

Table 1: Gender, age and medicines (including sizes, shapes of solid dosage forms) taken by patients in the Pill Glide study [*information missing; the size of capsules have been estimated; OD: once daily]

Figure 1: Flow chart of the Pill Glide study

Figure 2: Overall ‘medicine taking difficulty score’ for the behavioural and Pill Glide periods: (A) scores for each subjects and all dosage forms; (B): scores only for the solid dosage forms. [solid line if the score is lower for Pill Glide and dashed line if the score is higher]

Figure 3: Overall ‘medicines taking difficulty score’ average trendlines for the baseline behavioural approach and Pill Glide intervention periods grouped by dosage form type.
