

# The Phase out of Coal Power Generation in Britain and Germany

A Comparative Analysis of Drivers and Barriers

# **Dr. Christopher Ball**

- Scientific Co-Worker within IEK-STE
- Economic Analysis of Energy Technologies
- PhD in Energy Policies and Environmental Entrepreneurship, University of Stirling, Scotland

# Mr. Paul Kunz (MBA)

- Scientific Co-Worker in Forschungszentrum Jülich (IEK-STE) and PhD-Candidate
- Energy-Scenario Development and Innovation-Studies
- Master of Business Administration (2016) in Energy- and Ressource Economics, TU-Bergakademie Freiberg

#### **Research Goals**

		national <b>grid</b>
	Future Energy Scenarios	
	(8 pc and excitizity transmission

- Contextual Factors: Complexity
- PESTEL Technique
- Drivers & Challenges

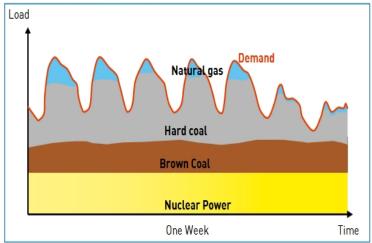

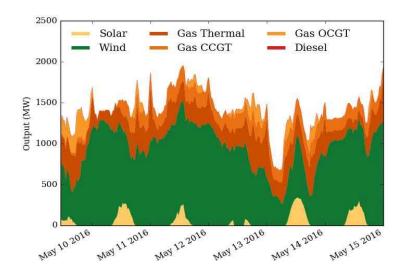

# **Decline Stage of Technology**

#### **New Power System**

The use of conventional power plants to meet overall demand in a power plant park without renewable energy sources

Centralised system with baseload power

More decentralised system, limited baseload, merit order

### **Insights beyond UK and Germany**

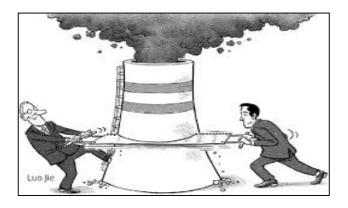

Other countries could draw lessons from the British and German cases

EU states in Eastern Europe still depend substantially on coal for their power supply As EU states, they are subject to climate targets

#### **Institutional Framework: UK**

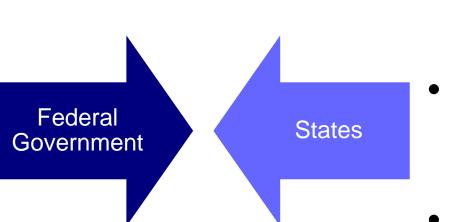

- Committe on Climate
  Change
- Energy UK support
- How to enforce, if plant operators unwilling to close?

#### **Institutional Framework: Germany**

Governmental
 Structure

 Institutional Shareholders

Compensation

#### **Economic & Technological Implications: UK**

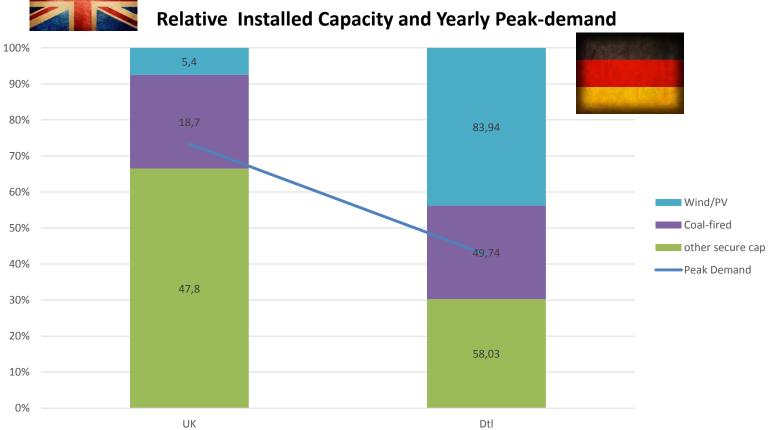

© Leah (2012)

Carbon Price Floor, Emissions Performance Standard, oil and natural gas focus

# **Economic & Technological Implications: UK**

# **Economic & Technological Implications: Germany**

Ending of subsidies for hard coal mining

CCS ruled out

## **Stakeholders and Environmental Interests: Both Countries**

- Environmental Pressure: mining, Paris Agreement
- Divestment
- Geopolitics

# **Stakeholders and Environmental Interests: Germany**

• "For me and the Board, the last year has been like a rollercoaster ride that has put our crisis management skills and nerves to the test (Peter Terium, RWE Chairman)

#### **Conclusions**

- Ageing coal infrastructure & economic instruments pushing phase out
- Robust and clear climate policy, but...
- More vulnerable security of supply and...
- Enforcement difficulties

- Strong security of supply
- Opposition to CCS and termination of subsidies, but...
- Challenge of decentralised government and...
- Greater social and distributional impacts of phase out
