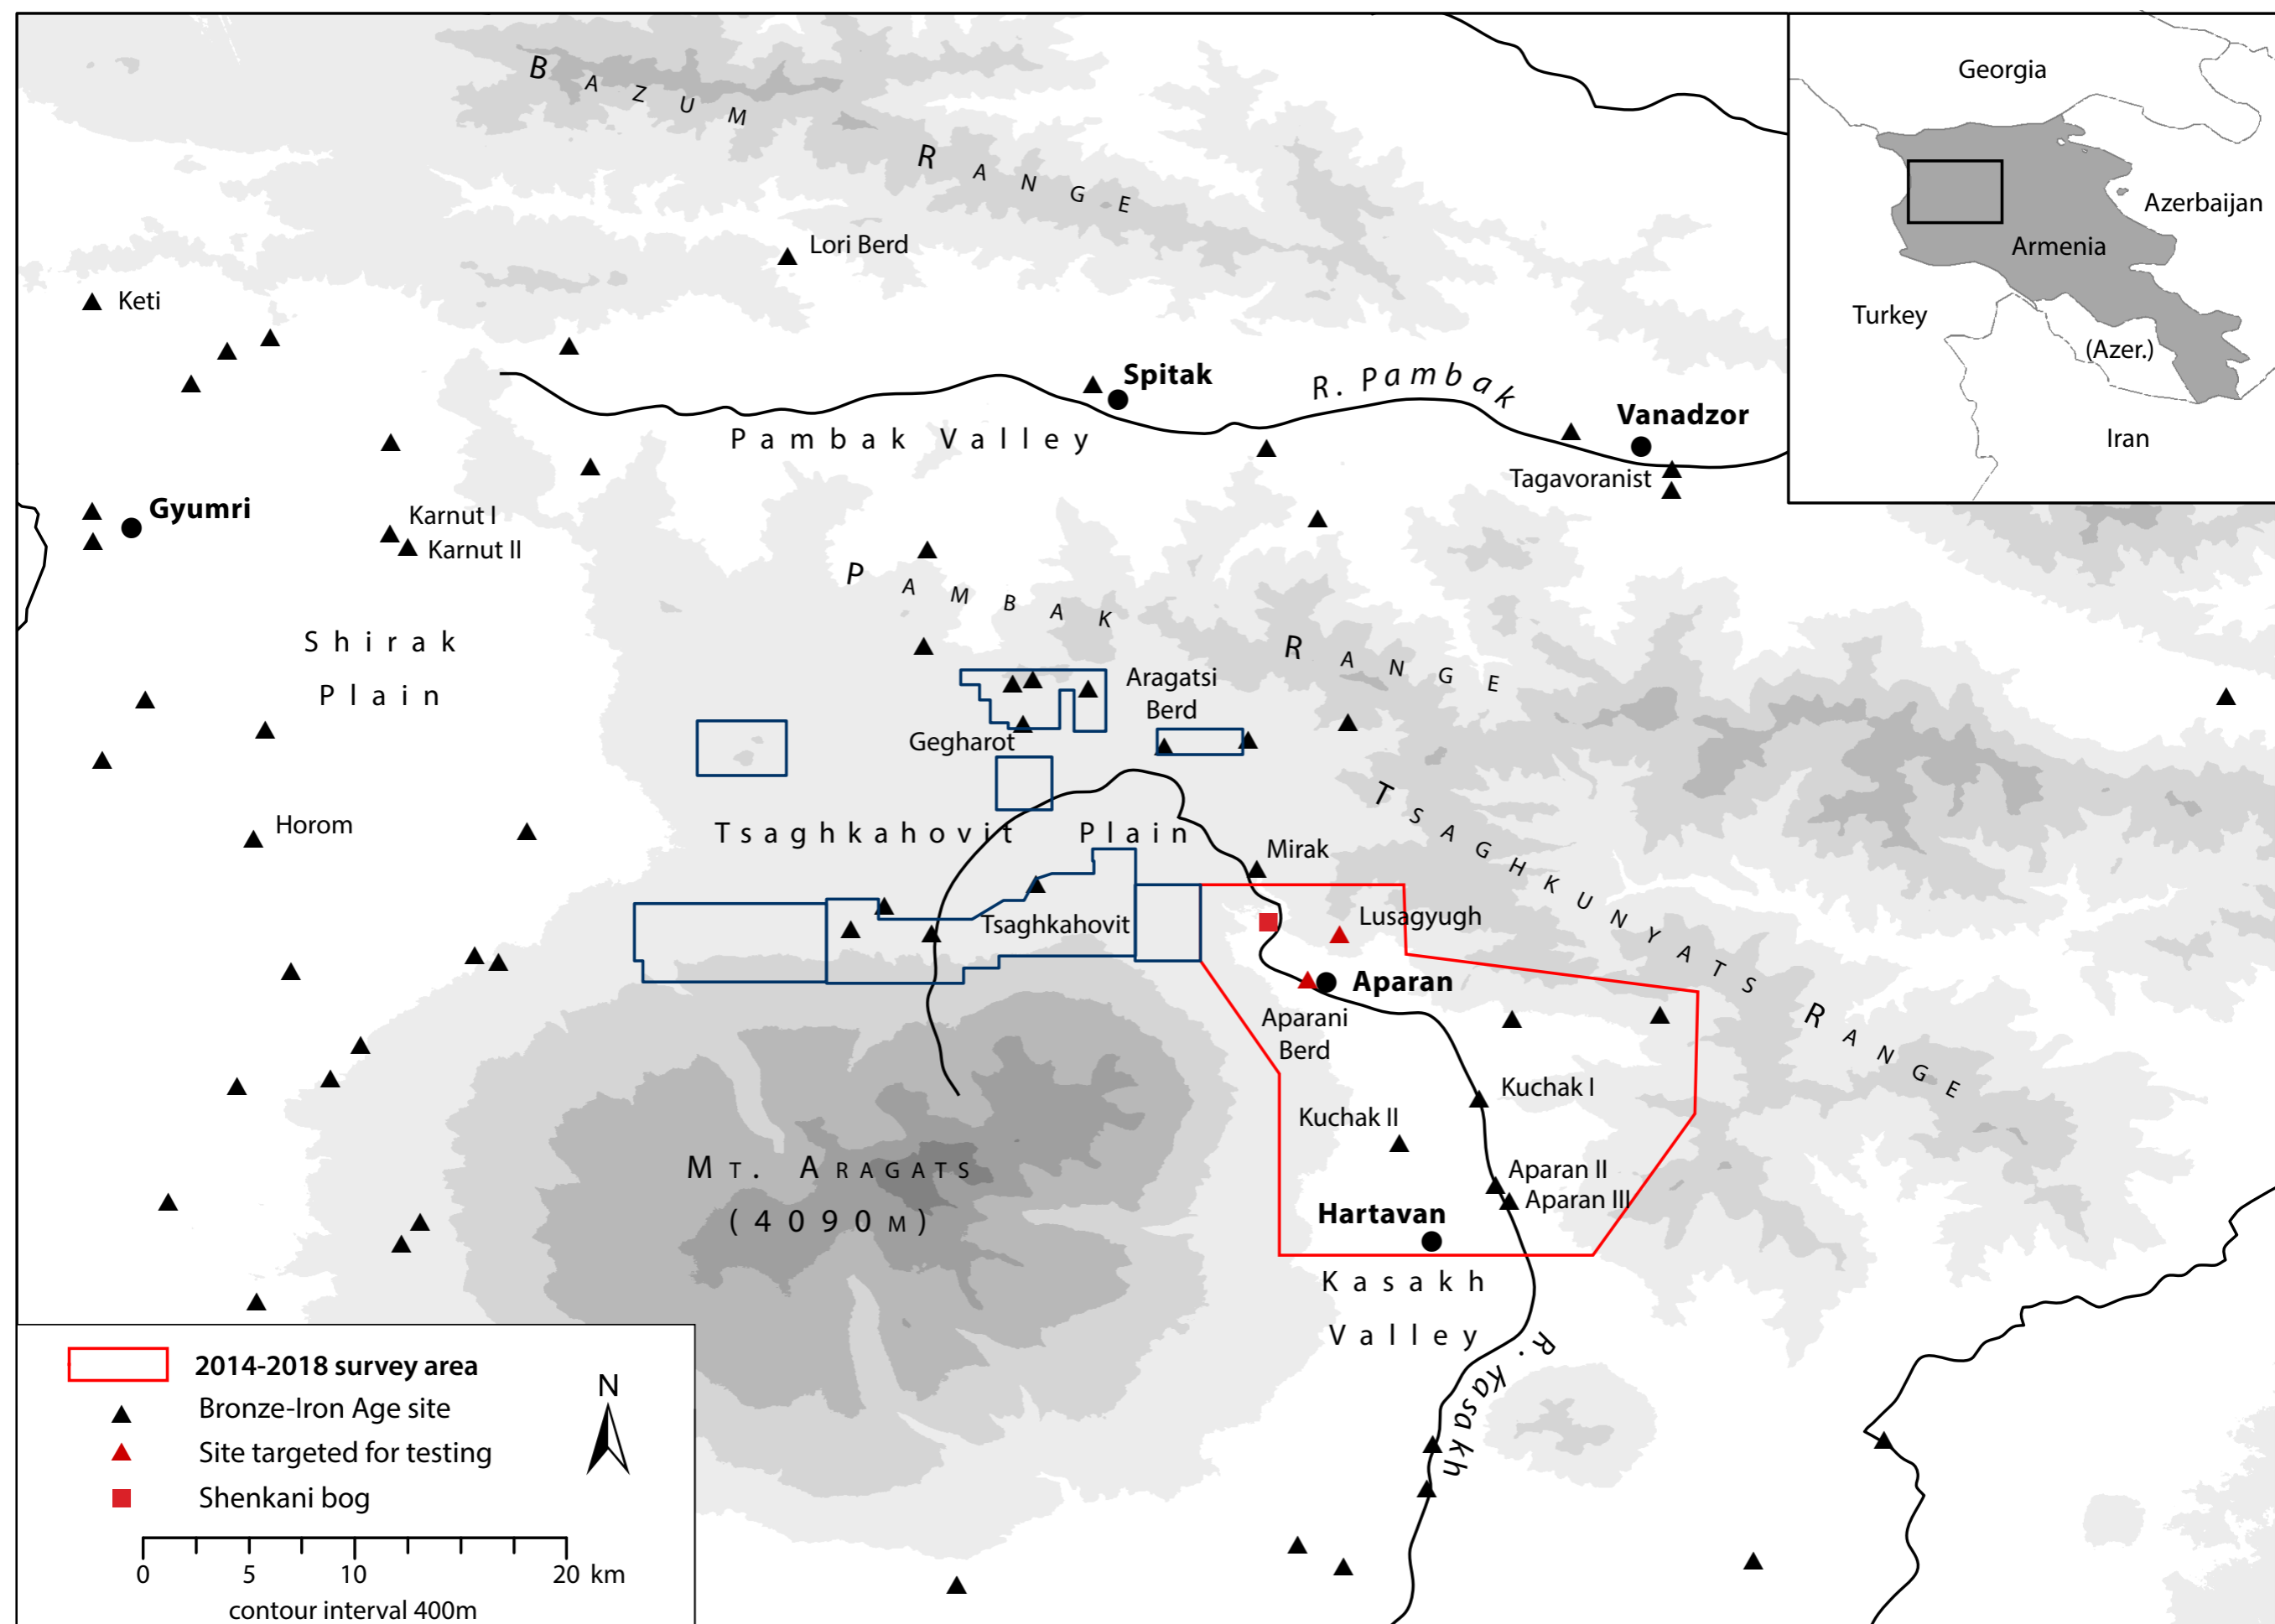

Extent of LBA/Iron 1 Forts in Armenian Highland (1500-800 BC)

DEM data: SRTM 90
 Modern borders: ESRI World Data 2004

1:5,000,000

Indiana Drones: UAV/UAS in Archaeology

Indiana Drones: UAV/UAS in Archaeology

DJI Phantom 3 Pro

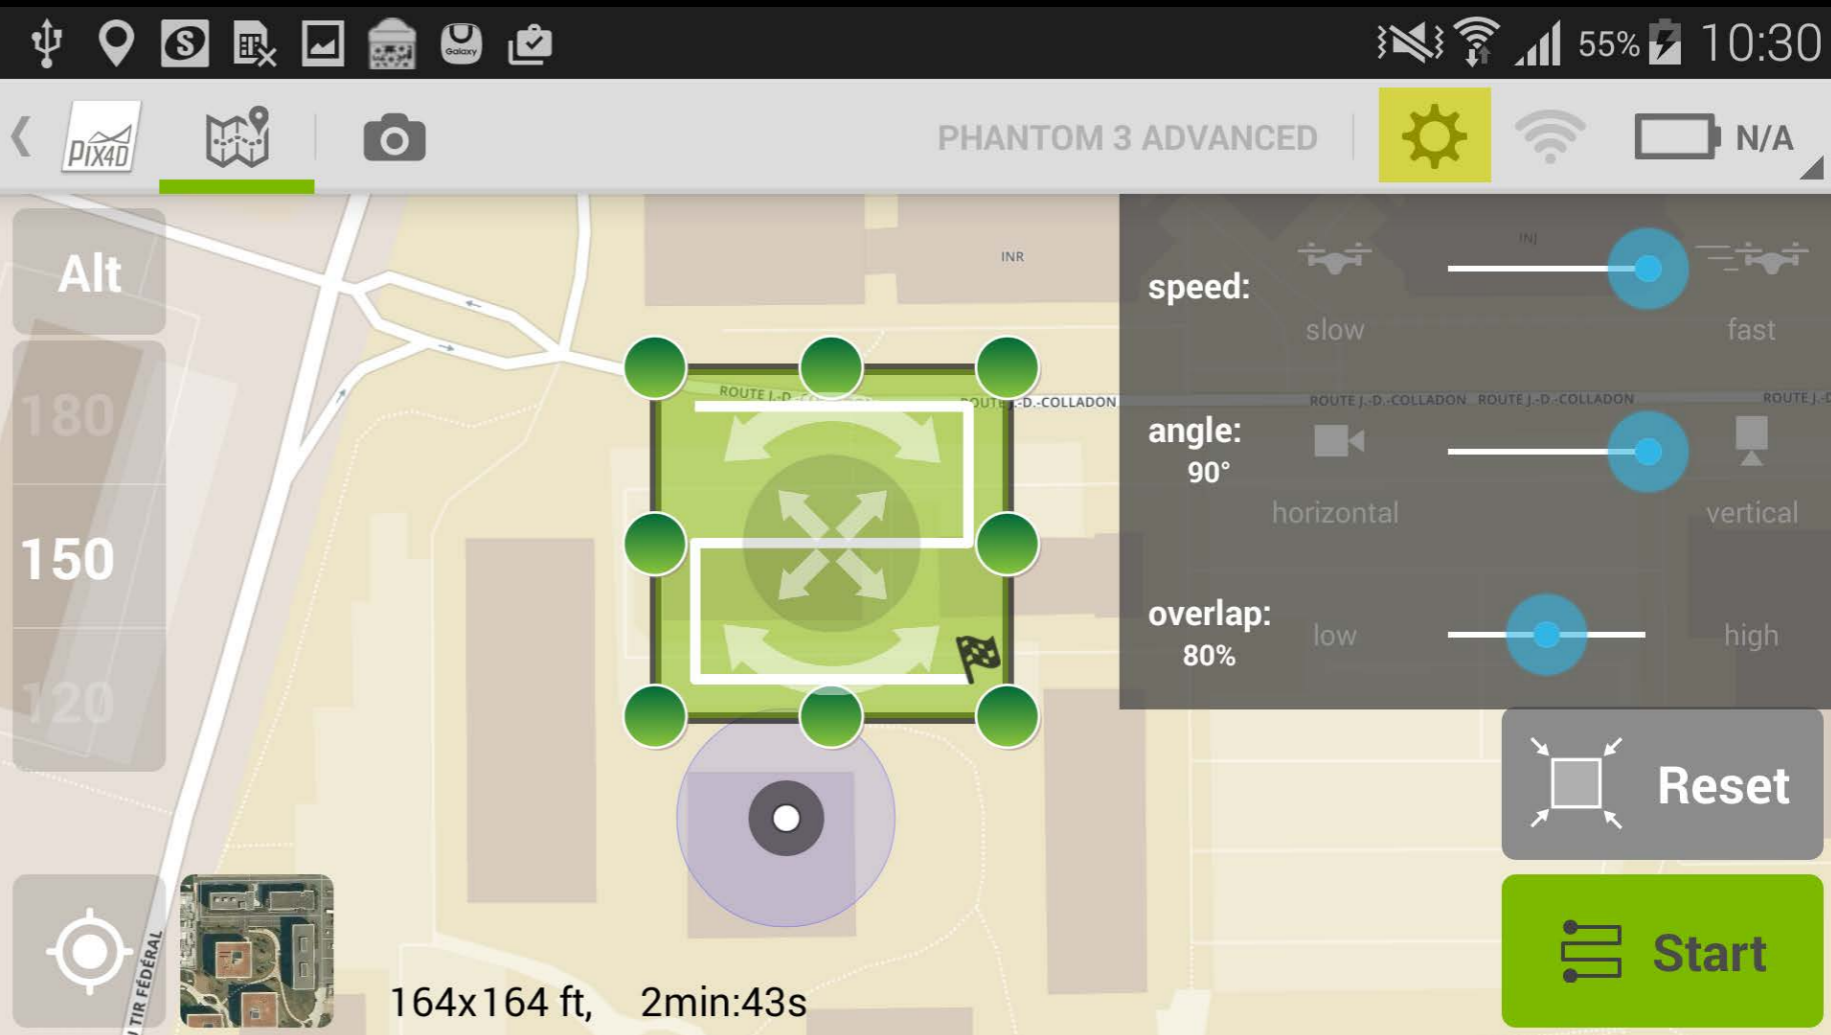

- iOS and Android compatible
- 12 megapixel camera
- 4K video
- 5 km distance
- 20 min battery

DJI Go app on iPhone

DJI Phantom 3 Pro

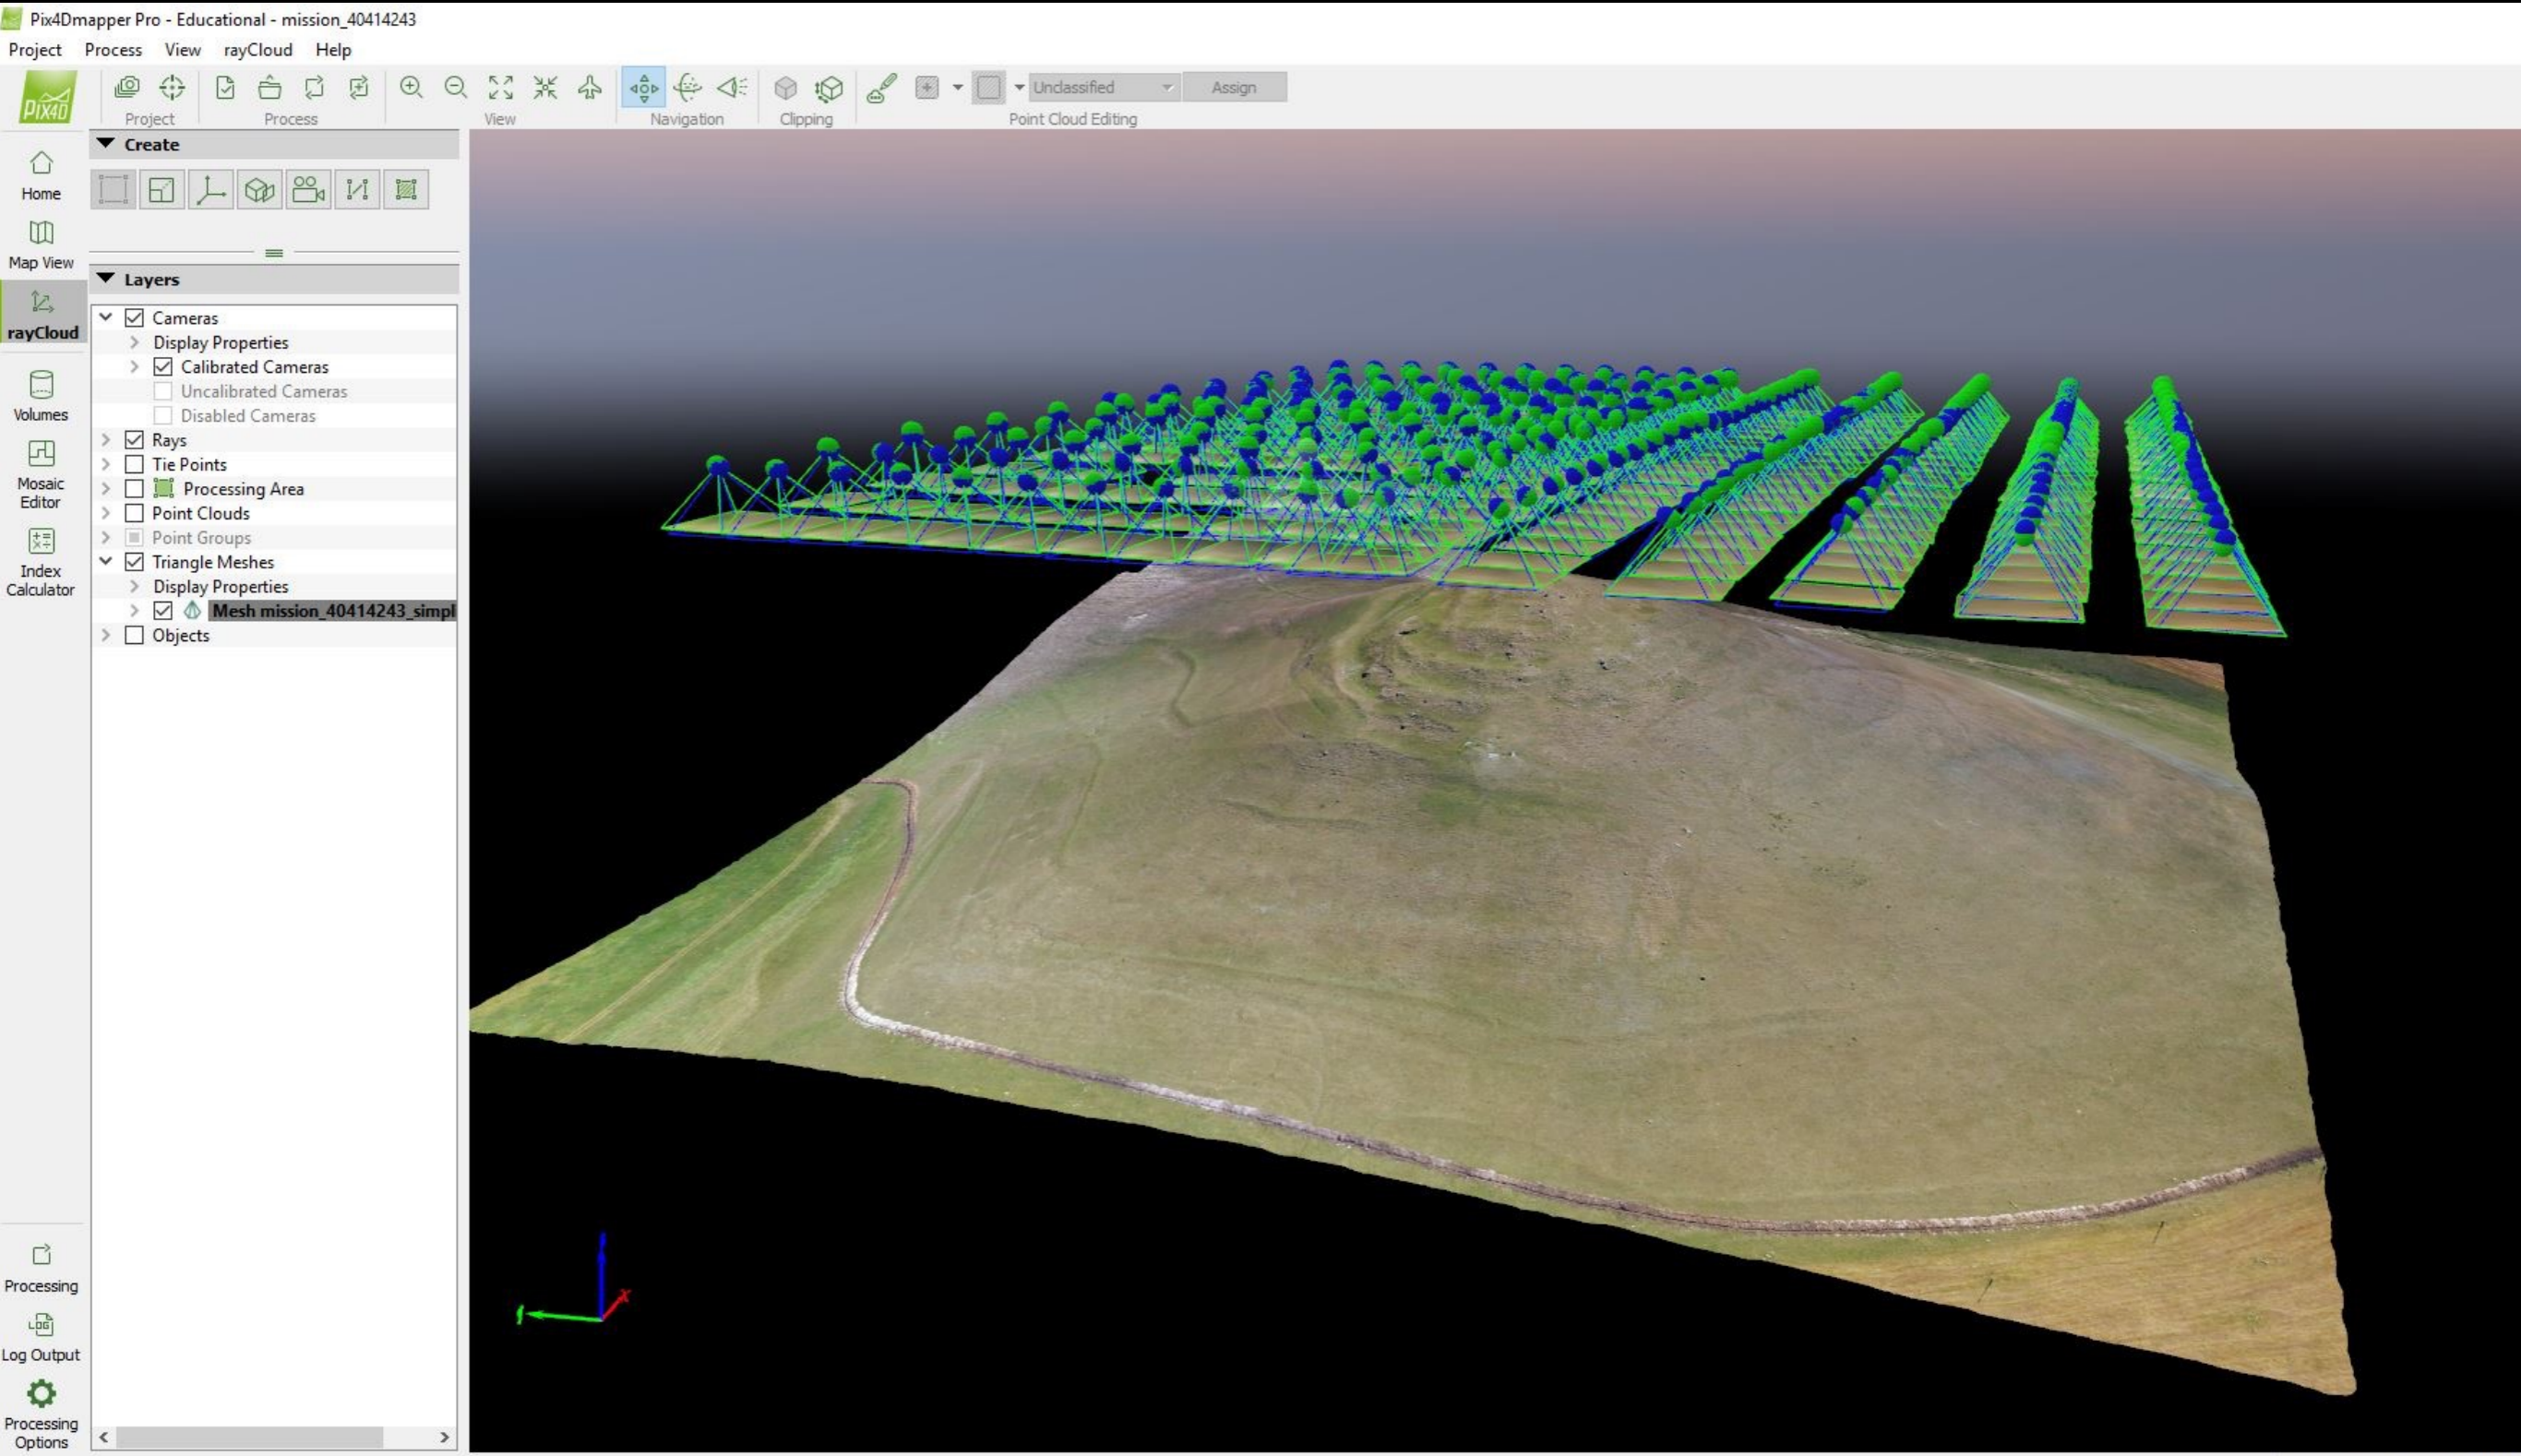

- built in GPS
 - hovers w/in 1m
 - go-home feature
- waypoint programming or pre-program mission grid

Pix4D Capture app

Analytical applications of drones

- Photogrammetry workflow
 - Pix4Dmapper Pro

Analytical applications of drones

- **Photogrammetry**

- Kuchak fortress, Armenia
 - 480 images
- Hi-res orthomosaic images
 - excavation planning
 - morphometric analysis

Orthomosaic
(Pix4Dmapper Pro)

Analytical applications of drones

- Photogrammetry
 - Aparani Berd fortress, Armenia
 - 1000 images

3D model (Pix4Dmapper Pro)

Drones in archaeology: Site monitoring and mitigation

- topsoil mine encroaching on
Bronze Age cemetery in rural
Armenia

Drones in archaeology: Site monitoring and mitigation

- 13th century medieval Armenian church with eroding cemetery from prior excavations

Drones in archaeology: Outreach, education, story telling

Drones in archaeology: Outreach, education, story telling
