Pagination	27-45
Volume	35
Titre de la revue	Agronomy for Sustainable Development
ISSN	1774-0746
Mots-clés	AdoptionIncentives [4], Common Agricultural Policy [5], Integrated pest management [6], Pesticides [7], Sustainable agriculture [8], Sustainable use directive [9]
Résumé en anglais	<p>Integrated pest management and organic farming are alternatives for sustainable agriculture and less pesticide use in the European Union. All professional users of pesticides in the European Union should follow the general principles of integrated pest management from 2014. States should report to the European Commission on their national action plan for the effective application of those guidelines. The major remaining issues are: 1) when guidelines are not already applied, what incentives would encourage European farmers to adopt those guidelines? 2) How and to what extent should public money be used to promote the adoption of guidelines? Here we review the adoption of integrated pest management in Europe. We deliver a framework to understand the drivers of changes in farmers' pest management practices. This framework also helps to understand farmer reaction to different policy incentives.</p>
