

Evolution of Smart Buildings and Their Place in the Internet of Everything

Jeremy Towler
Senior Manager - Energy &
Smart Technologies - BSRIA
Worldwide Market Intelligence

ICEBO 2014 China
September 2014

BSRIA is.....?

ESL-IC-14-09-09

What?

**Member based
Association
Since 1955**

For whom?

**Owner/Operators
Specifiers
Manufacturers
Contractors**

How?

**Consultancy services
Test
Instruments
Publications
Training
Information
Research**

Why?

**To help industry
and clients be
more efficient
and effective**

Trends for Smart Buildings

Technologies are already Interacting...

ESL-TC-14-09-09

Smart Cities

Smart Devices / Appliances

Smart Buildings

Data Communications

Energy

Smart City

ESL-IC-14-09-09

Broadband connectivity, Knowledge workforce, Innovation, Digital inclusion...

Smart Building

Information and Communications Technology, Passive design, Energy & Water efficiency, On-site renewables, Controls & Lighting, Monitoring and Management...

Smart Grid

Bi-directional flows of energy, 2-way communications, remote control/automation of power, integrated distributed energy, energy storage...

Smart Grid

YESTERDAY: TRADITIONAL

- Centralised generation
- Monodirectional power flow
- Centralised and limited control
- Manual restoration of failures
- Fixed fares

TOMORROW: SMART

- Decentralised generation
- Bidirectional power flow (T&D)
- Decentralised and multilevel control (knots)
- Failure prevention and self-healing concept
- Variable fares

Source: Prysmian Group

Smart Buildings

Integration with the Smart Grid

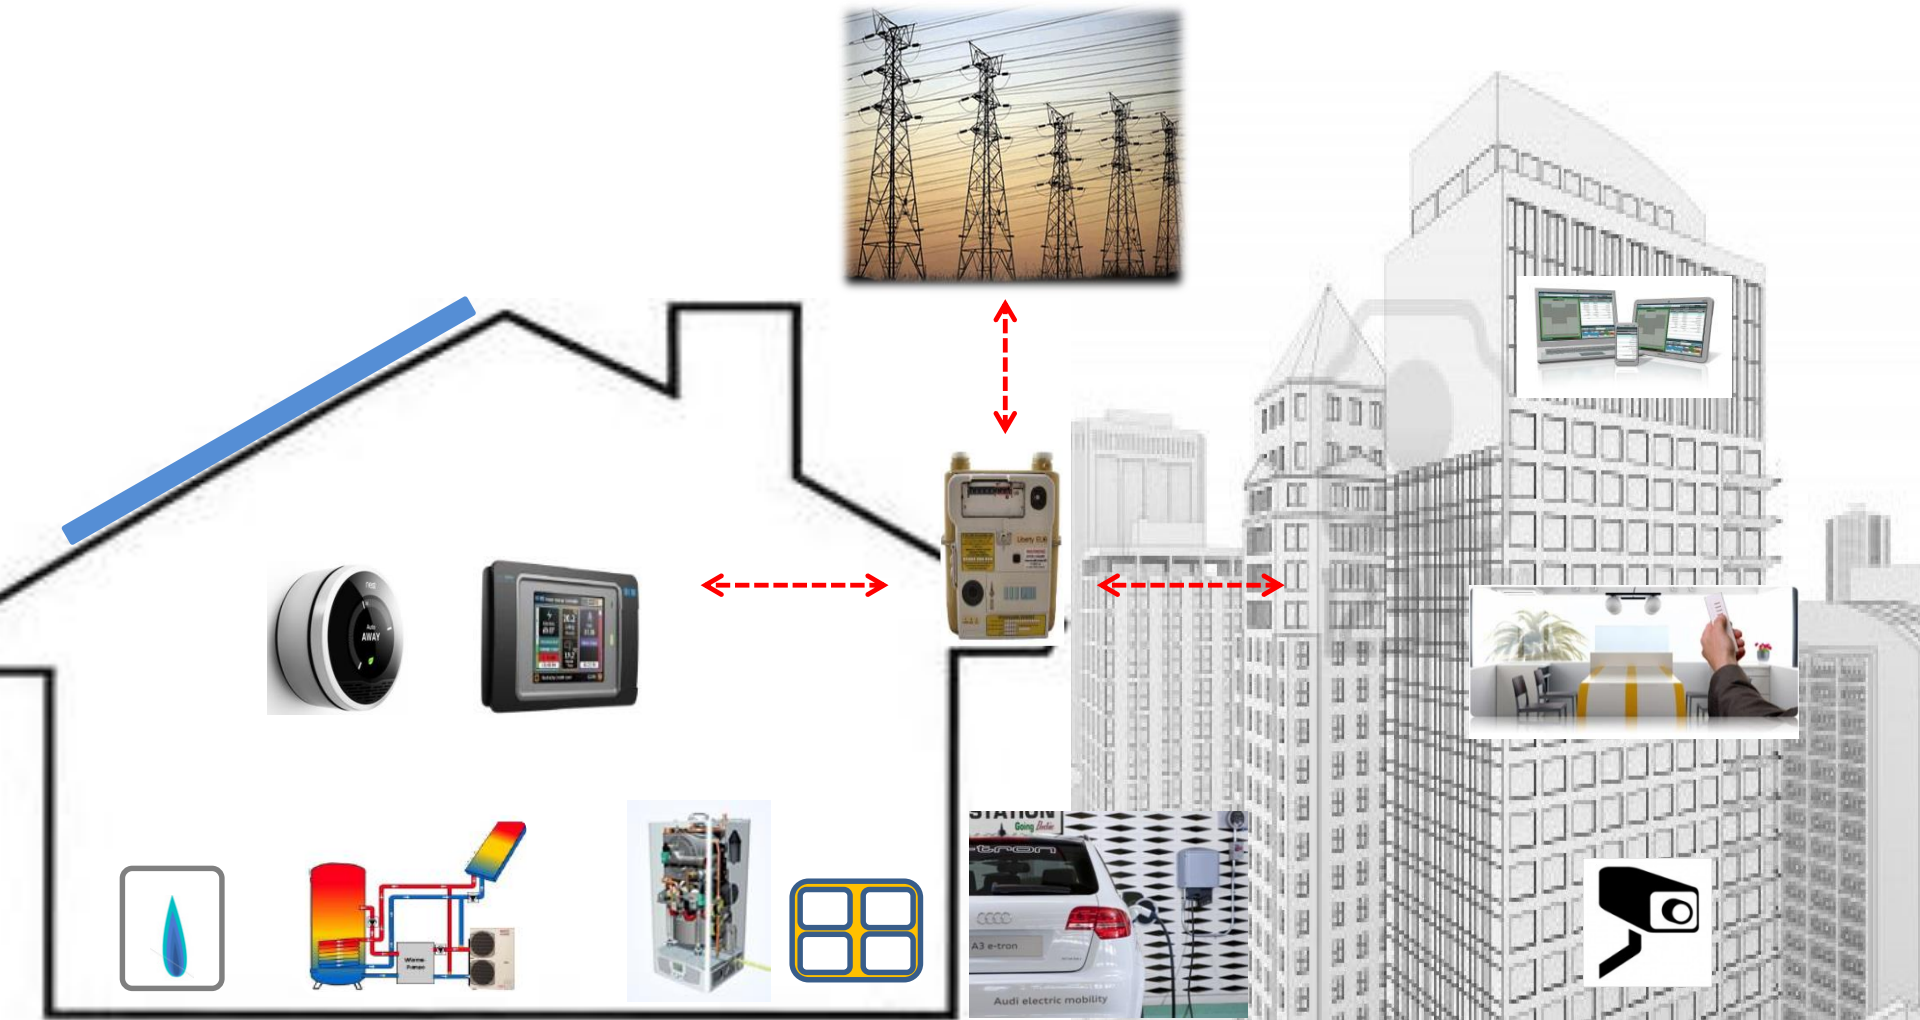

Connecting to Smart Cities

Smart Automation: Visualization - Interaction

ESL-IC-14-09-09

System Integration

The Challenge of Software and the Cloud

**Big Buildings
-Big Data**

**Advanced
Analytics**

**The Cloud: -
Universal Access**

Major opportunities for IT companies which combine these

Smart City Elements

ESL-IC-14-09-09

The Information Dimension

18 month payback
500 million data elements
10% energy savings
daily

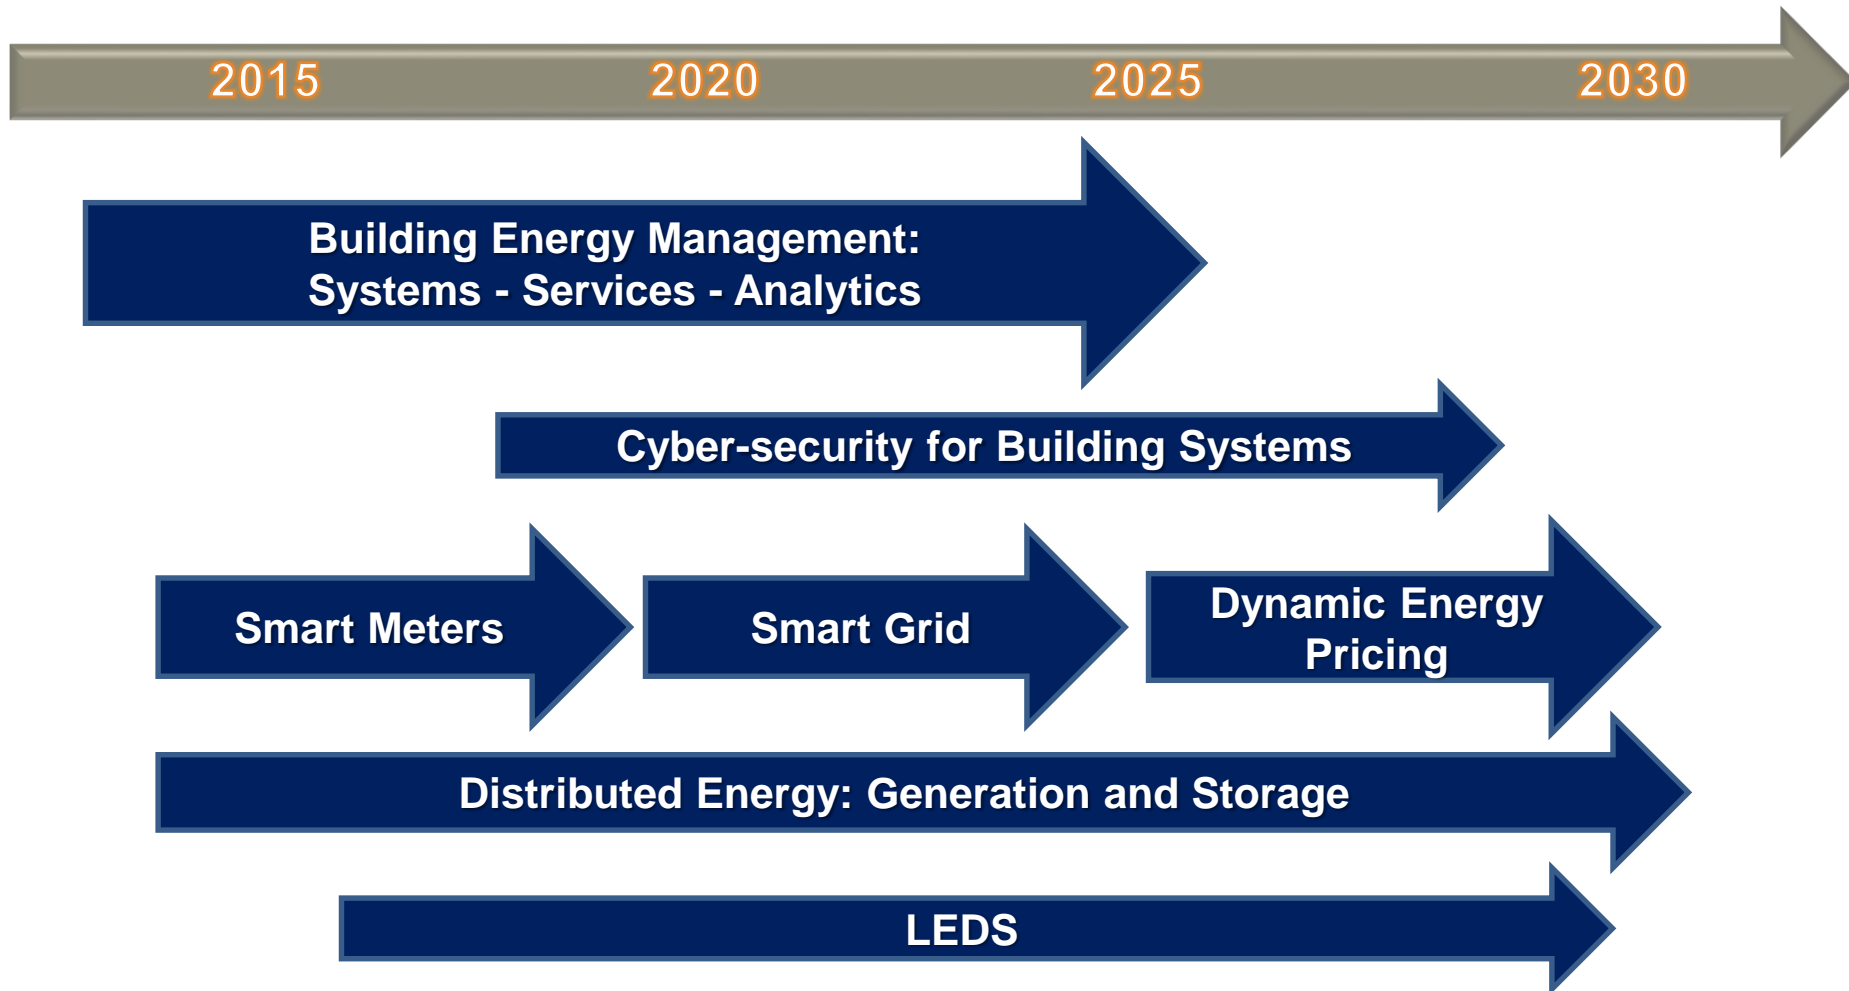

48% faults detected in <60 secs.

750 Air Handling
Units

125 buildings 4 million per building

58,000 employees

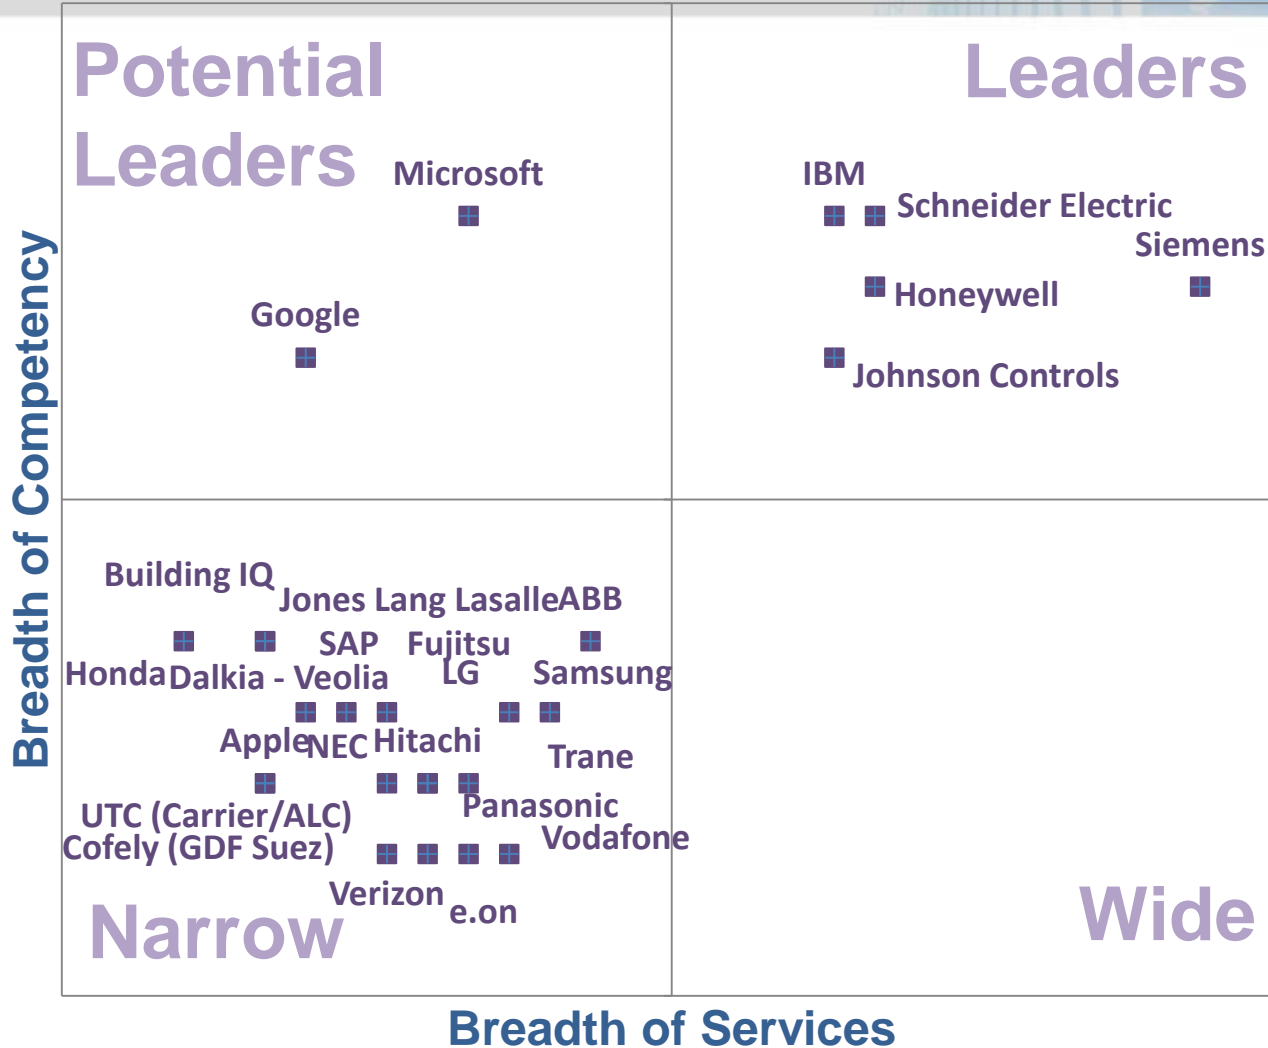

When?

Who is best placed to Lead the 'Smart New World'?

BSL-IC-14-09-08

Smart Reach

More than 75% of Buildings have no Intelligent Controls

ESI-10-14-09-09

1991-2010
15%

1961-1990
44%

Before 1960
41%

150-300 sensors and actuators

Towards the Information-based Building

“How can I manage my buildings to provide a safe, secure, comfortable and productive environment as cost-effectively as possible?”

New Skills Needed

Evolve
