

Earth Resources Laboratory Annual Report 2013
Table of Contents

Session 1: Fluid /Reservoirs Interactions: Joint Flow-Seismic Inversion

Sensitivity of time lapse seismic data to the compliance of hydraulic fractures – Xinding Fang, Xuefeng Shang, and Michael Fehler *

Data inversion in coupled subsurface flow and geomechanics models – Marco A. Iglesias²² and Dennis McLaughlin

Joint flow–seismic inversion for characterizing fractured reservoirs: theoretical approach and numerical modeling – Peter K. Kang, Yingcai Zheng, Xinding Fang, Rafal Wojcik, Dennis McLaughlin, Stephen Brown, Michael C. Fehler, Daniel R. Burns, and Ruben Juanes *

Efficient characterization of uncertain model parameters with a reduced-order ensemble Kalman filter – Binghuai Lin and Dennis McLaughlin

Real-time ensemble control with reduced-order modeling – Binghuai Lin and Dennis McLaughlin

Estimating the fracture density of small-scale vertical fractures when large-scale vertical fractures are present – Yuwei Liu¹², Mike Fehler, Xinding Fang, and Cai Liu¹²

*

Precise inversion of logged slownesses for elastic parameters in a gas shale formation – Douglas E. Miller, Steve A. Horne³, and John Walsh¹⁶

Seismic characterization of fractured reservoirs by focusing Gaussian beams – Yingcai Zheng, Xinding Fang, Michael C. Fehler, and Daniel R. Burns

Seismic characterization of reservoirs with variable fracture spacing by double focusing Gaussian beams – Yingcai Zheng, Xinding Fang, and Michael C. Fehler *

Session 2: Fluid /Reservoirs Interactions: Change Dynamics

Effect of borehole stress concentration on compressional wave velocity measurements – Xinding Fang, Michael Fehler, and Arthur Cheng⁹

*

Experimental measurements of the streaming potential and seismoelectric conversion in Berea sandstone – Zhenya Zhu and M. Nafi Toksöz

Experimental studies of the acoustic wave field near a borehole – Zhenya Zhu, Xien Liu⁴, Chen Gu, and M. Nafi Toksöz *

Session 3: New Student and Post Doc Introductions

Student presentations – Alison Malcolm *Students:* Junlun Li, Hui Huang, Sudish Bakku, Ruel Jerry, Clarion Hess, Kai Pan, Yuval Tal, Jingshuang Li, Yuwei Liu, Jing Liu, Haoyue Wang, Lucas Willemsen, *Post Docs:* Dylan Mikesell, Bruce Jones, Elizabeth Day, and Bérénice Froment

Session 4: Geomechanics and Microseismic: Methodology

Analysis of location uncertainty for a microearthquake cluster: A case study – Gabriela Melo, Alison Malcolm, Oleg Poliannikov, and Michael Fehler *

Joint microseismic event location with uncertain velocity – Oleg V. Poliannikov, Michael Prange¹⁷, Alison E. Malcolm, and Hugues Djikpesse¹⁷ *

A unified Bayesian framework for relative microseismic location – Oleg V. Poliannikov, Michael Prange¹⁷, Alison Malcolm, and Hugues Djikpesse¹⁷

Converted phase elastic migration velocity analysis – Andrey H. Shabelansky, Alison Malcolm, Mike Fehler, Xuefeng Shang, and William Rodi *

Full-waveform based microseismic event detection and signal enhancement: The subsurface approach – Fuxian Song, Norm Warpinski¹⁴, M. Nafi Toksöz, and Huseyin Kuleli

Full-waveform based microseismic source mechanism studies in the Barnett Shale: Linking microseismicity to reservoir geomechanics – Fuxian Song, Norm Warpinski¹⁴ and M. Nafi Toksöz

An experimental study of the brittle-ductile transition of basalt at oceanic crust pressure and temperature conditions – Marie Violay^{8,11}, Benoit Gibert⁸, David Mainprice⁸, Brian Evans, Jean-Marie Dautria⁸, Pierre Azais⁸, and Philippe Pezard⁸

Session 5: Geomechanics and Microseismic: Geomechanics

No geologic evidence that seismicity causes fault leakage that would render large-scale carbon capture and storage unsuccessful – Ruben Juanes, Bradford H. Hager, and Howard J. Herzog

Compressive strength and elastic properties of a transversely isotropic calcareous mudstone – Douglas Miller, Richard Plumb¹⁵, and Gregory Boitnott¹³

Influence of stress, temperature, and strain on calcite twins constrained by deformation experiments – E. Rybacki⁵, B. Evans, C. Janssen⁵, R. Wirth⁵, and G. Dresen⁵

Session 6: Subsurface Heterogeneity: Modeling and Estimation

Numerical modeling of elastic wave scattering by near- surface heterogeneities – Abdulaziz AlMuhaidib and M. Nafi Toksöz *

High-dimensional wave atoms and compression of seismic datasets – Matti Leinonen¹, Russell J. Hewett, Xiangxiong Zhang, Lexing Ying¹⁹, and Laurent Demanet *

Simultaneous estimation of reflectivity and geologic texture: Least-squares migration with a hierarchical Bayesian model – S. Ahmad Zamanian, Jonathan Kane¹⁸, William Rodi, and Michael Fehler *

Time-stepping beyond CFL: a locally one-dimensional scheme for acoustic wave propagation – Leonardo Zepeda-Núñez, Russell J. Hewett, Minghua Michel Rao⁶, and Laurent Demanet *

Session 7: Subsurface Heterogeneity: Imaging and Methodologies

Registration-guided least-squares waveform inversion – Hyongsu Baek, Henri Calandra²⁰, and Laurent Demanet

The failure mode of correlation focusing for model velocity estimation – Hyongsu Baek, Henri Calandra²⁰, and Laurent Demanet *

3D Weak-dispersion reverse-time migration with a stereo modeling method – Jingshuang Li²¹, Mike Fehler, Dinghui Yang²¹, and Xueyuan Huang²¹ *

Using SVD for improved interferometric Green's function retrieval – Gabriela Melo, Alison Malcolm, Dylan Mikesell^{2,7}, and Kasper van Wijk⁷

Reverse time migration in the presence of known sharp interfaces – Alan Richardson and Alison E. Malcolm *

Efficient stochastic Hessian estimation for full waveform inversion – Lucas A. Willemsen, Alison E. Malcolm, and Russell J. Hewett *

Double-difference waveform inversion of 4D ocean bottom cable data: Application to Valhall, North Sea – Di Yang, Michael Fehler, Alison Malcolm, Faqi Liu¹⁰ and Scott Morton¹⁰ *

Using image warping for time-lapse image domain wavefield tomography – Di Yang, Alison Malcolm, and Mike Fehler *
