

Figure 1 shows the number of returns made by the reason recorded for the return (returns made to GP surgeries ■ and those to community pharmacies □). The right hand column shows the returns recorded for each category as a percentage of the total number of returns (n=114).

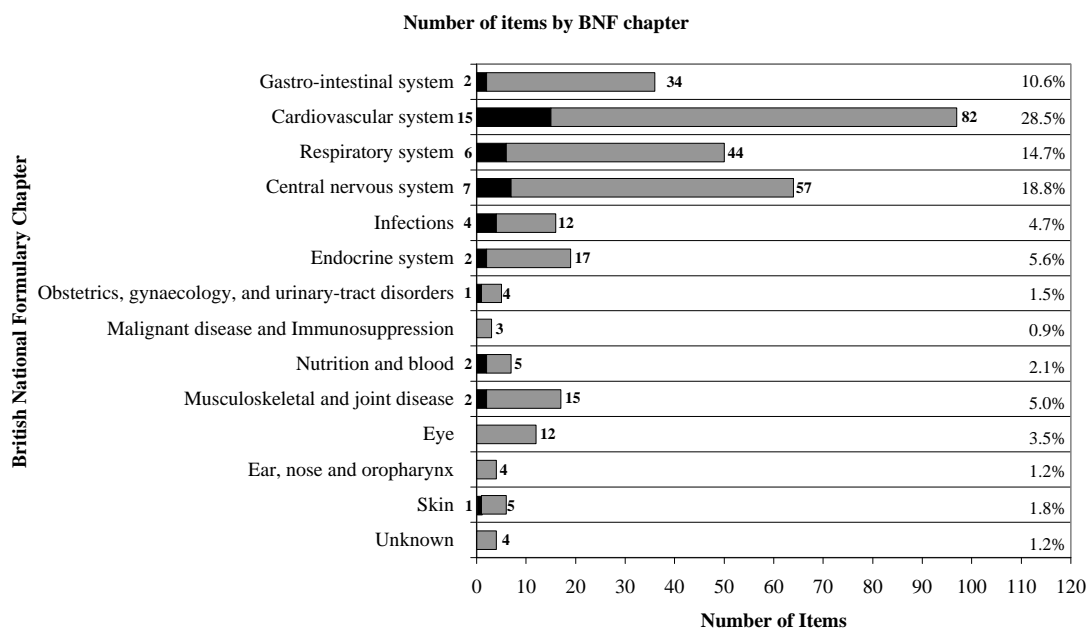

Figure 2 shows the number of items returned by the British National Formulary Chapter corresponding to the medicine (items returned to GP surgeries ■ and those to community pharmacies ■). The right hand column shows the items recorded for each chapter as a percentage of the total number of items (n=340).
